

# CODE OF FEDERAL REGULATIONS

## **Title 26** Internal Revenue

---

### Part 1 (§§ 1.441 to 1.500)

Revised as of April 1, 2017

Containing a codification of documents  
of general applicability and future effect

As of April 1, 2017

Published by the Office of the Federal Register  
National Archives and Records Administration  
as a Special Edition of the Federal Register

## U.S. GOVERNMENT OFFICIAL EDITION NOTICE

### Legal Status and Use of Seals and Logos

The seal of the National Archives and Records Administration (NARA) authenticates the Code of Federal Regulations (CFR) as the official codification of Federal regulations established under the Federal Register Act. Under the provisions of 44 U.S.C. 1507, the contents of the CFR, a special edition of the Federal Register, shall be judicially noticed. The CFR is prima facie evidence of the original documents published in the Federal Register (44 U.S.C. 1510).

It is prohibited to use NARA's official seal and the stylized Code of Federal Regulations logo on any republication of this material without the express, written permission of the Archivist of the United States or the Archivist's designee. Any person using NARA's official seals and logos in a manner inconsistent with the provisions of 36 CFR part 1200 is subject to the penalties specified in 18 U.S.C. 506, 701, and 1017.

### Use of ISBN Prefix

This is the Official U.S. Government edition of this publication and is herein identified to certify its authenticity. Use of the 0-16 ISBN prefix is for U.S. Government Publishing Office Official Editions only. The Superintendent of Documents of the U.S. Government Publishing Office requests that any reprinted edition clearly be labeled as a copy of the authentic work with a new ISBN.

part and section num-  
ber. Thus, 26 CFR  
1.441-0 refers to title 26,  
part 1, section 441-0.*

---

## Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16.....	as of January 1
Title 17 through Title 27.....	as of April 1
Title 28 through Title 41.....	as of July 1
Title 42 through Title 50.....	as of October 1

The appropriate revision date is printed on the cover of each volume.

### LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

### HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, April 1, 2017), consult the "List of CFR Sections Affected (LSA)," which is issued monthly, and the "Cumulative List of Parts Affected," which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

### EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

### OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.

Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

#### PAST PROVISIONS OF THE CODE

Provisions of the Code that are no longer in force and effect as of the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on any given date in the past by using the appropriate List of CFR Sections Affected (LSA). For the convenience of the reader, a “List of CFR Sections Affected” is published at the end of each CFR volume. For changes to the Code prior to the LSA listings at the end of the volume, consult previous annual editions of the LSA. For changes to the Code prior to 2001, consult the List of CFR Sections Affected compilations, published for 1949-1963, 1964-1972, 1973-1985, and 1986-2000.

#### “[RESERVED]” TERMINOLOGY

The term “[Reserved]” is used as a place holder within the Code of Federal Regulations. An agency may add regulatory information at a “[Reserved]” location at any time. Occasionally “[Reserved]” is used editorially to indicate that a portion of the CFR was left vacant and not accidentally dropped due to a printing or computer error.

#### INCORPORATION BY REFERENCE

*What is incorporation by reference?* Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

*What is a proper incorporation by reference?* The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

- (a) The incorporation will substantially reduce the volume of material published in the Federal Register.
- (b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.
- (c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

*What if the material incorporated by reference cannot be found?* If you have any problem locating or obtaining a copy of material listed as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, or call 202-741-6010.

#### CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Authorities and Rules. A list of CFR titles, chapters, subchapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume. The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

#### REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

#### INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency’s name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-741-6000 or write to the Director, Office of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001 or e-mail [fedreg.info@nara.gov](mailto:fedreg.info@nara.gov).

#### SALES

The Government Publishing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call toll-free, 866-512-1800, or DC area, 202-512-1800, M-F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2104, 24 hours a day. For payment by check, write to: US Government Publishing Office – New Orders, P.O. Box 979050, St. Louis, MO 63197-9000.

#### ELECTRONIC SERVICES

The full text of the Code of Federal Regulations, the LSA (List of CFR Sections Affected), The United States Government Manual, the Federal Register, Public Laws, Public Papers of the Presidents of the United States, Compilation of Presidential Documents and the Privacy Act Compilation are available in electronic format via [www.ofr.gov](http://www.ofr.gov). For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800, or 866-512-1800 (toll-free). E-mail, [ContactCenter@gpo.gov](mailto:ContactCenter@gpo.gov).

The Office of the Federal Register also offers a free service on the National Archives and Records Administration’s (NARA) World Wide Web site for public law numbers, Federal Register finding aids, and related information. Connect to NARA’s web site at [www.archives.gov/federal-register](http://www.archives.gov/federal-register).

The e-CFR is a regularly updated, unofficial editorial compilation of CFR material and Federal Register amendments, produced by the Office of the Federal Register and the Government Publishing Office. It is available at [www.ecfr.gov](http://www.ecfr.gov).

## THIS TITLE

Title 26—INTERNAL REVENUE is composed of twenty-two volumes. The contents of these volumes represent all current regulations issued by the Internal Revenue Service, Department of the Treasury, as of April 1, 2017. The first fifteen volumes comprise part 1 (Subchapter A—Income Tax) and are arranged by sections as follows: §§ 1.0–1.60; §§ 1.61–1.139; §§ 1.140–1.169; §§ 1.170–1.300; §§ 1.301–1.400; §§ 1.401–1.409; §§ 1.410–1.440; §§ 1.441–1.500; §§ 1.501–1.640; §§ 1.641–1.850; §§ 1.851–1.907; §§ 1.908–1.1000; §§ 1.1001–1.1400; §§ 1.1401–1.1550; and § 1.1551 to end of part 1. The sixteenth volume containing parts 2–29, includes the remainder of subchapter A and all of Subchapter B—Estate and Gift Taxes. The last six volumes contain parts 30–39 (Subchapter C—Employment Taxes and Collection of Income Tax at Source); parts 40–49; parts 50–299 (Subchapter D—Miscellaneous Excise Taxes); parts 300–499 (Subchapter F—Procedure and Administration); parts 500–599 (Subchapter G—Regulations under Tax Conventions); and part 600 to end (Subchapter H—Internal Revenue Practice).

The OMB control numbers for Title 26 appear in § 602.101 of this chapter. For the convenience of the user, § 602.101 appears in the Finding Aids section of the volumes containing parts 1 to 599.

For this volume, Michele Bugenhagen was Chief Editor. The Code of Federal Regulations publication program is under the direction of John Hyrum Martinez, assisted by Stephen J. Frattini.

#### ACCOUNTING PERIODS AND METHODS OF ACCOUNTING

##### ACCOUNTING PERIODS

###### Sec.

- 1.441-0 Table of contents.
- 1.441-1 Period for computation of taxable income.
- 1.441-2 Election of taxable year consisting of 52-53 weeks.
- 1.441-3 Taxable year of a personal service corporation.
- 1.441-4 Effective date.
- 1.442-1 Change of annual accounting period.
- 1.443-1 Returns for periods of less than 12 months.
- 1.444-0T Table of contents (temporary).
- 1.444-1T Election to use a taxable year other than the required taxable year (temporary).
- 1.444-2T Tiered structure (temporary).
- 1.444-3T Manner and time of making section 444 election (temporary).
- 1.444-4 Tiered structure.

##### METHODS OF ACCOUNTING

###### METHODS OF ACCOUNTING IN GENERAL

- 1.446-1 General rule for methods of accounting.
- 1.446-2 Method of accounting for interest.
- 1.446-3 Notional principal contracts.
- 1.446-3T Notional principal contracts (temporary).
- 1.446-4 Hedging transactions.
- 1.446-5 Debt issuance costs.
- 1.446-6 REMIC inducement fees.
- 1.446-7 Net asset value method for certain money market fund shares.
- 1.448-1 Limitation on the use of the cash receipts and disbursements method of accounting.
- 1.448-1T Limitation on the use of the cash receipts and disbursements method of accounting (temporary).
- 1.448-2 Nonaccrual of certain amounts by service providers.

###### TAXABLE YEAR FOR WHICH ITEMS OF GROSS INCOME INCLUDED

- 1.451-1 General rule for taxable year of inclusion.
- 1.451-2 Constructive receipt of income.
- 1.451-4 Accounting for redemption of trading stamps and coupons.

- 1.451-5 Advance payments for goods and long-term contracts.
- 1.451-6 Election to include crop insurance proceeds in gross income in the taxable year following the taxable year of destruction or damage.
- 1.451-7 Election relating to livestock sold on account of drought.
- 1.453-1—1.453-2 [Reserved]
- 1.453-3 Purchaser evidences of indebtedness payable on demand or readily tradable.
- 1.453-4 Sale of real property involving deferred periodic payments.
- 1.453-5 Sale of real property treated on installment method.
- 1.453-6 Deferred payment sale of real property not on installment method.
- 1.453-7—1.453-8 [Reserved]
- 1.453-9 Gain or loss on disposition of installment obligations.
- 1.453-10 Effective date.
- 1.453-11 Installment obligations received from a liquidating corporation.
- 1.453-12 Allocation of unrecaptured section 1250 gain reported on the installment method.
- 1.453A-0 Table of contents.
- 1.453A-1 Installment method of reporting income by dealers on personal property.
- 1.453A-2 Treatment of revolving credit plans; taxable years beginning on or before December 31, 1986.
- 1.453A-3 Requirements for adoption of or change to installment method by dealers in personal property.
- 1.454-1 Obligations issued at discount.
- 1.455-1 Treatment of prepaid subscription income.
- 1.455-2 Scope of election under section 455.
- 1.455-3 Method of allocation.
- 1.455-4 Cessation of taxpayer's liability.
- 1.455-5 Definitions and other rules.
- 1.455-6 Time and manner of making election.
- 1.456-1 Treatment of prepaid dues income.
- 1.456-2 Scope of election under section 456.
- 1.456-3 Method of allocation.
- 1.456-4 Cessation of liability or existence.
- 1.456-5 Definitions and other rules.
- 1.456-6 Time and manner of making election.
- 1.456-7 Transitional rule.
- 1.457-1 General overviews of section 457.
- 1.457-2 Definitions.
- 1.457-3 General introduction to eligible plans.
- 1.457-4 Annual deferrals, deferral limitations, and deferral agreements under eligible plans.
- 1.457-5 Individual limitation for combined annual deferrals under multiple eligible plans.

- 1.457-6 Timing of distributions under eligible plans.
  - 1.457-7 Taxation of Distribution Under Eligible Plans.
  - 1.457-8 Funding rules for eligible plans.
  - 1.457-9 Effect on eligible plans when not administered in accordance with eligibility requirements.
  - 1.457-10 Miscellaneous provisions.
  - 1.457-11 Tax treatment of participants if plan is not an eligible plan.
  - 1.457-12 Effective dates.
  - 1.458-1 Exclusion for certain returned magazines, paperbacks, or records.
  - 1.458-2 Manner of and time for making election.
  - 1.460-0 Outline of regulations under section 460.
  - 1.460-1 Long-term contracts.
  - 1.460-2 Long-term manufacturing contracts.
  - 1.460-3 Long-term construction contracts.
  - 1.460-4 Methods of accounting for long-term contracts.
  - 1.460-5 Cost allocation rules.
  - 1.460-6 Look-back method.
- TAXABLE YEAR FOR WHICH DEDUCTIONS TAKEN
- 1.461-0 Table of contents.
  - 1.461-1 General rule for taxable year of deduction.
  - 1.461-2 Contested liabilities.
  - 1.461-3 Prepaid interest. [Reserved]
  - 1.461-4 Economic performance.
  - 1.461-5 Recurring item exception.
  - 1.461-6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.
  - 1.465-1T Aggregation of certain activities (temporary).
  - 1.465-8 General rules; interest other than that of a creditor.
  - 1.465-20 Treatment of amounts borrowed from certain persons and amounts protected against loss.
  - 1.465-27 Qualified nonrecourse financing.
  - 1.466-1 Method of accounting for the redemption cost of qualified discount coupons.
  - 1.466-2 Special protective election for certain taxpayers.
  - 1.466-3 Manner of and time for making election under section 466.
  - 1.466-4 Manner of and time for making election under section 373(c) of the Revenue Act of 1978.
  - 1.467-0 Table of contents.
  - 1.467-1 Treatment of lessors and lessees generally.
  - 1.467-2 Rent accrual for section 467 rental agreements without adequate interest.
  - 1.467-3 Disqualified leasebacks and long-term agreements.
  - 1.467-4 Section 467 loan.
  - 1.467-5 Section 467 rental agreements with variable interest.
  - 1.467-6 Section 467 rental agreements with contingent payments. [Reserved]
  - 1.467-7 Section 467 recapture and other rules relating to dispositions and modifications.
  - 1.467-8 Automatic consent to change to constant rental accrual for certain rental agreements.
  - 1.467-9 Effective/applicability dates and automatic method changes for certain agreements.
  - 1.468A-0 Nuclear decommissioning costs; table of contents.
  - 1.468A-1 Nuclear decommissioning costs; general rules.
  - 1.468A-2 Treatment of electing taxpayer.
  - 1.468A-3 Ruling amount.
  - 1.468A-4 Treatment of nuclear decommissioning fund.
  - 1.468A-5 Nuclear decommissioning fund qualification requirements; prohibitions against self-dealing; disqualification of nuclear decommissioning fund; termination of fund upon substantial completion of decommissioning.
  - 1.468A-6 Disposition of an interest in a nuclear power plant.
  - 1.468A-7 Manner of and time for making election.
  - 1.468A-8 Special transfers to qualified funds pursuant to section 468A(f).
  - 1.468A-9 Effective/applicability date.
  - 1.468B Designated settlement funds.
  - 1.468B-0 Table of contents.
  - 1.468B-1 Qualified settlement funds.
  - 1.468B-2 Taxation of qualified settlement funds and related administrative requirements.
  - 1.468B-3 Rules applicable to the transferor.
  - 1.468B-4 Taxability of distributions to claimants.
  - 1.468B-5 Effective dates and transition rules applicable to qualified settlement funds.
  - 1.468B-6 Escrow accounts, trusts, and other funds used during deferred exchanges of like-kind property under section 1031(a)(3).
  - 1.468B-7 Pre-closing escrows.
  - 1.468B-8 Contingent-at-closing escrows. [Reserved]
  - 1.468B-9 Disputed ownership funds.
  - 1.469-0 Table of contents.
  - 1.469-1 General rules.
  - 1.469-1T General rules (temporary).
  - 1.469-2 Passive activity loss.
  - 1.469-2T Passive activity loss (temporary).
  - 1.469-3 Passive activity credit.
  - 1.469-3T Passive activity credit (temporary).
  - 1.469-4 Definition of activity.
  - 1.469-4T Definition of activity (temporary).
  - 1.469-5 Material participation.
  - 1.469-5T Material participation (temporary).
  - 1.469-6 Treatment of losses upon certain dispositions. [Reserved]
  - 1.469-7 Treatment of self-charged items of interest income and deduction.

## Internal Revenue Service, Treasury

Pt. 1

- 1.469-8 Application of section 469 to trust, estates, and their beneficiaries. [Reserved]
- 1.469-9 Rules for certain rental real estate activities.
- 1.469-10 Application of section 469 to publicly traded partnerships.
- 1.469-11 Effective date and transition rules.

### INVENTORIES

- 1.471-1 Need for inventories.
- 1.471-2 Valuation of inventories.
- 1.471-3 Inventories at cost.
- 1.471-4 Inventories at cost or market, whichever is lower.
- 1.471-5 Inventories by dealers in securities.
- 1.471-6 Inventories of livestock raisers and other farmers.
- 1.471-7 Inventories of miners and manufacturers.
- 1.471-8 Inventories of retail merchants.
- 1.471-9 Inventories of acquiring corporations.
- 1.471-10 Applicability of long-term contract methods.
- 1.471-11 Inventories of manufacturers.
- 1.472-1 Last-in, first-out inventories.
- 1.472-2 Requirements incident to adoption and use of LIFO inventory method.
- 1.472-3 Time and manner of making election.
- 1.472-4 Adjustments to be made by taxpayer.
- 1.472-5 Revocation of election.
- 1.472-6 Change from LIFO inventory method.
- 1.472-7 Inventories of acquiring corporations.
- 1.472-8 Dollar-value method of pricing LIFO inventories.
- 1.475-0 Table of contents.
- 1.475(a)-1—1.475(a)-2 [Reserved]
- 1.475(a)-3 Acquisition by a dealer of a security with a substituted basis.
- 1.475(a)-4 Valuation safe harbor.
- 1.475(b)-1 Scope of exemptions from market-to-market requirement.
- 1.475(b)-2 Exemptions—identification requirements.
- 1.475(b)-3 [Reserved]
- 1.475(b)-4 Exemptions—transitional issues.
- 1.475(c)-1 Definitions—dealer in securities.
- 1.475(c)-2 Definitions—security.
- 1.475(d)-1 Character of gain or loss.
- 1.475(g)-1 Effective dates.

### ADJUSTMENTS

- 1.481-1 Adjustments in general.
- 1.481-2 Limitation on tax.
- 1.481-3 Adjustments attributable to pre-1954 years where change was not initiated by taxpayer.
- 1.481-4 Adjustments taken into account with consent.
- 1.481-5 Effective dates.
- 1.482-0 Outline of regulations under section 482.

- 1.482-1 Allocation of income and deductions among taxpayers.
- 1.482-1T Allocation of income and deductions among taxpayers (temporary).
- 1.482-2 Determination of taxable income in specific situations.
- 1.482-3 Methods to determine taxable income in connection with a transfer of tangible property.
- 1.482-4 Methods to determine taxable income in connection with a transfer of intangible property.
- 1.482-5 Comparable profits method.
- 1.482-6 Profit split method.
- 1.482-7 Methods to determine taxable income in connection with a cost sharing arrangement.
- 1.482-8 Examples of the best method rule.
- 1.482-9 Methods to determine taxable income in connection with a controlled services transaction.
- 1.483-1 Interest on certain deferred payments.
- 1.483-2 Unstated interest.
- 1.483-3 Test rate of interest applicable to a contract.
- 1.483-4 Contingent payments.

### REGULATIONS APPLICABLE FOR TAXABLE YEARS BEGINNING ON OR BEFORE APRIL 21, 1993

- 1.482-1A Allocation of income and deductions among taxpayers.
- 1.482-2A Determination of taxable income in specific situations.
- 1.482-7A Methods to determine taxable income in connection with a cost sharing arrangement.
- 1.484-1.500 [Reserved]

### § 1.441-4 Effective date

[T.D. 8996, 67 FR 35012, May 17, 2002]

### § 1.441-1 Period for computation of taxable income.

(a) *Computation of taxable income*—(1) *In general.* Taxable income must be computed and a return must be made for a period known as the taxable year. For rules relating to methods of accounting, the taxable year for which items of gross income are included and deductions are taken, inventories, and adjustments, see parts II and III (section 446 and following), subchapter E, chapter 1 of the Internal Revenue Code, and the regulations thereunder.

(2) *Length of taxable year.* Except as otherwise provided in the Internal Revenue Code and the regulations thereunder (e.g., § 1.441-2 regarding 52-53-week taxable years), a taxable year may not cover a period of more than 12 calendar months.

(b) *General rules and definitions.* The general rules and definitions in this paragraph (b) apply for purposes of sections 441 and 442 and the regulations thereunder.

(1) *Taxable year.* *Taxable year* means—

(i) The period for which a return is made, if a return is made for a period

of less than 12 months (short period). See section 443 and the regulations thereunder;

(ii) Except as provided in paragraph (b)(1)(i) of this section, the taxpayer's required taxable year (as defined in paragraph (b)(2) of this section), if applicable;

(iii) Except as provided in paragraphs (b)(1)(i) and (ii) of this section, the taxpayer's annual accounting period (as defined in paragraph (b)(3) of this section), if it is a calendar year or a fiscal year; or

(iv) Except as provided in paragraphs (b)(1)(i) and (ii) of this section, the calendar year, if the taxpayer keeps no books, does not have an annual accounting period, or has an annual accounting period that does not qualify as a fiscal year.

(2) *Required taxable year*—(i) *In general.* Certain taxpayers must use the particular taxable year that is required under the Internal Revenue Code and the regulations thereunder (the required taxable year). For example, the required taxable year is—

(A) In the case of a foreign sales corporation or domestic international sales corporation, the taxable year determined under section 441(h) and § 1.921-1T(a)(11), (b)(4), and (b)(6);

(B) In the case of a personal service corporation (PSC), the taxable year determined under section 441(i) and § 1.441-3;

(C) In the case of a nuclear decommissioning fund, the taxable year determined under § 1.468A-4(c)(1);

(D) In the case of a designated settlement fund or a qualified settlement fund, the taxable year determined under § 1.468B-2(j);

(E) In the case of a common trust fund, the taxable year determined under section 584(i);

(F) In the case of certain trusts, the taxable year determined under section 644;

(G) In the case of a partnership, the taxable year determined under section 706 and § 1.706-1;

(H) In the case of an insurance company, the taxable year determined under section 843 and § 1.1502-76(a)(2);

(I) In the case of a real estate investment trust, the taxable year determined under section 859;

**Internal Revenue Service, Treasury**

**§ 1.441-1**

(J) In the case of a real estate mortgage investment conduit, the taxable year determined under section 860D(a)(5) and § 1.860D-1(b)(6);

(K) In the case of a specified foreign corporation, the taxable year determined under section 898(c)(1)(A);

(L) In the case of an S corporation, the taxable year determined under section 1378 and § 1.1378-1; or

(M) In the case of a member of an affiliated group that makes a consolidated return, the taxable year determined under § 1.1502-76.

(ii) *Exceptions.* Notwithstanding paragraph (b)(2)(i) of this section, the following taxpayers may have a taxable year other than their required taxable year:

(A) *52-53-week taxable years.* Certain taxpayers may elect to use a 52-53-week taxable year that ends with reference to their required taxable year. See, for example, §§ 1.441-3 (PSCs), 1.706-1 (partnerships), 1.1378-1 (S corporations), and 1.1502-76(a)(1) (members of a consolidated group).

(B) *Partnerships, S corporations, and PSCs.* A partnership, S corporation, or PSC may use a taxable year other than its required taxable year if the taxpayer elects to use a taxable year other than its required taxable year under section 444, elects a 52-53-week taxable year that ends with reference to its required taxable year as provided in paragraph (b)(2)(ii)(A) of this section or to a taxable year elected under section 444, or establishes a business purpose to the satisfaction of the Commissioner under section 442 (such as a grandfathered fiscal year).

(C) *Specified foreign corporations.* A specified foreign corporation (as defined in section 898(b)) may use a taxable year other than its required taxable year if it elects a 52-53-week taxable year that ends with reference to its required taxable year as provided in paragraph (b)(2)(ii)(A) of this section or makes a one-month deferral election under section 898(c)(1)(B).

(3) *Annual accounting period.* *Annual accounting period* means the annual period (calendar year or fiscal year) on the basis of which the taxpayer regularly computes its income in keeping its books.

(4) *Calendar year.* *Calendar year* means a period of 12 consecutive months ending on December 31. A taxpayer who has not established a fiscal year must make its return on the basis of a calendar year.

(5) *Fiscal year—(i) Definition.* *Fiscal year* means—

(A) A period of 12 consecutive months ending on the last day of any month other than December; or

(B) A 52-53-week taxable year, if such period has been elected by the taxpayer. See § 1.441-2.

(ii) *Recognition.* A fiscal year will be recognized only if the books of the taxpayer are kept in accordance with such fiscal year.

(6) *Grandfathered fiscal year.* *Grandfathered fiscal year* means a fiscal year (other than a year that resulted in a three month or less deferral of income) that a partnership or an S corporation received permission to use on or after July 1, 1974, by a letter ruling (i.e., not by automatic approval).

(7) *Books.* *Books* include the taxpayer's regular books of account and such other records and data as may be necessary to support the entries on the taxpayer's books and on the taxpayer's return, as for example, a reconciliation of any difference between such books and the taxpayer's return. Records that are sufficient to reflect income adequately and clearly on the basis of an annual accounting period will be regarded as the keeping of books. See section 6001 and the regulations thereunder for rules relating to the keeping of books and records.

(8) *Taxpayer.* *Taxpayer* has the same meaning as the term *person* as defined in section 7701(a)(1) (e.g., an individual, trust, estate, partnership, association, or corporation) rather than the meaning of the term *taxpayer* as defined in section 7701(a)(14) (any person subject to tax).

(c) *Adoption of taxable year—(1) In general.* Except as provided in paragraph (c)(2) of this section, a new taxpayer may adopt any taxable year that satisfies the requirements of section 441 and the regulations thereunder

without the approval of the Commissioner. A taxable year of a new taxpayer is adopted by filing its first Federal income tax return using that taxable year. The filing of an application for automatic extension of time to file a Federal income tax return (e.g., Form 7004, "Application for Automatic Extension of Time to File Corporation Income Tax Return"), the filing of an application for an employer identification number (i.e., Form SS-4, "Application for Employer Identification Number"), or the payment of estimated taxes, for a particular taxable year do not constitute an adoption of that taxable year.

(2) *Approval required*—(i) *Taxpayers with required taxable years.* A newly-formed partnership, S corporation, or PSC that wants to adopt a taxable year other than its required taxable year, a taxable year elected under section 444, or a 52-53-week taxable year that ends with reference to its required taxable year or a taxable year elected under section 444 must establish a business purpose and obtain the approval of the Commissioner under section 442.

(ii) *Taxpayers without books.* A taxpayer that must use a calendar year under section 441(g) and paragraph (f) of this section may not adopt a fiscal year without obtaining the approval of the Commissioner.

(d) *Retention of taxable year.* In certain cases, a partnership, S corporation, electing S corporation, or PSC will be required to change its taxable year unless it obtains the approval of the Commissioner under section 442, or makes an election under section 444, to retain its current taxable year. For example, a corporation using a June 30 fiscal year that either becomes a PSC or elects to be an S corporation and, as a result, is required to use the calendar year under section 441(i) or 1378, respectively, must obtain the approval of the Commissioner to retain its current fiscal year. Similarly, a partnership using a taxable year that corresponds to its required taxable year must obtain the approval of the Commissioner to retain such taxable year if its required taxable year changes as a result of a change in ownership. However, a partnership that previously established a business purpose to the satisfaction of

the Commissioner to use a taxable year is not required to obtain the approval of the Commissioner if its required taxable year changes as a result of a change in ownership.

(e) *Change of taxable year.* Once a taxpayer has adopted a taxable year, such taxable year must be used in computing taxable income and making returns for all subsequent years unless the taxpayer obtains approval from the Commissioner to make a change or the taxpayer is otherwise authorized to change without the approval of the Commissioner under the Internal Revenue Code (e.g., section 444 or 859) or the regulations thereunder.

(f) *Obtaining approval of the Commissioner or making a section 444 election.* See § 1.442-1(b) for procedures for obtaining approval of the Commissioner (automatically or otherwise) to adopt, change, or retain an annual accounting period. See §§ 1.444-1T and 1.444-2T for qualifications, and 1.444-3T for procedures, for making an election under section 444.

[T.D. 8996, 67 FR 35012, May 17, 2002]

**§ 1.441-2 Election of taxable year consisting of 52-53 weeks.**

(a) *In general*—(1) *Election.* An eligible taxpayer may elect to compute its taxable income on the basis of a fiscal year that—

- (i) Varies from 52 to 53 weeks;
- (ii) Ends always on the same day of the week; and
- (iii) Ends always on—

(A) Whatever date this same day of the week last occurs in a calendar month; or

(B) Whatever date this same day of the week falls that is the nearest to the last day of the calendar month.

(2) *Effect.* In the case of a taxable year described in paragraph (a)(1)(iii)(A) of this section, the year will always end within the month and may end on the last day of the month, or as many as six days before the end of the month. In the case of a taxable year described in paragraph (a)(1)(iii)(B) of this section, the year may end on the last day of the month, or as many as three days before or three days after the last day of the month.

(3) *Eligible taxpayer.* A taxpayer is eligible to elect a 52-53-week taxable year if such fiscal year would otherwise satisfy the requirements of section 441 and the regulations thereunder. For example, a taxpayer that is required to use a calendar year under §1.441-1(b)(2)(i)(D) is not an eligible taxpayer.

(4) *Example.* The provisions of this paragraph (a) are illustrated by the following example:

*Example.* If the taxpayer elects a taxable year ending always on the last Saturday in November, then for the year 2001, the taxable year would end on November 24, 2001. On the other hand, if the taxpayer had elected a taxable year ending always on the Saturday nearest to the end of November, then for the year 2001, the taxable year would end on December 1, 2001.

(b) *Procedures to elect a 52-53-week taxable year—(1) Adoption of a 52-53-week taxable year—(i) In general.* A new eligible taxpayer elects a 52-53-week taxable year by adopting such year in accordance with §1.441-1(c). A newly-formed partnership, S corporation or personal service corporation (PSC) may adopt a 52-53-week taxable year without the approval of the Commissioner if such year ends with reference to either the taxpayer's required taxable year (as defined in §1.441-1(b)(2)) or the taxable year elected under section 444. See §§1.441-3, 1.706-1, and 1.1378-1. Similarly, a newly-formed specified foreign corporation (as defined in section 898(b)) may adopt a 52-53-week taxable year if such year ends with reference to the taxpayer's required taxable year, or, if the one-month deferral election under section 898(c)(1)(B) is made, with reference to the month immediately preceding the required taxable year. See §1.1502-76(a)(1) for special rules regarding subsidiaries adopting 52-53-week taxable years.

(ii) *Filing requirement.* A taxpayer adopting a 52-53-week taxable year must file with its Federal income tax return for its first taxable year a statement containing the following information—

(A) The calendar month with reference to which the 52-53-week taxable year ends;

(B) The day of the week on which the 52-53-week taxable year always will end; and

(C) Whether the 52-53-week taxable year will always end on the date on which that day of the week last occurs in the calendar month, or on the date on which that day of the week falls that is nearest to the last day of that calendar month.

(2) *Change to (or from) a 52-53-week taxable year—(i) In general.* An election of a 52-53-week taxable year by an existing eligible taxpayer with an established taxable year is treated as a change in annual accounting period that requires the approval of the Commissioner in accordance with §1.442-1. Thus, a taxpayer must obtain approval to change from its current taxable year to a 52-53-week taxable year, even if such 52-53-week taxable year ends with reference to the same calendar month. Similarly, a taxpayer must obtain approval to change from a 52-53-week taxable year, or to change from one 52-53-week taxable year to another 52-53-week taxable year. However, a taxpayer may obtain approval for 52-53-week taxable year changes automatically to the extent provided in administrative procedures published by the Commissioner. See §1.442-1(b) for procedures for obtaining such approval.

(ii) *Special rules for the short period required to effect the change.* If a change to or from a 52-53-week taxable year results in a short period (within the meaning of §1.443-1(a)) of 359 days or more, or six days or less, the tax computation under §1.443-1(b) does not apply. If the short period is 359 days or more, it is treated as a full taxable year. If the short period is six days or less, such short period is not a separate taxable year but instead is added to and deemed a part of the following taxable year. (In the case of a change to or from a 52-53-week taxable year not involving a change of the month with reference to which the taxable year ends, the tax computation under §1.443-1(b) does not apply because the short period will always be 359 days or more, or six days or less.) In the case of a short period which is more than six days and less than 359 days, taxable income for the short period is placed on an annual

basis for purposes of § 1.443-1(b) by multiplying such income by 365 and dividing the result by the number of days in the short period. In such case, the tax for the short period is the same part of the tax computed on such income placed on an annual basis as the number of days in the short period is of 365 days (unless § 1.443-1(b)(2), relating to the alternative tax computation, applies). For an adjustment in deduction for personal exemption, see § 1.443-1(b)(1)(v).

(3) *Examples.* The following examples illustrate paragraph (b)(2)(ii) of this section:

*Example 1.* A taxpayer having a fiscal year ending April 30, obtains approval to change to a 52-53-week taxable year ending the last Saturday in April for taxable years beginning after April 30, 2001. This change involves a short period of 362 days, from May 1, 2001, to April 27, 2002, inclusive. Because the change results in a short period of 359 days or more, it is not placed on an annual basis and is treated as a full taxable year.

*Example 2.* Assume the same conditions as *Example 1*, except that the taxpayer changes for taxable years beginning after April 30, 2002, to a taxable year ending on the Thursday nearest to April 30. This change results in a short period of two days, May 1 to May 2, 2002. Because the short period is less than seven days, tax is not separately computed. This short period is added to and deemed part of the following 52-53-week taxable year, which would otherwise begin on May 3, 2002, and end on May 1, 2003.

(c) *Application of effective dates—(1) In general.* Except as provided in paragraph (c)(3) of this section, for purposes of determining the effective date (*e.g.*, of legislative, regulatory, or administrative changes) or the applicability of any provision of the internal revenue laws that is expressed in terms of taxable years beginning, including, or ending with reference to the first or last day of a specified calendar month, a 52-53-week taxable year is deemed to begin on the first day of the calendar month nearest to the first day of the 52-53-week taxable year, and is deemed to end or close on the last day of the calendar month nearest to the last day of the 52-53-week taxable year, as the case may be. Examples of provisions of this title, the applicability of which is expressed in terms referred to in the preceding sentence, include the provisions relating to the time for filing re-

turns and other documents, paying tax, or performing other acts, and the provisions of part II, subchapter B, chapter 6 (section 1561 and following) relating to surtax exemptions of certain controlled corporations.

(2) *Examples.* The provisions of paragraph (c)(1) of this section may be illustrated by the following examples:

*Example 1.* Assume that an income tax provision is applicable to taxable years beginning on or after January 1, 2001. For that purpose, a 52-53-week taxable year beginning on any day within the period December 26, 2000, to January 4, 2001, inclusive, is treated as beginning on January 1, 2001.

*Example 2.* Assume that an income tax provision requires that a return must be filed on or before the 15th day of the third month following the close of the taxable year. For that purpose, a 52-53-week taxable year ending on any day during the period May 25 to June 3, inclusive, is treated as ending on May 31, the last day of the month ending nearest to the last day of the taxable year, and the return, therefore, must be made on or before August 15.

*Example 3.* Assume that a revenue procedure requires the performance of an act by the taxpayer within “the first 90 days of the taxable year,” by “the 75th day of the taxable year,” or, alternately, by “the last day of the taxable year.” The taxpayer employs a 52-53-week taxable year that ends always on the Saturday closest to the last day of December. These requirements are not expressed in terms of taxable years beginning, including, or ending with reference to the first or last day of a specified calendar month, and are accordingly outside the scope of the rule stated in § 1.441-2(c)(1). Accordingly, the taxpayer must perform the required act by the 90th, 75th, or last day, respectively, of its taxable year.

*Example 4.* X, a corporation created on January 1, 2001, elects a 52-53-week taxable year ending on the Friday nearest the end of December. Thus, X’s first taxable year begins on Monday, January 1, 2001, and ends on Friday, December 28, 2001; its next taxable year begins on Saturday, December 29, 2001, and ends on Friday, January 3, 2003; and its next taxable year begins on Saturday, January 4, 2003, and ends on Friday, January 2, 2004. For purposes of applying the provisions of part II, subchapter B, chapter 6 of the Internal Revenue Code, X’s first taxable year is deemed to end on December 31, 2001; its next taxable year is deemed to begin on January 1, 2002, and end on December 31, 2002, and its next taxable year is deemed to begin on January 1, 2003, and end on December 31, 2003. Accordingly, each such taxable year is treated as including one and only one December 31st.

(3) *Changes in tax rates.* If a change in the rate of tax is effective during a 52-53-week taxable year (other than on the first day of such year as determined under paragraph (c)(1) of this section), the tax for the 52-53-week taxable year must be computed in accordance with section 15, relating to effect of changes, and the regulations thereunder. For the purpose of the computation under section 15, the determination of the number of days in the period before the change, and in the period on and after the change, is to be made without regard to the provisions of paragraph (b)(1) of this paragraph.

(4) *Examples.* The provisions of paragraph (c)(3) of this section may be illustrated by the following examples:

*Example 1.* Assume a change in the rate of tax is effective for taxable years beginning after June 30, 2002. For a 52-53-week taxable year beginning on Friday, November 2, 2001, the tax must be computed on the basis of the old rates for the actual number of days from November 2, 2001, to June 30, 2002, inclusive, and on the basis of the new rates for the actual number of days from July 1, 2002, to Thursday, October 31, 2002, inclusive.

*Example 2.* Assume a change in the rate of tax is effective for taxable years beginning after June 30, 2001. For this purpose, a 52-53-week taxable year beginning on any of the days from June 25 to July 4, inclusive, is treated as beginning on July 1. Therefore, no computation under section 15 will be required for such year because of the change in rate.

(d) *Computation of taxable income.* The principles of section 451, relating to the taxable year for inclusion of items of gross income, and section 461, relating to the taxable year for taking deductions, generally are applicable to 52-53-week taxable years. Thus, except as otherwise provided, all items of income and deduction must be determined on the basis of a 52-53-week taxable year. However, a taxpayer may determine particular items as though the 52-53-week taxable year were a taxable year consisting of 12 calendar months, provided that practice is consistently followed by the taxpayer and clearly reflects income. For example, an allowance for depreciation or amortization may be determined on the basis of a 52-53-week taxable year, or as though the 52-53-week taxable year is a taxable year consisting of 12 calendar months,

provided the taxpayer consistently follows that practice with respect to all depreciable or amortizable items.

(e) *Treatment of taxable years ending with reference to the same calendar month—(1) Pass-through entities.* If a pass-through entity (as defined in paragraph (e)(3)(i) of this section) or an owner of a pass-through entity (as defined in paragraph (e)(3)(ii) of this section), or both, use a 52-53-week taxable year and the taxable year of the pass-through entity and the owner end with reference to the same calendar month, then, for purposes of determining the taxable year in which items of income, gain, loss, deductions, or credits from the pass-through entity are taken into account by the owner of the pass-through, the owner's taxable year will be deemed to end on the last day of the pass-through's taxable year. Thus, if the taxable year of a partnership and a partner end with reference to the same calendar month, then for purposes of determining the taxable year in which that partner takes into account items described in section 702 and items that are deductible by the partnership (including items described in section 707(c)) and includible in the income of that partner, that partner's taxable year will be deemed to end on the last day of the partnership's taxable year. Similarly, if the taxable year of an S corporation and a shareholder end with reference to the same calendar month, then for purposes of determining the taxable year in which that shareholder takes into account items described in section 1366(a) and items that are deductible by the S corporation and includible in the income of that shareholder, that shareholder's taxable year will be deemed to end on the last day of the S corporation's taxable year.

(2) *Personal service corporations and employee-owners.* If the taxable year of a PSC (within the meaning of §1.441-3(c)) and an employee-owner (within the meaning of §1.441-3(g)) end with reference to the same calendar month, then for purposes of determining the taxable year in which an employee-owner takes into account items that are deductible by the PSC and includible in the income of the employee-owner, the employee-owner's taxable

year will be deemed to end on the last day of the PSC's taxable year.

(3) *Definitions*—(i) *Pass-through entity*. For purposes of this section, a pass-through entity means a partnership, S corporation, trust, estate, closely-held real estate investment trust (within the meaning of section 6655(e)(5)(B)), common trust fund (within the meaning of section 584(i)), controlled foreign corporation (within the meaning of section 957), foreign personal holding company (within the meaning of section 552), or passive foreign investment company that is a qualified electing fund (within the meaning of section 1295).

(ii) *Owner of a pass-through entity*. For purposes of this section, an owner of a pass-through entity generally means a taxpayer that owns an interest in, or stock of, a pass-through entity. For example, an owner of a pass-through entity includes a partner in a partnership, a shareholder of an S corporation, a beneficiary of a trust or an estate, an owner of a closely-held real estate investment trust (within the meaning of section 6655(e)(5)(A)), a participant in a common trust fund, a U.S. shareholder (as defined in section 951(b)) of a controlled foreign corporation, a U.S. shareholder (as defined in section 551(a)) of a foreign personal holding company, or a U.S. person that holds stock in a passive foreign investment company that is a qualified electing fund with respect to that shareholder.

(4) *Examples*. The provisions of paragraph (e)(2) of this section may be illustrated by the following examples:

*Example 1.* ABC Partnership uses a 52-53-week taxable year that ends on the Wednesday nearest to December 31, and its partners, A, B, and C, are individual calendar year taxpayers. Assume that, for ABC's taxable year ending January 3, 2001, each partner's distributive share of ABC's taxable income is \$10,000. Under section 706(a) and paragraph (e)(1) of this section, for the taxable year ending December 31, 2000, A, B, and C each must include \$10,000 in income with respect to the ABC year ending January 3, 2001. Similarly, if ABC makes a guaranteed payment to A on January 2, 2001, A must include the payment in income for A's taxable year ending December 31, 2000.

*Example 2.* X, a PSC, uses a 52-53-week taxable year that ends on the Wednesday nearest to December 31, and all of the employee-

owners of X are individual calendar year taxpayers. Assume that, for its taxable year ending January 3, 2001, X pays a bonus of \$10,000 to each employee-owner on January 2, 2001. Under paragraph (e)(2) of this section, each employee-owner must include its bonus in income for the taxable year ending December 31, 2000.

(5) *Transition rule*. In the case of an owner of a pass-through entity (other than the owner of a partnership or S corporation) that is required by this paragraph (e) to include in income for its first taxable year ending on or after May 17, 2002 amounts attributable to two taxable years of a pass-through entity, the amount that otherwise would be required to be included in income for such first taxable year by reason of this paragraph (e) should be included in income ratably over the four-taxable-year period beginning with such first taxable year under principles similar to § 1.702-3T, unless the owner of the pass-through entity elects to include all such income in its first taxable year ending on or after May 17, 2002.

[T.D. 8996, 67 FR 35012, May 17, 2002]

#### § 1.441-3 Taxable year of a personal service corporation.

(a) *Taxable year*—(1) *Required taxable year*. Except as provided in paragraph (a)(2) of this section, the taxable year of a personal service corporation (PSC) (as defined in paragraph (c) of this section) must be the calendar year.

(2) *Exceptions*. A PSC may have a taxable year other than its required taxable year (i.e., a fiscal year) if it makes an election under section 444, elects to use a 52-53-week taxable year that ends with reference to the calendar year or a taxable year elected under section 444, or establishes a business purpose for such fiscal year and obtains the approval of the Commissioner under section 442.

(b) *Adoption, change, or retention of taxable year*—(1) *Adoption of taxable year*. A PSC may adopt, in accordance with § 1.441-1(c), the calendar year, a taxable year elected under section 444, or a 52-53-week taxable year ending with reference to the calendar year or a taxable year elected under section 444 without the approval of the Commissioner. See § 1.441-1. A PSC that wants to adopt any other taxable year must

establish a business purpose and obtain the approval of the Commissioner under section 442.

(2) *Change in taxable year.* A PSC that wants to change its taxable year must obtain the approval of the Commissioner under section 442 or make an election under section 444. However, a PSC may obtain automatic approval for certain changes, including a change to the calendar year or to a 52-53-week taxable year ending with reference to the calendar year, pursuant to administrative procedures published by the Commissioner.

(3) *Retention of taxable year.* In certain cases, a PSC will be required to change its taxable year unless it obtains the approval of the Commissioner under section 442, or makes an election under section 444, to retain its current taxable year. For example, a corporation using a June 30 fiscal year that becomes a PSC and, as a result, is required to use the calendar year must obtain the approval of the Commissioner to retain its current fiscal year.

(4) *Procedures for obtaining approval or making a section 444 election.* See § 1.442-1(b) for procedures to obtain the approval of the Commissioner (automatically or otherwise) to adopt, change, or retain a taxable year. See §§ 1.444-1T and 1.444-2T for qualifications, and 1.444-3T for procedures, for making an election under section 444.

(5) *Examples.* The provisions of paragraph (b)(4) of this section may be illustrated by the following examples:

*Example 1.* X, whose taxable year ends on January 31, 2001, becomes a PSC for its taxable year beginning February 1, 2001, and does not obtain the approval of the Commissioner for using a fiscal year. Thus, for taxable years ending before February 1, 2001, this section does not apply with respect to X. For its taxable year beginning on February 1, 2001, however, X will be required to comply with paragraph (a) of this section. Thus, unless X obtains approval of the Commissioner to use a January 31 taxable year, or makes a section 444 election, X will be required to change its taxable year to the calendar year under paragraph (b) of this section by using a short taxable year that begins on February 1, 2001, and ends on December 31, 2001. Under paragraph (b)(1) of this section, X may obtain automatic approval to change its taxable year to a calendar year. See § 1.442-1(b).

*Example 2.* Assume the same facts as in *Example 1*, except that X desires to change to a

52-53-week taxable year ending with reference to the month of December. Under paragraph (b)(1) of this section X may obtain automatic approval to make the change. See § 1.442-1(b).

(c) *Personal service corporation defined—(1) In general.* For purposes of this section and section 442, a taxpayer is a PSC for a taxable year only if—

(i) The taxpayer is a C corporation (as defined in section 1361(a)(2)) for the taxable year;

(ii) The principal activity of the taxpayer during the testing period is the performance of personal services;

(iii) During the testing period, those services are substantially performed by employee-owners (as defined in paragraph (g) of this section); and

(iv) Employee-owners own (as determined under the attribution rules of section 318, except that the language “any” applies instead of “50 percent” in section 318(a)(2)(C)) more than 10 percent of the fair market value of the outstanding stock in the taxpayer on the last day of the testing period.

(2) *Testing period—(i) In general.* Except as otherwise provided in paragraph (c)(2)(ii) of this section, the testing period for any taxable year is the immediately preceding taxable year.

(ii) *New corporations.* The testing period for a taxpayer’s first taxable year is the period beginning on the first day of that taxable year and ending on the earlier of—

(A) The last day of that taxable year; or

(B) The last day of the calendar year in which that taxable year begins.

(3) *Examples.* The provisions of paragraph (c)(2)(ii) of this section may be illustrated by the following examples:

*Example 1.* Corporation A’s first taxable year begins on June 1, 2001, and A desires to use a September 30 taxable year. However, if A is a personal service corporation, it must obtain the Commissioner’s approval to use a September 30 taxable year. Pursuant to paragraph (c)(2)(ii) of this section, A’s testing period for its first taxable year beginning June 1, 2001, is the period June 1, 2001 through September 30, 2001. Thus, if, based upon such testing period, A is a personal service corporation, A must obtain the Commissioner’s permission to use a September 30 taxable year.

*Example 2.* The facts are the same as in *Example 1*, except that A desires to use a March 31 taxable year. Pursuant to paragraph

(c)(2)(ii) of this section, A's testing period for its first taxable year beginning June 1, 2001, is the period June 1, 2001, through December 31, 2001. Thus, if, based upon such testing period, A is a personal service corporation, A must obtain the Commissioner's permission to use a March 31 taxable year.

(d) *Performance of personal services*—(1) *Activities described in section 448(d)(2)(A)*. For purposes of this section, any activity of the taxpayer described in section 448(d)(2)(A) or the regulations thereunder will be treated as the performance of personal services. Therefore, any activity of the taxpayer that involves the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting (as such fields are defined in § 1.448-1T) will be treated as the performance of personal services for purposes of this section.

(2) *Activities not described in section 448(d)(2)(A)*. For purposes of this section, any activity of the taxpayer not described in section 448(d)(2)(A) or the regulations thereunder will not be treated as the performance of personal services.

(e) *Principal activity*—(1) *General rule*. For purposes of this section, the principal activity of a corporation for any testing period will be the performance of personal services if the cost of the corporation's compensation (the compensation cost) for such testing period that is attributable to its activities that are treated as the performance of personal services within the meaning of paragraph (d) of this section (i.e., the total compensation for personal service activities) exceeds 50 percent of the corporation's total compensation cost for such testing period.

(2) *Compensation cost*—(i) *Amounts included*. For purposes of this section, the compensation cost of a corporation for a taxable year is equal to the sum of the following amounts allowable as a deduction, allocated to a long-term contract, or otherwise chargeable to a capital account by the corporation during such taxable year—

(A) Wages and salaries; and

(B) Any other amounts, attributable to services performed for or on behalf of the corporation by a person who is an employee of the corporation (including an owner of the corporation who is

treated as an employee under paragraph (g)(2) of this section) during the testing period. Such amounts include, but are not limited to, amounts attributable to deferred compensation, commissions, bonuses, compensation includible in income under section 83, compensation for services based on a percentage of profits, and the cost of providing fringe benefits that are includible in income.

(ii) *Amounts excluded*. Notwithstanding paragraph (e)(2)(i) of this section, compensation cost does not include amounts attributable to a plan qualified under section 401(a) or 403(a), or to a simplified employee pension plan defined in section 408(k).

(3) *Attribution of compensation cost to personal service activity*—(i) *Employees involved only in the performance of personal services*. The compensation cost for employees involved only in the performance of activities that are treated as personal services under paragraph (d) of this section, or employees involved only in supporting the work of such employees, are considered to be attributable to the corporation's personal service activity.

(ii) *Employees involved only in activities that are not treated as the performance of personal services*. The compensation cost for employees involved only in the performance of activities that are not treated as personal services under paragraph (d) of this section, or for employees involved only in supporting the work of such employees, are not considered to be attributable to the corporation's personal service activity.

(iii) *Other employees*. The compensation cost for any employee who is not described in either paragraph (e)(3)(i) or (ii) of this section (a mixed-activity employee) is allocated as follows—

(A) *Compensation cost attributable to personal service activity*. That portion of the compensation cost for a mixed-activity employee that is attributable to the corporation's personal service activity equals the compensation cost for that employee multiplied by the percentage of the total time worked for the corporation by that employee during the year that is attributable to activities of the corporation that are treated as the performance of personal

services under paragraph (d) of this section. That percentage is to be determined by the taxpayer in any reasonable and consistent manner. Time logs are not required unless maintained for other purposes;

(B) *Compensation cost not attributable to personal service activity.* That portion of the compensation cost for a mixed activity employee that is not considered to be attributable to the corporation's personal service activity is the compensation cost for that employee less the amount determined in paragraph (e)(3)(iii)(A) of this section.

(f) *Services substantially performed by employee-owners*—(1) *General rule.* Personal services are substantially performed during the testing period by employee-owners of the corporation if more than 20 percent of the corporation's compensation cost for that period attributable to its activities that are treated as the performance of personal services within the meaning of paragraph (d) of this section (*i.e.*, the total compensation for personal service activities) is attributable to personal services performed by employee-owners.

(2) *Compensation cost attributable to personal services.* For purposes of paragraph (f)(1) of this section—

(i) The corporation's compensation cost attributable to its activities that are treated as the performance of personal services is determined under paragraph (e)(3) of this section; and

(ii) The portion of the amount determined under paragraph (f)(2)(i) of this section that is attributable to personal services performed by employee-owners is to be determined by the taxpayer in any reasonable and consistent manner.

(3) *Examples.* The provisions of this paragraph (f) may be illustrated by the following examples:

*Example 1.* For its taxable year beginning February 1, 2001, Corp A's testing period is the taxable year ending January 31, 2000. During that testing period, A's only activity was the performance of personal services. The total compensation cost of A (including compensation cost attributable to employee-owners) for the testing period was \$1,000,000. The total compensation cost attributable to employee-owners of A for the testing period was \$210,000. Pursuant to paragraph (f)(1) of this section, the employee-owners of A substantially performed the personal services of

A during the testing period because the compensation cost of A's employee-owners was more than 20 percent of the total compensation cost for all of A's employees (including employee-owners).

*Example 2.* Corp B has the same facts as corporation A in *Example 1*, except that during the taxable year ending January 31, 2001, B also participated in an activity that would not be characterized as the performance of personal services under this section. The total compensation cost of B (including compensation cost attributable to employee-owners) for the testing period was \$1,500,000 (\$1,000,000 attributable to B's personal service activity and \$500,000 attributable to B's other activity). The total compensation cost attributable to employee-owners of B for the testing period was \$250,000 (\$210,000 attributable to B's personal service activity and \$40,000 attributable to B's other activity). Pursuant to paragraph (f)(1) of this section, the employee-owners of B substantially performed the personal services of B during the testing period because more than 20 percent of B's compensation cost during the testing period attributable to its personal service activities was attributable to personal services performed by employee-owners (\$210,000).

(g) *Employee-owner defined*—(1) *General rule.* For purposes of this section, a person is an employee-owner of a corporation for a testing period if—

(i) The person is an employee of the corporation on any day of the testing period; and

(ii) The person owns any outstanding stock of the corporation on any day of the testing period.

(2) *Special rule for independent contractors who are owners.* Any person who is an owner of the corporation within the meaning of paragraph (g)(1)(ii) of this section and who performs personal services for, or on behalf of, the corporation is treated as an employee for purposes of this section, even if the legal form of that person's relationship to the corporation is such that the person would be considered an independent contractor for other purposes.

(h) *Special rules for affiliated groups filing consolidated returns*—(1) *In general.* For purposes of applying this section to the members of an affiliated group of corporations filing a consolidated return for the taxable year—

(i) The members of the affiliated group are treated as a single corporation;

## § 1.441-4

## 26 CFR Ch. I (4-1-17 Edition)

(ii) The employees of the members of the affiliated group are treated as employees of such single corporation; and

(iii) All of the stock of the members of the affiliated group that is not owned by any other member of the affiliated group is treated as the outstanding stock of that corporation.

(2) *Examples.* The provisions of this paragraph (h) may be illustrated by the following examples:

*Example 1.* The affiliated group AB, consisting of corporation A and its wholly owned subsidiary B, filed a consolidated Federal income tax return for the taxable year ending January 31, 2001, and AB is attempting to determine whether it is affected by this section for its taxable year beginning February 1, 2001. During the testing period (i.e., the taxable year ending January 31, 2001), A did not perform personal services. However, B's only activity was the performance of personal services. On the last day of the testing period, employees of A did not own any stock in A. However, some of B's employees own stock in A. In the aggregate, B's employees own 9 percent of A's stock on the last day of the testing period. Pursuant to paragraph (h)(1) of this section, this section is effectively applied on a consolidated basis to members of an affiliated group filing a consolidated Federal income tax return. Because the only employee-owners of AB are the employees of B, and because B's employees do not own more than 10 percent of AB on the last day of the testing period, AB is not a PSC subject to the provisions of this section. Thus, AB is not required to determine on a consolidated basis whether, during the testing period, its principal activity is the providing of personal services, or the personal services are substantially performed by employee-owners.

*Example 2.* The facts are the same as in Example 1, except that on the last day of the testing period A owns only 80 percent of B. The remaining 20 percent of B is owned by employees of B. The fair market value of A, including its 80 percent interest in B, as of the last day of the testing period, is \$1,000,000. In addition, the fair market value of the 20 percent interest in B owned by B's employees is \$50,000 as of the last day of the testing period. Pursuant to paragraphs (c)(1)(iv) and (h)(1) of this section, AB must determine whether the employee-owners of A and B (i.e., B's employees) own more than 10 percent of the fair market value of A and B as of the last day of the testing period. Because the \$140,000 [ $(\$1,000,000 \times .09) + \$50,000$ ] fair market value of the stock held by B's employees is greater than 10 percent of the aggregate fair market value of A and B as of the last day of the testing period, or \$105,000 [ $\$1,000,000 + \$50,000 \times .10$ ], AB may be subject

to this section if, on a consolidated basis during the testing period, the principal activity of AB is the performance of personal services and the personal services are substantially performed by employee-owners.

[T.D. 8996, 67 FR 35012, May 17, 2002]

### § 1.441-4 Effective date.

Sections 1.441-0 through 1.441-3 are applicable for taxable years ending on or after May 17, 2002.

[T.D. 8996, 67 FR 35012, May 17, 2002]

### § 1.442-1 Change of annual accounting period.

(a) *Approval of the Commissioner.* A taxpayer that has adopted an annual accounting period (as defined in § 1.441-1(b)(3)) as its taxable year generally must continue to use that annual accounting period in computing its taxable income and for making its Federal income tax returns. If the taxpayer wants to change its annual accounting period and use a new taxable year, it must obtain the approval of the Commissioner, unless it is otherwise authorized to change without the approval of the Commissioner under either the Internal Revenue Code (e.g., section 444 and section 859) or the regulations thereunder (e.g., paragraph (c) of this section). In addition, as described in § 1.441-1(c) and (d), a partnership, S corporation, electing S corporation, or personal service corporation (PSC) generally is required to secure the approval of the Commissioner to adopt or retain an annual accounting period other than its required taxable year. The manner of obtaining approval from the Commissioner to adopt, change, or retain an annual accounting period is provided in paragraph (b) of this section. However, special rules for obtaining approval may be provided in other sections.

(b) *Obtaining approval—(1) Time and manner for requesting approval.* In order to secure the approval of the Commissioner to adopt, change, or retain an annual accounting period, a taxpayer must file an application, generally on Form 1128, "Application To Adopt, Change, or Retain a Tax Year," with the Commissioner within such time and in such manner as is provided in administrative procedures published by the Commissioner.

(2) *General requirements for approval.* An adoption, change, or retention in annual accounting period will be approved where the taxpayer establishes a business purpose for the requested annual accounting period and agrees to the Commissioner's prescribed terms, conditions, and adjustments for effecting the adoption, change, or retention. In determining whether a taxpayer has established a business purpose and which terms, conditions, and adjustments will be required, consideration will be given to all the facts and circumstances relating to the adoption, change, or retention, including the tax consequences resulting therefrom. Generally, the requirement of a business purpose will be satisfied, and adjustments to neutralize any tax consequences will not be required, if the requested annual accounting period coincides with the taxpayer's required taxable year (as defined in §1.441-1(b)(2)), ownership taxable year, or natural business year. In the case of a partnership, S corporation, electing S corporation, or PSC, deferral of income to partners, shareholders, or employee-owners will not be treated as a business purpose.

(3) *Administrative procedures.* The Commissioner will prescribe administrative procedures under which a taxpayer may be permitted to adopt, change, or retain an annual accounting period. These administrative procedures will describe the business purpose requirements (including an ownership taxable year and a natural business year) and the terms, conditions, and adjustments necessary to obtain approval. Such terms, conditions, and adjustments may include adjustments necessary to neutralize the tax effects of a substantial distortion of income that would otherwise result from the requested annual accounting period including: a deferral of a substantial portion of the taxpayer's income, or shifting of a substantial portion of deductions, from one taxable year to another; a similar deferral or shifting in the case of any other person, such as a beneficiary in an estate; the creation of a short period in which there is a substantial net operating loss, capital loss, or credit (including a general business credit); or the creation of a

short period in which there is a substantial amount of income to offset an expiring net operating loss, capital loss, or credit. See, for example, Rev. Proc. 2002-39, 2002-22 I.R.B., procedures for obtaining the Commissioner's prior approval of an adoption, change, or retention in annual accounting period through application to the national office; Rev. Proc. 2002-37, 2002-22 I.R.B., automatic approval procedures for certain corporations; Rev. Proc. 2002-38, 2002-22 I.R.B., automatic approval procedures for partnerships, S corporations, electing S corporations, and PSCs; and Rev. Proc. 66-50, 1966-2 C.B. 1260, automatic approval procedures for individuals. For availability of Revenue Procedures and Notices, see §601.601(d)(2) of this chapter.

(4) *Taxpayers to whom section 441(g) applies.* If section 441(g) and §1.441-1(b)(1)(iv) apply to a taxpayer, the adoption of a fiscal year is treated as a change in the taxpayer's annual accounting period under section 442. Therefore, that fiscal year can become the taxpayer's taxable year only with the approval of the Commissioner. In addition to any other terms and conditions that may apply to such a change, the taxpayer must establish and maintain books that adequately and clearly reflect income for the short period involved in the change and for the fiscal year proposed.

(c) *Special rule for change of annual accounting period by subsidiary corporation.* A subsidiary corporation that is required to change its annual accounting period under §1.1502-76, relating to the taxable year of members of an affiliated group that file a consolidated return, does not need to obtain the approval of the Commissioner or file an application on Form 1128 with respect to that change.

(d) *Special rule for newly married couples.* (1) A newly married husband or wife may obtain automatic approval under this paragraph (d) to change his or her annual accounting period in order to use the annual accounting period of the other spouse so that a joint return may be filed for the first or second taxable year of that spouse ending after the date of marriage. Such automatic approval will be granted only if the newly married husband or wife

adopting the annual accounting period of the other spouse files a Federal income tax return for the short period required by that change on or before the 15th day of the 4th month following the close of the short period. See section 443 and the regulations thereunder. If the due date for any such short-period return occurs before the date of marriage, the first taxable year of the other spouse ending after the date of marriage cannot be adopted under this paragraph (d). The short-period return must contain a statement at the top of page one of the return that it is filed under the authority of this paragraph (d). The newly married husband or wife need not file Form 1128 with respect to a change described in this paragraph (d). For a change of annual accounting period by a husband or wife that does not qualify under this paragraph (d), see paragraph (b) of this section.

(2) The provisions of this paragraph (d) may be illustrated by the following example:

*Example.* H & W marry on September 25, 2001. H is on a fiscal year ending June 30, and W is on a calendar year. H wishes to change to a calendar year in order to file joint returns with W. W's first taxable year after marriage ends on December 31, 2001. H may not change to a calendar year for 2001 since, under this paragraph (d), he would have had to file a return for the short period from July 1 to December 31, 2000, by April 16, 2001. Since the date of marriage occurred subsequent to this due date, the return could not be filed under this paragraph (d). Therefore, H cannot change to a calendar year for 2001. However, H may change to a calendar year for 2002 by filing a return under this paragraph (d) by April 15, 2002, for the short period from July 1 to December 31, 2001. If H files such a return, H and W may file a joint return for calendar year 2002 (which is W's second taxable year ending after the date of marriage).

(e) *Effective date.* The rules of this section are applicable for taxable years ending on or after May 17, 2002.

[T.D. 8996, 67 FR 35019, May 17, 2002]

**§ 1.443-1 Returns for periods of less than 12 months.**

(a) *Returns for short period.* A return for a short period, that is, for a taxable year consisting of a period of less than 12 months, shall be made under any of the following circumstances:

(1) *Change of annual accounting period.* In the case of a change in the annual accounting period of a taxpayer, a separate return must be filed for the short period of less than 12 months beginning with the day following the close of the old taxable year and ending with the day preceding the first day of the new taxable year. However, such a return is not required for a short period of six days or less, or 359 days or more, resulting from a change from or to a 52-53-week taxable year. See section 441(f) and § 1.441-2. The computation of the tax for a short period required to effect a change of annual accounting period is described in paragraph (b) of this section. In general, a return for a short period resulting from a change of annual accounting period shall be filed and the tax paid within the time prescribed for filing a return for a taxday of the short period. For rules applicable to a subsidiary corporation which becomes a member of an affiliated group which files a consolidated return, see § 1.1502-76.

(2) *Taxpayer not in existence for entire taxable year.* If a taxpayer is not in existence for the entire taxable year, a return is required for the short period during which the taxpayer was in existence. For example, a corporation organized on August 1 and adopting the calendar year as its annual accounting period is required to file a return for the short period from August 1 to December 31, and returns for each calendar year thereafter. Similarly, a dissolving corporation which files its returns for the calendar year is required to file a return for the short period from January 1 to the date it goes out of existence. Income for the short period is not required to be annualized if the taxpayer is not in existence for the entire taxable year, and, in the case of a taxpayer other than a corporation, the deduction under section 151 for personal exemptions (or deductions in lieu thereof) need not be reduced under section 443(c). In general, the requirements with respect to the filing of returns and the payment of tax for a short period where the taxpayer has not been in existence for the entire taxable year are the same as for the filing of a return and the payment of tax for a taxable year of 12 months ending

on the last day of the short period. Although the return of a decedent is a return for the short period beginning with the first day of his last taxable year and ending with the date of his death, the filing of a return and the payment of tax for a decedent may be made as though the decedent had lived throughout his last taxable year.

(b) *Computation of tax for short period on change of annual accounting period—*

(1) *General rule.* (i) If a return is made for a short period resulting from a change of annual accounting period, the taxable income for the short period shall be placed on an annual basis by multiplying such income by 12 and dividing the result by the number of months in the short period. Unless section 443(b)(2) and subparagraph (2) of this paragraph apply, the tax for the short period shall be the same part of the tax computed on the annual basis as the number of months in the short period is of 12 months.

(ii) If a return is made for a short period of more than 6 days, but less than 359 days, resulting from a change from or to a 52-53-week taxable year, the taxable income for the short period shall be annualized and the tax computed on a daily basis, as provided in section 441(f)(2)(B)(iii) and §1.441-2(b)(2)(ii).

(iii) For method of computation of income for a short period in the case of a subsidiary corporation required to change its annual accounting period to conform to that of its parent, see §1.1502-76(b).

(iv) An individual taxpayer making a return for a short period resulting from a change of annual accounting period is not allowed to take the standard deduction provided in section 141 in computing his taxable income for the short period. See section 142(b)(3).

(v) In computing the taxable income of a taxpayer other than a corporation for a short period (which income is to be annualized in order to determine the tax under section 443(b)(1)) the personal exemptions allowed individuals under section 151 (and any deductions allowed other taxpayers in lieu thereof, such as the deduction under section 642(b)) shall be reduced to an amount which bears the same ratio to the full amount of the exemptions as the number of

months in the short period bears to 12. In the case of the taxable income for a short period resulting from a change from or to a 52-53-week taxable year to which section 441(f)(2)(B)(iii) applies, the computation required by the preceding sentence shall be made on a daily basis, that is, the deduction for personal exemptions (or any deduction in lieu thereof) shall be reduced to an amount which bears the same ratio to the full deduction as the number of days in the short period bears to 365.

(vi) If the amount of a credit against the tax (for example, the credits allowable under section 34 (for dividends received on or before December 31, 1964), and 35 (for partially tax-exempt interest)) is dependent upon the amount of any item of income or deduction, such credit shall be computed upon the amount of the item annualized separately in accordance with the foregoing rules. The credit so computed shall be treated as a credit against the tax computed on the basis of the annualized taxable income. In any case in which a limitation on the amount of a credit is based upon taxable income, taxable income shall mean the taxable income computed on the annualized basis.

(vii) The provisions of this subparagraph may be illustrated by the following examples:

*Example 1.* A taxpayer with one dependent who has been granted permission under section 442 to change his annual accounting period files a return for the short period of 10 months ending October 31, 1956. He has income and deductions as follows:

<i>Income</i>		
Interest income .....		\$10,000.00
Partially tax-exempt interest with respect to which a credit is allowable under section 35 .....		500.00
Dividends to which sections 34 and 116 are applicable .....		750.00
		11,250.00
<i>Deductions</i>		
Real estate taxes .....		200.00
2 personal exemptions at \$600 on an annual basis .....		1,200.00
The tax for the 10-month period is computed as follows:		
Total income as above ..		11,250.00
Less:		
Exclusion for dividends received .....	\$50.00	
2 personal exemptions (\$1,200 × <sup>10</sup> / <sub>12</sub> ) .....		1,000.00

§ 1.443-1

26 CFR Ch. I (4-1-17 Edition)

Real estate taxes .....	200.00	
		1,250.00
Taxable income for 10-month period before annualizing .....		10,000.00
Taxable income annualized (10,000 × 12/10) .....		12,000.00
Tax on \$12,000 before credits .....		3,400.00
Deduct credits:		
Dividends received for 10-month period .....	\$750.00	
Less: Excluded portion .....	50.00	
		700.00
Dividend income annualized (\$700 × 12/10) .....	840.00	
Credit (4 percent of \$840) .....		33.60
Partially tax-exempt interest included in gross income for 10-month period .....	500.00	
Partially tax-exempt interest (annualized) (\$500 × 12/10) .....	600.00	
Credit (3 percent of \$600) .....		18.00
		51.60
Tax on \$12,000 (after credits) .....		3,348.40
Tax for 10-month period (\$3,348.40 × 10/12) .....		2,790.33

*Example 2.* The X Corporation makes a return for the one-month period ending September 30, 1956, because of a change in annual accounting period permitted under section 442. Income and expenses for the short period are as follows:

Gross operating income .....	\$126,000
Business expenses .....	130,000
Net loss from operations .....	(4,000)
Dividends received from taxable domestic corporations .....	30,000
Gross income for short period before annualizing .....	26,000
Dividends received deduction (85 percent of \$30,000, but not in excess of 85 percent of \$26,000) .....	22,100
Taxable income for short period before annualizing .....	3,900
Taxable income annualized (\$8,900 × 12) .....	46,800
Tax on annual basis:	
\$46,800 at 52 percent .....	\$24,336
Less surtax exemption .....	5,500
	\$18,836
Tax for 1-month period (\$18,836 × 1/12) .....	1,570

*Example 3.* The Y Corporation makes a return for the six-month period ending June 30, 1957, because of a change in annual accounting period permitted under section 442. Income for the short period is as follows:

Taxable income exclusive of net long-term capital gain .....	\$40,000
Net long-term capital gain .....	10,000
Taxable income for short period before annualizing .....	50,000
Taxable income annualized (\$50,000 × 12/6) .....	100,000
<i>Regular tax computation</i>	
Taxable income annualized .....	100,000
Tax on annual basis:	
\$100,000 at 52 percent .....	\$52,000
Less surtax exemption .....	5,500
	46,500
Tax for 6-month period (\$46,500 × 6/12) .....	23,250
<i>Alternative tax computation</i>	
Taxable income annualized .....	100,000
Less annualized capital gain (\$10,000 × 12/6) .....	20,000
Annualized taxable income subject to partial tax .....	80,000
<i>Partial tax on annual basis</i>	
\$60,000 at 52 percent .....	\$41,600
Less surtax exemption .....	5,500
	36,100
25 percent of annualized capital gain (\$20,000) ...	5,000
Alternative tax on annual basis .....	41,100
Alternative tax for 6-month period (\$41,100 × 6/12) .....	20,550

Since the alternative tax of \$20,550 is less than the tax computed in the regular manner (\$23,250), the corporation's tax for the 6-month short period is \$20,550.

(2) *Exception: computation based on 12-month period.* (i) A taxpayer whose tax would otherwise be computed under section 443(b)(1) (or section 441(f)(2)(B)(iii) in the case of certain changes from or to a 52-53-week taxable year) for the short period resulting from a change of annual accounting period may apply to the district director to have his tax computed under the provisions of section 443(b)(2) and this subparagraph. If such application is made, as provided in subdivision (v) of this subparagraph, and if the taxpayer establishes the amount of his taxable income for the 12-month period described in subdivision (ii) of this subparagraph, then the tax for the short period shall be the greater of the following—

(a) An amount which bears the same ratio to the tax computed on the taxable income which the taxpayer has established for the 12-month period as the taxable income computed on the basis of the short period bears to the taxable income for such 12-month period; or

(b) The tax computed on the taxable income for the short period without placing the taxable income on an annual basis.

However, if the tax computed under section 443(b)(2) and this subparagraph is not less than the tax for the short period computed under section 443(b)(1) (or section 441(f)(2)(B)(iii) in the case of certain changes from or to a 52-53-week taxable year), then section 443(b)(2) and this subparagraph do not apply.

(ii) The term "12-month period" referred to in subdivision (i) of this subparagraph means the 12-month period beginning on the first day of the short period. However, if the taxpayer is not in existence at the end of such 12-month period, or if the taxpayer is a corporation which has disposed of substantially all of its assets before the end of such 12-month period, the term "12-month period" means the 12-month period ending at the close of the last day of the short period. For the purposes of the preceding sentence, a corporation which has ceased business and distributed so much of the assets used in its business that it cannot resume its customary operations with the remaining assets, will be considered to have disposed of substantially all of its assets. In the case of a change from a 52-53-week taxable year, the term "12-month period" means the period of 52 or 53 weeks (depending on the taxpayer's 52-53-week taxable year) beginning on the first day of the short period.

(iii)(a) The taxable income for the 12-month period is computed under the same provisions of law as are applicable to the short period and is computed as if the 12-month period were an actual annual accounting period of the taxpayer. All items which fall in such 12-month period must be included even if they are extraordinary in amount or of an unusual nature. If the taxpayer is a member of a partnership, his taxable income for the 12-month period shall include his distributive share of partnership income for any taxable year of the partnership ending within or with such 12-month period, but no amount shall be included with respect to a taxable year of the partnership ending before or after such 12-month period. If any other item partially applicable to

such 12-month period can be determined only at the end of a taxable year which includes only part of the 12-month period, the taxpayer, subject to review by the Commissioner, shall apportion such item to the 12-month period in such manner as will most clearly reflect income for the 12-month period.

(b) In the case of a taxpayer permitted or required to use inventories, the cost of goods sold during a part of the 12-month period included in a taxable year shall be considered, unless a more exact determination is available, as such part of the cost of goods sold during the entire taxable year as the gross receipts from sales for such part of the 12-month period is of the gross receipts from sales for the entire taxable year. For example, the 12-month period of a corporation engaged in the sale of merchandise, which has a short period from January 1, 1956, to September 30, 1956, is the calendar year 1956. The three-month period, October 1, 1956, to December 31, 1956, is part of the taxpayer's taxable year ending September 30, 1957. The cost of goods sold during the three-month period, October 1, 1956, to December 31, 1956, is such part of the cost of goods sold during the entire fiscal year ending September 30, 1957, as the gross receipts from sales for such three-month period are of the gross receipts from sales for the entire fiscal year.

(c) The Commissioner may, in granting permission to a taxpayer to change his annual accounting period, require, as a condition to permitting the change, that the taxpayer must take a closing inventory upon the last day of the 12-month period if he wishes to obtain the benefits of section 443(b)(2). Such closing inventory will be used only for the purposes of section 443(b)(2), and the taxpayer will not be required to use such inventory in computing the taxable income for the taxable year in which such inventory is taken.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

*Example 1.* The taxpayer in Example 1 under paragraph (b)(1)(vii) of this section establishes his taxable income for the 12-

§ 1.443-1

26 CFR Ch. I (4-1-17 Edition)

month period from January 1, 1956, to December 31, 1956. The taxpayer has a short period of 10 months, from January 1, 1956, to October 31, 1956. The taxpayer files an application in accordance with subdivision (v) of this subparagraph to compute his tax under section 443(b)(2). The taxpayer's income and deductions for the 12-month period, as so established, follow:

<i>Income</i>	
Interest income .....	\$11,000
Partially tax-exempt interest with respect to which a credit is allowable under section 35 .....	600
Dividends to which sections 34 and 116 are applicable .....	850
	12,450
<i>Deductions</i>	
Real estate taxes .....	200
2 personal exemptions at \$600 .....	1,200
<i>Tax computation for short period under section 443(b)(2)(A)(i)</i>	
Total income as above .....	\$12,450
Less:	
Exclusion for dividends received .....	\$50
Personal exemptions .....	1,200
Deduction for taxes .....	200
	1,450
Taxable income for 12-month period .....	11,000
Tax before credits .....	3,020
Credit for partially tax-exempt interest (3 percent of \$600) .....	18
Credit for dividends received (4 percent of (\$850 - 50)) .....	32
	50
Tax under section 443(b)(2)(A)(i) for 12-month period .....	2,970
Taxable income for 10-month short period from Example 1 of paragraph (b)(1)(vii) of this section before annualizing .....	10,000
Tax for short period under section 443(b)(2)(A)(i) (\$2,970 × \$10,000 (taxable income for short period)/\$11,000 (taxable income for 12-month period)) .....	2,700
<i>Tax computation for short period under section 443(b)(2)(A)(ii)</i>	
Total income for 10-month short period .....	11,250
Less:	
Exclusion for dividends received .....	50
2 personal exemptions .....	1,200
Real estate taxes .....	200
	1,450
Taxable income for short period without annualizing and without proration of personal exemptions .....	9,800
Tax before credits .....	2,572
Less credits:	
Partially tax-exempt interest (3 percent of \$500) .....	15
Dividends received (4 percent of (\$750 - 50)) .....	28
	43
Tax for short period under section 443(b)(2)(A)(ii) .....	2,529

The tax of \$2,700 computed under section 443(b)(2)(A)(i) is greater than the tax of \$2,529, computed under section 443(b)(2)(A)(ii), and is, therefore, the tax under section 443(b)(2). Since the tax of \$2,700 (computed under section 443(b)(2)) is less than the tax of \$2,790.33 (computed under section 443(b)(1)) on the annualized income of the short period (see Example 1 of paragraph (b)(1)(vii) of this section), the taxpayer's tax for the 10-month short period is \$2,700.

*Example 2.* Assume the same facts as in Example 1 of this subdivision, except that, during the month of November 1956, the taxpayer suffered a casualty loss of \$5,000. The tax computation for the short period under section 443(b)(2) would be as follows:

<i>Tax computation for short period under section 443(b)(2)(A)(i)</i>	
Taxable income for 12-month period from Example 1 .....	\$11,000
Less: Casualty loss .....	5,000
	6,000
Taxable income for 12-month period .....	6,000
Tax before credits .....	\$1,360
Credits from Example 1 .....	50
	1,310
Tax under section 443(b)(2)(A)(i) for 12-month period .....	1,310
Tax for short period (\$1,310 × \$10,000/\$6,000) under section 443(b)(2)(A)(i) .....	2,183
<i>Tax computation for short period under section 443(b)(2)(A)(ii)</i>	
Total income for the short period .....	11,250
Less:	
Exclusion for dividends received .....	50
2 personal exemptions .....	1,200
Real estate taxes .....	200
	1,450
Taxable income for short period without annualizing and without proration of personal exemptions .....	9,800
Tax before credits .....	2,572
Less credits:	
Partially tax-exempt interest (3 percent of \$500) .....	15
Dividends received (4 percent of \$750 - 50)) .....	28
	43
Tax for short period under section 443(b)(2)(A)(ii) .....	2,529

The tax of \$2,529, computed under section 443(b)(2)(A)(ii) is greater than the tax of \$2,183 computed under section 443(b)(2)-(A)(i) and is, therefore, the tax under section 443(b)(2). Since this tax is less than the tax of \$2,790.33, computed under section 443(b)(1) (see Example 1 of paragraph (b)(1)(vii) of this section), the taxpayer's tax for the 10-month short period is \$2,529.

(v)(a) A taxpayer who wishes to compute his tax for a short period resulting from a change of annual accounting period under section 443(b)(2) must make

an application therefor. Except as provided in (b) of this subdivision, the taxpayer shall first file his return for the short period and compute his tax under section 443(b)(1). The application for the benefits of section 443(b)(2) shall subsequently be made in the form of a claim for credit or refund. The claim shall set forth the computation of the taxable income and the tax thereon for the 12-month period and must be filed not later than the time (including extensions) prescribed for filing the return for the taxpayer's first taxable year which ends on or after the day which is 12 months after the beginning of the short period. For example, assume that a taxpayer changes his annual accounting period from the calendar year to a fiscal year ending September 30, and files a return for the short period from January 1, 1956, to September 30, 1956. His application for the benefits of section 443(b)(2) must be filed not later than the time prescribed for filing his return for his first taxable year which ends on or after the last day of December 1956, the twelfth month after the beginning of the short period. Thus, the taxpayer must file his application not later than the time prescribed for filing the return for his fiscal year ending September 30, 1957. If he obtains an extension of time for filing the return for such fiscal year, he may file his application during the period of such extension. If the district director determines that the taxpayer has established the amount of his taxable income for the 12-month period, any excess of the tax paid for the short period over the tax computed under section 443(b)(2) will be credited or refunded to the taxpayer in the same manner as in the case of an overpayment.

(b) If at the time the return for the short period is filed, the taxpayer is able to determine that the 12-month period ending with the close of the short period (see section 443(b)(2)-(B)(ii) and subparagraph (2)(ii) of this paragraph) will be used in the computations under section 443(b)(2), then the tax on the return for the short period may be determined under the provisions of section 443(b)(2). In such case, a return covering the 12-month period shall be attached to the return

for the short period as a part thereof, and the return and attachment will then be considered as an application for the benefits of section 443(b)(2).

(c) *Adjustment in deduction for personal exemption.* For adjustment in the deduction for personal exemptions in computing the tax for a short period resulting from a change of annual accounting period under section 443(b)(1) (or under section 441(f)(2)(B)(iii) in the case of certain changes from or to a 52-53-week taxable year), see paragraph (b)(1)(v) of this section.

(d) *Adjustments in exclusion of computing minimum tax for tax preferences.*

(1) If a return is made for a short period on account of any of the reasons specified in subsection (a) of section 443, the \$30,000 amount specified in section 56 (relating to minimum tax for tax preferences), modified as provided by section 58 and the regulations thereunder, shall be reduced to the amount which bears the same ratio to such specified amount as the number of days in the short period bears to 365.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

*Example.* A taxpayer who is an unmarried individual has been granted permission under section 442 to change his annual accounting period files a return for the short period of 4 months ending April 30, 1970. The \$30,000 amount specified in section 56 is reduced as follows:

$$(120/365) \times \$30,000 = \$9,835.89.$$

(e) *Cross references.* For inapplicability of section 443(b) and paragraph (b) of this section in computing—

(1) Accumulated earnings tax, see section 536 and the regulations thereunder;

(2) Personal holding company tax, see section 546 and the regulations thereunder;

(3) Undistributed foreign personal holding company income, see section 557 and the regulations thereunder;

(4) The taxable income of a regulated investment company, see section 852(b)(2)(E) and the regulations thereunder; and

(5) The taxable income of a real estate investment trust, see section

### § 1.444-1T Election to use a taxable year other than the required taxable year (temporary).

(a) *General rules*—(1) *Year other than required year.* Except as otherwise provided in this section and § 1.444-2T, a partnership, S corporation, or personal service corporation (as defined in § 1.441-3(c)) may make or continue an election (a “section 444 election”) to have a taxable year other than its required taxable year. See paragraph (b) of this section for limitations on the taxable year that may be elected. See § 1.444-2T for rules that generally prohibit a partnership, S corporation, or personal service corporation that is a member of a tiered structure from making or continuing a section 444 election. See § 1.444-3T for rules explaining how and when to make a section 444 election.

(2) *Effect of section 444 election*—(i) *In general.* A partnership or S corporation that makes or continues a section 444 election shall file returns and make payments as required by §§ 1.7519-1T

and 1.7519-2T. A personal service corporation that makes or continues a section 444 election is subject to the deduction limitation of § 1.280H-1T.

(ii) *Duration of section 444 election.* A section 444 election shall remain in effect until the election is terminated pursuant to paragraph (a)(5) of this section.

(3) *Section 444 election not required for certain years.* A partnership, S corporation, or personal service corporation is not required to make a section 444 election to use—

(i) A taxable year for which such entity establishes a business purpose to the satisfaction of the Commissioner (*i.e.*, approved under section 4 or 6 of Rev. Proc. 87-32, 1987-28 I.R.B. 14, or any successor revenue ruling or revenue procedure), or

(ii) A taxable year that is a “grandfathered fiscal year,” within the meaning of section 5.01(2) of Rev. Proc. 87-32 or any successor revenue ruling or revenue procedure.

Although a partnership, S corporation or personal service corporation qualifies to use a taxable year described in paragraph (a)(3) (i) or (ii) of this section, such entity may, if otherwise qualified, make a section 444 election to use a different taxable year. Thus, for example, assume that a personal service corporation that historically used a January 31 taxable year established to the satisfaction of the Commissioner, under section 6 of Rev. Proc. 87-32, a business purpose to use a September 30 taxable year for its taxable year beginning February 1, 1987. Pursuant to this paragraph (a)(3), such personal service corporation may use a September 30 taxable year without making a section 444 election. However, the corporation may, if otherwise qualified, make a section 444 election to use a year ending other than September 30 for its taxable year beginning February 1, 1987.

(4) *Required taxable year.* For purposes of this section, the term “required taxable year” means the taxable year determined under section 706(b), 1378, or 441(i) without taking into account any taxable year which is allowable either—

(i) By reason of business purpose (*i.e.*, approved under section 4 or 6 of Rev.

**§ 1.444-1T**

**26 CFR Ch. I (4-1-17 Edition)**

Proc. 87-32 or any successor revenue ruling or procedure), or

(ii) As a “grandfathered fiscal year” within the meaning of section 5.01(2) of Rev. Proc. 87-32, or any successor revenue ruling or procedure.

(5) *Termination of section 444 election—*

(i) *In general.* A section 444 election is terminated when—

(A) A partnership, S corporation, or personal service corporation changes to its required taxable year; or

(B) A partnership, S corporation, or personal service corporation liquidates (including a deemed liquidation of a partnership under §1.708-1 (b)(1)(iv)); or

(C) A partnership, S corporation, or personal service corporation willfully fails to comply with the requirements of section 7519 or 280H, whichever is applicable; or

(D) A partnership, S corporation, or personal service corporation becomes a member of a tiered structure (within the meaning of §1.444-2T), unless it is a partnership or S corporation that meets the same taxable year exception under §1.444-2T (e); or

(E) An S corporation’s S election is terminated; or

(F) A personal service corporation ceases to be a personal service corporation.

However, if a personal service corporation, that has a section 444 election in effect, elects to be an S corporation, the S corporation may continue the section 444 election of the personal service corporation. Similarly, if an S corporation that has a section 444 election in effect terminates its S election and immediately becomes a personal service corporation, the personal service corporation may continue the section 444 election of the S corporation. If a section 444 election is terminated under this paragraph (a)(5), the partnership, S corporation, or personal service corporation may not make another section 444 election for any taxable year.

(ii) *Effective date of termination.* A termination of a section 444 election shall be effective—

(A) In the case of a change to the required year, on the first day of the short year caused by the change;

(B) In the case of a liquidating entity, on the date the liquidation is completed for tax purposes;

(C) In the case of willful failure to comply, on the first day of the taxable year (determined as if a section 444 election had never been made) determined in the discretion of the District Director;

(D) In the case of membership in a tiered structure, on the first day of the taxable year in which the entity is considered to be a member of a tiered structure, or such other taxable year determined in the discretion of the District Director;

(E) In the case of termination of S status, on the first day of the taxable year for which S status no longer exists;

(F) In the case of a personal service corporation that changes status, on the first day of the taxable year, for which the entity is no longer a personal service corporation.

In the case of a termination under this paragraph (a)(5) that results in a short taxable year, an income tax return is required for the short period. In order to allow the Service to process the affected income tax return in an efficient manner, a partnership, S corporation, or personal service corporation that files such a short period return should type or legibly print at the top of the first page of the income tax return for the short taxable year—“SECTION 444 ELECTION TERMINATED.” In addition, a personal service corporation that changes its taxable year to the required taxable year is required to annualize its income for the short period.

(iii) *Example.* The provisions of paragraph (a)(5)(ii) of this section may be illustrated by the following example.

*Example.* Assume a partnership that is 100 percent owned, at all times, by calendar year individuals has historically used a June 30 taxable year. Also assume the partnership makes a valid section 444 election to retain a year ending June 30 for its taxable year beginning July 1, 1987. However, for its taxable year beginning July 1, 1988, the partnership changes to a calendar year, its required year. Based on these facts, the partnership’s section 444 election is terminated on July 1, 1988, and the partnership must file a short period return for the period July 1, 1988-December 31, 1988. Furthermore, pursuant to

## Internal Revenue Service, Treasury

## § 1.444-1T

§ 1.702-3T(a)(1), the partners in such partnership are not entitled to a 4-year spread with respect to partnership items of income and expense for the taxable year beginning July 1, 1988 and ending December 31, 1988.

(iv) *Special rule for entity that liquidates or is sold prior to making a section 444 election, required return, or required payment.* A partnership, S corporation, or personal service corporation that is liquidated or sold for tax purposes before a section 444 election, required return, or required payment is made for a particular year may, nevertheless, make or continue a section 444 election, if otherwise qualified. (See §§ 1.7519-2T (a)(2) and 1.7519-1T (a)(3), respectively, for a description of the required return and a definition of the term "required payment.") However, the partnership, S corporation, or personal service corporation (or a trustee or agent thereof) must comply with the requirements for making or continuing a section 444 election. Thus, if applicable, required payments must be made and a subsequent claim for refund must be made in accordance with § 1.7519-2T(a)(6). The following examples illustrate the application of this paragraph (a)(5)(iv).

*Example 1.* Assume an existing S corporation historically used a June 30 taxable year and desires to make a section 444 election for its taxable year beginning July 1, 1987. Assume further that the S corporation is liquidated for tax purposes on February 15, 1988. If otherwise qualified, the S corporation (or a trustee or agent thereof) may make a section 444 election to have a taxable year beginning July 1, 1987, and ending February 15, 1988. However, if the S corporation makes a section 444 election, it must comply with the requirements for making a section 444 election, including making required payments.

*Example 2.* The facts are the same as in Example 1, except that instead of liquidating on February 15, 1988, the shareholders of the S corporation sell their stock to a corporation on February 15, 1988. Thus, the corporation's S election is terminated on February 15, 1988. If otherwise qualified, the corporation may make a section 444 election to have a taxable year beginning July 1, 1987, and ending February 14, 1988.

*Example 3.* The facts are the same as in Example 2, except that the new shareholders are individuals. Furthermore, the corporation's S election is not terminated. Based on these facts, the S corporation, if otherwise qualified, may make a section 444 election to retain a year ending June 30 for its taxable

year beginning July 1, 1987. Furthermore, the S corporation may, if otherwise qualified, continue its section 444 election for subsequent taxable years.

(6) *Re-activating certain S elections—(i) Certain corporations electing S status that did not make a back-up calendar year request.* If a corporation that timely filed Form 2553, Election by a Small Business Corporation, effective for its first taxable year beginning in 1987—

(A) Requested a fiscal year based on business purpose,

(B) Did not agree to use a calendar year in the event its business purpose request was denied, and

(C) Such business purpose request is denied or withdrawn,

such corporation may retroactively re-activate its S election by making a valid section 444 election for its first taxable year beginning in 1987 and complying with the procedures in paragraph (a)(6)(iii) of this section.

(ii) *Certain corporations that revoked their S status.* If a corporation that used a fiscal year revoked its S election (pursuant to section 1362(d)(1)) for its first taxable year beginning in 1987, such corporation may retroactively re-activate its S election (*i.e.* rescind its revocation) by making a valid section 444 election for its first taxable year beginning in 1987 and complying with the procedures in paragraph (a)(6)(iii) of this section.

(iii) *Procedures for re-activating an S election.* A corporation re-activating its S election pursuant to paragraph (a)(6)(i) or (ii) of this section must—

(A) Obtain the consents of all shareholders who have owned stock in the corporation since the first day of the first taxable year of the corporation beginning after December 31, 1986,

(B) Include the following statement at the top of the first page of the corporation's Form 1120S for its first taxable year beginning in 1987—"SECTION 444 ELECTION—RE-ACTIVATES S STATUS," and

(C) Include the following statement with Form 1120S—"RE-ACTIVATION CONSENTED TO BY ALL SHAREHOLDERS WHO HAVE OWNED STOCK AT ANY TIME SINCE THE FIRST DAY OF THE FIRST TAXABLE YEAR OF THIS CORPORATION BEGINNING AFTER DECEMBER 31, 1986."

(iv) *Examples.* The provisions of this paragraph (a)(6) may be illustrated by the following examples.

*Example 1.* Assume a corporation historically used a June 30 taxable year and such corporation timely filed Form 2553, Election by a Small Business Corporation, to be effective for its taxable year beginning July 1, 1987. On its Form 2553, the corporation requested permission to retain its June 30 taxable year based on business purpose. However, the corporation did not agree to use a calendar year in the event its business purpose request was denied. On April 1, 1988, the Internal Revenue Service notified the corporation that its business purpose request was denied and therefore the corporation's S election was not effective. Pursuant to paragraph (a)(6)(i) of this section, the corporation may re-activate its S election by making a valid section 444 election and complying with the procedures in paragraph (a)(6)(iii) of this section.

*Example 2.* The facts are the same as in Example 1, except that as of July 26, 1988, the Internal Revenue Service has not yet determined whether the corporation has a valid business purpose to retain a June 30 taxable year. Based on these facts, the corporation may, if otherwise qualified, make a back-up section 444 election as provided in § 1.444-3T(b)(4). If the corporation's business purpose request is subsequently denied, the corporation should follow the procedures in § 1.444-3T(b)(4)(iii) for activating a back-up section 444 election rather than the procedures provided in this paragraph (a)(6) for re-activating an S election.

*Example 3.* Assume a corporation has historically been an S corporation with a March 31 taxable year. However, for its taxable year beginning April 1, 1987, the corporation revoked its S election pursuant to section 1362 (d)(1). Pursuant to paragraph (a)(6)(ii) of this section, such corporation may retroactively rescind its S election revocation by making a valid section 444 election for its taxable year beginning April 1, 1987, and complying with the procedures provided in paragraph (a)(6)(iii) of this section. If the corporation retroactively rescinds its S revocation, the corporation shall file a Form 1120S for its taxable year beginning April 1, 1987.

(b) *Limitation on taxable years that may be elected*—(1) *General rule.* Except as provided in paragraphs (b)(2) and (3) of this section, a section 444 election may be made only if the deferral period (as defined in paragraph (b)(4) of this section) of the taxable year to be elected is not longer than three months.

(2) *Changes in taxable year*—(i) *In general.* In the case of a partnership, S corporation, or personal service corpora-

tion changing its taxable year, such entity may make a section 444 election only if the deferral period of the taxable year to be elected is not longer than the shorter of—

(A) Three months, or

(B) The deferral period of the taxable year that is being changed, as defined in paragraph (b)(2)(iii) of this section.

(ii) *Special rule for certain existing corporations electing S status.* If a corporation with a taxable year other than the calendar year—

(A) Elected after September 18, 1986, and before January 1, 1988, under section 1362 of the Code to be an S corporation, and

(B) Elected to have the calendar year as the taxable year of the S corporation,

then, for taxable years beginning before 1989, paragraph (b)(2)(i) of this section shall be applied by taking into account the deferral period of the last taxable year of the corporation prior to electing to be an S corporation, rather than the deferral period of the taxable year that is being changed. Thus, the provisions of the preceding sentence do not apply to a corporation that elected to be an S corporation for its first taxable year.

(iii) *Deferral period of the taxable year that is being changed.* For purposes of paragraph (b)(2)(i)(B) of this section, the phrase “deferral period of the taxable year that is being changed” means the deferral period of the taxable year immediately preceding the taxable year for which the taxpayer desires to make a section 444 election. Furthermore, the deferral period of such year will be determined by using the required taxable year of the taxable year for which the taxpayer desires to make a section 444 election. For example, assume P, a partnership that has historically used a March 31 taxable year, desires to change to a September 30 taxable year by making a section 444 election for its taxable year beginning April 1, 1987. Furthermore, assume that pursuant to paragraph (a)(4) of this section, P's required taxable year for the taxable year beginning April 1, 1987 is a year ending December 31. Based on these facts the deferral period of the taxable year being changed is nine

months (the period from March 31 to December 31).

(iv) *Examples.* See paragraph (d)(1) of this section for examples that illustrate the provisions of this paragraph (b)(2).

(3) *Special rule for entities retaining 1986 taxable year.* Notwithstanding paragraph (b)(2) of this section, a partnership, S corporation, or personal service corporation may, for its first taxable year beginning after December 31, 1986, if otherwise qualified, make a section 444 election to have a taxable year that is the same as the entity's last taxable year beginning in 1986. See paragraph (d)(2) of this section for examples that illustrate the provisions of this paragraph (b)(3).

(4) *Deferral period—(i) Retentions of taxable year.* For a partnership, S corporation, or personal service corporation that desires to retain its taxable year by making a section 444 election, the term “deferral period” means the months between the beginning of such year and the close of the first required taxable year (as defined in paragraph (a)(4) of this section). The following example illustrates the application of this paragraph (b)(4)(i).

*Example.* AB partnership has historically used a taxable year ending July 31. AB desires to retain its July 31 taxable year by making a section 444 election for its taxable year beginning August 1, 1987. Calendar year individuals, A and B, each own 50 percent of the profits and capital of AB; thus, under paragraph (a)(4) of this section AB's required taxable year is the year ending December 31. Pursuant to this paragraph (b)(4)(i), if AB desires to retain its year ending July 31, the deferral period is five months (the months between July 31 and December 31).

(ii) *Adoptions of and changes in taxable year—(A) In general.* For a partnership, S corporation, or personal service corporation that desires to adopt or change its taxable year by making a section 444 election, the term “deferral period” means the months that occur after the end of the taxable year desired under section 444 and before the close of the required taxable year.

(B) *Special rule.* If a partnership, S corporation or personal service corporation is using the required taxable year as its taxable year, the deferral period is deemed to be zero.

(C) *Examples.* The provisions of this paragraph (b)(4)(ii) may be illustrated by the following examples.

*Example 1.* Assume that CD partnership has historically used the calendar year and that CD's required taxable year is the calendar year. Under the special rule provided in paragraph (b)(4)(ii)(B) of this section, CD's deferral period is zero. See paragraph (b)(2)(i) of this section for rules that preclude CD from making a section 444 election to change its taxable year.

*Example 2.* E, a newly formed partnership, began operations on December 1, 1987, and is owned by calendar year individuals. E desires to make a section 444 election to adopt a September 30 taxable year. E's required taxable year is December 31. Pursuant to paragraph (b)(4)(ii)(A) of this section E's deferral period for the taxable year beginning December 1, 1987, is three months (the number of months between September 30 and December 31).

*Example 3.* Assume that F, a personal service corporation, has historically used a June 30 taxable year. F desires to make a section 444 election to change to an August 31 taxable year, effective for its taxable year beginning July 1, 1987. For purposes of determining the availability of a section 444 election for changing to the taxable year ending August 31, the deferral period of an August 31 taxable year is four months (the number of months between August 31 and December 31). The deferral period for F's existing June 30 taxable year is six months (the number of months between June 30 and December 31). Pursuant to § 1.444-1T(b)(2)(i), F may not make a section 444 election to change to an August 31 taxable year.

(5) *Miscellaneous rules—(i) Special rule for determining the taxable year of a corporation electing S status.* For purposes of this section, and only for purposes of this section, a corporation that elected to be an S corporation for a taxable year beginning in 1987 or 1988 and which elected to be an S corporation prior to September 26, 1988, will not be considered to have adopted or changed its taxable year by virtue of information included on Form 2553, Election by a Small Business Corporation. See Example 8 in paragraph (d) of this section.

(ii) *Special procedure for cases where an income tax return is superseded—(A) In general.* In the case of a partnership, S corporation, or personal service corporation that filed an income tax return for its first taxable year beginning

after December 31, 1986, but subsequently makes a section 444 election that would result in a different year end for such taxable year, the income tax return filed pursuant to the section 444 election will supersede the original return. However, any payments of income tax made with respect to such superseded return will be credited to the taxpayer's superseding return and the taxpayer may file a claim for refund for such payments. See examples (5) and (7) in paragraph (d)(2) of this section.

(B) *Procedure for superseding return.* In order to allow the Service to process the affected income tax returns in an efficient manner, a partnership, S corporation, or personal service corporation that desires to supersede an income tax return in accordance with paragraph (b)(5)(ii)(A) of this section, should type or legibly print at the top of the first page of the income tax return for the taxable year elected—“SECTION 444 ELECTION—SUPERSEDES PRIOR RETURN.”

(iii) *Anti-abuse rule*—If an existing partnership, S corporation or personal service corporation (“predecessor entities”), or the owners thereof, transfer assets to a related party and the principal purpose of such transfer is to—

(A) Create a deferral period greater than the deferral period of the predecessor entity's taxable year, or

(B) Make a section 444 election following the termination of the predecessor entity's section 444 election, then such transfer will be disregarded for purposes of section 444 and this section, even if the deferral created by such change is effectively eliminated by a required payment (within the meaning of section 7519) or deferral of a deduction (to a personal service corporation under section 280H). The following example illustrates the application of this paragraph (b)(5)(iii).

*Example.* Assume that P1 is a partnership that historically used the calendar year and is owned by calendar year partners. Assume that P1 desires to make a section 444 election to change to a September year for the taxable year beginning January 1, 1988. P1 may not make a section 444 election to change taxable years under section 444(b)(2) because its current deferral period is zero. Assume further that P1 transfers a substantial portion of its assets to a newly-formed

partnership (P2), which is owned by the partners of P1. Absent paragraph (b)(5)(iii) of this section, P2 could, if otherwise qualified, make a section 444 election under paragraph (b)(1) of this section to use a taxable year with a three month or less deferral period (*i.e.*, a September 30, October 31, or November 30 taxable year). However, if the principal purpose of the asset transfer was to create a one-, two-, or three-month deferral period by P2 making a section 444 election, the section 444 election shall not be given effect, even if the deferral would be effectively eliminated by P2 making a required payment under section 7519.

(iv) *Special rules for partial months and 52-53-week taxable years.* Except as otherwise provided in § 1.280H-1T(c)(2)(i)(A), for purposes of this section and §§ 1.7519-1T, 1.7519-2T and 1.280H-1T—

(A) A month of less than 16 days is disregarded, and a month of more than 15 days is treated as a full month; and

(B) A 52-53-week taxable year with reference to the end of a particular month will be considered to be the same as a taxable year ending with reference to the last day of such month.

(c) *Effective date.* This section is effective for taxable years beginning after December 31, 1986.

(d) *Examples*—(1) *Changes in taxable year.* The following examples illustrate the provisions of paragraph (b)(2) of this section.

*Example 1.* A is a personal service corporation that historically used a June 30 taxable year. A desires to make a section 444 election to change to an August 31 taxable year, effective with its taxable year beginning July 1, 1987. Under paragraph (b)(4)(ii) of this section, the deferred period of the taxable year to be elected is four months (the number of months between August 31 and December 31). Furthermore, the deferral period of the taxable year that is being changed is six months (the number of months between June 30 and December 31). Pursuant to paragraph (b)(2)(i) of this section, a taxpayer may, if otherwise qualified, make a section 444 election to change to a taxable year only if the deferral period of the taxable year to be elected is not longer than the shorter of three months or the deferred period of the taxable year being changed. Since the deferral period of the taxable year to be elected (August 31) is greater than three months, A may not make a section 444 election to change to the taxable year ending August 31. However, since the deferral period of the taxable year that is being changed is three months or more, A may, if otherwise qualified, make a section

444 election to change to a year ending September 30, 1987 (three-month deferral period), a year ending October 31, 1987 (two-month deferral period), or a year ending November 30, 1987 (one-month deferral period). In addition, instead of making a section 444 election to change its taxable year, A could, if otherwise qualified, make a section 444 election to retain its June end, pursuant to paragraph (b)(3) of this section.

*Example 2.* B, a corporation that historically used an August 31 taxable year, elected on November 1, 1986 to be an S corporation for its taxable year beginning September 1, 1986. As a condition to having the S election accepted, B agreed on Form 2553 to use calendar year. Pursuant to the general effective date provided in paragraph (c) of this section, B may not make a section 444 election for its taxable year beginning in 1986. Thus, B must file a short period income tax return for the period September 1 to December 31, 1986.

*Example 3.* The facts are the same as in Example 2, except that B desires to make a section 444 election for its taxable year beginning January 1, 1987. Absent paragraph (b)(2)(ii) of this section, B would not be allowed to change its taxable year because the deferral period of the taxable year being changed (*i.e.*, the calendar year) is zero. However, pursuant to the special rule provided in paragraph (b)(2)(ii) of this section, B shall apply paragraph (b)(2)(i) of this section by taking into account the deferral period of the last taxable year of B prior to B's election to be an S corporation (four months), rather than the deferral period of B's taxable year that is being changed (zero months). Thus, if otherwise qualified, B may make a section 444 election to change to a taxable year ending September 30, October 31, or November 30, for its taxable year beginning January 1, 1987.

*Example 4.* The facts are the same as in Example 3, except that B files a calendar year income tax return for 1987 rather than making a section 444 election. However, for its taxable year beginning January 1, 1988, B desires to change its taxable year by making a section 444 election. Given that the special rule provided in paragraph (b)(2)(ii) of this section applies to section 444 elections made in taxable years beginning before 1989, B may, if otherwise qualified, make a section 444 election to change to a taxable year ending September 30, October 31, or November 30 for its taxable year beginning January 1, 1988.

*Example 5.* C, a corporation that historically used a June 30 taxable year, elected on December 15, 1986 to be an S corporation for its taxable year beginning July 1, 1987. As a condition to having the S election accepted, C agreed on Form 2553 to use a calendar year. Although pursuant to paragraph (b)(3) of this section, C would, if otherwise quali-

fied, be allowed to retain its June 30 taxable year, C desires to change to a September 30 taxable year by making a section 444 election. Pursuant to paragraph (b)(2) of this section, a taxpayer may, if otherwise qualified, make a section 444 election to change to a taxable year only if the deferral period of the taxable year to be elected is not longer than the shorter of three months or the deferral period of the taxable year being changed. Given these facts, the deferral period of the taxable year to be elected is 3 months (September 30 to December 31) while the deferral period of the taxable year being changed is 6 months (June 30 to December 31). Thus, C may, if otherwise qualified, change to a September 30 taxable year for its taxable year beginning July 1, 1987, by making a section 444 election. The fact that C agreed on Form 2553 to use a calendar year is not relevant.

*Example 6.* D, a corporation that historically used a March 31 taxable year, elects on June 1, 1988 to be an S corporation for its taxable year beginning April 1, 1988. D desires to change to a June 30 taxable year by making a section 444 election for its taxable year beginning April 1, 1988. Pursuant to paragraph (b)(2)(i) of this section, D may not change to a June 30 taxable year because such year would have a deferral period greater than 3 months. However, if otherwise qualified, D may make a section 444 election to change to a taxable year ending September 30, October 31, or November 30 for its taxable year beginning April 1, 1988.

*Example 7.* E, a corporation that began operations on November 1, 1986, elected to be an S corporation on December 15, 1986, for its taxable year beginning November 1, 1986. E filed a short period income tax return for the period November 1 to December 31, 1986. E desires to change to a September 30 taxable year by making a section 444 election for its taxable year beginning January 1, 1987. Although E elected to be an S corporation after September 18, 1986, and before January 1, 1988, paragraph (b)(2)(ii) of this section does not apply to E since E was not a C corporation prior to electing S status. Thus, E may not change its taxable year for the taxable year beginning January 1, 1987, by making a section 444 election.

*Example 8.* The facts are the same as in Example 7, except that E began operations on April 15, 1987, and elected to be an S corporation on June 1, 1987, for its taxable year beginning April 15, 1987. As a condition to being an S corporation, E agreed on Form 2553 to use a calendar year. E desires to make a section 444 election to use a year ending September 30 for its taxable year beginning April 15, 1987. Pursuant to paragraph (b)(5)(i) of this section, E's agreement to use a calendar year on Form 2553 does not mean that E has adopted a calendar year. Thus, E's desire to make a section 444 election to use a

September 30 taxable year will not be considered a change in taxable year and thus paragraph (b)(2) of this section will not apply. Instead, E will be subject to paragraph (b)(1) of this section. Since a September 30 taxable year would result in only a three-month deferral period (September 30 to December 31), E may, if otherwise qualified, make a section 444 election to use a year ending September 30 for its taxable year beginning April 15, 1987.

(2) *Special rule for entities retaining their 1986 taxable year.* The following examples illustrate the provisions of paragraph (b)(3) of this section.

*Example 1.* F, an S corporation that elected to be an S corporation several years ago, has historically used a June 30 taxable year. F desires to retain its June 30 taxable year by making a section 444 election for its taxable year beginning July 1, 1987. Pursuant to paragraph (b)(4)(i) of this section, the deferral period of the taxable year being retained is 6 months (June 30 to December 31, F's required taxable year). Absent the special rule provided in paragraph (b)(3) of this section, F would be subject to the general rule provided in paragraph (b)(1) of this section which limits the deferral period of the taxable year elected to three months or less. However, pursuant to paragraph (b)(3) of this section, F may, if otherwise qualified, make a section 444 election to retain its year ending June 30 for its taxable year beginning July 1, 1987.

*Example 2.* The facts are the same as in Example 1, except that F received permission from the Commissioner to change its taxable year to the calendar year, and filed a short period income tax return for the period July 1 to December 31, 1986. F desires to make a section 444 election to use a year ending June 30 for its taxable year beginning January 1, 1987. Given that F had a December 31 taxable year for its last taxable year beginning in 1986, the special rule provided in paragraph (b)(3) of this section does not allow F to use a June 30 taxable year for its taxable year beginning January 1, 1987. Furthermore, pursuant to paragraph (b)(2)(i) of this section, F is not allowed to change its taxable year from December 31 to June 30 because the deferral period of the taxable year being changed is zero months.

*Example 3.* G, a corporation that historically used an August 31 taxable year, elected to be an S corporation on November 15, 1986, for its taxable year beginning September 1, 1986. As a condition to obtaining S status, G agreed to use a calendar year. Thus, G filed its first S corporation return for the period September 1 to December 31, 1986. G desires to make a section 444 election to use a year ending August 31 for its taxable year beginning January 1, 1987. Since G's last taxable year beginning in 1986 was a calendar year, G

cannot use paragraph (b)(3) of this section, relating to retentions of taxable years, to elect an August 31 taxable year. Thus, G is subject to paragraph (b)(2)(i) of this section, relating to changes in taxable year. Although G, if otherwise qualified, may use the special rule provided in paragraph (b)(2)(ii) of this section, G may only change from its current taxable year (*i.e.*, the calendar year) to a taxable year that has no more than a three-month deferral period (*i.e.*, September 30, October 31, or November 30).

*Example 4.* The facts are the same as in Example 3, except that G elected to be an S corporation for its taxable year beginning September 1, 1987, rather than its taxable year beginning September 1, 1986. As a condition to making its S election, G agreed, on Form 2553, to use the calendar year. However, G has not yet filed a short period income tax return for the period September 1 to December 31, 1987. Given these facts, paragraph (b)(3) of this section would allow G, if otherwise qualified, to make a section 444 election to retain an August 31 taxable year for its taxable year beginning September 1, 1987.

*Example 5.* The facts are the same as in Example 4, except that G has already filed a short period income tax return for the period September 1 to December 31, 1987. Pursuant to paragraph (b)(5)(ii)(A) of this section, G may supersede the return it filed for the period September 1 to December 31, 1987. Thus, pursuant to paragraph (b)(3) of this section, G may, if otherwise qualified, make a section 444 election to retain an August 31 taxable year for the taxable year beginning September 1, 1987. In addition, G should follow the special procedures set forth in paragraph (b)(5)(ii)(B) of this section.

*Example 6.* H, a corporation that historically used a May 31 taxable year, elects to be an S corporation on June 15, 1988 for its taxable year beginning June 1, 1988. H desires to make a section 444 election to use a taxable year other than the calendar year. Since the taxable year in issue is not H's first taxable year beginning after December 31, 1986, H may not use the special rule provided in paragraph (b)(3)(i) and thus may not retain its May 31 year. However, H may, if otherwise qualified, make a section 444 election under paragraph (b)(2)(i) of this section, to change to a taxable year that has no more than a three-month deferral period (*i.e.*, September 30, October 31, or November 30) for its taxable year beginning June 1, 1988.

*Example 7.* I is a partnership that has historically used a calendar year. Sixty percent of the profits and capital of I are owned by Q, a corporation (that is neither an S corporation nor a personal service corporation) that has a June 30 taxable year, and 40 percent of the profits and capital are owned by

R, a calendar year individual. Since the partner that has more than a fifty percent interest in I has a June 30 taxable year, I's required taxable year is June 30. Accordingly, I filed an income tax return for the period January 1 to June 30, 1987. Based on these facts, I may, pursuant to paragraph (b)(5)(ii)(A) of this section, disregard the income tax return filed for the period January 1 to June 30, 1987. Thus, if otherwise qualified, I may make a section 444 election under paragraph (b)(2)(i) of this section to use a calendar year for its taxable year beginning January 1, 1987. If I makes such a section 444 election, I should follow the special procedures set forth in paragraph (b)(5)(ii)(B) of this section.

[T.D. 8205, 53 FR 19694, May 27, 1988, as amended by T.D. 8996, 67 FR 35012, May 17, 2002]

**§ 1.444-2T Tiered structure (temporary).**

(a) *General rule.* Except as provided in paragraph (e) of this section, no section 444 election shall be made or continued with respect to a partnership, S corporation, or personal service corporation that is a member of a tiered structure on the date specified in paragraph (d) of this section. For purposes of this section, the term "personal service corporation" means a personal service corporation as defined in § 1.441-3(c).

(b) *Definition of a member of a tiered structure—(1) In general.* A partnership, S corporation, or personal service corporation is considered a member of a tiered structure if—

(i) The partnership, S corporation, or personal service corporation directly owns any portion of a deferral entity, or

(ii) A deferral entity directly owns any portion of the partnership, S corporation, or personal service corporation.

However, see paragraph (c) of this section for certain de minimis rules, and see paragraph (b)(3) of this section for an anti-abuse rule. In addition, for purposes of this section, a beneficiary of a trust shall be considered to own an interest in the trust.

(2) *Deferral entity—(i) In general.* For purposes of this section, the term "deferral entity" means an entity that is a partnership, S corporation, personal service corporation, or trust. In the case of an affiliated group of corporations filing a consolidated income tax

return that is treated as a personal service corporation pursuant to § 1.441-4T (i), such affiliated group is considered to be a single deferral entity.

(ii) *Grantor trusts.* The term "deferral entity" does not include a trust (or a portion of a trust) which is treated as owned by the grantor or beneficiary under Subpart E, part I, subchapter J, chapter 1, of the Code (relating to grantor trusts), including a trust that is treated as a grantor trust pursuant to section 1361(d)(1)(A) of the Code (relating to qualified subchapter S trusts). Thus, any taxpayer treated under subpart E as owning a portion of a trust shall be treated as owning the assets of the trust attributable to that ownership. The following examples illustrate the provisions of this paragraph (b)(2)(ii).

*Example 1.* A, an individual, is the sole beneficiary of T. T is a trust that owns 50 percent of the profits and capital of X, a partnership that desires to make a section 444 election. Furthermore, pursuant to Subpart E, Part I, subchapter J, chapter 1 of the Code, A is treated as an owner of X. Based upon these facts, T is not a deferral entity and 50 percent of X is considered to be directly owned by A.

*Example 2.* The facts are the same as in Example 1, except that A is a personal service corporation rather than an individual. Given these facts, 50 percent of X is considered to be directly owned by A, a deferral entity. Thus, X is considered to be a member of a tiered structure.

(3) *Anti-abuse rule.* Notwithstanding paragraph (b)(1) of this section, a partnership, S corporation, or personal service corporation is considered a member of a tiered structure if the partnership, S corporation, personal service corporation, or related taxpayers have organized or reorganized their ownership structure or operations for the principal purpose of obtaining a significant unintended tax benefit from making or continuing a section 444 election. For purposes of the preceding sentence, a significant unintended tax benefit results when a partnership, S corporation, or personal service corporation makes a section 444 election and, as a result, a taxpayer (not limited to the entity making the election) obtains a significant deferral of income

substantially all of which is not eliminated by a required payment under section 7519. See examples (15) through (19) in paragraph (f) of this section.

(c) *De minimis rules*—(1) *In general.* For rules relating to a de minimis exception to paragraph (b)(1)(i) of this section (the “downstream de minimis rule”), see paragraph (c)(2) of this section. For rules relating to a de minimis exception to paragraph (b)(1)(ii) of this section (the “upstream de minimis rule”), see paragraph (c)(3) of this section. For rules relating to the interaction of the de minimis rules provided in this paragraph (c) and the “same taxable year exception” provided in paragraph (e) of this section, see paragraph (e)(5) of this section.

(2) *Downstream de minimis rule*—(i) *General rule.* If a partnership, S corporation, or personal service corporation directly owns any portion of one or more deferral entities as of the date specified in paragraph (d) of this section, such ownership is disregarded for purposes of paragraph (b)(1)(i) of this section if, in the aggregate, all such deferral entities accounted for—

(A) Not more than 5 percent of the partnership’s, S corporation’s, or personal service corporation’s adjusted taxable income for the testing period (“5 percent adjusted taxable income test”), or

(B) Not more than 2 percent of the partnership’s, S corporation’s, or personal service corporation’s gross income for the testing period (“2 percent gross income test”). See section 702 (c) for rules relating to the determination of gross income of a partner in a partnership.

See examples (3) through (5) in paragraph (f) of this section.

(ii) *Definition of testing period.* For purposes of this paragraph (c)(2), the term “testing period” means the taxable year that ends immediately prior to the taxable year for which the partnership, S corporation, or personal service corporation desires to make or continue a section 444 election. However, see the special rules provided in paragraph (c)(2)(iv) of this section for certain special cases (e.g., the partnership, S corporation, personal service corporation or deferral entity was not in existence during the entire testing

period). The following example illustrates the application of this paragraph (c)(2)(ii).

*Example.* A partnership desires to make a section 444 election for its taxable year beginning November 1, 1987. The testing period for purposes of determining whether deferral entities owned by such partnership are de minimis under paragraph (c)(2) of this section is the taxable year ending October 31, 1987. If either the partnership or the deferral entities were not in existence for the entire taxable year ending October 1, 1987, see the special rules provided in paragraph (c)(2)(iv) of this section.

(iii) *Definition of adjusted taxable income*—(A) *Partnership.* In the case of a partnership, adjusted taxable income for purposes of paragraph (c)(2) of this section is an amount equal to the sum of the—

(1) Aggregate amount of the partnership items described in section 702(a) (other than credits and tax-exempt income),

(2) Applicable payments defined in section 7519(d)(3) that are deducted in determining the amount described in paragraph (c)(2)(iii)(A)(1) of this section, and

(3) Guaranteed payments defined in section 707(c) that are deducted in determining the amount described in paragraph (c)(2)(iii)(A)(1) of this section and are not otherwise included in paragraph (c)(2)(iii)(A)(2) of this section. For purposes of determining the aggregate amount of partnership items under paragraph (c)(2)(iii)(A)(1) of this section, deductions and losses are treated as negative income. Thus, for example, if under section 702(a) a partnership has \$1,000 of ordinary taxable income, \$500 of specially allocated deductions, and \$300 of capital loss, the partnership’s aggregate amount of partnership items under paragraph (c)(2)(iii)(A)(1) of this section is \$200 (\$1,000–\$500–\$300).

(B) *S corporation.* In the case of an S corporation, adjusted taxable income for purposes of paragraph (c)(2) of this section is an amount equal to the sum of the—

(1) Aggregate amount of the S corporation items described in section 1366(a) (other than credits and tax-exempt income), and

(2) Applicable payments defined in section 7519(d)(3) that are deducted in

determining the amount described in paragraph (c)(2)(iii)(B)(I) of this section.

For purposes of determining the aggregate amount of S corporation items under paragraph (c)(2)(iii)(B)(I) of this section, deductions and losses are treated as negative income. Thus, for example, if under section 1366(a) an S corporation has \$2,000 of ordinary taxable income, \$1,000 of deductions described in section 1366(a)(1)(A) of the Code, and \$500 of capital loss, the S corporation's aggregate amount of S corporation items under paragraph (c)(2)(iii)(B)(I) of this section is \$500 (\$2,000-\$1,000-\$500).

(C) *Personal service corporation.* In the case of a personal service corporation, adjusted taxable income for purposes of paragraph (c)(2) of this section is an amount equal to the sum of the—

(1) Taxable income of the personal service corporation, and

(2) Applicable amounts defined in section 280H(f)(1) that are deducted in determining the amount described in paragraph (c)(2)(iii)(C)(I) of this section.

(iv) *Special rules—(A) Pro-forma rule.* Except as provided in paragraph (c)(iv)(C)(2) of this section, if a partnership, S corporation, or personal service corporation directly owns any interest in a deferral entity as of the date specified in paragraph (d) of this section and such ownership interest is different in amount from the partnership's, S corporation's, or personal service corporation's interest on any day during the testing period, the 5 percent adjusted taxable income test and the 2 percent gross income test must be applied on a pro-forma basis (*i.e.*, adjusted taxable income and gross income must be calculated for the testing period assuming that the partnership, S corporation, or personal service corporation owned the same interest in the deferral entity that it owned as of the date specified in paragraph (d) of this section). The following example illustrates the application of this paragraph (c)(2)(iv)(A).

*Example.* A personal service corporation desiring to make a section 444 election for its taxable year beginning October 1, 1987, acquires a 25 percent ownership interest in a partnership on or after October 1, 1987. Furthermore, the partnership has been in exist-

ence for several years. The personal service corporation must modify its calculations of the 5 percent adjusted taxable income test and the 2 percent gross income test for the testing period ended September 30, 1987, by assuming that the personal service corporation owned 25 percent of the partnership during such testing period and the personal service corporation's adjusted taxable income and gross income were correspondingly adjusted.

(B) *Reasonable estimates allowed.* If the information necessary to complete the pro-forma calculation described in paragraph (c)(2)(iv)(A) of this section is not readily available, the partnership, S corporation, or personal service corporation may make a reasonable estimate of such information.

(C) *Newly formed entities—(1) Newly formed deferral entities.* If a partnership, S corporation, or personal service corporation owns any portion of a deferral entity on the date specified in paragraph (d) of this section and such deferral entity was not in existence during the entire testing period (hereinafter referred to as a "newly formed deferral entity"), both the 5 percent adjusted taxable income test and the 2 percent gross income test are modified as follows. First, the partnership, S corporation, or personal service corporation shall calculate the percentage of its adjusted taxable income or gross income that is attributable to deferral entities, excluding newly formed deferral entities. Second, the partnership, S corporation, or personal service corporation shall calculate (on the date specified in paragraph (d) of this section) the percentage of the tax basis of its assets that are attributable to its tax basis with respect to its ownership interests in all newly formed deferral entities. If the sum of the two percentages is 5 percent or less, the deferral entities are considered de minimis and are disregarded for purposes of paragraph (b)(1)(i) of this section. If the sum of the two percentages is greater than 5 percent, the deferral entities do not qualify for the de minimis rule provided in paragraph (c)(2) of this section and thus the partnership, S corporation, or personal service corporation is considered to be a member of a tiered structure for purposes of this section.

(2) *Newly formed partnership, S corporation, or personal service corporation*

*desiring to make a section 444 election.* If a partnership, S corporation, or personal service corporation desires to make a section 444 election for the first taxable year of its existence, the 5 percent adjusted taxable income test and the 2 percent gross income test are replaced by a 5 percent of assets test. Thus, if on the date specified in paragraph (d) of this section, 5 percent or less of the assets (measured by reference to the tax basis of the assets) of the newly formed partnership, S corporation, or personal service corporation are attributable to the tax basis with respect to its ownership interests in the deferral entities, the deferral entities will be considered de minimis and will be disregarded for purposes of paragraph (b)(1)(i) of this section.

(3) *Upstream de minimis rule.* If a partnership, S corporation, or personal service corporation is directly owned by one or more deferral entities as of the date specified in paragraph (d) of this section, such ownership is disregarded for purposes of paragraph (b)(1)(ii) of this section if on the date specified in paragraph (d) of this section the deferral entities directly own, in the aggregate, 5 percent or less of—

(i) An interest in the current profits of the partnership, or

(ii) The stock (measured by value) of the S corporation or personal service corporation.

See examples (6) and (7) in paragraph (f) of this section.

(d) *Date for determining the existence of a tiered structure—(1) General rule.* For purposes of paragraph (a) of this section, a partnership, S corporation, or personal service corporation will be considered a member of a tiered structure for a particular taxable year if the partnership, S corporation, or personal service corporation is a member of a tiered structure on the last day of the required taxable year (as defined in section 444 (e) of the Code) ending within such year. If a particular taxable year does not include the last day of the required taxable year for such year, the partnership, S corporation, or personal service corporation will not be considered a member of a tiered structure for such year. The following examples illustrate the application of this paragraph (d)(1).

*Example 1.* Assume that a newly formed partnership whose first taxable year begins November 1, 1988, desires to adopt a September 30 taxable year by making a section 444 election. Furthermore, assume that for its taxable year beginning November 1, 1988, the partnership's required taxable year is December 31. If the partnership is a member of a tiered structure on December 31, 1988, it will not be eligible to make a section 444 election for a taxable year beginning November 1, 1988, and ending September 30, 1989.

*Example 2.* Assume an S corporation that historically used a June 30 taxable year desires to make a section 444 election to change to a year ending September 30 for its taxable year beginning July 1, 1987. If the S corporation can make the section 444 election, it will have a short taxable year beginning July 1, 1987, and ending September 30, 1987. Given these facts, the short taxable year beginning July 1, 1987, does not include the last day of the S corporation's required taxable year for such year (i.e., December 31, 1987). Thus, pursuant to paragraph (d)(1) of this section, the S corporation will not be considered a member of a tiered structure for its taxable year beginning July 1, 1987, and ending September 30, 1987.

(2) *Special rule for taxable years beginning in 1987.* For purposes of paragraph (a) of this section, a partnership, S corporation, or personal service corporation will not be considered a member of a tiered structure for a taxable year beginning in 1987 if the partnership, S corporation, or personal service corporation is not a member of a tiered structure on the day the partnership, S corporation, or personal service corporation timely files its section 444 election for such year. The following examples illustrate the application of this paragraph (d)(2).

*Example 1.* Assume that a partnership desires to retain a June 30 taxable year by making a section 444 election for its taxable year beginning July 1, 1987. Furthermore, assume that the partnership's required taxable year for such year is December 31 and that the partnership was a member of a tiered structure on such date. Also assume that the partnership was not a member of a tiered structure as of the date it timely filed its section 444 election for its taxable year beginning July 1, 1987. Based upon the special rule provided in this paragraph (d)(2), the partnership will not be considered a member of a tiered structure for its taxable year beginning July 1, 1987.

*Example 2.* Assume the same facts as in Example 1, except that the partnership was a member of a tiered structure on the date it filed its section 444 election for its taxable

year beginning July 1, 1987, but was not a member of a tiered structure on December 31, 1987. Paragraph (d)(1) of this section would still apply and thus the partnership would not be considered part of a tiered structure for its taxable year beginning July 1, 1987. However, the partnership would be considered a member of a tiered structure for its taxable year beginning July 1, 1988, if the partnership was a member of a tiered structure on December 31, 1988.

(e) *Same taxable year exception*—(1) *In general.* Although a partnership or S corporation is a member of a tiered structure as of the date specified in paragraph (d) of this section, the partnership, S corporation may make or continue a section 444 election if the tiered structure (as defined in paragraph (e)(2) of this section) consists entirely of partnerships or S corporations (or both), all of which have the same taxable year as determined under paragraph (e)(3) of this section. However, see paragraph (e)(5) of this section for the interaction of the de minimis rules provided in paragraph (c) of this section with the same taxable year exception. For purposes of this paragraph (e), two or more entities are considered to have the same taxable year if their taxable years end on the same day, even though they begin on different days. See examples (8) through (14) in paragraph (f) of this section.

(2) *Definition of tiered structure*—(i) *General rule.* For purposes of the same taxable year exception, the members of a tiered structure are defined to include the following entities—

(A) The partnership or S corporation that desires to qualify for the same taxable year exception,

(B) A deferral entity (or entities) directly owned (in whole or in part) by the partnership or S corporation that desires to qualify for the same taxable year exception,

(C) A deferral entity (or entities) directly owning any portion of the partnership or S corporation that desires to qualify for the same taxable year exception, and

(D) A deferral entity (or entities) directly owned (in whole or in part) by a “downstream controlled partnership,” as defined in paragraph (e)(2)(ii) of this section.

(ii) *Special flow-through rule for downstream controlled partnerships.* If more

than 50 percent of a partnership’s profits and capital are owned by a partnership or S corporation that desires to qualify for the same taxable year exception, such owned partnership is considered a downstream controlled partnership for purposes of paragraph (e)(2)(i) of this section. Furthermore, if more than 50 percent of a partnership’s profits and capital are owned by a downstream controlled partnership, such owned partnership is considered a downstream controlled partnership for purposes of paragraph (e)(2)(i) of this section.

(3) *Determining the taxable year of a partnership or S corporation.* The taxable year of a partnership or S corporation to be taken into account for purposes of paragraph (e)(1) of this section is the taxable year ending with or prior to the date specified in paragraph (d) of this section. Furthermore, the determination of such taxable year will take into consideration any section 444 elections made by the partnership or S corporation. See examples (10) and (11) in paragraph (f) of this section.

(4) *Special rule for 52-53-week taxable years.* For purposes of this paragraph (e), a 52-53-week taxable year with reference to the end of a particular month will be considered to be the same as a taxable year ending with reference to the last day of such month.

(5) *Interaction with de minimis rules*—(i) *Downstream de minimis rule*—(A) *In general.* If a partnership or S corporation that desires to make or continue a section 444 election is a member of a tiered structure (as defined in paragraph (e)(2) of this section) and directly owns any member (or members) of the tiered structure with a taxable year different from the taxable year of the partnership or S corporation, such ownership is disregarded for purposes of the same taxable year exception of paragraph (e)(1) of this section provided that, in the aggregate, the de minimis rule of paragraph (c)(2) of this section is satisfied with respect to such owned member (or members). The following example illustrates the application of this paragraph (e)(5)(i)(A).

*Example.* P, a partnership with a June 30 taxable year, owns 60 percent of P1, another partnership with a June 30 taxable year. P also owns 1 percent of P2 and P3, calendar

year partnerships. If, in the aggregate, P's ownership interests in P2 and P3 are considered de minimis under paragraph (c)(2) of this section, P meets the same taxable year exception and may make a section 444 election to retain its June 30 taxable year.

(B) *Special rule for members of a tiered structure directly owned by a downstream controlled partnership.* For purposes of paragraph (e)(5)(i)(A) of this section, a partnership or S corporation desiring to make or continue a section 444 election is considered to directly own any member of the tiered structure (as defined in paragraph (e)(2) of this section) directly owned by a downstream controlled partnership (as defined in paragraph (e)(2)(ii) of this section). The adjusted taxable income or gross income of the partnership or S corporation that is attributable to a member of a tiered structure directly owned by a downstream controlled partnership equals the adjusted taxable income or gross income of such member multiplied by the partnership's or S corporation's indirect ownership percentage of such member. The following example illustrates the application of this paragraph (e)(5)(i)(B).

*Example.* P, a partnership, desires to retain its June 30 taxable year by making a section 444 election. However, as of the date specified in paragraph (d) of this section, P owns 75 percent of P1, a June 30 partnership, and P1 owns 40 percent of P2, a calendar year partnership. P also owns 25 percent of P3, a calendar year partnership. Pursuant to paragraphs (e)(5)(i)(A) and (B) of this section, P may only qualify to use the same taxable year exception if, in the aggregate, P2 and P3 are de minimis with respect to P. Pursuant to paragraph (e)(5)(i)(B) of this section, P's adjusted taxable income or gross income attributable to P2 equals 30 percent (75 percent times 40 percent) of P2's adjusted taxable income or gross income.

(ii) *Upstream de minimis rule.* If a partnership or S corporation that desires to make or continue a section 444 election is a member of a tiered structure (as defined in paragraph (e)(2) of this section) and is owned directly by a member (or members) of the tiered structure with taxable years different from the taxable year of the partnership or S corporation, such ownership is disregarded for purposes of the same taxable year exception of paragraph (e)(1) of this section provided that, in the ag-

gregate, the de minimis rule of paragraph (c)(3) of this section is satisfied with respect to such owning member (or members). See Example 12 of paragraph (f) of this section.

(f) *Examples.* The provisions of this section may be illustrated by the following examples.

*Example 1.* A, a partnership, desires to make or continue a section 444 election. However, on the date specified in paragraph (d) of this section, A is owned by a combination of individuals and S corporations. The S corporations are deferral entities, as defined in paragraph (b)(2) of this section. Thus, pursuant to paragraph (b)(1)(ii) of this section, A will be a member of a tiered structure unless under paragraph (c)(3) of this section, the S corporations, in the aggregate, own a de minimis portion of A. If the S corporations' ownership in A is not considered de minimis under paragraph (c)(3) of this section, A is a member of a tiered structure and will be allowed to make or continue a section 444 election only if it meets the same taxable year exception provided in paragraph (e) of this section.

*Example 2.* B, a partnership, desires to make or continue a section 444 election. However, on the date specified in paragraph (d) of this section, B is a partner in two partnerships, B1 and B2. B1 and B2 are deferral entities, as defined in paragraph (b)(2) of this section. Thus, under paragraph (b)(1)(i) of this section, B will be a member of a tiered structure unless B's aggregate ownership interests in B1 and B2 are considered de minimis under paragraph (c)(2) of this section. If B is a member of a tiered structure on the date specified in paragraph (d) of this section, B will be allowed to make or continue a section 444 election only if it meets the same taxable year exception provided in paragraph (e) of this section.

*Example 3.* C, a partnership with a September 30 taxable year, is 100 percent owned by calendar year individuals. C desires to make a section 444 election for its taxable year beginning October 1, 1987. However, on the date specified in paragraph (d) of this section, C owns a 1 percent interest in C1, a partnership. C does not own any other interest in a deferral entity. For the taxable year ended September 30, 1987, 10 percent of C's adjusted taxable income (as defined in paragraph (c)(2)(iii) of this section) was attributable to C's partnership interest in C1. Furthermore, 4 percent of C's gross income for the taxable year ended September 30, 1987, was attributable to C's partnership interest in C1. Under paragraph (c)(2) of this section, C's partnership interest in C1 is not de minimis because during the testing period more than 5 percent of C's adjusted taxable income is attributable to C1 and more than 2 percent

of C's gross income is attributable to C1. Thus, C is a member of a tiered structure for its taxable year beginning October 1, 1987.

*Example 4.* The facts are the same as Example 3, except that for the taxable year ended September 30, 1987, only 2 percent of C's adjusted taxable income was attributable to C1. Under paragraph (c)(2) of this section, C's partnership interest in C1 is considered de minimis for purposes of determining whether C is a member of a tiered structure because not more than 5 percent of C's adjusted taxable income during the testing period is attributable to C1. Thus, C is not a member of a tiered structure for its taxable year beginning October 1, 1987.

*Example 5.* The facts are the same as Example 4, except that in addition to owning C1, C also owns 15 percent of C2, another partnership. For the taxable year ended September 30, 1987, 2 percent of C's adjusted taxable income is attributable to C1 and an additional 4 percent is attributable to C2. Furthermore, for the taxable year ended September 30, 1987, 4 percent of C's gross income is attributable to C1 while 3 percent is attributable to C2. Under paragraph (c)(2) of this section, C1 and C2 must be aggregated for purposes of determining whether C meets either the 5 percent adjusted taxable income test or the 2 percent gross income test. Since C's adjusted taxable income attributable to C1 and C2 is 6 percent (2 percent + 4 percent) and C's gross income attributable to C1 and C2 is 7 percent (4 percent + 3 percent), C does not meet the downstream de minimis rule provided in paragraph (c)(2) of this section. Thus, C is a member of a tiered structure for its taxable year beginning October 1, 1987.

*Example 6.* The facts are the same as Example 3, except that instead of determining whether C is part of a tiered structure, the issue is whether C1 is part of a tiered structure. In addition, assume that on the date specified in paragraph (d) of this section, the remaining 99 percent of C1 is owned by calendar year individuals and C1 does not own an interest in any deferral entity. Although C in Example 3 was considered to be a part of a tiered structure by virtue of its ownership interest in C1, C1 must be tested separately to determine whether it is part of a tiered structure. Since C's interest in C1 is 5 percent or less, C's interest in C1 is de minimis with respect to C1. See paragraph (c)(3) of this section. Thus, based upon these facts, C1 is not part of a tiered structure.

*Example 7.* The facts are the same as Example 6, except that the remaining 99 percent of C1 is owned 94 percent by calendar year individuals and 5 percent by C3, another partnership. Thus, deferral entities own 6 percent of C1 (1 percent owned by C and 5 percent owned by C3). Under paragraph (c)(3) of this section, deferral entities own more than a de minimis interest (*i.e.*, 5 percent) of C1, and thus C1 is part of a tiered structure.

*Example 8.* D, a partnership with a September 30 taxable year, desires to make a section 444 election for its taxable year beginning October 1, 1987. On December 31, 1987, and the date D plans to file its section 444 election, D is 10 percent owned by D1, a personal service corporation with a September 30 taxable year, and 90 percent owned by calendar year individuals. Furthermore, D1 will retain its September 30 taxable year because it previously established a business purpose for such year. Since D is owned in part by D1, a personal service corporation, and the ownership interest is not de minimis under paragraph (c)(3) of this section, D is considered a member of a tiered structure for its taxable year beginning October 1, 1987. Furthermore, although D and D1 have the same taxable year, D does not qualify for the same taxable year exception provided in paragraph (e) of this section because D1 is a personal service corporation rather than a partnership or S corporation. Thus, pursuant to paragraph (a) of this section, D may not make a section 444 election for its taxable year beginning October 1, 1987.

*Example 9.* The facts are the same as Example 8, except that D1 is a partnership rather than a personal service corporation. Based upon these facts, D qualifies for the same taxable year exception provided in paragraph (e) of this section. Thus, D may make a section 444 election for its taxable year beginning October 1, 1987.

*Example 10.* The facts are the same as Example 9, except that D1 has not established a business purpose for a September 30 taxable year. In addition, D1 does not desire to make a section 444 election and, under section 706(b), D1 will be required to change to a calendar year for its taxable year beginning October 1, 1987. Pursuant to paragraph (e)(3) of this section, D and D1 do not have the same taxable year for purposes of the same taxable year exception provided in paragraph (e) of this section. Thus, D may not make a section 444 election for its taxable year beginning October 1, 1987.

*Example 11.* The facts are the same as Example 8, except that D1 is a partnership with a March 31 taxable year. Furthermore, for its taxable year beginning April 1, 1987, D1 will change to a September 30 taxable year by making a section 444 election. Pursuant to paragraph (e)(3) of this section, D1 is considered to have a September 30 taxable year for purposes of determining whether D qualifies for the same taxable year exception provided in paragraph (e) of this section. Since both D and D1 will have the same taxable year as of the date specified in paragraph (d) of this section, D may make a section 444 election for its taxable year beginning October 1, 1987.

*Example 12.* The facts are the same as Example 11, except that instead of the remaining 90 percent of D being owned by calendar

year individuals, it is owned 86 percent by individuals and 4 percent by D2, a calendar year partnership. Thus, D, a September 30 partnership, is 10 percent owned by D1, a September 30 partnership, 86 percent owned by calendar year individuals, and 4 percent owned by D2, a calendar year partnership. Under paragraph (e)(5)(ii) of this section, D2's ownership interest in D is considered de minimis for purposes of the same taxable year exception. Since D2's ownership interest in D is considered de minimis, it is disregarded for purposes of determining whether D qualifies for the same taxable year exception provided in paragraph (e) of this section. Thus, since both D and D1 will have the same taxable year as of the date specified in paragraph (d) of this section, D may make a section 444 election for its taxable year beginning October 1, 1987.

*Example 13.* E, a partnership with a June 30 taxable year, desires to make a section 444 election for its taxable year beginning July 1, 1987. On the date specified in paragraph (d) of this section, E is 100 percent owned by calendar year individuals; E owns 99 percent of the profits and capital of E1, a partnership with a June 30 taxable year; and E1 owns 30 percent of the profits and capital of E2, a partnership with a September 30 taxable year. E owns no other deferral entities. Pursuant to paragraph (b)(1)(i) of this section, E is considered to be a member of a tiered structure. Furthermore, pursuant to paragraph (e) of this section, E does not qualify for the same taxable year exception because E2 does not have the same taxable year as E and E1.

*Example 14.* The facts are the same as Example 13, except that E owns only 49 percent (rather than 99 percent) of the profits and capital of E1. Pursuant to paragraph (e) of this section, E qualifies for the same taxable year exception because E and E1 have the same taxable year. Pursuant to paragraph (e) of this section, E1's ownership interest in E2 is disregarded since E does not own more than 50 percent of E1's profits and capital.

*Example 15.* Prior to consideration of the anti-abuse rule provided in paragraph (b)(3) of this section, H, a partnership that commenced operations on October 1, 1987, is eligible to make a section 444 election for its taxable year beginning October 1, 1987. Although H may obtain a significant deferral of income substantially all of which is not eliminated by a required payment under section 7519 (since there will be no required payment for H's first taxable year), the anti-abuse rule of paragraph (b)(3) will not apply unless the principal purpose of organizing H was the attainment of a significant deferral of income that would result from making a section 444 election.

*Example 16.* F, a partnership with a January 31 taxable year, desires to make a section 444 election to retain its January 31 tax-

able year for the taxable year beginning February 1, 1987. F is 100 percent owned by calendar year individuals. Prior to the date specified in paragraph (d) of this section, F contributes substantially all of its assets to F1, a partnership, in exchange for a 51 percent interest in F1. The remaining 49 percent of F1 is owned by the calendar year individuals owning 100 percent of F. If F is allowed to make a section 444 election to retain its January 31 taxable year, F1's required taxable year will be January 31 since a majority of F1's partners use a January 31 taxable year (see § 1.706-3T). F's principal purpose for creating F1 and contributing its assets to F1 is to obtain an 11-month deferral on 49 percent of the income previously earned by F and now earned by F1. Pursuant to paragraph (b)(3) of this section, F is not allowed to make a section 444 election for its taxable year beginning February 1, 1987.

*Example 17.* The facts are the same as in Example 16, except that F does not create F1 and contribute its assets to F1 until immediately after F makes its section 444 election for the taxable year beginning February 1, 1987. Thus, F is allowed to make a section 444 election for its taxable year beginning February 1, 1987. However, pursuant to paragraph (b)(3) of this section, F will have its section 444 election terminated for subsequent years unless the tax deferral inherent in the structure is eliminated (e.g., F1 is liquidated or the individual owners of F contribute their interests in F1 to F) prior to the date specified in paragraph (d) of this section for subsequent taxable years beginning on or after February 1, 1988.

*Example 18.* The facts are the same as in Example 16, except that F1 is 99 percent owned by F and none of the individual owners of F own any portion of F1. Furthermore, F obtained no tax benefit from creating and contributing assets to F1. Given these facts paragraph (b)(3) of this section does not apply and thus, F may make a section 444 election for its taxable year beginning February 1, 1987.

*Example 19.* G, a partnership with an October 31 taxable year, desires to retain its October 31 taxable year for its taxable year beginning November 1, 1987. However, as of December 31, 1987, G owns a 30 percent interest in G1, a calendar year partnership. G owns no other deferral entity, and G is 100 percent owned by calendar year individuals. Furthermore, G's interest in G1 does not meet the de minimis rule provided in paragraph (c)(3) of this section. Thus, in order to avoid being a tiered structure, G sells its interest in G1 to an unrelated third party prior to the date G timely makes its section 444 election for its taxable year beginning November 1, 1987. Although the sale of G1 allows G to qualify to make a section 444 election, and therefore to obtain a significant tax benefit, such benefit is not unintended. Thus, paragraph (b)(3) of

this section does not apply, and G may make a section 444 election for its taxable year beginning November 1, 1987.

(g) *Effective date.* This section is effective for taxable years beginning after December 31, 1986.

[T.D. 8205, 53 FR 19698, May 27, 1988, as amended by T.D. 8996, 67 FR 35012, May 17, 2002]

**§ 1.444-3T Manner and time of making section 444 election (temporary).**

(a) *In general.* A section 444 election shall be made in the manner and at the time provided in this section.

(b) *Manner and time of making election—(1) General rule.* A section 444 election shall be made by filing a properly prepared Form 8716, "Election to Have a Tax Year Other Than a Required Tax Year," with the Service Center indicated by the instructions to Form 8716. Except as provided in paragraphs (b) (2) and (4) of this section, Form 8716 must be filed by the earlier of—

(i) The 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective, or

(ii) The due date (without regard to extensions) of the income tax return resulting from the section 444 election.

In addition, a copy of Form 8716 must be attached to Form 1065 or Form 1120 series form, whichever is applicable, for the first taxable year for which the section 444 election is made. Form 8716 shall be signed by any person who is authorized to sign Form 1065 or Form 1120 series form, whichever is applicable. (See sections 6062 and 6063, relating to the signing of returns.) The provisions of this paragraph (b)(1) may be illustrated by the following examples.

*Example 1.* A, a partnership that began operations on September 10, 1988, is qualified to make a section 444 election to use a September 30 taxable year for its taxable year beginning September 10, 1988. Pursuant to paragraph (b)(1) of this section, A must file Form 8716 by the earlier of the 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective (*i.e.*, February 15, 1989) or the due date (without regard to extensions) of the partnership's tax return for the period September 10, 1988 to September 30, 1988 (*i.e.*, January 15, 1989). Thus, A must file Form 8716 by January 15, 1989.

*Example 2.* The facts are the same as in Example 1, except that A began operations on October 20, 1988. Based upon these facts, A must file Form 8716 by March 15, 1989, the 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective.

*Example 3.* B is a corporation that first becomes a personal service corporation for its taxable year beginning September 1, 1988. B qualifies to make a section 444 election to use a September 30 taxable year for its taxable year beginning September 1, 1988. Pursuant to this paragraph (b)(1), B must file Form 8716 by December 15, 1988, the due date of the income tax return for the short period September 1 to September 30, 1988.

(2) *Special extension of time for making an election.* If, pursuant to paragraph (b)(1) of this section, the due date for filing Form 8716 is prior to July 26, 1988, such date is extended to July 26, 1988. The provisions of this paragraph (b)(2) may be illustrated by the following examples.

*Example 1.* B, a partnership that historically used a June 30 taxable year, is qualified to make a section 444 election to retain a June 30 taxable year for its taxable year beginning July 1, 1987. Absent paragraph (b)(2) of this section, B would be required to file Form 8716 by December 15, 1987. However, pursuant to paragraph (b)(2) of this section, B's due date for filing Form 8716 is extended to July 26, 1988.

*Example 2.* C, a partnership that began operations on January 20, 1988, is qualified to make a section 444 election to use a year ending September 30 for its taxable year beginning January 20, 1988. Absent paragraph (b)(2) of this section, C is required to file Form 8716 by June 15, 1988 (the 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective). However, pursuant to paragraph (b)(2) of this section, the due date for filing Form 8716 is July 26, 1988.

(3) *Corporation electing to be an S corporation—(i) In general.* A corporation electing to be an S corporation is subject to the same time and manner rules for filing Form 8716 as any other taxpayer making a section 444 election. Thus, a corporation electing to be an S corporation that desires to make a section 444 election is not required to file Form 8716 with its Form 2553, "Election by a Small Business Corporation." However, a corporation electing to be an S corporation after September 26,

1988, is required to state on Form 2553 its intention to—

(A) Make a section 444 election, if qualified, or

(B) Make a “back-up section 444 election” as described in paragraph (b)(4) of this section.

If a corporation electing to be an S corporation fails to state either of the above intentions, the District Director may, at his discretion, disregard any section 444 election for such taxpayer.

(ii) *Examples.* The provisions of this paragraph (b)(3) may be illustrated by the following examples.

*Example 1.* D is a corporation that commences operations on October 1, 1988, and elects to be an S corporation for its taxable year beginning October 1, 1988. All of D’s shareholders use the calendar year as their taxable year. D desires to adopt a September 30 taxable year. D does not believe it has a business purpose for a September 30 taxable year and thus it must make a section 444 election to use such year. Based on these facts, D must, pursuant to the instructions to Form 2553, state on Form 2553 that, if qualified, it will make a section 444 election to adopt a year ending September 30 for its taxable year beginning October 1, 1988. If D is qualified (*i.e.*, D is not a member of a tiered structure on December 31, 1988) to make a section 444 election for its taxable year beginning October 1, 1988, D must file Form 8716 by March 15, 1989. If D ultimately is not qualified to make a section 444 election for its taxable year beginning October 1, 1988, D’s election to be an S corporation will not be effective unless, pursuant to the instructions to Form 2553, D made a back-up calendar year election (*i.e.*, an election to adopt the calendar year in the event D ultimately is not qualified to make a section 444 election for such year).

*Example 2.* The facts are the same as in Example 1, except that D believes it can establish, to the satisfaction of the Commissioner, a business purpose for adopting a September 30 taxable year. However, D desires to make a “back-up section 444 election” (see paragraph (b)(4) of this section) in the event that the Commissioner does not grant permission to adopt a September 30 taxable year based upon business purpose. Based on these facts, D must, pursuant to the instructions to Form 2553, state on Form 2553 its intention, if qualified, to make a back-up section 444 election to adopt a September 30 taxable year. If, by March 15, 1989, D has not received permission to adopt a September 30 taxable year and D is qualified to make a section 444 election, D must make a back-up election in accordance with paragraph (b)(4) of this section.

(4) *Back-up section 444 election—(i) General rule.* A taxpayer that has requested (or is planning to request) permission to use a particular taxable year based upon business purpose, may, if otherwise qualified, file a section 444 election (referred to as a “back-up section 444 election”). If the Commissioner subsequently denies the business purpose request, the taxpayer will, if otherwise qualified, be required to activate the back-up section 444 election. See examples (1) and (2) in paragraph (b)(4)(iv) of this section.

(ii) *Procedures for making a back-up section 444 election.* In addition to following the general rules provided in this section, a taxpayer making a back-up section 444 election should, in order to allow the Service to process the affected returns in an efficient manner, type or legibly print the words “BACK-UP ELECTION” at the top of Form 8716, “Election to Have a Tax Year Other Than a Required Tax Year.” However, if such Form 8716 is filed on or after the date a Form 1128, Application for Change in Accounting Period, is filed with respect to a period that begins on the same date, the words “FORM 1128 BACK-UP ELECTION” should be typed or legibly printed at the top of Form 8716.

(iii) *Procedures for activating a back-up section 444 election—(A) Partnerships and S corporations—(1) In general.* A back-up section 444 election made by a partnership or S corporation is activated by filing the return required in § 1.7519-2T (a)(2)(i) and making the payment required in § 1.7519-1T. The due date for filing such return and payment will be the later of—

(i) The due dates provided in § 1.7519-2T, or

(ii) 60 days from the date the Commissioner denies the business purpose request.

However, interest will be assessed (at the rate provided in section 6621 (a)(2)) on any required payment made after the due date (without regard to any extension for a back-up election) provided in § 1.7519-2T (a)(4)(i) or (a)(4)(ii), whichever is applicable, for such payment. Interest will be calculated from such due date to the date such amount is actually paid. Interest assessed under this paragraph will be separate

from any required payments. Thus, interest will not be subject to refund under § 1.7519-2T.

(2) *Special rule if Form 720 used to satisfy return requirement.* If, pursuant to § 1.7519-2T (a)(3), a partnership or S corporation must use Form 720, "Quarterly Federal Excise Tax Return," to satisfy the return requirement of § 1.7519-2T (a)(2), then in addition to following the general rules provided in § 1.7519-2T, the partnership or S corporation must type or legibly print the words "ACTIVATING BACK-UP ELECTION" on the top of Form 720. A partnership or S corporation that would otherwise file a Form 720 on or before the date specified in paragraph (b)(4)(iii)(A)(I) of this section may satisfy the return requirement by including the necessary information on such Form 720. Alternatively, such partnership or S corporation may file an additional Form 720 (*i.e.*, a Form 720 separate from the Form 720 it would otherwise file). Thus, for example, if the due date for activating an S corporation's back-up election is November 15, 1988, and the S corporation must file a Form 720 by October 31, 1988, to report manufacturers excise tax for the third quarter of 1988, the S corporation may use that Form 720 to activate its back-up election. Alternatively, the S corporation may file its regular Form 720 that is due October 31, 1988, and file an additional Form 720 by November 15, 1988, activating its back-up election.

(B) *Personal service corporations.* A back-up section 444 election made by a personal service corporation is activated by filing Form 8716 with the personal service corporation's original or amended income tax return for the taxable year in which the election is first effective, and typing or legibly printing the words—"ACTIVATING BACK-UP ELECTION" on the top of such income tax return.

(iv) *Examples.* The provisions of this paragraph (b)(4) may be illustrated by the following examples. Also see Example 2 in paragraph (b)(3) of this section.

*Example 1.* E, a partnership that historically used a June 30 taxable year, requested (pursuant to section 6 of Rev. Proc. 87-32, 1987-28 I.R.B. 14) permission from the Commissioner to retain a June 30 taxable year for its taxable year beginning July 1, 1987.

Furthermore, E is qualified to make a section 444 election to retain a June 30 taxable year for its taxable year beginning July 1, 1987. However, as of the date specified in paragraph (b)(2) of this section, the Commissioner has not determined whether E has a valid business purpose for retaining its June 30 taxable year. Based on these facts, E may, by the date specified in paragraph (b)(2) of this section, make a back-up section 444 election to retain its June 30 taxable year.

*Example 2.* The facts are the same as in Example 1. In addition, on August 12, 1988, the Internal Revenue Service notifies E that its business purpose request is denied. E asks for reconsideration of the Service's decision, and the Service sustains the original denial on September 30, 1988. Based on these facts, E must activate its back-up section 444 election within 60 days after September 30, 1988.

*Example 3.* The facts are the same as in Example 1, except that E desires to make a section 444 election to use a year ending September 30 for its taxable year beginning July 1, 1987. Although E qualifies to make a section 444 election to retain its June 30 taxable year, E may make a back-up section 444 election for a September 30 taxable year.

(c) *Administrative relief—(1) Extension of time to file income tax returns—(i) Automatic extension.* If a partnership, S corporation, or personal service corporation makes a section 444 election (or does not make a section 444 election, either because it is ineligible or because it decides not to make the election, and therefore changes to its required taxable year) for its first taxable year beginning after December 31, 1986, the due date for filing its income tax return for such year shall be the later of—

(A) The due date established under—

(1) Section 6072, in the case of Form 1065,

(2) § 1.6037-1 (b), in the case of Form 1120S,

(3) Section 6072 (b), in the case of other Form 1120 series form; or

(B) August 15, 1988.

The words "SECTION 444 RETURN" should, in order to allow the Service to process the affected returns in an efficient manner, be typed or legibly printed at the top of the Form 1065 or Form 1120 series form, whichever is applicable, filed under this paragraph (c)(1)(i).

(ii) *Additional extensions.* If the due date of the income tax return for the first taxable year beginning after December 31, 1986, extended as provided in paragraph (c)(1)(i)(B) of this section,

occurs before the date that is 6 months after the date specified in paragraph (c)(1)(i)(A) of this section, the partnership, S corporation, or personal service corporation may request an additional extension or extensions of time (up to 6 months after the date specified in paragraph (c)(1)(i)(A) of this section) to file its income tax return for such first taxable year. The request must be made by the later of the date specified in paragraph (c)(1)(i)(A) or (c)(1)(i)(B) of this section and must be made on Form 7004, "Application for Automatic Extension of Time To File Corporation Income Tax Return", or Form 2758, "Application for Extension of Time to File U.S. Partnership, Fiduciary, and Certain Other Returns," whichever is applicable, in accordance with the form and its instructions. In addition, the following words should be typed or legibly printed at the top of the form—"SECTION 444 REQUEST FOR ADDITIONAL EXTENSION."

(iii) *Examples.* The provisions of paragraph (c)(1) of this section may be illustrated by the following examples.

*Example 1.* G, a partnership that historically used a January 31 taxable year, makes a section 444 election to retain such year for its taxable year beginning February 1, 1987. Absent paragraph (c)(1)(i) of this section, G's Form 1065 for the taxable year ending January 31, 1988, is due on or before May 15, 1988. However, if G types or legibly prints "SECTION 444 RETURN" at the top of Form 1065 for such year, paragraph (c)(1)(i) of this section automatically extends the due date of such return to August 15, 1988.

*Example 2.* The facts are the same as in Example 1, except that G desires to extend the due date of its income tax return for the year ending January 31, 1988, to a date beyond August 15, 1988. Pursuant to paragraph (c)(1)(ii) of this section, G may extend such return to November 15, 1988 (*i.e.*, the date that is up to 6 months after May 15, 1988, the normal due date of the return). However, in order to obtain this additional extension, G must file Form 2758 pursuant to paragraph (c)(1)(i) of this section on or before August 15, 1988.

*Example 3.* H, a partnership that historically used a May 31 taxable year, makes a section 444 election to use a year ending September 30 for its taxable year beginning on June 1, 1987. Absent paragraph (c)(1)(i) of this section, H's Form 1065 for the taxable year beginning June 1, 1987, and ending September 30, 1987, is due on or before January 15, 1988. However, if H types or legibly prints "SECTION 444 RETURN" at the top of Form 1065

for such year, paragraph (c)(1)(i) of this section automatically extends the due date of such return to August 15, 1988.

*Example 4.* The facts are the same as in Example 3, except H desires to further extend (*i.e.*, extend beyond August 15, 1988) the due date of its income tax return for its taxable year beginning June 1, 1987, and ending September 30, 1987. Since August 15, 1988, is 6 months or more after the due date (without extensions) of such return, paragraph (c)(1)(ii) of this section prevents H from further extending the time for filing such return.

*Example 5.* I, a partnership that historically used a June 30 taxable year, considered making a section 444 election to retain such taxable year, but eventually decided to change to a December 31, taxable year (I's required taxable year). Absent paragraph (c)(1)(i) of this section, I's Form 1065 for the taxable year beginning July 1, 1987, and ending December 31, 1987, is due on or before April 15, 1988. Pursuant to paragraph (c)(1)(i) of this section, if I types or legibly prints "SECTION 444 RETURN" at the top of Form 1065 for such year, paragraph (c)(1)(i) of this section automatically extends the due date of such return to August 15, 1988. In addition, I may further extend such return pursuant to paragraph (c)(1)(ii) of this section.

(2) *No penalty for certain late payments—(i) In general.* In the case of a personal service corporation or S corporation described in paragraph (c)(1)(i) of this section, no penalty under section 6651 (a)(2) will be imposed for failure to pay income tax (if any) for the first taxable year beginning after December 31, 1986, but only for the period beginning with the last date for payment and ending with the later of the date specified in paragraph (c)(1)(i) or paragraph (c)(1)(ii) of this section.

(ii) *Example.* The provisions of paragraph (c)(2)(i) of this section may be illustrated by the following example.

*Example.* J, a personal service corporation that historically used a January 31 taxable year, makes a section 444 election to retain such year for its taxable year beginning February 1, 1987. The last date (without extension) for payment of J's income tax (if any) for its taxable year beginning February 1, 1987, is April 15, 1988. However, under paragraph (c)(2)(i) of this section, no penalty under section 6651(a)(2) will be imposed on any underpayment of income tax for the period beginning April 15, 1988 and ending August 15, 1988.

(d) *Effective date.* This section is effective for taxable years beginning after December 31, 1986.

[T.D. 8205, 53 FR 19703, May 27, 1988]

**§ 1.444-4 Tiered structure.**

(a) *Electing small business trusts.* For purposes of § 1.444-2T, solely with respect to an S corporation shareholder, the term *deferral entity* does not include a trust that is treated as an electing small business trust under section 1361(e). An S corporation with an electing small business trust as a shareholder may make an election under section 444. This paragraph is applicable to taxable years beginning on and after December 29, 2000; however, taxpayers may voluntarily apply it to taxable years of S corporations beginning after December 31, 1996.

(b) *Certain tax-exempt trusts.* For purposes of § 1.444-2T, solely with respect to an S corporation shareholder, the term *deferral entity* does not include a trust that is described in section 401(a) or 501(c)(3), and is exempt from taxation under section 501(a). An S corporation with a trust as a shareholder that is described in section 401(a) or section 501(c)(3), and is exempt from taxation under section 501(a) may make an election under section 444. This paragraph is applicable to taxable years beginning on and after December 29, 2000; however taxpayers may voluntarily apply it to taxable years of S corporations beginning after December 31, 1997.

(c) *Certain terminations disregarded—*  
(1) *In general.* An S corporation that is described in this paragraph (c)(1) may request that a termination of its election under section 444 be disregarded, and that the S corporation be permitted to resume use of the year it previously elected under section 444, by following the procedures of paragraph (c)(2) of this section. An S corporation is described in this paragraph if the S corporation is otherwise qualified to make a section 444 election, and its previous election was terminated under § 1.444-2T(a) solely because—

(i) In the case of a taxable year beginning after December 31, 1996, a trust that is treated as an electing small business trust became a shareholder of such S corporation; or

(ii) In the case of a taxable year beginning after December 31, 1997, a trust that is described in section 401(a) or 501(c)(3), and is exempt from taxation under section 501(a) became a shareholder of such S corporation.

(2) *Procedure—*(i) *In general.* An S corporation described in paragraph (c)(1) of this section that wishes to make the request described in paragraph (c)(1) of this section must do so by filing Form 8716, “Election To Have a Tax Year Other Than a Required Tax Year,” and typing or printing legibly at the top of such form—“CONTINUATION OF SECTION 444 ELECTION UNDER § 1.444-4.” In order to assist the Internal Revenue Service in updating the S corporation’s account, on Line 5 the Box “Changing to” should be checked. Additionally, the election month indicated must be the last month of the S corporation’s previously elected section 444 election year, and the effective year indicated must end in 2002.

(ii) *Time and place for filing Form 8716.* Such form must be filed on or before October 15, 2002, with the service center where the S corporation’s returns of tax (Forms 1120S) are filed. In addition, a copy of the Form 8716 should be attached to the S corporation’s short period Federal income tax return for the first election year beginning on or after January 1, 2002.

(3) *Effect of request—*(i) *Taxable years beginning on or after January 1, 2002.* An S corporation described in paragraph (c)(1) of this section that requests, in accordance with this paragraph, that a termination of its election under section 444 be disregarded will be permitted to resume use of the year it previously elected under section 444, commencing with its first taxable year beginning on or after January 1, 2002. Such S corporation will be required to file a return under § 1.7519-2T for each taxable year beginning on or after January 1, 2002. No payment under section 7519 will be due with respect to the first taxable year beginning on or after January 1, 2002. However, a required payment will be due on or before May 15, 2003, with respect to such S corporation’s second continued section 444 election year that begins in calendar year 2002.

(ii) *Taxable years beginning prior to January 1, 2002.* An S corporation described in paragraph (c)(1) of this section that requests, in accordance with this paragraph, that a termination of its election under section 444 be disregarded will not be required to amend any prior Federal income tax returns, make any required payments under section 7519, or file any returns under § 1.7519-2T, with respect to taxable years beginning on or after the date the termination of its section 444 election was effective and prior to January 1, 2002.

(iii) *Section 7519: required payments and returns.* The Internal Revenue Service waives any requirement for an S corporation described in paragraph (c)(1) of this section to file the federal tax returns and make any required payments under section 7519 for years prior to the taxable year of continuation as described in paragraph (c)(3)(i) of this section, if for such years the S corporation filed its federal income tax returns on the basis of its required taxable year.

[T.D. 8994, 67 FR 34394, May 14, 2002]

#### METHODS OF ACCOUNTING

##### METHODS OF ACCOUNTING IN GENERAL

#### § 1.446-1 General rule for methods of accounting.

(a) *General rule.* (1) Section 446(a) provides that taxable income shall be computed under the method of accounting on the basis of which a taxpayer regularly computes his income in keeping his books. The term “method of accounting” includes not only the overall method of accounting of the taxpayer but also the accounting treatment of any item. Examples of such over-all methods are the cash receipts and disbursements method, an accrual method, combinations of such methods, and combinations of the foregoing with various methods provided for the accounting treatment of special items. These methods of accounting for special items include the accounting treatment prescribed for research and experimental expenditures, soil and water conservation expenditures, depreciation, net operating losses, etc. Except for deviations permitted or re-

quired by such special accounting treatment, taxable income shall be computed under the method of accounting on the basis of which the taxpayer regularly computes his income in keeping his books. For requirement respecting the adoption or change of accounting method, see section 446(e) and paragraph (e) of this section.

(2) It is recognized that no uniform method of accounting can be prescribed for all taxpayers. Each taxpayer shall adopt such forms and systems as are, in his judgment, best suited to his needs. However, no method of accounting is acceptable unless, in the opinion of the Commissioner, it clearly reflects income. A method of accounting which reflects the consistent application of generally accepted accounting principles in a particular trade or business in accordance with accepted conditions or practices in that trade or business will ordinarily be regarded as clearly reflecting income, provided all items of gross income and expense are treated consistently from year to year.

(3) Items of gross income and expenditures which are elements in the computation of taxable income need not be in the form of cash. It is sufficient that such items can be valued in terms of money. For general rules relating to the taxable year for inclusion of income and for taking deductions, see sections 451 and 461, and the regulations thereunder.

(4) Each taxpayer is required to make a return of his taxable income for each taxable year and must maintain such accounting records as will enable him to file a correct return. See section 6001 and the regulations thereunder. Accounting records include the taxpayer’s regular books of account and such other records and data as may be necessary to support the entries on his books of account and on his return, as for example, a reconciliation of any differences between such books and his return. The following are among the essential features that must be considered in maintaining such records:

(i) In all cases in which the production, purchase, or sale of merchandise of any kind is an income-producing factor, merchandise on hand (including finished goods, work in process, raw

materials, and supplies) at the beginning and end of the year shall be taken into account in computing the taxable income of the year. (For rules relating to computation of inventories, see section 263A, 471, and 472 and the regulations thereunder.)

(ii) Expenditures made during the year shall be properly classified as between capital and expense. For example, expenditures for such items as plant and equipment, which have a useful life extending substantially beyond the taxable year, shall be charged to a capital account and not to an expense account.

(iii) In any case in which there is allowable with respect to an asset a deduction for depreciation, amortization, or depletion, any expenditures (other than ordinary repairs) made to restore the asset or prolong its useful life shall be added to the asset account or charged against the appropriate reserve.

(b) *Exceptions.* (1) If the taxpayer does not regularly employ a method of accounting which clearly reflects his income, the computation of taxable income shall be made in a manner which, in the opinion of the Commissioner, does clearly reflect income.

(2) A taxpayer whose sole source of income is wages need not keep formal books in order to have an accounting method. Tax returns, copies thereof, or other records may be sufficient to establish the use of the method of accounting used in the preparation of the taxpayer's income tax returns.

(c) *Permissible methods*—(1) In general. Subject to the provisions of paragraphs (a) and (b) of this section, a taxpayer may compute his taxable income under any of the following methods of accounting:

(i) *Cash receipts and disbursements method.* Generally, under the cash receipts and disbursements method in the computation of taxable income, all items which constitute gross income (whether in the form of cash, property, or services) are to be included for the taxable year in which actually or constructively received. Expenditures are to be deducted for the taxable year in which actually made. For rules relating to constructive receipt, see §1.451-2. For treatment of an expenditure at-

tributable to more than one taxable year, see section 461(a) and paragraph (a)(1) of §1.461-1.

(ii) *Accrual method.* (A) Generally, under an accrual method, income is to be included for the taxable year when all the events have occurred that fix the right to receive the income and the amount of the income can be determined with reasonable accuracy. Under such a method, a liability is incurred, and generally is taken into account for Federal income tax purposes, in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. (See paragraph (a)(2)(iii)(A) of §1.461-1 for examples of liabilities that may not be taken into account until after the taxable year incurred, and see §§1.461-4 through 1.461-6 for rules relating to economic performance.) Applicable provisions of the Code, the Income Tax Regulations, and other guidance published by the Secretary prescribe the manner in which a liability that has been incurred is taken into account. For example, section 162 provides that a deductible liability generally is taken into account in the taxable year incurred through a deduction from gross income. As a further example, under section 263 or 263A, a liability that relates to the creation of an asset having a useful life extending substantially beyond the close of the taxable year is taken into account in the taxable year incurred through capitalization (within the meaning of §1.263A-1(c)(3)) and may later affect the computation of taxable income through depreciation or otherwise over a period including subsequent taxable years, in accordance with applicable Internal Revenue Code sections and related guidance.

(B) The term "liability" includes any item allowable as a deduction, cost, or expense for Federal income tax purposes. In addition to allowable deductions, the term includes any amount otherwise allowable as a capitalized cost, as a cost taken into account in computing cost of goods sold, as a cost allocable to a long-term contract, or as

any other cost or expense. Thus, for example, an amount that a taxpayer expends or will expend for capital improvements to property must be incurred before the taxpayer may take the amount into account in computing its basis in the property. The term “liability” is not limited to items for which a legal obligation to pay exists at the time of payment. Thus, for example, amounts prepaid for goods or services and amounts paid without a legal obligation to do so may not be taken into account by an accrual basis taxpayer any earlier than the taxable year in which those amounts are incurred.

(C) No method of accounting is acceptable unless, in the opinion of the Commissioner, it clearly reflects income. The method used by the taxpayer in determining when income is to be accounted for will generally be acceptable if it accords with generally accepted accounting principles, is consistently used by the taxpayer from year to year, and is consistent with the Income Tax Regulations. For example, a taxpayer engaged in a manufacturing business may account for sales of the taxpayer’s product when the goods are shipped, when the product is delivered or accepted, or when title to the goods passes to the customers, whether or not billed, depending on the method regularly employed in keeping the taxpayer’s books.

(iii) *Other permissible methods.* Special methods of accounting are described elsewhere in chapter 1 of the Code and the regulations thereunder. For example, see the following sections and the regulations thereunder: Sections 61 and 162, relating to the crop method of accounting; section 453, relating to the installment method; section 460, relating to the long-term contract methods. In addition, special methods of accounting for particular items of income and expense are provided under other sections of chapter 1. For example, see section 174, relating to research and experimental expenditures, and section 175, relating to soil and water conservation expenditures.

(iv) *Combinations of the foregoing methods.* (a) In accordance with the following rules, any combination of the foregoing methods of accounting will

be permitted in connection with a trade or business if such combination clearly reflects income and is consistently used. Where a combination of methods of accounting includes any special methods, such as those referred to in subdivision (iii) of this subparagraph, the taxpayer must comply with the requirements relating to such special methods. A taxpayer using an accrual method of accounting with respect to purchases and sales may use the cash method in computing all other items of income and expense. However, a taxpayer who uses the cash method of accounting in computing gross income from his trade or business shall use the cash method in computing expenses of such trade or business. Similarly, a taxpayer who uses an accrual method of accounting in computing business expenses shall use an accrual method in computing items affecting gross income from his trade or business.

(b) A taxpayer using one method of accounting in computing items of income and deductions of his trade or business may compute other items of income and deductions not connected with his trade or business under a different method of accounting.

(2) *Special rules.* (i) In any case in which it is necessary to use an inventory the accrual method of accounting must be used with regard to purchases and sales unless otherwise authorized under subdivision (ii) of this subparagraph.

(ii) No method of accounting will be regarded as clearly reflecting income unless all items of gross profit and deductions are treated with consistency from year to year. The Commissioner may authorize a taxpayer to adopt or change to a method of accounting permitted by this chapter although the method is not specifically described in the regulations in this part if, in the opinion of the Commissioner, income is clearly reflected by the use of such method. Further, the Commissioner may authorize a taxpayer to continue the use of a method of accounting consistently used by the taxpayer, even though not specifically authorized by the regulations in this part, if, in the opinion of the Commissioner, income is clearly reflected by the use of such

method. See section 446(a) and paragraph (a) of this section, which require that taxable income shall be computed under the method of accounting on the basis of which the taxpayer regularly computes his income in keeping his books, and section 446(e) and paragraph (e) of this section, which require the prior approval of the Commissioner in the case of changes in accounting method.

(iii) The timing rules of §1.1502-13 are a method of accounting for intercompany transactions (as defined in §1.1502-13(b)(1)(i)), to be applied by each member of a consolidated group in addition to the member's other methods of accounting. See §1.1502-13(a)(3)(i). This paragraph (c)(2)(iii) is applicable to consolidated return years beginning on or after November 7, 2001.

(d) *Taxpayer engaged in more than one business.* (1) Where a taxpayer has two or more separate and distinct trades or businesses, a different method of accounting may be used for each trade or business, provided the method used for each trade or business clearly reflects the income of that particular trade or business. For example, a taxpayer may account for the operations of a personal service business on the cash receipts and disbursements method and of a manufacturing business on an accrual method, provided such businesses are separate and distinct and the methods used for each clearly reflect income. The method first used in accounting for business income and deductions in connection with each trade or business, as evidenced in the taxpayer's income tax return in which such income or deductions are first reported, must be consistently followed thereafter.

(2) No trade or business will be considered separate and distinct for purposes of this paragraph unless a complete and separable set of books and records is kept for such trade or business.

(3) If, by reason of maintaining different methods of accounting, there is a creation or shifting of profits or losses between the trades or businesses of the taxpayer (for example, through inventory adjustments, sales, purchases, or expenses) so that income of the taxpayer is not clearly reflected,

the trades or businesses of the taxpayer will not be considered to be separate and distinct.

(e) *Requirement respecting the adoption or change of accounting method.* (1) A taxpayer filing his first return may adopt any permissible method of accounting in computing taxable income for the taxable year covered by such return. See section 446(c) and paragraph (c) of this section for permissible methods. Moreover, a taxpayer may adopt any permissible method of accounting in connection with each separate and distinct trade or business, the income from which is reported for the first time. See section 446(d) and paragraph (d) of this section. See also section 446(a) and paragraph (a) of this section.

(2)(i) Except as otherwise expressly provided in chapter 1 of the Code and the regulations thereunder, a taxpayer who changes the method of accounting employed in keeping his books shall, before computing his income upon such new method for purposes of taxation, secure the consent of the Commissioner. Consent must be secured whether or not such method is proper or is permitted under the Internal Revenue Code or the regulations thereunder.

(ii) (a) A change in the method of accounting includes a change in the overall plan of accounting for gross income or deductions or a change in the treatment of any material item used in such overall plan. Although a method of accounting may exist under this definition without the necessity of a pattern of consistent treatment of an item, in most instances a method of accounting is not established for an item without such consistent treatment. A material item is any item that involves the proper time for the inclusion of the item in income or the taking of a deduction. Changes in method of accounting include a change from the cash receipts and disbursement method to an accrual method, or vice versa, a change involving the method or basis used in the valuation of inventories (see sections 471 and 472 and the regulations under sections 471 and 472), a change from the cash or accrual method to a long-term contract method, or vice versa (see §1.460-4), certain changes in computing depreciation or amortization (see paragraph (e)(2)(ii)(d) of this

section), a change involving the adoption, use or discontinuance of any other specialized method of computing taxable income, such as the crop method, and a change where the Internal Revenue Code and regulations under the Internal Revenue Code specifically require that the consent of the Commissioner must be obtained before adopting such a change.

(b) A change in method of accounting does not include correction of mathematical or posting errors, or errors in the computation of tax liability (such as errors in computation of the foreign tax credit, net operating loss, percentage depletion, or investment credit). Also, a change in method of accounting does not include adjustment of any item of income or deduction that does not involve the proper time for the inclusion of the item of income or the taking of a deduction. For example, corrections of items that are deducted as interest or salary, but that are in fact payments of dividends, and of items that are deducted as business expenses, but that are in fact personal expenses, are not changes in method of accounting. In addition, a change in the method of accounting does not include an adjustment with respect to the addition to a reserve for bad debts. Although such adjustment may involve the question of the proper time for the taking of a deduction, such items are traditionally corrected by adjustment in the current and future years. For the treatment of the adjustment of the addition to a bad debt reserve (for example, for banks under section 585 of the Internal Revenue Code), see the regulations under section 166 of the Internal Revenue Code. A change in the method of accounting also does not include a change in treatment resulting from a change in underlying facts. For further guidance on changes involving depreciable or amortizable assets, see paragraph (e)(2)(ii)(d) of this section and § 1.1016-3(h).

(c) A change in an overall plan or system of identifying or valuing items in inventory is a change in method of accounting. Also a change in the treatment of any material item used in the overall plan for identifying or valuing items in inventory is a change in method of accounting.

(d) *Changes involving depreciable or amortizable assets—(1) Scope.* This paragraph (e)(2)(ii)(d) applies to property subject to section 167, 168, 197, 1400I, 1400L(c), to section 168 prior to its amendment by the Tax Reform Act of 1986 (100 Stat. 2121) (former section 168), or to an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k), 1400L(b), or 1400N(d)).

(2) *Changes in depreciation or amortization that are a change in method of accounting.* Except as provided in paragraph (e)(2)(ii)(d)(3) of this section, a change in the treatment of an asset from nondepreciable or nonamortizable to depreciable or amortizable, or vice versa, is a change in method of accounting. Additionally, a correction to require depreciation or amortization in lieu of a deduction for the cost of depreciable or amortizable assets that had been consistently treated as an expense in the year of purchase, or vice versa, is a change in method of accounting. Further, except as provided in paragraph (e)(2)(ii)(d)(3) of this section, the following changes in computing depreciation or amortization are a change in method of accounting:

(i) A change in the depreciation or amortization method, period of recovery, or convention of a depreciable or amortizable asset.

(ii) A change from not claiming to claiming the additional first year depreciation deduction provided by, for example, section 168(k), 1400L(b), or 1400N(d), for, and the resulting change to the amount otherwise allowable as a depreciation deduction for the remaining adjusted depreciable basis (or similar basis) of, depreciable property that qualifies for the additional first year depreciation deduction (for example, qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or qualified Gulf Opportunity Zone property), provided the taxpayer did not make the election out of the additional first year depreciation deduction (or did not make a deemed election out of the additional first year depreciation deduction; for further guidance, for example, see Rev. Proc. 2002-33 (2002-1 C.B. 963), Rev. Proc. 2003-50 (2003-2 C.B. 119), Notice 2006-77 (2006-40 I.R.B. 590), and

§ 601.601(d)(2)(ii)(b) of this chapter) for the class of property in which the depreciable property that qualifies for the additional first year depreciation deduction (for example, qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or qualified Gulf Opportunity Zone property) is included.

(iii) A change from claiming the 30-percent additional first year depreciation deduction to claiming the 50-percent additional first year depreciation deduction for depreciable property that qualifies for the 50-percent additional first year depreciation deduction, provided the property is not included in any class of property for which the taxpayer elected the 30-percent, instead of the 50-percent, additional first year depreciation deduction (for example, 50-percent bonus depreciation property or qualified Gulf Opportunity Zone property), or a change from claiming the 50-percent additional first year depreciation deduction to claiming the 30-percent additional first year depreciation deduction for depreciable property that qualifies for the 30-percent additional first year depreciation deduction, including property that is included in a class of property for which the taxpayer elected the 30-percent, instead of the 50-percent, additional first year depreciation deduction (for example, qualified property or qualified New York Liberty Zone property), and the resulting change to the amount otherwise allowable as a depreciation deduction for the property's remaining adjusted depreciable basis (or similar basis). This paragraph (e)(2)(i)(d)(2)(iii) does not apply if a taxpayer is making a late election or revoking a timely valid election under the applicable additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k), 1400L(b), or 1400N(d)) (see paragraph (e)(2)(i)(d)(3)(iii) of this section).

(iv) A change from claiming to not claiming the additional first year depreciation deduction for an asset that does not qualify for the additional first year depreciation deduction, including an asset that is included in a class of property for which the taxpayer elected not to claim any additional first year depreciation deduction (for exam-

ple, an asset that is not qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or qualified Gulf Opportunity Zone property), and the resulting change to the amount otherwise allowable as a depreciation deduction for the property's depreciable basis.

(v) A change in salvage value to zero for a depreciable or amortizable asset for which the salvage value is expressly treated as zero by the Internal Revenue Code (for example, section 168(b)(4)), the regulations under the Internal Revenue Code (for example, § 1.197-2(f)(1)(ii)), or other guidance published in the Internal Revenue Bulletin.

(vi) A change in the accounting for depreciable or amortizable assets from a single asset account to a multiple asset account (pooling), or vice versa, or from one type of multiple asset account (pooling) to a different type of multiple asset account (pooling).

(vii) For depreciable or amortizable assets that are mass assets accounted for in multiple asset accounts or pools, a change in the method of identifying which assets have been disposed. For purposes of this paragraph (e)(2)(i)(d)(2)(vii), the term *mass assets* means a mass or group of individual items of depreciable or amortizable assets that are not necessarily homogeneous, each of which is minor in value relative to the total value of the mass or group, numerous in quantity, usually accounted for only on a total dollar or quantity basis, with respect to which separate identification is impracticable, and placed in service in the same taxable year.

(viii) Any other change in depreciation or amortization as the Secretary may designate by publication in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter).

(3) *Changes in depreciation or amortization that are not a change in method of accounting.* Section 1.446-1(e)(2)(i)(b) applies to determine whether a change in depreciation or amortization is not a change in method of accounting. Further, the following changes in depreciation or amortization are not a change in method of accounting:

(i) *Useful life.* An adjustment in the useful life of a depreciable or amortizable asset for which depreciation is determined under section 167 (other than under section 168, section 1400I, section 1400L(c), former section 168, or an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k), 1400L(b), or 1400N(d))) is not a change in method of accounting. This paragraph (e)(2)(ii)(d)(3)(i) does not apply if a taxpayer is changing to or from a useful life (or recovery period or amortization period) that is specifically assigned by the Internal Revenue Code (for example, section 167(f)(1), section 168(c), section 168(g)(2) or (3), section 197), the regulations under the Internal Revenue Code, or other guidance published in the Internal Revenue Bulletin and, therefore, such change is a change in method of accounting (unless paragraph (e)(2)(ii)(d)(3)(v) of this section applies). See paragraph (e)(2)(ii)(d)(5)(iv) of this section for determining the taxable year in which to correct an adjustment in useful life that is not a change in method of accounting.

(ii) *Change in use.* A change in computing depreciation or amortization allowances in the taxable year in which the use of an asset changes in the hands of the same taxpayer is not a change in method of accounting.

(iii) *Elections.* Generally, the making of a late depreciation or amortization election or the revocation of a timely valid depreciation or amortization election is not a change in method of accounting, except as otherwise expressly provided by the Internal Revenue Code, the regulations under the Internal Revenue Code, or other guidance published in the Internal Revenue Bulletin. This paragraph

(e)(2)(ii)(d)(3)(iii) also applies to making a late election or revoking a timely valid election made under section 13261(g)(2) or (3) of the Revenue Reconciliation Act of 1993 (107 Stat. 312, 540) (relating to amortizable section 197 intangibles). A taxpayer may request consent to make a late election or revoke a timely valid election by submitting a request for a private letter ruling. For making or revoking an election under section 179 of the Internal

Revenue Code, see section 179(c) and § 1.179-5.

(iv) *Salvage value.* Except as provided under paragraph (e)(2)(ii)(d)(2)(v) of this section, a change in salvage value of a depreciable or amortizable asset is not treated as a change in method of accounting.

(v) *Placed-in-service date.* Except as otherwise expressly provided by the Internal Revenue Code, the regulations under the Internal Revenue Code, or other guidance published in the Internal Revenue Bulletin, any change in the placed-in-service date of a depreciable or amortizable asset is not treated as a change in method of accounting. For example, if a taxpayer changes the placed-in-service date of a depreciable or amortizable asset because the taxpayer incorrectly determined the date on which the asset was placed in service, such a change is a change in the placed-in-service date of the asset and, therefore, is not a change in method of accounting. However, if a taxpayer incorrectly determines that a depreciable or amortizable asset is non-depreciable property and later changes the treatment of the asset to depreciable property, such a change is not a change in the placed-in-service date of the asset and, therefore, is a change in method of accounting under paragraph (e)(2)(ii)(d)(2) of this section. Further, a change in the convention of a depreciable or amortizable asset is not a change in the placed-in-service date of the asset and, therefore, is a change in method of accounting under paragraph (e)(2)(ii)(d)(2)(i) of this section. See paragraph (e)(2)(ii)(d)(5)(v) of this section for determining the taxable year in which to make a change in the placed-in-service date of a depreciable or amortizable asset that is not a change in method of accounting.

(vi) Any other change in depreciation or amortization as the Secretary may designate by publication in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter).

(4) *Item being changed.* For purposes of a change in depreciation or amortization to which this paragraph (e)(2)(ii)(d) applies, the item being changed generally is the depreciation

treatment of each individual depreciable or amortizable asset. However, the item is the depreciation treatment of each vintage account with respect to a depreciable asset for which depreciation is determined under §1.167(a)-11 (class life asset depreciation range (CLADR) property). Similarly, the item is the depreciable treatment of each general asset account with respect to a depreciable asset for which general asset account treatment has been elected under section 168(i)(4) or the item is the depreciation treatment of each mass asset account with respect to a depreciable asset for which mass asset account treatment has been elected under former section 168(d)(2)(A). Further, a change in computing depreciation or amortization under section 167 (other than under section 168, section 1400I, section 1400L(c), former section 168, or an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k), 1400L(b), or 1400N(d))) is permitted only with respect to all assets in a particular account (as defined in §1.167(a)-7) or vintage account.

(5) *Special rules.* For purposes of a change in depreciation or amortization to which this paragraph (e)(2)(ii)(d) applies—

(i) *Declining balance method to the straight line method for MACRS property.* For tangible, depreciable property subject to section 168 (MACRS property) that is depreciated using the 200-percent or 150-percent declining balance method of depreciation under section 168(b)(1) or (2), a taxpayer may change without the consent of the Commissioner from the declining balance method of depreciation to the straight line method of depreciation in the first taxable year in which the use of the straight line method with respect to the adjusted depreciable basis of the MACRS property as of the beginning of that year will yield a depreciation allowance that is greater than the depreciation allowance yielded by the use of the declining balance method. When the change is made, the adjusted depreciable basis of the MACRS property as of the beginning of the taxable year is recovered through annual depreciation allowances over the remaining recov-

ery period (for further guidance, see section 6.06 of Rev. Proc. 87-57 (1987-2 C.B. 687) and §601.601(d)(2)(ii)(b) of this chapter).

(ii) *Depreciation method changes for section 167 property.* For a depreciable or amortizable asset for which depreciation is determined under section 167 (other than under section 168, section 1400I, section 1400L(c), former section 168, or an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k), 1400L(b), or 1400N(d))), see §1.167(e)-1(b), (c), and (d) for the changes in depreciation method that are permitted to be made without the consent of the Commissioner. For CLADR property, see §1.167(a)-11(c)(1)(iii) for the changes in depreciation method for CLADR property that are permitted to be made without the consent of the Commissioner. Further, see §1.167(a)-11(b)(4)(iii)(c) for how to correct an incorrect classification or characterization of CLADR property.

(iii) *Section 481 adjustment.* Except as otherwise expressly provided by the Internal Revenue Code, the regulations under the Internal Revenue Code, or other guidance published in the Internal Revenue Bulletin, no section 481 adjustment is required or permitted for a change from one permissible method of computing depreciation or amortization to another permissible method of computing depreciation or amortization for an asset because this change is implemented by either a cut-off method (for further guidance, for example, see section 2.06 of Rev. Proc. 97-27 (1997-1 C.B. 680), section 2.06 of Rev. Proc. 2002-9 (2002-1 C.B. 327), and §601.601(d)(2)(ii)(b) of this chapter) or a modified cut-off method (under which the adjusted depreciable basis of the asset as of the beginning of the year of change is recovered using the new permissible method of accounting), as appropriate. However, a change from an impermissible method of computing depreciation or amortization to a permissible method of computing depreciation or amortization for an asset results in a section 481 adjustment. Similarly, a change in the treatment of an asset from nondepreciable or non-amortizable to depreciable or amortizable (or vice versa) or a change in the

treatment of an asset from expensing to depreciating (or vice versa) results in a section 481 adjustment.

(iv) *Change in useful life.* This paragraph (e)(2)(ii)(d)(5)(iv) applies to an adjustment in the useful life of a depreciable or amortizable asset for which depreciation is determined under section 167 (other than under section 168, section 1400I, section 1400L(c), former section 168, or an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k), 1400L(b), or 1400N(d))) and that is not a change in method of accounting under paragraph (e)(2)(ii)(d) of this section. For this adjustment in useful life, no section 481 adjustment is required or permitted. The adjustment in useful life, whether initiated by the Internal Revenue Service (IRS) or a taxpayer, is corrected by adjustments in the taxable year in which the conditions known to exist at the end of that taxable year changed thereby resulting in a redetermination of the useful life under § 1.167(a)-1(b) (or if the period of limitation for assessment under section 6501(a) has expired for that taxable year, in the first succeeding taxable year open under the period of limitation for assessment), and in subsequent taxable years. In other situations (for example, the useful life is incorrectly determined in the placed-in-service year), the adjustment in the useful life, whether initiated by the IRS or a taxpayer, may be corrected by adjustments in the earliest taxable year open under the period of limitation for assessment under section 6501(a) or the earliest taxable year under examination by the IRS but in no event earlier than the placed-in-service year of the asset, and in subsequent taxable years. However, if a taxpayer initiates the correction in useful life, in lieu of filing amended Federal tax returns (for example, because the conditions known to exist at the end of a prior taxable year changed thereby resulting in a redetermination of the useful life under § 1.167(a)-1(b)), the taxpayer may correct the adjustment in useful life by adjustments in the current and subsequent taxable years.

(v) *Change in placed-in-service date.* This paragraph (e)(2)(ii)(d)(5)(v) applies to a change in the placed-in-service

date of a depreciable or amortizable asset that is not a change in method of accounting under paragraph (e)(2)(ii)(d) of this section. For this change in placed-in-service date, no section 481 adjustment is required or permitted. The change in placed-in-service date, whether initiated by the IRS or a taxpayer, may be corrected by adjustments in the earliest taxable year open under the period of limitation for assessment under section 6501(a) or the earliest taxable year under examination by the IRS but in no event earlier than the placed-in-service year of the asset, and in subsequent taxable years. However, if a taxpayer initiates the change in placed-in-service date, in lieu of filing amended Federal tax returns, the taxpayer may correct the placed-in-service date by adjustments in the current and subsequent taxable years.

(iii) *Examples.* The rules of this paragraph (e) are illustrated by the following examples:

*Example 1.* Although the sale of merchandise is an income producing factor, and therefore inventories are required, a taxpayer in the retail jewelry business reports his income on the cash receipts and disbursements method of accounting. A change from the cash receipts and disbursements method of accounting to the accrual method of accounting is a change in the overall plan of accounting and thus is a change in method of accounting.

*Example 2.* A taxpayer in the wholesale dry goods business computes its income and expenses on the accrual method of accounting and files its Federal income tax returns on such basis except for real estate taxes which have been reported on the cash receipts and disbursements method of accounting. A change in the treatment of real estate taxes from the cash receipts and disbursements method to the accrual method is a change in method of accounting because such change is a change in the treatment of a material item within his overall accounting practice.

*Example 3.* A taxpayer in the wholesale dry goods business computes its income and expenses on the accrual method of accounting and files its Federal income tax returns on such basis. Vacation pay has been deducted in the year in which paid because the taxpayer did not have a completely vested vacation pay plan, and, therefore, the liability for payment did not accrue until that year. Subsequently, the taxpayer adopts a completely vested vacation pay plan that changes its year for accruing the deduction from the year in which payment is made to

the year in which the liability to make the payment now arises. The change for the year of deduction of the vacation pay plan is not a change in method of accounting but results, instead, because the underlying facts (that is, the type of vacation pay plan) have changed.

*Example 4.* From 1968 through 1970, a taxpayer has fairly allocated indirect overhead costs to the value of inventories on a fixed percentage of direct costs. If the ratio of indirect overhead costs to direct costs increases in 1971, a change in the underlying facts has occurred. Accordingly, an increase in the percentage in 1971 to fairly reflect the increase in the relative level of indirect overhead costs is not a change in method of accounting but is a change in treatment resulting from a change in the underlying facts.

*Example 5.* A taxpayer values inventories at cost. A change in the basis for valuation of inventories from cost to the lower of cost or market is a change in an overall practice of valuing items in inventory. The change, therefore, is a change in method of accounting for inventories.

*Example 6.* A taxpayer in the manufacturing business has for many taxable years valued its inventories at cost. However, cost has been improperly computed since no overhead costs have been included in valuing the inventories at cost. The failure to allocate an appropriate portion of overhead to the value of inventories is contrary to the requirement of the Internal Revenue Code and the regulations under the Internal Revenue Code. A change requiring appropriate allocation of overhead is a change in method of accounting because it involves a change in the treatment of a material item used in the overall practice of identifying or valuing items in inventory.

*Example 7.* A taxpayer has for many taxable years valued certain inventories by a method which provides for deducting 20 percent of the cost of the inventory items in determining the final inventory valuation. The 20 percent adjustment is taken as a "reserve for price changes." Although this method is not a proper method of valuing inventories under the Internal Revenue Code or the regulations under the Internal Revenue Code, it involves the treatment of a material item used in the overall practice of valuing inventory. A change in such practice or procedure is a change of method of accounting for inventories.

*Example 8.* A taxpayer has always used a base stock system of accounting for inventories. Under this system a constant price is applied to an assumed constant normal quantity of goods in stock. The base stock system is an overall plan of accounting for inventories which is not recognized as a proper method of accounting for inventories under the regulations. A change in this prac-

tice is, nevertheless, a change of method of accounting for inventories.

*Example 9.* In 2003, A1, a calendar year taxpayer engaged in the trade or business of manufacturing knitted goods, purchased and placed in service a building and its components at a total cost of \$10,000,000 for use in its manufacturing operations. A1 classified the \$10,000,000 as nonresidential real property under section 168(e). A1 elected not to deduct the additional first year depreciation provided by section 168(k) on its 2003 Federal tax return. As a result, on its 2003, 2004, and 2005 Federal tax returns, A1 depreciated the \$10,000,000 under the general depreciation system of section 168(a), using the straight line method of depreciation, a 39-year recovery period, and the mid-month convention. In 2006, A1 completes a cost segregation study on the building and its components and identifies items that cost a total of \$1,500,000 as section 1245 property. As a result, the \$1,500,000 should have been classified in 2003 as 5-year property under section 168(e) and depreciated on A1's 2003, 2004, and 2005 Federal tax returns under the general depreciation system, using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. Pursuant to paragraph (e)(2)(ii)(d)(2)(i) of this section, A1's change to this depreciation method, recovery period, and convention is a change in method of accounting. This method change results in a section 481 adjustment. The useful life exception under paragraph (e)(2)(ii)(d)(3)(i) of this section does not apply because the assets are depreciated under section 168.

*Example 10.* In 2003, B, a calendar year taxpayer, purchased and placed in service new equipment at a total cost of \$1,000,000 for use in its plant located outside the United States. The equipment is 15-year property under section 168(e) with a class life of 20 years. The equipment is required to be depreciated under the alternative depreciation system of section 168(g). However, B incorrectly depreciated the equipment under the general depreciation system of section 168(a), using the 150-percent declining balance method, a 15-year recovery period, and the half-year convention. In 2010, the IRS examines B's 2007 Federal income tax return and changes the depreciation of the equipment to the alternative depreciation system, using the straight line method of depreciation, a 20-year recovery period, and the half-year convention. Pursuant to paragraph (e)(2)(ii)(d)(2)(i) of this section, this change in depreciation method and recovery period made by the IRS is a change in method of accounting. This method change results in a section 481 adjustment. The useful life exception under paragraph (e)(2)(ii)(d)(3)(i) of this section does not apply because the assets are depreciated under section 168.

*Example 11.* In May 2003, C, a calendar year taxpayer, purchased and placed in service equipment for use in its trade or business. C never held this equipment for sale. However, C incorrectly treated the equipment as inventory on its 2003 and 2004 Federal tax returns. In 2005, C realizes that the equipment should have been treated as a depreciable asset. Pursuant to paragraph (e)(2)(ii)(d)(2) of this section, C's change in the treatment of the equipment from inventory to a depreciable asset is a change in method of accounting. This method change results in a section 481 adjustment.

*Example 12.* Since 2003, D, a calendar year taxpayer, has used the distribution fee period method to amortize distributor commissions and, under that method, established pools to account for the distributor commissions (for further guidance, see Rev. Proc. 2000-38 (2000-2 C.B. 310) and § 601.601(d)(2)(ii)(b) of this chapter). A change in the accounting of distributor commissions under the distribution fee period method from pooling to single asset accounting is a change in method of accounting pursuant to paragraph (e)(2)(ii)(d)(2)(vi) of this section. This method change results in no section 481 adjustment because the change is from one permissible method to another permissible method.

*Example 13.* Since 2003, E, a calendar year taxpayer, has accounted for items of MACRS property that are mass assets in pools. Each pool includes only the mass assets that are placed in service by E in the same taxable year. E is able to identify the cost basis of each asset in each pool. None of the pools are general asset accounts under section 168(i)(4) and the regulations under section 168(i)(4). E identified any dispositions of these mass assets by specific identification. Because of changes in E's recordkeeping in 2006, it is impracticable for E to continue to identify disposed mass assets using specific identification. As a result, E wants to change to a first-in, first-out method under which the mass assets disposed of in a taxable year are deemed to be from the pool with the earliest placed-in-service year in existence as of the beginning of the taxable year of each disposition. Pursuant to paragraph (e)(2)(ii)(d)(2)(vii) of this section, this change is a change in method of accounting. This method change results in no section 481 adjustment because the change is from one permissible method to another permissible method.

*Example 14.* In August 2003, F, a calendar year taxpayer, purchased and placed in service a copier for use in its trade or business. F incorrectly classified the copier as 7-year property under section 168(e). F elected not to deduct the additional first year depreciation provided by section 168(k) on its 2003 Federal tax return. As a result, on its 2003 and 2004 Federal tax returns, F depreciated

the copier under the general depreciation system of section 168(a), using the 200-percent declining balance method of depreciation, a 7-year recovery period, and the half-year convention. In 2005, F realizes that the copier is 5-year property and should have been depreciated on its 2003 and 2004 Federal tax returns under the general depreciation system using a 5-year recovery period rather than a 7-year recovery period. Pursuant to paragraph (e)(2)(ii)(d)(2)(i) of this section, F's change in recovery period from 7 to 5 years is a change in method of accounting. This method change results in a section 481 adjustment. The useful life exception under paragraph (e)(2)(ii)(d)(3)(i) of this section does not apply because the copier is depreciated under section 168.

*Example 15.* In 2004, G, a calendar year taxpayer, purchased and placed in service an intangible asset that is not an amortizable section 197 intangible and that is not described in section 167(f). G amortized the cost of the intangible asset under section 167(a) using the straight line method of depreciation and a determinable useful life of 13 years. The safe harbor useful life of 15 or 25 years under § 1.167(a)-3(b) does not apply to the intangible asset. In 2008, because of changing conditions, G changes the remaining useful life of the intangible asset to 2 years. Pursuant to paragraph (e)(2)(ii)(d)(3)(i) of this section, G's change in useful life is not a change in method of accounting because the intangible asset is depreciated under section 167 and G is not changing to or from a useful life that is specifically assigned by the Internal Revenue Code, the regulations under the Internal Revenue Code, or other guidance published in the Internal Revenue Bulletin.

*Example 16.* In July 2003, H, a calendar year taxpayer, purchased and placed in service "off-the-shelf" computer software and a new computer. The cost of the new computer and computer software are separately stated. H incorrectly included the cost of this software as part of the cost of the computer, which is 5-year property under section 168(e). On its 2003 Federal tax return, H elected to depreciate its 5-year property placed in service in 2003 under the alternative depreciation system of section 168(g) and H elected not to deduct the additional first year depreciation provided by section 168(k). The class life for a computer is 5 years. As a result, because H included the cost of the computer software as part of the cost of the computer hardware, H depreciated the cost of the software under the alternative depreciation system, using the straight line method of depreciation, a 5-year recovery period, and the half-year convention. In 2005, H realizes that the cost of the software should have been amortized under section 167(f)(1), using the straight line method of depreciation, a 36-month useful life, and a monthly convention. H's change from 5-years to 36-months is a change in

method of accounting because H is changing to a useful life that is specifically assigned by section 167(f)(1). The change in convention from the half-year to the monthly convention also is a change in method of accounting. Both changes result in a section 481 adjustment.

*Example 17.* On May 1, 2003, I2, a calendar year taxpayer, purchased and placed in service new equipment at a total cost of \$500,000 for use in its business. The equipment is 5-year property under section 168(e) with a class life of 9 years and is qualified property under section 168(k)(2). I2 did not place in service any other depreciable property in 2003. Section 168(g)(1)(A) through (D) do not apply to the equipment. I2 intended to elect the alternative depreciation system under section 168(g) for 5-year property placed in service in 2003. However, I2 did not make the election. Instead, I2 deducted on its 2003 Federal tax return the 30-percent additional first year depreciation attributable to the equipment and, on its 2003 and 2004 Federal tax returns, depreciated the remaining adjusted depreciable basis of the equipment under the general depreciation system under 168(a), using the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. In 2005, I2 realizes its failure to make the alternative depreciation system election in 2003 and files a Form 3115, "Application for Change in Accounting Method," to change its method of depreciating the remaining adjusted depreciable basis of the 2003 equipment to the alternative depreciation system. Because this equipment is not required to be depreciated under the alternative depreciation system, I2 is attempting to make an election under section 168(g)(7). However, this election must be made in the taxable year in which the equipment is placed in service (2003) and, consequently, I2 is attempting to make a late election under section 168(g)(7). Accordingly, I2's change to the alternative depreciation system is not a change in accounting method pursuant to paragraph (e)(2)(ii)(d)(3)(iii) of this section. Instead, I2 must submit a request for a private letter ruling under § 301.9100-3 of this chapter, requesting an extension of time to make the alternative depreciation system election on its 2003 Federal tax return.

*Example 18.* On December 1, 2004, J, a calendar year taxpayer, purchased and placed in service 20 previously-owned adding machines. For the 2004 taxable year, J incorrectly classified the adding machines as items in its "suspense" account for financial and tax accounting purposes. Assets in this suspense account are not depreciated until reclassified to a depreciable fixed asset account. In January 2006, J realizes that the cost of the adding machines is still in the suspense account and reclassifies such cost to the appropriate depreciable fixed asset ac-

count. As a result, on its 2004 and 2005 Federal tax returns, J did not depreciate the cost of the adding machines. Pursuant to paragraph (e)(2)(ii)(d)(2) of this section, J's change in the treatment of the adding machines from nondepreciable assets to depreciable assets is a change in method of accounting. The placed-in-service date exception under paragraph (e)(2)(ii)(d)(3)(v) of this section does not apply because the adding machines were incorrectly classified in a nondepreciable suspense account. This method change results in a section 481 adjustment.

*Example 19.* In December 2003, K, a calendar year taxpayer, purchased and placed in service equipment for use in its trade or business. However, K did not receive the invoice for this equipment until January 2004. As a result, K classified the equipment on its fixed asset records as being placed in service in January 2004. On its 2004 and 2005 Federal tax returns, K depreciated the cost of the equipment. In 2006, K realizes that the equipment was actually placed in service during the 2003 taxable year and, therefore, depreciation should have begun in the 2003 taxable year instead of the 2004 taxable year. Pursuant to paragraph (e)(2)(ii)(d)(3)(v) of this section, K's change in the placed-in-service date of the equipment is not a change in method of accounting.

(3)(i) Except as otherwise provided under the authority of paragraph (e)(3)(ii) of this section, to secure the Commissioner's consent to a taxpayer's change in method of accounting the taxpayer generally must file an application on Form 3115, "Application for Change in Accounting Method," with the Commissioner during the taxable year in which the taxpayer desires to make the change in method of accounting. See §§ 1.381(c)(4)-1(d)(2) and 1.381(c)(5)-1(d)(2) for rules allowing additional time, in some circumstances, for the filing of an application on Form 3115 with respect to a transaction to which section 381(a) applies. To the extent applicable, the taxpayer must furnish all information requested on the Form 3115. This information includes all classes of items that will be treated differently under the new method of accounting, any amounts that will be duplicated or omitted as a result of the proposed change, and the taxpayer's computation of any adjustments necessary to prevent such duplications or omissions. The Commissioner may require such other information as may be necessary to determine whether the proposed change will be permitted.

Permission to change a taxpayer's method of accounting will not be granted unless the taxpayer agrees to the Commissioner's prescribed terms and conditions for effecting the change, including the taxable year or years in which any adjustment necessary to prevent amounts from being duplicated or omitted is to be taken into account. See section 481 and the regulations thereunder, relating to certain adjustments resulting from accounting method changes, and section 472 and the regulations thereunder, relating to adjustments for changes to and from the last-in, first-out inventory method. For any Form 3115 filed on or after May 15, 1997, see § 1.446-1T(e)(3)(i)(B).

(ii) Notwithstanding the provisions of paragraph (e)(3)(i) of this section, the Commissioner may prescribe administrative procedures under which taxpayers will be permitted to change their method of accounting. The administrative procedures shall prescribe those terms and conditions necessary to obtain the Commissioner's consent to effect the change and to prevent amounts from being duplicated or omitted. The terms and conditions that may be prescribed by the Commissioner may include terms and conditions that require the change in method of accounting to be effected on a cut-off basis or by an adjustment under section 481(a) to be taken into account in the taxable year or years prescribed by the Commissioner.

(iii) This paragraph (e)(3) applies to Forms 3115 filed on or after December 31, 1997. For other Forms 3115, see § 1.446-1(e)(3) in effect prior to December 31, 1997 (§ 1.446-1(e)(3) as contained in the 26 CFR part 1 edition revised as of April 1, 1997).

(4) *Effective date*—(i) *In general*. Except as provided in paragraphs (e)(3)(iii), (e)(4)(ii), and (e)(4)(iii) of this section, paragraph (e) of this section applies on or after December 30, 2003. For the applicability of regulations before December 30, 2003, see § 1.446-1(e) in effect prior to December 30, 2003 (§ 1.446-1(e) as contained in 26 CFR part 1 edition revised as of April 1, 2003).

(ii) *Changes involving depreciable or amortizable assets*. With respect to paragraph (e)(2)(ii)(d) of this section, paragraph (e)(2)(iii) *Examples 9 through 19* of

this section, and the language “certain changes in computing depreciation or amortization (see paragraph (e)(2)(ii)(d) of this section)” in the last sentence of paragraph (e)(2)(ii)(a) of this section—

(A) For any change in depreciation or amortization that is a change in method of accounting, this section applies to such a change in method of accounting made by a taxpayer for a depreciable or amortizable asset placed in service by the taxpayer in a taxable year ending on or after December 30, 2003; and

(B) For any change in depreciation or amortization that is not a change in method of accounting, this section applies to such a change made by a taxpayer for a depreciable or amortizable asset placed in service by the taxpayer in a taxable year ending on or after December 30, 2003.

(iii) *Effective/applicability date for paragraph (e)(3)(i)*. The rules of paragraph (e)(3)(i) of this section apply to corporate reorganizations and tax-free liquidations described in section 381(a) that occur on or after August 31, 2011.

[T.D. 6500, 25 FR 11708, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.446-1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.fdsys.gov](http://www.fdsys.gov).

#### § 1.446-2 Method of accounting for interest.

(a) *Applicability*—(1) *In general*. This section provides rules for determining the amount of interest that accrues during an accrual period (other than interest described in paragraph (a)(2) of this section) and for determining the portion of a payment that consists of accrued interest. For purposes of this section, interest includes original issue discount and amounts treated as interest (whether stated or unstated) in any lending or deferred payment transaction. Accrued interest determined under this section is taken into account by a taxpayer under the taxpayer's regular method of accounting (e.g., an accrual method or the cash receipts and disbursements method). Application of an exception described in paragraph (a)(2) of this section to one party to a transaction does not affect

the application of this section to any other party to the transaction.

(2) *Exceptions*—(i) *Interest included or deducted under certain other provisions.* This section does not apply to interest that is taken into account under—

(A) Sections 1272(a), 1275, and 163(e) (income and deductions relating to original issue discount);

(B) Section 467(a)(2) (certain payments for the use of property or services);

(C) Sections 1276 through 1278 (market discount);

(D) Sections 1281 through 1283 (discount on certain short-term obligations);

(E) Section 7872(a) (certain loans with below-market interest rates); or

(F) Section 1.1272-3 (an election by a holder to treat all interest on a debt instrument as original issue discount).

(ii) *De minimis original issue discount.* This section does not apply to de minimis original issue discount (other than de minimis original issue discount treated as qualified stated interest) as determined under §1.1273-1(d). See §1.163-7 for the treatment of de minimis original issue discount by the issuer and §§1.1273-1(d) and 1.1272-3 for the treatment of de minimis original issue discount by the holder.

(b) *Accrual of qualified stated interest.* Qualified stated interest (as defined in §1.1273-1(c)) accrues ratably over the accrual period (or periods) to which it is attributable and accrues at the stated rate for the period (or periods).

(c) *Accrual of interest other than qualified stated interest.* Subject to the modifications in paragraph (d) of this section, the amount of interest (other than qualified stated interest) that accrues for any accrual period is determined under rules similar to those in the regulations under sections 1272 and 1275 for the accrual of original issue discount. The preceding sentence applies regardless of any contrary formula agreed to by the parties.

(d) *Modifications*—(1) *Issue price.* The issue price of the loan or contract is equal to—

(i) In the case of a contract for the sale or exchange of property to which section 483 applies, the amount described in §1.483-2(a)(1)(i) or (ii), whichever is applicable;

(ii) In the case of a contract for the sale or exchange of property to which section 483 does not apply, the stated principal amount; or

(iii) In any other case, the amount loaned.

(2) *Principal payments that are not deferred payments.* In the case of a contract to which section 483 applies, principal payments that are not deferred payments are ignored for purposes of determining yield and adjusted issue price.

(e) *Allocation of interest to payments*—(1) *In general.* Except as provided in paragraphs (e)(2), (e)(3), and (e)(4) of this section, each payment under a loan (other than payments of additional interest or similar charges provided with respect to amounts that are not paid when due) is treated as a payment of interest to the extent of the accrued and unpaid interest determined under paragraphs (b) and (c) of this section as of the date the payment becomes due.

(2) *Special rule for points deductible under section 461(g)(2).* If a payment of points is deductible by the borrower under section 461(g)(2), the payment is treated by the borrower as a payment of interest.

(3) *Allocation respected in certain small transactions.* [Reserved]

(4) *Pro rata prepayments.* Accrued but unpaid interest is allocated to a pro rata prepayment under rules similar to those for allocating accrued but unpaid original issue discount to a pro rata prepayment under §1.1275-2(f). For purposes of the preceding sentence, a pro rata prepayment is a payment that is made prior to maturity that—

(i) Is not made pursuant to the contract's payment schedule; and

(ii) Results in a substantially pro rata reduction of each payment remaining to be paid on the contract.

(f) *Aggregation rule.* For purposes of this section, all contracts calling for deferred payments arising from the same transaction (or a series of related transactions) are treated as a single contract. This rule, however, generally only applies to contracts involving a single borrower and a single lender.

(g) *Debt instruments denominated in a currency other than the U.S. dollar.* This section applies to a debt instrument

that provides for all payments denominated in, or determined by reference to, the functional currency of the taxpayer or qualified business unit of the taxpayer (even if that currency is other than the U.S. dollar). See § 1.988-2(b) to determine interest income or expense for debt instruments that provide for payments denominated in, or determined by reference to, a nonfunctional currency.

(h) *Example.* The following example illustrates the rules of this section.

*Example. Allocation of unstated interest to deferred payments.* (i) *Facts.* On July 1, 1996, A sells his personal residence to B for a stated purchase price of \$1,297,143.66. The property is not personal use property (within the meaning of section 1275(b)(3)) in the hands of B. Under the loan agreement, B is required to make two installment payments of \$648,571.83 each, the first due on June 30, 1998, and the second due on June 30, 2000. Both A and B use the cash receipts and disbursements method of accounting and use a calendar year for their taxable year.

(ii) *Amount of unstated interest.* Under section 483, the agreement does not provide for adequate stated interest. Thus, the loan's yield is the test rate of interest determined under § 1.483-3. Assume that both A and B use annual accrual periods and that the test rate of interest is 9.2 percent, compounded annually. Under § 1.483-2, the present value of the deferred payments is \$1,000,000. Thus, the agreement has unstated interest of \$297,143.66.

(iii) *First two accrual periods.* Under paragraph (d)(1) of this section, the issue price at the beginning of the first accrual period is \$1,000,000 (the amount described in § 1.483-2(a)(1)(i)). Under paragraph (c) of this section, the amount of interest that accrues for the first accrual period is \$92,000 ( $\$1,000,000 \times .092$ ) and the amount of interest that accrues for the second accrual period is \$100,464 ( $\$1,092,000 \times .092$ ). Thus, \$192,464 of interest has accrued as of the end of the second accrual period. Under paragraph (e)(1) of this section, the \$648,571.83 payment made on June 30, 1998, is treated first as a payment of interest to the extent of \$192,464. The remainder of the payment (\$456,107.83) is treated as a payment of principal. Both A and B take the payment of interest (\$192,464) into account in 1998.

(iv) *Second two accrual periods.* The adjusted issue price at the beginning of the third accrual period is \$543,892.17 ( $\$1,092,000 + \$100,464 - \$648,571.83$ ). The amount of interest that accrues for the third accrual period is \$50,038.08 ( $\$543,892.17 \times .092$ ) and the amount of interest that accrues for the final accrual period is \$54,641.58, the excess of the amount

payable at maturity (\$648,571.83), over the adjusted issue price at the beginning of the accrual period (\$593,930.25). As of the date the second payment becomes due, \$104,679.66 of interest has accrued. Thus, of the \$648,571.83 payment made on June 30, 2000, \$104,679.66 is treated as interest and \$543,892.17 is treated as principal. Both A and B take the payment of interest (\$104,679.66) into account in 2000.

(i) [Reserved]

(j) *Effective date.* This section applies to debt instruments issued on or after April 4, 1994, and to lending transactions, sales, and exchanges that occur on or after April 4, 1994. Taxpayers, however, may rely on this section for debt instruments issued after December 21, 1992, and before April 4, 1994, and for lending transactions, sales, and exchanges that occur after December 21, 1992, and before April 4, 1994.

[T.D. 8517, 59 FR 4804, Feb. 2, 1994]

**§ 1.446-3 Notional principal contracts.**

(a) *Table of contents.* This paragraph (a) lists captioned paragraphs contained in § 1.446-3.

*§ 1.446-3 Notional principal contracts.*

- (a) Table of contents.
- (b) Purpose.
- (c) Definitions and scope.
  - (1) Notional principal contract.
  - (i) In general.
  - (ii) Excluded contracts.
  - (iii) Transactions within section 475.
  - (iv) Transactions within section 988.
  - (2) Specified index.
  - (3) Notional principal amount.
  - (4) Special definitions.
    - (i) Related person and party to the contract.
    - (ii) Objective financial information.
    - (iii) Dealer in notional principal contracts.
    - (d) Taxable year of inclusion and deduction.
    - (e) Periodic payments.
      - (1) Definition.
      - (2) Recognition rules.
        - (i) In general.
        - (ii) Rate set in arrears.
        - (iii) Notional principal amount set in arrears.
      - (3) Examples.
    - (f) Nonperiodic payments.
      - (1) Definition.
      - (2) Recognition rules.
        - (i) In general.
        - (ii) General rule for swaps.
        - (iii) Alternative methods for swaps.
          - (A) Prepaid swaps.
          - (B) Other nonperiodic swap payments.

- (iv) General rule for caps and floors.
- (v) Alternative methods for caps and floors that hedge debt instruments.
  - (A) Prepaid caps and floors.
  - (B) Other caps and floors.
  - (C) Special method for collars.
- (vi) Additional methods.
  - (3) Term of extendible or terminable contracts.
  - (4) Examples.
  - (g) Special rules.
    - (1) Disguised notional principal contracts.
    - (2) Hedged notional principal contracts.
    - (3) Options and forwards to enter into notional principal contracts.
    - (4) Swaps with significant nonperiodic payments.
    - (5) Caps and floors that are significantly in-the-money. [Reserved]
    - (6) Examples.
    - (h) Termination payments.
      - (1) Definition.
      - (2) Taxable year of inclusion and deduction by original parties.
      - (3) Taxable year of inclusion and deduction by assignees.
      - (4) Special rules.
        - (i) Assignment of one leg of a contract.
        - (ii) Substance over form.
      - (5) Examples.
        - (i) Anti-abuse rule.
        - (j) Effective date.

(b) *Purpose.* The purpose of this section is to enable the clear reflection of the income and deductions from notional principal contracts by prescribing accounting methods that reflect the economic substance of such contracts.

(c) *Definitions and scope*—(1) *Notional principal contract*—(i) *In general.* A notional principal contract is a financial instrument that provides for the payment of amounts by one party to another at specified intervals calculated by reference to a specified index upon a notional principal amount in exchange for specified consideration or a promise to pay similar amounts. An agreement between a taxpayer and a qualified business unit (as defined in section 989(a)) of the taxpayer, or among qualified business units of the same taxpayer, is not a notional principal contract because a taxpayer cannot enter into a contract with itself. Notional principal contracts governed by this section include interest rate swaps, currency swaps, basis swaps, interest rate caps, interest rate floors, commodity swaps, equity swaps, equity index swaps, and similar agreements. A collar is not itself a notional principal

contract, but certain caps and floors that comprise a collar may be treated as a single notional principal contract under paragraph (f)(2)(v)(C) of this section. A contract may be a notional principal contract governed by this section even though the term of the contract is subject to termination or extension. Each confirmation under a master agreement to enter into agreements governed by this section is treated as a separate notional principal contract.

(ii) *Excluded contracts.* A contract described in section 1256(b), a futures contract, a forward contract, and an option are not notional principal contracts. An instrument or contract that constitutes indebtedness under general principles of Federal income tax law is not a notional principal contract. An option or forward contract that entitles or obligates a person to enter into a notional principal contract is not a notional principal contract, but payments made under such an option or forward contract may be governed by paragraph (g)(3) of this section.

(iii) *Transactions within section 475.* To the extent that the rules provided in paragraphs (e) and (f) of this section are inconsistent with the rules that apply to any notional principal contract that is governed by section 475 and regulations thereunder, the rules of section 475 and the regulations thereunder govern.

(iv) *Transactions within section 988.* To the extent that the rules provided in this section are inconsistent with the rules that apply to any notional principal contract that is also a section 988 transaction or that is integrated with other property or debt pursuant to section 988(d), the rules of section 988 and the regulations thereunder govern.

(2) *Specified index.* A specified index is—

- (i) A fixed rate, price, or amount;
- (ii) A fixed rate, price, or amount applicable in one or more specified periods followed by one or more different fixed rates, prices, or amounts applicable in other periods;
- (iii) An index that is based on objective financial information (as defined in paragraph (c)(4)(ii) of this section); and

(iv) An interest rate index that is regularly used in normal lending transactions between a party to the contract and unrelated persons.

(3) *Notional principal amount.* For purposes of this section, a notional principal amount is any specified amount of money or property that, when multiplied by a specified index, measures a party's rights and obligations under the contract, but is not borrowed or loaned between the parties as part of the contract. The notional principal amount may vary over the term of the contract, provided that it is set in advance or varies based on objective financial information (as defined in paragraph (c)(4)(ii) of this section).

(4) *Special definitions—(i) Related person and party to the contract.* A related person is a person related (within the meaning of section 267(b) or 707(b)(1)) to one of the parties to the notional principal contract or a member of the same consolidated group (as defined in § 1.1502-1(h)) as one of the parties to the contract. For purposes of this paragraph (c), a related person is considered to be a party to the contract.

(ii) *Objective financial information.* For purposes of this paragraph (c), objective financial information is any current, objectively determinable financial or economic information that is not within the control of any of the parties to the contract and is not unique to one of the parties' circumstances (such as one party's dividends, profits, or the value of its stock). Thus, for example, a notional principal amount may be based on a broadly-based equity index or the outstanding balance of a pool of mortgages, but not on the value of a party's stock.

(iii) *Dealer in notional principal contracts.* A dealer in notional principal contracts is a person who regularly offers to enter into, assume, offset, assign, or otherwise terminate positions in notional principal contracts with customers in the ordinary course of a trade or business.

(d) *Taxable year of inclusion and deduction.* For all purposes of the Code, the net income or net deduction from a notional principal contract for a taxable year is included in or deducted from gross income for that taxable

year. The net income or net deduction from a notional principal contract for a taxable year equals the total of all of the periodic payments that are recognized from that contract for the taxable year under paragraph (e) of this section and all of the nonperiodic payments that are recognized from that contract for the taxable year under paragraph (f) of this section.

(e) *Periodic payments—(1) Definition.* Periodic payments are payments made or received pursuant to a notional principal contract that are payable at intervals of one year or less during the entire term of the contract (including any extension periods provided for in the contract), that are based on a specified index described in paragraph (c)(2)(i), (iii), or (iv) of this section (appropriately adjusted for the length of the interval), and that are based on either a single notional principal amount or a notional principal amount that varies over the term of the contract in the same proportion as the notional principal amount that measures the other party's payments. Payments to purchase or sell a cap or a floor, however, are not periodic payments.

(2) *Recognition rules—(i) In general.* All taxpayers, regardless of their method of accounting, must recognize the ratable daily portion of a periodic payment for the taxable year to which that portion relates.

(ii) *Rate set in arrears.* If the amount of a periodic payment is not determinable at the end of a taxable year because the value of the specified index is not fixed until a date that occurs after the end of the taxable year, the ratable daily portion of a periodic payment that relates to that taxable year is generally based on the specified index that would have applied if the specified index were fixed as of the last day of the taxable year. If a taxpayer determines that the value of the specified index as of the last day of the taxable year does not provide a reasonable estimate of the specified index that will apply when the payment is fixed, the taxpayer may use a reasonable estimate of the specified index each year, provided that the taxpayer (and any related person that is a party to the contract) uses the same method to make the estimate consistently from year to

year and uses the same estimate for purposes of all financial reports to equity holders and creditors. The taxpayer's treatment of notional principal contracts with substantially similar specified indices will be considered in determining whether the taxpayer's estimate of the specified index is reasonable. Any difference between the amount that is recognized under this paragraph (e)(2)(ii) and the corresponding portion of the actual payment that becomes fixed under the contract is taken into account as an adjustment to the net income or net deduction from the notional principal contract for the taxable year during which the payment becomes fixed.

(iii) *Notional principal amount set in arrears.* Rules similar to the rules of paragraph (e)(2)(ii) of this section apply if the amount of a periodic payment is not determinable at the end of a taxable year because the notional principal amount is not fixed until a date that occurs after the end of the taxable year.

(3) *Examples.* The following examples illustrate the application of paragraph (e) of this section.

*Example 1. Accrual of periodic swap payments.* (a) On April 1, 1995, *A* enters into a contract with unrelated counterparty *B* under which, for a term of five years, *A* is obligated to make a payment to *B* each April 1, beginning April 1, 1996, in an amount equal to the London Interbank Offered Rate (LIBOR), as determined on the immediately preceding April 1, multiplied by a notional principal amount of \$100 million. Under the contract, *B* is obligated to make a payment to *A* each April 1, beginning April 1, 1996, in an amount equal to 8% multiplied by the same notional principal amount. *A* and *B* are calendar year taxpayers that use the accrual method of accounting. On April 1, 1995, LIBOR is 7.80%.

(b) This contract is a notional principal contract as defined by paragraph (c)(1) of this section, and both LIBOR and a fixed interest rate of 8% are specified indices under paragraph (c)(2) of this section. All of the payments to be made by *A* and *B* are periodic payments under paragraph (e)(1) of this section because each party's payments are based on a specified index described in paragraphs (c)(2)(iii) and (c)(2)(i) of this section, respectively, are payable at periodic intervals of one year or less throughout the term of the contract, and are based on a single notional principal amount.

(c) Under the terms of the swap agreement, on April 1, 1996, *B* is obligated to make a payment to *A* of \$8,000,000 (8% × \$100,000,000) and *A* is obligated to make a payment to *B* of \$7,800,000 (7.80% × \$100,000,000). Under paragraph (e)(2)(i) of this section, the ratable daily portions for 1995 are the amounts of these periodic payments that are attributable to *A*'s and *B*'s taxable year ending December 31, 1995. The ratable daily portion of the 8% fixed leg is \$6,010,929 (275 days/366 days × \$8,000,000), and the ratable daily portion of the floating leg is \$5,860,656 (275 days/366 days × \$7,800,000). The net amount for the taxable year is the difference between the ratable daily portions of the two periodic payments, or \$150,273 (\$6,010,929—\$5,860,656). Accordingly, *A* has net income of \$150,273 from this swap for 1995, and *B* has a corresponding net deduction of \$150,273.

(d) The \$49,727 unrecognized balance of the \$200,000 net periodic payment that is made on April 1, 1996, is included in *A*'s and *B*'s net income or net deduction from the contract for 1996.

(e) If the parties had entered into the contract on February 1, 1995, the result would not change because no portion of either party's obligation to make a payment under the swap relates to the period prior to April 1, 1995. Consequently, under paragraph (e)(2) of this section, neither party would accrue any income or deduction from the swap for the period from February 1, 1995, through March 31, 1995.

*Example 2. Accrual of periodic swap payments by cash method taxpayer.* (a) On April 1, 1995, *C* enters into a contract with unrelated counterparty *D* under which, for a period of five years, *C* is obligated to make a fixed payment to *D* each April 1, beginning April 1, 1996, in an amount equal to 8% multiplied by a notional principal amount of \$100 million. *D* is obligated to make semi-annual payments to *C* each April 1 and October 1, beginning October 1, 1995, in an amount equal to one-half of the LIBOR amount as of the first day of the preceding 6-month period multiplied by the notional principal amount. The payments are to be calculated using a 30/360 day convention. *C* is a calendar year taxpayer that uses the accrual method of accounting. *D* is a calendar year taxpayer that uses the cash receipts and disbursements method of accounting. LIBOR is 7.80% on April 1, 1995, and 7.46% on October 1, 1995.

(b) This contract is a notional principal contract as defined by paragraph (c)(1) of this section, and LIBOR and the fixed interest rate of 8% are each specified indices under paragraph (c)(2) of this section. All of the payments to be made by *C* and *D* are periodic payments under paragraph (e)(1) of this section because they are each based on appropriate specified indices, are payable at periodic intervals of one year or less

throughout the term of the contract, and are based on a single notional principal amount.

(c) Under the terms of the swap agreement, *D* pays *C* \$3,900,000 ( $0.5 \times 7.8\% \times \$100,000,000$ ) on October 1, 1995. In addition, *D* is obligated to pay *C* \$3,730,000 ( $0.5 \times 7.46\% \times \$100,000,000$ ) on April 1, 1996. *C* is obligated to pay *D* \$8,000,000 on April 1, 1996. Under paragraph (e)(2)(i) of this section, *C*'s and *D*'s ratable daily portions for 1995 are the amounts of the periodic payments that are attributable to their taxable year ending December 31, 1995. The ratable daily portion of the 8% fixed leg is \$6,000,000 ( $270 \text{ days}/360 \text{ days} \times \$8,000,000$ ), and the ratable daily portion of the floating leg is \$5,765,000 ( $\$3,900,000 + (90 \text{ days}/180 \text{ days} \times \$3,730,000)$ ). Thus, *C*'s net deduction from the contract for 1995 is \$235,000 ( $\$6,000,000 - \$5,765,000$ ) and *D* reports \$235,000 of net income from the contract for 1995.

(d) The net unrecognized balance of \$135,000 (\$2,000,000 balance of the fixed leg—\$1,865,000 balance of the floating leg) is included in *C*'s and *D*'s net income or net deduction from the contract for 1996.

*Example 3. Accrual of swap payments on index set in arrears.* (a) The facts are the same as in *Example 1*, except that *A*'s obligation to make payments based upon LIBOR is determined by reference to LIBOR on the day each payment is due. LIBOR is 8.25% on December 31, 1995, and 8.16% on April 1, 1996.

(b) On December 31, 1995, the amount that *A* is obligated to pay *B* is not known because it will not become fixed until April 1, 1996. Under paragraph (e)(2)(ii) of this section, the ratable daily portion of the periodic payment from *A* to *B* for 1995 is based on the value of LIBOR on December 31, 1995 (unless *A* or *B* determines that the value of LIBOR on that day does not reasonably estimate the value of the specified index). Thus, the ratable daily portion of the floating leg is \$6,198,770 ( $275 \text{ days}/366 \text{ days} \times 8.25\% \times \$100,000,000$ ), while the ratable daily portion of the fixed leg is \$6,010,929 ( $275 \text{ days}/366 \text{ days} \times \$8,000,000$ ). The net amount for 1995 on this swap is \$187,841 ( $\$6,198,770 - \$6,010,929$ ). Accordingly, *B* has \$187,841 of net income from the swap in 1995, and *A* has a net deduction of \$187,841.

(c) On April 1, 1996, *A* makes a net payment to *B* of \$160,000 (\$8,160,000 payment on the floating leg—\$8,000,000 payment on the fixed leg). For purposes of determining their net income or net deduction from this contract for the year ended December 31, 1996, *B* and *A* must adjust the net income and net deduction they recognized in 1995 by \$67,623 ( $275 \text{ days}/366 \text{ days} \times (\$8,250,000 \text{ presumed payment on the floating leg} - \$8,160,000 \text{ actual payment on the floating leg})$ ).

(f) *Nonperiodic payments—(1) Definition.* A nonperiodic payment is any payment made or received with respect to a notional principal contract that is

not a periodic payment (as defined in paragraph (e)(1) of this section) or a termination payment (as defined in paragraph (h) of this section). Examples of nonperiodic payments are the premium for a cap or floor agreement (even if it is paid in installments), the payment for an off-market swap agreement, the prepayment of part or all of one leg of a swap, and the premium for an option to enter into a swap if and when the option is exercised.

(2) *Recognition rules—(i) In general.* All taxpayers, regardless of their method of accounting, must recognize the ratable daily portion of a nonperiodic payment for the taxable year to which that portion relates. Generally, a nonperiodic payment must be recognized over the term of a notional principal contract in a manner that reflects the economic substance of the contract.

(ii) *General rule for swaps.* A nonperiodic payment that relates to a swap must be recognized over the term of the contract by allocating it in accordance with the forward rates (or, in the case of a commodity, the forward prices) of a series of cash-settled forward contracts that reflect the specified index and the notional principal amount. For purposes of this allocation, the forward rates or prices used to determine the amount of the nonperiodic payment will be respected, if reasonable. See paragraph (f)(4) *Example 7* of this section.

(iii) *Alternative methods for swaps.* Solely for purposes of determining the timing of income and deductions, a nonperiodic payment made or received with respect to a swap may be allocated to each period of the swap contract using one of the methods described in this paragraph (f)(2)(iii). The alternative methods may not be used by a dealer in notional principal contracts (as defined in paragraph (c)(4)(iii) of this section) for swaps entered into or acquired in its capacity as a dealer.

(A) *Prepaid swaps.* An upfront payment on a swap may be amortized by assuming that the nonperiodic payment represents the present value of a series of equal payments made throughout the term of the swap contract (the level payment method), adjusted as appropriate to take account

of increases or decreases in the notional principal amount. The discount rate used in this calculation must be the rate (or rates) used by the parties to determine the amount of the nonperiodic payment. If that rate is not readily ascertainable, the discount rate used must be a rate that is reasonable under the circumstances. Under this method, an upfront payment is allocated by dividing each equal payment into its principal recovery and time value components. The principal recovery components of the equal payments are treated as periodic payments that are deemed to be made on each of the dates that the swap contract provides for periodic payments by the payor of the nonperiodic payment or, if none, on each of the dates that the swap contract provides for periodic payments by the recipient of the nonperiodic payment. The time value component is needed to compute the amortization of the nonperiodic payment, but is otherwise disregarded. See paragraph (f)(4) *Example 5* of this section.

(B) *Other nonperiodic swap payments.* Nonperiodic payments on a swap other than an upfront payment may be amortized by treating the contract as if it provided for a single upfront payment (equal to the present value of the nonperiodic payments) and a loan between the parties. The discount rate (or rates) used in determining the deemed upfront payment and the time value component of the deemed loan is the same as the rate (or rates) used in the level payment method. The single upfront payment is then amortized under the level payment method described in paragraph (f)(2)(iii)(A) of this section. The time value component of the loan is not treated as interest, but, together with the amortized amount of the deemed upfront payment, is recognized as a periodic payment. See paragraph (f)(4) *Example 6* of this section. If both parties make nonperiodic payments, this calculation is done separately for the nonperiodic payments made by each party.

(iv) *General rule for caps and floors.* A payment to purchase or sell a cap or floor must be recognized over the term of the agreement by allocating it in accordance with the prices of a series of cash-settled option contracts that re-

flect the specified index and the notional principal amount. For purposes of this allocation, the option pricing used by the parties to determine the total amount paid for the cap or floor will be respected, if reasonable. Only the portion of the purchase price that is allocable to the option contract or contracts that expire during a particular period is recognized for that period. Thus, under this paragraph (f)(2)(iv), straight-line or accelerated amortization of a cap premium is generally not permitted. See paragraph (f)(4) *Examples 1* and *2* of this section.

(v) *Alternative methods for caps and floors that hedge debt instruments.* Solely for purposes of determining the timing of income and deductions, if a cap or floor is entered into primarily to reduce risk with respect to a specific debt instrument or group of debt instruments held or issued by the taxpayer, the taxpayer may amortize a payment to purchase or sell the cap or floor using the methods described in this paragraph (f)(2)(v), adjusted as appropriate to take account of increases or decreases in the notional principal amount. The alternative methods may not be used by a dealer in notional principal contracts (as defined in paragraph (c)(4)(iii) of this section) for caps or floors entered into or acquired in its capacity as a dealer.

(A) *Prepaid caps and floors.* A premium paid upfront for a cap or a floor may be amortized using the "level payment method" described in paragraph (f)(2)(iii)(A) of this section. See paragraph (f)(4) *Example 3* of this section.

(B) *Other caps and floors.* Nonperiodic payments on a cap or floor other than an upfront payment are amortized by treating the contract as if it provided for a single upfront payment (equal to the present value of the nonperiodic payments) and a loan between the parties as described in paragraph (f)(2)(iii)(B) of this section. Under the level payment method, a cap or floor premium paid in level annual installments over the term of the contract is effectively included or deducted from income ratably, in accordance with the level payments. See paragraph (f)(4) *Example 4* of this section.

(C) *Special method for collars.* A taxpayer may also treat a cap and a floor

that comprise a collar as a single notional principal contract and may amortize the net nonperiodic payment to enter into the cap and floor over the term of the collar in accordance with the methods prescribed in this paragraph (f)(2)(v).

(vi) *Additional methods.* The Commissioner may, by a revenue ruling or a revenue procedure published in the Internal Revenue Bulletin, provide alternative methods for allocating nonperiodic payments that relate to a notional principal contract to each year of the contract. See § 601.601(d)(2)(ii)(b) of this chapter.

(3) *Term of extendible or terminable contracts.* For purposes of this paragraph (f), the term of a notional principal contract that is subject to extension or termination is the reasonably expected term of the contract.

(4) *Examples.* The following examples illustrate the application of paragraph (f) of this section.

*Example 1. Cap premium amortized using general rule.* (a) On January 1, 1995, when LIBOR is 8%, *F* pays unrelated party *E* \$600,000 for a contract that obligates *E* to make a payment to *F* each quarter equal to one-quarter of the excess, if any, of three-month LIBOR over 9% with respect to a notional principal amount of \$25 million. Both *E* and *F* are calendar year taxpayers. *E* provides *F* with a schedule of allocable premium amounts indicating that the cap was priced according to a reasonable variation of the Black-Scholes option pricing formula and that the total premium is allocable to the following periods:

	Pricing allocation
1995 .....	\$55,000
1996 .....	225,000
1997 .....	320,000
	\$600,000

(b) This contract is a notional principal contract as defined by paragraph (c)(1) of this section, and LIBOR is a specified index under paragraph (c)(2)(iii) of this section. Any payments made by *E* to *F* are periodic payments under paragraph (e)(1) of this section because they are payable at periodic intervals of one year or less throughout the term of the contract, are based on an appropriate specified index, and are based on a single notional principal amount. The \$600,000 cap premium paid by *F* to *E* is a nonperiodic payment as defined in paragraph (f)(1) of this section.

(c) The Black-Scholes model is recognized in the financial industry as a standard technique for pricing interest rate cap agreements. Therefore, because *E* has used a reasonable option pricing model, the schedule generated by *E* is consistent with the economic substance of the cap, and may be used by both *E* and *F* for calculating their ratable daily portions of the cap premium. Under paragraph (f)(2)(iv) of this section, *E* recognizes the ratable daily portion of the cap premium as income, and *F* recognizes the ratable daily portion of the cap premium as a deduction based on the pricing schedule. Thus, *E* and *F* account for the contract as follows:

	Ratable daily portion
1995 .....	\$55,000
1996 .....	225,000
1997 .....	320,000
	\$600,000

(d) Any periodic payments under the cap agreement (that is, payments that *E* makes to *F* because LIBOR exceeds 9%) are included in the parties' net income or net deduction from the contract in accordance with paragraph (e)(2) of this section.

*Example 2. Cap premium allocated to proper period.* (a) The facts are the same as in *Example 1*, except that the cap is purchased by *F* on November 1, 1994. The first determination date under the cap agreement is January 31, 1995 (the last day of the first quarter to which the contract relates). LIBOR is 9.1% on December 31, 1994, and is 9.15% on January 31, 1995.

(b) *E* and *F* recognize \$9,192 (61 days/365 days × \$55,000) as the ratable daily portion of the nonperiodic payment for 1994, and include that amount in their net income or net deduction from the contract for 1994. If *E*'s pricing model allocated the cap premium to each quarter covered by the contract, the ratable daily portion would be 61 days/92 days times the premium allocated to the first quarter.

(c) Under paragraph (e)(2)(ii) of this section, *E* and *F* calculate the payments using LIBOR as of December 31, 1994. *F* recognizes as income the ratable daily portion of the presumed payment, or \$4,144 (61 days/92 days × .25 × .001 × \$25,000,000). Thus, *E* reports \$5,048 of net income from the contract for 1994 (\$9,192-\$4,144), and *F* reports a net deduction from the contract of \$5,048.

(d) On January 31, 1995, *E* pays *F* \$9,375 (.25 × .0015 × \$25,000,000) under the terms of the cap agreement. For purposes of determining their net income or net deduction from this contract for the year ended December 31, 1995, *E* and *F* must adjust their respective net income and net deduction from the cap

Internal Revenue Service, Treasury

§ 1.446-3

by \$2,072 (61 days/92 days × (\$9,375 actual payment under the cap on January 31, 1995—\$6,250 presumed payment under the cap on December 31, 1994)).

*Example 3. Cap premium amortized using alternative method.* (a) The facts are the same as in *Example 1*, except that the cap provides for annual payments by *E* and is entered into by *F* primarily to reduce risk with respect to a debt instrument issued by *F*. *F* elects to

amortize the cap premium using the alternative level payment method provided under paragraph (f)(2)(v)(A) of this section. Under that method, *F* amortizes the cap premium by assuming that the \$600,000 is repaid in 3 equal annual payments of \$241,269, assuming a discount rate of 10%. Each payment is divided into a time value component and a principal component, which are set out below.

	Level payment	Time value component	Principal component
1995 .....	\$241,269	\$60,000	\$181,269
1996 .....	241,269	41,873	199,396
1997 .....	241,269	21,934	219,335
	\$723,807	\$123,807	\$600,000

(b) The net of the ratable daily portions of the principal component and the payments, if any, received from *E* comprise *F*'s annual net income or net deduction from the cap. The time value components are needed only to compute the ratable daily portions of the cap premium, and are otherwise disregarded.

*Example 4. Cap premium paid in level installments and amortized using alternative method.* (a) The facts are the same as in *Example 3*, except that *F* agrees to pay for the cap in three level installments of \$241,269 (a total of

\$723,807) on December 31, 1995, 1996, and 1997. The present value of three payments of \$241,269, discounted at 10%, is \$600,000. For purposes of amortizing the cap premium under the alternative method provided in paragraph (f)(2)(v)(B) of this section, *F* is treated as paying \$600,000 for the cap on January 1, 1995, and borrowing \$600,000 from *E* that will be repaid in three annual installments of \$241,269. The time value component of the loan is computed as follows:

	Loan balance	Time value component	Principal component
1995 .....	\$600,000	\$60,000	\$181,269
1996 .....	418,731	41,873	199,396
1997 .....	219,335	21,934	219,335
		\$123,807	\$600,000

(b) *F* is treated as making periodic payments equal to the amortized principal components from a \$600,000 cap paid in advance (as described in *Example 3*), increased by the time value components of the \$600,000 loan, which totals \$241,269 each year. The time value components of the \$600,000 loan are included in the periodic payments made by *F*, but are not characterized as interest income or expense. The effect of the alternative method in this situation is to allow *F* to amortize the cap premium in level installments, the same way it is paid. The net of the ratable daily portions of *F*'s deemed periodic payments and the payments, if any, received from *E* comprise *F*'s annual net income or net deduction from the cap.

*Example 5. Upfront interest rate swap payment amortized using alternative method.* (a) On January 1, 1995, *G* enters into an interest rate swap agreement with unrelated counterparty *H* under which, for a term of five years, *G* is obligated to make annual payments at 11% and *H* is obligated to make

annual payments at LIBOR on a notional principal amount of \$100 million. At the time *G* and *H* enter into this swap agreement, the rate for similar on-market swaps is LIBOR to 10%. To compensate for this difference, on January 1, 1995, *H* pays *G* a yield adjustment fee of \$3,790,786. *G* provides *H* with information that indicates that the amount of the yield adjustment fee was determined as the present value, at 10% compounded annually, of five annual payments of \$1,000,000 (1% × \$100,000,000). *G* and *H* are calendar year taxpayers.

(b) This contract is a notional principal contract as defined by paragraph (c)(1) of this section. The yield adjustment fee is a nonperiodic payment as defined in paragraph (f)(1) of this section.

(c) Under the alternative method described in paragraph (f)(2)(iii)(A) of this section, the yield adjustment fee is recognized over the life of the agreement by assuming that the

§ 1.446-3

26 CFR Ch. I (4-1-17 Edition)

\$3,790,786 is repaid in five level payments. Assuming a constant yield to maturity and an-

nual compounding at 10%, the ratable daily portions are computed as follows:

	Level payment	Time value component	Principal component
1995 .....	\$1,000,000	\$379,079	\$620,921
1996 .....	1,000,000	316,987	683,013
1997 .....	1,000,000	248,685	751,315
1998 .....	1,000,000	173,554	826,446
1999 .....	1,000,000	90,909	909,091
	\$5,000,000	\$1,209,214	\$3,790,786

(d) *G* also makes swap payments to *H* at 11%, while *H* makes swap payments to *G* based on LIBOR. The net of the ratable daily portions of the 11% payments by *G*, the LIBOR payments by *H*, and the principal component of the yield adjustment fee paid by *H* determines the annual net income or net deduction from the contract for both *G* and *H*. The time value components are needed only to compute the ratable daily portions of the yield adjustment fee paid by *H*, and are otherwise disregarded.

*Example 6. Backloaded interest rate swap payment amortized using alternative method.*

	Loan balance	Time value component	Principal component
1995 .....	\$3,790,786	\$379,079	0
1996 .....	4,169,865	416,987	0
1997 .....	4,586,852	458,685	0
1998 .....	5,045,537	504,554	0
1999 .....	5,550,091	555,009	6,105,100

(b) The amortization of *H*'s yield adjustment fee is equal to the amortization of a yield adjustment fee of \$3,790,786 paid in advance (as described in *Example 5*), increased by the time value component of the \$3,790,786 deemed loan from *G* to *H*. Thus, the amount of *H*'s yield adjustment fee that is allocated to 1995 is \$1,000,000 (\$620,921 + \$379,079). The time value components of the \$3,790,786 loan are included in the periodic payments paid by *H*, but are not characterized as interest income or expense. The net of the ratable daily portions of the 11% swap payments by *G*, and the LIBOR payments by *H*, added to the principal components from *Example 5* and the time value components from this *Example 6*, determines the annual net income or net deduction from the contract for both *G* and *H*.

*Example 7. Nonperiodic payment on a commodity swap amortized under general rule.* (a) On January 1, 1995, *I* enters into a commodity swap agreement with unrelated counterparty *J* under which, for a term of three years, *I* is obligated to make annual payments based on a fixed price of \$2.35 per bushel times a notional amount of 100,000 bushels of corn and *J* is obligated to make

(a) The facts are the same as in *Example 5*, but *H* agrees to pay *G* a yield adjustment fee of \$6,105,100 on December 31, 1999. Under the alternative method in paragraph (f)(2)(iii)(B) of this section, *H* is treated as paying a yield adjustment fee of \$3,790,786 (the present value of \$6,105,100, discounted at a 10% rate with annual compounding) on January 1, 1995. Solely for timing purposes, *H* is treated as borrowing \$3,790,786 from *G*. Assuming annual compounding at 10%, the time value component is computed as follows:

annual payments equal to the spot price times the same notional amount. Assume that on January 1, 1995, the price of a one year forward for corn is \$2.40 per bushel, of a two year forward \$2.55 per bushel, and of a 3 year forward \$2.75 per bushel. To compensate for the below-market fixed price provided in the swap agreement, *I* pays *J* \$53,530 for entering into the swap. *I* and *J* are calendar year taxpayers.

(b) This contract is a notional principal contract as defined by paragraph (c)(1) of this section, and \$2.35 and the spot price of corn are specified indices under paragraphs (c)(2)(i) and (iii) of this section, respectively. The \$53,530 payment is a nonperiodic payment as defined by paragraph (f)(1) of this section.

(c) Assuming that *I* does not use the alternative methods provided under paragraph (f)(2)(iii) of this section, paragraph (f)(2)(ii) of this section requires that *I* recognize the nonperiodic payment over the term of the agreement by allocating the payment to each forward contract in accordance with the forward price of corn. Solely for timing purposes, *I* treats the \$53,530 nonperiodic payment as a loan that *J* will repay in three

**Internal Revenue Service, Treasury**

**§ 1.446-3**

installments of \$5,000, \$20,000, and \$40,000, the expected payouts on the in-the-money forward contracts. With annual compounding at

8%, the ratable daily portions are computed as follows:

	Expected forward payment	Time value component	Principal component
1995 .....	\$5,000	\$4,282	\$718
1996 .....	20,000	4,225	15,775
1997 .....	40,000	2,963	37,037
	\$65,000	\$11,470	\$53,530

(d) The ratable daily portion of the principal component is added to *F*'s periodic payments in computing its net income or net deduction from the notional principal contract for each taxable year. The time value components are needed only to compute the principal components, and are otherwise disregarded.

(g) *Special rules*—(1) *Disguised notional principal contracts*. The Commissioner may recharacterize all or part of a transaction (or series of transactions) if the effect of the transaction (or series of transactions) is to avoid the application of this section.

(2) *Hedged notional principal contracts*. If a taxpayer, either directly or through a related person (as defined in paragraph (c)(4)(i) of this section), reduces risk with respect to a notional principal contract by purchasing, selling, or otherwise entering into other notional principal contracts, futures, forwards, options, or other financial contracts (other than debt instruments), the taxpayer may not use the alternative methods provided in paragraphs (f)(2)(iii) and (v) of this section. Moreover, where such positions are entered into to avoid the appropriate timing or character of income from the contracts taken together, the Commissioner may require that amounts paid to or received by the taxpayer under the notional principal contract be treated in a manner that is consistent with the economic substance of the transaction as a whole.

(3) *Options and forwards to enter into notional principal contracts*. An option or forward contract that entitles or obligates a person to enter into a notional principal contract is subject to the general rules of taxation for options or forward contracts. Any payment with respect to the option or forward contract is treated as a nonperiodic payment for the underlying notional principal contract under the rules of paragraphs (f) and (g)(4) or (g)(5) of this section if and when the underlying notional principal contract is entered into.

(4) [Reserved]. For further guidance, see § 1.446-3T(g)(4).

(5) *Caps and floors that are significantly in-the-money*. [Reserved]

(6) *Examples*. The following examples illustrate the application of paragraph (g) of this section.

*Example 1. Cap hedged with options.* (a) On January 1, 1995, *K* sells to unrelated counterparty *L* three cash settlement European-style put options on Eurodollar time deposits with a strike rate of 9%. The options have exercise dates of January 1, 1996, January 1, 1997, and January 1, 1998, respectively. If LIBOR exceeds 9% on any of the exercise dates, *L* will be entitled, by exercising the relevant option, to receive from *K* an amount that corresponds to the excess of LIBOR over 9% times \$25 million. *L* pays *K* \$650,000 for the three options. Furthermore, *K* is related to *F*, the cap purchaser in paragraph (f)(4) *Example 1* of this section.

(b) *K*'s option agreements with *L* reduce risk with respect to *F*'s cap agreement with *E*. Accordingly, under paragraph (g)(2) of this section, *F* cannot use the alternative methods provided in paragraph (f)(2)(v) of this section to amortize the premium paid under the cap agreement. *F* must amortize the cap premium it paid in accordance with paragraph (f)(2)(iv) of this section.

(c) The method that *E* may use to account for its agreement with *F* is not affected by the application of paragraph (g)(2) of this section to *F*.

*Example 2.* [Reserved]. For further guidance, see § 1.446-3T(g)(6), *Example 2*.

*Example 3.* [Reserved]. For further guidance, see § 1.446-3T(g)(6), *Example 3*.

*Example 4.* [Reserved]. For further guidance, see § 1.446-3T(g)(6), *Example 4*.

(h) *Termination payments*—(1) *Definition*. A payment made or received to extinguish or assign all or a proportionate part of the remaining rights

and obligations of any party under a notional principal contract is a termination payment to the party making the termination payment and the party receiving the payment. A termination payment includes a payment made between the original parties to the contract (an extinguishment), a payment made between one party to the contract and a third party (an assignment), and any gain or loss realized on the exchange of one notional principal contract for another. Where one party assigns its remaining rights and obligations to a third party, the original non-assigning counterparty realizes gain or loss if the assignment results in a deemed exchange of contracts and a realization event under section 1001.

(2) *Taxable year of inclusion and deduction by original parties.* Except as otherwise provided (for example, in section 453, section 1092, or § 1.446-4), a party to a notional principal contract recognizes a termination payment in the year the contract is extinguished, assigned, or exchanged. When the termination payment is recognized, the party also recognizes any other payments that have been made or received pursuant to the notional principal contract, but that have not been recognized under paragraph (d) of this section. If only a proportionate part of a party's rights and obligations is extinguished, assigned, or exchanged, then only that proportion of the unrecognized payments is recognized under the previous sentence.

(3) *Taxable year of inclusion and deduction by assignees.* A termination payment made or received by an assignee pursuant to an assignment of a notional principal contract is recognized by the assignee under the rules of paragraphs (f) and (g)(4) or (g)(5) of this section as a nonperiodic payment for the notional principal contract that is in effect after the assignment.

(4) *Special rules—(i) Assignment of one leg of a contract.* A payment is not a termination payment if it is made or received by a party in exchange for assigning all or a portion of one leg of a notional principal contract at a time when a substantially proportionate amount of the other leg remains unperformed and unassigned. The payment is either an amount loaned, an

amount borrowed, or a nonperiodic payment, depending on the economic substance of the transaction to each party. This paragraph (h)(4)(i) applies whether or not the original notional principal contract is terminated as a result of the assignment.

(ii) *Substance over form.* Any economic benefit that is given or received by a taxpayer in lieu of a termination payment is a termination payment.

(5) *Examples.* The following examples illustrate the application of this paragraph (h). The contracts in the examples are not hedging transactions as defined in § 1.1221-2(b), and all of the examples assume that no loss-deferral rules apply.

*Example 1. Termination by extinguishment.*

(a) On January 1, 1995, *P* enters into an interest rate swap agreement with unrelated counterparty *Q* under which, for a term of seven years, *P* is obligated to make annual payments based on 10% and *Q* is obligated to make semi-annual payments based on LIBOR and a notional principal amount of \$100 million. *P* and *Q* are both calendar year taxpayers. On January 1, 1997, when the fixed rate on a comparable LIBOR swap has fallen to 9.5%, *P* pays *Q* \$1,895,393 to terminate the swap.

(b) The payment from *P* to *Q* extinguishes the swap contract and is a termination payment, as defined in paragraph (h)(1) of this section, for both parties. Accordingly, under paragraph (h)(2) of this section, *P* recognizes a loss of \$1,895,393 in 1997 and *Q* recognizes \$1,895,393 of gain in 1997.

*Example 2. Termination by assignment.* (a) The facts are the same as in *Example 1*, except that on January 1, 1997, *P* pays unrelated party *R* \$1,895,393 to assume all of *P*'s rights and obligations under the swap with *Q*. In return for this payment, *R* agrees to pay 10% of \$100 million annually to *Q* and to receive LIBOR payments from *Q* for the remaining five years of the swap.

(b) The payment from *P* to *R* terminates *P*'s interest in the swap contract with *Q* and is a termination payment, as defined in paragraph (h)(1) of this section, for *P*. Under paragraph (h)(2) of this section, *P* recognizes a loss of \$1,895,393 in 1997. Whether *Q* also has a termination payment with respect to the payment from *P* to *R* is determined under section 1001.

(c) Under paragraph (h)(3) of this section, the assignment payment that *R* receives from *P* is a nonperiodic payment for an interest rate swap. Because the assignment payment is not a significant nonperiodic payment within the meaning of paragraph (g)(1) of this section, *R* amortizes the \$1,895,393 over the five year term of the swap

agreement under paragraph (f)(2) of this section.

*Example 3. Assignment of swap with yield adjustment fee.* (a) The facts are the same as in *Example 2*, except that on January 1, 1995, *Q* paid *P* a yield adjustment fee to enter into the seven year interest rate swap. In accordance with paragraph (f)(2) of this section, *P* and *Q* included the ratable daily portions of that nonperiodic payment in their net income or net deduction from the contract for 1995 and 1996. On January 1, 1997, \$300,000 of the nonperiodic payment has not yet been recognized by *P* and *Q*.

(b) Under paragraph (h)(2) of this section, *P* recognizes a loss of \$1,595,393 (\$1,895,393-\$300,000) in 1997. *R* accounts for the termination payment in the same way it did in *Example 2*; the existence of an unamortized payment with respect to the original swap has no effect on *R*.

*Example 4. Assignment of one leg of a swap.*

(a) On January 1, 1995, *S* enters into an interest rate swap agreement with unrelated counterparty *T* under which, for a term of five years, *S* will make annual payments at 10% and *T* will make annual payments at LIBOR on a notional principal amount of \$50 million. On January 1, 1996, unrelated party *U* pays *T* \$15,849,327 for the right to receive the four remaining \$5,000,000 payments from *S*. Under the terms of the agreement between *S* and *T*, *S* is notified of this assignment, and *S* is contractually bound thereafter to make its payments to *U* on the appropriate payment dates. *S*'s obligation to pay *U* is conditioned on *T* making its LIBOR payment to *S* on the appropriate payment dates.

(b) Because *T* has assigned to *U* its rights to the fixed rate payments, but not its floating rate obligations under the notional principal contract, *U*'s payment to *T* is not a termination payment as defined in paragraph (h)(1) of this section, but is covered by paragraph (h)(4)(i) of this section. The economic substance of the transaction between *T* and *U* is a loan that does not affect the way that *S* and *T* account for the notional principal contract under this section.

(i) *Anti-abuse rule.* If a taxpayer enters into a transaction with a principal purpose of applying the rules of this section to produce a material distortion of income, the Commissioner may depart from the rules of this section as necessary to reflect the appropriate timing of income and deductions from the transaction.

(j)(1) *Effective/applicability date.* These regulations are effective for notional principal contracts entered into on or after December 13, 1993.

(2) [Reserved]. For further guidance, see § 1.446-3T(j)(2).

[T.D. 8491, 58 FR 53128, Oct. 14, 1993; 59 FR 9411, Feb. 28, 1994, as amended by T.D. 8554, 59 FR 36358, July 18, 1994; T.D. 9719, 80 FR 26440, May 8, 2015; 80 FR 34051, June 15, 2015]

#### § 1.446-3T Notional principal contracts (temporary).

(a) through (g)(3) [Reserved]. For further guidance, see § 1.446-3(a) through (g)(3).

(4) *Notional principal contracts with nonperiodic payments*—(i) *General rule.* Except as provided in paragraph (g)(4)(ii) of this section, a notional principal contract with one or more nonperiodic payments is treated as two separate transactions consisting of an on-market, level payment swap and one or more loans. The loan(s) must be accounted for by the parties to the contract independently of the swap. The time value component associated with the loan(s) is not included in the net income or net deduction from the swap under § 1.446-3(d), but it is recognized as interest for all purposes of the Internal Revenue Code. See paragraph (g)(6) *Example 2* of this section.

(ii) *Exceptions*—(A) *Notional principal contract with a term of one year or less*—(1) *General rule.* Except for purposes of sections 514 and 956, paragraph (g)(4)(i) of this section does not apply to a notional principal contract if the term of the contract is one year or less. For purposes of this paragraph (g)(4)(ii)(A), the term of a notional principal contract is the stated term of the contract, inclusive of any extensions (optional or otherwise) provided for in the terms of the contract, without regard to whether any extension is unilateral, is subject to approval by one or both parties to the contract, or is based on the occurrence or non-occurrence of a specified event.

(2) *Anti-abuse rule.* For purposes of determining the term of a contract under paragraph (g)(4)(ii)(A)(1) of this section, the Commissioner may treat two or more contracts as a single contract if a principal purpose of entering into separate contracts is to qualify for the exception set forth in paragraph (g)(4)(ii)(A)(1) of this section. A purpose may be a principal purpose even

though it is outweighed by other purposes (taken together or separately).

(B) *Notional principal contract subject to margin or collateral requirements.* Subject to the requirements in paragraph (g)(4)(ii)(C) of this section, paragraph (g)(4)(i) of this section does not apply to a notional principal contract if the contract is described in paragraph (g)(4)(ii)(B)(1) or (2) of this section. See § 1.956-2T(b)(1)(xi) for a related exception under section 956.

(1) The contract is cleared by a derivatives clearing organization (as such term is defined in section 1a of the Commodity Exchange Act (7 U.S.C. 1a)) or by a clearing agency (as such term is defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)) that is registered as a derivatives clearing organization under the Commodity Exchange Act or as a clearing agency under the Securities Exchange Act of 1934, respectively, and the derivatives clearing organization or clearing agency requires the parties to the contract to post and collect margin or collateral to fully collateralize the mark-to-market exposure on the contract (including the exposure on the nonperiodic payment) on a daily basis for the entire term of the contract. The mark-to-market exposure on a contract will be fully collateralized only if the contract is subject to both initial variation margin in an amount equal to the nonperiodic payment (except for variances permitted by intraday price changes) and daily variation margin in an amount equal to the daily change in the fair market value of the contract. See paragraph (g)(6) *Example 3* of this section.

(2) The parties to the contract are required, pursuant to the terms of the contract or the requirements of a federal regulator, to post and collect margin or collateral to fully collateralize the mark-to-market exposure on the contract (including the exposure on the nonperiodic payment) on a daily basis for the entire term of the contract. The mark-to-market exposure on a contract will be fully collateralized only if the contract is subject to both initial variation margin or collateral in an amount equal to the nonperiodic payment (except for variances permitted by intraday price changes) and daily

variation margin or collateral in an amount equal to the daily change in the fair market value of the contract. For purposes of this paragraph (g)(4)(ii)(B)(2), the term “federal regulator” means the Securities and Exchange Commission (SEC), Commodity Futures Trading Commission (CFTC), or a prudential regulator, as defined in section 1a(39) of the Commodity Exchange Act (7 U.S.C. 1a), as amended by section 721 of the Dodd-Frank Act. See paragraph (g)(6) *Example 4* of this section.

(C) *Limitations and special rules—(1) Cash requirement.* A notional principal contract is described in paragraph (g)(4)(ii)(B) of this section only to the extent the parties post and collect margin or collateral to fully collateralize the mark-to-market exposure on the contract (including the exposure on the nonperiodic payment) by paying and receiving the required margin or collateral in cash. The term “cash” includes U.S. dollars or cash in any currency in which payment obligations under the notional principal contract are denominated.

(2) *Excess margin or collateral.* For purposes of paragraph (g)(4)(ii)(B)(2) of this section, if the amount of cash margin or collateral posted and collected is in excess of the amount necessary to fully collateralize the mark-to-market exposure on the contract (including the exposure on the nonperiodic payment) on a daily basis for the entire term of the contract, any excess is subject to the rule in paragraph (g)(4)(i) of this section.

(3) *Margin or collateral paid and received in cash and other property.* If the parties to the contract post and collect both cash and other property to satisfy margin or collateral requirements to collateralize the mark-to-market exposure on the contract (including the exposure on the nonperiodic payment), any excess of the nonperiodic payment over the cash margin or collateral posted and collected is subject to the rule in paragraph (g)(4)(i) of this section.

(5) [Reserved]. For further guidance, see § 1.446-3(g)(5).

(6) *Examples* through *Example 1*. [Reserved]. For further guidance, see

**Internal Revenue Service, Treasury**

**§ 1.446-3T**

§1.446-3(g)(6), *Examples through Example 1.*

*Example 2. Nonperiodic payment.* (i) On January 1, 2016, unrelated parties M and N enter into an interest rate swap contract. Under the terms of the contract, N agrees to make five annual payments to M equal to LIBOR times a notional principal amount of \$100 million. In return, M agrees to pay N 6% of \$100 million annually, plus an upfront payment of \$15,163,147 on January 1, 2016. At the time M and N enter into the contract, the rate for similar on-market swaps is LIBOR to 10%, and N provides M with information that the amount of the upfront payment was determined as the present value, at 10% compounded annually, of five annual payments from M to N of \$4,000,000 (4% of \$100,000,000). The contract does not require the parties to post and collect margin or collateral to collateralize the mark-to-market exposure

on the contract on a daily basis for the entire term of the contract.

(ii) The exceptions in paragraphs (g)(4)(ii)(A) and (B) of this section do not apply. Under paragraph (g)(4)(i) of this section, the transaction is recharacterized as consisting of both a \$15,163,147 loan from M to N that N repays in installments over the term of the contract and an interest rate swap between M and N in which M immediately pays the installment payments on the loan back to N as part of its fixed payments on the swap in exchange for the LIBOR payments by N.

(iii) The upfront payment is recognized over the life of the contract by treating the \$15,163,147 as a loan that will be repaid with level payments over five years. Assuming a constant yield to maturity and annual compounding at 10%, M and N account for the principal and interest on the loan as follows:

	Level payment	Interest component	Principal component
2016 .....	\$4,000,000	\$1,516,315	\$2,483,685
2017 .....	4,000,000	1,267,946	2,732,054
2018 .....	4,000,000	994,741	3,005,259
2019 .....	4,000,000	694,215	3,305,785
2020 .....	4,000,000	363,636	3,636,364
	20,000,000	4,836,853	15,163,147

(iv) M recognizes interest income, and N claims an interest deduction, each taxable year equal to the interest component of the deemed installment payments on the loan. These interest amounts are not included in the parties' net income or net deduction from the swap contract under §1.446-3(d). The principal components are needed only to compute the interest component of the level payment for the following period and do not otherwise affect the parties' net income or net deduction from this contract.

(v) N also makes swap payments to M based on LIBOR and receives swap payments from M at a fixed rate that is equal to the sum of the stated fixed rate and the rate calculated by dividing the deemed level annual payments on the loan by the notional principal amount. Thus, the fixed rate on this swap is 10%, which is the sum of the stated rate of 6% and the rate calculated by dividing the annual loan payment of \$4,000,000 by the notional principal amount of \$100,000,000, or 4%. Using the methods provided in §1.446-3(e)(2), the fixed swap payments from M to N of \$10,000,000 (10% of \$100,000,000) and the LIBOR swap payments from N to M are included in the parties' net income or net deduction from the contract for each taxable year.

*Example 3. Full margin—cleared contract.* (i) A, a domestic corporation enters into an in-

terest rate swap contract with unrelated counterparty B. The contract is required to be cleared and is accepted for clearing by a U.S.-registered derivatives clearing organization (DCO). The standardized terms of the contract provide that A, for a term of X years, will pay B a fixed coupon of 1% per year and receive a floating coupon on a notional principal amount of \$Y. When A and B enter into the interest rate swap, the market coupon for similar interest rate swaps is 2% per year. The DCO requires A to make an upfront payment to compensate B for the below-market annual coupon payments that B will receive, and A makes the upfront payment in cash. The DCO also requires B to post initial variation margin in an amount equal to the upfront payment and requires each party to post and collect daily variation margin in an amount equal to the change in the fair market value of the contract on a daily basis for the entire term of the contract. B posts the initial variation margin in U.S. dollars, and the parties post and collect daily variation margin in U.S. dollars.

(ii) Because the contract is subject to initial variation margin in an amount equal to the upfront payment and daily variation margin in an amount equal to the change in the fair market value of the contract on a

daily basis for the entire term of the contract, the contract is described in paragraph (g)(4)(ii)(B)(1) of this section and paragraph (g)(4)(i) of this section does not apply to the contract.

*Example 4. Full margin—uncleared contract.*

(i) On June 1, 2016, P, a domestic corporation, enters into an interest rate swap contract with an unrelated domestic counterparty, CP. Under the terms of the contract, CP agrees to make five annual payments to P equal to a specified contract rate of 3% times the notional amount of \$10,000,000 plus an up-front payment of \$1,878,030. In exchange, P agrees to make five annual payments to CP equal to the same notional amount times LIBOR. At the time the parties enter into the contract, the fixed rate for an on-market swap is 7.52%. The contract is not required to be cleared and is not accepted for clearing by a U.S.-registered derivatives clearing organization. However, pursuant to the terms of the contract, P is obligated to post \$1,878,030 as collateral with CP, and P and CP are obligated to post and collect collateral each business day in an amount equal to the daily change in the fair market value of the contract for the entire term of the contract. All collateral on the contract is required to be in U.S. dollars.

(ii) Because the contract is required to be collateralized in an amount equal to the up-front payment and changes in the fair market value of the contract on a daily basis for the entire term of the contract, the contract is described in paragraph (g)(4)(ii)(B)(2) of this section and paragraph (g)(4)(i) of this section does not apply to the contract.

(h) through (j)(1) [Reserved]. For further guidance, see §1.446-3(h) through (j)(1).

(2) *Application of §1.446-3T(g)(4).* Paragraph (g)(4)(i) of this section and paragraph (g)(6) *Example 2* of this section apply to notional principal contracts entered into on or after the later of January 1, 2017, or 180 days after the date of publication of the Treasury decision adopting these rules as final regulations in the FEDERAL REGISTER. Paragraph (g)(4)(ii) of this section applies to notional principal contracts entered into on or after May 8, 2015. However, before the later of January 1, 2017, or 180 days after the date of publication of the Treasury decision adopting paragraph (g)(4)(i) of this section as final regulations in the FEDERAL REGISTER, taxpayers may rely on the provision in §1.446-3(g)(4), as contained in 26 CFR part 1, revised April 1, 2015, which (except for purposes of section 956) limits the application of the embedded

loan rule to nonperiodic payments that are significant, even if the requirements for the exceptions in paragraph (g)(4)(ii) of this section are not met. Taxpayers may apply paragraph (g)(4)(i) of this section, paragraph (g)(4)(ii) of this section, or both to notional principal contracts entered into before the dates set forth in this paragraph (j)(2).

(k) *Expiration date.* The applicability of paragraph (g)(4) of this section and paragraph (g)(6) *Examples 2, 3 and 4* of this section expires May 7, 2018.

[T.D. 9719, 80 FR 26440, May 8, 2015, as amended by 80 FR 61308, Oct. 13, 2015]

**§ 1.446-4 Hedging transactions.**

(a) *In general.* Except as provided in this paragraph (a), a hedging transaction as defined in §1.1221-2(b) (whether or not the character of gain or loss from the transaction is determined under §1.1221-2) must be accounted for under the rules of this section. To the extent that provisions of any other regulations governing the timing of income, deductions, gain, or loss are inconsistent with the rules of this section, the rules of this section control.

(1) *Trades or businesses excepted.* A taxpayer is not required to account for hedging transactions under the rules of this section for any trade or business in which the cash receipts and disbursements method of accounting is used or in which §1.471-6 is used for inventory valuations if, for all prior taxable years ending on or after September 30, 1993, the taxpayer met the \$5,000,000 gross receipts test of section 448(c) (or would have met that test if the taxpayer were a corporation or partnership). A taxpayer not required to use the rules of this section may nonetheless use a method of accounting that is consistent with these rules.

(2) *Coordination with other sections.* This section does not apply to—

(i) Any position to which section 475(a) applies;

(ii) An integrated transaction subject to §1.1275-6;

(iii) Any section 988 hedging transaction if the transaction is integrated under §1.988-5 or if other regulations issued under section 988(d) (or an advance ruling described in 1.988-5(e))

govern when gain or loss from the transaction is taken into account; or

(iv) The determination of the issuer's yield on an issue of tax-exempt bonds for purposes of the arbitrage restrictions to which § 1.148-4(h) applies.

(b) *Clear reflection of income.* The method of accounting used by a taxpayer for a hedging transaction must clearly reflect income. To clearly reflect income, the method used must reasonably match the timing of income, deduction, gain, or loss from the hedging transaction with the timing of income, deduction, gain, or loss from the item or items being hedged. Taking gains and losses into account in the period in which they are realized may clearly reflect income in the case of certain hedging transactions. For example, where a hedge and the item being hedged are disposed of in the same taxable year, taking realized gain or loss into account on both items in that taxable year may clearly reflect income. In the case of many hedging transactions, however, taking gains and losses into account as they are realized does not result in the matching required by this section.

(c) *Choice of method and consistency.* For any given type of hedging transaction, there may be more than one method of accounting that satisfies the clear reflection requirement of paragraph (b) of this section. A taxpayer is generally permitted to adopt a method of accounting for a particular type of hedging transaction that clearly reflects the taxpayer's income from that type of transaction. See paragraph (e) of this section for requirements and limitations on the taxpayer's choice of method. Different methods of accounting may be used for different types of hedging transactions and for transactions that hedge different types of items. Once a taxpayer adopts a method of accounting, however, that method must be applied consistently and can only be changed with the consent of the Commissioner, as provided by section 446(e) and the regulations and procedures thereunder.

(d) *Recordkeeping requirements—(1) In general.* The books and records maintained by a taxpayer must contain a description of the accounting method used for each type of hedging trans-

action. The description of the method or methods used must be sufficient to show how the clear reflection requirement of paragraph (b) of this section is satisfied.

(2) *Additional identification.* In addition to the identification required by § 1.1221-2(f), the books and records maintained by a taxpayer must contain whatever more specific identification with respect to a transaction is necessary to verify the application of the method of accounting used by the taxpayer for the transaction. This additional identification may relate to the hedging transaction or to the item, items, or aggregate risk being hedged. The additional identification must be made at the time specified in § 1.1221-2(f)(2) and must be made on, and retained as part of, the taxpayer's books and records.

(3) *Transactions in which character of gain or loss is not determined under § 1.1221-2.* A section 988 transaction, as defined in section 988(c)(1), or a qualified fund, as defined in section 988(c)(1)(E)(iii), is subject to the identification and recordkeeping requirements of § 1.1221-2(f). See § 1.1221-2(a)(4).

(e) *Requirements and limitations with respect to hedges of certain assets and liabilities.* In the case of certain hedging transactions, this paragraph (e) provides guidance in determining whether a taxpayer's method of accounting satisfies the clear reflection requirement of paragraph (b) of this section. Even if these rules are satisfied, however, the taxpayer's method, as actually applied to the taxpayer's hedging transactions, must clearly reflect income by meeting the matching requirement of paragraph (b) of this section.

(1) *Hedges of aggregate risk—(i) In general.* The method of accounting used for hedges of aggregate risk must comply with the matching requirements of paragraph (b) of this section. Even though a taxpayer may not be able to associate the hedging transaction with any particular item being hedged, the timing of income, deduction, gain, or loss from the hedging transaction must be matched with the timing of the aggregate income, deduction, gain, or loss from the items being hedged. For example, if a notional principal contract hedges a taxpayer's aggregate

risk, taking into account income, deduction, gain, or loss under the provisions of § 1.446-3 may clearly reflect income. See paragraph (e)(5) of this section.

(ii) *Mark-and-spread method.* The following method may be appropriate for taking into account income, deduction, gain, or loss from hedges of aggregate risk:

(A) The hedging transactions are marked to market at regular intervals for which the taxpayer has the necessary data, but no less frequently than quarterly; and

(B) The income, deduction, gain, or loss attributable to the realization or periodic marking to market of hedging transactions is taken into account over the period for which the hedging transactions are intended to reduce risk. Although the period over which the hedging transactions are intended to reduce risk may change, the period must be reasonable and consistent with the taxpayer's hedging policies and strategies.

(2) *Hedges of items marked to market.* In the case of a transaction that hedges an item that is marked to market under the taxpayer's method of accounting, marking the hedge to market clearly reflects income.

(3) *Hedges of inventory—(i) In general.* If a hedging transaction hedges purchases of inventory, gain or loss on the hedging transaction may be taken into account in the same period that it would be taken into account if the gain or loss were treated as an element of the cost of inventory. Similarly, if a hedging transaction hedges sales of inventory, gain or loss on the hedging transaction may be taken into account in the same period that it would be taken into account if the gain or loss were treated as an element of sales proceeds. If a hedge is associated with a particular purchase or sales transaction, the gain or loss on the hedge may be taken into account when it would be taken into account if it were an element of cost incurred in, or sales proceeds from, that transaction. As with hedges of aggregate risk, however, a taxpayer may not be able to associate hedges of inventory purchases or sales with particular purchase or sales transactions. In order to match the timing of income, deduction, gain, or

loss from the hedge with the timing of aggregate income, deduction, gain, or loss from the hedged purchases or sales, it may be appropriate for a taxpayer to account for its hedging transactions in the manner described in paragraph (e)(1)(ii) of this section, except that the gain or loss that is spread to each period is taken into account when it would be if it were an element of cost incurred (purchase hedges), or an element of proceeds from sales made (sales hedges), during that period.

(ii) *Alternative methods for certain inventory hedges.* In lieu of the method described in paragraph (e)(3)(i) of this section, other simpler, less precise methods may be used in appropriate cases where the clear reflection requirement of paragraph (b) of this section is satisfied. For example:

(A) Taking into account realized gains and losses on both hedges of inventory purchases and hedges of inventory sales when they would be taken into account if the gains and losses were elements of inventory cost in the period realized may clearly reflect income in some situations, but does not clearly reflect income for a taxpayer that uses the last-in, first-out method of accounting for the inventory; and

(B) Marking hedging transactions to market with resulting gain or loss taken into account immediately may clearly reflect income even though the inventory that is being hedged is not marked to market, but only if the inventory is not accounted for under either the last-in, first-out method or the lower-of-cost-or-market method and only if items are held in inventory for short periods of time.

(4) *Hedges of debt instruments.* Gain or loss from a transaction that hedges a debt instrument issued or to be issued by a taxpayer, or a debt instrument held or to be held by a taxpayer, must be accounted for by reference to the terms of the debt instrument and the period or periods to which the hedge relates. A hedge of an instrument that provides for interest to be paid at a fixed rate or a qualified floating rate, for example, generally is accounted for using constant yield principles. Thus, assuming that a fixed rate or qualified floating rate instrument remains outstanding, hedging gain or loss is taken

into account in the same periods in which it would be taken into account if it adjusted the yield of the instrument over the term to which the hedge relates. For example, gain or loss realized on a transaction that hedged an anticipated fixed rate borrowing for its entire term is accounted for, solely for purposes of this section, as if it decreased or increased the issue price of the debt instrument. Similarly, gain or loss realized on a transaction that hedges a contingent payment on a debt instrument subject to §1.1275-4(c) (a contingent payment debt instrument issued for nonpublicly traded property) is taken into account when the contingent payment is taken into account under §1.1275-4(c).

(5) *Notional principal contracts.* The rules of §1.446-3 govern the timing of income and deductions with respect to a notional principal contract unless, because the notional principal contract is part of a hedging transaction, the application of those rules would not result in the matching that is needed to satisfy the clear reflection requirement of paragraph (b) and, as applicable, (e)(4) of this section. For example, if a notional principal contract hedges a debt instrument, the method of accounting for periodic payments described in §1.446-3(e) and the methods of accounting for nonperiodic payments described in §1.446-3(f)(2)(iii) and (v) generally clearly reflect the taxpayer's income. The methods described in §1.446-3(f)(2)(ii) and (iv), however, generally do not clearly reflect the taxpayer's income in that situation.

(6) *Disposition of hedged asset or liability.* If a taxpayer hedges an item and disposes of, or terminates its interest in, the item but does not dispose of or terminate the hedging transaction, the taxpayer must appropriately match the built-in gain or loss on the hedging transaction to the gain or loss on the disposed item. To meet this requirement, the taxpayer may mark the hedge to market on the date it disposes of the hedged item. If the taxpayer intends to dispose of the hedging transaction within a reasonable period, however, it may be appropriate to match the realized gain or loss on the hedging transaction with the gain or loss on the disposed item. If the taxpayer intends

to dispose of the hedging transaction within a reasonable period and the hedging transaction is not actually disposed of within that period, the taxpayer must match the gain or loss on the hedge at the end of the reasonable period with the gain or loss on the disposed item. For purposes of this paragraph (e)(6), a reasonable period is generally 7 days.

(7) *Recycled hedges.* If a taxpayer enters into a hedging transaction by recycling a hedge of a particular hedged item to serve as a hedge of a different item, as described in §1.1221-2(d)(4), the taxpayer must match the built-in gain or loss at the time of the recycling to the gain or loss on the original hedged item, items, or aggregate risk. Income, deduction, gain, or loss attributable to the period after the recycling must be matched to the new hedged item, items, or aggregate risk under the principles of paragraph (b) of this section.

(8) *Unfulfilled anticipatory transactions—(i) In general.* If a taxpayer enters into a hedging transaction to reduce risk with respect to an anticipated asset acquisition, debt issuance, or obligation, and the anticipated transaction is not consummated, any income, deduction, gain, or loss from the hedging transaction is taken into account when realized.

(ii) *Consummation of anticipated transaction.* A taxpayer consummates a transaction for purposes of paragraph (e)(8)(i) of this section upon the occurrence (within a reasonable interval around the expected time of the anticipated transaction) of either the anticipated transaction or a different but similar transaction for which the hedge serves to reasonably reduce risk.

(9) *Hedging by members of a consolidated group—(i) General rule: single-entity approach.* In general, a member of a consolidated group must account for its hedging transactions as if all of the members were separate divisions of a single corporation. Thus, the timing of the income, deduction, gain, or loss on a hedging transaction must match the timing of income, deduction, gain, or loss from the item or items being hedged. Because all of the members are treated as if they were divisions of a single corporation, intercompany

## § 1.446-5

## 26 CFR Ch. I (4-1-17 Edition)

transactions are neither hedging transactions nor hedged items for these purposes.

(ii) *Separate-entity election.* If a consolidated group makes an election under § 1.1221-2(e)(2), then paragraph (e)(9)(i) of this section does not apply. Thus, in that case, each member of the consolidated group must account for its hedging transactions in a manner that meets the requirements of paragraph (b) of this section. For example, the income, deduction, gain, or loss from intercompany hedging transactions (as defined in § 1.1221-2(e)(2)(ii)) is taken into account under the timing rules of § 1.446-4 rather than under the timing rules of § 1.1502-13.

(iii) *Definitions.* For definitions of consolidated group, divisions of a single corporation, intercompany transaction, and member, see section 1502 and the regulations thereunder.

(iv) *Effective date.* This paragraph (e)(9) applies to transactions entered into on or after March 8, 1996.

(f) *Type or character of income and deduction.* The rules of this section govern the timing of income, deduction, gain, or loss on hedging transactions but do not affect the type or character of income, deduction, gain, or loss produced by the transaction. Thus, for example, the rules of paragraph (e)(3) of this section do not affect the computation of cost of goods sold or sales proceeds for a taxpayer that hedges inventory purchases or sales. Similarly, the rules of paragraph (e)(4) of this section do not increase or decrease the interest income or expense of a taxpayer that hedges a debt instrument or a liability.

(g) *Effective date.* This section applies to hedging transactions entered into on or after October 1, 1994.

(h) *Consent to change methods of accounting.* The Commissioner grants consent for a taxpayer to change its methods of accounting for transactions that are entered into on or after October 1, 1994, and that are described in paragraph (a) of this section. This consent is granted only for changes for the taxable year containing October 1, 1994. The taxpayer must describe its new methods of accounting in a statement

that is included in its Federal income tax return for that taxable year.

[T.D. 8554, 59 FR 36358, July 18, 1994, as amended by T.D. 8653, 61 FR 519, Jan. 8, 1996; T.D. 8674, 61 FR 30138, June 14, 1996; T.D. 8985, 67 FR 12865, Mar. 20, 2002; 67 FR 31955, May 13, 2002]

### § 1.446-5 Debt issuance costs.

(a) *In general.* This section provides rules for allocating debt issuance costs over the term of the debt. For purposes of this section, the term *debt issuance costs* means those transaction costs incurred by an issuer of debt (that is, a borrower) that are required to be capitalized under § 1.263(a)-5. If these costs are otherwise deductible, they are deductible by the issuer over the term of the debt as determined under paragraph (b) of this section.

(b) *Method of allocating debt issuance costs—(1) In general.* Solely for purposes of determining the amount of debt issuance costs that may be deducted in any period, these costs are treated as if they adjusted the yield on the debt. To effect this, the issuer treats the costs as if they decreased the issue price of the debt. See § 1.1273-2 to determine issue price. Thus, debt issuance costs increase or create original issue discount and decrease or eliminate bond issuance premium.

(2) *Original issue discount.* Any resulting original issue discount is taken into account by the issuer under the rules in § 1.163-7, which generally require the use of a constant yield method (as described in § 1.1272-1) to compute how much original issue discount is deductible for a period. However, see § 1.163-7(b) for special rules that apply if the total original issue discount on the debt is *de minimis*.

(3) *Bond issuance premium.* Any remaining bond issuance premium is taken into account by the issuer under the rules of § 1.163-13, which generally require the use of a constant yield method for purposes of allocating bond issuance premium to accrual periods.

(c) *Examples.* The following examples illustrate the rules of this section:

*Example 1.* (i) On January 1, 2004, X borrows \$10,000,000. The principal amount of the loan (\$10,000,000) is repayable on December 31, 2008, and payments of interest in the amount of \$500,000 are due on December 31 of each

year the loan is outstanding. X incurs debt issuance costs of \$130,000 to facilitate the borrowing.

(ii) Under § 1.1273-2, the issue price of the loan is \$10,000,000. However, under paragraph (b) of this section, X reduces the issue price of the loan by the debt issuance costs of \$130,000, resulting in an issue price of \$9,870,000. As a result, X treats the loan as having original issue discount in the amount of \$130,000 (stated redemption price at maturity of \$10,000,000 minus the issue price of \$9,870,000). Because this amount of original issue discount is more than the *de minimis* amount of original issue discount for the loan determined under § 1.1273-1(d) (\$125,000 (\$10,000,000 × .0025 × 5)), X must allocate the original issue discount to each year based on the constant yield method described in § 1.1272-1(b). See § 1.163-7(a). Based on this method and a yield of 5.30%, compounded annually, the original issue discount is allocable to each year as follows: \$23,385 for 2004, \$24,625 for 2005, \$25,931 for 2006, \$27,306 for 2007, and \$28,753 for 2008.

*Example 2.* (i) Assume the same facts as in *Example 1*, except that X incurs debt issuance costs of \$120,000 rather than \$130,000.

(ii) Under § 1.1273-2, the issue price of the loan is \$10,000,000. However, under paragraph (b) of this section, X reduces the issue price of the loan by the debt issuance costs of \$120,000, resulting in an issue price of \$9,880,000. As a result, X treats the loan as having original issue discount in the amount of \$120,000 (stated redemption price at maturity of \$10,000,000 minus the issue price of \$9,880,000). Because this amount of original issue discount is less than the *de minimis* amount of original issue discount for the loan determined under § 1.1273-1(d) (\$125,000), X does not have to use the constant yield method described in § 1.1272-1(b) to allocate the original issue discount to each year. Instead, under § 1.163-7(b)(2), X can choose to allocate the original issue discount to each year on a straight-line basis over the term of the loan or in proportion to the stated interest payments (\$24,000 each year). X also could choose to deduct the original issue discount at maturity of the loan. X makes its choice by reporting the original issue discount in a manner consistent with the method chosen on X's timely filed federal income tax return for 2004. If X wanted to use the constant yield method, based on a yield of 5.279%, compounded annually, the original issue discount is allocable to each year as follows: \$21,596 for 2004, \$22,736 for 2005, \$23,937 for 2006, \$25,200 for 2007, and \$26,531 for 2008.

(d) *Effective date.* This section applies to debt issuance costs paid or incurred for debt instruments issued on or after December 31, 2003.

(e) *Accounting method changes*—(1) *Consent to change.* An issuer required to change its method of accounting for debt issuance costs to comply with this section must secure the consent of the Commissioner in accordance with the requirements of § 1.446-1(e). Paragraph (e)(2) of this section provides the Commissioner's automatic consent for certain changes.

(2) *Automatic consent.* The Commissioner grants consent for an issuer to change its method of accounting for debt issuance costs incurred for debt instruments issued on or after December 31, 2003. Because this change is made on a cut-off basis, no items of income or deduction are omitted or duplicated and, therefore, no adjustment under section 481 is allowed. The consent granted by this paragraph (e)(2) applies provided—

(i) The change is made to comply with this section;

(ii) The change is made for the first taxable year for which the issuer must account for debt issuance costs under this section; and

(iii) The issuer attaches to its federal income tax return for the taxable year containing the change a statement that it has changed its method of accounting under this section.

[T.D. 9107, 69 FR 464, Jan. 5, 2004]

#### § 1.446-6 REMIC inducement fees.

(a) *Purpose.* This section provides specific timing rules for the clear reflection of income from an inducement fee received in connection with becoming the holder of a noneconomic REMIC residual interest. An inducement fee must be included in income over a period reasonably related to the period during which the applicable REMIC is expected to generate taxable income or net loss allocable to the holder of the noneconomic residual interest.

(b) *Definitions.* For purposes of this section:

(1) *Applicable REMIC.* The applicable REMIC is the REMIC that issued the noneconomic residual interest with respect to which the inducement fee is paid.

(2) *Inducement fee.* An inducement fee is the amount paid to induce a person to become the holder of a noneconomic

residual interest in an applicable REMIC.

(3) *Noneconomic residual interest.* A REMIC residual interest is a noneconomic residual interest if it is a noneconomic residual interest within the meaning of § 1.860E-1(c)(2).

(4) *Remaining anticipated weighted average life.* The remaining anticipated weighted average life is the anticipated weighted average life determined using the methodology set forth in § 1.860E-1(a)(3)(iv) applied as of the date of acquisition of the noneconomic residual interest.

(5) *REMIC.* The term REMIC has the same meaning in this section as given in § 1.860D-1.

(c) *General rule.* All taxpayers, regardless of their overall method of accounting, must recognize an inducement fee over the remaining expected life of the applicable REMIC in a manner that reasonably reflects, without regard to this paragraph, the after-tax costs and benefits of holding that noneconomic residual interest.

(d) *Special rule on disposition of a residual interest.* If any portion of an inducement fee received with respect to becoming the holder of a noneconomic residual interest in an applicable REMIC has not been recognized in full by the holder as of the time the holder transfers, or otherwise ceases to be the holder for Federal tax purposes of, that residual interest in the applicable REMIC, then the holder must include the unrecognized portion of the inducement fee in income at that time. This rule does not apply to a transaction to which section 381(c)(4) applies.

(e) *Safe harbors.* If inducement fees are recognized in accordance with a method described in this paragraph (e), that method complies with the requirements of paragraph (c) of this section.

(1) *The book method.* Under the book method, an inducement fee is recognized in accordance with the method of accounting, and over the same period, used by the taxpayer for financial reporting purposes (including consolidated financial statements to shareholders, partners, beneficiaries, and other proprietors and for credit purposes), provided that the inducement fee is included in income for financial reporting purposes over a period that is

not shorter than the period during which the applicable REMIC is expected to generate taxable income.

(2) *The modified REMIC regulatory method.* Under the modified REMIC regulatory method, the inducement fee is recognized ratably over the remaining anticipated weighted average life of the applicable REMIC as if the inducement fee were unrecognized gain being included in gross income under § 1.860F-2(b)(4)(iii).

(3) *Additional safe harbor methods.* The Commissioner, by revenue ruling or revenue procedure (see § 1.601(d)(2) of this chapter), may provide additional safe harbor methods for recognizing inducement fees relating to noneconomic REMIC residual interests.

(f) *Method of accounting.* The treatment of inducement fees is a method of accounting to which the provisions of sections 446 and 481 and the regulations thereunder apply. A taxpayer is generally permitted to adopt a method of accounting for inducement fees that satisfies the requirements of paragraph (c) of this section. Once a taxpayer adopts a method of accounting for inducement fees, that method must be applied consistently to all inducement fees received in connection with noneconomic REMIC residual interests and may be changed only with the consent of the Commissioner, as provided by section 446(e) and the regulations and procedures thereunder.

(g) *Effective date.* This section is applicable for taxable years ending on or after May 11, 2004.

[T.D. 9128, 69 FR 26041, May 11, 2004]

**§ 1.446-7 Net asset value method for certain money market fund shares.**

(a) *In general.* This section provides a permissible method of accounting (the net asset value method, or NAV method) for gain or loss on shares in a money market fund (or MMF).

(b) *Definitions.* For purposes of this section—

(1) *Computation period.* Computation periods are the periods (of either equal or varying length) that a taxpayer selects for computing gain and loss under the NAV method for shares in an MMF. Computation periods must possess all of the following attributes:

(i) Every day during the taxable year falls within one, and only one, computation period;

(ii) Each computation period contains days from only one taxable year; and

(iii) If the taxpayer is a regulated investment company (RIC) that is not described in section 4982(f)—

(A) The same computation periods are used for purposes of both income tax accounting under chapter 1 and excise tax computations under section 4982; and

(B) The requirements in paragraphs (b)(1)(i) and (ii) of this section are also satisfied if applied by substituting the RIC's section 4982 period for the RIC's taxable year.

(2) *Ending value.* The *ending value* of a taxpayer's shares in an MMF for a computation period is the aggregate fair market value of the taxpayer's shares at the end of that computation period.

(3) *Fair market value.* The fair market value of a share in an MMF is determined as follows:

(i) *Presumption based on applicable published redemption amount.* For purposes of this section, the fair market value of a share in an MMF is presumed to be the applicable published redemption amount for the share.

(ii) *Published redemption amount.* The published redemption amount for a share in an MMF is the published amount for which the MMF would redeem the share (usually, the net asset value per share (NAV)), taking into account any corrections and not taking into account any liquidity fee described in Rule 2a-7(c)(2) under the Investment Company Act of 1940 (17 CFR 270.2a-7(c)(2)).

(iii) *Applicable published redemption amount.* The applicable published redemption amount is—

(A) For purposes of determining the ending value of a taxpayer's shares in an MMF for a computation period under paragraph (b)(2) of this section, the last published redemption amount on the last day of that computation period;

(B) For purposes of determining the value of MMF shares received in a redemption or exchange described in paragraph (b)(5)(ii)(A) of this section,

the published redemption amount for such MMF shares used to determine the consideration received in the redemption or exchange, or if the consideration received is not based on a published redemption amount, the first published redemption amount for such MMF shares after the redemption or exchange;

(C) For purposes of determining the amount received in a redemption or exchange described in paragraph (b)(5)(ii)(B) of this section in which the consideration received is based on a published redemption amount for the redeemed shares, that published redemption amount; and

(D) For purposes of determining the amount received in an exchange described in paragraph (b)(5)(ii)(B) of this section that is not described in paragraph (b)(3)(iii)(C) of this section, or the amount of any adjustment resulting from a disposition transaction described in paragraph (b)(5)(iii) of this section, the first published redemption amount for the exchanged or disposed of MMF shares after the exchange or other transaction.

(iv) *Facts and circumstances determination.* If there is no applicable published redemption amount or if circumstances indicate that the amount does not represent the fair market value of a share in the MMF, the fair market value is determined on the basis of all of the facts and circumstances.

(4) *Money market fund (or MMF).* An MMF is a regulated investment company that is permitted to hold itself out to investors as a money market fund under Rule 2a-7 under the Investment Company Act of 1940 (17 CFR 270.2a-7). See paragraph (c)(5) of this section for the treatment of shares in a single MMF held in more than one account.

(5) *Net investment—(i) In general.* The net investment in an MMF for a computation period may be a positive amount, a negative amount, or zero. Except as provided in paragraph (b)(5)(iii) of this section, the net investment is equal to—

(A) The aggregate cost of shares in the MMF purchased during the computation period (including purchases through reinvestment of dividends); minus

(B) The aggregate amount received during the computation period in redemption of (or otherwise in exchange for) shares in the MMF in transactions in which gain or loss would be recognized if the taxpayer did not apply the NAV method to the shares.

(ii) *Aggregate amount received.* For purposes of paragraph (b)(5)(i)(B) of this section, the amount received in a redemption or exchange of an MMF share is—

(A) If no property other than cash and shares in one or more other MMFs is received, the amount of any cash plus the fair market value of any MMF shares received; or

(B) If any property other than cash or shares in one or more other MMFs is received, the fair market value of the redeemed MMF share.

(iii) *Adjustments—(A) Dispositions in which gain or loss is not recognized.* If, during the computation period, any shares in an MMF are disposed of in transactions in which gain or loss would not be recognized if the taxpayer did not apply the NAV method to the shares, the net investment in the MMF for the computation period is decreased by the fair market value of each such share at the time of its disposition.

(B) *Acquisitions other than by purchase.* If, during the computation period, any shares in an MMF are acquired other than by purchase, the net investment in the MMF for the computation period is increased by the adjusted basis (for purposes of determining loss) of each such share immediately after its acquisition. If the adjusted basis of an acquired share would be determined by reference to the basis of a share or shares in an MMF that are being disposed of by the taxpayer in a transaction that is governed by paragraph (b)(5)(iii)(A) of this section, then the adjusted basis of each such disposed share is treated for purposes of this section as being the fair market value of that share at the time of its disposition. If the adjusted basis of an acquired share would be determined by reference to the basis of that share in the hands of the person from whom the share is acquired and that person was applying the NAV method to the share at the time of the transaction, then the adjusted basis of the share in the hands

of the person from whom the share is acquired is treated for purposes of this section as being the fair market value of that share at the time of the transaction.

(6) *Section 4982 period.* If a taxpayer using the NAV method is a RIC to which section 4982 applies, the section 4982 period is the one-year period with respect to which gain or loss is determined for purposes of section 4982(e)(2) and (e)(6). The preceding sentence is applied taking into account the application of section 4982(e)(4). See paragraph (c)(8) of this section regarding the application of section 4982(e)(6).

(7) *Starting basis.* The starting basis of a taxpayer's shares in an MMF for a computation period is—

(i) Except as provided in paragraph (b)(7)(ii) of this section, the ending value of the taxpayer's shares in the MMF for the immediately preceding computation period; or

(ii) For the first computation period in a taxable year, if the taxpayer did not use the NAV method for shares in the MMF for the immediately preceding taxable year, the aggregate adjusted basis of the taxpayer's shares in the MMF at the end of the immediately preceding taxable year.

(c) *NAV method—(1) Scope.* A taxpayer may use the NAV method described in this section to determine the gain or loss for a taxable year on the taxpayer's shares in an MMF. A taxpayer may have different methods of accounting, different computation periods, and gains or losses of differing character, for its shares in different MMFs. See paragraph (c)(5) of this section for the treatment of shares in a single MMF held in more than one account. See paragraph (c)(6) of this section for rules applicable to RICs to which section 4982 applies. See paragraph (c)(8) of this section for rules applicable to accounting method changes.

(2) *Net gain or loss for a taxable year—(i) Determination for each computation period.* Subject to any adjustment under paragraph (c)(2)(ii) of this section, the net gain or loss for each computation period with respect to the shares in an MMF to which the NAV method applies equals the ending value, minus the starting basis, minus the net investment in the MMF for the

computation period. If the computation produces a result that is greater than zero, the taxpayer has a gain for the computation period with respect to the shares in the MMF; if the computation produces a result that is less than zero, the taxpayer has a loss for the computation period with respect to the shares in the MMF; and if the computation produces a result that is equal to zero, the taxpayer has no gain or loss for the computation period with respect to the shares in the MMF.

(ii) *Adjustment of gain or loss to reflect any basis adjustments.* If, during a computation period, there is any downward (or upward) adjustment to the taxpayer's basis in the shares in the MMF under any provision of internal revenue law, then the net gain or loss for the computation period on shares in the MMF determined under paragraph (c)(2)(i) of this section is increased (or decreased) by the amount of the adjustment.

(iii) *Timing of gains and losses.* Gain or loss determined under the NAV method with respect to a taxpayer's shares in an MMF during a computation period is treated as arising on the last day of the computation period.

(iv) *Determination of net gain or loss for each taxable year.* The taxpayer's net gain or loss for a taxable year on shares in an MMF is the sum of the net gains or losses on shares in the MMF for the computation period (or computation periods) that comprise the taxable year.

(3) *Character*—(i) In the case of a taxpayer that applies the NAV method to shares in an MMF, the gain or loss with respect to those shares for a computation period is treated as gain or loss from a sale or exchange of a capital asset provided the sale or exchange of one or more of those shares during the computation period would give rise to capital gain or loss if the taxpayer did not apply the NAV method to the shares.

(ii) In the case of a taxpayer that applies the NAV method to shares in an MMF, the gain or loss with respect to those shares for a computation period is treated as ordinary gain or loss provided the sale or exchange of every one of those shares during the computation period would give rise to ordinary gain

or loss if the taxpayer did not apply the NAV method to the shares.

(iii) See paragraph (c)(5) of this section for the treatment of shares in a single MMF held in more than one account.

(4) *Holding period.* Capital gains and losses determined under the NAV method are treated as short-term capital gains and losses.

(5) *More than one account.* If a taxpayer holds shares in an MMF through more than one account, the taxpayer must treat its holdings in each account as a separate MMF for purposes of this section. A taxpayer therefore may have different methods of accounting, different computation periods, and gains or losses of differing character, for its shares of a single MMF held in different accounts.

(6) *Consistency requirement for MMF shareholders that are RICs.* If the taxpayer is a RIC that is not described in section 4982(f) (and therefore is subject to the section 4982 excise tax), then, for each MMF, the taxpayer must use the NAV method for both income tax and excise tax computations or for neither computation. See paragraph (c)(5) of this section for the treatment of shares in a single MMF held in more than one account. See paragraph (c)(8)(ii) of this section for changes to or from the NAV method by a RIC.

(7) *Treatment of ordinary gains and losses under section 4982(e)(6).* Under section 4982(e)(6)(B), this section is a specified mark to market provision, and therefore any ordinary gains and losses determined under the NAV method are governed by section 4982(e)(6)(A).

(8) *Accounting method changes*—(i) *In general.* A change to or from the NAV method is a change in method of accounting to which the provisions of section 446 and the accompanying regulations apply. A taxpayer seeking to change to or from the NAV method must secure the consent of the Commissioner in accordance with §1.446-1(e) and follow the administrative procedures issued under §1.446-1(e)(3)(ii) for obtaining the Commissioner's consent to change the taxpayer's accounting method. Any such change will be made on a cut-off basis. Because there will be no duplication or omission of amounts as a result of such a change to

or from the NAV method, no adjustment under section 481(a) will be required or permitted.

(ii) *RICs—(A) In general.* A RIC that is subject to the excise tax under section 4982 and that changes to or from the NAV method for its shares in an MMF for income tax purposes must apply the new method for excise tax purposes starting with the first day of the RIC's income tax year of change. If that first day is not the first day of the RIC's section 4982 period that ends in or with the RIC's income tax year, then solely for purposes of applying the NAV method to compute the RIC's required distribution for the calendar year that ends with or within the RIC's income tax year of change, the section 4982 period is bifurcated into two portions, each of which is treated as a separate taxable year. The first portion begins on the first day of the section 4982 period and ends on the last day of the RIC's income tax year that precedes the year of change. The second portion begins on the first day of the income tax year of change and ends on the last day of the section 4982 period.

(B) *Example.* If a RIC that holds MMF shares as capital assets changes from a realization method to the NAV method for its income tax year ending January 31, 2019, the section 4982 period is bifurcated into two portions that are treated as separate taxable years solely for purposes of applying this section. For the portion starting on November 1, 2017, and ending on January 31, 2018, the RIC applies its realization method for excise tax purposes. For the portion starting on February 1, 2018, and ending on October 31, 2018, the RIC applies the NAV method for excise tax purposes, treating February 1, 2018, as the first day of the RIC's tax year for purposes of paragraphs (b)(1) and (6) of this section. The RIC's net gain or loss for this later portion is determined under paragraph (c)(2)(iii) of this section. This net gain or loss and any gains and losses for the earlier portion determined under the realization method are taken into account in determining the RIC's capital gain net income for the full one-year period described in section 4982(b)(1)(B).

(d) *Example.* The provisions of this section may be illustrated by the following example:

*Example.* (i) Fund is an MMF. Shareholder is a person whose taxable year is the calendar year. On January 1 of Year 1, Shareholder owns 5,000,000 shares in Fund with an adjusted basis of \$5,000,000.00. The price of Fund shares has not varied from \$1.00 from the date Shareholder acquired the shares through January 1 of Year 1. During that period, Shareholder has engaged in multiple purchases and redemptions of Fund shares, but Shareholder has reported no gains or losses with respect to the shares because Shareholder realized an amount in each redemption equal to Shareholder's basis in the redeemed shares. During Year 1, the price of Fund shares begins to float. During Year 1, Shareholder receives \$32,158.23 in taxable dividends from Fund and makes 120 purchases of additional shares in Fund (including purchases through the reinvestment of those dividends) totaling \$1,253,256.37 and 28 redemptions totaling \$1,124,591.71. The fair market value of Shareholder's shares in Fund at the end of Year 1 is \$5,129,750.00. All of Shareholder's shares in Fund are held in a single account and as capital assets. There is no adjustment to the basis in Shareholder's shares in Fund under any provision of internal revenue law during Year 1.

(ii) Prior to Year 1, Shareholder has had no gains or losses to report with respect to the Fund shares under a realization method and no changes in fair market value that would have been reported under the NAV method. Therefore, Shareholder may use the NAV method for the shares in Fund for Year 1. Shareholder uses the NAV method for the shares with its taxable year as the computation period. Shareholder's net investment in Fund for Year 1 equals \$128,664.66 (the \$1,253,256.37 in purchases, minus the \$1,124,591.71 in redemptions). Shareholder's Year 1 gain therefore is \$1,085.34, which is the ending value of Shareholder's shares (\$5,129,750.00), minus the starting basis of Shareholder's shares (\$5,000,000.00), minus Shareholder's net investment in the fund for the taxable year (\$128,664.66). The gain of \$1,085.34 is treated as short-term capital gain. Shareholder's starting basis for Year 2 is \$5,129,750.00. Shareholder also must include the \$32,158.23 in dividends in its income for Year 1 in the same manner as if Shareholder did not use the NAV method.

(iii) If Shareholder had instead adopted the calendar month as its computation period, it would have used the NAV method for every month of Year 1, even though prices of Fund shares may have been fixed for some months.

(e) *Effective/applicability date.* Except as provided in the following sentence, this section applies to taxable years

ending on or after July 8, 2016. For taxable years ending on or after July 28, 2014, and beginning before July 8, 2016, however, shareholders of MMFs may rely either on this section or on § 1.446-7 of the 2014 proposed regulations REG-107012-14 (79 FR 43694).

[T.D. 9774, 81 FR 44512, July 8, 2016]

**§ 1.448-1 Limitation on the use of the cash receipts and disbursements method of accounting.**

(a)-(f) [Reserved]

(g) *Treatment of accounting method change and timing rules for section 481(a) adjustment*—(1) *Treatment of change in accounting method.* Notwithstanding any other procedure published prior to January 7, 1991, concerning changes from the cash method, any taxpayer to whom section 448 applies must change its method of accounting in accordance with the provisions of this paragraph (g) and paragraph (h) of this section. In the case of any taxpayer required by this section to change its method of accounting for any taxable year, the change shall be treated as a change initiated by the taxpayer. The adjustments required under section 481(a) with respect to the change in method of accounting of such a taxpayer shall not be reduced by amounts attributable to taxable years preceding the Internal Revenue Code of 1954. Paragraph (h)(2) of this section provides procedures under which a taxpayer may change to an overall accrual method of accounting for the first taxable year the taxpayer is subject to this section (“first section 448 year”). If the taxpayer complies with the provisions of paragraph (h)(2) of this section for its first section 448 year, the change shall be treated as made with the consent of the Commissioner. Paragraph (h)(3) of this section provides procedures under which a taxpayer may change to other than an overall accrual method of accounting for its first section 448 year. Unless the taxpayer complies with the provisions of paragraph (h)(2) or (h)(3) of this section for its first section 448 year, the taxpayer must comply with the provisions of paragraph (h)(4) of this section. See paragraph (h) of this section for rules to effect a change in method of accounting.

(2) *Timing rules for section 481(a) adjustment*—(i) *In general.* Except as otherwise provided in paragraphs (g)(2)(ii) and (g)(3) of this section, a taxpayer required by this section to change from the cash method must take the net section 481(a) adjustment into account over the section 481(a) adjustment period as determined under the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner’s consent to a change in accounting method (for example, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and Rev. Proc. 97-27 (1997-1 C.B. 680) (also see § 601.601(d)(2) of this chapter)), provided the taxpayer complies with the provisions of paragraph (h)(2) or (3) of this section for its first section 448 year.

(ii) *Hospital timing rules*—(A) *In general.* In the case of a hospital that is required by this section to change from the cash method, the section 481(a) adjustment shall be taken into account ratably (beginning with the year of change) over 10 years, provided the taxpayer complies with the provisions of paragraph (h)(2) or (h)(3) of this section for its first section 448 year.

(B) *Definition of hospital.* For purposes of paragraph (g) of this section, a hospital is an institution—

(1) Accredited by the Joint Commission on Accreditation of Healthcare Organizations or its predecessor (the JCAHO) (or accredited or approved by a program of the qualified governmental unit in which such institution is located if the Secretary of Health and Human Services has found that the accreditation or comparable approval standards of such qualified governmental unit are essentially equivalent to those of the JCAHO);

(2) Used primarily to provide, by or under the supervision of physicians, to inpatients diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons;

(3) Requiring every patient to be under the care and supervision of a physician; and

(4) Providing 24-hour nursing services rendered or supervised by a registered professional nurse and having a licensed practical nurse or registered nurse on duty at all times.

For purposes of this section, an entity need not be owned by or on behalf of a governmental unit or by a section 501(c)(3) organization, or operated by a section 501(c)(3) organization, in order to be considered a hospital. In addition, for purposes of this section, a hospital does not include a rest or nursing home, continuing care facility, daycare center, medical school facility, research laboratory, or ambulatory care facility.

(C) *Dual function facilities.* With respect to any taxpayer whose operations consist both of a hospital, and other facilities not qualifying as a hospital, the portion of the adjustment required by section 481(a) that is attributable to the hospital shall be taken into account in accordance with the rules of paragraph (g)(2) of this section relating to hospitals. The portion of the adjustment required by section 481(a) that is not attributable to the hospital shall be taken into account in accordance with the rules of paragraph (g)(2) of this section not relating to hospitals.

(iii) *Untimely change in method of accounting to comply with this section.* Unless a taxpayer (including a hospital and a cooperative) required by this section to change from the cash method complies with the provisions of paragraph (h)(2) or (h)(3) of this section for its first section 448 year within the time prescribed by those paragraphs, the taxpayer must take the section 481(a) adjustment into account under the provisions of any applicable administrative procedure that is prescribed by the Commissioner after January 7, 1991, specifically for purposes of complying with this section. Absent such an administrative procedure, a taxpayer must request a change under § 1.446-1(e)(3) and shall be subject to any terms and conditions (including the year of change) as may be imposed by the Commissioner.

(3) *Special timing rules for section 481(a) adjustment—(i) Cessation of trade or business.* If the taxpayer ceases to engage in the trade or business to which the section 481(a) adjustment relates, or if the taxpayer operating the trade or business terminates existence, and such cessation or termination occurs prior to the expiration of the adjustment period described in paragraph

(g)(2)(i) or (ii) of this section, the taxpayer must take into account, in the taxable year of such cessation or termination, the balance of the adjustment not previously taken into account in computing taxable income. For purposes of this paragraph (g)(3)(i), the determination as to whether a taxpayer has ceased to engage in the trade or business to which the section 481(a) adjustment relates, or has terminated its existence, is to be made under the principles of § 1.446-1(e)(3)(ii) and its underlying administrative procedures.

(ii) *De minimis rule for a taxpayer other than a cooperative.* Notwithstanding paragraph (g)(2)(i) and (ii) of this section, a taxpayer other than a cooperative (within the meaning of section 1381(a)) that is required to change from the cash method by this section may elect to use, in lieu of the adjustment period described in paragraph (g)(2)(i) and (ii) of this section, the adjustment period for *de minimis* section 481(a) adjustments provided in the applicable administrative procedure issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's consent to a change in accounting method. A taxpayer may make an election under this paragraph (g)(3)(ii) only if—

(A) The taxpayer's entire net section 481(a) adjustment (whether positive or negative) is a *de minimis* amount as determined under the applicable administrative procedure issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's consent to a change in accounting method,

(B) The taxpayer complies with the provisions of paragraph (h)(2) or (3) of this section for its first section 448 year,

(C) The return for such year is due (determined with regard to extensions) after December 27, 1993, and

(D) The taxpayer complies with any applicable instructions to Form 3115 that specify the manner of electing the adjustment period for *de minimis* section 481(a) adjustments.

(4) *Additional rules relating to section 481(a) adjustment.* In addition to the rules set forth in paragraph (g) (2) and (3) of this section, the following rules shall apply in taking the section 481(a) adjustment into account—

(i) Any net operating loss and tax credit carryforwards will be allowed to offset any positive section 481(a) adjustment,

(ii) Any net operating loss arising in the year of change or in any subsequent year that is attributable to a negative section 481(a) adjustment may be carried back to earlier taxable years in accordance with section 172, and

(iii) For purposes of determining estimated income tax payments under sections 6654 and 6655, the section 481(a) adjustment will be recognized in taxable income ratably throughout a taxable year.

(5) *Outstanding section 481(a) adjustment from previous change in method of accounting.* If a taxpayer changed its method of accounting to the cash method for a taxable year prior to the year the taxpayer was required by this section to change from the cash method (the section 448 year), any section 481(a) adjustment from such prior change in method of accounting that is outstanding as of the section 448 year shall be taken into account in accordance with the provisions of this paragraph (g)(5). A taxpayer shall account for any remaining portion of the prior section 481(a) adjustment outstanding as of the section 448 year by continuing to take such remaining portion into account under the provisions and conditions of the prior change in method of accounting, or, at the taxpayer's option, combining or netting the remaining portion of the prior section 481(a) adjustment with the section 481(a) adjustment required under this section, and taking into account under the provisions of this section the resulting net amount of the adjustment. Any taxpayer choosing to combine or net the section 481(a) adjustments as described in the preceding sentence shall indicate such choice on the Form 3115 required to be filed by such taxpayer under the provisions of paragraph (h) of this section.

(h) *Procedures for change in method of accounting—(1) Applicability.* Paragraph (h) of this section applies to taxpayers who change from the cash method as required by this section. Paragraph (h) of this section does not apply to a change in accounting method required

by any Code section (or regulations thereunder) other than this section.

(2) *Automatic rule for changes to an overall accrual method—(i) Timely changes in method of accounting.* Notwithstanding any other available procedures to change to the accrual method of accounting, a taxpayer to whom paragraph (h) of this section applies who desires to make a change to an overall accrual method for its first section 448 year must make that change under the provisions of this paragraph (h)(2). A taxpayer changing to an overall accrual method under this paragraph (h)(2) must file a current Form 3115 by the time prescribed in paragraph (h)(2)(ii). In addition, the taxpayer must set forth on a statement accompanying the Form 3115 the period over which the section 481(a) adjustment will be taken into account and the basis for such conclusion. Moreover, the taxpayer must type or legibly print the following statement at the top of page 1 of the Form 3115: "Automatic Change to Accrual Method—Section 448." The consent of the Commissioner to the change in method of accounting is granted to taxpayers who change to an overall accrual method under this paragraph (h)(2). See paragraph (g)(2)(i), (g)(2)(ii), or (g)(3) of this section, whichever is applicable, for rules to account for the section 481(a) adjustment.

(ii) *Time and manner for filing Form 3115—(A) In general.* Except as provided in paragraph (h)(2)(ii)(B) of this section, the Form 3115 required by paragraph (h)(2)(i) must be filed no later than the due date (determined with regard to extensions) of the taxpayer's federal income tax return for the first section 448 year and must be attached to that return.

(B) *Extension of filing deadline.* Notwithstanding paragraph (h)(2)(ii)(A) of this section, the filing of the Form 3115 required by paragraph (h)(2)(i) shall not be considered late if such Form 3115 is attached to a timely filed amended income tax return for the first section 448 year, provided that—

(I) The taxpayer's first section 448 year is a taxable year that begins (or, pursuant to §1.441-2(c), is deemed to begin) in 1987, 1988, 1989, or 1990,

(2) The taxpayer has not been contacted for examination, is not before appeals, and is not before a federal court with respect to an income tax issue (each as defined in applicable administrative pronouncements), unless the taxpayer also complies with any requirements for approval in those applicable administrative pronouncements, and

(3) Any amended return required by this paragraph (h)(2)(ii)(B) is filed on or before July 8, 1991.

Filing an amended return under this paragraph (h)(2)(ii)(B) does not extend the time for making any other election. Thus, for example, taxpayers that comply with this section by filing an amended return pursuant to this paragraph (h)(2)(ii)(B) may not elect out of section 448 pursuant to paragraph (i)(2) of this section.

(3) *Changes to a method other than overall accrual method*—(i) *In general.* A taxpayer to whom paragraph (h) of this section applies who desires to change to a special method of accounting must make that change under the provisions of this paragraph (h)(3), except to the extent other special procedures have been promulgated regarding the special method of accounting. Such a taxpayer includes taxpayers who change to both an accrual method of accounting and a special method of accounting such as a long-term contract method. In order to change an accounting method under this paragraph (h)(3), a taxpayer must submit an application for change in accounting method under the applicable administrative procedures in effect at the time of change, including the applicable procedures regarding the time and place of filing the application for change in method. Moreover, a taxpayer who changes an accounting method under this paragraph (h)(3) must type or legibly print the following statement on the top of page 1 of Form 3115: “Change to a Special Method of Accounting—Section 448.” The filing of a Form 3115 by any taxpayer requesting a change of method of accounting under this paragraph (h)(3) for its taxable year beginning in 1987 will not be considered late if the form is filed with the appropriate office of the Internal Revenue Service on or before the later of: the date that is the

180th day of the taxable year of change; or September 14, 1987. If the Commissioner approves the taxpayer’s application for change in method of accounting, the timing of the adjustment required under section 481 (a), if applicable, will be determined under the provisions of paragraph (g)(2)(i), (g)(2)(ii), or (g)(3) of this section, whichever is applicable. If the Commissioner denies the taxpayer’s application for change in accounting method, or if the taxpayer’s application is untimely, the taxpayer must change to an overall accrual method of accounting under the provisions of either paragraph (h)(2) or (h)(4) of this section, whichever is applicable.

(ii) *Extension of filing deadline.* Notwithstanding paragraph (h)(3)(i) of this section, if the events or circumstances which under section 448 disqualify a taxpayer from using the cash method occur after the time prescribed under applicable procedures for filing the Form 3115, the filing of such form shall not be considered late if such form is filed on or before 30 days after the close of the taxable year.

(4) *Untimely change in method of accounting to comply with this section.* Unless a taxpayer to whom paragraph (h) of this section applies complies with the provisions of paragraph (h)(2) or (h)(3) of this section for its first section 448 year, the taxpayer must comply with the requirements of § 1.446-1 (e)(3) (including any applicable administrative procedure that is prescribed thereunder after January 7, 1991 specifically for purposes of complying with this section) in order to secure the consent of the Commissioner to change to a method of accounting that is in compliance with the provisions of this section. The taxpayer shall be subject to any terms and conditions (including the year of change) as may be imposed by the Commissioner.

(i) *Effective date*—(1) *In general.* Except as provided in paragraph (i)(2), (3), (4), and (5) of this section, this section applies to any taxable year beginning after December 31, 1986.

(2) *Election out of section 448*—(i) *In general.* A taxpayer may elect not to have this section apply to any (A) transaction with a related party (within the meaning of section 267(b) of the

Internal Revenue Code of 1954, as in effect on October 21, 1986), (B) loan, or (C) lease, if such transaction, loan, or lease was entered into on or before September 25, 1985. Any such election described in the preceding sentence may be made separately with respect to each transaction, loan, or lease. For rules relating to the making of such election, see §301.9100-7T (temporary regulations relating to elections under the Tax Reform Act of 1986). Notwithstanding the provisions of this paragraph (i)(2), the gross receipts attributable to a transaction, loan, or lease described in this paragraph (i)(2) shall be taken into account for purposes of the \$5,000,000 gross receipts test described in paragraph (f) of this section.

(ii) *Special rules for loans.* If the taxpayer makes an election under paragraph (i)(2)(i) of this section with respect to a loan entered into on or before September 25, 1985, the election shall apply only with respect to amounts that are attributable to the loan balance outstanding on September 25, 1985. The election shall not apply to any amounts advanced or lent after September 25, 1985, regardless of whether the loan agreement was entered into on or before such date. Moreover, any payments made on outstanding loan balances after September 25, 1985, shall be deemed to first extinguish loan balances outstanding on September 25, 1985, regardless of any contrary treatment of such loan payments by the borrower and lender.

(3) *Certain contracts entered into before September 25, 1985.* This section does not apply to a contract for the acquisition or transfer of real property or a contract for services related to the acquisition or development of real property if—

(i) The contract was entered into before September 25, 1985; and

(ii) The sole element of the contract which was not performed as of September 25, 1985, was payment for such property or services.

(4) *Transitional rule for paragraphs (g) and (h) of this section.* To the extent the provisions of paragraphs (g) and (h) of this section were not reflected in paragraphs (g) and (h) of §1.448-1T (as set forth in 26 CFR part 1 as revised on April 1, 1993), paragraphs (g) and (h) of

this section will not be adversely applied to a taxpayer with respect to transactions entered into before December 27, 1993.

(5) *Effective date of paragraph (g)(2)(i).* Paragraph (g)(2)(i) of this section applies to taxable years ending on or after June 16, 2004.

[T.D. 8514, 58 FR 68299, Dec. 27, 1993, as amended by T.D. 8996, 67 FR 35012, May 17, 2002; T.D. 9131, 69 FR 33572, June 16, 2004]

**§ 1.448-1T Limitation on the use of the cash receipts and disbursements method of accounting (temporary).**

(a) *Limitation on accounting method—*

(1) *In general.* This section prescribes regulations under section 448 relating to the limitation on the use of the cash receipts and disbursements method of accounting (the cash method) by certain taxpayers.

(2) *Limitation rule.* Except as otherwise provided in this section, the computation of taxable income using the cash method is prohibited in the case of a—

(i) C corporation,

(ii) Partnership with a C corporation as a partner, or

(iii) Tax shelter.

A partnership is described in paragraph (a)(2)(ii) of this section, if the partnership has a C corporation as a partner at any time during the partnership's taxable year beginning after December 31, 1986.

(3) *Meaning of C corporation.* For purposes of this section, the term "C corporation" includes any corporation that is not an S corporation. For example, a regulated investment company (as defined in section 851) or a real estate investment trust (as defined in section 856) is a C corporation for purposes of this section. In addition, a trust subject to tax under section 511 (b) shall be treated, for purposes of this section, as a C corporation, but only with respect to the portion of its activities that constitute an unrelated trade or business. Similarly, for purposes of this section, a corporation that is exempt from federal income taxes under section 501 (a) shall be treated as a C corporation only with respect to the portion of its activities that constitute an unrelated trade or

business. Moreover, for purposes of determining whether a partnership has a C corporation as a partner, any partnership described in paragraph (a)(2)(ii) of this section is treated as a C corporation. Thus, if partnership ABC has a partner that is a partnership with a C corporation, then, for purposes of this section, partnership ABC is treated as a partnership with a C corporation partner.

(4) *Treatment of a combination of methods.* For purposes of this section, the use of a method of accounting that records some, but not all, items on the cash method shall be considered the use of the cash method. Thus, a C corporation that uses a combination of accounting methods including the use of the cash method is subject to this section.

(b) *Tax shelter defined*—(1) *In general.* For purposes of this section, the term “tax shelter” means any—

(i) Enterprise (other than a C corporation) if at any time (including taxable years beginning before January 1, 1987) interests in such enterprise have been offered for sale in any offering required to be registered with any federal or state agency having the authority to regulate the offering of securities for sale,

(ii) Syndicate (within the meaning of paragraph (b)(3) of this section), or

(iii) Tax shelter within the meaning of section 6662(d)(2)(C).

(2) *Requirement of registration.* For purposes of paragraph (b)(1)(i) of this section, an offering is required to be registered with a federal or state agency if, under the applicable federal or state law, failure to register the offering would result in a violation of the applicable federal or state law (regardless of whether the offering is in fact registered). In addition, an offering is required to be registered with a federal or state agency if, under the applicable federal or state law, failure to file a notice of exemption from registration would result in a violation of the applicable federal or state law (regardless of whether the notice is in fact filed).

(3) *Meaning of syndicate.* For purposes of paragraph (b)(1)(ii) of this section, the term “syndicate” means a partnership or other entity (other than a C corporation) if more than 35 percent of

the losses of such entity during the taxable year (for taxable years beginning after December 31, 1986) are allocated to limited partners or limited entrepreneurs. For purposes of this paragraph (b)(3), the term “limited entrepreneur” has the same meaning given such term in section 464 (e)(2). In addition, in determining whether an interest in a partnership is held by a limited partner, or an interest in an entity or enterprise is held by a limited entrepreneur, section 464 (c)(2) shall apply in the case of the trade or business of farming (as defined in paragraph (d)(2) of this section), and section 1256 (e)(3)(C) shall apply in any other case. Moreover, for purposes of this paragraph (b)(3), the losses of a partnership, entity, or enterprise (the enterprise) means the excess of the deductions allowable to the enterprise over the amount of income recognized by such enterprise under the enterprise’s method of accounting used for federal income tax purposes (determined without regard to this section). For this purpose, gains or losses from the sale of capital assets or section 1221 (2) assets are not taken into account.

(4) *Presumed tax avoidance.* For purposes of paragraph (b)(1)(iii) of this section, marketed arrangements in which persons carrying on farming activities using the services of a common managerial or administrative service will be presumed to have the principal purpose of tax avoidance if such persons use borrowed funds to prepay a substantial portion of their farming expenses (e.g., payment for farm supplies that will not be used or consumed until a taxable year subsequent to the taxable year of payment).

(5) *Taxable year tax shelter must change accounting method.* A partnership, entity, or enterprise that is a tax shelter must change from the cash method for the later of (i) the first taxable year beginning after December 31, 1986, or (ii) the taxable year that such partnership, entity, or enterprise becomes a tax shelter.

(c) *Effect of section 448 on other provisions.* Nothing in section 448 shall have any effect on the application of any other provision of law that would otherwise limit the use of the cash method, and no inference shall be drawn

from section 448 with respect to the application of any such provision. For example, nothing in section 448 affects the requirement of section 447 that certain corporations must use an accrual method of accounting in computing taxable income from farming, or the requirement of § 1.446-1(c)(2) that an accrual method be used with regard to purchases and sales of inventory. Similarly, nothing in section 448 affects the authority of the Commissioner under section 446(b) to require the use of an accounting method that clearly reflects income, or the requirement under section 446(e) that a taxpayer secure the consent of the Commissioner before changing its method of accounting. For example, a taxpayer using the cash method may be required to change to an accrual method of accounting under section 446(b) because such method clearly reflects that taxpayer's income, even though the taxpayer is not prohibited by section 448 from using the cash method. Similarly, a taxpayer using an accrual method of accounting that is not prohibited by section 448 from using the cash method may not change to the cash method unless the taxpayer secures the consent of the Commissioner under section 446(e), and, in the opinion of the Commissioner, the use of the cash method clearly reflects that taxpayer's income under section 446(b).

(d) *Exception for farming business*—(1) *In general.* Except in the case of a tax shelter, this section shall not apply to any farming business. A taxpayer engaged in a farming business and a separate nonfarming business is not prohibited by this section from using the cash method with respect to the farming business, even though the taxpayer may be prohibited by this section from using the cash method with respect to the nonfarming business.

(2) *Meaning of farming business.* For purposes of paragraph (d) of this section, the term “farming business” means—

(i) The trade or business of farming as defined in section 263A(e)(4) (including the operation of a nursery or sod farm, or the raising or harvesting of trees bearing fruit, nuts, or other crops, or ornamental trees), or

(ii) The raising, harvesting, or growing of trees described in section 263A(c)(5) (relating to trees raised, harvested, or grown by the taxpayer other than trees described in paragraph (d)(2)(i) of this section).

Thus, for purposes of this section, the term “farming business” includes the raising of timber. For purposes of this section, the term “farming business” does not include the processing of commodities or products beyond those activities normally incident to the growing, raising or harvesting of such products. For example, assume that a C corporation taxpayer is in the business of growing and harvesting wheat and other grains. The taxpayer processes the harvested grains to produce breads, cereals, and similar food products which it sells to customers in the course of its business. Although the taxpayer is in the farming business with respect to the growing and harvesting of grain, the taxpayer is not in the farming business with respect to the processing of such grains to produce food products which the taxpayer sells to customers. Similarly, assume that a taxpayer is in the business of raising poultry or other livestock. The taxpayer uses the livestock in a meat processing operation in which the livestock are slaughtered, processed, and packaged or canned for sale to customers. Although the taxpayer is in the farming business with respect to the raising of livestock, the taxpayer is not in the farming business with respect to the meat processing operation. However, under this section the term “farming business” does include processing activities which are normally incident to the growing, raising or harvesting of agricultural products. For example, assume a taxpayer is in the business of growing fruits and vegetables. When the fruits and vegetables are ready to be harvested, the taxpayer picks, washes, inspects, and packages the fruits and vegetables for sale. Such activities are normally incident to the raising of these crops by farmers. The taxpayer will be considered to be in the business of farming with respect to the growing of fruits and vegetables, and the processing activities incident to the harvest.

(e) *Exception for qualified personal service corporation*—(1) *In general.* Except in the case of a tax shelter, this section does not apply to a qualified personal service corporation.

(2) *Certain treatment for qualified personal service corporation.* For purposes of paragraph (a)(2)(ii) of this section (relating to whether a partnership has a C corporation as a partner), a qualified personal service corporation shall be treated as an individual.

(3) *Meaning of qualified personal service corporation.* For purposes of this section, the term “qualified personal service corporation” means any corporation that meets—

(i) The function test paragraph (e)(4) of this section, and

(ii) The ownership test of paragraph (e)(5) of this section.

(4) *Function test*—(i) *In general.* A corporation meets the function test if substantially all the corporation’s activities for a taxable year involve the performance of services in one or more of the following fields—

- (A) Health,
- (B) Law,
- (C) Engineering (including surveying and mapping),
- (D) Architecture,
- (E) Accounting,
- (F) Actuarial science,
- (G) Performing arts, or
- (H) Consulting.

Substantially all of the activities of a corporation are involved in the performance of services in any field described in the preceding sentence (a qualifying field), only if 95 percent or more of the time spent by employees of the corporation, serving in their capacity as such, is devoted to the performance of services in a qualifying field. For purposes of determining whether this 95 percent test is satisfied, the performance of any activity incident to the actual performance of services in a qualifying field is considered the performance of services in that field. Activities incident to the performance of services in a qualifying field include the supervision of employees engaged in directly providing services to clients, and the performance of administrative and support services incident to such activities.

(ii) *Meaning of services performed in the field of health.* For purposes of paragraph (e)(4)(i)(A) of this section, the performance of services in the field of health means the provision of medical services by physicians, nurses, dentists, and other similar healthcare professionals. The performance of services in the field of health does not include the provision of services not directly related to a medical field, even though the services may purportedly relate to the health of the service recipient. For example, the performance of services in the field of health does not include the operation of health clubs or health spas that provide physical exercise or conditioning to their customers.

(iii) *Meaning of services performed in the field of performing arts.* For purposes of paragraph (e)(4)(i)(G) of this section, the performance of services in the field of the performing arts means the provision of services by actors, actresses, singers, musicians, entertainers, and similar artists in their capacity as such. The performance of services in the field of the performing arts does not include the provision of services by persons who themselves are not performing artists (*e.g.*, persons who may manage or promote such artists, and other persons in a trade or business that relates to the performing arts). Similarly, the performance of services in the field of the performing arts does not include the provision of services by persons who broadcast or otherwise disseminate the performances of such artists to members of the public (*e.g.*, employees of a radio station that broadcasts the performances of musicians and singers). Finally, the performance of services in the field of the performing arts does not include the provision of services by athletes.

(iv) *Meaning of services performed in the field of consulting*—(A) *In general.* For purposes of paragraph (e)(4)(i)(H) of this section, the performance of services in the field of consulting means the provision of advice and counsel. The performance of services in the field of consulting does not include the performance of services other than advice and counsel, such as sales or brokerage services, or economically similar services. For purposes of the preceding sentence, the determination of whether a

person's services are sales or brokerage services, or economically similar services, shall be based on all the facts and circumstances of that person's business. Such facts and circumstances include, for example, the manner in which the taxpayer is compensated for the services provided (*e.g.*, whether the compensation for the services is contingent upon the consummation of the transaction that the services were intended to effect).

(B) *Examples.* The following examples illustrate the provisions of paragraph (e)(4)(iv)(A) of this section. The examples do not address all types of services that may or may not qualify as consulting. The determination of whether activities not specifically addressed in the examples qualify as consulting shall be made by comparing the service activities in question to the types of service activities discussed in the examples. With respect to a corporation which performs services which qualify as consulting under this section, and other services which do not qualify as consulting, see paragraph (e)(4)(i) of this section which requires that substantially all of the corporation's activities involve the performance of services in a qualifying field.

*Example 1.* A taxpayer is in the business of providing economic analyses and forecasts of business prospects for its clients. Based on these analyses and forecasts, the taxpayer advises its clients on their business activities. For example, the taxpayer may analyze the economic conditions and outlook for a particular industry which a client is considering entering. The taxpayer will then make recommendations and advise the client on the prospects of entering the industry, as well as on other matters regarding the client's activities in such industry. The taxpayer provides similar services to other clients, involving, for example, economic analyses and evaluations of business prospects in different areas of the United States or in other countries, or economic analyses of overall economic trends and the provision of advice based on these analyses and evaluations. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

*Example 2.* A taxpayer is in the business of providing services that consist of determining a client's electronic data processing needs. The taxpayer will study and examine the client's business, focusing on the types of data and information relevant to the client and the needs of the client's employees for

access to this information. The taxpayer will then make recommendations regarding the design and implementation of data processing systems intended to meet the needs of the client. The taxpayer does not, however, provide the client with additional computer programming services distinct from the recommendations made by the taxpayer with respect to the design and implementation of the client's data processing systems. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

*Example 3.* A taxpayer is in the business of providing services that consist of determining a client's management and business structure needs. The taxpayer will study the client's organization, including, for example, the departments assigned to perform specific functions, lines of authority in the managerial hierarchy, personnel hiring, job responsibility, and personnel evaluations and compensation. Based on the study, the taxpayer will then advise the client on changes in the client's management and business structure, including, for example, the restructuring of the client's departmental systems or its lines of managerial authority. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

*Example 4.* A taxpayer is in the business of providing financial planning services. The taxpayer will study a particular client's financial situation, including, for example, the client's present income, savings and investments, and anticipated future economic and financial needs. Based on this study, the taxpayer will then assist the client in making decisions and plans regarding the client's financial activities. Such financial planning includes the design of a personal budget to assist the client in monitoring the client's financial situation, the adoption of investment strategies tailored to the client's needs, and other similar services. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

*Example 5.* A taxpayer is in the business of executing transactions for customers involving various types of securities or commodities generally traded through organized exchanges or other similar networks. The taxpayer provides its clients with economic analyses and forecasts of conditions in various industries and businesses. Based on these analyses, the taxpayer makes recommendations regarding transactions in securities and commodities. Clients place orders with the taxpayer to trade securities or commodities based on the taxpayer's recommendations. The taxpayer's compensation for its services is typically based on the trade orders. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in brokerage services. Relevant to this

determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the execution of trade orders for its clients).

*Example 6.* A taxpayer is in the business of studying a client's needs regarding its data processing facilities and making recommendations to the client regarding the design and implementation of data processing systems. The client will then order computers and other data processing equipment through the taxpayer based on the taxpayer's recommendations. The taxpayer's compensation for its services is typically based on the equipment orders made by the clients. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in the performance of sales services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the execution of equipment orders for its clients).

*Example 7.* A taxpayer is in the business of assisting businesses in meeting their personnel requirements by referring job applicants to employers with hiring needs in a particular area. The taxpayer may be informed by potential employers of their need for job applicants, or, alternatively, the taxpayer may become aware of the client's personnel requirements after the taxpayer studies and examines the client's management and business structure. The taxpayer's compensation for its services is typically based on the job applicants, referred by the taxpayer to the clients, who accept employment positions with the clients. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is involved in the performance of services economically similar to brokerage services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the hiring of a job applicant by the client).

*Example 8.* The facts are the same as in Example 7, except that the taxpayer's clients are individuals who use the services of the taxpayer to obtain employment positions. The taxpayer is typically compensated by its clients who obtain employment as a result of the taxpayer's services. For the reasons set forth in Example 7, the taxpayer is not considered to be engaged in the performance of services in the field of consulting.

*Example 9.* A taxpayer is in the business of assisting clients in placing advertisements for their goods and services. The taxpayer analyzes the conditions and trends in the client's particular industry, and then makes

recommendations to the client regarding the types of advertisements which should be placed by the client and the various types of advertising media (e.g., radio, television, magazines, etc.) which should be used by the client. The client will then purchase, through the taxpayer, advertisements in various media based on the taxpayer's recommendations. The taxpayer's compensation for its services is typically based on the particular orders for advertisements which the client makes. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in the performance of services economically similar to brokerage services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the placing of advertisements by clients).

*Example 10.* A taxpayer is in the business of selling insurance (including life and casualty insurance), annuities, and other similar insurance products to various individual and business clients. The taxpayer will study the particular client's financial situation, including, for example, the client's present income, savings and investments, business and personal insurance risks, and anticipated future economic and financial needs. Based on this study, the taxpayer will then make recommendations to the client regarding the desirability of various insurance products. The client will then purchase these various insurance products through the taxpayer. The taxpayer's compensation for its services is typically based on the purchases made by the clients. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in the performance of brokerage or sales services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the purchase of insurance products by its clients).

(5) *Ownership test*—(i) *In general.* A corporation meets the ownership test, if at all times during the taxable year, substantially all the corporation's stock, by value, is held, directly or indirectly, by—

(A) Employees performing services for such corporation in connection with activities involving a field referred to in paragraph (e)(4) of this section,

(B) Retired employees who had performed such services for such corporation,

(C) The estate of any individual described in paragraph (e)(5)(i) (A) or (B) of this section, or

(D) Any other person who acquired such stock by reason of the death of an individual described in paragraph (e)(5)(i) (A) or (B) of this section, but only for the 2-year period beginning on the date of the death of such individual.

For purposes of this paragraph (e)(5) of this section, the term “substantially all” means an amount equal to or greater than 95 percent.

(i) *Definition of employee.* For purposes of the ownership test of this paragraph (e)(5) of this section, a person shall not be considered an employee of a corporation unless the services performed by that person for such corporation, based on the facts and circumstances, are more than de minimis. In addition, a person who is an employee of a corporation shall not be treated as an employee of another corporation merely by reason of the employer corporation and the other corporation being members of the same affiliated group or otherwise related.

(iii) *Attribution rules.* For purposes of this paragraph (e)(5) of this section, a corporation’s stock is considered held indirectly by a person if, and to the extent, such person owns a proportionate interest in a partnership, S corporation, or qualified personal service corporation that owns such stock. No other arrangement or type of ownership shall constitute indirect ownership of a corporation’s stock for purposes of this paragraph (e)(5) of this section. Moreover, stock of a corporation held by a trust is considered held by a person if, and to the extent, such person is treated under subpart E, part I, subchapter J, chapter 1 of the Code as the owner of the portion of the trust that consists of such stock.

(iv) *Disregard of community property laws.* For purposes of this paragraph (e)(5) of this section, community property laws shall be disregarded. Thus, in determining the stock ownership of a corporation, stock owned by a spouse solely by reason of community property laws shall be treated as owned by the other spouse.

(v) *Treatment of certain stock plans.* For purposes of this paragraph (e)(5) of

this section, stock held by a plan described in section 401 (a) that is exempt from tax under section 501 (a) shall be treated as held by an employee described in paragraph (e)(5)(i)(A) of this section.

(vi) *Special election for certain affiliated groups.* For purposes of determining whether the stock ownership test of this paragraph (e)(5) of this section has been met, at the election of the common parent of an affiliated group (within the meaning of section 1504 (a)), all members of such group shall be treated as one taxpayer if substantially all (within the meaning of paragraph (e)(4)(i) of this section) the activities of all such members (in the aggregate) are in the same field described in paragraph (e)(4)(i)(A)–(H) of this section. For rules relating to the making of the election, see 26 CFR 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986).

(vii) *Examples.* The following examples illustrate the provisions of paragraph (e) of this section:

*Example 1.* (i) X, a Corporation, is engaged in the business of providing accounting services to its clients. These services consist of the preparation of audit and financial statements and the preparation of tax returns. For purposes of section 448, such services consist of the performance of services in the field of accounting. In addition, for purposes of section 448, the supervision of employees directly preparing the statements and returns, and the performance of all administrative and support services incident to such activities (including secretarial, janitorial, purchasing, personnel, security, and payroll services) are the performance of services in the field of accounting.

(ii) In addition, X owns and leases a portion of an office building. For purposes of this section, the following types of activities undertaken by the employees of X shall be considered as the performance of services in a field other than the field of accounting: (A) services directly relating to the leasing activities, e.g., time spent in leasing and maintaining the leased portion of the building; (B) supervision of employees engaged in directly providing services in the leasing activity; and (C) all administrative and support services incurred incident to services described in (A) and (B). The leasing activities of X are considered the performance of services in a field other than the field of accounting, regardless of whether such leasing activities constitute a trade or business under the Code. If the employees of X spend 95% or

more of their time in the performance of services in the field of accounting, X satisfies the function test of paragraph (e)(4) of this section.

*Example 2.* Assume that Y, a C corporation, meets the function test of paragraph (e)(4) of this section. Assume further that all the employees of Y are performing services for Y in a qualifying field as defined in paragraph (e)(4) of this section. P, a partnership, owns 40%, by value, of the stock of Y. The remaining 60% of the stock of Y is owned directly by employees of Y. Employees of Y have an aggregate interest of 90% in the capital and profits of P. This, 96% of the stock of Y is held directly, or indirectly, by employees of Y performing services in a qualifying field. Accordingly, Y meets the ownership test of paragraph (e)(5) of this section and is a qualified personal service corporation.

*Example 3.* The facts are the same as in Example 2, except that 40% of the stock of Y is owned by Z, a C corporation. The remaining 60% of the stock is owned directly by the employees of Y. Employees of Y own 90% of the stock, by value, of Z. Assume that Z independently qualifies as a personal service corporation. The result is the same as in Example 2, i.e., 96% of the stock of Y is held, directly or indirectly, by employees of Y performing services in a qualifying field. Thus, Y is a qualified personal service corporation.

*Example 4.* The facts are the same as in Example 3, except that Z does not independently qualify as a personal service corporation. Because Z is not a qualified personal service corporation, the Y stock owned by Z is not treated as being held indirectly by the Z shareholders. Consequently, only 60% of the stock of Y is held, directly or indirectly, by employees of Y. Thus, Y does not meet the ownership test of paragraph (e)(5) of this section, and is not a qualified personal service corporation.

*Example 5.* Assume that W, a C corporation, meets the function test of paragraph (e)(4) of this section. In addition, assume that all the employees of W are performing services for W in a qualifying field. Nominal legal title to 100% of the stock of W is held by employees of W. However, due solely to the operation of community property laws, 20% of the stock of W is held by spouses of such employees who themselves are not employees of W. In determining the ownership of the stock, community property laws are disregarded. Thus, Y meets the ownership test of paragraph (e)(5) of this section, and is a qualified personal service corporation.

*Example 6.* Assume that 90% of the stock of T, a C corporation, is directly owned by the employees of T. Spouses of T's employees directly own 5% of the stock of T. The spouses are not employees of T, and their ownership does not occur solely by operation of community property laws. In addition, 5% of the stock of T is held by trusts (other than a

trust described in section 401(a) that is exempt from tax under section 501(a)), the sole beneficiaries of which are employees of T. The employees are not treated as owners of the trusts under subpart E, part I, subchapter J, chapter 1 of the Code. Since a person is not treated as owning the stock of a corporation owned by that person's spouse, or by any portion of a trust that is not treated as owned by such person under subpart E, only 90% of the stock of T is treated as held, directly or indirectly, by employees of T. Thus, T does not meet the ownership test of paragraph (e)(5) of this section, and is not a qualified personal service corporation.

*Example 7.* Assume that Y, a C corporation, directly owns all the stock of three subsidiaries, F, G, and H. Y is a common parent of an affiliated group within the meaning of section 1504(a) consisting of Y, F, G, and H. Y is not engaged in the performance of services in a qualifying field. Instead, Y is a holding company whose activities consist of its ownership and investment in its operating subsidiaries. Substantially all the activities of F involve the performance of services in the field of engineering. In addition, a majority of (but not substantially all) the activities of G involve the performance of services in the field of engineering; the remainder of G's services involve the performance of services in a nonqualifying field. Moreover, a majority of (but not substantially all) the activities of H involve the performance of services in the field of engineering; the remainder of H's activities involve the performance of services in the field of architecture. Nevertheless, substantially all the activities of the group consisting of Y, F, G, and H, in the aggregate, involve the performance of services in the field of engineering. Accordingly, Y elects under paragraph (e)(5)(vi) of this section to be treated as one taxpayer for determining the ownership test of paragraph (e)(5) of this section. Assume that substantially all the stock of Y (by value) is held by employees of F, G, or H who perform services in connection with a qualifying field (engineering or architecture). Thus, for purposes of determining whether any member corporation is a qualified personal service corporation, the ownership test of paragraph (e)(5) of this section has been satisfied. Since F and H satisfy the function test of paragraph (e)(4) of this section, F and H are qualified personal service corporations. However, since Y and G each fail the function test of paragraph (e)(4) of this section, neither corporation is a qualified personal service corporation.

*Example 8.* The facts are the same as in Example 7, except that less than substantially all the activities of the group consisting of

Y, F, G, and H, in the aggregate, are performed in the field of engineering. Substantially all the activities of the group consisting of Y, F, G, and H, are, in the aggregate, performed in two fields, the fields of engineering and architecture. Y may not elect to have the affiliated group treated as one taxpayer for purposes of determining whether group members meet the ownership test of paragraph (e)(5) of this section. The election is available only if substantially all the activities of the group, in the aggregate, involve the performance of services in only one qualifying field. Moreover, none of the group members are qualified personal service corporations. Y fails the function test of paragraph (e)(4) of this section because less than substantially all the activities of Y are performed in a qualifying field. In addition, F, G, and H fail the ownership test of paragraph (e)(5) of this section because substantially all their stock is owned by Y and not by their employees. The owners of Y are not deemed to indirectly own the stock owned by Y because Y is not a qualified personal service corporation.

*Example 9.* (i) The facts are the same as in Example 8, except Y itself satisfies the function tests of paragraph (e)(4) of this section because substantially all the activities of Y involve the performance of services in the field of engineering. In addition, assume that all employees of Y are involved in the performance of services in the field of engineering, and that all such employees own 100% of Y's stock. Moreover, assume that one-third of all the employees of Y are separately employed by F. Similarly, another one-third of the employees of Y are separately employed by G and H, respectively. None of the employees of Y are employed by more than one of Y's subsidiaries. Also, no other persons except the employees of Y are employed by any of the subsidiaries.

(ii) Y is a personal service corporation under section 448 because Y satisfies both the function and the ownership test of paragraphs (e) (4) and (5) of this section. As in Example 8, Y is unable to make the election to have the affiliated group treated as one taxpayer for purposes of determining whether group members meet the ownership test of paragraph (e)(5) of this section because less than substantially all the activities, in the aggregate, of the group members are performed in one of the qualifying fields. However, because Y is a personal service corporation, the stock owned by Y is treated as indirectly owned, proportionately, by the owners of Y. Thus, the employees of F are collectively treated as owning one-third of the stock of F, G, and H. The employees of G and H are similarly treated as owning one-third of each subsidiary's stock.

(iii) F, G, and H each fail the ownership test of paragraph (e)(5) of this section because less than substantially all of each cor-

poration's stock is owned by the employees of the respective corporation. Only one-third of each corporation's stock is owned by employees of that corporation. Thus, F, G, and H are not qualified personal service corporations.

*Example 10.* (i) Assume that Y, a C corporation, directly owns all the stock of three subsidiaries, F, G, and Z. Y is a common parent of an affiliated group within the meaning of section 1504(a) consisting of Y, F, and G. Z is a foreign corporation and is excluded from the affiliated group under section 1504. Assume that Y is a holding company whose activities consist of its ownership and investment in its operating subsidiaries. Substantially all the activities of F, G, and Z involve the performance of services in the field of engineering. Assume that employees of Z own one-third of the stock of Y and that none of these employees are also employees of Y, F, or G. In addition, assume that Y elects to be treated as one taxpayer for determining whether group members meet the ownership tests of paragraph (e)(5) of this section. Thus, Y, F, and G are treated as one taxpayer for purposes of the ownership test.

(ii) None of the members of the group are qualified personal service corporations. Y, F, and G fail the ownership test of paragraph (e)(5) of this section because less than substantially all the stock of Y is owned by employees of either Y, F, or G. Moreover, Z fails the ownership test of paragraph (e)(5) of this section because substantially all its stock is owned by Y and not by its employees.

(6) *Application of function and ownership tests.* A corporation that fails the function test of paragraph (e)(4) of this section for any taxable year, or that fails the ownership test of paragraph (e)(5) of this section at any time during any taxable year, shall change from the cash method effective for the year in which the corporation fails to meet the function test or the ownership test. For example, if a personal service corporation fails the function test for taxable year 1987, such corporation must change from the cash method effective for taxable year 1987. A corporation that fails the function or ownership test for a taxable year shall not be treated as a qualified personal service corporation for any part of that taxable year.

(f) *Exception for entities with gross receipts of not more than \$5 million—(1) In general.* Except in the case of a tax shelter, this section shall not apply to any C corporation or partnership with a C corporation as a partner for any taxable year if, for all prior taxable

years beginning after December 31, 1985, such corporation or partnership (or any predecessor thereof) meets the \$5,000,000 gross receipts test of paragraph (f)(2) of this section.

(2) *The \$5,000,000 gross receipts test*—(i) *In general.* A corporation meets the \$5,000,000 gross receipts test of this paragraph (f)(2) for any prior taxable year if the average annual gross receipts of such corporation for the 3 taxable years (or, if shorter, the taxable years during which such corporation was in existence) ending with such prior taxable year does not exceed \$5,000,000. In the case of a C corporation exempt from federal income taxes under section 501(a), or a trust subject to tax under section 511(b) that is treated as a C corporation under paragraph (a)(3) of this section, only gross receipts from the activities of such corporation or trust that constitute unrelated trades or businesses are taken into account in determining whether the \$5,000,000 gross receipts test is satisfied. A partnership with a C corporation as a partner meets the \$5,000,000 gross receipts test of this paragraph (f)(2) for any prior taxable year if the average annual gross receipts of such partnership for the 3 taxable years (or, if shorter, the taxable years during which such partnership was in existence) ending with such prior year does not exceed \$5,000,000. The gross receipts of the corporate partner are not taken into account in determining whether the partnership meets the \$5,000,000 gross receipts test.

(ii) *Aggregation of gross receipts.* For purposes of determining whether the \$5,000,000 gross receipts test has been satisfied, all persons treated as a single employer under section 52 (a) or (b), or section 414 (m) or (o) (or who would be treated as a single employer under such sections if they had employees) shall be treated as one person. Gross receipts attributable to transactions between persons who are treated as a common employer under this paragraph shall not be taken into account in determining whether the \$5,000,000 gross receipts test is satisfied.

(iii) *Treatment of short taxable year.* In the case of any taxable year of less than 12 months (a short taxable year), the gross receipts shall be annualized

by (A) multiplying the gross receipts for the short period by 12 and (B) dividing the result by the number of months in the short period.

(iv) *Determination of gross receipts*—(A) *In general.* The term “gross receipts” means gross receipts of the taxable year in which such receipts are properly recognized under the taxpayer’s accounting method used in that taxable year (determined without regard to this section) for federal income tax purposes. For this purpose, gross receipts include total sales (net of returns and allowances) and all amounts received for services. In addition, gross receipts include any income from investments, and from incidental or outside sources. For example, gross receipts include interest (including original issue discount and tax-exempt interest within the meaning of section 103), dividends, rents, royalties, and annuities, regardless of whether such amounts are derived in the ordinary course of the taxpayer’s trade of business. Gross receipts are not reduced by cost of goods sold or by the cost of property sold if such property is described in section 1221 (1), (3), (4) or (5). With respect to sales of capital assets as defined in section 1221, or sales of property described in 1221 (2) (relating to property used in a trade or business), gross receipts shall be reduced by the taxpayer’s adjusted basis in such property. Gross receipts do not include the repayment of a loan or similar instrument (*e.g.*, a repayment of the principal amount of a loan held by a commercial lender). Finally, gross receipts do not include amounts received by the taxpayer with respect to sales tax or other similar state and local taxes if, under the applicable state or local law, the tax is legally imposed on the purchaser of the good or service, and the taxpayer merely collects and remits the tax to the taxing authority. If, in contrast, the tax is imposed on the taxpayer under the applicable law, then gross receipts shall include the amounts received that are allocable to the payment of such tax.

(3) *Examples.* The following examples illustrate the provisions of paragraph (f) of this section:

*Example 1.* X, a calendar year C corporation, was formed on January 1, 1986. Assume

that in 1986 X has gross receipts of \$15 million. For taxable year 1987, this section applies to X because in 1986, the period during which X was in existence, X has average annual gross receipts of more than \$5 million.

*Example 2.* Y, a calendar year C corporation that is not a qualified personal service corporation, has gross receipts of \$10 million, \$9 million, and \$4 million for taxable years 1984, 1985, and 1986, respectively. In taxable year 1986, X has average annual gross receipts for the 3-taxable-year period ending with 1986 of \$7.67 million (\$10 million + 9 million + 4 million ÷ 3). Thus, for taxable year 1987, this section applies and Y must change from the cash method for such year.

*Example 3.* Z, a C corporation which is not a qualified personal service corporation, has a 5% partnership interest in ZAB partnership, a calendar year cash method taxpayer. All other partners of ZAB partnership are individuals. Z corporation has average annual gross receipts of \$100,000 for the 3-taxable-year period ending with 1986 (i.e., 1984, 1985 and 1986). The ZAB partnership has average annual gross receipts of \$6 million for the same 3-taxable-year period. Since ZAB fails to meet the \$5,000,000 gross receipts test for 1986, this section applies to ZAB for its taxable year beginning January 1, 1987. Accordingly, ZAB must change from the cash method for its 1987 taxable year. The gross receipts of Z corporation are not relevant in determining whether ZAB is subject to this section.

*Example 4.* The facts are the same as in Example 3, except that during the 1987 taxable year of ZAB, the Z corporation transfers its partnership interest in ZAB to an individual. Under paragraph (a)(1) of this section, ZAB is treated as a partnership with a C corporation as a partner. Thus, this section requires ZAB to change from the cash method effective for its taxable year 1987. If ZAB later desires to change its method of accounting to the cash method for its taxable year beginning January 1, 1988 (or later), ZAB must comply with all requirements of law, including sections 446(b), 446(e), and 481, to effect the change.

*Example 5.* X, a C corporation that is not a qualified personal service corporation, was formed on January 1, 1986, in a transaction described in section 351. In the transaction, A, an individual, contributed all of the assets and liabilities of B, a trade or business, to X, in return for the receipt of all the outstanding stock of X. Assume that in 1986 X has gross receipts of \$4 million. In 1984 and 1985, the gross receipts of B, the trade or business, were \$10 million and \$7 million respectively. The gross receipts test is applied for the period during which X and its predecessor trade or business were in existence. X has average annual gross receipts for the 3-taxable-year period ending with 1986 of \$7 million (\$10 million + \$7 million + \$4 million ÷ 3). Thus, for taxable year 1987, this section

applies and X must change from the cash method for such year.

[T.D. 8143, 52 FR 22766, June 16, 1987, as amended by T.D. 8329, 56 FR 485, Jan. 7, 1991; T.D. 8514, 58 FR 68299, Dec. 27, 1993; T.D. 9174, 70 FR 704, Jan. 5, 2005]

#### § 1.448-2 Nonaccrual of certain amounts by service providers.

(a) *In general.* This section applies to taxpayers qualified to use a non-accrual-experience method of accounting provided for in section 448(d)(5) with respect to amounts to be received for the performance of services. A taxpayer that satisfies the requirements of this section is not required to accrue any portion of amounts to be received from the performance of services that, on the basis of the taxpayer's experience, and to the extent determined under the computation or formula used by the taxpayer and allowed under this section, will not be collected. Except as otherwise provided in this section, a taxpayer is qualified to use a non-accrual-experience method of accounting if the taxpayer uses an accrual method of accounting with respect to amounts to be received for the performance of services by the taxpayer and either—

(1) The services are in fields referred to in section 448(d)(2)(A) and described in § 1.448-1T(e)(4) (health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting); or

(2) The taxpayer meets the \$5 million annual gross receipts test of section 448(c) and § 1.448-1T(f)(2) for all prior taxable years.

(b) *Application of method and treatment as method of accounting.* The rules of section 448(d)(5) and the regulations are applied separately to each taxpayer. For purposes of section 448(d)(5), the term *taxpayer* has the same meaning as the term *person* defined in section 7701(a)(1) (rather than the meaning of the term defined in section 7701(a)(14)). The nonaccrual of amounts to be received for the performance of services is a method of accounting (a non-accrual-experience method). A change to a nonaccrual-experience method, from one nonaccrual-experience method to another nonaccrual-experience

method, or to a periodic system (for example, *see* Notice 88-51 (1988-1 C.B. 535) and § 601.601(d)(2)(ii)(b) of this chapter), is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations apply. *See* also paragraphs (c)(2)(i), (c)(5), (d)(4), and (e)(3)(i) of this section. Except as provided in other published guidance, a taxpayer who wishes to adopt or change to any nonaccrual-experience method other than one of the safe harbor methods described in paragraph (f) of this section must request and receive advance consent from the Commissioner in accordance with the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's consent.

(c) *Definitions and special rules*—(1) *Accounts receivable*—(i) *In general*. Accounts receivable include only amounts that are earned by a taxpayer and otherwise recognized in income through the performance of services by the taxpayer. For purposes of determining a taxpayer's nonaccrual-experience under any method provided in this section, amounts described in paragraph (c)(1)(ii) of this section are not taken into account. Except as otherwise provided, for purposes of this section, accounts receivable do not include amounts that are not billed (such as for charitable or pro bono services) or amounts contractually not collectible (such as amounts in excess of a fee schedule agreed to by contract). *See* paragraph (g) *Examples 1* and *2* of this section for examples of this rule.

(ii) *Method not available for certain receivables*—(A) *Amounts not earned and recognized through the performance of services*. A nonaccrual-experience method of accounting may not be used with respect to amounts that are not earned by a taxpayer and otherwise recognized in income through the performance of services by the taxpayer. For example, a nonaccrual-experience method may not be used with respect to amounts owed to the taxpayer by reason of the taxpayer's activities with respect to lending money, selling goods, or acquiring accounts receivable or other rights to receive payment from other persons (including persons related to the taxpayer) regardless of whether those persons earned the amounts

through the provision of services. However, *see* paragraph (d)(3) of this section for special rules regarding acquisitions of a trade or business or a unit of a trade or business.

(B) *If interest or penalty charged on amounts due*. A nonaccrual-experience method of accounting may not be used with respect to amounts due for which interest is required to be paid or for which there is any penalty for failure to timely pay any amounts due. For this purpose, a taxpayer will be treated as charging interest or penalties for late payment if the contract or agreement expressly provides for the charging of interest or penalties for late payment, regardless of the practice of the parties. If the contract or agreement does not expressly provide for the charging of interest or penalties for late payment, the determination of whether the taxpayer charges interest or penalties for late payment will be made based on all of the facts and circumstances of the transaction, and not merely on the characterization by the parties or the treatment of the transaction under state or local law. However, the offering of a discount for early payment of an amount due will not be regarded as the charging of interest or penalties for late payment under this section, if—

(1) The full amount due is otherwise accrued as gross income by the taxpayer at the time the services are provided; and

(2) The discount for early payment is treated as an adjustment to gross income in the year of payment, if payment is received within the time required for allowance of the discount. *See* paragraph (g) *Example 3* of this section for an example of this rule.

(2) *Applicable period*—(i) *In general*. The applicable period is the number of taxable years on which the taxpayer bases its nonaccrual-experience method. A change in the number of taxable years included in the applicable period is a change in method of accounting to which the procedures of section 446 apply. A change in the inclusion or exclusion of the current taxable year in the applicable period is a change in method of accounting to which the procedures of section 446 apply. A change

in the number of taxable years included in the applicable period or the inclusion or exclusion of the current taxable year in the applicable period is made on a cut-off basis.

(ii) *Applicable period for safe harbors.* For purposes of the safe harbors under paragraph (f) of this section the applicable period may consist of at least three but not more than six of the immediately preceding consecutive taxable years. Alternatively, the applicable period may consist of the current taxable year and at least two but not more than five of the immediately preceding consecutive taxable years. A period shorter than six taxable years is permissible only if the period contains the most recent preceding taxable years and all of the taxable years in the applicable period are consecutive.

(3) *Bad debts.* Bad debts are accounts receivable determined to be uncollectible and charged off.

(4) *Charge-offs.* Amounts charged off include only those amounts that would otherwise be allowable under section 166(a).

(5) *Determination date.* The determination date in safe harbor 2 provided in paragraph (f)(2) of this section is used as a cut-off date for determining all known data to be taken into account in the computation of the taxable year's uncollectible amount. The determination date may not be later than the earlier of the due date, including extensions, for filing the taxpayer's Federal income tax return for that taxable year or the date on which the taxpayer timely files the return for that taxable year. The determination date may be different in each taxable year. However, once a determination date is selected and used for a particular taxable year, it may not be changed for that taxable year. The choice of a determination date is not a method of accounting.

(6) *Recoveries.* Recoveries are amounts previously excluded from income under a nonaccrual-experience method or charged off that the taxpayer recovers.

(7) *Uncollectible amount.* The uncollectible amount is the portion of any account receivable amount due that, under the taxpayer's nonaccrual-

experience method, will be not collected.

(d) *Use of experience to estimate uncollectible amounts—(1) In general.* In determining the portion of any amount due that, on the basis of experience, will not be collected, a taxpayer may use any nonaccrual-experience method that clearly reflects the taxpayer's nonaccrual-experience. The determination of whether a nonaccrual-experience method clearly reflects the taxpayer's nonaccrual-experience is made in accordance with the rules under paragraph (e) of this section. Alternatively, the taxpayer may use any one of the five safe harbor nonaccrual-experience methods of accounting provided in paragraphs (f)(1) through (f)(5) of this section, which are presumed to clearly reflect a taxpayer's nonaccrual-experience.

(2) *Application to specific accounts receivable.* The nonaccrual-experience method is applied with respect to each account receivable of the taxpayer that is eligible for this method. With respect to a particular account receivable, the taxpayer determines, in the manner prescribed in paragraphs (d)(1) or (f)(1) through (f)(5) of this section (whichever applies), the uncollectible amount. The determination is required to be made only once with respect to each account receivable, regardless of the term of the receivable. The uncollectible amount is not recognized as gross income. Thus, the amount recognized as gross income is the amount that would otherwise be recognized as gross income with respect to the account receivable, less the uncollectible amount. A taxpayer that excludes an amount from income during a taxable year as a result of the taxpayer's use of a nonaccrual-experience method may not deduct in any subsequent taxable year the amount excluded from income. Thus, the taxpayer may not deduct the excluded amount in a subsequent taxable year in which the taxpayer actually determines that the amount is uncollectible and charges it off. If a taxpayer using a nonaccrual-experience method determines that an amount that was not excluded from income is uncollectible and should be charged off (for example, a calendar-year taxpayer determines on November

1st that an account receivable that was originated on May 1st of the same taxable year is uncollectible and should be charged off), the taxpayer may deduct the amount charged off when it is charged off, but must include any subsequent recoveries in income. The reasonableness of a taxpayer's determination that amounts are uncollectible and should be charged off may be considered on examination. See paragraph (g) *Example 12* of this section for an example of this rule.

(3) *Acquisitions and dispositions*—(i) *Acquisitions*. If a taxpayer acquires the major portion of a trade or business of another person (predecessor) or the major portion of a separate unit of a trade or business of a predecessor, then, for purposes of applying this section for any taxable year ending on or after the acquisition, the experience from preceding taxable years of the predecessor attributable to the portion of the trade or business acquired, if available, must be used in determining the taxpayer's experience.

(ii) *Dispositions*. If a taxpayer disposes of a major portion of a trade or business or the major portion of a separate unit of a trade or business, and the taxpayer furnished the acquiring person the information necessary for the computations required by this section, then, for purposes of applying this section for any taxable year ending on or after the disposition, the experience from preceding taxable years attributable to the portion of the trade or business disposed may not be used in determining the taxpayer's experience.

(iii) *Meaning of terms*. For the meaning of the terms *acquisition*, *separate unit*, and *major portion*, see paragraph (b) of § 1.52-2. The term *acquisition* includes an incorporation or a liquidation.

(4) *New taxpayers*. The rules of this paragraph (d)(4) apply to any newly formed taxpayer to which the rules of paragraph (d)(3)(i) of this section do not apply. Any newly formed taxpayer that wants to use a safe harbor nonaccrual-experience method of accounting described in paragraph (f)(1), (f)(2), (f)(3), (f)(4), or (f)(5) of this section applies the methods by using the experience of the actual number of taxable years available in the applicable pe-

riod. A newly formed taxpayer that wants to use one of the safe harbor nonaccrual-experience methods of accounting described in paragraph (f)(2), (f)(4), or (f)(5) of this section in its first taxable year and does not have any accounts receivable upon formation may not exclude any portion of its year-end accounts receivable from income for its first taxable year. The taxpayer must begin creating its moving average in its second taxable year by tracking the accounts receivable as of the first day of its second taxable year. The use of one of the safe harbor nonaccrual-experience methods of accounting described in paragraph (f)(2), (f)(4), or (f)(5) of this section in a taxpayer's second taxable year in this situation is not a change in method of accounting. Although the taxpayer must maintain the books and records necessary to perform the computations under the adopted safe harbor nonaccrual-experience method, the taxpayer is not required to affirmatively elect the method on its Federal income tax return for its first taxable year.

(5) *Recoveries*. Regardless of the nonaccrual-experience method of accounting used by a taxpayer under this section, the taxpayer must take recoveries into account. If, in a subsequent taxable year, a taxpayer recovers an amount previously excluded from income under a nonaccrual-experience method or charged off, the taxpayer must include the recovered amount in income in that subsequent taxable year. See paragraph (g) *Example 13* of this section for an example of this rule.

(6) *Request to exclude taxable years from applicable period*. A period shorter than the applicable period generally is permissible only if the period consists of consecutive taxable years and there is a change in the type of a substantial portion of the outstanding accounts receivable such that the risk of loss is substantially increased. A decline in the general economic conditions in the area, which substantially increases the risk of loss, is a relevant factor in determining whether a shorter period is appropriate. However, approval to use a shorter period will not be granted unless the taxpayer supplies evidence that the accounts receivable outstanding at the close of the taxable

years for the shorter period requested are more comparable in nature and risk to accounts receivable outstanding at the close of the current taxable year. A substantial increase in a taxpayer's bad debt experience is not, by itself, sufficient to justify the use of a shorter period. If approval is granted to use a shorter period, the experience for the excluded taxable years may not be used for any subsequent taxable year. A request for approval to exclude the experience of a prior taxable year must be made in accordance with the applicable procedures for requesting a letter ruling and must include a statement of the reasons the experience should be excluded. A request will not be considered unless it is sent to the Commissioner at least 30 days before the close of the first taxable year for which the approval is requested.

(7) *Short taxable years.* A taxpayer with a short taxable year that uses a nonaccrual-experience method that compares accounts receivable balance to total bad debts during the taxable year should make appropriate adjustments.

(8) *Recordkeeping requirements*—(i) A taxpayer using a nonaccrual-experience method of accounting must keep sufficient books and records to establish the amount of any exclusion from gross income under section 448(d)(5) for the taxable year, including books and records demonstrating—

(A) The nature of the taxpayer's nonaccrual-experience method;

(B) Whether, for any particular taxable year, the taxpayer qualifies to use its nonaccrual-experience method (including the self-testing requirements of paragraph (e) of this section (if applicable));

(C) The taxpayer's determination that amounts are uncollectible;

(D) The proper amount that is excludable under the taxpayer's nonaccrual-experience method; and

(E) The taxpayer's determination date under paragraph (c)(5) of this section (if applicable).

(ii) If a taxpayer does not maintain records of the data that are sufficient to establish the amount of any exclusion from gross income under section 448(d)(5) for the taxable year, the Internal Revenue Service may change the

taxpayer's method of accounting on examination. See §1.6001-1 for rules regarding records.

(e) *Requirements for nonaccrual method to clearly reflect experience*—(1) *In general.* A nonaccrual-experience method clearly reflects the taxpayer's experience if the taxpayer's nonaccrual-experience method meets the self-test requirements described in this paragraph (e). If a taxpayer is using one of the safe harbor nonaccrual-experience methods described in paragraphs (f)(1) through (f)(4) of this section, its method is deemed to clearly reflect its experience and is not subject to the self-testing requirements in paragraphs (e)(2) and (e)(3) of this section.

(2) *Requirement to self-test*—(i) *In general.* A taxpayer using, or desiring to use, a nonaccrual-experience method must self-test its nonaccrual-experience method for its first taxable year for which the taxpayer uses, or desires to use, that nonaccrual-experience method (first-year self-test) and every three taxable years thereafter (three-year self-test). Each self-test must be performed by comparing the uncollectible amount (under the taxpayer's nonaccrual-experience method) with the taxpayer's actual experience. A taxpayer using the safe harbor under paragraph (f)(5) of this section must self-test using the safe harbor comparison method in paragraph (e)(3) of this section.

(ii) *First-year self-test.* The first-year self-test must be performed by comparing the uncollectible amount with the taxpayer's actual experience for its first taxable year for which the taxpayer uses, or desires to use, that nonaccrual-experience method. If the uncollectible amount for the first-year self-test is less than or equal to the taxpayer's actual experience for its first taxable year for which the taxpayer uses, or desires to use, that nonaccrual-experience method, the taxpayer's nonaccrual-experience method is treated as clearly reflecting its experience for the first taxable year. If, as a result of the first-year self-test, the uncollectible amount for the test period is greater than the taxpayer's actual experience, then—

(A) The taxpayer's nonaccrual-experience method is treated as not clearly reflecting its experience;

(B) The taxpayer is not permitted to use that nonaccrual-experience method in that taxable year; and

(C) The taxpayer must change to (or adopt) for that taxable year either—

(1) Another nonaccrual-experience method that clearly reflects experience, that is, a nonaccrual-experience method that meets the first-year self-test requirement; or

(2) A safe harbor nonaccrual-experience method described in paragraphs (f)(1) through (f)(5) of this section.

(iii) *Three-year self-test*—(A) *In general.* The three-year self-test must be performed by comparing the sum of the uncollectible amounts for the current taxable year and prior two taxable years (cumulative uncollectible amount) with the sum of the taxpayer's actual experience for the current taxable year and prior two taxable years (cumulative actual experience amount).

(B) *Recapture.* If the cumulative uncollectible amount for the test period is greater than the cumulative actual experience amount for the test period, the taxpayer's uncollectible amount is limited to the cumulative actual experience amount for the test period. Any excess of the taxpayer's cumulative uncollectible amount over the taxpayer's cumulative actual nonaccrual-experience amount excluded from income during the test period must be recaptured into income in the third taxable year of the three-year self-test period.

(C) *Determination of whether method is permissible or impermissible.* If the cumulative uncollectible amount is less than 110 percent of the cumulative actual experience amount, the taxpayer's nonaccrual-experience method is treated as a permissible method and the taxpayer may continue to use its alternative nonaccrual-experience method, subject to the three-year self-test requirement of this paragraph (e)(2)(iii). If the cumulative uncollectible amount is greater than or equal to 110 percent of the cumulative actual experience amount, the taxpayer's nonaccrual-experience method is treated as impermissible in the taxable year subsequent

to the three-year self-test year and does not clearly reflect its experience. The taxpayer must change to another nonaccrual-experience method that clearly reflects experience, including, for example, one of the safe harbor nonaccrual-experience methods described in paragraphs (f)(1) through (f)(5) of this section, for the subsequent taxable year. A change in method of accounting from an impermissible method under this paragraph (e)(2)(iii)(C) to a permissible method in the taxable year subsequent to the three-year self-test year is made on a cut-off basis.

(iv) *Determination of taxpayer's actual experience.* [Reserved]

(3) *Safe harbor comparison method*—(i) *In general.* A taxpayer using, or desiring to use, a nonaccrual-experience method under the safe harbor in paragraph (f)(5) of this section must self-test its nonaccrual-experience method for its first taxable year for which the taxpayer uses, or desires to use, that nonaccrual-experience method (first-year self-test) and every three taxable years thereafter (three-year self-test). A nonaccrual-experience method under the safe harbor in paragraph (f)(5) of this section is deemed to clearly reflect experience provided all the requirements of the safe harbor comparison method of this paragraph (e)(3) are met. Each self-test must be performed by comparing the uncollectible amount (under the taxpayer's nonaccrual-experience method) with the uncollectible amount that would have resulted from use of one of the safe harbor methods described in paragraph (f)(1), (f)(2), (f)(3), or (f)(4) of this section. A change from a nonaccrual-experience method that uses the safe harbor comparison method for self-testing to a nonaccrual-experience method that does not use the safe harbor comparison method for self-testing, and vice versa, is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations apply. A change solely to use or discontinue use of the safe harbor comparison method for purposes of determining whether the nonaccrual-experience method clearly reflects experience must be made on a cut-off basis and without audit protection.

(ii) *Requirements to use safe harbor comparison method*—(A) *First-year self-test*. The first-year self-test must be performed by comparing the uncollectible amount with the uncollectible amount determined under any of the safe harbor methods described in paragraph (f)(1), (f)(2), (f)(3), or (f)(4) of this section (safe harbor uncollectible amount) for its first taxable year for which the taxpayer uses, or desires to use, that nonaccrual-experience method. If the uncollectible amount for the first-year self-test is less than or equal to the safe harbor uncollectible amount, then the taxpayer's nonaccrual-experience method is treated as clearly reflecting its experience for the first taxable year. If, as a result of the first-year self-test, the uncollectible amount for the test period is greater than the safe harbor uncollectible amount, then—

(1) The taxpayer's nonaccrual-experience method is treated as not clearly reflecting its experience;

(2) The taxpayer is not permitted to use that nonaccrual-experience method in that taxable year; and

(3) The taxpayer must change to (or adopt) for that taxable year either—

(i) Another nonaccrual-experience method that clearly reflects experience, that is, a nonaccrual-experience method that meets the first-year self-test requirement; or

(ii) A safe harbor nonaccrual-experience method described in paragraphs (f)(1) through (f)(5) of this section.

(B) *Three-year self-test*. The three-year self-test must be performed by comparing the sum of the uncollectible amounts for the current taxable year and prior two taxable years (cumulative uncollectible amount) with the sum of the uncollectible amount determined under any of the safe harbor methods described in paragraph (f)(1), (f)(2), (f)(3), or (f)(4) of this section for the current taxable year and prior two taxable years (cumulative safe harbor uncollectible amounts). If the cumulative uncollectible amount for the three-year self-test is less than or equal to the cumulative safe harbor uncollectible amount for the test period, then the taxpayer's nonaccrual-experience method is treated as clearly reflecting its experience for the test

period and the taxpayer may continue to use that nonaccrual-experience method, subject to a requirement to self-test again after three taxable years. If the cumulative uncollectible amount for the test period is greater than the cumulative safe harbor uncollectible amount for the test period, the taxpayer's uncollectible amount is limited to the cumulative safe harbor uncollectible amount for the test period. Any excess of the taxpayer's cumulative uncollectible amount over the taxpayer's cumulative safe harbor uncollectible amount excluded from income during the test period must be recaptured into income in the third taxable year of the three-year self-test period. If the cumulative uncollectible amount is less than 110 percent of the cumulative safe harbor uncollectible amount, the taxpayer's nonaccrual-experience method is treated as a permissible method and the taxpayer may continue to use its alternative nonaccrual-experience method, subject to the three-year self-test requirement of this paragraph (e)(3)(ii)(B). If the cumulative uncollectible amount is greater than or equal to 110 percent of the cumulative safe harbor uncollectible amount, the taxpayer's nonaccrual-experience method is treated as impermissible in the taxable year subsequent to the three-year self-test year and does not clearly reflect its experience. The taxpayer must change to another nonaccrual-experience method that clearly reflects experience, including, for example, one of the safe harbor nonaccrual-experience methods described in paragraphs (f)(1) through (f)(5) of this section, for the subsequent taxable year. A change in method of accounting from an impermissible method under this paragraph (e)(3)(ii)(B) to a permissible method in the taxable year subsequent to the three-year self-test year is made on a cut-off basis.

(4) *Methods that do not clearly reflect experience*. [Reserved]

(5) *Contemporaneous documentation*. For purposes of this paragraph (e), including the safe harbor comparison method of paragraph (e)(3) of this section, a taxpayer must document in its books and records, in the taxable year any first-year or three-year self-test is

performed, the method used to conduct the self-test, including appropriate documentation and computations that resulted in the determination that the taxpayer's nonaccrual-experience method clearly reflected the taxpayer's nonaccrual-experience for the applicable test period.

(f) *Safe harbors*—(1) *Safe harbor 1: revenue-based moving average method.* A taxpayer may use a nonaccrual-experience method under which the taxpayer determines the uncollectible amount by multiplying its accounts receivable balance at the end of the current tax-

able year by a percentage (revenue-based moving average percentage). The revenue-based moving average percentage is computed by dividing the total bad debts sustained, adjusted by recoveries received, throughout the applicable period by the total revenue resulting in accounts receivable earned throughout the applicable period. See paragraph (g) *Example 4* of this section for an example of this method. Thus, the uncollectible amount under the revenue-based moving average method is computed:

$$\frac{\text{Bad debts sustained, adjusted by recoveries received, during the applicable period}}{\text{Total revenue resulting in accounts receivable during the applicable period}} \times \text{Accounts receivable at end of current taxable year}$$

(2) *Safe harbor 2: actual experience method*—(i) *Option A: single determination date.* A taxpayer may use a nonaccrual-experience method under which the taxpayer determines the uncollectible amount by multiplying its accounts receivable balance at the end of the current taxable year by a percentage (moving average nonaccrual-experience percentage) and then increasing the resulting amount by 5 percent. See paragraph (g) *Example 5* of this section for an example of safe harbor 2 in general, and paragraph (g) *Example 6* of this section for an example of the single determination date op-

tion of safe harbor 2. The taxpayer's moving average nonaccrual-experience percentage is computed by dividing the total bad debts sustained, adjusted by recoveries that are allocable to the bad debts, by the determination date of the current taxable year related to the taxpayer's accounts receivable balance at the beginning of each taxable year during the applicable period by the sum of the accounts receivable at the beginning of each taxable year during the applicable period. Thus, the uncollectible amount under Option A of the actual experience method is computed:

$$\frac{\text{Bad debts sustained, adjusted by recoveries received that are allocable to the bad debts, by the determination date of the current taxable year related to the taxpayer's accounts receivable balance at the beginning of each taxable year during the applicable period}}{\text{Sum of accounts receivable at the beginning of each taxable year during the applicable period}} \times \frac{\text{Accounts receivable at end of current taxable year}}{\text{year}} \times 1.05$$

(ii) *Option B: multiple determination dates.* Alternatively, in computing its bad debts related to the taxpayer's accounts receivable balance at the beginning of each taxable year during the applicable period, a taxpayer may use the original determination date for each taxable year during the applicable period. That is, the taxpayer may use

bad debts sustained, adjusted by recoveries received that are allocable to the bad debts, by the determination date of each taxable year during the applicable period rather than the determination date of the current taxable year. See paragraph (g) *Example 7* of this section for an example of the multiple determination date option of safe harbor 2.

**Internal Revenue Service, Treasury**

**§ 1.448-2**

Thus, the uncollectible amount under Option B of the actual experience method is computed:

$$\frac{\text{Sum of, for each taxable year during the applicable period, bad debts sustained, adjusted by recoveries received that are allocable to the bad debts, by that taxable year's determination date and related to the taxpayer's accounts receivable balance at the beginning of the taxable year}}{\text{Sum of accounts receivable at the beginning of each taxable year during the applicable period}} \times \frac{\text{Accounts receivable at end of current taxable year}}{\text{year}} \times 1.05$$

(iii) *Tracing of recoveries*—(A) *In general.* Bad debts related to the taxpayer's accounts receivable balance at the beginning of each taxable year during the applicable period must be adjusted by the portion, if any, of recoveries received that are properly allocable to the bad debts.

(B) *Specific tracing.* If a taxpayer, without undue burden, can trace all recoveries to their corresponding charge-offs, the taxpayer must specifically trace all recoveries.

(C) *Recoveries cannot be traced without undue burden.* If a taxpayer has any recoveries that cannot, without undue burden, be traced to corresponding charge-offs, the taxpayer may allocate those or all recoveries between charge-offs of amounts in the relevant beginning accounts receivable balances and other charge-offs using an allocation method that is reasonable under all of the facts and circumstances.

(1) *Reasonable allocations.* An allocation method is reasonable if there is a cause and effect relationship between the allocation base or ratio and the recoveries. A taxpayer may elect to trace recoveries that are traceable and allocate all untraceable recoveries to charge-offs of amounts in the relevant beginning accounts receivable balances. Such an allocation method will be deemed to be reasonable under all the facts and circumstances.

(2) *Allocations that are not reasonable.* Allocation methods that generally will

not be considered reasonable include, for example, methods in which there is not a cause and effect relationship between the allocation base or ratio and methods in which receivables for which the nonaccrual-experience method is not allowed to be used are included in the allocation. See paragraph (c)(1)(ii) of this section for examples of receivables for which the nonaccrual-experience method is not allowed.

(3) *Safe harbor 3: modified Black Motor method.* A taxpayer may use a nonaccrual-experience method under which the taxpayer determines the uncollectible amount by multiplying its accounts receivable balance at the end of the current taxable year by a percentage (modified Black Motor moving average percentage) and then reducing the resulting amount by the bad debts written off during the current taxable year relating to accounts receivable generated during the current taxable year. The modified Black Motor moving average percentage is computed by dividing the total bad debts sustained, adjusted by recoveries received, during the applicable period by the sum of accounts receivable at the end of each taxable year during the applicable period. See paragraph (g) *Example 8* of this section for an example of this method. Thus, the uncollectible amount under the modified Black Motor method is computed:

$$\frac{\text{Bad debts sustained, adjusted by recoveries received, during the applicable period}}{\text{Sum of accounts receivable at the end of each taxable year during the applicable period}} \times \text{Accounts receivable at end of current taxable year} - \text{Bad debts written off during the current taxable year relating to accounts receivable generated during the current taxable year}$$

(4) *Safe harbor 4: modified moving average method.* A taxpayer may use a non-accrual-experience method under which the taxpayer determines the uncollectible amount by multiplying its accounts receivable balance at the end of the current taxable year by a percentage (modified moving average percentage). The modified moving average percentage is computed by dividing the total bad debts sustained, adjusted by recoveries received, during

the applicable period other than bad debts that were written off in the same taxable year the related accounts receivable were generated by the sum of accounts receivable at the beginning of each taxable year during the applicable period. See paragraph (g) *Example 9* of this section for an example of this method. Thus, the uncollectible amount under the modified moving average method is computed:

$$\frac{(\text{Bad debts sustained, adjusted by recoveries received, during the applicable period} - \text{Bad debts written off in same taxable year accounts receivable generated})}{\text{Sum of accounts receivable at the beginning of each taxable year during the applicable period}} \times \text{Accounts receivable at end of current taxable year}$$

(5) *Safe harbor 5: alternative non-accrual-experience method.* A taxpayer may use an alternative nonaccrual-experience method that clearly reflects the taxpayer's actual nonaccrual-experience, provided the taxpayer's alternative nonaccrual-experience method meets the self-test requirements described in paragraph (e)(3) of this section.

(g) *Examples.* The following examples illustrate the provisions of this section. In each example, the taxpayer uses a calendar year for Federal income tax purposes and an accrual method of accounting, does not require the payment of interest or penalties with respect to past due accounts receivable (except in the case of *Example 3*) and, in the case of *Examples 5* through *7*, selects an appropriate determination date for each taxable year. The examples are as follows:

*Example 1. Contractual allowance or adjustment.* B, a healthcare provider, performs a medical procedure on individual C, who has health insurance coverage with IC, an insurance company. B bills IC and C for \$5,000, B's standard charge for this medical procedure. However, B has a contract with IC that obligates B to accept \$3,500 as full payment for the medical procedure if the procedure is provided to a patient insured by IC. Under the contract, only \$3,500 of the \$5,000 billed by B is legally collectible from IC and C. The remaining \$1,500 represents a contractual allowance or contractual adjustment. Under paragraph (c)(1)(i) of this section, the remaining \$1,500 is not a contractually collectible amount for purposes of this section and B may not use a nonaccrual-experience method with respect to this portion of the receivable.

*Example 2. Charitable or pro bono services.* D, a law firm, agrees to represent individual E in a legal matter and to provide services to E on a pro bono basis. D normally charges \$500 for these services. Because D provides its services to E pro bono, D's services are never billed or intended to result in revenue.

**Internal Revenue Service, Treasury**

**§ 1.448-2**

Thus, under paragraph (c)(1)(i) of this section, the \$500 is not a collectible amount for purposes of this section and D may not use a nonaccrual-experience method with respect to this portion of the receivable.

*Example 3. Charging interest and/or penalties.* Z has two billing methods for the amounts to be received from Z's provision of services described in paragraph (a)(1) of this section. Under one method, for amounts that are more than 90 days past due, Z charges interest at a market rate until the amounts (together with interest) are paid. Under the other billing method, Z charges no interest for amounts past due. Under paragraph (c)(1)(ii) of this section, A may not use a nonaccrual-experience method of accounting with respect to any of the amounts billed under the method that charges interest on amounts that are more than 90 days past due. Z may, however, use the nonaccrual-experience method with respect to the amounts billed under the method that does not charge interest for amounts past due.

*Example 4. Safe harbor 1: Revenue-based moving average method.* (i) F uses the revenue-based moving average method described in paragraph (f)(1) of this section with an applicable period of six taxable years. F's total accounts receivable and bad debt experience for the 2006 taxable year and the five immediately preceding consecutive taxable years are as follows:

Taxable year	Total accounts receivable earned during the taxable year	Bad debts adjusted for recoveries
2001 .....	\$40,000	\$5,700
2002 .....	40,000	7,200
2003 .....	40,000	11,000
2004 .....	60,000	10,200
2005 .....	70,000	14,000
2006 .....	80,000	16,800
<b>Total .....</b>	<b>330,000</b>	<b>64,900</b>

(ii) F's revenue-based moving average percentage is 19.67% (\$64,900/\$330,000). If \$49,300 of accounts receivable remains outstanding as of the close of that taxable year (2006), F's uncollectible amount using the revenue-based moving average safe harbor method is computed by multiplying \$49,300 by the revenue-based moving average percentage of 19.67%, or \$9,697. Thus, F may exclude \$9,697 from gross income for 2006.

*Example 5. Safe harbor 2: Actual experience method.* (i) G is eligible to use a nonaccrual-experience method and wishes to adopt the actual experience method of paragraph (f)(2) of this section. G elects to use a three-year applicable period consisting of the current and two immediately preceding consecutive taxable years. G determines that its actual accounts receivable collection experience is as follows:

Taxable year	Total A/R balance at beginning of taxable year	Bad debts, adjusted for recoveries, related to A/R balance at beginning of taxable year
2006 .....	\$1,000,000	\$35,000
2007 .....	760,000	75,000
2008 .....	1,975,000	65,000
<b>Total .....</b>	<b>3,735,000</b>	<b>175,000</b>

(ii) G's ending A/R Balance on December 31, 2008, is \$880,000. In 2008, G computes its uncollectible amount by using a three-year moving average under paragraph (f)(2) of this section. G's moving average nonaccrual-experience percentage is 4.7%, determined by dividing the sum of the amount of G's accounts receivable outstanding on January 1 of 2006, 2007, and 2008, that were determined to be bad debts (adjusted for recoveries allocable to the bad debts) on or before the corresponding determination date(s), by the sum of the amount of G's accounts receivable outstanding on January 1 of 2006, 2007, and 2008 (\$175,000/\$3,735,000 or 4.7%). G's uncollectible amount for 2008 is determined by multiplying this percentage by the balance of G's accounts receivable on December 31, 2008 (\$880,000 × 4.7% = \$41,360), and increasing this amount by 105% (\$41,360 × 105% = \$43,428). G may exclude \$43,428 from gross income for 2008.

*Example 6. Safe harbor 2: Single determination date (Option A).* H is eligible to use a nonaccrual-experience method and wishes to adopt the actual experience method of paragraph (f)(2) of this section. H elects to use a six-year applicable period consisting of the current and five immediately preceding taxable years. H also elects to use a single determination date in accordance with paragraph (f)(2)(i) of this section. H selects December 31, its taxable year-end, as its determination date. Since H is using a single determination date from the current taxable year, its determination date for the 2001–2006 applicable period is December 31, 2006. H has a \$800 charge-off in 2003 of an account receivable in the 2003 beginning accounts receivable balance. In 2005, H has a recovery of \$100 which is traceable, without undue burden, to the \$800 charge-off in 2003. Since the \$100 recovery occurred prior to H's December 31, 2006, determination date, it reduces the amount of H's bad debts in the numerator of the formula for purposes of determining H's moving average nonaccrual-experience percentage. In addition, H must include the \$100 recovery in income in 2005 (see paragraph (d)(5) of this section regarding recoveries).

*Example 7. Safe harbor 2: Multiple determination dates (Option B).* The facts are the same as in Example 6, except H elects to use multiple determination dates in accordance with

paragraph (f)(2)(ii) of this section. Consequently, H's determination date is December 31, 2001, for its calculations of the portion of the numerator relating to the 2001 taxable year, December 31, 2002, for its calculations of the portion of the numerator relating to the 2002 taxable year, and so on through the final taxable year (2006), which has a determination date of December 31, 2006. Since the \$100 recovery did not occur until after December 31, 2003 (the determination date for the 2003 taxable year), it does not reduce the amount of H's bad debts in the numerator of the formula for purposes of determining H's moving average nonaccrual-experience percentage. However, H still must include the \$100 recovery in income in 2005 (see paragraph (d)(5) of this section regarding recoveries).

*Example 8. Safe harbor 3: Modified Black Motor method.* (i) J uses the modified Black Motor method described in paragraph (f)(3) of this section and a six-year applicable period. J's total accounts receivable and bad debt experience for the 2006 taxable year and the five immediately preceding consecutive taxable years are as follows:

Taxable year	Accounts receivable at end of taxable year	Bad debts (adjusted for recoveries)
2001 .....	\$130,000	\$9,100
2002 .....	140,000	7,000
2003 .....	140,000	14,000
2004 .....	160,000	14,400
2005 .....	170,000	20,400
2006 .....	180,000	10,800
Total .....	920,000	75,700

(ii) J's modified Black Motor moving average percentage is 8.228% (\$75,700/\$920,000). If the accounts receivable generated and written off during the current taxable year are \$3,600, J's uncollectible amount is \$11,210, computed by multiplying J's accounts receivable on December 31, 2006 (\$180,000) by the modified Black Motor moving average percentage of 8.228% and reducing the resulting amount by \$3,600 (J's accounts receivable generated and written off during the 2006 taxable year). J may exclude \$11,210 from gross income for 2006.

*Example 9. Safe harbor 4: Modified moving average method.* (i) The facts are the same as in *Example 8*, except that the balances represent accounts receivable at the beginning of the taxable year, and J uses the modified moving average method described in paragraph (f)(4) of this section and a six-year applicable period. Furthermore, the accounts receivable that were written off in the same taxable year they were generated, adjusted for recoveries of bad debts during the period are as follows:

Taxable year	Accounts receivable written off in same taxable year as generated (adjusted for recoveries)
2001 .....	\$3,033
2002 .....	2,333
2003 .....	4,667
2004 .....	4,800
2005 .....	6,800
2006 .....	3,600
Total .....	25,233

(ii) J's modified moving average percentage is 5.486% (((\$75,700 - \$25,233)/\$920,000). J's uncollectible amount is \$9,875, computed by multiplying J's accounts receivable on December 31, 2006 (\$180,000) by the modified moving average percentage of 5.486%. J may exclude \$9,875 from gross income for 2006.

*Example 10. First-year self-test.* Beginning in 2006, K is eligible to use a nonaccrual-experience method and wants to adopt an alternative nonaccrual-experience method under paragraph (f)(5) of this section, and consequently is subject to the safe harbor comparison method of self-testing under paragraph (e)(3) of this section. K elects to self-test against safe harbor 1 for purposes of conducting its first-year self-test. K's uncollectible amount for 2006 is \$22,000. K's safe harbor uncollectible amount under safe harbor 1 is \$21,000. Because K's uncollectible amount for 2006 (\$22,000) is greater than the safe harbor uncollectible amount (\$21,000), K's alternative nonaccrual-experience method is treated as not clearly reflecting its nonaccrual experience for 2006. Accordingly, K must adopt either another nonaccrual-experience method that clearly reflects experience (subject to the self-testing requirements of paragraph (e)(2)(ii) of this section, or a safe harbor nonaccrual-experience method described in paragraph (f)(1) (revenue-based moving average), (f)(2) (actual experience method), (f)(3) (modified Black Motor method), (f)(4) (modified moving average method) of this section, or another alternative nonaccrual-experience method under paragraph (f)(5) of this section that meets the self-testing requirements of paragraph (e)(3) of this section.

*Example 11. Three-year self-test.* The facts are the same as in *Example 10*, except that K's safe harbor uncollectible amount under safe harbor 1 for 2006 is also \$22,000. Consequently, K meets the first-year self-test requirement and may use its alternative nonaccrual-experience method. Subsequently, K's cumulative uncollectible amount for 2007 through 2009 is \$300,000. K's safe harbor uncollectible amount for 2007 through 2009 under its chosen safe harbor method for self-testing (safe harbor 1) is \$295,000. Because K's cumulative uncollectible amount for the

three-year test period (taxable years 2007 through 2009) is greater than its safe harbor uncollectible amount for the three-year test period (\$295,000), under paragraph (e)(3)(ii)(B) of this section, the \$5,000 excess of K's cumulative uncollectible amount over K's safe harbor uncollectible amount for the three-year test period must be recaptured into income in 2009 in accordance with paragraph (e)(3)(ii)(B) of this section. Since K's cumulative uncollectible amount for the three-year test period (\$300,000) is less than 110% of its safe harbor uncollectible amount ( $\$295,000 \times 110\% = \$324,500$ ), under paragraph (e)(3)(ii)(B) of this section, K may continue to use its alternative nonaccrual-experience method, subject to the three-year self-test requirement.

*Example 12. Subsequent worthlessness of year-end receivable.* The facts are the same as in *Example 4*, except that one of the accounts receivable outstanding at the end of 2002 was for \$8,000, and in 2003, under section 166, the entire amount of this receivable becomes wholly worthless. Because F does not accrue as income \$1,573 of this account receivable ( $\$8,000 \times .1967$ ) under the nonaccrual-experience method in 2002, under paragraph (d)(2) of this section F may not deduct this portion of the account receivable as a bad debt deduction under section 166 in 2003. F may deduct the remaining balance of the receivable in 2003 as a bad debt deduction under section 166 ( $\$8,000 - \$1,574 = \$6,426$ ).

*Example 13. Subsequent collection of year-end receivable.* The facts are the same as in *Example 4*. In 2007, F collects in full an account receivable of \$1,700 that was outstanding at the end of 2006. Under paragraph (d)(5) of this section, F must recognize additional gross income in 2007 equal to the portion of this receivable that F excluded from gross income in the prior taxable year ( $\$1,700 \times .1967 = \$334$ ). That amount (\$334) is a recovery under paragraph (d)(5) of this section.

(h) *Effective date.* This section is applicable for taxable years ending on or after August 31, 2006.

[T.D. 9285, 71 FR 52437, Sept. 6, 2006]

TAXABLE YEAR FOR WHICH ITEMS OF  
GROSS INCOME INCLUDED

**§ 1.451-1 General rule for taxable year of inclusion.**

(a) *General rule.* Gains, profits, and income are to be included in gross income for the taxable year in which they are actually or constructively received by the taxpayer unless includible for a different year in accordance with the taxpayer's method of accounting. Under an accrual method of accounting, income is includible in gross

income when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy. Therefore, under such a method of accounting if, in the case of compensation for services, no determination can be made as to the right to such compensation or the amount thereof until the services are completed, the amount of compensation is ordinarily income for the taxable year in which the determination can be made. Under the cash receipts and disbursements method of accounting, such an amount is includible in gross income when actually or constructively received. Where an amount of income is properly accrued on the basis of a reasonable estimate and the exact amount is subsequently determined, the difference, if any, shall be taken into account for the taxable year in which such determination is made. To the extent that income is attributable to the recovery of bad debts for accounts charged off in prior years, it is includible in the year of recovery in accordance with the taxpayer's method of accounting, regardless of the date when the amounts were charged off. For treatment of bad debts and bad debt recoveries, see sections 166 and 111 and the regulations thereunder. For rules relating to the treatment of amounts received in crop shares, see section 61 and the regulations thereunder. For the year in which a partner must include his distributive share of partnership income, see section 706(a) and paragraph (a) of § 1.706-1. If a taxpayer ascertains that an item should have been included in gross income in a prior taxable year, he should, if within the period of limitation, file an amended return and pay any additional tax due. Similarly, if a taxpayer ascertains that an item was improperly included in gross income in a prior taxable year, he should, if within the period of limitation, file claim for credit or refund of any overpayment of tax arising therefrom.

(b) *Special rule in case of death.* (1) A taxpayer's taxable year ends on the date of his death. See section 443(a)(2) and paragraph (a)(2) of § 1.443-1. In computing taxable income for such year, there shall be included only amounts

properly includible under the method of accounting used by the taxpayer. However, if the taxpayer used an accrual method of accounting, amounts accrued only by reason of his death shall not be included in computing taxable income for such year. If the taxpayer uses no regular accounting method, only amounts actually or constructively received during such year shall be included. (For rules relating to the inclusion of partnership income in the return of a decedent partner, see subchapter K, chapter 1 of the Code, and the regulations thereunder.)

(2) If the decedent owned an installment obligation the income from which was taxable to him under section 453, no income is required to be reported in the return of the decedent by reason of the transmission at death of such obligation. See section 453(d)(3). For the treatment of installment obligations acquired by the decedent's estate or by any person by bequest, devise, or inheritance from the decedent, see section 691(a)(4) and the regulations thereunder.

(c) *Special rule for employee tips.* Tips reported by an employee to his employer in a written statement furnished to the employer pursuant to section 6053(a) shall be included in gross income of the employee for the taxable year in which the written statement is furnished the employer. For provisions relating to the reporting of tips by an employee to his employer, see section 6053 and § 31.6053-1 of this chapter (Employment Tax Regulations).

(d) *Special rule for ratable inclusion of original issue discount.* For ratable inclusion of original issue discount in respect of certain corporate obligations issued after May 27, 1969, see section 1232(a)(3).

(e) *Special rule for inclusion of qualified tax refund effected by allocation.* For rules relating to the inclusion in income of an amount paid by a taxpayer in respect of his liability for a qualified State individual income tax and allocated or reallocated in such a manner as to apply it toward the taxpayer's liability for the Federal income tax, see paragraph (f)(1) of § 301.6361-1 of this chapter (Regulations on Procedure and Administration).

(f) *Timing of income from notional principal contracts.* For the timing of income with respect to notional principal contracts, see § 1.446-3.

(g) *Timing of income from section 467 rental agreements.* For the timing of income with respect to section 467 rental agreements, see section 467 and the regulations thereunder.

[T.D. 6500, 25 FR 11709, Nov. 26, 1960, as amended by T.D. 7001, 34 FR 997, Jan. 23, 1969; T.D. 7154, 36 FR 24996, Dec. 28, 1971; 43 FR 59357, Dec. 20, 1978; T.D. 8491, 58 FR 53135, Oct. 14, 1993; T.D. 8820, 64 FR 26851, May 18, 1999]

#### § 1.451-2 Constructive receipt of income.

(a) *General rule.* Income although not actually reduced to a taxpayer's possession is constructively received by him in the taxable year during which it is credited to his account, set apart for him, or otherwise made available so that he may draw upon it at any time, or so that he could have drawn upon it during the taxable year if notice of intention to withdraw had been given. However, income is not constructively received if the taxpayer's control of its receipt is subject to substantial limitations or restrictions. Thus, if a corporation credits its employees with bonus stock, but the stock is not available to such employees until some future date, the mere crediting on the books of the corporation does not constitute receipt. In the case of interest, dividends, or other earnings (whether or not credited) payable in respect of any deposit or account in a bank, building and loan association, savings and loan association, or similar institution, the following are not substantial limitations or restrictions on the taxpayer's control over the receipt of such earnings:

(1) A requirement that the deposit or account, and the earnings thereon, must be withdrawn in multiples of even amounts;

(2) The fact that the taxpayer would, by withdrawing the earnings during the taxable year, receive earnings that are not substantially less in comparison with the earnings for the corresponding period to which the taxpayer would be entitled had he left the account on deposit until a later date (for example, if an amount equal to

three months' interest must be forfeited upon withdrawal or redemption before maturity of a one year or less certificate of deposit, time deposit, bonus plan, or other deposit arrangement then the earnings payable on premature withdrawal or redemption would be substantially less when compared with the earnings available at maturity);

(3) A requirement that the earnings may be withdrawn only upon a withdrawal of all or part of the deposit or account. However, the mere fact that such institutions may pay earnings on withdrawals, total or partial, made during the last three business days of any calendar month ending a regular quarterly or semiannual earnings period at the applicable rate calculated to the end of such calendar month shall not constitute constructive receipt of income by any depositor or account holder in any such institution who has not made a withdrawal during such period;

(4) A requirement that a notice of intention to withdraw must be given in advance of the withdrawal. In any case when the rate of earnings payable in respect of such a deposit or account depends on the amount of notice of intention to withdraw that is given, earnings at the maximum rate are constructively received during the taxable year regardless of how long the deposit or account was held during the year or whether, in fact, any notice of intention to withdraw is given during the year. However, if in the taxable year of withdrawal the depositor or account holder receives a lower rate of earnings because he failed to give the required notice of intention to withdraw, he shall be allowed an ordinary loss in such taxable year in an amount equal to the difference between the amount of earnings previously included in gross income and the amount of earnings actually received. See section 165 and the regulations thereunder.

(b) *Examples of constructive receipt.* Amounts payable with respect to interest coupons which have matured and are payable but which have not been cashed are constructively received in the taxable year during which the coupons mature, unless it can be shown that there are no funds available for

payment of the interest during such year. Dividends on corporate stock are constructively received when unqualifiedly made subject to the demand of the shareholder. However, if a dividend is declared payable on December 31 and the corporation followed its usual practice of paying the dividends by checks mailed so that the shareholders would not receive them until January of the following year, such dividends are not considered to have been constructively received in December. Generally, the amount of dividends or interest credited on savings bank deposits or to shareholders of organizations such as building and loan associations or cooperative banks is income to the depositors or shareholders for the taxable year when credited. However, if any portion of such dividends or interest is not subject to withdrawal at the time credited, such portion is not constructively received and does not constitute income to the depositor or shareholder until the taxable year in which the portion first may be withdrawn. Accordingly, if, under a bonus or forfeiture plan, a portion of the dividends or interest is accumulated and may not be withdrawn until the maturity of the plan, the crediting of such portion to the account of the shareholder or depositor does not constitute constructive receipt. In this case, such credited portion is income to the depositor or shareholder in the year in which the plan matures. However, in the case of certain deposits made after December 31, 1970, in banks, domestic building and loan associations, and similar financial institutions, the ratable inclusion rules of section 1232(a)(3) apply. See § 1.1232-3A. Accrued interest on unwithdrawn insurance policy dividends is gross income to the taxpayer for the first taxable year during which such interest may be withdrawn by him.

[T.D. 6723, 29 FR 5342, Apr. 21, 1964, as amended by T.D. 7154, 36 FR 24997, Dec. 28, 1971; T.D. 7663, 44 FR 76782, Dec. 28, 1979]

**§ 1.451-4 Accounting for redemption of trading stamps and coupons.**

(a) *In general*—(1) *Subtraction from receipts.* If an accrual method taxpayer issues trading stamps or premium coupons with sales, or an accrual method

taxpayer is engaged in the business of selling trading stamps or premium coupons, and such stamps or coupons are redeemable by such taxpayer in merchandise, cash, or other property, the taxpayer should, in computing the income from such sales, subtract from gross receipts with respect to sales of such stamps or coupons (or from gross receipts with respect to sales with which trading stamps or coupons are issued) an amount equal to—

(i) The cost to the taxpayer of merchandise, cash, and other property used for redemptions in the taxable year,

(ii) Plus the net addition to the provision for future redemptions during the taxable year (or less the net subtraction from the provision for future redemptions during the taxable year).

(2) *Trading stamp companies.* For purposes of this section, a taxpayer will be considered as being in the business of selling trading stamps or premium coupons if—

(i) The trading stamps or premium coupons sold by him are issued by purchasers to promote the sale of their merchandise or services,

(ii) The principal activity of the trade or business is the sale of such stamps or coupons,

(iii) Such stamps or coupons are redeemable by the taxpayer for a period of at least 1 year from the date of sale, and

(iv) Based on his overall experience, it is estimated that not more than two-thirds of the stamps or coupons sold which it is estimated, pursuant to paragraph (c) of this section, will be ultimately redeemed, will be redeemed within 6 months of the date of sale.

(b) *Computation of the net addition to or subtraction from the provision for future redemptions—(1) Determination of the provision for future redemptions.* (i) The provision for future redemptions as of the end of a taxable year is computed by multiplying “estimated future redemptions” (as defined in subdivision (ii) of this subparagraph) by the estimated average cost of redeeming each trading stamp or coupon (computed in accordance with subdivision (iii) of this subparagraph).

(ii) For purposes of this section, the term “estimated future redemptions” as of the end of a taxable year means

the number of trading stamps or coupons outstanding as of the end of such year that it is reasonably estimated will ultimately be presented for redemption. Such estimate shall be determined in accordance with the rules contained in paragraph (c) of this section.

(iii) For purposes of this section, the estimated average cost of redeeming each trading stamp or coupon shall be computed by including only the costs to the taxpayer of acquiring the merchandise, cash, or other property needed to redeem such stamps or coupons. The term “the costs to the taxpayer of acquiring the merchandise, cash, or other property needed to redeem such stamps or coupons” includes only the price charged by the seller (less trade or other discounts, except strictly cash discounts approximating a fair interest rate, which may be deducted or not at the option of the taxpayer provided a consistent course is followed) plus transportation or other necessary charges in acquiring possession of the goods. Items such as the costs of advertising, catalogs, operating redemption centers, transporting merchandise or other property from a central warehouse to a branch warehouse (or from a warehouse to a redemption center), and storing the merchandise or other property used to redeem stamps or coupons should not be included in costs of redeeming stamps or premium coupons, but rather should be accounted for in accordance with the provisions of sections 162 and 263.

(2) *Changes in provision for future redemptions.* For purposes of this section, a “net addition to” or “net subtraction from” the provision for future redemptions for a taxable year is computed as follows:

(i) Carry over the provision for future redemptions (if any) as of the end of the preceding taxable year,

(ii) Compute the provision for future redemptions as of the end of the taxable year in accordance with subparagraph (1) of this paragraph, and

(iii) If the amount referred to in subdivision (ii) of this subparagraph exceeds the amount referred to in subdivision (i) of this subparagraph, such

**Internal Revenue Service, Treasury**

**§ 1.451-4**

excess is the net addition to the provision for future redemptions for the taxable year. On the other hand, if the amount referred to in such subdivision (i) exceeds the amount referred to in such subdivision (ii), such excess is the net subtraction from the provision for future redemptions for the taxable year.

(3) *Example.* The provisions of this paragraph and paragraph (a)(1) of this section may be illustrated by the following example:

*Example.* (a) X Company, a calendar year accrual method taxpayer, is engaged in the business of selling trading stamps to merchants. In 1971, its first year of operation, X sells 10 million stamps at \$5 per 1,000; it redeems 3 million stamps for merchandise and cash of an average value of \$3 per 1,000 stamps. At the end of 1971 it is estimated (pursuant to paragraph (c) of this section) that a total of 9 million stamps of the 10 million stamps issued in 1971 will eventually be presented for redemption. At this time it is estimated that the average cost of redeeming stamps (as described in subparagraph (1)(iii) of this paragraph) would continue to be \$3 per 1,000 stamps. Under these circumstances, X computes its gross income from sales of trading stamps as follows:

Gross receipts from sales (10 million stamps at \$5 per 1,000) .....	\$50,000
Less:	
Cost of actual redemptions (3 million stamps at \$3 per 1,000) .....	\$9,000
Provision for future redemptions on December 31, 1971 (9 million stamps - 3 million stamps × \$3 per 1,000) .....	18,000
	27,000
1971 gross income from sales of stamps .....	23,000

(b) In 1972, X also sells 10 million stamps at \$5 per 1,000 stamps. During 1972 X redeems 7 million stamps at an average cost of \$3.01 per 1,000 stamps. At the end of 1972 it is determined that the estimated future redemptions (within the meaning of subparagraph (1)(ii) of this paragraph) is 8 million. It is further determined that the estimated average cost of redeeming stamps would continue to be \$3.01 per 1,000 stamps. X thus computes its gross income from sales of trading stamps for 1972 as follows:

Gross receipts from sales (10 million stamps at \$5 per 1,000) .....	\$50,000
Less:	
Cost of actual redemptions (7 million stamps at \$3.01 per 1,000) ..	\$21,070
Plus:	
Provision for future redemptions on Dec. 31, 1972 (8 million stamps at \$3.01 per 1,000) .....	24,080

Minus provision for future redemptions on Dec. 31, 1971 .....	18,000
Addition to provision for future redemptions .....	6,080
Total cost of redemptions .....	27,150
1972 Gross income from sales of stamps .....	22,850

(c) *Estimated future redemptions*—(1) *In general.* A taxpayer may use any method of determining the estimated future redemptions as of the end of a year so long as—

(i) Such method results in a reasonably accurate estimate of the stamps or coupons outstanding at the end of such year that will ultimately be presented for redemption,

(ii) Such method is used consistently, and

(iii) Such taxpayer complies with the requirements of this paragraph and paragraphs (d) and (e) of this section.

(2) *Utilization of prior redemption experience.* Normally, the estimated future redemptions of a taxpayer shall be determined on the basis of such taxpayer's prior redemption experience. However, if the taxpayer does not have sufficient redemption experience to make a reasonable determination of his "estimated future redemptions," or if because of a change in his mode of operation or other relevant factors the determination cannot reasonably be made completely on the basis of the taxpayer's own experience, the experiences of similarly situated taxpayers may be used to establish an experience factor.

(3) *One method of determining estimated future redemptions.* One permissible method of determining the estimated future redemptions as of the end of the current taxable year is as follows:

(i) Estimate for each preceding taxable year and the current taxable year the number of trading stamps or coupons issued for each such year which will ultimately be presented for redemption.

(ii) Determine the sum of the estimates under subdivision (i) of this subparagraph for each taxable year prior to and including the current taxable year.

(iii) The difference between the sum determined under subdivision (ii) of

this subparagraph and the total number of trading stamps or coupons which have already been presented for redemption is the estimated future redemptions as of the end of the current taxable year.

(4) *Determination of an "estimated redemption percentage."* For purposes of applying subparagraph (3)(i) of this paragraph, one permissible method of estimating the number of trading stamps or coupons issued for a taxable year that will ultimately be presented for redemption is to multiply such number of stamps issued for such year by an "estimated redemption percentage." For purposes of this section the term "estimated redemption percentage" for a taxable year means a fraction, the numerator of which is the number of trading stamps or coupons issued during a taxable year that it is reasonably estimated will ultimately be redeemed, and the denominator of which is the number of trading stamps or coupons issued during such year. Consequently, the product of such percentage and the number of stamps issued for such year equals the number of trading stamps or coupons issued for such year that it is estimated will ultimately be redeemed.

(5) *Five-year rule.* (i) One permissible method of determining the "estimated redemption percentage" for a taxable year is to—

(a) Determine the percentage which the total number of stamps or coupons redeemed in the taxable year and the 4 preceding taxable years is of the total number of stamps or coupons issued or sold in such 5 years; and

(b) Multiply such percentage by an appropriate growth factor as determined pursuant to guidelines published by the Commissioner.

(ii) If a taxpayer uses the method described in subdivision (i) of this subparagraph for a taxable year, it will normally be presumed that such taxpayer's "estimated redemption percentage" is reasonably accurate.

(6) *Other methods of determining estimated future redemptions.* (i) If a taxpayer uses a method of determining his "estimated future redemptions" (other than a method which applies the 5-year rule as described in subparagraph (5)(i) of this paragraph) such as a probability

sampling technique, the appropriateness of the method (including the appropriateness of the sampling technique, if any) and the accuracy and reliability of the results obtained must, if requested, be demonstrated to the satisfaction of the district director.

(ii) No inference shall be drawn from subdivision (i) of this subparagraph that the use of any method to which such subdivision applies is less acceptable than the method described in subparagraph (5)(i) of this paragraph. Therefore, certain probability sampling techniques used in determining estimated future redemptions may result in reasonably accurate and reliable estimates. Such a sampling technique will be considered appropriate if the sample is—

(a) Taken in accordance with sound statistical sampling principles,

(b) In accordance with such principles, sufficiently broad to produce a reasonably accurate result, and

(c) Taken with sufficient frequency as to produce a reasonably accurate result.

In addition, if the sampling technique is appropriate, the results obtained therefrom in determining estimated future redemptions will be considered accurate and reliable if the evaluation of such results is consistent with sound statistical principles. Ordinarily, samplings and recomputations of the estimated future redemptions will be required annually. However, the facts and circumstances in a particular case may justify such a recomputation being taken less frequently than annually. In addition, the Commissioner may prescribe procedures indicating that samples made to update the results of a sample of stamps redeemed in a prior year need not be the same size as the sample of such prior year.

(d) *Consistency with financial reporting*—(1) *Estimated future redemptions.* For taxable years beginning after August 22, 1972, the estimated future redemptions must be no greater than the estimate that the taxpayer uses for purposes of all reports (including consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes.

(2) *Average cost of redeeming stamps.* For taxable years beginning after August 22, 1972, the estimated average cost of redeeming each stamp or coupon must be no greater than the average cost of redeeming each stamp or coupon (computed in accordance with paragraph (b)(1)(iii) of this section) that the taxpayer uses for purposes of all reports (including consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes.

(e) *Information to be furnished with return*—(1) *In general.* For taxable years beginning after August 22, 1972, a taxpayer described in paragraph (a) of this section who uses a method of determining the “estimated future redemptions” other than that described in paragraph (c)(5)(i) of this section shall file a statement with his return showing such information as is necessary to establish the correctness of the amount subtracted from gross receipts in the taxable year.

(2) *Taxpayers using the 5-year rule.* If a taxpayer uses the method of determining estimated future redemptions described in paragraph (c)(5)(i) of this section, he shall file a statement with his return showing, with respect to the taxable year and the 4 preceding taxable years—

(i) The total number of stamps or coupons issued or sold during each year, and

(ii) The total number of stamps or coupons redeemed in each such year.

(3) *Trading stamp companies.* In addition to the information required by subparagraph (1) or (2) of this paragraph, a taxpayer engaged in the trade or business of selling trading stamps or premium coupons shall include with the statement described in subparagraph (1) or (2) of this paragraph such information as may be necessary to satisfy the requirements of paragraph (a)(2)(iv) of this section.

[T.D. 7201, 37 FR 16911, Aug. 23, 1972, as amended by T.D. 7201, 37 FR 18617, Sept. 14, 1972]

**§ 1.451-5 Advance payments for goods and long-term contracts.**

(a) *Advance payment defined.* (1) For purposes of this section, the term “advance payment” means any amount

which is received in a taxable year by a taxpayer using an accrual method of accounting for purchases and sales or a long-term contract method of accounting (described in § 1.451-3), pursuant to, and to be applied against, an agreement:

(i) For the sale or other disposition in a future taxable year of goods held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business, or

(ii) For the building, installing, constructing or manufacturing by the taxpayer of items where the agreement is not completed within such taxable year.

(2) For purposes of subparagraph (1) of this paragraph:

(i) The term “agreement” includes (a) a gift certificate that can be redeemed for goods, and (b) an agreement which obligates a taxpayer to perform activities described in subparagraph (1)(i) or (ii) of this paragraph and which also contains an obligation to perform services that are to be performed as an integral part of such activities; and

(ii) Amounts due and payable are considered “received”.

(3) If a taxpayer (described in subparagraph (1) of this paragraph) receives an amount pursuant to, and to be applied against, an agreement that not only obligates the taxpayer to perform the activities described in subparagraph (1) (i) and (ii) of this paragraph, but also obligates the taxpayer to perform services that are not to be performed as an integral part of such activities, such amount will be treated as an “advance payment” (as defined in subparagraph (1) of this paragraph) only to the extent such amount is properly allocable to the obligation to perform the activities described in subparagraph (1) (i) and (ii) of this paragraph. The portion of the amount not so allocable will not be considered an “advance payment” to which this section applies. If, however, the amount not so allocable is less than 5 percent of the total contract price, such amount will be treated as so allocable except that such treatment cannot result in delaying the time at which the taxpayer would otherwise accrue the amounts attributable to the activities

described in subparagraph (1) (i) and (ii) of this paragraph.

(b) *Taxable year of inclusion*—(1) *In general.* Advance payments must be included in income either—

- (i) In the taxable year of receipt; or
- (ii) Except as provided in paragraph (c) of this section.

(a) In the taxable year in which properly accruable under the taxpayer's method of accounting for tax purposes if such method results in including advance payments in gross receipts no later than the time such advance payments are included in gross receipts for purposes of all of his reports (including consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes, or

(b) If the taxpayer's method of accounting for purposes of such reports results in advance payments (or any portion of such payments) being included in gross receipts earlier than for tax purposes, in the taxable year in which includible in gross receipts pursuant to his method of accounting for purposes of such reports.

(2) *Examples.* This paragraph may be illustrated by the following examples:

*Example 1.* S, a retailer who uses for tax purposes and for purposes of the reports referred to in subparagraph (1)(i)(a) of this paragraph, an accrual method of accounting under which it accounts for its sales of goods when the goods are shipped, receives advance payments for such goods. Such advance payments must be included in gross receipts for tax purposes either in the taxable year the payments are received or in the taxable year such goods are shipped (except as provided in paragraph (c) of this section).

*Example 2.* T, a manufacturer of household furniture, is a calendar year taxpayer who uses an accrual method of accounting pursuant to which income is accrued when furniture is shipped for purposes of its financial reports (referred to in subparagraph (1)(i)(a) of this paragraph) and an accrual method of accounting pursuant to which the income is accrued when furniture is delivered and accepted for tax purposes. See § 1.446-1(c)(1)(ii). In 1974, T receives an advance payment of \$8,000 from X with respect to an order of furniture to be manufactured for X for a total price of \$20,000. The furniture is shipped to X in December 1974, but it is not delivered to and accepted by X until January 1975. As a result of this contract, T must include the entire advance payment in its gross income for tax purposes in 1974 pursuant to subpara-

graph (1)(i)(b) of this paragraph. T must include the remaining \$12,000 of the gross contract price in its gross income in 1975 for tax purposes.

(3) *Long-term contracts.* In the case of a taxpayer accounting for advance payments for tax purposes pursuant to a long-term contract method of accounting under § 1.460-4, or of a taxpayer accounting for advance payments with respect to a long-term contract pursuant to an accrual method of accounting referred to in the succeeding sentence, advance payments shall be included in income in the taxable year in which properly included in gross receipts pursuant to such method of accounting (without regard to the financial reporting requirement contained in subparagraph (1)(i)(a) or (b) of this paragraph). An accrual method of accounting to which the preceding sentence applies shall consist of any method of accounting under which the income is accrued when, and costs are accumulated until, the subject matter of the contract (or, if the subject matter of the contract consists of more than one item, an item) is shipped, delivered, or accepted.

(4) *Installment method.* The financial reporting requirement of subparagraph (1)(i)(a) or (b) of this paragraph shall not be construed to prevent the use of the installment method under section 453. See § 1.446-1(c)(1)(ii).

(c) *Exception for inventoriable goods.* (1)(i) If a taxpayer receives an advance payment in a taxable year with respect to an agreement for the sale of goods properly includible in his inventory, or with respect to an agreement (such as a gift certificate) which can be satisfied with goods or a type of goods that cannot be identified in such taxable year, and on the last day of such taxable year the taxpayer—

(a) Is accounting for advance payments pursuant to a method described in paragraph (b)(1)(ii) of this section for tax purposes,

(b) Has received "substantial advance payments" (as defined in subparagraph (3) of this paragraph) with respect to such agreement, and

(c) Has on hand (or available to him in such year through his normal source

of supply) goods of substantially similar kind and in sufficient quantity to satisfy the agreement in such year,

then all advance payments received with respect to such agreement by the last day of the second taxable year following the year in which such substantial advance payments are received, and not previously included in income in accordance with the taxpayer's accrual method of accounting, must be included in income in such second taxable year.

(ii) If advance payments are required to be included in income in a taxable year solely by reason of subdivision (i) of this subparagraph, the taxpayer must take into account in such taxable year the costs and expenditures included in inventory at the end of such year with respect to such goods (or substantially similar goods) on hand or, if no such goods are on hand by the last day of such second taxable year, the estimated cost of goods necessary to satisfy the agreement.

(iii) Subdivision (ii) of this subparagraph does not apply if the goods or type of goods with respect to which the advance payment is received are not identifiable in the year the advance payments are required to be included in income by reason of subdivision (i) of this subparagraph (for example, where an amount is received for a gift certificate).

(2) If subparagraph (1)(i) of this paragraph is applicable to advance payments received with respect to an agreement, any advance payments received with respect to such agreement subsequent to such second taxable year must be included in gross income in the taxable year of receipt. To the extent estimated costs of goods are taken into account in a taxable year pursuant to subparagraph (1)(ii) of this paragraph, such costs may not again be taken into account in another year. In addition, any variances between the costs or estimated costs taken into account pursuant to subparagraph (1)(ii) of this paragraph and the costs actually incurred in fulfilling the taxpayer's obligations under the agreement must be taken into account as an adjustment to the cost of goods sold in the year the taxpayer completes his obligations under such agreement.

(3) For purposes of subparagraph (1) of this paragraph, a taxpayer will be considered to have received "substantial advance payments" with respect to an agreement by the last day of a taxable year if the advance payments received with respect to such agreement during such taxable year plus the advance payments received prior to such taxable year pursuant to such agreement, equal or exceed the total costs and expenditures reasonably estimated as includible in inventory with respect to such agreement. Advance payments received in a taxable year with respect to an agreement (such as a gift certificate) under which the goods or type of goods to be sold are not identifiable in such year shall be treated as "substantial advance payments" when received.

(4) The application of this paragraph is illustrated by the following example:

*Example.* In 1971, X, a calendar year accrual method taxpayer, enters into a contract for the sale of goods (properly includible in X's inventory) with a total contract price of \$100. X estimates that his total inventoriable costs and expenditures for the goods will be \$50. X receives the following advance payments with respect to the contract:

1971 .....	\$35
1972 .....	20
1973 .....	15
1974 .....	10
1975 .....	10
1976 .....	10

The goods are delivered pursuant to the customer's request in 1977. X's closing inventory for 1972 of the type of goods involved in the contract is sufficient to satisfy the contract. Since advance payments received by the end of 1972 exceed the inventoriable costs X estimates that he will incur, such payments constitute "substantial advance payments". Accordingly, all payments received by the end of 1974, the end of the second taxable year following the taxable year during which "substantial advance payments" are received, are includible in gross income for 1974. Therefore, for taxable year 1974 X must include \$30 in his gross income. X must include in his cost of goods sold for 1974 the cost of such goods (or similar goods) on hand or, if no such goods are on hand, the estimated inventoriable costs necessary to satisfy the contract. Since no further deferral is allowable for such contract, X must include in his gross income for the remaining years of the contract, the advance payment received each year. Any variance between estimated costs and the costs actually incurred in fulfilling the contract is to be taken into

## § 1.451-6

## 26 CFR Ch. I (4-1-17 Edition)

account in 1977, when the goods are delivered. See paragraph (c)(2) of this section.

(d) *Information schedule.* If a taxpayer accounts for advance payments pursuant to paragraph (b)(1)(ii) of this section, he must attach to his income tax return for each taxable year to which such provision applies an annual information schedule reflecting the total amount of advance payments received in the taxable year, the total amount of advance payments received in prior taxable years which has not been included in gross income before the current taxable year, and the total amount of such payments received in prior taxable years which has been included in gross income for the current taxable year.

(e) *Adoption of method.* (1) For taxable years ending on or after December 31, 1969, and before January 1, 1971, a taxpayer (even if he has already filed an income tax return for a taxable year ending within such period) may secure the consent of the Commissioner to change his method of accounting for such year to a method prescribed in paragraph (b)(1)(ii) of this section in the manner prescribed in section 446 and the regulations thereunder, if an application to secure such consent is filed on Form 3115 within 180 days after March 23, 1971.

(2) A taxpayer who is already reporting his income in accordance with a method prescribed in paragraph (b)(1)(ii)(a) of this section need not secure the consent of the Commissioner to continue to utilize this method. However, such a taxpayer, for all taxable years ending after March 23, 1971, must comply with the requirements of paragraphs (b)(1)(ii)(a) (including the financial reporting requirement) and (d) (relating to an annual information schedule) of this section.

(f) *Cessation of taxpayer's liability.* If a taxpayer has adopted a method prescribed in paragraph (b)(1)(ii) of this section, and if in a taxable year the taxpayer dies, ceases to exist in a transaction other than one to which section 381(a) applies, or his liability under the agreement otherwise ends, then so much of the advance payment as was not includible in his gross income in preceding taxable years shall

be included in his gross income for such taxable year.

(g) *Special rule for certain transactions concerning natural resources.* A transaction which is treated as creating a mortgage loan pursuant to section 636 and the regulations thereunder rather than as a sale shall not be considered a "sale or other disposition" within the meaning of paragraph (a)(1) of this section. Consequently, any payment received pursuant to such a transaction, which payment would otherwise qualify as an "advance payment", will not be treated as an "advance payment" for purposes of this section.

[T.D. 7103, 36 FR 5495, Mar. 24, 1971, as amended by T.D. 7397, 41 FR 2641, Jan. 19, 1976; T.D. 8067, 51 FR 393, Jan. 6, 1986; T.D. 8929, 66 FR 2224, Jan. 11, 2001]

### **§ 1.451-6 Election to include crop insurance proceeds in gross income in the taxable year following the taxable year of destruction or damage.**

(a) *In general.* (1) For taxable years ending after December 30, 1969, a taxpayer reporting gross income on the cash receipts and disbursements method of accounting may elect to include insurance proceeds received as a result of the destruction of, or damage to, crops in gross income for the taxable year following the taxable year of the destruction or damage, if the taxpayer establishes that, under the taxpayer's normal business practice, the income from those crops would have been included in gross income for any taxable year following the taxable year of the destruction or damage. However, if the taxpayer receives the insurance proceeds in the taxable year following the taxable year of the destruction or damage, the taxpayer shall include the proceeds in gross income for the taxable year of receipt without having to make an election under section 451(d) and this section. For the purposes of this section only, federal payments received as a result of destruction or damage to crops caused by drought, flood, or any other natural disaster, or the inability to plant crops because of such a natural disaster, shall be treated as insurance proceeds received as a result of destruction or damage to crops. The

preceding sentence shall apply to payments that are received by the taxpayer after December 31, 1973.

(2) In the case of a taxpayer who receives insurance proceeds as a result of the destruction of, or damage to, two or more specific crops, if such proceeds may, under section 451(d) and this section, be included in gross income for the taxable year following the taxable year of such destruction or damage, and if such taxpayer makes an election under section 451(d) and this section with respect to any portion of such proceeds, then such election will be deemed to cover all of such proceeds which are attributable to crops representing a single trade or business under section 446(d). A separate election must be made with respect to insurance proceeds attributable to each crop which represents a separate trade or business under section 446(d).

(b)(1) *Time and manner of making election.* The election to include in gross income insurance proceeds received as a result of destruction of, or damage to, the taxpayer's crops in the taxable year following the taxable year of such destruction or damage shall be made by means of a statement attached to the taxpayer's return (or an amended return) for the taxable year of destruction or damage. The statement shall include the name and address of the taxpayer (or his duly authorized representative), and shall set forth the following information:

(i) A declaration that the taxpayer is making an election under section 451(d) and this section;

(ii) Identification of the specific crop or crops destroyed or damaged;

(iii) A declaration that under the taxpayer's normal business practice the income derived from the crops which were destroyed or damaged would have been included in this gross income for a taxable year following the taxable year of such destruction or damage;

(iv) The cause of destruction or damage of crops and the date or dates on which such destruction or damage occurred;

(v) The total amount of payments received from insurance carriers, itemized with respect to each specific crop and with respect to the date each payment was received;

(vi) The name(s) of the insurance carrier or carriers from whom payments were received.

(2) *Scope of election.* Once made, an election under section 451(d) is binding for the taxable year for which made unless the district director consents to a revocation of such election. Requests for consent to revoke an election under section 451(d) shall be made by means of a letter to the district director for the district in which the taxpayer is required to file his return, setting forth the taxpayer's name, address, and identification number, the year for which it is desired to revoke the election, and the reasons therefor.

[T.D. 7097, 36 FR 5215, Mar. 18, 1971, as amended by T.D. 7526, 42 FR 64624, Dec. 27, 1977; T.D. 8429, 57 FR 38595, Aug. 26, 1992]

**§ 1.451-7 Election relating to livestock sold on account of drought.**

(a) *In general.* Section 451(e) provides that for taxable years beginning after December 31, 1975, a taxpayer whose principal trade or business is farming (within the meaning of § 6420 (c)(3)) and who reports taxable income on the cash receipts and disbursements method of accounting may elect to defer for one year a certain portion of income. The income which may be deferred is the amount of gain realized during the taxable year from the sale or exchange of that number of livestock sold or exchanged solely on account of a drought which caused an area to be designated as eligible for assistance by the Federal Government (regardless of whether the designation is made by the President or by an agency or department of the Federal Government). That number is equal to the excess of the number of livestock sold or exchanged over the number which would have been sold or exchanged had the taxpayer followed its usual business practices in the absence of such drought. For example, if in the past it has been a taxpayer's practice to sell or exchange annually 400 head of beef cattle but due to qualifying drought conditions 550 head were sold in a given taxable year, only income from the sale of 150 head may qualify for deferral under this section. The election is not available with respect to livestock described in section 1231(b)(3) (relating to cattle, horses

(and other livestock) held by the taxpayer for 24 months (12 months) and used for draft, breeding, dairy, or sporting purposes).

(b) *Usual business.* The determination of the number of animals which a taxpayer would have sold if it had followed its usual business practice in the absence of drought will be made in light of all facts and circumstances. In the case of taxpayers who have not established a usual business practice, reliance will be placed upon the usual business practice of similarly situated taxpayers in the same general region as the taxpayer.

(c) *Special rules*—(1) *Connection with drought area.* To qualify under section 451(e) and this section, the livestock need not be raised, and the sale or exchange need not take place, in a drought area. However, the sale or exchange of the livestock must occur solely on account of drought conditions, the existence of which affected the water, grazing, or other requirements of the livestock so as to necessitate their sale or exchange.

(2) *Sale prior to designation of area as eligible for Federal assistance.* The provisions of this section will apply regardless of whether all or a portion of the excess number of animals were sold or exchanged before an area becomes eligible for Federal assistance, so long as the drought which caused such dispositions also caused the area to be designated as eligible for Federal assistance.

(d) *Classifications of livestock with respect to which the election may be made.* The election to have the provisions of section 451(e) apply must be made separately for each broad generic classification of animals (e.g., hogs, sheep, cattle) for which the taxpayer wishes the provisions to apply. Separate elections shall not be made solely by reason of the animals' age, sex, or breed.

(e) *Computation*—(1) *Determination of amount deferred.* The amount of income which may be deferred for a classification of livestock pursuant to this section shall be determined in the following manner. The total amount of income realized from the sale or exchange of all livestock in the classification during the taxable year shall be divided by the total number of all

such livestock sold. The resulting quotient shall then be multiplied by the excess number of such livestock sold on account of drought.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

*Example.* A, a calendar year taxpayer, normally sells 100 head of beef cattle a year. As the result of drought conditions existing during 1976, A sells 135 head during that year. A realizes \$35,100 of income from the sale of the 135 head. On August 9, 1976, as a result of the drought, the affected area was declared a disaster area thereby eligible for Federal assistance. The amount of income which A may defer until 1977, presuming the other provisions of this section are met, is determined as follows:

\$35,100 (total income from sales of beef cattle)/135 (total number of beef cattle sold) × 35 (excess number of beef cattle sold, i.e. 135 - 100) = \$9,100 (amount which A may defer until 1977)

(f) *Successive elections.* If a taxpayer makes an election under section 451(e) for successive years, the amount deferred from one year to the next year shall not be deemed to have been received from the sale or exchange of livestock during the later year. In addition, in determining the taxpayer's normal business practice for the later year, earlier years for which an election under section 451(e) was made shall not be considered.

(g) *Time and manner of making election.* The election provided for in this section must be made by the later of (1) the due date for filing the income tax return (determined with regard to any extensions of time granted the taxpayer for filing such return) for the taxable year in which the early sale of livestock occurs, or (2) (the 90th day after the date these regulations are published as a Treasury decision in the FEDERAL REGISTER). The election must be made separately for each taxable year to which it is to apply. It must be made by attaching a statement to the return or an amended return for such taxable year. The statement shall include the name and address of the taxpayer and shall set forth the following information for each classification of livestock for which the election is made:

(1) A declaration that the taxpayer is making an election under section 451(e);

(2) Evidence of the existence of the drought conditions which forced the early sale or exchange of the livestock and the date, if known, on which an area was designated as eligible for assistance by the Federal Government as a result of the drought conditions.

(3) A statement explaining the relationship of the drought area to the taxpayer's early sale or exchange of the livestock;

(4) The total number of animals sold in each of the three preceding years;

(5) The number of animals which would have been sold in the taxable year had the taxpayer followed its normal business practice in the absence of drought;

(6) The total number of animals sold, and the number sold on account of drought, during the taxable year; and

(7) A computation, pursuant to paragraph (e) of this section, of the amount of income to be deferred for each such classification.

(h) *Revocation of election.* Once an election under this section is made for a taxable year, it may be revoked only with the approval of the Commissioner.

(i) *Cross reference.* For provisions relating to the involuntary conversion of livestock sold on account of drought see section 1033(e) and the regulations thereunder.

[T.D. 7526, 42 FR 64624, Dec. 27, 1977]

**§§ 1.453-1—1.453-2 [Reserved]**

**§ 1.453-3 Purchaser evidences of indebtedness payable on demand or readily tradable.**

(a) *In general.* A bond or other evidence of indebtedness (hereinafter in this section referred to as an obligation) issued by any person and payable on demand shall not be treated as an evidence of indebtedness of the purchaser in applying section 453(b) to a

sale or other disposition of real property or to a casual sale or other casual disposition of personal property. In addition, an obligation issued by a corporation or a government or political subdivision thereof—

(1) With interest coupons attached (whether or not the obligation is readily tradable in an established securities market),

(2) In registered form (other than an obligation issued in registered form which the taxpayer establishes will not be readily tradable in an established securities market), or

(3) In any other form designed to render such obligation readily tradable in an established securities market shall not be treated as an evidence of indebtedness of the purchaser in applying section 453(b) to a sale or other disposition of real property or to a casual sale or other casual disposition of personal property. For purposes of this section, an obligation is to be considered in registered form if it is registered as to principal, interest, or both and if its transfer must be effected by the surrender of the old instrument and either the reissuance by the corporation of the old instrument to the new holder or the issuance by the corporation of a new instrument to the new holder.

(b) *Treatment as payment.* If under section 453(b)(3) an obligation is not treated as an evidence of indebtedness of the purchaser, then—

(1) For purposes of determining whether the payments received in the taxable year of the sale or disposition exceed 30 percent of the selling price, and

(2) For purposes of returning income on the installment method during the taxable year of the sale or disposition or in a subsequent taxable year, the receipt by the seller of such obligation shall be treated as a payment. The rules stated in this paragraph may be illustrated by the following examples:

$$\frac{\begin{array}{l} \$250,000 \text{ payment (i.e., 250 of} \\ \text{corporation Y's registered bonds} \\ \text{each with a principal amount and} \\ \text{fair market value of \$1,000)} \end{array}}{\begin{array}{l} \$1 \text{ million selling price (i.e.,} \\ \$250,000 \text{ of corporation Y's} \\ \text{registered bonds plus} \\ \text{promissory note of \$750,000)} \end{array}} = 25 \text{ percent}$$

*Example 1.* On July 1, 1970, A, an individual on the cash method of accounting reporting on a calendar year basis, transferred all of his stock in corporation X (traded on an established securities market and having a fair market value of \$1 million) to corporation Y in exchange for 250 of corporation Y's registered bonds (which are traded in an over-the-counter bond market) each with a principal amount and fair market value of \$1,000 (with interest payable at the rate of 8 percent per year), and Y's unsecured promissory note, with a principal amount of \$750,000. At the time of such exchange A's basis in the corporation X stock is \$900,000. The promissory note is payable at the rate of \$75,000 annually, due on July 1, of each year following 1970, until the principal balance is paid. The note provides for the payment of interest at the rate of 10 percent per year also payable on July 1 of each year. Under the rule stated in subparagraph (1) of this paragraph, the 250 registered bonds of corporation Y are treated as a payment for purposes of the 30 percent test described in section 453(b)(2)(A)(ii). The payment on account of the bonds equals 25 percent of the selling price determined as follows:

Since the payments received in the taxable year of the sale do not exceed 30 percent of the selling price and the sales price exceeds \$1,000, A may report the income received on the sale of his corporation X stock on the installment method. A elects to report the income on the installment method. The gross profit to be realized when the corporation X stock is fully paid for is 10 percent of the total contract price, computed as follows: \$100,000 gross profit (i.e., \$1 million contract price less \$900,000 basis in corporation X stock) over \$1 million contract price. However, since subparagraph (2) of this paragraph also treats the 250 corporation Y registered bonds as a payment for purposes of reporting income, A must include \$25,000 (i.e., 10 percent times \$250,000) in his gross income for calendar year 1970, the taxable year of sale.

*Example 2.* Assume the same facts as in Example 1. Assume further that on July 1, 1971, corporation Y makes its first installment payment to A under the terms of the unsecured promissory note with 75 more of its

\$1,000 registered bonds. A must include \$7,500 (i.e., 10 percent gross profit percentage times \$75,000) in his gross income for calendar year 1971. In addition, A includes the interest payment made by corporation Y on July 1, in his gross income for 1971.

(c) *Payable on demand.* Under section 453(b)(3), an obligation shall be treated as payable on demand only if the obligation is treated as payable on demand under applicable state or local law.

(d) *Designed to be readily tradable in an established securities market—(1) In general.* Obligations issued by a corporation or government or political subdivision thereof will be deemed to be in a form designed to render such obligations readily tradable in an established securities market if—

(i) Steps necessary to create a market for them are taken at the time of issuance (or later, if taken pursuant to an expressed or implied agreement or understanding which existed at the time of issuance),

(ii) If they are treated as readily tradable in an established securities market under subparagraph (2) of this paragraph, or

(iii) If they are convertible obligations to which paragraph (e) of this section applies.

(2) *Readily tradable in an established securities market.* An obligation will be treated as readily tradable in an established securities market if—

(i) The obligation is part of an issue or series of issues which are readily tradable in an established securities market, or

(ii) The corporation issuing the obligation has other obligations of a comparable character which are described in subdivision (i) of this subparagraph. For purposes of subdivision (ii) of this subparagraph, the determination as to whether there exist obligations of a

comparable character depends upon the particular facts and circumstances. Factors to be considered in making such determination include, but are not limited to, substantial similarity with respect to the presence and nature of security for the obligation, the number of obligations issued (or to be issued), the number of holders of such obligation, the principal amount of the obligation, and other relevant factors.

(3) *Readily tradable.* For purposes of subparagraph (2)(i) of this paragraph, an obligation shall be treated as readily tradable if it is regularly quoted by brokers or dealers making a market in such obligation or is part of an issue a portion of which is in fact traded in an established securities market.

(4) *Established securities market.* For purposes of this paragraph, the term established securities market includes (i) a national securities exchange which is registered under section 6 of the Securities and Exchange Act of 1934 (15 U.S.C. 78f), (ii) an exchange which is exempted from registration under section 5 of the Securities Exchange Act of 1935 (15 U.S.C. 78e) because of its limited volume of transactions, and (iii) any over-the-counter market. For purposes of this subparagraph, an over-the-counter market is reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of obligations by identified brokers or dealers, other than a quotation sheet prepared and distributed by a broker or dealer in the regular course of his business and containing only quotations of such broker or dealer.

(5) *Examples.* The rules stated in this paragraph may be illustrated by the following examples:

*Example 1.* On June 1, 1971, 25 individuals owning equal interests in a tract of land with a fair market value of \$1 million sell the land to corporation Y. The \$1 million sales price is represented by 25 bonds issued by corporation Y each having a face value of \$40,000. The bonds are not in registered form and do not have interest coupons attached, and, in addition, are payable in 120 equal installments each due on the first business day of each month. In addition, the bonds are negotiable and may be assigned by the holder to any other person. However, the bonds are

not quoted by any brokers or dealers who deal in corporate bonds, and, furthermore, there are no comparable obligations of corporation Y (determined with reference to the characteristics set forth in subparagraph (2) of this paragraph) which are so quoted. Therefore, the bonds are not treated as readily tradable in an established securities market. In addition, under the particular facts and circumstances stated, the bonds will not be considered to be in a form designed to render them readily tradeable in an established securities market. Since the bonds are not in registered form, do not have coupons attached, are not in a form designed to render them readily tradable in an established securities market, the receipt of such bonds by the holder is not treated as a payment for purposes of section 453(b), notwithstanding that they are freely assignable.

*Example 2.* On April 1, 1972, corporation M purchases in a casual sale of personal property a fleet of trucks from corporation N in exchange for corporation M's negotiable notes, not in registered form and without coupons attached. The corporation M notes are comparable to earlier notes issued by corporation M, which notes are quoted in the Eastern Bond section of the National daily quotation sheet, which is an interdealer quotation system. Both issues of notes are unsecured, held by more than 100 holders, have a maturity date of more than 5 years, and were issued for a comparable principal amount. On the basis of these similar characteristics it appears that the latest notes will also be readily tradable. Since an interdealer system reflects an over-the-counter market, the earlier notes are treated as readily tradable in an established securities market. Since the later notes are obligations comparable to the earlier ones, which are treated as readily tradable in an established securities market, the later notes are also treated as readily tradable in an established securities market (whether or not such notes are actually traded).

(e) *Special rule for convertible securities—(1) General rule.* For purposes of paragraph (d)(1) of this section, if an obligation contains a right whereby the holder of such obligation may convert it directly or indirectly into another obligation which would be treated as a payment under paragraph (b) of this section or may convert it directly or indirectly into stock which would be treated as readily tradable or designed to be readily tradable in an established securities market under paragraph (d) of this section, the convertible obligation shall be considered to be in a form designed to render such obligation

readily tradable in an established securities market unless such obligation is convertible only at a substantial discount. In determining whether the stock or obligation, into which an obligation is convertible, is readily tradable or designed to be readily tradable in an established securities market, the rules stated in paragraph (d) of this section shall apply, and for purposes of such paragraph (d) if such obligation is convertible into stock then the term "stock" shall be substituted for the term "obligation" wherever it appears in such paragraph (d).

(2) *Substantial discount rule.* Whether an obligation is convertible at a substantial discount depends upon the particular facts and circumstances. A substantial discount shall be considered to exist if at the time the convertible obligation is issued, the fair market value of the stock or obligation into which the obligation is convertible is less than 80 percent of the fair market value of the obligation (determined by taking into account all relevant factors, including proper discount to reflect the fact that the convertible obligation is not readily tradable in an established securities market and any additional consideration required to be paid by the taxpayer). Also, if a privilege to convert an obligation into stock or an obligation which is readily tradable in an established securities market may not be exercised within a period of 1 year from the date the obligation is issued, a substantial discount shall be considered to exist.

(f) *Effective date.* The provisions of this section shall apply to sales or other dispositions occurring after May 27, 1969, which are not made pursuant to a binding written contract entered into on or before such date. No inference shall be drawn from this section as to any question of law concerning the application of section 453 to sales or other dispositions occurring on or before May 27, 1969.

[T.D. 7197, 37 FR 13532, July 11, 1972]

**§ 1.453-4 Sale of real property involving deferred periodic payments.**

(a) *In general.* Sales of real property involving deferred payments include (1) agreements of purchase and sale which

contemplate that a conveyance is not to be made at the outset, but only after all or a substantial portion of the selling price has been paid, and (2) sales in which there is an immediate transfer of title, the vendor being protected by a mortgage or other lien as to deferred payments.

(b) *Classes of sales.* Such sales, under either paragraph (a) (1) or (2) of this section, fall into two classes when considered with respect to the terms of sale, as follows:

(1) Sales of real property which may be accounted for on the installment method, that is, sales of real property in which (i) there are no payments during the taxable year of the sale or (ii) the payments in such taxable year (exclusive of evidences of indebtedness of the purchaser) do not exceed 30 percent of the selling price, or

(2) Deferred-payment sales of real property in which the payments received in cash or property other than evidences of indebtedness of the purchaser during the taxable year in which the sale is made exceed 30 percent of the selling price.

(c) *Determination of "selling price".* In the sale of mortgaged property the amount of the mortgage, whether the property is merely taken subject to the mortgage or whether the mortgage is assumed by the purchaser, shall, for the purpose of determining whether a sale is on the installment plan, be included as a part of the "selling price"; and for the purpose of determining the payments and the total contract price as those terms are used in section 453, and §§ 1.453-1 through 1.453-7, the amount of such mortgage shall be included only to the extent that it exceeds the basis of the property. The term "payments" does not include amounts received by the vendor in the year of sale from the disposition to a third person of notes given by the vendee as part of the purchase price which are due and payable in subsequent years. Commissions and other selling expenses paid or incurred by the vendor shall not reduce the amount of the payments, the total contract price, or the selling price.

[T.D. 6500, 25 FR 11715, Nov. 26, 1960]

**§ 1.453-5 Sale of real property treated on installment method.**

(a) *In general.* In any transaction described in paragraph (b)(1) of § 1.453-4, that is, sales of real property in which there are no payments during the year of sale or the payments in that year do not exceed 30 percent of the selling price, the vendor may return as income from each such transaction in any taxable year that proportion of the installment payments actually received in that year which the gross profit (as described in paragraph (b) of § 1.453-1) realized or to be realized when the property is paid for bears to the total contract price. In any case, the sale of each lot or parcel of a subdivided tract must be treated as a separate transaction and gain or loss computed accordingly. (See paragraph (a) of § 1.61-6.)

(b) *Defaults and repossessions—(1) Effective date.* This paragraph shall apply only with respect to taxable years beginning before September 3, 1964, in respect of which an election has not been properly made to have the provisions of section 1038 apply. For rules applicable to taxable years beginning after September 2, 1964, and for taxable years beginning after December 31, 1957, to which such an election applies, see section 1038, and §§ 1.1038-1 through 1.1038-3.

(2) *Gain or loss on reacquisition of property.* If the purchaser of real property on the installment plan defaults in any of his payments, and the vendor returning income on the installment method reacquires the property sold, whether title thereto had been retained by the vendor or transferred to the purchaser, gain or loss for the year in which the reacquisition occurs is to be computed upon any installment obligations of the purchaser which are satisfied or discharged upon the reacquisition or are applied by the vendor to the purchase or bid price of the property. Such gain or loss is to be measured by the difference between the fair market value at the date of reacquisition of the property reacquired (including the fair market value of any fixed improvements placed on the property by the purchaser) and the basis in the hands of the vendor of the obligations of the purchaser which are so satisfied, dis-

charged, or applied, with proper adjustment for any other amounts realized or costs incurred in connection with the reacquisition.

(3) *Fair market value of reacquired property.* If the property reacquired is bid in by the vendor at a foreclosure sale, the fair market value of the property shall be presumed to be the purchase or bid price thereof in the absence of clear and convincing proof to the contrary.

(4) *Basis of obligations.* The basis in the hands of the vendor of the obligations of the purchaser satisfied, discharged, or applied upon the reacquisition of the property will be the excess of the face value of such obligations over an amount equal to the income which would be returnable were the obligations paid in full. For definition of the basis of an installment obligation, see section 453(d)(2) and paragraph (b)(2) of § 1.453-9.

(5) *Bad debt deduction.* No deduction for a bad debt shall in any case be taken on account of any portion of the obligations of the purchaser which are treated by the vendor as not having been satisfied, discharged, or applied upon the reacquisition of the property, unless it is clearly shown that after the property was reacquired the purchaser remained liable for such portion; and in no event shall the amount of the deduction exceed the basis in the hands of the vendor of the portion of the obligations with respect to which the purchaser remained liable after the reacquisition. See section 166 and the regulations thereunder.

(6) *Basis of reacquired property.* If the property reacquired is subsequently sold, the basis for determining gain or loss is the fair market value of the property at the date of reacquisition, including the fair market value of any fixed improvements placed on the property by the purchaser.

[T.D. 6500, 25 FR 11716, Nov. 26, 1960, as amended by T.D. 6916, 32 FR 5923, Apr. 13, 1967]

**§ 1.453-6 Deferred payment sale of real property not on installment method.**

(a) *Value of obligations.* (1) In transactions included in paragraph (b)(2) of § 1.453-4, that is, sales of real property

involving deferred payments in which the payments received during the year of sale exceed 30 percent of the selling price, the obligations of the purchaser received by the vendor are to be considered as an amount realized to the extent of their fair market value in ascertaining the profit or loss from the transaction. Such obligations, however, are not considered in determining whether the payments during the year of sale exceed 30 percent of the selling price.

(2) If the obligations received by the vendor have no fair market value, the payments in cash or other property having a fair market value shall be applied against and reduce the basis of the property sold and, if in excess of such basis, shall be taxable to the extent of the excess. Gain or loss is realized when the obligations are disposed of or satisfied, the amount thereof being the difference between the reduced basis as provided in the preceding sentence and the amount realized therefor. Only in rare and extraordinary cases does property have no fair market value.

(b) *Repossession of property where title is retained by vendor*—(1) *Gain or loss on repossession.* If the vendor in sales referred to in paragraph (a) of this section has retained title to the property and the purchaser defaults in any of his payments, and the vendor repossesses the property, the difference between—

(i) The entire amount of the payments actually received on the contract and retained by the vendor plus the fair market value at the time of repossession of fixed improvements placed on the property by the purchaser, and

(ii) The sum of the profits previously returned as income in connection therewith and an amount representing what would have been a proper adjustment for exhaustion, wear and tear, obsolescence, amortization, and depletion of the property during the period the property was in the hands of the purchaser had the sale not been made, will constitute gain or loss, as the case may be, to the vendor for the year in which the property is repossessed.

(2) *Basis of repossessed property.* The basis of the property described in subparagraph (1) of this paragraph in the

hands of the vendor will be the original basis at the time of the sale plus the fair market value at the time of repossession of fixed improvements placed on the property by the purchaser, except that, with respect to repossessions occurring after September 18, 1958, the basis of the property shall be reduced by what would have been a proper adjustment for exhaustion, wear and tear, obsolescence, amortization, and depletion of the property during the period the property was in the hands of the purchaser if the sale had not been made.

(c) *Reacquisition of property where title is transferred to purchaser*—(1) *Gain or loss on reacquisition.* If the vendor in sales described in paragraph (a) of this section has previously transferred title to the purchaser, and the purchaser defaults in any of his payments, and the vendor accepts a voluntary reconveyance of the property, in partial or full satisfaction of the unpaid portion of the purchase price, the receipt of the property so reacquired, to the extent of its fair market value at that time, including the fair market value of fixed improvements placed on the property by the purchaser, shall be considered as the receipt of payment on the obligations satisfied. If the fair market value of the property is greater than the basis of the obligations of the purchaser so satisfied (generally, such basis being the fair market value of such obligations previously recognized in computing income), the excess constitutes ordinary income. If the value of such property is less than the basis of such obligations, the difference may be deducted as a bad debt if uncollectible, except that, if the obligations satisfied are securities (as defined in section 165(g)(2)(C)), any gain or loss resulting from the transaction is a capital gain or loss subject to the provisions of sections 1201 through 1241.

(2) *Basis of reacquired property.* If the reacquired property described in subparagraph (1) of this paragraph is subsequently sold, the basis for determining gain or loss is the fair market value of the property at the date of reacquisition, including the fair market value of the fixed improvements placed on the property by the purchaser. See

section 166 and the regulations thereunder with respect to property reacquired by the vendor in a foreclosure proceeding.

(d) *Effective date.* Paragraphs (b) and (c) of this section shall apply only with respect to taxable years beginning before September 3, 1964, in respect of which an election has not been properly made to have the provisions of section 1038 apply. For rules applicable to taxable years beginning after September 2, 1964, and for taxable years beginning after December 31, 1957, to which such an election applies, see section 1038, and §§ 1.1038-1 through 1.1038-3.

[T.D. 6500, 25 FR 11716, Nov. 26, 1960, as amended by T.D. 6916, 32 FR 5923, Apr. 13, 1967]

§§ 1.453-7—1.453-8 [Reserved]

§ 1.453-9 Gain or loss on disposition of installment obligations.

(a) *In general.* Subject to the exceptions contained in section 453(d)(4) and paragraph (c) of this section, the entire amount of gain or loss resulting from any disposition or satisfaction of installment obligations, computed in accordance with section 453(d), is recognized in the taxable year of such disposition or satisfaction and shall be considered as resulting from the sale or exchange of the property in respect of which the installment obligation was received by the taxpayer.

(b) *Computation of gain or loss.* (1) The amount of gain or loss resulting under paragraph (a) of this section is the difference between the basis of the obligation and (i) the amount realized, in the case of satisfaction at other than face value or in the case of a sale or exchange, or (ii) the fair market value of the obligation at the time of disposition, if such disposition is other than by sale or exchange.

(2) The basis of an installment obligation shall be the excess of the face value of the obligation over an amount equal to the income which would be returnable were the obligation satisfied in full.

(3) The application of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

*Example 1.* In 1960 the M Corporation sold a piece of unimproved real estate to B for \$20,000. The company acquired the property in 1948 at a cost of \$10,000. During 1960 the company received \$5,000 cash and vendee's notes for the remainder of the selling price, or \$15,000, payable in subsequent years. In 1962, before the vendee made any further payments, the company sold the notes for \$13,000 in cash. The corporation makes its returns on the calendar year basis. The income to be reported for 1962 is \$5,500, computed as follows:

Proceeds of sale of notes .....	\$13,000
Selling price of property .....	\$20,000
Cost of property .....	10,000
<hr/>	<hr/>
Total profit .....	10,000
Total contract price .....	20,000

Percent of profit, or proportion of each payment returnable as income, \$10,000 divided by \$20,000, 50 percent.

Face value of notes .....	15,000
Amount of income returnable were the notes satisfied in full, 50 percent of \$15,000 .....	7,500

Basis of obligation—excess of face value of notes over amount of income returnable were the notes satisfied in full .....	7,500
---	-------

Taxable income to be reported for 1962 ..... 5,500

*Example 2.* Suppose in Example 1 the M Corporation, instead of selling the notes, distributed them in 1962 to its shareholders as a dividend, and at the time of such distribution, the fair market value of the notes was \$14,000. The income to be reported for 1962 is \$6,500, computed as follows:

Fair market value of notes .....	\$14,000
Basis of obligation—excess of face value of notes over amount of income returnable were the notes satisfied in full (computed as in Example 1) .....	7,500

Taxable income to be reported for 1962 ..... 6,500

(c) *Disposition from which no gain or loss is recognized.* (1)(i) Under section 453(d)(4)(A), no gain or loss shall be recognized to a distributing corporation with respect to the distribution made after November 13, 1966, of installment obligations if (a) the distribution is made pursuant to a plan for the complete liquidation of a subsidiary under section 332, and (b) the basis of the such obligations in the hands of the distributee is determined under section 334(b)(1).

(ii) Under section 453(d)(4)(B), no gain or loss shall be recognized to a distributing corporation with respect to the distribution of installment obligations if the distribution is made, pursuant to

a plan for the complete liquidation of a corporation which meets the requirements of section 337, under conditions whereby no gain or loss would have been recognized to the corporation had such installment obligations been sold or exchanged on the day of the distribution. The preceding sentence shall not apply to the extent that under section 453(d)(1) gain to the distributing corporation would be considered as gain to which section 341(f)(2), 617(d)(1), 1245(a)(1), 1250(a)(1), 1251(c)(1), 1252(a)(1), or 1254(a)(1) applies, computed under the principles of the regulations under such provisions. See paragraph (d) of § 1.1245-6, paragraph (c)(6) of § 1.1250-1, paragraph (e)(6) of § 1.1251-1, paragraph (d)(3) of § 1.1252-1, and paragraph (d) of § 1.1254-1.

(2) Where the Code provides for exceptions to the recognition of gain or loss in the case of certain dispositions, no gain or loss shall result under section 453(d) in the case of a disposition of an installment obligation. Such exceptions include: Certain transfers to corporations under sections 351 and 361; contributions of property to a partnership by a partner under section 721; and distributions by a partnership to a partner under section 731 (except as provided by section 736 and section 751).

(3) Any amount received by a person in payment or settlement of an installment obligation acquired in a transaction described in subparagraphs (1) or (2) of this paragraph (other than an amount received by a stockholder with respect to an installment obligation distributed to him pursuant to section 337) shall be considered to have the character it would have had in the hands of the person from whom such installment obligation was acquired.

(d) *Carryover of installment method.* For the treatment of income derived from installment obligations received in transactions to which section 381 (a) is applicable, see section 381(c)(8) and the regulations thereunder.

(e) *Installment obligations transmitted at death.* Where installment obligations are transmitted at death, see section 691(a)(4) and the regulations thereunder for the treatment of amounts considered income in respect of a decedent.

(f) *Losses.* See subchapter P (section 1201 and following), chapter 1 of the Code, as to the limitation on capital losses sustained by corporations and the limitation as to both capital gains and capital losses of individuals.

(g) *Disposition of installment obligations to life insurance companies.* (1) Notwithstanding the provisions of section 453(d)(4) and paragraph (c) of this section or any provision of subtitle A relating to the nonrecognition of gain, the entire amount of any gain realized on the disposition of an installment obligation by any person, other than a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3), to a life insurance company or to a partnership of which a life insurance company is a partner shall be recognized and treated in accordance with section 453(d)(1) and paragraphs (a) and (b) of this section. If a corporation which is a life insurance company for the taxable year was a corporation which was not a life insurance company for the preceding taxable year, such corporation shall be treated, for purposes of section 453(d)(1) and this paragraph, as having transferred to a life insurance company, on the last day of the preceding taxable year, all installment obligations which it held on such last day. The gain, if any, realized by reason of the installment obligations being so transferred shall be recognized and treated in accordance with section 453(d)(1) and paragraphs (a) and (b) of this section. Similarly, a partnership of which a life insurance company becomes a partner shall be treated, for purposes of section 453(d)(1) and this paragraph, as having transferred to a life insurance company, on the last day of the preceding taxable year of such partnership, all installment obligations which it holds at the time such life insurance company becomes a partner. The gain, if any, realized by reason of the installment obligations being so transferred shall be recognized and treated in accordance with section 453(d)(1) and paragraphs (a) and (b) of this section.

(2) The provisions of section 453(d)(5) and subparagraph (1) of this paragraph shall not apply to losses sustained in

connection with the disposition of installment obligations to a life insurance company.

(3) For the effective date of the provisions of section 453(d)(5) and this paragraph, see paragraph (f) of § 1.453-10.

(4) Application of the provisions of this paragraph may be illustrated by the following examples:

*Example 1.* A, an individual, in a transaction to which section 351 applies, transfers in 1961 certain assets, including installment obligations, to a new corporation, X, which qualifies as a life insurance company (as defined in section 801(a)) for the year 1961. A makes his return on the calendar year basis. Section 453(d)(5) provides that the non-recognition provisions of section 351 will not apply to the installment obligations transferred by A to X Corporation. Therefore, the entire amount of any gain realized by A on the transfer of the installment obligations shall be recognized in 1961, with the amount of any such gain computed in accordance with the provisions of section 453(d)(1) and paragraph (b) of this section.

*Example 2.* The M Corporation did not qualify as a life insurance company (as defined in section 801(a)) for the taxable year 1958. On December 31, 1958, it held \$60,000 of installment obligations. The M Corporation qualified as a life insurance company for the taxable year 1959. Accordingly, the M Corporation is treated as having transferred to a life insurance company, on December 31, 1958, the \$60,000 of installment obligations it held on such date. The gain, if any, realized by M by reason of such installment obligations being so transferred shall be recognized in the taxable year 1958, with the amount of any such gain computed in accordance with the provisions of section 453(d)(1) and paragraph (b) of this section.

*Example 3.* During its taxable year 1958, none of the partners of the N partnership qualified as a life insurance company (as defined in section 801(a)). The N partnership held \$30,000 of installment obligations on December 31, 1958. On July 30, 1959, the O Corporation, a life insurance company (as defined in section 801(a)), became a partner in the partnership. The N partnership held \$50,000 of installment obligations on July 30, 1959. Pursuant to section 453(d)(5), the N partnership is treated as having transferred to a life insurance company, on December 31, 1958, the \$50,000 of installment obligations it held on July 30, 1959. The gain, if any, realized by the N partnership by reason of such installment obligations being so transferred shall be recognized in the taxable year 1958, with the amount of any such gain computed in accordance with the provisions of section 453(d)(1) and paragraph (b) of this section.

*Example 4.* In 1960, the P Corporation, in a reorganization qualifying under section 368(a), transferred certain assets (including installment obligations) to the R Corporation, a life insurance company as defined in section 801(a). P realized a loss upon the transfer of the installment obligations, which was not recognized under section 361. Pursuant to subparagraph (2) of paragraph (c) of this section, no loss with respect to the transfer of these obligations will be recognized to P under section 453(d)(1).

[T.D. 6500, 25 FR 11718, Nov. 26, 1960, as amended by T.D. 6590, 27 FR 1319, Feb. 13, 1962; T.D. 7084, 36 FR 267, Jan. 8, 1971; T.D. 7418, 41 FR 18812, May 7, 1976; T.D. 8586, 60 FR 2500, Jan. 10, 1995]

#### § 1.453-10 Effective date.

(a) Except as provided in this section, the provisions of section 453 and §§ 1.453-1 through 1.453-9 shall apply to taxable years beginning after December 31, 1953, and ending after August 16, 1954.

(b) The provisions of paragraphs (a) (2) and (3), (b), and (c) of § 1.453-8 shall apply to taxable years ending after December 17, 1958.

(c) Under the provisions of sections 453(b) and 7851(a)(1)(C), section 453(b)(1) and the regulations with respect thereto shall also apply—

(1) To a sale or other disposition during a taxable year beginning before January 1, 1954, only if the income was returnable (by reason of section 44(b) of the Internal Revenue Code of 1939) on the basis and in the manner prescribed in section 44(a) of such code.

(2) To a sale or other disposition during a taxable year beginning after December 31, 1953, and ending before August 17, 1954, though such taxable year is subject to the provisions of the Internal Revenue Code of 1939.

(d) Under the provisions of sections 453(c)(1)(B) and 7851(a)(1)(C) section 453(c) and the regulations with respect thereto shall also apply to taxable years beginning after December 31, 1953, and ending before August 17, 1954, though such taxable years are subject to the provisions of the Internal Revenue Code of 1939.

(e) The provisions of paragraph (b)(3) of § 1.453-6 shall apply to reposessions occurring after December 18, 1958.

(f) The provisions of section 453(d)(5) and paragraph (g) of § 1.453-9 shall

apply to taxable years ending after December 31, 1957, but only as to transfers or other dispositions of installment obligations occurring after such date.

[T.D. 6500, 25 FR 11718, Nov. 26, 1960, as amended by T.D. 6590, 27 FR 1320, Feb. 13, 1962; T.D. 6682, 28 FR 11177, Oct. 18, 1963]

**§ 1.453-11 Installment obligations received from a liquidating corporation.**

(a) *In general*—(1) *Overview*. Except as provided in section 453(h)(1)(C) (relating to installment sales of depreciable property to certain closely related persons), a qualifying shareholder (as defined in paragraph (b) of this section) who receives a qualifying installment obligation (as defined in paragraph (c) of this section) in a liquidation that satisfies section 453(h)(1)(A) treats the receipt of payments in respect of the obligation, rather than the receipt of the obligation itself, as a receipt of payment for the shareholder's stock. The shareholder reports the payments received on the installment method unless the shareholder elects otherwise in accordance with § 15a.453-1(d) of this chapter.

(2) *Coordination with other provisions*—(i) *Deemed sale of stock for installment obligation*. Except as specifically provided in section 453(h)(1)(C), a qualifying shareholder treats a qualifying installment obligation, for all purposes of the Internal Revenue Code, as if the obligation is received by the shareholder from the person issuing the obligation in exchange for the shareholder's stock in the liquidating corporation. For example, if the stock of a corporation that is liquidating is traded on an established securities market, an installment obligation distributed to a shareholder of the corporation in exchange for the shareholder's stock does not qualify for installment reporting pursuant to section 453(k)(2).

(ii) *Special rules to account for the qualifying installment obligation*—(A) *Issue price*. A qualifying installment obligation is treated by a qualifying shareholder as newly issued on the date of the distribution. The issue price of the qualifying installment obligation on that date is equal to the sum of the adjusted issue price of the obligation on the date of the distribution (as de-

termined under § 1.1275-1(b)) and the amount of any qualified stated interest (as defined in § 1.1273-1(c)) that has accrued prior to the distribution but that is not payable until after the distribution. For purposes of the preceding sentence, if the qualifying installment obligation is subject to § 1.446-2 (e.g., a debt instrument that has unstated interest under section 483), the adjusted issue price of the obligation is determined under § 1.446-2(c) and (d).

(B) *Variable rate debt instrument*. If the qualifying installment obligation is a variable rate debt instrument (as defined in § 1.1275-5), the shareholder uses the equivalent fixed rate debt instrument (within the meaning of § 1.1275-5(e)(3)(ii)) constructed for the qualifying installment obligation as of the date the obligation was issued to the liquidating corporation to determine the accruals of original issue discount, if any, and interest on the obligation.

(3) *Liquidating distributions treated as selling price*. All amounts distributed or treated as distributed to a qualifying shareholder incident to the liquidation, including cash, the issue price of qualifying installment obligations as determined under paragraph (a)(2)(ii)(A) of this section, and the fair market value of other property (including obligations that are not qualifying installment obligations) are considered as having been received by the shareholder as the selling price (as defined in § 15a.453-1(b)(2)(ii) of this chapter) for the shareholder's stock in the liquidating corporation. For the proper method of reporting liquidating distributions received in more than one taxable year of a shareholder, see paragraph (d) of this section. An election not to report on the installment method an installment obligation received in the liquidation applies to all distributions received in the liquidation.

(4) *Assumption of corporate liability by shareholders*. For purposes of this section, if in the course of a liquidation a shareholder assumes secured or unsecured liabilities of the liquidating corporation, or receives property from the corporation subject to such liabilities (including any tax liabilities incurred by the corporation on the distribution), the amount of the liabilities is added

to the shareholder's basis in the stock of the liquidating corporation. These additions to basis do not affect the shareholder's holding period for the stock. These liabilities do not reduce the amounts received in computing the selling price.

(5) *Examples.* The provisions of this paragraph (a) are illustrated by the following examples. Except as otherwise provided, assume in each example that A, an individual who is a calendar-year taxpayer, owns all of the stock of T corporation. A's adjusted tax basis in that stock is \$100,000. On February 1, 1998, T, an accrual method taxpayer, adopts a plan of complete liquidation that satisfies section 453(h)(1)(A) and immediately sells all of its assets to unrelated B corporation in a single transaction. The examples are as follows:

*Example 1.* (i) The stated purchase price for T's assets is \$3,500,000. In consideration for the sale, B makes a down payment of \$500,000 and issues a 10-year installment obligation with a stated principal amount of \$3,000,000. The obligation provides for interest payments of \$150,000 on January 31 of each year, with the total principal amount due at maturity.

(ii) Assume that for purposes of section 1274, the test rate on February 1, 1998, is 8 percent, compounded semi-annually. Also assume that a semi-annual accrual period is used. Under §1.1274-2, the issue price of the obligation on February 1, 1998, is \$2,368,450. Accordingly, the obligation has \$631,550 of original issue discount (\$3,000,000-\$2,368,450). Between February 1 and July 31, \$19,738 of original issue discount and \$75,000 of qualified stated interest accrue with respect to the obligation and are taken into account by T.

(iii) On July 31, 1998, T distributes the installment obligation to A in exchange for A's stock. No other property is ever distributed to A. On January 31, 1999, A receives the first annual payment of \$150,000 from B.

(iv) When the obligation is distributed to A on July 31, 1998, it is treated as if the obligation is received by A in an installment sale of shares directly to B on that date. Under §1.1275-1(b), the adjusted issue price of the obligation on that date is \$2,388,188 (original issue price of \$2,368,450 plus accrued original issue discount of \$19,738). Accordingly, the issue price of the obligation under paragraph (a)(2)(ii)(A) of this section is \$2,463,188, the sum of the adjusted issue price of the obligation on that date (\$2,388,188) and the amount of accrued but unpaid qualified stated interest (\$75,000).

(v) The selling price and contract price of A's stock in T is \$2,463,188, and the gross profit is \$2,363,188 (\$2,463,188 selling price less A's adjusted tax basis of \$100,000). A's gross profit ratio is thus 96 percent (gross profit of \$2,363,188 divided by total contract price of \$2,463,188).

(vi) Under §§1.446-2(e)(1) and 1.1275-2(a), \$98,527 of the \$150,000 payment is treated as a payment of the interest and original issue discount that accrued on the obligation from July 31, 1998, to January 31, 1999 (\$75,000 of qualified stated interest and \$23,527 of original issue discount). The balance of the payment (\$51,473) is treated as a payment of principal. A's gain recognized in 1999 is \$49,414 (96 percent of \$51,473).

*Example 2.* (i) T owns Blackacre, unimproved real property, with an adjusted tax basis of \$700,000. Blackacre is subject to a mortgage (underlying mortgage) of \$1,100,000. A is not personally liable on the underlying mortgage and the T shares held by A are not encumbered by the underlying mortgage. The other assets of T consist of \$400,000 of cash and \$600,000 of accounts receivable attributable to sales of inventory in the ordinary course of business. The unsecured liabilities of T total \$900,000.

(ii) On February 1, 1998, T adopts a plan of complete liquidation complying with section 453(h)(1)(A), and promptly sells Blackacre to B for a 4-year mortgage note (bearing adequate stated interest and otherwise meeting all of the requirements of section 453) in the face amount of \$4 million. Under the agreement between T and B, T (or its successor) is to continue to make principal and interest payments on the underlying mortgage. Immediately thereafter, T completes its liquidation by distributing to A its remaining cash of \$400,000 (after payment of T's tax liabilities), accounts receivable of \$600,000, and the \$4 million B note. A assumes T's \$900,000 of unsecured liabilities and receives the distributed property subject to the obligation to make payments on the \$1,100,000 underlying mortgage. A receives no payments from B on the B note during 1998.

(iii) Unless A elects otherwise, the transaction is reported by A on the installment method. The selling price is \$5 million (cash of \$400,000, accounts receivable of \$600,000, and the B note of \$4 million). The total contract price also is \$5 million. A's adjusted tax basis in the T shares, initially \$100,000, is increased by the \$900,000 of unsecured T liabilities assumed by A and by the obligation (subject to which A takes the distributed property) to make payments on the \$1,100,000 underlying mortgage on Blackacre, for an aggregate adjusted tax basis of \$2,100,000. Accordingly, the gross profit is \$2,900,000 (selling price of \$5 million less aggregate adjusted tax basis of \$2,100,000). The gross profit ratio is 58 percent (gross profit of \$2,900,000

divided by the total contract price of \$5 million). The 1998 payments to A are \$1 million (\$400,000 cash plus \$600,000 receivables) and A recognizes gain in 1998 of \$580,000 (58 percent of \$1 million).

(iv) In 1999, A receives payment from B on the B note of \$1 million (exclusive of interest). A's gain recognized in 1999 is \$580,000 (58 percent of \$1 million).

(b) *Qualifying shareholder.* For purposes of this section, *qualifying shareholder* means a shareholder to which, with respect to the liquidating distribution, section 331 applies. For example, a creditor that receives a distribution from a liquidating corporation, in exchange for the creditor's claim, is not a qualifying shareholder as a result of that distribution regardless of whether the liquidation satisfies section 453(h)(1)(A).

(c) *Qualifying installment obligation—*(1) *In general.* For purposes of this section, *qualifying installment obligation* means an installment obligation (other than an evidence of indebtedness described in § 15a.453-1(e) of this chapter, relating to obligations that are payable on demand or are readily tradable) acquired in a sale or exchange of corporate assets by a liquidating corporation during the 12-month period beginning on the date the plan of liquidation is adopted. See paragraph (c)(4) of this section for an exception for installment obligations acquired in respect of certain sales of inventory. Also see paragraph (c)(5) of this section for an exception for installment obligations attributable to sales of certain property that do not generally qualify for installment method treatment.

(2) *Corporate assets.* Except as provided in section 453(h)(1)(C), in paragraph (c)(4) of this section (relating to certain sales of inventory), and in paragraph (c)(5) of this section (relating to certain tax avoidance transactions), the nature of the assets sold by, and the tax consequences to, the selling corporation do not affect whether an installment obligation is a qualifying installment obligation. Thus, for example, the fact that the fair market value of an asset is less than the adjusted basis of that asset in the hands of the corporation; or that the sale of an asset will subject the corporation to depreciation recapture (e.g., under section 1245 or section 1250); or that the

assets of a trade or business sold by the corporation for an installment obligation include depreciable property, certain marketable securities, accounts receivable, installment obligations, or cash; or that the distribution of assets to the shareholder is or is not taxable to the corporation under sections 336 and 453B, does not affect whether installment obligations received in exchange for those assets are treated as qualifying installment obligations by the shareholder. However, an obligation received by the corporation in exchange for cash, in a transaction unrelated to a sale or exchange of noncash assets by the corporation, is not treated as a qualifying installment obligation.

(3) *Installment obligations distributed in liquidations described in section 453(h)(1)(E)—*(i) *In general.* In the case of a liquidation to which section 453(h)(1)(E) (relating to certain liquidating subsidiary corporations) applies, a qualifying installment obligation acquired in respect of a sale or exchange by the liquidating subsidiary corporation will be treated as a qualifying installment obligation if distributed by a controlling corporate shareholder (within the meaning of section 368(c)) to a qualifying shareholder. The preceding sentence is applied successively to each controlling corporate shareholder, if any, above the first controlling corporate shareholder.

(ii) *Examples.* The provisions of this paragraph (c)(3) are illustrated by the following examples:

*Example 1.* (i) A, an individual, owns all of the stock of T corporation, a C corporation. T has an operating division and three wholly-owned subsidiaries, X, Y, and Z. On February 1, 1998, T, Y, and Z all adopt plans of complete liquidation.

(ii) On March 1, 1998, the following sales are made to unrelated purchasers: T sells the assets of its operating division to B for cash and an installment obligation. T sells the stock of X to C for an installment obligation. Y sells all of its assets to D for an installment obligation. Z sells all of its assets to E for cash. The B, C, and D installment obligations bear adequate stated interest and meet the requirements of section 453.

(iii) In June 1998, Y and Z completely liquidate, distributing their respective assets (the D installment obligation and cash) to T.

In July 1998, T completely liquidates, distributing to A cash and the installment obligations respectively issued by B, C, and D. The liquidation of T is a liquidation to which section 453(h) applies and the liquidations of Y and Z into T are liquidations to which section 332 applies.

(iv) Because T is in control of Y (within the meaning of section 368(c)), the D obligation acquired by Y is treated as acquired by T pursuant to section 453(h)(1)(E). A is a qualifying shareholder and the installment obligations issued by B, C, and D are qualifying installment obligations. Unless A elects otherwise, A reports the transaction on the installment method as if the cash and installment obligations had been received in an installment sale of the stock of T corporation. Under section 453B(d), no gain or loss is recognized by Y on the distribution of the D installment obligation to T. Under sections 453B(a) and 336, T recognizes gain or loss on the distribution of the B, C, and D installment obligations to A in exchange for A's stock.

*Example 2.* (i) A, a cash-method individual taxpayer, owns all of the stock of P corporation, a C corporation. P owns 30 percent of the stock of Q corporation. The balance of the Q stock is owned by unrelated individuals. On February 1, 1998, P adopts a plan of complete liquidation and sells all of its property, other than its Q stock, to B, an unrelated purchaser for cash and an installment obligation bearing adequate stated interest. On March 1, 1998, Q adopts a plan of complete liquidation and sells all of its property to an unrelated purchaser, C, for cash and installment obligations. Q immediately distributes the cash and installment obligations to its shareholders in completion of its liquidation. Promptly thereafter, P liquidates, distributing to A cash, the B installment obligation, and a C installment obligation that P received in the liquidation of Q.

(ii) In the hands of A, the B installment obligation is a qualifying installment obligation. In the hands of P, the C installment obligation was a qualifying installment obligation. However, in the hands of A, the C installment obligation is not treated as a qualifying installment obligation because P owned only 30 percent of the stock of Q. Because P did not own the requisite 80 percent stock interest in Q, P was not a controlling corporate shareholder of Q (within the meaning of section 368(c)) immediately before the liquidation. Therefore, section 453(h)(1)(E) does not apply. Thus, in the hands of A, the C obligation is considered to be a third-party note (not a purchaser's evidence of indebtedness) and is treated as a payment to A in the year of distribution. Accordingly, for 1998, A reports as payment the cash and the fair market value of the C obligation distributed to A in the liquidation of P.

(iii) Because P held 30 percent of the stock of Q, section 453B(d) is inapplicable to P. Under sections 453B(a) and 336, accordingly, Q recognizes gain or loss on the distribution of the C obligation. P also recognizes gain or loss on the distribution of the B and C installment obligations to A in exchange for A's stock. See sections 453B and 336.

(4) *Installment obligations attributable to certain sales of inventory*—(i) *In general.* An installment obligation acquired by a corporation in a liquidation that satisfies section 453(h)(1)(A) in respect of a broken lot of inventory is not a qualifying installment obligation. If an installment obligation is acquired in respect of a broken lot of inventory and other assets, only the portion of the installment obligation acquired in respect of the broken lot of inventory is not a qualifying installment obligation. The portion of the installment obligation attributable to other assets is a qualifying installment obligation. For purposes of this section, the term *broken lot of inventory* means inventory property that is sold or exchanged other than in bulk to one person in one transaction involving substantially all of the inventory property attributable to a trade or business of the corporation. See paragraph (c)(4)(ii) of this section for rules for determining what portion of an installment obligation is not a qualifying installment obligation and paragraph (c)(4)(iii) of this section for rules determining the application of payments on an installment obligation only a portion of which is a qualifying installment obligation.

(ii) *Rules for determining nonqualifying portion of an installment obligation.* If a broken lot of inventory is sold to a purchaser together with other corporate assets for consideration consisting of an installment obligation and either cash, other property, the assumption of (or taking property subject to) corporate liabilities by the purchaser, or some combination thereof, the installment obligation is treated as having been acquired in respect of a broken lot of inventory only to the extent that the fair market value of the broken lot of inventory exceeds the sum of unsecured liabilities assumed by the purchaser, secured liabilities which encumber the broken lot of inventory and are assumed by the purchaser or to

which the broken lot of inventory is subject, and the sum of the cash and fair market value of other property received. This rule applies solely for the purpose of determining the portion of the installment obligation (if any) that is attributable to the broken lot of inventory.

(iii) *Application of payments.* If, by reason of the application of paragraph (c)(4)(ii) of this section, a portion of an installment obligation is not a qualifying installment obligation, then for purposes of determining the amount of gain to be reported by the shareholder under section 453, payments on the obligation (other than payments of qualified stated interest) shall be applied first to the portion of the obligation that is not a qualifying installment obligation.

(iv) *Example.* The following example illustrates the provisions of this paragraph (c)(4). In this example, assume that all obligations bear adequate stated interest within the meaning of section 1274(c)(2) and that the fair market value of each nonqualifying installment obligation equals its face amount. The example is as follows:

*Example.* (i) P corporation has three operating divisions, X, Y, and Z, each engaged in a separate trade or business, and a minor amount of investment assets. On July 1, 1998, P adopts a plan of complete liquidation that meets the criteria of section 453(h)(1)(A). The following sales are promptly made to purchasers unrelated to P: P sells all of the assets of the X division (including all of the inventory property) to B for \$30,000 cash and installment obligations totalling \$200,000. P sells substantially all of the inventory property of the Y division to C for a \$100,000 installment obligation, and sells all of the other assets of the Y division (excluding cash but including installment receivables previously acquired in the ordinary course of the business of the Y division) to D for a \$170,000 installment obligation. P sells 1/3 of the inventory property of the Z division to E for \$100,000 cash, 1/3 of the inventory property of the Z division to F for a \$100,000 installment obligation, and all of the other assets of the Z division (including the remaining 1/3 of the inventory property worth \$100,000) to G for \$60,000 cash, a \$240,000 installment obligation, and the assumption by G of the liabilities of the Z division. The liabilities assumed by G, which are unsecured liabilities and liabilities encumbering the inventory property acquired by G, aggregate \$30,000.

Thus, the total purchase price G pays is \$330,000.

(ii) P immediately completes its liquidation, distributing the cash and installment obligations, which otherwise meet the requirements of section 453, to A, an individual cash-method taxpayer who is its sole shareholder. In 1999, G makes a payment to A of \$100,000 (exclusive of interest) on the \$240,000 installment obligation.

(iii) In the hands of A, the installment obligations issued by B, C, and D are qualifying installment obligations because they were timely acquired by P in a sale or exchange of its assets. In addition, the installment obligation issued by C is a qualifying installment obligation because it arose from a sale to one person in one transaction of substantially all of the inventory property of the trade or business engaged in by the Y division.

(iv) The installment obligation issued by F is not a qualifying installment obligation because it is in respect of a broken lot of inventory. A portion of the installment obligation issued by G is a qualifying installment obligation and a portion is not a qualifying installment obligation, determined as follows: G purchased part of the inventory property (with a fair market value of \$100,000) and all of the other assets of the Z division by paying cash (\$60,000), issuing an installment obligation (\$240,000), and assuming liabilities of the Z division (\$30,000). The assumed liabilities (\$30,000) and cash (\$60,000) are attributed first to the inventory property. Therefore, only \$10,000 of the \$240,000 installment obligation is attributed to inventory property. Accordingly, in the hands of A, the G installment obligation is a qualifying installment obligation to the extent of \$230,000, but is not a qualifying installment obligation to the extent of the \$10,000 attributable to the inventory property.

(v) In the 1998 liquidation of P, A receives a liquidating distribution as follows:

Item	Qualifying installment obligations	Cash and other property
Cash .....		\$190,000
B note .....	\$200,000	
C note .....	\$100,000	
D note .....	\$170,000	
F note .....		\$100,000
G note <sup>1</sup> .....	\$230,000	\$ 10,000
<b>Total .....</b>	<b>\$700,000</b>	<b>\$300,000</b>

<sup>1</sup> Face amount \$240,000.

(vi) Assume that A's adjusted tax basis in the stock of P is \$100,000. Under the installment method, A's selling price and the contract price are both \$1 million, the gross profit is \$900,000 (selling price of \$1 million less adjusted tax basis of \$100,000), and the gross profit ratio is 90 percent (gross profit

of \$900,000 divided by the contract price of \$1 million). Accordingly, in 1998, A reports gain of \$270,000 (90 percent of \$300,000 payment in cash and other property). A's adjusted tax basis in each of the qualifying installment obligations is an amount equal to 10 percent of the obligation's respective face amount. A's adjusted tax basis in the F note, a non-qualifying installment obligation, is \$100,000, i.e., the fair market value of the note when received by A. A's adjusted tax basis in the G note, a mixed obligation, is \$33,000 (10 percent of the \$230,000 qualifying installment obligation portion of the note, plus the \$10,000 nonqualifying portion of the note).

(vii) With respect to the \$100,000 payment received from G in 1999, \$10,000 is treated as the recovery of the adjusted tax basis of the nonqualifying portion of the G installment obligation and \$9,000 (10 percent of \$90,000) is treated as the recovery of the adjusted tax basis of the portion of the note that is a qualifying installment obligation. The remaining \$81,000 (90 percent of \$90,000) is reported as gain from the sale of A's stock. See paragraph (c)(4)(iii) of this section.

(5) *Installment obligations attributable to sales of certain property*—(i) *In general.* An installment obligation acquired by a liquidating corporation, to the extent attributable to the sale of property described in paragraph (c)(5)(ii) of this section, is not a qualifying obligation if the corporation is formed or availed of for a principal purpose of avoiding section 453(b)(2) (relating to dealer dispositions and certain other dispositions of personal property), section 453(i) (relating to sales of property subject to recapture), or section 453(k) (relating to dispositions under a revolving credit plan and sales of stock or securities traded on an established securities market) through the use of a party bearing a relationship, either directly or indirectly, described in section 267(b) to any shareholder of the corporation.

(ii) *Covered property.* Property is described in this paragraph (c)(5)(ii) if, within 12 months before or after the adoption of the plan of liquidation, the property was owned by any shareholder and—

(A) The shareholder regularly sold or otherwise disposed of personal property of the same type on the installment plan or the property is real property that the shareholder held for sale to customers in the ordinary course of a trade or business (provided the property is not described in section 453(l)(2)

(relating to certain exceptions to the definition of dealer dispositions));

(B) The sale of the property by the shareholder would result in recapture income (within the meaning of section 453(i)(2)), but only if the amount of the recapture income is equal to or greater than 50 percent of the property's fair market value on the date of the sale by the corporation;

(C) The property is stock or securities that are traded on an established securities market; or

(D) The sale of the property by the shareholder would have been under a revolving credit plan.

(iii) *Safe harbor.* Paragraph (c)(5)(i) of this section will not apply to the liquidation of a corporation if, on the date the plan of complete liquidation is adopted and thereafter, less than 15 percent of the fair market value of the corporation's assets is attributable to property described in paragraph (c)(5)(ii) of this section.

(iv) *Example.* The provisions of this paragraph (c)(5) are illustrated by the following example:

*Example.* Ten percent of the fair market value of the assets of T is attributable to stock and securities traded on an established securities market. T owns no other assets described in paragraph (c)(5)(ii) of this section. T, after adopting a plan of complete liquidation, sells all of its stock and securities holdings to C corporation in exchange for an installment obligation bearing adequate stated interest, sells all of its other assets to B corporation for cash, and distributes the cash and installment obligation to its sole shareholder, A, in a complete liquidation that satisfies section 453(h)(1)(A). Because the C installment obligation arose from a sale of publicly traded stock and securities, T cannot report the gain on the sale under the installment method pursuant to section 453(k)(2). In the hands of A, however, the C installment obligation is treated as having arisen out of a sale of the stock of T corporation. In addition, the general rule of paragraph (c)(5)(i) of this section does not apply, even if a principal purpose of the liquidation was the avoidance of section 453(k)(2), because the fair market value of the publicly traded stock and securities is less than 15 percent of the total fair market value of T's assets. Accordingly, section 453(k)(2) does not apply to A, and A may use the installment method to report the gain recognized on the payments it receives in respect of the obligation.

(d) *Liquidating distributions received in more than one taxable year.* If a qualifying shareholder receives liquidating distributions to which this section applies in more than one taxable year, the shareholder must reasonably estimate the gain attributable to distributions received in each taxable year. In allocating basis to calculate the gain for a taxable year, the shareholder must reasonably estimate the anticipated aggregate distributions. For this purpose, the shareholder must take into account distributions and other relevant events or information that the shareholder knows or reasonably could know up to the date on which the federal income tax return for that year is filed. If the gain for a taxable year is properly taken into account on the basis of a reasonable estimate and the exact amount is subsequently determined the difference, if any, must be taken into account for the taxable year in which the subsequent determination is made. However, the shareholder may file an amended return for the earlier year in lieu of taking the difference into account for the subsequent taxable year.

(e) *Effective date.* This section is applicable to distributions of qualifying installment obligations made on or after January 28, 1998.

[T.D. 8762, 63 FR 4170, Jan. 28, 1998]

**§ 1.453-12 Allocation of unrecaptured section 1250 gain reported on the installment method.**

(a) *General rule.* Unrecaptured section 1250 gain, as defined in section 1(h)(7), is reported on the installment method if that method otherwise applies under section 453 or 453A and the corresponding regulations. If gain from an installment sale includes unrecaptured section 1250 gain and adjusted net capital gain (as defined in section 1(h)(4)), the unrecaptured section 1250 gain is taken into account before the adjusted net capital gain.

(b) *Installment payments from sales before May 7, 1997.* The amount of unrecaptured section 1250 gain in an installment payment that is properly taken into account after May 6, 1997, from a sale before May 7, 1997, is determined as if, for all payments properly

taken into account after the date of sale but before May 7, 1997, unrecaptured section 1250 gain had been taken into account before adjusted net capital gain.

(c) *Installment payments received after May 6, 1997, and on or before August 23, 1999.* If the amount of unrecaptured section 1250 gain in an installment payment that is properly taken into account after May 6, 1997, and on or before August 23, 1999, is less than the amount that would have been taken into account under this section, the lesser amount is used to determine the amount of unrecaptured section 1250 gain that remains to be taken into account.

(d) *Examples.* In each example, the taxpayer, an individual whose taxable year is the calendar year, does not elect out of the installment method. The installment obligation bears adequate stated interest, and the property sold is real property held in a trade or business that qualifies as both section 1231 property and section 1250 property. In all taxable years, the taxpayer's marginal tax rate on ordinary income is 28 percent. The following examples illustrate the rules of this section:

*Example 1. General rule.* This example illustrates the rule of paragraph (a) of this section as follows:

(i) In 1999, A sells property for \$10,000, to be paid in ten equal annual installments beginning on December 1, 1999. A originally purchased the property for \$5000, held the property for several years, and took straight-line depreciation deductions in the amount of \$3000. In each of the years 1999-2008, A has no other capital or section 1231 gains or losses.

(ii) A's adjusted basis at the time of the sale is \$2000. Of A's \$8000 of section 1231 gain on the sale of the property, \$3000 is attributable to prior straight-line depreciation deductions and is unrecaptured section 1250 gain. The gain on each installment payment is \$800.

(iii) As illustrated in the table in this paragraph (iii) of this *Example 1.*, A takes into account the unrecaptured section 1250 gain first. Therefore, the gain on A's first three payments, received in 1999, 2000, and 2001, is taxed at 25 percent. Of the \$800 of gain on the fourth payment, received in 2002, \$600 is taxed at 25 percent and the remaining \$200 is taxed at 20 percent. The gain on A's remaining six installment payments is taxed at 20 percent. The table is as follows:

Internal Revenue Service, Treasury

§ 1.453-12

	1999	2000	2001	2002	2003	2004-2008	Total gain
Installment gain .....	800	800	800	800	800	4000	8000
Taxed at 25% .....	800	800	800	600	.....	.....	3000
Taxed at 20% .....	.....	.....	.....	200	800	4000	5000
Remaining to be taxed at 25% .....	2200	1400	600	.....	.....	.....	.....

Example 2. Installment payments from sales prior to May 7, 1997. This example illustrates the rule of paragraph (b) of this section as follows:

(i) The facts are the same as in Example 1 except that A sold the property in 1994, received the first of the ten annual installment payments on December 1, 1994, and had no other capital or section 1231 gains or losses in the years 1994-2003.

(ii) As in Example 1, of A's \$8000 of gain on the sale of the property, \$3000 was attributable to prior straight-line depreciation deductions and is unrecaptured section 1250 gain.

(iii) As illustrated in the following table, A's first three payments, in 1994, 1995, and

1996, were received before May 7, 1997, and taxed at 28 percent. Under the rule described in paragraph (b) of this section, A determines the allocation of unrecaptured section 1250 gain for each installment payment after May 6, 1997, by taking unrecaptured section 1250 gain into account first, treating the general rule of paragraph (a) of this section as having applied since the time the property was sold, in 1994. Consequently, of the \$800 of gain on the fourth payment, received in 1997, \$600 is taxed at 25 percent and the remaining \$200 is taxed at 20 percent. The gain on A's remaining six installment payments is taxed at 20 percent. The table is as follows:

	1994	1995	1996	1997	1998	1999-2003	Total gain
Installment gain .....	800	800	800	800	800	4000	8000
Taxed at 28% .....	800	800	800	.....	.....	.....	2400
Taxed at 25% .....	.....	.....	.....	600	.....	.....	600
Taxed at 20% .....	.....	.....	.....	200	800	4000	5000
Remaining to be taxed at 25% .....	2200	1400	600	.....	.....	.....	.....

Example 3. Effect of section 1231(c) recapture. This example illustrates the rule of paragraph (a) of this section when there are non-recaptured net section 1231 losses, as defined in section 1231(c)(2), from prior years as follows:

(i) The facts are the same as in Example 1, except that in 1999 A has non-recaptured net section 1231 losses from the previous four years of \$1000.

(ii) As illustrated in the table in paragraph (iv) of this Example 3, in 1999, all of A's \$800 installment gain is recaptured as ordinary income under section 1231(c). Under the rule described in paragraph (a) of this section, for purposes of determining the amount of unrecaptured section 1250 gain remaining to be taken into account, the \$800 recaptured as ordinary income under section 1231(c) is treated as reducing unrecaptured section

1250 gain, rather than adjusted net capital gain. Therefore, A has \$2200 of unrecaptured section 1250 gain remaining to be taken into account.

(iii) In the year 2000, A's installment gain is taxed at two rates. First, \$200 is recaptured as ordinary income under section 1231(c). Second, the remaining \$600 of gain on A's year 2000 installment payment is taxed at 25 percent. Because the full \$800 of gain reduces unrecaptured section 1250 gain, A has \$1400 of unrecaptured section 1250 gain remaining to be taken into account.

(iv) The gain on A's installment payment received in 2001 is taxed at 25 percent. Of the \$800 of gain on the fourth payment, received in 2002, \$600 is taxed at 25 percent and the remaining \$200 is taxed at 20 percent. The gain on A's remaining six installment payments is taxed at 20 percent. The table is as follows:

	1999	2000	2001	2002	2003	2004-2008	Total gain
Installment gain .....	800	800	800	800	800	4000	8000
Taxed at ordinary rates under section 1231(c) .....	800	200	.....	.....	.....	.....	1000
Taxed at 25% .....	.....	600	800	600	.....	.....	2000
Taxed at 20% .....	.....	.....	.....	200	800	4000	5000
Remaining non-recaptured net section 1231 losses .....	200	.....	.....	.....	.....	.....	.....

	1999	2000	2001	2002	2003	2004-2008	Total gain
Remaining to be taxed at 25% .....	2200	1400	600	.....	.....	.....	.....

*Example 4. Effect of a net section 1231 loss.* This example illustrates the application of paragraph (a) of this section when there is a net section 1231 loss as follows:

(i) The facts are the same as in *Example 1* except that A has section 1231 losses of \$1000 in 1999.

(ii) In 1999, A's section 1231 installment gain of \$800 does not exceed A's section 1231 losses of \$1000. Therefore, A has a net section 1231 loss of \$200. As a result, under section 1231(a) all of A's section 1231 gains and losses are treated as ordinary gains and losses. As illustrated in the following table, A's entire \$800 of installment gain is ordinary gain. Under the rule described in paragraph (a) of this section, for purposes of determining the amount of unrecaptured section 1250 gain remaining to be taken into account, A's \$800 of ordinary section 1231 installment gain in 1999 is treated as reducing unrecaptured section 1250 gain. Therefore, A has \$2200 of unrecaptured section 1250 gain remaining to be taken into account.

(iii) In the year 2000, A has \$800 of section 1231 installment gain, resulting in a net section 1231 gain of \$800. A also has \$200 of non-recaptured net section 1231 losses. The \$800 gain is taxed at two rates. First, \$200 is taxed at ordinary rates under section 1231(c), recapturing the \$200 net section 1231 loss sustained in 1999. Second, the remaining \$600 of gain on A's year 2000 installment payment is taxed at 25 percent. As in *Example 3*, the \$200 of section 1231(c) gain is treated as reducing unrecaptured section 1250 gain, rather than adjusted net capital gain. Therefore, A has \$1400 of unrecaptured section 1250 gain remaining to be taken into account.

(iv) The gain on A's installment payment received in 2001 is taxed at 25 percent, reducing the remaining unrecaptured section 1250 gain to \$600. Of the \$800 of gain on the fourth payment, received in 2002, \$600 is taxed at 25 percent and the remaining \$200 is taxed at 20 percent. The gain on A's remaining six installment payments is taxed at 20 percent. The table is as follows:

	1999	2000	2001	2002	2003	2004-2008	Total gain
Installment gain .....	800	800	800	800	800	4000	8000
Ordinary gain under section 1231(a) .....	800	.....	.....	.....	.....	.....	800
Taxed at ordinary rates under section 1231(c) .....	.....	200	.....	.....	.....	.....	200
Taxed at 25% .....	.....	600	800	600	.....	.....	2000
Taxed at 20% .....	.....	.....	.....	200	800	4000	5000
Net section 1231 loss .....	200	.....	.....	.....	.....	.....	.....
Remaining to be taxed at 25% .....	2200	1400	600	.....	.....	.....	.....

(e) *Effective date.* This section applies to installment payments properly taken into account after August 23, 1999.

[T.D. 8836, 64 FR 45875, Aug. 23, 1999]

**§ 1.453A-0 Table of contents.**

This section lists the paragraphs and subparagraphs contained in §§1.453A-1 through 1.453A-3.

*§1.453A-1 Installment method of reporting income by dealers in personal property.*

- (a) In general.
- (b) Effect of security.
- (c) Definition of dealer, sale, and sale on the installment plan.
- (d) Installment plans.
- (1) Traditional installment plans.
- (2) Revolving credit plans.

(e) Installment income of dealers in personal property.

- (1) In general.
- (2) Gross profit and total contract price.
- (3) Carrying charges not included in total contract price.
- (f) Other accounting methods.
- (g) Records.
- (h) Effective date.

*§1.453A-2 Treatment of revolving credit plans; taxable years beginning on or before December 31, 1986.*

- (a) In general.
- (b) Coordination with traditional installment plan.
- (c) Revolving credit plans.
- (d) Effective date.

*§1.453A-3 Requirements for adoption of or change to installment method by dealers in personal property.*

- (a) In general.

(b) Time and manner of electing installment method reporting.

- (1) Time for election.
- (2) Adoption of installation method.
- (3) Change to installment method.
- (4) Deemed elections.

(c) Consent.

(d) Cut-off method for amounts previously accrued.

(e) Effective date.

[T.D. 8270, 54 FR 46376, Nov. 3, 1989]

**§ 1.453A-1 Installment method of reporting income by dealers on personal property.**

(a) *In general.* A dealer (as defined in paragraph (c)(1) of this section) may elect to return the income from the sale of personal property on the installment method if such sale is a sale on the installment plan (as defined in paragraphs (c)(3) and (d) of this section). Under the installment method of accounting, a taxpayer may return as income from installment sales in any taxable year that proportion of the installment payments actually received in that year which the gross profit realized or to be realized when the property is paid for bears to the total contract price. For this purpose, gross profit means sales less cost of goods sold. See paragraph (d) of this section for additional rules relating to the computation of income under the installment method of accounting. In addition, see § 1.453A-2 for rules treating revolving credit plans as installment plans for taxable years beginning on or before December 31, 1986.

(b) *Effect of security.* A dealer may adopt (but is not required to do so) one of the following four ways of protecting against loss in case of default by the purchaser:

(1) An agreement that title is to remain in the vendor until performance of the purchaser's part of the transaction is completed;

(2) A form of contract in which title is conveyed to the purchaser immediately, but subject to a lien for the unpaid portion of the selling price;

(3) A present transfer of title to the purchaser, who at the same time executes a reconveyance in the form of a chattel mortgage to the vendor; or

(4) A conveyance to a trustee pending performance of the contract and subject to its provisions.

(c) *Definitions of dealer, sale, and sale on the installment plan.* For purposes of the regulations under section 453A—

(1) The term “dealer” means a person who regularly sells or otherwise disposes of personal property on the installment plan;

(2) The term “sale” includes sales and other dispositions; and

(3) Except as provided in paragraph (d)(2) of this section, the term “sale on the installment plan” means—

(i) A sale of personal property by the taxpayer under any plan for the sale of personal property, which plan, by its terms and conditions, contemplates that each sale under the plan will be paid for in two or more payments; or

(ii) A sale of personal property by the taxpayer under any plan for the sale of personal property—

(A) Which plan, by its terms and conditions, contemplates that such sale will be paid for in two or more payments; and

(B) Which sale is in fact paid for in two or more payments.

(d) *Installment plans*—(1) *Traditional installment plans.* A traditional installment plan usually has the following characteristics:

(i) The execution of a separate installment contract for each sale or disposition of personal property; and

(ii) The retention by the dealer of some type of security interest in such property.

Normally, a sale under a traditional installment plan meets the requirements of paragraph (c)(3)(i) of this section.

(2) *Revolving credit plans.* Sales under a revolving credit plan (within the meaning of § 1.453A-2(c)(1))—

(i) Are treated, for taxable years beginning on or before December 31, 1986, as sales on the installment plan to the extent provided in § 1.453A-2, which provides for the application of the requirements of paragraph (c)(3)(ii) of this section to sales under revolving credit plans; and

(ii) Are not treated as sales on the installment plan for taxable years beginning after December 31, 1986.

(e) *Installment income of dealers in personal property*—(1) *In general.* The income from sales on the installment plan of a dealer may be ascertained by treating as income that proportion of

the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which the gross profit realized or to be realized on the total sales on the installment plan made during each year bears to the total contract price of all such sales made during that respective year. However, if the dealer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, the income from such sales may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which either:

(i) The gross profit realized or to be realized on the total credit sales made during each year bears to the total contract price of all credit sales during that respective year, or

(ii) The gross profit realized or to be realized on all sales made during each year bears to the total contract price of all sales made during that respective year.

A dealer who desires to compute income by the installment method shall maintain accounting records in such a manner as to enable an accurate computation to be made by such method in accordance with the provisions of this section, section 446, and § 1.446-1.

(2) *Gross profit and total contract price.* For purposes of paragraph (e)(1) of this section, in computing the gross profit realized or to be realized on the total sales on the installment plan, there shall be included in the total selling price and, thus, in the total contract price of all such sales.

(i) The amount of carrying charges or interest which is determined at the time of each sale and is added to the established cash selling price of such property and is treated as part of the selling price for customer billing purposes, and

(ii) In the case of sales made in taxable years beginning on or after January 1, 1960, the amount of carrying charges or interest determined with respect to such sales which are added contemporaneously with the sale on

the books of account of the seller but are treated as periodic service charges for customer billing purposes.

Any change in the amount of the carrying charges or interest in a year subsequent to the sale will not affect the computation of the gross profit for the year of sale but will be taken into account at the time the carrying charges or interest are adjusted. The application of this paragraph (e)(2) to carrying charges or interest described in paragraph (e)(2)(ii) of this section may be illustrated by the following example:

*Example.* X Corporation makes sales on the traditional installment plan. The customer's order specifies that the total price consists of a cash price plus a "time price differential" of 1½ percent per month on the outstanding balance in the customer's account, and the customer is billed in this manner. On its books and for purposes of reporting to stockholders, X Corporation consistently makes the following entries each month when it records its sales. A debit entry is made to accounts receivable (for the total price) and balancing credit entries are made to sales (for the established selling price) and to a reserve account for collection expense (for the amount of the time price differential). In computing the gross profit realized or to be realized on the total sales on the installment plan, the total selling price and, thus, the total contract price for purposes of this paragraph (e) would, with respect to sales made in taxable years beginning on or after January 1, 1960, include the time price differential.

(3) *Carrying charges not included in total contract price.* In the case of sales by dealers in personal property made during taxable years beginning after December 31, 1963, the income from which is returned on the installment method, if the carrying charges or interest with respect to such sales is not included in the total contract price, payments received with respect to such sales shall be treated as applying first against such carrying charges or interest.

(f) Other accounting methods. If the vendor chooses as a matter of consistent practice to return the income from installment sales on an accrual method (.) such a course is permissible.

(g) Records. In adopting the installment method of accounting the seller

must maintain such records as are necessary to clearly reflect income in accordance with this section, section 446 and §1.446-1.

(h) *Effective date.* This section applies for taxable years beginning after December 31, 1953, and ending after August 16, 1954, but generally does not apply to sales made after December 31, 1987, in taxable years ending after such date. For sales made after December 31, 1987, sales made by a dealer in personal or real property shall not be treated as sales on the installment plan. (However, see section 453(1)(2) for exceptions to this rule.)

[T.D. 8270, 54 FR 46377, Nov. 3, 1989]

**§ 1.453A-2 Treatment of revolving credit plans; taxable years beginning on or before December 31, 1986.**

(a) *In general.* If a dealer sells or otherwise disposes of personal property under a revolving credit plan—

(1) Such sales will be treated as sales on the installment plan to the extent provided in paragraph (c) of this section;

(2) Income from sales treated as sales on the installment plan under paragraph (c) of this section may be returned on the installment method; and

(3) Income returned on the installment method is computed in accordance with §1.453A-1, except that—

(i) The gross profit on such sales is computed without regard to §1.453A-1(e)(2);

(ii) Under the circumstances described in paragraph (c)(6)(vi) of this section, the taxpayer may, in computing income for a taxable year, treat all such sales as sales made in such taxable year for purposes of applying the gross profit percentage; and

(iii) The rule contained in §1.453A-1(e)(3) is applied in accordance with paragraph (c)(6)(v) of this section.

(b) *Coordination with traditional installment plan.* A dealer who makes sales of personal property under both a revolving credit plan and a traditional installment plan (1) may elect to report only sales under the traditional installment plan on the installment method, (2) may elect to report only sales under the revolving credit plan on the installment method, or (3) may

elect to report both sales under the revolving credit plan and the traditional installment plan on the installment method.

(c) *Revolving credit plans.* (1) To the extent provided in this paragraph (c) sales under a revolving credit plan will be treated as sales on the installment plan. The term “revolving credit plan” includes cycle budget accounts, flexible budget accounts, continuous budget accounts, and other similar plans or arrangements for the sale of personal property under which the customer agrees to pay each billing-month (as defined in paragraph (c)(6)(iii) of this section) a part of the outstanding balance of the customer’s account. Sales under a revolving credit plan do not constitute sales on the installment plan merely by reason of the fact that the total debt at the end of a billing-month is paid in installments. The terms and conditions of a revolving credit plan do not contemplate that each sale under the plan will be paid for in two or more payments and thus do not meet the requirements of §1.453A-1(c)(3)(i). In addition, since under a revolving credit plan payments are not generally applied to liquidate any particular sale, and since the terms and conditions of such plan contemplate that account balances may be paid in full or in installments, it is generally impossible to determine that a particular sale under a revolving credit plan is to be or is in fact paid for in installments so as to meet the requirements of §1.453A-1 (c)(3)(ii). However, paragraphs (c) (2) and (3) of this section provides rules under which a certain percentage of charges under a revolving credit plan will be treated as sales on the installment plan. For purposes of arriving at this percentage, these rules, in general, treat as sales on the plan those sales under a revolving installment credit plan:

(i) Which are of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments and

(ii) Which are charged to accounts on which subsequent payments indicate that such sales are being paid for in two or more installments.

(2)(i) The percentage of charges under a revolving credit plan which will be

treated as sales on the installment plan shall be computed by making an actual segregation of charges in a probability sample of the revolving credit accounts and by applying the rules contained in paragraph (c)(3) of this section to determine what percentage of charges in the sample is to be treated as sales on the installment plan. (See paragraph (c)(5) of this section for rules to be used if some of the sales under a revolving credit plan are non-personal property sales (as defined in paragraph (c)(6)(iv) of this section.) Such segregation shall be made of charges which make up the balances in the sample accounts as of the end of each customer's last billing-month ending within the taxable year. (See paragraph (c)(6)(v) of this section for rules to be used in determining which charges make up the balance of an account.) However, in making such segregation, any account to which a sale is charged during the taxable year on which no payment is credited after the billing-month within which the sale is made (hereinafter called the "billing-month of sale") and on or before the end of the first billing-month ending in the taxpayer's next taxable year shall be disregarded and not taken into account in the determination of what percentage of charges in the sample is to be treated as sales on the installment plan. In order to obtain a probability sample, the accounts shall be selected in accordance with generally accepted probability sampling techniques. The appropriateness of the sampling technique and the accuracy and reliability of the results obtained must, if requested, be demonstrated to the satisfaction of the district director. If the district director is not satisfied that the taxpayer's sample is appropriate or that the results obtained are accurate and reliable, the taxpayer shall recompute the sample percentage or make appropriate adjustments to the original computations in a manner satisfactory to the district director. The taxpayer shall maintain records in sufficient detail to show the method of computing and applying the sample.

(ii) For taxable years ending before January 31, 1964, a taxpayer who has reported for income tax purposes all or a portion of sales under a revolving

credit plan as sales on the installment method may apply the percentage obtained for the first taxable year ending on or after such date in determining the percentage of charges under a revolving credit plan for such prior taxable year (or years) which will be treated as sales on the installment plan. However, in computing the percentage to be applied in determining the percentage of charges under a revolving credit plan which will be treated as sales on the installment plan for such prior taxable year (or years), the rule stated in § 1.453A-1(e)(3) shall not apply. See paragraph (c)(6)(v) of this section for rules relating to the application of payments to finance charges for such prior taxable years.

(3) For the purpose of determining the percentage described in paragraph (c)(2) of this section, a charge under a revolving credit plan will be treated as a sale on the installment plan only if such charge is a sale (as defined in paragraph (c)(6) of this section) and meets the following requirements:

(i) The sale must be of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments. If the aggregate of sales charged during a billing-month to an account under a revolving credit plan exceeds the required monthly payment, then all sales during such billing-month shall be considered to be of the type which the terms and conditions of such plan contemplate will be paid for in two or more installments. The required monthly payment shall be the amount of the payment which the terms and conditions of the revolving credit contract require the customer to make with respect to a billing-month. If the amount of such payment is not fixed at the date the contract is entered into, but is dependent upon the balance of the account, then such amount shall be the amount that the customer is required to pay (but not including any past-due payments) as shown on the statement either:

(A) For the last billing-month ending within the taxpayer's taxable year or

(B) For the billing-month of sale, whichever method the taxpayer adopts for all accounts. A taxpayer shall not change such method of determining the required monthly payment based upon

the balance of the account without obtaining the consent of the district director. In any case where the required monthly payment is not set in accordance with a consistent method used during the entire taxable year, the district director may determine the required monthly payment in accordance with the method used during the major portion of such taxable year if the use of such method is necessary in order to reflect properly the income from sales under a revolving credit plan. The requirements stated in this paragraph (c)(3)(i) may be illustrated by the following examples:

*Example 1.* Under the terms of a revolving credit plan the required monthly payment to be made by customer A is \$20. During the billing-month ending in December, sales aggregating \$80 are charged to customer A's account, and during the next billing-month, ending in January, sales aggregating \$19.95 and finance charges of \$.60 are charged to A's account. Since the aggregate of sales charged to customer A's account during the billing-month ending in December (\$80) exceeds the required monthly payment (\$20), the terms and conditions of the plan contemplate that the sales charged during such billing-month are of the type which will be paid for in two or more installments. Since the aggregate of sales charged to customer A's account during the billing-month ending in January (\$19.95) does not exceed the required monthly payment, the sales making up the aggregate of sales in such billing-month are not of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments.

*Example 2.* The terms of a revolving credit plan require a payment of 20 percent of the balance of the customer's account as of the end of the billing-month for which the statement is rendered. A customer makes purchases aggregating \$25 in the customer's next to the last billing-month ending within the taxpayer's taxable year, and the balance at the end of that month is \$150. At the end of the customer's last billing-month ending within the taxpayer's taxable year, the balance of the account has decreased to \$110. If the taxpayer determines the required monthly payment by reference to the payment required on the statement for the last billing-month ending within the taxable year and applies such method consistently to all accounts, then the sales making up the \$25 aggregate of sales are of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments. Although such aggregate was less than the \$30 payment (20% × \$150) required on the statement rendered for the

billing-month of sales. It was more than the \$22 (20% × \$110) that the customer was required to pay on the statement rendered for his last billing-month ending within the taxable year, and thus meets the requirements of this paragraph (c)(3)(i). If, however, the taxpayer determines the required monthly payment by reference to the payment required on the statement for the billing-month of sale, then the sales making up the aggregate of sales during such billing-month do not meet the requirements of this paragraph (c)(3)(i) because such aggregate was less than the \$30 payment required on the statement rendered for such month.

(ii) The sale must be charged to an account on which the first payment after the billing-month of sale indicates that the sale is being paid in installments. The first payment after the billing-month of sale indicates that the sale is being paid in installments if, and only if, such payment is an amount which is less than the balance of the account as of the close of the billing-month of sale. For purposes of this paragraph (c)(3)(ii), such balance shall be reduced by any return or allowance credited to the account after the close of the billing-month of sale and before the close of the billing-month within which the first payment after the billing-month of sale is credited to the account, unless the taxpayer demonstrates that the return or allowance was attributable to a charge made in a month subsequent to the billing-month of sale. The requirements stated in this paragraph (c)(3)(ii) may be illustrated by the following examples, in which it is assumed that the taxpayer's annual accounting period ends on January 31.

*Example 1.* Customer A's revolving credit account shows the following sales and payments:

Month ending	Aggregate sales in month	Payments	Balance
December 20 .....	\$150	0	\$150
January 20 .....	75	\$30	195
February 20 .....	0	195	0

All sales made in the billing-month ending December 20 meet the requirements of this paragraph (c)(3)(ii) because the first payment on the account after such billing-month (\$30) was less than the balance of the account as of the close of such billing-month (\$150); and none of the sales made in the billing-month ending January 20 meets the requirements of

§ 1.453A-2

26 CFR Ch. I (4-1-17 Edition)

this paragraph (c)(3)(ii) because the balance of the account as of the end of such billing-month was liquidated in one payment. By application of the rules of paragraph (c)(6)(v) of this section, the balance in the account as of the last billing-month ending in the taxable year (\$195) consists of \$120 of the \$150 of sales made in the billing-month ending December 20 and all of the \$75 of sales made in the billing-month ending January 20. Therefore, \$120 of the account balance meets the requirements of this paragraph (c)(3)(ii) and \$75 does not.

*Example 2.* Customer B's revolving credit account shows the following sales and payments:

Month ending	Aggregate sales in month	Payments	Balance
December 20 .....	\$ 50	0	\$ 50
January 20 .....	100	0	150
February 20 .....	0	\$50	100

None of the sales made in the billing-month ending December 20 meets the requirements of this paragraph (c)(3)(ii) because the first payment credited to the account after such billing-month (\$50) is not less than the balance of the account as of the close of such month (\$50). All of the sales made in the billing-month ending January 20 meet the requirements of this paragraph (c)(3)(ii) because the first payment after such billing-month (\$50) is less than the balance of the account as of the close of such month (\$150).

Month ending	Aggregate sales in month <sup>1</sup>	Returns and allowances	Payments	Finance charges	Balance
January 20 .....	\$15.00	0	0	0	\$15.00
February 20 .....	0	0	0	\$0.15	15.15

<sup>1</sup> Including sales of personal property and nonpersonal property sales.

For purposes of the segregation provided for in paragraph (c)(2)(i) of this section, customer A's account will be disregarded and not taken into account in the determination of what percentage of charges in the sample is to be treated as sales on the installment plan because no payment was credited to that account after the billing-month of sale and on or before February 20.

*Example 2.* This example is applicable with respect to sales made during taxable years beginning before January 1, 1964. Under the terms of corporation X's revolving credit plan, payments are required in accordance with the following schedule:

Month ending	Aggregate sales in month <sup>1</sup>	Returns and allowances	Payments	Finance charges	Balances
October 20 .....	\$55.00	0	0	0	\$55.00

*Example 3.* Customer C's revolving credit account shows the following purchases and credits:

Month ending	Item	Charges	Credits	Balance
January 20 .....	Coat .....	\$55	.....	.....
	Dress .....	40	.....	.....
	Shirt .....	5	.....	\$100
February 20 .....	Return .....	.....	\$5	.....
	Payments .....	.....	95	0

None of the sales made in the billing-month ending January 20 meets the requirements of this paragraph (c)(3)(ii) because the first payment credited to the account after such billing-month (\$95) was equal to the balance of the account as of the end of such billing-month, \$95. For this purpose, the balance of \$100 is reduced by the \$5 return which was credited to the account after the close of the billing-month of sale and before the close of the billing-month within which the first payment after the billing-month of sale is credited.

(4) The provisions of paragraphs (c) (2) and (3) of this section may be illustrated by the following examples in which it is assumed that the taxpayer is a dealer whose annual accounting period ends on January 31.

*Example 1.* Customer A's revolving credit ledger account shows the following:

	Required monthly payment
Unpaid balance:	
0 to \$99.99 .....	\$20
\$100 to \$199.99 .....	40
\$200 to \$299.99 .....	60

Customer B's revolving credit ledger account for the period beginning on September 21, 1963, and ending February 20, 1964, shows the following:

Month ending	Aggregate sales in month <sup>1</sup>	Returns and allowances	Payments	Finance charges	Balances
November 20 .....	45.00	0	\$20.00	\$0.35	80.35
December 20 .....	20.00	0	20.00	.60	80.95
January 20 .....	26.00	\$5.00	20.00	.61	82.56
February 20 .....	0	10.00	72.56	0	0

<sup>1</sup>Including sales of personal property and nonpersonal property sales.

The three \$20 payments and the \$5 return or allowance made in the billing-months ending in the taxable year are applied under the rules in paragraph (c)(6)(v) of this section to liquidate the earliest outstanding charges, first to the \$55 aggregate of sales in the billing-month ending October 20 and next to \$10 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, \$82.56, is made up as follows:

Remainder of sales in billing-month ending Nov. 20 (\$45 - \$10) .....	\$35.00
Finance charges for billing-month ending Nov. 20 .....	0.35
Sales for billing-month ending Dec. 20 .....	20.00
Finance charge for billing-month ending Dec. 20 .....	0.60
Sales for billing-month ending Jan. 20 .....	26.00
Finance charge for billing-month ending Jan. 20 .....	0.61
<b>Total .....</b>	<b>82.56</b>

The sales of \$35 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of paragraph (c)(3)(i) of this section because the aggregate of sales charged during such billing-month (\$45) exceeds the required monthly payment (\$20), and such sales meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after the billing-month of sale (\$20) is an amount less than the balance of the account as of the close of such month (\$80.35). Therefore, \$35 of sales will be treated as sales on the installment plan. The \$20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of paragraph (c)(3)(i) of this section because it is in an amount which does not exceed the required monthly payment (\$20). (The finance charge of \$0.60 added in the billing-month does not enter into the determination of the aggregate of sales for the month because the term "sales" (as defined in paragraph (c)(6)(i) of this section does not include finance charges). The \$26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of paragraph (c)(3)(i) of this section because the first payment after such billing-month (\$72.56) was equal to the balance of the account as of the close of such billing-month (\$72.56). For this purpose, the balance of \$82.56 is reduced by the \$10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the \$82.56 balance of B's account as of the close of the last bill-

ing-month ending within corporation X's taxable year, \$35 will be treated as sales on the installment plan for purposes of determining the percentage provided for paragraph (c)(2) of this section.

*Example 3.* This example is applicable with respect to sales made during taxable years beginning after December 31, 1963. Assume the facts in Example 2, except that Customer B's revolving credit ledger account is for the period beginning on September 21, 1964 and ending February 20, 1965. Since payments received are first used to liquidate any outstanding finance charges under the rule in paragraph (c)(6)(v) of this section, the \$20 payment in December liquidated the \$0.35 finance charge accrued at the end of the November billing-month and the \$20 payment in January liquidated the \$0.60 finance charge accrued at the end of the December billing-month. The balance of the three \$20 payments (\$59.05) and the \$5 return or allowance are applied (under the rules in paragraph (c)(6)(v) of this section) to liquidate the earliest outstanding sales, first to the \$55 aggregate of sales in the billing-month ending October 20 and next to \$9.05 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, \$82.56, is made up as follows:

Remainder of sales in billing-month ending Nov. 20 (\$45 - \$9.05) .....	\$35.95
Sales for billing-month ending Dec. 20 .....	20.00
Sales for billing-month ending Jan. 20 .....	26.00
Finance charge for billing-month ending Jan. 20 .....	0.61
<b>Total .....</b>	<b>82.56</b>

The sales of \$35.95 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of paragraph (c)(3)(i) of this section because the aggregate of sales charged during such billing-month (\$45) exceeds the required monthly payment (\$20), and such sales meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after the billing-month of sale (\$20) is an amount less than the balance of the account as of the close of such month (\$80.35). Therefore, \$35.95 of sales will be treated as sales on the installment plan. The \$20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of paragraph (c)(3)(i) of this section because it is in an amount which does not exceed the

required monthly payment (\$20). The \$26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of paragraph (c)(3)(ii) of this section because the first payment after such billing-month (\$72.56) was equal to the balance of the account as of the close of such billing-month (\$72.56). For this purpose, the balance of \$82.56 is reduced by the \$10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the \$82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year \$35.95 will be treated as sales on the installment plan for purposes of determining the percentage provided for in paragraph (c)(2) of this section.

(5) Sales under a revolving credit plan which are nonpersonal property sales (as defined in paragraph (c)(6)(iv) of this section) do not constitute sales on the installment plan. Therefore, the charges under a revolving credit plan must be reduced by the nonpersonal property sales, if any, under such plan, before application of the sample percentage as provided for in paragraph (c)(2)(i) of this section. The taxpayer may treat as the nonpersonal property sales under the plan for the taxable year an amount which bears the same ratio to the total sales under the revolving credit plan made in the taxable year as the total nonpersonal property sales made in such year bears to the total sales made in such year.

(6) For purposes of this paragraph (c)—

(i) The term "sales" includes sales of services, such as a charge for watch repair, as well as sales of property, but does not include finance or service charges.

(ii) The term "charges" includes sales of services and property as well as finance or service charges.

(iii) A billing-month is that period of time for which a periodic statement of charges and credits is rendered to a customer.

(iv) The term "nonpersonal property sales" means all sales which are not sales of personal property made by the taxpayer. Thus, sales of a department leased by the taxpayer to another are nonpersonal property sales. Likewise, charges for services rendered by the taxpayer are nonpersonal property sales unless such services are incidental to and rendered contemporaneously with the sale of personal prop-

erty, in which case such charges shall be considered as constituting part of the selling price of such property.

(v) Except as otherwise provided in this paragraph (c)(6)(v), each payment received from a customer under a revolving credit plan before the close of the last billing-month ending in the taxable year shall be applied to liquidate the earliest outstanding charges under such plan, notwithstanding any rule of law or contract provision to the contrary. For purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in the taxable year, the taxpayer may apply returns and allowances which are credited before the close of the last billing-month ending in the taxable year either (A) to liquidate or reduce the charge for the specific item so returned or for which an allowance is permitted, or (B) to liquidate or reduce the earliest outstanding charges. The method so selected for applying returns and allowances shall be followed on a consistent basis from year to year unless the district director consents to a change. Additionally, finance or service charges which are computed on the basis of the balance of the account at the end of the previous billing-month (usually reduced by payments during the current billing-month) are accrued at the end of the current billing-month and are therefore considered, for purposes of determining the earliest outstanding charges, as charged to the account after any sales made during the current billing month. However, for purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in a taxable year which began after December 31, 1963, payments received during such year shall be applied first against any finance or service charges which were outstanding at the time such payment was received. The preceding sentence shall not apply with respect to a computation made for purposes of applying the rule described in paragraph (c)(2)(ii) of this section.

(vi) The taxpayer shall allocate those sales under a revolving credit plan which are treated as sales on the installment plan to the proper year of sale in order to apply the appropriate

gross profit percentage as provided for in § 1.453A-1(e). This allocation shall be made on the basis of the percentages of charges treated as sales on the installment plan which are attributable to each taxable year as determined in the sample of accounts described in paragraph (c)(2) of this section. However, if the taxpayer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, all sales may be considered as being made in the taxable year for purposes of applying the gross profit percentage.

(7) The provisions of this paragraph (c) may be illustrated by the following example:

*Example.* Corporation X is a dealer and has elected to report on the installment method those sales under its revolving credit plan which may be treated as sales on the installment plan. Corporation X's taxable year ends on January 31, and the total balance of all its revolving credit accounts as of January 31, 1964, is \$2,000,000. The total sales made in the taxable year are \$10,000,000 of which \$500,000 are nonpersonal property sales. The gross profit percentage realized or to be realized on all sales made in the taxable year is 40 percent. The amount of the gross profit contained in the year-end balance of \$2,000,000 which may be deferred to succeeding years is computed as follows:

(i) In order to reduce the charges appearing in the year-end balance of revolving credit accounts receivable by the nonpersonal property sales contained therein, corporation X determines the amount of such nonpersonal property sales under the method permitted in paragraph (c)(5) of this section. Corporation X first determines the ratio which total nonpersonal property sales made during the year (\$500,000) bears to total sales made during the year (\$10,000,000), and then applies the percentage (5 percent) thus obtained to the year-end balance of revolving credit accounts receivable (\$2,000,000). The nonpersonal property sales thus determined (\$100,000) is subtracted from such year-end balance to obtain the charges under the revolving credit plan appearing in the year-end balance (\$1,900,000) to which the sample percentage is to be applied.

(ii) In accordance with generally accepted sampling techniques, the taxpayer selects a probability sample of all revolving credit accounts having balances for billing-months ending in January 1964. The technique employed results in a random selection of accounts with total balances of \$100,000.

(iii) Analysis of these sample accounts discloses that of the \$100,000 of balances, \$10,000 of balances are in accounts on which no pay-

ment was credited after a billing-month of sale and on or before the end of the first billing-month ending in the taxable year beginning February 1, 1964. These balances are, therefore, disregarded and not taken into account in the determination of what percentage of sales in the sample is to be treated as sales on the installment plan. Of the remaining \$90,000 of balances, the taxpayer determines, by analyzing the ledger cards in the sample, that \$63,000 of balances are composed of sales which meet the requirements of paragraphs (c)(3) (i) and (ii) of this section and are thus treated as sales on the installment plan. The remaining \$27,000 of balances either did not meet the requirements of paragraphs (c)(3) (i) and (ii) of this section or were not sales (as defined in paragraph (c)(6)(i) of this section). The percentage of charges in the sample treated as sales on the installment plan is, therefore, 70 percent (\$63,000 ÷ \$90,000).

(iv) The charges in the year-end balance which are to be treated as sales on the installment plan, \$1,330,000, are computed by multiplying the charges to which the sample percentage is applied (\$1,900,000) by the sample percentage (70 percent).

(v) The deferred gross profit attributable to sales under the revolving credit plan for the taxable year, \$532,000, is determined by multiplying the amount treated as sales on the installment plan (\$1,330,000), by the gross profit percentage (40 percent). (Corporation X will be able to demonstrate to the satisfaction of the district director that (A) since the gross profit percentage for all sales does not vary materially from the gross profit percentage for all sales made under the revolving credit plan, (B) since only an insubstantial amount of sales included in year-end account balances was made prior to the taxable year, and (C) since the prior year's gross profit percentage does not vary materially from the gross profit percentage for the taxable year, income from sales on the installment plan will be clearly reflected by applying the current year's gross profit percentage for all sales under the revolving credit plan treated as sales on the installment plan.)

(d) *Effective date.* This section applies for taxable years beginning after December 31, 1953, and ending after August 16, 1954, but does not apply for any taxable year beginning after December 31, 1986. For taxable years beginning after December 31, 1986, sales under a revolving credit plan shall not be treated as sales on the installment plan.

[T.D. 8269, 54 FR 46375, Nov. 3, 1989]

**§ 1.453A-3 Requirements for adoption of or change to installment method by dealers in personal property.**

(a) *In general.* A dealer (within the meaning of § 1.453A-1(c)(1)) may adopt or change to the installment method for a type or types of sales on the installment plan (within the meaning of § 1.453A-1(c)(3) and (d)) in the manner prescribed in this section. This section applies only to dealers and only with respect to their sales on the installment plan.

(b) *Time and manner of electing installment method reporting—(1) Time for election.* An election to adopt or change to the installment method for a type or types of sales must be made on an income tax return for the taxable year of the election, filed on or before the time specified (including extensions thereof) for filing such return.

(2) *Adoption of installment method.* A taxpayer who adopts the installment method for the first taxable year in which sales are made on an installment plan of any kind must indicate in the income tax return for that taxable year that the installment method of accounting is being adopted and specify the type or types of sales included within the election. If a taxpayer in the year of the initial election made only one type of sale on the installment plan, but during a subsequent taxable year makes another type of sale on the installment plan and adopts the installment method for that other type of sale, the taxpayer must indicate in the income tax return for the subsequent year that an election is being made to adopt the installment method of accounting for the additional type of sale.

(3) *Change to installment method.* A taxpayer who changes to the installment method for a particular type or types of sales on the installment plan in accordance with this section must, for each type of sale on the installment plan for which the installment method is to be used, attach a separate statement to the income tax return for the taxable year with respect to which the change is made. Each statement must show the method of accounting used in computing taxable income before the change and the type of sale on the in-

stallment plan for which the installment method is being elected.

(4) *Deemed elections.* A dealer (including a person who is a dealer as a result of the recharacterization of transactions as sales) is deemed to have elected the installment method if the dealer treats a sale on the installment plan as a transaction other than a sale and fails to report the full amount of gain in the year of the sale. For example, if a transaction treated by a dealer as a lease is recharacterized by the Internal Revenue Service as a sale on the installment plan, the dealer will be deemed to have elected the installment method assuming the dealer failed to report the full amount of gain in the year of the transaction.

(c) *Consent.* A dealer may adopt or change to the installment method for sales on the installment plan without the consent of the Commissioner. However, a dealer may not change from the installment method to the accrual method of accounting or to any other method of accounting without the consent of the Commissioner.

(d) *Cut-off method for amounts previously accrued.* An election to change to the installment method for a type of sale applies only with respect to sales made on or after the first day of the taxable year of change. Thus, payments received in the taxable year of the change, or in subsequent years, in respect of an installment obligation which arose in a taxable year prior to the taxable year of change are not taken into account on the installment method, but rather must be accounted for under the taxpayer's method of accounting in use in the prior year.

(e) *Effective date.* This section applies to sales by dealers in taxable years ending after October 19, 1980, but generally does not apply to sales made after December 31, 1987. For sales made after December 31, 1987, sales by a dealer in personal or real property shall not be treated as sales on the installment plan. (However, see section 453(1)(2) for certain exceptions to this rule.) For rules relating to sales by dealers in taxable years ending before October 20, 1980, see 26 CFR 1.453-7 and 1.453-8 (rev. as of April 1, 1987).

[T.D. 8269, 54 FR 46375, Nov. 3, 1989]

**§ 1.454-1 Obligations issued at discount.**

(a) *Certain non-interest-bearing obligations issued at discount*—(1) *Election to include increase in income currently.* If a taxpayer owns—

(i) A non-interest-bearing obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals (other than an obligation issued by a corporation after May 27, 1969, as to which ratable inclusion of original issue discount is required under section 1232(a)(3)), or

(ii) An obligation of the United States, other than a current income obligation, in which he retains his investment in a matured series E U.S. savings bond, or

(iii) A nontransferable obligation (whether or not a current income obligation) of the United States for which a series E U.S. savings bond was exchanged (whether or not at final maturity) in an exchange upon which gain is not recognized because of section 1037(a) (or so much of section 1031(b) as relates to section 1037),

and if the increase, if any, in redemption price of such obligation described in subdivision (i), (ii), or (iii) of this subparagraph during the taxable year (as described in subparagraph (2) of this paragraph) does not constitute income for such year under the method of accounting used in computing his taxable income, then the taxpayer may, at his election, treat the increase as constituting income for the year in which such increase occurs. If the election is not made and section 1037 (or so much of section 1031 as relates to section 1037) does not apply, the taxpayer shall treat the increase as constituting income for the year in which the obligation is redeemed or disposed of, or finally matures, whichever is earlier. Any such election must be made in the taxpayer's return and may be made for any taxable year. If an election is made with respect to any such obligation described in subdivision (i), (ii), or (iii) of this subparagraph, it shall apply also to all other obligations of the type described in such subdivisions owned by the taxpayer at the beginning of the first taxable year to which the election applies, and to those thereafter acquired by him, and shall be binding for

the taxable year for which the return is filed and for all subsequent taxable years, unless the Commissioner permits the taxpayer to change to a different method of reporting income from such obligations. See section 446(e) and paragraph (e) of § 1.446-1, relating to requirement respecting a change of accounting method. Although the election once made is binding upon the taxpayer, it does not apply to a transferee of the taxpayer.

(2) *Amount of increase in case of non-interest-bearing obligations.* In any case in which an election is made under section 454, the amount which accrues in any taxable year to which the election applies is measured by the actual increase in the redemption price occurring in that year. This amount does not accrue ratably between the dates on which the redemption price changes. For example, if two dates on which the redemption price increases (February 1 and August 1) fall within a taxable year and if the redemption price increases in the amount of 50 cents on each such date, the amount accruing in that year would be \$1 (\$0.50 on February 1 and \$0.50 on August 1). If the taxpayer owns a non-interest-bearing obligation of the character described in subdivision (i), (ii), or (iii) of subparagraph (1) of this paragraph acquired prior to the first taxable year to which his election applies, he must also include in gross income for such first taxable year (i) the increase in the redemption price of such obligation occurring between the date of acquisition of the obligation and the first day of such first taxable year and (ii), in a case where a series E bond was exchanged for such obligation, the increase in the redemption price of such series E bond occurring between the date of acquisition of such series E bond and the date of the exchange.

(3) *Amount of increase in case of current income obligations.* If an election is made under section 454 and the taxpayer owns, at the beginning of the first taxable year to which the election applies, a current income obligation of the character described in subparagraph (1)(iii) of this paragraph acquired prior to such taxable year, he must also include in gross income for such first taxable year the increase in the

redemption price of the series E bond which was surrendered to the United States in exchange for such current income obligation; the amount of the increase is that occurring between the date of acquisition of the series E bond and the date of the exchange.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

*Example 1.* Throughout the calendar year 1954, a taxpayer who uses the cash receipts and disbursements method of accounting holds series E U.S. savings bonds having a maturity value of \$5,000 and a redemption value at the beginning of the year 1954 of \$4,050 and at the end of the year 1954 of \$4,150. He purchased the bonds on January 1, 1949, for \$3,750, and holds no other obligation of the type described in this section. If the taxpayer exercises the election in his return for the calendar year 1954, he is required to include \$400 in taxable income with respect to such bonds. Of this amount, \$300 represents the increase in the redemption price before 1954 and \$100 represents the increase in the redemption price in 1954. The increases in redemption value occurring in subsequent taxable years are includible in gross income for such taxable years.

*Example 2.* In 1958 B, a taxpayer who uses the cash receipts and disbursements method of accounting and the calendar year as his taxable year, purchased for \$7,500 a series E United States savings bond with a face value of \$10,000. In 1965, when the stated redemption value of the series E bond is \$9,760, B surrenders it to the United States in exchange solely for a \$10,000 series H U.S. current income savings bond in an exchange qualifying under section 1037(a), after paying \$240 additional consideration. On the exchange of the series E bond for the series H bond in 1965, B realizes a gain of \$2,260 (\$9,760 less \$7,500), none of which is recognized for that year by reason of section 1037(a). B retains the series H bond and redeems it at maturity in 1975 for \$10,000, but in 1966 he exercises the election under section 454(a) in his return for that year with respect to five series E bonds he purchased in 1960. B is required to include in gross income for 1966 the increase in redemption price occurring before 1966 and in 1966 with respect to the series E bonds purchased in 1960; he is also required to include in gross income for 1966 the \$2,260 increase in redemption price of the series E bond which was exchanged in 1965 for the series H bond.

(b) *Short-term obligations issued on a discount basis.* In the case of obligations of the United States or any of its possessions, or of a State, or Territory, or any political subdivision thereof, or of

the District of Columbia, issued on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, the amount of discount at which such obligation originally sold does not accrue until the date on which such obligation is redeemed, sold, or otherwise disposed of. This rule applies regardless of the method of accounting used by the taxpayer. For examples illustrating rules for computation of income from sale or other disposition of certain obligations of the type described in this paragraph, see section 1221 and the regulations thereunder.

(c) *Matured U.S. savings bonds—(1) Inclusion of increase in income upon redemption or final maturity.* If a taxpayer (other than a corporation) holds—

(i) A matured series E U.S. savings bond,

(ii) An obligation of the United States, other than a current income obligation, in which he retains his investment in a matured series E U.S. savings bond, or

(iii) A nontransferable obligation (whether or not a current income obligation) of the United States for which a series E U.S. savings bond was exchanged (whether or not at final maturity) in an exchange upon which gain is not recognized because of section 1037(a) (or so much of section 1031(b) as relates to section 1037(a)),

the increase in redemption price of the series E bond in excess of the amount paid for such series E bond shall be included in the gross income of such taxpayer for the taxable year in which the obligation described in subdivision (i), (ii), or (iii) of this subparagraph is redeemed or disposed of, or finally matures, whichever is earlier, but only to the extent such increase has not previously been includible in the gross income of such taxpayer or any other taxpayer. If such obligation is partially redeemed before final maturity, or partially disposed of by being partially reissued to another owner, such increase in redemption price shall be included in the gross income of such taxpayer for such taxable year on a basis proportional to the total denomination of obligations redeemed or disposed of. The provisions of section 454 (c) and of this subparagraph shall not apply in the

case of any taxable year for which the taxpayer's taxable income is computed under an accrual method of accounting or for a taxable year for which an election made by the taxpayer under section 454(a) and paragraph (a) of this section applies. For rules respecting the character of the gain realized upon the disposition or redemption of an obligation described in subdivision (iii) of this subparagraph, see paragraph (b) of §1.1037-1.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples, in which it is assumed that the taxpayer uses the cash receipts and disbursements method of accounting and the calendar year as his taxable year:

*Example 1.* On June 1, 1941, A purchased for \$375 a series E U.S. savings bond which was redeemable at maturity (10 years from issue date) for \$500. At maturity of the bond, A exercised the option of retaining the matured series E bond for the 10-year extended maturity period. On June 2, 1961, A redeemed the series E bond, at which time the stated redemption value was \$674.60. A never elected under section 454(a) to include the annual increase in redemption price in gross income currently. Under section 454(c), A is required to include \$299.60 (\$674.60 less \$375) in gross income for 1961 by reason of his redemption of the bond.

*Example 2.* The facts are the same as in Example 2 in paragraph (a)(4) of this section. On redemption of the series H bond received in the exchange qualifying under section 1037(a), B realizes a gain of \$2,260, determined as provided in Example 5 in paragraph (b)(4) of §1.1037-1. None of this amount is includible in B's gross income for 1975, such amount having already been includible in his gross income for 1966 because of his election under section 454(a).

*Example 3.* C, who had elected under section 454(a) to include the annual increase in the redemption price of his non-interest-bearing obligations in gross income currently, owned a \$1,000 series E U.S. savings bond, which was purchased on October 1, 1949, for \$750, C died on February 1, 1955, when the redemption value of the bond was \$820. The bond was immediately reissued to D, his only heir, who has not made an election under section 454(a). On January 15, 1960, when the redemption value of the bond is \$1,000, D surrenders it to the United States in exchange solely for a \$1,000 series H U.S. savings bond in an exchange qualifying under the provisions of section 1037(a). For 1960 D properly does not return any income from the exchange of bonds, although he returns the interest payments on the series H bond for the taxable

years in which they are received. On September 1, 1964, prior to maturity of the series H bond, D redeems it for \$1,000. For 1964, D must include \$180 in gross income under section 454(c) from the redemption of the series H bond, that is, the amount of the increase in the redemption price of the series E bond (\$1,000 less \$820) occurring between February 1, 1955, and January 15, 1960, the period during which he owned the series E bond.

[T.D. 6500, 25 FR 11719, Nov. 26, 1960, as amended by T.D. 6935, 32 FR 15820, Nov. 17, 1967; T.D. 7154, 36 FR 24997, Dec. 28, 1971]

#### §1.455-1 Treatment of prepaid subscription income.

Effective with respect to taxable years beginning after December 31, 1957, section 455 permits certain taxpayers to elect with respect to a trade or business in connection with which prepaid subscription income is received, to include such income in gross income for the taxable years during which a liability exists to furnish or deliver a newspaper, magazine, or other periodical. If a taxpayer does not elect to treat prepaid subscription income under the provisions of section 455, such income is includible in gross income for the taxable year in which received by the taxpayer, unless under the method or practice of accounting used in computing taxable income such amount is to be properly accounted for as of a different period.

[T.D. 6591, 27 FR 1798, Feb. 27, 1962]

#### §1.455-2 Scope of election under section 455.

(a) If a taxpayer makes an election under section 455 and §1.455-6 with respect to a trade or business, all prepaid subscription income from such trade or business shall be included in gross income for the taxable years during which the liability exists to furnish or deliver a newspaper, magazine, or other periodical. Such election shall be applicable to all prepaid subscription income received in connection with the trade or business for which the election is made; except that the taxpayer may further elect to include in gross income for the taxable year of receipt (as described in section 455(d)(3) and paragraph (c) of §1.455-5) the entire amount of any prepaid subscription income if the liability from which it arose is to end within 12 months after the date of

### § 1.455-3

### 26 CFR Ch. I (4-1-17 Edition)

receipt, hereinafter sometimes referred to as “within 12 months” election.

(b) If the taxpayer is engaged in more than one trade or business in which a liability is incurred to furnish or deliver a newspaper, magazine, or other periodical, a separate election 455 with respect to each such trade or business. In addition, a taxpayer may make a separate “within 12 months” election for each separate trade or business for which it has made an election under section 455.

(c) An election made under section 455 shall be binding for the first taxable year for which the election is made and for all subsequent taxable years, unless the taxpayer secures the consent of the Commissioner to the revocation of such election. Thus, in any case where the taxpayer has elected a method prescribed by section 455 for the inclusion of prepaid subscription income in gross income, such method of reporting income may not be changed without the prior approval of the Commissioner. In order to secure the Commissioner’s consent to the revocation of such election, an application must be filed with the Commissioner in accordance with section 446(e) and the regulations thereunder. For purposes of subtitle A of the Code, the computation of taxable income under an election made under section 455 shall be treated as a method of accounting. For adjustments required by changes in method of accounting, see section 481 and the regulations thereunder.

(d) An election made under section 455 shall not apply to any prepaid subscription income received before the first taxable year to which the election applies. For example, Corporation M, which computes its taxable income under an accrual method of accounting and files its income tax returns on the calendar year basis, publishes a monthly magazine and customarily sells subscriptions on a 3-year basis. In 1958 it received \$135,000 of 3-year prepaid subscription income for subscriptions beginning during 1958, and in 1959 it received \$142,000 of prepaid subscription income for subscriptions beginning after December 31, 1958. In February 1959 it elected, with the consent of the Commissioner, to report its prepaid subscription income under the provi-

sions of section 455 for the year 1959 and subsequent taxable years. The \$135,000 received in 1958 from prepaid subscriptions must be included in gross income in full in that year, and no part of such 1958 income shall be allocated to the years 1959, 1960, and 1961 during which M was under a liability to deliver its magazine. The \$142,000 received in 1959 from prepaid subscriptions shall be allocated to the years 1959, 1960, 1961, and 1962.

(e) No election may be made under section 455 with respect to a trade or business if, in computing taxable income, the cash receipts and disbursements method of accounting is used with respect to such trade or business. However, if the taxpayer is on a “combination” method of accounting under section 446(c)(4) and the regulations thereunder, it may elect the benefits of section 455 if it uses an accrual method of accounting for subscription income

[T.D. 6591, 27 FR 1798, Feb. 27, 1962]

#### § 1.455-3 Method of allocation.

(a) Prepaid subscription income to which section 455 applies shall be included in gross income for the taxable years during which the liability to which the income relates is discharged or is deemed to be discharged on the basis of the taxpayer’s experience.

(b) For purposes of determining the period or periods over which the liability of the taxpayer extends, and for purposes of allocating prepaid subscription income to such periods, the taxpayer may aggregate similar transactions during the taxable year in any reasonable manner, provided the method of aggregation and allocation is consistently followed.

[T.D. 6591, 27 FR 1798, Feb. 27, 1962]

#### § 1.455-4 Cessation of taxpayer’s liability.

(a) If a taxpayer has elected to apply the provisions of section 455 to a trade or business in connection with which prepaid subscription income is received, and if its liability to furnish or deliver a newspaper, magazine, or other periodical ends for any reason, then so much of the prepaid subscription income attributable to such liability as was not includible in its gross income

under section 455 for preceding taxable years shall be included in its gross income for the taxable year in which such liability ends. A taxpayer's liability may end, for example, because of the cancellation of a subscription. See section 381(c)(4) and the regulations thereunder for the treatment of prepaid subscription income in a transaction to which section 381(a) applies.

(b) If a taxpayer who has elected to apply the provisions of section 455 to a trade or business dies or ceases to exist, then so much of the prepaid subscription income attributable to such trade or business which was not includible in its gross income under section 455 for preceding taxable years shall be included in its gross income for the taxable year in which such death or cessation of existence occurs. See section 381(c)(4) and the regulations thereunder for the treatment of prepaid subscription income in a transaction to which section 381(a) applies.

[T.D. 6591, 27 FR 1799, Feb. 27, 1962]

#### § 1.455-5 Definitions and other rules.

(a) *Prepaid subscription income.* (1) The term "prepaid subscription income" means any amount includible in gross income which is received in connection with, and is directly attributable to, a liability of the taxpayer which extends beyond the close of the taxable year in which such amount is received and which is income from a newspaper, magazine, or other periodical. For example where Corporation X, a publisher of newspapers, magazines, and other periodicals makes sales on a subscription basis and the purchaser pays the subscription price in advance, prepaid subscription income would include the amounts actually received by X in connection with its liability to furnish or deliver the newspaper, magazine, or other periodical.

(2) For purposes of section 455, prepaid subscription income does not include amounts received by a taxpayer in connection with sales of subscriptions on a prepaid basis where such taxpayer does not have the liability to furnish or deliver a newspaper, magazine, or other periodical. The provisions of this subparagraph may be illustrated by the following example. Corporation D has a contract with each

of several large publishers which grants it the right to sell subscriptions to their periodicals. Corporation D collects the subscription price from the subscribers, retains a portion thereof as its commission and remits the balance to the publishers. The amount retained by Corporation D represents commissions on the sale of subscriptions, and is not prepaid subscription income for purposes of section 455 since the commissions represent compensation for services rendered and are not directly attributable to a liability of Corporation D to furnish or deliver a newspaper, magazine, or other periodical.

(b) *Liability.* The term "liability" means a liability of the taxpayer to furnish or deliver a newspaper, magazine, or other periodical.

(c) *Receipt of prepaid subscription income.* For purposes of section 455, prepaid subscription income shall be treated as received during the taxable year for which it is includible in gross income under section 451, relating to general rule for taxable year of inclusion, without regard to section 455.

(d) *Treatment of prepaid subscription income under an established accounting method.* Notwithstanding the provisions of section 455 and § 1.455-1, any taxpayer who, for taxable years beginning before January 1, 1958, has reported prepaid subscription income for income tax purposes under an established and consistent method or practice of deferring such income may continue to report such income in accordance with such method or practice for all subsequent taxable years to which section 455 applies without making an election under section 455.

[T.D. 6591, 27 FR 1799, Feb. 27, 1962]

#### § 1.455-6 Time and manner of making election.

(a) *Election without consent.* (1) A taxpayer may, without consent, elect to treat prepaid subscription income of a trade or business under section 455 for the first taxable year—

(i) Which begins after December 31, 1957, and

(ii) In which there is received prepaid subscription income from the trade or business for which the election is made. Such an election shall be made

not later than the time prescribed by law for filing the income tax return for such year (including extensions thereof), and shall be made by means of a statement attached to such return.

(2) The statement shall indicate that the taxpayer is electing to apply the provisions of section 455 to his trade or business, and shall contain the following information:

(i) The name and a description of the taxpayer's trade or business to which the election is to apply;

(ii) The method of accounting used in such trade or business;

(iii) The total amount of prepaid subscription income from such trade or business for the taxable year;

(iv) The period or periods over which the liability of the taxpayer to furnish or deliver a newspaper, magazine, or other periodical extends;

(v) The amount of prepaid subscription income applicable to each such period; and

(vi) A description of the method used in allocating the prepaid subscription income to each such period.

In any case in which prepaid subscription income is received from more than one trade or business, the statement shall set forth the required information with respect to each trade or business subject to the election.

(3) See paragraph (c) of this section for additional information required to be submitted with the statement if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid subscription income attributable to a liability which is to end within 12 months after the date of receipt.

(b) *Election with consent.* A taxpayer may, with the consent of the Commissioner, elect at any time to apply the provisions of section 455 to any trade or business in which it receives prepaid subscription income. The request for such consent shall be in writing, signed by the taxpayer or its authorized representative, and shall be addressed to the Commissioner of Internal Revenue, Attention: T:R:C, Washington, D.C. 20224. The request must be filed on or before the later of the following dates:

(1) 90 days after the beginning of the first taxable year to which the election is to apply or

(2) May 28, 1962, and must contain the information described in paragraph (a)(2) of this section.

See paragraph (c) of this section for additional information required to be submitted with the request if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid subscription income attributable to a liability which is to end within 12 months after the date of receipt.

(c) *“Within 12 months” election.* (1) A taxpayer who elects to apply the provisions of section 455 to any trade or business may also elect to include in gross income for the taxable year of receipt (as described in section 455(d)(3) and paragraph (c) of § 1.455-5) the entire amount of any prepaid subscription income from such trade or business if the liability from which it arose is to end within 12 months after the date of receipt. Any such election is binding for the first taxable year for which it is effective and for all subsequent taxable years, unless the taxpayer secures permission from the Commissioner to treat such income differently. Application to revoke or change a “within 12 months” election shall be made in accordance with the provisions of section 446(e) and the regulations thereunder.

(2) The “within 12 months” election shall be made by including in the statement required by paragraph (a) of this section or the request described in paragraph (b) of this section, whichever is applicable, a declaration that the taxpayer elects to include such income in gross income in the taxable year of receipt, and the amount of such income. If the taxpayer is engaged in more than one trade or business for which the election under section 455 is made, it must include, in such statement or request, a declaration for each trade or business for which it makes the “within 12 months” election. See also paragraph (e) of § 1.455-2.

(3) If the taxpayer does not make the “within 12 months” election for its trade or business at the time prescribed for making the election to include prepaid subscription income in gross income for the taxable years during which its liability to furnish or deliver a newspaper, magazine, or other

periodical exists for such trade or business, but later wishes to make such election, it must apply for permission from the Commissioner. Such application shall be made in accordance with the provisions of section 446(e) and the regulations thereunder.

[T.D. 6591, 27 FR 1799, Feb. 27, 1962]

**§ 1.456-1 Treatment of prepaid dues income.**

Effective for taxable years beginning after December 31, 1960, a taxpayer which is a membership organization (as described in paragraph (c) of § 1.456-5) and which receives prepaid dues income as described in paragraph (a) of § 1.456-5 in connection with its trade or business of rendering services or making available membership privileges may elect under section 456 to include such income in gross income ratably over the taxable years during which its liability (as described in paragraph (b) of § 1.456-5) to render such services or extend such privileges exists, if such liability does not extend over a period of time in excess of 36 months. If the taxpayer does not elect to treat prepaid dues income under section 456, or if such income may not be reported under section 456, as for example, where the income relates to a liability to render services or make available membership privileges which extends beyond 36 months, then such income is includible in gross income for the taxable year in which it is received (as described in paragraph (d) of § 1.456-5).

[T.D. 6937, 32 FR 16394, Nov. 30, 1967]

**§ 1.456-2 Scope of election under section 456.**

(a) An election made under section 456 and § 1.456-6, shall be applicable to all prepaid dues income received in connection with the trade or business for which the election is made. However, the taxpayer may further elect to include in gross income for the taxable year of receipt the entire amount of any prepaid dues income attributable to a liability extending beyond the close of the taxable year but ending within 12 months after the date of receipt, hereinafter referred to as the "within 12 months" election.

(b) If the taxpayer is engaged in more than one trade or business in connection with which prepaid dues income is received, a separate election may be made under section 456 with respect to each such trade or business. In addition, a taxpayer may make a separate "within 12 months" election for each separate trade or business for which it has made an election under section 456.

(c) A section 456 election and a "within 12 months" election shall be binding for the first taxable year for which the election is made and for all subsequent taxable years, unless the taxpayer secures the consent of the Commissioner to the revocation of either election. In order to secure the Commissioner's consent to the revocation of the section 456 election or the "within 12 months" election, an application must be filed with the Commissioner in accordance with section 446(e) and the regulations thereunder. However, an application for consent to revoke the section 456 election or the "within 12 months" election in the case of all taxable years which end before November 30, 1967 must be filed on or before February 28, 1968. For purposes of Subtitle A of the Code, the computation of taxable income under an election made under section 456 or under the "within 12 months" election shall be treated as a method of accounting. For adjustments required by changes in method of accounting, see section 481 and the regulations thereunder.

(d) Except as provided in section 456(d) and § 1.456-7, an election made under section 456 shall not apply to any prepaid dues income received before the first taxable year to which the election applies. For example, Corporation X, a membership organization which files its income tax returns on a calendar year basis, customarily sells 3-year memberships, payable in advance. In 1961 it received \$160,000 of prepaid dues income for 3-year memberships beginning during 1961, and in 1962 it received \$185,000 of prepaid dues income for 3-year memberships beginning on January 1, 1962. In March 1962 it elected, with the consent of the Commissioner, to report its prepaid dues income under the provisions of section 456 for the year 1962 and subsequent

### § 1.456-3

### 26 CFR Ch. I (4-1-17 Edition)

taxable years. The \$160,000 received in 1961 from prepaid dues must be included in gross income in full in that year, and except as provided in section 456(d) and § 1.456-7, no part of such income shall be allocated to the taxable years 1962, 1963, and 1964 during which X was under a liability to make available its membership privileges. The \$185,000 received in 1962 from prepaid dues income shall be allocated to the years 1962, 1963, and 1964.

(e) No election may be made under section 456 with respect to a trade or business if, in computing taxable income, the cash receipts and disbursements method (or a hybrid thereof) of accounting is used with respect to such trade or business, unless the combination of the section 456 election and the taxpayer's hybrid method of accounting does not result in a material distortion of income.

[T.D. 6937, 32 FR 16394, Nov. 30, 1967; 32 FR 17479, Dec. 6, 1967]

#### § 1.456-3 Method of allocation.

(a) Prepaid dues income for which an election has been made under section 456 shall be included in gross income over the period of time during which the liability to render services or make available membership privileges exists. The liability to render the services or make available the membership privileges shall be deemed to exist ratably over the period of time such services are required to be rendered, or such membership privileges are required to be made available. Thus, the prepaid dues income shall be included in gross income ratably over the period of the membership contract. For example, Corporation X, a membership organization, which files its income tax returns on a calendar year basis, elects, for its taxable year beginning January 1, 1961, to report its prepaid dues income in accordance with the provisions of section 456. On March 31, 1961, it sells a 2-year membership for \$48 payable in advance, the membership to extend from May 1, 1961, to April 30, 1963. X shall include in its gross income for the taxable year 1961  $\frac{3}{24}$  of the \$48, or \$16, and for the taxable year 1962  $\frac{12}{24}$  of the \$48, or \$24, and for the taxable year 1963  $\frac{4}{24}$  of the \$48, or \$8.

(b) For purposes of determining the period or periods over which the liability of the taxpayer exists, and for purposes of allocating prepaid dues income to such periods, the taxpayer may aggregate similar transactions during the taxable year in any reasonable manner, provided the method of aggregation and allocation is consistently followed.

[T.D. 6937, 32 FR 16395, Nov. 30, 1967]

#### § 1.456-4 Cessation of liability or existence.

(a) If a taxpayer has elected to apply the provisions of section 456 to a trade or business in connection with which prepaid dues income is received, and if the taxpayer's liability to render services or make available membership privileges ends for any reason, as for example, because of the cancellation of a membership then so much of the prepaid dues income attributable to such liability as was not includible in the taxpayer's gross income under section 456 for preceding taxable years shall be included in gross income for the taxable year in which such liability ends. This paragraph shall not apply to amounts includible in gross income under § 1.456-7.

(b) If a taxpayer which has elected to apply the provisions of section 456 ceases to exist, then the prepaid dues income which was not includible in gross income under section 456 for preceding taxable years shall be included in the taxpayer's gross income for the taxable year in which such cessation of existence occurs. This paragraph shall not apply to amounts includible in gross income under § 1.456-7.

(c) If a taxpayer is a party to a transaction to which section 381(a) applies and the taxpayer's method of accounting with respect to prepaid dues income is used by the acquiring corporation under the provisions of section 381(c)(4), then neither the liability nor the existence of the taxpayer shall be deemed to have ended or ceased. In such cases see section 381(c)(4) and the regulations thereunder for the treatment of the portion of prepaid dues income which was not included in gross income under section 456 for preceding taxable years.

[T.D. 6937, 32 FR 16395, Nov. 30, 1967]

**§ 1.456-5 Definitions and other rules.**

(a) *Prepaid dues income.* (1) The term “prepaid dues income” means any amount for membership dues includible in gross income which is received by a membership organization in connection with, and is directly attributable to, a liability of the taxpayer to render services or make available membership privileges over a period of time which extends beyond the close of the taxable year in which such amount is received.

(2) For purposes of section 456, prepaid dues income does not include amounts received by a taxpayer in connection with sales of memberships on a prepaid basis where the taxpayer does not have the liability to furnish the services or make available the membership privileges. For example, where a taxpayer has a contract with several membership organizations to sell memberships in such organizations and retains a portion of the amounts received from the sale of such memberships and remits the balance to the membership organizations, the amounts retained by such taxpayer represent commissions and do not constitute prepaid dues income for purposes of section 456.

(b) *Liability.* The term “liability” means a liability of the taxpayer to render services or make available membership privileges over a period of time which does not exceed 36 months. Thus, if during the taxable year a taxpayer sells memberships for more than 36 months and also memberships for 36 months or less, section 456 does not apply to the income from the sale of memberships for more than 36 months. For the purpose of determining the duration of a liability, a bona fide renewal of a membership shall not be considered to be a part of the existing membership.

(c) *Membership organization.* (1) The term “membership organization” means a corporation, association, federation, or other similar organization meeting the following requirements:

(i) It is organized without capital stock of any kind.

(ii) Its charter, bylaws, or other written agreement or contract expressly prohibits the distribution of any part of the net earnings directly or indirectly, in money, property, or services, to any member, and

(iii) No part of the net earnings of which is in fact distributed to any member either directly or indirectly, in money, property, or services.

(2) For purposes of this paragraph an increase in services or reduction in dues to all members shall generally not be considered distributions of net earnings.

(3) If a corporation, association, federation, or other similar organization subsequent to the time it elects to report its prepaid dues income in accordance with the provisions of section 456, (i) issues any kind of capital stock either to any member or nonmember, (ii) amends its charter, bylaws, or other written agreement or contract to permit distributions of its net earnings to any member or, (iii) in fact, distributes any part of its net earnings either in money, property, or services to any member, then immediately after such event the organization shall not be considered a membership organization within the meaning of section 456(e)(3).

(d) *Receipt of prepaid dues income.* For purposes of section 456, prepaid dues income shall be treated as received during the taxable year for which it is includible in gross income under section 451, relating to the general rule for taxable year of inclusion, without regard to section 456.

[T.D. 6937, 32 FR 16395, Nov. 30, 1967]

**§ 1.456-6 Time and manner of making election.**

(a) *Election without consent.* A taxpayer may make an election under section 456 without the consent of the Commissioner for the first taxable year beginning after December 31, 1960, in which it receives prepaid dues income in the trade or business for which such election is made. The election must be made not later than the time prescribed by law for filing the income tax return for such year (including extensions thereof). The election must be made by means of a statement attached to such return. In addition, there should be attached a copy of a typical membership contract used by the organization and a copy of its charter, bylaws, or other written agreement or contract of organization or association. The statement shall indicate that the taxpayer is electing to apply

the provisions of section 456 to the trade or business, and shall contain the following information:

(1) The taxpayer's name and a description of the trade or business to which the election is to apply.

(2) The method of accounting used for prepaid dues income in the trade or business during the first taxable year for which the election is to be effective and during each of 3 preceding taxable years, and if there was a change in the method of accounting for prepaid dues income during such 3-year period, a detailed explanation of such change including the adjustments necessary to prevent duplications or omissions of income.

(3) Whether any type of deferral method for prepaid dues income has been used during any of the 3 taxable years preceding the first taxable year for which the election is effective. Where any type of such deferral method has been used during this period, an explanation of the method and a schedule showing the amounts received in each such year and the amounts deferred to each succeeding year.

(4) A schedule with appropriate explanations showing:

(i) The total amount of prepaid dues income received in the trade or business in the first taxable year for which the election is effective and the amount of such income to be included in each taxable year in accordance with the election,

(ii) The total amount, if any, of prepayments of dues received in the first taxable year for which the election is effective which are directly attributable to a liability of the taxpayer to render services or make available membership privileges over a period of time in excess of 36 months, and

(iii) The total amount, if any, of prepaid dues income received in the trade or business in—

(a) The taxable year preceding the first taxable year for which the election is effective if all memberships sold by the taxpayer are for periods of 1 year or less,

(b) Each of the 2 taxable years preceding the first taxable year for which the election is effective if any memberships are sold for periods in excess of 1

year but none are sold for periods in excess of 2 years, or

(c) Each of the 3 taxable years preceding the first taxable year for which the election is effective if any memberships are sold for periods in excess of 2 years.

In each case there shall be set forth the amount of such income which would have been includible in each taxable year had the election been effective for the years for which the information is required.

In any case in which prepaid dues income is received from more than one trade or business, the statement shall set forth separately the required information with respect to each trade or business for which the election is made. See paragraph (c) of this section for additional information required to be submitted with the statement if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid dues income attributable to a liability which is to end within 12 months after the date of receipt.

(b) *Election with consent.* A taxpayer may elect with the consent of the Commissioner, to apply the provisions of section 456 to any trade or business in which it receives prepaid dues income. The request for such consent shall be in writing, signed by the taxpayer or its authorized representative, and shall be addressed to the Commissioner of Internal Revenue, Washington, D.C. 20224. The request must be filed on or before the later of the following dates:

(1) 90 days after the beginning of the first taxable year to which the election is to apply, or

(2) February 28, 1968 and should contain the information described in paragraph (a) of this section.

See paragraph (c) of this section for additional information required to be submitted with the request if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid dues income attributable to a liability which is to end within 12 months after the date of receipt.

(c) *“Within 12 months” election.* (1) The “within 12 months” election shall be made by including in the statement

required by paragraph (a) of this section or the request described in paragraph (b) of this section, whichever is applicable, a declaration that the taxpayer elects to include such income in gross income in the taxable year of receipt, and the amount of such income for each taxable year to which the election is to apply which has ended prior to the time such statement or request is filed. If the taxpayer is engaged in more than one trade or business for which the election under section 456 is made, it must include, in such statement or request, a declaration for each trade or business for which it wishes to make the "within 12 months" election.

(2) If the taxpayer does not make the "within 12 months" election for a trade or business at the time it makes the election under paragraph (a) or (b) of this section, but later wishes to make such election, it must apply for permission from the Commissioner. Such application shall be made in accordance with the provisions of section 446(e).

[T.D. 6937, 32 FR 16395, Nov. 30, 1967; 32 FR 17479, Dec. 6, 1967]

#### § 1.456-7 Transitional rule.

(a) Under section 456(d)(1), a taxpayer making an election under section 456 shall include in its gross income for the first taxable year to which the election applies and for each of the 2 succeeding taxable years not only that portion of prepaid dues income which is includible in gross income for each such taxable year under section 456(a), but also an additional amount equal to that portion of the total prepaid dues income received in each of the 3 taxable years preceding the first taxable year to which the election applies which would have been includible in gross income for such first taxable year and such 2 succeeding taxable years had the election under section 456 been effective during such 3 preceding taxable years. In computing such additional amounts—

(1) In the case of taxpayers who did not include in gross income for the taxable year preceding the first taxable year for which the election is effective, that portion of the prepaid dues income received in such year attributable to a liability which is to end within 12 months after the date of receipt, no ef-

fect shall be given to a "within 12 months" election made under paragraph (c) of § 1.456-6, and

(2) There shall be taken into account only prepaid dues income arising from a trade or business with respect to which an election is made under section 456 and § 1.456-6.

Section 481 and the regulations thereunder shall have no application to the additional amounts includible in gross income under section 456(d) and this section, but section 481 and the regulations thereunder shall apply to prevent other amounts from being duplicated or omitted.

(b) A taxpayer who makes an election with respect to prepaid dues income, and who includes in gross income for any taxable year to which the election applies an additional amount computed under section 456(d)(1) and paragraph (a) of this section, shall be permitted under section 456(d)(2) to deduct for such taxable year and for each of the 4 succeeding taxable years an amount equal to one-fifth of such additional amount, but only to the extent that such additional amount was also included in the taxpayer's gross income for any of the 3 taxable years preceding the first taxable year to which such election applies. The taxpayer shall maintain books and records in sufficient detail to enable the district director to determine upon audit that the additional amounts were included in the taxpayer's gross income for any of the 3 taxable years preceding such first taxable year. If, however, the taxpayer ceases to exist, as described in paragraph (b) of § 1.456-4, and there is included in gross income, under such paragraph, of the year of cessation the entire portion of prepaid dues income not previously includible in gross income under section 456 for preceding taxable years (other than for amounts received prior to the first year for which an election was made), all the amounts not previously deducted under this paragraph shall be permitted as a deduction in the year of cessation of existence.

(c) The provisions of this section may be illustrated by the following example:

*Example.* (1) Assume that X Corporation, a membership organization qualified to make

§ 1.456-7

26 CFR Ch. I (4-1-17 Edition)

the election under section 456, elects to report its prepaid dues income in accordance with the provisions of section 456 for its taxable year ending December 31, 1961. Assume further that X Corporation receives in the middle of each taxable year \$3,000 of prepaid

dues income in connection with a liability to render services over a 3-year period beginning with the date of receipt. Under section 456(a), X Corporation will report income received in 1961 and subsequent years as follows:

Year of receipt	Total receipts	1961	1962	1963	1964	1965	1966	1967	1968
1961	\$3,000	\$500	\$1,000	\$1,000	\$500	.....	.....	.....	.....
1962	3,000	.....	500	1,000	1,000	\$500	.....	.....	.....
1963	3,000	.....	.....	500	1,000	1,000	\$500	.....	.....
1964	3,000	.....	.....	.....	500	1,000	1,000	\$500	.....
1965	3,000	.....	.....	.....	.....	500	1,000	1,000	\$500
1966	3,000	.....	.....	.....	.....	.....	500	1,000	1,000
1967	3,000	.....	.....	.....	.....	.....	.....	500	1,000
1968	3,000	.....	.....	.....	.....	.....	.....	.....	500
Total reportable under section 456(a)		500	1,500	2,500	3,000	3,000	3,000	3,000	3,000

(2) Under section 456(d) (1), X Corporation must include in its gross income for the first taxable year to which the election applies and for each of the 2 succeeding taxable years, the amounts which would have been

included in those years had the election been effective 3 years earlier. If the election had been effective in 1958, the following amounts received in 1958, 1959, and 1960 would have been reported in 1961 and subsequent years:

Year of receipt	Amount received	Years of including additional amounts		
		1961	1962	1963
1958	\$3,000	\$500	.....	.....
1959	3,000	1,000	\$500	.....
1960	3,000	1,000	1,000	\$500
Total additional amounts to be included under section 456(d)(1)		2,500	1,500	500

(3) Having included the additional amounts as required by section 456(d)(1), and assuming such amounts were actually included in gross income in the 3 taxable years preceding the first taxable year for which the election

is effective, X Corporation is entitled to deduct under section 456(d)(2) in the year of inclusion and in each of the succeeding 4 years an amount equal to one-fifth of the amounts included, as follows:

Year of inclusion	Amount	Years of deduction						
		1961	1962	1963	1964	1965	1966	1967
1961	\$2,500	\$500	\$500	\$500	\$500	\$500	.....	.....
1962	1,500	.....	300	300	300	300	\$300	.....
1963	500	.....	.....	100	100	100	100	\$10
Total amount deductible under section 456(d)(2)		500	800	900	900	900	400	100

(4) The net result of the inclusions under section 456(d)(1) and the deductions under

section 456(d)(2) may be summarized as follows:

	1961	1962	1963	1964	1965	1966	1967	1968
Amount includible under section 456(a)	\$500	\$1,500	\$2,500	\$3,000	\$3,000	\$3,000	\$3,000	\$3,000
Amount includible under section 456(d)(1)	2,500	1,500	500	.....	.....	.....	.....	.....
Total	3,000	3,000	3,000	3,000	3,000	3,000	3,000	3,000
Amount deductible under section 456(d)(2)	500	800	900	900	900	400	100	.....
Net amount reportable under section 456	2,500	2,200	2,100	2,100	2,100	2,600	2,900	3,000

[T.D. 6937, 32 FR 16396, Nov. 30, 1967]

**§ 1.457-1 General overviews of section 457.**

Section 457 provides rules for non-qualified deferred compensation plans established by eligible employers as defined under § 1.457-2(d). Eligible employers can establish either deferred compensation plans that are eligible plans and that meet the requirements of section 457(b) and §§ 1.457-3 through 1.457-10, or deferred compensation plans or arrangements that do not meet the requirements of section 457(b) and §§ 1.457-3 through 1.457-10 and that are subject to tax treatment under section 457(f) and § 1.457-11.

[T.D. 9075, 68 FR 41234, July 11, 2003]

**§ 1.457-2 Definitions.**

This section sets forth the definitions that are used under §§ 1.457-1 through 1.457-11.

(a) *Amount(s) deferred.* *Amount(s) deferred* means the total annual deferrals under an eligible plan in the current and prior years, adjusted for gain or loss. Except as provided at §§ 1.457-4(c)(1)(iii) and 1.457-6(a), amount(s) deferred includes any rollover amount held by an eligible plan as provided under § 1.457-10(e).

(b) *Annual deferral(s)*—(1) *Annual deferral(s)* means, with respect to a taxable year, the amount of compensation deferred under an eligible plan, whether by salary reduction or by nonelective employer contribution. The amount of compensation deferred under an eligible plan is taken into account as an annual deferral in the taxable year of the participant in which deferred, or, if later, the year in which the amount of compensation deferred is no longer subject to a substantial risk of forfeiture.

(2) If the amount of compensation deferred under the plan during a taxable year is not subject to a substantial risk of forfeiture, the amount taken into account as an annual deferral is not adjusted to reflect gain or loss allocable to the compensation deferred. If, however, the amount of compensation deferred under the plan during the taxable year is subject to a substantial risk of forfeiture, the amount of com-

ensation deferred that is taken into account as an annual deferral in the taxable year in which the substantial risk of forfeiture lapses must be adjusted to reflect gain or loss allocable to the compensation deferred until the substantial risk of forfeiture lapses.

(3) If the eligible plan is a defined benefit plan within the meaning of section 414(j), the annual deferral for a taxable year is the present value of the increase during the taxable year of the participant's accrued benefit that is not subject to a substantial risk of forfeiture (disregarding any such increase attributable to prior annual deferrals). For this purpose, present value must be determined using actuarial assumptions and methods that are reasonable (both individually and in the aggregate), as determined by the Commissioner.

(4) For purposes solely of applying § 1.457-4 to determine the maximum amount of the annual deferral for a participant for a taxable year under an eligible plan, the maximum amount is reduced by the amount of any deferral for the participant under a plan described at paragraph (k)(4)(i) of this section (relating to certain plans in existence before January 1, 1987) as if that deferral were an annual deferral under another eligible plan of the employer.

(c) *Beneficiary.* *Beneficiary* means a person who is entitled to benefits in respect of a participant following the participant's death or an alternate payee as described in § 1.457-10(c).

(d) *Catch-up.* *Catch-up* amount or *catch-up* limitation for a participant for a taxable year means the annual deferral permitted under section 414(v) (as described in § 1.457-4(c)(2)) or section 457(b)(3) (as described in § 1.457-4(c)(3)) to the extent the amount of the annual deferral for the participant for the taxable year is permitted to exceed the plan ceiling applicable under section 457(b)(2) (as described in § 1.457-4(c)(1)).

(e) *Eligible employer.* *Eligible employer* means an entity that is a State that

establishes a plan or a tax-exempt entity that establishes a plan. The performance of services as an independent contractor for a State or local government or a tax-exempt entity is treated as the performance of services for an eligible employer. The term *eligible employer* does not include a church as defined in section 3121(w)(3)(A), a qualified church-controlled organization as defined in section 3121(w)(3)(B), or the Federal government or any agency or instrumentality thereof. Thus, for example, a nursing home which is associated with a church, but which is not itself a church (as defined in section 3121(w)(3)(A)) or a qualified church-controlled organization as defined in section 3121(w)(3)(B)), would be an eligible employer if it is a tax-exempt entity as defined in paragraph (m) of this section.

(f) *Eligible plan.* An *eligible plan* is a plan that meets the requirements of §§1.457-3 through 1.457-10 that is established and maintained by an eligible employer. An *eligible governmental plan* is an eligible plan that is established and maintained by an eligible employer as defined in paragraph (l) of this section. An arrangement does not fail to constitute a single eligible governmental plan merely because the arrangement is funded through more than one trustee, custodian, or insurance carrier. An *eligible plan of a tax-exempt entity* is an eligible plan that is established and maintained by an eligible employer as defined in paragraph (m) of this section.

(g) *Includible compensation.* *Includible compensation* of a participant means, with respect to a taxable year, the participant's compensation, as defined in section 415(c)(3), for services performed for the eligible employer. The amount of includible compensation is determined without regard to any community property laws.

(h) *Ineligible plan.* *Ineligible plan* means a plan established and maintained by an eligible employer that is not maintained in accordance with §§1.457-3 through 1.457-10. A plan that is not established by an eligible employer as defined in paragraph (e) of this section is neither an eligible nor an ineligible plan.

(i) *Nonelective employer contribution.* A *nonelective employer contribution* is a contribution made by an eligible employer for the participant with respect to which the participant does not have the choice to receive the contribution in cash or property. Solely for purposes of section 457 and §§1.457-2 through 1.457-11, the term *nonelective employer contribution* includes employer contributions that would be described in section 401(m) if they were contributions to a qualified plan.

(j) *Participant.* *Participant* in an eligible plan means an individual who is currently deferring compensation, or who has previously deferred compensation under the plan by salary reduction or by nonelective employer contribution and who has not received a distribution of his or her entire benefit under the eligible plan. Only individuals who perform services for the eligible employer, either as an employee or as an independent contractor, may defer compensation under the eligible plan.

(k) *Plan.* *Plan* includes any agreement or arrangement between an eligible employer and a participant or participants (including an individual employment agreement) under which the payment of compensation is deferred (whether by salary reduction or by nonelective employer contribution). The following types of plans are not treated as agreements or arrangements under which compensation is deferred: a bona fide vacation leave, sick leave, compensatory time, severance pay, disability pay, or death benefit plan described in section 457(e)(11)(A)(i) and any plan paying length of service awards to bona fide volunteers (and their beneficiaries) on account of qualified services performed by such volunteers as described in section 457(e)(11)(A)(ii). Further, the term *plan* does not include any of the following (and section 457 and §§1.457-2 through 1.457-11 do not apply to any of the following)—

(1) Any nonelective deferred compensation under which all individuals (other than those who have not satisfied any applicable initial service requirement) with the same relationship with the eligible employer are covered under the same plan with no individual

variations or options under the plan as described in section 457(e)(12), but only to the extent the compensation is attributable to services performed as an independent contractor;

(2) An agreement or arrangement described in §1.457-11(b);

(3) Any plan satisfying the conditions in section 1107(c)(4) of the Tax Reform Act of 1986 (100 Stat. 2494) (TRA '86) (relating to certain plans for State judges); and

(4) Any of the following plans or arrangements (to which specific transitional statutory exclusions apply)—

(i) A plan or arrangement of a tax-exempt entity in existence prior to January 1, 1987, if the conditions of section 1107(c)(3)(B) of the TRA '86, as amended by section 1011(e)(6) of the Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3700) (TAMRA), are satisfied (see §1.457-2(b)(4) for a special rule regarding such plan);

(ii) A collectively bargained nonelective deferred compensation plan in effect on December 31, 1987, if the conditions of section 6064(d)(2) of TAMRA are satisfied;

(iii) Amounts described in section 6064(d)(3) of TAMRA (relating to certain nonelective deferred compensation arrangements in effect before 1989); and

(iv) Any plan satisfying the conditions in section 1107(c)(4) or (5) of TRA '86 (relating to certain plans for certain individuals with respect to which the Service issued guidance before 1977).

(l) *State.* *State* means a State (treating the District of Columbia as a State as provided under section 7701(a)(10)), a political subdivision of a State, and any agency or instrumentality of a State.

(m) *Tax-exempt entity.* *Tax-exempt entity* includes any organization exempt from tax under subtitle A of the Internal Revenue Code, except that a governmental unit (including an international governmental organization) is not a tax-exempt entity.

(n) *Trust.* *Trust* means a trust described under section 457(g) and §1.457-8. Custodial accounts and contracts described in section 401(f) are treated as trusts under the rules described in §1.457-8(a)(2).

[T.D. 9075, 68 FR 41234, July 11, 2003; 68 FR 51446, Aug. 27, 2003]

### § 1.457-3 General introduction to eligible plans.

(a) *Compliance in form and operation.* An eligible plan is a written plan established and maintained by an eligible employer that is maintained, in both form and operation, in accordance with the requirements of §§1.457-4 through 1.457-10. An eligible plan must contain all the material terms and conditions for benefits under the plan. An eligible plan may contain certain optional features not required for plan eligibility under section 457(b), such as distributions for unforeseeable emergencies, loans, plan-to-plan transfers, additional deferral elections, acceptance of rollovers to the plan, and distributions of smaller accounts to eligible participants. However, except as otherwise specifically provided in §§1.457-4 through 1.457-10, if an eligible plan contains any optional provisions, the optional provisions must meet, in both form and operation, the relevant requirements under section 457 and §§1.457-2 through 1.457-10.

(b) *Treatment as single plan.* In any case in which multiple plans are used to avoid or evade the requirements of §§1.457-4 through 1.457-10, the Commissioner may apply the rules under §§1.457-4 through 1.457-10 as if the plans were a single plan. See also §1.457-4(c)(3)(v) (requiring an eligible employer to have no more than one normal retirement age for each participant under all of the eligible plans it sponsors), the second sentence of §1.457-4(e)(2) (treating deferrals under all eligible plans under which an individual participates by virtue of his or her relationship with a single employer as a single plan for purposes of determining excess deferrals), and §1.457-5 (combining annual deferrals under all eligible plans).

[T.D. 9075, 68 FR 41234, July 11, 2003]

### § 1.457-4 Annual deferrals, deferral limitations, and deferral agreements under eligible plans.

(a) *Taxation of annual deferrals.* Annual deferrals that satisfy the requirements of paragraphs (b) and (c) of this section are excluded from the gross income of a participant in the year deferred or contributed and are not includible in gross income until paid to

the participant in the case of an eligible governmental plan, or until paid or otherwise made available to the participant in the case of an eligible plan of a tax-exempt entity. See § 1.457-7.

(b) *Agreement for deferral.* In order to be an eligible plan, the plan must provide that compensation may be deferred for any calendar month by salary reduction only if an agreement providing for the deferral has been entered into before the first day of the month in which the compensation is paid or made available. A new employee may defer compensation payable in the calendar month during which the participant first becomes an employee if an agreement providing for the deferral is entered into on or before the first day on which the participant performs services for the eligible employer. An eligible plan may provide that if a participant enters into an agreement providing for deferral by salary reduction under the plan, the agreement will remain in effect until the participant revokes or alters the terms of the agreement. Nonelective employer contributions are treated as being made under an agreement entered into before the first day of the calendar month.

(c) *Maximum deferral limitations—(1) Basic annual limitation.* (i) Except as described in paragraphs (c)(2) and (3) of this section, in order to be an eligible plan, the plan must provide that the annual deferral amount for a taxable year (the plan ceiling) may not exceed the lesser of—

(A) The applicable annual dollar amount specified in section 457(e)(15): \$11,000 for 2002; \$12,000 for 2003; \$13,000 for 2004; \$14,000 for 2005; and \$15,000 for 2006 and thereafter. After 2006, the \$15,000 amount is adjusted for cost-of-living in the manner described in paragraph (c)(4) of this section; or

(B) 100 percent of the participant's includible compensation for the taxable year.

(ii) The amount of annual deferrals permitted by the 100 percent of includible compensation limitation under paragraph (c)(1)(i)(B) of this section is determined under section 457(e)(5) and § 1.457-2(g).

(iii) For purposes of determining the plan ceiling under this paragraph (c), the annual deferral amount does not

include any rollover amounts received by the eligible plan under § 1.457-10(e).

(iv) The provisions of this paragraph (c)(1) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant A, who earns \$14,000 a year, enters into a salary reduction agreement in 2006 with A's eligible employer and elects to defer \$13,000 of A's compensation for that year. A is not eligible for the catch-up described in paragraph (c)(2) or (3) of this section, participates in no other retirement plan, and has no other income exclusions taken into account in computing includible compensation.

(ii) *Conclusion.* The annual deferral limit for A in 2006 is the lesser of \$15,000 or 100 percent of includible compensation, \$14,000. A's annual deferral of \$13,000 is permitted under the plan because it is not in excess of \$14,000 and thus does not exceed 100 percent of A's includible compensation.

*Example 2.* (i) *Facts.* Assume the same facts as in *Example 1*, except that A's eligible employer provides an immediately vested, matching employer contribution under the plan for participants who make salary reduction deferrals under A's eligible plan. The matching contribution is equal to 100 percent of elective contributions, but not in excess of 10 percent of compensation (in A's case, \$1,400).

(ii) *Conclusion.* Participant A's annual deferral exceeds the limitations of this paragraph (c)(1). A's maximum deferral limitation in 2006 is \$14,000. A's salary reduction deferral of \$13,000 combined with A's eligible employer's nonelective employer contribution of \$1,400 exceeds the basic annual limitation of this paragraph (c)(1) because A's annual deferrals total \$14,400. A has an excess deferral for the taxable year of \$400, the amount exceeding A's permitted annual deferral limitation. The \$400 excess deferral is treated as described in paragraph (e) of this section.

*Example 3.* (i) *Facts.* Beginning in year 2002, Eligible Employer X contributes \$3,000 per year for five years to B's eligible plan account. B's interest in the account vests in 2006. B has annual compensation of \$50,000 in each of the five years 2002 through 2006. B is 41 years old. B is not eligible for the catch-up described in paragraph (c)(2) or (3) of this section, participates in no other retirement plan, and has no other income exclusions taken into account in computing includible compensation. Adjusted for gain or loss, the value of B's benefit when B's interest in the account vests in 2006 is \$17,000.

(ii) *Conclusion.* Under this vesting schedule, \$17,000 is taken into account as an annual deferral in 2006. B's annual deferrals under the plan are limited to a maximum of \$15,000 in 2006. Thus, the aggregate of the amounts deferred, \$17,000, is in excess of B's maximum

deferral limitation by \$2,000. The \$2,000 is treated as an excess deferral described in paragraph (e) of this section.

(2) *Age 50 catch-up*—(i) *In general.* In accordance with section 414(v) and the regulations thereunder, an eligible governmental plan may provide for catch-up contributions for a participant who is age 50 by the end of the year, provided that such age 50 catch-up contributions do not exceed the catch-up limit under section 414(v)(2) for the taxable year. The maximum amount of age 50 catch-up contributions for a taxable year under section 414(v) is as follows: \$1,000 for 2002; \$2,000 for 2003; \$3,000 for 2004; \$4,000 for 2005; and \$5,000 for 2006 and thereafter. After 2006, the \$5,000 amount is adjusted for cost-of-living. For additional guidance, see regulations under section 414(v).

(ii) *Coordination with special section 457 catch-up.* In accordance with sections 414(v)(6)(C) and 457(e)(18), the age 50 catch-up described in this paragraph (c)(2) does not apply for any taxable year for which a higher limitation applies under the special section 457 catch-up under paragraph (c)(3) of this section. Thus, for purposes of this paragraph (c)(2)(ii) and paragraph (c)(3) of this section, the special section 457 catch-up under paragraph (c)(3) of this section applies for any taxable year if and only if the plan ceiling taking into account paragraph (c)(1) of this section and the special section 457 catch-up described in paragraph (c)(3) of this section (and disregarding the age 50 catch-up described in this paragraph (c)(2)) is larger than the plan ceiling taking into account paragraph (c)(1) of this section and the age 50 catch-up described in this paragraph (c)(2) (and disregarding the special section 457 catch-up described in paragraph (c)(3) of this section). Thus, if a plan so provides, a participant who is eligible for the age 50 catch-up for a year and for whom the year is also one of the participant's last three taxable years ending before the participant attains normal retirement age is eligible for the larger of—

(A) The plan ceiling under paragraph (c)(1) of this section and the age 50 catch-up described in this paragraph (c)(2) (and disregarding the special section 457 catch-up described in paragraph (c)(3) of this section) or

(B) The plan ceiling under paragraph (c)(1) of this section and the special section 457 catch-up described in paragraph (c)(3) of this section (and disregarding the age 50 catch-up described in this paragraph (c)(2)).

(iii) *Examples.* The provisions of this paragraph (c)(2) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant C, who is 55, is eligible to participate in an eligible governmental plan in 2006. The plan provides a normal retirement age of 65. The plan provides limitations on annual deferrals up to the maximum permitted under paragraphs (c)(1) and (3) of this section and the age 50 catch-up described in this paragraph (c)(2). For 2006, C will receive compensation of \$40,000 from the eligible employer. C desires to defer the maximum amount possible in 2006. The applicable basic dollar limit of paragraph (c)(1)(i)(A) of this section is \$15,000 for 2006 and the additional dollar amount permitted under the age 50 catch-up is \$5,000 for 2006.

(ii) *Conclusion.* C is eligible for the age 50 catch-up in 2006 because C is 55 in 2006. However, C is not eligible for the special section 457 catch-up under paragraph (c)(3) of this section in 2006 because 2006 is not one of the last three taxable years ending before C attains normal retirement age. Accordingly, the maximum that C may defer for 2006 is \$20,000.

*Example 2.* (i) *Facts.* The facts are the same as in *Example 1*, except that, in 2006, C will attain age 62. The maximum amount that C can elect under the special section 457 catch-up under paragraph (c)(3) of this section is \$2,000 for 2006.

(ii) *Conclusion.* The maximum that C may defer for 2006 is \$20,000. This is the sum of the basic plan ceiling under paragraph (c)(1) of this section equal to \$15,000 and the age 50 catch-up equal to \$5,000. The special section 457 catch-up under paragraph (c)(3) of this section is not applicable since it provides a smaller plan ceiling.

*Example 3.* (i) *Facts.* The facts are the same as in *Example 2*, except that the maximum additional amount that C can elect under the special section 457 catch-up under paragraph (c)(3) of this section is \$7,000 for 2006.

(ii) *Conclusion.* The maximum that C may defer for 2006 is \$22,000. This is the sum of the basic plan ceiling under paragraph (c)(1) of this section equal to \$15,000, plus the additional special section 457 catch-up under paragraph (c)(3) of this section equal to \$7,000. The additional dollar amount permitted under the age 50 catch-up is not applicable to C for 2006 because it provides a smaller plan ceiling.

(3) *Special section 457 catch-up*—(i) *In general.* Except as provided in paragraph (c)(2)(ii) of this section, an eligible plan may provide that, for one or more of the participant's last three taxable years ending before the participant attains normal retirement age, the plan ceiling is an amount not in excess of the lesser of—

(A) Twice the dollar amount in effect under paragraph (c)(1)(i)(A) of this section; or

(B) The underutilized limitation determined under paragraph (c)(3)(ii) of this section.

(ii) *Underutilized limitation.* The underutilized amount determined under this paragraph (c)(3)(ii) is the sum of—

(A) The plan ceiling established under paragraph (c)(1) of this section for the taxable year; plus

(B) The plan ceiling established under paragraph (c)(1) of this section (or under section 457(b)(2) for any year before the applicability date of this section) for any prior taxable year or years, less the amount of annual deferrals under the plan for such prior taxable year or years (disregarding any annual deferrals under the plan permitted under the age 50 catch-up under paragraph (c)(2) of this section).

(iii) *Determining underutilized limitation under paragraph (c)(3)(ii)(B) of this section.* A prior taxable year is taken into account under paragraph (c)(3)(ii)(B) of this section only if it is a year beginning after December 31, 1978, in which the participant was eligible to participate in the plan, and in which compensation deferred (if any) under the plan during the year was subject to a plan ceiling established under paragraph (c)(1) of this section. This paragraph (c)(3)(iii) is subject to the special rules in paragraph (c)(3)(iv) of this section.

(iv) *Special rules concerning application of the coordination limit for years prior to 2002 for purposes of determining the underutilized limitation*—(A) *General rule.* For purposes of determining the underutilized limitation for years prior to 2002, participants remain subject to the rules in effect prior to the repeal of the coordination limitation under section 457(c)(2). Thus, the applicable basic annual limitation under paragraph (c)(1) of this section and the spe-

cial section 457 catch-up under this paragraph (c)(3) for years in effect prior to 2002 are reduced, for purposes of determining a participant's underutilized amount under a plan, by amounts excluded from the participant's income for any prior taxable year by reason of a nonelective employer contribution, salary reduction or elective contribution under any other eligible section 457(b) plan, or a salary reduction or elective contribution under any 401(k) qualified cash or deferred arrangement, section 402(h)(1)(B) simplified employee pension (SARSEP), section 403(b) annuity contract, and section 408(p) simple retirement account, or under any plan for which a deduction is allowed because of a contribution to an organization described in section 501(c)(18) (pre-2002 coordination plans). Similarly, in applying the section 457(b)(2)(B) limitation for includible compensation for years prior to 2002, the limitation is 33½ percent of the participant's compensation includible in gross income.

(B) *Coordination limitation applied to participant.* For purposes of determining the underutilized limitation for years prior to 2002, the coordination limitation applies to pre-2002 coordination plans of all employers for whom a participant has performed services, whether or not those are plans of the participant's current eligible employer. Thus, for purposes of determining the amount excluded from a participant's gross income in any prior taxable year under paragraph (c)(3)(ii)(B) of this section, the participant's annual deferrals under an eligible plan, and salary reduction or elective deferrals under all other pre-2002 coordination plans, must be determined on an aggregate basis. To the extent that the combined deferrals for years prior to 2002 exceeded the maximum deferral limitations, the amount is treated as an excess deferral under paragraph (e) of this section for those prior years.

(C) *Special rule where no annual deferrals under the eligible plan.* A participant who, although eligible, did not defer any compensation under the eligible plan in any year before 2002 is not subject to the coordinated deferral limit, even though the participant may have deferred compensation under one

of the other pre-2002 coordination plans. An individual is treated as not having deferred compensation under an eligible plan for a prior taxable year if all annual deferrals under the plan are distributed in accordance with paragraph (e) of this section. Thus, to the extent that a participant participated solely in one or more of the other pre-2002 coordination plans during a prior taxable year (and not the eligible plan), the participant is not subject to the coordinated limitation for that prior taxable year. However, the participant is treated as having deferred an amount in a prior taxable year, for purposes of determining the underutilized limitation for that prior taxable year under this paragraph (c)(3)(iv)(C), to the extent of the participant's aggregate salary reduction contributions and elective deferrals under all pre-2002 coordination plans up to the maximum deferral limitations in effect under section 457(b) for that prior taxable year. To the extent an employer did not offer an eligible plan to an individual in a prior given year, no underutilized limitation is available to the individual for that prior year, even if the employee subsequently becomes eligible to participate in an eligible plan of the employer.

(D) *Examples.* The provisions of this paragraph (c)(3)(iv) are illustrated by the following examples:

*Example 1.* (i) *Facts.* In 2001 and in years prior to 2001, Participant D earned \$50,000 a year and was eligible to participate in both an eligible plan and a section 401(k) plan. However, D had always participated only in the section 401(k) plan and had always deferred the maximum amount possible. For each year before 2002, the maximum amount permitted under section 401(k) exceeded the limitation of paragraph (c)(3)(i) of this section. In 2002, D is in the 3-year period prior to D's attainment of the eligible plan's normal retirement age of 65, and D now wants to participate in the eligible plan and make annual deferrals of up to \$30,000 under the plan's special section 457 catch-up provisions.

(ii) *Conclusion.* Participant D is treated as having no underutilized amount under paragraph (c)(3)(ii)(B) of this section for 2002 for purposes of the catch-up limitation under section 457(b)(3) and paragraph (c)(3) of this section because, in each of the years before 2002, D has deferred an amount equal to or in excess of the limitation of paragraph (c)(3)(i)

of this section under all of D's coordinated plans.

*Example 2.* (i) *Facts.* Assume the same facts as in *Example 1*, except that D only deferred \$2,500 per year under the section 401(k) plan for one year before 2002.

(ii) *Conclusion.* D is treated as having an underutilized amount under paragraph (c)(3)(ii)(B) of this section for 2002 for purposes of the special section 457 catch-up limitation. This is because D has deferred an amount for prior years that is less than the limitation of paragraph (c)(1)(i) of this section under all of D's coordinated plans.

*Example 3.* (i) *Facts.* Participant E, who earned \$15,000 for 2000, entered into a salary reduction agreement in 2000 with E's eligible employer and elected to defer \$3,000 for that year under E's eligible plan. For 2000, E's eligible employer provided an immediately vested, matching employer contribution under the plan for participants who make salary reduction deferrals under E's eligible plan. The matching contribution was equal to 67 percent of elective contributions, but not in excess of 10 percent of compensation before salary reduction deferrals (in E's case, \$1,000). For 2000, E was not eligible for any catch-up contribution, participated in no other retirement plan, and had no other income exclusions taken into account in computing taxable compensation.

(ii) *Conclusion.* Participant E's annual deferral equaled the maximum limitation of section 457(b) for 2000. E's maximum deferral limitation in 2000 was \$4,000 because E's includible compensation was \$12,000 (\$15,000 minus the deferral of \$3,000) and the applicable limitation for 2000 was one third of the individual's includible compensation (one-third of \$12,000 equals \$4,000). E's salary reduction deferral of \$3,000 combined with E's eligible employer's matching contribution of \$1,000 equals the limitation of section 457(b) for 2000 because E's annual deferrals totaled \$4,000. E's underutilized amount for 2000 is zero.

(v) *Normal retirement age—(A) General rule.* For purposes of the special section 457 catch-up in this paragraph (c)(3), a plan must specify the normal retirement age under the plan. A plan may define normal retirement age as any age that is on or after the earlier of age 65 or the age at which participants have the right to retire and receive, under the basic defined benefit pension plan of the State or tax-exempt entity (or a money purchase pension plan in which the participant also participates if the participant is not eligible to participate in a defined benefit plan), immediate retirement benefits without actuarial or similar reduction because

of retirement before some later specified age, and that is not later than age 70½. Alternatively, a plan may provide that a participant is allowed to designate a normal retirement age within these ages. For purposes of the special section 457 catch-up in this paragraph (c)(3), an entity sponsoring more than one eligible plan may not permit a participant to have more than one normal retirement age under the eligible plans it sponsors.

(B) *Special rule for eligible plans of qualified police or firefighters.* An eligible plan with participants that include qualified police or firefighters as defined under section 415(b)(2)(H)(i)(I) may designate a normal retirement age for such qualified police or firefighters that is earlier than the earliest normal retirement age designated under the general rule of paragraph (c)(3)(i)(A) of this section, but in no event may the normal retirement age be earlier than age 40. Alternatively, a plan may allow a qualified police or firefighter participant to designate a normal retirement age that is between age 40 and age 70½.

(vi) *Examples.* The provisions of this paragraph (c)(3) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant F, who will turn 61 on April 1, 2006, becomes eligible to participate in an eligible plan on January 1, 2006. The plan provides a normal retirement age of 65. The plan provides limitations on annual deferrals up to the maximum permitted under paragraphs (c)(1) through (3) of this section. For 2006, F will receive compensation of \$40,000 from the eligible employer. F desires to defer the maximum amount possible in 2006. The applicable basic dollar limit of paragraph (c)(1)(i)(A) of this section is \$15,000 for 2006 and the additional dollar amount permitted under the age 50 catch-up in paragraph (c)(2) of this section for an individual who is at least age 50 is \$5,000 for 2006.

(ii) *Conclusion.* F is not eligible for the special section 457 catch-up under paragraph (c)(3) of this section in 2006 because 2006 is not one of the last three taxable years ending before F attains normal retirement age. Accordingly, the maximum that F may defer for 2006 is \$20,000. See also paragraph (c)(2)(iii) *Example 1* of this section.

*Example 2.* (i) *Facts.* The facts are the same as in *Example 1* except that, in 2006, F elects to defer only \$2,000 under the plan (rather than the maximum permitted amount of \$20,000). In addition, assume that the applicable basic dollar limit of paragraph (c)(1)(i)(A)

of this section continues to be \$15,000 for 2007 and the additional dollar amount permitted under the age 50 catch-up in paragraph (c)(2) of this section for an individual who is at least age 50 continues to be \$5,000 for 2007. In F's taxable year 2007, which is one of the last three taxable years ending before F attains the plan's normal retirement age of 65, F again receives a salary of \$40,000 and elects to defer the maximum amount permissible under the plan's catch-up provisions prescribed under paragraph (c) of this section.

(ii) *Conclusion.* For 2007, which is one of the last three taxable years ending before F attains the plan's normal retirement age of 65, the applicable limit on deferrals for F is the larger of the amount under the special section 457 catch-up or \$20,000, which is the basic annual limitation (\$15,000) and the age 50 catch-up limit of section 414(v) (\$5,000). For 2007, F's special section 457 catch-up amount is the lesser of two times the basic annual limitation (\$30,000) or the sum of the basic annual limitation (\$15,000) plus the \$13,000 underutilized limitation under paragraph (c)(3)(ii) of this section (the \$15,000 plan ceiling in 2006, minus the \$2,000 contributed for F in 2006), or \$28,000. Thus, the maximum amount that F may defer in 2007 is \$28,000.

*Example 3.* (i) *Facts.* The facts are the same as in *Examples 1* and *2*, except that F does not make any contributions to the plan before 2010. In addition, assume that the applicable basic dollar limitation of paragraph (c)(1)(i)(A) of this section continues to be \$15,000 for 2010 and the additional dollar amount permitted under the age 50 catch-up in paragraph (c)(2) of this section for an individual who is at least age 50 continues to be \$5,000 for 2010. In F's taxable year 2010, the year in which F attains age 65 (which is the normal retirement age under the plan), F desires to defer the maximum amount possible under the plan. F's compensation for 2010 is again \$40,000.

(ii) *Conclusion.* For 2010, the maximum amount that F may defer is \$20,000. The special section 457 catch-up provisions under paragraph (c)(3) of this section are not applicable because 2010 is not a taxable year ending before the year in which F attains normal retirement age.

(4) *Cost-of-living adjustment.* For years beginning after December 31, 2006, the \$15,000 dollar limitation in paragraph (c)(1)(i)(A) of this section will be adjusted to take into account increases in the cost-of-living. The adjustment in the dollar limitation is made at the same time and in the same manner as under section 415(d) (relating to qualified plans under section 401(a)), except that the base period is the calendar quarter beginning July 1, 2005 and any

increase which is not a multiple of \$500 will be rounded to the next lowest multiple of \$500.

(d) *Deferrals after severance from employment, including sick, vacation, and back pay under an eligible plan*—(1) *In general.* An eligible plan may provide that a participant who has not had a severance from employment may elect to defer accumulated sick pay, accumulated vacation pay, and back pay under an eligible plan if the requirements of section 457(b) are satisfied. For example, the plan must provide, in accordance with paragraph (b) of this section, that these amounts may be deferred for any calendar month only if an agreement providing for the deferral is entered into before the beginning of the month in which the amounts would otherwise be paid or made available and the participant is an employee on the date the amounts would otherwise be paid or made available. For purposes of section 457, compensation that would otherwise be paid for a payroll period that begins before severance from employment is treated as an amount that would otherwise be paid or made available before an employee has a severance from employment. In addition, deferrals may be made for former employees with respect to compensation described in §1.415(c)-2(e)(3)(i) (relating to certain compensation paid by the later of 2½ months after severance from employment or the end of the limitation year that includes the date of severance from employment). For this purpose, the calendar year is substituted for the limitation year. In addition, compensation described in §1.415(c)-2(e)(4), (g)(4), or (g)(7) (relating to compensation paid to participants who are permanently and totally disabled or compensation relating to qualified military service under section 414(u)), provided those amounts represent compensation described in §1.415(c)-2(e)(3)(i).

(2) *Examples.* The provisions of this paragraph (d) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant G, who is age 62 in year 2007, is an employee who participates in an eligible plan providing a normal retirement age of 65 and a bona fide sick leave and vacation pay program of the eligible employer. Under the terms of G's em-

ployer's eligible plan and the sick leave and vacation pay program, G is permitted to make a one-time election to contribute amounts representing accumulated sick pay to the eligible plan. G has a severance from employment on January 12, 2008, at which time G's accumulated sick and vacation pay that is payable on March 15, 2008, totals \$12,000. G elects, on February 4, 2008, to have the \$12,000 of accumulated sick and vacation pay contributed to the eligible plan.

(ii) *Conclusion.* Under the terms of the eligible plan and the sick and vacation pay program, G may elect before March 1, 2008, to defer the accumulated sick and vacation pay because the agreement providing for the deferral is entered into before the beginning of the month in which the amount is currently available and the amount is bona fide accumulated sick and vacation pay, as described in §1.415(c)-2(e)(3)(ii), and that is payable by the later of 2½ months after severance from employment or the end of the calendar year that includes the date of severance from employment by G. Thus, under this section and §1.415(c)-2(e)(3)(ii), the \$12,000 is included in G's includible compensation for purposes of determining G's includible compensation in year 2008.

*Example 2.* (i) *Facts.* Same facts as in *Example 1*, except that G's severance from employment is on May 31, 2008, G's \$12,000 of accumulated sick and vacation pay is payable on September 15, 2008 (which is by the later of 2½ months after severance from employment or the end of the calendar year that includes the date of severance from employment by G), and G's election to defer the accumulated sick and vacation pay is made before May 1, 2008.

(ii) *Conclusion.* Under this section and §1.415(c)-2(e)(3)(ii), the \$12,000 is included in G's includible compensation for purposes of determining G's includible compensation in year 2008.

*Example 3.* (i) *Facts.* Employer X maintains an eligible plan and a vacation leave plan. Under the terms of the vacation leave plan, employees generally accrue three weeks of vacation per year. Up to one week's unused vacation may be carried over from one year to the next, so that in any single year an employee may have a maximum of four weeks' vacation time. At the beginning of each calendar year, under the terms of the eligible plan (which constitutes an agreement providing for the deferral), the value of any unused vacation time from the prior year in excess of one week is automatically contributed to the eligible plan, to the extent of the employee's maximum deferral limitations. Amounts in excess of the maximum deferral limitations are forfeited.

(ii) *Conclusion.* The value of the unused vacation pay contributed to X's eligible plan pursuant to the terms of the plan and the terms of the vacation leave plan is treated as

an annual deferral to the eligible plan for January of the calendar year. No amounts contributed to the eligible plan will be considered made available to a participant in X's eligible plan.

(e) *Excess deferrals under an eligible plan*—(1) *In general.* Any amount deferred under an eligible plan for the taxable year of a participant that exceeds the maximum deferral limitations set forth in paragraphs (c)(1) through (3) of this section, and any amount that exceeds the individual limitation under §1.457-5, constitutes an excess deferral that is taxable in accordance with §1.457-11 for that taxable year. Thus, an excess deferral is includible in gross income in the taxable year deferred or, if later, the first taxable year in which there is no substantial risk of forfeiture.

(2) *Excess deferrals under an eligible governmental plan other than as a result of the individual limitation.* In order to be an eligible governmental plan, the plan must provide that any excess deferral resulting from a failure of a plan to apply the limitations of paragraphs (c)(1) through (3) of this section to amounts deferred under the eligible plan (computed without regard to the individual limitation under §1.457-5) will be distributed to the participant, with allocable net income, as soon as administratively practicable after the plan determines that the amount is an excess deferral. For purposes of determining whether there is an excess deferral resulting from a failure of a plan to apply the limitations of paragraphs (c)(1) through (3) of this section, all plans under which an individual participates by virtue of his or her relationship with a single employer are treated as a single plan (without regard to any differences in funding). An eligible governmental plan does not fail to satisfy the requirements of paragraphs (a) through (d) of this section or §§1.457-6 through 1.457-10 (including the distribution rules under §1.457-6 and the funding rules under §1.457-8) solely by reason of a distribution made under this paragraph (e)(2). If such excess deferrals are not corrected by distribution under this paragraph (e)(2), the plan will be an ineligible plan under which benefits are taxable in accordance with §1.457-11.

(3) *Excess deferrals under an eligible plan of a tax-exempt employer other than as a result of the individual limitation.* If a plan of a tax-exempt employer fails to comply with the limitations of paragraphs (c)(1) through (3) of this section, the plan will be an ineligible plan under which benefits are taxable in accordance with §1.457-11. However, a plan may distribute to a participant any excess deferrals (and any income allocable to such amount) not later than the first April 15 following the close of the taxable year of the excess deferrals. In such a case, the plan will continue to be treated as an eligible plan. However, any excess deferral is included in the gross income of a participant for the taxable year of the excess deferral. If the excess deferrals are not corrected by distribution under this paragraph (e)(3), the plan is an ineligible plan under which benefits are taxable in accordance with §1.457-11. For purposes of determining whether there is an excess deferral resulting from a failure of a plan to apply the limitations of paragraphs (c)(1) through (3) of this section, all eligible plans under which an individual participates by virtue of his or her relationship with a single employer are treated as a single plan.

(4) *Excess deferrals arising from application of the individual limitation.* An eligible plan may provide that an excess deferral that is a result solely of a failure to comply with the individual limitation under §1.457-5 for a taxable year may be distributed to the participant, with allocable net income, as soon as administratively practicable after the plan determines that the amount is an excess deferral. An eligible plan does not fail to satisfy the requirements of paragraphs (a) through (d) of this section or §§1.457-6 through 1.457-10 (including the distribution rules under §1.457-6 and the funding rules under §1.457-8) solely by reason of a distribution made under this paragraph (e)(4). Although a plan will still maintain eligible status if excess deferrals are not distributed under this paragraph (e)(4), a participant must include the excess amounts in income as provided in paragraph (e)(1) of this section.

(5) *Examples.* The provisions of this paragraph (e) are illustrated by the following examples:

*Example 1.* (i) *Facts.* In 2006, the eligible plan of State Employer X in which Participant H participates permits a maximum deferral of the lesser of \$15,000 or 100 percent of includible compensation. In 2006, H, who has compensation of \$28,000, nevertheless defers \$16,000 under the eligible plan. Participant H is age 45 and normal retirement age under the plan is age 65. For 2006, the applicable dollar limit under paragraph (c)(1)(i)(A) of this section is \$15,000. Employer X discovers the error in January of 2007 when it completes H's 2006 Form W-2 and promptly distributes \$1,022 to H (which is the sum of the \$1,000 excess and \$22 of allocable net income).

(ii) *Conclusion.* Participant H has deferred \$1,000 in excess of the \$15,000 limitation provided for under the plan for 2006. The \$1,000 excess must be included by H in H's income for 2006. In order to correct the failure and still be an eligible plan, the plan must distribute the excess deferral, with allocable net income, as soon as administratively practicable after determining that the amount exceeds the plan deferral limitations. In this case, \$22 of the distribution of \$1,022 is included in H's gross income for 2007 (and is not an eligible rollover distribution). If the excess deferral were not distributed, the plan would be an ineligible plan with respect to which benefits are taxable in accordance with § 1.457-11.

*Example 2.* (i) *Facts.* The facts are the same as in *Example 1*, except that X uses a number of separate arrangements with different trustees and annuity insurers to permit employees to defer and H elects deferrals under several of the funding arrangements none of which exceeds \$15,000 for any individual funding arrangement, but which total \$16,000.

(ii) *Conclusion.* The conclusion is the same as in *Example 1*.

*Example 3.* (i) *Facts.* The facts are the same as in *Example 1*, except that H's deferral under the eligible plan is limited to \$11,000 and H also makes a salary reduction contribution of \$5,000 to an annuity contract under section 403(b) with the same Employer X.

(ii) *Conclusion.* H's deferrals are within the plan deferral limitations of Employer X. Because of the repeal of the application of the coordination limitation under former paragraph (2) of section 457(c), H's salary reduction deferrals under the annuity contract are no longer considered in determining H's applicable deferral limits under paragraphs (c)(1) through (3) of this section.

*Example 4.* (i) *Facts.* The facts are the same as in *Example 1*, except that H's deferral under the eligible governmental plan is limited to \$14,000 and H also makes a deferral of \$4,000 to an eligible governmental plan of a

different employer. Participant H is age 45 and normal retirement age under both eligible plans is age 65.

(ii) *Conclusion.* Because of the application of the individual limitation under § 1.457-5, H has an excess deferral of \$3,000 (the sum of \$14,000 plus \$4,000 equals \$18,000, which is \$3,000 in excess of the dollar limitation of \$15,000). The \$3,000 excess deferral, with allocable net income, may be distributed from either plan as soon as administratively practicable after determining that the combined amount exceeds the deferral limitations. If the \$3,000 excess deferral is not distributed to H, each plan will continue to be an eligible plan, but the \$3,000 must be included by H in H's income for 2006.

*Example 5.* (i) *Facts.* Assume the same facts as in *Example 3*, except that H's deferral under the eligible governmental plan is limited to \$14,000 and H also makes a deferral of \$4,000 to an eligible plan of Employer Y, a tax-exempt entity.

(ii) *Conclusion.* The results are the same as in *Example 3*, namely, because of the application of the individual limitation under § 1.457-5, H has an excess deferral of \$3,000. If the \$3,000 excess deferral is not distributed to H, each plan will continue to be an eligible plan, but the \$3,000 must be included by H in H's income for 2006.

*Example 6.* (i) *Facts.* Assume the same facts as in *Example 5*, except that X is a tax-exempt entity and thus its plan is an eligible plan of a tax-exempt entity.

(ii) *Conclusion.* The results are the same as in *Example 5*, namely, because of the application of the individual limitation under § 1.457-5, H has an excess deferral of \$3,000. If the \$3,000 excess deferral is not distributed to H, each plan will continue to be an eligible plan, but the \$3,000 must be included by H into H's income for 2006.

[T.D. 9075, 68 FR 41234, July 11, 2003; 68 FR 51446, Aug. 27, 2003; T.D. 9319, 72 FR 16930, Apr. 5, 2007]

#### § 1.457-5 Individual limitation for combined annual deferrals under multiple eligible plans

(a) *General rule.* The individual limitation under section 457(c) and this section equals the basic annual deferral limitation under § 1.457-4(c)(1)(i)(A), plus either the age 50 catch-up amount under § 1.457-4(c)(2), or the special section 457 catch-up amount under § 1.457-4(c)(3), applied by taking into account the combined annual deferral for the participant for any taxable year under all eligible plans. While an eligible plan may include provisions under which it will limit deferrals to meet the individual limitation under section 457(c)

and this section, annual deferrals by a participant that exceed the individual limit under section 457(c) and this section (but do not exceed the limits under § 1.457-4(c)) will not cause a plan to lose its eligible status. However, to the extent the combined annual deferrals for a participant for any taxable year exceed the individual limitation under section 457(c) and this section for that year, the amounts are treated as excess deferrals as described in § 1.457-4(e).

(b) *Limitation applied to participant.* The individual limitation in this section applies to eligible plans of all employers for whom a participant has performed services, including both eligible governmental plans and eligible plans of a tax-exempt entity and both eligible plans of the employer and eligible plans of other employers. Thus, for purposes of determining the amount excluded from a participant's gross income in any taxable year (including the underutilized limitation under § 1.457-4 (c)(3)(ii)(B)), the participant's annual deferral under an eligible plan, and the participant's annual deferrals under all other eligible plans, must be determined on an aggregate basis. To the extent that the combined annual deferral amount exceeds the maximum deferral limitation applicable under § 1.457-4 (c)(1)(i)(A), (c)(2), or (c)(3), the amount is treated as an excess deferral under § 1.457-4(e).

(c) *Special rules for catch-up amounts under multiple eligible plans.* For purposes of applying section 457(c) and this section, the special section 457 catch-up under § 1.457-4 (c)(3) is taken into account only to the extent that an annual deferral is made for a participant under an eligible plan as a result of plan provisions permitted under § 1.457-4 (c)(3). In addition, if a participant has annual deferrals under more than one eligible plan and the applicable catch-up amount under § 1.457-4 (c)(2) or (3) is not the same for each such eligible plan for the taxable year, section 457(c) and this section are applied using the catch-up amount under whichever plan has the largest catch-up amount applicable to the participant.

(d) *Examples.* The provisions of this section are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant F is age 62 in 2006 and participates in two eligible plans during 2006, Plans J and K, which are each eligible plans of two different governmental entities. Each plan includes provisions allowing the maximum annual deferral permitted under § 1.457-4(c)(1) through (3). For 2006, the underutilized amount under § 1.457-4 (c)(3)(ii)(B) is \$20,000 under Plan J and is \$40,000 under Plan K. Normal retirement age is age 65 under both plans. Participant F defers \$15,000 under each plan. Participant F's includible compensation is in each case in excess of the deferral. Neither plan designates the \$15,000 contribution as a catch-up permitted under each plan's special section 457 catch-up provisions.

(ii) *Conclusion.* For purposes of applying this section to Participant F for 2006, the maximum exclusion is \$20,000. This is equal to the sum of \$15,000 plus \$5,000, which is the age 50 catch-up amount. Thus, F has an excess amount of \$10,000 which is treated as an excess deferral for Participant F for 2006 under § 1.457-4(e).

*Example 2.* (i) *Facts.* Participant E, who will turn 63 on April 1, 2006, participates in four eligible plans during year 2006: Plan W which is an eligible governmental plan; and Plans X, Y, and Z which are each eligible plans of three different tax-exempt entities. For year 2006, the limitation that applies to Participant E under all four plans under § 1.457-4(c)(1)(i)(A) is \$15,000. For year 2006, the additional age 50 catch-up limitation that applies to Participant E under all four plans under § 1.457-4(c)(2) is \$5,000. Further, for year 2006, different limitations under § 1.457-4(c)(3) and (c)(3)(ii)(B) apply to Participant E under each of these plans, as follows: under Plan W, the underutilized limitation under § 1.457-4(c)(3)(ii)(B) is \$7,000; under Plan X, the underutilized limitation under § 1.457-4(c)(3)(ii)(B) is \$2,000; under Plan Y, the underutilized limitation under § 1.457-4(c)(3)(ii)(B) is \$8,000; and under Plan Z, § 1.457-4(c)(3) is not applicable since normal retirement age is 62 under Plan Z. Participant E's includible compensation is in each case in excess of any applicable deferral.

(ii) *Conclusion.* For purposes of applying this section to Participant E for year 2006, Participant E could elect to defer \$23,000 under Plan Y, which is the maximum deferral limitation under § 1.457-4(c)(1) through (3), and to defer no amount under Plans W, X, and Z. The \$23,000 maximum amount is equal to the sum of \$15,000 plus \$8,000, which is the catch-up amount applicable to Participant E under Plan Y and which is the largest catch-up amount applicable to Participant E under any of the four plans for year 2006. Alternatively, Participant E could instead elect to defer the following combination of amounts: An aggregate total of \$15,000 to Plans X, Y, and Z, if no contribution is made to Plan W; an aggregate total of \$20,000 to

any of the four plans, assuming at least \$5,000 is contributed to Plan W; or \$22,000 to Plan W and none to any of the other three plans.

(iii) If the underutilized amount under Plans W, X, and Y for year 2006 were in each case zero (because E had always contributed the maximum amount or E was a new participant) or an amount not in excess of \$5,000, the maximum exclusion under this section would be \$20,000 for Participant E for year 2006 (\$15,000 plus the \$5,000 age 50 catch-up amount), which Participant E could contribute to any of the plans assuming at least \$5,000 is contributed to Plan W.

[T.D. 9075, 68 FR 41240, July 11, 2003; 68 FR 51446, Aug. 26, 2003; T.D. 9319, 72 FR 16930, Apr. 5, 2007; 72 FR 28854, May 23, 2007]

**§ 1.457-6 Timing of distributions under eligible plans.**

(a) *In general.* Except as provided in paragraph (c) of this section (relating to distributions on account of an unforeseeable emergency), paragraph (e) of this section (relating to distributions of small accounts), § 1.457-10(a) (relating to plan terminations), or § 1.457-10(c) (relating to domestic relations orders), amounts deferred under an eligible plan may not be paid to a participant or beneficiary before the participant has a severance from employment with the eligible employer or when the participant attains age 70½, if earlier. For rules relating to loans, see paragraph (f) of this section. This section does not apply to distributions of excess amounts under § 1.457-4(e). However, except to the extent set forth by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d) of this chapter), this section applies to amounts held in a separate account for eligible rollover distributions maintained by an eligible governmental plan as described in § 1.457-10(e)(2).

(b) *Severance from employment*—(1) *Employees.* An employee has a severance from employment with the eligible employer if the employee dies, retires, or otherwise has a severance from employment with the eligible employer. See regulations under section 401(k) for additional guidance concerning severance from employment.

(2) *Independent contractors*—(i) *In general.* An independent contractor is considered to have a severance from em-

ployment with the eligible employer upon the expiration of the contract (or in the case of more than one contract, all contracts) under which services are performed for the eligible employer if the expiration constitutes a good-faith and complete termination of the contractual relationship. An expiration does not constitute a good faith and complete termination of the contractual relationship if the eligible employer anticipates a renewal of a contractual relationship or the independent contractor becoming an employee. For this purpose, an eligible employer is considered to anticipate the renewal of the contractual relationship with an independent contractor if it intends to contract again for the services provided under the expired contract, and neither the eligible employer nor the independent contractor has eliminated the independent contractor as a possible provider of services under any such new contract. Further, an eligible employer is considered to intend to contract again for the services provided under an expired contract if the eligible employer's doing so is conditioned only upon incurring a need for the services, the availability of funds, or both.

(ii) *Special rule.* Notwithstanding paragraph (b)(2)(i) of this section, the plan is considered to satisfy the requirement described in paragraph (a) of this section that no amounts deferred under the plan be paid or made available to the participant before the participant has a severance from employment with the eligible employer if, with respect to amounts payable to a participant who is an independent contractor, an eligible plan provides that—

(A) No amount will be paid to the participant before a date at least 12 months after the day on which the contract expires under which services are performed for the eligible employer (or, in the case of more than one contract, all such contracts expire); and

(B) No amount payable to the participant on that date will be paid to the participant if, after the expiration of the contract (or contracts) and before that date, the participant performs services for the eligible employer as an independent contractor or an employee.

(c) *Rules applicable to distributions for unforeseeable emergencies*—(1) *In general.* An eligible plan may permit a distribution to a participant or beneficiary for an unforeseeable emergency. The distribution must satisfy the requirements of paragraph (c)(2) of this section.

(2) *Requirements*—(i) *Unforeseeable emergency defined.* An unforeseeable emergency must be defined in the plan as a severe financial hardship of the participant or beneficiary resulting from an illness or accident of the participant or beneficiary, the participant's or beneficiary's spouse, or the participant's or beneficiary's dependent (as defined in section 152, and, for taxable years beginning on or after January 1, 2005, without regard to section 152(b)(1), (b)(2), and (d)(1)(B)); loss of the participant's or beneficiary's property due to casualty (including the need to rebuild a home following damage to a home not otherwise covered by homeowner's insurance, such as damage that is the result of a natural disaster); or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the participant or the beneficiary. For example, the imminent foreclosure of or eviction from the participant's or beneficiary's primary residence may constitute an unforeseeable emergency. In addition, the need to pay for medical expenses, including non-refundable deductibles, as well as for the cost of prescription drug medication, may constitute an unforeseeable emergency. Finally, the need to pay for the funeral expenses of a spouse or a dependent (as defined in section 152, and, for taxable years beginning on or after January 1, 2005, without regard to section 152(b)(1), (b)(2), and (d)(1)(B)) of a participant or beneficiary may also constitute an unforeseeable emergency. Except as otherwise specifically provided in this paragraph (c)(2)(i), the purchase of a home and the payment of college tuition are not unforeseeable emergencies under this paragraph (c)(2)(i).

(ii) *Unforeseeable emergency distribution standard.* Whether a participant or beneficiary is faced with an unforeseeable emergency permitting a distribution under this paragraph (c) is to be

determined based on the relevant facts and circumstances of each case, but, in any case, a distribution on account of unforeseeable emergency may not be made to the extent that such emergency is or may be relieved through reimbursement or compensation from insurance or otherwise, by liquidation of the participant's assets, to the extent the liquidation of such assets would not itself cause severe financial hardship, or by cessation of deferrals under the plan.

(iii) *Distribution necessary to satisfy emergency need.* Distributions because of an unforeseeable emergency must be limited to the amount reasonably necessary to satisfy the emergency need (which may include any amounts necessary to pay for any federal, state, or local income taxes or penalties reasonably anticipated to result from the distribution).

(d) *Minimum required distributions for eligible plans.* In order to be an eligible plan, a plan must meet the distribution requirements of section 457(d)(1) and (2). Under section 457(d)(2), a plan must meet the minimum distribution requirements of section 401(a)(9). See section 401(a)(9) and the regulations thereunder for these requirements. Section 401(a)(9) requires that a plan begin lifetime distributions to a participant no later than April 1 of the calendar year following the later of the calendar year in which the participant attains age 70½ or the calendar year in which the participant retires.

(e) *Distributions of smaller accounts*—(1) *In general.* An eligible plan may provide for a distribution of all or a portion of a participant's benefit if this paragraph (e)(1) is satisfied. This paragraph (e)(1) is satisfied if the participant's total amount deferred (the participant's total account balance) which is not attributable to rollover contributions (as defined in section 411(a)(11)(D)) is not in excess of the dollar limit under section 411(a)(11)(A), no amount has been deferred under the plan by or for the participant during the two-year period ending on the date of the distribution, and there has been no prior distribution under the plan to the participant under this paragraph (e). An eligible plan is not required to

permit distributions under this paragraph (e).

(2) *Alternative provisions possible.* Consistent with the provisions of paragraph (e)(1) of this section, a plan may provide that the total amount deferred for a participant or beneficiary will be distributed automatically to the participant or beneficiary if the requirements of paragraph (e)(1) of this section are met. Alternatively, if the requirements of paragraph (e)(1) of this section are met, the plan may provide for the total amount deferred for a participant or beneficiary to be distributed to the participant or beneficiary only if the participant or beneficiary so elects. The plan is permitted to substitute a specified dollar amount that is less than the total amount deferred. In addition, these two alternatives can be combined; for example, a plan could provide for automatic distributions for up to \$500, but allow a participant or beneficiary to elect a distribution if the total account balance is above \$500.

(f) *Loans from eligible plans—(1) Eligible plans of tax-exempt entities.* If a participant or beneficiary receives (directly or indirectly) any amount deferred as a loan from an eligible plan of a tax-exempt entity, that amount will be treated as having been paid or made available to the individual as a distribution under the plan, in violation of the distribution requirements of section 457(d).

(2) *Eligible governmental plans.* The determination of whether the availability of a loan, the making of a loan, or a failure to repay a loan made from a trustee (or a person treated as a trustee under section 457(g)) of an eligible governmental plan to a participant or beneficiary is treated as a distribution (directly or indirectly) for purposes of this section, and the determination of whether the availability of the loan, the making of the loan, or a failure to repay the loan is in any other respect a violation of the requirements of section 457(b) and the regulations, depends on the facts and circumstances. Among the facts and circumstances are whether the loan has a fixed repayment schedule and bears a reasonable rate of interest, and whether there are repayment safeguards to which a prudent lender would adhere. Thus, for exam-

ple, a loan must bear a reasonable rate of interest in order to satisfy the exclusive benefit requirement of section 457(g)(1) and §1.457-8(a)(1). See also §1.457-7(b)(3) relating to the application of section 72(p) with respect to the taxation of a loan made under an eligible governmental plan, and §1.72(p)-1 relating to section 72(p)(2).

(3) *Example.* The provisions of paragraph (f)(2) of this section are illustrated by the following example:

*Example.* (i) *Facts.* Eligible Plan X of State Y is funded through Trust Z. Plan X permits an employee's account balance under Plan X to be paid in a single sum at severance from employment with State Y. Plan X includes a loan program under which any active employee with a vested account balance may receive a loan from Trust Z. Loans are made pursuant to plan provisions regarding loans that are set forth in the plan under which loans bear a reasonable rate of interest and are secured by the employee's account balance. In order to avoid taxation under §1.457-7(b)(3) and section 72(p)(1), the plan provisions limit the amount of loans and require loans to be repaid in level installments as required under section 72(p)(2). Participant J's vested account balance under Plan X is \$50,000. J receives a loan from Trust Z in the amount of \$5,000 on December 1, 2003, to be repaid in level installments made quarterly over the 5-year period ending on November 30, 2008. Participant J makes the required repayments until J has a severance from employment from State Y in 2005 and subsequently fails to repay the outstanding loan balance of \$2,250. The \$2,250 loan balance is offset against J's \$80,000 account balance benefit under Plan X, and J elects to be paid the remaining \$77,750 in 2005.

(ii) *Conclusion.* The making of the loan to J will not be treated as a violation of the requirements of section 457(b) or the regulations. The cancellation of the loan at severance from employment does not cause Plan X to fail to satisfy the requirements for plan eligibility under section 457. In addition, because the loan satisfies the maximum amount and repayment requirements of section 72(p)(2), J is not required to include any amount in income as a result of the loan until 2005, when J has income of \$2,250 as a result of the offset (which is a permissible distribution under this section) and income of \$77,750 as a result of the distribution made in 2005.

[T.D. 9075, 68 FR 41240, July 11, 2003; 68 FR 51446, Aug. 27, 2003; T.D. 9319, 72 FR 16930, Apr. 5, 2007]

**§ 1.457-7 Taxation of Distributions Under Eligible Plans.**

(a) *General rules for when amounts are included in gross income.* The rules for determining when an amount deferred under an eligible plan is includible in the gross income of a participant or beneficiary depend on whether the plan is an eligible governmental plan or an eligible plan of a tax-exempt entity. Paragraph (b) of this section sets forth the rules for an eligible governmental plan. Paragraph (c) of this section sets forth the rules for an eligible plan of a tax-exempt entity.

(b) *Amounts included in gross income under an eligible governmental plan—(1) Amounts included in gross income in year paid under an eligible governmental plan.* Except as provided in paragraphs (b)(2) and (3) of this section (or in § 1.457-10(c) relating to payments to a spouse or former spouse pursuant to a qualified domestic relations order), amounts deferred under an eligible governmental plan are includible in the gross income of a participant or beneficiary for the taxable year in which paid to the participant or beneficiary under the plan.

(2) *Rollovers to individual retirement arrangements and other eligible retirement plans.* A trustee-to-trustee transfer in accordance with section 401(a)(31) (generally referred to as a direct rollover) from an eligible government plan is not includible in gross income of a participant or beneficiary in the year transferred. In addition, any payment made from an eligible government plan in the form of an eligible rollover distribution (as defined in section 402(c)(4)) is not includible in gross income in the year paid to the extent the payment is transferred to an eligible retirement plan (as defined in section 402(c)(8)(B)) within 60 days, including the transfer to the eligible retirement plan of any property distributed from the eligible governmental plan. For this purpose, the rules of section 402(c)(2) through (7) and (9) apply. Any trustee-to-trustee transfer under this paragraph (b)(2) from an eligible government plan is a distribution that is subject to the distribution requirements of § 1.457-6.

(3) *Amounts taxable under section 72(p)(1).* In accordance with section 72(p), the amount of any loan from an

eligible governmental plan to a participant or beneficiary (including any pledge or assignment treated as a loan under section 72(p)(1)(B)) is treated as having been received as a distribution from the plan under section 72(p)(1), except to the extent set forth in section 72(p)(2) (relating to loans that do not exceed a maximum amount and that are repayable in accordance with certain terms) and § 1.72(p)-1. Thus, except to the extent a loan satisfies section 72(p)(2), any amount loaned from an eligible governmental plan to a participant or beneficiary (including any pledge or assignment treated as a loan under section 72(p)(1)(B)) is includible in the gross income of the participant or beneficiary for the taxable year in which the loan is made. See generally § 1.72(p)-1.

(4) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Eligible Plan G of a governmental entity permits distribution of benefits in a single sum or in installments of up to 20 years, with such benefits to commence at any date that is after severance from employment (up to the later of severance from employment or the plan's normal retirement age of 65). Effective for participants who have a severance from employment after December 31, 2001, Plan X allows an election—as to both the date on which payments are to begin and the form in which payments are to be made—to be made by the participant at any time that is before the commencement date selected. However, Plan X chooses to require elections to be filed at least 30 days before the commencement date selected in order for Plan X to have enough time to be able to effectuate the election.

(ii) *Conclusion.* No amounts are included in gross income before actual payments begin. If installment payments begin (and the installment payments are payable over at least 10 years so as not to be eligible rollover distributions), the amount included in gross income for any year is equal to the amount of the installment payment paid during the year.

*Example 2.* (i) *Facts.* Same facts as in *Example 1*, except that the same rules are extended to participants who had a severance from employment before January 1, 2002.

(ii) *Conclusion.* For all participants (that is, both those who have a severance from employment after December 31, 2001, and those who have a severance from employment before January 1, 2002, including those whose benefit payments have commenced before January 1, 2002), no amounts are included in

gross income before actual payments begin. If installment payments begin (and the installment payments are payable over at least 10 years so as not to be eligible rollover distributions), the amount included in gross income for any year is equal to the amount of the installment payment paid during the year.

(c) *Amounts included in gross income under an eligible plan of a tax-exempt entity*—(1) *Amounts included in gross income in year paid or made available under an eligible plan of a tax-exempt entity.* Amounts deferred under an eligible plan of a tax-exempt entity are includible in the gross income of a participant or beneficiary for the taxable year in which paid or otherwise made available to the participant or beneficiary under the plan. Thus, amounts deferred under an eligible plan of a tax-exempt entity are includible in the gross income of the participant or beneficiary in the year the amounts are first made available under the terms of the plan, even if the plan has not distributed the amounts deferred. Amounts deferred under an eligible plan of a tax-exempt entity are not considered made available to the participant or beneficiary solely because the participant or beneficiary is permitted to choose among various investments under the plan.

(2) *When amounts deferred are considered to be made available under an eligible plan of a tax-exempt entity*—(i) *General rule.* Except as provided in paragraphs (c)(2)(ii) through (iv) of this section, amounts deferred under an eligible plan of a tax-exempt entity are considered made available (and, thus, are includible in the gross income of the participant or beneficiary under this paragraph (c)) at the earliest date, on or after severance from employment, on which the plan allows distributions to commence, but in no event later than the date on which distributions must commence pursuant to section 401(a)(9). For example, in the case of a plan that permits distribution to commence on the date that is 60 days after the close of the plan year in which the participant has a severance from employment with the eligible employer, amounts deferred are considered to be made available on that date. However, distributions deferred in accordance with paragraphs (c)(2)(ii) through (iv) of this section are not considered made

available prior to the applicable date under paragraphs (c)(2)(ii) through (iv) of this section. In addition, no portion of a participant or beneficiary's account is treated as made available (and thus currently includible in income) under an eligible plan of a tax-exempt entity merely because the participant or beneficiary under the plan may elect to receive a distribution in any of the following circumstances:

(A) A distribution in the event of an unforeseeable emergency to the extent the distribution is permitted under §1.457-6(c).

(B) A distribution from an account for which the total amount deferred is not in excess of the dollar limit under section 411(a)(11)(A) to the extent the distribution is permitted under §1.457-6(e).

(ii) *Initial election to defer commencement of distributions*—(A) *In general.* An eligible plan of a tax-exempt entity may provide a period for making an initial election during which the participant or beneficiary may elect, in accordance with the terms of the plan, to defer the payment of some or all of the amounts deferred to a fixed or determinable future time. The period for making this initial election must expire prior to the first time that any such amounts would be considered made available under the plan under paragraph (c)(2)(i) of this section.

(B) *Failure to make initial election to defer commencement of distributions.* Generally, if no initial election is made by a participant or beneficiary under this paragraph (c)(2)(ii), then the amounts deferred under an eligible plan of a tax-exempt entity are considered made available and taxable to the participant or beneficiary in accordance with paragraph (c)(2)(i) of this section at the earliest time, on or after severance from employment (but in no event later than the date on which distributions must commence pursuant to section 401(a)(9)), that distribution is permitted to commence under the terms of the plan. However, the plan may provide for a default payment schedule that applies if no election is made. If the plan provides for a default payment schedule, the amounts deferred are includible in the gross income of the participant or beneficiary

in the year the amounts deferred are first made available under the terms of the default payment schedule.

(iii) *Additional election to defer commencement of distribution.* An eligible plan of a tax-exempt entity is permitted to provide that a participant or beneficiary who has made an initial election under paragraph (c)(2)(ii)(A) of this section may make one additional election to defer (but not accelerate) commencement of distributions under the plan before distributions have commenced in accordance with the initial deferral election under paragraph (c)(2)(ii)(A) of this section. Amounts payable to a participant or beneficiary under an eligible plan of a tax-exempt entity are not treated as made available merely because the plan allows the participant to make an additional election under this paragraph (c)(2)(iii). A participant or beneficiary is not precluded from making an additional election to defer commencement of distributions merely because the participant or beneficiary has previously received a distribution under § 1.457-6(c) because of an unforeseeable emergency, has received a distribution of smaller amounts under § 1.457-6(e), has made (and revoked) other deferral or method of payment elections within the initial election period, or is subject to a default payment schedule under which the commencement of benefits is deferred (for example, until a participant is age 65).

(iv) *Election as to method of payment.* An eligible plan of a tax-exempt entity may provide that an election as to the method of payment under the plan may be made at any time prior to the time the amounts are distributed in accordance with the participant or beneficiary's initial or additional election to defer commencement of distributions under paragraph (c)(2)(ii) or (iii) of this section. Where no method of payment is elected, the entire amount deferred will be includible in the gross income of the participant or beneficiary when the amounts first become made available in accordance with a participant's initial or additional elections to defer under paragraphs (c)(2)(ii) and (iii) of this section, unless the eligible plan provides for a default method of payment (in which case

amounts are considered made available and taxable when paid under the terms of the default payment schedule). A method of payment means a distribution or a series of periodic distributions commencing on a date determined in accordance with paragraph (c)(2)(ii) or (iii) of this section.

(3) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Eligible Plan X of a tax-exempt entity provides that a participant's total account balance, representing all amounts deferred under the plan, is payable to a participant in a single sum 60 days after severance from employment throughout these examples, unless, during a 30-day period immediately following the severance, the participant elects to receive the single sum payment at a later date (that is not later than the plan's normal retirement age of 65) or elects to receive distribution in 10 annual installments to begin 60 days after severance from employment (or at a later date, if so elected, that is not later than the plan's normal retirement age of 65). On November 13, 2004, K, a calendar year taxpayer, has a severance from employment with the eligible employer. K does not, within the 30-day window period, elect to postpone distributions to a later date or to receive payment in 10 fixed annual installments.

(ii) *Conclusion.* The single sum payment is payable to K 60 days after the date K has a severance from employment (January 12, 2005), and is includible in the gross income of K in 2005 under section 457(a).

*Example 2.* (i) *Facts.* The terms of eligible Plan X are the same as described in *Example 1*. Participant L participates in eligible Plan X. On November 11, 2003, L has a severance from the employment of the eligible employer. On November 24, 2003, L makes an initial deferral election not to receive the single-sum payment payable 60 days after the severance, and instead elects to receive the amounts in 10 annual installments to begin 60 days after severance from employment.

(ii) *Conclusion.* No portion of L's account is considered made available in 2003 or 2004 before a payment is made and no amount is includible in the gross income of L until distributions commence. The annual installment payable in 2004 will be includible in L's gross income in 2004.

*Example 3.* (i) *Facts.* The facts are the same as in *Example 1*, except that eligible Plan X also provides that those participants who are receiving distributions in 10 annual installments may, at any time and without restriction, elect to receive a cash out of all remaining installments. Participant M elects

to receive a distribution in 10 annual installments commencing in 2004.

(ii) *Conclusion.* M's total account balance, representing the total of the amounts deferred under the plan, is considered made available and is includible in M's gross income in 2004.

*Example 4.* (i) *Facts.* The facts are the same as in *Example 3*, except that, instead of providing for an unrestricted cashout of remaining payments, the plan provides that participants or beneficiaries who are receiving distributions in 10 annual installments may accelerate the payment of the amount remaining payable to the participant upon the occurrence of an unforeseeable emergency as described in § 1.457-6(c)(1) in an amount not exceeding that described in § 1.457-6(c)(2).

(ii) *Conclusion.* No amount is considered made available to participant M on account of M's right to accelerate payments upon the occurrence of an unforeseeable emergency.

*Example 5.* (i) *Facts.* Eligible Plan Y of a tax-exempt entity provides that distributions will commence 60 days after a participant's severance from employment unless the participant elects, within a 30-day window period following severance from employment, to defer distributions to a later date (but no later than the year following the calendar year the participant attains age 70½). The plan provides that a participant who has elected to defer distributions to a later date may make an election as to form of distribution at any time prior to the 30th day before distributions are to commence.

(ii) *Conclusion.* No amount is considered made available prior to the date distributions are to commence by reason of a participant's right to defer or make an election as to the form of distribution.

*Example 6.* (i) *Facts.* The facts are the same as in *Example 1*, except that the plan also permits participants who have made an initial election to defer distribution to make one additional deferral election at any time prior to the date distributions are scheduled to commence. Participant N has a severance from employment at age 50. The next day, during the 30-day period provided in the plan, N elects to receive distribution in the form of 10 annual installment payments beginning at age 55. Two weeks later, within the 30-day window period, N makes a new election permitted under the plan to receive 10 annual installment payments beginning at age 60 (instead of age 55). When N is age 59, N elects under the additional deferral election provisions, to defer distributions until age 65.

(ii) *Conclusion.* In this example, N's election to defer distributions until age 65 is a valid election. The two elections N makes during the 30-day window period are not additional deferral elections described in paragraph (c)(2)(iii) of this section because they are made before the first permissible payout

date under the plan. Therefore, the plan is not precluded from allowing N to make the additional deferral election. However, N can make no further election to defer distributions beyond age 65 (or accelerate distribution before age 65) because this additional deferral election can only be made once.

[T.D. 9075, 68 FR 41240, July 11, 2003; 68 FR 51447, Aug. 27, 2003]

#### § 1.457-8 Funding rules for eligible plans.

(a) *Eligible governmental plans*—(1) *In general.* In order to be an eligible governmental plan, all amounts deferred under the plan, all property and rights purchased with such amounts, and all income attributable to such amounts, property, or rights, must be held in trust for the exclusive benefit of participants and their beneficiaries. A trust described in this paragraph (a) that also meets the requirements of §§ 1.457-3 through 1.457-10 is treated as an organization exempt from tax under section 501(a), and a participant's or beneficiary's interest in amounts in the trust is includible in the gross income of the participants and beneficiaries only to the extent, and at the time, provided for in section 457(a) and §§ 1.457-4 through 1.457-10.

(2) *Trust requirement.* (i) A trust described in this paragraph (a) must be established pursuant to a written agreement that constitutes a valid trust under State law. The terms of the trust must make it impossible, prior to the satisfaction of all liabilities with respect to participants and their beneficiaries, for any part of the assets and income of the trust to be used for, or diverted to, purposes other than for the exclusive benefit of participants and their beneficiaries.

(ii) Amounts deferred under an eligible governmental plan must be transferred to a trust within a period that is not longer than is reasonable for the proper administration of the participant accounts (if any). For purposes of this requirement, the plan may provide for amounts deferred for a participant under the plan to be transferred to the trust within a specified period after the date the amounts would otherwise have been paid to the participant. For example, the plan could provide for amounts deferred under the plan at the election of the participant to be contributed to

the trust within 15 business days following the month in which these amounts would otherwise have been paid to the participant.

(3) *Custodial accounts and annuity contracts treated as trusts*—(i) *In general.* For purposes of the trust requirement of this paragraph (a), custodial accounts and annuity contracts described in section 401(f) that satisfy the requirements of this paragraph (a)(3) are treated as trusts under rules similar to the rules of section 401(f). Therefore, the provisions of § 1.401(f)-1(b) will generally apply to determine whether a custodial account or an annuity contract is treated as a trust. The use of a custodial account or annuity contract as part of an eligible governmental plan does not preclude the use of a trust or another custodial account or annuity contract as part of the same plan, provided that all such vehicles satisfy the requirements of section 457(g)(1) and (3) and paragraphs (a)(1) and (2) of this section and that all assets and income of the plan are held in such vehicles.

(ii) *Custodial accounts*—(A) *In general.* A custodial account is treated as a trust, for purposes of section 457(g)(1) and paragraphs (a)(1) and (2) of this section, if the custodian is a bank, as described in section 408(n), or a person who meets the nonbank trustee requirements of paragraph (a)(3)(ii)(B) of this section, and the account meets the requirements of paragraphs (a)(1) and (2) of this section, other than the requirement that it be a trust.

(B) *Nonbank trustee status.* The custodian of a custodial account may be a person other than a bank only if the person demonstrates to the satisfaction of the Commissioner that the manner in which the person will administer the custodial account will be consistent with the requirements of section 457(g)(1) and (3). To do so, the person must demonstrate that the requirements of § 1.408-2(e)(2) through (6) (relating to nonbank trustees) are met. The written application must be sent to the address prescribed by the Commissioner in the same manner as prescribed under § 1.408-2(e). To the extent that a person has already demonstrated to the satisfaction of the Commissioner that the person satisfies

the requirements of § 1.408-2(e) in connection with a qualified trust (or custodial account or annuity contract) under section 401(a), that person is deemed to satisfy the requirements of this paragraph (a)(3)(ii)(B).

(iii) *Annuity contracts.* An annuity contract is treated as a trust for purposes of section 457(g)(1) and paragraph (a)(1) of this section if the contract is an annuity contract, as defined in section 401(g), that has been issued by an insurance company qualified to do business in the State, and the contract meets the requirements of paragraphs (a)(1) and (2) of this section, other than the requirement that it be a trust. An annuity contract does not include a life, health or accident, property, casualty, or liability insurance contract.

(4) *Combining assets.* [Reserved]

(b) *Eligible plans maintained by tax-exempt entity*—(1) *General rule.* In order to be an eligible plan of a tax-exempt entity, the plan must be unfunded and plan assets must not be set aside for participants or their beneficiaries. Under section 457(b)(6) and this paragraph (b), an eligible plan of a tax-exempt entity must provide that all amounts deferred under the plan, all property and rights to property (including rights as a beneficiary of a contract providing life insurance protection) purchased with such amounts, and all income attributable to such amounts, property, or rights, must remain (until paid or made available to the participant or beneficiary) solely the property and rights of the eligible employer (without being restricted to the provision of benefits under the plan), subject only to the claims of the eligible employer's general creditors.

(2) *Additional requirements.* For purposes of paragraph (b)(1) of this section, the plan must be unfunded regardless of whether or not the amounts were deferred pursuant to a salary reduction agreement between the eligible employer and the participant. Any funding arrangement under an eligible plan of a tax-exempt entity that sets aside assets for the exclusive benefit of participants violates this requirement, and amounts deferred are generally immediately includible in the gross income of plan participants and beneficiaries. Nothing in this paragraph (b)

prohibits an eligible plan from permitting participants and their beneficiaries to make an election among different investment options available under the plan, such as an election affecting the investment of the amounts described in paragraph (b)(1) of this section.

[T.D. 9075, 68 FR 41240, July 11, 2003; 68 FR 51447, Aug. 27, 2003]

**§ 1.457-9 Effect on eligible plans when not administered in accordance with eligibility requirements.**

(a) *Eligible governmental plans.* A plan of a State ceases to be an eligible governmental plan on the first day of the first plan year beginning more than 180 days after the date on which the Commissioner notifies the State in writing that the plan is being administered in a manner that is inconsistent with one or more of the requirements of §§ 1.457-3 through 1.457-8 or 1.447-10. However, the plan may correct the plan inconsistencies specified in the written notification before the first day of that plan year and continue to maintain plan eligibility. If a plan ceases to be an eligible governmental plan, amounts subsequently deferred by participants will be includible in income when deferred, or, if later, when the amounts deferred cease to be subject to a substantial risk of forfeiture, as provided at § 1.457-11. Amounts deferred before the date on which the plan ceases to be an eligible governmental plan, and any earnings thereon, will be treated as if the plan continues to be an eligible governmental plan and will not be includible in participant's or beneficiary's gross income until paid to the participant or beneficiary.

(b) *Eligible plans of tax-exempt entities.* A plan of a tax-exempt entity ceases to be an eligible plan on the first day that the plan fails to satisfy one or more of the requirements of §§ 1.457-3 through 1.457-8, or § 1.457-10. See § 1.457-11 for rules regarding the treatment of an ineligible plan.

[T.D. 9075, 68 FR 41240, July 11, 2003; 68 FR 51447, Aug. 27, 2003]

**§ 1.457-10 Miscellaneous provisions.**

(a) *Plan terminations and frozen plans—(1) In general.* An eligible employer may amend its plan to elimi-

nate future deferrals for existing participants or to limit participation to existing participants and employees. An eligible plan may also contain provisions that permit plan termination and permit amounts deferred to be distributed on termination. In order for a plan to be considered terminated, amounts deferred under an eligible plan must be distributed to all plan participants and beneficiaries as soon as administratively practicable after termination of the eligible plan. The mere provision for, and making of, distributions to participants or beneficiaries upon a plan termination will not cause an eligible plan to cease to satisfy the requirements of section 457(b) or the regulations.

(2) *Employers that cease to be eligible employers—(i) Plan not terminated.* An eligible employer that ceases to be an eligible employer may no longer maintain an eligible plan. If the employer was a tax-exempt entity and the plan is not terminated as permitted under paragraph (a)(2)(ii) of this section, the tax consequences to participants and beneficiaries in the previously eligible (unfunded) plan of an ineligible employer are determined in accordance with either section 451 if the employer becomes an entity other than a State or § 1.457-11 if the employer becomes a State. If the employer was a State and the plan is neither terminated as permitted under paragraph (a)(2)(ii) of this section nor transferred to another eligible plan of that State as permitted under paragraph (b) of this section, the tax consequences to participants in the previously eligible governmental plan of an ineligible employer, the assets of which are held in trust pursuant to § 1.457-8(a), are determined in accordance with section 402(b) (section 403(c) in the case of an annuity contract) and the trust is no longer to be treated as a trust that is exempt from tax under section 501(a).

(ii) *Plan termination.* As an alternative to determining the tax consequences to the plan and participants under paragraph (a)(2)(i) of this section, the employer may terminate the plan and distribute the amounts deferred (and all plan assets) to all plan participants as soon as administratively practicable in accordance with

paragraph (a)(1) of this section. Such distribution may include eligible rollover distributions in the case of a plan that was an eligible governmental plan. In addition, if the employer is a State, another alternative to determining the tax consequences under paragraph (a)(2)(i) of this section is to transfer the assets of the eligible governmental plan to an eligible governmental plan of another eligible employer within the same State under the plan-to-plan transfer rules of paragraph (b) of this section.

(3) *Examples.* The provisions of this paragraph (a) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Employer Y, a corporation that owns a State hospital, sponsors an eligible governmental plan funded through a trust. Employer Y is acquired by a for-profit hospital and Employer Y ceases to be an eligible employer under section 457(e)(1) or § 1.457-2(e). Employer Y terminates the plan and, during the next 6 months, distributes to participants and beneficiaries all amounts deferred that were under the plan.

(ii) *Conclusion.* The termination and distribution does not cause the plan to fail to be an eligible governmental plan. Amounts that are distributed as eligible rollover distributions may be rolled over to an eligible retirement plan described in section 402(c)(8)(B).

*Example 2.* (i) *Facts.* The facts are the same as in *Example 1*, except that Employer Y decides to continue to maintain the plan.

(ii) *Conclusion.* If Employer Y continues to maintain the plan, the tax consequences to participants and beneficiaries will be determined in accordance with either section 402(b) if the compensation deferred is funded through a trust, section 403(c) if the compensation deferred is funded through annuity contracts, or § 1.457-11 if the compensation deferred is not funded through a trust or annuity contract. In addition, if Employer Y continues to maintain the plan, the trust will no longer be treated as exempt from tax under section 501(a).

*Example 3.* (i) *Facts.* Employer Z, a corporation that owns a tax-exempt hospital, sponsors an unfunded eligible plan. Employer Z is acquired by a for-profit hospital and is no longer an eligible employer under section 457(e)(1) or § 1.457-2(e). Employer Z terminates the plan and distributes all amounts deferred under the eligible plan to participants and beneficiaries within a one-year period.

(ii) *Conclusion.* Distributions under the plan are treated as made under an eligible plan of a tax-exempt entity and the distributions of the amounts deferred are includable

in the gross income of the participant or beneficiary in the year distributed.

*Example 4.* (i) *Facts.* The facts are the same as in *Example 3*, except that Employer Z decides to maintain instead of terminate the plan.

(ii) *Conclusion.* If Employer Z maintains the plan, the tax consequences to participants and beneficiaries in the plan will thereafter be determined in accordance with section 451.

(b) *Plan-to-plan transfers—(1) General rule.* An eligible governmental plan may provide for the transfer of amounts deferred by a participant or beneficiary to another eligible governmental plan if the conditions in paragraphs (b)(2), (3), or (4) of this section are met. An eligible plan of a tax-exempt entity may provide for transfers of amounts deferred by a participant to another eligible plan of a tax-exempt entity if the conditions in paragraph (b)(5) of this section are met. In addition, an eligible governmental plan may accept transfers from another eligible governmental plan as described in the first sentence of this paragraph (b)(1), and an eligible plan of a tax-exempt entity may accept transfers from another eligible plan of a tax-exempt entity as described in the preceding sentence. However, a State may not transfer the assets of its eligible governmental plan to a tax-exempt entity's eligible plan and the plan of a tax-exempt entity may not accept such a transfer. Similarly, a tax-exempt entity may not transfer the assets of its eligible plan to an eligible governmental plan and an eligible governmental plan may not accept such a transfer. In addition, if the conditions in paragraph (b)(4) of this section (relating to permissive past service credit and repayments under section 415) are met, an eligible governmental plan of a State may provide for the transfer of amounts deferred by a participant or beneficiary to a qualified plan (under section 401(a)) maintained by a State. However, a qualified plan may not transfer assets to an eligible governmental plan or to an eligible plan of a tax-exempt entity, and an eligible governmental plan or the plan of a tax-exempt entity may not accept such a transfer.

(2) *Requirements for post-severance plan-to-plan transfers among eligible governmental plans.* A transfer under paragraph (b)(1) of this section from an eligible governmental plan to another eligible governmental plan is permitted if the following conditions are met—

(i) The transferor plan provides for transfers;

(ii) The receiving plan provides for the receipt of transfers;

(iii) The participant or beneficiary whose amounts deferred are being transferred will have an amount deferred immediately after the transfer at least equal to the amount deferred with respect to that participant or beneficiary immediately before the transfer; and

(iv) In the case of a transfer for a participant, the participant has had a severance from employment with the transferring employer and is performing services for the entity maintaining the receiving plan.

(3) *Requirements for plan-to-plan transfers of all plan assets of eligible governmental plan.* A transfer under paragraph (b)(1) of this section from an eligible governmental plan to another eligible governmental plan is permitted if the following conditions are met—

(i) The transfer is from an eligible governmental plan to another eligible governmental plan within the same State;

(ii) All of the assets held by the transferor plan are transferred;

(iii) The transferor plan provides for transfers;

(iv) The receiving plan provides for the receipt of transfers;

(v) The participant or beneficiary whose amounts deferred are being transferred will have an amount deferred immediately after the transfer at least equal to the amount deferred with respect to that participant or beneficiary immediately before the transfer; and

(vi) The participants or beneficiaries whose deferred amounts are being transferred are not eligible for additional annual deferrals in the receiving plan unless they are performing services for the entity maintaining the receiving plan.

(4) *Requirements for plan-to-plan transfers among eligible governmental plans of*

*the same employer.* A transfer under paragraph (b)(1) of this section from an eligible governmental plan to another eligible governmental plan is permitted if the following conditions are met—

(i) The transfer is from an eligible governmental plan to another eligible governmental plan of the same employer (and, for this purpose, the employer is not treated as the same employer if the participant's compensation is paid by a different entity);

(ii) The transferor plan provides for transfers;

(iii) The receiving plan provides for the receipt of transfers;

(iv) The participant or beneficiary whose amounts deferred are being transferred will have an amount deferred immediately after the transfer at least equal to the amount deferred with respect to that participant or beneficiary immediately before the transfer; and

(v) The participant or beneficiary whose deferred amounts are being transferred is not eligible for additional annual deferrals in the receiving plan unless the participant or beneficiary is performing services for the entity maintaining the receiving plan.

(5) *Requirements for post-severance plan-to-plan transfers among eligible plans of tax-exempt entities.* A transfer under paragraph (b)(1) of this section from an eligible plan of a tax-exempt employer to another eligible plan of a tax-exempt employer is permitted if the following conditions are met—

(i) The transferor plan provides for transfers;

(ii) The receiving plan provides for the receipt of transfers;

(iii) The participant or beneficiary whose amounts deferred are being transferred will have an amount deferred immediately after the transfer at least equal to the amount deferred with respect to that participant or beneficiary immediately before the transfer; and

(iv) In the case of a transfer for a participant, the participant has had a severance from employment with the transferring employer and is performing services for the entity maintaining the receiving plan.

(6) *Treatment of amount transferred following a plan-to-plan transfer between eligible plans.* Following a transfer of any amount between eligible plans under paragraphs (b)(1) through (b)(5) of this section—

(i) The transferred amount is subject to the restrictions of § 1.457-6 (relating to when distributions are permitted to be made to a participant under an eligible plan) in the receiving plan in the same manner as if the transferred amount had been originally been deferred under the receiving plan if the participant is performing services for the entity maintaining the receiving plan, and

(ii) In the case of a transfer between eligible plans of tax-exempt entities, except as otherwise determined by the Commissioner, the transferred amount is subject to § 1.457-7(c)(2) (relating to when amounts are considered to be made available under an eligible plan of a tax-exempt entity) in the same manner as if the elections made by the participant or beneficiary under the transferor plan had been made under the receiving plan.

(7) *Examples.* The provisions of paragraphs (b)(1) through (6) of this section are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant A, the president of City X's hospital, has accepted a position with another hospital which is a tax-exempt entity. A participates in the eligible governmental plan of City X. A would like to transfer the amounts deferred under City X's eligible governmental plan to the eligible plan of the tax-exempt hospital.

(ii) *Conclusion.* City X's plan may not transfer A's amounts deferred to the tax-exempt employer's eligible plan. In addition, because the amounts deferred would no longer be held in trust for the exclusive benefit of participants and their beneficiaries, the transfer would violate the exclusive benefit rule of section 457(g) and § 1.457-8(a).

*Example 2.* (i) *Facts.* County M, located in State S, operates several health clinics and maintains an eligible governmental plan for employees of those clinics. One of the clinics operated by County M is being acquired by a hospital operated by State S, and employees of that clinic will become employees of State S. County M permits those employees to transfer their balances under County M's eligible governmental plan to the eligible governmental plan of State S.

(ii) *Conclusion.* If the eligible governmental plans of County M and State S provide for

the transfer and acceptance of the transfer (and the other requirements of paragraph (b)(1) of this section are satisfied), then the requirements of paragraph (b)(2) of this section are satisfied and, thus, the transfer will not cause either plan to violate the requirements of section 457 or these regulations.

*Example 3.* (i) *Facts.* City Employer Z, a hospital, sponsors an eligible governmental plan. City Employer Z is located in State B. All of the assets of City Employer Z are being acquired by a tax-exempt hospital. City Employer Z, in accordance with the plan-to-plan transfer rules of paragraph (b) of this section, would like to transfer the total amount of assets deferred under City Employer Z's eligible governmental plan to the acquiring tax-exempt entity's eligible plan.

(ii) *Conclusion.* City Employer Z may not permit participants to transfer the amounts to the eligible plan of the tax-exempt entity. In addition, because the amounts deferred would no longer be held in trust for the exclusive benefit of participants and their beneficiaries, the transfer would violate the exclusive benefit rule of section 457(g) and § 1.457-8(a).

*Example 4.* (i) *Facts.* The facts are the same as in *Example 3*, except that City Employer Z, instead of transferring all of its assets to the eligible plan of the tax-exempt entity, decides to transfer all of the amounts deferred under City Z's eligible governmental plan to the eligible governmental plan of County B in which City Z is located. County B's eligible plan does not cover employees of City Z, but is willing to allow the assets of City Z's plan to be transferred to County B's plan, a related state government entity, also located in State B.

(ii) *Conclusion.* If City Employer Z's (transferor) eligible governmental plan provides for such transfer and the eligible governmental plan of County B permits the acceptance of such a transfer (and the other requirements of paragraph (b)(1) of this section are satisfied), then the requirements of paragraph (b)(3) of this section are satisfied and, thus, City Employer Z may transfer the total amounts deferred under its eligible governmental plan, prior to termination of that plan, to the eligible governmental plan maintained by County B. However, the participants of City Employer Z whose deferred amounts are being transferred are not eligible to participate in the eligible governmental plan of County B, the receiving plan, unless they are performing services for County B.

*Example 5.* (i) *Facts.* State C has an eligible governmental plan. Employees of City U in State C are among the eligible employees for State C's plan and City U decides to adopt another eligible governmental plan only for its employees. State C decides to allow employees to elect to transfer all of the

amounts deferred for an employee under State C's eligible governmental plan to City U's eligible governmental plan.

(ii) *Conclusion.* If State C's (transferor) eligible governmental plan provides for such transfer and the eligible governmental plan of City U permits the acceptance of such a transfer (and the other requirements of paragraph (b)(1) of this section are satisfied), then the requirements of paragraph (b)(4) of this section are satisfied and, thus, State C may transfer the total amounts deferred under its eligible governmental plan to the eligible governmental plan maintained by City U.

(8) *Purchase of permissive service credit by plan-to-plan transfers from an eligible governmental plan to a qualified plan—(i) General rule.* An eligible governmental plan of a State may provide for the transfer of amounts deferred by a participant or beneficiary to a defined benefit governmental plan (as defined in section 414(d)), and no amount shall be includible in gross income by reason of the transfer, if the conditions in paragraph (b)(8)(ii) of this section are met. A transfer under this paragraph (b)(8) is not treated as a distribution for purposes of § 1.457-6. Therefore, such a transfer may be made before severance from employment.

(ii) *Conditions for plan-to-plan transfers from an eligible governmental plan to a qualified plan.* A transfer may be made under this paragraph (b)(8) only if the transfer is either—

(A) For the purchase of permissive service credit (as defined in section 415(n)(3)(A)) under the receiving defined benefit governmental plan; or

(B) A repayment to which section 415 does not apply by reason of section 415(k)(3).

(iii) *Example.* The provisions of this paragraph (b)(8) are illustrated by the following example:

*Example.* (i) *Facts.* Plan X is an eligible governmental plan maintained by County Y for its employees. Plan X provides for distributions only in the event of death, an unforeseeable emergency, or severance from employment with County Y (including retirement from County Y). Plan S is a qualified defined benefit plan maintained by State T for its employees. County Y is within State T. Employee A is an employee of County Y and is a participant in Plan X. Employee A previously was an employee of State T and is still entitled to benefits under Plan S. Plan S includes provisions allowing participants in certain plans, including Plan X, to trans-

fer assets to Plan S for the purchase of service credit under Plan S and does not permit the amount transferred to exceed the amount necessary to fund the benefit resulting from the service credit. Although not required to do so, Plan X allows Employee A to transfer assets to Plan S to provide a service benefit under Plan S.

(ii) *Conclusion.* The transfer is permitted under this paragraph (b)(8).

(c) *Qualified domestic relations orders under eligible plans—(1) General rule.* An eligible plan does not become an ineligible plan described in section 457(f) solely because its administrator or sponsor complies with a qualified domestic relations order as defined in section 414(p), including an order requiring the distribution of the benefits of a participant to an alternate payee in advance of the general rules for eligible plan distributions under § 1.457-6. If a distribution or payment is made from an eligible plan to an alternate payee pursuant to a qualified domestic relations order, rules similar to the rules of section 402(e)(1)(A) shall apply to the distribution or payment.

(2) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

*Example 1.* (i) *Facts.* Participant C and C's spouse D are divorcing. C is employed by State S and is a participant in an eligible plan maintained by State S. C has an account valued at \$100,000 under the plan. Pursuant to the divorce, a court issues a qualified domestic relations order on September 1, 2003 that allocates 50 percent of C's \$100,000 plan account to D and specifically provides for an immediate distribution to D of D's share within 6 months of the order. Payment is made to D in January of 2004.

(ii) *Conclusion.* State S's eligible plan does not become an ineligible plan described in section 457(f) and § 1.457-11 solely because its administrator or sponsor complies with the qualified domestic relations order requiring the immediate distribution to D in advance of the general rules for eligible plan distributions under § 1.457-6. In accordance with section 402(e)(1)(A), D (not C) must include the distribution in gross income. The distribution is includible in D's gross income in 2004. If the qualified domestic relations order were to provide for distribution to D at a future date, amounts deferred attributable to D's share will be includible in D's gross income when paid to D.

*Example 2.* (i) *Facts.* The facts are the same as in *Example 1*, except that S is a tax-exempt entity, instead of a State.

(ii) *Conclusion.* State S's eligible plan does not become an ineligible plan described in section 457(f) and § 1.457-11 solely because its administrator or sponsor complies with the qualified domestic relations order requiring the immediate distribution to D in advance of the general rules for eligible plan distributions under § 1.457-6. In accordance with section 402(e)(1)(A), D (not C) must include the distribution in gross income. The distribution is includible in D's gross income in 2004, assuming that the plan did not make the distribution available to D in 2003. If the qualified domestic relations order were to provide for distribution to D at a future date, amounts deferred attributable to D's share would be includible in D's gross income when paid or made available to D.

(d) *Death benefits and life insurance proceeds.* A death benefit plan under section 457(e)(11) is not an eligible plan. In addition, no amount paid or made available under an eligible plan as death benefits or life insurance proceeds is excludable from gross income under section 101.

(e) *Rollovers to eligible governmental plans—(1) General rule.* An eligible governmental plan may accept contributions that are eligible rollover distributions (as defined in section 402(c)(4)) made from another eligible retirement plan (as defined in section 402(c)(8)(B)) if the conditions in paragraph (e)(2) of this section are met. Amounts contributed to an eligible governmental plan as eligible rollover distributions are not taken into account for purposes of the annual limit on annual deferrals by a participant in § 1.457-4(c) or § 1.457-5, but are otherwise treated in the same manner as amounts deferred under section 457 for purposes of §§ 1.457-3 through 1.457-9 and this section.

(2) *Conditions for rollovers to an eligible governmental plan.* An eligible governmental plan that permits eligible rollover distributions made from another eligible retirement plan to be paid into the eligible governmental plan is required under this paragraph (e)(2) to provide that it will separately account for any eligible rollover distributions it receives. A plan does not fail to satisfy this requirement if it separately accounts for particular types of eligible rollover distributions (for example, if it maintains a separate account for eligible rollover distributions attributable to annual deferrals that were

made under other eligible governmental plans and a separate account for amounts attributable to other eligible rollover distributions), but this requirement is not satisfied if any such separate account includes any amount that is not attributable to an eligible rollover distribution.

(3) *Example.* The provisions of this paragraph (e) are illustrated by the following example:

*Example.* (i) *Facts.* Plan T is an eligible governmental plan that provides that employees who are eligible to participate in Plan T may make rollover contributions to Plan T from amounts distributed to an employee from an eligible retirement plan. An eligible retirement plan is defined in Plan T as another eligible governmental plan, a qualified section 401(a) or 403(a) plan, or a section 403(b) contract, or an individual retirement arrangement (IRA) that holds such amounts. Plan T requires rollover contributions to be paid by the eligible retirement plan directly to Plan T (a direct rollover) or to be paid by the participant within 60 days after the date on which the participant received the amount from the other eligible retirement plan. Plan T does not take rollover contributions into account for purposes of the plan's limits on amounts deferred that conform to § 1.457-4(c). Rollover contributions paid to Plan T are invested in the trust in the same manner as amounts deferred under Plan T and rollover contributions (and earnings thereon) are available for distribution to the participant at the same time and in the same manner as amounts deferred under Plan T. In addition, Plan T provides that, for each participant who makes a rollover contribution to Plan T, the Plan T record-keeper is to establish a separate account for the participant's rollover contributions. The record-keeper calculates earnings and losses for investments held in the rollover account separately from earnings and losses on other amounts held under the plan and calculates disbursements from and payments made to the rollover account separately from disbursements from and payments made to other amounts held under the plan.

(ii) *Conclusion.* Plan T does not lose its status as an eligible governmental plan as a result of the receipt of rollover contributions. The conclusion would not be different if the Plan T record-keeper were to establish two separate accounts, one of which is for the participant's rollover contributions attributable to annual deferrals that were made under an eligible governmental plan and the other of which is for other rollover contributions.

(f) *Deemed IRAs under eligible governmental plans.* See regulations under section 408(q) for guidance regarding the treatment of separate accounts or annuities as individual retirement plans (IRAs).

[T.D. 9075, 68 FR 41240, July 11, 2003; 68 FR 51447, Aug. 27, 2003; T.D. 9319, 72 FR 16931, Apr. 5, 2007]

**§ 1.457-11 Tax treatment of participants if plan is not an eligible plan.**

(a) *In general.* Under section 457(f), if an eligible employer provides for a deferral of compensation under any agreement or arrangement that is an ineligible plan—

(1) Compensation deferred under the agreement or arrangement is includible in the gross income of the participant or beneficiary for the first taxable year in which there is no substantial risk of forfeiture (within the meaning of section 457(f)(3)(B)) of the rights to such compensation;

(2) If the compensation deferred is subject to a substantial risk of forfeiture, the amount includible in gross income for the first taxable year in which there is no substantial risk of forfeiture includes earnings thereon to the date on which there is no substantial risk of forfeiture;

(3) Earnings credited on the compensation deferred under the agreement or arrangement that are not includible in gross income under paragraph (a)(2) of this section are includible in the gross income of the participant or beneficiary only when paid or made available to the participant or beneficiary, provided that the interest of the participant or beneficiary in any assets (including amounts deferred under the plan) of the entity sponsoring the agreement or arrangement is not senior to the entity's general creditors; and

(4) Amounts paid or made available to a participant or beneficiary under the agreement or arrangement are includible in the gross income of the participant or beneficiary under section 72, relating to annuities.

(b) *Exceptions.* Paragraph (a) of this section does not apply with respect to—

(1) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a);

(2) An annuity plan or contract described in section 403;

(3) That portion of any plan which consists of a transfer of property described in section 83;

(4) That portion of any plan which consists of a trust to which section 402(b) applies; or

(5) A qualified governmental excess benefit arrangement described in section 415(m).

(c) *Amount included in income.* The amount included in gross income on the applicable date under paragraphs (a)(1) and (a)(2) of this section is equal to the present value of the compensation (including earnings to the extent provided in paragraph (a)(2) of this section) on that date. For purposes of applying section 72 on the applicable date under paragraphs (a)(3) and (4) of this section, the participant is treated as having paid investment in the contract (or basis) to the extent that the deferred compensation has been taken into account by the participant in accordance with paragraphs (a)(1) and (a)(2) of this section.

(d) *Coordination of section 457(f) with section 83—*(1) *General rules.* Under paragraph (b)(3) of this section, section 457(f) and paragraph (a) of this section do not apply to that portion of any plan which consists of a transfer of property described in section 83. For this purpose, a transfer of property described in section 83 means a transfer of property to which section 83 applies. Section 457(f) and paragraph (a) of this section do not apply if the date on which there is no substantial risk of forfeiture with respect to compensation deferred under an agreement or arrangement that is not an eligible plan is on or after the date on which there is a transfer of property to which section 83 applies. However, section 457(f) and paragraph (a) of this section apply if the date on which there is no substantial risk of forfeiture with respect to compensation deferred under an agreement or arrangement that is not an eligible plan precedes the date on which there is a transfer of property to which section 83 applies. If deferred compensation payable in property is

includible in gross income under section 457(f), then, as provided in section 72, the amount includible in gross income when that property is later transferred or made available to the service provider is the excess of the value of the property at that time over the amount previously included in gross income under section 457(f).

(2) *Examples.* The provisions of this paragraph (d) are illustrated in the following examples:

*Example 1.* (i) *Facts.* As part of an arrangement for the deferral of compensation, an eligible employer agrees on December 1, 2002 to pay an individual rendering services for the eligible employer a specified dollar amount on January 15, 2005. The arrangement provides for the payment to be made in the form of property having a fair market value equal to the specified dollar amount. The individual's rights to the payment are not subject to a substantial risk of forfeiture (within the meaning of section 457(f)(3)(B)).

(ii) *Conclusion.* In this *Example 1*, because there is no substantial risk of forfeiture with respect to the agreement to transfer property in 2005, the present value (as of December 1, 2002) of the payment is includible in the individual's gross income for 2002. Under paragraph (a)(4) of this section, when the payment is made on January 15, 2005, the amount includible in the individual's gross income is equal to the excess of the fair market value of the property when paid, over the amount that was includible in gross income for 2002 (which is the basis allocable to that payment).

*Example 2.* (i) *Facts.* As part of an arrangement for the deferral of compensation, individuals A and B rendering services for a tax-exempt entity each receive in 2010 property that is subject to a substantial risk of forfeiture (within the meaning of section 457(f)(3)(B) and within the meaning of section 83(c)(1)). Individual A makes an election to include the fair market value of the property in gross income under section 83(b) and individual B does not make this election. The substantial risk of forfeiture for the property transferred to individual A lapses in 2012 and the substantial risk of forfeiture for the property transferred to individual B also lapses in 2012. Thus, the property transferred to individual A is included in A's gross income for 2010 when A makes a section 83(b) election and the property transferred to individual B is included in B's gross income for 2012 when the substantial risk of forfeiture for the property lapses.

(ii) *Conclusion.* In this *Example 2*, in each case, the compensation deferred is not subject to section 457(f) or this section because section 83 applies to the transfer of property on or before the date on which there is no

substantial risk of forfeiture with respect to compensation deferred under the arrangement.

*Example 3.* (i) *Facts.* In 2004, Z, a tax-exempt entity, grants an option to acquire property to employee C. The option lacks a readily ascertainable fair market value, within the meaning of section 83(e)(3), has a value on the date of grant equal to \$100,000, and is not subject to a substantial risk of forfeiture (within the meaning of section 457(f)(3)(B) and within the meaning of section 83(c)(1)). Z exercises the option in 2012 by paying an exercise price of \$75,000 and receives property that has a fair market value (for purposes of section 83) equal to \$300,000.

(ii) *Conclusion.* In this *Example 3*, under section 83(e)(3), section 83 does not apply to the grant of the option. Accordingly, C has income of \$100,000 in 2004 under section 457(f). In 2012, C has income of \$125,000, which is the value of the property transferred in 2012, minus the allocable portion of the basis that results from the \$100,000 of income in 2004 and the \$75,000 exercise price.

*Example 4.* (i) *Facts.* In 2010, X, a tax-exempt entity, agrees to pay deferred compensation to employee D. The amount payable is \$100,000 to be paid 10 years later in 2020. The commitment to make the \$100,000 payment is not subject to a substantial risk of forfeiture. In 2010, the present value of the \$100,000 is \$50,000. In 2018, X transfers to D property having a fair market value (for purposes of section 83) equal to \$70,000. The transfer is in partial settlement of the commitment made in 2010 and, at the time of the transfer in 2018, the present value of the commitment is \$80,000. In 2020, X pays D the \$12,500 that remains due.

(ii) *Conclusion.* In this *Example 4*, D has income of \$50,000 in 2010. In 2018, D has income of \$30,000, which is the amount transferred in 2018, minus the allocable portion of the basis that results from the \$50,000 of income in 2010. (Under section 72(e)(2)(B), income is allocated first. The income is equal to \$30,000 (\$80,000 minus the \$50,000 basis), with the result that the allocable portion of the basis is equal to \$40,000 (\$70,000 minus the \$30,000 of income.) In 2020, D has income of \$2,500 (\$12,500 minus \$10,000, which is the excess of the original \$50,000 basis over the \$40,000 basis allocated to the transfer made in 2018).

[T.D. 9075, 68 FR 41240, July 11, 2003]

#### § 1.457-12 Effective dates.

(a) *General effective date.* Except as otherwise provided in this section, §§ 1.457-1 through 1.457-11 apply for taxable years beginning after December 31, 2001.

(b) *Transition period for eligible plans to comply with EGTRRA.* For taxable years beginning after December 31,

2001, and before January 1, 2004, a plan does not fail to be an eligible plan as a result of requirements imposed by the Economic Growth and Tax Relief Reconciliation Act of 2001 (115 Stat. 385) (EGTRRA) (Public Law 107-16) June 7, 2001, if it is operated in accordance with a reasonable, good faith interpretation of EGTRRA.

(c) *Special rule for distributions from rollover accounts.* The last sentence of § 1.457-6(a) (relating to distributions of amounts held in a separate account for eligible rollover distributions) applies for taxable years beginning after December 31, 2003.

(d) *Special rule for options.* Section 1.457-11(d) does not apply with respect to an option without a readily ascertainable fair market value (within the meaning of section 83(e)(3)) that was granted on or before May 8, 2002.

(e) *Special rule for qualified domestic relations orders.* Section 1.457-10(c) (relating to qualified domestic relations orders) applies for transfers, distributions, and payments made after December 31, 2001.

[T.D. 9075, 68 FR 41240, July 11, 2003]

**§ 1.458-1 Exclusion for certain returned magazines, paperbacks, or records.**

(a) *In general*—(1) *Introduction.* For taxable years beginning after September 30, 1979, section 458 allows accrual basis taxpayers to elect to use a method of accounting that excludes from gross income some or all of the income attributable to qualified sales during the taxable year of magazines, paperbacks, or records, that are returned before the close of the applicable merchandise return period for that taxable year. Any amount so excluded cannot be excluded or deducted from gross income for the taxable year in which the merchandise is returned to the taxpayer. For the taxable year in which the taxpayer first uses this method of accounting, the taxpayer is not allowed to exclude from gross income amounts attributable to merchandise returns received during the taxable year that would have been excluded from gross income for the prior taxable year had the taxpayer used this method of accounting for that prior year. (See paragraph (e) of this section

for rules describing how this amount should be taken into account.) The election to use this method of accounting shall be made in accordance with the rules contained in section 458(c) and in § 1.458-2 and this section. A taxpayer that does not elect to use this method of accounting can reduce income for returned merchandise only for the taxable year in which the merchandise is actually returned unsold by the purchaser.

(2) *Effective date.* While this section is generally effective only for taxable years beginning after August 31, 1984, taxpayers may rely on the provisions of paragraphs (a) through (f) of this section in taxable years beginning after September 30, 1979.

(b) *Definitions*—(1) *Magazine.* “Magazine” means a publication, usually paper-backed and sometimes illustrated, that is issued at regular intervals and contains stories, poems, articles, features, etc. This term includes periodicals, but does not include newspapers or volumes of a single publication issued at various intervals. However, volumes of a single publication that are issued at least annually, are related by title or subject matter to a magazine, and would otherwise qualify as a magazine, will be treated as a magazine.

(2) *Paperback.* “Paperback” means a paperback book other than a magazine. Unlike a hardback book, which usually has stiff front and back covers that enclose pages bound to a separate spine, a paperback book is characterized by a flexible outer cover to which the pages of the book are directly affixed.

(3) *Record.* “Record” means a disc, tape, or similar item on which music, spoken or other sounds are recorded. However, the term does not include blank records, tapes, etc., on which it is expected the ultimate purchaser will record. The following items, provided they carry pre-recorded sound, are examples of “records”: audio and video cassettes, eight-track tapes, reel-to-reel tapes, cylinders, and flat, compact, and laser discs.

(4) *Qualified sale.* In order for a sale to be considered a qualified sale, both of the following conditions must be met:

(i) The taxpayer must be under a legal obligation (as determined by applicable State law), at the time of sale, to adjust the sales price of the magazine, paperback, or record on account of the purchaser's failure to resell it; and

(ii) The taxpayer must actually adjust the sales price of the magazine, paperback, or record to reflect the purchaser's failure to resell the merchandise. The following are examples of adjustments to the sales price of unsold merchandise: Cash refunds, credits to the account of the purchaser, and repurchases of the merchandise. The adjustment need not be equal to the full amount of the sales price of the item. However, a markdown of the sales price under an agreement whereby the purchaser continues to hold the merchandise for sale or other disposition (other than solely for scrap) does not constitute an adjustment resulting from a failure to resell.

(5) *Merchandise return period*—(i) *In general.* Unless the taxpayer elects a shorter period, the “merchandise return period” is the period that ends 2 months and 15 days after the close of the taxable year for sales of magazines and 4 months and 15 days after the close of the taxable year for sales of paperbacks and records.

(ii) *Election to use shorter period.* The taxpayer may select a shorter merchandise return period than the applicable period set forth in paragraph (b)(5)(i) of this section.

(iii) *Change in merchandise return period.* Any change in the merchandise return period after its initial establishment will be treated as a change in method of accounting.

(c) *Amount of the exclusion*—(1) *In general.* Except as otherwise provided in paragraph (g) of this section, the amount of the gross income exclusion with respect to any qualified sale is equal to the lesser of—

(i) The amount covered by the legal obligation referred to in paragraph (b)(4)(i) of this section; or

(ii) The amount of the adjustment agreed to by the taxpayer before the close of the merchandise return period.

(2) *Price adjustment in excess of legal obligation.* The excess, if any, of the amount described in paragraph (c)(1)(ii)

of this section over the amount described in paragraph (c)(1)(i) of this section should be excluded in the taxable year in which it is properly accruable under section 461.

(d) *Return of the merchandise*—(1) *In general.* (i) The exclusion from gross income allowed by section 458 applies with respect to a qualified sale of merchandise only if the seller receives, before the close of the merchandise return period, either—

(A) The physical return of the merchandise; or

(B) Satisfactory evidence that the merchandise has not been and will not be resold (as defined in paragraph (d)(2) of this section).

(ii) For purposes of this paragraph (d), evidence of a return received by an agent of the seller (other than the purchaser who purchased the merchandise from the seller) will be considered to be received by the seller at the time the agent receives the merchandise or evidence.

(2) *Satisfactory evidence.* Evidence that merchandise has not been and will not be resold is satisfactory only if the seller receives—

(i) Physical return of some portion of the merchandise (e.g., covers) provided under either the agreement between the seller and the purchaser or industry practice (such return evidencing the fact that the purchaser has not and will not resell the merchandise); or

(ii) A written statement from the purchaser specifying the quantities of each title not resold, provided either—

(A) The statement contains a representation that the items specified will not be resold by the purchaser; or

(B) The past dealings, if any, between the parties and industry practice indicate that such statement constitutes a promise by the purchaser not to resell the items.

(3) *Retention of evidence.* In the case of a return of merchandise (described in paragraph (d)(1)(i)(A) of this section) or portion thereof (described in paragraph (d)(2)(i) of this section), the seller has no obligation to retain physical evidence of the returned merchandise or portion thereof, provided the seller maintains documentary evidence that describes the quantity of physical

items returned to the seller and indicates that the items were returned before the close of the merchandise return period.

(e) *Transitional adjustment*—(1) *In general.* An election to change from some other method of accounting for the return of magazines, paperbacks, or records to the method of accounting described in section 458 is a change in method of accounting that requires a transitional adjustment. Section 458 provides special rules for transitional adjustments that must be taken into account as a result of this change. See paragraph (e)(2) of this section for special rules applicable to magazines and paragraphs (e) (3) and (4) of this section for special rules applicable to paperbacks and records.

(2) *Magazines: 5-year spread of decrease in taxable income.* For taxpayers who have elected to use the method of accounting described in section 458 to account for returned magazines for a taxable year, section 458(d) and this paragraph (e)(2) provide a special rule for taking into account any decrease in taxable income resulting from the adjustment required by section 481(a)(2). Under these provisions, one-fifth of the transitional adjustment must be taken into account in the taxable year of the change and in each of the 4 succeeding taxable years. For example, if the application of section 481(a)(2) would produce a decrease in taxable income of \$50 for 1980, the year of change, then \$10 (one-fifth of \$50) must be taken into account as a decrease in taxable income for 1980, 1981, 1982, 1983, and 1984.

(3) *Suspense account for paperbacks and records*—(i) *In general.* For taxpayers who have elected to use the method of accounting described in section 458 to account for returned paperbacks and records for a taxable year, section 458(e) provides that, in lieu of applying section 481, an electing taxpayer must establish a separate suspense account for its paperback business and its record business. The initial opening balance of the suspense account is described in paragraph (e)(3)(ii)(A) of this section. An initial adjustment to gross income for the year of election is described in paragraph (e)(3)(ii)(B) of this section. Annual adjustments to the suspense ac-

count are described in paragraph (e)(3)(iii)(A) of this section. Gross income adjustments are described in paragraph (e)(3)(iii)(B) of this section. Examples are provided in paragraph (e)(4) of this section. The effect of the suspense account is to defer all, or some part, of the deduction of the transitional adjustment until the taxpayer is no longer engaged in the trade or business of selling paperbacks or records, whichever is applicable.

(ii) *Establishing a suspense account*—(A) *Initial opening balance.* To compute the initial opening balance of the suspense account for the first taxable year for which an election is effective, the taxpayer must determine the section 458 amount (as defined in paragraph (e)(3)(ii)(C) of this section) for each of the three preceding taxable years. The initial opening balance of the account is the largest of the section 458 amounts.

(B) *Initial year adjustment.* If the initial opening balance in the suspense account exceeds the section 458 amount (as defined in paragraph (e)(3)(ii)(C) of this section) for the taxable year immediately preceding the year of election, the excess is included in the taxpayer's gross income for the first taxable year for which the election was made.

(C) *Section 458 amount.* For purposes of paragraph (e)(3)(ii) of this section, the section 458 amount for a taxable year is the dollar amount of merchandise returns that would have been excluded from gross income under section 458(a) for that taxable year if the section 458 election had been in effect for that taxable year.

(iii) *Annual adjustments*—(A) *Adjustment to the suspense account.* Adjustments are made to the suspense account each year to account for fluctuations in merchandise returns. To compute the annual adjustment, the taxpayer must determine the amount to be excluded under the election from gross income under section 458(a) for the taxable year. If the amount is less than the opening balance in the suspense account for the taxable year, the balance in the suspense account is reduced by the difference. Conversely, if the amount is greater than the opening balance in the suspense account for the

§ 1.458-1

26 CFR Ch. I (4-1-17 Edition)

taxable year, the account is increased by the difference, but not to an amount in excess of the initial opening balance described in paragraph (e)(3)(ii)(A) of this section. Therefore, the balance in the suspense account will never be greater than the initial opening balance in the suspense account determined in paragraph (e)(3)(ii)(A) of this section. However, the balance in the suspense account after adjustments may be less than this initial opening balance in the suspense account.

(B) *Gross income adjustments.* Adjustments to the suspense account for years subsequent to the year of election also produce adjustments in the taxpayer's gross income. Adjustments which reduce the balance in the suspense account reduce gross income for the year in which the adjustment to the suspense account is made. Adjustments which increase the balance in the suspense account increase gross income for the year in which the adjustment to the suspense account is made.

(4) *Example.* The provisions of paragraph (e)(3) of this section may be illustrated by the following example:

*Example:* (i) X corporation, a paperback distributor, makes a timely section 458 election for its taxable year ending December 31, 1980. If the election had been in effect for the taxable years ending on December 31, 1977, 1978, and 1979, the dollar amounts of the qualifying returns would have been \$5, \$8, and \$6,

respectively. The initial opening balance of X's suspense account on January 1, 1980, is \$8, the largest of these amounts. Since the initial opening balance (\$8), is larger than the qualifying returns for 1979 (\$6), the initial adjustment to gross income for 1980 is \$2 (\$8-\$6).

(ii) X has \$5 in qualifying returns for its taxable year ending December 31, 1980. X must reduce its suspense account by \$3, which is the excess of the opening balance (\$8) over the amount of qualifying returns for the 1980 taxable year (\$5). X also reduces its gross income for 1980 by \$3. Thus, the net amount excludable from gross income for the 1980 taxable year after taking into account the qualifying returns, the gross income adjustment, and the initial year adjustment is \$6 (\$3 + \$5 - \$2).

(iii) X has qualifying returns of \$7 for its taxable year ending December 31, 1981. X must increase its suspense account balance by \$2, which is the excess of the amount of qualifying returns for 1981 (\$7) over X's opening balance in the suspense account (\$5). X must also increase its gross income by \$2. Thus, the net income excludable from gross income for the 1981 taxable year after taking into account the qualifying returns and the gross income adjustment is \$5 (\$7-\$2).

(iv) X has qualifying returns of \$10 for its taxable year ending December 31, 1982. The opening balance in X's suspense account of \$7 will not be increased in excess of the initial opening balance (\$8). X must also increase gross income by \$1. Thus, the net amount excludable from gross income for the 1982 taxable year is \$9 (\$10-\$1).

(v) This example is summarized by the following table:

	Years Ending December 31					
	1977	1978	1979	1980 <sup>1</sup>	1981	1982
<b>Facts:</b>						
Qualifying returns during merchandise return period for the taxable year .....	\$5	\$8	\$6	\$5	\$7	\$10
<b>Adjustment to suspense account:</b>						
Opening balance .....				\$8	\$5	\$7
Addition to account <sup>2</sup> .....					2	1
Reduction to account <sup>3</sup> .....				(3)		
Opening balance for next year .....				\$5	\$7	\$8
<b>Amount excludable from income:</b>						
Initial year adjustment .....				\$(2)		
Amount excludable as qualifying returns in merchandise return period .....				5	\$7	\$10
Adjustment for increase in suspense account .....					(2)	(1)
Adjustment for decrease in suspense account .....				3		

	Years Ending December 31					
	1977	1978	1979	1980 <sup>1</sup>	1981	1982
Net amount excludable for the year .....	.....	.....	.....	\$6	\$5	\$9

<sup>1</sup> Year of Change.

<sup>2</sup> Applies when qualifying returns during the merchandise return period exceed the opening balance; the addition is not to cause the suspense account to exceed the initial opening balance.

<sup>3</sup> Applies when qualifying returns during the merchandise return period are less than the opening balance.

(f) *Subchapter C transactions*—(1) *General rule.* If a transfer of substantially all the assets of a trade or business in which paperbacks or records are sold is made to an acquiring corporation, and if the acquiring corporation determines its basis in these assets, in whole or part, with reference to the basis of these assets in the hands of the transferor, then for the purposes of section 458(e) the principles of section 381 and §1.381(c)(4)-1 will apply. The application of this rule is not limited to the transactions described in section 381(a). Thus, the rule also applies, for example, to transactions described in section 351.

(2) *Special rules.* If, in the case of a transaction described in paragraph (f)(1) of this section, an acquiring corporation acquires assets that were used in a trade or business that was not subject to a section 458 election from a transferor that is owned or controlled directly (or indirectly through a chain of corporations) by the same interests, and if the acquiring corporation uses the acquired assets in a trade or business for which the acquiring corporation later makes an election to use section 458, then the acquiring corporation must establish a suspense account by taking into account not only its own experience but also the transferor's experience when the transferor held the assets in its trade or business. Furthermore, the transferor is not allowed a deduction or exclusion for merchandise returned after the date of the transfer attributable to sales made by the transferor before the date of the transfer. Such returns shall be considered to be received by the acquiring corporation.

(3) *Example.* The provisions of paragraph (f)(2) of this section may be illustrated by the following example.

*Example.* Corporation S, a calendar year taxpayer, is a wholly owned subsidiary of

Corporation P, a calendar year taxpayer. On December 31, 1982, S acquires from P substantially all of the assets used in a trade or business in which records are sold. P had not made an election under section 458 with respect to the qualified sale of records made in connection with that trade or business. S makes an election to use section 458 for its taxable year ending December 31, 1983, for the trade or business in which the acquired assets are used. P's qualified record returns within the 4 month and 15 day merchandise return period following the 1980 and 1981 taxable years were \$150 and \$170, respectively. S's qualified record returns during the merchandise return period following 1982 were \$160. S must establish a suspense account by taking into account both P's and S's experience for the 3 immediately preceding taxable years. Thus, the initial opening balance of S's suspense account is \$170. S must also make an initial year adjustment of \$10 (\$170—\$160), which S must include in income for S's taxable year ending December 31, 1983. P is not entitled to a deduction or exclusion for merchandise received after the date of the transfer (December 31, 1982) attributable to sales made by the transferor before the date of transfer. Thus, P is not entitled to a deduction or exclusion for the \$160 of merchandise received by S during the first 4 months and 15 days of 1983.

(g) *Adjustment to inventory and cost of goods sold.* (1) If a taxpayer makes adjustments to gross receipts for a taxable year under the method of accounting described in section 458, the taxpayer, in determining excludable gross income, is also required to make appropriate correlative adjustments to purchases or closing inventory and to cost of goods sold for the same taxable year. Adjustments are appropriate, for example, where the taxpayer holds the merchandise returned for resale or where the taxpayer is entitled to receive a price adjustment from the person or entity that sold the merchandise to the taxpayer. Cost of goods sold must be properly adjusted in accordance with

the provisions of § 1.61-3 which provides, in pertinent part, that gross income derived from a manufacturing or merchandising business equals total sales less cost of goods sold.

(2) The provisions of this paragraph (g) may be illustrated by the following examples. These examples do not, however, reflect any required adjustments under paragraph (e)(3) of this section.

*Example 1.* (i) In 1986, P, a publisher, properly elects under section 458 of the Code not to include in its gross income in the year of sale, income attributable to qualified sales of paperback books returned within the specified statutory merchandise return period of 4 months and 15 days. P and D, a distributor, agree that P shall provide D with a full refund for paperback books that D purchases from P and is unable to resell, provided the merchandise is returned to P within four months following the original sale. The agreement constitutes a legal obligation. The agreement provides that D's return of the covers of paperback books within the first four months following their sale constitutes satisfactory evidence that D has not resold and will not resell the paperback books. During P's 1989 taxable year, pursuant to the agreement, P sells D 500 paperback books for \$1 each. In 1990, during the merchandise return period, D returns covers from 100 unsold paperback books representing \$100 of P's 1989 sales of paperback books. P's cost attributable to the returned books is \$25. No adjustment to cost of goods sold is required under paragraph (g)(1) of this section because P is not holding returned merchandise for resale. P's proper amount excluded from its 1989 gross income under section 458 is \$100.

(ii) If D returns the paperback books, rather than the covers, to P and these same books are then held by P for resale to other customers, paragraph (g)(1) of this section applies. Under paragraph (g)(1), P is required to decrease its cost of goods sold by \$25, the amount of P's cost attributable to the returned merchandise. The proper amount excluded from P's 1989 gross income under section 458 is \$75, resulting from adjustments to sales and cost of sales [(100 × \$1) - \$25].

*Example 2.* (i) In 1986, D, a distributor, properly elects under section 458 of the Code not to include in its gross income in the year of sale, income attributable to qualified sales of paperback books returned within the specified statutory merchandise return period of four months and 15 days. D and R, a retailer, agree that D shall provide a full refund for paperback books that R purchases from it and is unable to resell. D and R also have agreed that the merchandise must be returned to D within four months following the original sale. The agreement constitutes

a legal obligation. D is similarly entitled to a full refund from P, the publisher, for the same paperback books. In 1990, during the merchandise return period, R returns paperback books to D representing \$100 of 1989 sales. D's cost relating to these sales is \$50. Under paragraph (g)(1) of this section, D must decrease its costs of goods sold by \$50. D's proper amount excluded from its 1989 gross income under section 458 is \$50 resulting from adjustments to sales and costs of sales (\$100 - \$50).

(ii) If D is instead only entitled to a 50 percent refund from P, D is required under paragraph (g)(1) of this section to decrease its costs of goods sold by \$25, the amount of refund from P. D's proper amount excluded from its 1989 gross income under section 458 is \$75, resulting from adjustments to sales and cost of sales (\$100 - \$25).

[T.D. 8426, 57 FR 38596, Aug. 26, 1992; 57 FR 45879, Oct. 5, 1992]

#### § 1.458-2 Manner of and time for making election.

(a) *Scope.* For taxable years beginning after September 30, 1979, section 458 provides a special method of accounting for taxpayers who account for sales of magazines, paperbacks, or records using an accrual method of accounting. In order to use the special method of accounting under section 458, a taxpayer must make an election in the manner prescribed in this section. The election does not require the prior consent of the Internal Revenue Service. The election is effective for the taxable year for which it is made and for all subsequent taxable years, unless the taxpayer secures the prior consent of the Internal Revenue Service to revoke such election.

(b) *Separate election for each trade or business.* An election is made with respect to each trade or business of a taxpayer in connection with which qualified sales (as defined in section 458(b)(5)) of a category of merchandise were made. Magazines, paperbacks, and records are each treated as a separate category of merchandise. If qualified sales of two or more categories of merchandise are made in connection with the same trade or business, then solely for purposes of section 458, each category is treated as a separate trade or business. For example, if a taxpayer makes qualified sales of both magazines and paperbacks in the same trade or business, then solely for purposes of

section 458, the qualified sales relating to magazines are considered one trade or business and the qualified sales relating to paperbacks are considered a separate trade or business. Thus, if the taxpayer wishes to account under section 458 for the qualified sales of both magazines and paperbacks, such taxpayer must make a separate election for each category.

(c) *Manner of, and time for, making election.* An election is made under section 458 and this section by filing a statement of election containing the information described in paragraph (d) of this section with the taxpayer's income tax return for first taxable year for which the election is made. The election must be made no later than the time prescribed by law (including extensions) for filing the income tax return for the first taxable year for which the election is made. Thus, the election may not be filed with an amended income tax return after the prescribed date (including extensions) for filing the original return for such year.

(d) *Required information.* The statement of election required by paragraph (c) of this section must indicate that an election is being made under section 458(c) and must set forth the following information:

- (1) The taxpayer's name, address, and identification number;
- (2) A description of each trade or business for which an election is made;
- (3) The first taxable year for which an election is made for each trade or business;
- (4) The merchandise return period (as defined in section 458(b)(7)) for each trade or business for which an election is made;
- (5) With respect to an election that applies to magazines, the amount of the adjustment computed under section 481(a) resulting from the change to the method of accounting described in section 458; and
- (6) With respect to an election that applies to paperbacks or records, the initial opening balance (computed in accordance with section 458(e)) in the suspense account for each trade or business for which an election is made. The statement of election should be made on a Form 3115 which need con-

tain no information other than that required by this paragraph.

[T.D. 7628, 44 FR 33398, June 11, 1979. Redesignated by T.D. 8426, 57 FR 38599, Aug. 26, 1992]

#### § 1.460-0 Outline of regulations under section 460.

This section lists the paragraphs contained in § 1.460-1 through § 1.460-6.

##### § 1.460-1 Long-term contracts.

- (a) Overview.
  - (1) In general.
  - (2) Exceptions to required use of PCM.
    - (i) Exempt construction contract.
    - (ii) Qualified ship or residential construction contract.
  - (b) Terms.
    - (1) Long-term contract.
    - (2) Contract for the manufacture, building, installation, or construction of property.
      - (i) In general.
      - (ii) De minimis construction activities.
    - (3) Allocable contract costs.
    - (4) Related party.
    - (5) Contracting year.
    - (6) Completion year.
    - (7) Contract commencement date.
    - (8) Incurred.
    - (9) Independent research and development expenses.
    - (10) Long-term contract methods of accounting.
      - (c) Entering into and completing long-term contracts.
        - (1) In general.
        - (2) Date contract entered into.
          - (i) In general.
          - (ii) Options and change orders.
        - (3) Date contract completed.
          - (i) In general.
          - (ii) Secondary items.
            - (iii) Subcontracts.
          - (iv) Final completion and acceptance.
            - (A) In general.
            - (B) Contingent compensation.
            - (C) Assembly or installation.
            - (D) Disputes.
          - (d) Allocation among activities.
            - (1) In general.
            - (2) Non-long-term contract activity.
          - (e) Severing and aggregating contracts.
            - (1) In general.
            - (2) Facts and circumstances.
              - (i) Pricing.
                - (ii) Separate delivery or acceptance.
                - (iii) Reasonable businessperson.
              - (3) Exceptions.
                - (i) Severance for PCM.
                - (ii) Options and change orders.
              - (4) Statement with return.
              - (f) Classifying contracts.
                - (1) In general.
                - (2) Hybrid contracts.
                  - (i) In general.

**Internal Revenue Service, Treasury**

**§ 1.460-0**

- (B) Contract price.
- (C) Contract costs.
- (iv) Special rules related to certain corporate and partnership transactions.
  - (A) Old taxpayer—basis adjustment.
  - (1) In general.
  - (2) Basis adjustment in excess of stock or partnership interest basis.
  - (3) Subsequent dispositions of certain contracts.
    - (B) New taxpayer.
    - (1) Contract price adjustment.
    - (2) Basis in contract.
  - (C) Definition of old taxpayer and new taxpayer for certain partnership transactions.
  - (D) Exceptions to step-in-the-shoes rules for S corporations.
  - (v) Special rules relating to certain partnership transactions.
    - (A) Section 704(c).
    - (1) Contributions of contracts.
    - (2) Revaluations of partnership property.
    - (3) Allocation methods.
    - (B) Basis adjustments under sections 743(b) and 734(b).
    - (C) Cross reference.
    - (D) Exceptions to step-in-the-shoes rules.
    - (4) Anti-abuse rule.
    - (5) Examples.
    - (6) Effective date.

*§ 1.460-5 Cost allocation rules.*

- (a) Overview.
- (b) Cost allocation method for contracts subject to PCM.
  - (1) In general.
  - (2) Special rules.
    - (i) Direct material costs.
    - (ii) Components and subassemblies.
    - (iii) Simplified production methods.
    - (iv) Costs identified under cost-plus long-term contracts and federal long-term contracts.
    - (v) Interest.
      - (A) In general.
      - (B) Production period.
      - (C) Application of section 263A(f).
    - (vi) Research and experimental expenses.
    - (vii) Service costs.
      - (A) Simplified service cost method.
      - (1) In general.
      - (2) Example.
      - (B) Jobsite costs.
    - (C) Limitation on other reasonable cost allocation methods.
  - (c) Simplified cost-to-cost method for contracts subject to the PCM.
    - (1) In general.
    - (2) Election.
    - (d) Cost allocation rules for exempt construction contracts reported using CCM.
      - (1) In general.
      - (2) Indirect costs.
        - (i) Indirect costs allocable to exempt construction contracts.
        - (ii) Indirect costs not allocable to exempt construction contracts.

- (3) Large homebuilders.
- (e) Cost allocation rules for contracts subject to the PCCM.
- (f) Special rules applicable to costs allocated under this section.
  - (1) Nondeductible costs.
  - (2) Costs incurred for non-long-term contract activities.
  - (g) Method of accounting.

*§ 1.460-6 Look-back method.*

- (a) In general.
- (1) Introduction.
- (2) Overview.
- (b) Scope of look-back method.
  - (1) In general.
  - (2) Exceptions from section 460.
  - (3) De minimis exception.
  - (4) Alternative minimum tax.
  - (5) Effective date.
- (c) Operation of the look-back method.
  - (1) Overview.
    - (i) In general.
    - (ii) Post-completion revenue and expenses.
      - (A) In general.
      - (B) Completion.
        - (C) Discounting of contract price and contract cost adjustments subsequent to completion; election not to discount.
          - (1) General rule.
          - (2) Election not to discount.
          - (3) Year-end discounting convention.
          - (D) Revenue acceleration rule.
            - (2) Look-back Step One.
              - (i) Hypothetical reallocation of income among prior tax years.
              - (ii) Treatment of estimated future costs in year of completion.
                - (iii) Interim reestimates not considered.
                - (iv) Tax years in which income is affected.
                - (v) Costs incurred prior to contract execution; 10-percent method.
                  - (A) General rule.
                  - (B) Example.
                - (vi) Amount treated as contract price.
                  - (A) General rule.
                  - (B) Contingencies.
                  - (C) Change orders.
                - (3) Look-back Step Two: Computation of hypothetical overpayment or underpayment of tax.
                  - (i) In general.
                  - (ii) Redetermination of tax liability.
                  - (iii) Hypothetical underpayment or overpayment.
                  - (iv) Cumulative determination of tax liability.
                  - (v) Years affected by look-back only.
                  - (vi) Definition of tax liability.
              - (4) Look-back Step Three: Calculation of interest on underpayment or overpayment.
                - (i) In general.
                - (ii) Changes in the amount of a loss or credit carryback or carryover.
                - (iii) Changes in the amount of tax liability that generated a subsequent refund.
                - (d) Simplified marginal impact method.

sections of the Internal Revenue Code or regulations.

(ii) *Qualified ship or residential construction contract.* The requirement to use the PCM applies only to a portion of a *qualified ship contract* described in § 1.460-2(d) or *residential construction contract* described in § 1.460-3(c). A taxpayer generally may determine the income from a qualified ship contract or residential construction contract using the percentage-of-completion/capitalized-cost method (PCCM) described in § 1.460-4(e), but must use a cost allocation method described in § 1.460-5(b) for the entire contract.

(b) *Terms*—(1) *Long-term contract.* A *long-term contract* generally is any contract for the manufacture, building, installation, or construction of property if the contract is not completed within the contracting year, as defined in paragraph (b)(5) of this section. However, a contract for the manufacture of property is a long-term contract only if it also satisfies either the unique item or 12-month requirements described in § 1.460-2. A contract for the manufacture of personal property is a *manufacturing contract*. In contrast, a contract for the building, installation, or construction of real property is a *construction contract*.

(2) *Contract for the manufacture, building, installation, or construction of property*—(i) *In general.* A contract is a *contract for the manufacture, building, installation, or construction of property* if the manufacture, building, installation, or construction of property is necessary for the taxpayer's contractual obligations to be fulfilled and if the manufacture, building, installation, or construction of that property has not been completed when the parties enter into the contract. If a taxpayer has to manufacture or construct an item to fulfill its obligations under the contract, the fact that the taxpayer is not required to deliver that item to the customer is not relevant. Whether the customer has title to, control over, or bears the risk of loss from, the property manufactured or constructed by the taxpayer also is not relevant. Furthermore, how the parties characterize their agreement (*e.g.*, as a contract for the sale of property) is not relevant.

(ii) *De minimis construction activities.* Notwithstanding paragraph (b)(2)(i) of this section, a contract is not a construction contract under section 460 if the contract includes the provision of land by the taxpayer and the estimated total allocable contract costs, as defined in paragraph (b)(3) of this section, attributable to the taxpayer's construction activities are less than 10 percent of the contract's total contract price, as defined in § 1.460-4(b)(4)(i). For the purposes of this paragraph (b)(2)(ii), the allocable contract costs attributable to the taxpayer's construction activities do not include the cost of the land provided to the customer. In addition, a contract's estimated total allocable contract costs include a proportionate share of the estimated cost of any common improvement that benefits the subject matter of the contract if the taxpayer is contractually obligated, or required by law, to construct the common improvement.

(3) *Allocable contract costs.* *Allocable contract costs* are costs that are allocable to a long-term contract under § 1.460-5.

(4) *Related party.* A *related party* is a person whose relationship to a taxpayer is described in section 707(b) or 267(b), determined without regard to section 267(f)(1)(A) and determined by replacing "at least 80 percent" with "more than 50 percent" for the purposes of determining the ownership of the stock of a corporation in sections 267(b)(2), (8), (10)(A), and (12).

(5) *Contracting year.* The *contracting year* is the taxable year in which a taxpayer enters into a contract as described in paragraph (c)(2) of this section.

(6) *Completion year.* The *completion year* is the taxable year in which a taxpayer completes a contract as described in paragraph (c)(3) of this section.

(7) *Contract commencement date.* The *contract commencement date* is the date that a taxpayer or related party first incurs any allocable contract costs, such as design and engineering costs, other than expenses attributable to bidding and negotiating activities. Generally, the contract commencement date is relevant in applying

§ 1.460-6(b)(3) (concerning the de minimis exception to the look-back method under section 460(b)(3)(B)); § 1.460-5(b)(2)(v)(B)(1)(i) (concerning the production period subject to interest allocation); § 1.460-2(d) (concerning qualified ship contracts); and § 1.460-3(b)(1)(ii) (concerning the construction period for exempt construction contracts).

(8) *Incurred*. *Incurred* has the meaning given in § 1.461-1(a)(2) (concerning the taxable year a liability is incurred under the accrual method of accounting), regardless of a taxpayer's overall method of accounting. See § 1.461-4(d)(2)(ii) for economic performance rules concerning the PCM.

(9) *Independent research and development expenses*. *Independent research and development expenses* are any expenses incurred in the performance of research or development, except that this term does not include any expenses that are directly attributable to a particular long-term contract in existence when the expenses are incurred and this term does not include any expenses under an agreement to perform research or development.

(10) *Long-term contract methods of accounting*. *Long-term contract methods of accounting*, which include the PCM, the CCM, the PCCM, and the exempt-contract percentage-of-completion method (EPCM), are methods of accounting that may be used only for long-term contracts.

(c) *Entering into and completing long-term contracts*—(1) *In general*. To determine when a contract is entered into under paragraph (c)(2) of this section and completed under paragraph (c)(3) of this section, a taxpayer must consider all relevant allocable contract costs incurred and activities performed by itself, by related parties on its behalf, and by the customer, that are incident to or necessary for the long-term contract. In addition, to determine whether a contract is completed in the contracting year, the taxpayer may not consider when it expects to complete the contract.

(2) *Date contract entered into*—(i) *In general*. A taxpayer enters into a contract on the date that the contract binds both the taxpayer and the customer under applicable law, even if the

contract is subject to unsatisfied conditions not within the taxpayer's control (such as obtaining financing). If a taxpayer delays entering into a contract for a principal purpose of avoiding section 460, however, the taxpayer will be treated as having entered into a contract not later than the contract commencement date.

(ii) *Options and change orders*. A taxpayer enters into a new contract on the date that the customer exercises an option or similar provision in a contract if that option or similar provision must be severed from the contract under paragraph (e) of this section. Similarly, a taxpayer enters into a new contract on the date that it accepts a change order or other similar agreement if the change order or other similar agreement must be severed from the contract under paragraph (e) of this section.

(3) *Date contract completed*—(i) *In general*. A taxpayer's contract is completed upon the earlier of—

(A) Use of the subject matter of the contract by the customer for its intended purpose (other than for testing) and at least 95 percent of the total allocable contract costs attributable to the subject matter have been incurred by the taxpayer; or

(B) Final completion and acceptance of the subject matter of the contract.

(ii) *Secondary items*. The date a contract accounted for using the CCM is completed is determined without regard to whether one or more secondary items have been used or finally completed and accepted. If any secondary items are incomplete at the end of the taxable year in which the primary subject matter of a contract is completed, the taxpayer must separate the portion of the gross contract price and the allocable contract costs attributable to the incomplete secondary item(s) from the completed contract and account for them using a permissible method of accounting. A permissible method of accounting includes a long-term contract method of accounting only if a separate contract for the secondary item(s) would be a long-term contract, as defined in paragraph (b)(1) of this section.

(iii) *Subcontracts*. In the case of a subcontract, a subcontractor's customer is

the general contractor. Thus, the subject matter of the subcontract is the relevant subject matter under paragraph (c)(3)(i) of this section.

(iv) *Final completion and acceptance*—(A) *In general.* Except as otherwise provided in this paragraph (c)(3)(iv), to determine whether final completion and acceptance of the subject matter of a contract have occurred, a taxpayer must consider all relevant facts and circumstances. Nevertheless, a taxpayer may not delay the completion of a contract for the principal purpose of deferring federal income tax.

(B) *Contingent compensation.* Final completion and acceptance is determined without regard to any contractual term that provides for additional compensation that is contingent on the successful performance of the subject matter of the contract. A taxpayer must account for all contingent compensation that is not includible in total contract price under §1.460-4(b)(4)(i), or in gross contract price under §1.460-4(d)(3), using a permissible method of accounting. For application of the look-back method for contracts accounted for using the PCM, see §1.460-6(c)(1)(ii) and (2)(vi).

(C) *Assembly or installation.* Final completion and acceptance is determined without regard to whether the taxpayer has an obligation to assist or supervise assembly or installation of the subject matter of the contract where the assembly or installation is not performed by the taxpayer or a related party. A taxpayer must account for the gross receipts and costs attributable to such an obligation using a permissible method of accounting, other than a long-term contract method.

(D) *Disputes.* Final completion and acceptance is determined without regard to whether a dispute exists at the time the taxpayer tenders the subject matter of the contract to the customer. For contracts accounted for using the CCM, see §1.460-4(d)(4). For application of the look-back method for contracts accounted for using the PCM, see §1.460-6(c)(1)(ii) and (2)(vi).

(d) *Allocation among activities*—(1) *In general.* Long-term contract methods of accounting apply only to the gross receipts and costs attributable to long-

term contract activities. Gross receipts and costs attributable to long-term contract activities means amounts included in total contract price or gross contract price, whichever is applicable, as determined under §1.460-4, and costs allocable to the contract, as determined under §1.460-5. Gross receipts and costs attributable to non-long-term contract activities (as defined in paragraph (d)(2) of this section) generally must be taken into account using a permissible method of accounting other than a long-term contract method. See section 446(c) and §1.446-1(c). However, if the performance of a non-long-term contract activity is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of one or more of the taxpayer's long-term contracts, the gross receipts and costs attributable to that activity must be allocated to the long-term contract(s) benefitted as provided in §§1.460-4(b)(4)(i) and 1.460-5(f)(2), respectively. Similarly, if a single long-term contract requires a taxpayer to perform a non-long-term contract activity that is not incident to or necessary for the manufacture, building, installation, or construction of the subject matter of the long-term contract, the gross receipts and costs attributable to that non-long-term contract activity must be separated from the contract and accounted for using a permissible method of accounting other than a long-term contract method. But see paragraph (g) of this section for related party rules.

(2) *Non-long-term contract activity.* *Non-long-term contract activity* means the performance of an activity other than manufacturing, building, installation, or construction, such as the provision of architectural, design, engineering, and construction management services, and the development or implementation of computer software. In addition, performance under a guaranty, warranty, or maintenance agreement is a non-long-term contract activity that is never incident to or necessary for the manufacture or construction of property under a long-term contract.

(e) *Severing and aggregating contracts*—(1) *In general.* After application of the allocation rules of paragraph (d)

of this section, the severing and aggregating rules of this paragraph (e) may be applied by the Commissioner or the taxpayer as necessary to clearly reflect income (*e.g.*, to prevent the unreasonable deferral (or acceleration) of income or the premature recognition (or deferral) of loss). Under the severing and aggregating rules, one agreement may be treated as two or more contracts, and two or more agreements may be treated as one contract. Except as provided in paragraph (e)(3)(ii) of this section, a taxpayer must determine whether to sever an agreement or to aggregate two or more agreements based on the facts and circumstances known at the end of the contracting year.

(2) *Facts and circumstances.* Whether an agreement should be severed, or two or more agreements should be aggregated, depends on the following factors:

(i) *Pricing.* Independent pricing of items in an agreement is necessary for the agreement to be severed into two or more contracts. In the case of an agreement for similar items, if the price to be paid for the items is determined under different terms or formulas (*e.g.*, if some items are priced under a cost-plus incentive fee arrangement and later items are to be priced under a fixed-price arrangement), then the difference in the pricing terms or formulas indicates that the items are independently priced. Similarly, interdependent pricing of items in separate agreements is necessary for two or more agreements to be aggregated into one contract. A single price negotiation for similar items ordered under one or more agreements indicates that the items are interdependently priced.

(ii) *Separate delivery or acceptance.* An agreement may not be severed into two or more contracts unless it provides for separate delivery or separate acceptance of items that are the subject matter of the agreement. However, the separate delivery or separate acceptance of items by itself does not necessarily require an agreement to be severed.

(iii) *Reasonable businessperson.* Two or more agreements to perform manufacturing or construction activities may not be aggregated into one contract unless a reasonable businessperson would not have entered into one of the

agreements for the terms agreed upon without also entering into the other agreement(s). Similarly, an agreement to perform manufacturing or construction activities may not be severed into two or more contracts if a reasonable businessperson would not have entered into separate agreements containing terms allocable to each severed contract. Analyzing the reasonable businessperson standard requires an analysis of all the facts and circumstances of the business arrangement between the taxpayer and the customer. For purposes of this paragraph (e)(2)(iii), a taxpayer's expectation that the parties would enter into another agreement, when agreeing to the terms contained in the first agreement, is not relevant.

(3) *Exceptions*—(i) *Severance for PCM.* A taxpayer may not sever under this paragraph (e) a long-term contract that would be subject to the PCM without obtaining the Commissioner's prior written consent.

(ii) *Options and change orders.* Except as provided in paragraph (e)(3)(i) of this section, a taxpayer must sever an agreement that increases the number of units to be supplied to the customer, such as through the exercise of an option or the acceptance of a change order, if the agreement provides for separate delivery or separate acceptance of the additional units.

(4) *Statement with return.* If a taxpayer severs an agreement or aggregates two or more agreements under this paragraph (e) during the taxable year, the taxpayer must attach a statement to its original federal income tax return for that year. This statement must contain the following information—

(i) The legend NOTIFICATION OF SEVERANCE OR AGGREGATION UNDER SEC. 1.460-1(e);

(ii) The taxpayer's name; and

(iii) The taxpayer's employer identification number or social security number.

(f) *Classifying contracts*—(1) *In general.* After applying the severing and aggregating rules of paragraph (e) of this section, a taxpayer must determine the classification of a contract (*e.g.*, as a long-term manufacturing contract, long-term construction contract, non-

long-term contract) based on all the facts and circumstances known no later than the end of the contracting year. Classification is determined on a contract-by-contract basis. Consequently, a requirement to manufacture a single unique item under a long-term contract will subject all other items in that contract to section 460.

(2) *Hybrid contracts*—(i) *In general.* A long-term contract that requires a taxpayer to perform both manufacturing and construction activities (hybrid contract) generally must be classified as two contracts, a manufacturing contract and a construction contract. A taxpayer may elect, on a contract-by-contract basis, to classify a hybrid contract as a long-term construction contract if at least 95 percent of the estimated total allocable contract costs are reasonably allocable to construction activities. In addition, a taxpayer may elect, on a contract-by-contract basis, to classify a hybrid contract as a long-term manufacturing contract subject to the PCM.

(ii) *Elections.* A taxpayer makes an election under this paragraph (f)(2) by using its method of accounting for similar construction contracts or for manufacturing contracts, whichever is applicable, to account for a hybrid contract entered into during the taxable year of the election on its original federal income tax return for the election year. If an electing taxpayer's method is the PCM, the taxpayer also must use the PCM to apply the look-back method under § 1.460-6 and to determine alternative minimum taxable income under § 1.460-4(f).

(3) *Method of accounting.* Except as provided in paragraph (f)(2)(ii) of this section, a taxpayer's method of classifying contracts is a method of accounting under section 446 and, thus, may not be changed without the Commissioner's consent. If a taxpayer's method of classifying contracts is unreasonable, that classification method is an impermissible accounting method.

(4) *Use of estimates*—(i) *Estimating length of contract.* A taxpayer must use a reasonable estimate of the time required to complete a contract when necessary to classify the contract (e.g., to determine whether the five-year

completion rule for qualified ship contracts under § 1.460-2(d), or the two-year completion rule for exempt construction contracts under § 1.460-3(b), is satisfied, but not to determine whether a contract is completed within the contracting year under paragraph (b)(1) of this section). To be considered reasonable, an estimate of the time required to complete the contract must include anticipated time for delay, rework, change orders, technology or design problems, or other problems that reasonably can be anticipated considering the nature of the contract and prior experience. A contract term that specifies an expected completion or delivery date may be considered evidence that the taxpayer reasonably expects to complete or deliver the subject matter of the contract on or about the date specified, especially if the contract provides bona fide penalties for failing to meet the specified date. If a taxpayer classifies a contract based on a reasonable estimate of completion time, the contract will not be reclassified based on the actual (or another reasonable estimate of) completion time. A taxpayer's estimate of completion time will not be considered unreasonable if a contract is not completed within the estimated time primarily because of unforeseeable factors not within the taxpayer's control, such as third-party litigation, extreme weather conditions, strikes, or delays in securing permits or licenses.

(ii) *Estimating allocable contract costs.* A taxpayer must use a reasonable estimate of total allocable contract costs when necessary to classify the contract (e.g., to determine whether a contract is a home construction contract under § 1.460-3(b)(2)). If a taxpayer classifies a contract based on a reasonable estimate of total allocable contract costs, the contract will not be reclassified based on the actual (or another reasonable estimate of) total allocable contract costs.

(g) *Special rules for activities benefiting long-term contracts of a related party*—(1) *Related party use of PCM*—(i) *In general.* Except as provided in paragraph (g)(1)(ii) of this section, if a related party and its customer enter into a long-term contract subject to the

PCM, and a taxpayer performs any activity that is incident to or necessary for the related party's long-term contract, the taxpayer must account for the gross receipts and costs attributable to this activity using the PCM, even if this activity is not otherwise subject to section 460(a). This type of activity may include, for example, the performance of engineering and design services, and the production of components and subassemblies that are reasonably expected to be used in the production of the subject matter of the related party's contract.

(ii) *Exception for components and subassemblies.* A taxpayer is not required to use the PCM under this paragraph (g) to account for a component or subassembly that benefits a related party's long-term contract if more than 50 percent of the average annual gross receipts attributable to the sale of this item for the 3-taxable-year-period ending with the contracting year comes from unrelated parties.

(2) *Total contract price.* If a taxpayer is required to use the PCM under paragraph (g)(1)(i) of this section, the total contract price (as defined in § 1.460-4(b)(4)(i)) is the fair market value of the taxpayer's activity that is incident to or necessary for the performance of the related party's long-term contract. The related party also must use the fair market value of the taxpayer's activity as the cost it incurs for the activity. The fair market value of the taxpayer's activity may or may not be the same as the amount the related party pays the taxpayer for that activity.

(3) *Completion factor.* To compute a contract's completion factor (as described in § 1.460-4(b)(5)), the related party must take into account the fair market value of the taxpayer's activity that is incident to or necessary for the performance of the related party's long-term contract when the related party incurs the liability to the taxpayer for the activity, rather than when the taxpayer incurs the costs to perform the activity.

(h) *Effective date—(1) In general.* Except as otherwise provided, this section and §§ 1.460-2 through 1.460-5 are applicable for contracts entered into on or after January 11, 2001.

(2) *Change in method of accounting.* Any change in a taxpayer's method of accounting necessary to comply with this section and §§ 1.460-2 through 1.460-5 is a change in method of accounting to which the provisions of section 446 and the regulations thereunder apply. For the first taxable year that includes January 11, 2001, a taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with the provisions of this section and §§ 1.460-2 through 1.460-5 for long-term contracts entered into on or after January 11, 2001. A taxpayer that wants to change its method of accounting under this paragraph (h)(2) must follow the automatic consent procedures in Rev. Proc. 99-49 (1999-52 I.R.B. 725) (see § 601.601(d)(2) of this chapter), except that the scope limitations in section 4.02 of Rev. Proc. 99-49 do not apply. Because a change under this paragraph (h)(2) is made on a cut-off basis, a section 481(a) adjustment is not permitted or required. Moreover, the taxpayer does not receive audit protection under section 7 of Rev. Proc. 99-49 for a change in method of accounting under this paragraph (h)(2). A taxpayer that wants to change its exempt-contract method of accounting is not granted the consent of the Commissioner under this paragraph (h)(2) and must file a Form 3115, "Application for Change in Accounting Method," to obtain consent. See Rev. Proc. 97-27 (1997-1 C.B. 680) (see § 601.601(d)(2) of this chapter).

(i) [Reserved]

(j) *Examples.* The following examples illustrate the rules of this section:

*Example 1. Contract for manufacture of property.* B notifies C, an aircraft manufacturer, that it wants to purchase an aircraft of a particular type. At the time C receives the order, C has on hand several partially completed aircraft of this type; however, C does not have any completed aircraft of this type on hand. C and B agree that B will purchase one of these aircraft after it has been completed. C retains title to and risk of loss with respect to the aircraft until the sale takes place. The agreement between C and B is a contract for the manufacture of property under paragraph (b)(2)(i) of this section, even if labeled as a contract for the sale of property, because the manufacture of the aircraft is necessary for C's obligations under the

agreement to be fulfilled and the manufacturing was not complete when B and C entered into the agreement.

*Example 2. De minimis construction activity.* C, a master developer whose taxable year ends December 31, owns 5,000 acres of undeveloped land with a cost basis of \$5,000,000 and a fair market value of \$50,000,000. To obtain permission from the local county government to improve this land, a service road must be constructed on this land to benefit all 5,000 acres. In 2001, C enters into a contract to sell a 1,000-acre parcel of undeveloped land to B, a residential developer, for its fair market value, \$10,000,000. In this contract, C agrees to construct a service road running through the land that C is selling to B and through the 4,000 adjacent acres of undeveloped land that C has sold or will sell to other residential developers for its fair market value, \$40,000,000. C reasonably estimates that it will incur allocable contract costs of \$50,000 (excluding the cost of the land) to construct this service road, which will be owned and maintained by the county. C must reasonably allocate the cost of the service road among the benefitted parcels. The portion of the estimated total allocable contract costs that C allocates to the 1,000-acre parcel being sold to B (based upon its fair market value) is \$10,000 ( $\$50,000 \times (\$10,000,000 \div \$50,000,000)$ ). Construction of the service road is finished in 2002. Because the estimated total allocable contract costs attributable to C's construction activities, \$10,000, are less than 10 percent of the contract's total contract price, \$10,000,000, C's contract with B is not a construction contract under paragraph (b)(2)(ii) of this section. Thus, C's contract with B is not a long-term contract under paragraph (b)(2)(i) of this section, notwithstanding that construction of the service road is not completed in 2001.

*Example 3. Completion—customer use.* In 2002, C, whose taxable year ends December 31, enters into a contract to construct a building for B. In November of 2003, the building is completed in every respect necessary for its intended use, and B occupies the building. In early December of 2003, B notifies C of some minor deficiencies that need to be corrected, and C agrees to correct them in January 2004. C reasonably estimates that the cost of correcting these deficiencies will be less than five percent of the total allocable contract costs. C's contract is complete under paragraph (c)(3)(i)(A) of this section in 2003 because in that year, B used the building and C had incurred at least 95 percent of the total allocable contract costs attributable to the building. C must use a permissible method of accounting for any deficiency-related costs incurred after 2003.

*Example 4. Completion—customer use.* In 2001, C, whose taxable year ends December 31, agrees to construct a shopping center, which includes an adjoining parking lot, for B. By

October 2002, C has finished constructing the retail portion of the shopping center. By December 2002, C has graded the entire parking lot, but has paved only one-fourth of it because inclement weather conditions prevented C from laying asphalt on the remaining three-fourths. In December 2002, B opens the retail portion of the shopping center and the paved portion of the parking lot to the general public. C reasonably estimates that the cost of paving the remaining three-fourths of the parking lot when weather permits will exceed five percent of C's total allocable contract costs. Even though B is using the subject matter of the contract, C's contract is not completed in December 2002 under paragraph (c)(3)(i)(A) of this section because C has not incurred at least 95 percent of the total allocable contract costs attributable to the subject matter.

*Example 5. Completion—customer use.* In 2001, C, whose taxable year ends December 31, agrees to manufacture 100 machines for B. By December 31, 2002, C has delivered 99 of the machines to B. C reasonably estimates that the cost of finishing the related work on the contract will be less than five percent of the total allocable contract costs. C's contract is not complete under paragraph (c)(3)(i)(A) of this section in 2002 because in that year, B is not using the subject matter of the contract (all 100 machines) for its intended purpose.

*Example 6. Non-long-term contract activity.* On January 1, 2001, C, whose taxable year ends December 31, enters into a single long-term contract to design and manufacture a satellite and to develop computer software enabling B to operate the satellite. At the end of 2001, C has not finished manufacturing the satellite. Designing the satellite and developing the computer software are non-long-term contract activities that are incident to and necessary for the taxpayer's manufacturing of the subject matter of a long-term contract because the satellite could not be manufactured without the design and would not operate without the software. Thus, under paragraph (d)(1) of this section, C must allocate these non-long-term contract activities to the long-term contract and account for the gross receipts and costs attributable to designing the satellite and developing computer software using the PCM.

*Example 7. Non-long-term contract activity.* C agrees to manufacture equipment for B under a long-term contract. In a separate contract, C agrees to design the equipment being manufactured for B under the long-term contract. Under paragraph (d)(1) of this section, C must allocate the gross receipts and costs related to the design to the long-term contract because designing the equipment is a non-long-term contract activity that is incident to and necessary for the

manufacture of the subject matter of the long-term contract.

*Example 8. Severance.* On January 1, 2001, C, a construction contractor, and B, a real estate investor, enter into an agreement requiring C to build two office buildings in different areas of a large city. The agreement provides that the two office buildings will be completed by C and accepted by B in 2002 and 2003, respectively, and that C will be paid \$1,000,000 and \$1,500,000 for the two office buildings, respectively. The agreement will provide C with a reasonable profit from the construction of each building. Unless C is required to use the PCM to account for the contract, C is required to sever this contract under paragraph (e)(2) of this section because the buildings are independently priced, the agreement provides for separate delivery and acceptance of the buildings, and, as each building will generate a reasonable profit, a reasonable businessperson would have entered into separate agreements for the terms agreed upon for each building.

*Example 9. Severance.* C, a large construction contractor whose taxable year ends December 31, accounts for its construction contracts using the PCM and has elected to use the 10-percent method described in § 1.460-4(b)(6). In September 2001, C enters into an agreement to construct four buildings in four different cities. The buildings are independently priced and the contract provides a reasonable profit for each of the buildings. In addition, the agreement requires C to complete one building per year in 2002, 2003, 2004, and 2005. As of December 31, 2001, C has incurred 25 percent of the estimated total allocable contract costs attributable to one of the buildings, but only five percent of the estimated total allocable contract costs attributable to all four buildings included in the agreement. C does not request the Commissioner's consent to sever this contract. Using the 10-percent method, C does not take into account any portion of the total contract price or any incurred allocable contract costs attributable to this agreement in 2001. Upon examination of C's 2001 tax return, the Commissioner determines that C entered into one agreement for four buildings rather than four separate agreements each for one building solely to take advantage of the deferral obtained under the 10-percent method. Consequently, to clearly reflect the taxpayer's income, the Commissioner may require C to sever the agreement into four separate contracts under paragraph (e)(2) of this section because the buildings are independently priced, the agreement provides for separate delivery and acceptance of the buildings, and a reasonable businessperson would have entered into separate agreements for these buildings.

*Example 10. Aggregation.* In 2001, C, a shipbuilder, enters into two agreements with the Department of the Navy as the result of a

single negotiation. Each agreement obligates C to manufacture a submarine. Because the submarines are of the same class, their specifications are similar. Because C has never manufactured submarines of this class, however, C anticipates that it will incur substantially higher costs to manufacture the first submarine, to be delivered in 2007, than to manufacture the second submarine, to be delivered in 2010. If the agreements are treated as separate contracts, the first contract probably will produce a substantial loss, while the second contract probably will produce substantial profit. Based upon these facts, aggregation is required under paragraph (e)(2) of this section because the submarines are interdependently priced and a reasonable businessperson would not have entered the first agreement without also entering into the second.

*Example 11. Aggregation.* In 2001, C, a manufacturer of aircraft and related equipment, agrees to manufacture 10 military aircraft for foreign government B and to deliver the aircraft by the end of 2003. When entering into the agreement, C anticipates that it might receive production orders from B over the next 20 years for as many as 300 more of these aircraft. The negotiated contract price reflects C's and B's consideration of the expected total cost of manufacturing the 10 aircraft, the risks and opportunities associated with the agreement, and the additional factors the parties considered relevant. The negotiated price provides a profit on the sale of the 10 aircraft even if C does not receive any additional production orders from B. It is unlikely, however, that C actually would have wanted to manufacture the 10 aircraft but for the expectation that it would receive additional production orders from B. In 2003, B accepts delivery of the 10 aircraft. At that time, B orders an additional 20 aircraft of the same type for delivery in 2007. When negotiating the price for the additional 20 aircraft, C and B consider the fact that the expected unit cost for this production run of 20 aircraft will be lower than the unit cost of the 10 aircraft completed and accepted in 2003, but substantially higher than the expected unit cost of future production runs. Based upon these facts, aggregation is not permitted under paragraph (e)(2) of this section. Because the parties negotiated the prices of both agreements considering only the expected production costs and risks for each agreement standing alone, the terms and conditions agreed upon for the first agreement are independent of the terms and conditions agreed upon for the second agreement. The fact that the agreement to manufacture 10 aircraft provides a profit for C indicates that a reasonable businessperson would have entered into that agreement without entering into the agreement to manufacture the additional 20 aircraft.

*Example 12. Classification and completion.* In 2001, C, whose taxable year ends December 31, agrees to manufacture and install an industrial machine for B. C elects under paragraph (f) of this section to classify the agreement as a long-term manufacturing contract and to account for it using the PCM. The agreement requires C to deliver the machine in August 2003 and to install and test the machine in B's factory. In addition, the agreement requires B to accept the machine when the tests prove that the machine's performance will satisfy the environmental standards set by the Environmental Protection Agency (EPA), even if B has not obtained the required operating permit. Because of technical difficulties, C cannot deliver the machine until December 2003, when B conditionally accepts delivery. C installs the machine in December 2003 and then tests it through February 2004. B accepts the machine in February 2004, but does not obtain the operating permit from the EPA until January 2005. Under paragraph (c)(3)(i)(B) of this section, C's contract is finally completed and accepted in February 2004, even though B does not obtain the operating permit until January 2005, because C completed all its obligations under the contract and B accepted the machine in February 2004.

[T.D. 8929, 66 FR 2225, Jan. 11, 2001; 66 FR 18357, Apr. 6, 2001]

#### **§ 1.460-2 Long-term manufacturing contracts.**

(a) *In general.* Section 460 generally requires a taxpayer to determine the income from a long-term manufacturing contract using the percentage-of-completion method described in § 1.460-4(b) (PCM). A contract not completed in the contracting year is a long-term manufacturing contract if it involves the manufacture of personal property that is—

(1) A unique item of a type that is not normally carried in the finished goods inventory of the taxpayer; or

(2) An item that normally requires more than 12 calendar months to complete (regardless of the duration of the contract or the time to complete a deliverable quantity of the item).

(b) *Unique—(1) In general.* *Unique* means designed for the needs of a specific customer. To determine whether an item is designed for the needs of a specific customer, a taxpayer must consider the extent to which research, development, design, engineering, retooling, and similar activities (customizing activities) are required to manu-

facture the item and whether the item could be sold to other customers with little or no modification. A contract may require the taxpayer to manufacture more than one unit of a unique item. If a contract requires a taxpayer to manufacture more than one unit of the same item, the taxpayer must determine whether that item is unique by considering the customizing activities that would be needed to produce only the first unit. For the purposes of this paragraph (b), a taxpayer must consider the activities performed on its behalf by a subcontractor.

(2) *Safe harbors.* Notwithstanding paragraph (b)(1) of this section, an item is not unique if it satisfies one or more of the safe harbors in this paragraph (b)(2). If an item does not satisfy one or more safe harbors, the determination of uniqueness will depend on the facts and circumstances. The safe harbors are:

(i) *Short production period.* An item is not unique if it normally requires 90 days or less to complete. In the case of a contract for multiple units of an item, the item is not unique only if it normally requires 90 days or less to complete each unit of the item in the contract.

(ii) *Customized item.* An item is not unique if the total allocable contract costs attributable to customizing activities that are incident to or necessary for the manufacture of the item do not exceed 10 percent of the estimated total allocable contract costs allocable to the item. In the case of a contract for multiple units of an item, this comparison must be performed on the first unit of the item, and the total allocable contract costs attributable to customizing activities that are incident to or necessary for the manufacture of the first unit of the item must be allocated to that first unit.

(iii) *Inventoried item.* A unique item ceases to be unique no later than when the taxpayer normally includes similar items in its finished goods inventory.

(c) *Normal time to complete—(1) In general.* The amount of time normally required to complete an item is the item's reasonably expected *production period*, as described in § 1.263A-12, determined at the end of the contracting year. Thus, in general, the expected

production period for an item begins when a taxpayer incurs at least five percent of the costs that would be allocable to the item under §1.460-5 and ends when the item is ready to be held for sale and all reasonably expected production activities are complete. In the case of components that are assembled or reassembled into an item or unit at the customer's facility by the taxpayer's employees or agents, the production period ends when the components are assembled or reassembled into an operable item or unit. To the extent that several distinct activities related to the production of the item are expected to occur simultaneously, the period during which these distinct activities occur is not counted more than once. Furthermore, when determining the normal time to complete an item, a taxpayer is not required to consider activities performed or costs incurred that would not be allocable contract costs under section 460 (e.g., independent research and development expenses (as defined in §1.460-1(b)(9)) and marketing expenses). Moreover, the time normally required to design and manufacture the first unit of an item for which the taxpayer intends to produce multiple units generally does not indicate the normal time to complete the item.

(2) *Production by related parties.* To determine the time normally required to complete an item, a taxpayer must consider all relevant production activities performed and costs incurred by itself and by related parties, as defined in §1.460-1(b)(4). For example, if a taxpayer's item requires a component or subassembly manufactured by a related party, the taxpayer must consider the time the related party takes to complete the component or subassembly and, for purposes of determining the beginning of an item's production period, the costs incurred by the related party that are allocable to the component or subassembly. However, if both requirements of the exception for components and subassemblies under §1.460-1(g)(1)(ii) are satisfied, a taxpayer does not consider the activities performed or the costs incurred by a related party when determining the normal time to complete an item.

(d) *Qualified ship contracts.* A taxpayer may determine the income from a long-term manufacturing contract that is a qualified ship contract using either the PCM or the percentage-of-completion/capitalized-cost method (PCCM) of accounting described in §1.460-4(e). A *qualified ship contract* is any contract entered into after February 28, 1986, to manufacture in the United States not more than 5 seagoing vessels if the vessels will not be manufactured directly or indirectly for the United States Government and if the taxpayer reasonably expects to complete the contract within 5 years of the contract commencement date. Under §1.460-1(e)(3)(i), a contract to produce more than 5 vessels for which the PCM would be required cannot be severed in order to be classified as a qualified ship contract.

(e) *Examples.* The following examples illustrate the rules of this section:

*Example 1. Unique item and classification.* In December 2001, C enters into a contract with B to design and manufacture a new type of industrial equipment. C reasonably expects the normal production period for this type of equipment to be eight months. Because the new type of industrial equipment requires a substantial amount of research, design, and engineering to produce, C determines that the equipment is a unique item and its contract with B is a long-term contract. After delivering the equipment to B in September 2002, C contracts with B to produce five additional units of that industrial equipment with certain different specifications. These additional units, which also are expected to take eight months to produce, will be delivered to B in 2003. C determines that the research, design, engineering, retooling, and similar customizing costs necessary to produce the five additional units of equipment does not exceed 10 percent of the first unit's share of estimated total allocable contract costs. Consequently, the additional units of equipment satisfy the safe harbor in paragraph (b)(2)(ii) of this section and are not unique items. Although C's contract with B to produce the five additional units is not completed within the contracting year, the contract is not a long-term contract since the additional units of equipment are not unique items and do not normally require more than 12 months to produce. C must classify its second contract with B as a non-long term contract, notwithstanding that it classified the previous contract with B for a similar item as a long-term contract, because the determination of whether a contract is a long-term contract is made on a

contract-by-contract basis. A change in classification is not a change in method of accounting because the change in classification results from a change in underlying facts.

*Example 2. 12-month rule—related party.* C manufactures cranes. C purchases one of the crane's components from R, a related party under §1.460-1(b)(4). Less than 50 percent of R's gross receipts attributable to the sale of this component comes from sales to unrelated parties; thus, the exception for components and subassemblies under §1.460-1(g)(1)(ii) is not satisfied. Consequently, C must consider the activities of R as R incurs costs and performs the activities rather than as C incurs a liability to R. The normal time period between the time that both C and R incur five percent of the costs allocable to the crane and the time that R completes the component is five months. C normally requires an additional eight months to complete production of the crane after receiving the integral component from R. C's crane is an item of a type that normally requires more than 12 months to complete under paragraph (c) of this section because the production period from the time that both C and R incur five percent of the costs allocable to the crane until the time that production of the crane is complete is normally 13 months.

*Example 3. 12-month rule—duration of contract.* The facts are the same as in *Example 2*, except that C enters into a sales contract with B on December 31, 2001 (the last day of C's taxable year), and delivers a completed crane to B on February 1, 2002. C's contract with B is a long-term contract under paragraph (a)(2) of this section because the contract is not completed in the contracting year, 2001, and the crane is an item that normally requires more than 12 calendar months to complete (regardless of the duration of the contract).

*Example 4. 12-month rule—normal time to complete.* The facts are the same as in *Example 2*, except that C (and R) actually complete B's crane in only 10 calendar months. The contract is a long-term contract because the normal time to complete a crane, not the actual time to complete a crane, is the relevant criterion for determining whether an item is subject to paragraph (a)(2) of this section.

*Example 5. Normal time to complete.* C enters into a multi-unit contract to produce four units of an item. C does not anticipate producing any additional units of the item. C expects to perform the research, design, and development that are directly allocable to the particular item and to produce the first unit in the first 24 months. C reasonably expects the production period for each of the three remaining units will be 3 months. This contract is not a contract that involves the manufacture of an item that normally requires more than 12 months to complete be-

cause the normal time to complete the item is 3 months. However, the contract does not satisfy the 90-day safe harbor for unique items because the normal time to complete the first unit of this item exceeds 90 days. Thus, the contract might involve the manufacture of a unique item depending on the facts and circumstances.

[T.D. 8929, 66 FR 2230, Jan. 11, 2001; 66 FR 18191, Apr. 6, 2001]

### § 1.460-3 Long-term construction contracts.

(a) *In general.* Section 460 generally requires a taxpayer to determine the income from a long-term construction contract using the percentage-of-completion method described in §1.460-4(b) (PCM). A contract not completed in the contracting year is a long-term construction contract if it involves the building, construction, reconstruction, or rehabilitation of real property; the installation of an integral component to real property; or the improvement of real property (collectively referred to as construction). *Real property* means land, buildings, and *inherently permanent structures*, as defined in §1.263A-8(c)(3), such as roadways, dams, and bridges. Real property does not include vessels, offshore drilling platforms, or unsevered natural products of land. An *integral component to real property* includes property not produced at the site of the real property but intended to be permanently affixed to the real property, such as elevators and central heating and cooling systems. Thus, for example, a contract to install an elevator in a building is a construction contract because a building is real property, but a contract to install an elevator in a ship is not a construction contract because a ship is not real property.

(b) *Exempt construction contracts—(1) In general.* The general requirement to use the PCM and the cost allocation rules described in §1.460-5(b) or (c) does not apply to any long-term construction contract described in this paragraph (b) (exempt construction contract). *Exempt construction contract* means any—

- (i) Home construction contract; and
- (ii) Other construction contract that a taxpayer estimates (when entering into the contract) will be completed

within 2 years of the contract commencement date, provided the taxpayer satisfies the \$10,000,000 gross receipts test described in paragraph (b)(3) of this section.

(2) *Home construction contract*—(i) *In general.* A long-term construction contract is a *home construction contract* if a taxpayer (including a subcontractor working for a general contractor) reasonably expects to attribute 80 percent or more of the estimated total allocable contract costs (including the cost of land, materials, and services), determined as of the close of the contracting year, to the construction of—

(A) Dwelling units, as defined in section 168(e)(2)(A)(ii)(I), contained in buildings containing 4 or fewer dwelling units (including buildings with 4 or fewer dwelling units that also have commercial units); and

(B) Improvements to real property directly related to, and located at the site of, the dwelling units.

(i) *Townhouses and rowhouses.* Each townhouse or rowhouse is a separate building.

(iii) *Common improvements.* A taxpayer includes in the cost of the dwelling units their allocable share of the cost that the taxpayer reasonably expects to incur for any common improvements (e.g., sewers, roads, clubhouses) that benefit the dwelling units and that the taxpayer is contractually obligated, or required by law, to construct within the tract or tracts of land that contain the dwelling units.

(iv) *Mixed use costs.* If a contract involves the construction of both commercial units and dwelling units within the same building, a taxpayer must allocate the costs among the commercial units and dwelling units using a reasonable method or combination of reasonable methods, such as specific identification, square footage, or fair market value.

(3) *\$10,000,000 gross receipts test*—(i) *In general.* Except as otherwise provided in paragraphs (b)(3)(ii) and (iii) of this section, the \$10,000,000 gross receipts test is satisfied if a taxpayer's (or predecessor's) average annual gross receipts for the 3 taxable years preceding the contracting year do not exceed \$10,000,000, as determined using the

principles of the gross receipts test for small resellers under §1.263A-3(b).

(ii) *Single employer.* To apply the gross receipts test, a taxpayer is not required to aggregate the gross receipts of persons treated as a single employer solely under section 414(m) and any regulations prescribed under section 414.

(iii) *Attribution of gross receipts.* A taxpayer must aggregate a proportionate share of the construction-related gross receipts of any person that has a five percent or greater interest in the taxpayer. In addition, a taxpayer must aggregate a proportionate share of the construction-related gross receipts of any person in which the taxpayer has a five percent or greater interest. For this purpose, a taxpayer must determine ownership interests as of the first day of the taxpayer's contracting year and must include indirect interests in any corporation, partnership, estate, trust, or sole proprietorship according to principles similar to the constructive ownership rules under sections 1563(e), (f)(2), and (f)(3)(A). However, a taxpayer is not required to aggregate under this paragraph (b)(3)(iii) any construction-related gross receipts required to be aggregated under paragraph (b)(3)(i) of this section.

(c) *Residential construction contracts.* A taxpayer may determine the income from a long-term construction contract that is a residential construction contract using either the PCM or the percentage-of-completion/capitalized-cost method (PCCM) of accounting described in §1.460-4(e). A *residential construction contract* is a home construction contract, as defined in paragraph (b)(2) of this section, except that the building or buildings being constructed contain more than 4 dwelling units.

[T.D. 8929, 66 FR 2231, Jan. 11, 2001]

**§ 1.460-4 Methods of accounting for long-term contracts.**

(a) *Overview.* This section prescribes permissible methods of accounting for long-term contracts. Paragraph (b) of this section describes the percentage-of-completion method under section 460(b) (PCM) that a taxpayer generally must use to determine the income from a long-term contract. Paragraph (c) of this section lists permissible methods

of accounting for exempt construction contracts described in §1.460-3(b)(1) and describes the exempt-contract percentage-of-completion method (EPCM). Paragraph (d) of this section describes the completed-contract method (CCM), which is one of the permissible methods of accounting for exempt construction contracts. Paragraph (e) of this section describes the percentage-of-completion/capitalized-cost method (PCCM), which is a permissible method of accounting for qualified ship contracts described in §1.460-2(d) and residential construction contracts described in §1.460-3(c). Paragraph (f) of this section provides rules for determining the alternative minimum taxable income (AMTI) from long-term contracts that are not exempted under section 56. Paragraph (g) of this section provides rules concerning consistency in methods of accounting for long-term contracts. Paragraph (h) of this section provides examples illustrating the principles of this section. Paragraph (j) of this section provides rules for taxpayers that file consolidated tax returns. Finally, paragraph (k) of this section provides rules relating to a mid-contract change in taxpayer of a contract accounted for using a long-term contract method of accounting.

(b) *Percentage-of-completion method*—  
 (1) *In general.* Under the PCM, a taxpayer generally must include in income the portion of the *total contract price*, as defined in paragraph (b)(4)(i) of this section, that corresponds to the percentage of the entire contract that the taxpayer has completed during the taxable year. The percentage of completion must be determined by comparing allocable contract costs incurred with estimated total allocable contract costs. Thus, the taxpayer includes a portion of the total contract price in gross income as the taxpayer incurs allocable contract costs.

(2) *Computations.* To determine the income from a long-term contract, a taxpayer—

(i) Computes the *completion factor* for the contract, which is the ratio of the cumulative allocable contract costs that the taxpayer has incurred through the end of the taxable year to the estimated total allocable contract costs

that the taxpayer reasonably expects to incur under the contract;

(ii) Computes the amount of *cumulative gross receipts* from the contract by multiplying the completion factor by the total contract price;

(iii) Computes the amount of *current-year gross receipts*, which is the difference between the amount of cumulative gross receipts for the current taxable year and the amount of cumulative gross receipts for the immediately preceding taxable year (the difference can be a positive or negative number); and

(iv) Takes both the current-year gross receipts and the allocable contract costs incurred during the current year into account in computing taxable income.

(3) *Post-completion-year income.* If a taxpayer has not included the total contract price in gross income by the completion year, as defined in §1.460-1(b)(6), the taxpayer must include the remaining portion of the total contract price in gross income for the taxable year following the completion year. For the treatment of post-completion-year costs, see paragraph (b)(5)(v) of this section. See §1.460-6(c)(1)(ii) for application of the look-back method as a result of adjustments to total contract price.

(4) *Total contract price*—(i) *In general*—  
 (A) *Definition.* *Total contract price* means the amount that a taxpayer reasonably expects to receive under a long-term contract, including holdbacks, retainages, and cost reimbursements. See §1.460-6(c)(1)(ii) and (2)(vi) for application of the look-back method as a result of changes in total contract price.

(B) *Contingent compensation.* Any amount related to a contingent right under a contract, such as a bonus, award, incentive payment, and amount in dispute, is included in total contract price as soon as the taxpayer can reasonably predict that the amount will be earned, even if the all events test has not yet been met. For example, if a bonus is payable to a taxpayer for meeting an early completion date, the bonus is includible in total contract price at the time and to the extent

that the taxpayer can reasonably predict the achievement of the corresponding objective. Similarly, a portion of the contract price that is in dispute is includible in total contract price at the time and to the extent that the taxpayer can reasonably predict that the dispute will be resolved in the taxpayer's favor (regardless of when the taxpayer actually receives payment or when the dispute is finally resolved). Total contract price does not include compensation that might be earned under any other agreement that the taxpayer expects to obtain from the same customer (e.g., exercised option or follow-on contract) if that other agreement is not aggregated under § 1.460-1(e). For the purposes of this paragraph (b)(4)(i)(B), a taxpayer can reasonably predict that an amount of contingent income will be earned not later than when the taxpayer includes that amount in income for financial reporting purposes under generally accepted accounting principles. If a taxpayer has not included an amount of contingent compensation in total contract price under this paragraph (b)(4)(i) by the taxable year following the completion year, the taxpayer must account for that amount of contingent compensation using a permissible method of accounting. If it is determined after the taxable year following the completion year that an amount included in total contract price will not be earned, the taxpayer should deduct that amount in the year of the determination.

(C) *Non-long-term contract activities.* Total contract price includes an allocable share of the gross receipts attributable to a non-long-term contract activity, as defined in § 1.460-1(d)(2), if the activity is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of the long-term contract. Total contract price also includes amounts reimbursed for independent research and development expenses (as defined in § 1.460-1(b)(9)), or for bidding and proposal costs, under a federal or cost-plus long-term contract (as defined in section 460(d)), regardless of whether the research and development, or bidding and proposal, activities are

incident to or necessary for the performance of that long-term contract.

(ii) *Estimating total contract price.* A taxpayer must estimate the total contract price based upon all the facts and circumstances known as of the last day of the taxable year. For this purpose, an event that occurs after the end of the taxable year must be taken into account if its occurrence was reasonably predictable and its income was subject to reasonable estimation as of the last day of that taxable year.

(5) *Completion factor—(i) Allocable contract costs.* A taxpayer must use a cost allocation method permitted under either § 1.460-5(b) or (c) to determine the amount of cumulative allocable contract costs and estimated total allocable contract costs that are used to determine a contract's completion factor. Allocable contract costs include a reimbursable cost that is allocable to the contract.

(ii) *Cumulative allocable contract costs.* To determine a contract's completion factor for a taxable year, a taxpayer must take into account the cumulative allocable contract costs that have been incurred, as defined in § 1.460-1(b)(8), through the end of the taxable year.

(iii) *Estimating total allocable contract costs.* A taxpayer must estimate total allocable contract costs for each long-term contract based upon all the facts and circumstances known as of the last day of the taxable year. For this purpose, an event that occurs after the end of the taxable year must be taken into account if its occurrence was reasonably predictable and its cost was subject to reasonable estimation as of the last day of that taxable year. To be considered reasonable, an estimate of total allocable contract costs must include costs attributable to delay, rework, change orders, technology or design problems, or other problems that reasonably can be predicted considering the nature of the contract and prior experience. However, estimated total allocable contract costs do not include any contingency allowance for costs that, as of the end of the taxable year, are not reasonably predicted to be incurred in the performance of the contract. For example, estimated total allocable contract costs do not include any costs attributable to factors not

reasonably predictable at the end of the taxable year, such as third-party litigation, extreme weather conditions, strikes, and delays in securing required permits and licenses. In addition, the estimated costs of performing other agreements that are not aggregated with the contract under §1.460-1(e) that the taxpayer expects to incur with the same customer (*e.g.*, follow-on contracts) are not included in estimated total allocable contract costs for the initial contract.

(iv) *Pre-contracting-year costs.* If a taxpayer reasonably expects to enter into a long-term contract in a future taxable year, the taxpayer must capitalize all costs incurred prior to entering into the contract that will be allocable to that contract (*e.g.*, bidding and proposal costs). A taxpayer is not required to compute a completion factor, or to include in gross income any amount, related to allocable contract costs for any taxable year ending before the contracting year or, if applicable, the 10-percent year defined in paragraph (b)(6)(i) of this section. In that year, the taxpayer is required to compute a completion factor that includes all allocable contract costs that have been incurred as of the end of that taxable year (whether previously capitalized or deducted) and to take into account in computing taxable income the related gross receipts and the previously capitalized allocable contract costs. If, however, a taxpayer determines in a subsequent year that it will not enter into the long-term contract, the taxpayer must account for these pre-contracting-year costs in that year (*e.g.*, as a deduction or an inventoriable cost) using the appropriate rules contained in other sections of the Code or regulations.

(v) *Post-completion-year costs.* If a taxpayer incurs an allocable contract cost after the completion year, the taxpayer must account for that cost using a permissible method of accounting. See §1.460-6(c)(1)(ii) for application of the look-back method as a result of adjustments to allocable contract costs.

(6) *10-percent method—(i) In general.* Instead of determining the income from a long-term contract beginning with the contracting year, a taxpayer may elect to use the 10-percent method

under section 460(b)(5). Under the 10-percent method, a taxpayer does not include in gross income any amount related to allocable contract costs until the taxable year in which the taxpayer has incurred at least 10 percent of the estimated total allocable contract costs (10-percent year). A taxpayer must treat costs incurred before the 10-percent year as pre-contracting-year costs described in paragraph (b)(5)(iv) of this section.

(ii) *Election.* A taxpayer makes an election under this paragraph (b)(6) by using the 10-percent method for all long-term contracts entered into during the taxable year of the election on its original federal income tax return for the election year. This election is a method of accounting and, thus, applies to all long-term contracts entered into during and after the taxable year of the election. An electing taxpayer must use the 10-percent method to apply the look-back method under §1.460-6 and to determine alternative minimum taxable income under paragraph (f) of this section. This election is not available if a taxpayer uses the simplified cost-to-cost method described in §1.460-5(c) to compute the completion factor of a long-term contract.

(7) *Terminated contract—(i) Reversal of income.* If a long-term contract is terminated before completion and, as a result, the taxpayer retains ownership of the property that is the subject matter of that contract, the taxpayer must reverse the transaction in the taxable year of termination. To reverse the transaction, the taxpayer reports a loss (or gain) equal to the cumulative allocable contract costs reported under the contract in all prior taxable years less the cumulative gross receipts reported under the contract in all prior taxable years.

(ii) *Adjusted basis.* As a result of reversing the transaction under paragraph (b)(7)(i) of this section, a taxpayer will have an adjusted basis in the retained property equal to the cumulative allocable contract costs reported under the contract in all prior taxable years. However, if the taxpayer received and retains any consideration or compensation from the customer, the taxpayer must reduce the adjusted

basis in the retained property (but not below zero) by the fair market value of that consideration or compensation. To the extent that the amount of the consideration or compensation described in the preceding sentence exceeds the adjusted basis in the retained property, the taxpayer must include the excess in gross income for the taxable year of termination.

(iii) *Look-back method.* The look-back method does not apply to a terminated contract that is subject to this paragraph (b)(7).

(c) *Exempt contract methods*—(1) *In general.* An *exempt contract method* means the method of accounting that a taxpayer must use to account for all its long-term contracts (and any portion of a long-term contract) that are exempt from the requirements of section 460(a). Thus, an exempt contract method applies to exempt construction contracts, as defined in § 1.460-3(b); the non-PCM portion of a qualified ship contract, as defined in § 1.460-2(d); and the non-PCM portion of a residential construction contract, as defined in § 1.460-3(c). Permissible exempt contract methods include the PCM, the EPCM described in paragraph (c)(2) of this section, the CCM described in paragraph (d) of this section, or any other permissible method. See section 446.

(2) *Exempt-contract percentage-of-completion method*—(i) *In general.* Similar to the PCM described in paragraph (b) of this section, a taxpayer using the EPCM generally must include in income the portion of the total contract price, as described in paragraph (b)(4) of this section, that corresponds to the percentage of the entire contract that the taxpayer has completed during the taxable year. However, under the EPCM, the percentage of completion may be determined as of the end of the taxable year by using any method of cost comparison (such as comparing direct labor costs incurred to date to estimated total direct labor costs) or by comparing the work performed on the contract with the estimated total work to be performed, rather than by using the cost-to-cost comparison required by paragraphs (b)(2)(i) and (5) of this section, provided such method is used consistently and clearly reflects in-

come. In addition, paragraph (b)(3) of this section (regarding post-completion-year income), paragraph (b)(6) of this section (regarding the 10-percent method) and § 1.460-6 (regarding the look-back method) do not apply to the EPCM.

(ii) *Determination of work performed.* For purposes of the EPCM, the criteria used to compare the work performed on a contract as of the end of the taxable year with the estimated total work to be performed must clearly reflect the earning of income with respect to the contract. For example, in the case of a roadbuilder, a standard of completion solely based on miles of roadway completed in a case where the terrain is substantially different may not clearly reflect the earning of income with respect to the contract.

(d) *Completed-contract method*—(1) *In general.* Except as otherwise provided in paragraph (d)(4) of this section, a taxpayer using the CCM to account for a long-term contract must take into account in the contract's completion year, as defined in § 1.460-1(b)(6), the gross contract price and all allocable contract costs incurred by the completion year. A taxpayer may not treat the cost of any materials and supplies that are allocated to a contract, but actually remain on hand when the contract is completed, as an allocable contract cost.

(2) *Post-completion-year income and costs.* If a taxpayer has not included an item of contingent compensation (*i.e.*, amounts for which the all events test has not been satisfied) in gross contract price under paragraph (d)(3) of this section by the completion year, the taxpayer must account for this item of contingent compensation using a permissible method of accounting. If a taxpayer incurs an allocable contract cost after the completion year, the taxpayer must account for that cost using a permissible method of accounting.

(3) *Gross contract price.* Gross contract price includes all amounts (including holdbacks, retainages, and reimbursements) that a taxpayer is entitled by law or contract to receive, whether or not the amounts are due or have been paid. In addition, gross contract price includes all bonuses, awards, and incentive payments, such as a bonus for

meeting an early completion date, to the extent the all events test is satisfied. If a taxpayer performs a non-long-term contract activity, as defined in § 1.460-1(d)(2), that is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of one or more of the taxpayer's long-term contracts, the taxpayer must include an allocable share of the gross receipts attributable to that activity in the gross contract price of the contract(s) benefitted by that activity. Gross contract price also includes amounts reimbursed for independent research and development expenses (as defined in § 1.460-1(b)(9)), or bidding and proposal costs, under a federal or cost-plus long-term contract (as defined in section 460(d)), regardless of whether the research and development, or bidding and proposal, activities are incident to or necessary for the performance of that long-term contract.

(4) *Contracts with disputed claims*—(i) *In general.* The special rules in this paragraph (d)(4) apply to a long-term contract accounted for using the CCM with a dispute caused by a customer's requesting a reduction of the gross contract price or the performance of additional work under the contract or by a taxpayer's requesting an increase in gross contract price, or both, on or after the date a taxpayer has tendered the subject matter of the contract to the customer.

(ii) *Taxpayer assured of profit or loss.* If the disputed amount relates to a customer's claim for either a reduction in price or additional work and the taxpayer is assured of either a profit or a loss on a long-term contract regardless of the outcome of the dispute, the gross contract price, reduced (but not below zero) by the amount reasonably in dispute, must be taken into account in the completion year. If the disputed amount relates to a taxpayer's claim for an increase in price and the taxpayer is assured of either a profit or a loss on a long-term contract regardless of the outcome of the dispute, the gross contract price must be taken into account in the completion year. If the taxpayer is assured a profit on the contract, all allocable contract costs incurred by the end of the completion year are taken into account in that

year. If the taxpayer is assured a loss on the contract, all allocable contract costs incurred by the end of the completion year, reduced by the amount reasonably in dispute, are taken into account in the completion year.

(iii) *Taxpayer unable to determine profit or loss.* If the amount reasonably in dispute affects so much of the gross contract price or allocable contract costs that a taxpayer cannot determine whether a profit or loss ultimately will be realized from a long-term contract, the taxpayer may not take any of the gross contract price or allocable contract costs into account in the completion year.

(iv) *Dispute resolved.* Any part of the gross contract price and any allocable contract costs that have not been taken into account because of the principles described in paragraph (d)(4)(i), (ii), or (iii) of this section must be taken into account in the taxable year in which the dispute is resolved. If a taxpayer performs additional work under the contract because of the dispute, the term *taxable year in which the dispute is resolved* means the taxable year the additional work is completed, rather than the taxable year in which the outcome of the dispute is determined by agreement, decision, or otherwise.

(e) *Percentage-of-completion/capitalized-cost method.* Under the PCCM, a taxpayer must determine the income from a long-term contract using the PCM for the applicable percentage of the contract and its exempt contract method, as defined in paragraph (c) of this section, for the remaining percentage of the contract. For residential construction contracts described in § 1.460-3(c), the applicable percentage is 70 percent, and the remaining percentage is 30 percent. For qualified ship contracts described in § 1.460-2(d), the applicable percentage is 40 percent, and the remaining percentage is 60 percent.

(f) *Alternative minimum taxable income*—(1) *In general.* Under section 56(a)(3), a taxpayer (not exempt from the AMT under section 55(e)) must use the PCM to determine its AMTI from any long-term contract entered into on or after March 1, 1986, that is not a home construction contract, as defined in § 1.460-3(b)(2). For AMTI purposes,

the PCM must include any election under paragraph (b)(6) of this section (concerning the 10-percent method) or under § 1.460-5(c) (concerning the simplified cost-to-cost method) that the taxpayer has made for regular tax purposes. For exempt construction contracts described in § 1.460-3(b)(1)(ii), a taxpayer must use the simplified cost-to-cost method to determine the completion factor for AMTI purposes. Except as provided in paragraph (f)(2) of this section, a taxpayer must use AMTI costs and AMTI methods, such as the depreciation method described in section 56(a)(1), to determine the completion factor of a long-term contract (except a home construction contract) for AMTI purposes.

(2) *Election to use regular completion factors.* Under this paragraph (f)(2), a taxpayer may elect for AMTI purposes to determine the completion factors of all of its long-term contracts using the methods of accounting and allocable contract costs used for regular federal income tax purposes. A taxpayer makes this election by using regular methods and regular costs to compute the completion factors of all long-term contracts entered into during the taxable year of the election for AMTI purposes on its original federal income tax return for the election year. This election is a method of accounting and, thus, applies to all long-term contracts entered into during and after the taxable year of the election. Although a taxpayer may elect to compute the completion factor of its long-term contracts using regular methods and regular costs, an election under this paragraph (f)(2) does not eliminate a taxpayer's obligation to comply with the requirements of section 55 when computing AMTI. For example, although a taxpayer may elect to use the depreciation methods used for regular tax purposes to compute the completion factor of its long-term contracts for AMTI purposes, the taxpayer must use the depreciation methods permitted by section 56 to compute AMTI.

(g) *Method of accounting.* A taxpayer that uses the PCM, EPCM, CCM, or PCCM, or elects the 10-percent method or special AMTI method (or changes to another method of accounting with the Commissioner's consent) must apply

the method(s) consistently for all similarly classified long-term contracts, until the taxpayer obtains the Commissioner's consent under section 446(e) to change to another method of accounting. A taxpayer-initiated change in method of accounting will be permitted only on a cut-off basis (*i.e.*, for contracts entered into on or after the year of change), and thus, a section 481(a) adjustment will not be permitted or required.

(h) *Examples.* The following examples illustrate the rules of this section:

*Example 1. PCM—estimating total contract price.* C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. On January 1, 2001, C enters into a contract to design and manufacture a satellite (a unique item). The contract provides that C will be paid \$10,000,000 for delivering the completed satellite by December 1, 2002. The contract also provides that C will receive a \$3,000,000 bonus for delivering the satellite by July 1, 2002, and an additional \$4,000,000 bonus if the satellite successfully performs its mission for five years. C is unable to reasonably predict if the satellite will successfully perform its mission for five years. If on December 31, 2001, C should reasonably expect to deliver the satellite by July 1, 2002, the estimated total contract price is \$13,000,000 (\$10,000,000 unit price + \$3,000,000 production-related bonus). Otherwise, the estimated total contract price is \$10,000,000. In either event, the \$4,000,000 bonus is not includible in the estimated total contract price as of December 31, 2001, because C is unable to reasonably predict that the satellite will successfully perform its mission for five years.

*Example 2. PCM—computing income.* (i) C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. During 2001, C agrees to manufacture for the customer, B, a unique item for a total contract price of \$1,000,000. Under C's contract, B is entitled to retain 10 percent of the total contract price until it accepts the item. By the end of 2001, C has incurred \$200,000 of allocable contract costs and estimates that the total allocable contract costs will be \$800,000. By the end of 2002, C has incurred \$600,000 of allocable contract costs and estimates that the total allocable contract costs will be \$900,000. In 2003, after completing the contract, C determines that the actual cost to manufacture the item was \$750,000.

(ii) For each of the taxable years, C's income from the contract is computed as follows:

|  | Taxable Year |           |           |
|--|--------------|-----------|-----------|
|  | 2001         | 2002      | 2003      |
| (A) Cumulative incurred costs .....              | \$200,000    | \$600,000 | \$750,000 |
| (B) Estimated total costs .....                  | 800,000      | 900,000   | 750,000   |
| (C) Completion factor: (A) ÷ (B) .....           | 25.00%       | 66.67%    | 100.00%   |
| (D) Total contract price .....                   | 1,000,000    | 1,000,000 | 1,000,000 |
| (E) Cumulative gross receipts: (C) × (D) .....   | 250,000      | 666,667   | 1,000,000 |
| (F) Cumulative gross receipts (prior year) ..... | (0)          | (250,000) | (666,667) |
| (G) Current-year gross receipts .....            | 250,000      | 416,667   | 333,333   |
| (H) Cumulative incurred costs .....              | 200,000      | 600,000   | 750,000   |
| (I) Cumulative incurred costs (prior year) ..... | (0)          | (200,000) | (600,000) |
| (J) Current-year costs .....                     | 200,000      | 400,000   | 150,000   |
| (K) Gross income: (G) – (J) .....                | \$50,000     | \$16,667  | \$183,333 |

*Example 3. PCM—computing income with cost sharing.* (i) C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. During 2001, C enters into a contract to manufacture a unique item. The contract specifies a target price of \$1,000,000, a target cost of \$600,000, and a target profit of \$400,000. C and B will share the savings of any cost underrun (actual total incurred cost is less than target cost) and the additional cost of any cost overrun (actual total incurred cost is greater than target cost) as follows: 30 percent to C and 70 percent to B. By the end of 2001, C has incurred \$200,000 of allocable contract costs

and estimates that the total allocable contract costs will be \$600,000. By the end of 2002, C has incurred \$300,000 of allocable contract costs and estimates that the total allocable contract costs will be \$400,000. In 2003, after completing the contract, C determines that the actual cost to manufacture the item was \$700,000.

(ii) For each of the taxable years, C's income from the contract is computed as follows (note that the sharing of any cost underrun or cost overrun is reflected as an adjustment to C's target price under paragraph (b)(4)(i) of this section):

|   | Taxable Year |             |             |
|---|--------------|-------------|-------------|
|   | 2001         | 2002        | 2003        |
| (A) Cumulative incurred costs .....               | \$200,000    | \$300,000   | \$700,000   |
| (B) Estimated total costs .....                   | 600,000      | 400,000     | 700,000     |
| (C) Completion factor: (A) ÷ (B) .....            | 33.33%       | 75.00%      | 100.00%     |
| (D) Target price .....                            | \$1,000,000  | \$1,000,000 | \$1,000,000 |
| (E) Estimated total costs .....                   | 600,000      | 400,000     | 700,000     |
| (F) Target costs .....                            | 600,000      | 600,000     | 600,000     |
| (G) Cost (underrun)/overrun: (E) – (F) .....      | 0            | (200,000)   | 100,000     |
| (H) Adjustment rate .....                         | 70%          | 70%         | 70%         |
| (I) Target price adjustment .....                 | 0            | (140,000)   | 70,000      |
| (J) Total contract price: (D) + (I) .....         | \$1,000,000  | \$860,000   | \$1,070,000 |
| (K) Cumulative gross receipts: (C) × (J) .....    | \$333,333    | \$645,000   | \$1,070,000 |
| (L) Cumulative gross receipts (prior year): ..... | (0)          | (333,333)   | (645,000)   |
| (M) Current-year gross receipts .....             | 333,333      | 311,667     | 425,000     |
| (N) Cumulative incurred costs .....               | 200,000      | 300,000     | 700,000     |
| (O) Cumulative incurred costs (prior year): ..... | (0)          | (200,000)   | (300,000)   |
| (P) Current-year costs .....                      | 200,000      | 100,000     | 400,000     |
| (Q) Gross income: (M) – (P) .....                 | \$133,333    | \$211,667   | \$25,000    |

§ 1.460-4

26 CFR Ch. I (4-1-17 Edition)

*Example 4. PCM—10 percent method.* (i) C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. In November 2001, C agrees to manufacture a unique item for \$1,000,000. C reasonably estimates that the total allocable contract costs will be \$600,000. By December 31, 2001, C has received \$50,000 in progress payments and incurred \$40,000 of costs. C elects to use the 10 percent method

effective for 2001 and all subsequent taxable years. During 2002, C receives \$500,000 in progress payments and incurs \$260,000 of costs. In 2003, C incurs an additional \$300,000 of costs, C finishes manufacturing the item, and receives the final \$450,000 payment.

(ii) For each of the taxable years, C's income from the contract is computed as follows:

|   | Taxable Year |           |           |
|---|--------------|-----------|-----------|
|   | 2001         | 2002      | 2003      |
| (A) Cumulative incurred costs .....               | \$40,000     | \$300,000 | \$600,000 |
| (B) Estimated total costs .....                   | 600,000      | 600,000   | 600,000   |
| (C) Completion factor (A) ÷ (B) .....             | 6.67%        | 50.00%    | 100.00%   |
| (D) Total contract price .....                    | 1,000,000    | 1,000,000 | 1,000,000 |
| (E) Cumulative gross receipts: (C) × (D)* .....   | 0            | 500,000   | 1,000,000 |
| (F) Cumulative gross receipts (prior year): ..... | (0)          | (0)       | (500,000) |
| (G) Current-year gross receipts .....             | 0            | 500,000   | 500,000   |
| (H) Cumulative incurred costs .....               | 0            | 300,000   | 600,000   |
| (I) Cumulative incurred costs (prior year): ..... | (0)          | (0)       | (300,000) |
| (J) Current-year costs .....                      | 0            | 300,000   | 300,000   |
| (K) Gross income: (G) – (J) .....                 | \$0          | \$200,000 | \$200,000 |

\*Unless (C) <10 percent.

*Example 5. PCM—contract terminated.* C, whose taxable year ends December 31, determines the income from long-term contracts using the PCM. During 2001, C buys land and begins constructing a building that will contain 50 condominium units on that land. C enters into a contract to sell one unit in this condominium to B for \$240,000. B gives C a \$5,000 deposit toward the purchase price. By the end of 2001, C has incurred \$50,000 of allocable contract costs on B's unit and estimates that the total allocable contract costs on B's unit will be \$150,000. Thus, for 2001, C reports gross receipts of \$80,000 (\$50,000 ÷ \$150,000 × \$240,000), current-year costs of \$50,000, and gross income of \$30,000 (\$80,000 – \$50,000). In 2002, after C has incurred an additional \$25,000 of allocable contract costs on B's unit, B files for bankruptcy protection and defaults on the contract with C, who is permitted to keep B's \$5,000 deposit as liquidated damages. In 2002, C reverses the transaction with B under paragraph (b)(7) of this section and reports a loss of \$30,000 (\$50,000 – \$80,000). In addition, C obtains an adjusted basis in the unit sold to B of \$70,000 (\$50,000 (current-year costs deducted in 2001) – \$5,000 (B's forfeited deposit) + \$25,000 (current-year costs incurred in 2002)). C may not apply the look-back method to this contract in 2002.

*Example 6. CCM—contracts with disputes from customer claims.* In 2001, C, whose taxable

year ends December 31, uses the CCM to account for exempt construction contracts. C enters into a contract to construct a bridge for B. The terms of the contract provide for a \$1,000,000 gross contract price. C finishes the bridge in 2002 at a cost of \$950,000. When B examines the bridge, B insists that C either repaint several girders or reduce the contract price. The amount reasonably in dispute is \$10,000. In 2003, C and B resolve their dispute, C repaints the girders at a cost of \$6,000, and C and B agree that the contract price is not to be reduced. Because C is assured a profit of \$40,000 (\$1,000,000 – \$10,000 – \$950,000) in 2002 even if the dispute is resolved in B's favor, C must take this \$40,000 into account in 2002. In 2003, C will earn an additional \$4,000 profit (\$1,000,000 – \$956,000 – \$40,000) from the contract with B. Thus, C must take into account an additional \$10,000 of gross contract price and \$6,000 of additional contract costs in 2003.

*Example 7. CCM—contracts with disputes from taxpayer claims.* In 2003, C, whose taxable year ends December 31, uses the CCM to account for exempt construction contracts. C enters into a contract to construct a building for B. The terms of the contract provide for a \$1,000,000 gross contract price. C finishes the building in 2004 at a cost of \$1,005,000. B examines the building in 2004 and agrees that it meets the contract's specifications; however, at the end of 2004, C and

B are unable to agree on the merits of C's claim for an additional \$10,000 for items that C alleges are changes in contract specifications and B alleges are within the scope of the contract's original specifications. In 2005, B agrees to pay C an additional \$2,000 to satisfy C's claims under the contract. Because the amount in dispute affects so much of the gross contract price that C cannot determine in 2004 whether a profit or loss will ultimately be realized, C may not taken any of the gross contract price or allocable contract costs into account in 2004. C must take into account \$1,002,000 of gross contract price and \$1,005,000 of allocable contract costs in 2005.

*Example 8. CCM—contracts with disputes from taxpayer and customer claims.* C, whose taxable year ends December 31, uses the CCM to account for exempt construction contracts. C constructs a factory for B pursuant to a long-term contract. Under the terms of the contract, B agrees to pay C a total of \$1,000,000 for construction of the factory. C finishes construction of the factory in 2002 at a cost of \$1,020,000. When B takes possession of the factory and begins operations in December 2002, B is dissatisfied with the location and workmanship of certain heating ducts. As of the end of 2002, C contends that the heating ducts are constructed in accordance with contract specifications. The amount of the gross contract price reasonably in dispute with respect to the heating ducts is \$6,000. As of this time, C is claiming \$14,000 in addition to the original contract price for certain changes in contract specifications which C alleges have increased his costs. B denies that these changes have increased C's costs. In 2003, the disputes between C and B are resolved by performance of additional work by C at a cost of \$1,000 and by an agreement that the contract price would be revised downward to \$996,000. Under these circumstances, C must include in his gross income for 2002, \$994,000 (the gross contract price less the amount reasonably in dispute because of B's claim, or \$1,000,000 - \$6,000). In 2002, C must also take into account \$1,000,000 of allocable contract costs (costs incurred less the amounts in dispute attributable to both B's and C's claims, or \$1,020,000 - \$6,000 - \$14,000). In 2003, C must take into account an additional \$2,000 of gross contract price (\$996,000 - \$994,000) and \$21,000 of allocable contract costs (\$1,021,000 - \$1,000,000).

(i) [Reserved]

(j) *Consolidated groups and controlled groups—(1) Intercompany transactions—*  
 (i) *In general.* Section 1.1502-13 does not apply to the income, gain, deduction, or loss from an intercompany transaction between members of a consolidated group, and section 267(f) does not apply to these items from an intercom-

pany sale between members of a controlled group, to the extent—

(A) The transaction or sale directly or indirectly benefits, or is intended to benefit, another member's long-term contract with a nonmember;

(B) The selling member is required under section 460 to determine any part of its gross income from the transaction or sale under the percentage-of-completion method (PCM); and

(C) The member with the long-term contract is required under section 460 to determine any part of its gross income from the long-term contract under the PCM.

(ii) *Definitions and nomenclature.* The definitions and nomenclature under § 1.1502-13 and § 1.267(f)-1 apply for purposes of this paragraph (j).

(2) *Example.* The following example illustrates the principles of paragraph (j)(1) of this section.

*Example.* Corporations P, S, and B file consolidated returns on a calendar-year basis. In 1996, B enters into a long-term contract with X, a nonmember, to manufacture 5 airplanes for \$500 million, with delivery scheduled for 1999. Section 460 requires B to determine the gross income from its contract with X under the PCM. S enters into a contract with B to manufacture for \$50 million the engines that B will install on X's airplanes. Section 460 requires S to determine the gross income from its contract with B under the PCM. S estimates that it will incur \$40 million of total contract costs during 1997 and 1998 to manufacture the engines. S incurs \$10 million of contract costs in 1997 and \$30 million in 1998. Under paragraph (j) of this section, S determines its gross income from the long-term contract under the PCM rather than taking its income or loss into account under section 267(f) or § 1.1502-13. Thus, S includes \$12.5 million of gross receipts and \$10 million of contract costs in gross income in 1997 and includes \$37.5 million of gross receipts and \$30 million of contract costs in gross income in 1998.

(3) *Effective dates—(i) In general.* This paragraph (j) applies with respect to transactions and sales occurring pursuant to contracts entered into in years beginning on or after July 12, 1995.

(ii) *Prior law.* For transactions and sales occurring pursuant to contracts entered into in years beginning before July 12, 1995, see the applicable regulations issued under sections 267(f) and 1502, including §§ 1.267(f)-1T, 1.267(f)-2T, and 1.1502-13(n) (as contained in the 26

CFR part 1 edition revised as of April 1, 1995).

(4) *Consent to change method of accounting.* For transactions and sales to which this paragraph (j) applies, the Commissioner's consent under section 446(e) is hereby granted to the extent any changes in method of accounting are necessary solely to comply with this section, provided the changes are made in the first taxable year of the taxpayer to which the rules of this paragraph (j) apply. Changes in method of accounting for these transactions are to be effected on a cut-off basis.

(k) *Mid-contract change in taxpayer—*  
 (1) *In general.* The rules in this paragraph (k) apply if prior to the completion of a long-term contract accounted for using a long-term contract method by a taxpayer (old taxpayer), there is a transaction that makes another taxpayer (new taxpayer) responsible for accounting for income from the same contract. For purposes of this paragraph (k) and § 1.460-6(g), an old taxpayer also includes any old taxpayer(s) (e.g., predecessors) of the old taxpayer. In addition, a change in status from taxable to tax exempt or from domestic to foreign, or vice versa, will be considered a change in taxpayer. Finally, a contract will be treated as the same contract if the terms of the contract are not substantially changed in connection with the transaction, whether or not the customer agrees to release the old taxpayer from any or all of its obligations under the contract. The rules governing constructive completion transactions are provided in paragraph (k)(2) of this section, while the rules governing step-in-the-shoes transactions are provided in paragraph (k)(3) of this section. Special rules relating to the treatment of certain partnership transactions are provided in paragraphs (k)(2)(iv) and (k)(3)(v) of this section. For application of the look-back method to mid-contract changes in taxpayers for contracts accounted for using the PCM, see § 1.460-6(g).

(2) *Constructive completion transactions—*(i) *Scope.* The constructive completion rules in this paragraph (k)(2) apply to transactions (constructive completion transactions) that result in a change in the taxpayer re-

sponsible for reporting income from a contract and that are not described in paragraph (k)(3)(i) of this section. Constructive completion transactions generally include, for example, taxable sales under section 1001 and deemed asset sales under section 338.

(ii) *Old taxpayer.* The old taxpayer is treated as completing the contract on the date of the transaction. The total contract price (or, gross contract price in the case of a long-term contract accounted for under the CCM) for the old taxpayer is the sum of any amounts realized from the transaction that are allocable to the contract and any amounts the old taxpayer has received or reasonably expects to receive under the contract. Total contract price (or gross contract price) is reduced by any amount paid by the old taxpayer to the new taxpayer, and by any transaction costs, that are allocable to the contract. Thus, the old taxpayer's allocable contract costs determined under paragraph (b)(5) of this section do not include any consideration paid, or costs incurred, as a result of the transaction that are allocable to the contract. In the case of a transaction subject to section 338 or 1060, the amount realized from the transaction allocable to the contract is determined by using the residual method under §§ 1.338-6 and 1.338-7.

(iii) *New taxpayer.* The new taxpayer is treated as entering into a new contract on the date of the transaction. The new taxpayer must evaluate whether the new contract should be classified as a long-term contract within the meaning of § 1.460-1(b) and account for the contract under a permissible method of accounting. For a new taxpayer who accounts for a contract using the PCM, the total contract price is any amount the new taxpayer reasonably expects to receive under the contract consistent with paragraph (b)(4) of this section. Total contract price is reduced by the amount of any consideration paid by the new taxpayer as a result of the transaction, and by any transaction costs, that are allocable to the contract and is increased by the amount of any consideration received by the new taxpayer as a result of the transaction that is allocable to

the contract. Similarly, the gross contract price for a contract accounted for using the CCM is all amounts the new taxpayer is entitled by law or contract to receive consistent with paragraph (d)(3) of this section, adjusted for any consideration paid (or received) by the new taxpayer as a result of the transaction, and for any transaction costs, that are allocable to the contract. Thus, the new taxpayer's allocable contract costs determined under paragraph (b)(5) of this section do not include any consideration paid, or costs incurred, as a result of the transaction that are allocable to the contract. In the case of a transaction subject to sections 338 or 1060, the amount of consideration paid that is allocable to the contract is determined by using the residual method under §§ 1.338-6 and 1.338-7.

(iv) *Special rules relating to distributions of certain contracts by a partnership*—(A) *In general.* The constructive completion rules of paragraph (k)(2) of this section apply both to the distribution of a contract accounted for under a long-term contract method of accounting by a partnership to a partner and to the distribution of an interest in a partnership (lower-tier partnership) holding (either directly or through other partnerships) one or more contracts accounted for under a long-term contract method of accounting by another partnership (upper-tier partnership). Notwithstanding the previous sentence, the constructive completion rules of paragraph (k)(2) of this section do not apply to a transfer by a partnership (transferor partnership) of all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership, under § 1.708-1(b)(4) (relating to terminations under section 708(b)(1)(B)) or § 1.708-1(c)(3)(i) (relating to certain partnership mergers). If a partnership that holds a contract accounted for under a long-term contract method of accounting terminates under section 708(b)(1)(A) because the number of its owners is reduced to one, the entire contract will be treated as being distributed from the partnership for pur-

poses of the constructive completion rules, and the partnership must apply paragraph (k)(2) of this section immediately prior to the transaction or transactions resulting in the termination of the partnership.

(B) *Old taxpayer.* The partnership that distributes the contract is treated as the old taxpayer for purposes of paragraph (k)(2)(ii) of this section. For purposes of determining the total contract price (or gross contract price) under paragraph (k)(2)(ii) of this section, the fair market value of the contract is treated as the amount realized from the transaction. For purposes of determining each partner's distributive share of partnership items, any income or loss resulting from the constructive completion must be allocated among the partners of the old taxpayer as though the partnership closed its books on the date of the distribution.

(C) *New taxpayer.* The partner receiving the distributed contract is treated as the new taxpayer for purposes of paragraph (k)(2)(iii) of this section. For purposes of determining the total contract price (or gross contract price) under paragraph (k)(2)(iii) of this section, the new taxpayer's basis in the contract (including the uncompleted property, if applicable) after the distribution (as determined under section 732) is treated as consideration paid by the new taxpayer that is allocable to the contract. Thus, the total contract price (or gross contract price) of the new contract is reduced by the partner's basis in the contract (including the uncompleted property, if applicable) immediately after the distribution.

(D) *Basis rules.* For purposes of determining the new taxpayer's basis in the contract (including the uncompleted property, if applicable) under section 732, and the amount of any basis adjustment under section 734(b), the partnership's basis in the contract (including the uncompleted property, if applicable) immediately prior to the distribution is equal to—

(1) The partnership's allocable contract costs (including transaction costs);

(2) Increased (or decreased) by the amount of cumulative taxable income (or loss) recognized by the partnership

on the contract through the date of the distribution (including amounts recognized as a result of the constructive completion); and

(3) Decreased by the amounts that the partnership has received or reasonably expects to receive under the contract.

(E) *Section 751—(1) In general.* Contracts accounted for under a long-term contract method of accounting are unrealized receivables within the meaning of section 751(c). For purposes of section 751, the amount of ordinary income or loss attributable to a contract accounted for under a long-term contract method of accounting is the amount of income or loss that the partnership would take into account under the constructive completion rules of paragraph (k)(2) of this section if the contract were disposed of for its fair market value in a constructive completion transaction, adjusted to account for any income or loss from the contract that is allocated under section 706 to that portion of the taxable year of the partnership ending on the date of the distribution, sale, or exchange.

(2) *Ordering rules.* Because the distribution of a contract accounted for under a long-term contract method of accounting is the distribution of an unrealized receivable, section 751(b) may apply to the distribution. A partnership that distributes a contract accounted for under a long-term contract method of accounting must apply paragraph (k)(2)(ii) of this section before applying the rules of section 751(b) to the distribution.

(3) *Step-in-the-shoes transactions—(i) Scope.* Except as otherwise provided in paragraph (k)(3)(v)(D) of this section, the step-in-the-shoes rules in this paragraph (k)(3) apply to the following transactions that result in a change in the taxpayer responsible for reporting income from a contract accounted for using a long-term contract method of accounting (step-in-the-shoes transactions)—

(A) Transfers to which section 361 applies if the transfer is in connection with a reorganization described in section 368(a)(1)(A), (C) or (F);

(B) Transfers to which section 361 applies if the transfer is in connection with a reorganization described in sec-

tion 368(a)(1)(D) or (G), provided the requirements of section 354(b)(1)(A) and (B) are met;

(C) Distributions to which section 332 applies, provided the contract is transferred to an 80-percent distributee;

(D) Transfers described in section 351;

(E) Transfers to which section 361 applies if the transfer is in connection with a reorganization described in section 368(a)(1)(D) with respect to which the requirements of section 355 (or so much of section 356 as relates to section 355) are met;

(F) Transfers (e.g., sales) of S corporation stock;

(G) Conversion to or from an S corporation;

(H) Members joining or leaving a consolidated group;

(I) Contributions of contracts accounted for under a long-term contract method of accounting to which section 721(a) applies;

(J) Contributions of property (other than contracts accounted for under a long-term contract method of accounting) to a partnership that holds a contract accounted for under a long-term contract method of accounting;

(K) Transfers of partnership interests (other than transfers which cause the partnership to terminate under section 708(b)(1)(A));

(L) Distributions to which section 731 applies (other than the distribution of the contract); and

(M) Any other transaction designated in the Internal Revenue Bulletin by the Internal Revenue Service. See § 601.601(d)(2)(ii) of this chapter.

(ii) *Old taxpayer—(A) In general.* The new taxpayer will “step into the shoes” of the old taxpayer with respect to the contract. Thus, the old taxpayer’s obligation to account for the contract terminates on the date of the transaction and is assumed by the new taxpayer, as set forth in paragraph (k)(3)(iii) of this section. As a result, an old taxpayer using the PCM is required to recognize income from the contract based on the cumulative allocable contract costs incurred as of the date of the transaction. Similarly, an old taxpayer using the CCM is not required to recognize any revenue and may not deduct allocable contract costs incurred with respect to the contract.

(B) *Gain realized on the transaction.* The amount of gain the old taxpayer realizes on the transfer of a contract in a step-in-the-shoes transaction must be determined after application of paragraph (k)(3)(ii)(A) of this section using the rules of paragraph (k)(2) of this section that apply to constructive completion transactions. (The amount of gain realized on a transfer of a contract is relevant, for example, in determining the amount of gain recognized with respect to the contract in a section 351 transaction in which the old taxpayer receives from the new taxpayer money or property other than stock of the transferee.)

(iii) *New taxpayer—(A) Method of accounting.* Beginning on the date of the transaction, the new taxpayer must account for the long-term contract by using the same method of accounting used by the old taxpayer prior to the transaction. The same method of accounting must be used for such contract regardless of whether the old taxpayer's method is the new taxpayer's principal method of accounting under § 1.381(c)(4)-1(b)(3) or whether the new taxpayer is otherwise eligible to use the old taxpayer's method. Thus, if the old taxpayer uses the PCM to account for the contract, the new taxpayer steps into the shoes of the old taxpayer with respect to its completion factor and percentage of completion methods (such as the 10-percent method), even if the new taxpayer has not elected such methods for similarly classified contracts. Similarly, if the old taxpayer uses the CCM, the new taxpayer steps into the shoes of the old taxpayer with respect to the CCM, even if the new taxpayer is not otherwise eligible to use the CCM. However, the new taxpayer is not necessarily bound by the old taxpayer's method for similarly classified contracts entered into by the new taxpayer subsequent to the transaction and must apply general tax principles, including section 381, to determine the appropriate method to account for these subsequent contracts. To the extent that general tax principles allow the taxpayer to account for similarly classified contracts using a method other than the old taxpayer's method, the taxpayer is not required to obtain the consent of the Commis-

sioner to begin using such other method.

(B) *Contract price.* In the case of a long-term contract that has been accounted for under PCM, the total contract price for the new taxpayer is the sum of any amounts the old taxpayer or the new taxpayer has received or reasonably expects to receive under the contract consistent with paragraph (b)(4) of this section. Similarly, the gross contract price in the case of a long-term contract accounted for under the CCM includes all amounts the old taxpayer or the new taxpayer is entitled by law or by contract to receive consistent with paragraph (d)(3) of this section.

(C) *Contract costs.* Total allocable contract costs for the new taxpayer are the allocable contract costs as defined under paragraph (b)(5) of this section incurred by either the old taxpayer prior to, or the new taxpayer after, the transaction. Thus, any payments between the old taxpayer and the new taxpayer with respect to the contract in connection with the transaction are not treated as allocable contract costs.

(iv) *Special rules related to certain corporate and partnership transactions—(A) Old taxpayer—basis adjustment—(1) In general.* Except as provided in paragraph (k)(3)(iv)(A)(2) of this section, in the case of a transaction described in paragraph (k)(3)(i)(D), (E), or (I) of this section, the old taxpayer must adjust its basis in the stock or partnership interest of the new taxpayer by—

(i) Increasing such basis by the amount of gross receipts the old taxpayer has recognized under the contract; and

(ii) Reducing such basis by the amount of gross receipts the old taxpayer has received or reasonably expects to receive under the contract (except to the extent such gross receipts give rise to a liability other than a liability described in section 357(c)(3)).

(2) *Basis adjustment in excess of stock or partnership interest basis.* If the old and new taxpayer do not join in the filing of a consolidated Federal income tax return, the old taxpayer may not adjust its basis in the stock or partnership interest of the new taxpayer under paragraph (k)(3)(iv)(A)(1) of this section below zero and the old taxpayer

must recognize ordinary income to the extent the basis in the stock or partnership interest of the new taxpayer otherwise would be adjusted below zero. If the old and new taxpayer join in the filing of a consolidated Federal income tax return, the old taxpayer must create an (or increase an existing) excess loss account to the extent the basis in the stock of the new taxpayer otherwise would be adjusted below zero under paragraph (k)(3)(iv)(A)(I) of this section. See § 1.1502-19 and 1.1502-32(a)(3)(ii).

(3) *Subsequent dispositions of certain contracts.* If the old taxpayer disposes of a contract in a transaction described in paragraph (k)(3)(i)(D), (E), or (I) of this section that the old taxpayer acquired in a transaction described in paragraph (k)(3)(i)(D), (E), or (I) of this section, the basis adjustment rule of this paragraph (k)(3)(iv)(A) is applied by treating the old taxpayer as having recognized the amount of gross receipts recognized by the previous old taxpayer under the contract and any amount recognized by the previous old taxpayer with respect to the contract in connection with the transaction in which the old taxpayer acquired the contract. In addition, the old taxpayer is treated as having received or as reasonably expecting to receive under the contract any amount the previous old taxpayer received or reasonably expects to receive under the contract. Similar principles will apply in the case of multiple successive transfers described in paragraph (k)(3)(i)(D), (E), or (I) of this section involving the contract.

(B) *New taxpayer—(1) Contract price adjustment.* Generally, payments between the old taxpayer and the new taxpayer with respect to the contract in connection with the transaction do not affect the contract price. Notwithstanding the preceding sentence and paragraph (k)(3)(iii)(B) of this section, however, in the case of transactions described in paragraph (k)(3)(i)(B), (D), (E), or (I) of this section, the total contract price (or gross contract price) must be reduced to the extent of any amount recognized by the old taxpayer with respect to the contract in connection with the transaction (*e.g.*, any amount recognized under section 351(b)

or section 357 that is attributable to the contract and any income recognized by the old taxpayer pursuant to the basis adjustment rule of paragraph (k)(3)(iv)(A) of this section).

(2) *Basis in contract.* The new taxpayer's basis in a contract (including the uncompleted property, if applicable) acquired in a transaction described in paragraphs (k)(3)(i)(A) through (E) or paragraph (k)(3)(i)(I) of this section will be computed under section 362, section 334, or section 723, as applicable. Upon a new taxpayer's completion (actual or constructive) of a CCM or a PCM contract acquired in a transaction described in paragraphs (k)(3)(i)(A) through (E) or paragraph (k)(3)(i)(I) of this section, the new taxpayer's basis in the contract (including the uncompleted property, if applicable) is reduced to zero. The new taxpayer is not entitled to a deduction or loss in connection with any basis reduction pursuant to this paragraph (k)(3)(iv)(B)(2).

(C) *Definition of old taxpayer and new taxpayer for certain partnership transactions.* For purposes of paragraphs (k)(3)(ii), (iii) and (iv) of this section, in the case of a transaction described in paragraph (k)(3)(i)(I) of this section, the partner contributing the contract to the partnership is treated as the old taxpayer, and the partnership receiving the contract from the partner is treated as the new taxpayer.

(D) *Exceptions to step-in-the-shoes rules for S corporations.* Upon a transfer described in paragraph (k)(3)(i)(F) of this section or a conversion described in paragraph (k)(3)(i)(G) of this section, paragraphs (k)(3)(ii) and (iii) of this section apply to a contract accounted for under a long-term contract method of accounting only if the S corporation's books are closed under section 1362(e)(3), section 1362(e)(6)(C), section 1362(e)(6)(D), section 1377(a)(2), or § 1.1502-76 on the date of the transfer or conversion. In these cases, the corporation is treated as both the old taxpayer and the new taxpayer for purposes of paragraphs (k)(3)(ii) and (iii) of this section. In all other cases involving these transfers, the corporation shall compute its income or loss from each contract accounted for under a long-term contract method of accounting

for the period that includes the date of the transaction as though no change in taxpayer had occurred with respect to the contract, and must allocate the income or loss from the contract for that period in accordance with the rules generally applicable to transfers of S corporation stock and conversions to or from S corporation status. This paragraph (k)(3)(iv)(D) is applicable for transactions on or after July 16, 2004. In addition, this paragraph (k)(3)(iv)(D) may be relied upon for transactions on or after May 15, 2002.

(v) *Special rules relating to certain partnership transactions*—(A) *Section 704(c)—(1) Contributions of contracts.* The principles of section 704(c)(1)(A), section 737, and the regulations thereunder apply to income or loss with respect to a contract accounted for under a long-term contract method of accounting that is contributed to a partnership. The amount of built-in income or built-in loss attributable to a contributed contract that is subject to section 704(c)(1)(A) is determined as follows. First, the contributing partner must take into account any income or loss required under paragraph (k)(3)(ii)(A) of this section for the period ending on the date of the contribution. Second, the partnership must determine the amount of income or loss that the contributing partner would take into account if the contract were disposed of for its fair market value in a constructive completion transaction. This calculation is treated as occurring immediately after the partner has applied paragraph (k)(3)(ii)(A) of this section, but before the contribution to the partnership. Finally, this amount is reduced by the amount of income, if any, that the contributing partner is required to recognize as a result of the contribution.

(2) *Revaluations of partnership property.* The principles of section 704(c) and § 1.704-3 apply to allocations of income or loss with respect to a long-term contract that is revalued by a partnership under § 1.704-1(b)(2)(iv)(f). The amount of built-in income or built-in loss attributable to such a contract is equal to the amount of income or loss that would be taken into account if, at the time of the revaluation, the contract were disposed of for its

fair market value in a constructive completion transaction.

(3) *Allocation methods.* In the case of a contract accounted for under the CCM, any built-in income or loss under section 704(c) is taken into account in the year the contract is completed. In the case of a contract accounted for under a long-term contract method of accounting other than the CCM, any built-in income or loss under section 704(c) must be taken into account in a manner that reasonably accounts for the section 704(c) income or loss over the remaining term of the contract.

(B) *Basis adjustments under sections 743(b) and 734(b).* For purposes of §§ 1.743-1(d), 1.755-1(b), and 1.755-1(c), the amount of ordinary income or loss attributable to a contract accounted for under a long-term contract method of accounting is the amount of income or loss that the partnership would take into account under the constructive completion rules of paragraph (k)(2) of this section if, at the time of the sale of a partnership interest or the distribution to a partner, the partnership disposed of the contract for its fair market value in a constructive completion transaction. If all or part of the transferee's basis adjustment under section 743(b) or the partnership's basis adjustment under section 734(b) is allocated to a contract accounted for under a long-term contract method of accounting, the basis adjustment shall reduce or increase, as the case may be, the affected party's income or loss from the contract. In the case of a contract accounted for under the CCM, the basis adjustment is taken into account in the year in which the contract is completed. In the case of a contract accounted for under a long-term contract method of accounting other than the CCM, the portion of that basis adjustment that is recovered in each taxable year of the partnership must be determined by the partnership in a manner that reasonably accounts for the adjustment over the remaining term of the contract.

(C) *Cross reference.* See paragraph (k)(2)(iv)(E) of this section for rules relating to the application of section 751 to the transfer of an interest in a partnership holding a contract accounted

for under a long-term contract method of accounting.

(D) *Exceptions to step-in-the-shoes rules.* Upon a contribution described in paragraph (k)(3)(i)(J) of this section, a transfer described in paragraph (k)(3)(i)(K) of this section, or a distribution described in paragraph (k)(3)(i)(L) of this section, paragraphs (k)(3)(ii) and (iii) of this section apply to a contract accounted for under a long-term contract method of accounting only if the partnership's books are properly closed with respect to that contract under section 706. In these cases, the partnership is treated as both the old taxpayer and the new taxpayer for purposes of paragraphs (k)(3)(ii) and (iii) of this section. In all other cases involving these transactions, the partnership shall compute its income or loss from each contract accounted for under a long-term contract method of accounting for the period that includes the date of the transaction as though no change in taxpayer had occurred with respect to the contract, and must allocate the income or loss from the contract for that period under a reasonable method complying with section 706.

(4) *Anti-abuse rule.* Notwithstanding this paragraph (k), in the case of a transaction entered into with a principal purpose of shifting the tax consequences associated with a long-term contract in a manner that substantially reduces the aggregate U.S. Federal income tax liability of the parties with respect to that contract, the Commissioner may allocate to the old (or new) taxpayer the income from that contract properly allocable to the old (or new) taxpayer. For example, the Commissioner may reallocate income from a long-term contract in a transaction in which a contract accounted for using the CCM, or using the PCM where the old taxpayer has received advance payments in excess of its contribution to the contract, is transferred to a tax indifferent party (e.g., a foreign person not subject to U.S. Federal income tax).

(5) *Examples.* The following examples illustrate the rules of this paragraph (k). For purposes of these examples, it is assumed that the contract is a long-term construction contract accounted

for using the PCM prior to the transaction unless stated otherwise and the contract is not transferred with a principal purpose of shifting the tax consequences associated with a long-term contract in a manner that substantially reduces the aggregate U.S. Federal income tax liability of the parties with respect to that contract. The examples are as follows:

*Example 1. Constructive completion—PCM.* (i) *Facts.* In Year 1, X enters into a contract. The total contract price is \$1,000,000 and the estimated total allocable contract costs are \$800,000. In Year 1, X incurs costs of \$200,000. In Year 2, X incurs additional costs of \$400,000 before selling the contract as part of a taxable sale of its business in Year 2 to Y, an unrelated party. At the time of sale, X has received \$650,000 in progress payments under the contract. The consideration allocable to the contract under section 1060 is \$150,000. Pursuant to the sale, the new taxpayer Y immediately assumes X's contract obligations and rights. Y is required to account for the contract using the PCM. In Year 2, Y incurs additional allocable contract costs of \$50,000. Y correctly estimates at the end of Year 2 that it will have to incur an additional \$75,000 of allocable contract costs in Year 3 to complete the contract.

(ii) *Old taxpayer.* For Year 1, X reports receipts of \$250,000 (the completion factor multiplied by total contract price (\$200,000/\$800,000 × \$1,000,000)) and costs of \$200,000, for a profit of \$50,000. X is treated as completing the contract in Year 2 because it sold the contract. For purposes of applying the PCM in Year 2, the total contract price is \$800,000 (the sum of the amounts received under the contract and the amount realized in the sale (\$650,000 + \$150,000)) and the total allocable contract costs are \$600,000 (the sum of the costs incurred in Year 1 and Year 2 (\$200,000 + \$400,000)). Thus, in Year 2, X reports receipts of \$550,000 (total contract price minus receipts already reported (\$800,000 - \$250,000)) and costs incurred in year 2 of \$400,000, for a profit of \$150,000.

(iii) *New taxpayer.* Y is treated as entering into a new contract in Year 2. The total contract price is \$200,000 (the amount remaining to be paid under the terms of the contract less the consideration paid allocable to the contract (\$1,000,000 - \$650,000 - \$150,000)). The estimated total allocable contract costs at the end of Year 2 are \$125,000 (the allocable contract costs that Y reasonably expects to incur to complete the contract (\$50,000 + \$75,000)). In Year 2, Y reports receipts of \$80,000 (the completion factor multiplied by the total contract price [(\$50,000/\$125,000) × \$200,000]) and costs of \$50,000 (the costs incurred after the purchase), for a profit of \$30,000. For Year 3, Y reports receipts of

\$120,000 (total contract price minus receipts already reported (\$200,000 - \$80,000)) and costs of \$75,000, for a profit of \$45,000.

*Example 2. Constructive completion—CCM.* (i) *Facts.* The facts are the same as in Example 1, except that X and Y properly account for the contract under the CCM.

(ii) *Old taxpayer.* X does not report any income or costs from the contract in Year 1. In Year 2, the contract is deemed complete for X, and X reports its gross contract price of \$800,000 (the sum of the amounts received under the contract and the amount realized in the sale (\$650,000 + \$150,000)) and its total allocable contract costs of \$600,000 (the sum of the costs incurred in Year 1 and Year 2 (\$200,000 + \$400,000)) in that year, for a profit of \$200,000.

(iii) *New taxpayer.* Y is treated as entering into a new contract in Year 2. Under the CCM, Y reports no gross receipts or costs in Year 2. Y reports its gross contract price of \$200,000 (the amount remaining to be paid under the terms of the contract less the consideration paid allocable to the contract (\$1,000,000 - \$650,000 - \$150,000)) and its total allocable contract costs of \$125,000 (the allocable contract costs that Y incurred to complete the contract (\$50,000 + \$75,000)) in Year 3, the completion year, for a profit of \$75,000.

*Example 3. Step-in-the-shoes—PCM.* (i) *Facts.* The facts are the same as in Example 1, except that X transfers the contract (including the uncompleted property) to Y in exchange for stock of Y in a transaction that qualifies as a statutory merger described in section 368(a)(1)(A) and does not result in gain or loss to X under section 361(a).

(ii) *Old taxpayer.* For Year 1, X reports receipts of \$250,000 (the completion factor multiplied by total contract price (\$200,000/\$800,000 × \$1,000,000)) and costs of \$200,000, for a profit of \$50,000. Because the mid-contract change in taxpayer results from a transaction described in paragraph (k)(3)(i) of this section, X is not treated as completing the contract in Year 2. In Year 2, X reports receipts of \$500,000 (the completion factor multiplied by the total contract price and minus the Year 1 gross receipts [(\$600,000/\$800,000 × \$1,000,000) - \$250,000]) and costs of \$400,000, for a profit of \$100,000.

(iii) *New taxpayer.* Because the mid-contract change in taxpayer results from a step-in-the-shoes transaction, Y must account for the contract using the same methods of accounting used by X prior to the transaction. Total contract price is the sum of any amounts that X and Y have received or reasonably expect to receive under the contract, and total allocable contract costs are the allocable contract costs of X and Y. Thus, the estimated total allocable contract costs at the end of Year 2 are \$725,000 (the cumulative allocable contract costs of X and the estimated total allocable contract costs of Y (\$200,000 + \$400,000 + \$50,000 + \$75,000)). In

Year 2, Y reports receipts of \$146,552 (the completion factor multiplied by the total contract price minus receipts reported by the old taxpayer  $([(\$650,000/\$725,000) \times \$1,000,000] - \$750,000)$  and costs of \$50,000, for a profit of \$96,552. For Year 3, Y reports receipts of \$103,448 (the total contract price minus prior year receipts (\$1,000,000 - \$896,552)) and costs of \$75,000, for a profit of \$28,448.

*Example 4. Step-in-the-shoes—CCM.* (i) *Facts.* The facts are the same as in Example 3, except that X properly accounts for the contract under the CCM.

(ii) *Old taxpayer.* X reports no income or costs from the contract in Years 1, 2 or 3.

(iii) *New taxpayer.* Because the mid-contract change in taxpayer results from a step-in-the-shoes transaction, Y must account for the contract using the same method of accounting used by X prior to the transaction. Thus, in Year 3, the completion year, Y reports receipts of \$1,000,000 and total contract costs of \$725,000, for a profit of \$275,000.

*Example 5. Step in the shoes—PCM—basis adjustment.* The facts are the same as in Example 3, except that X transfers the contract (including the uncompleted property) with a basis of \$0 and \$125,000 of cash to a new corporation, Z, in exchange for all of the stock of Z in a section 351 transaction. Thus, under section 358(a), X's basis in the Z stock is \$125,000. Pursuant to paragraph (k)(3)(iv)(A)(I) of this section, X must increase its basis in the Z stock by the amount of gross receipts X recognized under the contract, \$750,000 (\$250,000 receipts in Year 1 + \$500,000 receipts in Year 2), and reduce its basis by the amount of gross receipts X received under the contract, the \$650,000 in progress payments. Accordingly, X's basis in the Z stock is \$225,000. All other results are the same.

*Example 6. Step in the shoes—CCM—basis adjustment.* (i) *Facts.* The facts are the same as in Example 4, except that X receives progress payments of \$800,000 (rather than \$650,000) and transfers the contract (including the uncompleted property) with a basis of \$600,000 and \$125,000 of cash to a new corporation, Z, in exchange for all of the stock of Z in a section 351 transaction. X and Z do not join in filing a consolidated Federal income tax return.

(ii) *Old taxpayer.* X reports no income or costs under the contract in Years 1, 2, or 3. Under section 358(a), X's basis in Z is \$725,000. Pursuant to paragraph (k)(3)(iv)(A)(I), X must reduce its basis in the stock of Z by \$800,000, the progress payments received by X. However, X may not reduce its basis in the Z stock below zero pursuant paragraph (k)(3)(iv)(A)(2) of this section. Accordingly, X's basis in the Z stock is reduced by \$725,000 to zero and X must recognize ordinary income of \$75,000.

(iii) *New taxpayer.* Upon completion of the contract in Year 3, Z reports gross receipts

of \$925,000 (\$1,000,000 original contract price—\$75,000 income recognized by the old taxpayer pursuant to the basis adjustment rule of paragraph (k)(3)(iv)(A)) and total contract costs of \$725,000, for a profit of \$200,000.

*Example 7. Step in the shoes—PCM—gain recognized in transaction.* (i) *Facts.* The facts are the same as in *Example 3*, except that X transfers the contract (including the uncompleted property) with a basis of \$0 and an unrelated capital asset with a value of \$100,000 and a basis of \$0 to a new corporation, Z, in exchange for stock of Z with a value of \$200,000 and \$50,000 of cash in a section 351 transaction.

(ii) *Old taxpayer.* For year 1, X reports receipts of \$250,000 ( $\$200,000/\$800,000 \times \$1,000,000$ ) and costs of \$200,000, for a profit of \$50,000. X is not treated as completing the contract in Year 2. In Year 2, X reports receipts of \$500,000 ( $(\$600,000/\$800,000 \times \$1,000,000 = \$750,000$  cumulative gross receipts)—\$250,000 prior year cumulative gross receipts) and costs of \$400,000, for a profit of \$100,000. Under paragraph (k)(3)(ii)(B) of this section, X determines that the gain realized on the transfer of the contract to Z under the constructive completion rules of paragraph (k)(2)(ii) of this section is \$50,000 (total contract price of \$800,000 (\$150,000 value allocable to the contract + \$650,000 progress payments)—\$750,000 previously recognized cumulative gross receipts—\$0 costs incurred but not recognized). The gain realized on the transfer of the unrelated capital asset to Z is \$100,000. The amount of gain X must recognize due to the receipt of \$50,000 cash in the exchange is \$50,000, of which \$30,000 is allocated to the contract (\$150,000 value of contract/\$250,000 total value of property transferred to Z  $\times$  \$50,000) and is treated as ordinary income, and \$20,000 is allocated to the unrelated capital asset (\$100,000 value of capital asset/\$250,000 total value of property transferred to Z  $\times$  \$50,000). Under section 358(a), X's basis in the Z stock is \$0. However, pursuant to paragraph (k)(3)(iv)(A)(1) of this section, X must increase its basis in the Z stock by \$750,000, the amount of gross receipts recognized under the contract, and must reduce its basis in the Z stock by \$650,000, the amount of gross receipts X received under the contract. Therefore, X's basis in the Z stock is \$100,000.

(iii) *New taxpayer.* Z must account for the contract using the same PCM method used by X prior to the transaction. Pursuant to paragraph (k)(3)(iv)(B)(1) of this section, the total contract price is \$970,000 (\$1,000,000 amount X and Z have received or reasonably expect to receive under the contract—\$30,000 income recognized by X with respect to the contract as a result of the receipt of \$50,000 cash in the transaction). In Year 2, Z reports gross receipts of \$119,655 ( $\$650,000/\$725,000 \times \$970,000 = \$869,655$  current year cumulative gross receipts—\$750,000 cumulative gross receipts reported by the old taxpayer) and

costs of \$50,000, for a profit of \$69,655. In Year 3, Z reports gross receipts of \$100,345 ( $\$970,000 - \$869,655$ ) and costs of \$75,000, for a profit of \$25,345.

*Example 8. Step in the shoes—CCM—gain recognized in transaction.* (i) *Facts.* The facts are the same as in *Example 4*, except that X transfers the contract (including the uncompleted property) with a basis of \$600,000 and an unrelated capital asset with a value of \$125,000 and a basis of \$0 to a new corporation, Z, in exchange for all the stock of Z with a value of \$175,000 and \$100,000 of cash in a section 351 transaction. X and Z do not join in filing a consolidated Federal income tax return.

(ii) *Old taxpayer.* X reports no income or costs under the contract in Years 1, 2, or 3. Under paragraph (k)(3)(ii)(B), X determines that the gain realized on the transfer of the contract to Z under the constructive completion rules of paragraph (k)(2)(ii) of this section is \$200,000 ( $\$800,000$  total contract price (\$150,000 value allocable to the contract + \$650,000 progress payments)—\$600,000 costs incurred but not recognized). The gain realized on the transfer of the unrelated capital asset to Z is \$125,000. The amount of gain X must recognize due to the receipt of \$100,000 of cash in the exchange is \$100,000, of which \$54,545 is allocated to the contract ( $\$150,000$  value of the contract/\$275,000 total value of property transferred to Z  $\times$  \$100,000) and is treated as ordinary income, and \$45,455 is allocated to the unrelated capital asset ( $\$125,000$  value of capital asset/\$275,000 total value of property transferred to Z  $\times$  \$100,000). Under section 358(a), X's basis in the Z stock is \$600,000 ( $\$600,000$  basis in the contract and unrelated capital asset transferred—\$100,000 cash received + \$100,000 gain recognized). Pursuant to paragraph (k)(3)(iv)(A)(1) of this section, X must reduce its basis in the stock of Z by \$650,000, the progress payments received under the contract. However, X may not reduce its basis in the Z stock below zero pursuant to paragraph (k)(3)(iv)(A)(2) of this section. Accordingly, X's basis in the Z stock is reduced by \$600,000 to zero and X must recognize income of \$50,000.

(iii) *New taxpayer.* Z must account for the contract using the same CCM used by X prior to the transaction. Pursuant to paragraph (k)(3)(iv)(B)(1) of this section, the total contract price is \$895,455 ( $\$1,000,000$  original contract price—\$54,545 income recognized by old taxpayer with respect to the contract as a result of the receipt of cash in the transaction—\$50,000 income recognized by the old taxpayer pursuant to the basis adjustment rule of paragraph (k)(3)(iv)(A)). Accordingly, upon completion of the contract in Year 3, Z reports gross receipts of \$895,455 and total contract costs of \$725,000, for a profit of \$170,455.

*Example 9. Constructive completion—PCM—distribution of contract by partnership.* (i)

*Facts.* In Year 1, W, X, Y, and Z each contribute \$100,000 to form equal partnership PRS. In Year 1, PRS enters into a contract. The total contract price is \$1,000,000 and the estimated total allocable contract costs are \$800,000. In Year 1, PRS incurs costs of \$600,000 and receives \$650,000 in progress payments under the contract. Under the contract, PRS performed all of the services required in order to be entitled to receive the progress payments, and there was no obligation to return the payments or perform any additional services in order to retain the payments. PRS properly accounts for the contract under the PCM. In Year 2, PRS distributes the contract to X in liquidation of X's interest. PRS incurs no costs and receives no progress payments in Year 2 prior to the distribution. At the time of the distribution, PRS's only asset other than the long-term contract and the partially constructed property is \$450,000 cash (\$400,000 initially contributed and \$50,000 in excess progress payments). The fair market value of the contract is \$150,000. Pursuant to the distribution, X assumes PRS's contract obligations and rights. In Year 2, X incurs additional allocable contract costs of \$50,000. X correctly estimates at the end of Year 2 that X will have to incur an additional \$75,000 of allocable contract costs in Year 3 to complete the contract (rather than \$150,000 as originally estimated by PRS). Assume that X properly accounts for the contract under the PCM, that PRS has no income or loss other than income or loss from the contract, and that PRS has an election under section 754 in effect in Year 2.

(ii) *Tax consequences to PRS.* For Year 1, PRS reports receipts of \$750,000 (the completion factor multiplied by total contract price (\$600,000/\$800,000 × \$1,000,000)) and costs of \$600,000, for a profit of \$150,000, which is allocated equally among W, X, Y, and Z (\$37,500 each). Immediately prior to the distribution of the contract to X in Year 2, the contract is deemed completed. Under paragraph (k)(2)(iv)(B) of this section, the fair market value of the contract (\$150,000) is treated as the amount realized from the transaction. For purposes of applying the PCM in Year 2, the total contract price is \$800,000 (the sum of the amounts received under the contract and the amount treated as realized from the transaction (\$650,000 + \$150,000)) and the total allocable contract costs are \$600,000. Thus, in Year 2 PRS reports receipts of \$50,000 (total contract price minus receipts already reported (\$800,000 - \$750,000)), and costs incurred in Year 2 of \$0, for a profit of \$50,000. Under paragraph (k)(2)(iv)(B) of this section, this profit must be allocated among W, X, Y, and Z as though the partnership closed its books on the date of the distribution. Accordingly, each partner's distributive share of this income is \$12,500.

(iii) *Tax consequences to X.* X's basis in its interest in PRS immediately prior to the distribution is \$150,000 (X's \$100,000 initial contribution, increased by \$37,500, X's distributive share of Year 1 income, and \$12,500, X's distributive share of Year 2 income). Under paragraph (k)(2)(iv)(D) of this section, PRS's basis in the contract (including the uncompleted property, if applicable) immediately prior to the distribution is equal to \$150,000 (the partnership's allocable contract costs, \$600,000, increased by the amount of income recognized by PRS on the contract through the date of the distribution (including amounts recognized as a result of the constructive completion), \$200,000, decreased by the amounts that the partnership has received or reasonably expects to receive under the contract, \$650,000). Under section 732, X's basis in the contract (including the uncompleted property) after the distribution is \$150,000. Under paragraph (k)(2)(iv)(C) of this section, X's basis in the contract (including the uncompleted property) is treated as consideration paid by X that is allocable to the contract. X's total contract price is \$200,000 (the amount remaining to be paid under the terms of the contract less the consideration allocable to the contract (\$350,000 - \$150,000)). For Year 2, X reports receipts of \$80,000 (the completion factor multiplied by the total contract price [(\$50,000/\$125,000) × \$200,000]) and costs of \$50,000 (the costs incurred after the distribution of the contract), for a profit of \$30,000. For Year 3, X reports receipts of \$120,000 (the total contract price minus receipts already reported (\$200,000 - \$80,000)) and costs of \$75,000, for a profit of \$45,000.

(iv) *Section 734(b).* Because X's basis in the contract (including the uncompleted property) immediately after the distribution, \$150,000, is equal to PRS's basis in the contract (including the uncompleted property) immediately prior to the distribution, there is no basis adjustment under section 734(b).

*Example 10. Constructive completion—CCM—distribution of contract by partnership.* (i) *Facts.* The facts are the same as in *Example 9*, except that PRS and X properly account for the contract under the CCM.

(ii) *Tax consequences to PRS.* PRS reports no income or costs from the contract in Year 1. Immediately prior to the distribution of the contract to X in Year 2, the contract is deemed completed. Under paragraph (k)(2)(iv)(B) of this section, the fair market value of the contract (\$150,000) is treated as the amount realized from the transaction. For purposes of applying the CCM in Year 2, the gross contract price is \$800,000 (the sum of the amounts received under the contract and the amount treated as realized from the transaction (\$650,000 + \$150,000)) and the total allocable contract costs are \$600,000. Thus, in Year 2 PRS reports profits of \$200,000

(\$800,000 – \$600,000). This profit must be allocated among W, X, Y, and Z as though the partnership closed its books on the date of the distribution. Accordingly, each partner's distributive share of this income is \$50,000.

(iii) *Tax consequences to X.* X's basis in its interest in PRS immediately prior to the distribution is \$150,000 (\$100,000 initial contribution, increased by \$50,000, X's distributive share of Year 2 income). Under paragraph (k)(2)(iv)(D) of this section, PRS's basis in the contract (including the uncompleted property, if applicable) immediately prior to the distribution is equal to \$150,000 (the partnership's allocable contract costs, \$600,000, increased by the amount of cumulative taxable income recognized by PRS on the contract through the date of the distribution (including amounts recognized as a result of the constructive completion), \$200,000, decreased by the amounts that the partnership has received or reasonably expects to receive under the contract, \$650,000). Under section 732, X's basis in the contract (including the uncompleted property) after the distribution is \$150,000. Under paragraph (k)(2)(iv)(C) of this section, X's basis in the contract is treated as consideration paid by X that is allocable to the contract. Under the CCM, X reports no gross receipts or costs in Year 2. For Year 3, the completion year, X reports its gross contract price of \$200,000 (the amount remaining to be paid under the terms of the contract less the consideration allocable to the contract (\$350,000 – \$150,000)) and its total allocable contract costs of \$125,000 (the allocable contract costs that X incurred to complete the contract (\$50,000 + \$75,000)), for a profit of \$75,000.

(iv) *Section 734(b).* The results under section 734(b) are the same as in Example 9.

*Example 11. Step-in-the-shoes—PCM—contribution of contract to partnership.* (i) *Facts.* In Year 1, X enters into a contract that X properly accounts for under the PCM. The total contract price is \$1,000,000 and the estimated total allocable contract costs are \$800,000. In Year 1, X incurs costs of \$600,000 and receives \$650,000 in progress payments under the contract. Under the contract, X performed all of the services required in order to be entitled to receive the progress payments, and there was no obligation to return the payments or perform any additional services in order to retain the payments. In Year 2, X contributes the contract (including the uncompleted property) with a basis of \$0 and \$125,000 of cash to partnership PRS in exchange for a one-fourth partnership interest. X incurs costs of \$10,000, and receives no progress payments in Year 2 prior to the contribution of the contract. X and the other three partners of PRS share equally in its capital, profits, and losses. The parties determine that, at the time of the contribution, the fair market value of the contract is \$160,000. Following the contribution in Year

2, PRS incurs additional allocable contract costs of \$40,000. PRS correctly estimates at the end of Year 2 that it will have to incur an additional \$75,000 of allocable contract costs in Year 3 to complete the contract (rather than \$150,000 as originally estimated by PRS).

(ii) *Tax consequences to X.* For Year 1, X reports receipts of \$750,000 (the completion factor multiplied by the total contract price (\$600,000/\$800,000 × \$1,000,000)) and costs of \$600,000, for a profit of \$150,000. Because the mid-contract change in taxpayer results from a transaction described in paragraph (k)(3)(i)(I) of this section, X is not treated as completing the contract in Year 2. Under paragraph (k)(3)(ii)(A) of this section, for Year 2, X reports receipts of \$12,500 (the completion factor multiplied by the total contract price (\$610,000/\$800,000 × \$1,000,000, or \$762,500), decreased by receipts already reported, \$750,000) and costs of \$10,000, for a profit of \$2,500. Under section 722, X's initial basis in its interest in PRS is \$125,000. Pursuant to paragraph (k)(3)(iv)(A)(1) of this section, X must increase its basis in its interest in PRS by the amount of gross receipts X recognized under the contract, \$762,500, and reduce its basis by the amount of gross receipts X received under the contract, the \$650,000 in progress payments. Accordingly, X's basis in its interest in PRS is \$237,500.

(iii) *Tax consequences to PRS.* Because the mid-contract change in taxpayer results from a step-in-the-shoes transaction, PRS must account for the contract using the same methods of accounting used by X prior to the transaction. The total contract price is the sum of any amounts that X and PRS have received or reasonably expect to receive under the contract, and total allocable contract costs are the allocable contract costs of X and PRS. For Year 2, PRS reports receipts of \$134,052 (the completion factor multiplied by the total contract price [(\$650,000/\$725,000) – \$1,000,000], \$896,552, decreased by receipts reported by X, \$762,500) and costs of \$40,000, for a profit of \$94,052. For Year 3, PRS reports receipts of \$103,448 (the total contract price minus prior year receipts (\$1,000,000 × \$896,552)) and costs of \$75,000, for a profit of \$28,448.

(iv) *Section 704(c).* The principles of section 704(c) and § 1.704-3 apply to allocations of income or loss with respect to the contract contributed by X. In this case, the amount of built-in income that is subject to section 704(c) is the amount of income or loss that the contributing partner would take into account if the contract were disposed of for its fair market value in a constructive completion transaction. This calculation is treated as occurring immediately after the partner has applied paragraph (k)(3)(ii)(A) of this section, but before the contribution to the partnership. In a constructive completion transaction, the total contract price would

be \$810,000 (the sum of the amounts received under the contract and the amount realized in the deemed sale (\$650,000 + \$160,000)). X would report receipts of \$47,500 (total contract price minus receipts already reported (\$810,000 - \$762,500)) and costs of \$0, for a profit of \$47,500. Thus, the amount of built-in income that is subject to section 704(c) is \$47,500. The partnership must apply section 704(c) to this income in a manner that reasonably accounts for the income over the remaining term of the contract. For example, in Year 2, PRS could allocate \$26,810 to X under section 704(c) (the amount of built-in income, \$47,500, multiplied by a fraction, the numerator of which is the completion factor for the year,  $\$650,000/725,000$ , less the completion factor for the prior year,  $\$610,000/\$800,000$ , and the denominator of which is 100 percent reduced by the completion factor for the taxable year preceding the event creating the section 704(c) income or loss,  $\$610,000/\$800,000$ ). The remaining \$67,242 would be allocated equally among all of the partners. In Year 3, the completion year, PRS could allocate \$20,690 to X under section 704(c) ( $\$47,500 \times [(\$725,000/\$725,000 - \$650,000/\$725,000) / (100 \text{ percent} - \$610,000/\$800,000)]$ ). The remaining \$7,758 would be allocated equally among all the partners.

*Example 12. Step-in-the-shoes—CCM—contribution of contract to partnership.* (i) *Facts.* The facts are the same as in *Example 11*, except that X and PRS properly account for the contract under the CCM, and X has a basis of \$610,000 in the contract (including the uncompleted property).

(ii) *Tax consequences to X.* X reports no income or costs from the contract in Years 1 or 2. X is not treated as completing the contract in Year 2. Under section 722, X's initial basis in its interest in PRS is \$735,000 (the sum of \$125,000 cash and X's basis of \$610,000 in the contract (including the uncompleted property)). Pursuant to paragraph (k)(3)(iv)(A)(i) of this section, X must reduce its basis in its interest in PRS by the amount of gross receipts X received under the contract, or \$650,000. Accordingly, X's basis in its interest in PRS is \$85,000.

(iii) *Tax consequences to PRS.* PRS must account for the contract using the same methods of accounting used by X prior to the transaction. Under the CCM, PRS reports no gross receipts or costs in Year 2. For Year 3, the completion year, PRS reports its gross contract price of \$1,000,000 (the sum of any amounts that X and PRS have received or reasonably expect to receive under the contract), and total allocable contract costs of \$725,000 (the allocable contract costs of X and PRS), for a profit of \$275,000.

(iv) *Section 704(c).* In this case, the amount of built-in income that is subject to section 704(c) is the amount of income or loss that the contributing partner would take into account if the contract were disposed of for its

fair market value in a constructive completion transaction. This calculation is treated as occurring immediately after the partner has applied paragraph (k)(3)(ii)(A) of this section, but before the contribution to the partnership. In a constructive completion transaction, X would report its gross contract price of \$810,000 (the sum of the amounts received under the contract and the amount realized in the deemed sale (\$650,000 + \$160,000)) and its total allocable contract costs of \$610,000, for a profit of \$200,000. Thus, the amount of built-in income that is subject to section 704(c) is \$200,000. Out of PRS's income of \$275,000, in Year 3, \$200,000 must be allocated to X under section 704(c), and the remaining \$75,000 is allocated equally among all of the partners.

*Example 13. Step-in-the-shoes—PCM—transfer of a partnership interest.* (i) *Facts.* In Year 1, W, X, Y, and Z each contribute \$100,000 to form equal partnership PRS. In Year 1, PRS enters into a contract. The total contract price is \$1,000,000 and the estimated total allocable contract costs are \$800,000. In Year 1, PRS incurs costs of \$600,000 and receives \$650,000 in progress payments under the contract. Under the contract, PRS performed all of the services required in order to be entitled to receive the progress payments, and there was no obligation to return the payment or perform any additional services in order to retain the payments. PRS properly accounts for the contract under the PCM. In Year 2, W transfers W's interest in PRS to T for \$150,000. Assume that \$10,000 of PRS's Year 2 costs are incurred prior to the transfer, \$40,000 are incurred after the transfer; and that PRS receives no progress payments in Year 2. Also assume that the fair market value of the contract on the date of the transfer is \$160,000, that PRS closes its books with respect to the contract under section 706 on the date of the transfer, and that PRS correctly estimates at the end of Year 2 that it will have to incur an additional \$75,000 of allocable contract costs in Year 3 to complete the contract (rather than \$150,000 as originally estimated by PRS).

(ii) *Income reporting for period ending on date of transfer.* For Year 1, PRS reports receipts of \$750,000 (the completion factor multiplied by total contract price ( $\$600,000/\$800,000 \times \$1,000,000$ )) and costs of \$600,000, for a profit of \$150,000. This profit is allocated equally among W, X, Y, and Z (\$37,500 each). Under paragraph (k)(3)(ii)(A) of this section, for the part of Year 2 ending on the date of the transfer of W's interest, PRS reports receipts of \$12,500 (the completion factor multiplied by the total contract price ( $\$610,000/\$800,000 \times \$1,000,000$ )) minus receipts already reported (\$750,000) and costs of \$10,000 for a profit of \$2,500. This profit is allocated equally among W, X, Y, and Z (\$625 each).

(iii) *Income reporting for period after transfer.* PRS must continue to use the PCM. For

the part of Year 2 beginning on the day after the transfer, PRS reports receipts of \$134,052 (the completion factor multiplied by the total contract price decreased by receipts reported by PRS for the period ending on the date of the transfer  $[(\$650,000/\$725,000 \times \$1,000,000) - \$762,500]$ ) and costs of \$40,000, for a profit of \$94,052. This profit is shared equally among T, X, Y, and Z (\$23,513 each). For Year 3, PRS reports receipts of \$103,448 (the total contract price minus prior year receipts  $(\$1,000,000 - \$896,552)$ ) and costs of \$75,000, for a profit of \$28,448. The profit for Year 3 is shared equally among T, X, Y, and Z (\$7,112 each).

(iv) *Tax Consequences to W.* W's amount realized is \$150,000. W's adjusted basis in its interest in PRS is \$138,125 (\$100,000 originally contributed, plus \$37,500, W's distributive share of PRS's Year 1 income, and \$625, W's distributive share of PRS's Year 2 income prior to the transfer). Accordingly, W's income from the sale of W's interest in PRS is \$11,875. Under paragraph (k)(2)(iv)(E) of this section, for purposes of section 751(a), the amount of ordinary income attributable to the contract is determined as follows. First, the partnership must determine the amount of income or loss from the contract that is allocated under section 706 to the period ending on the date of the sale (\$625). Second, the partnership must determine the amount of income or loss that the partnership would take into account under the constructive completion rules of paragraph (k)(2) of this section if the contract were disposed of for its fair market value in a constructive completion transaction. Because PRS closed its books under section 706 with respect to the contract on the date of the sale, this calculation is treated as occurring immediately after the partnership has applied paragraph (k)(3)(ii)(A) of this section on the date of the sale. In a constructive completion transaction, the total contract price would be \$810,000 (the sum of the amounts received under the contract and the amount realized in the deemed sale  $(\$650,000 + \$160,000)$ ). PRS would report receipts of \$47,500 (total contract price minus receipts already reported  $(\$810,000 - \$762,500)$ ) and costs of \$0, for a profit of \$47,500. Thus, the amount of ordinary income attributable to the contract is \$47,500, and W's share of that income is \$11,875. Thus, under § 1.751-1(a), all of W's \$11,875 of income from the sale of W's interest in PRS is ordinary income.

(v) *Tax Consequences to T.* T's adjusted basis for its interest in PRS is \$150,000. Under § 1.743-1(d)(2), the amount of income that would be allocated to T if the contract were disposed of for its fair market value (adjusted to account for income from the contract for the portion of PRS's taxable year that ends on the date of the transfer) is \$11,875. Under § 1.743-1(b), the amount of T's basis adjustment under section 743(b) is

\$11,875. Under paragraph (k)(3)(v)(B) of this section, the portion of T's basis adjustment that is recovered in Year 2 and Year 3 must be determined by PRS in a manner that reasonably accounts for the adjustment over the remaining term of the contract. For example, PRS could recover \$6,703 of the adjustment in Year 2 (the amount of the basis adjustment, \$11,875, multiplied by a fraction, the numerator of which is the excess of the completion factor for the year,  $\$650,000/\$725,000$ , less the completion factor for the prior year,  $\$610,000/\$800,000$ , and the denominator of which is 100 percent reduced by the completion factor for the taxable year preceding the transfer,  $\$610,000/\$800,000$ ). T's distributive share of income in Year 2 from the contract would be adjusted from \$23,513 to \$16,810 as a result of the basis adjustment. In Year 3, the completion year, PRS could recover \$5,172 of the adjustment  $(\$11,875 \times [(\$725,000/\$725,000 - \$650,000/\$725,000) / (100 \text{ percent} - \$610,000/\$800,000)])$ . T's distributive share of income in Year 3, the completion year, from the contract would be adjusted from \$7,112 to \$1,940 as a result of the basis adjustment.

(6) *Effective date.* Except as provided in paragraph (k)(3)(iv)(D) of this section, this paragraph (k) is applicable for transactions on or after May 15, 2002. Application of the rules of this paragraph (k) to a transaction that occurs on or after May 15, 2002 is not a change in method of accounting.

[T.D. 8597, 60 FR 36684, July 18, 1995, as amended by T.D. 8929, 66 FR 2232, Jan. 11, 2001; 66 FR 18191, Apr. 6, 2001; T.D. 8995, 67 FR 34605, May 15, 2002; T.D. 9137, 69 FR 42553, July 16, 2004]

#### § 1.460-5 Cost allocation rules.

(a) *Overview.* This section prescribes methods of allocating costs to long-term contracts accounted for using the percentage-of-completion method described in § 1.460-4(b) (PCM), the completed-contract method described in § 1.460-4(d) (CCM), or the percentage-of-completion/capitalized-cost method described in § 1.460-4(e) (PCCM). Exempt construction contracts described in § 1.460-3(b) accounted for using a method other than the PCM or CCM are not subject to the cost allocation rules of this section (other than the requirement to allocate production-period interest under paragraph (b)(2)(v) of this section). Paragraph (b) of this section describes the regular cost allocation methods for contracts subject to the

PCM. Paragraph (c) of this section describes an elective simplified cost allocation method for contracts subject to the PCM. Paragraph (d) of this section describes the cost allocation methods for exempt construction contracts reported using the CCM. Paragraph (e) of this section describes the cost allocation rules for contracts subject to the PCCM. Paragraph (f) of this section describes additional rules applicable to the cost allocation methods described in this section. Paragraph (g) of this section provides rules concerning consistency in method of allocating costs to long-term contracts.

(b) *Cost allocation method for contracts subject to PCM*—(1) *In general.* Except as otherwise provided in paragraph (b)(2) of this section, a taxpayer must allocate costs to each long-term contract subject to the PCM in the same manner that direct and indirect costs are capitalized to property produced by a taxpayer under §1.263A-1(e) through (h). Thus, a taxpayer must allocate to each long-term contract subject to the PCM all direct costs and certain indirect costs properly allocable to the long-term contract (*i.e.*, all costs that directly benefit or are incurred by reason of the performance of the long-term contract). However, see paragraph (c) of this section concerning an election to allocate contract costs using the simplified cost-to-cost method. As in section 263A, the use of the practical capacity concept is not permitted. See §1.263A-2(a)(4).

(2) *Special rules*—(i) *Direct material costs.* The costs of direct materials must be allocated to a long-term contract when dedicated to the contract under principles similar to those in §1.263A-11(b)(2). Thus, a taxpayer dedicates direct materials by associating them with a specific contract, including by purchase order, entry on books and records, or shipping instructions. A taxpayer maintaining inventories under §1.471-1 must determine allocable contract costs attributable to direct materials using its method of accounting for those inventories (*e.g.*, FIFO, LIFO, specific identification).

(ii) *Components and subassemblies.* The costs of a component or subassembly (component) produced by the taxpayer must be allocated to a long-term con-

tract as the taxpayer incurs costs to produce the component if the taxpayer reasonably expects to incorporate the component into the subject matter of the contract. Similarly, the cost of a purchased component (including a component purchased from a related party) must be allocated to a long-term contract as the taxpayer incurs the cost to purchase the component if the taxpayer reasonably expects to incorporate the component into the subject matter of the contract. In all other cases, the cost of a component must be allocated to a long-term contract when the component is dedicated, under principles similar to those in §1.263A-11(b)(2). A taxpayer maintaining inventories under §1.471-1 must determine allocable contract costs attributable to components using its method of accounting for those inventories (*e.g.*, FIFO, LIFO, specific identification).

(iii) *Simplified production methods.* A taxpayer may not determine allocable contract costs using the simplified production methods described in §1.263A-2(b) and (c).

(iv) *Costs identified under cost-plus long-term contracts and federal long-term contracts.* To the extent not otherwise allocated to the contract under this paragraph (b), a taxpayer must allocate any identified costs to a cost-plus long-term contract or federal long-term contract (as defined in section 460(d)). *Identified cost* means any cost, including a charge representing the time-value of money, identified by the taxpayer or related person as being attributable to the taxpayer's cost-plus long-term contract or federal long-term contract under the terms of the contract itself or under federal, state, or local law or regulation.

(v) *Interest*—(A) *In general.* If property produced under a long-term contract is *designated property*, as defined in §1.263A-8(b) (without regard to the exclusion for long-term contracts under §1.263A-8(d)(2)(v)), a taxpayer must allocate interest incurred during the production period to the long-term contract in the same manner as interest is allocated to property produced by a taxpayer under section 263A(f). See §§1.263A-8 to 1.263A-12 generally.

(B) *Production period.* Notwithstanding § 1.263A-12(c) and (d), for purposes of this paragraph (b)(2)(v), the production period of a long-term contract—

(I) Begins on the later of—

(i) The contract commencement date, as defined in § 1.460-1(b)(7); or

(ii) For a taxpayer using the accrual method of accounting for long-term contracts, the date by which 5 percent or more of the total estimated costs, including design and planning costs, under the contract have been incurred; and

(2) Ends on the date that the contract is completed, as defined in § 1.460-1(c)(3).

(C) *Application of section 263A(f).* For purposes of this paragraph (b)(2)(v), section 263A(f)(1)(B)(iii) (regarding an estimated production period exceeding 1 year and a cost exceeding \$1,000,000) must be applied on a contract-by-contract basis; except that, in the case of a taxpayer using an accrual method of accounting, that section must be applied on a property-by-property basis.

(vi) *Research and experimental expenses.* Notwithstanding § 1.263A-1(e)(3)(ii)(P) and (iii)(B), a taxpayer must allocate research and experimental expenses, other than independent research and development expenses (as defined in § 1.460-1(b)(9)), to its long-term contracts.

(vii) *Service costs—(A) Simplified service cost method—(1) In general.* To use the simplified service cost method under § 1.263A-1(h), a taxpayer must allocate the otherwise capitalizable mixed service costs among its long-term contracts using a reasonable method. For example, otherwise capitalizable mixed service costs may be allocated to each long-term contract based on labor hours or contract costs allocable to the contract. To be considered reasonable, an allocation method must be applied consistently and must not disproportionately allocate service costs to contracts expected to be completed in the near future.

(2) *Example.* The following example illustrates the rule of this paragraph (b)(2)(vii)(A):

*Example. Simplified service cost method.* During 2001, C, whose taxable year ends December 31, produces electronic equipment for in-

ventory and enters into long-term contracts to manufacture specialized electronic equipment. C's method of allocating mixed service costs to the property it produces is the labor-based, simplified service cost method described in § 1.263A-1(h)(4). For 2001, C's total mixed service costs are \$100,000, C's section 263A labor costs are \$500,000, C's section 460 labor costs (*i.e.*, labor costs allocable to C's long-term contracts) are \$250,000, and C's total labor costs are \$1,000,000. To determine the amount of mixed service costs capitalizable under section 263A for 2001, C multiplies its total mixed service costs by its section 263A allocation ratio (section 263A labor costs ÷ total labor costs). Thus, C's capitalizable mixed service costs for 2001 are \$50,000 ( $\$100,000 \times \frac{\$500,000}{\$1,000,000}$ ). Thereafter, C allocates its capitalizable mixed service costs to produced property remaining in ending inventory using its 263A allocation method (*e.g.*, burden rate, simplified production). Similarly, to determine the amount of mixed service costs that are allocable to C's long-term contracts for 2001, C multiplies its total mixed service costs by its section 460 allocation ratio (section 460 labor ÷ total labor costs). Thus, C's allocable mixed service contract costs for 2001 are \$25,000 ( $\$100,000 \times \frac{\$250,000}{\$1,000,000}$ ). Thereafter, C allocates its allocable mixed service costs to its long-term contracts proportionately based on its section 460 labor costs allocable to each long-term contract.

(B) *Jobsite costs.* If an administrative, service, or support function is performed solely at the jobsite for a specific long-term contract, the taxpayer may allocate all the direct and indirect costs of that administrative, service, or support function to that long-term contract. Similarly, if an administrative, service, or support function is performed at the jobsite solely for the taxpayer's long-term contract activities, the taxpayer may allocate all the direct and indirect costs of that administrative, service, or support function among all the long-term contracts performed at that jobsite. For this purpose, jobsite means a production plant or a construction site.

(C) *Limitation on other reasonable cost allocation methods.* A taxpayer may use any other reasonable method of allocating service costs, as provided in § 1.263A-1(f)(4), if, for the taxpayer's long-term contracts considered as a whole, the—

(1) Total amount of service costs allocated to the contracts does not differ significantly from the total amount of

service costs that would have been allocated to the contracts under §1.263A-1(f)(2) or (3);

(2) Service costs are not allocated disproportionately to contracts expected to be completed in the near future because of the taxpayer's cost allocation method; and

(3) Taxpayer's cost allocation method is applied consistently.

(c) *Simplified cost-to-cost method for contracts subject to the PCM*—(1) *In general.* Instead of using the cost allocation method prescribed in paragraph (b) of this section, a taxpayer may elect to use the simplified cost-to-cost method, which is authorized under section 460(b)(3)(A), to allocate costs to a long-term contract subject to the PCM. Under the simplified cost-to-cost method, a taxpayer determines a contract's completion factor based upon only direct material costs; direct labor costs; and depreciation, amortization, and cost recovery allowances on equipment and facilities directly used to manufacture or construct the subject matter of the contract. For this purpose, the costs associated with any manufacturing or construction activities performed by a subcontractor are considered either direct material or direct labor costs, as appropriate, and therefore must be allocated to the contract under the simplified cost-to-cost method. An electing taxpayer must use the simplified cost-to-cost method to apply the look-back method under §1.460-6 and to determine alternative minimum taxable income under §1.460-4(f).

(2) *Election.* A taxpayer makes an election under this paragraph (c) by using the simplified cost-to-cost method for all long-term contracts entered into during the taxable year of the election on its original federal income tax return for the election year. This election is a method of accounting and, thus, applies to all long-term contracts entered into during and after the taxable year of the election. This election is not available if a taxpayer does not use the PCM to account for all long-term contracts or if a taxpayer elects to use the 10-percent method described in §1.460-4(b)(6).

(d) *Cost allocation rules for exempt construction contracts reported using the CCM*—(1) *In general.* For exempt con-

struction contracts reported using the CCM, other than contracts described in paragraph (d)(3) of this section (concerning contracts of homebuilders that do not satisfy the \$10,000,000 gross receipts test described in §1.460-3(b)(3) or will not be completed within two years of the contract commencement date), a taxpayer must annually allocate the cost of any activity that is incident to or necessary for the taxpayer's performance under a long-term contract. A taxpayer must allocate to each exempt construction contract all direct costs as defined in §1.263A-1(e)(2)(i) and all indirect costs either as provided in §1.263A-1(e)(3) or as provided in paragraph (d)(2) of this section.

(2) *Indirect costs*—(i) *Indirect costs allocable to exempt construction contracts.* A taxpayer allocating costs under this paragraph (d)(2) must allocate the following costs to an exempt construction contract, other than a contract described in paragraph (d)(3) of this section, to the extent incurred in the performance of that contract—

- (A) Repair of equipment or facilities;
- (B) Maintenance of equipment or facilities;
- (C) Utilities, such as heat, light, and power, allocable to equipment or facilities;
- (D) Rent of equipment or facilities;
- (E) Indirect labor and contract supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes, and contributions to a supplemental unemployment benefits plan;
- (F) Indirect materials and supplies;
- (G) Noncapitalized tools and equipment;
- (H) Quality control and inspection;
- (I) Taxes otherwise allowable as a deduction under section 164, other than state, local, and foreign income taxes, to the extent attributable to labor, materials, supplies, equipment, or facilities;
- (J) Depreciation, amortization, and cost-recovery allowances reported for the taxable year for financial purposes

on equipment and facilities to the extent allowable as deductions under chapter 1 of the Internal Revenue Code;

(K) Cost depletion;

(L) Administrative costs other than the cost of selling or any return on capital;

(M) Compensation paid to officers other than for incidental or occasional services;

(N) Insurance, such as liability insurance on machinery and equipment; and

(O) Interest, as required under paragraph (b)(2)(v) of this section.

(ii) *Indirect costs not allocable to exempt construction contracts.* A taxpayer allocating costs under this paragraph (d)(2) is not required to allocate the following costs to an exempt construction contract reported using the CCM—

(A) Marketing and selling expenses, including bidding expenses;

(B) Advertising expenses;

(C) Other distribution expenses;

(D) General and administrative expenses attributable to the performance of services that benefit the taxpayer's activities as a whole (*e.g.*, payroll expenses, legal and accounting expenses);

(E) Research and experimental expenses (described in section 174 and the regulations thereunder);

(F) Losses under section 165 and the regulations thereunder;

(G) Percentage of depletion in excess of cost depletion;

(H) Depreciation, amortization, and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle (for this purpose, an asset is not considered to be temporarily idle on non-working days, and an asset used in construction is considered to be idle when it is neither en route to nor located at a job-site), and depreciation, amortization and cost recovery allowances under chapter 1 of the Internal Revenue Code in excess of depreciation, amortization, and cost recovery allowances reported by the taxpayer in the taxpayer's financial reports;

(I) Income taxes attributable to income received from long-term contracts;

(J) Contributions paid to or under a stock bonus, pension, profit-sharing, or annuity plan or other plan deferring the receipt of compensation whether or

not the plan qualifies under section 401(a), and other employee benefit expenses paid or accrued on behalf of labor, to the extent the contributions or expenses are otherwise allowable as deductions under chapter 1 of the Internal Revenue Code. Other employee benefit expenses include (but are not limited to): Worker's compensation; amounts deductible or for whose payment reduction in earnings and profits is allowed under section 404A and the regulations thereunder; payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation which has the effect of a stock bonus, pension, profit-sharing, or annuity plan, or other plan deferring the receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, etc.;

(K) Cost attributable to strikes, rework labor, scrap and spoilage; and

(L) Compensation paid to officers attributable to the performance of services that benefit the taxpayer's activities as a whole.

(3) *Large homebuilders.* A taxpayer must capitalize the costs of home construction contracts under section 263A and the regulations thereunder, unless the contract will be completed within two years of the contract commencement date and the taxpayer satisfies the \$10,000,000 gross receipts test described in § 1.460-3(b)(3).

(e) *Cost allocation rules for contracts subject to the PCCM.* A taxpayer must use the cost allocation rules described in paragraph (b) of this section to determine the costs allocable to the entire qualified ship contract or residential construction contract accounted for using the PCCM and may not use the simplified cost-to-cost method described in paragraph (c) of this section.

(f) *Special rules applicable to costs allocated under this section—(1) Nondeductible costs.* A taxpayer may not allocate any otherwise allocable contract cost to a long-term contract if any section

of the Internal Revenue Code disallows a deduction for that type of payment or expenditure (e.g., an illegal bribe described in section 162(c)).

(2) *Costs incurred for non-long-term contract activities.* If a taxpayer performs a non-long-term contract activity, as defined in §1.460-1(d)(2), that is incident to or necessary for the manufacture, building, installation, or construction of the subject matter of one or more of the taxpayer's long-term contracts, the taxpayer must allocate the costs attributable to that activity to such contract(s).

(g) *Method of accounting.* A taxpayer that adopts or elects a cost allocation method of accounting (or changes to another cost allocation method of accounting with the Commissioner's consent) must apply that method consistently for all similarly classified contracts, until the taxpayer obtains the Commissioner's consent under section 446(e) to change to another cost allocation method. A taxpayer-initiated change in cost allocation method will be permitted only on a cut-off basis (i.e., for contracts entered into on or after the year of change) and thus, a section 481(a) adjustment will not be permitted or required.

[T.D. 8929, 66 FR 2237, Jan. 11, 2001]

#### § 1.460-6 Look-back method.

(a) *In general*—(1) *Introduction.* With respect to income from any long-term contract reported under the percentage of completion method, a taxpayer is required to pay or is entitled to receive interest under section 460(b) on the amount of tax liability that is deferred or accelerated as a result of overestimating or underestimating total contract price or contract costs. Under this look-back method, taxpayers are required to pay interest for any deferral of tax liability resulting from the underestimation of the total contract price or the overestimation of total contract costs. Conversely, if the total contract price is overestimated or the total contract costs are underestimated, taxpayers are entitled to receive interest for any resulting acceleration of tax liability. The computation of the amount of deferred or accelerated tax liability under the look-back method is hypothetical; applica-

tion of the look-back method does not result in an adjustment to the taxpayer's tax liability as originally reported, as reported on an amended return, or as adjusted on examination. Thus, the look-back method does not correct for differences in tax liability that result from over- or under-estimation of contract price and costs and that are permanent because, for example, tax rates change during the term of the contract.

(2) *Overview.* Paragraph (b) explains which situations require application of the look-back method to income from a long-term contract. Paragraph (c) explains the operation of the three computational steps for applying the look-back method. Paragraph (d) provides guidance concerning the simplified marginal impact method. Paragraph (e) provides an elective method to minimize the number of times the look-back method must be reapplied to a single long-term contract. Paragraph (f) describes the reporting requirements for the look-back method and the tax treatment of look-back interest. Paragraph (g) provides rules for applying the look-back method when there is a transaction that changes the taxpayer that reports income from a long-term contract prior to the completion of a contract. Paragraph (h) provides examples illustrating the three computational steps for applying the look-back method. Paragraph (j) of this section provides guidance concerning the election not to apply the look-back method in de minimis cases.

(b) *Scope of look-back method*—(1) *In general.* The look-back method applies to any income from a long-term contract within the meaning of section 460(f) that is required to be reported under the percentage of completion method (as modified by section 460) for regular income tax purposes or for alternative minimum tax purposes. If a taxpayer uses the percentage of completion-capitalized cost method for long-term contracts, the look-back method applies for regular tax purposes only to the portion (40, 70, or 90 percent, whichever applies) of the income from the contract that is reported under the percentage of completion

method. To the extent that the percentage-of-completion method is required to be used under § 1.460-1(g) with respect to income and expenses that are attributable to activities that benefit a related party's long-term contract, the look-back method also applies to these amounts, even if those activities are not performed under a contract entered into directly by the taxpayer.

(2) *Exceptions from section 460.* The look-back method generally does not apply to the regular taxable income from any long-term construction contract within the meaning of section 460(e)(4) that:

(i) Is a home construction contract within the meaning of section 460(e)(1)(A), or

(ii) Is not a home construction contract but is estimated to be completed within a 2-year period by a taxpayer whose average annual gross receipts for the 3 tax years preceding the tax year the contract is entered into do not exceed \$10,000,000 (as provided in section 460(e)(1)(B)). These contracts are not subject to the look-back method for regular tax purposes, even if the taxpayer uses a version of the percentage of completion method permitted under § 1.451-3, unless the taxpayer has properly changed its method of accounting for these contracts to the percentage of completion method as modified by section 460(b). The look-back method, however, applies to the alternative minimum taxable income from a contract of this type, unless it is exempt from the required use of the percentage of completion method under section 56(a)(3).

(3) *De minimis exception.* Notwithstanding that the percentage of completion method is otherwise required to be used, the look-back method does not apply to any long-term contract that:

(i) Is completed within 2 years of the contract commencement date, and

(ii) Has a gross contract price (as of the completion of the contract) that does not exceed the lesser of \$1,000,000 or 1 percent of the average annual gross receipts of the taxpayer for the 3 tax years preceding the tax year in which the contract is completed.

This de minimis exception is mandatory and, therefore, precludes applica-

tion of the look-back method to any contract that meets the requirements of the exception. The de minimis exception applies for purposes of computing both regular taxable income and alternative minimum taxable income. Solely for this purpose, the determination of whether a long-term contract meets the gross receipts test for both alternative minimum tax and regular tax purposes is made based only on the taxpayer's regular taxable income.

(4) *Alternative minimum tax.* For purposes of computing alternative minimum taxable income, section 56(a)(3) generally requires long-term contracts within the meaning of section 460(f) (generally without regard to the exceptions in section 460(e)) to be accounted for using only the percentage of completion method as defined in section 460(b), including the look-back method of section 460(b), with respect to tax years beginning after December 31, 1986. However, section 56(a)(3) (and thus the look-back method) does not apply to any long-term contract entered into after June 20, 1988, and before the beginning of the first tax year that begins after September 30, 1990, that meets the conditions of both section 460(e)(1)(A) and clauses (i) and (ii) of section 460(e)(1)(B), and does not apply to any long-term contract entered into in a tax year that begins after September 30, 1990, that meets the conditions of section 460(e)(1)(A). A taxpayer that applies the percentage of completion method (and thus the look-back method) to income from a long-term contract only for purposes of determining alternative minimum taxable income, and not regular taxable income, must apply the look-back method to the alternative minimum taxable income in the year of contract completion and other filing years whether or not the taxpayer was liable for the alternative minimum tax for the filing year or for any prior year. Interest is computed under the look-back method to the extent that the taxpayer's total tax liability (including the alternative minimum tax liability) would have differed if the percentage of completion method had been applied using actual, rather than estimated, contract price and contract costs.

(5) *Effective date.* The look-back method, including the de minimis exception, applies to long-term contracts entered into after February 28, 1986. With respect to activities that are subject to section 460 solely because they benefit a long-term contract of a related party, the look-back method generally applies only if the related party's long-term contract was entered into after June 20, 1988, unless a principal purpose of the related-party arrangement is to avoid the requirements of section 460.

(c) *Operation of the look-back method—*

(1) *Overview—(i) In general.* The amount of interest charged or credited to a taxpayer under the look-back method is computed in three steps. This paragraph (c) describes the three steps for applying the look-back method. These steps are illustrated by the examples in paragraph (h). The first step is to hypothetically reapply the percentage of completion method to all long-term contracts that are completed or adjusted in the current year (the “filing year”), using the actual, rather than estimated, total contract price and contract costs. Based on this reapplication, the taxpayer determines the amount of taxable income (and alternative minimum taxable income) that would have been reported for each year prior to the filing year that is affected by contracts completed or adjusted in the filing year if the actual, rather than estimated, total contract price and costs had been used in applying the percentage of completion method to these contracts, and to any other contracts completed or adjusted in a year preceding the filing year. If the percentage of completion method only applies to alternative minimum taxable income for contracts completed or adjusted in the filing year, only alternative minimum taxable income is re-computed in the first step. The second step is to compare what the tax liability would have been under the percentage of completion method (as reapplied in the first step) for each tax year for which the tax liability is affected by income from contracts completed or adjusted in the filing year (a “redetermination year”) with the most recent determination of tax liability for that year to produce a hypothetical under-

payments or overpayment of tax. The third step is to apply the rate of interest on overpayments designated under section 6621 of the Code, compounded daily, to the hypothetical underpayment or overpayment of tax for each redetermination year to compute interest that runs, generally, from the due date (determined without regard to extensions) of the return for the redetermination year to the due date (determined without regard to extensions) of the return for the filing year. The net amount of interest computed under the third step is paid by or credited to the taxpayer for the filing year. Paragraph (d) provides a simplified marginal impact method that simplifies the second step—the computation of hypothetical underpayments or overpayments of tax liability for redetermination years—and, in some cases, the third step—the determination of the time period for computing interest.

(ii) *Post-completion revenue and expenses—(A) In general.* Except as otherwise provided in section 460(b)(6) (see § 1.460-6(j) for method of electing) or § 1.460-6(e), a taxpayer must apply the look-back method to a long-term contract in the completion year and in any post-completion year for which the taxpayer must adjust total contract price or total allocable contract costs, or both, under the PCM. Any year in which the look-back method must be reapplied is treated as a filing year. See Example 3 of paragraph (h)(4) for an illustration of how the look-back method is applied to post-completion adjustments.

(B) *Completion.* A contract is considered to be completed for purposes of the look-back method in the year in which final completion and acceptance within the meaning of § 1.460-1(c)(3) have occurred.

(C) *Discounting of contract price and contract cost adjustments subsequent to completion; election not to discount—(1) General rule.* The amount of any post-completion adjustment to the total contract price or contract costs is discounted, solely for purposes of applying the look-back method, from its value at the time the amount is taken into account in computing taxable income to its value at the completion of the contract. The discount rate for this

purpose is the Federal mid-term rate under section 1274(d) in effect at the time the amount is properly taken into account. For purposes of applying the look-back method for the completion year, no amounts are discounted, even if they are received after the completion year.

(2) *Election not to discount.* Notwithstanding the general requirement to discount post-completion adjustments, a taxpayer may elect not to discount contract price and contract cost adjustments with respect to any contract. The election not to discount is to be made on a contract-by-contract basis and is binding with respect to all post-completion adjustments that arise with respect to a contract for which an election has been made. An election not to discount with respect to any contract is made by stating that an election is being made on the taxpayer's timely filed Federal income tax return (determined with regard to extensions) for the first tax year after completion in which the taxpayer takes into account (i.e., includes in income or deducts) any adjustment to the contract price or contract costs. See § 301.9100-8 of this chapter.

(3) *Year-end discounting convention.* In the absence of an election not to discount, any revisions to the contract price and contract costs must be discounted to their value as of the completion of the contract in reapplying the look-back method. For this purpose, the period of discounting is the period between the completion date of the contract and the date that any adjustment is taken into account in computing taxable income. Although taxpayers may use the period between the months in which these two events actually occur, in many cases, these dates may not be readily identifiable. Therefore, for administrative convenience, taxpayers are permitted to use the period between the end of the tax years in which these events occur as the period of discounting provided that the convention is used consistently with respect to all post-completion adjustments for all contracts of the taxpayer the adjustments to which are discounted. In that case, the taxpayer must use as the discount rate the Federal mid-term rate under section

1274(d) as of the end of the tax year in which any revision is taken into account in computing taxable income.

(D) *Revenue acceleration rule.* Section 460(b)(1) imposes a special rule that requires a taxpayer to include in gross income, for the tax year immediately following the year of completion, any previously unreported portion of the total contract price (including amounts that the taxpayer expects to receive in the future) determined as of that year, even if the percentage of completion ratio is less than 100 percent because the taxpayer expects to incur additional allocable contract costs in a later year. At the time any remaining portion of the contract price is includible in income under this rule, no offset against this income is permitted for estimated future contract costs. To achieve the requirement to report all remaining contract revenue without regard to additional estimated costs, a taxpayer must include only costs actually incurred through the end of the tax year in the denominator of the percentage of completion ratio in applying the percentage of completion method for any tax years after the year of completion. The look-back method also must be reapplied for the year immediately following the year of completion if any portion of the contract price is includible in income in that year by reason of section 460(b)(1). For purposes of reapplying the look-back method as a result of this inclusion in income, the taxpayer must only include in the denominator of the percentage of completion ratio the actual contract costs incurred as of the end of the year, even if the taxpayer reasonably expects to incur additional allocable contract costs. To the extent that costs are incurred in a subsequent tax year, the look-back method is reapplied in that year (or a later year if the delayed reapplication method is used), and the taxpayer is entitled to receive interest for the post-completion adjustment to contract costs. Because this reapplication occurs subsequent to the completion year, only the cumulative costs incurred as of the end of the reapplication year are includible in the denominator of the percentage of completion ratio.

(2) *Look-back Step One*—(i) *Hypothetical reallocation of income among prior tax years.* For each filing year, a taxpayer must allocate total contract income among prior tax years, by hypothetically applying the percentage of completion method to all contracts that are completed or adjusted in the filing year using the rules of this paragraph (c)(2). The taxpayer must reallocate income from those contracts among all years preceding the filing year that are affected by those contracts using the total contract price and contract costs, as determined as of the end of the filing year (“actual contract price and costs”), rather than the estimated contract price and contract costs. The taxpayer then must determine the amount of taxable income and the amount of alternative minimum taxable income that would have been reported for each affected tax year preceding the filing year if the percentage of completion method had been applied on the basis of actual contract price and contract costs in reporting income from all contracts completed or adjusted in the filing year and in any preceding year. If the percentage of completion method only applies to alternative minimum taxable income from the contract, only alternative minimum taxable income is recomputed in the first step. For purposes of reallocating income (and costs if the 10-percent year changes for a taxpayer using the 10-percent method of section 460(b)(5)) under the look-back method, the method of computing the percentage of completion ratio is the same method used to report income from the contract on the taxpayer’s return. (Thus, an election to use the 10-percent method or the simplified cost-to-cost method is taken into account). See Example 1 of paragraph (h)(2) for an illustration of Step One.

(ii) *Treatment of estimated future costs in year of completion.* If a taxpayer reasonably expects to incur additional allocable contract costs in a tax year subsequent to the year in which the contract is completed, the taxpayer includes the actual costs incurred as of the end of the completion year plus the additional allocable contract costs that are reasonably expected to be incurred (to the extent includible under

the taxpayer’s percentage of completion method) in the denominator of the percentage of completion ratio. The completion year is the only filing year for which the taxpayer may include additional estimated costs in the denominator of the percentage of completion ratio in applying the look-back method. If the look-back method is re-applied in any year after the completion year, only the cumulative costs incurred as of the end of the year of re-application are includible in the denominator of the percentage of completion ratio in reapplying the look-back method.

(iii) *Interim reestimates not considered.* The look-back method cannot be applied to a contract before it is completed. Accordingly, for purposes of applying Step One, the actual total contract price and contract costs are substituted for the previous estimates of total contract price and contract costs only with respect to contracts that have been completed in the filing year and in a tax year preceding the filing year. No adjustments are made under Step One for contracts that have not been completed prior to the end of the current filing year, even if, as of the end of this year, the estimated total contract price or contract costs for these uncompleted contracts is different from the estimated amount that was used during any tax year for which taxable income is recomputed with respect to completed contracts under the look-back method for the current filing year.

(iv) *Tax years in which income is affected.* In general, because income under the percentage of completion method is generally reported as costs are incurred, the taxable income and alternative minimum taxable income are recomputed only for each year in which allocable contract costs were incurred. However, there will be exceptions to this general rule. For example, a taxpayer may be required to cumulatively adjust the income from a contract in a year in which no allocable contract costs are incurred if the estimated total contract price or contract costs was revised in that year. However, in applying the look-back method, no contract income is allocated to

that year. Thus, there may be a difference between the amount of contract income originally reported for that year and the amount of contract income as reallocated. Similarly, because of the revenue acceleration rule of section 460(b)(1), income may be reported in the year immediately following the completion year even though no costs were incurred during that year and, in applying the look-back method in that year or another year, if additional costs are incurred or the contract price is adjusted in a later year, no income is allocated to the year immediately following the completion year.

(v) *Costs incurred prior to contract execution; 10-percent method*—(A) *General rule.* The look-back method does not require allocation of contract income to tax years before the contract was entered into. Costs incurred prior to the year a contract is entered into are first taken into account in the numerator of the percentage of completion ratio in the year the contract is entered into. A taxpayer using the 10-percent method must also use the 10-percent method in applying the look-back method, using actual total contract costs to determine the 10-percent year. Thus, contract income is never reallocated to a year before the 10-percent year as determined on the basis of actual contract costs. If the 10-percent year is earlier as a result of applying Step One of the look-back method, contract costs incurred up to and including the new 10-percent year (as determined based on actual contract costs), are reallocated from the original 10-percent year to the new 10-percent, and costs incurred in later years but before the old 10-percent year are reallocated to those years. If the 10-percent year is later as a result of applying Step One of the look-back method, contract costs incurred up to and including the new 10-percent year are reallocated from all prior years to the new 10-percent year. This is the only case in which costs are reallocated under the look-back method.

(B) *Example.* The application of the look-back method by a taxpayer using the 10-percent method is illustrated by the following example:

*Example.* Z elected to use the 10-percent method of section 460(b)(5) for reporting income under the percentage of completion method. Z entered into a contract in 1990 for a fixed price of \$1,000x. During 1990, Z incurred allocable contract costs of \$80x and estimated that it would incur a total of \$900x for the entire contract. Since \$80x is less than 10 percent of total estimated contract costs, Z reported no revenue from the contract in 1990 and deferred the \$80x of costs incurred. In 1991, Z incurred an additional \$620x of contract costs, and completed the contract. Accordingly, in its 1991 return, Z reported the entire contract price of \$1,000x, and deducted the \$620x of costs incurred in 1991 and the \$80x of costs incurred in 1990.

Under section 460(b)(5), the 10-percent method applies both for reporting contract income and the look-back method. Under the look-back method, since the costs incurred in 1990 (\$80x) exceed 10 percent of the actual total contract costs (\$700x), Z is required to allocate \$114x of contract revenue ( $\$80x/\$700x \times \$1,000x$ ) and the \$80x of costs incurred to 1990. Thus, application of the look-back method results in a net increase in taxable income for 1990 of \$34x, solely for purposes of the look-back method.

(vi) *Amount treated as contract price*—(A) *General rule.* The amount that is treated as total contract price for purposes of applying the percentage of completion method and reapplying the percentage of completion method under the look-back method under Step One includes all amounts that the taxpayer expects to receive from the customer. Thus, amounts are treated as part of the contract price as soon as it is reasonably estimated that they will be received, even if the all-events test has not yet been met.

(B) *Contingencies.* Any amounts related to contingent rights or obligations, such as incentive fees or amounts in dispute, are not separated from the contract and accounted for under a non-long-term contract method of accounting, notwithstanding any provision in § 1.460-4(b)(4)(i), to the contrary. Instead, those amounts are treated as part of the total contract price in applying the look-back method. For example, if an incentive fee under a contract to manufacture a satellite is payable to the taxpayer after a specified period of successful performance, the incentive fee is includible in the total contract price at the time and to the extent that it can reasonably be predicted that the performance

objectives will be met. . . A portion of the contract price that is in dispute is included in the total contract price at the time and to the extent that the taxpayer can reasonably expect the dispute will be resolved in the taxpayer's favor (without regard to when the taxpayer receives payment for the amount in dispute or when the dispute is finally resolved).

(C) *Change orders.* In applying the look-back method, a change order with respect to a contract is not treated as a separate contract unless the change order would be treated as a separate contract under the rules for severing and aggregating contracts provided in §1.460-1(e). Thus, if a change order is not treated as a separate contract, the contract price and contract costs attributable to the change order must be taken into account in allocating contract income to all tax years affected by the underlying contract.

(3) *Look-back Step Two: Computation of hypothetical overpayment or underpayment of tax—(i) In general.* Step Two involves the computation of a hypothetical overpayment or underpayment of tax for each year in which the tax liability is affected by income from contracts that are completed or adjusted in the filing year (a “redetermination year”). The application of Step Two depends on whether the taxpayer uses the simplified marginal impact method contained in paragraph (d) or the actual method described in this paragraph (c)(3). The remainder of this paragraph (c)(3) does not apply if a taxpayer uses the simplified marginal impact method.

(ii) *Redetermination of tax liability.* Under the method described in this paragraph (c)(3) (the “actual method”), a taxpayer, first, must determine what its regular and alternative minimum tax liability would have been for each redetermination year if the amounts of contract income allocated in Step One for all contracts completed or adjusted in the filing year and in any prior year were substituted for the amounts of contract income reported under the percentage of completion method on the taxpayer's original return (or as subsequently adjusted on examination, or by amended return). See Example 2

of paragraph (h)(3) for an illustration of Step Two.

(iii) *Hypothetical underpayment or overpayment.* After redetermining the income tax liability for each tax year affected by the reallocation of contract income, the taxpayer then determines the amount, if any, of the hypothetical underpayment or overpayment of tax for each of these redetermination years. The hypothetical underpayment or overpayment for each affected year is the difference between the tax liability as redetermined under the look-back method for that year and the amount of tax liability determined as of the latest of the following:

(A) The original return date;

(B) The date of a subsequently amended or adjusted return (if, however, the amended return is due to a carryback described in section 6611(f), see paragraph (c)(4)(iii)); or,

(C) The last previous application of the look-back method (in which case, the previous hypothetical tax liability is used).

(iv) *Cumulative determination of tax liability.* The redetermination of tax liability resulting from previous applications of the look-back method is cumulative. Thus, for example, in computing the amount of a hypothetical overpayment or underpayment of tax for a redetermination year, the current hypothetical tax liability is compared to the hypothetical tax liability for that year determined as of the last previous application of the look-back method.

(v) *Years affected by look-back only.* A redetermination of income tax liability under Step Two is required for every tax year for which the tax liability would have been affected by a change in the amount of income or loss for any other year for which a redetermination is required. For example, if the allocation of contract income under Step One changed the amount of a net operating loss that was carried back to a year preceding the year the taxpayer entered into the contract, the tax liability for the earlier year must be redetermined.

(vi) *Definition of tax liability.* For purposes of Step Two, the income tax liability must be redetermined by taking into account all applicable additions to tax, credits, and net operating loss

carrybacks and carryovers. Thus, the tax, if any, imposed under section 55 (relating to alternative minimum tax) must be taken into account. For example, if the taxpayer did not pay alternative minimum tax, but would have paid alternative minimum tax for that year if actual rather than estimated contract price and costs had been used in determining contract income for the year, the amount of any hypothetical overpayment or underpayment of tax must be determined by comparing the hypothetical total tax liability (including hypothetical alternative minimum tax liability) with the actual tax liability for that year. The effect of taking these items into account in applying the look-back method is illustrated in Examples (4) through (7) of paragraphs (h)(5) through (h)(8) below.

(4) *Look-back Step Three: Calculation of interest on underpayment or overpayment*—(i) *In general.* After determining a hypothetical underpayment or overpayment of tax for each redetermination year, the taxpayer must determine the interest charged or credited on each of these amounts. Interest on the amount determined under Step Two is determined by applying the overpayment rate designated under section 6621, compounded daily. In general, the time period over which interest is charged on hypothetical underpayments or credited on hypothetical overpayments begins at the due date (not including extensions) of the return for the redetermination year for which the hypothetical underpayment or overpayment determined in Step Two is computed. This time period generally ends on the earlier of:

(A) The due date (not including extensions) of the return for the filing year, and

(B) The date both

(1) The income tax return for the filing year is filed, and

(2) The tax for that year has been paid in full. If a taxpayer uses the simplified marginal impact method contained in paragraph (d), the remainder of this paragraph (c)(4) does not apply.

(ii) *Changes in the amount of a loss or credit carryback or carryover.* The time period for determining interest may be different in cases involving loss or credit carrybacks or carryovers in

order to properly reflect the time period during which the taxpayer (in the case of an underpayment) or the Government (in the case of an overpayment) had the use of the amount determined to be a hypothetical underpayment or overpayment. Thus, if a reallocation of contract income under Step One results in an increase or decrease to a net operating loss carryback (but not a carryforward), the interest due or to be refunded must be computed on the increase or decrease in tax attributable to the change to the carryback only from the due date (not including extensions) of the return for the redetermination year that generated the carryback and not from the due date of the return for the redetermination year in which the carryback was absorbed. In the case of a change in the amount of a carryover as a result of applying the look-back method, interest is computed from the due date of the return for the year in which the carryover was absorbed. See Examples (8) and (9) of paragraph (h)(9) for an illustration of these rules.

(iii) *Changes in the amount of tax liability that generated a subsequent refund.* If the amount of tax liability for a redetermination year (as reported on the taxpayer's original return, as subsequently adjusted on examination, as adjusted by amended return, or as redetermined by the last previous application of the look-back method) is decreased by the application of the look-back method, and any portion of the redetermination year tax liability was absorbed by a loss or credit carryback arising in a year subsequent to the redetermination year, the look-back method applies as follows to properly reflect the time period of the use of the tax overpayment. To the extent the amount of tax absorbed because of the carryback exceeds the total hypothetical tax liability for the year (as redetermined under the look-back method) the taxpayer is entitled to receive interest only until the due date (not including extensions) of the return for the year in which the carryback arose.

*Example.* Upon the completion of a long-term contract in 1990, the taxpayer redetermines its tax liability for 1988 under the

look-back method. This redetermination results in a hypothetical reduction of tax liability from \$1,500x (actual liability originally reported) to \$1,200x (hypothetical liability). In addition, the taxpayer had already received a refund of some or all of the actual 1988 tax by carrying back a net operating loss (NOL) that arose in 1989. The time period over which interest would be computed on the hypothetical overpayment of \$300x for 1988 would depend on the amount of the refund generated by the carryback, as illustrated by the following three alternative situations:

(A) If the amount refunded because of the NOL is \$1,500x: interest is credited to the taxpayer on the entire hypothetical overpayment of \$300x from the due date of the 1988 return, when the hypothetical overpayment occurred, until the due date of the 1989 return, when the taxpayer received a refund for the entire amount of the 1988 tax, including the hypothetical overpayment.

(B) If the amount refunded because of the NOL is \$1,000x: interest is credited to the taxpayer on the entire amount of the hypothetical overpayment of \$300x from the due date of the 1988 return, when the hypothetical overpayment occurred, until the due date of the 1990 return. In this situation interest is credited until the due date of the return for the completion year of the contract, rather than the due date of the return for the year in which the carryback arose, because the amount refunded was less than the redetermined tax liability. Therefore, no portion of the hypothetical overpayment is treated as having been refunded to the taxpayer before the filing year.

(C) If the amount refunded because of the NOL is \$1,300x: interest is credited to the taxpayer on \$100x (\$1,300x - \$1,200x) from the due date of the 1988 return until the due date of the 1989 return because only this portion of the total hypothetical overpayment is treated as having been refunded to the taxpayer before the filing year. However, the taxpayer did not receive a refund for the remaining \$200x of the overpayment at that time and, therefore, is credited with interest on \$200x through the due date of the tax return for 1990, the filing year. See Examples (10) and (11) of paragraph (h)(9) for a further illustration of this rule.

(d) *Simplified marginal impact method*—

(1) *Introduction.* This paragraph (d) provides a simplified method for calculating look-back interest. Any taxpayer may elect this simplified marginal impact method, except that pass-through entities described in paragraph (d)(4) of this section are required to apply the simplified marginal impact method at the entity level with respect to domestic contracts and the owners

of those entities do not apply the look-back method to those contracts. Under the simplified marginal impact method, a taxpayer calculates the hypothetical underpayments or overpayments of tax for a prior year based on an assumed marginal tax rate. A taxpayer electing to use the simplified marginal impact method must use the method for each long-term contract for which it reports income (except with respect to domestic contracts if the taxpayer is an owner in a widely held pass-through entity that is required to use the simplified marginal impact method at the entity level for those contracts).

(2) *Operation*—(i) *In general.* Under the simplified marginal impact method, income from those contracts that are completed or adjusted in the filing year is first reallocated in accordance with the procedures of Step One contained in paragraph (c)(2) of this section. Step Two is modified in the following manner. The hypothetical underpayment or overpayment of tax for each year of the contract (a “redetermination year”) is determined by multiplying the applicable regular tax rate (as defined in paragraph (d)(2)(iii)) by the increase or decrease in regular taxable income (or, if it produces a greater amount, by multiplying the applicable alternative minimum tax rate by the increase or decrease in alternative minimum taxable income, whether or not the taxpayer would have been subject to the alternative minimum tax) that results from reallocating income to the tax year under Step One. Generally, the product of the alternative minimum tax rate and the increase or decrease in alternative minimum taxable income will be the greater of the two amounts described in the preceding sentence only with respect to contracts for which a taxpayer uses the full percentage of completion method only for alternative minimum tax purposes and uses the completed contract method, or the percentage of completion-capitalized cost method, for regular tax purposes. Step Three is then applied. Interest is credited to the taxpayer on the net overpayment and is charged to the taxpayer on the net underpayment for each redetermination year from the due date (determined without regard to

extensions) of the return for the redetermination year until the earlier of

(A) The due date (determined without regard to extensions) of the return for the filing year, and

(B) The first date by which both the return is filed and the tax is fully paid.

(ii) *Applicable tax rate.* For purposes of determining hypothetical underpayments or overpayments of tax under the simplified marginal impact method, the applicable regular tax rate is the highest rate of tax in effect for the redetermination year under section 1 in the case of an individual and under section 11 in the case of a corporation. The applicable alternative minimum tax rate is the rate of tax in effect for the taxpayer under section 55(b)(1). The highest rate is determined without regard to the taxpayer's actual rate bracket and without regard to any additional surtax imposed for the purpose of phasing out multiple tax brackets or exemptions.

(iii) *Overpayment ceiling.* The net hypothetical overpayment of tax for any redetermination year is limited to the taxpayer's total federal income tax liability for the redetermination year reduced by the cumulative amount of net hypothetical overpayments of tax for that redetermination year resulting from earlier applications of the look-back method. If the reallocation of contract income results in a net overpayment of tax and this amount exceeds the actual tax liability (as of the filing year) for the redetermination year, as adjusted for past applications of the look-back method and taking into account net operating loss, capital loss, or credit carryovers and carrybacks to that year, the actual tax so adjusted is treated as the overpayment for the redetermination year. This overpayment ceiling does not apply when the simplified marginal impact method is applied at the entity level by a widely held pass-through entity in accordance with paragraph (d)(4) of this section.

(iv) *Example.* The application of the simplified marginal impact method is illustrated by the following example:

*Example.* Corporation X, a calendar-year taxpayer, reports income from long-term contracts and elected the simplified marginal impact method when it filed its income

tax return for 1989. X uses only the percentage of completion method for both regular taxable income and alternative minimum taxable income. X completed contracts A, B, and C in 1989 and, therefore, was required to apply the look-back method in 1989. Income was actually reported for these contracts in 1987, 1988, and 1989. X's applicable tax rate, as determined under section 11, for the redetermination years 1987 and 1988 was 40 percent and 34 percent, respectively. The amount of contract income originally reported and reallocated for contracts A, B, and C, and the net overpayments and underpayments for the redetermination years are as follows:

|  | 1987     | 1988     |
|--|----------|----------|
| <b>Contract A:</b>                                     |          |          |
| Originally reported .....                              | \$5,000x | \$4,000x |
| Reallocated .....                                      | 3,000x   | 5,000x   |
| Increase/(Decrease) .....                              | (2,000x) | 1,000x   |
| <b>Contract B:</b>                                     |          |          |

| <b>Final (Underpayment)/Overpayment</b> .....          | 1,500x   | (850x)   |

Under the simplified marginal impact method, X determined a tentative hypothetical net overpayment for 1987 and a net underpayment for 1988. X determined these amounts by first aggregating the difference for contracts A, B, and C between the amount of contract price originally reported and the amount of contract price as reallocated and, then, applying the highest regular tax rate to the aggregate decrease in income for 1987 and the aggregate increase in income for 1988.

However, X's overpayment for 1987 is subject to a ceiling based on X's total tax liability. Because the tentative net overpayment of tax for 1987 exceeds the actual tax liability for that year after taking into account carryovers and carrybacks to that year, the final overpayment under the simplified marginal impact method is the amount of tax liability paid instead of the tentative net overpayment. Since application of the look-back method for 1988 results in a tentative underpayment of tax, it is not subject to a ceiling. If the look-back method is applied in 1991, the ceiling amount for 1987 will be zero and the ceiling amount for 1988 will be \$1,350.

X is entitled to receive interest on the hypothetical overpayment from March 15, 1988,

to March 15, 1990. X is required to pay interest on the underpayment from March 15, 1989, to March 15, 1990.

(3) *Anti-abuse rule.* If the simplified marginal impact method is used with respect to any long-term contract (including a contract of a widely held pass-through entity), the district director may recompute interest for the contract (including domestic contracts of widely held pass-through entities) under the look-back method using the actual method (and without regard to the simplified marginal impact method). The district director may make such a recomputation only if the amount of income originally reported with respect to the contract for any redetermination year exceeds the amount of income reallocated under the look-back method with respect to that contract for that year (using actual contract price and contract costs) by the lesser of \$1,000,000 or 20 percent of the amount of income as reallocated (*i.e.*, based on actual contract price and contract costs) under the look-back method with respect to that contract for that year. In determining whether to exercise this authority upon examination of the Form 8697, the district director may take into account whether the taxpayer overreported income for a purpose of receiving interest under the look-back method on a hypothetical overpayment determined at the applicable tax rate. The district director also may take into account whether the taxpayer underreported income for the year in question with respect to other contracts. Notwithstanding the look-back method, the district director may require an adjustment to the tax liability for any open tax year if the taxpayer did not apply the percentage of completion method properly on its original return.

(4) *Application—(i) Required use by certain pass-through entities—(A) General rule.* The simplified marginal impact method is required to be used with respect to income reported from domestic contracts by a pass-through entity that is either a partnership, an S corporation, or a trust, and that is not closely held. With respect to contracts described in the preceding sentence, the simplified marginal impact method is applied by the pass-through entity at

the entity level. For determining the amount of any hypothetical underpayment or overpayment, the applicable regular and alternative minimum tax rates, respectively, are generally the highest rates of tax in effect for corporations under section 11 and section 55 (b)(1). However, the applicable regular and alternative minimum tax rates are the highest rates of tax imposed on individuals under section 1 and section 55 (b)(1) if, at all times during the redetermination year involved (*i.e.*, the year in which the hypothetical increase or decrease in income arises), more than 50 percent of the interests in the entity were held by individuals directly or through 1 or more pass-through entities.

(B) *Closely held.* A pass-through entity is closely held if, at any time during any redetermination year, 50 percent of more (by value) of the beneficial interests in that entity are held (directly or indirectly) by or for 5 or fewer persons. For this purpose, the term “person” has the same meaning as in section 7701(a)(1), except that a pass-through entity is not treated as a person. In addition, the constructive ownership rules of section 1563(e) apply by substituting the term “beneficial interest” for the term “stock” and by substituting the term “pass-through entity” for the term, “corporation” used in that section, as appropriate, for purposes of determining whether a beneficial interest in a pass-through entity is indirectly owned by any person.

(C) *Examples.* The following examples illustrate the application of the rules of paragraph (d)(4)(i):

*Example 1.* P, a partnership, began a long-term contract on March 1, 1986, and completed this contract in its tax year ending December 31, 1989. P used the percentage of completion method for all contract income. Substantially all of the income from the contract arose from U.S. sources. At all times during all of the years for which income was required to be reported under the contract, exactly 25 percent of the value of P’s interests was owned by Corporation M. The remaining 75 percent of the value of P’s interests was owned in equal shares by 15 unrelated individuals, who are also unrelated to Corporation M. M’s ownership of P represents less than 50 percent of the value of the beneficial interests in P, and, therefore, viewed alone, is insufficient to make P a

closely held partnership. In addition, because no 4 of the individual owners together own 25 percent or more of the remaining value of P's beneficial interests, there is no group of 5 owners that together own, directly or indirectly, 50 percent or more by value of the beneficial interests in P. Therefore, P is not closely held pass-through entity.

Because P is not a closely held pass-through entity, and because P completed the contract after the effective date of section 460(b)(4), P is required to use the simplified marginal impact method. Any interest computed under the look-back method will be paid to, or collected from, P, rather than its partners, and must be reported to each of the partners on Form 1065 as interest income or expense. Further, assume that, for the redetermination years, Corporation M is subject to alternative minimum tax at the rate of 20 percent and 3 of the individuals who own interests in P are subject to the highest marginal tax rate of 33 percent in 1988. Regardless of the actual marginal tax rates of its partners, P is required to determine the underpayment or overpayment of tax for each redetermination year at the entity level by applying a single rate to the increase or decrease in income resulting from the reallocation of contract income under the look-back method. Because more than 50 percent of the interests in P are held by individuals, P must use the highest rate specified in section 1 for each redetermination year. Thus, the rate applied by P is 50 percent for 1986, 38.5 percent for 1987, and 28 percent for 1988.

*Example 2.* Assume the same facts as in Example 1, except that one of the individuals, Individual I, who directly owns 5 percent of the value of the interests of P, also owns 100 percent of the stock of Corporation M. Section 1563(e)(4) of the Code provides that stock owned directly or indirectly by or for a corporation is considered to be owned by any person who owns 5 percent or more in value of its stock in that proportion which the value of the stock which that person so owns bears to the value of all the stock in that corporation. Because section 460(b)(4)(C)(iii) and this paragraph (d)(4) provide that rules similar to the constructive ownership rules of section 1563(e) apply in determining whether a pass-through entity is closely held, all of M's interest in P is attributed to I because I owns 100 percent of the value of the stock in M. Accordingly, because I's direct 5 percent and constructive 25 percent ownership of P, plus the interests owned by any 4 other individual partners, equals 50 percent or more of the value of the beneficial interests of P, P is a closely held pass-through entity within the meaning of section 460(b)(4)(C)(iii). Therefore, P cannot use the simplified marginal impact method at the entity level. Accordingly, each of the partners of P must separately apply the look-back method to their respective inter-

ests in the income and expenses attributable to the contract, but each partner may elect to use the simplified marginal impact method with respect to the partner's share of income from the contract.

(D) *Domestic contracts—(1) General rule.* A domestic contract is any contract substantially all of the income of which is from sources in the United States. For this purpose, “substantially all” of the income from a long-term contract is considered to be from United States sources if 95 percent or more of the gross income from the contract is from sources within the United States as determined under the rules in sections 861 through 865.

(2) *Portion of contract income sourced.* In determining whether substantially all of the gross income from a long-term contract is from United States sources, taxpayers must apply the allocation and apportionment principles of sections 861 through 865 only to the portion of the contract accounted for under the percentage of completion method. Under the percentage of completion method, gross income from a long-term contract includes all payments to be received under the contract (*i.e.*, any amounts treated as contract price). Similarly, all costs taken into account in the computation of taxable income under the percentage of completion method are deducted from gross income rather than added to a cost of goods sold account that reduces gross income. Therefore, allocable contract costs are not considered in determining whether a long-term contract is a domestic contract or a foreign contract, even if, under the taxpayer's facts, the allocation of contract costs to any portion of a contract not accounted for under the percentage of completion method would affect the relative percentages of United States and foreign source gross income from the entire contract if this portion of the contract were taken into account in applying the 95-percent test.

(E) *Application to foreign contracts.* If a widely held pass-through entity has some foreign contracts and some domestic contracts, the owners of the pass-through entity each apply the look-back method (using, if they elect,

the simplified marginal impact method) to their respective share of the income and expense from foreign contracts. Moreover, in applying the look-back method to foreign contracts at the owner level, the owners do not take into account their share of increases or decreases in contract income resulting from the application of the simplified marginal impact method with respect to domestic contracts at the entity level.

(F) *Effective date.* The simplified marginal impact method must be applied to pass-through entities described in paragraph (d)(4)(i) of this section with respect to domestic contracts completed or adjusted in tax years for which the due date of the return (determined with regard to extensions) of the pass-through entity is after November 9, 1988.

(ii) *Elective use—(A) General rule.* As provided in paragraph (d)(4)(i) of this section, the simplified marginal impact method must be used by certain pass-through entities with respect to domestic contracts. C corporations, individuals, and owners of closely held pass-through entities may elect the simplified marginal impact method. Owners of other pass-through entities may also elect the simplified marginal impact method with respect to all contracts other than those for which the simplified marginal impact method is required to be applied at the entity level. This rule applies to foreign contracts of widely held pass-through entities. In the case of an electing owner in a pass-through entity, the simplified marginal impact method is applied at the owner level, instead of at the entity level, with respect to the owner's share of the long-term contract income and expense reported by the pass-through entity.

(B) *Election requirements.* A taxpayer elects the simplified marginal impact method by stating that the election is being made on a timely filed income tax return (determined with regard to extensions) for the first tax year the election is to apply. An election to use the simplified marginal impact method applies to all applications of the look-back method to all eligible long-term contracts for the tax year for which the election is made and for any subse-

quent tax year. The election may not be revoked without the consent of the Commissioner.

(C) *Consolidated group consistency rule.* In the case of a consolidated group of corporations as defined in §1.1502-1(h), an election to use the simplified marginal impact method is made by the common parent of the group. The election is binding on all other affected members of the group (including members that join the group after the election is made with respect to all applications of the look-back method after joining). If a member subsequently leaves the group, the election remains binding as to that member unless the Commissioner consents to a revocation of the election. If a corporation using the simplified marginal impact method joins a group that does not use the method, the election is automatically revoked with respect to all applications of the look-back method after it joins the group.

(e) *Delayed reapplication method—(1) In general.* For purposes of reapplying the look-back method after the year of contract completion, a taxpayer may elect the delayed reapplication method to minimize the number of required reapplications of the look-back method. Under this method, the look-back method is reapplied after the year of completion of a contract (or after a subsequent application of the look-back method) only when the first one of the following conditions is met with respect to the contract:

(i) The net undiscounted value of increases or decreases in the contract price occurring since the time of the last application of the look-back method exceeds the lesser of \$1,000,000 or 10 percent of the total contract price as of that time,

(ii) The net undiscounted value of increases or decreases in the contract costs occurring since the time of the last application of the look-back method exceeds the lesser of \$1,000,000 or 10 percent of the total contract price as of that time,

(iii) The taxpayer goes out of existence,

(iv) The taxpayer reasonably believes the contract is finally settled and closed, or

(v) Neither condition (e)(1) (i), (ii), (iii), nor (iv) above is met by the end of the fifth tax year that begins after the last previous application of the look-back method.

(2) *Time and manner of making election.* An election to use the delayed reapplication method may be made for any filing year for which the due date of the return (determined with regard to extensions) is after June 12, 1990. The election is made by a statement to that effect on the taxpayer's timely filed Federal income tax return (determined with regard to extensions) for the first tax year the election is to be effective. An election to use the delayed reapplication method is binding with respect to all long-term contracts for which the look-back method would be reapplied without regard to the election in the year of election and any subsequent year unless the Commissioner consents to a revocation of the election. In the case of a consolidated group of corporations as defined in § 1.1502-1(h), an election to use the delayed reapplication method is made by the common parent of the group. The election is binding on all other affected members of the group (including members that join the group after the election is made with respect to contracts adjusted after joining). If a member subsequently leaves the group, the election remains binding as to that member unless the Commissioner consents to a revocation of the election. If a corporation that has made the election joins a consolidated group that has not made the election, the election is treated as revoked with respect to contracts adjusted after joining.

(3) *Examples.* The operation of this delayed reapplication method is illustrated by the following examples:

*Example 1.* X completes a contract in 1987, and applies the look-back method when its return for 1987 is filed. X properly uses \$600,000 as the actual contract price in applying the look-back method. In 1990, as a result of the settlement of a dispute with its customer, X redetermines total contract price to be \$640,000, and includes \$40,000 in gross income. On its return for 1990, X states it is electing the delayed reapplication method. X is not required to reapply the look-back method at that time, because \$40,000 does not exceed the lesser of \$1,000,000 or 10 percent of the unadjusted contract price of \$600,000, and

5 years have not passed since the last application of the look-back method.

*Example 2.* Assume the same facts as in Example 1, except that at the end of 1992, the fifth year after completion of the contract, no other adjustments to contract price or contract costs have occurred. X is required to reapply the look-back method in 1992 and, accordingly, redetermine its tax liability for each redetermination year. After redetermining the underpayment of tax for those years, X must compute the amount of interest charged on the underpayments. Although 1992 is the filing year, interest is due on the amount of each underpayment resulting from the adjustment only from the due date of the return for each redetermination year to the due date of the return for 1990 because the tax liability for the adjustment was fully paid in 1990. However, from the due of the 1990 return until the due date of the 1992 return, when the look-back method is reapplied for the adjustment, interest is due on the amount of interest attributable to the underpayments.

(f) *Look-back reporting—(1) Procedure.* The amount of any interest due from, or payable to, a taxpayer as a result of applying the look-back method is computed on Form 8697 for any filing year. In general, the look-back method is applied by the taxpayer that reports income from a long-term contract. See paragraph (g) of this section to determine who is responsible for applying the look-back method when, prior to the completion of a long-term contract, there is a transaction that changes the taxpayer that reports income from the contract.

(2) *Treatment of interest on return—(i) General rule.* The amount of interest required to be paid by a taxpayer is treated as an income tax under subtitle A, but only for purposes of subtitle F of the Code (other than sections 6654 and 6655), which addresses tax procedures and administration. Thus, a taxpayer that fails to pay the amount of interest due is subject to any applicable penalties under subtitle F, including, for example, an underpayment penalty under section 6651, and the taxpayer also is liable for underpayment interest under section 6601. However, interest required to be paid under the look-back method is treated as interest expense for purposes of computing taxable income under subtitle A, even though it is treated as income tax liability for subtitle F purposes. Interest received under the look-back method is treated

as taxable interest income for all purposes, and is not treated as a reduction in tax liability or a tax refund. The determination of whether or not interest computed under the look-back method is treated as tax is determined on a “net” basis for each filing year. Thus, if a taxpayer computes for the current filing year both hypothetical overpayments and hypothetical underpayments for prior years, the taxpayer has an increase in tax only if the interest computed on the underpayments for all those prior years exceeds the interest computed on the overpayments for all those prior years, for all contracts completed or adjusted for the year.

(ii) *Timing of look-back interest.* For purposes of determining taxable income under subtitle A of the Code, any amount of interest payable to the taxpayer under the look-back method is includible in gross income as interest income in the tax year it is properly taken into account under the taxpayer’s method of accounting for interest income. Any amount of interest required to be paid is taken into account as interest expense arising from an underpayment of income tax in the tax year it is properly taken into account under the taxpayer’s method of accounting for interest expense. Thus, look-back interest required to be paid by an individual, or by a pass-through entity on behalf of an individual owner (or beneficiary) under the simplified marginal impact method, is personal interest and, therefore, is disallowed in accordance with §1.163-9T(b)(2). Interest determined at the entity level under the simplified marginal impact method is allocated among the owners (or beneficiaries) for reporting purposes in the same manner that interest income and interest expense are allocated to owners (or beneficiaries) and subject to the requirements of section 704 and any other applicable rules.

(3) *Statute of limitations and compounding of interest on look-back interest.* For guidance on the statute of limitations applicable to the assessment and collection of look-back interest owed by a taxpayer, see sections 6501 and 6502. A taxpayer’s claim for credit or refund of look-back interest previously paid by or collected from a taxpayer is a claim for credit or refund

of an overpayment of tax and is subject to the statute of limitations provided in section 6511. A taxpayer’s claim for look-back interest (or interest payable on look-back interest) that is not attributable to an amount previously paid by or collected from a taxpayer is a general, non-tax claim against the federal government. For guidance on the statute of limitations that applies to general, non-tax claims against the federal government, see 28 U.S.C. sections 2401 and 2501. For guidance applicable to the compounding of interest when the look-back interest is not paid, see sections 6601 to 6622.

(g) *Mid-contract change in taxpayer—*

(1) *In general.* The rules in this paragraph (g) apply if, as described in §1.460-4(k), prior to the completion of a long-term contract accounted for using the PCM or the PCCM by a taxpayer (old taxpayer), there is a transaction that makes another taxpayer (new taxpayer) responsible for accounting for income from the same contract. The rules governing constructive completion transactions are provided in paragraph (g)(2) of this section, while the rules governing step-in-the-shoes transactions are provided in paragraph (g)(3) of this section. For purposes of this paragraph, pre-transaction years are all taxable years of the old taxpayer in which the old taxpayer accounted for (or should have accounted for) gross receipts from the contract, and post-transaction years are all taxable years of the new taxpayer in which the new taxpayer accounted for (or should have accounted for) gross receipts from the contract.

(2) *Constructive completion transactions.* In the case of a transaction described in §1.460-4(k)(2)(i) (constructive completion transaction), the look-back method is applied by the old taxpayer with respect to pre-transaction years upon the date of the transaction and, if the new taxpayer uses the PCM or the PCCM to account for the contract, by the new taxpayer with respect to post-transaction years upon completion of the contract. The contract price and allocable contract costs to be taken into account by the old taxpayer or the new taxpayer in applying the look-back method are described in §1.460-4(k)(2).

(3) *Step-in-the-shoes transactions*—(i) *General rules.* In the case of a transaction described in §1.460-4(k)(3)(i) (step-in-the-shoes transaction), the look-back method is not applied at the time of the transaction, but is instead applied for the first time when the contract is completed by the new taxpayer. Upon completion of the contract, the look-back method is applied by the new taxpayer with respect to both pre-transaction years and post-transaction years, taking into account all amounts reasonably expected to be received by either the old or new taxpayer and all allocable contract costs incurred during both periods as described in §1.460-4(k)(3). The new taxpayer is liable for filing the Form 8697 and for interest computed on hypothetical underpayments of tax, and is entitled to receive interest with respect to hypothetical overpayments of tax, for both pre- and post-transaction years. The old taxpayer will be secondarily liable for any interest required to be paid with respect to pre-transaction years reduced by any interest on pre-transaction overpayments.

(ii) *Application of look-back method to pre-transaction period*—(A) *Contract price.* The actual contract price for pre-transaction taxable years must be determined by the new taxpayer without regard to any contract price adjustment described in paragraph (k)(3)(iv)(B)(1) of this section.

(B) *Method.* The new taxpayer may apply the look-back method to each pre-transaction taxable year that is a redetermination year using the simplified marginal impact method described in paragraph (d) of this section (regardless of whether or not the old taxpayer would have actually used that method and without regard to the tax liability ceiling). But see paragraph (d)(4) of this section, which requires use of the simplified marginal impact method by certain pass-through entities.

(C) *Interest accrual period.* With respect to any hypothetical underpayment or overpayment of tax for a pre-transaction taxable year, interest accrues from the due date of the old taxpayer's tax return (not including extensions) for the taxable year of the underpayment or overpayment until

the due date of the new taxpayer's return (not including extensions) for the completion year or the year of a post-completion adjustment, whichever is applicable.

(D) *Information old taxpayer must provide*—(1) *In general.* Except as provided in paragraph (g)(3)(ii)(D)(2) of this section, in order to help the new taxpayer to apply the look-back method with respect to pre-transaction taxable years, any old taxpayer that accounted for income from a long-term contract under the PCM or PCCM for either regular or alternative minimum tax purposes is required to provide the information described in this paragraph to the new taxpayer by the due date (not including extensions) of the old taxpayer's income tax return for the first taxable year ending on or after a step-in-the-shoes transaction described in §1.460-4(k)(3)(i). The required information is as follows—

(i) The portion of the contract reported by the old taxpayer under PCM for regular and alternative minimum tax purposes (*i.e.*, whether the old taxpayer used PCM, the 40/60 PCCM method, or the 70/30 PCCM method);

(ii) Any submethods used in the application of PCM (*e.g.*, the simplified cost-to-cost method or the 10-percent method);

(iii) The amount of total contract price reported by year;

(iv) The numerator and the denominator of the completion factor by year;

(v) The due date (not including extensions) of the old taxpayer's income tax returns for each taxable year in which income was required to be reported;

(vi) Whether the old taxpayer was a corporate or a noncorporate taxpayer by year; and

(vii) Any other information required by the Commissioner by administrative pronouncement.

(2) *Special rules for certain pass-through entity transactions.* For purposes of paragraph (g)(3)(ii)(D)(1) of this section, in the case of a transaction described in §1.460-4(k)(3)(i)(I), the contributing partner is treated as the old taxpayer, and the partnership is treated as the new taxpayer. In the case of transactions described in §1.460-4(k)(3)(i)(F), (G), (J), (K), or (L), the old taxpayer is not required to provide the

information described in paragraph (g)(3)(ii)(D)(1) of this section, because information necessary for the new taxpayer to apply the look-back method is provided by the pass-through entity. This paragraph (g)(3)(ii)(D) is applicable for transactions on or after August 6, 2003.

(iii) *Application of look-back method to post-transaction years.* With respect to post-transaction taxable years, the new taxpayer must use the same look-back method it uses for other contracts (i.e., the simplified marginal impact method or the actual method) to determine the amount of any hypothetical overpayment or underpayment of tax and the time period for computing interest on these amounts.

(iv) *S corporation elections.* Following the conversion of a C corporation into an S corporation, the look-back method is applied at the entity level with respect to contracts entered into prior to the conversion, notwithstanding section 460(b)(4)(B)(i).

(4) *Effective date.* Except as provided in paragraph (g)(3)(ii)(D) of this section, this paragraph (g) is applicable for transactions on or after May 15, 2002.

(h) *Examples—(1) Overview.* This paragraph provides computational examples of the rules of this section. Except as otherwise noted, the examples involve calendar-year taxpayers and involve long-term contracts subject to section 460 that are accounted for using the percentage of completion method, rather than the percentage of completion-capitalized cost method. If the percentage of completion-capitalized cost method were used by a taxpayer described in the examples, the amounts of contract income and expenses shown in the examples would be reduced, for purposes of determining regular taxable income, to the appropriate fraction (40, 70, or 90 percent) of contract items accounted for under the percentage of completion method. Tens of thousands of dollars (\$ 00,000's) are omitted from the figures in the examples. The contracts described in the examples are assumed to be the taxpayers' only contracts that are subject to the look-back method of section 460. Except as otherwise stated, the exam-

ples assume that the taxpayer has no adjustments and preferences for purposes of section 55, so that alternative minimum taxable income is the same as taxable income, and no alternative minimum tax is imposed for the years involved. The examples assume that the taxpayer does not elect the 10-percent method, the simplified marginal impact method, or the delayed re-application method.

(2) *Step One.* The following example illustrates the application of paragraph (c)(2):

*Example 1.* In 1989, W completes three long-term contracts, A, B, and C, entered into on January 1 of 1986, 1987, and 1988, respectively. For Contract A, W used the completed contract method of accounting. For Contract B, W used the percentage of completion-capitalized cost method of accounting, taking into account 60 percent of contract income under W's normal method of accounting, which was the completed contract method. For Contract C, W used the percentage of completion method of accounting. The total price for each contract was \$1,000. In computing alternative minimum taxable income, W is required to use the percentage of completion method for Contracts B and C. W used regular tax costs for purposes of determining the degree of contract completion under the alternative minimum tax.

Contract A is not taken into account for purposes of applying the look-back method, because it is subject to neither section 460 nor section 56(a)(3). Thus, even if W had used the percentage of completion method as permitted under §1.451-3, instead of the completed contract method, the look-back method would not be applicable because the Contract A was entered into before the effective date of section 460.

The actual costs allocated to Contracts B and C under section 460(c) and incurred in each year of the contract were as follows:

| Contract | 1987  | 1988  | 1989  | Total |
|----------|-------|-------|-------|-------|
| B .....  | \$200 | \$400 | \$200 | \$800 |
| C .....  | 100   | 300   | 400   | 800   |

In applying the look-back method, the first step is to allocate the contract price among tax years preceding and including the completion year. That allocation would produce the following amounts of gross income for purposes of the regular tax. Note that no income from Contract C is allocated to 1987, the year before the contract was entered into, even though contract costs were incurred in 1987:

§ 1.460-6

26 CFR Ch. I (4-1-17 Edition)

| Contract | 1987                              | 1988                                      | 1989  |
|----------|-----------------------------------|---|-------|
| B .....  | \$100<br>(40%X\$200/\$800X\$1000) | \$200<br>((40%X\$600/\$800X\$1000)-\$100) | \$700 |
| C .....  | 0                                 | 500<br>(\$400/\$800X\$1000)               | 500   |

Because the percentage of completion-capitalized cost method may not be used for alternative minimum tax purposes, the allocation of contract income would produce the

following amounts of gross income for purposes of computing alternative minimum taxable income:

| Contract | 1987                          | 1988                                  | 1989  |
|----------|-------------------------------|---------------------------------------|-------|
| B .....  | \$250<br>(\$200/\$800X\$1000) | \$500<br>((\$600/\$800X\$1000)-\$250) | \$250 |
| C .....  | 0                             | 500                                   | 500   |

(3) *Step Two.* The following example illustrates the application of paragraph (c)(3):

*Example 2.* (i) X enters into two long-term contracts (D and E) in 1988. X determines its tax liability for 1988 as follows:

e = estimate  
a = amount originally reported (actual)  
h = hypothetical

|  | 1988     |          | Total    |
|--|----------|----------|----------|
|  | D        | E        |          |
| 1988 contract costs .....                                      | \$3,000a | \$2,000a | .....    |
| Total contract costs .....                                     | 8,000e   | 8,000e   | .....    |
| Total contract price .....                                     | 10,000e  | 10,000e  | .....    |
| 1988 completion % .....  | 37.5e    | 25e      | .....    |
| 1988 gross income .....  | 3,750a   | 2,500a   | .....    |
| Less, 1988 costs .....   | (3,000a) | (2,000a) | .....    |
| 1988 net contract income .....                                 | 750a     | 500a     | \$1,250a |
| Other 1988 net income (loss) .....                             | .....    | .....    | (2,000a) |
| Taxable income (NOL) .....                                     | .....    | .....    | (750a)   |
| Tax .....  | .....    | .....    | 0a       |
| Refund from NOL carryback fully absorbed in 1985, at 46% ..... | .....    | .....    | 345a     |

(ii) X completes Contract D during 1989. X determines its taxable income for 1989 as follows:

|                                    | 1989     |          | Total    |
|------------------------------------|----------|----------|----------|
|                                    | D        | E        |          |
| 1989 contract costs .....          | \$3,000a | 0a       | .....    |
| Total contract costs .....         | 6,000a   | \$9,000e | .....    |
| Total contract price .....         | 10,000a  | 10,000e  | .....    |
| 1989 completion % .....            | 100a     | 22.2e    | .....    |
| 1989 gross income/(loss) .....     | 6,250a   | (278a)   | .....    |
| Less, 1989 costs .....             | (3,000a) | 0a       | .....    |
| 1989 net contract income .....     | 3,250a   | (278a)   | \$2,972a |
| Other 1989 net income (loss) ..... | .....    | .....    | 0a       |
| Taxable income (NOL) .....         | .....    | .....    | 2,972a   |
| Tax at 34% .....                   | .....    | .....    | 1,011a   |

**Internal Revenue Service, Treasury**

**§ 1.460-6**

(iii) For purposes of the look-back method, X must reallocate the actual total contract D price between 1988 and 1989 based on the actual total contract D costs. This results in the following hypothetical underpayment of tax for 1988 for purposes of the look-back method. Note that X does not reallocate the

contract E price in applying the look-back method in 1989 because contract E has not been completed, even though X's estimate of contract E costs has changed. The following computation is only for purposes of applying the look-back method, and does not result in the assessment of a tax deficiency.

|  | 1988     |          | Total    |
|--|----------|----------|----------|
|  | D        | E        |          |
| 1988 contract costs .....  | \$3,000a | \$2,000a | .....    |
| Total contract costs .....                                       | 6,000a   | 8,000e   | .....    |
| Total contract price .....                                       | 10,000a  | 10,000e  | .....    |
| 1988 completion % .....  | 50a      | 25e      | .....    |
| 1988 gross income .....  | 5,000h   | 2,500a   | .....    |
| Less, 1988 costs .....   | (3,000a) | (2,000a) | .....    |
| 1988 net contract income .....                                   | 2,000h   | 500a     | \$2,500h |
| Other 1988 net income (loss) .....                               | .....    | .....    | (2,000a) |
| Taxable income (NOL) .....                                       | .....    | .....    | 500h     |
| Tax at 34% .....   | .....    | .....    | 170h     |
| Less, previously computed tax .....                              | .....    | .....    | - 0a     |
| Underpayment of 1988 tax .....                                   | .....    | .....    | 170h     |
| Underpayment of 1985 tax from NOL carryback refund in 1988 ..... | .....    | .....    | 345h     |
| Total underpayment of tax .....                                  | .....    | .....    | 515h     |

For purposes of any subsequent application of the look-back method for which 1989 is a redetermination year, because the reallocation of contract income and redetermination of tax liability are cumulative, X will use for 1989 the amount of contract D income and the amount of tax liability that would have been reported in 1989 if X had used actual

contract costs instead of the amounts that were originally reported using the estimate of \$8,000. Assuming no subsequent revisions (due to, for example, adjustments to contract D price and costs determined after the end of 1989), this amount would be determined as follows:

|                                    | 1989     |          | Total    |
|------------------------------------|----------|----------|----------|
|                                    | D        | E        |          |
| 1989 contract costs .....          | \$3,000a | 0a       | .....    |
| Total contract costs .....         | 6,000a   | \$9,000e | .....    |
| Total contract price .....         | 10,000a  | 10,000e  | .....    |
| 1989 completion % .....            | 100a     | 22.2e    | .....    |
| 1989 gross income .....            | 5,000h   | (278a)   | .....    |
| Less, 1989 costs .....             | (3,000a) | 0a       | .....    |
| 1989 net contract income .....     | 2,000h   | (278a)   | \$1,722h |
| Other 1989 net income (loss) ..... | .....    | .....    | 0a       |
| Taxable income (NOL) .....         | .....    | .....    | 1,722h   |
| Tax at 34% .....                   | .....    | .....    | 585h     |

(iv) X completes contract E during 1990. X determines its taxable income for 1990 as follows:

|                            | 1990  |          | Total |
|----------------------------|-------|----------|-------|
|                            | D     | E        |       |
| 1990 contract costs .....  | ..... | \$7,000a | ..... |
| Total contract costs ..... | ..... | 9,000a   | ..... |
| Total contract price ..... | ..... | 10,000a  | ..... |
| 1990 completion % .....    | ..... | 100a     | ..... |
| 1990 gross income .....    | ..... | 7,778a   | ..... |

|                                    | 1990 |          | Total  |
|------------------------------------|------|----------|--------|
|                                    | D    | E        |        |
| Less, 1990 costs .....             |      | (7,000a) |        |
| 1990 net contract income .....     |      | 778a     | \$778a |
| Other 1990 net income (loss) ..... |      |          | 0a     |
| Taxable income (NOL) .....         |      |          | 778a   |
| Tax at 34% .....                   |      |          | 265a   |

(v) For purposes of the look-back method, X must reallocate the actual total contract E price between the 1988, 1989, and 1990, based on the actual total contract E costs. This results in the following hypothetical overpayment of tax for 1988. Note that X uses

the amount of income for contract D determined in the last previous application of the look-back method, and not the amount of income actually reported:

|  | 1988       |            | Total      |
|--|------------|------------|------------|
|  | D          | E          |            |
| 1988 contract costs .....  | \$3,000a   | \$2,000a   |            |
| Total contract costs .....   | \$6,000a   | \$9,000a   |            |
| Total contract price .....   | \$10,000a  | \$10,000a  |            |
| 1988 completion (%) .....  | 50a        | 22.2a      |            |
| 1988 gross income .....  | \$5,000h   | \$2,222h   |            |
| Less, 1988 costs .....   | (\$3,000a) | (\$2,000a) |            |
| 1988 net contract income .....   | \$2,000h   | \$222h     | \$2,222h   |
| Other 1988 net income (loss) .....   |            |            | (\$2,000a) |
| Taxable income (NOL) .....   |            |            | \$222h     |
| Tax at 34% .....   |            |            | \$75h      |
| Less, previously computed tax (based on most recent application of the look-back method) ..... |            |            | \$170h     |
| Overpayment of 1988 tax .....  |            |            | (\$95h)    |

In applying the look-back method to 1989, X again uses the amounts substituted as of the last previous application of the look-

back method with respect to contract D. Thus, X computes its hypothetical underpayment for 1989 as follows:

|                                     | 1989       |           | Total    |
|-------------------------------------|------------|-----------|----------|
|                                     | D          | E         |          |
| 1989 contract costs .....           | \$3,000a   | 0a        |          |
| Total contract costs .....          | \$6,000a   | \$9,000a  |          |
| Total contract price .....          | \$10,000a  | \$10,000a |          |
| 1989 completion (%) .....           | 100a       | 22.2a     |          |
| 1989 gross income .....             | \$5,000h   | \$0h      |          |
| Less, 1989 costs .....              | (\$3,000a) | (\$0a)    |          |
| 1989 net contract income .....      | \$2,000h   | 0a        | \$2,000h |
| Other 1989 net income (loss) .....  |            |           | (\$0a)   |
| Taxable income (NOL) .....          |            |           | \$2,000h |
| Tax at 34% .....                    |            |           | \$680h   |
| Less, previously computed tax ..... |            |           | \$585h   |
| Underpayment of 1989 tax .....      |            |           | \$95h    |

For purposes of any subsequent application of the look-back method for which 1990 is a redetermination year, X will use for 1990 the amount of Contract E income, and the

amount of tax liability, that was originally reported in 1990 because X's estimate of the total contract costs from \$8,000 to \$9,000 did not change after 1989. Without regard to any

**Internal Revenue Service, Treasury**

**§ 1.460-6**

subsequent revisions, these amounts are the same as in the table in paragraph (h)(3)(iv) above.

(4) *Post-completion adjustments.* The following example illustrates the application of paragraph (c)(1)(ii):

*Example 3.* The facts are the same as in Example 2. In 1991, X settles a lawsuit against its customer in Contract E. The customer pays X an additional \$3,000, without interest, in 1991. Applying the Federal mid-term rate then in effect, this \$3,000 has a discounted value at the time of contract completion in 1990 of \$2,700. X is required to apply the look-back method for 1991 even though no contract was completed in 1991. X must include the full \$3,000 adjustment (which was not previously includible in total contract price) in gross income for 1991. X does not elect not

to discount adjustments to the contract price or costs. Thus, X adjusts the contract price by the discounted amount of the adjustment and, therefore, uses \$12,700 (not \$13,000) for total Contract E price, rather than \$10,000, which was used when the look-back method was first applied with respect to Contract E.

For purposes of the look-back method, X must allocate the revised total Contract E price of \$12,700 between 1988, 1989 and 1990 based on the actual total Contract E costs, and compare the resulting revised tax liability with the tax liability determined for the last previous application of the look-back method involving those years. This results in the following hypothetical underpayments of tax for purposes of the look-back method:

r = revised

|                                     | 1988       |            | Total      |
|-------------------------------------|------------|------------|------------|
|                                     | D          | E          |            |
| 1988 contract costs .....           | \$3,000a   | \$2,000a   | .....      |
| Total contract costs .....          | \$6,000a   | \$9,000a   | .....      |
| Total contract price .....          | \$10,000a  | \$12,700r  | .....      |
| 1988 completion (%) .....           | 50a        | 22.2a      | .....      |
| 1988 gross income .....             | \$5,000h   | \$2,822rh  | .....      |
| Less, 1988 costs .....              | (\$3,000a) | (\$2,000a) | .....      |
| 1988 net contract income .....      | \$2,000h   | 822rh      | \$2,222rh  |
| Other 1988 net income (loss) .....  | .....      | .....      | (\$2,000a) |
| Taxable income .....                | .....      | .....      | \$822rh    |
| Tax at 34% .....                    | .....      | .....      | \$279rh    |
| Less, previously computed tax ..... | .....      | .....      | \$75h      |
| Underpayment of 1988 tax .....      | .....      | .....      | \$204rh    |

No Contract E costs were incurred in 1989, and there is no hypothetical underpayment for 1989.

|                                     | 1990  |            |           |
|-------------------------------------|-------|------------|-----------|
|                                     | D     | E          | Total     |
| 1990 contract costs .....           | ..... | \$7,000a   | .....     |
| Total contract costs .....          | ..... | \$9,000a   | .....     |
| Total contract price .....          | ..... | \$12,700r  | .....     |
| 1990 completion (%) .....           | ..... | 100a       | .....     |
| 1990 gross income .....             | ..... | \$9,878rh  | .....     |
| Less 1990 costs .....               | ..... | (\$7,000a) | .....     |
| 1990 net contract income .....      | ..... | \$2,878rh  | \$2,878rh |
| Other 1990 net income (loss) .....  | ..... | .....      | 0a        |
| Taxable income (NOL) .....          | ..... | .....      | \$2,878rh |
| Tax at 34% .....                    | ..... | .....      | \$978rh   |
| Less, previously computed tax ..... | ..... | .....      | \$265h    |
| Underpayment of 1990 tax .....      | ..... | .....      | \$713rh   |

In 1992, X incurs an additional cost of \$1,000 allocable to the contract, which was not previously includible in total contract costs. Applying the Federal mid-term rate then in

effect, the \$1,000 has a discounted value at the time of contract completion of \$800. X deducts this additional \$1,000 in expenses in 1992. Based on this increase to contract

§ 1.460-6

26 CFR Ch. I (4-1-17 Edition)

costs, X reapplies the look-back method, and determines the following hypothetical underpayments for 1988, 1989 and 1990 for purposes of the look-back method:

|                                     | 1988       |            | Total      |
|-------------------------------------|------------|------------|------------|
|                                     | D          | E          |            |
| 1988 contract costs .....           | \$3,000a   | \$2,000a   | .....      |
| Total contract costs .....          | \$6,000a   | \$9,800r   | .....      |
| Total contract price .....          | \$10,000a  | \$12,700r  | .....      |
| 1988 completion (%) .....           | 50a        | 20.4r      | .....      |
| 1988 gross income .....             | \$5,000h   | \$2,592rh  | .....      |
| Less, 1988 costs .....              | (\$3,000a) | (\$2,000a) | .....      |
| 1988 net contract income .....      | \$2,000h   | 592rh      | \$2,592rh  |
| Other 1988 net income (loss) .....  |            |            | (\$2,000a) |
| Taxable income (NOL) .....          |            |            | \$592rh    |
| Tax at 34% .....                    |            |            | \$201rh    |
| Less, previously computed tax ..... |            |            | \$279rh    |
| Overpayment of 1988 tax .....       |            |            | (\$78rh)   |

No Contract E costs were incurred in 1989, and there is no hypothetical underpayment for 1989.

|                                     | 1990 |          | Total     |
|-------------------------------------|------|----------|-----------|
|                                     | D    | E        |           |
| 1990 contract costs .....           |      |          | \$7,000a  |
| Total contract costs .....          |      | 9,800r   | .....     |
| Total contract price .....          |      | 12,700r  | .....     |
| 1990 completion (%) .....           |      | 92a      | .....     |
| 1990 gross income .....             |      | 9,071rh  | .....     |
| Less, 1990 costs .....              |      | (7,000a) | .....     |
| 1990 Net contract income .....      |      | 2,071rh  | \$2,071rh |
| Other 1990 net income (loss) .....  |      |          | 0a        |
| Taxable income (NOL) .....          |      |          | 2,071rh   |
| Tax at 34% .....                    |      |          | 704rh     |
| Less, previously computed tax ..... |      |          | 978rh     |
| Overpayment of 1990 tax .....       |      |          | (274rh)   |

(5) *Alternative minimum tax.* The operation of the look-back method in the case of a taxpayer liable for the alternative minimum tax as provided in paragraph (c)(3)(vi) is illustrated by the following examples:

*Example 4.* Y enters into a long-term contract in 1988 that is completed in 1989. Y used regular tax costs for purposes of determining the degree of contract completion under the alternative minimum tax.

(i) Y determines its tax liability for 1988 as follows:

|                                 |            |
|---------------------------------|------------|
| 1988 contract costs .....       | \$4,000a   |
| Total contract costs .....      | \$8,000e   |
| Total contract price .....      | \$20,000e  |
| 1988 completion (%) .....       | 50e        |
| 1988 gross income .....         | \$10,000a  |
| Less, 1988 contract costs ..... | (\$4,000a) |
| 1988 net contract income .....  | \$6,000a   |

|   |            |
|---|------------|
| Other 1988 net income/(loss) .....  | (\$3,400a) |
| Taxable income .....  | \$2,600a   |
| Regular tax at 34% .....  | 884a       |
| Adjustments and preferences to produce alternative minimum taxable income ..... | \$600a     |
| Alternative minimum taxable income .....  | \$3,200a   |
| Tentative minimum tax at 20% .....  | 640a       |
| Tax liability .....   | \$884a     |

In 1989, Y determines the following amounts:

|                            |           |
|----------------------------|-----------|
| 1989 contract costs .....  | \$6,000a  |
| Total contract costs ..... | \$10,000a |
| Total contract price ..... | \$20,000a |

(ii) For purposes of applying the look-back method, Y redetermines its tax liability for 1988, which results in a hypothetical overpayment of tax. This hypothetical overpayment is determined by comparing Y's original regular tax liability for 1988 with the hypothetical total tax liability (including alternative minimum tax liability) for that

**Internal Revenue Service, Treasury**

**§ 1.460-6**

year because Y would have paid the alternative minimum tax if Y had used its actual contract costs to report income:

|   |            |
|---|------------|
| 1988 contract costs .....   | \$4,000a   |
| Total contract costs .....  | \$10,000a  |
| Total contract price .....  | \$20,000a  |
| 1988 completion(%) .....  | 40a        |
| 1988 gross income .....   | \$8,000h   |
| less, 1988 contract costs .....   | (\$4,000a) |
| 1988 net contract income .....  | \$4,000h   |
| Other 1988 net income/(loss) .....  | (\$3,400a) |
| Taxable income .....  | \$600h     |
| Regular tax at 34% .....  | \$204h     |
| Adjustments and preferences to produce alternative minimum taxable income ..... | \$600a     |
| Alternative minimum taxable income .....  | \$1,200h   |
| Tentative minimum tax at 20% .....  | 240h       |
| Alternative minimum tax .....   | \$36h      |
| Total tax liability .....   | \$240h     |
| Less, previously computed tax .....   | \$884a     |
| Underpayment/(overpayment) .....  | (\$644h)   |

(6) *Credit carryovers.* The operation of the look-back method in the case of credit carryovers as provided in paragraph (c)(3)(v) is illustrated by the following example:

*Example 5.* Z enters into a contract in 1986 that is completed in 1987. Z determines its tax liability for 1986 as follows:

|  |          |
|--|----------|
| 1986 contract costs .....  | \$400a   |
| Total contract costs .....   | \$1,000e |
| Total contract price .....   | \$2,000e |
| 1986 completion (%) .....  | 40e      |
| 1986 gross income .....  | \$800a   |
| Less, 1986 costs .....   | (\$400a) |
| 1986 net contract income .....                                       | \$400a   |
| Other 1986 net income .....  | \$0a     |
| Taxable income .....   | \$400a   |
| Tax at 46% .....   | \$184a   |
| Unused tax credits carried forward from 1985 allowable in 1986 ..... | \$350a   |
| Net tax due .....  | \$0a     |

Z determines the following amounts for 1987:

|                            |          |
|----------------------------|----------|
| 1987 contract costs .....  | \$400a   |
| Total contract price ..... | \$2,000a |
| Total contract costs ..... | \$800a   |

If Z had used actual rather than estimated contract costs in determining gross income for 1986, Z would have reported tax liability of \$276 (46%x\$600) rather than \$184. However, Z would have paid no additional tax for 1986 because its unused tax credits carried forward from 1985 would have been sufficient to offset this increased tax liability. Therefore, there is no hypothetical underpayment for 1986 for purposes of the look-back method. However, this hypothetical earlier use of the credit may increase the hypothetical tax liability for 1987 (or another subsequent year) for purposes of subsequent applications of the look-back method.

(7) *Net operating losses.* The operation of the look-back method in the case of net operating loss ("NOL") carryovers as provided in paragraph (c)(3)(v) is illustrated by the following example:

*Example 6.* A entered into a long-term contract in 1986, which was completed in 1987. A determined its tax liability for 1986 as follows:

|                                    |            |
|------------------------------------|------------|
| 1986 contract costs .....          | \$400a     |
| Total contract costs .....         | \$1,000e   |
| Total contract price .....         | \$2,000e   |
| 1986 completion (%) .....          | 40e        |
| 1986 gross income .....            | \$800a     |
| Less, 1986 costs .....             | (\$400a)   |
| 1986 net contract income .....     | \$400a     |
| Other 1986 net income/(loss) ..... | (\$1,000a) |
| Taxable income/(NOL) .....         | (\$600a)   |
| Tax .....                          | \$0a       |

A elected to carry this loss forward to 1987 pursuant to section 172(b)(3)(C).

For 1987, A determined the following amounts:

|                            |          |
|----------------------------|----------|
| 1987 contract costs .....  | \$400a   |
| Total contract costs ..... | \$800a   |
| Total contract price ..... | \$2,000a |

If actual rather than estimated contract costs had been used in determining gross income for 1986, A would have reported \$1,000 of gross income from the contract rather than \$800, and thus would have reported a loss of \$400 rather than \$600. However, since A would have paid no tax for 1986 regardless of whether actual or estimated contract costs had been used, A does not have an underpayment for 1986 for purposes of the look-back method. If A had, instead, carried back the 1986 NOL, and this NOL had been absorbed in the tax years 1983 through 1985, it would have resulted in refunds of tax for those years in 1986. When A applies the look-back method, a hypothetical underpayment of tax would have resulted for those years due to a hypothetical reduction in the amount that would have been refunded if income had been reported on the basis of actual contract costs. See Example 2(iii).

(8) *Alternative minimum tax credit.* The following example illustrates the application of the look-back method if affected by the alternative minimum tax credit as provided in paragraph (c)(3)(vi):

(i) Example 4, above illustrates that the reallocation of contract income under the look-back method can result in a hypothetical underpayment or overpayment determined using the alternative minimum tax rate, even though the taxpayer actually paid only the regular tax for that year. However, application of the look-back method had no effect on the difference between the amount of alternative minimum taxable income and the amount of regular taxable income taken into account in that year because the taxpayer was

§ 1.460-6

26 CFR Ch. I (4-1-17 Edition)

required to use the percentage of completion method for both regular and alternative minimum tax purposes and used the same version of the percentage of completion method for both regular and alternative minimum tax purposes (*i.e.*, the taxpayer had made an election to use regular tax costs in determining the percentage of completion for purposes of computing alternative minimum taxable income).

(ii) The following example illustrates the application of the look-back method in the case of a taxpayer that does not use the percentage of completion method of accounting for long-term contracts in computing taxable income for regular tax purposes and thus must make an adjustment to taxable income to determine alternative minimum taxable income. The example also shows how interest is computed under the look-back method when the taxpayer is entitled to a credit under section 53 for minimum tax paid because of this adjustment.

*Example 7.* X is a taxpayer engaged in the construction of real property under contracts that are completed within a 24-month period and whose average annual gross receipts do not exceed \$10,000,000. As permitted by section 460(e)(1)(B), X uses the completed contract method (“CCM”) for regular tax purposes. However, X is engaged in the construction of commercial real property and, therefore, is required to use the percentage of completion method (“PCM”) for alternative minimum tax (“AMT”) purposes.

Assume that for 1988, 1989, and 1990, X has only one long-term contract, which is entered into in 1988 and completed in 1990. Assume further that X estimates gross income from the contract to be \$2,000, total contract costs to be \$1,000, and that the contract is 25 percent complete in 1988 and 75 percent complete in 1989. In 1990, the year of completion, the percentage of completion does not change but, upon completion, gross income from the contract is actually \$3,000, instead of \$2,000, and costs are actually \$1,000.

For 1988, 1989, and 1990, X’s income and tax liability using estimated contract price and costs are as follows:

| Estimates                   | 1988    | 1989    | 1990    |
|-----------------------------|---------|---------|---------|
| Regular tax:                |         |         |         |
| Long-term:                  |         |         |         |
| Contract-CCM .....          | 0       | 0       | \$2,000 |
| Other Income .....          | 0       | \$5,000 | 0       |
| Total Income .....          | 0       | \$5,000 | \$2,000 |
| Tax @ 34% .....             | 0       | \$1,700 | \$680   |
| AMT                         |         |         |         |
| Gross Income .....          | \$500   | \$1,000 | \$1,500 |
| Deductions .....            | \$(250) | \$(500) | \$(250) |
| Total long-term:            |         |         |         |
| Contract-PCM .....          | \$250   | \$500   | \$1,250 |
| Other Income .....          | 0       | \$5,000 | 0       |
| Total Income .....          | \$250   | \$5,500 | \$1,250 |
| Tax @ 20% .....             | \$50    | \$1,100 | \$250   |
| Tentative Minimum Tax ..... | \$50    | \$1,100 | \$250   |
| Regular Tax .....           | 0       | \$1,700 | \$680   |
| Minimum Tax Credit .....    | 0       | \$(50)  | 0       |
| Net Tax Liability .....     | \$50    | \$1,650 | \$680   |

When X files its tax return for 1990, X applies the look-back method to the contract. For 1988, 1989, and 1990, X’s income and tax

liability using actual contract price and costs are as follows:

| Actual             | 1988    | 1989    | 1990    |
|--------------------|---------|---------|---------|
| Regular tax:       |         |         |         |
| Long-term:         |         |         |         |
| Contract-CCM ..... | 0       | 0       | \$2,000 |
| Other Income ..... | 0       | \$5,000 | 0       |
| Total Income ..... | 0       | \$5,000 | \$2,000 |
| Tax @ 34% .....    | 0       | \$1,700 | \$680   |
| AMT                |         |         |         |
| Gross Income ..... | \$750   | \$1,500 | \$750   |
| Deductions .....   | \$(250) | \$(500) | \$(250) |
| Total long-term:   |         |         |         |
| Contract-PCM ..... | \$500   | \$1,000 | \$500   |
| Other Income ..... | 0       | \$5,000 | 0       |

Internal Revenue Service, Treasury

§ 1.460-6

| Actual                      | 1988  | 1989    | 1990  |
|-----------------------------|-------|---------|-------|
| Total Income .....          | \$500 | \$6,000 | \$500 |
| Tax @ 20% .....             | \$100 | \$1,200 | \$100 |
| Tentative Minimum Tax ..... | \$100 | \$1,200 | \$100 |
| Regular Tax .....           | 0     | \$1,700 | \$680 |
| Minimum Tax Credit .....    | 0     | \$(100) | 0     |
| Net Tax Liability .....     | \$100 | \$1,600 | \$680 |
| Underpayment .....          | \$50  |         |       |
| Overpayment .....           |       | \$50    |       |

As shown above, application of the look-back method results in a hypothetical underpayment of \$50 for 1988 because X was subject to the alternative minimum tax for that year. Interest is charged to X on this \$50 underpayment from the due date of X's 1988 return until the due date of X's 1990 return.

In 1989, although X was required to compute alternative minimum taxable income using the percentage of completion method, X was not required to pay alternative minimum tax. Nevertheless, the look-back method must be applied to 1989 because use of actual rather than estimated contract price in computing alternative minimum taxable income for 1988 would have changed the amount of the alternative minimum tax credit carried to 1989. Interest is paid to X on the resulting \$50 overpayment from the due date of X's 1989 return until the due date of X's 1990 return.

(9) *Period for interest.* The following Examples (8) through (11) illustrate how to determine the period for computing interest as provided in paragraph (c)(4):

*Example 8.* The facts are the same as in Example 6, except that the contract is completed in 1988, and A determined the following amounts for 1987 and 1988:

|  |          |
|--|----------|
| For 1987:                                    |          |
| 1987 contract costs .....                    | 0        |
| Total contract costs .....                   | \$1,000e |
| Total contract price .....                   | \$2,000e |
| 1987 completion (%) .....                    | \$40e    |
| 1987 gross income .....                      | 0a       |
| Less, 1987 costs .....                       | 0a       |
| Other 1987 net income .....                  | \$600a   |
| Net operating loss carryforward from 1986 .. | \$(600a) |
| Taxable income .....                         | 0a       |
| Tax .....                                    | 0a       |
| For 1988:                                    |          |
| 1988 contract costs .....                    | \$400a   |
| Total contract costs .....                   | \$800a   |
| Total contract price .....                   | \$2,000a |

If actual rather than estimated contract costs had been used in determining gross income for 1986, A would have reported \$1,000 of gross income from the contract for 1986 rather than \$800, and would have reported a net operating loss carryforward to 1987 of \$400 rather than \$600. Therefore, A would have reported taxable income of \$200, and would have paid tax of \$80 (i.e., \$200 × 40%) for 1987. The due date for filing A's Federal income

tax return for its 1988 taxable year is March 15. A obtains an extension and files its 1988 return on September 15, 1989. Under the look-back method, A is required to pay interest on the amount of this hypothetical underpayment (\$80) computed from the due date (determined without regard to extensions) for A's return for 1987 (not 1986, even though 1986 was the year in which the net operating loss arose) until March 15 (not September 15), the due date (without regard to extensions) of A's return for 1988. A is required to pay additional interest from March 15 until September 15 on the amount of interest outstanding as of March 15 with respect to the hypothetical underpayment of \$80.

*Example 9.* The facts are the same as in Example 6, except that A carries the net operating loss of \$600 back to 1983 rather than forward to 1987, and receives a refund of \$276 (\$600 reduction in 1983 taxable income × 46% rate in effect in 1983). As in Example 6, if actual contract costs had been used, A would have reported a loss for 1986 of \$400 rather than \$600. Thus, A would have received a refund of 1983 tax of \$184 (\$400 × 46%) rather than \$276. Under the look-back method A is required to pay interest on the difference in these two amounts (\$92) computed from the due date (determined without regard to extensions) of A's return for 1986 (the year in which the carryback arose rather than 1983, the year in which it was used) until the due date of A's return for 1988.

*Example 10.* B enters into a long-term contract in 1986 that is completed in 1988. B determines its 1986 tax liability as follows:

|   |            |
|---|------------|
| 1986 contract costs .....                           | \$400a     |
| Total contract costs .....                          | \$1,000e   |
| Total contract price .....                          | \$2,000e   |
| 1986 completion (%) .....                           | 40e        |
| 1986 gross income .....                             | \$800a     |
| Less, 1986 costs .....                              | (\$400a)   |
| 1986 net contract income .....                      | \$400a     |
| Other 1986 net income .....                         | \$2,000a   |
| Taxable income .....                                | \$2,400a   |
| Tax at 46% .....                                    | \$1,104a   |
| B determines its tax liability for 1987 as follows: |            |
| 1987 contract costs .....                           | \$400a     |
| Total contract costs .....                          | \$1,600e   |
| Total contract price .....                          | \$2,000e   |
| 1987 completion (%) .....                           | 50e        |
| 1987 gross income .....                             | \$200a     |
| ( = (50% × \$2,000) - \$800 previously reported)    |            |
| less, 1987 costs .....                              | (\$400a)   |
| 1987 net contract income .....                      | (\$200a)   |
| Other 1987 net income/(loss) .....                  | (\$2,200a) |
| Taxable income (NOL) .....                          | (\$2,400a) |

Tax ..... 0a

Assume that B had no taxable income in either 1984 or 1985, so that the entire amount of the \$2,400 net operating loss is carried back to 1986, and B receives a refund, with interest from the due date of B's 1987 return, of the entire \$1,104 in tax that it paid for 1986.

In 1988, B determines the following amounts:

|                            |          |
|----------------------------|----------|
| 1988 contract costs .....  | \$800a   |
| Total contract costs ..... | \$1,600a |
| Total contract price ..... | \$2,000a |

If B had used actual contract costs rather than estimated costs in determining its gross income for 1986, B would have had gross income from the contract of \$500 rather than \$800, and thus would have had taxable income of \$2,100 rather than \$2,400, and would have paid tax of \$966 rather than \$1,104. B is entitled to receive interest on the difference between these two amounts, the hypothetical overpayment of tax of \$138. Interest is computed from the due date (without regard to extensions) of B's return for 1986 until the due date for B's return for 1987. Interest stops running at this date, because B's hypothetical overpayment of tax ended when B filed its original 1987 return and received a refund for the carryback to 1986, and interest on this refund began to run only from the due date of B's 1987 return. See section 6611(f).

*Example 11.* C enters into a long-term contract in 1986, its first year in business, which is completed in 1988. C determines its tax liability for 1986 as follows:

|                                |          |
|--------------------------------|----------|
| 1986 contract costs .....      | \$400a   |
| Total contract costs .....     | \$1,000e |
| Total contract price .....     | \$2,000e |
| 1986 completion (%) .....      | 40e      |
| 1986 gross income .....        | \$800a   |
| less, 1986 costs .....         | (\$400a) |
| 1986 net contract income ..... | \$400a   |
| Other 1986 net income .....    | \$2,000a |
| Taxable income (NOL) .....     | \$2,400a |
| Tax at 46% .....               | \$1,104a |

C determines its tax liability for 1987 as follows:

|                                |            |
|--------------------------------|------------|
| 1987 contract costs .....      | \$400a     |
| Total contract costs .....     | \$1,066e   |
| Total contract price .....     | \$2,000e   |
| 1987 completion (%) .....      | 75e        |
| 1987 gross income .....        | \$700a     |
| Less, 1987 costs .....         | (\$400a)   |
| 1987 net contract income ..... | \$300a     |
| Other 1987 net income .....    | (\$2,450a) |
| Taxable income (NOL) .....     | (\$2,150a) |
| Tax .....                      | \$10a      |

C carries back the net operating loss to 1986, and files an amended return for 1986, showing taxable income of \$250, and receives a refund of \$989 (46% × \$2,150). Interest on this refund begins to run only as of the due date of C's 1987 return. See section 6611(f).

In 1988, when the contract is completed, C determines the following amounts:

|                            |          |
|----------------------------|----------|
| 1988 contract costs .....  | \$800a   |
| Total contract costs ..... | \$1,600a |
| Total contract price ..... | \$2,000a |

If C had used actual contract price and contract costs in determining gross income for 1986, it would have reported gross income from the contract of \$500 rather than \$800, taxable income of \$2,100 rather than \$2,400, and tax liability of \$966 rather than \$1,104.

If C had used actual contract price and contract costs in determining gross income for 1987, it would have reported gross income from the contract of \$500 rather than \$700, and would have reported a net operating loss of \$2,350, rather than \$2,150, which would have been carried back to 1986.

Under the look-back method, C receives interest with respect to a total 1986 hypothetical overpayment of \$138 (\$1,104 minus \$966). C is credited with interest on \$23 of this amount only from the due date of C's 1986 return until the due date of C's 1987 tax return, because this portion of C's total hypothetical overpayment for 1986 was refunded to C with interest computed from the due date of C's 1987 return and, therefore, was no longer held by the government. However, because the remainder of the total hypothetical overpayment of \$115 was not refunded to C, C is credited with interest on this amount from the due date of C's 1986 return until the due date of C's 1988 tax return.

Under the look-back method, C receives no interest with respect to 1987, because C had no tax liability for 1987 using either estimated or actual contract price and costs.

(i) [Reserved]

(j) *Election not to apply look-back method in de minimis cases.* Section 460(b)(6) provides taxpayers with an election not to apply the look-back method to long-term contracts in de minimis cases, effective for contracts completed in taxable years ending after August 5, 1997. To make an election, a taxpayer must attach a statement to its timely filed original federal income tax return (including extensions) for the taxable year the election is to become effective or to an amended return for that year, provided the amended return is filed on or before March 31, 1998. This statement must have the legend "NOTIFICATION OF ELECTION UNDER SECTION 460(b)(6)"; provide the taxpayer's name and identifying number and the effective date of the election; and identify the trades or businesses that involve long-term contracts. An election applies to all long-term contracts completed during and after the taxable

## Internal Revenue Service, Treasury

## § 1.461-0

year for which the election is effective. An election may not be revoked without the Commissioner's consent. For taxpayers who elected to use the delayed reapplication method under paragraph (e) of this section, an election under this paragraph (j) automatically revokes the election to use the delayed reapplication method for contracts subject to section 460(b)(6). A consolidated group of corporations, as defined in § 1.1502-1(h), is subject to consistency rules analogous to those in paragraph (e)(2) of this section and in paragraph (d)(4)(ii)(C) of this section (concerning election to use simplified marginal impact method).

### TAXABLE YEAR FOR WHICH DEDUCTIONS TAKEN

#### § 1.461-0 Table of contents.

This section lists the captions that appear in the regulations under section 461 of the Internal Revenue Code.

##### § 1.461-1 General rule for taxable year of deduction.

- (a) General rule.
  - (1) Taxpayer using cash receipts and disbursements method.
  - (2) Taxpayer using an accrual method.
  - (3) Effect in current taxable year of improperly accounting for a liability in a prior taxable year.
  - (4) Deductions attributable to certain foreign income.
  - (b) Special rule in case of death.
  - (c) Accrual of real property taxes.
    - (1) In general.
    - (2) Special rules.
    - (3) When election may be made.
    - (4) Binding effect of election.
    - (5) Apportionment of taxes on real property between seller and purchaser.
    - (6) Examples.
  - (d) Limitation on acceleration of accrual of taxes.
  - (e) Dividends or interest paid by certain savings institutions on certain deposits or withdrawable accounts.
    - (1) Deduction not allowable.
    - (2) Computation of amounts not allowed as a deduction.
    - (3) When amounts allowable.

##### § 1.461-2 Contested liabilities.

- (a) General rule.

- (1) Taxable year of deduction.
- (2) Exception.
- (3) Refunds includible in gross income.
- (4) Examples.
- (5) Liabilities described in paragraph (g) of § 1.461-4. [Reserved]
- (b) Contest of asserted liability.
  - (1) Asserted liability.
  - (2) Definition of the term "contest."
  - (3) Example.
  - (c) Transfer to provide for the satisfaction of an asserted liability.
    - (1) In general.
    - (2) Examples.
    - (d) Contest exists after transfer.
    - (e) Deduction otherwise allowed.
      - (1) In general.
      - (2) Example.
      - (f) Treatment of money or property transferred to an escrowee, trustee, or court and treatment of any income attributable thereto. [Reserved]
      - (g) Effective dates.

##### § 1.461-3 Prepaid interest. [Reserved]

##### § 1.461-4 Economic performance.

- (a) Introduction.
  - (1) In general.
  - (2) Overview.
  - (b) Exceptions to the economic performance requirement.
  - (c) Definitions.
    - (1) Liability.
    - (2) Payment.
    - (d) Liabilities arising out of the provision of services, property, or the use of property.
      - (1) In general.
      - (2) Services or property provided to the taxpayer.
      - (3) Use of property provided to the taxpayer.
      - (4) Services or property provided by the taxpayer.
      - (5) Liabilities that are assumed in connection with the sale of a trade or business.
      - (6) Rules relating to the provision of services or property to a taxpayer.
      - (7) Examples.
    - (e) Interest.
    - (f) Timing of deductions from notional principal contracts.
    - (g) Certain liabilities for which payment is economic performance.
      - (1) In general.
      - (2) Liabilities arising under a workers compensation act or out of any tort, breach of contract, or violation of law.
      - (3) Rebates and refunds.
      - (4) Awards, prizes, and jackpots.
      - (5) Insurance, warranty, and service contracts.
      - (6) Taxes.
      - (7) Other liabilities.
      - (8) Examples.
      - (h) Liabilities arising under the Nuclear Waste Policy Act of 1982.

**26 CFR Ch. I (4-1-17 Edition)**

- (i) [Reserved]
- (j) Contingent liabilities. [Reserved]
- (k) Special effective dates.
  - (1) In general.
  - (2) Long-term contracts.
  - (3) Payment liabilities.
- (l) [Reserved]
- (m) Change in method of accounting required by this section.
  - (1) In general.
  - (2) Change in method of accounting for long-term contracts and payment liabilities.

*§ 1.461-5 Recurring item exception.*

- (a) In general.
  - (b) Requirements for use of the exception.
    - (1) General rule.
    - (2) Amended returns.
    - (3) Liabilities that are recurring in nature.
    - (4) Materiality requirement.
    - (5) Matching requirement.
  - (c) Types of liabilities not eligible for treatment under the recurring item exception.
    - (d) Time and manner of adopting the recurring item exception.
      - (1) In general.
      - (2) Change to the recurring item exception method for the first taxable year beginning after December 31, 1991.
      - (3) Retroactive change to the recurring item exception method.
    - (e) Examples.

*§ 1.461-6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.*

- (a) Qualified assignments of certain personal injury liabilities under section 130.
- (b) Section 468B.
- (c) Payments to other funds or persons that constitute economic performance. [Reserved]
- (d) Effective dates.

[T.D. 8408, 57 FR 12420, Apr. 10, 1992, as amended by T.D. 8593, 60 FR 18743, Apr. 13, 1995]

**§ 1.461-1 General rule for taxable year of deduction.**

(a) *General rule*—(1) *Taxpayer using cash receipts and disbursements method.* Under the cash receipts and disbursements method of accounting, amounts representing allowable deductions shall, as a general rule, be taken into account for the taxable year in which paid. Further, a taxpayer using this method may also be entitled to certain deductions in the computation of taxable income which do not involve cash disbursements during the taxable year, such as the deductions for depreciation, depletion, and losses under sec-

tions 167, 611, and 165, respectively. If an expenditure results in the creation of an asset having a useful life which extends substantially beyond the close of the taxable year, such an expenditure may not be deductible, or may be deductible only in part, for the taxable year in which made. An example is an expenditure for the construction of improvements by the lessee on leased property where the estimated life of the improvements is in excess of the remaining period of the lease. In such a case, in lieu of the allowance for depreciation provided by section 167, the basis shall be amortized ratably over the remaining period of the lease. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in determining whether the useful life of the improvements exceeds the remaining term of the lease where a lessee begins improvements on leased property after July 28, 1958, other than improvements which on such date and at all times thereafter, the lessee was under a binding legal obligation to make. See section 263 and the regulations thereunder for rules relating to capital expenditures. See section 467 and the regulations thereunder for rules under which a liability arising out of the use of property pursuant to a section 467 rental agreement is taken into account.

(2) *Taxpayer using an accrual method*—(i) *In general.* Under an accrual method of accounting, a liability (as defined in § 1.446-1(c)(1)(ii)(B)) is incurred, and generally is taken into account for Federal income tax purposes, in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. (See paragraph (a)(2)(iii)(A) of this section for examples of liabilities that may not be taken into account until a taxable year subsequent to the taxable year incurred, and see §§ 1.461-4 through 1.461-6 for rules relating to economic performance.) Applicable provisions of the Code, the Income Tax Regulations, and other guidance published by the Secretary prescribe the manner in

which a liability that has been incurred is taken into account. For example, section 162 provides that the deductible liability generally is taken into account in the taxable year incurred through a deduction from gross income. As a further example, under section 263 or 263A, a liability that relates to the creation of an asset having a useful life extending substantially beyond the close of the taxable year is taken into account in the taxable year incurred through capitalization (within the meaning of §1.263A-1(c)(3)), and may later affect the computation of taxable income through depreciation or otherwise over a period including subsequent taxable years, in accordance with applicable Internal Revenue Code sections and guidance published by the Secretary. The principles of this paragraph (a)(2) also apply in the calculation of earnings and profits and accumulated earnings and profits.

(ii) *Uncertainty as to the amount of a liability.* While no liability shall be taken into account before economic performance and all of the events that fix the liability have occurred, the fact that the exact amount of the liability cannot be determined does not prevent a taxpayer from taking into account that portion of the amount of the liability which can be computed with reasonable accuracy within the taxable year. For example, A renders services to B during the taxable year for which A charges \$10,000. B admits a liability to A for \$6,000 but contests the remainder. B may take into account only \$6,000 as an expense for the taxable year in which the services were rendered.

(iii) *Alternative timing rules.* (A) If any provision of the Code requires a liability to be taken into account in a taxable year later than the taxable year provided in paragraph (a)(2)(i) of this section, the liability is taken into account as prescribed in that Code provision. See, for example, section 267 (transactions between related parties) and section 464 (farming syndicates).

(B) If the liability of a taxpayer is subject to section 170 (charitable contributions), section 192 (black lung benefit trusts), section 194A (employer liability trusts), section 468 (mining and solid waste disposal reclamation and

closing costs), or section 468A (certain nuclear decommissioning costs), the liability is taken into account as determined under that section and not under section 461 or the regulations thereunder. For special rules relating to certain loss deductions, see sections 165(e), 165(i), and 165(l), relating to theft losses, disaster losses, and losses from certain deposits in qualified financial institutions.

(C) Section 461 and the regulations thereunder do not apply to any amount allowable under a provision of the Code as a deduction for a reserve for estimated expenses.

(D) Except as otherwise provided in any Internal Revenue regulations, revenue procedure, or revenue ruling, the economic performance requirement of section 461(h) and the regulations thereunder is satisfied to the extent that any amount is otherwise deductible under section 404 (employer contributions to a plan of deferred compensation), section 404A (certain foreign deferred compensation plans), or section 419 (welfare benefit funds). See §1.461-4(d)(2)(iii).

(E) Except as otherwise provided by regulations or other published guidance issued by the Commissioner (See §601.601(b)(2) of this chapter), in the case of a liability arising out of the use of property pursuant to a section 467 rental agreement, the all events test (including economic performance) is considered met in the taxable year in which the liability is to be taken into account under section 467 and the regulations thereunder.

(3) *Effect in current taxable year of improperly accounting for a liability in a prior taxable year.* Each year's return should be complete in itself, and taxpayers shall ascertain the facts necessary to make a correct return. The expenses, liabilities, or loss of one year generally cannot be used to reduce the income of a subsequent year. A taxpayer may not take into account in a return for a subsequent taxable year liabilities that, under the taxpayer's method of accounting, should have been taken into account in a prior taxable year. If a taxpayer ascertains that a liability should have been taken into account in a prior taxable year, the taxpayer should, if within the period of

limitation, file a claim for credit or refund of any overpayment of tax arising therefrom. Similarly, if a taxpayer ascertains that a liability was improperly taken into account in a prior taxable year, the taxpayer should, if within the period of limitation, file an amended return and pay any additional tax due. However, except as provided in section 905(c) and the regulations thereunder, if a liability is properly taken into account in an amount based on a computation made with reasonable accuracy and the exact amount of the liability is subsequently determined in a later taxable year, the difference, if any, between such amounts shall be taken into account for the later taxable year.

(4) *Deductions attributable to certain foreign income.* In any case in which, owing to monetary, exchange, or other restrictions imposed by a foreign country, an amount otherwise constituting gross income for the taxable year from sources without the United States is not includible in gross income of the taxpayer for that year, the deductions and credits properly chargeable against the amount so restricted shall not be deductible in such year but shall be deductible proportionately in any subsequent taxable year in which such amount or portion thereof is includible in gross income. See paragraph (b) of § 1.905-1 for rules relating to credit for foreign income taxes when foreign income is subject to exchange controls.

(b) *Special rule in case of death.* A taxpayer's taxable year ends on the date of his death. See section 443(a)(2) and paragraph (a)(2) of § 1.443-1. In computing taxable income for such year, there shall be deducted only amounts properly deductible under the method of accounting used by the taxpayer. However, if the taxpayer used an accrual method of accounting, no deduction shall be allowed for amounts accrued only by reason of his death. For rules relating to the inclusion of items of partnership deduction, loss, or credit in the return of a decedent partner, see subchapter K, chapter 1 of the Code, and the regulations thereunder.

(c) *Accrual of real property taxes—(1) In general.* If the accrual of real property taxes is proper in connection with one of the methods of accounting de-

scribed in section 446(c), any taxpayer using such a method of accounting may elect to accrue any real property tax, which is related to a definite period of time, ratably over that period in the manner described in this paragraph. For example, assume that such an election is made by a calendar-year taxpayer whose real property taxes, applicable to the period from July 1, 1955, to June 30, 1956, amount to \$1,200. Under section 461(c), \$600 of such taxes accrue in the calendar year 1955, and the balance accrues in 1956. For special rule in the case of certain contested real property taxes in respect of which the taxpayer transfers money or other property to provide for the satisfaction of the contested tax, see § 1.461-2. For general rules relating to deductions for taxes, see section 164 and the regulations thereunder.

(2) *Special rules—(i) Effective date.* Section 461(c) and this paragraph do not apply to any real property tax allowable as a deduction under the Internal Revenue Code of 1939 for any taxable year beginning before January 1, 1954.

(ii) If real property taxes which relate to a period prior to the taxpayer's first taxable year beginning on or after January 1, 1954, would, but for section 461(c), be deductible in such first taxable year, the portion of such taxes which applies to the prior period is deductible in such first taxable year (in addition to the amount allowable under section 461(c)(1)).

(3) *When election may be made—(i) Without consent.* A taxpayer may elect to accrue real property taxes ratably in accordance with section 461(c) and this paragraph without the consent of the Commissioner for his first taxable year beginning after December 31, 1953, and ending after August 16, 1954, in which the taxpayer incurs real property taxes. Such election must be made not later than the time prescribed by law for filing the return for such year (including extensions thereof). An election may be made by the taxpayer for each separate trade or business (and for nonbusiness activities, if accounted for separately). Such an election shall apply to all real property taxes of the trade, business, or nonbusiness activity for which the election is made. The

election shall be made in a statement submitted with the taxpayer's return for the first taxable year to which the election is applicable. The statement should set forth:

(a) The trades or businesses, or non-business activity, to which the election is to apply, and the method of accounting used therein;

(b) The period of time to which the taxes are related; and

(c) The computation of the deduction for real property taxes for the first year of the election (or a summary of such computation).

(ii) *With consent.* A taxpayer may elect with the consent of the Commissioner to accrue real property taxes ratably in accordance with section 461(c) and this paragraph. A written request for permission to make such an election shall be submitted to the Commissioner of Internal Revenue, Washington, D.C. 20224, within 90 days after the beginning of the taxable year to which the election is first applicable, or before March 26, 1958, whichever date is later. The request for permission shall state:

(a) The name and address of the taxpayer;

(b) The trades or businesses, or non-business activity, to which the election is to apply, and the method of accounting used therein;

(c) The taxable year to which the election first applies;

(d) The period to which the real property tax relate;

(e) The computation of the deduction for real property taxes for the first year of election (or a summary of such computation); and

(f) An adequate description of the manner in which all real property taxes were deducted in the year prior to the year of election.

(4) *Binding effect of election.* An election to accrue real property taxes ratably under section 461(c) is binding upon the taxpayer unless the consent of the Commissioner is obtained under section 446(e) and paragraph (e) of § 1.446-1 to change such method of deducting real property taxes. If the last day prescribed by law for filing a return for any taxable year (including extensions thereof) to which section 461(c) is applicable falls before March

25, 1958, consent is hereby given for the taxpayer to revoke an election previously made to accrue real property taxes in the manner prescribed by section 461(c). If the taxpayer revokes his election under the preceding sentence, he must, on or before March 25, 1958, notify the district director for the district in which the return was filed of such revocation. For any taxable year for which such revocation is applicable, an amended return reflecting such revocation shall be filed on or before March 25, 1958.

(5) *Apportionment of taxes on real property between seller and purchaser.* For apportionment of taxes on real property between seller and purchaser, see section 164(d) and the regulations thereunder.

(6) *Examples.* The provisions of this paragraph are illustrated by the following examples:

*Example 1.* A taxpayer on an accrual method reports his taxable income for the taxable year ending June 30. He elects to accrue real property taxes ratably for the taxable year ending June 30, 1955 (which is his first taxable year beginning on or after January 1, 1954). In the absence of an election under section 461(c), such taxes would accrue on January 1 of the calendar year to which they are related. The real property taxes are \$1,200 for 1954; \$1,600 for 1955; and \$1,800 for 1956. Deductions for such taxes for the fiscal years ending June 30, 1955, and June 30, 1956, are computed as follows:

| FISCAL YEAR ENDING JUNE 30, 1955                             |                   |
|--|-------------------|
| July through December 1954 .....                             | <sup>1</sup> None |
| January through June 1955 ( $\frac{6}{12}$ of \$1,600) ..... | \$800             |
| Deduction for fiscal year ending June 30, 1955 .....         | 800               |

<sup>1</sup> The taxes for 1954 were deductible in the fiscal year ending June 30, 1954, since such taxes accrued on January 1, 1954.

| FISCAL YEAR ENDING JUNE 30, 1956                              |       |
|---|-------|
| July through December 1955 ( $\frac{6}{12}$ of \$1,600) ..... | \$800 |
| January through June 1956 ( $\frac{6}{12}$ of \$1,800) .....  | 900   |
| Deduction for fiscal year ending June 30, 1956 .....          | 1,700 |

*Example 2.* A calendar-year taxpayer on an accrual method elects to accrue real property taxes ratably for 1954. In the absence of an election under section 461(c), such taxes would accrue on July 1 and are assessed for the 12-month period beginning on that date. The real property taxes assessed for the year ending June 30, 1954, are \$1,200; \$1,600 for the year ending June 30, 1955; and \$1,800 for the year ending June 30, 1956. Deductions for such taxes for the calendar years 1954 and 1955 are computed as follows:

| YEAR ENDING DECEMBER 31, 1954                   |                   |
|---|-------------------|
| January through June 1954 .....                 | <sup>1</sup> None |
| July through December 1954 (½ of \$1,600) ..... | \$800             |

Deduction for year ending December 31, 1954 800

<sup>1</sup>The entire tax of \$1,200 for the year ended June 30, 1954, was deductible in the return for 1953, since such tax accrued on July 1, 1953.

| YEAR ENDING DECEMBER 31, 1955                   |       |
|---|-------|
| January through June 1955 (½ of \$1,600) .....  | \$800 |
| July through December 1955 (½ of \$1,800) ..... | 900   |

Deduction for year ending December 31, 1955 1,700

*Example 3.* A calendar-year taxpayer on an accrual method elects to accrue real property taxes ratably for 1954. In the absence of an election under section 461(c), such taxes, which relate to the calendar year 1954, are accruable on December 1 of the preceding calendar year. No deduction for real property taxes is allowable for the taxable year 1954 since such taxes accrued in the taxable year 1953 under section 23(c) of the Internal Revenue Code of 1939.

*Example 4.* A taxpayer on an accrual method reports his taxable income for the taxable year ending March 31. He elects to accrue real property taxes ratably for the taxable year ending March 31, 1955. In the absence of an election under section 461(c), such taxes are accruable on June 1 of the calendar year to which they relate. The real property taxes are \$1,200 for 1954; \$1,600 for 1955; and \$1,800 for 1956. Deductions for such taxes for the taxable years ending March 31, 1955, and March 31, 1956, are computed as follows:

| FISCAL YEAR ENDING MARCH 31, 1955   |       |
|---|-------|
| April through December 1954 (½ of \$1,200) .....  | \$900 |
| January through March 1955 (½ of \$1,600) .....   | 400   |
| Taxes accrued ratably in fiscal year ending March 31, 1955 .....  | 1,800 |
| Tax relating to period January through March 1954, paid in June 1954, and not deductible in prior taxable year (½ of \$1,200) ..... | 300   |
| Deduction for fiscal year ending March 31, 1955 .....   | 1,600 |

| FISCAL YEAR ENDING MARCH 31, 1956                     |         |
|---|---------|
| April through December 1955 (½ of \$1,600) .....      | \$1,200 |
| January through March 1956 (½ of \$1,800) .....       | 450     |
| Deduction for fiscal year ending March 31, 1956 ..... | 1,650   |

*Example 5.* The facts are the same as in Example 4 except that in June 1955, when the taxpayer pays his \$1,600 real property taxes for 1955, he pays \$400 of such amount under protest. Deductions for taxes for the taxable years ending March 31, 1955, and March 31, 1956, are computed as follows:

| FISCAL YEAR ENDING MARCH 31, 1955                |       |
|--|-------|
| April through December 1954 (½ of \$1,200) ..... | \$900 |

| FISCAL YEAR ENDING MARCH 31, 1955—<br>Continued   |     |
|---|-----|
| January through March 1955 (½ of \$1,200, that is, \$1,600 minus \$400 (the contested portion which is not properly accruable)) ..... | 300 |

|  |       |
|--|-------|
| Taxes accrued ratably in fiscal year ending March 31, 1955 .....   | 1,200 |
| Tax relating to period January through March 1954, paid in June 1954, and not deductible in prior taxable years (½ of \$1,200) ..... | 300   |
| Deduction for fiscal year ending March 31, 1955 .....  | 1,500 |

| FISCAL YEAR ENDING MARCH 31, 1956                |       |
|--|-------|
| April through December 1955 (½ of \$1,200) ..... | \$900 |
| January through March 1956 (½ of \$1,800) .....  | 450   |

|  |       |
|--|-------|
| Taxes accrued ratably in fiscal year ending March 31, 1956 .....   | 1,350 |
| Contested portion of tax relating to period January through December 1955, paid in June 1955, and deductible, under section 461(f), for taxpayer's fiscal year ending March 31, 1956 ..... | 400   |
| Deduction for fiscal year ending March 31, 1956 .....  | 1,750 |

(d) *Limitation on acceleration of accrual of taxes.* (1) Section 461(d)(1) provides that, in the case of a taxpayer whose taxable income is computed under an accrual method of accounting, to the extent that the time for accruing taxes is earlier than it would be but for any action of any taxing jurisdiction taken after December 31, 1960, such taxes are to be treated as accruing at the time they would have accrued but for such action. Any such action which, but for the provisions of section 461(d) and this paragraph, would accelerate the time for accruing a tax is to be disregarded in determining the time for accruing such tax for purposes of the deduction allowed for such tax. Such action is to be disregarded not only with respect to a taxpayer (whose taxable income is computed under an accrual method of accounting) upon whom the tax is imposed at the time of the action, but also with respect to such a taxpayer upon whom the tax is imposed at any time subsequent to such action. Thus, in the case of a tax imposed on property, the acceleration of the time for accruing taxes is to be disregarded not only with respect to the taxpayer who owned the property at the time of such acceleration, but also with respect to any subsequent owner of the property

whose taxable income is computed under an accrual method of accounting. Similarly, such action is to be disregarded with respect to all property subject to such tax, even if such property is acquired after the action. Whenever the time for accruing taxes is to be disregarded in accordance with the provisions of this paragraph, the taxpayer shall accrue the tax at the time (original accrual date) the tax would have accrued but for such action, and shall, in the absence of any action of the taxing jurisdiction placing the time for accruing such tax at a time subsequent to the original accrual date, continue to accrue the tax as of the original accrual date for all future taxable years.

(2) For purposes of this paragraph—

(i) The term “a taxpayer whose taxable income is computed under an accrual method of accounting” means a taxpayer who, for Federal income tax purposes, accounts for any tax which is the subject of “any action” (as defined in subdivision (iii) of this subparagraph) under an accrual method of accounting. See section 446 and the regulations thereunder. If a taxpayer uses an accrual method as his overall method of accounting, it shall be presumed that he is “a taxpayer whose taxable income is computed under an accrual method of accounting.” However, if the taxpayer establishes to the satisfaction of the district director that he has, for Federal income tax purposes, consistently accounted for such tax under the cash method of accounting, he shall be considered not to be “a taxpayer whose taxable income is computed under an accrual method of accounting.”

(ii) The time for accruing taxes shall be determined under section 461 and the regulations in this section.

(iii) The term “any action” includes the enactment or reenactment of legislation, the adoption of an ordinance, the exercise of any taxing or administrative authority, or the taking of any other step, the result of which is an acceleration of the accrual event of any tax. The term also applies to the substitution of a substantially similar tax by either the original taxing jurisdiction or a substitute jurisdiction. However, the term does not include either a judicial interpretation, or an adminis-

trative determination by the Internal Revenue Service, as to the event which fixes the accrual date for the tax.

(iv) The term “any taxing jurisdiction” includes the District of Columbia, any State, possession of the United States, city, county, municipality, school district, or other political subdivision or authority, other than the United States, which imposes, assesses, or collects a tax.

(3) The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* State X imposes a tax on intangible and tangible personal property used in a trade or business conducted in the State. The tax is assessed as of July 1, and becomes a lien as of that date. As a result of administrative and judicial decisions, July 1 is recognized as the proper date on which accrual method taxpayers may accrue their personal property tax for Federal income tax purposes. In 1961 State X, by legislative action, changes the assessment and lien dates from July 1, 1962, to December 31, 1961, for the property tax year 1962. The action taken by State X is considered to be “any action” of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action. Therefore, for purposes of the deduction allowed for such tax, the personal property tax imposed by State X, for the property tax year 1962, shall be treated as though it accrued on July 1, 1962.

*Example 2.* Assume the same facts as in Example 1 except that State X repeals the personal property tax and in lieu thereof enacts a franchise tax which is imposed on the privilege of conducting a trade or business within State X, and is based on the value of intangible and tangible personal property used in the trade or business. The franchise tax is to be assessed and will become a lien as of December 31, 1961, for the franchise tax year 1962, and on December 31 for all subsequent franchise tax years. Since the franchise tax is substantially similar to the former personal property tax and since the enactment of the franchise tax has the effect of accelerating the accrual date of the personal property tax from July 1, 1962, to December 31, 1961, the action taken by State X is considered to be “any action” of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action. Therefore, for purposes of the deduction allowed for such tax, the franchise tax imposed by State X shall be treated as though it accrued on July 1, 1962, for the franchise tax year 1962, and on July 1 for all subsequent franchise tax years.

*Example 3.* Assume the same facts as in Example 1 except that State X repealed the personal property tax and empowered the counties within the State to impose a personal property tax. Assuming the counties in State X subsequently imposed a personal property tax and chose December 31 of the preceding year as the assessment and lien date, the action of each of the counties would be considered to be “any action” of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action since it is immaterial whether the original taxing jurisdiction or a substitute jurisdiction took the action.

(4) Section 461(d)(1) shall not be applicable to the extent that it would prevent the taxpayer and all other persons, including successors in interest, from ever taking into account, for Federal income tax purposes, any tax to which that section would otherwise apply. For example, assume that State Y imposes a personal property tax on tangible personal property used in a trade or business conducted in the State during a calendar year. The tax is assessed as of February 1 of the year following the personal property tax year, and becomes a lien as of that date. As a result of administrative and judicial decisions, February 1 of the following year is recognized as the proper date on which accrual method taxpayers may accrue the personal property tax for Federal income tax purposes. In 1962 State Y, by legislative action, changes the assessment and lien dates for the personal property tax year 1962 from February 1, 1963, to December 1, 1962, and to December 1 of the personal property tax year for all subsequent years. Corporation A, an accrual method taxpayer which uses the calendar year as its taxable year, pays the tax for 1962 on December 10, 1962. On December 15, 1962, the property which was taxed is completely destroyed and, on December 20, 1962, corporation A transfers all of its remaining assets to its shareholders, and is dissolved. Since corporation A is not in existence in 1963, and therefore could not take the personal property tax into account in computing its 1963 Federal income tax if February 1, 1963, is considered to be the time for accruing the tax, and no other person could ever take such tax into account in computing his Federal income tax, such

tax shall be treated as accruing as of December 1, 1962. To the extent that any person other than the taxpayer may at any time take such tax into account in computing his taxable income, the provisions of section 461(d)(1) shall apply. Thus, upon the dissolution of a corporation or the termination of a partnership between the time which, but for the provisions of section 461(d)(1) and this paragraph, would be the time for accruing any tax which was the subject of “any action” (as defined in subdivision (iii) of subparagraph (2)), and the original accrual date, the corporation or the partnership would be entitled to a deduction for only that portion, if any, of such tax with respect to which it can establish, to the satisfaction of the district director, that no other taxpayer can properly take into account in computing his taxable income. However, to the extent that the corporation or partnership cannot establish, at the time of its dissolution or termination, as the case may be, that no other taxpayer would be entitled to take such tax into account in computing his taxable income, and it is subsequently determined that no other taxpayer is entitled to take such tax into account in computing his taxable income, the corporation or partnership may file a claim for refund for the year of its dissolution or termination (subject to the limitations prescribed in section 6511) and claim as a deduction therein the portion of such tax determined to be not deductible by any other taxpayer.

(5) Section 461(d) and this paragraph shall apply to taxable years ending after December 31, 1960.

(e) *Dividends or interest paid by certain savings institutions on certain deposits or withdrawable accounts—(1) Deduction not allowable—(i) In general.* Except as otherwise provided in this paragraph, pursuant to section 461(e) amounts paid to, or credited to the accounts of, depositors or holders of accounts as dividends or interest on their deposits or withdrawable accounts (if such amounts paid or credited are withdrawable on demand subject only to customary notice to withdraw) by a mutual savings bank not having capital stock represented by shares, a domestic building and loan association,

or a cooperative bank shall not be allowed as a deduction for the taxable year to the extent such amounts are paid or credited for periods representing more than 12 months. The provisions of section 461(e) are applicable with respect to taxable years ending after December 31, 1962. Whether amounts are paid or credited for periods representing more than 12 months depends upon all the facts and circumstances in each case. For example, payments or credits which under all the facts and circumstances are in the nature of bona fide bonus interest or dividends paid or credited because a shareholder or depositor maintained a certain balance for more than 12 months, will not be considered made for more than 12 months, providing the regular payments or credits represent a period of 12 months or less. The nonallowance of a deduction to the taxpayer under section 461(e) and this subparagraph has no effect either on the proper time for reporting dividends or interest by a depositor or holder of a withdrawable account, or on the obligation of the taxpayer to make a return setting forth, among other things, the aggregate amounts paid to a depositor or shareholder under section 6049 (relating to returns regarding payments of interest) and the regulations thereunder. With respect to a short period (a taxable year consisting of a period of less than 12 months), amounts of dividends or interest paid or credited shall not be allowed as a deduction to the extent that such amounts are paid or credited for a period representing more than the number of months in such short period. In such a case, the rules contained in section 461(e) and this paragraph apply to the short period in a manner consistent with the application of such rules to a 12-month taxable year. Subparagraph (2) of this paragraph provides rules for computing amounts not allowed in the taxable year and subparagraph (3) provides rules for determining when such amounts are allowed. See section 7701(a) (19) and (32) and the regulations thereunder for the definitions of domestic building and loan association and cooperative bank.

(ii) *Exceptions.* The rule of nonallowance set forth in subdivision (i) of this

subparagraph is not applicable to a taxpayer in the year in which it liquidates (other than following, or as part of, an acquisition of its assets in which the acquiring corporation, pursuant to section 381(a), takes into account certain items of the taxpayer, which for purposes of this paragraph shall be referred to as an acquisition described in section 381(a)). In addition, such rule of nonallowance is not applicable to a taxpayer which pays or credits grace interest or dividends to terminating depositors or shareholders, provided the total amount of the grace interest or dividends paid or credited during the payment or crediting period (for example, a quarterly or semi-annual period) does not exceed 10 percent of the total amount of the interest or dividends paid or credited during such period, computed without regard to the grace interest or dividends. For example, providing the 10 percent limitation is met, the rule of nonallowance does not apply in a case in which a calendar year taxpayer, with regular interest payment dates of January 1, April 1, July 1, and October 1, pays grace interest for the period beginning October 1 to a depositor who terminates his account on December 10.

(2) *Computation of amounts not allowed as a deduction—(i) Method of computation.* The amount of the dividends or interest to which subparagraph (1) of this paragraph applies, which is not allowed as a deduction, shall be computed under the rules of this subparagraph. The amount which is not allowed as a deduction is the difference between the total amount of dividends or interest paid or credited to that class of accounts with respect to which a deduction is not allowed under subparagraph (1) of this paragraph during the taxable year (or short period, if applicable) and an amount which bears the same ratio to such total as the number 12 (or number of months in the short period) bears to the number of months with respect to which such amounts of dividends or interest are paid or credited.

(ii) *Examples.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

*Example 1.* X Association, a domestic building and loan association filing its return on

§ 1.461-1

26 CFR Ch. I (4-1-17 Edition)

the basis of a calendar year, regularly credits dividends on its withdrawable accounts quarterly on the first day of the quarter following the quarter with respect to which they are earned. X changes the time of crediting dividends commencing with the credit for the fourth quarter of 1964. Such credit and all subsequent credits are made on the last day of the quarter with respect to which they are earned. As a result of this change X's credits for the year 1964 are as follows:

| Period with respect to which earned | Date credited in 1964 | Amt.      |
|-------------------------------------|-----------------------|-----------|
| 4th quarter, 1963 .....             | Jan. 1                | \$250,000 |
| 1st quarter, 1964 .....             | Apr. 1                | 300,000   |
| 2d quarter, 1964 .....              | July 1                | 300,000   |
| 3d quarter, 1964 .....              | Oct. 1                | 300,000   |
| 4th quarter, 1964 .....             | Dec. 31               | 350,000   |
| Total dividends credited ....       |                       | 1,500,000 |

Since the change in the time of crediting dividends results in the crediting in 1964 of amounts of dividends representing periods totaling 15 months (October 1963 through December 1964), amounts shall not be allowed as a deduction in 1964 which are in excess of \$1,200,000, which is the amount which bears the same ratio to the amounts of dividends credited during the year (\$1,500,000) as the number 12 bears to the number of months (15) with respect to which such dividends are credited. Thus, \$300,000 (\$1,500,000 minus \$1,200,000) is not allowed as a deduction in 1964.

*Example 2.* Y Association, a domestic building and loan association filing its return on the basis of a calendar year, regularly credits dividends on its withdrawable accounts on the basis of a semiannual period on March 31 and September 30 of each year. Y changes the period with respect to which credits are made from the semiannual period to the quarterly basis, commencing with the last quarter in 1964. The credit for this last quarter and all subsequent credits are made on the last day of the quarter with respect to which they are earned. As a result of this change, Y's credits for the year 1964 are as follows:

| Period with respect to which earned   | Date credited in 1964 | Amt.      |
|---------------------------------------|-----------------------|-----------|
| 6-month period ending Mar. 31, 1964.  | Mar. 31               | \$300,000 |
| 6-month period ending Sept. 30, 1964. | Sept. 30              | 400,000   |
| 4th quarter, 1964 .....               | Dec. 31               | 200,000   |
| Total dividends credited ....         |                       | 900,000   |

Since the change in the basis of crediting dividends results in a crediting in 1964 of dividends representing periods totaling 15 months (October 1963 through December 1964), amounts shall not be allowed as a deduction in 1964 which are in excess of

\$720,000, which is the amount which bears the same ratio to the amounts of dividends credited during the year (\$900,000) as the number 12 bears to the number of months (15) with respect to which such dividends are credited. Thus, \$180,000 (\$900,000 minus \$720,000) is not allowed as a deduction in 1964.

*Example 3.* Z Association, a domestic building and loan association regularly files its return on the basis of a fiscal year ending on the last day of February and regularly credits dividends on its withdrawable accounts quarterly on the last day of the quarter with respect to which they are earned. Z receives approval from the Commissioner of Internal Revenue to change its accounting period to a calendar year and effects the change by filing a return for a short period ending on December 31, 1964. Dividend credits for the short period beginning on March 1 and ending on December 31, 1964, are as follows:

| Period with respect to which earned | Date credited in 1964 | Amt.      |
|-------------------------------------|-----------------------|-----------|
| January-March 1964 .....            | Mar. 31               | \$250,000 |
| April-June 1964 .....               | June 30               | 300,000   |
| July-September 1964 .....           | Sept. 30              | 300,000   |
| October-December 1964 .....         | Dec. 31               | 350,000   |
| Total dividends credited ....       |                       | 1,200,000 |

Since the change of accounting period results in amounts of dividends credited (\$1,200,000) representing periods totaling 12 months (January through December 1964), and such periods represent more than the number of months (10) in the short period, an amount shall not be allowed as a deduction in such short period which is in excess of \$1,000,000, which is the amount which bears the same ratio to the amount of dividends credited in the short period (\$1,200,000) as the number of months (10) in the short period bears to the number of months (12) with respect to which such dividends are credited. Thus, \$200,000 (\$1,200,000 minus \$1,000,000) is not allowed as a deduction in the short period.

(3) *When amounts allowable.* The amount of dividends or interest not allowed as a deduction under subparagraph (1) of this paragraph shall be allowed as follows (subject to the limitation that the total of the amounts so allowed shall not exceed the amount not allowed under subparagraph (1)):

(i) Such amount shall be allowed as a deduction in a later taxable year or years subject to the limitation that, when taken together with the deductions otherwise allowable in the later taxable year or years, it does not bring the deductions for any later taxable year to a total representing a period of more than 12 months (or number of

months in the short period, if applicable). However, in any event, an amount otherwise allowable under subdivision (ii) of this subparagraph shall be allowed notwithstanding the fact that it may bring the deductions allowable to a total representing a period of more than 12 months (or number of months in the short period, if applicable).

(ii) In any case in which it is established to the satisfaction of the Commissioner that the taxpayer does not intend to avoid taxes, one-tenth of such amount shall be allowed as a deduction in each of the 10 succeeding taxable years—

(a) Commencing with the taxable year for which such amount is not allowed as a deduction under subparagraph (1), or

(b) In the case of such amount not allowed for a taxable year ending before July 1, 1964, commencing with either the first or second taxable year after the taxable year for which such amount is not allowed as a deduction under subparagraph (1) if the taxpayer has not taken a deduction on his return, or filed a claim for credit or refund, in respect of such amount under (a).

Normally, if the deduction not allowed under subparagraph (1) is a result of a change, not requested by the taxpayer, in the taxpayer's annual accounting period or dividend or interest payment or crediting dates solely as a consequence of a requirement of a Federal or State regulatory authority, or if the deduction is not allowed solely as a result of the taxpayer being a party to an acquisition to which section 381(a) applies, the Commissioner will permit the allowance of the amount not allowed in the manner provided in this subdivision. Nothing set forth in this subdivision shall be construed as permitting the allowance of a credit or refund for any year which is barred by the limitations on credit or refund provided by section 6511.

(iii) If the total of the amounts, if any, allowed under subdivisions (i) and (ii) of this subparagraph before the taxable year in which the taxpayer liquidates or otherwise ceases to engage in trade or business is less than the amount not allowed under subparagraph (1), there shall be allowed a de-

duction in such taxable year for the difference between the amount not allowed under subparagraph (1) and the amounts allowed, if any, as deductions under subdivisions (i) and (ii) unless the circumstances under which the taxpayer ceased to do business constitute an acquisition described in section 381(a) (relating to carryovers in certain corporate acquisitions). If the circumstances under which the taxpayer ceased to do business constitute an acquisition described in section 381(a), the acquiring corporation shall succeed to and take into account the balance of the amounts not allowed on the same basis as the taxpayer, had it not ceased to engage in business.

[T.D. 6500, 25 FR 11720, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.461-1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.fdsys.gov](http://www.fdsys.gov).

#### § 1.461-2 Contested liabilities.

(a) *General rule*—(1) *Taxable year of deduction.* If—

(i) The taxpayer contests an asserted liability,

(ii) The taxpayer transfers money or other property to provide for the satisfaction of the asserted liability,

(iii) The contest with respect to the asserted liability exists after the time of the transfer, and

(iv) But for the fact that the asserted liability is contested, a deduction would be allowed for the taxable year of the transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable),

then the deduction with respect to the contested amount shall be allowed for the taxable year of the transfer.

(2) *Exception.* Subparagraph (1) of this paragraph shall not apply in respect of the deduction for income, war profits, and excess profits taxes imposed by the authority of any foreign country or possession of the United States, including a tax paid in lieu of a tax on income, war profits, or excess profits otherwise generally imposed by any foreign country or by any possession of the United States.

(3) *Refunds includible in gross income.* If any portion of the contested amount

which is deducted under subparagraph (1) of this paragraph for the taxable year of transfer is refunded when the contest is settled, such portion is includible in gross income except as provided in § 1.111-1, relating to recovery of certain items previously deducted or credited. Such refunded amount is includible in gross income for the taxable year of receipt, or for an earlier taxable year if properly accruable for such earlier year.

(4) *Examples.* The provisions of this paragraph are illustrated by the following examples:

*Example 1.* X Corporation, which uses an accrual method of accounting, in 1964 contests \$20 of a \$100 asserted real property tax liability but pays the entire \$100 to the taxing authority. In 1968, the contest is settled and X receives a refund of \$5. X deducts \$100 for the taxable year 1964, and includes \$5 in gross income for the taxable year 1968 (assuming § 1.111-1 does not apply to such amount). If in 1964 X pays only \$80 to the taxing authority, X deducts only \$80 for 1964. The result would be the same if X Corporation used the cash method of accounting.

*Example 2.* Y Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. Y's real property taxes are assessed and become a lien on December 1, but are not payable until March 1 of the following year. On December 10, 1964, Y contests \$20 of the \$100 asserted real property tax which was assessed and became a lien on December 1, 1964. On March 1, 1965, Y pays the entire \$100 to the taxing authority. In 1968, the contest is settled and Y receives a refund of \$5. Y deducts \$80 for the taxable year 1964, deducts \$20 for the taxable year 1965, and includes \$5 in gross income for the taxable year 1968 (assuming § 1.111-1 does not apply to such amount).

(b) *Production costs*—(1) *In general; asserted liability.* For purposes of paragraph (a)(1) of this section, the term “asserted liability” means an item with respect to which, but for the existence of any contest in respect of such item, a deduction would be allowable under an accrual method of accounting. For example, a notice of a local real estate tax assessment and a bill received for services may represent asserted liabilities.

(2) *Definition of the term “contest”.* Any contest which would prevent accrual of a liability under section 461(a) shall be considered to be a contest in determining whether the taxpayer sat-

isfies paragraph (a)(1)(i) of this section. A contest arises when there is a bona fide dispute as to the proper evaluation of the law or the facts necessary to determine the existence or correctness of the amount of an asserted liability. It is not necessary to institute suit in a court of law in order to contest an asserted liability. An affirmative act denying the validity or accuracy, or both, of an asserted liability to the person who is asserting such liability, such as including a written protest with payment of the asserted liability, is sufficient to commence a contest. Thus, lodging a protest in accordance with local law is sufficient to contest an asserted liability for taxes. It is not necessary that the affirmative act denying the validity or accuracy, or both, of an asserted liability be in writing if, upon examination of all the facts and circumstances, it can be established to the satisfaction of the Commissioner that a liability has been asserted and contested.

(3) *Example.* The provisions of this paragraph are illustrated by the following example:

*Example:* O Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. O receives a large shipment of typewriter ribbons from S Company on January 30, 1964, which O pays for in full on February 10, 1964. Subsequent to their receipt, several of the ribbons prove defective because of inferior materials used by the manufacturer. On August 9, 1964, O orally notifies S and demands refund of the full purchase price of the ribbons. After negotiations prove futile and a written demand is rejected by S, O institutes an action for the full purchase price. For purposes of paragraph (a)(1)(i) of this section, S has asserted a liability against O which O contests on August 9, 1964. O deducts the contested amount for 1964.

(c) *Transfer to provide for the satisfaction of an asserted liability*—(1) *In general.* (i) A taxpayer may provide for the satisfaction of an asserted liability by transferring money or other property beyond his control to—

(A) The person who is asserting the liability;

(B) An escrowee or trustee pursuant to a written agreement (among the escrowee or trustee, the taxpayer, and the person who is asserting the liability) that the money or other property

be delivered in accordance with the settlement of the contest;

(C) An escrowee or trustee pursuant to an order of the United States or of any State or political subdivision thereof or any agency or instrumentality of the foregoing, or of a court, that the money or other property be delivered in accordance with the settlement of the contest; or

(D) A court with jurisdiction over the contest.

(ii) In order for money or other property to be beyond the control of a taxpayer, the taxpayer must relinquish all authority over the money or other property.

(iii) The following are not transfers to provide for the satisfaction of an asserted liability—

(A) Purchasing a bond to guarantee payment of the asserted liability;

(B) An entry on the taxpayer's books of account;

(C) A transfer to an account that is within the control of the taxpayer;

(D) A transfer of any indebtedness of the taxpayer or of any promise by the taxpayer to provide services or property in the future; and

(E) A transfer to a person (other than the person asserting the liability) of any stock of the taxpayer or of any stock or indebtedness of a person related to the taxpayer (as defined in section 267(b)).

(2) *Examples.* The provisions of this paragraph are illustrated by the following examples:

*Example 1.* M Corporation contests a \$5,000 liability asserted against it by L Company for services rendered. To provide for the contingency that it might have to pay the liability, M establishes a separate bank account in its own name. M then transfers \$5,000 from its general account to such separate account. Such transfer does not qualify as a transfer to provide for the satisfaction of an asserted liability because M has not transferred the money beyond its control.

*Example 2.* M Corporation contests a \$5,000 liability asserted against it by L Company for services rendered. To provide for the contingency that it might have to pay the liability, M transfers \$5,000 to an irrevocable trust pursuant to a written agreement among the trustee, M (the taxpayer), and L (the person who is asserting the liability) that the money shall be held until the contest is settled and then disbursed in accordance with the settlement. Such transfer

qualifies as a transfer to provide for the satisfaction of an asserted liability.

(d) *Contest exists after transfer.* In order for a contest with respect to an asserted liability to exist after the time of transfer, such contest must be pursued subsequent to such time. Thus, the contest must have been neither settled nor abandoned at the time of the transfer. A contest may be settled by a decision, judgment, decree, or other order of any court of competent jurisdiction which has become final, or by written or oral agreement between the parties. For example, Z Corporation, which uses an accrual method of accounting, in 1964 contests a \$100 asserted liability. In 1967 the contested liability is settled as being \$80 which Z accrues and deducts for such year. In 1968 Z pays the \$80. Section 461(f) does not apply to Z with respect to the transfer because a contest did not exist after the time of such transfer.

(e) *Deduction otherwise allowed—(1) In general.* The existence of the contest with respect to an asserted liability must prevent (without regard to section 461(f)) and be the only factor preventing a deduction for the taxable year of the transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable) to provide for the satisfaction of such liability. Nothing in section 461(f) or this section shall be construed to give rise to a deduction since section 461(f) and this section relate only to the timing of deductions which are otherwise allowable under the Code.

(2) *Application of economic performance rules to transfers under section 461(f).* (i) A taxpayer using an accrual method of accounting is not allowed a deduction under section 461(f) in the taxable year of the transfer unless economic performance has occurred.

(ii) Economic performance occurs for liabilities requiring payment to another person arising out of any workers compensation act or any tort, or any other liability designated in § 1.461-4(g), as payments are made to the person to which the liability is owed. Except as provided in section 468B or the regulations thereunder, economic performance does not occur when a taxpayer transfers money or other property to a

trust, an escrow account, or a court to provide for the satisfaction of an asserted workers compensation, tort, or other liability designated under § 1.461-4(g) that the taxpayer is contesting unless the trust, escrow account, or court is the person to which the liability is owed or the taxpayer's payment to the trust, escrow account, or court discharges the taxpayer's liability to the claimant. Rather, economic performance occurs in the taxable year the taxpayer transfers money or other property to the person that is asserting the workers compensation, tort, or other liability designated under § 1.461-4(g) that the taxpayer is contesting or in the taxable year that payment is made from a trust, an escrow account, or a court registry funded by the taxpayer to the person to which the liability is owed.

(3) *Examples.* The provisions of this paragraph are illustrated by the following examples:

*Example 1.* A, an individual, makes a gift of certain property to B, an individual. A pays the entire amount of gift tax assessed against him but contests his liability for the tax. Section 275(a)(3) provides that gift taxes are not deductible. A does not satisfy the requirement of paragraph (a)(1)(iv) of this section because a deduction would not be allowed for the taxable year of the transfer even if A did not contest his liability to the tax.

*Example 2.* Corporation X is a defendant in a class action suit for tort liabilities. In 2002, X establishes a trust for the purpose of satisfying the asserted liability and transfers \$10,000,000 to the trust. The trust does not satisfy the requirements of section 468B or the regulations thereunder. In 2004, the trustee pays \$10,000,000 to the plaintiffs in settlement of the litigation. Under paragraph (e)(2) of this section, economic performance with respect to X's liability to the plaintiffs occurs in 2004. X may deduct the \$10,000,000 payment to the plaintiffs in 2004.

(f) *Treatment of money or property transferred to an escrowee, trustee, or court and treatment of any income attributable thereto.* [Reserved]

(g) *Effective dates.* (1) Except as otherwise provided, this section applies to transfers of money or other property in taxable years beginning after December 31, 1953, and ending after August 16, 1954.

(2) Paragraph (c)(1)(iii)(E) of this section applies to transfers of any stock of

the taxpayer or any stock or indebtedness of a person related to the taxpayer on or after November 19, 2003.

(3) Paragraph (e)(2)(i) of this section applies to transfers of money or other property after July 18, 1984.

(4) Paragraph (e)(2)(ii) and paragraph (e)(3) *Example 2* of this section apply to—

(i) Transfers after July 18, 1984, of money or other property to provide for the satisfaction of an asserted workers compensation or tort liability; and

(ii) Transfers in taxable years beginning after December 31, 1991, of money or other property to provide for the satisfaction of asserted liabilities designated in § 1.461-4(g) (other than liabilities for workers compensation or tort).

[T.D. 6772, 29 FR 15753, Nov. 24, 1964, as amended by T.D. 8408, 57 FR 12421, Apr. 10, 1992; T.D. 9095, 68 FR 65636, Nov. 21, 2003; T.D. 9140, 69 FR 43303, July 20, 2004]

**§ 1.461-3 Prepaid interest. [Reserved]**

**§ 1.461-4 Economic performance.**

(a) *Introduction—(1) In general.* For purposes of determining whether an accrual basis taxpayer can treat the amount of any liability (as defined in § 1.446-1(c)(1)(ii)(B)) as incurred, the all events test is not treated as met any earlier than the taxable year in which economic performance occurs with respect to the liability.

(2) *Overview.* Paragraph (b) of this section lists exceptions to the economic performance requirement. Paragraph (c) of this section provides cross-references to the definitions of certain terms for purposes of section 461 (h) and the regulations thereunder. Paragraphs (d) through (m) of this section and § 1.461-6 provide rules for determining when economic performance occurs. Section 1.461-5 provides rules relating to an exception under which certain recurring items may be incurred for the taxable year before the year during which economic performance occurs.

(b) *Exceptions to the economic performance requirement.* Paragraph (a)(2)(iii)(B) of § 1.461-1 provides examples of liabilities that are taken into

account under rules that operate without regard to the all events test (including economic performance).

(c) *Definitions.* The following cross-references identify certain terms defined for purposes of section 461(h) and the regulations thereunder:

(1) *Liability.* See paragraph (c)(1)(ii)(B)d of §1.446-1 for the definition of “liability.”

(2) *Payment.* See paragraph (g)(1)(ii) of this section for the definition of “payment.”

(d) *Liabilities arising out of the provision of services, property, or the use of property—(1) In general.* The principles of this paragraph (d) determine when economic performance occurs with respect to liabilities arising out of the performance of services, the transfer of property, or the use of property. This paragraph (d) does not apply to liabilities described in paragraph (e) (relating to interest expense) or paragraph (g) (relating to breach of contract, workers compensation, tort, etc.) of this section. In addition, except as otherwise provided in Internal Revenue regulations, revenue procedures, or revenue rulings this paragraph (d) does not apply to amounts paid pursuant to a notional principal contract. The Commissioner may provide additional rules in regulations, revenue procedures, or revenue rulings concerning the time at which economic performance occurs for items described in this paragraph (d).

(2) *Services or property provided to the Taxpayer—(i) In general.* Except as otherwise provided in paragraph (d)(5) of this section, if the liability of a taxpayer arises out of the providing of services or property to the taxpayer by another person, economic performance occurs as the services or property is provided.

(ii) *Long-term contracts.* In the case of any liability of a taxpayer described in paragraph (d)(2)(i) of this section that is an expense attributable to a long-term contract with respect to which the taxpayer uses the percentage of completion method, economic performance occurs—

(A) As the services or property is provided; or, if earlier,

(B) As the taxpayer makes payment (as defined in paragraph (g)(1)(ii) of

this section) in satisfaction of the liability to the person providing the services or property. See paragraph (k)(2) of this section for the effective date of this paragraph (d)(2)(ii).

(iii) *Employee benefits—(A) In general.* Except as otherwise provided in any Internal Revenue regulation, revenue procedure, or revenue ruling, the economic performance requirement is satisfied to the extent that any amount is otherwise deductible under section 404 (employer contributions to a plan of deferred compensation), section 404A (certain foreign deferred compensation plans), and section 419 (welfare benefit funds). See §1.461-1(a)(2)(iii)(D).

(B) *Property transferred in connection with performance of services.* [Reserved]

(iv) *Cross-references.* See *Examples 4* through *6* of paragraph (d)(7) of this section. See paragraph (d)(6) of this section for rules relating to when a taxpayer may treat services or property as provided to the taxpayer.

(3) *Use of property provided to the taxpayer—(i) In general.* Except as otherwise provided in this paragraph (d)(3)d and paragraph (d)(5) of this section, if the liability of a taxpayer arises out of the use of property by the taxpayer, economic performance occurs ratably over the period of time the taxpayer is entitled to the use of the property (taking into account any reasonably expected renewal periods when necessary to carry out the purposes of section 461(h)). See *Examples 6* through *9* of paragraph (d)(7) of this section.

(ii) *Exceptions—(A) Volume, frequency of use, or income.* If the liability of a taxpayer arises out of the use of property by the taxpayer and all or a portion of the liability is determined by reference to the frequency or volume of use of the property or the income from the property, economic performance occurs for the portion of the liability determined by reference to the frequency or volume of use of the property or the income from the property as the taxpayer uses the property or includes income from the property. See *Examples 8* and *9* of paragraph (d)(7) of this section. This paragraph (d)(3)(ii) shall not apply if the District Director determines, that based on the substance of the transaction, the liability of the taxpayer for use of the property

is more appropriately measured ratably over the period of time the taxpayer is entitled to the use of the property.

(B) *Section 467 rental agreements.* In the case of a liability arising out of the use of property pursuant to a section 467 rental agreement, economic performance occurs as provided in § 1.461-1(a)(2)(iii)(E).

(4) *Services or property provided by the taxpayer—(i) In general.* Except as otherwise provided in paragraph (d)(5) of this section, if the liability of a taxpayer requires the taxpayer to provide services or property to another person, economic performance occurs as the taxpayer incurs costs (within the meaning of § 1.446-1(c)(1)(ii)) in connection with the satisfaction of the liability. See *Examples 1 through 3* of paragraph (d)(7) of this section.

(ii) *Barter transactions.* If the liability of a taxpayer requires the taxpayer to provide services, property, or the use of property, and arises out of the use of property by the taxpayer, or out of the provision of services or property to the taxpayer by another person, economic performance occurs to the extent of the lesser of—

(A) The cumulative extent to which the taxpayer incurs costs (within the meaning of § 1.446-1(c)(1)(ii)) in connection with its liability to provide the services or property; or

(B) The cumulative extent to which the services or property is provided to the taxpayer.

(5) *Liabilities that are assumed in connection with the sale of a trade or business—(i) In general.* If, in connection with the sale or exchange of a trade or business by a taxpayer, the purchaser expressly assumes a liability arising out of the trade or business that the taxpayer but for the economic performance requirement would have been entitled to incur as of the date of the sale, economic performance with respect to that liability occurs as the amount of the liability is properly included in the amount realized on the transaction by the taxpayer. See § 1.1001-2 for rules relating to the inclusion in amount realized from a discharge of liabilities resulting from a sale or exchange.

(ii) *Trade or business.* For purposes of this paragraph (d)(5), a trade or business is a specific group of activities carried on by the taxpayer for the purpose of earning income or profit if every operation that is necessary to the process of earning income or profit is included in the group. Thus, for example, the group of activities generally must include the collection of income and the payment of expenses.

(iii) *Tax avoidance.* This paragraph (d)(5) does not apply if the District Director determines that tax avoidance is one of the taxpayer's principal purposes for the sale or exchange.

(6) *Rules relating to the provision of services or property to a taxpayer.* The following rules apply for purposes of this paragraph (d):

(i) Services or property provided to a taxpayer include services or property provided to another person at the direction of the taxpayer.

(ii) A taxpayer is permitted to treat services or property as provided to the taxpayer as the taxpayer makes payment to the person providing the services or property (as defined in paragraph (g)(1)(ii) of this section), if the taxpayer can reasonably expect the person to provide the services or property within 3½ months after the date of payment.

(iii) A taxpayer is permitted to treat property as provided to the taxpayer when the property is delivered or accepted, or when title to the property passes. The method used by the taxpayer to determine when property is provided is a method of accounting that must comply with the rules of § 1.446-1(e). Thus, the method of determining when property is provided must be used consistently from year to year, and cannot be changed without the consent of the Commissioner.

(iv) If different services or items of property are required to be provided to a taxpayer under a single contract or agreement, economic performance generally occurs over the time each service is provided and as each item of property is provided. However, if a service or item of property to be provided to the taxpayer is incidental to other services or property to be provided under a contract or agreement, the taxpayer is not required to allocate

any portion of the total contract price to the incidental service or property. For purposes of this paragraph (d)(6)(iv), services or property is treated as incidental only if—

(A) The cost of the services or property is treated on the taxpayer's books and records as part of the cost of the other services or property provided under the contract; and

(B) The aggregate cost of the services or property does not exceed 10 percent of the total contract price.

(7) *Examples.* The following examples illustrate the principles of this paragraph (d). For purposes of these examples, it is assumed that the requirements of the all events test other than economic performance have been met, and that the recurring item exception is not used. Assume further that the examples do not involve section 467 rental agreements and, therefore, section 467 is not applicable. The examples are as follows:

*Example 1. Services or property provided by the taxpayer.* (i) X corporation, a calendar year, accrual method taxpayer, is an oil company. During March 1990, X enters into an oil and gas lease with Y. In November 1990, X installs a platform and commences drilling. The lease obligates X to remove its offshore platform and well fixtures upon abandonment of the well or termination of the lease. During 1998, X removes the platform and well fixtures at a cost of \$200,000.

(ii) Under paragraph (d)(4)(i) of this section, economic performance with respect to X's liability to remove the offshore platform and well fixtures occurs as X incurs costs in connection with that liability. X incurs these costs in 1998 as, for example, X's employees provide X with removal services (see paragraph (d)(2) of this section). Consequently, X incurs \$200,000 for the 1998 taxable year. Alternatively, assume that during 1990 X pays Z \$130,000 to remove the platform and fixtures, and that Z performs these removal services in 1998. Under paragraph (d)(2) of this section, X does not incur this cost until Z performs the services. Thus, economic performance with respect to the \$130,000 X pays Z occurs in 1998.

*Example 2. Services or property provided by the taxpayer.* (i) W corporation, a calendar year, accrual method taxpayer, sells tractors under a three-year warranty that obligates W to make any reasonable repairs to each tractor it sells. During 1990, W sells ten tractors. In 1992 W repairs, at a cost of \$5,000, two tractors sold during 1990.

(ii) Under paragraph (d)(4)(i) of this section, economic performance with respect to

W's liability to perform services under the warranty occurs as W incurs costs in connection with that liability. W incurs these costs in 1992 as, for example, replacement parts are provided to W (see paragraph (d)(2) of this section). Consequently, \$5,000 is incurred by W for the 1992 taxable year.

*Example 3. Services or property provided by the taxpayer; Long-term contracts.* (i) W corporation, a calendar year, accrual method taxpayer, manufactures machine tool equipment. In November 1992, W contracts to provide X corporation with certain equipment. The contract is not a long-term contract under section 460 or § 1.451-3. In 1992, W pays Z corporation \$50,000 to lease from Z, for the one-year period beginning on January 1, 1993, testing equipment to perform quality control tests required by the agreement with X. In 1992, pursuant to the terms of a contract, W pays Y corporation \$100,000 for certain parts necessary to manufacture the equipment. The parts are provided to W in 1993. W's employees provide W with services necessary to manufacture the equipment during 1993, for which W pays \$150,000 in 1993.

(ii) Under paragraph (d)(4) of this section, economic performance with respect to W's liability to provide the equipment to X occurs as W incurs costs in connection with that liability. W incurs these costs during 1993, as services, property, and the use of property necessary to manufacture the equipment are provided to W (see paragraphs (d)(2) and (d)(3) of this section). Thus, \$300,000 is incurred by W for the 1993 taxable year. See section 263A and the regulations thereunder for rules relating to the capitalization and inclusion in inventory of these incurred costs.

(iii) Alternatively, assume that the agreement with X is a long-term contract as defined in section 460(f), and that W takes into account all items with respect to such contracts under the percentage of completion method as described in section 460(b)(1). Under paragraph (d)(2)(ii) of this section, the \$100,000 W pays in 1992 for parts is incurred for the 1992 taxable year, for purposes of determining the percentage of completion under section 460(b)(1)(A). W's other costs under the agreement are incurred for the 1993 taxable year for this purpose.

*Example 4. Services or property provided to the taxpayers.* (i) LP1, a calendar year, accrual method limited partnership, owns the working interest in a parcel of property containing oil and gas. During December 1990, LP1 enters into a turnkey contract with Z corporation pursuant to which LP1 pays Z \$200,000 and Z is required to provide a completed well by the close of 1992. In May 1992, Z commences drilling the well, and, in December 1992, the well is completed.

(ii) Under paragraph (d)(2) of this section, economic performance with respect to LP1's

liability for drilling and development services provided to LP1 by Z occurs as the services are provided. Consequently, \$200,000 is incurred by LP1 for the 1992 taxable year.

*Example 5. Services or property provided to the taxpayer.* (i) X corporation, a calendar year, accrual method taxpayer, is an automobile dealer. On January 15, 1990, X agrees to pay an additional \$10 to Y, the manufacturer of the automobiles, for each automobile purchased by X from Y. Y agrees to provide advertising and promotional activities to X.

(ii) During 1990, X purchases from Y 1,000 new automobiles and pays to Y an additional \$10,000 as provided in the agreement. Y, in turn, uses this \$10,000 to provide advertising and promotional activities during 1992.

(iii) Under paragraph (d)(2) of this section, economic performance with respect to X's liability for advertising and promotional services provided to X by Y occurs as the services are provided. Consequently, \$10,000 is incurred by X for the 1992 taxable year.

*Example 6. Use of property provided to the taxpayer; services or property provided to the taxpayer.* (i) V corporation, a calendar year, accrual method taxpayer, charters aircrafts. On December 20, 1990, V leases a jet aircraft from L for the four-year period that begins on January 1, 1991. The lease obligates V to pay L a base rental of \$500,000 per year. In addition, the lease requires V to pay \$25 to an escrow account for each hour that the aircraft is flown. The escrow account funds are held by V and are to be used by L to make necessary repairs to the aircraft. Any amount remaining in the escrow account upon termination of the lease is payable to V. During 1991, the aircraft is flown 1,000 hours and V pays \$25,000 to the escrow account. The aircraft is repaired by L in 1993. In 1994, \$20,000 is released from the escrow account to pay L for the repairs.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to V's base rental liability occurs ratably over the period of time V is entitled to use the jet aircraft. Consequently, the \$500,000 rent is incurred by V for the 1991 taxable year and for each of the next three taxable years. Under paragraph (d)(2) of this section, economic performance with respect to the liability to place amounts in escrow occurs as the aircraft is repaired. Consequently, V incurs \$20,000 for the 1993 taxable year.

*Example 7. Use of property provided to the taxpayer.* (i) X corporation, a calendar year, accrual method taxpayer, manufactures and sells electronic circuitry. On November 15, 1990, X enters into a contract with Y that entitles X to the exclusive use of a product owned by Y for the five-year period beginning on January 1, 1991. Pursuant to the contract, X pays Y \$100,000 on December 30, 1990.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to

X's liability for the use of property occurs ratably over the period of time X is entitled to use the product. Consequently, \$20,000 is incurred by X for 1991 and for each of the succeeding four taxable years.

*Example 8. Use of property provided to the taxpayer.* (i) Y corporation, a calendar year, accrual method taxpayer, enters into a five-year lease with Z for the use of a copy machine on July 1, 1991. Y also receives delivery of the copy machine on July 1, 1991. The lease obligates Y to pay Z a base rental payment of \$6,000 per year at the beginning of each lease year and an additional charge of 5 cents per copy 30 days after the end of each lease year. The machine is used to make 50,000 copies during the first lease year: 20,000 copies in 1991 and 30,000 copies from January 1, 1992, to July 1, 1992. Y pays the \$6,000 base rental payment to Z on July 1, 1991, and the \$2,500 variable use payment on July 30, 1992.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to Y's base rental liability occurs ratably over the period of time Y is entitled to use the copy machine. Consequently, \$3,000 rent is incurred by Y for the 1991 taxable year. Under paragraph (d)(3)(ii) of this section, economic performance with respect to Y's variable use portion of the liability occurs as Y uses the machine. Thus, the \$1,000 of the \$2,500 variable-use liability that relates to the 20,000 copies made in 1991 is incurred by Y for the 1991 taxable year.

*Example 9. Use of property provided to the taxpayer.* (i) X corporation, a calendar year, accrual method taxpayer, enters into a five-year product distribution agreement with Y, on January 1, 1992. The agreement provides for a payment of \$100,000 on January 1, 1992, plus 10 percent of the gross profits earned by X from distribution of the product. The variable income portion of X's liability is payable on April 1 of each subsequent year. On January 1, 1992, X pays Y \$100,000. On April 1, 1993, X pays Y \$3 million representing 10 percent of X's gross profits from January 1 through December 31, 1992.

(ii) Under paragraph (d)(3)(i) of this section, economic performance with respect to X's \$100,000 payment occurs ratably over the period of time X is entitled to use the product. Consequently, \$20,000 is incurred by X for each year of the agreement beginning with 1992. Under paragraph (d)(3)(ii) of this section, economic performance with respect to X's variable income portion of the liability occurs as the income is earned by X. Thus, the \$3 million variable-income liability is incurred by X for the 1992 taxable year.

(e) *Interest.* In the case of interest, economic performance occurs as the interest cost economically accrues, in accordance with the principles of relevant provisions of the Code.

(f) *Timing of deductions from notional principal contracts.* Economic performance on a notional principal contract occurs as provided under § 1.446-3.

(g) *Certain liabilities for which payment is economic performance—(1) In general—*

(i) *Person to which payment must be made.* In the case of liabilities described in paragraphs (g) (2) through (7) of this section, economic performance occurs when, and to the extent that, payment is made to the person to which the liability is owed. Thus, except as otherwise provided in paragraph (g)(1)(iv) of this section and § 1.461-6, economic performance does not occur as a taxpayer makes payments in connection with such a liability to any other person, including a trust, escrow account, court-administered fund, or any similar arrangement, unless the payments constitute payment to the person to which the liability is owed under paragraph (g)(1)(ii)(B) of this section. Instead, economic performance occurs as payments are made from that other person or fund to the person to which the liability is owed. The amount of economic performance that occurs as payment is made from the other person or fund to the person to which the liability is owed may not exceed the amount the taxpayer transferred to the other person or fund. For special rules relating to the taxation of amounts transferred to “qualified settlement funds,” see section 468B and the regulations thereunder. The Commissioner may provide additional rules in regulations, revenue procedures, and revenue rulings concerning the time at which economic performance occurs for items described in this paragraph (g).

(ii) *Payment to person to which liability is owed.* Paragraph (d)(6) of this section provides that for purposes of paragraph (d) of this section (relating to the provision of services or property to the taxpayer) in certain cases a taxpayer may treat services or property as provided to the taxpayer as the taxpayer makes payments to the person providing the services or property. In addition, this paragraph (g) provides that in the case of certain liabilities of a taxpayer, economic performance occurs as the taxpayer makes payment to persons specified therein. For these and

all other purposes of section 461(h) and the regulations thereunder:

(A) *Payment.* The term *payment* has the same meaning as is used when determining whether a taxpayer using the cash receipts and disbursements method of accounting has made a payment. Thus, for example, payment includes the furnishing of cash or cash equivalents and the netting of offsetting accounts. Payment does not include the furnishing of a note or other evidence of indebtedness of the taxpayer, whether or not the evidence is guaranteed by any other instrument (including a standby letter of credit) or by any third party (including a government agency). As a further example, payment does not include a promise of the taxpayer to provide services or property in the future (whether or not the promise is evidenced by a contract or other written agreement). In addition, payment does not include an amount transferred as a loan, refundable deposit, or contingent payment.

(B) *Person to which payment is made.* Payment to a particular person is accomplished if paragraph (g)(1)(ii)(A) of this section is satisfied and a cash basis taxpayer in the position of that person would be treated as having actually or constructively received the amount of the payment as gross income under the principles of section 451 (without regard to section 104(a) or any other provision that specifically excludes the amount from gross income). Thus, for example, the purchase of an annuity contract or any other asset generally does not constitute payment to the person to which a liability is owed unless the ownership of the contract or other asset is transferred to that person.

(C) *Liabilities that are assumed in connection with the sale of a trade or business.* Paragraph (d)(5) of this section provides rules that determine when economic performance occurs in the case of liabilities that are assumed in connection with the sale of a trade or business. The provisions of paragraph (d)(5) of this section also apply to any liability described in paragraph (g) (2) through (7) of this section that the purchaser expressly assumes in connection with the sale or exchange of a trade or business by a taxpayer, provided the

taxpayer (but for the economic performance requirement) would have been entitled to incur the liability as of the date of the sale.

(iii) *Person*. For purposes of this paragraph (g), “person” has the same meaning as in section 7701(a)(1), except that it also includes any foreign state, the United States, any State or political subdivision thereof, any possession of the United States, and any agency or instrumentality of any of the foregoing.

(iv) *Assignments*. If a person that has a right to receive payment in satisfaction of a liability described in paragraphs (g) (2) through (7) of this section makes a valid assignment of that right to a second person, or if the right is assigned to the second person through operation of law, then payment to the second person in satisfaction of that liability constitutes payment to the person to which the liability is owed.

(2) *Liabilities arising under a workers compensation act or out of any tort, breach of contract, or violation of law*. If the liability of a taxpayer requires a payment or series of payments to another person and arises under any workers compensation act or out of any tort, breach of contract, or violation of law, economic performance occurs as payment is made to the person to which the liability is owed. See *Example 1* of paragraph (g)(8) of this section. For purposes of this paragraph (g)(2)—

(i) A liability to make payments for services, property, or other consideration provided under a contract is not a liability arising out of a breach of that contract unless the payments are in the nature of incidental, consequential, or liquidated damages; and

(ii) A liability arising out of a tort, breach of contract, or violation of law includes a liability arising out of the settlement of a dispute in which a tort, breach of contract, or violation of law, respectively, is alleged.

(3) *Rebates and refunds*. If the liability of a taxpayer is to pay a rebate, refund, or similar payment to another person (whether paid in property, money, or as a reduction in the price of goods or services to be provided in the future by the taxpayer), economic performance occurs as payment is made to the per-

son to which the liability is owed. This paragraph (g)(3) applies to all rebates, refunds, and payments or transfers in the nature of a rebate or refund regardless of whether they are characterized as a deduction from gross income, an adjustment to gross receipts or total sales, or an adjustment or addition to cost of goods sold. In the case of a rebate or refund made as a reduction in the price of goods or services to be provided in the future by the taxpayer, “payment” is deemed to occur as the taxpayer would otherwise be required to recognize income resulting from a disposition at an unreduced price. See *Example 2* of paragraph (g)(8) of this section. For purposes of determining whether the recurring item exception of § 1.461-5 applies, a liability that arises out of a tort, breach of contract, or violation of law is not considered a rebate or refund.

(4) *Awards, prizes, and jackpots*. If the liability of a taxpayer is to provide an award, prize, jackpot, or other similar payment to another person, economic performance occurs as payment is made to the person to which the liability is owed. See *Examples 3* and *4* of paragraph (g)(8) of this section.

(5) *Insurance, warranty, and service contracts*. If the liability of a taxpayer arises out of the provision to the taxpayer of insurance, or a warranty or service contract, economic performance occurs as payment is made to the person to which the liability is owed. See *Examples 5* through *7* of paragraph (g)(8) of this section. For purposes of this paragraph (g)(5)—

(i) A warranty or service contract is a contract that a taxpayer enters into in connection with property bought or leased by the taxpayer, pursuant to which the other party to the contract promises to replace or repair the property under specified circumstances.

(ii) The term “insurance” has the same meaning as is used when determining the deductibility of amounts paid or incurred for insurance under section 162.

(6) *Taxes*—(i) *In general*. Except as otherwise provided in this paragraph (g)(6), if the liability of a taxpayer is to pay a tax, economic performance occurs as the tax is paid to the governmental authority that imposed the tax.

For purposes of this paragraph (g)(6), payment includes payments of estimated income tax and payments of tax where the taxpayer subsequently files a claim for credit or refund. In addition, for purposes of this paragraph (g)(6), a tax does not include a charge collected by a governmental authority for specific extraordinary services or property provided to a taxpayer by the governmental authority. Examples of such a charge include the purchase price of a parcel of land sold to a taxpayer by a governmental authority and a charge for labor engaged in by government employees to improve that parcel. In certain cases, a liability to pay a tax is permitted to be taken into account in the taxable year before the taxable year during which economic performance occurs under the recurring item exception of § 1.461-5. See *Example 8* of paragraph (g)(8) of this section.

(ii) *Licensing fees.* If the liability of a taxpayer is to pay a licensing or permit fee required by a governmental authority, economic performance occurs as the fee is paid to the governmental authority, or as payment is made to any other person at the direction of the governmental authority.

(iii) *Exceptions—(A) Real property taxes.* If a taxpayer has made a valid election under section 461 (c), the taxpayer's accrual for real property taxes is determined under section 461 (c). Otherwise, economic performance with respect to a property tax liability occurs as the tax is paid, as specified in paragraph (g)(6)(i) of this section.

(B) *Certain foreign taxes.* If the liability of a taxpayer is to pay an income, war profits, or excess profits tax that is imposed by the authority of any foreign country or possession of the United States and is creditable under section 901 (including a creditable tax described in section 903 that is paid in lieu of such a tax), economic performance occurs when the requirements of the all events test (as described in § 1.446-1 (c)(1)(ii)) other than economic performance are met, whether or not the taxpayer elects to credit such taxes under section 901 (a).

(7) *Other liabilities.* In the case of a taxpayer's liability for which economic performance rules are not provided elsewhere in this section or in any other

Internal Revenue regulation, revenue ruling or revenue procedure, economic performance occurs as the taxpayer makes payments in satisfaction of the liability to the person to which the liability is owed. This paragraph (g)(7) applies only if the liability cannot properly be characterized as a liability covered by rules provided elsewhere in this section. If a liability may properly be characterized as, for example, a liability arising from the provision of services or property to, or by, a taxpayer, the determination as to when economic performance occurs with respect to that liability is made under paragraph (d) of this section and not under this paragraph (g)(7).

(8) *Examples.* The following examples illustrate the principles of this paragraph (g). For purposes of these examples, it is assumed that the requirements of the all events test other than economic performance have been met and, except as otherwise provided, that the recurring item exception is not used.

*Example 1. Liabilities arising out of a tort.* (i) During the period 1970 through 1975, Z corporation, a calendar year, accrual method taxpayer, manufactured and distributed industrial products that contained carcinogenic substances. In 1992, a number of lawsuits are filed against Z alleging damages due to exposure to these products. In settlement of a lawsuit maintained by A, Z agrees to purchase an annuity contract that will provide annual payments to A of \$50,000 for a period of 25 years. On December 15, 1992, Z pays W, an unrelated life insurance company, \$491,129 for such an annuity contract. Z retains ownership of the annuity contract.

(ii) Under paragraph (g)(2) of this section, economic performance with respect to Z's liability to A occurs as each payment is made to A. Consequently, \$50,000 is incurred by Z for each taxable year that a payment is made to A under the annuity contract. (Z must also include in income a portion of amounts paid under the annuity, pursuant to section 72.) The result is the same if in 1992 Z secures its obligation with a standby letter of credit.

(iii) If Z later transfers ownership of the annuity contract to A, an amount equal to the fair market value of the annuity on the date of transfer is incurred by Z in the taxable year of the transfer (see paragraph (g)(1)(ii)(B) of this section). In addition, the transfer constitutes a transaction to which section 1001 applies.

*Example 2. Rebates and refunds.* (i) X corporation, a calendar year, accrual method

taxpayer, manufactures and sells hardware products. X enters into agreements that entitle each of its distributors to a rebate (or discount on future purchases) from X based on the amount of purchases made by the distributor from X during any calendar year. During the 1992 calendar year, X becomes liable to pay a \$2,000 rebate to distributor A. X pays A \$1,200 of the rebate on January 15, 1993, and the remaining \$800 on October 15, 1993. Assume the rebate is deductible (or allowable as an adjustment to gross receipts or cost of goods sold) when incurred.

(ii) If X does not adopt the recurring item exception described in § 1.461-5 with respect to rebates and refunds, then under paragraph (g)(3) of this section, economic performance with respect to the \$2,000 rebate liability occurs in 1993. However, if X has made a proper election under § 1.461-5, and as of December 31, 1992, all events have occurred that determine the fact of the rebate liability, X incurs \$1,200 for the 1992 taxable year. Because economic performance (payment) with respect to the remaining \$800 does not occur until October 15, 1993 (more than 8½ months after the end of 1992), X cannot use the recurring item exception for this portion of the liability (see § 1.461-5). Thus, the \$800 is not incurred by X until the 1993 taxable year. If, instead of making the cash payments to A during 1993, X adjusts the price of hardware purchased by A that is delivered to A during 1993, X's "payment" occurs as X would otherwise be required to recognize income resulting from a disposition at an unreduced price.

*Example 3. Awards, prizes, and jackpots.* (i) W corporation, a calendar year, accrual method taxpayer, produces and sells breakfast cereal. W conducts a contest pursuant to which the winner is entitled to \$10,000 per year for a period of 20 years. On December 1, 1992, A is declared the winner of the contest and is paid \$10,000 by W. In addition, on December 1 of each of the next nineteen years, W pays \$10,000 to A.

(ii) Under paragraph (g)(4) of this section, economic performance with respect to the \$200,000 contest liability occurs as each of the \$10,000 payments is made by W to A. Consequently, \$10,000 is incurred by W for the 1992 taxable year and for each of the succeeding nineteen taxable years.

*Example 4. Awards, prizes, and jackpots.* (i) Y corporation, a calendar year, accrual method taxpayer, owns a casino that contains progressive slot machines. A progressive slot machine provides a guaranteed jackpot amount that increases as money is gambled through the machine until the jackpot is won or until a maximum predetermined amount is reached. On July 1, 1993, the guaranteed jackpot amount on one of Y's slot machines reaches the maximum predetermined amount of \$50,000. On October 1, 1994, the \$50,000 jackpot is paid to B.

(ii) Under paragraph (g)(4) of this section, economic performance with respect to the \$50,000 jackpot liability occurs on the date the jackpot is paid to B. Consequently, \$50,000 is incurred by Y for the 1994 taxable year.

*Example 5. Insurance, warranty, and service contracts.* (i) V corporation, a calendar year, accrual method taxpayer, manufactures toys. V enters into a contract with W, an unrelated insurance company, on December 15, 1992. The contract obligates V to pay W a premium of \$500,000 before the end of 1995. The contract obligates W to satisfy any liability of V resulting from claims made during 1993 or 1994 against V by any third party for damages attributable to defects in toys manufactured by V. Pursuant to the contract, V pays W a premium of \$500,000 on October 1, 1995.

(ii) Assuming the arrangement constitutes insurance, under paragraph (g)(5) of this section economic performance occurs as the premium is paid. Thus, \$500,000 is incurred by V for the 1995 taxable year.

*Example 6. Insurance, warranty, and service contracts.* (i) Y corporation, a calendar year, accrual method taxpayer, is a common carrier. On December 15, 1992, Y enters into a contract with Z, an unrelated insurance company, under which Z must satisfy any liability of Y that arises during the succeeding 5 years for damages under a workers compensation act or out of any tort, provided the event that causes the damages occurs during 1993 or 1994. Under the contract, Y pays \$360,000 to Z on December 31, 1993.

(ii) Assuming the arrangement constitutes insurance, under paragraph (g)(5) of this section economic performance occurs as the premium is paid. Consequently, \$360,000 is incurred by Y for the 1993 taxable year. The period for which the \$360,000 amount is permitted to be taken into account is determined under the capitalization rules because the insurance contract is an asset having a useful life extending substantially beyond the close of the taxable year.

*Example 7. Insurance, warranty, and service contracts.* Assume the same facts as in *Example 6*, except that Y is obligated to pay the first \$5,000 of any damages covered by the arrangement with Z. Y is, in effect, self-insured to the extent of this \$5,000 "deductible." Thus, under paragraph (g)(2) of this section, economic performance with respect to the \$5,000 liability does not occur until the amount is paid to the person to which the tort or workers compensation liability is owed.

*Example 8. Taxes.* (i) The laws of State A provide that every person owning personal property located in State A on the first day of January shall be liable for tax thereon and that a lien for the tax shall attach as of that date. In addition, the laws of State A provide that 60% of the tax is due on the first day of

December following the lien date and the remaining 40% is due on the first day of July of the succeeding year. On January 1, 1992, X corporation, a calendar year, accrual method taxpayer, owns personal property located in State A. State A imposes a \$10,000 tax on S with respect to that property on January 1, 1992. X pays State A \$6,000 of the tax on December 1, 1992, and the remaining \$4,000 on July 1, 1993.

(i) Under paragraph (g)(6) of this section, economic performance with respect to \$6,000 of the tax liability occurs on December 1, 1992. Consequently, \$6,000 is incurred by X for the 1992 taxable year. Economic performance with respect to the remaining \$4,000 of the tax liability occurs on July 1, 1993. If X has adopted the recurring item exception described in § 1.461-5 as a method of accounting for taxes, and as of December 31, 1992, all events have occurred that determine the liability of X for the remaining \$4,000, X also incurs \$4,000 for the 1992 taxable year. If X does not adopt the recurring item exception method, the \$4,000 is not incurred by X until the 1993 taxable year.

(h) *Liabilities arising under the Nuclear Waste Policy Act of 1982.* Notwithstanding the principles of paragraph (d) of this section, economic performance with respect to the liability of an owner or generator of nuclear waste to make payments to the Department of Energy ("DOE") pursuant to a contract required by the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425, 42 U.S.C. 10101-10226 (1982)) occurs as each payment under the contract is made to DOE and not when DOE satisfies its obligations under the contract. This rule applies to the continuing fee required by 42 U.S.C. 10222(a)(2) (1982), as well as the one-time fee required by 42 U.S.C. 10222 (a)(3) (1982). For rules relating to when economic performance occurs with respect to interest, see paragraph (e) of this section.

(i) [Reserved]

(j) *Contingent liabilities.* [Reserved]

(k) *Special effective dates—(1) In general.* Except as otherwise provided in this paragraph (k), section 461(h) and this section apply to liabilities that would, under the law in effect before the enactment of section 461(h), be allowable as a deduction or otherwise incurred after July 18, 1984. For example, the economic performance requirement applies to all liabilities arising under a workers compensation act or out of any tort that would, under the law in effect before the enactment of section

461(h), be incurred after July 18, 1984. For taxable years ending before April 7, 1995, see Q&A-2 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995), which provides an election to make this change in method of accounting applicable to either the portion of the first taxable year that occurs after July 18, 1984 (part-year change method), or the entire first taxable year ending after July 18, 1984 (full-year change method). With respect to the effective date rules for interest accruing under any obligation (whether or not evidenced by a debt instrument) if the obligation is incurred in any transaction occurring after June 8, 1984, and is not incurred under a written contract which was binding on March 1, 1984, and at all times thereafter until the obligation is incurred. Interest accruing under an obligation described in the preceding sentence is subject to section 461(h) even if the interest accrues before July 19, 1984. Similarly, interest accruing under any obligation incurred in a transaction occurring before June 9, 1984, (or under a written contract which was binding on March 1, 1984, and at all times thereafter until the obligation is incurred) is not subject to section 461(h) even to the extent the interest accrues after July 18, 1984.

(2) *Long-term contracts.* Except as otherwise provided in paragraph (M)(2) of this section, in the case of liabilities described in paragraph (d)(2)(ii) of this section (relating to long-term contracts), paragraph (d)(2)(ii) of this section applies to liabilities that would, but for the enactment of section 461(h), be allowable as a deduction or otherwise incurred for taxable years beginning after December 31, 1991.

(3) *Payment liabilities.* Except as otherwise provided in paragraph (m)(2) of this section, in the case of liabilities described in paragraph (g) of this section (other than liabilities arising under a workers compensation act or out of any tort described in paragraph (g)(2) of this section), paragraph (g) of this section applies to liabilities that would, but for the enactment of section 461(h), be allowable as a deduction or otherwise incurred for taxable years beginning after December 31, 1991.

(l) [Reserved]

(m) *Change in method of accounting required by this section—(1) In general.* For the first taxable year ending after July 18, 1984, a taxpayer is granted the consent of the Commissioner to change its method of accounting for liabilities to comply with the provisions of this section pursuant to any of the following procedures:

(i) For taxable years ending before April 7, 1995, the part-year change in method election described in Q&A-2 through Q&A-6 and Q&A-8 through Q&A-10 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995);

(ii) For taxable years ending before April 7, 1995, the full-year change in method election described in Q&A-2 through Q&A-6 and Q&A-8 through Q&A-10 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995); or

(iii) For taxable years ending before April 7, 1995, if no election is made, the cut-off method described in Q&A-1 and Q&A-11 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995).

(2) *Change in method of accounting for long-term contracts and payment liabilities—(1) First taxable year beginning after December 31, 1991.* For the first taxable year beginning after December 31, 1991, a taxpayer is granted the consent of the Commissioner to change its method of accounting for long-term contract liabilities described in paragraph (D)(2)(ii) of this section and payment liabilities described in paragraph (g) of this section (other than liabilities arising under a workers compensation act or out of any tort described in paragraph (g)(2) of this section) to comply with the provisions of this section. The change must be made in accordance with paragraph (m)(1)(ii) or (m)(1)(iii) of this section, except the effective date is the first day of the first taxable year beginning December 31, 1991.

(ii) *Retroactive change in method of accounting for long-term contracts and payment liabilities.* For the first taxable year beginning after December 31, 1989, or the first taxable year beginning after December 31, 1990, a taxpayer is granted the consent of the Commissioner to change its method of accounting for long-term contract liabilities described in paragraph (d)(2)(ii) of this

section and payment liabilities described in paragraph (g) of this section (other than liabilities arising under a workers compensation act or out of any tort described in paragraph (g)(2) of this section) to comply with the provisions of this section. The change must be made in accordance with paragraph (m)(1)(ii) or (m)(1)(iii) of this section, except the effective date is the first day of the first taxable year beginning after December 31, 1989, or the first day of the first taxable year beginning after December 31, 1990. For taxable years ending before April 7, 1995, the taxpayer may make the change in method of accounting, including a full-year change in method election under paragraph (m)(1)(ii) of this section and Q&A-5 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995), by filing an amended return for such year, provided the amended return is filed on or before October 7, 1992.

[T.D. 8408, 57 FR 12421, Apr. 10, 1992, as amended by T.D. 8491, 58 FR 53135, Oct. 14, 1993; T.D. 8593, 60 FR 18743, Apr. 13, 1995; T.D. 8820, 64 FR 26851, May 18, 1999; T.D. 8408, 69 FR 44597, July 27, 2004]

#### § 1.461-5 Recurring item exception.

(a) *In general.* Except as otherwise provided in paragraph (c) of this section, a taxpayer using an accrual method of accounting may adopt the recurring item exception described in paragraph (b) of this section as method of accounting for one or more types of recurring items incurred by the taxpayer. In the case of the “other payment liabilities” described in § 1.461-4(g)(7), the Commissioner may provide for the application of the recurring item exception by regulation, revenue procedure or revenue ruling.

(b) *Requirements for use of the exception—(1) General rule.* Under the recurring item exception, a liability is treated as incurred for a taxable year if—

(i) As of the end of that taxable year, all events have occurred that establish the fact of the liability and the amount of the liability can be determined with reasonable accuracy;

(ii) Economic performance with respect to the liability occurs on or before the earlier of—

(A) The date the taxpayer files a timely (including extensions) return for that taxable year; or

(B) The 15th day of the 9th calendar month after the close of that taxable year;

(iii) The liability is recurring in nature; and

(iv) Either—

(A) The amount of the liability is not material; or

(B) The accrual of the liability for that taxable year results in a better matching of the liability with the income to which it relates than would result from accruing the liability for the taxable year in which economic performance occurs.

(2) *Amended returns.* A taxpayer may file an amended return treating a liability as incurred under the recurring item exception for a taxable year if economic performance with respect to the liability occurs after the taxpayer files a return for that year, but within 8½ months after the close of that year.

(3) *Liabilities that are recurring in nature.* A liability is recurring if it can generally be expected to be incurred from one taxable year to the next. However, a taxpayer may treat such a liability as recurring in nature even if it is not incurred by the taxpayer in each taxable year. In addition, a liability that has never previously been incurred by a taxpayer may be treated as recurring if it is reasonable to expect that the liability will be incurred on a recurring basis in the future.

(4) *Materiality requirement.* For purposes of this paragraph (b):

(i) In determining whether a liability is material, consideration shall be given to the amount of the liability in absolute terms and in relation to the amount of other items of income and expense attributable to the same activity.

(ii) A liability is material if it is material for financial statement purposes under generally accepted accounting principles.

(iii) A liability that is immaterial for financial statement purposes under generally accepted accounting principles may be material for purposes of this paragraph (b).

(5) *Matching requirement.* (i) In determining whether the matching require-

ment of paragraph (b)(1)(iv)(B) of this section is satisfied, generally accepted accounting principles are an important factor, but are not dispositive.

(ii) In the case of a liability described in paragraph (g)(3) (rebates and refunds), paragraph (g)(4) (awards, prizes, and jackpots), paragraph (g)(5) (insurance, warranty, and service contracts), paragraph (g)(6) (taxes), or paragraph (h) (continuing fees under the Nuclear Waste Policy Act of 1982) of § 1.461-4, the matching requirement of paragraph (b)(1)(iv)(B) of this section shall be deemed satisfied.

(c) *Types of liabilities not eligible for treatment under the recurring item exception.* The recurring item exception does not apply to any liability of a taxpayer described in paragraph (e) (interest), paragraph (g)(2) (workers compensation, tort, breach of contract, and violation of law), or paragraph (g)(7) (other liabilities) of § 1.461-4. Moreover, the recurring item exception does not apply to any liability incurred by a tax shelter, as defined in section 461(i) and § 1.448-1T(b).

(d) *Time and manner of adopting the recurring item exception—(1) In general.* The recurring item exception is a method of accounting that must be consistently applied with respect to a type of item, or for all items, from one taxable year to the next in order to clearly reflect income. A taxpayer is permitted to adopt the recurring item exception as part of its method of accounting for any type of item for the first taxable year in which that type of item is incurred. Except as otherwise provided, the rules of section 446(e) and § 1.446-1(e) apply to changes to or from the recurring item exception as a method of accounting. For taxable years ending before April 7, 1995, see Q&A-7 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995) for rules concerning the time and manner of adopting the recurring item exception for taxable years that include July 19, 1984. For purposes of this section, items are to be classified by type in a manner that results in classifications that are no less inclusive than the classifications of production costs provided in the full-absorption regulations of § 1.471-11(b) and (c), whether or not the

taxpayer is required to maintain inventories.

(2) *Change to the recurring item exception method for the first taxable year beginning after December 31, 1991*—(i) *In general.* For the first taxable year beginning after December 31, 1991, a taxpayer is granted the consent of the Commissioner to change to the recurring item exception method of accounting. A taxpayer is also granted the consent of the Commissioner to expand or modify its use of the recurring item exception method for the first taxable year beginning after December 31, 1991. For each trade or business for which a taxpayer elects to use the recurring item exception method, the taxpayer must use the same method of change (cut-off or full-year change) it is using for that trade or business under § 1.461-4(m). For taxable year ending before April 7, 1995, see Q&A-11 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995) for an explanation of how amounts are taken into account under the cut-off method (except that, for purposes of this paragraph (d)(2), the change applies to all amounts otherwise incurred on or after the first day of the first taxable year beginning after December 31, 1991). For taxable years ending before April 7, 1995, see Q&A-6 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995) for an explanation of how amounts are taken into account under the full-year change method (except that the change in method occurs on the first day of the first taxable year beginning after December 31, 1991). For taxable years ending before April 7, 1995, the full-year change in method may result in a section 481(a) adjustment that must be taken into account in the manner described in Q&A-8 and Q&A-9 of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995) (except that the taxable year of change is the first taxable year beginning after December 31, 1991).

(ii) *Manner of changing to the recurring item exception method.* For the first taxable year beginning after December 31, 1991, a taxpayer may change to the recurring item exception method by accounting for the item on its timely filed original return for such taxable year (including extensions). For tax-

able years ending before April 7, 1995, the automatic consent of the Commissioner is limited to those items accounted for under the recurring item exception method on the timely filed return, unless the taxpayer indicates a wider scope of change by filing the statement provided in Q&A-7(b)(2) of § 1.461-7T (as it appears in 26 CFR part 1 revised April 1, 1995).

(3) *Retroactive change to the recurring item exception method.* For the first taxable year beginning after December 31, 1989, or December 31, 1990, a taxpayer is granted consent of the Commissioner to change to the recurring item exception method of accounting, provided the taxpayer complies with paragraph (d)(2) of this section on either the original return for such year or on an amended return for such year filed on or before October 7, 1991. For this purpose the effective date is the first day of the first taxable year beginning after December 31, 1989, or the first day of the first taxable year beginning after December 31, 1990. A taxpayer is also granted the consent of the Commissioner to expand or modify its use of the recurring item exception method for the first taxable year beginning after December 31, 1989, December 31, 1990, or December 31, 1991.

(e) *Examples.* The following examples illustrate the principles of this section:

*Example 1. Requirements for use of the recurring item exception.* (i) Y corporation, a calendar year, accrual method taxpayer, manufactures and distributes video cassette recorders. Y timely files its federal income tax return for each taxable year on the extended due date for the return (September 15, of the following taxable year). Y offers to refund the price of a recorder to any purchaser not satisfied with the recorder. During 1992, 100 purchasers request a refund of the \$500 purchase price. Y refunds \$30,000 on or before September 15, 1993, and the remaining \$20,000 after such date but before the end of 1993.

(ii) Under paragraph (g)(3) of § 1.461-4, economic performance with respect to \$30,000 of the refund liability occurs on September 15, 1993. Assume the refund is deductible (or allowable as an adjustment to gross receipts or cost of goods sold) when incurred. If Y does not adopt the recurring item exception with respect to rebates and refunds, the \$30,000 refund is incurred by Y for the 1993 taxable year. However, if Y has properly adopted the recurring item exception method of accounting under this section, and as of December

31, 1992, all events have occurred that determine the fact of the liability for the \$30,000 refund, Y incurs that amount for the 1992 taxable year. Because economic performance (payment) with respect to the remaining \$20,000 occurs after September 15, 1993 (more than 8½ months after the end of 1992), that amount is not eligible for recurring item treatment under this section. Thus, the \$20,000 amount is not incurred by Y until the 1993 taxable year.

*Example 2. Requirements for use of the recurring item exception; amended returns.* The facts are the same as in *Example 2*, except that Y files its income tax return for 1992 on March 15, 1993, and Y does not refund the price of any recorder before that date. Under paragraph (b)(1) of this section, the refund liability is not eligible for the recurring item exception because economic performance with respect to the refund does not occur before Y files a return for the taxable year for which the item would have been incurred under the exception. However, since economic performance occurs within 8½ months after 1992, Y may file an amended return claiming the \$30,000 as incurred for its 1992 taxable year (see paragraph (b)(2) of this section).

[T.D. 8408, 57 FR 12427, Apr. 10, 1992, as amended by T.D. 8593, 60 FR 18743, Apr. 13, 1995]

**§ 1.461-6 Economic performance when certain liabilities are assigned or are extinguished by the establishment of a fund.**

(a) *Qualified assignments of certain personal injury liabilities under section 130.* In the case of a qualified assignment (within the meaning of section 130(c)), economic performance occurs as a taxpayer-assignor makes payments that are excludible from the income of the assignee under section 130(a).

(b) *Section 468B.* Economic performance occurs as a taxpayer makes qualified payments to a designated settlement fund under section 468B, relating to special rules for designated settlement funds.

(c) *Payments to other funds or persons that constitute economic performance.* [Reserved]

(d) *Effective dates.* The rules in paragraph (a) of this section apply to payments after July 18, 1984.

[T.D. 8408, 57 FR 12428, Apr. 10, 1992]

**§ 1.465-1T Aggregation of certain activities (temporary).**

(a) *General rule.* A partner in a partnership or an S corporation share-

holder may aggregate and treat as a single activity—

(1) The holding, production, or distribution of more than one motion picture film or video tape by the partnership or S corporation,

(2) The farming (as defined in section 464 (e)) of more than one farm by the partnership or S corporation,

(3) The exploration for, or exploitation of, oil and gas resources with respect to more than one oil and gas property by the partnership or S corporation, or

(4) The exploration for, or exploitation of, geothermal deposits (within the meaning of section 613(e)(3)) with respect to more than one geothermal property by the partnership or S corporation.

Thus, for example, if a partnership or S corporation is engaged in the activity of exploring for, or exploiting, oil and gas resources with respect to 10 oil and gas properties, a partner or S corporation shareholder may aggregate those properties and treat the aggregated oil and gas activities as a single activity. If that partnership or S corporation also is engaged in the activity of farming with respect to two farms, the partner or shareholder may aggregate the farms and treat the aggregated farming activities as a single separate activity. Except as provided in section 465(c)(2)(B)(ii), the partner or shareholder cannot aggregate the farming activity with the oil and gas activity.

(b) *Effective date.* This section shall apply to taxable years beginning after December 31, 1983 and before January 1, 1985.

(Secs. 465(c)(2)(B) and 7805 of the Internal Revenue Code of 1954 (98 Stat. 814, 68A Stat. 917; 26 U.S.C. 465(c)(2)(B) and 7805))

[T.D. 8012, 50 FR 9614, Mar. 11, 1985]

**§ 1.465-8 General rules; interest other than that of a creditor.**

(a) *In general—(1) Amounts borrowed.* This section applies to amounts borrowed for use in an activity described in section 465(c)(1) or (c)(3)(A). Amounts borrowed with respect to an activity will not increase the borrower's amount at risk in the activity if the lender has an interest in the activity other than that of a creditor or

is related to a person (other than the borrower) who has an interest in the activity other than that of a creditor. This rule applies even if the borrower is personally liable for the repayment of the loan or the loan is secured by property not used in the activity. For additional rules relating to the treatment of amounts borrowed from these persons, see § 1.465-20.

(2) *Certain borrowed amounts excepted.*

(i) For purposes of determining a corporation's amount at risk, an interest in the corporation as a shareholder is not an interest in any activity of the corporation. Thus, amounts borrowed by a corporation from a shareholder may increase the corporation's amount at risk.

(ii) For purposes of determining a taxpayer's amount at risk in an activity of holding real property, paragraph (a)(1) of this section does not apply to financing that is secured by real property used in the activity and is either—

(A) Qualified nonrecourse financing described in section 465(b)(6)(B); or

(B) Financing that, if it were nonrecourse, would be financing described in section 465(b)(6)(B).

(b) *Loans for which the borrower is personally liable for repayment—(1) General rule.* If a borrower is personally liable for the repayment of a loan for use in an activity, a person shall be considered a person with an interest in the activity other than that of a creditor only if the person has either a capital interest in the activity or an interest in the net profits of the activity.

(2) *Capital interest.* For the purposes of this section a capital interest in an activity means an interest in the assets of the activity which is distributable to the owner of the capital interest upon the liquidation of the activity. The partners of a partnership and the shareholders of an S corporation are considered to have capital interests in the activities conducted by the partnership or S corporation.

(3) *Interest in net profits.* For the purposes of this section it is not necessary for a person to have any incidents of ownership in the activity in order to have an interest in the net profits of the activity. For example, an employee or independent contractor any part of whose compensation is determined

with reference to the net profits of the activity will be considered to have an interest in the net profits of the activity.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* A, the owner of a herd of cattle sells the herd to partnership BCD. BCD pays A \$10,000 in cash and executes a note for \$30,000 payable to A. Each of the three partners, B, C, and D, assumes personal liability for repayment of the amount owed A. In addition, BCD enters into an agreement with A under which A is to take care of the cattle for BCD in return for compensation equal to 6 percent of BCD's net profits from the activity. Because A has an interest in the net profits of BCD's farming activity, A is considered to have an interest in the activity other than that of a creditor. Accordingly, amounts payable to A for use in that activity do not increase the partners' amount at risk even though the partners assume personal liability for repayment.

*Example 2.* Assume the same facts as in *Example 1* except that instead of receiving compensation equal to 6 percent of BCD's net profits from the activity, A instead receives compensation equal to 1 percent of the gross receipts from the activity. A does not have a capital interest in BCD. A's interest in the gross receipts is not considered an interest in the net profits. Because B, C, and D assumed personal liability for the amounts payable to A, and A has neither a capital interest nor an interest in the net profits of the activity, A is not considered to have an interest in the activity other than that of a creditor with respect to the \$30,000 loan. Accordingly, B, C, and D are at risk for their share of the loan if the other provisions of section 465 are met.

*Example 3.* Assume the same facts as in *Example 1* except that instead of receiving compensation equal to 6 percent of BCD's net profits from the activity, A instead receives compensation equal to 6 percent of the net profits from the activity or \$15,000, whichever is greater. A is considered to have an interest in the net profits from the activity and accordingly will be treated as a person with an interest in the activity other than that of a creditor.

(c) *Nonrecourse loans secured by assets with a readily ascertainable fair market value—(1) General rule.* This paragraph shall apply in the case of a nonrecourse loan for use in an activity where the loan is secured by property which has a readily ascertainable fair market value. In the case of such a loan a person shall be considered a person with

an interest in the activity other than that of a creditor only if the person has either a capital interest in the activity or an interest in the net profits of the activity.

(2) *Example.* The provisions of this paragraph (c) may be illustrated by the following example:

*Example.* X is an investor in an activity described in section 465(c)(1). In order to raise money for the investment, X borrows money from A, the promoter (the person who brought X together with other taxpayers for the purpose of investing in the activity). The loan is secured by stock unrelated to the activity which is listed on a national securities exchange. X's stock has a readily ascertainable fair market value. A does not have a capital interest in the activity or an interest in its net profits. Accordingly, with respect to the loan secured by X's stock, A does not have an interest in the activity other than that of a creditor.

(d) *Nonrecourse loans secured by assets without a readily ascertainable fair market value—(1) General rule.* This paragraph shall apply in the case of a non-recourse loan for use in an activity where the loan is secured by property which does not have a readily ascertainable fair market value. In the case of such a loan a person shall be considered a person with an interest in the activity other than that of a creditor if the person stands to receive financial gain (other than interest) from the activity or from the sale of interests in the activity. For the purposes of this section persons who stand to receive financial gain from the activity include persons who receive compensation for services rendered in connection with the organization or operation of the activity or for the sale of interests in the activity. Such a person will generally include the promoter of the activity who organizes the activity or solicits potential investors in the activity.

(2) *Example.* The provisions of this paragraph (d) may be illustrated by the following example:

*Example.* A is the promoter of an activity described in section 465(c)(1). As the promoter, A organizes the activity and solicits potential investors. For these services A is paid a flat fee of \$130x. This fee is paid out of the amounts contributed by the investors to the activity. X, one of the investors in the activity, borrows money from A for use in the activity. X is not personally liable for re-

payment to A of the amount borrowed. As security for the loan, X pledges an asset which does not have a readily ascertainable fair market value. A is considered a person with an interest in the activity other than that of a creditor with respect to this loan because the asset pledged as security does not have a readily ascertainable fair market value, X is not personally liable for repayment of the loan, and A received financial gain from the activity. Accordingly, X's amount at risk in the activity is not increased despite the fact that property was pledged as security.

(e) *Effective date.* This section applies to amounts borrowed after May 3, 2004.

[T.D. 9124, 69 FR 24079, May 3, 2004; 69 FR 26305, May 12, 2004]

**§ 1.465-20 Treatment of amounts borrowed from certain persons and amounts protected against loss.**

(a) *General rule.* The following amounts are treated in the same manner as borrowed amounts for which the taxpayer has no personal liability and for which no security is pledged—

(1) Amounts that do not increase the taxpayer's amount at risk because they are borrowed from a person who has an interest in the activity other than that of a creditor or from a person who is related to a person (other than the taxpayer) who has an interest in the activity other than that of a creditor; and

(2) Amounts (whether or not borrowed) that are protected against loss.

(b) *Interest other than that of a creditor; cross reference.* See § 1.465-8 for additional rules relating to amounts borrowed from a person who has an interest in the activity other than that of a creditor or is related to a person (other than the taxpayer) who has an interest in the activity other than that of a creditor.

(c) *Amounts protected against loss; cross reference.* See § 1.465-6 for rules relating to amounts protected against loss.

(d) *Effective date.* This section applies to amounts borrowed after May 3, 2004.

[T.D. 9124, 69 FR 24079, May 3, 2004]

**§ 1.465-27 Qualified nonrecourse financing.**

(a) *In general.* Notwithstanding any provision of section 465(b) or the regulations under section 465(b), for an activity of holding real property, a taxpayer is considered at risk for the taxpayer's share of any qualified nonrecourse financing which is secured by real property used in such activity.

(b) *Qualified nonrecourse financing secured by real property*—(1) *In general.* For purposes of section 465(b)(6) and this section, the term *qualified nonrecourse financing* means any financing—

(i) Which is borrowed by the taxpayer with respect to the activity of holding real property;

(ii) Which is borrowed by the taxpayer from a qualified person or represents a loan from any federal, state, or local government or instrumentality thereof, or is guaranteed by any federal, state, or local government;

(iii) For which no person is personally liable for repayment, taking into account paragraphs (b)(3), (4), and (5) of this section; and

(iv) Which is not convertible debt.

(2) *Security for qualified nonrecourse financing*—(i) *Types of property.* For a taxpayer to be considered at risk under section 465(b)(6), qualified nonrecourse financing must be secured only by real property used in the activity of holding real property. For this purpose, however, property that is incidental to the activity of holding real property will be disregarded. In addition, for this purpose, property that is neither real property used in the activity of holding real property nor incidental property will be disregarded if the aggregate gross fair market value of such property is less than 10 percent of the aggregate gross fair market value of all the property securing the financing.

(ii) *Look-through rule for partnerships.* For purposes of paragraph (b)(2)(i) of this section, a borrower shall be treated as owning directly its proportional share of the assets in a partnership in which the borrower owns (directly or indirectly through a chain of partnerships) an equity interest.

(3) *Personal liability; partial liability.* If one or more persons are personally liable for repayment of a portion of a fi-

ancing, the portion of the financing for which no person is personally liable may qualify as qualified nonrecourse financing.

(4) *Partnership liability.* For purposes of section 465(b)(6) and this paragraph (b), the personal liability of any partnership for repayment of a financing is disregarded and, provided the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, the financing will be treated as qualified nonrecourse financing secured by real property if—

(i) The only persons personally liable to repay the financing are partnerships;

(ii) Each partnership with personal liability holds only property described in paragraph (b)(2)(i) of this section (applying the principles of paragraph (b)(2)(ii) of this section in determining the property held by each partnership); and

(iii) In exercising its remedies to collect on the financing in a default or default-like situation, the lender may proceed only against property that is described in paragraph (b)(2)(i) of this section and that is held by the partnership or partnerships (applying the principles of paragraph (b)(2)(ii) of this section in determining the property held by the partnership or partnerships).

(5) *Disregarded entities.* Principles similar to those described in paragraph (b)(4) of this section shall apply in determining whether a financing of an entity that is disregarded for federal tax purposes under § 301.7701-3 of this chapter is treated as qualified nonrecourse financing secured by real property.

(6) *Examples.* The following examples illustrate the rules of this section:

*Example 1. Personal liability of a partnership; incidental property.* (1) X is a limited liability company that is classified as a partnership for federal tax purposes. X engages only in the activity of holding real property. In addition to real property used in the activity of holding real property, X owns office equipment, a truck, and maintenance equipment that it uses to support the activity of holding real property. X borrows \$500 to use in the activity. X is personally liable on the financing, but no member of X and no other person is liable for repayment of the financing under local law. The lender may proceed

against all of X's assets if X defaults on the financing.

(ii) Under paragraph (b)(2)(i) of this section, the personal property is disregarded as incidental property used in the activity of holding real property. Under paragraph (b)(4) of this section, the personal liability of X for repayment of the financing is disregarded and, provided the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, the financing will be treated as qualified nonrecourse financing secured by real property.

*Example 2. Bifurcation of a financing.* The facts are the same as in *Example 1*, except that A, a member of X, is personally liable for repayment of \$100 of the financing. If the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, then under paragraph (b)(3) of this section, the portion of the financing for which A is not personally liable for repayment (\$400) will be treated as qualified nonrecourse financing secured by real property.

*Example 3. Personal liability; tiered partnerships.* (i) UTP1 and UTP2, both limited liability companies classified as partnerships, are the only general partners in Y, a limited partnership. Y borrows \$500 with respect to the activity of holding real property. The financing is a general obligation of Y. UTP1 and UTP2, therefore, are personally liable to repay the financing. Under section 752, UTP1's share of the financing is \$300, and UTP2's share is \$200. No person other than Y, UTP1, and UTP2 is personally liable to repay the financing. Y, UTP1, and UTP2 each hold only real property.

(ii) Under paragraph (b)(4) of this section, the personal liability of Y, UTP1, and UTP2 to repay the financing is disregarded and, provided the requirements of paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, UTP1's \$300 share of the financing and UTP2's \$200 share of the financing will be treated as qualified nonrecourse financing secured by real property.

*Example 4. Personal liability; tiered partnerships.* The facts are the same as in *Example 3*, except that Y's general partners are UTP1 and B, an individual. Because B, an individual, is also personally liable to repay the \$500 financing, the entire financing fails to satisfy the requirement in paragraph (b)(1)(iii) of this section. Accordingly, UTP1's \$300 share of the financing will not be treated as qualified nonrecourse financing secured by real property.

*Example 5. Personal liability; tiered partnerships.* The facts are the same as in *Example 3*, except that Y is a limited liability company and UTP1 and UTP2 are not personally liable for the debt. However, UTP1 and UTP2 each pledge property as security for the loan that is other than real property used in the activity of holding real property and other than property that is incidental to the activity of

holding real property. The fair market value of the property pledged by UTP1 and UTP2 is greater than 10 percent of the sum of the aggregate gross fair market value of the property held by Y and the aggregate gross fair market value of the property pledged by UTP1 and UTP2. Accordingly, the financing fails to satisfy the requirement in paragraph (b)(1)(iii) of this section by virtue of its failure to satisfy paragraph (b)(4)(iii) of this section. Therefore, the financing is not qualified nonrecourse financing secured by real property.

*Example 6. Personal liability; Disregarded entity.* (i) X is a single member limited liability company that is disregarded as an entity separate from its owner for federal tax purposes under §301.7701-3 of this chapter. X owns certain real property and property that is incidental to the activity of holding the real property. X does not own any other property. For federal tax purposes, A, the sole member of X, is considered to own all of the property held by X and is engaged in the activity of holding real property through X. X borrows \$500 and uses the proceeds to purchase additional real property that is used in the activity of holding real property. X is personally liable to repay the financing, but A is not personally liable for repayment of the financing under local law. The lender may proceed against all of X's assets if X defaults on the financing.

(ii) X is disregarded so that the assets and liabilities of X are treated as the assets and liabilities of A. However, A is not personally liable for the \$500 liability. Provided that the requirements contained in paragraphs (b)(1)(i), (ii), and (iv) of this section are satisfied, the financing will be treated as qualified nonrecourse financing secured by real property with respect to A.

(c) *Effective date.* This section is effective for any financing incurred on or after August 4, 1998. Taxpayers, however, may apply this section retroactively for financing incurred before August 4, 1998.

[T.D. 8777, 63 FR 41421, Aug. 4, 1998]

#### **§ 1.466-1 Method of accounting for the redemption cost of qualified discount coupons.**

(a) *Introduction.* Section 466 permits taxpayers who elect to use the method of accounting description in section 466 to deduct the redemption cost (as defined in paragraph (b) of this section) of qualified discount coupons (as defined in paragraph (c) of this section) outstanding at the end of the taxable year and redeemed during the redemption period (within the meaning of

paragraph (d)(2) of this section) in addition to the redemption cost of qualified discount coupons redeemed during the taxable year which were not deducted for a prior taxable year. For the taxable year in which the taxpayer first uses this method of accounting, the taxpayer is not allowed to deduct the redemption costs of qualified discount coupons redeemed during the taxable year that would have been deductible for the prior taxable year had the taxpayer used this method of accounting for such prior year. (See paragraph (e) of this section for rules describing how this amount should be taken into account.) A taxpayer must use the accrual method of accounting for any trade or business for which an election is made under section 466. Furthermore, the taxpayer must make an election in accordance with the rules in section 466(d) and § 1.466-3 for that trade or business. The method of accounting in section 466 is applicable only to the taxpayer's redemption of qualified discount coupons. Section 466 does not apply to trading stamps or premium coupons, which are subject to the method of accounting in § 1.451-4, or to discount coupons that are not qualified discount coupons.

(b) *Redemption costs*—(1) *Costs deductible under section 466.* The deduction allowed by section 466 applies only to the redemption cost of qualified discount coupons. The term “redemption cost” means an amount equal to:

(i) The lesser of:

(A) The amount of the discount stated on the coupon, or

(B) The cost incurred by the taxpayer for paying the discount; plus

(ii) The amount payable to the retailer (or other person redeeming the coupon from the person receiving the price discount) for services in redeeming the coupon.

The amount payable to the retailer or other person for services in redeeming the coupon is allowed only if the amount payable is stated on the coupon.

(2) *Costs not deductible under section 466.* The term “redemption cost” includes only the amounts stated in paragraph (b)(1) of this section. Amounts other than those mentioned in paragraph (b)(1) of this section can-

not be deducted under the method of accounting described in section 466 even though such amounts are incurred in relation to the redemption of qualified discount coupons. Therefore, those amounts must be taken into account as if section 466 did not apply. Examples of such amounts are fees paid to the redemption center or clearinghouse and amounts payable to the retailer in excess of the amount stated on the coupon.

(c) *Qualified discount coupons*—(1) *General rule.* In order for a discount coupon (as defined in paragraph (c)(2)(i) of this section) to be considered a qualified discount coupon, all of the following requirements must be met:

(i) The coupon must have been issued by and must be redeemable by the taxpayer;

(ii) The coupon must allow a discount on the purchase price of merchandise or other tangible personal property;

(iii) The face amount of the coupon must not exceed five dollars;

(iv) The coupon, by its terms, may not be used with other coupons to bring about a price discount reimbursable by the issuer of more than five dollars with respect to any item; and

(v) There must exist a redemption chain (as defined in paragraph (c)(2)(ii) of this section) with respect to the coupon.

(2) *Definitions*—(i) *Discount coupon.* A discount coupon is a sales promotion device used to encourage the purchase of a specific product by allowing a purchaser of that product to receive a discount on its purchase price. The term “discount coupon” does not include trading stamps or premium coupons, which are subject to the method of accounting in § 1.451-4. A discount coupon may or may not be issued as part of a prior purchase. A discount coupon normally entitles its holders to receive nothing more than a reduction in the sales price of one of the issuer's products. The discount may be stated in terms of a cash amount, a percentage or fraction of the purchase price, a “two for the price of one” deal, or any other similar provision. A discount coupon need not be printed on paper in the form usually associated with coupons; it may be a token or other object so long as it functions as a coupon.

(ii) *Redemption chain.* A redemption chain exists when the issuer redeems the coupon from some person other than the customer who used the coupon to receive the price discount. Thus, in order to be treated as a qualified discount coupon, the coupon must not be issued by the person that initially redeems the coupon from the customer. For purposes of determining whether a redemption chain exists, corporations that are members of the same controlled group of corporations (as defined in section 1563(a)) as the issuer of the coupon shall be treated as the issuer. Thus, if the issuer of the coupon and the retailer that initially redeems the coupon from the customer are members of the same controlled group of corporations, the coupon shall not be treated as a qualified discount coupon.

(d) *Deduction for coupons redeemed during the redemption period—(1) General rule.* Two special conditions must be met before the cost of redeeming qualified discount coupons during the redemption period can be deducted from the taxpayer's gross income for the taxable year preceding the redemption period. First, the qualified discount coupons must have been outstanding at the close of such taxable year. Second, the qualified discount coupons must have been received by the taxpayer before the close of the redemption period for that taxable year.

(2) *Redemption period.* The taxpayer can select any redemption period so long as the period does not extend longer than 6 months after the close of the taxpayer's taxable year. A change in the redemption period so selected shall be treated as a change in method of accounting.

(3) *Coupons received.* The deduction provided for in section 466(a)(1) is limited to the redemption costs associated with coupons that are actually received by the taxpayer within the redemption period. For purposes of this paragraph, if the issuer uses a redemption agent or clearinghouse to group, count, and verify coupons after they have been redeemed by a retailer, the coupons received by the redemption agent or clearinghouse will be considered to have been received by the issuer. Nothing in section 466, however,

allows deductions to be made on the basis of estimated redemptions, whether such estimates are made by either the issuer or some other party.

(e) *Transitional adjustment—(1) In general.* An election to change from some other method of accounting for the redemption of discount coupons to the method of accounting described in section 466 is a change in method of accounting that requires a transitional adjustment. Unless the taxpayer can qualify for a waiver of the suspense account requirement as provided for in section 373(c) of the Revenue Act of 1978 (92 Stat. 2865), the taxpayer should compute the transitional adjustment described in section 481(a)(2) according to the rules contained in this section. This adjustment should be taken into account according to the special rules in subsections (e) and (f) of section 466.

(2) *Net increase in taxable income.* In the case of a transitional adjustment that would result in a net increase in taxable income under section 481(a)(2) for the year of change, that increase should be taken into income over a ten-year period consisting of the year of change and the immediately succeeding nine taxable years. For example, assume that A, a calendar year taxpayer, makes an election to use the method of accounting described in section 466 for the year 1980 and for subsequent years. Assume further that the amount of the transitional adjustment computed under section 481(a)(2) would result in a net increase in taxable income of \$100 for 1980. Under these facts, A should increase taxable income for 1980 and each of the next nine taxable years by \$10.

(3) *Suspense account—(i) In general.* In the case of a transitional adjustment that would result in a net decrease in taxable income under section 481(a)(2) for the year of change, in lieu of applying section 481, the taxpayer must establish a separate suspense account for each trade or business for which the taxpayer has made an election to use section 466. The computation of the initial opening balance in the suspense account is described in paragraph (e)(3)(ii)(A) of this section. An initial adjustment to gross income for the

year of election is described in paragraph (e)(3)(ii)(B) of this section. Annual adjustments to the suspense account are described in paragraph (e)(3)(iii)(A) of this section, and gross income adjustments are described in paragraph (e)(3)(iii)(B) of this section. Examples are provided in paragraph (e)(4) of this section. The effect of the suspense account is to defer some part of, or all of, the deduction of the transitional adjustment until the taxpayer no longer redeems discount coupons in connection with the trade or business to which the suspense account relates.

(ii) *Establishing a suspense account—*(A) *Initial opening balance.* To compute the initial opening balance of the suspense account for the first taxable year for which the election to use section 466 is effective, the taxpayer must determine the dollar amount of the deduction that would have been allowed for qualified discount coupon redemption costs during the redemption period for each of the three immediately preceding taxable years had the election to use section 466 been in effect for those years. The initial opening balance of the suspense account is the largest such dollar amount reduced by the sum of the adjustments attributable to the change in method of accounting that increase income for the year of change.

(B) *Initial year adjustment.* If, in computing the initial opening balance, the largest dollar amount of deduction that would have been allowed in any of the three prior years exceeds the actual cost of redeeming qualified discount coupons received during the redemption period following the close of the year immediately preceding the year of election, the excess is included in income in the year of election. Section 481(b) does not apply to this increase in gross income.

(iii) *Annual adjustments—*(A) *Adjustment to the suspense account.* Adjustments are made to the suspense account each year to account for fluctuations in coupon redemptions. To compute the annual adjustment, the taxpayer must determine the amount to be deducted under section 466(a)(1) for the taxable year. If the amount is less than the opening balance in the suspense account for the taxable year, the

balance in the suspense account is reduced by the difference. Conversely, if such amount is greater than the opening balance in the suspense account for the taxable year, the account is increased by the difference (but not to an amount in excess of the initial opening balance described in paragraph (e)(3)(ii) of this section). Therefore, the balance in the suspense account will never be greater than the initial opening balance in the suspense account determined in paragraph (e)(3)(ii) of this section. However, the balance in the suspense account after adjustments may be less than this initial opening balance in the suspense account.

(B) *Gross income adjustments.* Adjustments to the suspense account for years subsequent to the year of the election also produce adjustments in the taxpayer's gross income. Adjustments which reduce the balance in the suspense account reduce gross income for the year in which the adjustment to the suspense account is made. Adjustments which increase the balance in the suspense account increase gross income for the year in which the adjustment to the suspense account is made.

(4) *Examples.* (i) The provisions of paragraph (e)(3) of this section may be illustrated by the following examples:

*Example 1.* Assume that the issuer of qualified discount coupons makes a timely election under section 466 for its taxable year ending December 31, 1979, and does not select a coupon redemption period shorter than the statutory period of 6 months. Assume further that the taxpayer's qualified discount coupon redemption costs in the first 6 months of 1977, 1978, and 1979 were \$7, \$13, and \$8 respectively, and that the accounting change adjustments that increase income for 1979 are \$10. Since the accounting change adjustment that increases income for 1979, (\$10), is greater than the taxpayer's discount coupon redemptions during the first 6 months of 1979 (\$8), the net section 481(a)(2) adjustment for the year of change results in a positive adjustment. Because of this, a suspense account is not required. The taxpayer should instead follow the rules in section 466(f) and in paragraph (e)(2) of this section in order to take this positive transitional adjustment into account.

*Example 2.* Assume the same facts as in Example 1, except that the sum of the accounting change adjustments that increase income for 1979 is equal to \$2. Under these facts the initial opening balance in the suspense account on January 1, 1979 would be \$11 (that

is, the largest dollar amount of qualified coupon redemption costs in the pertinent years (\$13), reduced by the sum of the accounting change adjustments that increase income in the year of change (\$2). Since the coupon redemption costs taken into account in determining the initial opening balance (\$13 in 1979) exceed the actual redemption costs in the first 6 months of the taxable year for which the election is first effective (\$8 in 1979), the excess of \$5 is added to gross income for the year of election (1979).

*Example 3.* Assume, in addition to the facts of Example 2, that coupon redemption costs during the redemption period for the 1979 taxable year are \$7. Since the qualifying redemption costs (\$7) during the redemption period for the taxable year are less than the opening balance in the suspense account (\$11) the taxpayer must reduce the suspense account balance by the difference (\$4). The taxpayer is also allowed to take a deduction equal to the amount of this adjustment to the suspense account. Thus, the net amount deductible for the 1979 taxable year after taking into account the coupon redemptions during the redemption period, the amount deductible because of the decrease in the suspense account, and the initial year adjustment determined in Example 2 is \$6 (\$7 + \$4 - \$5).

*Example 4.* Assume, in addition to the facts of Example 3, that coupon redemption costs during the redemption period for the 1980 taxable year are \$10. Since the qualifying redemption costs during the redemption period for the taxable year (\$10) exceed the opening balance of the suspense account at the beginning of the taxable year (\$7), the suspense account must be increased by the difference (\$3). The taxpayer must also include \$3 in gross income for the taxable year. Thus, the net amount deductible for the 1980 taxable year is \$7 (\$10 - \$3).

*Example 5.* Assume, in addition to the facts of Example 4, that coupon redemption costs during the redemption period for the 1981 taxable year are \$12. Since the qualifying redemption costs for the 1981 taxable year (\$12) exceed the opening balance of the suspense account at the beginning of the taxable year (\$10), the suspense account must be increased by the difference (\$2) but not above the initial opening balance (\$11). Thus, the taxpayer will increase the balance by \$1. The taxpayer must also include \$1 in gross income for the taxable year. Thus, the net amount deductible for the 1981 taxable year is \$11 (\$12 - \$1).

(ii) The following table summarizes examples (2) through (5):

|  | Years ending Dec. 31— |       |       |       |       |       |
|--|-----------------------|-------|-------|-------|-------|-------|
|  | 1977                  | 1978  | 1979  | 1980  | 1981  | 1982  |
| <b>Facts:</b>  |                       |       |       |       |       |       |

(f) *Subchapter C transactions—(1) General rule.* If a transfer of substantially all the assets of a trade or business in which discount coupons are redeemed is made to an acquiring corporation, and if the acquiring corporation determines its bases in these assets, in whole or part, with reference to the

basis of these assets in the hands of the transferor, then for the purposes of section 466(e) the principles of section 381 and §1.381(c)(4)-1 will apply. The application of this rule is not limited to the transactions described in section 381(a).

Thus, the rule also applies, for example, to transactions described in section 351.

(2) *Special rules.* If, in the case of a transaction described in paragraph (f)(1) of this section, an acquiring corporation acquires assets that were used in a trade or business that was not subject to a section 466 election from a transferor that is owned or controlled directly (or indirectly through a chain of corporations) by the same interests, and if the acquiring corporation uses the acquired assets in a trade or business for which the acquiring corporation later makes an election to use section 466, then the acquiring corporation must establish a suspense account by taking into account not only its own experience but also the transferor's experience when the transferor held the assets in its trade or business. Furthermore, the transferor is not allowed a deduction for qualified discount coupons redeemed after the date of the transfer attributable to discount coupons issued by the transferor before the date of the transfer. Such redemptions shall be considered to be made by the acquiring corporation.

(3) *Example.* The provisions of paragraph (f)(2) of this section may be illustrated by the following example:

*Example.* Corporation S, a calendar year taxpayer, is a wholly owned subsidiary of Corporation P, a calendar year taxpayer. On December 31, 1982, S acquires from P substantially all of the assets used in a trade or business in which qualified discount coupons are redeemed. P had not made an election under section 466 with respect to the redemption costs of the qualified discount coupons issued in connection with that trade or business. S makes an election to use section 466 for its taxable year ending December 31, 1983, for the trade or business in which the acquired assets are used, and selects a redemption period of 6 months. Assume that P's qualified discount coupon redemption costs in the first 6 months of 1981 and 1982 were \$120 and \$140 respectively. Assume further that S's qualified discount coupon redemption costs in the first 6 months of 1983 were \$130, and that there are no accounting change adjustments that increase income with respect to the election. S must establish a suspense account by taking into account the largest dollar amount of deductions that would have been allowed under section 466(a)(1) for the 3 immediately preceding taxable years of P, including both P's and S's experience with respect to costs ac-

tually incurred during the redemption periods relating to those years. Thus, the initial opening balance of S's suspense account is \$140. S must also make an initial year adjustment of \$10 (\$140-\$130), which S must include in income for S's taxable year ending December 31, 1983. P may not take a deduction for the qualified coupon redemptions made after December 31, 1982, that are attributable to coupons issued by P before December 31, 1982. Thus, none of the \$130 qualified discount coupon redemption costs incurred by S during the first six months of 1983 may be deducted by P.

[T.D. 8022, 50 FR 18474, May 1, 1985, as amended at 50 FR 21046, May 22, 1985]

#### § 1.466-2 Special protective election for certain taxpayers.

(a) *General rule.* Section 373(c) of the Revenue Act of 1978 (92 Stat. 2865) allows certain taxpayers, who in prior years have accounted for discount coupons under a method of accounting reasonably similar to the method described in § 1.451-4, to elect to treat that method of accounting as a proper one for those prior years. There are several differences between this protective election and the section 466(d) election. First, the protective election applies only to a single continuous period of taxable years the last year of which ends before January 1, 1979. Second, an otherwise qualifying protective election may apply to coupons which are discount coupons but which would not be treated as qualified discount coupons under Code section 466. Third, certain expenses such as the cost of redemption center service fees, and amounts that are payable to the retailer (or other person redeeming the coupons from the person receiving the price discount) for services in redeeming the coupons but that are not stated on the coupon, can be subtracted from gross receipts for prior years covered by a protective election (if treated as deductible under the accounting method for such years), even though such expenses would not be deductible under Code section 466.

(b) *Requirements.* In order to qualify for this special protective election, the following conditions must be met:

(1) For a continuous period of one or more prior taxable years, (the last year of which ends before Jan. 1, 1979), the taxpayer must have used a method of accounting for discount coupons that is

reasonably similar to the method provided in §1.451-4 or its predecessors under the Internal Revenue Code of 1954;

(2) The taxpayer must make an election under section 466 of the Internal Revenue Code of 1954 according to the rules contained in §1.466-3 for its first taxable year ending after December 31, 1978; and

(3) The taxpayer must make an election under section 373(c) of the Revenue Act of 1978 according to the rules contained in §1.466-4 for its first taxable year ending after December 31, 1978.

(c) *Amount to be subtracted from gross receipts.* The amount the taxpayer may subtract under this section for the redemption costs of coupons shall include only:

(1) Costs of the type permitted by §1.451-4 to be included in the estimated average cost of redeeming coupons, plus

(2) Any amount designated or referred to on the coupon payable by the taxpayer to the person who allowed the discount on a sale by such person to the user of the coupon.

Nothing in this paragraph shall allow an item to be deducted more than once.

(d) *Right to amend prior tax returns.* This paragraph applies only to those taxpayers who have agreed in a prior year to discontinue the use of the method of accounting described in §1.451-4 for discount coupon redemptions. If the taxpayer used such method of accounting on the original return filed for the prior taxable year, and if any such year is not closed under the statute of limitations or by reason of a closing agreement with the Internal Revenue Service, a taxpayer who has made a protective election may file an amended return and a claim for refund for such years. In this amended return, the taxpayer should account for its discount coupon redemptions, according to the method of accounting described in §1.451-4. This is not to be construed, however, to abrogate in any way the rules regarding the close of taxable years due to the statute of limitations or a binding closing agreement between the Internal Revenue Service and the taxpayer.

(e) *Suspense account not required.* If the following three conditions are satisfied, the taxpayer need not establish the suspense account otherwise required by section 466(e). First, the taxpayer must make a timely election under these rules to protect prior years. Second, the method of accounting used in those years must have been used for all discount coupons issued by the taxpayer in those years in all the taxpayer's separate trades or

businesses in which coupons were issued. Third, either before or after an amendment to the taxpayer's tax returns as described in paragraph (d) of this section, a method of accounting reasonably similar to the method of accounting described in §1.451-4 must have been used for the taxable year ending on or before December 31, 1978. If these conditions are met, the taxpayer will treat the election of the method under section 466 as a change in method of accounting to which the rules in section 481 and the regulations thereunder apply.

(f) *Definition: reasonably similar.* For purposes of paragraphs (b)(1) and (e) of this section, a taxpayer will be considered to have used a method of accounting for discount coupons that is "reasonably similar" to the method of accounting provided in §1.451-4 if the taxpayer followed the method of accounting described in §1.451-4 as if that method were a valid method of accounting for discount coupon redemptions.

[T.D. 8022, 50 FR 18476, May 1, 1985]

**§ 1.466-3 Manner of and time for making election under section 466.**

(a) *In general.* Section 466 provides a special method of accounting for accrual basis taxpayers who issue qualified discount coupons (as defined in section 466(b)). In order to use the special method under section 466, a taxpayer must make an election with respect to the trade or business in connection with which the qualified discount coupons are issued. If a taxpayer issues qualified discount coupons in connection with more than one trade or business, the taxpayer may use the special method of accounting under section 466 only with respect to the qualified discount coupons issued in

connection with a trade or business for which an election is made. The election must be made in the manner prescribed in this section. The election does not require the prior consent of the Internal Revenue Service. An election under section 466 is effective for the taxable year for which it is made and for all subsequent taxable years, unless the taxpayer secures the prior consent of the Internal Revenue Service to revoke such election.

(b) *Manner of and time for making election*—(1) *General rule.* Except as provided in paragraph (b)(2) of this section, an election is made under section 466 and this section by filing a statement of election containing the information described in paragraph (c) of this section with the taxpayer's income tax return for the taxpayer's first taxable year for which the election is made. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the income tax return for the first taxable year for which the election is made. Thus, the election may not be made for a taxable year by filing an amended income tax return after the time prescribed (including extensions) for filing the original return for such year.

(2) *Transitional rule.* If the last day of the time prescribed by law (including extensions thereof) for filing a taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, falls before December 3, 1979, and the taxpayer does not make an election under section 466 with respect to such taxable year in the manner prescribed by paragraph (b)(1) of this section, an election is made under section 466 and this section with respect to such taxable year if—

(i) Within the time prescribed by law (including extensions thereof) for filing the taxpayer's income tax return for such taxable year, the taxpayer has made a reasonable effort to notify the Commissioner of the taxpayer's intent to make an election under section 466 with respect to such taxable year, and

(ii) Before January 2, 1980, the taxpayer files a statement of election containing the information described in paragraph (c) of this section to be

associated with the taxpayer's income tax return for such taxable year.

For purposes of paragraph (b)(2)(i) of this section, a reasonable effort to notify the Commissioner of an intent to make an election under section 466 with respect to a taxable year includes the timely filing of an income tax return for such taxable year if the taxable income reported on the return reflects a deduction for the redemption costs of qualified discount coupons as determined under section 466(a).

(c) *Required information.* The statement of election required by paragraph (b) of this section must indicate that the taxpayer (identified by name, address, and taxpayer identification number) is making an election under section 466 and must set forth the following information:

(1) A description of each trade or business for which the election is made;

(2) The first taxable year for which the election is made;

(3) The redemption period (as defined in section 466(c)(2)) for each trade or business for which the election is made;

(4) If the taxpayer is required to establish a suspense account under section 466(e) for a trade or business for which the election is made, the initial opening balance of such account (as defined in section 466(e)(2)) for each such trade or business; and

(5) In the case of an election under section 466 that results in a net increase in taxable income under section 481(a)(2), the amount of such net increase.

The statement of election should be made on a Form 3115, which need contain no information other than that required by this paragraph or paragraph (c) of § 1.466-4.

[T.D. 8022, 50 FR 18477, May 1, 1985]

**§ 1.466-4 Manner of and time for making election under section 373(c) of the Revenue Act of 1978.**

(a) *In general.* Section 373(c)(2) of the Revenue Act of 1978 (92 Stat. 2865) provides an election for taxpayers who satisfy the requirements of section 373(c)(2)(A) (i) and (ii) of the Act. The election is made with respect to a

method of accounting for the redemption costs of discount coupons used by the electing taxpayer in a continuous period of one or more taxable years ending before January 1, 1979. The election must be made in the manner prescribed by this section. The election does not require the prior consent of the Internal Revenue Service.

(b) *Manner of and time for making election*—(1) *General rule.* Except as provided in paragraph (b)(2) of this section, the election under section 373(c) of the Revenue Act of 1978 is made by filing a statement of election containing the information described in paragraph (c) of this section with the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the income tax return for the taxpayer's first taxable year ending after December 31, 1978. Thus, the election may not be made with an amended income tax return for such year filed after the time prescribed (including extensions) for filing the original return.

(2) *Transitional rule.* If the last day of the time prescribed by law (including extensions thereof) for filing a taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, falls before December 3, 1979, and the taxpayer does not make an election in the manner prescribed by paragraph (b)(1) of this section, an election is made under section 373(c) of the Act and this section with respect to a continuous period if—

(i) Within the time prescribed by law (including extensions thereof) for filing the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, the taxpayer has made a reasonable effort to notify the Commissioner of the taxpayer's intent to make election under section 373(c) of the Act with respect to the continuous period, and

(ii) Before January 2, 1980, the taxpayer files a statement of election containing the information described in paragraph (c) of this section to be associated with the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978.

(c) *Required information.* The statement of election required by paragraph (b) of this section must indicate that the taxpayer (identified by name, address, and taxpayer identification number) is making an election under section 373(c) of the Revenue Act of 1978 and must set forth the taxable years in the continuous period for which the election is made. The statement of election should be made on the same form 3115 on which the taxpayer has made a statement of election under section 466. The Form 3115 need contain no information other than that required by this paragraph or paragraph (c) of § 1466-3.

[T.D. 8820, 64 FR 26851, May 18, 1999, as amended by T.D. 8917, 66 FR 1039, Jan. 5, 2001]

**§ 1.467-1 Treatment of lessors and lessees generally.**

- (a) *Overview*—(1) *In general.* When applicable, section 467 requires a lessor

and lessee of tangible property to treat rents consistently and to use the accrual method of accounting (and time value of money principles) regardless of their overall method of accounting. In addition, in certain cases involving tax avoidance, the lessor and lessee must take rent and stated or imputed interest into account under a constant rental accrual method, pursuant to which the rent is treated as accruing ratably over the entire lease term.

(2) *Cases in which rules are inapplicable.* Section 467 applies only to leases (or other similar arrangements) that constitute section 467 rental agreements as defined in paragraph (c) of this section. For example, a rental agreement is not a section 467 rental agreement, and, therefore, is not subject to the provisions of this section and §§ 1.467-2 through 1.467-9 (the section 467 regulations), if it specifies equal amounts of rent for each month throughout the lease term and all payments of rent are due in the calendar year to which the rent relates (or in the preceding or succeeding calendar year). In addition, the section 467 regulations do not apply to a rental agreement that requires total rents of \$250,000 or less. For purposes of determining whether the agreement has total rents of \$250,000 or less, certain specified contingent rent is disregarded.

(3) *Summary of rules—(i) Basic rules.* Paragraph (c) of this section provides rules for determining whether a rental agreement is a section 467 rental agreement. Paragraphs (d) and (e) of this section provide rules for determining the amount of rent and interest, respectively, required to be taken into account by a lessor and lessee under a section 467 rental agreement. Paragraphs (f) through (h) and (j) of this section provide various definitions and special rules relating to the application of the section 467 regulations. Paragraph (i) of this section is reserved.

(ii) *Special rules.* Section 1.467-2 provides rules for section 467 rental agreements that have deferred or prepaid rents without providing for adequate interest. Section 1.467-3 provides rules for application of the constant rental accrual method, including criteria for

determining whether an agreement is subject to this method. Section 1.467-4 provides rules for establishing and adjusting a section 467 loan (the amount that a lessor is deemed to have loaned to the lessee, or vice versa, pursuant to the application of the section 467 regulations). Section 1.467-5 provides rules for applying the section 467 regulations where a rental agreement requires payments of interest at a variable rate. Section 1.467-6, relating to the treatment of certain section 467 rental agreements with contingent payments, is reserved. Section 1.467-7 provides rules for the treatment of dispositions by a lessor of property subject to a section 467 rental agreement and the treatment of assignments by lessees and certain lessee-financed renewals of a section 467 rental agreement. Section 1.467-7 also provides rules for the treatment of modified rental agreements. Section 1.467-8 provides special transitional rules relating to the method of accounting for certain rental agreements entered into on or before May 18, 1999. Finally, § 1.467-9 provides the effective date rules for the section 467 regulations.

(4) *Scope of rules.* No inference should be drawn from any provision of this section or §§ 1.467-2 through 1.467-9 concerning whether—

(i) For Federal tax purposes, an arrangement constitutes a lease; or

(ii) For Federal tax purposes, any obligation of the lessee under a rental agreement is treated as rent.

(5) *Application of other authorities.* Notwithstanding section 467 and the regulations thereunder, other authorities such as section 446(b) clear-reflection-of-income principles, section 482, and the substance-over-form doctrine, may be applied by the Commissioner to determine the income and expense from a rental agreement (including the proper allocation of fixed rent under a rental agreement).

(b) *Method of accounting for section 467 rental agreements.* If a rental agreement is a section 467 rental agreement, as described in paragraph (c) of this section, the lessor and lessee must each take into account for any taxable year the sum of—

(1) The section 467 rent for the taxable year (as defined in paragraph (d) of this section); and

(2) The section 467 interest for the taxable year (as defined in paragraph (e) of this section).

(c) *Section 467 rental agreements*—(1) *In general.* Except as otherwise provided in paragraph (c)(4) of this section, the term *section 467 rental agreement* means a rental agreement, as defined in paragraph (h)(12) of this section, that has increasing or decreasing rents (as described in paragraph (c)(2) of this section), or deferred or prepaid rents (as described in paragraph (c)(3) of this section).

(2) *Increasing or decreasing rent*—(i) *Fixed rent*—(A) *In general.* A rental agreement has increasing or decreasing rent if the annualized fixed rent, as described in paragraph (j)(3) of this section, allocated to any rental period exceeds the annualized fixed rent allocated to any other rental period in the lease term.

(B) *Certain rent holidays disregarded.* Notwithstanding the provisions of paragraph (c)(2)(i)(A) of this section, a rental agreement does not have increasing or decreasing rent if the increasing or decreasing rent is solely attributable to a rent holiday provision allowing reduced rent (or no rent) for a period of three months or less at the beginning of the lease term.

(ii) *Fixed rent allocated to a rental period*—(A) *Specific allocation*—(1) *In general.* If a rental agreement provides a specific allocation of fixed rent, as described in paragraph (c)(2)(ii)(A)(2) of this section, the amount of fixed rent allocated to each rental period during the lease term is the amount of fixed rent allocated to that period by the rental agreement.

(2) *Rental agreements specifically allocating fixed rent.* A rental agreement specifically allocates fixed rent if the rental agreement unambiguously specifies, for periods no longer than a year, a fixed amount of rent for which the lessee becomes liable on account of the use of the property during that period, and the total amount of fixed rent specified is equal to the total amount of fixed rent payable under the lease. For example, a rental agreement providing that rent is \$100,000 per calendar

year, and providing for total payments of fixed rent equal to the total amount specified, specifically allocates rent. A rental agreement stating only when rent is payable does not specifically allocate rent.

(B) *No specific allocation.* If a rental agreement does not provide a specific allocation of fixed rent (for example, because the total amount of fixed rent specified is not equal to the total amount of fixed rent payable under the lease), the amount of fixed rent allocated to a rental period is the amount of fixed rent payable during that rental period. If an amount of fixed rent is payable before the beginning of the lease term, it is allocated to the first rental period in the lease term. If an amount of fixed rent is payable after the end of the lease term, it is allocated to the last rental period in the lease term.

(iii) *Contingent rent*—(A) *In general.* A rental agreement has increasing or decreasing rent if it requires (or may require) the payment of contingent rent (as defined in paragraph (h)(2) of this section), other than contingent rent described in paragraph (c)(2)(iii)(B) of this section.

(B) *Certain contingent rent disregarded.* For purposes of this paragraph (c)(2)(iii), rent is disregarded to the extent it is contingent as the result of one or more of the following provisions—

(1) A qualified percentage rents provision, as defined in paragraph (h)(8) of this section;

(2) An adjustment based on a reasonable price index, as defined in paragraph (h)(10) of this section;

(3) A provision requiring the lessee to pay third-party costs, as defined in paragraph (h)(15) of this section;

(4) A provision requiring the payment of late payment charges, as defined in paragraph (h)(4) of this section;

(5) A loss payment provision, as defined in paragraph (h)(7) of this section;

(6) A qualified TRAC provision, as defined in paragraph (h)(9) of this section;

(7) A residual condition provision, as defined in paragraph (h)(13) of this section;

(8) A tax indemnity provision, as defined in paragraph (h)(14) of this section;

(9) A variable interest rate provision, as defined in paragraph (h)(16) of this section; or

(10) Any other provision provided in regulations or other published guidance issued by the Commissioner, but only if the provision is designated as contingent rent to be disregarded for purposes of this paragraph (c)(2)(iii).

(3) *Deferred or prepaid rent*—(i) *Deferred rent*. A rental agreement has deferred rent under this paragraph (c)(3) if the cumulative amount of rent allocated as of the close of a calendar year (determined under paragraph (c)(3)(iii) of this section) exceeds the cumulative amount of rent payable as of the close of the succeeding calendar year.

(ii) *Prepaid rent*. A rental agreement has prepaid rent under this paragraph (c)(3) if the cumulative amount of rent payable as of the close of a calendar year exceeds the cumulative amount of rent allocated as of the close of the succeeding calendar year (determined under paragraph (c)(3)(iii) of this section).

(iii) *Rent allocated to a calendar year*. For purposes of this paragraph (c)(3), the rent allocated to a calendar year is the sum of—

(A) The fixed rent allocated to any rental period (determined under paragraph (c)(2)(ii) of this section) that begins and ends in the calendar year;

(B) A ratable portion of the fixed rent allocated to any other rental period that begins or ends in the calendar year; and (C) Any contingent rent that accrues during the calendar year.

(iv) *Examples*. The following examples illustrate the application of this paragraph (c)(3):

*Example 1.* (i) A and B enter into a rental agreement that provides for the lease of property to begin on January 1, 2000, and end on December 31, 2003. The rental agreement provides that rent of \$100,000 accrues during each year of the lease term. Under the rental agreement, no rent is payable during calendar year 2000, a payment of \$100,000 is to be made on December 31, 2001, and December 31, 2002, and a payment of \$200,000 is to be made on December 31, 2003. A and B both select the calendar year as their rental period. Thus, the amount of rent allocated to each rental period under paragraph (c)(2)(ii) of this section is \$100,000. Therefore, the rental agreement does not have increasing or decreasing rent as described in paragraph (c)(2)(i) of this section.

(ii) Under paragraph (c)(3)(i) of this section, a rental agreement has deferred rent if, at the close of a calendar year, the cumulative amount of rent allocated under paragraph (c)(3)(iii) of this section exceeds the cumulative amount of rent payable as of the close of the succeeding year. In this example, there is no deferred rent: the rent allocated to 2000 (\$100,000) does not exceed the cumulative rent payable as of December 31, 2001 (\$100,000); the rent allocated to 2001 and preceding years (\$200,000) does not exceed the cumulative rent payable as of December 31, 2002 (\$200,000); the rent allocated to 2002 and preceding years (\$300,000) does not exceed the cumulative rent payable as of December 31, 2003 (\$400,000); and the rent allocated to 2003 and preceding years (\$400,000) does not exceed the cumulative rent payable as of December 31, 2004 (\$400,000). Therefore, because the rental agreement does not have increasing or decreasing rent and does not have deferred or prepaid rent, the rental agreement is not a section 467 rental agreement.

*Example 2.* (i) A and B enter into a rental agreement that provides for a 10-year lease of personal property, beginning on January 1, 2000, and ending on December 31, 2009. The rental agreement provides for accruals of rent of \$10,000 during each month of the lease term. Under paragraph (c)(3)(iii) of this section, \$120,000 is allocated to each calendar year. The rental agreement provides for a \$1,200,000 payment on December 31, 2000.

(ii) The rental agreement does not have increasing or decreasing rent as described in paragraph (c)(2)(i) of this section. The rental agreement, however, provides prepaid rent under paragraph (c)(3)(ii) of this section because the cumulative amount of rent payable as of the close of a calendar year exceeds the cumulative amount of rent allocated as of the close of the succeeding calendar year. For example, the cumulative amount of rent payable as of the close of 2000 (\$1,200,000 is payable on December 31, 2000) exceeds the cumulative amount of rent allocated as of the close of 2001, the succeeding calendar year (\$240,000). Accordingly, the rental agreement is a section 467 rental agreement.

(4) *Rental agreements involving total payments of \$250,000 or less*—(i) *In general*. A rental agreement is not a section 467 rental agreement if, as of the agreement date (as defined in paragraph (h)(1) of this section), it is not reasonably expected that the sum of the aggregate amount of rental payments under the rental agreement and the aggregate value of all other consideration to be received for the use of property (taking into account any payments of contingent rent, and any

other contingent consideration) will exceed \$250,000.

(ii) *Special rules in computing amount described in paragraph (c)(4)(i) of this section of this section.* The following rules apply in determining the amount described in paragraph (c)(4)(i) of this section:

(A) Stated interest on deferred rent is not taken into account. However, the Commissioner may recharacterize a portion of stated interest as additional rent if a rental agreement provides for interest on deferred rent at a rate that, in light of all of the facts and circumstances, is clearly greater than the arm's-length rate of interest that would have been charged in a lending transaction between the lessor and lessee.

(B) Consideration that does not involve a cash payment is taken into account at its fair market value. A liability that is either assumed or secured by property acquired subject to the liability is taken into account at the sum of its remaining principal amount and accrued interest (if any) thereon or, in the case of an obligation originally issued at a discount, at the sum of its adjusted issue price and accrued qualified stated interest (if any), within the meaning of § 1.1273-1(c)(1).

(C) All rental agreements that are part of the same transaction or a series of related transactions involving the same lessee (or any related person) and the same lessor (or any related person) are treated as a single rental agreement. Whether two or more rental agreements are part of the same transaction or a series of related transactions depends on all the facts and circumstances.

(D) If an agreement includes a provision increasing or decreasing rent payable solely as a result of an adjustment based on a reasonable price index, the amount described in paragraph (c)(4)(i) of this section must be determined as if the applicable price index did not change during the lease term.

(E) If an agreement includes a variable interest rate provision (as defined in paragraph (h)(16) of this section), the amount described in paragraph (c)(4)(i) of this section must be determined by using fixed rate substitutes (determined in the same manner as under

§ 1.1275-5(e), treating the agreement date as the issue date) for the variable rates of interest applicable to the lessor's indebtedness.

(F) Contingent rent described in paragraphs (c)(2)(iii)(B)(3) through (8) of this section is not taken into account.

(d) *Section 467 rent—(1) In general.* The section 467 rent for a taxable year is the sum of—

(i) The fixed rent for any rental period (determined under paragraph (d)(2) of this section) that begins and ends in the taxable year;

(ii) A ratable portion of the fixed rent for any other rental period beginning or ending in the taxable year; and

(iii) In the case of a section 467 rental agreement that provides for contingent rent, the contingent rent that accrues during the taxable year.

(2) *Fixed rent for a rental period—(i) Constant rental accrual.* In the case of a section 467 rental agreement that is a disqualified leaseback or long-term agreement (as described in § 1.467-3(b)), the fixed rent for a rental period is the constant rental amount (as determined under § 1.467-3(d)).

(ii) *Proportional rental accrual.* In the case of a section 467 rental agreement that is not described in paragraph (d)(2)(i) of this section, and does not provide adequate interest on fixed rent (as determined under § 1.467-2(b)), the fixed rent for a rental period is the proportional rental amount (as determined under § 1.467-2(c)).

(iii) *Section 467 rental agreement accrual.* In the case of a section 467 rental agreement that is not described in either paragraph (d)(2)(i) or (ii) of this section, the fixed rent for a rental period is the amount of fixed rent allocated to the rental period under the rental agreement, as determined under paragraph (c)(2)(ii) of this section.

(e) *Section 467 interest—(1) In general.* The section 467 interest for a taxable year is the sum of—

(i) The interest on fixed rent for any rental period that begins and ends in the taxable year;

(ii) A ratable portion of the interest on fixed rent for any other rental period beginning or ending in the taxable year; and

(iii) In the case of a section 467 rental agreement that provides for contingent rent, any interest that accrues on the contingent rent during the taxable year.

(2) *Interest on fixed rent for a rental period*—(i) *In general.* Except as provided in paragraph (e)(2)(ii) of this section and § 1.467-5(b)(1)(ii), the interest on fixed rent for a rental period is equal to the product of—

(A) The principal balance of the section 467 loan (as described in § 1.467-4(b)) at the beginning of the rental period; and

(B) The yield of the section 467 loan (as described in § 1.467-4(c)).

(ii) *Section 467 rental agreements with adequate interest.* Except in the case of a section 467 rental agreement that is a disqualified leaseback or long-term agreement, if a section 467 rental agreement provides adequate interest under § 1.467-2(b)(1)(i) (agreements with no deferred or prepaid rent) or § 1.467-2(b)(1)(ii) (agreements with adequate interest stated at a single fixed rate), the interest on fixed rent for a rental period is the amount of interest provided in the rental agreement for the period.

(3) *Treatment of interest.* If the section 467 interest for a rental period is a positive amount, the lessor has interest income and the lessee has an interest expense. If the section 467 interest for a rental period is a negative amount, the lessee has interest income and the lessor has an interest expense. Section 467 interest is treated as interest for all purposes of the Internal Revenue Code.

(f) *Substantial modification of a rental agreement*—(1) *Treatment as new agreement*—(i) *In general.* If a substantial modification of a rental agreement occurs after June 3, 1996, the post-modification agreement is treated as a new agreement and the date on which the modification occurs is treated as the agreement date in applying section 467 and the regulations thereunder to the post-modification agreement. Thus, for example, the post-modification agreement is treated as a new agreement entered into on the date the modification occurs for purposes of determining whether it is a section 467 rental agreement under this section, whether it is

a disqualified leaseback or long-term agreement under § 1.467-3, and whether it is entered into after the applicable effective date in § 1.467-9.

(ii) *Limitation.* In the case of a substantial modification of a rental agreement occurring on or before May 18, 1999, this paragraph (f) applies only if—

(A) The rental agreement was a disqualified leaseback or long-term agreement before the modification and the agreement date, determined without regard to the modification, is after June 3, 1996; or

(B) The post-modification agreement would, after application of the rules in this paragraph (f) (other than the special rule for disqualified agreements in paragraph (f)(4)(iii) of this section), be a disqualified leaseback or long-term agreement.

(2) *Post-modification agreement; in general.* For purposes of determining whether a post-modification agreement is a section 467 rental agreement or a disqualified leaseback or long-term agreement under paragraph (f)(1) of this section, the terms of the post-modification agreement are, except as provided in paragraph (f)(4) of this section, only those terms that provide for rights and obligations relating to post-modification items (within the meaning of paragraph (f)(5)(iv) of this section).

(3) *Other effects of a modification.* For rules relating to amounts that must be taken into account following certain modifications, see § 1.467-7(g).

(4) *Special rules*—(i) *Carryover of character; leasebacks.* If an agreement is a leaseback prior to its modification and the lessee prior to the modification (or a related person) is the lessee after the modification, the post-modification agreement is a leaseback even if the post-modification lessee did not have an interest in the property at any time during the two-year period ending on the date on which the modification occurs.

(ii) *Carryover of character; long-term agreements.* If an agreement is a long-term agreement prior to its modification and the entire agreement (as modified) would be a long-term agreement, the post-modification agreement is a long-term agreement.

(iii) *Carryover of character; disqualified agreements.* If an agreement (as in effect before its modification) is a disqualified leaseback or long-term agreement as the result of a determination (whether occurring before or after the modification) under §1.467-3(b)(1)(ii) and the post-modification agreement is a section 467 rental agreement (or the entire agreement (as modified) would be a section 467 rental agreement), the post-modification agreement will, notwithstanding its treatment as a new agreement under paragraph (f)(1)(i) of this section, be subject to constant rental accrual unless the Commissioner determines that, because of the absence of tax avoidance potential, the post-modification agreement should not be treated as a disqualified leaseback or long-term agreement.

(iv) *Allocation of rent.* If the entire agreement (as modified) provides a specific allocation of fixed rent, as described in paragraph (c)(2)(ii)(A)(2) of this section, the post-modification agreement is treated as an agreement that provides a specific allocation of fixed rent. If the entire agreement (as modified) does not provide a specific allocation of fixed rent, the fixed rent allocated to rental periods during the lease term of the post-modification agreement is determined by applying the rules of paragraph (c)(2)(ii)(B) of this section to the entire agreement (as modified).

(v) *Difference between aggregate rent and interest and aggregate payments—(A) In general.* Except as provided in paragraph (f)(4)(v)(B) of this section, a post-modification agreement described in paragraph (f)(4)(v)(C) of this section is treated as a section 467 rental agreement subject to proportional rental accrual (determined under §1.467-2(c)).

(B) *Constant rental accrual prior to the modification.* A post-modification agreement described in paragraph (f)(4)(v)(C) of this section is treated as a section 467 rental agreement subject to constant rental accrual if—

(1) Constant rental accrual is required under paragraph (f)(4)(iii) of this section; or

(2) The post-modification agreement involves total payments of more than \$250,000 (as described in paragraph (c)(4) of this section), and the Commissioner

determines that the post-modification agreement is a disqualified leaseback or long-term agreement.

(C) *Agreements described in this paragraph (f)(4)(v)(C).* A post-modification agreement is described in this paragraph (f)(4)(v)(C) if the aggregate amount of fixed rent and stated interest treated as post-modification items does not equal the aggregate amount of payments treated as post-modification items.

(vi) *Principal purpose of tax avoidance.* If a principal purpose of a substantial modification is to avoid the purpose or intent of section 467 or the regulations thereunder, the Commissioner may treat the entire agreement (as modified) as a single agreement for purposes of section 467 and the regulations thereunder.

(5) *Definitions.* The following definitions apply for purposes of this paragraph (f) and §1.467-7(g):

(i) A *modification* of a rental agreement is any alteration, including any deletion or addition, in whole or in part, of a legal right or obligation of the lessor or lessee thereunder, whether the alteration is evidenced by an express agreement (oral or written), conduct of the parties, or otherwise.

(ii) A modification is *substantial* only if, based on all of the facts and circumstances, the legal rights or obligations that are altered and the degree to which they are altered are economically substantial. A modification of a rental agreement will not be treated as substantial solely because it is not described in paragraph (f)(6) of this section.

(iii) A modification *occurs* on the earlier of the first date on which there is a binding contract that substantially sets forth the terms of the modification or the date on which agreement to such terms is otherwise evidenced.

(iv) *Post-modification items* with respect to any modification of a rental agreement are all items (other than pre-modification items) provided under the terms of the entire agreement (as modified).

(v) *Pre-modification items* with respect to any modification of a rental agreement are pre-modification rent, interest thereon, and payments allocable thereto (whether payable before or

after the modification.) For this purpose—

(A) Pre-modification rent is rent allocable to periods before the effective date of the modification, but only to the extent such rent is payable under the entire agreement (as modified) at the time such rent was due under the agreement in effect before the modification; and

(B) Pre-modification items are identified by applying payments, in the order payable under the entire agreement (as modified) unless the agreement specifies otherwise, to rent and interest thereon in the order in which amounts accrue.

(vi) The *entire agreement (as modified)* with respect to any modification is the agreement consisting of pre-modification terms providing for rights and obligations that are not affected by the modification and post-modification terms providing for rights and obligations that differ from the rights and obligations under the agreement in effect before the modification. For example, if a 10-year rental agreement that provides for rent of \$25,000 per year is modified at the end of the 5th year to provide for rent of \$30,000 per year in subsequent years, the entire agreement (as modified) provides for a 10-year lease term and provides for rent of \$25,000 per year in years 1 through 5 and rent of \$30,000 per year in years 6 through 10. The result would be the same if the modification provided for both the increase in rent and the substitution of a new lessee.

(6) *Safe harbors.* Notwithstanding the provisions of paragraph (f)(5) of this section, a modification of a rental agreement is not a substantial modification if the modification occurs solely as the result of one or more of the following—

(i) The refinancing of any indebtedness incurred by the lessor to acquire the property subject to the rental agreement and secured by such property (or any refinancing thereof) but only if all of the following conditions are met—

(A) Neither the amount, nor the time for payment, of the principal amount of the new indebtedness differs from the amount and time for payment of the remaining principal amount of the

refinanced indebtedness, except for de minimis changes;

(B) For each of the remaining rental periods, the rent allocation schedule, the payments of rent and interest, and the amount accrued under section 467 are changed only to the extent necessary to take into account the change in financing costs, and such changes are made pursuant to the terms of the rental agreement in effect before the modification;

(C) The lessor and the lessee are not related persons to each other or to any lender to the lessor with respect to the property (whether under the refinanced indebtedness or the new indebtedness); and

(D) With respect to the indebtedness being refinanced, the lessor was granted a unilateral option (within the meaning of § 1.1001-3(c)(3)) by the creditor to repay the refinanced indebtedness, exercisable with or without the lessee's consent;

(ii) A change in the obligation of the lessee to make any of the contingent payments described in paragraphs (c)(2)(iii)(B)(3) through (8) of this section; or

(iii) A change in the amount of fixed rent allocated to a rental period that, when combined with all previous changes in the amount of fixed rent allocated to the rental period, does not exceed one percent of the fixed rent allocated to that rental period prior to the modification.

(7) *Special rules for certain transfers—*

(i) *In general.* For purposes of this paragraph (f), a substitution of a new lessee or a sale, exchange, or other disposition by a lessor of property subject to a rental agreement will not, by itself, be treated as a substantial modification unless a principal purpose of the transaction giving rise to the modification is the avoidance of Federal income tax. In determining whether a principal purpose of the transaction giving rise to the modification is the avoidance of Federal income tax—

(A) The safe harbors and other principles of § 1.467-3(c) are taken into account; and

(B) The Commissioner may treat the post-modification agreement as a new

agreement or treat the entire agreement (as modified) as a single agreement.

(ii) *Exception.* Notwithstanding the provisions of paragraph (f)(7)(i) of this section, the continuing lessor and the new lessee (in the case of a substitution of a new lessee) or the new lessor and the continuing lessee (in the case of a sale, exchange, or other disposition by a lessor of property subject to a rental agreement) may, in appropriate cases, request the Commissioner to treat the transaction as if it were a substantial modification in order to have the provisions of paragraph (f)(4)(iii) of this section and § 1.467-7(g)(1) apply to the transaction.

(g) *Treatment of amounts payable by lessor to lessee—(1) Interest.* For purposes of determining present value, any amounts payable by the lessor to the lessee as interest on prepaid rent are treated as negative amounts.

(2) *Other amounts.* [Reserved]

(h) *Meaning of terms.* The following meanings apply for purposes of this section and §§ 1.467-2 through 1.467-9:

(1) *Agreement date* means the earlier of the lease date or the first date on which there is a binding written contract that substantially sets forth the terms under which the property will be leased.

(2) *Contingent rent* means any rent that is not fixed rent, including any amount reflecting an adjustment based on a reasonable price index (as defined in paragraph (h)(10) of this section) or a variable interest rate provision (as defined in paragraph (h)(16) of this section).

(3) *Fixed rent* means any rent to the extent its amount and the time at which it is required to be paid are fixed and determinable under the terms of the rental agreement as of the lease date. The following rules apply for the purpose of determining the extent to which rent is fixed rent:

(i) The possibility of a breach, default, or other early termination of the rental agreement and any adjustments based on a reasonable price index or a variable interest rate provision are disregarded.

(ii) Rent will not fail to be treated as fixed rent merely because of the possibility of impairment by insolvency,

bankruptcy, or other similar circumstances.

(iii) If the lease term (as defined in paragraph (h)(6) of this section) includes one or more periods as to which either the lessor or the lessee has an option to renew or extend the term of the agreement, rent will not fail to be treated as fixed rent merely because the option has not been exercised.

(iv) If the lease term includes one or more periods during which a substitute lessee or lessor may have use of the property, rent will not fail to be treated as fixed rent merely because the contingencies relating to the obligation of the lessee (or a related person) to make payments in the nature of rent have not occurred.

(v) If either the lessor or the lessee has an unconditional option or options, exercisable on one or more dates during the lease term, that, if exercised, require payments of rent to be made under an alternative payment schedule or schedules, the amount of fixed rent and the dates on which such rent is required to be paid are determined on the basis of the payment schedule that, as of the agreement date, is most likely to occur. If payments of rent are made under an alternative payment schedule that differs from the payment schedule assumed in applying the preceding sentence, then, for purposes of paragraph (f) of this section, the rental agreement is treated as having been modified at the time the option to make payments on such alternative schedule is exercised.

(4) *Late payment charge* means any amount required to be paid by the lessee to the lessor as additional compensation for the lessee's failure to make any payment of rent under a rental agreement when due.

(5) *Lease date* means the date on which the lessee first has the right to use of the property that is the subject of the rental agreement.

(6) *Lease term* means the period during which the lessee has use of the property subject to the rental agreement, including any option of the lessor to renew or extend the term of the agreement. An option of the lessee to renew or extend the term of the agreement is included in the lease term only if it is expected, as of the agreement

date, that the option will be exercised. For this purpose, a lessee is generally expected to exercise an option if, for example, as of the agreement date the rent for the option period is less than the expected fair market value rental for such period. The lessor's or lessee's determination that an option period is either included in or excluded from the lease term is not binding on the Commissioner. If the lessee (or a related person) agrees that one or both of them will or could be obligated to make payments in the nature of rent (within the meaning of § 1.168(i)-2(b)(2)) for a period when another lessee (the substitute lessee) or the lessor will have use of the property subject to the rental agreement, the Commissioner may, in appropriate cases, treat the period when the substitute lessee or lessor will have use of the property as part of the lease term. See § 1.467-7(f) for special rules applicable to the lessee, substitute lessee, and lessor. This paragraph (h)(6) applies to section 467 rental agreements entered into after March 6, 2001. However, taxpayers may choose to apply this paragraph (h)(6) to any rental agreement that is described in § 1.467-9(a) and is entered into on or before March 6, 2001.

(7) A *loss payment provision* means a provision that requires the lessee to pay the lessor a sum of money (which may be either a stipulated amount or an amount determined by reference to a formula or other objective measure) if the property subject to the rental agreement is lost, stolen, damaged or destroyed, or otherwise rendered unsuitable for any use (other than for scrap purposes).

(8) A *qualified percentage rents provision* means a provision pursuant to which the rent is equal to a fixed percentage of the lessee's receipts or sales (whether or not receipts or sales are adjusted for returned merchandise or Federal, state, or local sales taxes), but only if the percentage does not vary throughout the lease term. A provision will not fail to be treated as a qualified percentage rents provision solely by reason of one or more of the following additional terms:

(i) Differing percentages of receipts or sales apply to different departments or separate floors of a retail store, but

only if the percentage applicable to a particular department or floor does not vary throughout the lease term.

(ii) The percentage is applied to receipts or sales in excess of determinable dollar amounts, but only if the determinable dollar amounts are fixed and do not vary throughout the lease term.

(9) A *qualified TRAC provision* means a terminal rental adjustment clause (as defined in section 7701(h)(3)) contained in a qualified motor vehicle operating agreement (as defined in section 7701(h)(2)), but only if the adjustment to the rental price is based on a reasonable estimate, determined as of any date between the agreement date and the lease date (or, in the event the agreement date is the same as or later than the lease date, determined as of the agreement date), of the fair market value of the motor vehicle (including any trailer) at the end of the lease term.

(10) An adjustment is *based on a reasonable price index* if the adjustment reflects inflation or deflation occurring over a period during the lease term and is determined consistently under a generally recognized index for measuring inflation or deflation (for example, the non-seasonally adjusted U.S. City Average All Items Consumer Price Index for All Urban Consumers (CPI-U), which is published by the Bureau of Labor Statistics of the Department of Labor). An adjustment will not fail to be treated as one that is based on a reasonable price index merely because the adjustment may be limited to a fixed percentage, but only if the parties reasonably expect, as of any date between the agreement date and the lease date (or, in the event the agreement date is the same as the lease date, as of such date), that the fixed percentage will actually limit the amount of the rent payable during less than 50 percent of the lease term.

(11) For purposes of determining whether a section 467 rental agreement is a leaseback within the meaning of § 1.467-3(b)(2), two persons are *related persons* if they are related persons within the meaning of section 465(b)(3)(C). In all other cases, two persons are *related persons* if they either have a relationship to each other that

is specified in section 267(b) or section 707(b)(1) or are related entities within the meaning of sections 168(h)(4)(A), (B), or (C).

(12) *Rental agreement* includes any agreement, whether written or oral, that provides for the use of tangible property and is treated as a lease for Federal income tax purposes.

(13) A *residual condition provision* means a provision in a rental agreement that requires a payment to be made by either the lessor or the lessee to the other party based on the difference between the actual condition of the property subject to the agreement, determined as of the expiration of the lease term, and the expected condition of the property at the expiration of the lease term, as set forth in the rental agreement. The amount of any such payment may be determined by reference to any objective measure relating to the use or condition of the property, such as miles, hours or other duration of use, units of production, or similar measure. A provision will be treated as a residual condition provision only if the payment represents compensation for the use of, or wear and tear on, the property in excess of, or below, a standard set forth in the rental agreement, and the standard is reasonably expected, as of any date between the agreement date and the lease date (or, in the event the agreement date is the same as or later than the lease date, as of the agreement date), to be met at the expiration of the lease term.

(14) A *tax indemnity provision* means a provision in a rental agreement that may require the lessee to make one or more payments to the lessor in the event that the Federal, foreign, state, or local income tax consequences actually realized by a lessor from owning the property subject to the rental agreement and leasing it to the lessee differ from the consequences reasonably expected by the lessor, but only if the differences in such consequences result from a misrepresentation, act, or failure to act on the part of the lessee, or any other factor not within the control of the lessor or any related person.

(15) *Third-party costs* include any real estate taxes, insurance premiums,

maintenance costs, and any other costs (excluding a debt service cost) that relate to the leased property and are not within the control of the lessor or lessee or any person related to the lessor or lessee.

(16) A *variable interest rate provision* means a provision in a rental agreement that requires the rent payable by the lessee to the lessor to be adjusted by the dollar amount of changes in the amount of interest payable by the lessor on any indebtedness that was incurred to acquire the property subject to the rental agreement (or any refinancing thereof), but—

(i) Only to the extent the changes are attributable to changes in the interest rate; and

(ii) Only if the indebtedness provides for interest at one or more qualified floating rates (within the meaning of § 1.1275-5(b)), or the changes are attributable to a refinancing at a fixed rate or one or more qualified floating rates.

(i) [Reserved]

(j) *Computational rules.* For purposes of this section and §§ 1.467-2 through 1.467-9, the following rules apply—

(1) *Counting conventions.* Any reasonable counting convention may be used (for example, 30 days per month/360 days per year) to determine the length of a rental period or to perform any computation. Rental periods of the same descriptive length, for example annual, semiannual, quarterly, or monthly, may be treated as being of equal length.

(2) *Conventions regarding timing of rent and payments—*(i) *In general.* For purposes of determining present values and yield only, except as otherwise provided in this section and §§ 1.467-2 through 1.467-8—

(A) The rent allocated to a rental period is taken into account on the last day of the rental period;

(B) Any amount payable during the first half of the first rental period is treated as payable on the first day of that rental period;

(C) Any amount payable during the first half of any other rental period is treated as payable on the last day of the preceding rental period;

(D) Any amount payable during the second half of a rental period is treated

as payable on the last day of the rental period; and

(E) Any amount payable at the midpoint of a rental period is treated, in applying this paragraph (j)(2), as an amount payable during the first half of the rental period.

(ii) *Time amount is payable.* For purposes of this section and §§ 1.467-2 through 1.467-9, an amount is payable on the last day for timely payment (that is, the last day such amount may be paid without incurring interest, computed at an arm's-length rate, a substantial penalty, or other substantial detriment (such as giving the lessor the right to terminate the agreement, bring an action to enforce payment, or exercise other similar remedies under the terms of the agreement or applicable law)). This paragraph (j)(2)(ii) applies to section 467 rental agreements entered into after March 6, 2001. However, taxpayers may choose to apply this paragraph (j)(2)(ii) to any rental agreement that is described in § 1.467-9(a) and is entered into on or before March 6, 2001.

(3) *Annualized fixed rent.* Annualized fixed rent is determined by multiplying the fixed rent allocated to the rental period under paragraph (c)(2)(ii) of this section by the number of periods of the rental period's length in a calendar year. Thus, if the fixed rent allocated to a rental period is \$10,000 and the rental period is one month, the annualized fixed rent for that rental period is \$120,000 (\$10,000 times 12).

(4) *Allocation of fixed rent within a period.* A rental agreement that allocates fixed rent to any period is treated as allocating fixed rent ratably within that period. Thus, if a rental agreement provides that \$120,000 is allocated to each calendar year in the lease term, \$10,000 of rent is allocated to each calendar month.

(5) *Rental period length.* Except as provided in § 1.467-3(d)(1) (relating to agreements for which constant rental accrual is required), rental periods may be of any length, may vary in length, and may be different as between the lessor and the lessee as long as—

(i) The rental periods are one year or less, cover the entire lease term, and do not overlap;

(ii) Each scheduled payment under the rental agreement (other than a payment scheduled to occur before or after the lease term) occurs within 30 days of the beginning or end of a rental period; and

(iii) In the case of a rental agreement that does not provide a specific allocation of fixed rent, the rental periods selected do not cause the agreement to be treated as a section 467 rental agreement unless all alternative rental period schedules would result in such treatment.

[T.D. 8820, 64 FR 26853, May 18, 1999, as amended by T.D. 8917, 66 FR 1039, Jan. 5, 2001]

**§ 1.467-2 Rent accrual for section 467 rental agreements without adequate interest.**

(a) *Section 467 rental agreements for which proportional rental accrual is required.* Under § 1.467-1(d)(2)(ii), the fixed rent for each rental period is the proportional rental amount, computed under paragraph (c) of this section, if—

(1) The section 467 rental agreement is not a disqualified leaseback or long-term agreement under § 1.467-3(b); and

(2) The section 467 rental agreement does not provide adequate interest on fixed rent under paragraph (b) of this section.

(b) *Adequate interest on fixed rent—(1) In general.* A section 467 rental agreement provides adequate interest on fixed rent if, disregarding any contingent rent—

(i) The rental agreement has no deferred or prepaid rent as described in § 1.467-1(c)(3);

(ii) The rental agreement has deferred or prepaid rent, and—

(A) The rental agreement provides interest (the stated rate of interest) on deferred or prepaid fixed rent at a single fixed rate (as defined in § 1.1273-1(c)(1)(iii));

(B) The stated rate of interest on fixed rent is no lower than 110 percent of the applicable Federal rate (as defined in paragraph (e)(3) of this section);

(C) The amount of deferred or prepaid fixed rent on which interest is charged is adjusted at least annually to reflect the amount of deferred or prepaid fixed rent as of a date no earlier than the date of the preceding adjustment and

no later than the date of the succeeding adjustment; and

(D) The rental agreement requires interest to be paid or compounded at least annually;

(iii) The rental agreement provides for deferred rent but no prepaid rent, and the sum of the present values (within the meaning of paragraph (d) of this section) of all amounts payable by the lessee as fixed rent (and interest, if any, thereon) is equal to or greater than the sum of the present values of the fixed rent allocated to each rental period; or

(iv) The rental agreement provides for prepaid rent but no deferred rent, and the sum of the present values of all amounts payable by the lessee as fixed rent, plus the sum of the negative present values of all amounts payable by the lessor as interest, if any, on prepaid fixed rent, is equal to or less than the sum of the present values of the fixed rent allocated to each rental period.

(2) *Section 467 rental agreements that provide for a variable rate of interest.* For purposes of the adequate interest test under paragraph (b)(1) of this section, if a section 467 rental agreement provides for variable interest, the rental agreement is treated as providing for fixed rates of interest on deferred or prepaid fixed rent equal to the fixed rate substitutes (determined in the same manner as under §1.1275-5(e), treating the agreement date as the issue date) for the variable rates called for by the rental agreement. For purposes of this section, a rental agreement provides for variable interest if all stated interest provided by the agreement is paid or compounded at least annually at a rate or rates that meet the requirements of §1.1275-5(a)(3)(i)(A) or (B) and (a)(4).

(3) *Agreements with both deferred and prepaid rent.* If an agreement has both deferred and prepaid rent, the agreement provides adequate interest under paragraph (b)(1) of this section if the conditions set forth in paragraph (b)(1)(ii)(A) through (D) of this section are met for both the prepaid and the deferred rent. For purposes of this paragraph (b)(3), an agreement will be considered to meet the condition set forth in paragraph (b)(1)(ii)(A) of this

section if the agreement provides a single fixed rate of interest on the deferred rent and a single fixed rate of interest on the prepaid rent, even if those rates are not the same. This paragraph (b)(3) applies to section 467 rental agreements entered into after March 6, 2001. However, taxpayers may choose to apply this paragraph (b)(3) to any rental agreement that is described in §1.467-9(a) and is entered into on or before March 6, 2001.

(c) *Computation of proportional rental amount—(1) In general.* The proportional rental amount for a rental period is the amount of fixed rent allocated to the rental period under §1.467-1(c)(2)(i), multiplied by a fraction. The numerator of the fraction is the sum of the present values of the amounts payable under the terms of the section 467 rental agreement as fixed rent and interest thereon. The denominator of the fraction is the sum of the present values of the fixed rent allocated to each rental period under the rental agreement.

(2) *Section 467 rental agreements that provide for a variable rate of interest.* To calculate the proportional rental amount for a section 467 rental agreement that provides for a variable rate of interest, see §1.467-5.

(d) *Present value.* For purposes of determining adequate interest under paragraph (b) of this section or the proportional rental amount under paragraph (c) of this section, the present value of any amount is determined using a discount rate equal to 110 percent of the applicable Federal rate. In general, present values are determined as of the first day of the first rental period in the lease term. However, if a section 467 rental agreement calls for payments of fixed rent prior to the lease term, present values are determined as of the first day a fixed rent payment is called for by the agreement. For purposes of the present value determination under paragraph (b)(1)(iv) of this section, the fixed rent allocated to a rental period must be discounted from the first day of the rental period. For other conventions and rules relating to the determination of present value, see §1.467-1(g) and (j).

(e) *Applicable Federal rate—(1) In general.* The applicable Federal rate for a

section 467 rental agreement is the applicable Federal rate in effect on the agreement date. The *applicable Federal rate* for a rental agreement means—

(i) The Federal short-term rate if the term of the rental agreement is not over 3 years;

(ii) The Federal mid-term rate if the term of the rental agreement is over 3 years but not over 9 years; and

(iii) The Federal long-term rate if the term of the rental agreement is over 9 years.

(2) *Source of applicable Federal rates.* The Internal Revenue Service publishes the applicable Federal rates, based on annual, semiannual, quarterly, and monthly compounding, each month in the Internal Revenue Bulletin (see § 601.601(d) of this chapter). However, the applicable Federal rates may be based on any compounding assumption. To convert a rate based on one compounding assumption to an equivalent rate based on a different compounding assumption, see § 1.1272-1(j), *Example 1*.

(3) *110 percent of applicable Federal rate.* For purposes of § 1.467-1, this section and §§ 1.467-3 through 1.467-9, 110 percent of the applicable Federal rate means 110 percent of the applicable Federal rate based on semiannual compounding or any rate based on a different compounding assumption that is equivalent to 110 percent of the applicable Federal rate based on semiannual compounding. The Internal Revenue Service publishes 110 percent of the applicable Federal rates, based on annual, semiannual, quarterly, and monthly compounding, each month in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter).

(4) *Term of the section 467 rental agreement—(i) In general.* For purposes of determining the applicable Federal rate under this paragraph (e), the term of the section 467 rental agreement includes the lease term, any period before the lease term beginning with the first day an amount of fixed rent is payable under the terms of the rental agreement, and any period after the lease term ending with the last day an amount of fixed rent or interest thereon is payable under the rental agreement.

(ii) *Section 467 rental agreements with variable interest.* If a section 467 rental agreement provides variable interest on deferred or prepaid fixed rent, the term of the rental agreement for purposes of calculating the applicable Federal rate is the longest period between interest rate adjustment dates, or, if the rental agreement provides an initial fixed rate of interest on deferred or prepaid fixed rent, the period between the agreement date and the last day the fixed rate applies, if this period is longer. If, as described in § 1.1274-4(c)(2)(ii), the rental agreement provides for a qualified floating rate (as defined in § 1.1275-5(b)) that in substance resembles a fixed rate, the applicable Federal rate is determined by reference to the lease term.

(f) *Examples.* The following examples illustrate the application of this section. In each of these examples it is assumed that the rental agreement is not a disqualified leaseback or long-term agreement subject to constant rental accrual. The examples are as follows:

*Example 1.* (i) C agrees to lease property from D for five years beginning on January 1, 2000, and ending on December 31, 2004. The section 467 rental agreement provides that rent of \$100,000 accrues in each calendar year in the lease term and that rent of \$500,000 plus \$120,000 of interest is payable on December 31, 2004. Assume that the parties select the calendar year as the rental period and that 110 percent of the applicable Federal rate is 10 percent, compounded annually.

(ii) The rental agreement has deferred rent under § 1.467-1(c)(3)(i) because the fixed rent allocated to calendar years 2000, 2001, and 2002 is not paid until 2004. In addition, because the rental agreement does not state an interest rate, the rental agreement does not satisfy the requirements of paragraph (b)(1)(ii) of this section.

(iii)(A) Because the rental agreement has deferred fixed rent and no prepaid rent, the agreement has adequate interest only if the present value test provided in paragraph (b)(1)(iii) of this section is met. The present value of all fixed rent and interest payable under the rental agreement is \$384,971.22, determined as follows:  $\$620,000/(1.10)^5 = \$384,971.22$ . The present value of all fixed rent allocated under the rental agreement (discounting the amount of fixed rent allocated to a rental period from the last day of the rental period) is \$379,078.68, determined as follows:

$$\$379,078.68 = \$100,000 \times \frac{1 - (1.10)^{-5}}{.10}$$

(B) The rental agreement provides adequate interest on fixed rent because the present value of the single amount payable under the section 467 rental agreement exceeds the sum of the present values of fixed rent allocated.

(iv) For an example illustrating the computation of the yield on the rental agreement and the allocation of the interest and rent provided for under the rental agreement, see §1.467-4(f), *Example 2*.

*Example 2.* (i) E and F enter into a section 467 rental agreement for the lease of equipment beginning on January 1, 2000, and ending on December 31, 2004. The rental agreement provides that rent of \$100,000 accrues for each calendar month during the lease term. All rent is payable on December 31, 2004, together with interest on accrued rent at a qualified floating rate set at a current value (as defined in §1.1275-5(a)(4)) that is compounded at the end of each calendar month and adjusted at the beginning of each calendar month throughout the lease term. Therefore, the rental agreement provides for variable interest within the meaning of paragraph (b)(2) of this section.

(ii) On the agreement date the qualified floating rate is 7.5 percent, and 110 percent of the applicable Federal rate, as defined in paragraph (e)(3) of this section, based on monthly compounding, is 7 percent. Under paragraph (b)(2) of this section, the fixed rate substitute for the qualified floating rate is 7.5 percent and the agreement is treated as providing for interest at this fixed rate for purposes of determining whether adequate interest is provided under paragraph (b) of

this section. Accordingly, the requirements of paragraph (b)(1)(ii) of this section are satisfied, and the rental agreement has adequate interest.

*Example 3.* (i) X and Y enter into a section 467 rental agreement for the lease of real property beginning on January 1, 2000, and ending on December 31, 2002. The rental agreement provides that rent of \$800,000 is allocable to 2000, \$1,000,000 is allocable to 2001, and \$1,200,000 is allocable to 2002. Under the rental agreement, Y must make a \$3,000,000 payment on December 31, 2002. Assume that both X and Y choose the calendar year as the rental period, X and Y are calendar year taxpayers, and 110 percent of the applicable Federal rate is 8.5 percent compounded annually.

(ii) The rental agreement fails to provide adequate interest under paragraph (b)(1) of this section. Therefore, under §1.467-1(d)(2)(ii), the fixed rent for each rental period is the proportional rental amount.

(iii)(A) The proportional rental amount is computed under paragraph (c) of this section. Because the rental agreement does not call for any fixed rent payments prior to the lease term, under paragraph (d) of this section, the present value is determined as of the first day of the first rental period in the lease term. The present value of the single amount payable by the lessee under the rental agreement is computed as follows:

$$\$2,348,724.30 = \frac{\$3,000,000}{(1+.085)^3}$$

(B) The sum of the present values of the fixed rent allocated to each rental period (discounting the fixed rent allocated to a rental period from the last day of such rental period) is computed as follows:

$$\$2,526,272.20 = \frac{\$800,000}{(1+.085)} + \frac{\$1,000,000}{(1+.085)^2} + \frac{\$1,200,000}{(1+.085)^3}$$

(C) Thus, the fraction for determining the proportional rental amount is .9297194 (\$2,348,724.30/\$2,526,272.20). The section 467 interest for each of the taxable years within the lease term is computed and taken into account as provided in §1.467-4. The section 467 rent for each of the taxable years within the lease term is as follows:

| Taxable year | Section 467 rent                          |
|--------------|---|
| 2000 .....   | \$743,775.52<br>(\$ 800,000 × .9297194).  |
| 2001 .....   | 929,719.40<br>(\$1,000,000 × .9297194).   |
| 2002 .....   | 1,115,663.28<br>(\$1,200,000 × .9297194). |

[T.D. 8820, 64 FR 26859, May 18, 1999, as amended by T.D. 8917, 66 FR 1040, Jan. 5, 2001]

**§1.467-3 Disqualified leasebacks and long-term agreements.**

(a) *General rule.* Under §1.467-1(d)(2)(i), constant rental accrual (as described under paragraph (d) of this section) must be used to determine the fixed rent for each rental period in the lease term if the section 467 rental agreement is a disqualified leaseback or long-term agreement within the

meaning of paragraph (b) of this section. Constant rental accrual may not be used in the absence of a determination by the Commissioner, pursuant to paragraph (b)(1)(ii) of this section, that the rental agreement is disqualified. Such determination may be made either on a case-by-case basis or in regulations or other guidance published by the Commissioner (see § 601.601(d)(2) of this chapter) providing that a certain type or class of leaseback or long-term agreement will be treated as disqualified and subject to constant rental accrual.

(b) *Disqualified leaseback or long-term agreement*—(1) *In general.* A leaseback (as defined in paragraph (b)(2) of this section) or a long-term agreement (as defined in paragraph (b)(3) of this section) is disqualified only if—

(i) A principal purpose for providing increasing or decreasing rent is the avoidance of Federal income tax (as described in paragraph (c) of this section);

(ii) The Commissioner determines that, because of the tax avoidance purpose, the agreement should be treated as a disqualified leaseback or long-term agreement; and

(iii) For section 467 rental agreements entered into before July 19, 1999, the amount determined with respect to the rental agreement under § 1.467-1(c)(4) (relating to the exception for rental agreements involving total payments of \$250,000 or less) exceeds \$2,000,000.

(2) *Leaseback.* A section 467 rental agreement is a leaseback if the lessee (or a related person) had any interest (other than a de minimis interest) in the property at any time during the two-year period ending on the agreement date. For this purpose, interests in property include options and agreements to purchase the property (whether or not the lessee or related person was considered the owner of the property for Federal income tax purposes) and, in the case of subleased property, any interest as a sublessor.

(3) *Long-term agreement*—(i) *In general.* A section 467 rental agreement is a long-term agreement if the lease term exceeds 75 percent of the property's statutory recovery period.

(ii) *Statutory recovery period*—(A) *In general.* The term statutory recovery period means—

(1) In the case of property depreciable under section 168, the applicable period determined under section 467(e)(3)(A);

(2) In the case of land, 19 years; and

(3) In the case of any other tangible property, the period that would apply under section 467(e)(3)(A) if the property were property to which section 168 applied.

(B) *Special rule for rental agreements relating to properties having different statutory recovery periods.* In the case of a rental agreement relating to two or more related properties that have different statutory recovery periods, the statutory recovery period for purposes of paragraph (b)(3)(ii)(A) of this section is the weighted average, based on the fair market values of the properties on the agreement date, of the statutory recovery periods of each of the properties.

(c) *Tax avoidance as principal purpose for increasing or decreasing rent*—(1) *In general.* In determining whether a principal purpose for providing increasing or decreasing rent is the avoidance of Federal income tax, all relevant facts and circumstances are taken into account. However, an agreement will not be treated as a disqualified leaseback or long-term agreement if either of the safe harbors set forth in paragraph (c)(3) of this section is met. The mere failure of a leaseback or long-term agreement to meet one of these safe harbors will not, by itself, cause the agreement to be treated as one in which tax avoidance was a principal purpose for providing increasing or decreasing rent.

(2) *Tax avoidance*—(i) *In general.* If, as of the agreement date, a significant difference between the marginal tax rates of the lessor and lessee can reasonably be expected at some time during the lease term, the agreement will be closely scrutinized and clear and convincing evidence will be required to establish that tax avoidance is not a principal purpose for providing increasing or decreasing rent. The term “marginal tax rate” means the percentage determined by dividing one dollar into the amount of the increase or decrease in the Federal income tax

liability of the taxpayer that would result from an additional dollar of rental income or deduction.

(ii) *Significant difference in tax rates.* A significant difference between the marginal tax rates of the lessor and lessee is reasonably expected if—

(A) The rental agreement has increasing rents and the lessor's marginal tax rate is reasonably expected to exceed the lessee's marginal tax rate by more than 10 percentage points during any rental period to which the rental agreement allocates annualized fixed rent that is less than the average rent allocated to all calendar years (determined by taking into account the rules set forth in paragraph (c)(4)(iii) of this section); or

(B) The rental agreement has decreasing rents and the lessee's marginal tax rate is reasonably expected to exceed the lessor's marginal tax rate by more than 10 percentage points during any rental period to which the rental agreement allocates annualized fixed rent that is greater than the average rent allocated to all calendar years (determined by taking into account the rules set forth in paragraph (c)(4)(iii) of this section).

(iii) *Special circumstances.* In determining the expected marginal tax rates of the lessor and lessee, net operating loss and credit carryovers and any other attributes or special circumstances reasonably expected to affect the Federal income tax liability of the taxpayer (including the alternative minimum tax) are taken into account. For example, in the case of a partnership or S corporation, the amount of rental income or deduction that would be allocable to the partners or shareholders, respectively, is taken into account.

(3) *Safe harbors.* Tax avoidance will not be considered a principal purpose for providing increasing or decreasing rent if—

(i) The uneven rent test (as defined in paragraph (c)(4) of this section) is met; or

(ii) The increase or decrease in rent is wholly attributable to one or more of the following provisions—

(A) A contingent rent provision set forth in § 1.467-1(c)(2)(iii)(B); or

(B) A single rent holiday provision allowing reduced rent (or no rent) for one consecutive period during the lease term, but only if—

(1) The rent holiday is for a period of three months or less at the beginning of the lease term and for no other period; or

(2) The duration of the rent holiday is reasonable, determined by reference to commercial practice (as of the agreement date) in the locality where the use of the property occurs, and does not exceed the lesser of 24 months or 10 percent of the lease term.

(4) *Uneven rent test—(i) In general.* The uneven rent test is met if the rent allocated to each calendar year does not vary from the average rent allocated to all calendar years (determined in accordance with the rules set forth in paragraph (c)(4)(iii) of this section) by more than 10 percent.

(ii) *Special rule for real estate.* Paragraph (c)(4)(i) of this section is applied by substituting “15 percent” for “10 percent” if the rental agreement is a long-term agreement and at least 90 percent of the property subject to the agreement (determined on the basis of fair market value as of the agreement date) consists of real property (as defined in § 1.856-3(d)).

(iii) *Operating rules.* In determining whether the uneven rent test has been met, the following rules apply:

(A) Any contingent rent attributable to a provision set forth in § 1.467-1(c)(2)(iii)(B)(3) through (9) is disregarded.

(B) If the lease term includes one or more partial calendar years (a period less than a complete calendar year), the average rent allocated to each calendar year is the total rent allocated under the rental agreement, divided by the actual length (in years) of the lease term. The rent allocated to a partial calendar year is annualized by multiplying the allocated rent by the number of periods of the partial calendar year's length in a full calendar year and the annualized rent is treated as the amount of rent allocated to that year in determining whether the uneven rent test is met.

(C) In the case of a rental agreement not described in paragraph (c)(4)(ii) of

this section, an initial rent holiday period and any rent allocated to such period are disregarded for purposes of this paragraph (c)(4) if taking such period and rent into account would cause the agreement to fail to meet the uneven rent test. For purposes of this paragraph (c)(4), an initial rent holiday period is any period of three months or less at the beginning of the lease term during which annualized fixed rent (determined by treating such period as a rental period for purposes of § 1.467-1(j)(3)) is less than the average rent allocated to all calendar years (determined before the application of this paragraph (c)(4)(iii)(C)).

(D) In the case of a rental agreement described in paragraph (c)(4)(ii) of this section, one qualified rent holiday period and any rent allocated to such period are disregarded for purposes of this paragraph (c)(4) if taking such period and rent into account would cause the agreement to fail the uneven rent test. For this purpose, a qualified rent holiday period is a consecutive period that is an initial rent holiday period or that meets the following conditions:

(1) The period does not exceed the lesser of 24 months or 10 percent of the lease term (determined before the application of this paragraph (c)(4)(iii)(D)).

(2) Annualized fixed rent during the period (determined by treating the period as a rental period for purposes of § 1.467-1(j)(3)) is less than the average rent allocated to all calendar years (determined before the application of this paragraph (c)(4)(iii)(D)).

(3) Providing less than average rent for the period is reasonable, determined by reference to commercial practice (as of the agreement date) in the locality where the use of the property occurs.

(E) If the rental agreement contains a variable interest rate provision, the uneven rent test is applied by treating the rent as having been fixed under the terms of the rental agreement for the entire lease term using fixed rate substitutes (determined in the same manner as § 1.1275-5(e), treating the agreement date as the issue date) for the variable rates of interest provided under the terms of the lessor's indebtedness.

(d) *Calculating constant rental amount*—(1) *In general.* Except as provided in paragraph (d)(2) of this section, the constant rental amount is the amount that, if paid at the end of each rental period, would result in a present value equal to the present value of all amounts payable under the disqualified leaseback or long-term agreement as rent and interest. In computing the constant rental amount, the rules for determining present value are the same as those provided in § 1.467-2(d) for computing the proportional rental amount. If constant rental accrual is required, all rental periods (other than an initial or final short period of not more than one month) must be equal in length and satisfy the requirements of § 1.467-1(j)(5).

(2) *Initial or final short periods.* If a disqualified leaseback or long-term agreement has an initial or final short rental period, the constant rental amount for the initial or final short period may be determined under any reasonable method. However, the sum of the present values of all the constant rental amounts must equal the present values of all amounts payable under the disqualified leaseback or long-term agreement as rent and interest. Any adjustment necessary to eliminate the section 467 loan balance because of the method used to determine the constant rental amount for short periods must be taken into account as section 467 rent for the final rental period.

(3) *Method to determine constant rental amount; no short periods*—(i) *Step 1.* Determine the present value of amounts payable under the disqualified leaseback or long-term agreement as rent or interest.

(ii) *Step 2.* Determine the present value of \$1 to be received at the end of each rental period during the lease term as of the first day of the first rental period during the lease term (or, if earlier, the first day a rent payment is required under the rental agreement).

(iii) *Step 3.* Divide the amount determined in paragraph (d)(3)(i) of this section (Step 1) by the number of dollars determined in paragraph (d)(3)(ii) of this section (Step 2).

**Internal Revenue Service, Treasury**

**§ 1.467-3**

(e) *Examples.* The following examples illustrate the application of this section:

*Example 1.* (i) K, lessor, and L, lessee, enter into a long-term agreement for a 10-year lease of personal property beginning on January 1, 2000. K and L are C corporations that use the calendar year as their taxable year. K does not have any unused losses or credits from taxable years preceding 2000. In addition, as of the agreement date, K expects that it will be subject to the maximum rate of tax imposed by section 11 in 2000 and that it will not be limited in its ability to use any losses or credits. As of the agreement date, L expects that it will be subject to the alternative minimum tax imposed by section 55 in 2000. The rental agreement provides for rent allocations in each year of the lease term, as follows:

| Year | Amount    |
|------|-----------|
| 2000 | \$427,500 |
| 2001 | 442,500   |
| 2002 | 457,500   |
| 2003 | 472,500   |
| 2004 | 487,500   |
| 2005 | 502,500   |
| 2006 | 517,500   |
| 2007 | 532,500   |
| 2008 | 547,500   |
| 2009 | 562,500   |

(ii) As described in paragraph (c)(2) of this section, as of the agreement date, a significant difference between the marginal tax rates of the lessor and lessee can reasonably be expected at some time during the lease term. First, the rental agreement has increasing rents. Second, the lessor's marginal tax rate exceeds the lessee's marginal tax rate by more than 10 percentage points during a rental period to which the rental agreement allocates less than a ratable portion of the aggregate amount of rent payable under the agreement. For example, for the year 2000, the lessor's expected marginal tax rate is 35 percent, the percentage determined by dividing the increase in the Federal income tax liability of K that would result from an additional dollar of rental income (\$.35) by \$1. Because the lessee is subject to the alternative minimum tax, the lessee's expected marginal tax rate for 2000 is 20 percent, the percentage determined by dividing the decrease in the Federal income tax liability (taking into account both the decrease in the lessee's regular tax and the increase in the lessee's alternative minimum tax) that would result from an additional dollar of rental deduction (\$.20) by \$1. Further, for the year 2000, the rent allocated in accordance with the rental agreement is \$427,500, which is less than a ratable portion of the aggregate amount of rental payments, \$495,000, determined by dividing the total rents payable

under the agreement (\$4,950,000) by the number of years in the lease term (10). Thus, because a significant difference between the marginal tax rates of the lessor and lessee can reasonably be expected during the lease term, the agreement will be closely scrutinized and clear and convincing evidence will be required to establish that tax avoidance is not a principal purpose for providing increasing rent.

*Example 2.* (i) A and B enter into a long-term agreement for a 5-year lease of personal property beginning on July 1, 2000, and ending on June 30, 2005. The rental agreement provides that the rent is allocated to the calendar years in the lease term in accordance with the following schedule and is paid at successive six-month intervals (on December 31 and June 30) during the lease term:

| Year | Amount    |
|------|-----------|
| 2000 | \$450,000 |
| 2001 | 900,000   |
| 2002 | 900,000   |
| 2003 | 1,100,000 |
| 2004 | 1,100,000 |
| 2005 | 550,000   |

(ii) In determining whether the uneven rent test described in paragraph (c)(4)(i) of this section is met, the total amount of rent allocated under the rental agreement is \$5,000,000, and the lease term is five years. The average rent for each year is \$1,000,000 (see paragraph (c)(4)(iii)(B) of this section), and the uneven rent test is met if the rent for each year is not less than \$900,000 and not more than \$1,100,000. The test is met for 2000 because the annualized rent for that year is \$900,000. The test is met for 2005 because the annualized rent for that year is \$1,100,000. The test is met for each of the years 2001 through 2004 because the rent for each of these years is not less than \$900,000 and not more than \$1,100,000. Accordingly, because the uneven rent test of paragraph (c)(4)(i) of this section is met, the long-term agreement will not be treated as disqualified.

*Example 3.* (i) C and D enter into a long-term agreement for a lease of personal property beginning on October 1, 1999, and ending on December 31, 2005. The rental agreement provides that the rent is allocated to the calendar years in the lease term in accordance with the following schedule and is paid at successive six-month intervals (on December 31 and June 30) during the lease term:

| Year | Amount    |
|------|-----------|
| 1999 | \$0       |
| 2000 | 900,000   |
| 2001 | 900,000   |
| 2002 | 900,000   |
| 2003 | 1,100,000 |
| 2004 | 1,100,000 |
| 2005 | 1,100,000 |

(ii) The three-month rent holiday period at the beginning of the lease term is an initial rent holiday within the meaning of paragraph (c)(4)(iii)(C) of this section. Moreover, the agreement would fail the uneven rent test if the rent holiday period and the rent allocated to the period were taken into account. Thus, under paragraph (c)(4)(iii)(C) of this section, the period and the rent allocated to the period are disregarded for purposes of applying the uneven rent test. In that case, the lease term is six years, and the uneven rent test is met because the average rent for each year in the lease term is \$1,000,000 and the rent for each calendar year in the lease term is not less than \$900,000 nor more than \$1,100,000. Accordingly, the long-term agreement will not be treated as disqualified.

*Example 4.* (i) E and F enter into a long-term agreement for a 6-year lease of personal property beginning on January 1, 2000, and ending on December 31, 2005. The rental agreement provides that the rent allocated to the calendar years in the lease term and paid at successive six-month intervals (on June 30 and December 31) during the lease term is the sum of the interest on the lessor's indebtedness, in the amount of \$4,637,577, and an amount determined in accordance with the following schedule:

| Year       | Amount    |
|------------|-----------|
| 2000 ..... | \$539,574 |
| 2001 ..... | 583,603   |
| 2002 ..... | 631,225   |
| 2003 ..... | 886,733   |
| 2004 ..... | 959,090   |
| 2005 ..... | 1,037,352 |

(i) Assume further that the lessor's indebtedness bears interest at the rate of 2 percent in excess of the 6-month London Interbank Offered Rate (LIBOR) in effect on the first day of the 6-month period for each rental period and that, on the agreement date, the interest rate under this formula would be 8 percent. If the interest rate remained fixed during the entire lease term, the formula for determining the rent payable by the lessee would result in payments of rent in the amount of \$450,000 for each six-month period in 2000, 2001, and 2002, and \$550,000 for each six-month period in 2003, 2004, and 2005.

(iii) Under paragraph (c)(4)(iii)(E) of this section, the fixed rate substitute for the variable interest rate provision produces a schedule of fixed rents that meets the uneven rent test of paragraph (c)(4)(i) of this section. Thus, even if the actual rents payable under the rental agreement do not meet the uneven rent test because of fluctuations in the 6-month LIBOR, the uneven rent test will be treated as having been met, and the long-term agreement will not be treated as disqualified.

*Example 5.* (i) G and H enter into a long-term agreement for a 5-year lease of personal property beginning on January 1, 2000, and ending on December 31, 2004. The rental agreement provides that the rent is payable to G at the rate of \$40,000 per month in arrears, subject to an adjustment based on changes in prevailing interest rates during the lease term. Under this adjustment, the lessor is entitled to receive an amount equal to the sum of a specified dollar amount, which increases each month as payments of rent are made, and interest on a notional principal amount (as defined in § 1.446-3(c)(3)) at a qualified floating rate (as defined in § 1.1275-5(b)). The notional principal amount is initially established at 80 percent of the cost of the property. As each payment of rent is made, the notional principal amount is reduced (but not below zero) to an amount that would represent the outstanding principal balance of a loan the payments on which are equal to the monthly payments of rent. As of the agreement date, the value of the qualified floating rate is 9 percent. Although G did not incur indebtedness specifically for the purpose of acquiring the property, the parties agreed to the adjustment provisions in order to compensate G for its general costs of borrowing.

(ii) The adjustment provision produces a schedule of rent payments that is virtually identical to the schedule that would have resulted if G had actually borrowed money in an amount and on terms identical to the terms used in determining interest on the notional principal amount and the adjustment were based on that indebtedness. An adjustment based on actual indebtedness of the lessor would have been a variable interest rate provision eligible for a safe harbor under paragraph (c)(3)(ii)(A) of this section. Accordingly, based on all the facts and circumstances, the adjustment provision did not have as one of its principal purposes the avoidance of Federal income tax, and thus the long-term agreement will not be treated as disqualified.

*Example 6.* (i) X and Y enter into a leaseback for a 5-year lease of personal property beginning on January 1, 1998, and ending on December 31, 2002. The rental agreement provides that \$0 of rent is allocated to years 1998, 1999, and 2000, and that rent of \$17,500,000 is allocated to years 2001 and 2002. The rental agreement provides that the rent allocated to each year is payable on December 31 of that year. Assume all rental periods are the calendar year. Assume also that 110 percent of the applicable Federal rate based on annual compounding is 12 percent.

(ii)(A) If the Commissioner determines that the leaseback is disqualified, the constant rental amount is computed as follows:

(B) Step 1 in calculating the constant rental amount is to determine the present value

**Internal Revenue Service, Treasury****§ 1.467-4**

of the two payments due under the rental agreement as follows:

$$\$21,051,536 = \frac{\$17,500,000}{(1.12)^4} + \frac{\$17,500,000}{(1.12)^5}$$

(iii) Because no amounts of rent are payable before the lease term, Step 2 in calculating the constant rental amount is to determine the present value as of the first day of the lease term of \$1 to be received at the end of each rental period during the lease term. This results in a present value of \$3,604,776.2. In Step 3 the amount determined in Step 1 is divided by the number of dollars determined in Step 2. Thus, the constant rental amount is \$5,839,901 for each calendar year during the lease term computed as follows:

$$\$5,839,901 = \frac{\$21,051,536}{3.6047762}$$

[T.D. 8820, 64 FR 26860, May 18, 1999, as amended by T.D. 8917, 66 FR 1040, Jan. 5, 2001]

**§ 1.467-4 Section 467 loan.**

(a) *In general*—(1) *Overview*. Except as provided in paragraph (a)(2) of this section, the section 467 loan rules of this section apply to a section 467 rental agreement if, as of the first day of a rental period, there is a difference between the amount of fixed rent payable under the rental agreement on or before the first day and the amount of fixed rent required to be accrued in accordance with § 1.467-1(d)(2) before the first day. Paragraph (b) of this section provides rules for computing the principal balance of a section 467 loan at the beginning of any rental period. The principal balance of a section 467 loan may be positive or negative. For Federal tax purposes, if the principal balance is positive, the amount represents a loan from the lessor to the lessee, and if the principal balance is negative, the amount represents a loan from the lessee to the lessor.

(2) *No section 467 loan in the case of certain section 467 rental agreements*. Except as provided in paragraphs (a)(3) and (4) of this section, this section does not apply to section 467 rental agreements that provide adequate interest under § 1.467-2(b)(1)(i) (agreements with no deferred or prepaid rent) or § 1.467-2(b)(1)(ii) (agreements with deferred or prepaid rent that provide adequate stated interest at a single fixed rate).

(3) *Rental agreements subject to constant rental accrual*. Notwithstanding the provisions of paragraph (a)(2) of this section, this section applies to rental agreements subject to constant rental accrual under § 1.467-3 (relating to disqualified leasebacks or long-term agreements).

(4) *Special rule in applying the provisions of § 1.467-7(e), (f), or (g)*. Notwithstanding the provisions of paragraph (a)(2) of this section, section 467 loan balances must be computed for section 467 rental agreements that are not subject to constant rental accrual under § 1.467-3 and that provide adequate interest under § 1.467-2(b)(1)(i) or (ii), but only for purposes of applying the provisions of § 1.467-7(e) (relating to dispositions of property subject to a section 467 rental agreement), § 1.467-7(f) (relating to assignments by lessees and lessee-financed renewals), and § 1.467-7(g) (relating to modifications of rental agreements).

(b) *Principal balance*—(1) *In general*. Except as provided in paragraph (b)(2) of this section or in § 1.467-7(e), (f), or (g), the principal balance of the section 467 loan at the beginning of a rental period equals—

(i) The fixed rent accrued in preceding rental periods;

(ii) Increased by the sum of—

(A) The interest on fixed rent includable in the gross income of the lessor for preceding rental periods; and

(B) Any amount payable by the lessor on or before the first day of the rental period as interest on prepaid fixed rent; and

(iii) Decreased by the sum of—

(A) The interest on prepaid fixed rent includable in the gross income of the lessee for preceding rental periods; and

(B) Any amount payable by the lessee on or before the first day of the rental period as fixed rent or interest thereon.

(2) *Section 467 rental agreements that provide for prepaid fixed rent and adequate interest*. If a section 467 rental agreement calls for prepaid fixed rent and provides adequate interest under § 1.467-2(b)(1)(iv), the principal balance of the section 467 loan at the beginning of a rental period equals the principal balance determined under paragraph (b)(1) of this section, plus the fixed rent accrued for that rental period.

(3) *Timing of payments.* For purposes of this paragraph (b), the day on which an amount is payable is determined under the rules of § 1.467-1(j)(2)(i)(B) through (E) and § 1.467-1(j)(2)(ii).

(c) *Yield—(1) In general—(i) Method of determining yield.* Except as provided in paragraphs (c)(2) and (3) of this section, the yield of a section 467 loan is the discount rate at which the sum of the present values of all amounts payable by the lessee as fixed rent and interest on fixed rent, plus the sum of the present values of all amounts payable by the lessor as interest on prepaid fixed rent, equals the sum of the present values of the fixed rent that accrues in accordance with § 1.467-1(d)(2). The yield must be constant over the term of the section 467 rental agreement and, when expressed as a percentage, must be calculated to at least two decimal places.

(ii) *Method of stating yield.* In determining the section 467 interest for a rental period, the yield of the section 467 loan must be stated appropriately by taking into account the length of the rental period. Section 1.1272-1(j), *Example 1*, provides a formula for converting a yield based on a period of one length to an equivalent yield based on a period of a different length.

(iii) *Rounding adjustments.* Any adjustment necessary to eliminate the section 467 loan because of rounding the yield to two or more decimal places must be taken into account as an adjustment to the section 467 interest for the final rental period determined as provided in paragraph (e) of this section.

(2) *Yield of section 467 rental agreements for which constant rental amount or proportional rental amount is computed.* In the case of a section 467 rental agreement to which § 1.467-1(d)(2)(i) or (ii) applies, the yield of the section 467 loan equals 110 percent of the applicable Federal rate (based on a compounding period equal to the length of the rental period).

(3) *Yield for purposes of applying paragraph (a)(4) of this section.* For purposes of applying paragraph (a)(4) of this section, the yield of the section 467 loan balance of any party, or prior party, to a section 467 rental agreement for a period is the same for all parties and is

the yield that results in the net accrual of positive or negative interest for that period equal to the amount of such interest that accrues under the terms of the rental agreement for that period. For example, if property subject to a section 467 rental agreement is sold (transferred) and the beginning section 467 loan balance of the transferor (as described in § 1.467-7(e)(2)(i)) is positive and the beginning section 467 loan balance of the transferee (as described in § 1.467-7(e)(2)(ii)) is negative, the yield on each of these loan balances for any period is the same for all parties and is the yield that results in the net accrual of positive or negative interest, taking into account the aggregate positive or negative interest on the section 467 loan balances of both the transferor and transferee, equal to the amount of such interest that accrues under the terms of the rental agreement for that period.

(4) *Determination of present values.* The rules for determining present value in computing the yield of a section 467 loan are the same as those provided in § 1.467-2(d) for computing the proportional rental amount.

(d) *Contingent payments.* Except as otherwise required, contingent payments are not taken into account in calculating either the yield or the principal balance of a section 467 loan.

(e) *Section 467 rental agreements that call for payments before or after the lease term.* If a section 467 rental agreement calls for the payment of fixed rent or interest thereon before the beginning of the lease term, this section is applied by treating the period beginning on the first day an amount is payable and ending on the day before the beginning of the first rental period of the lease term as one or more rental periods. If a rental agreement calls for the payment of fixed rent or interest thereon after the end of the lease term, this section is applied by treating the period beginning on the day after the end of the last rental period of the lease term and ending on the last day an amount of fixed rent or interest thereon is payable as one or more rental periods. Rental period length for the period before the lease term or after the lease term is determined in accordance with the rules of § 1.467-1(j)(5).

(f) *Examples.* The following examples illustrate the application of this section:

*Example 1.* (i)(A) A leases property to B for a three-year period beginning on January 1, 2000, and ending on December 31, 2002. The section 467 rental agreement has the following rent allocation schedule and payment schedule:

|            | Rent allocation | Payment     |
|------------|-----------------|-------------|
| 2000 ..... | \$400,000       | .....       |
| 2001 ..... | 600,000         | .....       |
| 2002 ..... | 800,000         | \$1,800,000 |

(B) The rental agreement requires a \$1.8 million payment to be made on December 31, 2002, but does not provide for interest on deferred rent. Assume A and B choose the calendar year as the rental period length and that 110 percent of the applicable Federal rate based on annual compounding is 10 percent. Assume also that the agreement is not a leaseback or long-term agreement and, therefore, is not subject to constant rental accrual.

(ii) Because the section 467 rental agreement does not provide adequate interest under §1.467-2(b) and is not subject to constant rental accrual, the fixed rent that accrues during each rental period is the proportional rental amount as described in §1.467-2(c). The proportional rental amounts for each rental period are as follows:

|            |              |
|------------|--------------|
| 2000 ..... | \$370,370.37 |
| 2001 ..... | 555,555.56   |
| 2002 ..... | 740,740.73   |

(iii) A section 467 loan arises at the beginning of the second rental period because the rent payable on or before that day (zero) is less than the fixed rent accrued under §1.467-1(d)(2) in all preceding rental periods (\$370,370.37). Under paragraph (c)(2) of this section, the yield of the loan is equal to 110 percent of the applicable Federal rate (10 percent compounded annually). Because no payments are treated as made on or before the first day of the second rental period, the principal balance of the loan at the beginning of the second rental period is \$370,370.37. The interest for the second rental period on fixed rent is \$37,037.04 (.10 × \$370,370.37) and, under §1.467-1(e)(3), is treated as interest in-

come of the lessor and as an interest expense of the lessee.

(iv) Because no payments are made on or before the first day of the third rental period, the principal balance of the loan at the beginning of the third rental period is equal to the fixed rent accrued during the first and second rental periods plus the lessor's interest income on fixed rent for the second rental period (\$962,962.97 = \$370,370.37 + \$555,555.56 + \$37,037.04). The interest for the third rental period on fixed rent is \$96,296.30 (.10 × \$962,962.97). Thus, the sum of the fixed rent and interest on fixed rent for the three rental periods is equal to the total amount paid over the lease term (first year fixed rent accrual, \$370,370.37, plus second year fixed rent and interest accrual, \$555,555.56 + \$37,037.04, plus third year fixed rent and interest accrual, \$740,740.73 + \$96,296.30, equals \$1,800,000). B takes the amounts of interest and rent into account as interest and rent expense, respectively, and A takes such amounts into account as interest and rent income, respectively, for the calendar years identified above, regardless of their respective overall methods of accounting.

*Example 2.* (i) The facts are the same as in *Example 1*, §1.467-2(f). C agrees to lease property from D for five years beginning on January 1, 2000, and ending on December 31, 2004. The section 467 rental agreement provides that rent of \$100,000 accrues in each calendar year in the lease term and that rent of \$500,000 plus \$120,000 of interest is payable on December 31, 2004. The parties select the calendar year as the rental period, and 110 percent of the applicable Federal rate is 10 percent, compounded annually. The rental agreement has deferred rent but provides adequate interest on fixed rent.

(ii)(A) Pursuant to paragraph (c)(1) of this section, the yield of the section 467 loan is 10.775078%, compounded annually. The following is a schedule of the rent allocable to each rental period during the lease term, the balance of the section 467 loan as of the end of each rental period (determined, in the case of the calendar year 2004, without regard to the single payment of rent and interest in the amount of \$620,000 payable on the last day of the lease term), and the interest on the section 467 loan allocable to each rental period:

| Calendar year | Section 467 interest | Section 467 rent | Section 467 loan balance |
|---------------|----------------------|------------------|--------------------------|
| 2000 .....    | \$0                  | \$100,000.00     | \$100,000.00             |
| 2001 .....    | 10,775.08            | 100,000.00       | 210,775.08               |
| 2002 .....    | 22,711.18            | 100,000.00       | 333,486.26               |
| 2003 .....    | 35,933.41            | 100,000.00       | 469,419.67               |
| 2004 .....    | 50,580.33            | 100,000.00       | 620,000.00               |

(B) C takes the amounts of interest and rent into account as expense and D takes such amounts into account as income for the calendar years identified above, regardless of their respective overall methods of accounting.

[T.D. 8820, 64 FR 26863, May 18, 1999]

**§ 1.467-5 Section 467 rental agreements with variable interest.**

(a) *Variable interest on deferred or prepaid rent*—(1) *In general.* This section provides rules for computing section 467 rent and interest in the case of section 467 rental agreements providing variable interest. For purposes of this section, a rental agreement provides for variable interest if the rental agreement provides for stated interest that is paid or compounded at least annually at a rate or rates that meet the requirements of § 1.1275-5(a)(3)(i)(A) or (B) and (a)(4). If a section 467 rental agreement provides for interest that is neither variable interest nor fixed interest, the agreement provides for contingent payments.

(2) *Exceptions.* This section is not applicable to section 467 rental agreements that provide adequate interest under § 1.467-2(b)(1)(i) (agreements with no deferred or prepaid rent) or (b)(1)(ii) (rental agreements with stated interest at a single fixed rate). The exceptions in this paragraph (a)(2) do not apply to rental agreements subject to constant rental accrual under § 1.467-3.

(b) *Variable rate treated as fixed*—(1) *In general.* If a section 467 rental agreement provides variable interest—

(i) The fixed rate substitutes (determined in the same manner as under § 1.1275-5(e), treating the agreement date as the issue date) for the variable rates of interest on deferred or prepaid fixed rent provided by the rental agreement must be used in computing the proportional rental amount under § 1.467-2(c), the constant rental amount under § 1.467-3(d), the principal balance of a section 467 loan under § 1.467-4(b), and the yield of a section 467 loan under § 1.467-4(c); and

(ii) The interest on fixed rent for any rental period is equal to the amount that would be determined under § 1.467-1(e)(2) if the section 467 rental agreement did not provide variable interest, using the fixed rate substitutes determined under paragraph (b)(1)(i) of this

section in place of the variable rates called for by the rental agreement, plus the variable interest adjustment amount provided in paragraph (b)(2) of this section.

(2) *Variable interest adjustment amount*—(i) *In general.* The variable interest adjustment amount for a rental period equals the difference between—

(A) The amount of interest that, without regard to section 467, would have accrued during the rental period under the terms of the section 467 rental agreement; and

(B) The amount of interest that, without regard to section 467, would have accrued during the rental period under the terms of the section 467 rental agreement using the fixed rate substitutes determined under paragraph (b)(1)(i) of this section in place of the variable interest rates called for by the rental agreement.

(ii) *Positive or negative adjustment.* If the amount determined under paragraph (b)(2)(i)(A) of this section is greater than the amount determined under paragraph (b)(2)(i)(B) of this section, the variable interest adjustment amount is positive. If the amount determined under paragraph (b)(2)(i)(A) of this section is less than the amount determined under paragraph (b)(2)(i)(B) of this section, the variable interest adjustment amount is negative.

(3) *Section 467 loan balance.* The variable interest adjustment amount is not taken into account in determining the principal balance of a section 467 loan under § 1.467-4(b). Instead, the section 467 loan balance is computed as if all amounts payable under the section 467 rental agreement were based on the fixed rate substitutes determined under paragraph (b)(1)(i) of this section.

(c) *Examples.* The following examples illustrate the application of this section:

*Example 1.* (i) X and Y enter into a section 467 rental agreement for the lease of personal property beginning on January 1, 2000, and ending on December 31, 2002. The rental agreement allocates \$100,000 of rent to 2000, \$200,000 to 2001, and \$100,000 to 2002, and requires the lessee to pay all \$400,000 of rent on December 31, 2002. The rental agreement requires the accrual of interest on unpaid accrued rent at two different qualified floating rates (as defined in § 1.1275-5(b)), one for 2001 and the other for 2002, such interest to be

paid on December 31 of the year it accrues. The rental agreement provides that the qualified floating rate is set at a current value within the meaning of §1.1275-5(a)(4). Assume that on the agreement date, 110 percent of the applicable Federal rate is 10 percent, compounded annually. Assume also that the agreement is not a leaseback or long-term agreement and, therefore, is not subject to constant rental accrual.

(ii) To determine if the section 467 rental agreement provides for adequate interest under §1.467-2(b), §1.467-2(b)(2) requires the use of fixed rate substitutes (in this example determined in the same manner as under §1.1275-5(e)(3)(i) treating the agreement date as the issue date) in place of the variable rates called for by the rental agreement. Assume that on the agreement date the qualified floating rates, and therefore the fixed rate substitutes, relating to 2001 and 2002 are 10 and 15 percent compounded annually. Taking into account the fixed rate substitutes, the sum of the present values of all amounts payable by the lessee as fixed rent and interest thereon is greater than the sum of the

present values of the fixed rent allocated to each rental period. Accordingly, the rental agreement provides adequate interest under §1.467-2(b)(1)(iii) and the fixed rent accruing in each calendar year during the rental agreement is the fixed rent allocated under the rental agreement.

(iii) Because the section 467 rental agreement provides for variable interest on unpaid accrued fixed rent at qualified floating rates and the qualified floating rates are set at a current value, the requirements of §1.1275-5(a)(3)(i)(A) and (4) are met and the rental agreement provides for variable interest within the meaning of paragraph (a)(1) of this section. Therefore, under paragraph (b)(1)(i) of this section, the yield of the section 467 loan is computed based on the fixed rate substitutes. Under §1.467-4(c), the constant yield (rounded to two decimal places) equals 13.63 percent compounded annually. Based on the fixed rate substitutes, the fixed rent, interest on fixed rent, and the principal balance of the section 467 loan, for each calendar year during the lease term, are as follows:

|            | Accrued rent | Accrued interest | Projected payment | Cumulative loan |
|------------|--------------|------------------|-------------------|-----------------|
| 2000 ..... | \$100,000    | \$0              | \$0               | \$100,000       |
| 2001 ..... | 200,000      | 13,630           | (10,000)          | 303,630         |
| 2002 ..... | 100,000      | 41,370           | (445,000)         | 0               |

(iv) To compute the actual reported interest on fixed rent for each calendar year, the variable interest adjustment amount, as described in paragraph (b)(2) of this section, must be added to the accrued interest determined in paragraph (iii) of this *Example 1*. Assume that the variable rates for 2001 and 2002 are actually 11 and 14 percent, respectively. Without regard to section 467, the interest that would have accrued during each calendar year under the terms of the section 467 rental agreement, and the interest that would have accrued under the terms of the rental agreement using the fixed rate substitutes determined under paragraph (b)(1)(i) of this section are as follows:

|            | Accrued interest under rental agreement | Accrued interest using fixed rate substitutes |
|------------|---|---|
| 2000 ..... | \$0                                     | \$0   |
| 2001 ..... | 11,000                                  | 10,000  |
| 2002 ..... | 42,000                                  | 45,000  |

(v) Under paragraph (b)(2) of this section, the variable interest adjustment amount is \$1,000 (\$11,000 - \$10,000) for 2001 and is -\$3,000 (\$42,000 - \$45,000) for 2002. Thus, under paragraph (b)(1)(ii) of this section, the actual interest on fixed rent for 2001 is \$14,630 (\$13,630 + \$1,000) and for 2002 is \$38,370 (\$41,370 - \$3,000).

*Example 2.* (i) The facts are the same as in *Example 1* except that 110 percent of the applicable Federal rate is 15 percent compounded annually and the section 467 rental agreement does not provide adequate interest under §1.467-2(b). Consequently, the fixed rent for each calendar year during the lease is the proportional rental amount.

(ii) The sum of the present values of the fixed rent provided for each calendar year during the lease term, discounted at 15 percent compounded annually, equals \$303,936.87.

(iii)(A) Paragraph (b)(1)(i) of this section requires the proportional rental amount to be computed based on the assumption that interest will accrue and be paid based on the fixed rate substitutes. Thus, the sum of the present values of the projected payments under the section 467 rental agreement equals \$300,156.16, computed as follows:

$$\begin{aligned}
 \$ 10,000 / (1.15)^2 &= \$ 7,561.44 \\
 445,000 / (1.15)^3 &= 292,594.72 \\
 &\underline{\underline{\$300,156.16}}
 \end{aligned}$$

(B) The fraction for computing the proportional rental amount equals .9875609 (\$300,156.16/\$303,936.87).

§ 1.467-6

(iv) Based on the fixed rate substitutes, the fixed rent, interest on fixed rent, and the balance of the section 467 loan for each cal-

endar year during the lease term are as follows:

|            | Proportional rent | Accrued interest | Projected payment | Cumulative loan |
|------------|-------------------|------------------|-------------------|-----------------|
| 2000 ..... | \$98,756.09       | \$0.00           | \$0               | \$98,756.09     |
| 2001 ..... | 197,512.18        | 14,813.41        | (10,000)          | 301,081.68      |
| 2002 ..... | 98,756.09         | 45,162.23        | (445,000)         | 0.00            |

(v) The variable interest adjustment amount in this example is the same as in *Example 1*. Under paragraph (b)(1)(ii) of this section, the actual interest on fixed rent for 2001 is \$15,813.41 (\$14,813.41 + \$1,000) and for 2002 is \$42,162.23 (\$45,162.23 - \$3,000).

[T.D. 8820, 64 FR 26865, May 18, 1999]

**§ 1.467-6 Section 467 rental agreements with contingent payments. [Reserved]**

**§ 1.467-7 Section 467 recapture and other rules relating to dispositions and modifications.**

(a) *Section 467 recapture.* Notwithstanding any other provision of the Internal Revenue Code, except as provided in paragraph (c) of this section, a lessor disposing of property in a transaction to which this paragraph (a) applies must recognize the recapture amount (determined under paragraph (b) of this section) and treat that amount as ordinary income. This paragraph (a) applies to any disposition of property subject to a section 467 rental agreement that—

(1) Is a leaseback (as defined in § 1.467-3(b)(2)) or a long-term agreement (as defined in § 1.467-3(b)(3));

(2) Is not disqualified under § 1.467-3(b)(1); and

(3) Allocates to any rental period fixed rent that, when annualized, exceeds the annualized fixed rent allocated to any preceding rental period.

(b) *Recapture amount—(1) In general.* The recapture amount for a disposition is the lesser of—

(i) The prior understated inclusion (determined under paragraph (b)(2) of this section); or

(ii) The section 467 gain (determined under paragraph (b)(3) of this section).

(2) *Prior understated inclusion.* The prior understated inclusion is the excess (if any) of—

(i) The aggregate amount of section 467 rent and section 467 interest for the

period during which the lessor held the property, determined as if the section 467 rental agreement were a disqualified leaseback or long-term agreement subject to constant rental accrual under § 1.467-3; over

(ii) The aggregate amount of section 467 rent and section 467 interest accrued by the lessor during that period.

(3) *Section 467 gain—(i) In general.* Except as otherwise provided in paragraph (b)(3)(ii) of this section, the section 467 gain is the excess (if any) of—

(A) The amount realized from the disposition; over

(B) The sum of the adjusted basis of the property and the amount of any gain from the disposition that is treated as ordinary income under any provision of subtitle A of the Internal Revenue Code other than section 467(c) (for example, section 1245 or 1250).

(ii) *Certain dispositions.* In the case of a disposition that is not a sale or exchange, the section 467 gain is the excess (if any) of the fair market value of the property on the date of disposition over the amount determined under paragraph (b)(3)(i)(B) of this section.

(c) *Special rules—(1) Gifts.* Paragraph (a) of this section does not apply to a disposition by gift. However, see paragraph (c)(4) of this section for dispositions by transferees. If a disposition is in part a sale or exchange and in part a gift, paragraph (a) of this section applies to the disposition but the prior understated inclusion is determined by taking into account only section 467 rent and section 467 interest properly allocable to the portion of the property not disposed of by gift.

(2) *Dispositions at death.* Paragraph (a) of this section does not apply to a disposition if the basis of the property in the hands of the transferee is determined under section 1014(a) or section 1022. However, see paragraph (c)(4) of this section for dispositions of property

subject to section 1022 by transferees. This paragraph (c)(2) does not apply to property that constitutes a right to receive an item of income in respect of a decedent. See sections 691, 1014(c), and 1022(f).

(3) *Certain tax-free exchanges*—(i) *In general.* The recapture amount in the case of a disposition to which this paragraph (c)(3) applies is limited to the amount of gain recognized to the transferor (determined without regard to paragraph (a) of this section), reduced by the amount of any gain from the disposition that is treated as ordinary income under any provision of subtitle A of the Internal Revenue Code other than section 467(c). However, see paragraph (c)(4) of this section for dispositions by transferees.

(ii) *Dispositions covered*—(A) *In general.* Except as provided in paragraph (c)(3)(ii)(B) of this section, this paragraph (c)(3) applies to a disposition of property if the basis of the property in the hands of the transferee is determined by reference to its basis in the hands of the transferor by reason of the application of section 332, 351, 361, 721, or 731.

(B) *Transfers to certain tax-exempt organizations.* This paragraph (c)(3) does not apply to a disposition to an organization (other than a cooperative described in section 521) which is exempt from tax imposed by chapter 1, subtitle A of the Internal Revenue Code (a tax-exempt entity) except to the extent the property is used in an activity the income from which is subject to tax under section 511(a) (a section 511(a) activity). However, if assets used to any extent in a section 511(a) activity are disposed of by the tax-exempt entity, then, notwithstanding any other provision of law (except section 1031 or section 1033) the recapture amount with respect to such disposition, to the extent attributable under paragraph (c)(4) of this section to the period of the transferor's ownership of the property prior to the first disposition, shall be included in the tax-exempt entity's unrelated business taxable income. To the extent that the tax-exempt entity ceases to use the property in a section 511(a) activity, the entity will be treated for purposes of this paragraph (c)(3) and paragraph (c)(4) of this section as

having disposed of the property to such extent on the date of the cessation.

(4) *Dispositions by transferee.* If the recapture amount with respect to a disposition of property (the first disposition) is limited under paragraph (c)(1) or (c)(3) of this section, or under paragraph (c)(2) of this section because the basis of the property in the hands of the transferee is determined under section 1022, and the transferee subsequently disposes of the property in a transaction to which paragraph (a) of this section applies, the prior understated inclusion determined under paragraph (b)(2) of this section is computed by taking into account the amounts attributable to the period of the transferor's ownership of the property prior to the first disposition. Thus, for example, the section 467 rent and section 467 interest that would have been taken into account by the transferee if the section 467 rental agreement were a disqualified lease-back or long-term agreement subject to constant rental accrual include the amounts that would have been taken into account by the transferor, and the aggregate amount of section 467 rent and section 467 interest accrued by the transferee includes the aggregate amount of section 467 rent and section 467 interest that was taken into account by the transferor. The prior understated inclusion determined under this paragraph (c)(4) must be reduced by any recapture amount taken into account under paragraph (a) of this section by the transferor.

(5) *Like-kind exchanges and involuntary conversions.* If property is disposed of or converted and, before the application of paragraph (a) of this section, gain is not recognized in whole or in part under section 1031 or 1033, then the amount of section 467 gain taken into account by the lessor is limited to the sum of—

(i) The amount of gain recognized on the disposition or conversion of the property (determined without regard to paragraph (a) of this section); and

(ii) The fair market value of property acquired that is not subject to the same section 467 rental agreement and that is not taken into account under paragraph (c)(5)(i) of this section.

§ 1.467-7

(6) *Installment sales.* In the case of an installment sale of property to which paragraph (a) of this section applies—

(i) The recapture amount is recognized and treated as ordinary income in the year of the disposition; and

(ii) Any gain in excess of the recapture amount is reported under the installment method of accounting if and to the extent that method is otherwise available under section 453.

(7) *Dispositions covered by section 170(e), 341(e)(12), or 751(c).* For purposes of sections 170(e), 341(e)(12), and 751(c), amounts treated as ordinary income under paragraph (a) of this section must be treated in the same manner as amounts treated as ordinary income under section 1245 or 1250.

(d) *Examples.* The following examples illustrate the application of paragraphs (a), (b), and (c) of this section. In each of these examples the transferor of property subject to a section 467 rental agreement is entitled to the rent for the day of the disposition. The examples are as follows:

*Example 1.* (i)(A) X and Y enter into a section 467 rental agreement for a 5-year lease of personal property beginning on January 1, 2000, and ending on December 31, 2004. The rental agreement provides that the calendar year will be the rental period and that rents accrue and are paid in the following pattern:

|            | Allocation | Payment |
|------------|------------|---------|
| 2000 ..... | \$0        | \$0     |
| 2001 ..... | 87,500     | 0       |
| 2002 ..... | 87,500     | 175,000 |
| 2003 ..... | 87,500     | 175,000 |
| 2004 ..... | 87,500     | 0       |

(B) Assume that both X and Y are calendar year taxpayers and that 110 percent of the applicable Federal rate is 11 percent, compounded annually. Assume also that the rental agreement is a long-term agreement (as defined in §1.467-3(b)(3)), but it is not a disqualified leaseback or long-term agreement. Further, because the agreement does not provide prepaid or deferred rent, proportional rental accrual is not applicable. (See §1.467-2(b)(1)(i)). Therefore, the rent taken into account under §1.467-1(d)(2) is the fixed rent allocated to the rental periods under §1.467-1(c)(2)(ii).

(ii) On December 31, 2000, X sells the property subject to the section 467 rental agreement to an unrelated person for \$575,000. At the time of the sale, X's adjusted basis in the property is \$175,000. Thus, X's gain on the sale of the property is \$400,000. Assume that \$175,000 of this gain would be treated as ordi-

nary income under provisions of the Internal Revenue Code other than section 467(c). Under paragraph (a) of this section, X is required to take the recapture amount into account as ordinary income. Under paragraph (b) of this section, the recapture amount is the lesser of the prior understated inclusion or the section 467 gain.

(iii)(A) In computing the prior understated inclusion under paragraph (b)(2) of this section, assume that the section 467 rent and section 467 interest (based on constant rental accrual) would be taken into account as follows if the section 467 rental agreement were a disqualified long-term agreement:

|            | Section 467 rent | Section 467 interest |
|------------|------------------|----------------------|
| 2000 ..... | \$65,812.55      | \$0                  |
| 2001 ..... | 65,812.55        | 7,239.38             |
| 2002 ..... | 65,812.55        | 15,275.09            |
| 2003 ..... | 65,812.55        | 4,944.73             |
| 2004 ..... | 65,812.55        | (6,521.95)           |

(B) The total amount of section 467 rent and section 467 interest for 2000, based on constant rental accrual, is \$65,812.55. Since X did not take any section 467 rent or section 467 interest into account in 2000, the prior understated inclusion is also \$65,812.55. X's section 467 gain is \$225,000, which is the excess of the gain realized (\$400,000) over the amount of that gain treated as ordinary income under non-section 467 provisions (\$175,000). Accordingly, the recapture amount (the lesser of the prior understated inclusion or the section 467 gain) treated as ordinary income is \$65,812.55.

*Example 2.* (i) The facts are the same as in *Example 1*, except that the section 467 rental agreement specifies that rents accrue and are paid in the following pattern:

|            | Allocation | Payment |
|------------|------------|---------|
| 2000 ..... | \$60,000   | \$0     |
| 2001 ..... | 65,000     | 0       |
| 2002 ..... | 70,000     | 175,000 |
| 2003 ..... | 75,000     | 175,000 |
| 2004 ..... | 80,000     | 0       |

(ii)(A) Assume the section 467 rental agreement does not provide for adequate interest under §1.467-2(b), and, therefore, the fixed rent for a rental period is the proportional rental amount. See §1.467-1(d)(2)(ii). Under §1.467-2(c), the following amounts would be required to be taken into account:

|            | Section 467 rent | Section 467 interest |
|------------|------------------|----------------------|
| 2000 ..... | \$57,260.43      | \$0                  |
| 2001 ..... | 62,032.13        | 6,298.65             |
| 2002 ..... | 66,803.83        | 13,815.03            |
| 2003 ..... | 71,575.53        | 3,433.11             |
| 2004 ..... | 76,347.23        | (7,565.94)           |

(B) The amount of section 467 rent and section 467 interest taken into account by X for 2000 is \$57,260.43. Thus, the prior understated inclusion is \$8,552.12 (the excess of the amount of section 467 rent and section 467 interest based on constant rental accrual for 2000, \$65,812.55, over the amount of section 467 rent and section 467 interest actually taken into account, \$57,260.43). Since the prior understated inclusion is less than the section 467 gain (\$225,000, as determined in *Example 1*(iii)(B)), the recapture amount treated as ordinary income is also \$8,552.12.

*Example 3.* (i) The facts are the same as in *Example 1*, except that, instead of selling the property, X transfers the property to S on December 31, 2002, in exchange for stock of S in a transaction that meets the requirements of section 351(a). Under paragraph (c)(3) of this section, because of the application of section 351, X is not required to take into account any section 467 recapture.

(ii) On December 31, 2003, S sells the property subject to the section 467 rental agreement to an unrelated person for \$450,000. At the time of the sale, S's adjusted basis in the property is \$105,000. Thus, S's gain on the sale of the property is \$345,000. Assume that \$245,000 of this gain would be treated as ordinary income under provisions of the Internal Revenue Code other than section 467(c). Under paragraph (a) of this section, S is required to take the recapture amount into account as ordinary income which, under paragraph (b) of this section, is the lesser of the prior understated inclusion or the section 467 gain.

(iii) S owned the property in 2003 and, under paragraph (c)(4) of this section, for purposes of determining S's prior understated inclusion, S is treated as if it had owned the property during the years 2000 through 2002. In computing S's prior understated inclusion under paragraph (b)(2) of this section, the section 467 rent and section 467 interest based on constant rental accrual are the same as the amounts set forth in the schedule in *Example 1*(iii)(A). Thus, the constant rental amount for 2000, 2001, 2002, and 2003 is \$290,709.40 ( $(4 \times \$65,812.55) + \$7,239.38 + \$15,275.09 + \$4,944.73$ ). The section 467 rent and section 467 interest actually taken into account prior to the disposition is \$262,500. Thus, S's prior understated inclusion is \$28,209.40 ( $\$290,709.40$  minus  $\$262,500$  ( $3 \times \$87,500$ )). S's section 467 gain is \$100,000, the difference between the gain realized on the disposition (\$345,000) and the amount of gain that is treated as ordinary income under non-section 467 Code provisions (\$245,000). Accordingly, S's recapture amount, the lesser of the prior understated inclusion or the section 467 gain, is \$28,209.40.

(e) *Other rules relating to dispositions—*

(1) *In general.* If there is a sale, exchange, or other disposition of prop-

erty subject to a section 467 rental agreement (the transfer), the section 467 rent and, if applicable, section 467 interest for a period are taken into account by the owner of the property during the period. The following rules apply in determining the section 467 rent and section 467 interest for the portion of the rental period ending immediately prior to the transfer:

(i) The section 467 rent and section 467 interest for the portion of the rental period ending immediately prior to the transfer are a pro rata portion of the section 467 rent and the section 467 interest, respectively, for the rental period. Such amounts are also taken into account in determining the transferor's section 467 loan balance, prior to any adjustment thereof that may be required under paragraph (h) of this section, immediately before the transfer.

(ii) If the transferor of the property is entitled to the rent for the day of transfer, the transfer is treated as occurring at the end of the day of the transfer.

(iii) If the transferee of the property is entitled to the rent for the day of transfer, the transfer is treated as occurring at the beginning of the day of the transfer.

(2) *Treatment of section 467 loan.* If there is a transfer described in paragraph (e)(1) of this section, the following rules apply in determining the transferor's and the transferee's section 467 loans for the period after the transfer, the amount realized by the transferor, and the transferee's basis in the property:

(i) The beginning balance of the transferor's section 467 loan is equal to the net present value at the time of the transfer (but after giving effect to the transfer) of all subsequent amounts payable as fixed rent and interest on fixed rent to the transferor and all subsequent amounts payable as interest on prepaid fixed rent by the transferor. The transferor must continue to take into account interest on the transferor's section 467 loan balance after the date of the transfer.

(ii) The beginning balance of the transferee's section 467 loan is equal to the principal balance of the transferor's section 467 loan immediately before the transfer reduced (below zero, if

appropriate) by the beginning balance of the transferor's section 467 loan. Amounts payable to the transferor are not taken into account in adjusting the transferee's section 467 loan balance.

(iii) If the beginning balance of the transferee's section 467 loan is negative, the transferor and transferee must treat the balance as a liability that is either assumed in connection with the transfer of the property or secured by the property acquired subject to the liability. If the beginning balance of the transferee's section 467 loan is positive, the transferor and transferee must treat the balance as an additional asset acquired in connection with the transfer of the property. In the case of a positive beginning balance of the transferee's section 467 loan, the transferee will have an initial cost basis in the section 467 loan equal to the lesser of the beginning balance of the loan or the aggregate consideration for the transfer of the property subject to the section 467 rental agreement and the transfer of the transferor's interest in the section 467 loan.

(3) [Reserved]

(4) *Examples.* The following examples illustrate the application of this paragraph (e). In each of these examples the transferor of property subject to a section 467 rental agreement is entitled to the rent for the day of the transfer. The examples are as follows:

*Example 1.* (i) Q and R enter into a section 467 rental agreement for a 5-year lease of personal property beginning on January 1, 2000, and ending on December 31, 2004. The rental agreement provides that \$0 of rent is allocated to 2000, 2001, and 2002, and \$1,750,000 is allocated to each of the years 2003 and 2004. The rental agreement provides that the calendar year will be the rental period and that the rent allocated to each calendar year is payable on the last day of that calendar year. Assume that both Q and R are calendar year taxpayers and that 110 percent of the applicable Federal rate is 11 percent, compounded annually. Assume further that the rental agreement is a disqualified long-term agreement (as defined in § 1.467-3(b)(3)) and that the section 467 rent, the section 467 interest, and the section 467 loan balance would be the following amounts:

| Calendar year | Payment      | Section 467 interest | Section 467 rent | Section 467 loan balance |
|---------------|--------------|----------------------|------------------|--------------------------|
| 2000 .....    | \$0          | \$0                  | \$592,905.87     | \$592,905.87             |
| 2001 .....    | 0            | 65,219.65            | 592,905.87       | 1,251,031.39             |
| 2002 .....    | 0            | 137,613.45           | 592,905.87       | 1,981,550.71             |
| 2003 .....    | 1,750,000.00 | 217,970.58           | 592,905.87       | 1,042,427.16             |
| 2004 .....    | 1,750,000.00 | 114,666.97           | 592,905.87       | 0                        |

(ii) On December 31, 2002, Q sells the property subject to the section 467 rental agreement to P, an unrelated person, for \$3,000,000. Q does not retain the right to receive any amounts payable by R under the rental agreement after the date of sale, but the agreement is not otherwise modified. At the time of the sale, Q's adjusted basis in the property is \$975,000. Assume that, under § 1.467-1(f)(7), the disposition is not a substantial modification. Further, the Commissioner does not determine that the treatment of the agreement as a disqualified long-term agreement should be changed and, under § 1.467-1(f)(4)(iii), the agreement remains subject to constant rental accrual. Thus, under paragraph (g)(2)(iii) of this section, section 467 rent and section 467 interest for periods after the disposition will be taken into account on the basis of constant rental accrual applied to the terms of the entire agreement (as modified).

(iii) Under paragraph (e)(2)(ii) of this section, the beginning balance of P's section 467 loan is \$1,981,550.71. P's section 467 loan bal-

ance is computed by reducing the balance of the section 467 loan immediately before the transfer (\$1,981,550.71) by the beginning balance of the transferor's section 467 loan (\$0 because Q does not retain the right to receive any amounts payable under the rental agreement subsequent to the transfer).

(iv) Q will be treated as if it had received \$1,981,550.71 from the disposition of the section 467 loan and \$1,018,449.29 from the sale of the property subject to the rental agreement. Thus, Q's gain on the sale of the property is \$43,449.29 (\$1,018,449.29 amount realized less \$975,000 adjusted basis). Q's gain is not subject to the recapture provisions of section 467(c) and paragraph (a) of this section because the rental agreement was disqualified under § 1.467-3(b)(1) and, thus, the requirement of paragraph (a)(2) of this section is not met. Q recognizes no gain on the disposition of the section 467 loan because Q's basis in the loan equals the amount considered received for the loan. Further, Q does not take into account any of the section 467

rent or section 467 interest attributable to periods after the transfer of the property.

(v) P is treated as if it had acquired the property and the positive balance in the transferee's section 467 loan. P's cost basis in the property is \$1,018,449.29, and its cost basis in the section 467 loan immediately following the transfer is \$1,981,550.71. P takes section 467 rent and section 467 interest into account for the calendar years 2002 and 2003 under the constant rental accrual method and, accordingly, treats payments received under the rental agreement as recoveries of the principal balance of the section 467 loan (as adjusted from time to time).

*Example 2.* (i) The facts are the same as *Example 1*, except that on December 31, 2002, Q transfers the property to P in exchange for stock of P having a fair market value of \$3,000,000 and the transaction meets the requirements of section 351(a).

(ii) Q is treated as having transferred two assets to P, the property subject to the rental agreement and the positive balance of the section 467 loan. Under section 351(a), because only stock of P is received by Q, Q does not recognize any of the gain realized on the transaction. Pursuant to section 358(a), the basis of Q in the P stock received in the exchange is the same as the aggregate basis of the property exchanged, or \$2,956,550.71 (the sum of the balance of the section 467 loan, \$1,981,550.71, and the adjusted basis of the property, \$975,000). Q does not take into account any of the section 467 rent or section 467 interest attributable to periods after the transfer of the property.

(iii) P is treated as if it had acquired the property and the positive balance in the transferee's section 467 loan in the transaction. Pursuant to section 362(a), P's basis in each asset is the same as the basis of Q immediately preceding the transfer. Thus, the basis of P in the property subject to the rental agreement is \$975,000, and the basis of P in the section 467 loan immediately following the transfer is \$1,981,550.71. P takes section 467 rent and section 467 interest into account for the calendar years 2003 and 2004 under the constant rental accrual method and, accordingly, treats payments received under the rental agreement as recoveries of the principal balance of the section 467 loan (as adjusted from time to time).

(f) *Treatment of assignments by lessee and lessee-financed renewals—(1) Substitute lessee use.* If a lessee assigns its interest in a section 467 rental agreement to a substitute lessee, or if a period when a substitute lessee has the use of property subject to a section 467 rental agreement is otherwise included in the lease term under § 1.467-1(h)(6), the section 467 rent for a period is taken into account by the person hav-

ing the use of the property during the period. The following rules apply in determining the section 467 rent and section 467 interest for the portion of the rental period ending immediately prior to the assignment:

(i) The section 467 rent and section 467 interest for the portion of the rental period ending immediately prior to the assignment are a pro rata portion of the section 467 rent and the section 467 interest, respectively, for the rental period. Such amounts are also taken into account in determining the lessee's section 467 loan balance, prior to any adjustment thereof that may be required under paragraph (h) of this section, immediately before the substitute lessee first has use of the property.

(ii) If the lessee is liable for the rent for the day that the substitute lessee first has use of the property, the substitute lessee's use shall be treated as beginning at the end of that day.

(iii) If the substitute lessee is liable for the rent for the day that the substitute lessee first has use of the property, the substitute lessee's use shall be treated as beginning at the beginning of that day.

(2) *Treatment of section 467 loan.* If, as described in paragraph (f)(1) of this section, a lessee assigns its interest in a section 467 rental agreement to a substitute lessee or a period when a substitute lessee has the use of property subject to a section 467 rental agreement is otherwise included in the lease term under § 1.467-1(h)(6), the following rules apply in determining the amount of the lessee's and the substitute lessee's section 467 loans for the period when the substitute lessee has use of the property and in computing the taxable income of the lessee and substitute lessee:

(i) The beginning balance of the lessee's section 467 loan is equal to the net present value, as of the time the substitute lessee first has use of the property (but after giving effect to the transfer of the right to use the property), of all amounts subsequently payable by the lessee as fixed rent and interest on fixed rent and all amounts subsequently payable as interest on prepaid fixed rent to the lessee. For purposes of this paragraph (f), any

amount otherwise payable by the lessee is not treated as an amount subsequently payable by the lessee to the extent that such payment, if made by the lessee, would give rise to a right of contribution or other similar claim against the substitute lessee or any other person. The lessee must continue to take into account interest on the lessee's section 467 loan balance after the substitute lessee first has use of the property.

(ii) The beginning balance of the substitute lessee's section 467 loan is equal to the principal balance of the lessee's section 467 loan immediately before the substitute lessee first has use of the property reduced (below zero, if appropriate) by the beginning balance of the lessee's section 467 loan. Amounts payable by the lessee to any person other than the substitute lessee (or a related person) or payable to the lessee by any person other than the substitute lessee (or a related person) are not taken into account in adjusting the substitute lessee's section 467 loan balance.

(iii) If the beginning balance of the substitute lessee's section 467 loan is positive, the beginning balance is treated as—

(A) Gross receipts of the lessee for the taxable year in which the substitute lessee first has use of the property; and

(B) A liability that is either assumed in connection with the transfer of the leasehold interest to the substitute lessee or secured by property acquired subject to the liability.

(iv) If the beginning balance of the substitute lessee's section 467 loan is negative, the following rules apply:

(A) If the principal balance of the lessee's section 467 loan immediately before the substitute lessee first has use of the property was negative, any consideration paid by the substitute lessee to the lessee in conjunction with the transfer of the use of the property shall be treated as a nontaxable return of capital to the lessee to the extent that—

(1) The consideration does not exceed the amount owed to the lessee under the lessee's section 467 loan balance immediately before the substitute lessee first has use of the property; and

(2) The lessee has basis in the principal balance of the lessee's section 467 loan immediately before the substitute lessee first has use of the property.

(B) Except as provided in paragraph (f)(2)(iv)(D) of this section, the excess, if any, of the beginning balance of the amount owed to the substitute lessee under the section 467 loan, over any consideration paid by the substitute lessee to the lessee in conjunction with the transfer of the use of the property, is treated as an amount incurred by the lessee for the taxable year in which the substitute lessee first has use of the property.

(C) To the extent the beginning balance of the amount owed to the substitute lessee under the section 467 loan exceeds any consideration paid by the substitute lessee to the lessee in conjunction with the transfer of the use of the property, repayments of the beginning balance are items of gross income of the substitute lessee in the taxable year in which repayment occurs (determined by applying any repayment first to the beginning balance of the substitute lessee's section 467 loan).

(D) Any amount incurred by the lessee under paragraph (f)(2)(iv)(B) of this section with respect to a transfer of the use of property (the current transfer) shall be reduced (but not below zero) to the extent that the lessee, in its capacity, if any, as a substitute lessee with respect to an earlier transfer of the use of the property would have recognized additional gross income under paragraph (f)(2)(iv)(C) of this section if the current transfer had not occurred.

(v) For purposes of paragraph (f)(2)(iv)(C) of this section, repayments occur as the negative balance is amortized through the net accrual of rent and negative interest.

(3) *Lessor use.* If a period when the lessor has the use of property subject to a section 467 rental agreement is included in the lease term under § 1.467-1(h)(6), the section 467 rent for the period is not taken into account and the lessor is treated as a substitute lessee for purposes of this paragraph (f).

(4) *Examples.* The following examples illustrate the application of this paragraph (f). In each of these examples,

**Internal Revenue Service, Treasury**

**§ 1.467-7**

the substitute lessee is liable for the rent for the day on which the substitute lessee first has use of the property subject to the section 467 rental agreement. Further, assume that in each example the lessee assignment is not a substantial modification under § 1.467-1(f). The examples are as follows:

*Example 1.* (i) The facts are the same as in *Example 1* of paragraph (e)(4) of this section, except that on December 31, 2001, R, the lessee, contracts to assign its entire remaining interest in the leasehold to S, a calendar year taxpayer. The assignment becomes effective at the beginning of January 1, 2002. Pursuant to the terms of the assignment, R agrees with S that R will make \$1,400,000 of the \$1,750,000 rental payment required on December 31, 2003.

(ii) Under paragraph (f)(2)(i) of this section, R's section 467 loan balance as of the beginning of January 1, 2002, the time S first has use of the property, is \$1,136,271.41 (\$1,400,000/(1.11)<sup>2</sup>). Under paragraph (f)(2)(ii) of this section, S's section 467 loan balance as of the beginning of January 1, 2002, is \$114,759.98

(the principal balance of R's section 467 loan immediately before S has use of the property (\$1,251,031.39), less R's section 467 loan balance at the beginning of January 1, 2002 (\$1,136,271.41)).

(iii) Because S's \$114,759.98 section 467 loan balance is positive, under paragraph (f)(2)(iii)(A) of this section, such amount is treated as gross receipts of R for 2002, R's taxable year in which S first has use of the property. R will treat the \$114,759.98 as an amount received in exchange for the transfer of the leasehold interest. Under paragraph (f)(2)(iii)(B) of this section, S will treat that amount as a liability assumed in acquiring the leasehold interest. Thus, S's cost basis in the leasehold interest is \$114,759.98.

(iv) Under paragraph (f)(1) of this section, S takes the section 467 rent attributable to the property into account for the period beginning on January 1, 2002. For 2002, S takes section 467 interest into account based on S's section 467 loan balance at the beginning of 2002. S's amounts payable, section 467 rent, section 467 interest, and end-of-year section 467 loan balances for calendar years 2002 through 2004 are as follows:

| Calendar year   | Payment      | Section 467 interest | Section 467 rent | Section 467 loan balance |
|-----------------|--------------|----------------------|------------------|--------------------------|
| Beginning ..... |              |                      |                  | \$114,759.98             |
| 2002 .....      | \$0          | \$12,623.60          | \$592,905.87     | 720,289.45               |
| 2003 .....      | 350,000.00   | 79,231.83            | 592,905.87       | 1,042,427.15             |
| 2004 .....      | 1,750,000.00 | 114,666.98           | 592,905.87       | 0                        |

(v) Under paragraph (f)(2)(i) of this section, R must continue to take into account section 467 interest on R's section 467 loan balance after S first has use of the property. R's section 467 loan balance beginning when S

first has use of the property is \$1,136,271.41. R's section 467 interest and end-of-year section 467 loan balances for calendar years 2002 through 2003 are as follows:

| Calendar year   | Payment      | Section 467 interest | Section 467 loan balance |
|-----------------|--------------|----------------------|--------------------------|
| Beginning ..... |              |                      | \$1,136,271.41           |
| 2002 .....      | \$0          | \$124,989.85         | 1,261,261.26             |
| 2003 .....      | 1,400,000.00 | 138,738.74           | 0                        |

*Example 2.* (i) On January 1, 2000, B leases tangible personal property from C for a period of five years. The rental agreement provides that the rental period is the calendar year and that rent payments are due at the end of the calendar year. The rental agreement does not provide for interest on prepaid rent. Assume that B and C are both calendar year taxpayers and that 110 percent of the applicable Federal rate is 10 percent, compounded annually. The rental agreement allocates rents and provides for payments of rent as follows:

| Calendar year | Rent      | Payments  |
|---------------|-----------|-----------|
| 2000 .....    | \$200,000 | \$400,000 |
| 2001 .....    | 200,000   | 300,000   |
| 2002 .....    | 200,000   | 200,000   |
| 2003 .....    | 200,000   | 100,000   |
| 2004 .....    | 200,000   | 0         |

(ii) The rental agreement has prepaid rent within the meaning of § 1.467-1(c)(3)(ii) because the cumulative amount of rent payable through the end of 2001 (\$700,000) exceeds the cumulative amount of rent allocated to calendar years 2000 through 2002 (\$600,000). Because the rental agreement does not provide for adequate interest on prepaid fixed rent,

§ 1.467-7

26 CFR Ch. I (4-1-17 Edition)

the rent for each calendar year during the lease term is the proportional rental amount, as described in § 1.467-2(c). The amounts payable, section 467 rent, section

467 interest, and end-of-year section 467 loan balances for each calendar year are as follows:

| Calendar year | Payment   | Section 467 interest | Section 467 rent | Section 467 loan balance |
|---------------|-----------|----------------------|------------------|--------------------------|
| 2000 .....    | \$400,000 | \$0                  | \$218,987.40     | (\$181,012.60)           |
| 2001 .....    | 300,000   | (18,101.26)          | 218,987.40       | (280,126.46)             |
| 2002 .....    | 200,000   | (28,012.64)          | 218,987.40       | (289,151.70)             |
| 2003 .....    | 100,000   | (28,915.17)          | 218,987.40       | (199,079.47)             |
| 2004 .....    | 0         | (19,907.93)          | 218,987.40       | 0                        |

(iii) On December 31, 2001, B contracts to assign its entire remaining interest in the leasehold to D, a calendar year taxpayer. The assignment becomes effective at the beginning of January 1, 2002. D pays B \$278,000 on January 1, 2002, in conjunction with the assignment of the leasehold interest. Under the terms of the assignment, B is not obligated to make any rental payments due after the assignment.

(iv) Under paragraph (f)(2)(i) of this section, B's section 467 loan balance as of the beginning of January 1, 2002, the time D first has use of the property, is zero because D is obligated to make all rent payments due after the assignment of the leasehold interest. Under paragraph (f)(2)(ii) of this section, D's section 467 loan balance as of the beginning of January 1, 2002, is negative \$280,126.46 (the principal balance of B's section 467 loan immediately before D has use of the property (negative \$280,126.46), less B's section 467 loan balance when D first has use of the property (zero)). Because D's beginning section 467 loan balance is negative, paragraph (f)(2)(iv) of this section applies.

(v) Because B's \$280,126.46 section 467 loan balance at the end of 2001 (that is, immediately before D has use of the property) is negative, paragraph (f)(2)(iv)(A) of this section applies. B's loan balance is the amount owed to B under the section 467 loan and consists of the excess of B's payments to C over the net amount of rent and negative interest B has taken into account through the end of 2001. Thus, B's basis in the negative section 467 loan balance at the end of 2001 is \$280,126.46. Because the \$278,000 paid by D to B in conjunction with the transfer of the leasehold interest does not exceed the amount owed to B under the section 467 loan at the end of 2001, and does not exceed B's basis in that loan balance, under paragraph (f)(2)(iv)(A) of this section B treats the \$278,000 payment from D as a nontaxable return of capital.

(vi) The beginning balance of the amount owed to D under the section 467 loan (\$280,126.46) exceeds by \$2,126.46 the \$278,000 paid by D to B in conjunction with the transfer of the leasehold interest. Paragraph (f)(2)(iv)(B) of this section treats the \$2,126.46

as an amount incurred by B in 2002, B's taxable year in which D first has use of the property. Paragraph (f)(2)(iv)(D) of this section does not apply to reduce the amount incurred by B because B is the original lessee under the section 467 rental agreement.

(vii) Under paragraph (f)(1) of this section, D takes the section 467 rent into account for the period beginning when D first has use of the property. D takes section 467 interest into account based on a beginning section 467 loan balance of negative \$280,126.46.

(viii) The beginning balance of the amount owed to D under the section 467 loan (\$280,126.46) exceeds by \$2,126.46 the \$278,000 paid by D to B in conjunction with the transfer of the leasehold interest. Under paragraph (f)(2)(iv)(C) of this section, D must include this amount in gross income in 2002, the year in which this amount of D's beginning section 467 loan balance is paid through the net accrual of rent and negative interest. This inclusion in gross income ensures that the reductions in D's taxable income attributable to the section 467 rental agreement will not exceed the actual amount of D's expenditures.

(g) *Application of section 467 following a rental agreement modification—(1) Substantial modifications.* The following rules apply to any substantial modification of a rental agreement occurring after May 18, 1999 unless the entire agreement (as modified) is treated as a single agreement under § 1.467-1(f)(4)(vi):

(i) *Treatment of pre-modification items.* The lessor and lessee must take pre-modification items (within the meaning of § 1.467-1(f)(5)(v)) into account under their method of accounting used before the modification to report income and expense attributable to the rental agreement.

(ii) *Computations with respect to post-modification items.* In computing section 467 rent, section 467 interest, and the amount of the section 467 loan with respect to post-modification items—

(A) Post-modification items are treated as provided under a rental agreement (the post-modification agreement) separate from the agreement under which pre-modification items are provided;

(B) The lease term of the post-modification agreement begins at the beginning of the first period for which rent other than pre-modification rent is provided; and

(C) The applicable Federal rate for the post-modification agreement is the applicable Federal rate in effect on the day on which the modification occurs.

(iii) *Adjustments—(A) Adjustment relating to certain prepayments.* If any payments before the beginning of the lease term of the post-modification agreement are post-modification items, the lessor and lessee must take into account, in the taxable year in which the modification occurs, any adjustment necessary to prevent duplication with respect to such payments or the omission of interest thereon for periods before the beginning of the lease term.

(B) *Adjustment relating to retroactive beginning of lease term.* If the lease term of a post-modification agreement begins before the date on which the modification occurs, the lessor and lessee must take into account in the taxable year in which the modification occurs any amount necessary to prevent the duplication or omission of rent or interest for the period after the beginning of the lease term of the post-modification agreement and before the beginning of the taxable year in which the modification occurs. For this purpose, the amount necessary to prevent duplication or omission is determined after taking into account any adjustments required by the Commissioner for taxable years ending prior to the beginning of the taxable year in which the modification occurs. In determining any adjustments required by the Commissioner for taxable years ending prior to the beginning of the taxable year in which the modification occurs, the Commissioner will disregard the modification.

(iv) *Coordination with rules relating to dispositions and assignments—(A) Dispositions.* If the modification involves a sale, exchange, or other disposition of

the property subject to the rental agreement—

(1) Adjustments required under this paragraph (g) are taken into account before applying paragraphs (a), (b), (c), and (e) of this section;

(2) The prior understated inclusion for purposes of paragraph (b) of this section is the sum of the prior understated inclusion with respect to pre-modification items and the prior understated inclusion with respect to post-modification items; and

(3) Paragraph (e) of this section applies separately with respect to pre-modification items and post-modification items.

(B) *Assignments.* If the modification involves an assignment of the lessee's interest in the rental agreement to a substitute lessee or a substitute lessee having use of the property during a period otherwise included in the lease term—

(1) Adjustments required under this paragraph (g) are taken into account before applying paragraph (f) of this section; and

(2) Paragraph (f) of this section applies separately with respect to pre-modification items and post-modification items.

(2) *Other modifications.* The following rules apply to a modification (other than a substantial modification) of a rental agreement occurring after May 18, 1999:

(i) *Computation of section 467 loan for modified agreement.* The amount of the section 467 loan relating to the agreement is computed as of the effective date of the modification. The section 467 rent and section 467 interest for periods before the effective date of the modification are determined, solely for purposes of computing the amount of the section 467 loan, under the terms of the entire agreement (as modified).

(ii) *Change in balance of section 467 loan.* (A) If the balance of the section 467 loan determined under paragraph (g)(2)(i) of this section is greater than the balance of the section 467 loan immediately before the effective date of the modification, the difference is taken into account, in the taxable year in which the modification occurs, as additional rent.

(B) If the balance of the section 467 loan determined under paragraph (g)(2)(i) of this section is less than the balance of the section 467 loan immediately before the effective date of the modification, the difference is taken into account, in the taxable year in which the modification occurs, as a reduction of the rent previously taken into account by the lessor and lessee.

(C) For purposes of this paragraph (g)(2)(ii), a negative balance is less than a positive balance, a zero balance, or any other negative balance that is closer to a zero balance.

(iii) *Section 467 rent and interest after the modification.* The section 467 rent and section 467 interest for periods after the effective date of the modification are determined under the terms of the entire agreement (as modified).

(iv) *Applicable Federal rate.* The applicable Federal rate for the agreement does not change as a result of the modification.

(v) *Modification effective within a rental period.* If the effective date of a modification does not coincide with the beginning or end of a rental period under the agreement in effect before the modification, the section 467 rent and section 467 interest for the portion of the rental period ending immediately prior to the effective date of the modification are a pro rata portion of the section 467 rent and the section 467 interest, respectively, for the rental period. Such amounts are also taken into account in determining the section 467 loan balance, prior to any adjustment thereof that may be required under paragraph (h) of this section, immediately before the effective date of the modification. Similar rules apply with respect to the section 467 rent and section 467 interest determined under the terms of the entire agreement (as modified) for purposes of computing the amount of the section 467 loan under paragraph (g)(2)(i) of this section and the section 467 rent and section 467 interest for a partial rental period beginning on the effective date of the modification.

(vi) *Other adjustments.* The lessor and lessee must take into account, in the taxable year in which a retroactive modification occurs, any amount necessary to prevent the duplication or

omission of rent or interest for the period before the beginning of the taxable year in which the modification occurs.

(vii) *Coordination with rules relating to dispositions and assignments.* If the modification involves a sale, exchange, or other disposition of the property subject to the rental agreement, an assignment of the lessee's interest in the rental agreement to a substitute lessee or a substitute lessee having use of the property during a period otherwise included in the lease term, adjustments required under this paragraph (g) are taken into account before applying paragraphs (a), (b), (c), (e), and (f) of this section.

(viii) *Exception for agreements entered into prior to effective date of section 467.* This paragraph (g)(2) does not apply to a modification of a rental agreement that is not subject to section 467 because of the effective date provisions of section 92(c) of the Tax Reform Act of 1984 (Public Law 98-369 (98 Stat. 612)).

(3) *Adjustment by Commissioner.* If the entire agreement (as modified) is treated as a single agreement under § 1.467-1(f)(4)(vi), the Commissioner may require adjustments to taxable income to reflect the effect of the modification, including adjustments that are similar to those required under paragraph (g)(2) of this section.

(4) *Effective date of modification.* The effective date of a modification of a rental agreement occurs at the earliest of—

(i) The date on which the modification occurs;

(ii) The beginning of the first period for which the amount of rent or interest provided under the entire agreement (as modified) differs from the amount of rent or interest provided under the agreement in effect before the modification;

(iii) The due date of the first payment, under either the entire agreement (as modified) or the agreement in effect before the modification, that is not identical, in due date and amount, under both such agreements;

(iv) The date, in the case of a modification involving the substitution of a new lessor, on which the property subject to the rental agreement is transferred; or

(v) The date, in the case of a modification involving the substitution of a new lessee, on which the substitute lessee first has use of the property subject to the rental agreement.

(5) *Examples.* The following examples illustrate the application of this paragraph (g):

*Example 1.* (i) F, a cash method lessor, and G, an accrual method lessee, agree to a 7-year lease of tangible personal property for the period beginning on January 1, 1998, and ending on December 31, 2004. The rental agreement allocates \$100,000 of rent to each calendar year during the lease term, such rent to be paid December 31 following the close of the calendar year to which it is allocated. Because the rental agreement does not provide for increasing rent, or deferred rent within the meaning of section 467(d)(1)(A), section 467 does not apply to the rental agreement.

(ii) Prior to January 1, 2001, G timely makes the \$100,000 rental payments required as of December 31, 1999, and December 31, 2000. On January 1, 2001, F and G modify the rental agreement payment schedule to provide for a single final payment of \$500,000 on December 31, 2004. Assume that the change is a substantial modification within the meaning of §1.467-1(f)(5)(ii). Because the modification occurs after May 18, 1999, the post-modification agreement is treated, under §1.467-1(f)(1), as a new agreement for purposes of determining whether it is a section 467 rental agreement.

(iii) Under §1.467-1(f)(5)(v), the \$200,000 of rent allocated to calendar years 1998 and 1999 (periods prior to the modification) constitutes pre-modification rent, and the \$100,000 rent payments made on December 31, 1999, and December 31, 2000, constitute pre-modification payments. Although calendar year 2000 is also prior to the modification, the rent allocated to calendar year 2000 is not pre-modification rent and the related payment is not a pre-modification payment because the modification changed the time at which that rent is payable. See §1.467-1(f)(5)(v)(A).

(iv) Under paragraph (g)(1)(i) of this section, F and G take pre-modification rent and pre-modification payments into account under the method of accounting they used to report income and deductions attributable to the pre-modification agreement.

(v) Under §1.467-1(f)(1)(i), the post-modification agreement providing rent for the pe-

riod beginning on January 1, 2000, and ending on December 31, 2004, is treated as a new rental agreement. This rental agreement allocates \$100,000 of rent to each of the calendar years 2000 through 2004 and provides for a single rental payment of \$500,000 on December 31, 2004. Because the post-modification agreement provides for deferred rent under §1.467-1(c)(3)(i), section 467 applies. Further, the post-modification agreement does not provide for adequate interest on fixed rent, and therefore F and G must account for fixed rent and interest on fixed rent using proportional rental accrual. Under paragraph (g)(1)(iii) of this section, for their taxable years which include January 1, 2001, F and G must adjust reported rent for the difference between the rent taken into account for the calendar year 2000 under the unmodified agreement and the proportional rental amount for that year under the post-modification agreement.

*Example 2.* (i) On January 1, 2000, X, lessee, and Y, lessor, enter into a rental agreement for a 6-year lease of tangible personal property beginning January 1, 2000, and ending December 31, 2005. The agreement provides that the calendar year is the rental period and all rent payments are due on July 15 of all years in which a payment is required. Assume the agreement is not a disqualified leaseback or long-term agreement within the meaning of §1.467-3(b), and has the following allocation schedule and payment schedule:

| Year       | Allocation | Payment   |
|------------|------------|-----------|
| 2000 ..... | \$800,000  | \$0       |
| 2001 ..... | 900,000    | 0         |
| 2002 ..... | 1,000,000  | 1,500,000 |
| 2003 ..... | 1,000,000  | 1,500,000 |
| 2004 ..... | 1,100,000  | 1,500,000 |
| 2005 ..... | 1,200,000  | 1,500,000 |

(ii) The rental agreement has deferred rent within the meaning of §1.467-1(c)(3)(i) because the rent allocated to 2000 is not payable until 2002 and some of the rent allocable to 2001 is not payable until 2003. Further, the rental agreement does not provide adequate interest on fixed rent within the meaning of §1.467-2(b). Therefore, the rent amount to be accrued by X and Y for each rental period is the proportional rental amount, as described in §1.467-2(c). Assuming 110 percent of the applicable Federal rate is 10 percent compounded annually, the section 467 rent, interest, and loan balances are as follows:

| Year       | Rent         | Interest   | Loan balance |
|------------|--------------|------------|--------------|
| 2000 ..... | \$736,949.55 | \$0        | \$736,949.55 |
| 2001 ..... | 829,068.24   | 73,694.96  | 1,639,712.75 |
| 2002 ..... | 921,186.94   | 163,971.28 | 1,224,870.97 |
| 2003 ..... | 921,186.94   | 122,487.10 | 768,545.01   |
| 2004 ..... | 1,013,305.63 | 76,854.50  | 358,705.14   |

| Year       | Rent         | Interest  | Loan balance |
|------------|--------------|-----------|--------------|
| 2005 ..... | 1,105,424.33 | 35,870.53 | 0            |

(iii)(A) On January 1, 2004, X and Y agree that the \$1,500,000 payment scheduled for July 15, 2005, will be made in three equal installments on June 15, 2005, July 15, 2005, and August 15, 2005. Under § 1.467-1(j)(2)(i)(C) (relating to timing conventions), the payment to be made on June 15, 2005, is treated as if it were payable on December 31, 2004, for purposes of determining present values and yield of the section 467 loan. Assume that this change, which results in the following allocation schedule and payment schedule, is not a substantial modification within the meaning of § 1.467-1(f)(5)(ii):

| Year       | Allocation | Payment   |
|------------|------------|-----------|
| 2000 ..... | \$800,000  | \$0       |
| 2001 ..... | 900,000    | 0         |
| 2002 ..... | 1,000,000  | 1,500,000 |
| 2003 ..... | 1,000,000  | 1,500,000 |
| 2004 ..... | 1,100,000  | 2,000,000 |
| 2005 ..... | 1,200,000  | 1,000,000 |

(B) The agreement remains subject to proportional rental accrual after the modification because it has deferred rent and does not provide adequate interest on fixed rent within the meaning of § 1.467-2(b).

(iv) Because the modification occurs after May 18, 1999, and is not substantial within the meaning of § 1.467-1(f)(5)(ii), paragraph (g)(2) of this section applies. Under paragraph (g)(2)(i) of this section, the amount of the section 467 loan relating to the modified agreement is computed as of the effective date of the modification, and, solely for purposes of recomputing the amount of the section 467 loan, the section 467 rent and section 467 interest for periods before the modification are determined under the terms of the entire agreement (as modified). In addition, the applicable Federal rate does not change as a result of the modification. Thus, the recomputed section 467 rent, interest, and loan balances are as follows:

| Year       | Rent          | Interest    | Loan balance  |
|------------|---------------|-------------|---------------|
| 2000 ..... | \$ 742,242.59 | \$ 0        | \$ 742,242.59 |
| 2001 ..... | 835,022.91    | 74,224.26   | 1,651,489.76  |
| 2002 ..... | 927,803.24    | 165,148.98  | 1,244,441.98  |
| 2003 ..... | 927,803.24    | 124,444.20  | 796,689.42    |
| 2004 ..... | 1,020,583.56  | 79,668.94   | (103,058.08)  |
| 2005 ..... | 1,113,363.88  | (10,305.80) | 0             |

(v) Under paragraph (g)(2)(ii) of this section, the difference between the section 467 loan balance immediately before the effective date of the modification and the recomputed section 467 loan balance as of the effective date of the modification is taken into account. In this example, the loan balance immediately before the effective date of the modification is \$768,545.01 and the recomputed loan balance as of the effective date of the modification is \$796,689.42. Thus, because the recomputed loan balance exceeds the original loan balance, the difference (\$28,144.41) is taken into account, in the taxable year in which the modification occurs, as additional rent. Beginning on January 1, 2004, section 467 rent and interest are taken into account by X and Y in accordance with the recomputed rent schedule set forth in paragraph (iv) of this example.

loss. For example, if a transferee lessor acquires property subject to a section 467 rental agreement at other than the beginning or end of a rental period, and the transferee lessor's beginning section 467 loan balance differs from the transferor lessor's section 467 loan balance immediately prior to the transfer, it will be necessary to treat the rental period that includes the day of transfer as consisting of two rental periods, one beginning at the beginning of the rental period that includes the day of transfer and ending with or immediately prior to the transfer and one beginning with or immediately after the transfer and ending immediately prior to the beginning of the succeeding rental period. Because the substitution of two rental periods for one rental period may change the proportional rental amount or constant rental amount, the change in rental periods should be treated as a modification of

(h) *Omissions or duplications*—(1) *In general.* In applying the rules of this section in conjunction with the rules of §§ 1.467-1 through 1.467-5, adjustments must be made to the extent necessary to prevent the omission or duplication of items of income, deduction, gain, or

**Internal Revenue Service, Treasury**

**§ 1.467-7**

the rental agreement that occurs immediately prior to the transfer. The change in rental periods, by itself, is not treated as a substantial modification of the rental agreement although the substitution of a new lessor may constitute a substantial modification of the rental agreement. Likewise, §1.467-1(j)(2), which provides rules regarding when amounts are treated as payable, is designed to simplify calculations of present values, section 467 loan balances, and proportional and constant rental amounts. These simplifying conventions assume that there will be no change in the lessor or lessee under a section 467 rental agreement and that the terms of the section 467 rental agreement will not be modified. Therefore, as illustrated in the example in paragraph (h)(2) of this section, when actual events do not reflect these assumptions, it may be necessary to alter the application of these rules to properly reflect taxable income.

(2) *Example.* The following example illustrates an application of this paragraph (h):

| Calendar Year | Section 467 rent | Section 467 interest | Payments  | Section 467 loan balance |
|---------------|------------------|----------------------|-----------|--------------------------|
| 2000 .....    | \$220,077.48     | \$0                  | \$450,000 | \$(229,922.52)           |
| 2001 .....    | 220,077.48       | (22,992.25)          | 250,000   | (282,837.29)             |
| 2002 .....    | 220,077.48       | (28,283.73)          | 200,000   | (291,043.54)             |
| 2003 .....    | 220,077.48       | (29,104.35)          | 100,000   | (200,070.41)             |
| 2004 .....    | 220,077.48       | (20,007.07)          | 0         | 0                        |

(iii) On January 1, 2002, J and K amend the terms of the rental agreement to advance the due date of the \$200,000 payment originally due on July 15, 2002, to June 15, 2002. This change in the payment schedule constitutes a modification of the terms of the rental agreement within the meaning of §1.467-1(f)(5)(i). Assume, however, that the change is not a substantial modification within the meaning of §1.467-1(f)(5)(ii). Because the modification occurs after May 18,

| Calendar   | Section 467 rent | Section 467 interest | Payments  | Section 467 loan balance |
|------------|------------------|----------------------|-----------|--------------------------|
| 2000 ..... | \$224,041.38     | \$0                  | \$450,000 | \$(225,958.62)           |
| 2001 ..... | 224,041.38       | (22,595.86)          | 450,000   | (474,513.10)             |
| 2002 ..... | 224,041.38       | (47,451.31)          | 0         | (297,923.03)             |
| 2003 ..... | 224,041.38       | (29,792.30)          | 100,000   | (203,673.95)             |
| 2004 ..... | 224,041.38       | (20,367.43)          | 0         | 0                        |

(iv) Section 1.467-4(b)(3) incorporates the conventions of §1.467-1(j)(2) in determining

*Example.* (i) J leases tangible personal property from K for five years beginning on January 1, 2000, and ending on December 31, 2004. Under the rental agreement, rent is payable on July 15 of the calendar year to which it is allocated. Both J and K treat the calendar year as the rental period. The allocation of rent and payments of rent required under the rental agreement are as follows:

| Calendar year | Rent      | Payments  |
|---------------|-----------|-----------|
| 2000 .....    | \$200,000 | \$450,000 |
| 2001 .....    | 200,000   | 250,000   |
| 2002 .....    | 200,000   | 200,000   |
| 2003 .....    | 200,000   | 100,000   |
| 2004 .....    | 200,000   | 0         |

(ii) The rental agreement does not provide for interest on prepaid rent. The rental agreement has prepaid rent under §1.467-1(c)(3)(ii) because the rent payable at the end of 2000 exceeds the cumulative amount of rent allocated to 2000 and 2001. Therefore, J and K must take section 467 rent into account under the proportional rental method of §1.467-2(c). Assume that 110 percent of the applicable Federal rate is 10 percent, compounded annually. The section 467 rent, section 467 interest, amounts payable, and section 467 loan balances for each of the calendar years under the terms of the rental agreement are as follows:

1999, and is not substantial, paragraph (g)(2) of this section applies. Thus, the section 467 loan balance at the beginning of 2002 must be recomputed as if the June 15, 2002, payment date had been included in the terms of the pre-modification rental agreement. If this had been the case, the section 467 rent, section 467 interest, amounts payable, and section 467 loan balances for each of the calendar years under the terms of the rental agreement would have been as follows:

when amounts are treated as payable for purposes of determining the section 467 loan

balance. Section 1.467-1(j)(2)(i)(C) treats amounts payable during the first half of any rental period except the first rental period as payable on the last day of the preceding rental period. Therefore, because June 15, 2002, occurs in the first half of 2002, in determining the section 467 loan balance at the beginning of 2002 under the amended terms of the rental agreement, the \$200,000 payment due on June 15, 2002, is treated as payable on December 31, 2001.

(v) Under paragraph (g)(2)(ii)(B) of this section, if the recomputed section 467 loan balance is less than the section 467 loan balance immediately before the modification, the difference is taken into account as a reduction of the rent previously taken into account by the lessor and the lessee. In this example, the recomputed section 467 loan balance immediately after the modification is negative \$474,513.10 and the section 467 loan balance immediately before the modification is negative \$282,837.29. However, the section 467 loan balance immediately before the modification does not take into account the \$200,000 payment originally payable on July 15, 2002, whereas, under the conventions of § 1.467-1(j)(2)(i)(C), the recomputed section 467 loan balance immediately after the modification takes into account that \$200,000 payment because it is now payable in the first half of the rental period (June 15). Under these circumstances, if the recomputed section 467 loan balance immediately after the modification is treated as negative \$474,513.10 for purposes of applying paragraph (g)(2)(ii)(B) of this section, K's gross income and J's deductions attributable to the section 467 rental agreement will be understated by \$200,000. Therefore, under paragraph (h)(1) of this section, only for purposes of applying paragraph (g)(2)(ii)(B) of this section, the \$200,000 payment due on June 15, 2002, should not be taken into account in determining the recomputed section 467 loan balance immediately after the modification.

[T.D. 8820, 64 FR 26867, May 18, 1999, as amended by T.D. 9811, 82 FR 6238, Jan. 19, 2017]

**§ 1.467-8 Automatic consent to change to constant rental accrual for certain rental agreements.**

(a) *General rule.* For the first taxable year ending after May 18, 1999, a taxpayer may change to the constant rental accrual method, as described in § 1.467-3, for all of its section 467 rental agreements described in paragraph (b) of this section. A change to the constant rental accrual method is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations thereunder

apply. A taxpayer changing its method of accounting in accordance with this section must follow the automatic change in accounting method provisions of Rev. Proc. 98-60 (see § 601.601(d)(2) of this chapter) except, for purposes of this paragraph (a), the scope limitations in section 4.02 of Rev. Proc. 98-60 are not applicable. Taxpayers changing their method of accounting in accordance with this section must do so for all of their section 467 rental agreements described in paragraph (b) of this section.

(b) *Agreements to which automatic consent applies.* A section 467 rental agreement is described in this paragraph (b) if—

(1) The property subject to the section 467 rental agreement is financed with an “exempt facility bond” within the meaning of section 142;

(2) The facility subject to the section 467 rental agreement is described in section 142(a)(1), (2), (3), or (12);

(3) The section 467 rental agreement does not include a specific allocation of fixed rent within the meaning of § 1.467-1(c)(2)(ii)(A)(2); and

(4) The section 467 rental agreement was entered into on or before May 18, 1999.

[T.D. 8820, 64 FR 26875, May 18, 1999]

**§ 1.467-9 Effective/applicability dates and automatic method changes for certain agreements.**

(a) *In general.* Sections 1.467-1 through 1.467-7 are applicable for—

(1) Disqualified leasebacks and long-term agreements entered into after June 3, 1996; and

(2) Rental agreements not described in paragraph (a)(1) of this section that are entered into after May 18, 1999.

(b) *Automatic consent for certain rental agreements.* Section 1.467-8 applies only to rental agreements described in § 1.467-8.

(c) *Application of regulation project IA-292-84 to certain leasebacks and long-term agreements.* In the case of any leaseback or long-term agreement (other than a disqualified leaseback or long-term agreement) entered into after June 3, 1996, and on or before May 18, 1999, a taxpayer may choose to apply the provisions of regulation project IA-292-84

**Internal Revenue Service, Treasury**

**§ 1.468A-0**

(1996-2 C.B. 462)(see § 601.601(d)(2) of this chapter).

(d) *Entered into.* For purposes of this section and § 1.467-8, a rental agreement is entered into on its agreement date (within the meaning of § 1.467-1(h)(1) and, if applicable, § 1.467-1(f)(1)(i)).

(e) *Change in method of accounting—*  
(1) *In general.* For the first taxable year ending after May 18, 1999, a taxpayer is granted consent of the Commissioner to change its method of accounting for rental agreements described in paragraph (a)(2) of this section to comply with the provisions of §§ 1.467-1 through 1.467-7.

(2) *Application of regulation project IA-292-84.* For the first taxable year ending after May 18, 1999, a taxpayer is granted consent of the Commissioner to change its method of accounting for any rental agreement described in paragraph (c) of this section to comply with the provisions of regulation project IA-292-84 (1996-2 C.B. 462) (see § 601.601(d)(2) of this chapter).

(3) *Automatic change procedures.* A taxpayer changing its method of accounting in accordance with this paragraph (e) must follow the automatic change in accounting method provisions of Rev. Proc. 98-60 (see § 601.601(d)(2) of this chapter) except, for purposes of this paragraph (e), the scope limitations in section 4.02 of Rev. Proc. 98-60 are not applicable. A method change in accordance with paragraph (e)(1) of this section is made on a cut-off basis so no adjustment under section 481(a) is required.

(f) *Application of section 1022.* The provisions of § 1.467-7(c)(2) and (4) relating to section 1022 are effective on and after January 19, 2017.

[T.D. 8820, 64 FR 26875, May 18, 1999, as amended by T.D. 9811, 82 FR 6238, Jan. 19, 2017]

**§ 1.468A-0 Nuclear decommissioning costs; table of contents.**

This section lists the paragraphs contained in §§ 1.468A-1 through 1.468A-9.

*§ 1.468A-1 Nuclear decommissioning costs; general rules.*

- (a) Introduction.
- (b) Definitions.
- (c) Special rules applicable to certain experimental nuclear facilities.

*§ 1.468A-2 Treatment of electing taxpayer.*

- (a) In general.
- (b) Limitation on payments to a nuclear decommissioning fund.
  - (1) In general.
  - (2) Excess contributions not deductible.
- (c) Deemed payment rules.
  - (1) In general.
  - (2) Cash payment by customer.
- (d) Treatment of distributions.
  - (1) In general.
  - (2) Exceptions to inclusion in gross income.
    - (i) Payment of administrative costs and incidental expenses.
    - (ii) Withdrawals of excess contributions.
    - (iii) Actual distributions of amounts included in gross income as deemed distributions.
  - (e) Deduction when economic performance occurs.

*§ 1.468A-3 Ruling amount.*

- (a) In general.
- (b) Level funding limitation.
- (c) Funding period.
- (d) Decommissioning costs allocable to a fund.
  - (1) General rule.
  - (2) Total estimated cost of decommissioning.
  - (3) Taxpayer's share.
- (e) Manner of requesting schedule of ruling amounts.
  - (1) In general.
  - (2) Information required.
  - (3) Administrative procedures.
  - (f) Review and revision of schedule of ruling amounts.
    - (1) Mandatory review.
    - (2) Elective review.
    - (3) Determination of revised schedule of ruling amounts.
  - (g) Special rule permitting payments to a nuclear decommissioning fund before receipt of an initial or revised ruling amount applicable to a taxable year.

*§ 1.468A-4 Treatment of nuclear decommissioning fund.*

- (a) In general.
- (b) Modified gross income.
- (c) Special rules.
  - (1) Period for computation of modified gross income.
  - (2) Gain or loss upon distribution of property by a fund.
  - (3) Denial of credits against tax.
  - (4) Other corporate taxes inapplicable.
- (d) Treatment as corporation for purposes of subtitle F.

*§ 1.468A-5 Nuclear decommissioning fund—miscellaneous provisions.*

- (a) Qualification requirements.
  - (1) In general.
  - (2) Limitation on contributions.

**§ 1.468A-1**

**26 CFR Ch. I (4-1-17 Edition)**

- (3) Limitation on use of fund.
  - (i) In general.
  - (ii) Definition of administrative costs and expenses.
- (4) Trust provisions.
- (b) Prohibitions against self-dealing.
  - (1) In general.
  - (2) Self-dealing defined.
  - (3) Disqualified person defined.
- (c) Disqualification of nuclear decommissioning fund.
  - (1) In general.
  - (2) Exception to disqualification.
- (i) In general.
- (ii) Excess contribution defined.
- (iii) Taxation of income attributable to an excess contribution.
- (3) Effect of disqualification.
- (4) Further effects of disqualification.
- (d) Termination of nuclear decommissioning fund upon substantial completion of decommissioning.
  - (1) In general.
  - (2) Additional rules.
  - (3) Substantial completion of decommissioning defined.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

**§ 1.468A-1 Nuclear decommissioning costs; general rules.**

(a) *Introduction.* Section 468A provides an elective method for taking into account nuclear decommissioning costs for Federal income tax purposes. In general, an eligible taxpayer that elects the application of section 468A pursuant to the rules contained in § 1.468A-7 is allowed a deduction (as determined under § 1.468A-2) for the taxable year in which the taxpayer makes a cash payment to a nuclear decommissioning fund. Taxpayers using an accrual method of accounting that do not elect the application of section 468A are not allowed a deduction for nuclear decommissioning costs prior to the taxable year in which economic performance occurs with respect to such costs (see section 461(h)).

(b) *Definitions.* The following terms are defined for purposes of section 468A and §§ 1.468A-1 through 1.468A-9:

- (1) The term *eligible taxpayer* means any taxpayer that possesses a qualifying interest in a nuclear power plant

(including a nuclear power plant that is under construction).

(2) The term *qualifying interest* means—

(i) A direct ownership interest; and  
 (ii) A leasehold interest in any portion of a nuclear power plant if—

(A) The holder of the leasehold interest is primarily liable under Federal or State law for decommissioning such portion of the nuclear power plant; and

(B) No other person establishes a nuclear decommissioning fund with respect to such portion of the nuclear power plant.

(3) The term *direct ownership interest* includes an interest held as a tenant in common or joint tenant, but does not include stock in a corporation that owns a nuclear power plant or an interest in a partnership that owns a nuclear power plant. Thus, in the case of a partnership that owns a nuclear power plant, the election under section 468A must be made by the partnership and not by the partners. In the case of an unincorporated organization described in §1.761-2(a)(3) that elects under section 761(a) to be excluded from the application of subchapter K, each taxpayer that is a co-owner of the nuclear power plant is eligible to make a separate election under section 468A.

(4) The terms *nuclear decommissioning fund* and *qualified nuclear decommissioning fund* mean a fund that satisfies the requirements of §1.468A-5. The term *nonqualified fund* means a fund that does not satisfy those requirements.

(5) The term *nuclear power plant* means any nuclear power reactor that is used predominantly in the trade or business of the furnishing or sale of electric energy. Each unit (that is, nuclear reactor) located on a multi-unit site is a separate nuclear power plant. The term *nuclear power plant* also includes the portion of the common facilities of a multi-unit site allocable to a unit on that site.

(6) The term *nuclear decommissioning costs* or *decommissioning costs* includes all otherwise deductible expenses to be incurred in connection with the entombment, decontamination, dismantlement, removal and disposal of the structures, systems and components of a nuclear power plant, wheth-

er that nuclear power plant will continue to produce electric energy or has permanently ceased to produce electric energy. Such term includes all otherwise deductible expenses to be incurred in connection with the preparation for decommissioning, such as engineering and other planning expenses, and all otherwise deductible expenses to be incurred with respect to the plant after the actual decommissioning occurs, such as physical security and radiation monitoring expenses. Such term also includes costs incurred in connection with the construction, operation, and ultimate decommissioning of a facility used solely to store, pending acceptance by the government for permanent storage or disposal, spent nuclear fuel generated by the nuclear power plant or plants located on the same site as the storage facility. Such term does not include otherwise deductible expenses to be incurred in connection with the disposal of spent nuclear fuel under the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425). An expense is otherwise deductible for purposes of this paragraph (b)(6) if it would be deductible under chapter 1 of the Internal Revenue Code without regard to section 280B.

(7) The term *public utility commission* means any State or political subdivision thereof, any agency, instrumentality or judicial body of the United States, or any judicial body, commission or other similar body of the District of Columbia or of any State or any political subdivision thereof that establishes or approves rates for the furnishing or sale of electric energy.

(8) The term *ratemaking proceeding* means any proceeding before a public utility commission in which rates for the furnishing or sale of electric energy are established or approved. Such term includes a generic proceeding that applies to two or more taxpayers that are subject to the jurisdiction of a single public utility commission.

(9) The term *special transfer* means any transfer of funds to a qualified nuclear decommissioning fund pursuant to §1.468A-8.

(c) *Special rules applicable to certain experimental nuclear facilities.* (1) The owner of a qualifying interest in an experimental nuclear facility possesses a

## § 1.468A-2

## 26 CFR Ch. I (4-1-17 Edition)

qualifying interest in a nuclear power plant for purposes of paragraph (b) of this section if such person is engaged in the trade or business of the furnishing or sale of electric energy.

(2) An owner of stock in a corporation that owns an experimental nuclear facility possesses a qualifying interest in a nuclear power plant for purposes of paragraph (b)(1) of this section if—

(i) Such stockholder satisfies the conditions of paragraph (c)(1) of this section; and

(ii) The corporation that directly owns the facility is not engaged in the trade or business of the furnishing or sale of electric energy.

(3) For purposes of this paragraph (c), an experimental nuclear facility is a nuclear power reactor that is used predominantly for the purpose of conducting experimentation and research.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

### § 1.468A-2 Treatment of electing taxpayer.

(a) *In general.* An eligible taxpayer that elects the application of section 468A pursuant to the rules contained in § 1.468A-7 (an electing taxpayer) is allowed a deduction for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment as provided in paragraph (c) of this section) to a nuclear decommissioning fund and for any taxable year in which a deduction is allowed for a special transfer described in § 1.468A-8. The amount of the deduction for any taxable year equals the total amount of cash payments made (or deemed made) by the electing taxpayer to a nuclear decommissioning fund (or nuclear decommissioning funds) during such taxable year under this section, plus any amount allowable as a deduction in that taxable year for a special transfer described in § 1.468A-8. The amount of a special transfer permitted under § 1.468A-8 is not treated as a cash payment for purposes of this paragraph (a), and a taxpayer making a special transfer is allowed a ratable deduction in each taxable year during the remaining useful life of the nuclear power plant for the special transfer. A payment may not be made (or deemed made) to a nuclear decommissioning fund before

the first taxable year in which all of the following conditions are satisfied:

(1) The construction of the nuclear power plant to which the nuclear decommissioning fund relates has commenced.

(2) A ruling amount is applicable to the nuclear decommissioning fund (see § 1.468A-3).

(b) *Limitation on payments to a nuclear decommissioning fund—(1) In general.* For purposes of paragraph (a) of this section, the maximum amount of cash payments made (or deemed made) to a nuclear decommissioning fund under paragraph (a) of this section during any taxable year shall not exceed the ruling amount applicable to the nuclear decommissioning fund for such taxable year (as determined under § 1.468A-3).

(2) *Excess contributions not deductible.* If the amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceeds the limitation of paragraph (b)(1) of this section, the excess is not deductible by the electing taxpayer. In addition, see paragraph (c) of § 1.468A-5 for rules which provide that the Internal Revenue Service may disqualify a nuclear decommissioning fund if the amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceeds the limitation of paragraph (b)(1) of this section.

(3) *Special transfer disregarded.* The amount of a special transfer permitted under § 1.468A-8 is not treated as a cash payment for purposes of this paragraph (b).

(c) *Deemed payment rules—(1) In general.* The amount of any cash payment made by an electing taxpayer to a nuclear decommissioning fund on or before the 15th day of the third calendar month after the close of any taxable year (the deemed payment deadline date) shall be deemed made during such taxable year if the electing taxpayer irrevocably designates the amount as relating to such taxable year on its timely filed Federal income tax return for such taxable year (see § 1.468A-7(b)(4)(iii) and (iv) for rules relating to such designation).

(2) *Cash payment by customer.* The amount of any cash payment made by

a customer of an electing taxpayer to a nuclear decommissioning fund of such electing taxpayer shall be deemed made by the electing taxpayer if the amount is included in the gross income of the electing taxpayer in the manner prescribed by section 88 and §1.88-1.

(d) *Treatment of distributions*—(1) *In general.* Except as otherwise provided in paragraph (d)(2) of this section, the amount of any actual or deemed distribution from a nuclear decommissioning fund shall be included in the gross income of the electing taxpayer for the taxable year in which the distribution occurs. The amount of any distribution of property equals the fair market value of the property on the date of the distribution. See §1.468A-5(c) and (d) for rules relating to the deemed distribution of the assets of a nuclear decommissioning fund in the case of a disqualification or termination of the fund. A distribution from a nuclear decommissioning fund shall include an expenditure from the fund or the use of the fund's assets—

(i) To satisfy, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the fund relates; and

(ii) To pay administrative costs and other incidental expenses of the fund.

(2) *Exceptions to inclusion in gross income*—(i) *Payment of administrative costs and incidental expenses.* The amount of any payment by a nuclear decommissioning fund for administrative costs or other incidental expenses of such fund (as defined in §1.468A-5(a)(3)(ii)) shall not be included in the gross income of the electing taxpayer unless such amount is paid to the electing taxpayer (in which case the amount of the payment is included in the gross income of the electing taxpayer under section 61).

(ii) *Withdrawals of excess contributions.* The amount of a withdrawal of an excess contribution (as defined in §1.468A-5(c)(2)(ii)) by an electing taxpayer pursuant to the rules of §1.468A-5(c)(2) shall not be included in the gross income of the electing taxpayer. See paragraph (b)(2) of this section, which provides that the payment of such amount to the nuclear decommissioning

fund is not deductible by the electing taxpayer.

(iii) *Actual distributions of amounts included in gross income as deemed distributions.* If the amount of a deemed distribution is included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurs, no further amount is required to be included in gross income when the amount of the deemed distribution is actually distributed by the nuclear decommissioning fund. The amount of a deemed distribution is actually distributed by a nuclear decommissioning fund as the first actual distributions are made by the nuclear decommissioning fund on or after the date of the deemed distribution.

(e) *Deduction when economic performance occurs.* An electing taxpayer using an accrual method of accounting is allowed a deduction for nuclear decommissioning costs no earlier than the taxable year in which economic performance occurs with respect to such costs (see section 461(h)(2)). The amount of nuclear decommissioning costs that is deductible under this paragraph (e) is determined without regard to section 280B (see §1.468A-1(b)(6)). A deduction is allowed under this paragraph (e) whether or not a deduction was allowed with respect to such costs under section 468A(a) and paragraph (a) of this section for an earlier taxable year.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

#### § 1.468A-3 Ruling amount.

(a) *In general.* (1) Except as otherwise provided in paragraph (g) of this section or in §1.468A-8 (relating to deductions for special transfers into a nuclear decommissioning fund), an electing taxpayer is allowed a deduction under section 468A(a) for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment) to a nuclear decommissioning fund only if the taxpayer has received a schedule of ruling amounts for the nuclear decommissioning fund that includes a ruling amount for such taxable year. Except as provided in paragraph (a)(4) or (5) of this section, a schedule of ruling amounts for a nuclear decommissioning fund (*schedule of ruling amounts*) is a ruling (within

the meaning of §601.201(a)(2) of this chapter) specifying the annual payments (ruling amounts) that, over the taxable years remaining in the funding period as of the date the schedule first applies, will result in a projected balance of the nuclear decommissioning fund as of the last day of the funding period equal to (and in no event greater than) the amount of decommissioning costs allocable to the fund. The projected balance of a nuclear decommissioning fund as of the last day of the funding period shall be calculated by taking into account the fair market value of the assets of the fund as of the first day of the first taxable year to which the schedule of ruling amounts applies and the estimated rate of return to be earned by the assets of the fund after payment of the estimated administrative costs and incidental expenses to be incurred by the fund (as defined in §1.468A-5(a)(3)(ii)), including all Federal, State and local income taxes to be incurred by the fund (the after-tax rate of return). See paragraph (c) of this section for a definition of funding period and paragraph (d) of this section for guidance with respect to the amount of decommissioning costs allocable to a fund.

(2) Each schedule of ruling amounts must be consistent with the principles and provisions of this section and must be based on reasonable assumptions concerning—

(i) The after-tax rate of return to be earned by the assets of the qualified nuclear decommissioning fund;

(ii) The total estimated cost of decommissioning the nuclear power plant (see paragraph (d)(2) of this section); and

(iii) The frequency of contributions to a nuclear decommissioning fund for a taxable year (for example, monthly, quarterly, semi-annual or annual contributions).

(3) The Internal Revenue Service (IRS) shall provide a schedule of ruling amounts that is identical to the schedule of ruling amounts proposed by the taxpayer in connection with the taxpayer's request for a schedule of ruling amounts (see paragraph (e)(2)(viii) of this section), but no schedule of ruling amounts shall be provided unless the taxpayer's proposed schedule of ruling

amounts is consistent with the principles and provisions of this section and is based on reasonable assumptions. If a proposed schedule of ruling amounts is not consistent with the principles and provisions of this section or is not based on reasonable assumptions, the taxpayer may propose an amended schedule of ruling amounts that is consistent with such principles and provisions and is based on reasonable assumptions.

(4) The taxpayer bears the burden of demonstrating that the proposed schedule of ruling amounts is consistent with the principles and provisions of this section and is based on reasonable assumptions. If a public utility commission established or approved the currently applicable rates for the furnishing or sale by the taxpayer of electricity from the plant, the taxpayer can generally satisfy this burden of proof by demonstrating that the schedule of ruling amounts is calculated using the assumptions used by the public utility commission in its most recent order. In addition, a taxpayer that owns an interest in a deregulated nuclear plant may submit assumptions used by a public utility commission that formerly had regulatory jurisdiction over the plant as support for the assumptions used in calculating the taxpayer's proposed schedule of ruling amounts, with the understanding that the assumptions used by the public utility commission may be given less weight if they are out of date or were developed in a proceeding for a different taxpayer. The use of other industry standards, such as the assumptions underlying the taxpayer's most recent financial assurance filing with the NRC, are an alternative means of demonstrating that the taxpayer has calculated its proposed schedule of ruling amounts on a reasonable basis. Consistency with financial accounting statements is not sufficient, in the absence of other supporting evidence, to meet the taxpayer's burden of proof under this paragraph (a)(4).

(5) The IRS will approve, at the request of the taxpayer, a formula or method for determining a schedule of ruling amounts (rather than providing a schedule specifying a dollar amount

for each taxable year) if the formula or method is consistent with the principles and provisions of this section and is based on reasonable assumptions. See paragraph (f)(1)(ii) of this section for a special rule relating to the mandatory review of ruling amounts that are determined pursuant to a formula or method.

(6) The IRS may, in its discretion, provide a schedule of ruling amounts that is determined on a basis other than the rules of paragraphs (a) through (d) of this section if—

(i) In connection with its request for a schedule of ruling amounts, the taxpayer explains the need for special treatment and sets forth an alternative basis for determining the schedule of ruling amounts; and

(ii) The IRS determines that special treatment is consistent with the purpose of section 468A.

(b) *Level funding limitation.* (1) Except as otherwise provided in paragraph (b)(3) of this section, the ruling amount specified in a schedule of ruling amounts for any taxable year in the funding period (as defined in paragraph (c) of this section) shall not be less than the ruling amount specified in such schedule for any earlier taxable year.

(2) The ruling amount specified in a schedule of ruling amounts for a taxable year after the end of the funding period may be less than the ruling amount specified in such schedule for an earlier taxable year.

(3) The ruling amount specified in a schedule of ruling amounts for the last taxable year in the funding period may be less than the ruling amount specified in such schedule for an earlier taxable year if, when annualized, the amount specified for the last taxable year is not less than the amount specified for such earlier taxable year. The amount specified for the last taxable year is annualized by—

(i) Determining the number of days between the beginning of the taxable year and the end of the plant's estimated useful life;

(ii) Dividing the amount specified for the last taxable year by such number of days; and

(iii) Multiplying the result by the number of days in the last taxable year (generally 365).

(c) *Funding period*—(1) *In general.* For purposes of this section, the funding period for a nuclear decommissioning fund is the period that—

(i) Begins on the first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund (see § 1.468A-2(a) for rules relating to the first taxable year for which a payment may be made (or deemed made) to a nuclear decommissioning fund); and

(ii) Ends on the last day of the taxable year that includes the last day of the estimated useful life of the nuclear power plant to which the nuclear decommissioning fund relates.

(2) *Estimated useful life.* The last day of the estimated useful life of a nuclear power plant is determined under the following rules:

(i) Except as provided in paragraph (c)(2)(ii) of this section—

(A) The last day of the estimated useful life of a nuclear power plant that has been included in rate base for ratemaking purposes in any ratemaking proceeding that established rates for a period before January 1, 2006, is the date used in the first such ratemaking proceeding as the estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes;

(B) The last day of the estimated useful life of a nuclear power plant that is not described in paragraph (c)(2)(i)(A) of this section is the last day of the estimated useful life of the plant determined as of the date it is placed in service;

(C) A taxpayer with an interest in a plant that is not described in paragraph (c)(2)(i)(A) of this section may use any reasonable method for determining the last day of such estimated useful life; and

(D) A reasonable method for purposes of paragraph (c)(2)(i)(C) of this section may include use of the period for which a public utility commission has included a comparable nuclear power plant in rate base for ratemaking purposes.

(ii) If it can be established that the estimated useful life of the nuclear

power plant will end on a date other than the date determined under paragraph (c)(2)(i) of this section, the taxpayer may use such other date as the last day of the estimated useful life but is not required to do so. If the last day of the estimated useful life was determined under paragraph (c)(2)(i)(A) of this section and the most recent ratemaking proceeding used an alternative date as the estimated date on which the nuclear power plant will no longer be included rate base, the most recent ratemaking proceeding will generally be treated as establishing such alternative date as the last day of the estimated useful life.

(iii) The estimated useful life of a nuclear power plant determined for purposes of paragraph (c)(1) of this section may end on a different date from the estimated useful life of a nuclear power plant determined for purposes of § 1.468A-8(b)(1) and (c)(1).

(d) *Decommissioning costs allocable to a fund.* The amount of decommissioning costs allocable to a nuclear decommissioning fund is determined for purposes of this section by applying the following rules and definitions:

(1) *General rule.* The amount of decommissioning costs allocable to a nuclear decommissioning fund is the taxpayer's share of the total estimated cost of decommissioning the nuclear power plant to which the fund relates.

(2) *Total estimated cost of decommissioning.* Under paragraph (a)(2) of this section, the taxpayer must demonstrate the reasonableness of the assumptions concerning the total estimated cost of decommissioning the nuclear power plant.

(3) *Taxpayer's share.* The taxpayer's share of the total estimated cost of decommissioning a nuclear power plant equals the total estimated cost of decommissioning such nuclear power plant multiplied by the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents. (See § 1.468A-1(b)(2) for circumstances in which a taxpayer possesses a qualifying interest in a nuclear power plant).

(e) *Manner of requesting schedule of ruling amounts—(1) In general.* (i) In order to receive a ruling amount for any taxable year, a taxpayer must file

a request for a schedule of ruling amounts that complies with the requirements of this paragraph (e), the applicable procedural rules set forth in § 601.201(e) of this chapter (Statement of Procedural Rules), and the requirements of any applicable revenue procedure that is in effect on the date the request is filed.

(ii) A separate request for a schedule of ruling amounts is required for each nuclear decommissioning fund established by a taxpayer. (See paragraph (a) of § 1.468A-5 for rules relating to the number of nuclear decommissioning funds that a taxpayer can establish.)

(iii) Except as provided by §§ 1.468A-5(a)(1)(iv) (relating to certain unincorporated organizations that may be taxable as corporations) and 1.468A-8 (relating to a special transfer under section 468A(f)(1)), a request for a schedule of ruling amounts must not contain a request for a ruling on any other issue, whether the issue involves section 468A or another section of the Internal Revenue Code.

(iv) In the case of an affiliated group of corporations that join in the filing of a consolidated return, the common parent of the group may request a schedule of ruling amounts for each member of the group that possesses a qualifying interest in the same nuclear power plant by filing a single submission with the IRS.

(v) The IRS will not provide or revise a ruling amount applicable to a taxable year in response to a request for a schedule of ruling amounts that is filed after the deemed payment deadline date (as defined in § 1.468A-2(c)(1)) for such taxable year. In determining the date when a request is filed, the principles of sections 7502 and 7503 shall apply.

(vi) Except as provided in paragraph (e)(1)(vii) of this section, a request for a schedule of ruling amounts shall be considered filed only if such request complies substantially with the requirements of this paragraph (e).

(vii) If a request does not comply substantially with the requirements of this paragraph (e), the IRS will notify

the taxpayer of that fact. If the information or materials necessary to comply substantially with the requirements of this paragraph (e) are provided to the IRS within 30 days after this notification, the request will be considered filed on the date of the original submission. In addition, the request will be considered filed on the date of the original submission in a case in which the information and materials are provided more than 30 days after the notification if the IRS determines that the electing taxpayer made a good faith effort to provide the applicable information or materials within 30 days after notification and also determines that treating the request as filed on the date of the original submission is consistent with the purposes of section 468A. In any other case in which the information or materials necessary to comply substantially with the requirements of this paragraph (e) are not provided within 30 days after the notification, the request will be considered filed on the date that all information or materials necessary to comply with the requirements of this paragraph (e) are provided.

(2) *Information required.* A request for a schedule of ruling amounts must contain the following information:

(i) The taxpayer's name, address, and taxpayer identification number.

(ii) Whether the request is for an initial schedule of ruling amounts, a mandatory review of the schedule of ruling amounts (*see* paragraph (f)(1) of this section), or an elective review of the schedule of ruling amounts (*see* paragraph (f)(2) of this section).

(iii) The name and location of the nuclear power plant with respect to which a schedule of ruling amounts is requested.

(iv) A description of the taxpayer's qualifying interest in the nuclear power plant and the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents.

(v) Where applicable, an identification of each public utility commission that establishes or approves rates for the furnishing or sale by the taxpayer of electric energy generated by the nuclear power plant, and, for each public utility commission identified—

(A) Whether the public utility commission has determined the amount of decommissioning costs to be included in the taxpayer's cost of service for ratemaking purposes;

(B) The amount of decommissioning costs that are to be included in the taxpayer's cost of service for each taxable year under the current determination and amounts that otherwise are required to be included in the taxpayer's income under section 88 and the regulations thereunder;

(C) A description of the assumptions, estimates and other factors used by the public utility commission to determine the amount of decommissioning costs;

(D) A copy of such portions of any order or opinion of the public utility commission as pertain to the public utility commission's most recent determination of the amount of decommissioning costs to be included in cost of service; and

(E) A copy of each engineering or cost study that was relied on or used by the public utility commission in determining the amount of decommissioning costs to be included in the taxpayer's cost of service under the current determination.

(vi) A description of the assumptions, estimates and other factors that were used by the taxpayer to determine the amount of decommissioning costs, including each of the following if applicable:

(A) A description of the proposed method of decommissioning the nuclear power plant (for example, prompt removal/dismantlement, safe storage entombment with delayed dismantlement, or safe storage mothballing with delayed dismantlement).

(B) The estimated year in which substantial decommissioning costs will first be incurred.

(C) The estimated year in which the decommissioning of the nuclear power plant will be substantially complete (*see* §1.468A-5(d)(3) for a definition of substantial completion of decommissioning).

(D) The total estimated cost of decommissioning expressed in current dollars (that is, based on price levels in effect at the time of the current determination).

(E) The total estimated cost of decommissioning expressed in future dollars (that is, based on anticipated price levels when expenses are expected to be paid).

(F) For each taxable year in the period that begins with the year specified in paragraph (e)(2)(vi)(B) of this section (the estimated year in which substantial decommissioning costs will first be incurred) and ends with the year specified in paragraph (e)(2)(vi)(C) of this section (the estimated year in which the decommissioning of the nuclear power plant will be substantially complete), the estimated cost of decommissioning expressed in future dollars.

(G) A description of the methodology used in converting the estimated cost of decommissioning expressed in current dollars to the estimated cost of decommissioning expressed in future dollars.

(H) The assumed after-tax rate of return to be earned by the assets of the qualified nuclear decommissioning fund.

(I) A copy of each engineering or cost study that was relied on or used by the taxpayer in determining the amount of decommissioning costs.

(vii) A proposed schedule of ruling amounts for each taxable year remaining in the funding period as of the date the schedule of ruling amounts will first apply.

(viii) A description of the assumptions, estimates and other factors that were used in determining the proposed schedule of ruling amounts, including, if applicable—

(A) The funding period (as such term is defined in paragraph (c) of this section);

(B) The assumed after-tax rate of return to be earned by the assets of the nuclear decommissioning fund;

(C) The fair market value of the assets (if any) of the nuclear decommissioning fund as of the first day of the first taxable year to which the schedule of ruling amounts will apply;

(D) The amount expected to be earned by the assets of the nuclear decommissioning fund (based on the after-tax rate of return applicable to the fund) over the period that begins on the first day of the first taxable year to which the schedule of ruling

amounts will apply and ends on the last day of the funding period;

(E) The amount of decommissioning costs allocable to the nuclear decommissioning fund (as determined under paragraph (d) of this section);

(F) The total estimated cost of decommissioning (as determined under paragraph (d)(2) of this section); and

(G) The taxpayer's share of the total estimated cost of decommissioning (as such term is defined in paragraph (d)(3) of this section).

(ix) If the request is for a revised schedule of ruling amounts, the after-tax rate of return earned by the assets of the nuclear decommissioning fund for each taxable year in the period that begins with the date of the initial contribution to the fund and ends with the first day of the first taxable year to which the revised schedule of ruling amounts applies.

(x) If applicable, an explanation of the need for a schedule of ruling amounts determined on a basis other than the rules of paragraphs (a) through (d) of this section and a description of an alternative basis for determining a schedule of ruling amounts (see paragraph (a)(5) of this section).

(xi) A chart or table, based upon the assumed after-tax rate of return to be earned by the assets of the nuclear decommissioning fund, setting forth the years the fund will be in existence, the annual contribution to the fund, the estimated annual earnings of the fund and the cumulative total balance in the fund.

(xii) If the request is for a revised schedule of ruling amounts, a copy of the schedule of ruling amounts that the revised schedule would replace.

(xiii) If the request for a schedule of ruling amounts contains a request, pursuant to § 1.468A-5(a)(1)(iv), that the IRS rule whether an unincorporated organization through which the assets of the fund are invested is an association taxable as a corporation for Federal tax purposes, a copy of the legal documents establishing or otherwise governing the organization.

(xiv) Any other information required by the IRS that may be necessary or useful in determining the schedule of ruling amounts.

(3) *Administrative procedures.* The IRS may prescribe administrative procedures that supplement the provisions of paragraph (e)(1) and (2) of this section. In addition, the IRS may, in its discretion, waive the requirements of paragraph (e)(1) and (2) of this section under appropriate circumstances.

(f) *Review and revision of schedule of ruling amounts—(1) Mandatory review.*

(i) Any taxpayer that has obtained a schedule of ruling amounts pursuant to paragraph (e) of this section must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the 10th taxable year that begins after the taxable year in which the most recent schedule of ruling amounts was received. If the taxpayer calculated its most recent schedule of ruling amounts on any basis other than an order issued by a public utility commission, the taxpayer must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the 5th taxable year that begins after the taxable year in which the most recent schedule of ruling amounts was received.

(ii)(A) Any taxpayer that has obtained a formula or method for determining a schedule of ruling amounts for any taxable year under paragraph (a)(5) of this section must file a request for a revised schedule on or before the earlier of the deemed payment deadline for the 5th taxable year that begins after its taxable year in which the most recent formula or method was approved or the deemed payment deadline for the first taxable year that begins after a taxable year in which there is a substantial variation in the ruling amount determined under the most recent formula or method. There is a substantial variation in the ruling amount determined under the formula or method in effect for a taxable year if the ruling amount for the year and the ruling amount for any earlier year since the most recent formula or method was approved differ by more than 50 percent of the smaller amount.

(B) Any taxpayer that has determined its ruling amount for any taxable year under a formula prescribed by § 1.468A-6 (which prescribes ruling amounts for the taxable year in which

there is a disposition of a qualifying interest in a nuclear power plant) must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline for its first taxable year that begins after the disposition.

(iii) A taxpayer requesting a schedule of deduction amounts for a nuclear decommissioning fund under § 1.468A-8 must also request a revised schedule of ruling amounts for the fund. The revised schedule of ruling amounts must apply beginning with the first taxable year following the first year in which a deduction is allowed under the schedule of deduction amounts.

(iv) If the operating license of the nuclear power plant to which a nuclear decommissioning fund relates is renewed, the taxpayer maintaining the fund must request a revised schedule of ruling amounts. The request for the revised schedule must be submitted on or before the deemed payment deadline for the taxable year that includes the date on which the operating license is renewed.

(v) A request for a schedule of ruling amounts required by this paragraph (f)(1) must be made in accordance with the rules of paragraph (e) of this section. If a taxpayer does not properly file a request for a revised schedule of ruling amounts by the date provided in paragraph (f)(1)(i), (ii) or (iv) of this section (whichever is applicable), the taxpayer's ruling amount for the first taxable year to which the revised schedule of ruling amounts would have applied and for all succeeding taxable years until a new schedule is obtained shall be zero dollars, unless, in its discretion, the IRS provides otherwise in such new schedule of ruling amounts. Thus, if a taxpayer is required to request a revised schedule of ruling amounts under any provision of this section, and each ruling amount in the revised schedule would equal zero dollars, the taxpayer may, instead of requesting a new schedule of ruling amounts, begin treating the ruling amounts under its most recent schedule as equal to zero dollars.

(2) *Elective review.* Any taxpayer that has obtained a schedule of ruling amounts pursuant to paragraph (e) of this section can request a revised

schedule of ruling amounts. Such a request must be made in accordance with the rules of paragraph (e) of this section; thus, the IRS will not provide a revised ruling amount applicable to a taxable year in response to a request for a schedule of ruling amounts that is filed after the deemed payment deadline date for such taxable year (see paragraph (e)(1)(vi) of this section).

(3) *Determination of revised schedule of ruling amounts.* A revised schedule of ruling amounts for a nuclear decommissioning fund shall be determined under this section without regard to any schedule of ruling amounts for such nuclear decommissioning fund that was issued prior to such revised schedule. Thus, a ruling amount specified in a revised schedule of ruling amounts for any taxable year in the funding period can be less than one or more ruling amounts specified in a prior schedule of ruling amounts for a prior taxable year.

(g) *Special rule permitting payments to a nuclear decommissioning fund before receipt of an initial or revised ruling amount applicable to a taxable year.* (1) If an electing taxpayer has filed a timely request for an initial or revised ruling amount for a taxable year beginning on or after January 1, 2006, and does not receive the ruling amount on or before the deemed payment deadline date for such taxable year, the taxpayer may make a payment to a nuclear decommissioning fund on the basis of the ruling amount proposed in the taxpayer's request. Thus, under the preceding sentence, an electing taxpayer may make a payment to a nuclear decommissioning fund for such taxable year that does not exceed the ruling amount proposed by the taxpayer for such taxable year in a timely filed request for a schedule of ruling amounts.

(2) If an electing taxpayer makes a payment to a nuclear decommissioning fund for any taxable year pursuant to paragraph (g)(1) of this section and the ruling amount that is provided by the IRS is greater than the ruling amount proposed by the taxpayer for such taxable year, the taxpayer is not allowed to make an additional payment to the fund for such taxable year after the deemed payment deadline date for such taxable year.

(3) If the payment or transfer that an electing taxpayer makes to a nuclear decommissioning fund for any taxable year pursuant to paragraph (g)(1) of this section exceeds the ruling amount that is provided by the IRS for such taxable year, the following rules apply:

(i) The amount of the excess is an excess contribution (as defined in § 1.468A-5(c)(2)(ii)) for such taxable year.

(ii) The amount of the excess contribution is not deductible (see § 1.468A-2(b)(2)) and must be withdrawn by the taxpayer pursuant to the rules of § 1.468A-5(c)(2)(i).

(iii) The taxpayer must withdraw the after-tax earnings on the excess contribution.

(iv) If the taxpayer claimed a deduction for the excess contribution, the taxpayer should file an amended return for the taxable year.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

**§ 1.468A-4 Treatment of nuclear decommissioning fund.**

(a) *In general.* A nuclear decommissioning fund is subject to tax on all of its modified gross income (as defined in paragraph (b) of this section). The rate of tax is 20 percent for taxable years beginning after December 31, 1995. This tax is in lieu of any other tax that may be imposed under subtitle A of the Internal Revenue Code (Code) on the income earned by the assets of the nuclear decommissioning fund.

(b) *Modified gross income.* For purposes of this section, the term *modified gross income* means gross income as defined under section 61 computed with the following modifications:

(1) The amount of any payment or special transfer to the nuclear decommissioning fund with respect to which a deduction is allowed under section 468A(a) or section 468A(f) is excluded from gross income.

(2) A deduction is allowed for the amount of administrative costs and other incidental expenses of the nuclear decommissioning fund (including taxes, legal expenses, accounting expenses, actuarial expenses and trustee

expenses, but not including decommissioning costs) that are otherwise deductible and that are paid by the nuclear decommissioning fund to any person other than the electing taxpayer. An expense is otherwise deductible for purposes of this paragraph (b)(2) if it would be deductible under chapter 1 of the Code in determining the taxable income of a corporation. For example, because Federal income taxes are not deductible under chapter 1 of the Code in determining the taxable income of a corporation, the tax imposed by section 468A(e)(2) and paragraph (a) of this section is not deductible in determining the modified gross income of a nuclear decommissioning fund. Similarly, because certain expenses allocable to tax-exempt interest income are not deductible under section 265 in determining the taxable income of a corporation, such expenses are not deductible in determining the modified gross income of a nuclear decommissioning fund.

(3) A deduction is allowed for the amount of an otherwise deductible loss that is sustained by the nuclear decommissioning fund in connection with the sale, exchange or worthlessness of any investment. A loss is otherwise deductible for purposes of this paragraph (b)(3) if such loss would be deductible by a corporation under section 165(f) or (g) and sections 1211(a) and 1212(a).

(4) A deduction is allowed for the amount of an otherwise deductible net operating loss of the nuclear decommissioning fund. For purposes of this paragraph (b), the net operating loss of a nuclear decommissioning fund for a taxable year is the amount by which the deductions allowable under paragraphs (b)(2) and (3) of this section exceed the gross income of the nuclear decommissioning fund computed with the modification described in paragraph (b)(1) of this section. A net operating loss is otherwise deductible for purposes of this paragraph (b)(4) if such a net operating loss would be deductible by a corporation under section 172(a).

(c) *Special rules*—(1) *Period for computation of modified gross income.* The modified gross income of a nuclear decommissioning fund must be computed on the basis of the taxable year of the

electing taxpayer. If an electing taxpayer changes its taxable year, each nuclear decommissioning fund of the electing taxpayer must change to the new taxable year. See section 442 and § 1.442-1 for rules relating to the change to a new taxable year.

(2) *Gain or loss upon distribution of property by a fund.* A distribution of property by a nuclear decommissioning fund (whether an actual distribution or a deemed distribution) shall be considered a disposition of property by the nuclear decommissioning fund for purposes of section 1001. In determining the amount of gain or loss from such disposition, the amount realized by the nuclear decommissioning fund shall be the fair market value of the property on the date of disposition.

(3) *Denial of credits against tax.* The tax imposed on the modified gross income of a nuclear decommissioning fund under paragraph (a) of this section is not to be reduced or offset by any credits against tax provided by part IV of subchapter A of chapter 1 of the Code other than the credit provided by section 31(c) for amounts withheld under section 3406 (back-up withholding).

(4) *Other corporate taxes inapplicable.* Although the modified gross income of a nuclear decommissioning fund is subject to tax at the rate specified by section 468A(e)(2) and paragraph (a) of this section, a nuclear decommissioning fund is not subject to the other taxes imposed on corporations under subtitle A of the Code. For example, a nuclear decommissioning fund is not subject to the alternative minimum tax imposed by section 55, the accumulated earnings tax imposed by section 531, the personal holding company tax imposed by section 541, and the alternative tax imposed on a corporation under section 1201(a).

(d) *Treatment as corporation for purposes of subtitle F.* For purposes of subtitle F of the Code and §§ 1.468A-1 through 1.468A-9, a nuclear decommissioning fund is to be treated as if it were a corporation and the tax imposed by section 468A(e)(2) and paragraph (a) of this section is to be treated as a tax imposed by section 11. Thus, for example, the following rules apply:

§ 1.468A-5

26 CFR Ch. I (4-1-17 Edition)

(1) A nuclear decommissioning fund must file a return with respect to the tax imposed by section 468A(e)(2) and paragraph (a) of this section for each taxable year (or portion thereof) that the fund is in existence even though no amount is included in the gross income of the fund for such taxable year. The return is to be made on Form 1120-ND in accordance with the instructions relating to such form. For purposes of this paragraph (d)(1), a nuclear decommissioning fund is in existence for the period that—

(i) Begins on the date that the first deductible payment is actually made to such nuclear decommissioning fund; and

(ii) Ends on the date of termination (*see* § 1.468A-5(d)), the date that the entire fund is disqualified (*see* § 1.468A-5(c)), or the date that the electing taxpayer disposes of its entire qualifying interest in the nuclear power plant to which the nuclear decommissioning fund relates (other than in connection with the transfer of the entire fund to the person acquiring such interest), whichever is applicable.

(2) For each taxable year of the nuclear decommissioning fund, the return described in paragraph (d)(1) of this section must be filed on or before the 15th day of the third month following the close of such taxable year unless the nuclear decommissioning fund is granted an extension of time for filing under section 6081. If such an extension is granted for any taxable year, the return for such taxable year must be filed on or before the extended due date for such taxable year.

(3) A nuclear decommissioning fund must provide its employer identification number on returns, statements and other documents as required by the forms and instructions relating thereto. The employer identification number is obtained by filing a Form SS-4, Application for Employer Identification Number, in accordance with the instructions relating thereto.

(4) A nuclear decommissioning fund must deposit all payments of tax imposed by section 468A(e)(2) and paragraph (a) of this section (including any payments of estimated tax) with an authorized government depository in accordance with § 1.6302-1.

(5) A nuclear decommissioning fund is subject to the addition to tax imposed by section 6655 in case of a failure to pay estimated income tax. For purposes of section 6655 and this section—

(i) The tax with respect to which the amount of the underpayment is computed in the case of a nuclear decommissioning fund is the tax imposed by section 468A(e)(2) and paragraph (a) of this section; and

(ii) The taxable income with respect to which the nuclear decommissioning fund's status as a large corporation is measured is modified gross income (as defined by paragraph (b) of this section).

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

**§ 1.468A-5 Nuclear decommissioning fund qualification requirements; prohibitions against self-dealing; disqualification of nuclear decommissioning fund; termination of fund upon substantial completion of decommissioning.**

(a) *Qualification requirements*—(1) *In general.* (i) A nuclear decommissioning fund must be established and maintained at all times in the United States pursuant to an arrangement that qualifies as a trust under State law. Such trust must be established for the exclusive purpose of providing funds for the decommissioning of one or more nuclear power plants, but a single trust agreement may establish multiple funds for such purpose. Thus, for example—

(A) Two or more nuclear decommissioning funds can be established and maintained pursuant to a single trust agreement; and

(B) One or more funds that are to be used for the decommissioning of a nuclear power plant and that do not qualify as nuclear decommissioning funds under this paragraph (a) can be established and maintained pursuant to a trust agreement that governs one or more nuclear decommissioning funds.

(ii) A separate nuclear decommissioning fund is required for each electing taxpayer and for each nuclear power plant with respect to which an electing taxpayer possesses a qualifying interest. The Internal Revenue Service (IRS) will issue a separate

schedule of ruling amounts with respect to each nuclear decommissioning fund, and each nuclear decommissioning fund must file a separate income tax return even if other nuclear decommissioning funds or nonqualified funds are established and maintained pursuant to the trust agreement governing such fund or the assets of other nuclear decommissioning funds or nonqualified funds are pooled with the assets of such fund.

(iii) An electing taxpayer can maintain only one nuclear decommissioning fund for each nuclear power plant with respect to which the taxpayer elects the application of section 468A. If a nuclear power plant is subject to the rate-making jurisdiction of two or more public utility commissions and any such public utility commission requires a separate fund to be maintained for the benefit of ratepayers whose rates are established or approved by the public utility commission, the separate funds maintained for such plant (whether or not established and maintained pursuant to a single trust agreement) shall be considered a single nuclear decommissioning fund for purposes of section 468A and §§1.468A-1 through 1.468A-4, this section and §§1.468A-7 through 1.468A-9. Thus, for example, the IRS will issue one schedule of ruling amounts with respect to such nuclear power plant, the nuclear decommissioning fund must file a single income tax return (see §1.468A-4(d)(1)), and, if the IRS disqualifies the nuclear decommissioning fund, the assets of each separate fund are treated as distributed on the date of disqualification (see paragraph (c)(3) of this section).

(iv) If assets of a nuclear decommissioning fund are (or will be) invested through an unincorporated organization, within the meaning of §301.7701-2 of this chapter, the IRS will rule, if requested, whether the organization is an association taxable as a corporation for Federal tax purposes. A request for this ruling may be made by the electing taxpayer as part of its request for a schedule of ruling amounts or as part of a request under §1.468A-8 for a schedule of deduction amounts.

(2) *Limitation on contributions.* Except as otherwise provided in §1.468A-8 (re-

lating to special transfers under section 468A(f)), a nuclear decommissioning fund is not permitted to accept any contributions in cash or property other than cash payments with respect to which a deduction is allowed under section 468A(a) and §1.468A-2(a). Thus, for example, except in the case of a special transfer pursuant to §1.468A-8, securities may not be contributed to a nuclear decommissioning fund even if the taxpayer or a fund established by the taxpayer previously held such securities for the purpose of providing funds for the decommissioning of a nuclear power plant.

(3) *Limitation on use of fund—(i) In general.* The assets of a nuclear decommissioning fund are to be used exclusively—

(A) To satisfy, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates;

(B) To pay administrative costs and other incidental expenses of the nuclear decommissioning fund; and

(C) To the extent that the assets of the nuclear decommissioning fund are not currently required for the purposes described in paragraph (a)(3)(i)(A) or (B) of this section, to make investments.

(ii) *Definition of administrative costs and expenses.* For purposes of paragraph (a)(3)(i) of this section, the term *administrative costs and other incidental expenses of a nuclear decommissioning fund* means all ordinary and necessary expenses incurred in connection with the operation of the nuclear decommissioning fund. Such term includes the tax imposed by section 468A(e)(2) and §1.468A-4(a), any State or local tax imposed on the income or the assets of the fund, legal expenses, accounting expenses, actuarial expenses and trustee expenses. Such term does not include decommissioning costs or the payment of insurance premiums on a policy to pay for the nuclear decommissioning costs of a nuclear power plant. Such term also does not include the excise tax imposed on the trustee or other disqualified person under section 4951 or the reimbursement of any expenses incurred in connection with the assertion of such tax unless such expenses

are considered reasonable and necessary under section 4951(d)(2)(C) and it is determined that the trustee or other disqualified person is not liable for the excise tax.

(4) *Trust provisions.* Each qualified nuclear decommissioning fund trust agreement must provide that assets in the fund must be used as authorized by section 468A and §§ 1.468A-1 through 1.468A-9 and that the agreement may not be amended so as to violate section 468A or §§ 1.468A-1 through 1.468A-9.

(b) *Prohibitions against self-dealing—*  
(1) *In general.* Except as otherwise provided in this paragraph (b), the excise taxes imposed by section 4951 shall apply to each act of self-dealing between a disqualified person and a nuclear decommissioning fund.

(2) *Self-dealing defined.* For purposes of this paragraph (b), the term *self-dealing* means any act described in section 4951(d), except—

(i) A payment by a nuclear decommissioning fund for the purpose of satisfying, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates;

(ii) A withdrawal of an excess contribution by the electing taxpayer pursuant to the rules of paragraph (c)(2) of this section;

(iii) A withdrawal by the electing taxpayer of amounts that have been treated as distributed under paragraph (c)(3) of this section;

(iv) A payment of amounts remaining in a nuclear decommissioning fund to the electing taxpayer after the termination of such fund (as determined under paragraph (d) of this section);

(v) Any act described in section 4951(d)(2)(B) or (C);

(vi) Any act that is described in § 53.4951-1(c) of this chapter and is undertaken to facilitate the temporary investment of assets or the payment of reasonable administrative expenses of the nuclear decommissioning fund; or

(vii) A payment by a nuclear decommissioning fund for the performance of trust functions and certain general banking services by a bank or trust company that is a disqualified person if the banking services are reasonable and necessary to carry out the pur-

poses of the fund and the compensation paid to the bank or trust company for such services, taking into account the fair interest rate for the use of the funds by the bank or trust company, is not excessive.

(3) *Disqualified person defined.* For purposes of this paragraph (b), the term *disqualified person* includes each person described in section 4951(e)(4) and § 53.4951-1(d).

(4) *General banking services.* The general banking services allowed by paragraph (b)(2)(vii) of this section are—

(i) Checking accounts, as long as the bank does not charge interest on any overwithdrawals;

(ii) Savings accounts, as long as the fund may withdraw its funds on no more than 30 days' notice without subjecting itself to a loss of interest on its money for the time during which the money was on deposit; and

(iii) Safekeeping activities (*see* § 53.4941(d)-3(c)(2), *Example 3*, of this chapter).

(c) *Disqualification of nuclear decommissioning fund—*(1) *In general—*(i) *Disqualification events.* Except as otherwise provided in paragraph (c)(2) of this section, the IRS may, in its discretion, disqualify all or any portion of a nuclear decommissioning fund if at any time during a taxable year of the fund—

(A) The fund does not satisfy the requirements of paragraph (a) of this section; or

(B) The fund and a disqualified person engage in an act of self-dealing (as defined in paragraph (b)(2) of this section).

(ii) *Date of disqualification.* (A) Except as otherwise provided in this paragraph (c)(1)(ii), the date on which a disqualification under this paragraph (c) will take effect (date of disqualification) is the date that the fund does not satisfy the requirements of paragraph (a) of this section or the date on which the act of self-dealing occurs, whichever is applicable.

(B) If the IRS determines, in its discretion, that the disqualification should take effect on a date subsequent to the date specified in paragraph (c)(1)(ii)(A) of this section, the date of disqualification is such subsequent date.

(iii) *Notice of disqualification.* The IRS will notify the electing taxpayer of the disqualification of a nuclear decommissioning fund and the date of disqualification by registered or certified mail to the last known address of the electing taxpayer (the notice of disqualification). For further guidance regarding the definition of last known address, see §301.6212-2 of this chapter.

(2) *Exception to disqualification—(i) In general.* A nuclear decommissioning fund will not be disqualified under paragraph (c)(1) of this section by reason of an excess contribution or the withdrawal of such excess contribution by an electing taxpayer if the amount of the excess contribution is withdrawn by the electing taxpayer on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year to which the excess contribution relates. In the case of an excess contribution that is the result of a payment made pursuant to §1.468A-3(g)(1), a nuclear decommissioning fund will not be disqualified under paragraph (c)(1) of this section if the amount of the excess contribution is withdrawn by the electing taxpayer on or before the later of—

(A) The date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year to which the excess contribution relates; or

(B) The date that is 30 days after the date that the taxpayer receives the ruling amount for such taxable year.

(ii) *Excess contribution defined.* For purposes of this section, an excess contribution is the amount by which cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceed the payment limitation contained in section 468A(b) and §1.468A-2(b). The amount of a special transfer permitted under §1.468A-8 is not treated as a cash payment for this purpose.

(iii) *Taxation of income attributable to an excess contribution.* The income of a nuclear decommissioning fund attributable to an excess contribution is required to be included in the gross income of the nuclear decommissioning fund under §1.468A-4(b).

(3) *Disqualification treated as distribution.* If all or any portion of a nuclear decommissioning fund is disqualified under paragraph (c)(1) of this section, the portion of the nuclear decommissioning fund that is disqualified is treated as distributed to the electing taxpayer on the date of disqualification. Such a distribution shall be treated for purposes of section 1001 as a disposition of property held by the nuclear decommissioning fund (see §1.468A-4(c)(2)). In addition, the electing taxpayer must include in gross income for the taxable year that includes the date of disqualification an amount equal to the fair market value of the distributable assets of the nuclear decommissioning fund multiplied by the fraction of the nuclear decommissioning fund that was disqualified under paragraph (c)(1) of this section. For this purpose, the fair market value of the distributable assets of the nuclear decommissioning fund is equal to the fair market value of the assets of the fund determined as of the date of disqualification, reduced by—

(i) The amount of any excess contribution that was not withdrawn before the date of disqualification if no deduction was allowed with respect to such excess contribution;

(ii) The amount of any deemed distribution that was not actually distributed before the date of disqualification (as determined under §1.468A-2(d)(2)(iii)) if the amount of the deemed distribution was included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurred; and

(iii) The amount of any tax that—

(A) Is imposed on the income of the fund;

(B) Is attributable to income taken into account before the date of disqualification or as a result of the disqualification; and

(C) Has not been paid as of the date of disqualification.

(4) *Further effects of disqualification.* Contributions made to a disqualified fund after the date of disqualification are not deductible under section 468A(a) and §1.468A-2(a), or, if the fund is disqualified only in part, are deductible only to the extent provided in the notice of disqualification. In addition,

if any assets of the fund that are deemed distributed under paragraph (c)(3) of this section are held by the fund after the date of disqualification (or if additional assets are acquired with nondeductible contributions made to the fund after the date of disqualification), the income earned by such assets after the date of disqualification must be included in the gross income of the electing taxpayer (*see* section 671) to the extent that such income is otherwise includible under chapter 1 of the Internal Revenue Code (Code). An electing taxpayer can establish a nuclear decommissioning fund to replace a fund that has been disqualified in its entirety only if the IRS specifically consents to the establishment of a replacement fund in connection with the issuance of an initial schedule of ruling amounts for such replacement fund.

(d) *Termination of nuclear decommissioning fund upon substantial completion of decommissioning*—(1) *In general.* Upon substantial completion of the decommissioning of a nuclear power plant to which a nuclear decommissioning fund relates, such nuclear decommissioning fund shall be considered terminated and treated as having distributed all of its assets on the date the termination occurs (the termination date). Such a distribution shall be treated for purposes of section 1001 as a disposition of property held by the nuclear decommissioning fund (*see* § 1.468A-4(c)(2)). In addition, the electing taxpayer shall include in gross income for the taxable year in which the termination occurs an amount equal to the fair market value of the assets of the fund determined as of the termination date, reduced by—

(i) The amount of any deemed distribution that was not actually distributed before the termination date if the amount of the deemed distribution was included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurred; and

(ii) The amount of any tax that—

(A) Is imposed on the income of the fund;

(B) Is attributable to income taken into account before the termination date or as a result of the termination; and

(C) Has not been paid as of the termination date.

(2) *Additional rules.* Contributions made to a nuclear decommissioning fund after the termination date are not deductible under section 468A(a) and § 1.468A-2(a). In addition, if any assets are held by the fund after the termination date, the income earned by such assets after the termination date must be included in the gross income of the electing taxpayer (*see* section 671) to the extent that such income is otherwise includible under chapter 1 of the Code. Finally, under § 1.468A-2(e), an electing taxpayer using an accrual method of accounting is allowed a deduction for nuclear decommissioning costs that are incurred during any taxable year even if such costs are incurred after substantial completion of decommissioning (for example, expenses incurred to monitor or safeguard the plant site).

(3) *Substantial completion of decommissioning and termination date.* (i) The substantial completion of the decommissioning of a nuclear power plant occurs on the date that the maximum acceptable radioactivity levels mandated by the Nuclear Regulatory Commission with respect to a decommissioned nuclear power plant are satisfied (the substantial completion date). Except as otherwise provided in paragraph (d)(3)(ii) of this section, the substantial completion date is also the termination date.

(ii) If a significant portion of the total estimated decommissioning costs with respect to a nuclear power plant are not incurred on or before the substantial completion date, an electing taxpayer may request, and the IRS will issue, a ruling that designates a date subsequent to the substantial completion date as the termination date. The termination date designated in the ruling will not be later than the last day of the third taxable year after the taxable year that includes the substantial completion date. The request for a ruling under this paragraph (d)(3)(ii) must be filed during the taxable year that includes the substantial completion date and must comply with the procedural rules in effect at the time of the request.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

**§ 1.468A-6 Disposition of an interest in a nuclear power plant.**

(a) *In general.* This section describes the Federal income tax consequences of a transfer of the assets of a nuclear decommissioning fund (Fund) within the meaning of §1.468A-1(b)(4) in connection with a sale, exchange, or other disposition by a taxpayer (transferor) of all or a portion of its qualifying interest in a nuclear power plant to another taxpayer (transferee). This section also explains how a schedule of ruling amounts will be determined for the transferor and transferee. For purposes of this section, a nuclear power plant includes a plant that previously qualified as a nuclear power plant and that has permanently ceased to produce electricity.

(b) *Requirements.* This section applies if—

(1) Immediately before the disposition, the transferor maintained a Fund with respect to the interest disposed of;

(2) Immediately after the disposition—

(i) The transferee maintains a Fund with respect to the interest acquired;

(ii) The interest acquired is a qualifying interest of the transferee in the nuclear power plant;

(3) In connection with the disposition, either—

(i) The transferee acquires part or all of the transferor's qualifying interest in the plant and a proportionate amount of the assets of the transferor's Fund (all such assets if the transferee acquires the transferor's entire qualifying interest in the plant) is transferred to a Fund of the transferee; or

(ii) The transferee acquires the transferor's entire qualifying interest in the plant and the transferor's entire Fund is transferred to the transferee; and

(4) The transferee continues to satisfy the requirements of §1.468A-5(a)(1)(iii), which permits an electing taxpayer to maintain only one Fund for each plant.

(c) *Tax consequences.* A disposition that satisfies the requirements of paragraph (b) of this section will have the following tax consequences at the time it occurs:

(1) *The transferor and its Fund.* (i) Except as provided in paragraph (c)(1)(ii) of this section, neither the transferor

nor the transferor's Fund will recognize gain or loss or otherwise take any income or deduction into account by reason of the transfer of a proportionate amount of the assets of the transferor's Fund to the transferee's Fund (or by reason of the transfer of the transferor's entire Fund to the transferee). For purposes of §§1.468A-1 through 1.468A-9, this transfer (or the transfer of the transferor's Fund) will not be considered a distribution of assets by the transferor's Fund.

(ii) Notwithstanding paragraph (c)(1)(i) of this section, if the transferor has made a special transfer under §1.468A-8 prior to the transfer of the Fund or Fund assets, any deduction with respect to that special transfer allowable under section 468A(f)(2) for a taxable year ending after the date of the transfer of the Fund or Fund assets (the unamortized special transfer deduction) is allowed under section 468A(f)(2)(C) for the taxable year that includes the date of the transfer of the Fund or Fund assets. If the taxpayer transfers only a portion of its interest in a nuclear power plant, only the corresponding portion of the unamortized special transfer deduction qualifies for the acceleration under section 468A(f)(2)(C).

(2) *The transferee and its Fund.* Neither the transferee nor the transferee's Fund will recognize gain or loss or otherwise take any income or deduction into account by reason of the transfer of a proportionate amount of the assets of the transferor's Fund to the transferee's Fund (or by reason of the transfer of the transferor's Fund to the transferee). For purposes of §§1.468A-1 through 1.468A-9, this transfer (or the transfer of the transferor's Fund) will not constitute a payment or a contribution of assets by the transferee to its Fund.

(3) *Basis.* Transfers of assets of a Fund to which this section applies do not affect basis. Thus, the transferee's Fund will have a basis in the assets received from the transferor's Fund that is the same as the basis of those assets in the transferor's Fund immediately before the disposition.

(d) *Determination of proportionate amount.* For purposes of this section, a transferor of a qualifying interest in a

nuclear power plant is considered to transfer a proportionate amount of the assets of its Fund to a Fund of a transferee of the interest if, on the date of the transfer of the interest, the percentage of the fair market value of the Fund's assets attributable to the assets transferred equals the percentage of the transferor's qualifying interest that is transferred.

(e) *Calculation of schedule of ruling amounts and schedule of deduction amounts for dispositions described in this section*—(1) *Transferor*. If a transferor disposes of all or a portion of its qualifying interest in a nuclear power plant in a transaction to which this section applies, the transferor's schedule of ruling amounts with respect to the interests disposed of and retained (if any) and, if applicable, the amount allowable as a deduction for a special transfer under § 1.468A-8 will be determined under the following rules:

(i) *Taxable year of disposition; ruling amount*. If the transferor does not file a request for a revised schedule of ruling amounts on or before the deemed payment deadline for the taxable year of the transferor in which the disposition of its interest in the nuclear power plant occurs (that is, the date that is two and one-half months after the close of that year), the transferor's ruling amount with respect to that plant for that year will equal the sum of—

(A) The ruling amount contained in the transferor's current schedule of ruling amounts with respect to that plant for that taxable year multiplied by the portion of the qualifying interest that is retained (if any); and

(B) The ruling amount contained in the transferor's current schedule of ruling amounts with respect to that plant for that taxable year multiplied by the product of—

(1) The portion of the transferor's qualifying interest that is disposed of; and

(2) A fraction, the numerator of which is the number of days in that taxable year that precede the date of disposition, and the denominator of which is the number of days in that taxable year.

(ii) *Taxable year of disposition; deduction under § 1.468A-8*. If the transferor has elected to make a special transfer

under section 468A(f), the amount allowable as a deduction under § 1.468A-8 for the taxable year in which it transfers a portion of its interest in the nuclear power plant is equal to the deduction amount for that taxable year from its existing schedule of deduction amounts multiplied by the percentage of its interest that it retains. This deduction is in addition to the deduction described in paragraph (c)(1)(ii) of this section.

(iii) *Taxable years after the year of disposition*. A transferor that retains a qualifying interest in a nuclear power plant must file a request for a revised schedule of ruling amounts (and, if applicable, a revised schedule of deduction amounts) with respect to that interest on or before the deemed payment deadline for the first taxable year of the transferor beginning after the disposition. See §§ 1.468A-3(f)(1)(ii)(B) and 1.468A-8(c)(3). If the transferor does not timely file such a request, the transferor's ruling amount and the transferor's deduction amount under § 1.468A-8 with respect to that interest for the affected year or years will be zero, unless the Internal Revenue Service (IRS) waives the application of this paragraph (e)(1)(iii) upon a showing of good cause for the delay.

(2) *Transferee*. If a transferee acquires all or a portion of a transferor's qualifying interest in a nuclear power plant in a transaction to which this section applies, the transferee's schedule of ruling amounts with respect to the interest acquired will be determined under the following rules:

(i) *Taxable year of disposition*. If the transferee does not file a request for a schedule of ruling amounts on or before the deemed payment deadline for the taxable year of the transferee in which the disposition occurs (that is, the date that is two and one-half months after the close of that year), the transferee's ruling amount with respect to the interest acquired in the nuclear power plant for that year is equal to the amount contained in the transferor's current schedule of ruling amounts for that plant for the taxable year of the transferor in which the disposition occurred, multiplied by the product of—

(A) The portion of the transferor's qualifying interest that is transferred; and

(B) A fraction, the numerator of which is the number of days in the taxable year of the transferor including and following the date of disposition, and the denominator of which is the number of days in that taxable year.

(ii) *Taxable years after the year of disposition.* A transferee of a qualifying interest in a nuclear power plant must file a request for a revised schedule of ruling amounts with respect to that interest on or before the deemed payment deadline for the first taxable year of the transferee beginning after the disposition. See § 1.468A-3(f)(1)(ii)(B). If the transferee does not timely file such a request, the transferee's ruling amount with respect to that interest for the affected year or years will be zero, unless the IRS waives the application of this paragraph (e)(2)(ii) upon a showing of good cause for the delay.

(3) *Examples.* The following examples illustrate the provisions of this paragraph (e):

*Example 1.* (i) X Corporation is a calendar year taxpayer engaged in the sale of electric energy generated by a nuclear power plant. The plant is owned entirely by X. On May 27, 2010, X transfers a 60-percent qualifying interest in the plant to Y Corporation, a calendar year taxpayer. Before the transfer, X had received a schedule of ruling amounts containing an annual ruling amount of \$10 million for the taxable years 2005 through 2025. For 2010, neither X nor Y files a request for a revised schedule of ruling amounts.

(ii) Under paragraph (e)(1)(i) of this section, X's ruling amount for 2010 is calculated as follows:  $(\$10,000,000 \times .40) + (\$10,000,000 \times .60 \times 146/365) = \$6,400,000$ . Under paragraph (e)(2)(i) of this section, Y's ruling amount for 2010 is calculated as follows:  $\$10,000,000 \times .60 \times 219/365 = \$3,600,000$ . Under paragraphs (e)(1)(iii) and (e)(2)(ii) of this section, X and Y must file requests for revised schedules of ruling amounts by March 15, 2012.

*Example 2.* Y Corporation, the sole owner of a nuclear power plant, is a calendar year taxpayer. In year 1, Y elects to make a special transfer under section 468A(f)(1) to the nuclear decommissioning fund Y maintains with respect to the plant. The amount of the special transfer is  $\$100 \times$ , and the remaining useful life of the plant is 20 years. Y obtains a schedule of deduction amounts under § 1.468A-8T(c) permitting a  $\$5 \times$  deduction each year over the 20-year remaining useful life, and deducts  $\$5 \times$  of the special transfer amount in year 1, year 2, year 3, and year 4. On the first day of year 5, Y transfers a 25% interest in the plant to an unrelated party. Under paragraph (e)(1)(ii) of this section, Y

may deduct in Year 5 the unamortized special transfer deduction corresponding to the portion of the plant transferred (25 percent of  $\$80 \times$  or  $\$20 \times$ ). In addition, under paragraph (e)(1)(ii) of this section, Y may deduct the portion of the deduction amount for year 5 from the schedule of deduction amounts corresponding to its retained interest in the plant (75 percent of  $\$5 \times$  or  $\$3.75 \times$ ). Pursuant to paragraph (e)(1)(iii) of this section, Y must file a request for a revised schedule of ruling amounts by March 15 of year 7.

(f) *Anti-abuse provision.* The IRS may treat a disposition as satisfying the requirements of this section if the IRS determines that this treatment is necessary or appropriate to carry out the purposes of section 468A and §§ 1.468A-1 through 1.468A-9.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010, as amended by 76 FR 3837, Jan. 21, 2011]

#### § 1.468A-7 Manner of and time for making election.

(a) *In general.* An eligible taxpayer is allowed a deduction for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment) to a nuclear decommissioning fund or for a special transfer under § 1.468A-8 only if the taxpayer elects the application of section 468A. A separate election is required for each nuclear decommissioning fund and for each taxable year with respect to which payments are to be deducted under section 468A or a special transfer is made under § 1.468A-8. In the case of an affiliated group of corporations that join in the filing of a consolidated return for a taxable year, the common parent must make a separate election on behalf of each member whose payments to a nuclear decommissioning fund during such taxable year are to be deducted under section 468A and each member that makes a special transfer under § 1.468A-8 with respect to such year. The election under section 468A for any taxable year is irrevocable and must be made by attaching a statement (Election Statement) and a copy of the schedule of ruling amounts provided pursuant to the rules of § 1.468A-3 to the taxpayer's Federal income tax return (or, in the case of an affiliated group of corporations that join in the filing of a consolidated return, the consolidated return) for such taxable year. The return to which the Election

**§ 1.468A-8**

**26 CFR Ch. I (4-1-17 Edition)**

Statement and a copy of the schedule of ruling amounts is attached must be filed on or before the time prescribed by law (including extensions) for filing the return for the taxable year with respect to which payments are to be deducted under section 468A.

(b) *Required information.* The Election Statement must include the following information:

(1) The legend “Election Under Section 468A” typed or legibly printed at the top of the first page.

(2) The electing taxpayer’s name, address and taxpayer identification number (or, in the case of an affiliated group of corporations that join in the filing of a consolidated return, the name, address and taxpayer identification number of each electing taxpayer).

(3) The taxable year for which the election is made.

(4) For each nuclear decommissioning fund for which an election is made—

(i) The name and location of the nuclear power plant to which the fund relates;

(ii) The name and employer identification number of the nuclear decommissioning fund;

(iii) The total amount of actual cash payments made to the nuclear decommissioning fund during the taxable year that were not treated as deemed cash payments under § 1.468A-2(c)(1) for a prior taxable year;

(iv) The total amount of cash payments deemed made to the nuclear decommissioning fund under § 1.468A-2(c)(1) for the taxable year;

(v) The total amount of any special transfers (whether in cash or property) made to the nuclear decommissioning fund under § 1.468A-8 during the taxable year that were not treated as deemed transfers under § 1.468A-8(a)(4) for a prior taxable year;

(vi) The total amount of any special transfers (whether in cash or property) deemed made to the nuclear decommissioning fund under § 1.468A-8(a)(4) for the taxable year; and

(vii) For each item of property included in the amounts described in paragraph (b)(4)(v) or (vi) of this section, the amount of the item of property and whether the basis of the item of property is determined under

§ 1.468A-8(b)(5)(iii)(A) or § 1.468A-8(b)(5)(iii)(B).

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

**§ 1.468A-8 Special transfers to qualified funds pursuant to section 468A(f).**

(a) *General rule*—(1) *In general.* Under section 468A(f), a taxpayer maintaining a qualified nuclear decommissioning fund with respect to a nuclear power plant may transfer cash or property into the fund (a special transfer). The special transfer is not subject to the ruling amount limitation in section 468A(b) and is not treated as a cash payment for purposes of that limitation. Thus, a taxpayer may, in the same taxable year, pay the ruling amount and make a special transfer into the fund. A special transfer may be made in cash, property, or both cash and property. The amount of a special transfer (that is, the amount of cash and the fair market value of property transferred) may not exceed the present value of the pre-2005 nonqualifying amount of nuclear decommissioning costs with respect to the nuclear power plant. The taxpayer is entitled to a deduction against income for a special transfer, as described in paragraph (b) of this section. A special transfer may not be made to a nuclear decommissioning fund before the first taxable year in which a deduction amount is applicable to the nuclear decommissioning fund (see paragraph (c) of this section).

(2) *Pre-2005 nonqualifying amount*—(i) *In general.* The present value of the pre-2005 nonqualifying amount of nuclear decommissioning costs with respect to a nuclear power plant is the amount equal to the pre-2005 nonqualifying percentage of the present value of the estimated future decommissioning costs (as defined in § 1.468A-1(b)(6)) with respect to the nuclear power plant as of the first day of the taxable year of the taxpayer in which the special transfer is made or deemed made (or a later date that is on or before the date on which the special transfer is expected to be made if the taxpayer establishes to the satisfaction of the IRS that the determination of present value as of such date is reasonable and consistent with the principles and provisions of

this section). For this purpose, the pre-2005 nonqualifying percentage for the plant is 100 percent reduced by the sum of—

(A) The qualifying percentage (within the meaning of §1.468A-3(d)(4) as in effect on December 31, 2005) used in determining the taxpayer's last schedule of ruling amounts for the nuclear decommissioning fund under the law in effect before the enactment of the Energy Policy Act of 2005 (that is, the percentage of the plant's total nuclear decommissioning costs that were permitted to be funded through the fund under the law in effect before the enactment of the Energy Policy Act of 2005); and

(B) The percentage of decommissioning costs transferred in any previous special transfer (that is, the amount transferred as a percentage of the present value of the estimated future costs of decommissioning as of the first day of the taxable year in which such previous transfer was made).

(ii) *Pre-2005 nonqualifying amount of transferee.* If there is a transfer of a nuclear decommissioning fund or part or all of its assets and §1.468A-6 applies to the transfer, the pre-2005 nonqualifying amount determined with respect to the transferee is equal to the pre-2005 nonqualifying amount (or a proportionate part of the pre-2005 nonqualifying amount) that would have been determined with respect to the transferor but for such transfer.

(3) *Transfers in multiple years.* A taxpayer making a special transfer is not required to transfer the entire eligible amount in a single year. The requirements of paragraph (c) of this section apply separately to each year in which a special transfer is made. In calculating the amount of any subsequent transfer, the taxpayer must reduce the pre-2005 nonqualifying percentage under paragraph (a)(2) of this section to take into account all previous transfers. For example, if a taxpayer has a pre-2005 nonqualifying percentage of 40 percent, and transfers half of the eligible amount in a special transfer, any subsequent transfer must be calculated on the basis of a pre-2005 nonqualifying percentage of 20 percent.

(4) *Deemed payment rules—(i) In general.* The amount of any special trans-

fer (whether in cash or property) described in §1.468A-8 and made by an electing taxpayer to a nuclear decommissioning fund on or before the 15th day of the third calendar month after the close of any taxable year (the deemed payment deadline date) shall be deemed made during such taxable year if the electing taxpayer irrevocably designates the amount as relating to such taxable year on its timely filed Federal income tax return for such taxable year or, in the case of special transfers described in paragraph (a)(4)(ii) of this section, on an amended return for such taxable year (see §1.468A-7(b)(4)(v) and (vi) for rules relating to such designation).

(ii) *Special rule for certain special transfers.* Special transfers that the electing taxpayer designates as relating to a taxable year beginning after December 31, 2005, and ending before January 1, 2010, which are actually made within 90 days after the electing taxpayer receives a ruling from the Secretary relating to the special transfer are deemed made during the taxable year designated as the year to which the special transfer relates.

(b) *Deduction for amounts transferred—*  
(1) *In general.* (i) Except as provided in this paragraph (b), the deduction for any special transfer is allowed ratably over the remaining useful life of the nuclear power plant. The amount of the deduction for any taxable year is the deduction amount for such year specified in the schedule of deduction amounts required under paragraph (c) of this section.

(ii) For purposes of this paragraph (b), the remaining useful life of the nuclear power plant is the period beginning on the first day of the taxable year during which the transfer is made and ending on the last day of the taxable year that includes the last day of the estimated useful life of the nuclear power plant. The last day of the estimated useful life of the nuclear power plant is determined for this purpose under the rules of §1.468A-3(c)(2).

(2) *Amount of deduction—(i) General rule.* Except as provided in this paragraph (b)(2), the deduction for property contributed in a special transfer is limited to the lesser of the fair market

value of the property contributed or the taxpayer's basis in that property.

(ii) *Election—(A) In general.* If the fair market value of the property contributed is less than the taxpayer's adjusted basis in such property as of the date the property is contributed and the fund elects to treat the fair market value of the property as its adjusted basis in the property, the taxpayer may deduct an amount equal to the adjusted basis of the contributed property.

(B) *Manner of making election.* The election described in paragraph (b)(2)(ii)(A) of this section is made for property contributed in a special transfer by attaching a description of the property and a statement that the fund is making an election under § 1.468A-8(b)(2)(ii) with respect to the property to the return of the fund for the taxable year in which the property is contributed to the fund.

(C) *Election allowed for property transferred prior to December 23, 2010.* The election described in paragraph (b)(2)(ii)(A) of this section may be made and a deduction equal to adjusted basis will be allowed for property contributed in a special transfer prior to December 23, 2010. The election in such a case may be made on an amended return of the fund for the taxable year in which the property is contributed to the fund and the transferor may amend previously filed returns to claim a deduction calculated by reference to the adjusted basis of the property.

(3) *Denial of deduction for previously deducted amounts.* If a deduction (other than a deduction under section 468A) has been allowed to the taxpayer (or a predecessor) on account of expected decommissioning costs for a nuclear power plant (a nonconforming deduction) or an amount otherwise includible in income has been excluded from the gross income of the taxpayer (or a predecessor) on account of such expected decommissioning costs (a nonconforming exclusion), the deduction allowed for a special transfer to the nuclear decommissioning fund maintained with respect to the plant is reduced. In the case of a single special transfer of the full eligible amount, the reduction is equal to the aggregate amount of all nonconforming deduc-

tions and nonconforming exclusions. In the case of a transfer of less than the full eligible amount, the reduction is a ratable portion of such aggregate amount.

(4) *Transfers of qualified nuclear decommissioning funds.* (i) If a special transfer is made to any qualified nuclear decommissioning fund, there is a subsequent transfer of the fund or the assets of the fund (a fund transfer), and § 1.468-6 applies to the fund transfer, any amount of the deduction under paragraph (b) of this section allocable to taxable years ending after the date of the fund transfer will be allowed as a current deduction to the transferor for the taxable year that includes the date of the fund transfer. See § 468A-6(c) for additional rules concerning transfers of decommissioning funds, including the transfer of a portion of the taxpayer's interest in a nuclear power plant. If a taxpayer transfers only part of the fund or the fund's assets, the rules in this paragraph (b)(4) apply only to the corresponding portion of the deduction under paragraph (b) of this section.

(ii) If a deduction is allowed to the transferor under paragraph (b)(4)(i) of this section and the transferee is related to the transferor, the Internal Revenue Service (IRS) will not approve the transferee's schedule of ruling amounts for taxable years beginning after the date of the transfer unless the ruling amounts are deferred in a manner that results in recapture of the acceleration amount. For this purpose—

(A) The acceleration amount is the difference between the deduction allowed under this paragraph (b)(4) and the present value as of the beginning of the acceleration period of the deductions that, but for the transfer, would have been allowed under this paragraph (b) for taxable years during the acceleration period;

(B) The acceleration amount is recaptured if the aggregate present value of the ruling amounts at the beginning of the acceleration period is equal to the amount by which the aggregate present value of the ruling amounts that would have been approved but for this paragraph (b)(4)(ii) exceeds the acceleration amount;

(C) The acceleration period is the period from the first day of the transferor's first taxable year beginning after the date of the transfer until the end of the plant's remaining useful life;

(D) Present values will be determined using the assumptions that are used in determining the transferee's first schedule of ruling amounts; and

(E) A transferor and a transferee are related if their relationship is specified in section 267(b) or section 707(b)(1) or they are treated as a single taxpayer under section 41(f)(1)(A) or (B).

(5) *Special rules*—(i) *Gain or loss not recognized on transfers to fund.* No gain or loss will be recognized on any special transfer.

(ii) *Taxpayer basis in fund.* Notwithstanding any other provision of the Internal Revenue Code (Code) and regulations, the taxpayer's basis in the fund is not increased by reason of the special transfer.

(iii) *Fund basis in transferred property*—(A) *In general.* Except as provided in paragraph (b)(5)(iii)(B) of this section, the fund's basis in any property transferred in a special transfer is the same as the transferor's basis in the property immediately before the transfer.

(B) *Basis in case of election.* If a fund makes the election described in paragraph (b)(2)(ii) of this section, the fund's basis in the property transferred is the fair market value of the property on the date of transfer.

(c) *Schedule of deductions required*—(1) *In general.* A taxpayer may not make a special transfer to a qualified nuclear decommissioning fund unless the taxpayer requests from the IRS a schedule of deduction amounts in connection with such transfer. A schedule of deduction amounts for a nuclear decommissioning fund (schedule of deduction amounts) is a ruling (within the meaning of §601.201(a)(2) of this chapter) specifying the annual deductions (deduction amounts) that, over the taxable years in the remaining useful life of the nuclear power plant, will result in the deduction of the entire amount of the special transfer. Such a request may be combined with a request for a schedule of ruling amounts under §1.468A-3(a). In the case of a combined request, the schedule of deduction

amounts requested under this paragraph (c)(1) must be stated separately from the schedule of ruling amounts requested under §1.468A-3(a) and approval of the schedule of deduction amounts under this section will constitute a separate ruling. A request for a schedule of deduction amounts must comply with all provisions of paragraph (d) of this section.

(2) *Transfers in multiple taxable years.* A taxpayer making a special transfer in more than one taxable year pursuant to paragraph (a)(3) of this section must request a separate schedule of deduction amounts in connection with each special transfer. More than one schedule of deduction amounts can be requested in a single ruling request to the Secretary and the Secretary will provide, in a single ruling, separate schedules of deduction amounts for each of a series of special transfers provided that each request for a separate schedule of deduction amounts complies with all requirements of this paragraph.

(3) *Transfer of partial interest in fund.* If a taxpayer transfers part of a fund or a fund's assets and is allowed a deduction under paragraph (b)(3) of this section, the taxpayer must request a new schedule of deduction amounts in connection with the transfer.

(4) *Special transfer permitted before receipt of schedule.* If an electing taxpayer has filed a timely request for a schedule of deduction amounts in connection with a special transfer for a taxable year and does not receive the schedule of deduction amounts before the deemed payment deadline for such taxable year, the taxpayer may make a special transfer to the nuclear decommissioning fund on the basis of the special transfer amount proposed in the taxpayer's request. If the schedule of deduction amounts provided by the Secretary is based on a special transfer amount that differs from the special transfer amount proposed in the taxpayer's request, rules similar to the rules of §1.468A-3(g)(2) and (3) shall apply.

(d) *Manner of requesting schedule of deduction amounts*—(1) *In general.* (i) In order to receive a deduction amount for any taxable year, a taxpayer must

file a request for a schedule of deduction amounts that complies with the requirements of this paragraph (d), the applicable procedural rules set forth in § 601.201(e) of this chapter (Statement of Procedural Rules) and the requirements of any applicable revenue procedure that is in effect on the date the request is filed.

(ii) A separate request for a schedule of deduction amounts is required for each nuclear decommissioning fund established by a taxpayer (see § 1.468A-5(a) for rules relating to the number of nuclear decommissioning funds that a taxpayer can establish).

(iii) Except as provided by § 1.468A-5(a)(1)(iv) (relating to certain unincorporated organizations that may be taxable as corporations) and § 1.468A-3 (relating to a request for a schedule of ruling amounts), a request for a schedule of deduction amounts must not contain a request for a ruling on any other issue, whether the issue involves section 468A or another section of the Code.

(iv) In the case of an affiliated group of corporations that join in the filing of a consolidated return, the common parent of the group may request a schedule of deduction amounts for each member of the group that possesses a qualifying interest in the same nuclear power plant by filing a single submission with the IRS.

(v) Except as provided in paragraph (d)(1)(vi) of this section, the IRS will not provide or revise a deduction amount applicable to a taxable year in response to a request for a schedule of deduction amounts that is filed after the deemed payment deadline date (as defined in paragraph (a)(4) of this section) for such taxable year.

(vi) For special transfers relating to taxable years beginning after December 31, 2005, and before January 1, 2010, the IRS will not provide a deduction amount in response to a request for a schedule of deduction amounts that is filed after February 22, 2011.

(vii) Except as provided in paragraph (d)(1)(viii) of this section, a request for a schedule of deduction amounts shall be considered filed only if such request complies substantially with the requirements of this paragraph (d). In determining the date when a request is

filed, the principles of sections 7502 and 7503 shall apply.

(viii) If a request does not comply substantially with the requirements of this paragraph (d), the IRS will notify the taxpayer of that fact. If the information or materials necessary to comply substantially with the requirements of this paragraph (d) are provided to the IRS within 30 days after this notification, the request will be considered filed on the date of the original submission. In addition, the request will be considered filed on the date of the original submission in a case in which the information and materials are provided more than 30 days after the notification if the IRS determines that the electing taxpayer made a good faith effort to provide the applicable information or materials within 30 days after notification and also determines that treating the request as filed on the date of the original submission is consistent with the purposes of section 468A. In any other case in which the information or materials necessary to comply substantially with the requirements of this paragraph (d) are not provided within 30 days after the notification, the request will be considered filed on the date that all information or materials necessary to comply with the requirements of this paragraph (d) are provided.

(2) *Information required.* A request for a schedule of deduction amounts must contain the following information:

(i) The taxpayer's name, address and taxpayer identification number.

(ii) Whether the request is for an initial schedule of deduction amounts or a schedule of deduction amounts for a subsequent special transfer.

(iii) The name and location of the nuclear power plant with respect to which a schedule of deduction amounts is requested.

(iv) A description of the taxpayer's qualifying interest in the nuclear power plant and the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents.

(v) The present value of the estimated future decommissioning costs (as defined in § 1.468A-1(b)(6)) with respect to the taxpayer's qualifying interest in the nuclear power plant as of the first day of the taxable year of the

taxpayer in which a transfer is made under this section.

(vi) A description of the assumptions, estimates and other factors that were used by the taxpayer to determine the amount of decommissioning costs, including each of the following if applicable:

(A) A description of the proposed method of decommissioning the nuclear power plant (for example, prompt removal/dismantlement, safe storage entombment with delayed dismantlement, or safe storage mothballing with delayed dismantlement).

(B) The estimated year in which substantial decommissioning costs will first be incurred.

(C) The estimated year in which the decommissioning of the nuclear power plant will be substantially complete (see §1.468A-5(d)(3) for a definition of substantial completion of decommissioning).

(D) The total estimated cost of decommissioning expressed in current dollars (that is, based on price levels in effect at the time of the current determination).

(E) The total estimated cost of decommissioning expressed in future dollars (that is, based on anticipated price levels when expenses are expected to be paid).

(F) For each taxable year in the period that begins with the year specified in paragraph (d)(2)(vi)(B) of this section (the estimated year in which substantial decommissioning costs will first be incurred) and ends with the year specified in paragraph (d)(2)(vi)(C) of this section (the estimated year in which the decommissioning of the nuclear power plant will be substantially complete), the estimated cost of decommissioning expressed in future dollars.

(G) A description of the methodology used in converting the estimated cost of decommissioning expressed in current dollars to the estimated cost of decommissioning expressed in future dollars.

(H) The assumed after-tax rate of return to be earned by the amounts collected for decommissioning.

(I) A copy of each engineering or cost study that was relied on or used by the

taxpayer in determining the amount of decommissioning costs.

(vii) The taxpayer's pre-2005 non-qualifying percentage (as defined in paragraph (a)(2) of this section).

(viii) The estimated useful life of the nuclear power plant (as such term is defined in paragraph (b)(1)(ii) or (iii) of this section).

(ix) If the request is for a subsequent schedule of deduction amounts, the amount of the previous special transfer and the present value of the estimated future decommissioning costs (as defined in §1.468A-1(b)(6)) with respect to the taxpayer's qualifying interest in the nuclear power plant as of the first day of the taxable year of the taxpayer in which the previous special transfer was made.

(x) If the request is for a subsequent schedule of deduction amounts, a copy of all schedules of deduction amounts that relate to the nuclear power plant to which the request relates and that were previously issued to the taxpayer making the request.

(xi) If the request for a schedule of deduction amounts contains a request, pursuant to §1.468A-5(a)(1)(iv), that the IRS rule whether an unincorporated organization through which the assets of the fund are invested is an association taxable as a corporation for Federal tax purposes, a copy of the legal documents establishing or otherwise governing the organization.

(xii) Any other information required by the IRS that may be necessary or useful in determining the schedule of deduction amounts.

(3) *Statement required.* A taxpayer requesting a schedule of deduction amounts under this paragraph (d) must submit a statement that any nonconforming deductions and nonconforming exclusions have reduced the deduction allowed for the special transfer in accordance with paragraph (b)(2) of this section.

(4) *Administrative procedures.* The IRS may prescribe administrative procedures that supplement the provisions of paragraphs (d)(1) and (2) of this section. In addition, the IRS may, in its discretion, waive the requirements of paragraphs (d)(1) and (2) of this section under appropriate circumstances.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

## § 1.468A-9

## 26 CFR Ch. I (4-1-17 Edition)

### § 1.468A-9 Effective/applicability date.

Sections 1.468A-1 through 1.468A-8 are effective on December 23, 2010 and apply with respect to taxable years ending after such date. Special rules that are provided for taxable years ending on or before such date, such as the special rule for certain special transfers contained in § 1.468A-8(a)(4)(ii), apply with respect to such taxable years. In addition, a taxpayer may apply the provisions of §§ 1.468A-1 through 1.468A-8 with respect to a taxable year ending on or before December 23, 2010 if all such provisions are consistently applied.

[T.D. 9512, 75 FR 80701, Dec. 23, 2010]

### § 1.468B Designated settlement funds.

A designated settlement fund, as defined in section 468B(d)(2), is taxed in the manner described in § 1.468B-2. The rules for transferors to a qualified settlement fund described in § 1.468B-3 apply to transferors to a designated settlement fund. Similarly, the rules for claimants of a qualified settlement fund described in § 1.468B-4 apply to claimants of a designated settlement fund. A fund, account, or trust that does not qualify as a designated settlement fund is, however, a qualified settlement fund if it meets the requirements of a qualified settlement fund described in § 1.468B-1.

[T.D. 8459, 57 FR 60988, Dec. 23, 1992]

### § 1.468B-0 Table of contents.

This section lists the table of contents for §§ 1.468B-1 through 1.468B-9.

#### *§ 1.468B-1 Qualified settlement funds.*

- (a) In general.
- (b) Coordination with other entity classifications.
- (c) Requirements.

### § 1.468B-1 Qualified settlement funds.

(a) *In general.* A qualified settlement fund is a fund, account, or trust that satisfies the requirements of paragraph (c) of this section.

(b) *Coordination with other entity classifications.* If a fund, account, or trust that is a qualified settlement fund could be classified as a trust within the meaning of § 301.7701-4 of this chapter, it is classified as a qualified settlement fund for all purposes of the Internal Revenue Code (Code). If a fund, account, or trust, organized as a trust under applicable state law, is a qualified settlement fund, and could be classified as either an association (within the meaning of § 301.7701-2 of this chapter) or a partnership (within the meaning of § 301.7701-3 of this chapter), it is classified as a qualified settlement fund for all purposes of the Code. If a fund, account, or trust, established for contested liabilities pursuant to § 1.461-2(c)(1) is a qualified settlement fund, it is classified as a qualified settlement fund for all purposes of the Code.

(c) *Requirements.* A fund, account, or trust satisfies the requirements of this paragraph (c) if—

(1) It is established pursuant to an order of, or is approved by, the United States, any state (including the District of Columbia), territory, possession, or political subdivision thereof, or any agency or instrumentality (including a court of law) of any of the foregoing and is subject to the continuing jurisdiction of that governmental authority;

(2) It is established to resolve or satisfy one or more contested or uncontested claims that have resulted or may result from an event (or related

series of events) that has occurred and that has given rise to at least one claim asserting liability—

(i) Under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (hereinafter referred to as CERCLA), as amended, 42 U.S.C. 9601 *et seq.*; or

(ii) Arising out of a tort, breach of contract, or violation of law; or

(iii) Designated by the Commissioner in a revenue ruling or revenue procedure; and

(3) The fund, account, or trust is a trust under applicable state law, or its assets are otherwise segregated from other assets of the transferor (and related persons).

(d) *Definitions.* For purposes of this section—

(1) *Transferor.* A “transferor” is a person that transfers (or on behalf of whom an insurer or other person transfers) money or property to a qualified settlement fund to resolve or satisfy claims described in paragraph (c)(2) of this section against that person.

(2) *Related person.* A “related person” is any person who is related to the transferor within the meaning of sections 267(b) or 707(b)(1).

(e) *Governmental order or approval requirement—*(1) *In general.* A fund, account, or trust is “ordered by” or “approved by” a governmental authority described in paragraph (c)(1) of this section when the authority issues its initial or preliminary order to establish, or grants its initial or preliminary approval of, the fund, account, or trust, even if that order or approval may be subject to review or revision. Except as otherwise provided in paragraph (j)(2) of this section, the governmental authority’s order or approval has no retroactive effect and does not permit a fund, account, or trust to be a qualified settlement fund prior to the date the order is issued or the approval is granted.

(2) *Arbitration panels.* An arbitration award that orders the establishment of, or approves, a fund, account, or trust is an order or approval of a governmental authority described in paragraph (c)(1) of this section if—

(i) The arbitration award is judicially enforceable;

(ii) The arbitration award is issued pursuant to a bona fide arbitration proceeding in accordance with rules that are approved by a governmental authority described in paragraph (c)(1) of this section (such as self-regulatory organization-administered arbitration proceedings in the securities industry); and

(iii) The fund, account, or trust is subject to the continuing jurisdiction of the arbitration panel, the court of law that has jurisdiction to enforce the arbitration award, or the governmental authority that approved the rules of the arbitration proceeding.

(f) *Resolve or satisfy requirement*—(1) *Liabilities to provide services or property.* Except as otherwise provided in paragraph (f)(2) of this section, a liability is not described in paragraph (c)(2) of this section if it is a liability for the provision of services or property, unless the transferor's obligation to provide services or property is extinguished by a transfer or transfers to the fund, account, or trust.

(2) *CERCLA liabilities.* A transferor's liability under CERCLA to provide services or property is described in paragraph (c)(2) of this section if following its transfer to a fund, account, or trust the transferor's only remaining liability to the Environmental Protection Agency (if any) is a remote, future obligation to provide services or property.

(g) *Excluded liabilities.* A liability is not described in paragraph (c)(2) of this section if it—

(1) Arises under a workers compensation act or a self-insured health plan;

(2) Is an obligation to refund the purchase price of, or to repair or replace, products regularly sold in the ordinary course of the transferor's trade or business;

(3) Is an obligation of the transferor to make payments to its general trade creditors or debtholders that relates to a title 11 or similar case (as defined in section 368(a)(3)(A)), or a workout; or

(4) Is designated by the Commissioner in a revenue ruling or a revenue procedure (see § 601.601(d)(2)(ii)(b) of this chapter).

(h) *Segregation requirement*—(1) *In general.* If it is not a trust under applicable state law, a fund, account, or trust sat-

isfies the requirements of paragraph (c)(3) of this section if its assets are physically segregated from other assets of the transferor (and related persons). For example, cash held by a transferor in a separate bank account satisfies the segregation requirement of paragraph (c)(3) of this section.

(2) *Classification of fund established to resolve or satisfy allowable and non-allowable claims.* If a fund, account, or trust is established to resolve or satisfy claims described in paragraph (c)(2) of this section as well as other types of claims (*i.e.*, non-allowable claims) arising from the same event or related series of events, the fund is a qualified settlement fund. However, under § 1.468B-3(c), economic performance does not occur with respect to transfers to the qualified settlement fund for non-allowable claims.

(i) [Reserved]

(j) *Classification of fund prior to satisfaction of requirements in paragraph (c) of this section*—(1) *In general.* If a fund, account, or trust is established to resolve or satisfy claims described in paragraph (c)(2) of this section, the assets of the fund, account, or trust are treated as owned by the transferor of those assets until the fund, account, or trust also meets the requirements of paragraphs (c) (1) and (3) of this section. On the date the fund, account, or trust satisfies all the requirements of paragraph (c) of this section, the transferor is treated as transferring the assets to a qualified settlement fund.

(2) *Relation-back rule*—(i) *In general.* If a fund, account, or trust meets the requirements of paragraphs (c)(2) and (c)(3) of this section prior to the time it meets the requirements of paragraph (c)(1) of this section, the transferor and administrator (as defined in § 1.468B-2(k)(3)) may jointly elect (a relation-back election) to treat the fund, account, or trust as coming into existence as a qualified settlement fund on the later of the date the fund, account, or trust meets the requirements of paragraphs (c)(2) and (c)(3) of this section or January 1 of the calendar year in which all the requirements of paragraph (c) of this section are met. If a relation-back election is made, the assets held by the fund, account, or trust on the date the qualified settlement

fund is treated as coming into existence are treated as transferred to the qualified settlement fund on that date.

(ii) *Relation-back election.* A relation-back election is made by attaching a copy of the election statement, signed by each transferor and the administrator, to (and as part of) the timely filed income tax return (including extensions) of the qualified settlement fund for the taxable year in which the fund is treated as coming into existence. A copy of the election statement must also be attached to (and as part of) the timely filed income tax return (including extensions), or an amended return that is consistent with the requirements of §§ 1.468B-1 through 1.468B-4, of each transferor for the taxable year of the transferor that includes the date on which the qualified settlement fund is treated as coming into existence. The election statement must contain—

(A) A legend, “§ 1.468B-1 Relation-Back Election”, at the top of the first page;

(B) Each transferor’s name, address, and taxpayer identification number;

(C) The qualified settlement fund’s name, address, and employer identification number;

(D) The date as of which the qualified settlement fund is treated as coming into existence; and

(E) A schedule describing each asset treated as transferred to the qualified settlement fund on the date the fund is treated as coming into existence. The schedule of assets does not have to identify the amount of cash or the property treated as transferred by a particular transferor. If the schedule does not identify the transferor of each asset, however, each transferor must include with the copy of the election statement that is attached to its income tax return (or amended return) a schedule describing each asset the transferor is treating as transferring to the qualified settlement fund.

(k) *Election to treat a qualified settlement fund as a subpart E trust—(1) In general.* If a qualified settlement fund has only one transferor (as defined in paragraph (d)(1) of this section), the transferor may make an election (grantor trust election) to treat the qualified settlement fund as a trust all

of which is owned by the transferor under section 671 and the regulations thereunder. A grantor trust election may be made whether or not the qualified settlement fund would be classified, in the absence of paragraph (b) of this section, as a trust all of which is treated as owned by the transferor under section 671 and the regulations thereunder. A grantor trust election may be revoked only for compelling circumstances upon consent of the Commissioner by private letter ruling.

(2) *Manner of making grantor trust election—(i) In general.* To make a grantor trust election, a transferor must attach an election statement satisfying the requirements of paragraph (k)(2)(ii) of this section to a timely filed (including extensions) Form 1041, “U.S. Income Tax Return for Estates and Trusts,” that the administrator files on behalf of the qualified settlement fund for the taxable year in which the qualified settlement fund is established. However, if a Form 1041 is not otherwise required to be filed (for example, because the provisions of § 1.671-4(b) apply), then the transferor makes a grantor trust election by attaching an election statement satisfying the requirements of paragraph (k)(2)(ii) of this section to a timely filed (including extensions) income tax return of the transferor for the taxable year in which the qualified settlement fund is established. See § 1.468B-5(c)(2) for transition rules.

(ii) *Requirements for election statement.* The election statement must include a statement by the transferor that the transferor will treat the qualified settlement fund as a grantor trust. The election statement must include the transferor’s name, address, taxpayer identification number, and the legend, “§ 1.468B-1(k) Election.” The election statement and the statement described in § 1.671-4(a) may be combined into a single statement.

(3) *Effect of making the election.* If a grantor trust election is made—

(i) Paragraph (b) of this section, and §§ 1.468B-2, 1.468B-3, and 1.468B-5(a) and (b) do not apply to the qualified settlement fund. However, this section (except for paragraph (b) of this section) and § 1.468B-4 apply to the qualified settlement fund;

(ii) The qualified settlement fund is treated, for Federal income tax purposes, as a trust all of which is treated as owned by the transferor under section 671 and the regulations thereunder;

(iii) The transferor must take into account in computing the transferor's income tax liability all items of income, deduction, and credit (including capital gains and losses) of the qualified settlement fund in accordance with § 1.671-3(a)(1); and

(iv) The reporting obligations imposed by § 1.671-4 on the trustee of a trust apply to the administrator.

(1) *Examples.* The following examples illustrate the rules of this section:

*Example 1.* In a class action brought in a United States federal district court, the court holds that the defendant, Corporation X, violated certain securities laws and must pay damages in the amount of \$150 million. Pursuant to an order of the court, Corporation X transfers \$50 million in cash and transfers property with a fair market value of \$75 million to a state law trust. The trust will liquidate the property and distribute the cash proceeds to the plaintiffs in the class action. The trust is a qualified settlement fund because it was established pursuant to the order of a federal district court to resolve or satisfy claims against Corporation X for securities law violations that have occurred.

*Example 2.* (i) Assume the same facts as in *Example 1*, except that Corporation X and the class of plaintiffs reach an out-of-court settlement that requires Corporation X to establish and fund a state law trust before the settlement agreement is submitted to the court for approval.

(ii) The trust is not a qualified settlement fund because it neither is established pursuant to an order of, nor has it been approved by, a governmental authority described in paragraph (c)(1) of this section.

*Example 3.* On June 1, 1994, Corporation Y establishes a fund to resolve or satisfy claims against it arising from the violation of certain securities laws. On that date, Corporation Y transfers \$10 million to a segregated account. On December 1, 1994, a federal district court approves the fund. Assuming Corporation Y and the administrator of the qualified settlement fund do not make a relation-back election, Corporation Y is treated as the owner of the \$10 million, and is taxable on any income earned on that money, from June 1 through November 30, 1994. The fund is a qualified settlement fund beginning on December 1, 1994.

*Example 4.* (i) On September 1, 1993, Corporation X, which has a taxable year ending

on October 31, enters into a settlement agreement with a plaintiff class for asserted tort liabilities. Under the settlement agreement, Corporation X makes two \$50 million payments into a segregated fund, one on September 1, 1993, and one on October 1, 1993, to resolve or satisfy the tort liabilities. A federal district court approves the settlement agreement on November 1, 1993.

(ii) The administrator of the fund and Corporation X elect to treat the fund as a qualified settlement fund prior to governmental approval under the relation-back rule of paragraph (j)(2) of this section. The administrator must attach the relation-back election statement to the fund's income tax return for calendar year 1993, and Corporation X must attach the election to its original or amended income tax return for its taxable year ending October 31, 1993.

(iii) Pursuant to the relation-back election, the fund begins its existence as a qualified settlement fund on September 1, 1993, and Corporation X is treated as transferring \$50 million to the qualified settlement fund on September 1, 1993, and \$50 million on October 1, 1993.

(iv) With respect to these transfers, Corporation X must provide the statement described in § 1.468B-3(e) to the administrator of the qualified settlement fund by February 15, 1994, and must attach a copy of this statement to its original or amended income tax return for its taxable year ending October 31, 1993.

*Example 5.* Assume the same facts as in *Example 4*, except that the court approves the settlement on May 1, 1994. The administrator must attach the relation-back election statement to the fund's income tax return for calendar year 1994, and Corporation X must attach the election statement to its original or amended income tax return for its taxable year ending October 31, 1994. Pursuant to this election, the fund begins its existence as a qualified settlement fund on January 1, 1994. In addition, Corporation X is treated as transferring to the qualified settlement fund all amounts held in the fund on January 1, 1994. With respect to the transfer, Corporation X must provide the statement described in § 1.468B-3(e) to the administrator of the qualified settlement fund by February 15, 1995, and must attach a copy of this statement to its income tax return for its taxable year ending October 31, 1994.

*Example 6.* Corporation Z establishes a fund that meets all the requirements of section 468B(d)(2) for a designated settlement fund, except that Corporation Z does not make the election under section 468B(d)(2)(F). Although the fund does not qualify as a designated settlement fund, it is a qualified settlement fund because the fund meets the requirements of paragraph (c) of this section.

*Example 7.* Corporation X owns and operates a landfill in State A. State A requires

Corporation X to transfer money to a trust annually based on the total tonnage of material placed in the landfill during the year. Under the laws of State A, Corporation X will be required to perform (either itself or through contractors) specified closure activities when the landfill is full, and the trust assets will be used to reimburse Corporation X for those closure costs. The trust is not a qualified settlement fund because it is established to secure the liability of Corporation X to perform the closure activities.

[T.D. 8459, 57 FR 60989, Dec. 23, 1992; 58 FR 7865, Feb. 10, 1993, as amended by T.D. 9249, 71 FR 6201, Feb. 7, 2006]

**§ 1.468B-2 Taxation of qualified settlement funds and related administrative requirements.**

(a) *In general.* A qualified settlement fund is a United States person and is subject to tax on its modified gross income for any taxable year at a rate equal to the maximum rate in effect for that taxable year under section 1(e).

(b) *Modified gross income.* The “modified gross income” of a qualified settlement fund is its gross income, as defined in section 61, computed with the following modifications—

(1) In general, amounts transferred to the qualified settlement fund by, or on behalf of, a transferor to resolve or satisfy a liability for which the fund is established are excluded from gross income. However, dividends on stock of a transferor (or a related person), interest on debt of a transferor (or a related person), and payments in compensation for late or delayed transfers, are not excluded from gross income.

(2) A deduction is allowed for administrative costs and other incidental expenses incurred in connection with the operation of the qualified settlement fund that would be deductible under chapter 1 of the Internal Revenue Code in determining the taxable income of a corporation. Administrative costs and other incidental expenses include state and local taxes, legal, accounting, and actuarial fees relating to the operation of the qualified settlement fund, and expenses arising from the notification of claimants and the processing of their claims. Administrative costs and other incidental expenses do not include legal fees incurred by, or on behalf of, claimants.

(3) A deduction is allowed for losses sustained by the qualified settlement fund in connection with the sale, exchange, or worthlessness of property held by the fund to the extent the losses would be deductible in determining the taxable income of a corporation under section 165 (f) or (g), and sections 1211(a) and 1212(a).

(4) A deduction is allowed for the amount of a net operating loss of the qualified settlement fund to the extent the loss would be deductible in determining the taxable income of a corporation under section 172(a). For purposes of this paragraph (b)(4), the net operating loss of a qualified settlement fund for a taxable year is the amount by which the deductions allowed under paragraphs (b)(2) and (b)(3) of this section exceed the gross income of the fund computed with the modification described in paragraph (b)(1) of this section.

(c) *Partnership interests held by a qualified settlement fund on February 14, 1992—*(1) *In general.* For taxable years ending prior to January 1, 2003, a qualified settlement fund that holds a partnership interest it acquired prior to February 15, 1992, is allowed a deduction for its distributive share of that partnership’s items of loss, deduction, or credit described in section 702(a) that would be deductible in determining the taxable income (or in the case of a credit, the income tax liability) of a corporation to the extent of the fund’s distributive share of that partnership’s items of income and gain described in section 702(a) for the same taxable year. For purposes of this paragraph (c)(1), a distributive share of a partnership credit is treated as a deduction in an amount equal to the amount of the credit divided by the rate described in paragraph (a) of this section.

(2) *Limitation on changes in partnership agreements and capital contributions.* For purposes of paragraph (c)(1) of this section, changes in a qualified settlement fund’s distributive share of items of income, gain, loss, deduction, or credit are disregarded if—

(i) They result from a change in the terms of the partnership agreement on or after December 18, 1992, or a capital contribution to the partnership on or

after December 18, 1992, unless the partnership agreement as in effect prior to December 18, 1992, requires the contribution; and

(ii) A principal purpose of the change in the terms of the partnership agreement or the capital contribution is to circumvent the limitation described in paragraph (c)(1) of this section.

(d) *Distributions to transferors and claimants.* Amounts that are distributed by a qualified settlement fund to, or on behalf of, a transferor or a claimant are not deductible by the fund.

(e) *Basis of property transferred to a qualified settlement fund.* A qualified settlement fund's initial basis in property it receives from a transferor (or from an insurer or other person on behalf of a transferor) is the fair market value of that property on the date of transfer to the fund.

(f) *Distribution of property.* A qualified settlement fund must treat a distribution of property as a sale or exchange of that property for purposes of section 1001(a). In computing gain or loss, the amount realized by the qualified settlement fund is the fair market value of the property on the date of distribution.

(g) *Other taxes.* The tax imposed under paragraph (a) of this section is in lieu of any other taxation of the income of a qualified settlement fund under subtitle A of the Internal Revenue Code. Thus, a qualified settlement fund is not subject to the alternative minimum tax of section 55, the accumulated earnings tax of section 531, the personal holding company tax of section 541, or the maximum capital gains rate of section 1(h). A qualified settlement fund is, however, subject to taxes that are not imposed on the income of a taxpayer, such as the tax on transfers of property to foreign entities under section 1491.

(h) *Denial of credits against tax.* The tax imposed on the modified gross income of a qualified settlement fund under paragraph (a) of this section may not be reduced or offset by any credits against tax provided by part IV of subchapter A of chapter 1 of the Internal Revenue Code.

(i) [Reserved]

(j) *Taxable year and accounting method.* The taxable year of a qualified set-

tlement fund is the calendar year. A qualified settlement fund must use an accrual method of accounting within the meaning of section 446(c).

(k) *Treatment as corporation for purposes of subtitle F.* Except as otherwise provided in §1.468B-5(b), for purposes of subtitle F of the Internal Revenue Code, a qualified settlement fund is treated as a corporation and any tax imposed under paragraph (a) of this section is treated as a tax imposed by section 11. Subtitle F rules that apply to qualified settlement funds include, but are not limited to—

(1) A qualified settlement fund must file an income tax return with respect to the tax imposed under paragraph (a) of this section for each taxable year that the fund is in existence, whether or not the fund has gross income for that taxable year.

(2) A qualified settlement fund is in existence for the period that—

(i) Begins on the first date on which the fund is treated as a qualified settlement fund under §1.468B-1; and

(ii) Ends on the earlier of the date the fund—

(A) No longer satisfies the requirements of §1.468B-1; or

(B) No longer has any assets and will not receive any more transfers. (See paragraph (m) of this section for procedures for the prompt assessment of tax.)

(3) The income tax return of the qualified settlement fund must be filed on or before March 15 of the year following the close of the taxable year of the qualified settlement fund unless the fund is granted an extension of time for filing under section 6081. The return must be made by the administrator of the qualified settlement fund. The "administrator" (which may include a trustee if the qualified settlement fund is a trust) of a qualified settlement fund is, in order of priority—

(i) The person designated, or approved, by the governmental authority that ordered or approved the fund for purposes of §1.468B-1(c)(1);

(ii) The person designated in the escrow agreement, settlement agreement, or other similar agreement governing the fund;

(iii) The escrow agent, custodian, or other person in possession or control of the fund's assets; or

(iv) The transferor or, if there are multiple transferors, all the transferors, unless an agreement signed by all the transferors designates a single transferor as the administrator.

(4) The administrator of a qualified settlement fund must obtain an employer identification number for the fund.

(5) A qualified settlement fund must deposit all payments of tax imposed under paragraph (a) of this section (including any payments of estimated tax) with an authorized government depository in accordance with § 1.6302-1.

(6) A qualified settlement fund is subject to the addition to tax imposed by section 6655 in the case of an underpayment of estimated tax computed with respect to the tax imposed under paragraph (a) of this section. For purposes of section 6655(g)(2), a qualified settlement fund's taxable income is its modified gross income and a transferor is not considered a predecessor of a qualified settlement fund.

(1) *Information reporting and withholding requirements*—(1) *Payments to a qualified settlement fund.* Payments to a qualified settlement fund are treated as payments to a corporation for purposes of the information reporting requirements of part III of subchapter A of chapter 61 of the Internal Revenue Code.

(2) *Payments and distributions by a qualified settlement fund*—(i) *In general.* Payments and distributions by a qualified settlement fund are subject to the information reporting requirements of part III of subchapter A of chapter 61 of the Internal Revenue Code (Code), and the withholding requirements of subchapter A of chapter 3 of subtitle A and subtitle C of the Code.

(ii) *Special rules.* The following rules apply with respect to payments and distributions by a qualified settlement fund—

(A) A qualified settlement fund must make a return for, or must withhold tax on, a distribution to a claimant if one or more transferors would have been required to make a return or withhold tax had that transferor made

the distribution directly to the claimant;

(B) For purposes of sections 6041(a) and 6041A, if a qualified settlement fund makes a payment or distribution to a transferor, the fund is deemed to make the payment or distribution to the transferor in the course of a trade or business;

(C) For purposes of sections 6041(a) and 6041A, if a qualified settlement fund makes a payment or distribution on behalf of a transferor or a claimant, the fund is deemed to make the payment or distribution to the recipient of that payment or distribution in the course of a trade or business;

(D) With respect to a distribution or payment described in paragraph (1)(2)(ii)(C) of this section and the information reporting requirements of part III of subchapter A of chapter 61 of the Internal Revenue Code, the qualified settlement fund is also deemed to have made the distribution or payment to the transferor or claimant.

(m) *Request for prompt assessment.* A qualified settlement fund is eligible to request the prompt assessment of tax under section 6501(d). For purposes of section 6501(d), a qualified settlement fund is treated as dissolving on the date the fund no longer has any assets (other than a reasonable reserve for potential tax liabilities and related professional fees) and will not receive any more transfers.

(n) *Examples.* The following examples illustrate the rules of this section:

*Example 1.* On June 30, 1993, a United States federal district court approves the settlement of a lawsuit under which Corporation X must transfer \$10,833,000 to a qualified settlement fund on August 1, 1993. The \$10,833,000 includes \$10 million of damages incurred by plaintiffs on October 1, 1992, and \$833,000 of interest calculated at 10 percent annually from October 1, 1992, to August 1, 1993. The \$833,000 of interest is not a payment to the qualified settlement fund in compensation for a late or delayed transfer to the fund within the meaning of paragraph (b)(1) of this section because the payment of \$10,833,000 to the fund is not due until August 1, 1993.

*Example 2.* Assume the same facts as in *Example 1* except that the settlement agreement also provides for interest to accrue at a rate of 12 percent annually on any amount not transferred to the qualified settlement fund on August 1, 1993, and the only transfer

Corporation X makes to the fund is \$11,374,650 on January 1, 1994. The additional payment of \$541,650 (\$11,374,650 paid on January 1, 1994, less \$10,833,000 due on August 1, 1993) is a payment to the qualified settlement fund in compensation for a late or delayed transfer to the fund within the meaning of paragraph (b)(1) of this section.

[T.D. 8459, 57 FR 60991, Dec. 23, 1992; 58 FR 7865, Feb. 10, 1993]

**§ 1.468B-3 Rules applicable to the transferor.**

(a) *Transfer of property*—(1) *In general.* A transferor must treat a transfer of property to a qualified settlement fund as a sale or exchange of that property for purposes of section 1001(a). In computing the gain or loss, the amount realized by the transferor is the fair market value of the property on the date the transfer is made (or is treated as made under § 1.468B-1(g)) to the qualified settlement fund. Because the issuance of a transferor's debt, obligation to provide services or property in the future, or obligation to make a payment described in § 1.461-4(g), is generally not a transfer of property by the transferor, it generally does not result in gain or loss to the transferor under this paragraph (a)(1). If a person other than the transferor transfers property to a qualified settlement fund, there may be other tax consequences as determined under general federal income tax principles.

(2) *Anti-abuse rule.* The Commissioner may disallow a loss resulting from the transfer of property to a qualified settlement fund if the Commissioner determines that a principal purpose for the transfer was to claim the loss and—

(i) The transferor places significant restrictions on the fund's ability to use or dispose of the property; or

(ii) The property (or substantially similar property) is distributed to the transferor (or a related person).

(b) *Qualified appraisal requirement for transfers of certain property*—(1) *In general.* A transferor must obtain a qualified appraisal to support a loss or deduction it claims with respect to a transfer to a qualified settlement fund of the following types of property—

(i) Nonpublicly traded securities (as defined in § 1.170A-13(c)(7)(ix)) issued by the transferor (or a related person); and

(ii) Interests in the transferor (if the transferor is a partnership) and in a partnership in which the transferor (or a related person) is a direct or indirect partner.

(2) *Provision of copies.* The transferor must provide a copy of the qualified appraisal to the administrator of the qualified settlement fund no later than February 15 of the year following the calendar year in which the property is transferred. The transferor also must attach a copy of the qualified appraisal to (and as part of) its timely filed income tax return (including extensions) for the taxable year of the transferor in which the transfer is made.

(3) *Qualified appraisal.* A "qualified appraisal" is a written appraisal that—

(i) Is made within 60 days before or after the date the property is transferred to the qualified settlement fund;

(ii) Is prepared, signed, and dated by an individual who is a qualified appraiser within the meaning of § 1.170A-13(c)(5);

(iii) Includes the information required by paragraph (b)(4) of this section; and

(iv) Does not involve an appraisal fee of the type prohibited by § 1.170A-13(c)(6).

(4) *Information included in a qualified appraisal.* A qualified appraisal must include the following information—

(i) A description of the appraised property;

(ii) The date (or expected date) of the property's transfer to the qualified settlement fund;

(iii) The appraised fair market value of the property on the date (or expected date) of transfer;

(iv) The method of valuing the property, such as the comparable sales approach;

(v) The specific basis for the valuation, such as specific comparable sales or statistical sampling, including a justification for using comparable sales or statistical sampling and an explanation of the procedure employed;

(vi) The terms of any agreement or understanding entered into (or expected to be entered into) by or on behalf of the transferor (or a related person) or the qualified settlement fund that relates to the use, sale, or other disposition of the transferred property,

including, for example, the terms of any agreement or understanding that temporarily or permanently—

(A) Restricts the qualified settlement fund's right to use or dispose of the property; or

(B) Reserves to, or confers upon, any person other than the qualified settlement fund any right (including designating another person as having the right) to income from the property, to possess the property (including the right to purchase or otherwise acquire the property), or to exercise any voting rights with respect to the property;

(vii) The name, address, and taxpayer identification number of the qualified appraiser; and if the qualified appraiser is acting in his or her capacity as a partner in a partnership, an employee of any person, or an independent contractor engaged by a person other than the transferor, the name, address, and taxpayer identification number of the partnership or the person who employs or engages the qualified appraiser;

(viii) The qualifications of the qualified appraiser, including the appraiser's background, experience, education, and membership, if any, in professional appraisal associations; and

(ix) A statement that the appraisal was prepared for income tax purposes.

(5) *Effect of signature of the qualified appraiser.* Any appraiser who falsely or fraudulently overstates the value of the transferred property referred to in a qualified appraisal may be subject to a civil penalty under section 6701 for aiding and abetting an understatement of tax liability and may have appraisals disregarded pursuant to 31 U.S.C. 330(c).

(c) *Economic performance*—(1) *In general.* Except as otherwise provided in this paragraph (c), for purposes of section 461(h), economic performance occurs with respect to a liability described in § 1.468B-1(c)(2) (determined with regard to § 1.468B-1(f) and (g)) to the extent the transferor makes a transfer to a qualified settlement fund to resolve or satisfy the liability.

(2) *Right to a refund or reversion*—(i) *In general.* Economic performance does not occur to the extent—

(A) The transferor (or a related person) has a right to a refund or reversion of a transfer if that right is exer-

cisable currently and without the agreement of an unrelated person that is independent or has an adverse interest (e.g., the court or agency that approved the fund, or the fund claimants); or

(B) Money or property is transferred under conditions that allow its refund or reversion by reason of the occurrence of an event that is certain to occur, such as the passage of time, or if restrictions on its refund or reversion are illusory.

(ii) *Right extinguished.* With respect to a transfer described in paragraph (c)(2)(i) of this section, economic performance is deemed to occur on the date, and to the extent, the transferor's right to a refund or reversion is extinguished.

(3) *Obligations of a transferor.* Economic performance does not occur when a transferor transfers to a qualified settlement fund its debt (or the debt of a related person). Instead, economic performance occurs as the transferor (or related person) makes principal payments on the debt. Similarly, economic performance does not occur when a transferor transfers to a qualified settlement fund its obligation (or the obligation of a related person) to provide services or property in the future, or to make a payment described in § 1.461-4(g). Instead, economic performance with respect to such an obligation occurs as services, property or payments are provided or made to the qualified settlement fund or a claimant.

(d) *Payment of insurance amounts.* No deduction is allowed to a transferor for a transfer to a qualified settlement fund to the extent the transferred amounts represent amounts received from the settlement of an insurance claim and are excludable from gross income. If the settlement of an insurance claim occurs after a transferor makes a transfer to a qualified settlement fund for which a deduction has been taken, the transferor must include in income the amounts received from the settlement of the insurance claim to the extent of the deduction.

(e) *Statement to the qualified settlement fund and the Internal Revenue Service*—

(1) *In general.* A transferor must provide the statement described in paragraph (e)(2) of this section to the administrator of a qualified settlement fund no later than February 15 of the year following each calendar year in which the transferor (or an insurer or other person on behalf of the transferor) makes a transfer to the fund. The transferor must attach a copy of the statement to (and as part of) its timely filed income tax return (including extensions) for the taxable year of the transferor in which the transfer is made.

(2) *Required statement*—(i) *In general.* The statement required by this paragraph (e) must provide the following information—

(A) A legend, “§1.468B-3 Statement”, at the top of the first page;

(B) The transferor’s name, address, and taxpayer identification number;

(C) The qualified settlement fund’s name, address, and employer identification number;

(D) The date of each transfer;

(E) The amount of cash transferred; and

(F) A description of property transferred and its fair market value on the date of transfer.

(ii) *Combined statements.* If a qualified settlement fund has more than one transferor, any two or more of the transferors may provide a combined statement to the administrator that does not identify the amount of cash or the property transferred by a particular transferor. If a combined statement is used, however, each transferor must include with its copy of the statement that is attached to its income tax return a schedule describing each asset that the transferor transferred to the qualified settlement fund.

(f) *Distributions to transferors*—(1) *In general.* A transferor must include in gross income any distribution (including a deemed distribution described in paragraph (f)(2) of this section) it receives from a qualified settlement fund. If property is distributed, the amount includible in gross income and the basis in that property, is the fair market value of the property on the date of the distribution.

(2) *Deemed distributions*—(i) *Other liabilities.* If a qualified settlement fund

makes a distribution on behalf of a transferor to a person that is not a claimant, or to a claimant to resolve or satisfy a liability of the transferor (or a related person) other than a liability described in §1.468B-1(c)(2) for which the fund was established, the distribution is deemed made by the fund to the transferor. The transferor, in turn, is deemed to have made a payment to the actual recipient.

(ii) *Constructive receipt.* To the extent a transferor acquires a right to a refund or reversion described in paragraph (c)(2) of this section of all or a portion of the assets of a qualified settlement fund subsequent to the transfer of those assets to the fund, the fund is deemed to distribute those assets to the transferor on the date the right is acquired.

(3) *Tax benefit rule.* A distribution described in paragraph (f)(1) or (f)(2) of this section is excluded from the gross income of a transferor to the extent provided by section 111(a).

(g) *Example.* The following example illustrates the rules of this section:

*Example.* On March 1, 1993, Individual A transfers \$1 million to a qualified settlement fund to resolve or satisfy claims against him resulting from certain violations of securities laws. Individual A uses the cash receipts and disbursements method of accounting. Since Individual A does not use the accrual method of accounting, the economic performance rules of paragraph (c) of this section are not applicable. Therefore, whether, when, and to what extent Individual A can deduct the transfer is determined under applicable provisions of the Internal Revenue Code, such as sections 162 and 461.

[T.D. 8459, 57 FR 60992, Dec. 23, 1992]

#### § 1.468B-4 Taxability of distributions to claimants.

Whether a distribution to a claimant is includible in the claimant’s gross income is generally determined by reference to the claim in respect of which the distribution is made and as if the distribution were made directly by the transferor. For example, to the extent a distribution is in satisfaction of damages on account of personal injury or sickness, the distribution may be excludable from gross income under section 104(a)(2). Similarly, to the extent a distribution is in satisfaction of a claim for foregone taxable interest, the

## § 1.468B-5

## 26 CFR Ch. I (4-1-17 Edition)

distribution is includible in the claimant's gross income under section 61(a)(4).

[T.D. 8459, 57 FR 60994, Dec. 23, 1992]

### § 1.468B-5 Effective dates and transition rules applicable to qualified settlement funds.

(a) *In general.* Section 468B, including section 468B(g), is effective as provided in the Tax Reform Act of 1986 and the Technical and Miscellaneous Revenue Act of 1988. Except as otherwise provided in this section, §§ 1.468B-1 through 1.468B-4 are effective on January 1, 1993. Thus, the regulations apply to income of a qualified settlement fund earned after December 31, 1992, transfers to a fund after December 31, 1992, and distributions from a fund after December 31, 1992. For purposes of § 1.468B-3(c) (relating to economic performance), previously transferred assets held by a qualified settlement fund on the date these regulations first apply to the fund (i.e., January 1, 1993, or the earlier date provided under paragraph (b)(2) of this section) are treated as transferred to the fund on that date, to the extent no taxpayer has previously claimed a deduction for the transfer.

(b) *Taxation of certain pre-1996 fund income—(1) Reasonable method—(i) In general.* With respect to a fund, account, or trust established after August 16, 1986, but prior to February 15, 1992, that satisfies (or, if it no longer exists, would have satisfied) the requirements of § 1.468B-1(c), the Internal Revenue Service will not challenge a reasonable, consistently applied method of taxation for transfers to the fund, income earned by the fund, and distributions made by the fund after August 16, 1986, but prior to January 1, 1996. A method is generally considered reasonable if, depending on the facts and circumstances, all transferors and the administrator of the fund have consistently treated transfers to the fund, income earned by the fund, and distributions made by the fund after August 16, 1986, as if the fund were—

(A) A grantor trust and the transferors are the grantors;

(B) A complex trust and the transferors are the grantors; or

(C) A designated settlement fund.

(ii) *Qualified settlement funds established after February 14, 1992, but before January 1, 1993.* With respect to a fund, account, or trust established after February 14, 1992, but prior to January 1, 1993, that satisfies the requirements of § 1.468B-1(c), the Internal Revenue Service will not challenge a reasonable, consistently applied method of taxation as described in paragraph (b)(1)(i) of this section for transfers to, income earned by, and distributions made by the fund prior to January 1, 1993. However, pursuant to paragraph (a) of this section, sections 1.468B-1 through 1.468B-4 apply to transfers to, income earned by, and distributions made by the qualified settlement fund after 1992.

(iii) *Use of cash method of accounting.* For purposes of paragraphs (b)(i) and (b)(ii) of this section, for taxable years beginning prior to January 1, 1996, the Internal Revenue Service will not challenge the use of the cash receipts and disbursement method of accounting by a fund, account, or trust.

(iv) *Unreasonable position.* In no event is it a reasonable position to assert, pursuant to Rev. Rul. 71-119 (see § 601.601(d)(2)(ii)(b) of this chapter), that there is no current taxation of the income of a fund established after August 16, 1986.

(v) *Waiver of penalties.* For taxable years beginning prior to January 1, 1993, if a fund, account or trust is subject to section 468B(g) and the Internal Revenue Service does not challenge the method of taxation for transfers to, income earned by, and distributions made by, the fund pursuant to paragraph (b)(1)(i) or (b)(1)(ii) of this section, penalties will not be imposed in connection with the use of such method. For example, the penalties under section 6655 for failure to pay estimated tax, section 6651(a)(1) for failure to file a return, section 6651(a)(2) for failure to pay tax, section 6656 for failure to make deposit of taxes, and section 6662 for accuracy-related underpayments will generally not be imposed.

(2) *Election to apply qualified settlement fund rules—(i) In general.* The person that will be the administrator of a qualified settlement fund may elect to apply §§ 1.468B-1 through 1.468B-4 to

transfers to, income earned by, and distributions made by, the fund in taxable years ending after August 16, 1986. The election is effective beginning on the first day of the earliest open taxable year of the qualified settlement fund. For purposes of this paragraph (b)(2), a taxable year is considered open if the period for assessment and collection of tax has not expired pursuant to the rules of section 6501. The election statement must provide the information described in paragraph (b)(2)(ii) of this section and must be signed by the person that will be the administrator. Such person must also provide each transferor of the qualified settlement fund with a copy of the election statement on or before March 15, 1993.

(ii) *Election statement.* The election statement must provide the following information—

(A) A legend, “§1.468B-5(b)(2) Election”, at the top of the first page;

(B) Each transferor’s name, address, and taxpayer identification number;

(C) The qualified settlement fund’s name, address, and employer identification number; and

(D) The date the qualified settlement fund was established within the meaning of §1.468B-1(j).

(iii) *Due date of returns and amended returns.* The election statement described in paragraph (b)(2)(ii) of this section must be filed with, and as part of, the qualified settlement fund’s timely filed tax return for the taxable year ended December 31, 1992. In addition, the qualified settlement fund must file an amended return that is consistent with the requirements of §§1.468B-1 through 1.468B-4 for any taxable year to which the election applies in which the fund took a position inconsistent with those requirements. Any such amended return must be filed no later than March 15, 1993, and must include a copy of the election statement described in paragraph (b)(2)(ii) of this section.

(iv) *Computation of interest and waiver of penalties.* For purposes of section 6601 and section 6611, the income tax return for each taxable year of the qualified settlement fund to which the election applies is due on March 15 of the year following the taxable year of the fund. For taxable years of a qualified settle-

ment fund ending prior to January 1, 1993, the income earned by the fund is deemed to have been earned on December 31 of each taxable year for purposes of section 6655. Thus, the addition to tax for failure to pay estimated tax under section 6655 will not be imposed. The penalty for failure to file a return under section 6651(a)(1), the penalty for failure to pay tax under section 6651(a)(2), the penalty for failure to make deposit of taxes under section 6656, and the accuracy-related penalty under section 6662 will not be imposed on a qualified settlement fund if the fund files its tax returns for taxable years ending prior to January 1, 1993, and pays any tax due for those taxable years, on or before March 15, 1993.

(c) *Grantor trust elections under §1.468B-1(k)—(1) In general.* A transferor may make a grantor trust election under §1.468B-1(k) if the qualified settlement fund is established after February 3, 2006.

(2) *Transition rules.* A transferor may make a grantor trust election under §1.468B-1(k) for a qualified settlement fund that was established on or before February 3, 2006, if the applicable period of limitation on filing an amended return has not expired for both the qualified settlement fund’s first taxable year and all subsequent taxable years and the transferor’s corresponding taxable year or years. A grantor trust election under this paragraph (c)(2) requires that the returns of the qualified settlement fund and the transferor for all affected taxable years are consistent with the grantor trust election. This requirement may be satisfied by timely filed original returns or amended returns filed before the applicable period of limitation expires.

(3) *Qualified settlement funds established by the U.S. government on or before February 3, 2006.* If the U.S. government, or any agency or instrumentality thereof, established a qualified settlement fund on or before February 3, 2006, and the fund would have been classified as a trust all of which is treated as owned by the U.S. government under section 671 and the regulations thereunder without regard to the regulations under section 468B, then the U.S. government is deemed to have made a grantor trust election under

## § 1.468B-6

## 26 CFR Ch. I (4-1-17 Edition)

§ 1.468B-1(k), and the election is applicable for all taxable years of the fund.

[T.D. 8459, 57 FR 60994, Dec. 23, 1992, as amended by T.D. 9249, 71 FR 6201, Feb. 7, 2006]

### **§ 1.468B-6 Escrow accounts, trusts, and other funds used during deferred exchanges of like-kind property under section 1031(a)(3).**

(a) *Scope.* This section provides rules under section 468B(g) relating to the current taxation of escrow accounts, trusts, and other funds used during deferred exchanges.

(b) *Definitions.* The definitions in this paragraph (b) apply for purposes of this section.

(1) *In general.* *Deferred exchange, escrow agreement, escrow holder, exchange agreement, qualified escrow account, qualified intermediary, qualified trust, relinquished property, replacement property, taxpayer, trust agreement, and trustee* have the same meanings as in § 1.1031(k)-1; deferred exchange also includes any exchange intended to qualify as a deferred exchange, and qualified intermediary also includes any person or entity intended by a taxpayer to be a qualified intermediary within the meaning of § 1.1031(k)-1(g)(4).

(2) *Exchange funds.* *Exchange funds* means relinquished property, cash, or cash equivalent that secures an obligation of a transferee to transfer replacement property, or proceeds from a transfer of relinquished property, held in a qualified escrow account, qualified trust, or other escrow account, trust, or fund in a deferred exchange.

(3) *Exchange facilitator.* *Exchange facilitator* means a qualified intermediary, transferee, escrow holder, trustee, or other party that holds exchange funds for a taxpayer in a deferred exchange pursuant to an escrow agreement, trust agreement, or exchange agreement.

(4) *Transactional expenses*—(i) *In general.* Except as provided in paragraph (b)(4)(ii) of this section, *transactional expenses* means transactional items within the meaning of § 1.1031(k)-1(g)(7)(ii).

(ii) *Special rule for certain fees for exchange facilitator services.* The fee for the services of an exchange facilitator is not a transactional expense unless

the escrow agreement, trust agreement, or exchange agreement, as applicable, provides that—

(A) The amount of the fee payable to the exchange facilitator is fixed on or before the date of the transfer of the relinquished property by the taxpayer (either by stating the fee as a fixed dollar amount in the agreement or determining the fee by a formula, the result of which is known on or before the transfer of the relinquished property by the taxpayer); and

(B) The amount of the fee is payable by the taxpayer regardless of whether the earnings attributable to the exchange funds are sufficient to pay the fee.

(c) *Taxation of exchange funds*—(1) *Exchange funds generally treated as loaned to an exchange facilitator.* Except as provided in paragraph (c)(2) of this section, exchange funds are treated as loaned from a taxpayer to an exchange facilitator (exchange facilitator loan). If a transaction is treated as an exchange facilitator loan under this paragraph (c)(1), the exchange facilitator must take into account all items of income, deduction, and credit (including capital gains and losses) attributable to the exchange funds. See § 1.7872-16 to determine if an exchange facilitator loan is a below-market loan for purposes of section 7872 and § 1.7872-5(b)(16) to determine if an exchange facilitator loan is exempt from section 7872.

(2) *Exchange funds not treated as loaned to an exchange facilitator*—(i) *Scope.* This paragraph (c)(2) applies if, in accordance with an escrow agreement, trust agreement, or exchange agreement, as applicable, all the earnings attributable to a taxpayer's exchange funds are paid to the taxpayer.

(ii) *Earnings attributable to the taxpayer's exchange funds*—(A) *Separately identified account.* If an exchange facilitator holds all of the taxpayer's exchange funds in a separately identified account, the earnings credited to that account are deemed to be all the earnings attributable to the taxpayer's exchange funds for purposes of paragraph (c)(2)(i) of this section. In general, a separately identified account is

an account established under the taxpayer's name and taxpayer identification number with a depository institution. For purposes of paragraph (c)(2)(i) of this section, a sub-account will be treated as a separately identified account if the master account under which the sub-account is created is established with a depository institution, the depository institution identifies the sub-account by the taxpayer's name and taxpayer identification number, and the depository institution specifically credits earnings to the sub-account.

(B) *Allocation of earnings in commingled accounts.* If an exchange facilitator commingles (for investment or otherwise) the taxpayer's exchange funds with other funds or assets, all the earnings attributable to the taxpayer's exchange funds are paid to the taxpayer if all of the earnings attributable to the commingled funds or assets that are allocable on a pro-rata basis (using a reasonable method that takes into account the time that the exchange funds are in the commingled account, actual rate or rates of return, and the respective account balances) to the taxpayer's exchange funds either are paid to the taxpayer or are treated as paid to the taxpayer under paragraph (c)(2)(ii)(C) of this section.

(C) *Transactional expenses.* Any payment from the taxpayer's exchange funds, or from the earnings attributable to the taxpayer's exchange funds, for a transactional expense of the taxpayer (as defined in paragraph (b)(4) of this section) is treated as first paid to the taxpayer and then paid by the taxpayer to the recipient.

(iii) *Treatment of the taxpayer.* If this paragraph (c)(2) applies, exchange funds are not treated as loaned from a taxpayer to an exchange facilitator. The taxpayer must take into account all items of income, deduction, and credit (including capital gains and losses) attributable to the exchange funds.

(d) *Information reporting requirements.* A payor (as defined in §1.6041-1) must report the income attributable to exchange funds to the extent required by the information reporting provisions of subpart B, Part III, subchapter A, chapter 61, Subtitle F of the Internal Rev-

enue Code, and the regulations under those provisions. See §1.6041-1(f) for rules relating to the amount to be reported when fees, expenses or commissions owed by a payee to a third party are deducted from a payment.

(e) *Examples.* The provisions of this section are illustrated by the following examples in which T is a taxpayer that uses a calendar taxable year and the cash receipts and disbursements method of accounting. The examples are as follows:

*Example 1. All earnings attributable to exchange funds paid to taxpayer.* (i) T enters into a deferred exchange with R. The sales agreement provides that T will transfer property (the relinquished property) to R and R will transfer replacement property to T. R's obligation to transfer replacement property to T is secured by cash equal to the fair market value of the relinquished property, which R will deposit into a qualified escrow account that T establishes with B, a depository institution. T enters into an escrow agreement with B that provides that all the earnings attributable to the exchange funds will be paid to T.

(ii) On November 1, 2008, T transfers property to R and R deposits \$2,100,000 in T's qualified escrow account with B. Between November 1 and December 31, 2008, B credits T's account with \$14,000 of interest. During January 2009, B credits T's account with \$7000 of interest. On February 1, 2009, R transfers replacement property worth \$2,100,000 to T and B pays \$2,100,000 from the qualified escrow account to R. Additionally, on February 1, 2009, B pays the \$21,000 of interest to T.

(iii) Under paragraph (b) of this section, the \$2,100,000 deposited with B constitutes exchange funds and B is an exchange facilitator. Because all the earnings attributable to the exchange funds are paid to T in accordance with the escrow agreement, paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to B. T must take into account in computing T's income tax liability for 2008 the \$14,000 of earnings credited to the qualified escrow account in 2008 and for 2009 the \$7,000 of earnings credited to the qualified escrow account in 2009.

*Example 2. Payment of transactional expenses from earnings.* (i) The facts are the same as in *Example 1*, except that the escrow agreement provides that, prior to paying the earnings to T, B may deduct any amounts B has paid to third parties for T's transactional expenses. B pays a third party \$350 on behalf of T for a survey of the replacement property. After deducting \$350 from the earnings attributable to T's qualified escrow account, B

pays T the remainder (\$20,650) of the earnings.

(i) Under paragraph (b)(4) of this section, the cost of the survey is a transactional expense. Under paragraph (c)(2)(ii)(C) of this section, the \$350 that B pays for the survey is treated as first paid to T and then from T to the third party. Therefore, all the earnings attributable to T's exchange funds are paid or treated as paid to T in accordance with the escrow agreement, and paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to B, and T must take into account in computing T's income tax liability the \$21,000 of earnings credited to the qualified escrow account.

*Example 3. Earnings retained by exchange facilitator as compensation for services.* (i) The facts are the same as in *Example 1*, except that the escrow agreement provides that B also may deduct any outstanding fees owed by T for B's services in facilitating the deferred exchange. In accordance with paragraph (b)(4)(ii) of this section, the escrow agreement provides for a fixed fee of \$1,200 for B's services, which is payable by T regardless of the amount of earnings attributable to the exchange funds. Because the earnings on the exchange funds in this case exceed \$1,200, B retains \$1,200 as the unpaid portion of its fee and pays T the remainder (\$19,800) of the earnings.

(ii) Under paragraph (b)(4) of this section, B's fee is treated as a transactional expense. Under paragraph (c)(2)(ii)(C) of this section, the \$1,200 that B retains for its fee is treated as first paid to T and then from T to B. Therefore, all the earnings attributable to T's exchange funds are paid or treated as paid to T in accordance with the escrow agreement, and paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to B, and T must take into account in computing T's income tax liability the \$21,000 of earnings credited to the qualified escrow account.

*Example 4. Exchange funds deposited by exchange facilitator with related depository institution in account in taxpayer's name.* (i) The facts are the same as in *Example 1* except that, instead of entering into an escrow agreement, T enters into an exchange agreement with QI, a qualified intermediary. The exchange agreement provides that R will pay \$2,100,000 to QI, QI will deposit \$2,100,000 into an account with a depository institution under T's name and taxpayer identification number (TIN), and all the earnings attributable to the account will be paid to T.

(ii) On May 1, 2008, T transfers property to QI, QI transfers the property to R, R delivers \$2,100,000 to QI, and QI deposits \$2,100,000 into a money market account with depository institution B under T's name and TIN. B and QI are members of the same consolidated group of corporations within the meaning of

section 1501. Between May 1 and September 1, 2008, the account earns \$28,000 of interest at the stated rate established by B. During the period May 1 to September 1, 2008, B invests T's exchange funds and earns \$40,000. On September 1, 2008, QI uses \$2,100,000 of the funds in the account to purchase replacement property identified by T and transfers the replacement property to T. B pays to T the \$28,000 of interest earned on the money market account at the stated rate.

(iii) Under paragraph (b) of this section, the \$2,100,000 QI receives from R for the relinquished property is exchange funds and QI is an exchange facilitator. B is not an exchange facilitator. T has not entered into an escrow agreement, trust agreement, or exchange agreement with B, and QI, not B, holds the exchange funds on behalf of T. Under paragraph (c)(2)(ii)(A) of this section, the \$40,000 B earns from investing T's exchange funds are not treated as earnings attributable to T's exchange funds. Because all the earnings attributable to T's exchange funds are paid to T in accordance with the exchange agreement, paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to QI, and T must take into account in computing T's income tax liability for 2008 the \$28,000 of interest earned on the money market account.

*Example 5. Earnings of related depository institution credited to exchange facilitator.* (i) The facts are the same as in *Example 4*, except that at the end of each taxable year, B credits a portion of its earnings on deposits to QI. The amount credited is based on the total amount of exchange funds QI has deposited with B during the year. At the end of the 2008 taxable year, B credits \$152,500 of B's earnings to QI.

(ii) Under paragraph (c)(2)(ii)(A) of this section, no part of the \$152,500 credited by B to QI is earnings attributable to T's exchange funds. Therefore, all of the earnings attributable to the exchange funds are paid to T in accordance with the exchange agreement, and paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to QI, and T must take into account in computing T's income tax liability for 2008 the \$28,000 of interest earned on T's account.

*Example 6. Exchange funds deposited by exchange facilitator with unrelated depository institution in sub-account in taxpayer's name.* (i) The facts are the same as in *Example 4*, except that QI and B are unrelated and the money market account in which QI deposits the \$2,100,000 received from T is a sub-account within a master account QI maintains with B in QI's name and TIN. The master account includes other sub-accounts, each in the name and TIN of a taxpayer that has entered into an exchange agreement with QI, into which QI deposits each taxpayer's exchange funds. Each month, B transfers to

QI's master account an additional amount of interest based upon the average daily balance of all exchange funds within the master account during the month. At the end of the 2008 taxable year, B has credited \$152,500 of additional interest to QI.

(ii) Under paragraph (c)(2)(ii)(A) of this section, no part of the \$152,500 credited by B to QI is earnings attributable to T's exchange funds. Therefore, all of the earnings attributable to the exchange funds are paid to T in accordance with the exchange agreement, and paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to QI, and T must take into account in computing T's income tax liability for 2008 the \$28,000 of interest earned on T's account.

*Example 7. Marketing fee paid to exchange facilitator.* (i) The facts are the same as in *Example 4*, except that at the end of each taxable year, B pays a marketing fee to QI for using B as its depository institution for exchange funds. The amount of the fee is based on the total amount of exchange funds QI has deposited with B during the year.

(ii) Under paragraph (c)(2)(ii)(A) of this section, no part of the marketing fee that B pays to QI is earnings attributable to T's exchange funds. Therefore, all of the earnings attributable to the exchange funds are paid to T in accordance with the exchange agreement, and paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to QI, and T must take into account in computing T's income tax liability for 2008 the \$28,000 of interest earned on T's account.

*Example 8. Stated rate of interest on account less than earnings attributable to exchange funds.* (i) The facts are the same as in *Exam-*

*ple 4*, except that the exchange agreement provides only that QI will pay T a stated rate of interest. QI invests the exchange funds and earns \$40,000. The exchange funds earn \$28,000 at the stated rate of interest, and QI pays the \$28,000 to T.

(ii) Paragraph (c)(1) of this section applies and the exchange funds are treated as loaned from T to QI. QI must take into account in computing QI's income tax liability all items of income, deduction, and credit (including capital gains and losses) attributable to the exchange funds. Paragraph (c)(2) of this section does not apply because QI does not pay all the earnings attributable to the exchange funds to T. See §§1.7872-5 and 1.7872-16 for rules relating to exchange facilitator loans.

*Example 9. All earnings attributable to commingled exchange funds paid to taxpayer.* (i) The facts are the same as in *Example 4*, except that the exchange agreement does not specify how the \$2,100,000 QI receives from R must be invested.

(ii) On May 1, 2008, QI deposits the \$2,100,000 with B in a pre-existing interest-bearing account under QI's name and TIN. The account has a total balance of \$5,275,000 immediately thereafter. On the last day of each month between May and September, 2008, the account earns interest as follows: \$17,583 in May, \$17,642 in June, \$18,756 in July, and \$17,472 in August. On July 11, 2008, QI deposits \$500,000 in the account. On August 15, 2008, QI withdraws \$1,175,000 from the account.

(iii) QI calculates T's pro-rata share of the earnings allocable to the \$2,100,000 based on the actual return, the average daily principal balances, and a 30-day month convention, as follows:

| Month        | Account's avg. daily bal. | T's avg. daily bal. | T's share* (percent) | Monthly interest | T's end. bal.** |
|--------------|---------------------------|---------------------|----------------------|------------------|-----------------|
| May .....    | \$5,275,000               | \$2,100,000         | 39.8                 | \$17,583         | \$2,106,998     |
| June .....   | 5,292,583                 | 2,106,998           | 39.8                 | 17,642           | 2,114,020       |
| July .....   | 5,643,558                 | 2,114,020           | 37.5                 | 18,756           | 2,121,054       |
| August ..... | 5,035,647                 | 2,121,054           | 42.1                 | 17,472           | 2,128,410       |

\* T's Average Daily Balance ÷ Account's Average Daily Balance.

\*\* T's beginning balance + [(T's share) (Monthly Interest)].

(iv) On September 1, 2008, QI uses \$2,100,000 of the funds to purchase replacement property identified by T and transfers the property to T. QI pays \$28,410, the earnings of the account allocated to T's exchange funds, to T.

(v) Because QI uses a reasonable method to calculate the pro-rata share of account earnings allocable to T's exchange funds in accordance with paragraph (c)(2)(ii)(B) of this section, and pays all those earnings to T, paragraph (c)(2) of this section applies. The exchange funds are not treated as loaned from T to QI. T must take into account in

computing T's income tax liability for 2008 the \$28,410 of earnings attributable to T's exchange funds.

(f) *Effective/applicability dates*—(1) *In general.* This section applies to transfers of relinquished property made by taxpayers on or after October 8, 2008.

(2) *Transition rule.* With respect to transfers of relinquished property made by taxpayers after August 16, 1986, but before October 8, 2008, the Internal Revenue Service will not challenge a

## § 1.468B-7

## 26 CFR Ch. I (4-1-17 Edition)

reasonable, consistently applied method of taxation for income attributable to exchange funds.

[T.D. 9413, 73 FR 39620, July 10, 2008]

### § 1.468B-7 Pre-closing escrows.

(a) *Scope.* This section provides rules under section 468B(g) for the current taxation of income of a pre-closing escrow.

(b) *Definitions.* For purposes of this section—

(1) A *pre-closing escrow* is an escrow account, trust, or fund—

(i) Established in connection with the sale or exchange of real or personal property;

(ii) Funded with a down payment, earnest money, or similar payment that is deposited into the escrow prior to the sale or exchange of the property;

(iii) Used to secure the obligation of the purchaser to pay the purchase price for the property;

(iv) The assets of which, including any income earned thereon, will be paid to the purchaser or otherwise distributed for the purchaser's benefit when the property is sold or exchanged (for example, by being distributed to the seller as a credit against the purchase price); and

(v) Which is not an escrow account or trust established in connection with a deferred exchange under section 1031(a)(3).

(2) *Purchaser* means, in the case of an exchange, the intended transferee of the property whose obligation to pay the purchase price is secured by the pre-closing escrow;

(3) *Purchase price* means, in the case of an exchange, the required consideration for the property; and

(4) *Administrator* means the escrow agent, escrow holder, trustee, or other person responsible for administering the pre-closing escrow.

(c) *Taxation of pre-closing escrows.* The purchaser must take into account in computing the purchaser's income tax liability all items of income, deduction, and credit (including capital gains and losses) of the pre-closing escrow. In the case of an exchange with a single pre-closing escrow funded by two or more purchasers, each purchaser must take into account in computing the purchaser's income tax liability all

items of income, deduction, and credit (including capital gains and losses) earned by the pre-closing escrow with respect to the money or property deposited in the pre-closing escrow by or on behalf of that purchaser.

(d) *Reporting obligations of the administrator.* For each calendar year (or portion thereof) that a pre-closing escrow is in existence, the administrator must report the income of the pre-closing escrow on Form 1099 to the extent required by the information reporting provisions of subpart B, Part III, subchapter A, chapter 61, Subtitle F of the Internal Revenue Code and the regulations thereunder. See § 1.6041-1(f) for rules relating to the amount to be reported when fees, expenses, or commissions owed by a payee to a third party are deducted from a payment.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

*Example 1.* P enters into a contract with S for the purchase of residential property owned by S for the price of \$200,000. P is required to deposit \$10,000 of earnest money into an escrow. At closing, the \$10,000 and the interest earned thereon will be credited against the purchase price of the property. The escrow is a pre-closing escrow. P is taxable on the interest earned on the pre-closing escrow prior to closing.

*Example 2.* X and Y enter into a contract in which X agrees to exchange certain construction equipment for residential property owned by Y. The contract requires X and Y to each deposit \$10,000 of earnest money into an escrow. At closing, \$10,000 and the interest earned thereon will be paid to X and \$10,000 and the interest earned thereon will be paid to Y. The escrow is a pre-closing escrow. X is taxable on the interest earned prior to closing on the \$10,000 of funds X deposited in the pre-closing escrow. Similarly, Y is taxable on the interest earned prior to closing on the \$10,000 of funds Y deposited in the pre-closing escrow.

(f) *Effective dates—(1) In general.* This section applies to pre-closing escrows established after February 3, 2006.

(2) *Transition rule.* With respect to a pre-closing escrow established after August 16, 1986, but on or before February 3, 2006, the Internal Revenue Service will not challenge a reasonable, consistently applied method of

taxation for income earned by the escrow or a reasonable, consistently applied method for reporting the income.

[T.D. 9249, 71 FR 6202, Feb. 7, 2006]

**§ 1.468B-8 Contingent-at-closing escrows. [Reserved]**

**§ 1.468B-9 Disputed ownership funds.**

(a) *Scope.* This section provides rules under section 468B(g) relating to the current taxation of income of a disputed ownership fund.

(b) *Definitions.* For purposes of this section—

(1) *Disputed ownership fund* means an escrow account, trust, or fund that—

(i) Is established to hold money or property subject to conflicting claims of ownership;

(ii) Is subject to the continuing jurisdiction of a court;

(iii) Requires the approval of the court to pay or distribute money or property to, or on behalf of, a claimant, transferor, or transferor-claimant; and

(iv) Is not a qualified settlement fund under § 1.468B-1, a bankruptcy estate (or part thereof) resulting from the commencement of a case under title 11 of the United States Code, or a liquidating trust under § 301.7701-4(d) of this chapter (except as provided in paragraph (c)(2)(ii) of this section);

(2) *Administrator* means a person designated as such by a court having jurisdiction over a disputed ownership fund, however, if no person is designated, the administrator is the escrow agent, escrow holder, trustee, receiver, or other person responsible for administering the fund;

(3) *Claimant* means a person who claims ownership of, in whole or in part, or a legal or equitable interest in, money or property immediately before and immediately after that property is transferred to a disputed ownership fund;

(4) *Court* means a court of law or equity of the United States or of any state (including the District of Columbia), territory, possession, or political subdivision thereof;

(5) *Disputed property* means money or property held in a disputed ownership fund subject to the claimants' conflicting claims of ownership;

(6) *Related person* means any person that is related to a transferor within the meaning of section 267(b) or 707(b)(1);

(7) *Transferor* means, in general, a person that transfers disputed property to a disputed ownership fund, except that—

(i) If disputed property is transferred by an agent, fiduciary, or other person acting in a similar capacity, the transferor is the person on whose behalf the agent, fiduciary, or other person acts; and

(ii) A payor of interest or other income earned by a disputed ownership fund is not a transferor within the meaning of this section (unless the payor is also a claimant);

(8) *Transferor-claimant* means a transferor that claims ownership of, in whole or in part, or a legal or equitable interest in, the disputed property immediately before and immediately after that property is transferred to the disputed ownership fund. Because a transferor-claimant is both a transferor and a claimant, generally the terms *transferor* and *claimant* also include a transferor-claimant. See paragraph (d) of this section for rules applicable only to transferors that are not transferor-claimants and paragraph (e) of this section for rules applicable only to transferors that are also transferor-claimants.

(c) *Taxation of a disputed ownership fund*—(1) *In general.* For Federal income tax purposes, a disputed ownership fund is treated as the owner of all assets that it holds. A disputed ownership fund is treated as a C corporation for purposes of subtitle F of the Internal Revenue Code, and the administrator of the fund must obtain an employer identification number for the fund, make all required income tax and information returns, and deposit all tax payments. Except as otherwise provided in this section, a disputed ownership fund is taxable as—

(i) A C corporation, unless all the assets transferred to the fund by or on behalf of transferors are passive investment assets. For purposes of this section, passive investment assets are assets of the type that generate portfolio income within the meaning of § 1.469-2T(c)(3)(i); or

(ii) A qualified settlement fund, if all the assets transferred to the fund by or on behalf of transferors are passive investment assets. A disputed ownership fund taxable as a qualified settlement fund under this section is subject to all the provisions contained in § 1.468B-2, except that the rules contained in paragraphs (c)(3), (4), and (c)(5)(i) of this section apply in lieu of the rules in § 1.468B-2(b)(1), (d), (e), (f) and (j).

(2) *Exceptions.* (i) The claimants to a disputed ownership fund may submit a private letter ruling request proposing a method of taxation different than the method provided in paragraph (c)(1) of this section.

(ii) The trustee of a liquidating trust established pursuant to a plan confirmed by the court in a case under title 11 of the United States Code may, in the liquidating trust's first taxable year, elect to treat an escrow account, trust, or fund that holds assets of the liquidating trust that are subject to disputed claims as a disputed ownership fund. Pursuant to this election, creditors holding disputed claims are not treated as transferors of the money or property transferred to the disputed ownership fund. A trustee makes the election by attaching a statement to the timely filed Federal income tax return of the disputed ownership fund for the taxable year for which the election becomes effective. The election statement must include a statement that the trustee will treat the escrow account, trust, or fund as a disputed ownership fund and must include a legend, "§ 1.468B-9(c) Election," at the top of the page. The election may be revoked only upon consent of the Commissioner by private letter ruling.

(3) *Property received by the disputed ownership fund—(i) Generally excluded from income.* In general, a disputed ownership fund does not include an amount in income on account of a transfer of disputed property to the disputed ownership fund. However, the accrual or receipt of income from the disputed property in a disputed ownership fund is not a transfer of disputed property to the fund. Therefore, a disputed ownership fund must include in income all income received or accrued from the disputed property, including items such as—

(A) Payments to a disputed ownership fund made in compensation for late or delayed transfers of money or property;

(B) Dividends on stock of a transferor (or a related person) held by the fund; and

(C) Interest on debt of a transferor (or a related person) held by the fund.

(ii) *Basis and holding period.* In general, the initial basis of property transferred by, or on behalf of, a transferor to a disputed ownership fund is the fair market value of the property on the date of transfer to the fund, and the fund's holding period begins on the date of the transfer. However, if the transferor is a transferor-claimant, the fund's initial basis in the property is the same as the basis of the transferor-claimant immediately before the transfer to the fund, and the fund's holding period for the property is determined under section 1223(2).

(4) *Property distributed by the disputed ownership fund—(i) Computing gain or loss.* Except in the case of a distribution or deemed distribution described in paragraph (e)(3) of this section, a disputed ownership fund must treat a distribution of disputed property as a sale or exchange of that property for purposes of section 1001(a). In computing gain or loss, the amount realized by the disputed ownership fund is the fair market value of that property on the date of distribution.

(ii) *Denial of deduction.* A disputed ownership fund is not allowed a deduction for a distribution of disputed property or of the net after-tax income earned by the disputed ownership fund made to or on behalf of a transferor or claimant.

(5) *Taxable year and accounting method.* (i) A disputed ownership fund taxable as a C corporation under paragraph (c)(1)(i) of this section may compute taxable income under any accounting method allowable under section 446 and is not subject to the limitations contained in section 448. A disputed ownership fund taxable as a C corporation may use any taxable year allowable under section 441.

(ii) A disputed ownership fund taxable as a qualified settlement fund under paragraph (c)(1)(ii) of this section may compute taxable income

under any accounting method allowable under section 446 and may use any taxable year allowable under section 441.

(iii) Appropriate adjustments must be made by a disputed ownership fund or transferors to the fund to prevent the fund and the transferors from taking into account the same item of income, deduction, gain, loss, or credit (including capital gains and losses) more than once or from omitting such items. For example, if a transferor that is not a transferor-claimant uses the cash receipts and disbursements method of accounting and transfers an account receivable to a disputed ownership fund that uses an accrual method of accounting, at the time of the transfer of the account receivable to the disputed ownership fund, the transferor must include in its gross income the value of the account receivable because, under paragraph (c)(3)(ii) of this section, the disputed ownership fund will take a fair market value basis in the receivable and will not include the fair market value in its income when received from the transferor or when paid by the customer. If the account receivable were transferred to the disputed ownership fund by a transferor-claimant using the cash receipts and disbursements method, however, the disputed ownership fund would take a basis in the receivable equal to the transferor's basis, or \$0, and would be required to report the income upon collection of the account.

(6) *Unused carryovers.* Upon the termination of a disputed ownership fund, if the fund has an unused net operating loss carryover under section 172, an unused capital loss carryover under section 1212, or an unused tax credit carryover, or if the fund has, for its last taxable year, deductions in excess of gross income, the claimant to which the fund's net assets are distributable will succeed to and take into account the fund's unused net operating loss carryover, unused capital loss carryover, unused tax credit carryover, or excess of deductions over gross income for the last taxable year of the fund. If the fund's net assets are distributable to more than one claimant, the unused net operating loss carryover, unused capital loss carryover, unused tax cred-

it carryover, or excess of deductions over gross income for the last taxable year must be allocated among the claimants in proportion to the value of the assets distributable to each claimant from the fund. Unused carryovers described in this paragraph (c)(6) are not money or other property for purposes of paragraph (e)(3)(ii) of this section and thus are not deemed transferred to a transferor-claimant before being transferred to the claimants described in this paragraph (c)(6).

(d) *Rules applicable to transferors that are not transferor-claimants.* The rules in this paragraph (d) apply to transferors (as defined in paragraph (b)(7) of this section) that are not transferor-claimants (as defined in paragraph (b)(8) of this section).

(1) *Transfer of property.* A transferor must treat a transfer of property to a disputed ownership fund as a sale or other disposition of that property for purposes of section 1001(a). In computing the gain or loss on the disposition, the amount realized by the transferor is the fair market value of the property on the date the transfer is made to the disputed ownership fund.

(2) *Economic performance—(i) In general.* For purposes of section 461(h), if a transferor using an accrual method of accounting has a liability for which economic performance would otherwise occur under § 1.461-4(g) when the transferor makes payment to the claimant or claimants, economic performance occurs with respect to the liability when and to the extent that the transferor makes a transfer to a disputed ownership fund to resolve or satisfy that liability.

(ii) *Obligations of the transferor.* Economic performance does not occur when a transferor using an accrual method of accounting issues to a disputed ownership fund its debt (or provides the debt of a related person). Instead, economic performance occurs as the transferor (or related person) makes principal payments on the debt. Economic performance does not occur when the transferor provides to a disputed ownership fund its obligation (or the obligation of a related person) to provide property or services in the future or to make a payment described in § 1.461-4(g)(1)(ii)(A). Instead, economic

performance occurs with respect to such an obligation as property or services are provided or payments are made to the disputed ownership fund or a claimant. With regard to interest on a debt issued or provided to a disputed ownership fund, economic performance occurs as determined under § 1.461-4(e).

(3) *Distributions to transferors*—(i) *In general*. Except as provided in section 111(a) and paragraph (d)(3)(ii) of this section, the transferor must include in gross income any distribution to the transferor (including a deemed distribution described in paragraph (d)(3)(iii) of this section) from the disputed ownership fund. If property is distributed, the amount includible in gross income and the basis in that property are generally the fair market value of the property on the date of distribution.

(ii) *Exception*. A transferor is not required to include in gross income a distribution of money or property that it previously transferred to the disputed ownership fund if the transferor did not take into account, for example, by deduction or capitalization, an amount with respect to the transfer either at the time of the transfer to, or while the money or property was held by, the disputed ownership fund. The transferor's gross income does not include a distribution of money from the disputed ownership fund equal to the net after-tax income earned on money or property transferred to the disputed ownership fund by the transferor while that money or property was held by the fund. Money distributed to a transferor by a disputed ownership fund will be deemed to be distributed first from the money or property transferred to the disputed ownership fund by that transferor, then from the net after-tax income of any money or property transferred to the disputed ownership fund by that transferor, and then from other sources.

(iii) *Deemed distributions*. If a disputed ownership fund makes a distribution of money or property on behalf of a transferor to a person that is not a claimant, the distribution is deemed made by the fund to the transferor. The transferor, in turn, is deemed to make a payment to the actual recipient.

(e) *Rules applicable to transferor-claimants*. The rules in this paragraph (e) apply to transferor-claimants (as defined in paragraph (b)(8) of this section).

(1) *Transfer of property*. A transfer of property by a transferor-claimant to a disputed ownership fund is not a sale or other disposition of the property for purposes of section 1001(a).

(2) *Economic performance*—(i) *In general*. For purposes of section 461(h), if a transferor-claimant using an accrual method of accounting has a liability for which economic performance would otherwise occur under § 1.461-4(g) when the transferor-claimant makes payment to another claimant, economic performance occurs with respect to the liability when and to the extent that the disputed ownership fund transfers money or property to the other claimant to resolve or satisfy that liability.

(ii) *Obligations of the transferor-claimant*. Economic performance does not occur when a disputed ownership fund transfers the debt of a transferor-claimant (or of a person related to the transferor-claimant) to another claimant. Instead, economic performance occurs as principal payments on the debt are made to the other claimant. Economic performance does not occur when a disputed ownership fund transfers to another claimant the obligation of a transferor-claimant (or of a person related to the transferor-claimant) to provide property or services in the future or to make a payment described in § 1.461-4(g)(1)(ii)(A). Instead, economic performance occurs with respect to such an obligation as property or services are provided or payments are made to the other claimant. With regard to interest on a debt issued or provided to a disputed ownership fund, economic performance occurs as determined under § 1.461-4(e).

(3) *Distributions to transferor-claimants*—(i) *In general*. The gross income of a transferor-claimant does not include a distribution to the transferor-claimant (including a deemed distribution described in paragraph (e)(3)(ii) of this section) of money or property from a disputed ownership fund that the transferor-claimant previously transferred to the fund, or the net after-tax

income earned on that money or property while it was held by the fund. If such property is distributed to the transferor-claimant by the disputed ownership fund, then the transferor-claimant's basis in the property is the same as the disputed ownership fund's basis in the property immediately before the distribution.

(ii) *Deemed distributions.* If a disputed ownership fund makes a distribution of money or property to a claimant or makes a distribution of money or property on behalf of a transferor-claimant to a person that is not a claimant, the distribution is deemed made by the fund to the transferor-claimant. The transferor-claimant, in turn, is deemed to make a payment to the actual recipient.

(f) *Distributions to claimants other than transferor-claimants.* Whether a claimant other than a transferor-claimant must include in gross income a distribution of money or property from a disputed ownership fund generally is determined by reference to the claim in respect of which the distribution is made.

(g) *Statement to the disputed ownership fund and the Internal Revenue Service with respect to transfers of property other than cash—(1) In general.* By February 15 of the year following each calendar year in which a transferor (or other person acting on behalf of a transferor) makes a transfer of property other than cash to a disputed ownership fund, the transferor must provide a statement to the administrator of the fund setting forth the information described in paragraph (g)(3) of this section. The transferor must attach a copy of this statement to its return for the taxable year of transfer.

(2) *Combined statements.* If a disputed ownership fund has more than one transferor, any two or more transferors may provide a combined statement to the administrator. If a combined statement is used, each transferor must attach a copy of the combined statement to its return and maintain with its books and records a schedule describing each asset that the transferor transferred to the disputed ownership fund.

(3) *Information required on the statement.* The statement required by para-

graph (g)(1) of this section must include the following information—

(i) A legend, “§1.468B-9 Statement,” at the top of the first page;

(ii) The transferor's name, address, and taxpayer identification number;

(iii) The disputed ownership fund's name, address, and employer identification number;

(iv) A statement declaring whether the transferor is a transferor-claimant;

(v) The date of each transfer;

(vi) A description of the property (other than cash) transferred; and

(vii) The disputed ownership fund's basis in the property and holding period on the date of transfer as determined under paragraph (c)(3)(ii) of this section.

(h) *Examples.* The following examples illustrate the rules of this section:

*Example 1.* (i) X Corporation petitions the United States Tax Court in 2006 for a redetermination of its tax liability for the 2003 taxable year. In 2006, the Tax Court determines that X Corporation is liable for an income tax deficiency for the 2003 taxable year. X Corporation files an appellate bond in accordance with section 7485(a) and files a notice of appeal with the appropriate United States Court of Appeals. In 2006, the Court of Appeals affirms the decision of the Tax Court and the United States Supreme Court denies X Corporation's petition for a writ of certiorari.

(ii) The appellate bond that X Corporation files with the court for the purpose of staying assessment and collection of deficiencies pending appeal is not an escrow account, trust or fund established to hold property subject to conflicting claims of ownership. Although X Corporation was found liable for an income tax deficiency, ownership of the appellate bond is not disputed. Rather, the bond serves as security for a disputed liability. Therefore, the bond is not a disputed ownership fund.

*Example 2.* (i) The facts are the same as *Example 1*, except that X Corporation deposits United States Treasury bonds with the Tax Court in accordance with section 7845(c)(2) and 31 U.S.C. 9303.

(ii) The deposit of United States Treasury bonds with the court for the purpose of staying assessment and collection of deficiencies while X Corporation prosecutes an appeal does not create a disputed ownership fund because ownership of the bonds is not disputed.

*Example 3.* (i) Prior to A's death, A was the insured under a life insurance policy issued by X, an insurance company. X uses an accrual method of accounting. Both A's current spouse and A's former spouse claim to

be the beneficiary under the policy and entitled to the policy proceeds (\$1 million). In 2005, X files an interpleader action and deposits \$1 million into the registry of the court. On June 1, 2006, a final determination is made that A's current spouse is the beneficiary under the policy and entitled to the money held in the registry of the court. The interest earned on the registry account is \$12,000. The money in the registry account is distributed to A's current spouse.

(ii) The money held in the registry of the court consisting of the policy proceeds and the earnings thereon are a disputed ownership fund taxable as if it were a qualified settlement fund. See paragraphs (b)(1) and (c)(1)(ii) of this section. The fund's gross income does not include the \$1 million transferred to the fund by X, however, the \$12,000 interest is included in the fund's gross income in accordance with its method of accounting. See paragraph (c)(3)(i) of this section. Under paragraph (c)(4)(ii) of this section, the fund is not allowed a deduction for a distribution to A's current spouse of the \$1 million or the interest income earned by the fund.

(iii) X is a transferor that is not a transferor-claimant. See paragraphs (b)(7) and (b)(8) of this section.

(iv) Whether A's current spouse must include in income the \$1 million insurance proceeds and the interest received from the fund is determined under other provisions of the Internal Revenue Code. See paragraph (f) of this section.

*Example 4.* (i) Corporation B and unrelated individual C claim ownership of certain rental property. B uses an accrual method of accounting. The rental property is property used in a trade or business. B claims to have purchased the property from C's father. However, C asserts that the purported sale to B was ineffective and that C acquired ownership of the property through intestate succession upon the death of C's father. For several years, B has maintained and received the rent from the property.

(ii) Pending the resolution of the title dispute between B and C, the title to the rental property is transferred to a court-supervised registry account on February 1, 2005. On that date the court appoints R as receiver for the property. R collects the rent earned on the property and hires employees necessary for the maintenance of the property. The rents paid to R cannot be distributed to B or C without the court's approval.

(iii) On June 1, 2006, the court makes a final determination that the rental property is owned by C. The court orders C to refund to B the purchase price paid by B to C's father plus interest on that amount from February 1, 2005. The court also orders that a distribution be made to C of all funds held in the court registry consisting of the rent col-

lected by R and the income earned thereon. C takes title to the rental property.

(iv) The rental property and the funds held by the court registry are a disputed ownership fund under paragraph (b)(1) of this section. The fund is taxable as if it were a C corporation because the rental property is not a passive investment asset within the meaning of paragraph (c)(1)(i) of this section.

(v) The fund's gross income does not include the value of the rental property transferred to the fund by B. See paragraph (c)(3)(i) of this section. Under paragraph (c)(3)(ii) of this section, the fund's initial basis in the property is the same as B's adjusted basis immediately before the transfer to the fund and the fund's holding period is determined under section 1223(2). The fund's gross income includes the rents collected by R and any income earned thereon. For the period between February 1, 2005, and June 1, 2006, the fund may be allowed deductions for depreciation and for the costs of maintenance of the property because the fund is treated as owning the property during this period. See sections 162, 167, and 168. Under paragraph (c)(4)(ii) of this section, the fund may not deduct the distribution to C of the property, or the rents (or any income earned thereon) collected from the property while the fund holds the property. No gain or loss is recognized by the fund from this distribution or from the fund's transfer of the rental property to C pursuant to the court's determination that C owns the property. See paragraphs (c)(4)(i) and (e)(3) of this section.

(vi) B is the transferor to the fund. Under paragraphs (b)(8) and (e)(1) of this section, B is a transferor-claimant and does not recognize gain or loss under section 1001(a) on transfer of the property to the disputed ownership fund. The money and property distributed from the fund to C is deemed to be distributed first to B and then transferred from B to C. See paragraph (e)(3)(ii) of this section. Under paragraph (e)(2)(i) of this section, economic performance occurs when the disputed ownership fund transfers the property and any earnings thereon to C. The income tax consequences of the deemed transfer from B to C as well as the income tax consequences of C's refund to B of the purchase price paid to C's father and interest thereon are determined under other provisions of the Internal Revenue Code.

(i) [Reserved]

(j) *Effective dates—(1) In general.* This section applies to disputed ownership funds established after February 3, 2006.

(2) *Transition rule.* With respect to a disputed ownership fund established after August 16, 1986, but on or before February 3, 2006, the Internal Revenue

## Internal Revenue Service, Treasury

## § 1.469-0

Service will not challenge a reasonable, consistently applied method of taxation for income earned by the fund, transfers to the fund, and distributions made by the fund.

[T.D. 9249, 71 FR 6202, Feb. 7, 2006]

### § 1.469-0 Table of contents.

This section lists the captions that appear in the regulations under section 469.

#### § 1.469-1 General rules.

- (a)-(c)(7) [Reserved]
- (c)(8) Consolidated groups.
- (c)(9)-(d)(1) [Reserved]
- (2) Coordination with sections 613A(d) and 1211.
  - (d)(3)-(e)(1) [Reserved]
  - (2) Trade or business activity.
  - (e)(3)(i)-(e)(3)(ii) [Reserved]
  - (iii) Average period of customer use.
    - (A) In general.
    - (B) Average use factor.
    - (C) Average period of customer use for class of property.
    - (D) Period of customer use.
    - (E) Class of property.
    - (F) Gross rental income and daily rent.
  - (e)(3)(iv)-(e)(3)(vi)(C) [Reserved]
  - (D) Lodging rented for convenience of employer.
    - (E) Unadjusted basis.
  - (e)(3)(vii)-(e)(4)(iii) [Reserved]
  - (iv) Definition of "working interest."
    - (e)(4)(v)-(vi) [Reserved]
  - (5) Rental of dwelling unit.
  - (e)(6)-(f)(3)(iii) [Reserved]
- (4) Carryover of disallowed deductions and credits.
  - (i) In general.
  - (ii) Operations continued through C corporations or similar entities.
  - (iii) Examples.
    - (g)(1)-(g)(4)(ii)(B) [Reserved]
  - (4)(ii)(C) (no paragraph heading)
  - (5) [Reserved]
- (h)(1) In general.
- (2) Definitions.
- (3) [Reserved]
- (4) Status and participation of members.
  - (i) Determination by reference to status and participation of group.
  - (ii) Determination of status and participation of consolidated group.
  - (5) [Reserved]
- (6) Intercompany transactions.
  - (i) In general.
  - (ii) Example.
  - (iii) Effective dates.
- (h)(7)-(k) [Reserved]

#### § 1.469-1T General rules (temporary).

- (a) Passive activity loss and credit disallowed.

- (1) In general.
- (2) Exceptions.
- (b) Taxpayers to whom these rules apply.
- (c) Cross references.
  - (1) Definition of passive activity.
  - (2) Passive activity loss.
  - (3) Passive activity credit.
  - (4) Effect of rules for other purposes.
  - (5) Special rule for oil and gas working interests.
  - (6) Treatment of disallowed losses and credits.
  - (7) Corporations subject to section 469.
  - (8) [Reserved]
  - (9) Joint returns.
  - (10) Material participation.
  - (11) Effective date and transition rules.
  - (12) Future regulations.
- (d) Effect of section 469 and the regulations thereunder for other purposes.
  - (1) Treatment of items of passive activity income and gain.
  - (2) Coordination with sections 613A(d) and 1211. [Reserved]
  - (3) Treatment of passive activity losses.
  - (e) Definition of "passive activity."
    - (1) In general.
    - (2) Trade or business activity. [Reserved]
    - (3) Rental Activity.
      - (i) In general.
      - (ii) Exceptions.
    - (iii) Average period of customer use. [Reserved]
      - (A) In general. [Reserved]
      - (B) Average use factor. [Reserved]
      - (C) Average period of customer use for class of property. [Reserved]
      - (D) Period of Customer use. [Reserved]
      - (E) Class of property. [Reserved]
      - (F) Gross rental income and daily rent. [Reserved]
    - (iv) Significant personal services.
      - (A) In general.
      - (B) Excluded services.
      - (v) Extraordinary personal services.
      - (vi) Rental of property incidental to a nonrental activity of the taxpayer.
        - (A) In general.
        - (B) Property held for investment.
        - (C) Property used in a trade or business.
        - (D) Lodging rented for convenience of employer. [Reserved]
        - (E) Unadjusted basis. [Reserved]
        - (vii) Property made available for use in a nonrental activity conducted by a partnership, S corporation or joint venture in which the taxpayer owns an interest.
        - (viii) Examples.
    - (4) Special rules for oil and gas working interests.
      - (i) In general.
      - (ii) Exception for deductions attributable to a period during which liability is limited.
        - (A) In general.
        - (B) Coordination with rules governing the identification of disallowed passive activity deductions.

- (C) Meaning of certain terms.
  - (1) Allocable deductions.
  - (2) Disqualified deductions.
  - (3) Net loss.
  - (4) Ratable portion.
  - (iii) Examples.
  - (iv) Definition of “working interest.” [Reserved]
  - (v) Entities that limit liability.
    - (A) General rule.
    - (B) Other limitations disregarded.
    - (C) Examples.
  - (vi) Cross reference to special rule for income from certain oil or gas properties.
  - (5) Rental of dwelling unit. [Reserved]
  - (6) Activity of trading personal property.
    - (i) In general.
    - (ii) Personal property.
    - (iii) Example.
  - (f) Treatment of disallowed passive activity losses and credits.
    - (1) Scope of this paragraph.
    - (2) Identification of disallowed passive activity deductions.
      - (i) Allocation of disallowed passive activity deductions.
        - (A) General rule.
        - (B) Loss from an activity.
        - (C) Significant participation passive activities.
        - (D) Examples.
          - (ii) Allocation with loss activities.
            - (A) In general.
            - (B) Excluded deductions.
          - (iii) Separately identified deductions.
      - (3) Identification of disallowed credits from passive activities.
        - (i) General rule.
        - (ii) Coordination rule.
        - (iii) Separately identified credits.
      - (4) Carryover of disallowed deductions and credits. [Reserved]
        - (i) In general.
        - (ii) Operations continued through C corporations or similar entities.
        - (iii) Examples.
      - (g) Application of these rules to C corporations.
        - (1) In general.
        - (2) Definitions.
        - (3) Participation of corporations.
          - (i) Material participation.
          - (ii) Significant participation.
          - (iii) Participation of individual.
        - (4) Modified computation of passive activity loss in the case of closely held corporations.
          - (i) In general.
          - (ii) Net active income.
          - (iii) Examples.
        - (5) Allowance of passive activity credit of closely held corporations to extent of net active income tax liability.
          - (i) In general.
          - (ii) Net active income tax liability.
        - (h) Special rules for affiliated group filing consolidated return.

- (1)-(2) [Reserved]
- (3) Disallowance of consolidated group’s passive activity loss or credit.
- (4) Status and participation of members. [Reserved]
  - (i) Determination by reference to status and participation of group. [Reserved]
  - (ii) Determination of status and participation of consolidated group. [Reserved]
  - (5) Modification of rules for identifying disallowed passive activity deductions and credits.
    - (i) Identification of disallowed deductions.
    - (ii) Ratable portion of disallowed passive activity losses.
    - (iii) Identification of disallowed credits.
  - (6) [Reserved]
  - (7) Disposition of stock of a member of an affiliated group.
    - (8) Dispositions of property used in multiple activities.
      - (i) [Reserved]
      - (j) Spouses filing joint returns.
        - (1) In general.
        - (2) Exceptions of treatment as one taxpayer.
          - (i) Identification of disallowed deductions and credits.
            - (ii) Treatment of deductions disallowed under sections 704(d), 1366(d) and 465.
            - (iii) Treatment of losses from working interests.
              - (3) Joint return no longer filed.
              - (4) Participation of spouses.
          - (k) Former passive activities and changes in status of corporations. [Reserved]

§ 1.469-2 *Passive activity loss.*

- (a)-(c)(2)(ii) [Reserved]
- (iii) Disposition of substantially appreciated property formerly used in a nonpassive activity.
  - (A) In general.
  - (B) Date of disposition.
  - (C) Substantially appreciated property.
  - (D) Investment property.
  - (E) Coordination with § 1.469-2T(c)(2)(ii).
  - (F) Coordination with section 163(d).
  - (G) Examples.
  - (iv) Taxable acquisitions.
  - (v) Property held for sale to customers.
    - (A) Sale incidental to another activity.
    - (1) Applicability.
      - (i) In general.
      - (ii) Principal purpose.
    - (2) Dealing activity not taken into account.
      - (B) Use in a nondealing activity incidental to sale.
      - (C) Examples.
  - (c)(3)-(c)(5) [Reserved]
  - (6) Gross income from certain oil or gas properties.
    - (i) In general.
    - (ii) Gross and net passive income from the property.
      - (iii) Property.

(B) Dispositions of partnership interest and S corporation stock.

(6) Coordination with other limitations on deductions that apply before section 469.

(i) In general.  
 (ii) Proration of deductions disallowed under basis limitations.

(A) Deductions disallowed under section 704(d).

(B) Deductions disallowed under section 1366(d).

(iii) Proration of deductions disallowed under at-risk limitations.

(iv) Coordination of basis and at-risk limitations.

(v) Separately identified items of deduction and loss.

(7) Deductions from section 481 adjustment.

(i) In general.  
 (ii) Negative section 481 adjustment.  
 (iii) Ratable portion.

(8) Taxable year in which item arises.

(e) Special rules for partners and S corporation shareholders.

(1) In general.  
 (2) Payments under sections 707(a), 707(c), and 736(b).

(i) Section 707(a).

(ii) Section 707(c).

(iii) Payments in liquidation of a partner's interest in partnership property.

(A) In general.

(B) Payments in liquidation of a partner's interest of a partnership property.

(3) Sale or exchange of interest in passthrough entity.

(i) Application of this paragraph (e)(3).

(ii) General rule.

(A) Allocation among activities.

(B) Ratable portions.

(1) Disposition on which gain is recognized.

(2) Disposition on which loss is recognized.

(C) Default rule.

(D) Special rules.

(f) Applicable valuation date.

(i) In general.

(ii) Exception.

(2) Basis adjustment.

(3) Tiered passthrough entities.

(E) Meaning of certain terms.

(iii) Treatment of gain allocated to certain passive activities as not from a passive activity.

(iv) Dispositions occurring in taxable years beginning before February 19, 1988.

(A) In general.

(B) Exceptions.

(v) Treatment of portfolio assets.

(vi) Definitions.

(vii) Examples.

(f) Recharacterization of passive income in certain situations.

(1) In general.

(2) Special rule for significant participation.

(i) In general.

(ii) Significant participation passive activity.

(iii) Example.

(3) Rental of nondepreciable property.

(4) Net interest income from passive equity-financed lending activity.

(i) In general.

(ii) Equity-financed lending activity.

(A) In general.

(B) Certain liabilities not taken into account.

(iii) Equity-financed interest income.

(iv) Net interest income.

(v) Interest-bearing assets.

(vi) Liabilities incurred in the activity.

(vii) Average outstanding balance.

(viii) Example.

(5) Net income from certain property rented incidental to development activity.

(i) In general. [Reserved]

(ii) Commencement of use. [Reserved]

(iii) Services performed for the purpose of enhancing the value of property. [Reserved]

(iv) Examples. [Reserved]

(6) Property rented to a nonpassive activity.

(7) Special rules applicable to the acquisition of an interest of a passthrough entity engaged in the trade or business of licensing intangible property.

(i) In general.

(ii) Royalty income from property.

(iii) Exceptions.

(iv) Capital expenditures.

(v) Example.

(8) Limitation on recharacterized income.

(9) Meaning of certain terms.

(10) Coordination with section 163(d).

(11) Effective date.

§ 1.469-3 *Passive activity credit.*

(a)-(d) [Reserved]

(e) Coordination with section 38(b).

(f) Coordination with section 50.

(g) [Reserved]

§ 1.469-3T *Passive activity credit (temporary).*

(a) Computation of passive activity credit.

(b) Credits subject to section 469.

(1) In general.

(2) Treatment of credits attributed to qualified progress expenditures.

(3) Special rule for partners and S corporations shareholders.

(4) Exception for pre-1987 credits.

(c) Taxable year to which credit is attributable.

(d) Regular tax liability allocable to passive activities.

(1) In general.

(2) Regular tax liability.

(e) Coordination with section 38(b). [Reserved]

(f) Coordination with section 47. [Reserved]

(g) Examples.

  - (3) Requirement of material participation in the real property trades or businesses.
  - (4) Treatment of spouses.
  - (5) Employees in real property trades or businesses.
  - (d) General rule for determining real property trades or businesses.
    - (1) Facts and circumstances.
    - (2) Consistency requirement.
  - (e) Treatment of rental real estate activities of a qualifying taxpayer.
    - (1) In general.
    - (2) Treatment as a former passive activity.
    - (3) Grouping rental real estate activities with other activities.
      - (i) In general.
      - (ii) Special rule for certain management activities.
    - (4) Example.
  - (f) Limited partnership interests in rental real estate activities.
    - (1) In general.
    - (2) De minimis exception.
  - (g) Election to treat all interests in rental real estate as a single rental real estate activity.
    - (1) In general.
    - (2) Certain changes not material.
    - (3) Filing a statement to make or revoke the election.
  - (h) Interests in rental real estate held by certain passthrough entities.
    - (1) General rule.
    - (2) Special rule if a qualifying taxpayer holds a fifty-percent or greater interest in a passthrough entity.
    - (3) Special rule for interests held in tiered passthrough entities.
      - (i) [Reserved]

- (j) \$25,000 offset for rental real estate activities of qualifying taxpayers.
  - (1) In general.
  - (2) Example.

*§ 1.469-10 Application of section 469 to publicly traded partnerships. [Reserved]*

*§ 1.469-11 Effective date and transition rules.*

- (a) Generally applicable effective dates.
- (b) Additional effective dates.
  - (1) Application of 1992 amendments for taxable years beginning before October 4, 1994.
  - (2) Additional transition rule for 1992 amendments.
  - (3) Fresh starts under consistency rules.
    - (i) Regrouping when tax liability is first determined under Project PS-1-89.
    - (ii) Regrouping when tax liability is first determined under § 1.469-4.
    - (iii) Regrouping when taxpayer is first subject to section 469(c)(7).
    - (iv) Regrouping for taxpayers subject to section 1411.
      - (A) In general.
      - (B) Eligibility criteria.
      - (C) Consequences of amended returns and examination adjustments.
        - (1) Taxpayers first subject to section 1411.
        - (2) Taxpayers ceasing to be subject to section 1411.
      - (3) Examples.
      - (D) Effective/applicability date.
    - (4) Certain investment credit property.
  - (c) Special rules.
    - (1) Application of certain income recharacterization rules and self-charged rules.
      - (i) Certain recharacterization rules inapplicable in 1987.
      - (ii) Property rented to a nonpassive activity.
      - (iii) Self-charged rules.
    - (2) Qualified low-income housing projects.
    - (3) Effect of events occurring in years prior to 1987.
    - (d) Examples.

[T.D. 8417, 57 FR 20748, May 15, 1992, as amended by T.D. 8477, 58 FR 11538, Feb. 26, 1993; T.D. 8495, 58 FR 58787, Nov. 4, 1993; T.D. 8565, 59 FR 50487, Oct. 4, 1994; T.D. 8597, 60 FR 36684, July 18, 1995; T.D. 8645, 60 FR 66498, Dec. 22, 1995; T.D. 9013, 67 FR 54089, Aug. 21, 2002; T.D. 9644, 78 FR 72421, Dec. 2, 2013]

### § 1.469-1 General rules.

- (a)-(c)(7) [Reserved]
- (c)(8) *Consolidated groups.* Rules relating to the application of section 469 to consolidated groups are contained in paragraph (h) of this section.
- (c)(9)-(d)(1) [Reserved]

(d)(2) *Coordination with sections 613A(d) and 1211.* A passive activity deduction that is not disallowed for the taxable year under section 469 and the regulations thereunder may nonetheless be disallowed for the taxable year under section 613A(d) or 1211. The following example illustrates the application of this paragraph (d)(2):

*Example.* In 1993, an individual derives \$10,000 of ordinary income from passive activity X, no gains from the sale or exchange of capital assets or assets used in a trade or business, \$12,000 of capital loss from passive activity Y, and no income, gain, deductions, or losses from any other passive activity. The capital loss from activity Y is a passive activity deduction (within the meaning of § 1.469-2T(d)). Under section 469 and the regulations thereunder, the taxpayer is allowed \$10,000 of the \$12,000 passive activity deduction and has a \$2,000 passive activity loss for the taxable year. Since the \$10,000 passive activity deduction allowed under section 469 is a capital loss, such deduction is allowable for the taxable year only to the extent provided under section 1211. Therefore, the taxpayer is allowed \$3,000 of the \$10,000 capital loss under section 1211 and has a \$7,000 capital loss carryover (within the meaning of section 1212(b)) to the succeeding taxable year.

(d)(3)-(e)(1) [Reserved]

(e)(2) *Trade or business activities.* Trade or business activities are activities that constitute trade or business activities within the meaning of § 1.469-4(b)(1).

(e)(3)(i)-(e)(3)(ii) [Reserved]

(e)(3)(iii) *Average period of customer use—(A) In general.* For purposes of this paragraph (e)(3), the average period of customer use for property held in connection with an activity (the *activity's average period of customer use*) is the sum of the average use factors for each class of property held in connection with the activity.

(B) *Average use factor.* The average use factor for a class of property held in connection with an activity is the average period of customer use for that class of property multiplied by the fraction obtained by dividing—

(1) The activity's gross rental income attributable to that class of property; by

(2) The activity's gross rental income.

(C) *Average period of customer use for class of property.* In determining an activity's average period of customer use for a taxable year, the average period

of customer use for a class of property held in connection with an activity is determined by dividing—

(1) The aggregate number of days in all periods of customer use for property in the class (taking into account only periods that end during the taxable year or that include the last day of the taxable year); by

(2) The number of those periods of customer use.

(D) *Period of customer use.* Each period during which a customer has a continuous or recurring right to use an item of property held in connection with the activity (without regard to whether the customer uses the property for the entire period or whether the right to use the property is pursuant to a single agreement or to renewals thereof) is treated for purposes of this paragraph (e)(3)(iii) as a separate period of customer use. The duration of a period of customer use that includes the last day of a taxable year may be determined on the basis of reasonable estimates.

(E) *Class of property.* Taxpayers may organize property into classes for purposes of this paragraph (e)(3)(iii) using any method under which items of property for which the amount of the daily rent differs significantly are not included in the same class.

(F) *Gross rental income and daily rent.* In determining an activity's average period of customer use for a taxable year—

(1) The activity's gross rental income is the gross income from the activity for the taxable year taking into account only income that is attributable to amounts paid for the use of property;

(2) The activity's gross rental income attributable to a class of property is the gross income from the activity for the taxable year taking into account only income that is attributable to amounts paid for the use of property in that class; and

(3) The daily rent for items of property may be determined on any basis that reasonably reflects differences during the taxable year in the amounts ordinarily paid for one day's use of those items of property.

(e)(3)(iv)-(e)(3)(vi)(C) [Reserved]

(e)(3)(vi)(D) *Lodging rented for convenience of employer.* The provision of lodging to an employee or to an employee's spouse or dependents is treated as incidental to the activity (or activities) of the taxpayer in which the employee performs services if the lodging is furnished for the taxpayer's convenience (within the meaning of section 119).

(E) *Unadjusted basis.* For purposes of this paragraph (e)(3)(vi), the term *unadjusted basis* means adjusted basis determined without regard to any adjustment described in section 1016 that decreases basis.

(e)(3)(vii)–(e)(4)(iii) [Reserved]

(e)(4)(iv) *Definition of “working interest.”* For purposes of section 469 and the regulations thereunder, the term *working interest* means a working or operating mineral interest in any tract or parcel of land (within the meaning of § 1.612-4(a)).

(e)(4)(v)–(f)(3) [Reserved]

(f)(4) *Carryover of disallowed deductions and credits*—(i) *In general.* In the case of an activity of a taxpayer with respect to which any deductions or credits are disallowed for a taxable year under § 1.469-1T(f)(2) or (f)(3) (the loss activity)—

(A) The disallowed deductions or credits is allocated among the taxpayer's activities for the succeeding taxable year in a manner that reasonably reflects the extent to which each activity continues the loss activity; and

(B) The disallowed deductions or credits allocated to an activity under paragraph (f)(4)(i)(A) of this section shall be treated as deductions or credits from the activity for the succeeding taxable year.

(ii) *Business continued through C corporations or similar entities.* If a taxpayer continues part or all of a loss activity through a C corporation or similar entity (C corporation entity), the taxpayer's interest in the C corporation entity shall be treated for purposes of this paragraph (f)(4) as an interest in a passive activity that continues that loss activity in whole or part. An entity is similar to a C corporation for this purpose if the owners of interests in the entity derive only portfolio income (within the meaning of § 1.469-2T(c)(3)(i)) from the interests.

(iii) *Examples.* The following examples illustrate the application of this paragraph (f)(4). In each example, the taxpayer is an individual whose taxable year is the calendar year.

*Example 1.* (i) The taxpayer owns interests in a convenience store and an apartment building. In each taxable year, the taxpayer's interests in the convenience store and the apartment building are treated under § 1.469-4 as interests in two separate passive activities of the taxpayer. A \$5,000 loss from the convenience-store activity and a \$3,000 loss from the apartment-building activity are disallowed under § 1.469-1T(f)(2) for 1993. Under § 1.469-1T(f)(2), the \$5,000 loss from the convenience-store activity is allocated among the passive activity deductions from that activity for 1993, and the \$3,000 loss from the apartment-building activity is treated similarly.

(ii) In 1994, the convenience store is continued in a single activity, and the section 469 activities that constituted the apartment building is similarly continued in a separate activity. Thus, the disallowed deductions from the convenience-store activity for 1993 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's convenience-store activity in 1994. Similarly, the disallowed deductions from the apartment-building activity for 1993 must be allocated to the taxpayer's apartment-building activity in 1994. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the convenience-store activity in 1994 are treated as deductions from that activity for 1994, and the disallowed deductions allocated to the apartment-building activity for 1994 are treated as deductions from the apartment-building activity for 1994.

*Example 2.* (i) In 1993, the taxpayer acquires a restaurant and a catering business. Assume that in 1993 and 1994 the restaurant and the catering business are treated under § 1.469-4 as an interest in a single passive activity of the taxpayer (the restaurant and catering activity). A \$10,000 loss from the activity is disallowed under § 1.469-1T(f)(2) for 1994. Assume that in 1995, the taxpayer's interests in the restaurant and the catering business are treated under § 1.469-4 as interests in two separate passive activities of the taxpayer.

(ii) Under § 1.469-1T(f)(2), the \$10,000 loss from the restaurant and catering activity is allocated among the passive activity deductions from that activity for 1994. In 1995, the businesses that constituted the restaurant and catering activity are continued, but are treated as two separate activities under § 1.469-4. Thus, the disallowed deductions from the restaurant and catering activity for 1994 must be allocated under paragraph (f)(4)(i)(A) of this section between the restaurant activity and the catering activity in

1995 in a manner that reasonably reflects the extent to which each of the activities continues the single restaurant and catering activity. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the restaurant activity in 1995 are treated as deductions from the restaurant activity for 1995, and the disallowed deductions allocated to the catering activity in 1995 are treated as deductions from the catering activity for 1995.

*Example 3.* (i) In 1993, the taxpayer acquires a restaurant and a catering business. Assume that in 1993 and 1994 the restaurant and the catering business are treated under § 1.469-4 as an interest in a single passive activity of the taxpayer (the restaurant and catering activity). A \$10,000 loss from the activity is disallowed under § 1.469-1T(f)(2) for 1994. Assume that in 1995, the taxpayer's interests in the restaurant and the catering business are treated under § 1.469-4 as interests in two separate passive activities of the taxpayer. In addition, a \$20,000 loss from the activity was disallowed under § 1.469-1T(f)(2) for 1993, and the gross income and deductions (including deductions that were disallowed for 1993 under § 1.469-1T(f)(2)) from the restaurant and catering business for 1993 and 1994 are as follows:

|                    | Restaurant | Catering business |
|--------------------|------------|-------------------|
| 1993:              |            |                   |
| Gross income ..... | \$20,000   | \$60,000          |
| Deductions .....   | 40,000     | 60,000            |
| Net income (loss)  | (20,000)   | .....             |
| 1994:              |            |                   |
| Gross income ..... | 40,000     | 50,000            |
| Deductions .....   | 130,000    | 270,000           |
| Net income (loss)  | 10,000     | (20,000)          |

<sup>1</sup>Includes \$8,000 of deductions that were disallowed for 1993 (\$20,000 × \$40,000/\$100,000).

<sup>2</sup>Includes \$12,000 of deductions that were disallowed for 1993 (\$20,000 × \$60,000/\$100,000).

(ii) Under paragraph (f)(4)(i)(A) of this section, the disallowed deductions from the restaurant and catering activity must be allocated among the taxpayer's activities for the succeeding year in a manner that reasonably reflects the extent to which those activities continue the restaurant and catering activity. The remainder of this example describes a number of allocation methods that will ordinarily satisfy the requirement of paragraph (f)(4)(i)(A) of this section. The description of specific allocation methods in this example does not preclude the use of other reasonable allocation methods for purposes of paragraph (f)(4)(i)(A) of this section.

(iii) Ordinarily, an allocation of disallowed deductions from the restaurant to the restaurant activity and disallowed deductions from the catering business to the catering activity would satisfy the requirement of paragraph (f)(4)(i)(A) of this section. Under

§ 1.469-1T (f)(2)(ii), a ratable portion of each deduction from the restaurant and catering activity is disallowed for 1994. Thus, \$3,000 of the 1994 deductions from the restaurant are disallowed (\$10,000 × \$30,000/\$100,000), and \$7,000 of the 1994 deductions from the catering business are disallowed (\$10,000 × \$70,000/\$100,000). Thus, the taxpayer can ordinarily treat \$3,000 of the disallowed deductions as deductions from the restaurant activity for 1995, and \$7,000 of the disallowed deductions as deductions from the catering activity for 1995.

(iv) Ordinarily, an allocation of disallowed deductions between the restaurant activity and catering activity in proportion to the losses from the restaurant and from the catering business for 1994 would also satisfy the requirement of paragraph (f)(4)(i)(A) of this section. If the restaurant and the catering business had been treated as separate activities in 1994, the restaurant activity would have had net income of \$10,000 and the catering activity would have had a \$20,000 loss. Thus, the taxpayer can ordinarily treat all \$10,000 of disallowed deductions as deductions from the catering activity for 1995.

(v) Ordinarily, an allocation of disallowed deductions between the restaurant activity and catering activity in proportion to the losses from the restaurant and from the catering business for 1994 (determined as if the restaurant and the catering business had been separate activities for all taxable years) would also satisfy the requirement of paragraph (f)(4)(i)(A) of this section. If the restaurant and the catering business had been treated as separate activities for all taxable years, the entire \$20,000 loss from the restaurant in 1993 would have been allocated to the restaurant activity in 1994, and the gross income and deductions from the separate activities for 1994 would be as follows:

|                    | Restaurant | Catering business |
|--------------------|------------|-------------------|
| Gross income ..... | \$40,000   | \$50,000          |
| Deductions .....   | 42,000     | 58,000            |
| Net income (loss)  | (2,000)    | (8,000)           |

Thus, the taxpayer can ordinarily treat \$2,000 of the disallowed deductions as deductions from the restaurant activity for 1995, and \$8,000 of the disallowed deductions as deductions from the catering activity for 1995.

*Example 4.* (i) The taxpayer is a partner in a law partnership that acquires a building in December 1993 for use in the partnership's law practice. In taxable year 1993, four floors that are not needed in the law practice are leased to tenants; in taxable year 1994, two floors are leased to tenants; in taxable years after 1994, only one floor is leased to tenants and the rental operations are insubstantial. Assume that under § 1.469-4, the law practice and the rental property are treated as a

trade or business activity and a separate rental activity for taxable years 1993 and 1994. Assume further that the law practice and the rental operations are a single trade or business activity for taxable years after 1994 under § 1.469-4. The trade or business activity is not a passive activity of the taxpayer. The rental activity, however, is a passive activity. Under § 1.469-T(f)(2), a \$12,000 loss from the rental activity is disallowed for 1993 and a \$9,000 loss from the rental activity is disallowed for 1994.

(ii) Under § 1.469-1T(f)(2), the \$12,000 loss from the rental activity for 1993 is allocated among the passive activity deductions from that activity for 1993. In 1994, the business of the rental activity is continued in two separate activities. Only two floors of the building remain in the rental activity, and the other two floors (*i.e.*, the floors that were leased to tenants in 1993, but not in 1994) are used in the taxpayer's law-practice activity. Thus, the disallowed deductions from the rental activity for 1993 must be allocated under paragraph (f)(4)(i)(A) of this section between the rental activity and the law-practice activity in a manner that reasonably reflects the extent to which each of the activities continues business on the four floors that were leased to tenants in 1993. In these circumstances, the requirement of paragraph (f)(4)(i)(A) of this section would ordinarily be satisfied by any of the allocation methods illustrated in Example 3 or by an allocation of 50 percent of the disallowed deductions to each activity. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the rental activity in 1994 are treated as deductions from the rental activity for 1994, and the disallowed deductions (\$6,000) allocated to the law-practice activity in 1994 are treated as deductions from the law-practice activity for 1994.

(iii) Under § 1.469-1T(f)(2), the \$9,000 loss from the rental activity for 1994 is allocated among the passive activity deductions from that activity for 1994. In 1995, the rental activity is continued in the taxpayer's law-practice activity. Thus, the disallowed deductions from the rental activity for 1994 must be allocated under paragraph (f)(4)(ii) of this section to the taxpayer's law-practice activity in 1995. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the law-practice activity are treated as deductions from the law-practice activity for 1995.

(iv) Rules relating to former passive activities will be contained in paragraph (k) of this section. Under those rules, any disallowed deductions from the rental activity that are treated as deductions from the law-practice activity will be treated as unused deductions that are allocable to a former passive activity.

*Example 5.* (i) The taxpayer owns stock in a corporation that is an S corporation for the

taxpayer's 1993 taxable year and a C corporation thereafter. The only activity of the corporation is a rental activity. For 1993, the taxpayer's pro rata share of the corporation's loss from the rental activity is \$5,000, and the entire loss is disallowed under § 1.469-1T(f)(2) of this section.

(ii) Under § 1.469-1T(f)(2), the taxpayer's \$5,000 loss from the rental activity is allocated among the taxpayer's deductions from that activity for 1993. In 1994, the rental activity is continued through a C corporation, and the taxpayer's interest in the C corporation is treated under paragraph (f)(4)(ii) of this section as a passive activity that continues the rental activity (the C corporation activity) for purposes of allocating the previously disallowed loss. Thus, the disallowed deductions from the rental activity for 1993 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's C corporation activity in 1994, and are treated under paragraph (f)(4)(i)(B) of this section as deductions from the C corporation activity for 1994.

(iii) Treating the taxpayer's interest in the C corporation as an interest in a passive activity that continues the business of the rental activity does not change the character of the taxpayer's dividend income from the C corporation. Thus, the taxpayer's dividend income is portfolio income (within the meaning of § 1.469-2T(c)(3)(i)) and is not included in passive activity gross income. Accordingly, the taxpayer's loss from the C corporation activity for 1994 is \$5,000.

*Example 6.* (i) The taxpayer owns stock in a corporation that is an S corporation for the taxpayer's 1993 taxable year and a C corporation thereafter. The only activity of the corporation is a rental activity. For 1993, the taxpayer's pro rata share of the corporation's loss from the rental activity is \$5,000, and the entire loss is disallowed under § 1.469-1T(f)(2). The taxpayer has \$2,000 in income from other passive activities for 1994, and as a result, only 60% of the taxpayer's loss from the C corporation activity (\$3,000) is disallowed for 1994 under § 1.469-1T(f)(2).

(ii) Under § 1.469-1T(f)(2), the \$3,000 disallowed loss from the C corporation activity is allocated among the passive activity deductions from that activity for 1994. In effect, therefore, 60 percent of each disallowed deduction from the rental activity for 1993 is again disallowed for 1994.

(iii) Under paragraph (f)(4) of this section, the taxpayer's interest in the C corporation is treated as a loss activity and as an interest in a passive activity that continues the business of that loss activity for 1995. Thus, the disallowed deductions from the C corporation activity for 1994 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's C corporation activity in 1995, and are treated under paragraph (f)(4)(i)(B)

## Internal Revenue Service, Treasury

## § 1.469-1

of this section as deductions from that activity for 1995.

(g)(1)-(g)(4)(ii)(B) [Reserved]

(g)(4)(ii)(C) Portfolio income (within the meaning of §1.469-2T(c)(3)(i)), including any gross income that is treated as portfolio income under any other provision of the regulations (See, e.g., §1.469-2(c)(2)(iii)(F) (relating to gain from the disposition of substantially appreciated property formerly held for investment) and §1.469-2(f)(10) (relating to certain recharacterized passive activity gross income))

(5) [Reserved]

(h)(1) *In general.* This paragraph (h) provides rules for applying section 469 in computing a consolidated group's consolidated taxable income and consolidated tax liability (and the separate taxable income and tax liability of each member).

(2) *Definitions.* The definitions and nomenclature in the regulations under section 1502 apply for purposes of this paragraph (h). See, e.g., §§1.1502-1 (definitions of group, consolidated group, member, subsidiary, and consolidated return year), 1.1502-2 (consolidated tax liability), 1.1502-11 (consolidated taxable income), 1.1502-12 (separate taxable income), 1.1502-13 (intercompany transactions), 1.1502-21 (net operating losses, and 1.1502-22 (consolidated net capital gain and loss).

(3) [Reserved]

(4) *Status and participation of members*—(i) *Determination by reference to status and participation of group.* For purposes of section 469 and the regulations thereunder—

(A) Each member of a consolidated group shall be treated as a closely held corporation or personal service corporation, respectively, for the taxable year, if and only if the consolidated group is treated (under the rules of paragraph (h)(4)(ii) of this section) as a closely held corporation or personal service corporation for that year; and

(B) The determination of whether a trade or business activity (within the meaning of paragraph (e)(2) of this section) conducted by one or more members of a consolidated group is a passive activity of the members is made by reference to the consolidated group's participation in the activity.

(ii) *Determination of status and participation of consolidated group.* For purposes of determining under §1.469-1T(g)(2) whether a consolidated group is treated as a closely held corporation or a personal service corporation, and determining under §1.469-1T(g)(3) whether the consolidated group materially or significantly participates in any activity conducted by one or more members of the group—

(A) The members of the consolidated group shall be treated as one corporation;

(B) Only the outstanding stock of the common parent shall be treated as outstanding stock of the corporation;

(C) An employee of any member of the group shall be treated as an employee of the corporation; and

(D) An activity is treated as the principal activity of the corporation if and only if it is the principal activity (within the meaning of §1.441-3(e)) of the consolidated group.

(5) [Reserved]

(6) *Intercompany transactions*—(i) *In general.* Section 1.1502-13 applies to determine the treatment under section 469 of intercompany items and corresponding items from intercompany transactions between members of a consolidated group. For example, the matching rule of §1.1502-13(c) treats the selling member (S) and the buying member (B) as divisions of a single corporation for purposes of determining whether S's intercompany items and B's corresponding items are from a passive activity. Thus, for purposes of applying §1.469-2(c)(2)(iii) and §1.469-2T(d)(5)(ii) to property sold by S to B in an intercompany transaction—

(A) S and B are treated as divisions of a single corporation for determining the uses of the property during the 12-month period preceding its disposition to a nonmember, and generally have an aggregate holding period for the property; and

(B) §1.469-2(c)(2)(iv) does not apply.

(ii) *Example.* The following example illustrates the application of this paragraph (h)(6).

*Example.* (i) P, a closely held corporation, is the common parent of the P consolidated group. P owns all of the stock of S and B. X is a person unrelated to any member of the P group. S owns and operates equipment

that is not used in a passive activity. On January 1 of Year 1, S sells the equipment to B at a gain. B uses the equipment in a passive activity and does not dispose of the equipment before it has been fully depreciated.

(ii) Under the matching rule of §1.1502-13(c), S's gain taken into account as a result of B's depreciation is treated as gain from a passive activity even though S used the equipment in a nonpassive activity.

(iii) The facts are the same as in paragraph (a) of this Example, except that B sells the equipment to X on December 1 of Year 3 at a further gain. Assume that if S and B were divisions of a single corporation, gain from the sale to X would be passive income attributable to a passive activity. To the extent of B's depreciation before the sale, the results are the same as in paragraph (ii) of this Example. B's gain and S's remaining gain taken into account as a result of B's sale are treated as attributable to a passive activity.

(iv) The facts are the same as in paragraph (iii) of this Example, except that B recognizes a loss on the sale to X. B's loss and S's gain taken into account as a result of B's sale are treated as attributable to a passive activity.

(iii) *Effective dates.* This paragraph (h)(6) applies with respect to transactions occurring in years beginning on or after July 12, 1995. For transactions occurring in years beginning before July 12, 1995, see §1.469-1T(h)(6) (as contained in the 26 CFR part 1 edition revised as of April 1, 1995).

(h)(7)-(k) [Reserved]

[T.D. 8417, 57 FR 20750, May 15, 1992; 57 FR 28612, June 26, 1992, as amended by T.D. 8417, 59 FR 45623, Sept. 2, 1994; T.D. 8597, 60 FR 36684, July 18, 1995; T.D. 8677, 61 FR 33322, June 27, 1996; T.D. 8823, 64 FR 36099, July 2, 1999; T.D. 8996, 67 FR 35012, May 17, 2002]

**§ 1.469-1T General rules (temporary).**

(a) *Passive activity loss and credit disallowed*—(1) *In general.* Except as otherwise provided in paragraph (a)(2) of this section—

(i) The passive activity loss for the taxable year shall not be allowed as a deduction; and

(ii) The passive activity credit for the taxable year shall not be allowed.

(2) *Exceptions.* Paragraph (a)(1) of this section shall not apply to the passive activity loss or the passive activity credit for the taxable year to the extent provided in—

(i) Section 469(i) and the rules to be contained in §1.469-9T (relating to

losses and credits attributable to certain rental real estate activities); and

(ii) Section 1.469-11T (relating to losses and credits attributable to certain pre-enactment interests in activities).

(b) *Taxpayers to whom these rules apply.* The rules of section 469 and the regulations thereunder generally apply to—

(1) Individuals;

(2) Trusts (other than trusts (or portions of trusts) described in section 671);

(3) Estates;

(4) Personal service corporations (within the meaning of paragraph (g)(2)(i) of this section); and

(5) Closely held corporations (within the meaning of paragraph (g)(2)(ii) of this section).

(c) *Cross references*—(1) *Definition of “passive activity.”* Rules relating to the definition of the term “passive activity” are contained in paragraph (e) of this section.

(2) *Passive activity loss.* Rules relating to the computation of the passive activity loss for the taxable year are contained in §1.469-2T.

(3) *Passive activity credit.* Rules relating to the computation of the passive activity credit for the taxable year are contained in §1.469-3T.

(4) *Effect of rules for other purposes.* Rules relating to the effect of section 469 and the regulations thereunder for other purposes under the Code are contained in paragraph (d) of this section.

(5) *Special rule for oil and gas working interests.* Rules relating to the treatment of losses and credits from certain interests in oil and gas wells are contained in paragraph (e)(4) of this section

(6) *Treatment of disallowed losses and credits.* Paragraph (f) of this section contains rules relating to—

(i) The treatment of deductions from passive activities in taxable years in which the passive activity loss is disallowed in whole or in part under paragraph (a)(1)(i) of this section; and

(ii) The treatment of credits from passive activities in taxable years in which the passive activity credit is disallowed in whole or in part under paragraph (a)(1)(ii) of this section.

(7) *Corporation subject to section 469.* Rules relating to the application of section 469 and regulations thereunder to C corporations are contained in paragraph (g) of this section.

(8) [Reserved]

(9) *Joint returns.* Rules relating to the application of section 469 and the regulations thereunder to spouses filing a joint return for the taxable year are contained in paragraph (j) of this section.

(10) *Material participation.* Rules defining the term “material participation” are contained in § 1.469-5T.

(11) *Effective date and transition rules.* Rules relating to the effective date of section 469 and the regulations thereunder and transition rules applicable to pre-enactment interests in activities are contained in § 1.469-11T.

(12) *Future regulations.* (i) Rules relating to former passive activities and changes in corporate status will be contained in paragraph (k) of this section.

(ii) Rules relating to the definition of “activity” will be contained in § 1.469-4T.

(iii) Rules relating to the treatment of deductions from activities that are disposed of in certain transactions will be contained in § 1.469-6T.

(iv) Rules relating to the treatment of self-charged items of income and expense will be contained in § 1.469-7T.

(v) Rules relating to the application of section 469 and the regulations thereunder to trusts, estates, and their beneficiaries will be contained in § 1.469-8T.

(vi) Rules relating to the treatment of income, deductions, and credits from certain rental real estate activities of individuals and certain estates will be contained in § 1.469-9T.

(vii) Rules relating to the application of section 469 to publicly traded partnerships will be contained in § 1.469-10T.

(d) *Effect of section 469 and the regulations thereunder for other purposes—(1) Treatment of items of passive activity income and gain.* Neither the provisions of section 469 (a)(1) and paragraph (a)(1) of this section nor the characterization of items of income or deduction as passive activity gross income (within the meaning of § 1.469-2T (c)) or passive ac-

tivity deductions (within the meaning of § 1.469-2T (d)) affects the treatment of any item of income or gain under any provision of the Internal Revenue Code other than section 469. The following example illustrates the application of this paragraph (d)(1):

*Example.* (i) In 1991, an individual’s only income and loss from passive activities are a \$10,000 capital gain from passive activity X and a \$12,000 ordinary loss from passive activity Y. The taxpayer also has a \$10,000 capital loss that is not derived from a passive activity.

(ii) Under § 1.469-2T (b), the taxpayer has a \$2,000 passive activity loss for the taxable year. The only effect of section 469 and the regulations thereunder is to disallow a deduction for the taxpayer’s \$2,000 passive activity loss for the taxable year. Thus, the taxpayer’s capital loss for the taxable year is allowed because the \$10,000 capital gain from passive activity X is taken into account under section 1211 (b) in computing the taxpayer’s allowable capital loss for the year.

(2) *Coordination with sections 613A(d) and 1211.* [Reserved]. See § 1.469-1(d)(2) for rules relating to this paragraph.

(3) *Treatment of passive activity losses.* Except as otherwise provided by regulations, a deduction that is disallowed for a taxable year under section 469 and the regulations thereunder is not taken into account as a deduction that is allowed for the taxable year in computing the amount subject to any tax imposed by subtitle A of the Internal Revenue Code. The following example illustrates the application of this paragraph (d)(3):

*Example.* An individual has a \$5,000 passive activity loss for a taxable year, all of which is disallowed under paragraph (a)(1) of this section. All of the disallowed loss is allocated under paragraph (f) of this section to activities that are trades or businesses (within the meaning of section 1402(c)). Such loss is not taken into account for the taxable year in computing the taxpayer’s taxable income subject to tax under section 1. In addition, under this paragraph (d)(3), such loss is not taken into account for the taxable year in computing the taxpayer’s net earnings from self-employment subject to tax under section 1401.

(e) *Definition of “passive activity”—(1) In general.* Except as otherwise provided in this paragraph (e), an activity is a passive activity of the taxpayer for a taxable year if and only if the activity—

(i) Is a trade or business activity (within the meaning of paragraph (e)(2) of this section) in which the taxpayer does not materially participate for such taxable year; or

(ii) Is a rental activity (within the meaning of paragraph (e)(3) of this section), without regard to whether or to what extent the taxpayer participates in such activity.

(2) *Trade or business activity.* [Reserved]. See § 1.469-1(e)(2) for rules relating to this paragraph.

(3) *Rental activity*—(i) *In general.* Except as otherwise provided in this paragraph (e)(3), an activity is a rental activity for a taxable year if—

(A) During such taxable year, tangible property held in connection with the activity is used by customers or held for use by customers; and

(B) The gross income attributable to the conduct of the activity during such taxable year represents (or, in the case of an activity in which property is held for use by customers, the expected gross income from the conduct of the activity will represent) amounts paid or to be paid principally for the use of such tangible property (without regard to whether the use of the property by customers is pursuant to a lease or pursuant to a service contract or other arrangement that is not denominated a lease).

(ii) *Exceptions.* For purposes of this paragraph (e)(3), an activity involving the use of tangible property is not a rental activity for a taxable year if for such taxable year—

(A) The average period of customer use for such property is seven days or less;

(B) The average period of customer use for such property is 30 days or less, and significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided by or on behalf of the owner of the property in connection with making the property available for use by customers;

(C) Extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided by or on behalf of the owner of the property in connection with making such property available for use by customers (without regard to the average period of customer use);

(D) The rental of such property is treated as incidental to a nonrental activity of the taxpayer under paragraph (e)(3)(vi) of this section;

(E) The taxpayer customarily makes the property available during defined business hours for nonexclusive use by various customers; or

(F) The provision of the property for use in an activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest is not a rental activity under paragraph (e)(3)(vii) of this section.

(iii) *Average period of customer use.* [Reserved]. See § 1.469-1(e)(3)(iii) for rules relating to this paragraph.

(iv) *Significant personal services*—(A) *In general.* For purposes of paragraph (e)(3)(ii)(B) of this section, personal services include only services performed by individuals, and do not include excluded services (within the meaning of paragraph (e)(3)(iv)(B) of this section). In determining whether personal services provided in connection with making property available for use by customers are significant, all of the relevant facts and circumstances shall be taken into account. Relevant facts and circumstances include the frequency with which such services are provided, the type and amount of labor required to perform such services, and the value of such services relative to the amount charged for the use of the property.

(B) *Excluded services.* For purposes of paragraph (e)(3)(iv)(A) of this section, the term “excluded services” means, with respect to any property made available for use by customers—

(1) Services necessary to permit the lawful use of the property;

(2) Services performed in connection with the construction of improvements to the property, or in connection with the performance of repairs that extend the property’s useful life for a period substantially longer than the average period for which such property is used by customers; and

(3) Services, provided in connection with the use of any improved real property, that are similar to those commonly provided in connection with long-term rentals of high-grade commercial or residential real property (e.g., cleaning and maintenance of

common areas, routine repairs, trash collection, elevator service, and security at entrances or perimeters).

(v) *Extraordinary personal services.* For purposes of paragraph (e)(3)(ii)(C) of this section, extraordinary personal services are provided in connection with making property available for use by customers only if the services provided in connection with the use of the property are performed by individuals, and the use by customers of the property is incidental to their receipt of such services. For example, the use by patients of a hospital's boarding facilities generally is incidental to their receipt of the personal services provided by the hospital's medical and nursing staff. Similarly, the use by students of a boarding school's dormitories generally is incidental to their receipt of the personal services provided by the school's teaching staff.

(vi) *Rental of property incidental to a nonrental activity of the taxpayer—(A) In general.* For purposes of paragraph (e)(3)(ii)(D) of this section, the rental of property shall be treated as incidental to a nonrental activity of the taxpayer only to the extent provided in this paragraph (e)(3)(vi).

(B) *Property held for investment.* The rental of property during a taxable year shall be treated as incidental to an activity of holding such property for investment if and only if—

(1) The principal purpose for holding the property during such taxable year is to realize gain from the appreciation of the property (without regard to whether it is expected that such gain will be realized from the sale or exchange of the property in its current state of development); and

(2) The gross rental income from the property for such taxable year is less than two percent of the lesser of—

(i) The unadjusted basis of such property; and

(ii) The fair market value of such property.

(C) *Property used in a trade or business.* The rental of property during a taxable year shall be treated as incidental to a trade or business activity (within the meaning of paragraph (e)(2) of this section) if and only if—

(1) The taxpayer owns an interest in such trade or business activity during the taxable year;

(2) The property was predominantly used in such trade or business activity during the taxable year or during at least two of the five taxable years that immediately precede the taxable year; and

(3) The gross rental income from such property for the taxable year is less than two percent of the lesser of—

(i) The unadjusted basis of such property; and

(ii) The fair market value of such property.

(D) *Lodging for convenience of employer.* [Reserved]. See § 1.469-1(e)(3)(vi)(D) for rules relating to this paragraph.

(E) *Unadjusted basis.* [Reserved]. See § 1.469-1(e)(3)(vi)(E) for rules relating to this paragraph.

(vii) *Property made available for use in a nonrental activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest.* If the taxpayer owns an interest in a partnership, S corporation, or joint venture conducting an activity other than a rental activity, and the taxpayer provides property for use in the activity in the taxpayer's capacity as an owner of an interest in such partnership, S corporation, or joint venture, the provision of such property is not a rental activity. Thus, if a partner contributes the use of property to a partnership, none of the partner's distributive share of partnership income is income from a rental activity unless the partnership is engaged in a rental activity. In addition, a partner's gross income attributable to a payment described in section 707(c) is not income from a rental activity under any circumstances (see § 1.469-2T (e)(2)). The determination of whether property used in an activity is provided by the taxpayer in the taxpayer's capacity as an owner of an interest in a partnership, S corporation, or joint venture shall be made on the basis of all of the facts and circumstances.

(viii) *Examples.* The following examples illustrate the application of this paragraph (e)(3):

*Example 1.* The taxpayer is engaged in an activity of leasing photocopying equipment.

The average period of customer use for the equipment exceeds 30 days. Pursuant to the lease agreements, skilled technicians employed by the taxpayer maintain the equipment and service malfunctioning equipment for no additional charge. Service calls occur frequently (three times per week on average) and require substantial labor. The value of the maintenance and repair services (measured by the cost to the taxpayer of employees performing these services) exceeds 50 percent of the amount charged for the use of the equipment. Under these facts, services performed by individuals are provided in connection with the use of the photocopying equipment, but the customers' use of the photocopying equipment is not incidental to their receipt of the services. Therefore, extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are not provided in connection with making the photocopying equipment available for use by customers, and the activity is a rental activity.

*Example 2.* The facts are the same as in Example 1, except that the average period of customer use for the photocopying equipment exceeds seven days but does not exceed 30 days. Under these facts, significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided in connection with making the photocopying equipment available for use by customers and, under paragraph (e)(3)(ii)(B) of this section, the activity is not a rental activity.

*Example 3.* The taxpayer is engaged in an activity of transporting goods for customers. In conducting the activity, the taxpayer provides tractor-trailers to transport goods for customers pursuant to arrangements under which the tractor-trailers are selected by the taxpayer, may be replaced at the sole option of the taxpayer, and are operated and maintained by drivers and mechanics employed by the taxpayer. The average period of customer use for the tractor-trailers exceeds 30 days. Under these facts, the use of tractor-trailers by the taxpayer's customers is incidental to their receipt of personal services provided by the taxpayer. Accordingly, the services performed in the activity are extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) and, under paragraph (e)(3)(ii)(C) of this section, the activity is not a rental activity.

*Example 4.* The taxpayer is engaged in an activity of owning and operating a residential apartment hotel. For the taxable year, the average period of customer use for apartments exceeds seven days but does not exceed 30 days. In addition to cleaning public entrances, exists, stairways, and lobbies, and collecting and removing trash, the taxpayer provides a daily maid and linen service at no additional charge. All of the services other than maid and linen service are excluded services (within the meaning of paragraph

(e)(3)(iv)(B) of this section), because such services are similar to those commonly provided in connection with long-term rentals of high-grade residential real property. The value of the maid and linen services (measured by the cost to the taxpayer of employees performing such services) is less than 10 percent of the amount charged to tenants for occupancy of apartments. Under these facts, neither significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) nor extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided in connection with making apartments available for use by customers. Accordingly, the activity is a rental activity.

*Example 5.* The taxpayer owns 1,000 acres of unimproved land with a fair market value of \$350,000 and an unadjusted basis of \$210,000. The taxpayer holds the land for the principal purpose of realizing gain from appreciation. In order to defray the cost of carrying the land, the taxpayer leases the land to a rancher, who uses the land to graze cattle and pays rent of \$4,000 per year. Thus, the gross rental income from the land is less than two percent of the lesser of the fair market value and the unadjusted basis of the land ( $.02 \times \$210,000 = \$4,200$ ). Accordingly, under paragraph (e)(3)(ii)(D) of this section, the rental of the land is not a rental activity because the rental is treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding the property for investment.

*Example 6.* (i) A calendar year taxpayer owns an interest in a farming activity which is a trade or business activity (within the meaning of paragraph (e)(2) of this section) and owns farmland which was used in the farming activity in 1985 and 1986. The fair market value of the farmland is \$350,000 and its unadjusted basis is \$210,000. In 1987, 1988, and 1989, the taxpayer continues to own an interest in the farming activity but does not use the land in the activity. In 1987, the taxpayer leases the land for \$4,000 to a rancher, who uses the land to graze cattle. In 1988, the taxpayer leases the land for \$10,000 to a film production company, which uses the land to film scenes for a movie. In 1989, the taxpayer again leases the land for \$4,000 to the rancher.

(ii) For 1987 and 1989, the taxpayer owns an interest in a trade or business activity, and the farmland which the taxpayer leases to the rancher was used in such activity for two out of the five immediately preceding taxable years. In addition, the gross rental income from the land (\$4,000) is less than two percent of the lesser of the fair market value and the unadjusted basis of the land ( $.02 \times \$210,000 = \$4,200$ ). Accordingly, the taxpayer's rental of the land is treated under paragraph (e)(3)(vi)(C) of this section as incidental to

the taxpayer's farming activity, and is not a rental activity.

(iii) Because the taxpayer's gross rental income from the land for 1988 (\$10,000) is not less than two percent of the lesser of the fair market value and the unadjusted basis of the land, the requirement of paragraph (e)(3)(vi)(C)(3) of this section is not met. Therefore, the taxpayer's rental of the land in 1988 is not treated as incidental to the taxpayer's farming activity and is a rental activity.

*Example 7.* (i) In 1988, the taxpayer acquires vacant land for the purpose of constructing a shopping mall. Before commencing construction, the taxpayer leases the land under a one-year lease to an automobile dealer, who uses the land to park cars held in its inventory. The taxpayer commences construction of the shopping mall in 1989.

(ii) The taxpayer acquired the land for the principal purpose of constructing the shopping mall, not for the principal purpose of realizing gain from the appreciation of the property. Therefore, the rental of the property in 1988 is not treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding the property for investment.

(iii) The land has not been used in any taxable year in any trade or business of the taxpayer. Therefore, the rental of the property in 1988 is not treated under paragraph (e)(3)(vi)(C) of this section as incidental to a trade or business activity.

(iv) Since the rental of the land in 1988 is not treated under paragraph (e)(3)(vi) of this section as incidental to a nonrental activity of the taxpayer, the rental of the land in 1988 is a rental activity. See § 1.469-2T(f)(3) for a special rule relating to the treatment of gross income from the rental of nondepreciable property.

*Example 8.* The taxpayer makes farmland available to a tenant farmer pursuant to an arrangement designated a "crop-share lease." Under the arrangement, the tenant is required to use the tenant's best efforts to farm the land and produce marketable crops. The taxpayer is obligated to pay 50 percent of the costs incurred in the activity (without regard to whether any crops are successfully produced or marketed), and is entitled to 50 percent of the crops produced (or 50 percent of the proceeds from marketing the crops). For purposes of paragraph (e)(3)(vii) of this section, the taxpayer is treated as providing the farmland for use in a farming activity conducted by a joint venture in the taxpayer's capacity as an owner of an interest in the joint venture. Accordingly, under paragraph (e)(3)(ii)(F) of this section, the taxpayer is not engaged in a rental activity, without regard to whether the taxpayer performs any services in the farming activity.

*Example 9.* The taxpayer owns a taxicab which the taxpayer operates during the day

and leases to another driver for use at night under a one-year lease. Under the terms of the lease, the other driver is charged a fixed rental for use of the taxicab. Assume that, under the rules to be contained in § 1.469-4T, the taxpayer is engaged in two separate activities, an activity of operating the taxicab and an activity of making the taxicab available for use by the other driver. Under these facts, the period for which the other driver uses the taxicab exceeds 30 days, and the taxpayer does not provide extraordinary personal services in connection with making the taxicab available to the other driver. Accordingly, the lease of the taxicab is a rental activity.

*Example 10.* The taxpayer operates a golf course. Some customers of the golf course pay green fees upon each use of the golf course, while other customers purchase weekly, monthly, or annual passes. The golf course is open to all customers from sunrise to sunset every day of the year except certain holidays and days on which the taxpayer determines that the course is too wet for play. The taxpayer thus makes the golf course available during prescribed hours for nonexclusive use by various customers. Accordingly, under paragraph (e)(3)(ii)(E) of this section, the taxpayer is not engaged in a rental activity, without regard to the average period of customer use for the golf course.

(4) *Special rule for oil and gas working interests—*(i) *In general.* Except as otherwise provided in paragraph (e)(4)(ii) of this section, an interest in an oil or gas well drilled or operated pursuant to a working interest (within the meaning of paragraph (e)(4)(iv) of this section) of a taxpayer is not an interest in a passive activity for the taxpayer's taxable year (without regard to whether the taxpayer materially participates in such activity) if at any time during such taxable year the taxpayer holds such working interest either—

(A) Directly; or

(B) Through an entity that does not limit the liability of the taxpayer with respect to the drilling or operation of such well pursuant to such working interest.

(ii) *Exception for deductions attributable to a period during which liability is limited—*(A) *In general.* If paragraph (e)(4)(i) of this section applies for a taxable year to the taxpayer's interest in an oil or gas well that would, but for the application of paragraph (e)(4)(i) of this section, be an interest in a passive activity for the taxable year, and the

taxpayer has a net loss (within the meaning of paragraph (e)(4)(ii)(C)(3) of this section) from the well for the taxable year—

(1) The taxpayer's disqualified deductions (within the meaning of paragraph (e)(4)(ii)(C)(2) of this section) from such oil or gas well for such year shall be treated as passive activity deductions for such year (within the meaning of § 1.469-2T(d)); and

(2) A ratable portion (within the meaning of paragraph (e)(4)(ii)(C)(4) of this section) of the taxpayer's gross income from such oil or gas well for such year shall be treated as passive activity gross income for such year (within the meaning of § 1.469-2T(c)).

(B) *Coordination with rules governing the identification of disallowed passive activity deductions.* If gross income and deductions from an activity for a taxable year are treated as passive activity gross income and passive activity deductions under paragraph (e)(4)(ii)(A) of this section, such activity shall be treated as a passive activity for such year for purposes of applying paragraph (f) (2) and (4) of this section.

(C) *Meaning of certain terms.* For purposes of this paragraph (e)(4)(ii), the following terms shall have the meanings set forth below:

(1) *Allocable deductions.* The deductions allocable to a taxable year are any deductions that arise in such year (within the meaning of § 1.469-2T (d)(8)) and any deductions that are treated as deductions for such year under paragraph (f)(4) of this section.

(2) *Disqualified deductions.* The taxpayer's "disqualified deductions" from an oil or gas well for a taxable year are the taxpayer's deductions—

(i) That are attributable to such well and allocable to the taxable year; and

(ii) With respect to which economic performance (within the meaning of section 461(h), without regard to section 461 (h)(3) or (i)(2)) occurs at a time during which the taxpayer's only interest in the working interest is held through an entity that limits the taxpayer's liability with respect to the drilling or operation of such well.

(3) *Net loss.* The "net loss" of a taxpayer from an oil or gas well for a taxable year equals the amount by which the taxpayer's deductions that are at-

tributable to such oil or gas well and allocable to such year exceeds the gross income of the taxpayer from such well for such year.

(4) *Ratable portion.* The "ratable portion" of the taxpayer's gross income from an oil or gas well for a taxable year equals the total amount of such gross income multiplied by the fraction obtained by dividing—

(i) The disqualified deductions from such oil or gas well for the taxable year; by

(ii) The total amount of the deductions that are attributable to such oil or gas well and allocable to the taxable year.

(iii) *Examples.* The following examples illustrate the application of paragraphs (e)(4) (i) and (ii) of this section:

*Example 1.* (i) A, a calendar year individual, acquires on January 1, 1987, a general partnership interest in P, a calendar year partnership that holds a working interest in an oil or gas property. Pursuant to the partnership agreement, A is entitled to convert the general partnership interest into a limited partnership interest at any time. On December 1, 1987, pursuant to a contract with D, an independent drilling contractor, P commences drilling a single well pursuant to the working interest. Under the drilling contract, P pays D for the drilling only as the work is performed. All drilling costs are deducted by P in the year in which they are paid. At the end of 1987, A converts the general partnership interest into a limited partnership interest, effective immediately. The drilling of the well is completed on February 28, 1988. A's interest in the well would but for this paragraph (e)(4) be an interest in a passive activity.

(ii) Throughout 1987, A holds the working interest through an entity that does not limit A's liability with respect to the drilling of the well pursuant to the working interest. In 1988, however, A holds the working interest through an entity that limits A's liability with respect to the drilling and operation of the well throughout such year. Accordingly, under paragraph (e)(4)(i) of this section, A's interest in P's well is not an interest in a passive activity for 1987 but is an interest in a passive activity for 1988. Moreover, since economic performance occurs in 1987 with respect to all items of deduction for drilling costs that are allocable to 1987, A has no disqualified deductions for 1987.

*Example 2.* The facts are the same as in Example 1, except that all costs of drilling under the contract with D (including costs of drilling performed after 1987) are paid before the end of 1987 and A has a net loss for 1987. In addition, A has \$15,000 of total deductions

that are attributable to the well and allocable to 1987, but economic performance (as that term is used in paragraph (e)(4)(ii)(C)(2)(ii) of this section) does not occur with respect to \$5,000 of those deductions until 1988. Under paragraph (e)(4)(ii) of this section, the \$5,000 of deductions with respect to which economic performance occurs in 1988 are disqualified deductions and are treated as passive activity deductions for 1987. In addition, one-third (\$5,000/\$15,000) of A's gross income from the well for 1987 is treated as passive activity gross income.

(iv) *Definition of "working interest."* [Reserved]. See § 1.469-1(e)(4)(iv) for rules relating to this paragraph.

(v) *Entities that limit liability*—(A) *General rule.* For purposes of paragraph (e)(4)(i)(B) of this section, an entity limits the liability of the taxpayer with respect to the drilling or operation of a well pursuant to a working interest held through such entity if the taxpayer's interest in the entity is in the form of—

(1) A limited partnership interest in a partnership in which the taxpayer is not a general partner;

(2) Stock in a corporation; or

(3) An interest in any entity (other than a limited partnership or corporation) that, under applicable State law, limits the potential liability of a holder of such an interest for all obligations of the entity to a determinable fixed amount (for example, the sum of the taxpayer's capital contributions).

(B) *Other limitations disregarded.* For purposes of this paragraph (e)(4), protection against loss through any of the following is not taken into account in determining whether a taxpayer holds a working interest through an entity that limits the taxpayer's liability:

(1) An indemnification agreement;

(2) A stop loss arrangement;

(3) Insurance;

(4) Any similar arrangement; or

(5) Any combination of the foregoing.

(C) *Examples.* The following examples illustrate the application of this paragraph (e)(4)(v):

*Example 1.* A owns a 20 percent interest as a general partner in the capital and profits of P, a partnership which owns oil or gas working interests. The other partners of P agree to indemnify A against liability in excess of A's capital contribution for any of P's costs and expenses with respect to P's working interests. As a general partner, however, A is jointly and severally liable for all of P's

liabilities and, under paragraph (e)(4)(v)(B)(1) of this section, the indemnification agreement is not taken into account in determining whether A holds the working interests through an entity that limits A's liability. Accordingly, the partnership does not limit A's liability with respect to the drilling or operation of wells pursuant to the working interests.

*Example 2.* B owns a 10 percent interest in X, an entity (other than a limited partnership or corporation) created under applicable State law to hold working interests in oil or gas properties. Under applicable State law, B is liable without limitation for 10 percent of X's costs and expenses with respect to X's working interests but is not liable for the remaining 90 percent of such costs and expenses. Since B's liability for the obligations of X is not limited to a determinable fixed amount (within the meaning of paragraph (e)(4)(v)(A)(3) of this section), the entity does not limit B's liability with respect to the drilling or operation of wells pursuant to the working interests.

*Example 3.* C is both a general partner and a limited partner in a partnership that owns a working interest in oil or gas property. Because C owns an interest as a general partner in each well drilled pursuant to the working interest, C's entire interest in each well drilled pursuant to the working interest is treated under paragraph (e)(4)(i) of this section as an interest in an activity that is not a passive activity (without regard to whether C materially participates in such activity).

(vi) *Cross reference to special rule for income from certain oil or gas properties.* A special rule relating to the treatment of income from certain interests in oil or gas properties is contained in § 1.469-2T(c)(6).

(5) *Rental of dwelling unit.* [Reserved]. See § 1.469-2(d)(2)(xii) for rules relating to this paragraph.

(6) *Activity of trading personal property*—(i) *In general.* An activity of trading personal property for the account of owners of interests in the activity is not a passive activity (without regard to whether such activity is a trade or business activity (within the meaning of paragraph (e)(2) of this section)).

(ii) *Personal property.* For purposes of this paragraph (e)(6), the term "personal property" means personal property (within the meaning of section 1092(d), without regard to paragraph (3) thereof).

(iii) *Example.* The following example illustrates the application of this paragraph (e)(6):

§ 1.469-1T

26 CFR Ch. I (4-1-17 Edition)

*Example.* A partnership is a trader of stocks, bonds, and other securities (within the meaning of section 1236(c)). The capital employed by the partnership in the trading activity consists of amounts contributed by the partners in exchange for their partnership interests, and funds borrowed by the partnership. The partnership derives gross income from the activity in the form of interest, dividends, and capital gains. Under these facts, the partnership is treated as conducting an activity of trading personal property for the account of its partners. Accordingly, under this paragraph (e)(6), the activity is not a passive activity.

(f) *Treatment of disallowed passive activity losses and credits*—(1) *Scope of this paragraph.* The rules in this paragraph (f)—

(i) Identify the passive activity deductions that are disallowed for any taxable year in which all or a portion of the taxpayer's passive activity loss is disallowed under paragraph (a)(1)(i) of this section;

(ii) Identify the credits from passive activities that are disallowed for any taxable year in which all or a portion of the taxpayer's passive activity credit is disallowed under paragraph (a)(1)(i) of this section; and

(iii) Provide for the carryover of disallowed deductions and credits.

(2) *Identification of disallowed passive activity deductions*—(i) *Allocation of disallowed passive activity loss among activities*—(A) *General rule.* If all or any portion of the taxpayer's passive activity loss is disallowed for the taxable year under paragraph (a)(1)(i) of this section, a ratable portion of the loss (if any) from each passive activity of the taxpayer is disallowed. For purposes of the preceding sentence, the ratable portion of a loss from an activity is computed by multiplying the passive

activity loss that is disallowed for the taxable year by the fraction obtained by dividing—

(1) The loss from the activity for the taxable year; by

(2) The sum of the losses for the taxable year from all activities having losses for such year.

(B) *Loss from an activity.* For purposes of this paragraph (f)(2)(i), the term "loss from an activity" means—

(1) The amount by which the passive activity deductions from the activity for the taxable year (within the meaning of § 1.469-2T(d)) exceed the passive activity gross income from the activity for the taxable year (within the meaning of § 1.469-2T(c)); reduced by

(2) Any part of such amount that is allowed under section 469(i) and the rules to be contained in § 1.469-9T (relating to the \$25,000 allowance for certain rental real estate activities).

(C) *Significant participation passive activities.* If the taxpayer's passive activity gross income from significant participation passive activities (within the meaning of § 1.469-2T(f)(2)(ii)) for the taxable year (determined without regard to § 1.469-2T(f)(2) through (4)) exceeds the taxpayer's passive activity deductions from such activities for the taxable year, such activities shall be treated, solely for purposes of applying this paragraph (f)(2)(i) for the taxable year, as a single activity that does not have a loss for such taxable year.

(D) *Examples.* The following examples illustrate the application of this paragraph (f)(2)(i):

*Example 1.* An individual holds interests in three passive activities, A, B, and C. The gross income and deductions from these activities for the taxable year are as follows:

|                         | A         | B          | C        | Total      |
|-------------------------|-----------|------------|----------|------------|
| Gross income .....      | \$7,000   | \$4,000    | \$12,000 | \$23,000   |
| Deductions .....        | (16,000)  | (20,000)   | (8,000)  | (44,000)   |
| Net income (loss) ..... | (\$9,000) | (\$16,000) | \$4,000  | (\$21,000) |

The taxpayer's \$21,000 passive activity loss for the taxable year is disallowed under paragraph (a)(1)(i) of this section. Therefore, a ratable portion of the losses from activities A and B is disallowed. The disallowed portion of each loss is determined as follows:

A:  $\$21,000 \times \$9,000/\$25,000$  ..... \$7,560

B:  $\$21,000 \times \$16,000/\$25,000$  ..... \$13,440  
 Total ..... \$21,000

*Example 2.* An individual holds interests in four passive activities, A, B, C, and D. The results of operations of these activities for the taxable year are as follows:

|                         | A       | B        | C        | D       | Total    |
|-------------------------|---------|----------|----------|---------|----------|
| Gross income .....      | 15,000  | 5,000    | 10,000   | 10,000  | 40,000   |
| Deductions .....        | (5,000) | (10,000) | (20,000) | (8,000) | (43,000) |
| Net income (loss) ..... | 10,000  | (5,000)  | (10,000) | 2,000   | (3,000)  |

Activities A and B are significant participation passive activities (within the meaning of § 1.469-2T(f)(2)(ii)). The gross income from these activities for the taxable year (\$20,000) exceeds the passive activity deductions from those activities for the taxable year (\$15,000) by \$5,000 and, under § 1.469-2T(f)(2), \$5,000 of gross income from those activities is treated as not from a passive activity. Therefore, solely for purposes of applying this paragraph (f)(2)(i) for the taxable year, activities A and B are treated as a single activity that does not have a loss for the taxable year. Under § 1.469-2T(b), the taxpayer's passive activity loss for the taxable year is \$8,000 (\$43,000 of passive activity deductions minus \$35,000 of passive activity gross income). The results of treating activities A and B as a single activity that does not have a loss for the taxable year is that none of the \$8,000 passive activity loss is allocated under this paragraph (f)(2)(i) to activity B for the taxable year, even though the taxpayer incurred a loss in that activity for the taxable year.

(ii) *Allocation within loss activities—*  
(A) *In general.* If all or any portion of a taxpayer's loss from an activity is disallowed under paragraph (f)(2)(i) of this section for the taxable year, a ratable portion of each passive activity deduction (other than an excluded deduction (within the meaning of paragraph (f)(2)(ii)(B) of this section)) of the taxpayer from such activity is disallowed. For purposes of the preceding sentence, the ratable portion of a passive activity deduction of a taxpayer is the amount of the disallowed portion of the taxpayer's loss from the activity (within the meaning of paragraph (f)(2)(i)(B) of this section) for the taxable year multiplied by the fraction obtained by dividing—

(1) The amount of such deduction; by  
(2) The sum of all passive activity deductions (other than excluded deductions (within the meaning of paragraph (f)(2)(ii)(B) of this section)) of the taxpayer from such activity from the taxable year.

(B) *Excluded deductions.* The term "excluded deduction" means any passive activity deduction of a taxpayer that is taken into account in com-

puting the taxpayer's net income from an item of property for a taxable year in which an amount of the taxpayer's gross income from such item of property is treated as not from a passive activity under § 1.469-2T(c)(6) or § 1.469-2T(f) (5), (6), or (7).

(iii) *Separately identified deductions.* In identifying the deductions from an activity that are disallowed under this paragraph (f)(2), the taxpayer need not account separately for a deduction unless such deduction may, if separately taken into account, result in an income tax liability for any taxable year different from that which would result were such deduction not taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702-1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Deductions that must be accounted for separately include (but are not limited to) deductions that—

(A) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in taxable years in which the taxpayer actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(B) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in taxable years in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity; or

(C) Are taken into account under section 1211 (relating to the limitation on capital losses) or section 1231 (relating to property used in a trade or business and involuntary conversions).

(3) *Identification of disallowed credits from passive activities—*(i) *General rule.* If all or any portion of the taxpayer's passive activity credit is disallowed for the taxable year under paragraph (a)(1)(ii) of this section, a ratable portion of each credit from each passive activity of the taxpayer is disallowed.

For purposes of the preceding sentence, the ratable portion of a credit of a taxpayer is computed by multiplying the portion of the taxpayer's passive activity credit that is disallowed for the taxable year by the fraction obtained by dividing—

(A) The amount of the credit; by

(B) The sum of all of the taxpayer's credits from passive activities for the taxable year.

(ii) *Coordination rule.* For purposes of paragraph (f)(3)(i) of this section, the credits from a passive activity do not include any credit or portion of a credit that—

(A) Is allowed for the taxable year under section 469(i) and the rules to be contained in § 1.469-9T (relating to the \$25,000 allowance for certain rental real estate activities); or

(B) Increases the basis of property during the taxable year under section 469(j)(9) and the rules to be contained in § 1.469-6T (relating to the election to increase the basis of certain property by disallowed credits).

(iii) *Separately identified credits.* In identifying the credits from an activity that are disallowed under this paragraph (f)(3), the taxpayer need not account separately for any credit unless such credit may, if separately taken into account, result in an income tax liability for any taxable year different from that which would result were such credit not taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702-1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Credits that must be accounted for separately include (but are not limited to)—

(A) Credits (other than the low-income housing and rehabilitation investment credits) from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) that arise in a taxable year in which the taxpayer actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(B) Credits (other than the low-income housing and rehabilitation investment credits) from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) that arise in a tax-

able year in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(C) Low-income housing and rehabilitation investment credits from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T); and

(D) Any credit that is subject to the limitations of sections 26(a), 28(d)(2), 29(b)(5), or 38(c) in a manner that differs from the manner in which any other credit is subject to such limitations.

(4) *Carryover of disallowed deductions and credits.* [Reserved]. See § 1.469-1(f)(4) for rules relating to this paragraph.

(g) *Application of these rules to C corporations—(1) In general.* Except as otherwise provided in the rules to be contained in paragraph (k) of this section, section 469 and the regulations thereunder do not apply to any corporation that is not a personal service corporation or a closely held corporation for the taxable year. See paragraphs (g) (4) and (5) of this section for special rules for computing the passive activity loss and passive activity credit, respectively, of a closely held corporation.

(2) *Definitions.* For purposes of section 469 and the regulations thereunder—

(i) The term *personal service corporation* means a C corporation that is a personal service corporation for the taxable year (within the meaning of § 1.441-3(c)); and

(ii) The term *closely held corporation* means a C corporation that meets the stock ownership requirements of section 542(a)(2) (taking into account the modifications in section 465(a)(3)) for the taxable year and is not a personal service corporation for such year.

(3) *Participation of corporations—(i) Material participation.* For purposes of section 469 and the regulations thereunder, a corporation described in paragraph (g)(2) of this section shall be treated as materially participating in an activity for a taxable year if and only if—

(A) One or more individuals, each of whom is treated under paragraph (g)(3)(iii) of this section as materially participating in such activity for the

taxable year, directly or indirectly hold (in the aggregate) more than 50 percent (by value) of the outstanding stock of such corporation; or

(B) In the case of a closely held corporation (within the meaning of paragraph (g)(2)(ii) of this section), the requirements of section 465(c)(7)(C) (without regard to clause (iv) thereof and taking into account section 465(c)(7)(D)) are met with respect to such activity.

(ii) *Significant participation.* For purposes of § 1.469-2T(f)(2), an activity of a corporation described in paragraph (g)(2) of this section shall be treated as a significant participation passive activity for a taxable year if and only if—

(A) The corporation is not treated as materially participating in such activity for the taxable year; and

(B) One or more individuals, each of whom is treated under paragraph (g)(3)(iii) of this section as significantly participating in such activity, directly or indirectly hold (in the aggregate) more than 50 percent (by value) of the outstanding stock of such corporation.

(iii) *Participation of individual.* Whether an individual is treated for purposes of this paragraph (g)(3) as materially participating or significantly participating in an activity of a corporation shall be determined under the rules of § 1.469-5T, except that in applying such rules—

(A) All activities of the corporation shall be treated as activities in which the individual holds an interest in determining whether the individual participates (within the meaning of § 1.469-5T(f)) in an activity of the corporation; and

(B) The individual's participation in all activities other than activities of the corporation shall be disregarded in determining whether the individual's participation in an activity of the corporation is treated as material participation under § 1.469-5T(a)(4) (relating to material participation in significant participation activities).

(4) *Modified computation of passive activity loss in the case of closely held corporations—(i) In general.* A closely held corporation's passive activity loss for the taxable year is the amount, if any, by which the corporation's passive ac-

tivity deductions for the taxable year (within the meaning of § 1.469-2T(d)) exceed the sum of—

(A) The corporation's passive activity gross income for the taxable year (within the meaning of § 1.469-2T(c)); and

(B) The corporation's net active income for the taxable year.

(ii) *Net active income.* For purposes of this paragraph (g)(4), a corporation's net active income for the taxable year is such corporation's taxable income for the taxable year, determined without regard to the following items for the year:

(A) Passive activity gross income;

(B) Passive activity deductions;

(C) [Reserved]. See § 1.469-1(g)(4)(ii)(C) for rules relating to this paragraph.

(D) Gross income that is treated under § 1.469-2T(c)(6) (relating to gross income from certain oil or gas properties) as not from a passive activity;

(E) Gross income and deductions from any trade or business activity (within the meaning of paragraph (e)(2) of this section) that is described in paragraph (e)(6) of this section (relating to certain activities of trading personal property) but only if the corporation did not materially participate in such activity for the taxable year;

(F) Deductions described in § 1.469-2T(d)(2)(i), (ii), and (iv) (relating to certain deductions attributable to portfolio income); and

(G) Interest expense allocated under § 1.163-8T to a portfolio expenditure (within the meaning of § 1.163-8T(b)(6)).

(iii) *Examples.* The following examples illustrate the application of this paragraph (g)(4):

*Example 1.* (i) For 1987, X, a closely held corporation, is engaged in two activities, a trade or business activity in which X materially participates for 1987 and a rental activity. X also holds portfolio investments. For 1987, X has the following gross income and deductions:

|   |                  |
|---|------------------|
| Gross income:   |                  |
| Rents .....   | \$60,000         |
| Gross income from business .....  | 100,000          |
| Portfolio income .....  | 35,000           |
| Total .....   | <u>\$195,000</u> |
| Deductions:   |                  |
| Rental deductions .....   | (\$100,000)      |
| Business deductions (80,000) .....  |                  |
| Interest expense allocable to portfolio expenditures under § 1.163-8T ..... | (10,000)         |

§ 1.469-1T

26 CFR Ch. I (4-1-17 Edition)

|   |         |             |             |             |
|---|---------|-------------|-------------|-------------|
| Deductions (other than interest expense) clearly and directly allocable to portfolio income .....                       | (5,000) |             | Total ..... | (\$195,000) |
| (ii) The corporation's net active income for 1987 is \$20,000, computed as follows:                                     |         |             |             |             |
| Gross income .....  |         |             | \$195,000   |             |
| Amounts not taken into account in computing net active income:  |         |             |             |             |
| Rents (see paragraph (g)(4)(ii)(A) of this section) .....   |         | \$60,000    |             |             |
| Portfolio income (see paragraph (g)(4)(ii)(C) of this section) .....  |         | \$35,000    |             |             |
|   |         | \$95,000    | (\$95,000)  |             |
| Gross income taken into account in computing net active income .....  |         |             | \$100,000   | \$100,000   |
| Deductions .....  |         |             |             |             |
| (\$195,000)   |         |             |             |             |
| Amounts not taken into account in computing net active income:  |         |             |             |             |
| Rental deductions (see paragraph (g)(4)(ii)(B) of this section) .....   |         | (\$100,000) |             |             |
| Interest expense allocated to portfolio expenditures (see paragraph (g)(4)(ii)(G) of this section) .....                |         | (\$10,000)  |             |             |
| Other deductions clearly and directly allocable to portfolio income (see paragraph (g)(4)(ii)(F) of this section) ..... |         | (\$5,000)   |             |             |
|   |         | (\$115,000) | \$115,000   |             |
| Deductions taken into account in computing net active income .....  |         |             | (\$80,000)  | (\$80,000)  |
| Net active income .....   |         |             |             | \$20,000    |

(iii) Under paragraph (g)(4)(i) of this section, X's passive activity loss for 1987 is \$20,000, the amount by which the passive activity deductions for the taxable year (\$100,000) exceed the sum of (a) the passive activity gross income for the taxable year (\$60,000) and (b) the net active income for the taxable year (\$20,000). Under paragraph (f)(4) of this section, the \$20,000 of deductions from X's rental activity that are disallowed for 1987 are treated as deductions from the rental activity for 1988. If computed without regard to the net active income for the taxable year, X's passive activity loss would be \$40,000 (\$100,000 of rental deductions minus \$60,000 of rental income). Thus, the effect of the rule in paragraph (g)(4)(i) of this section is to reduce the corporation's passive activity loss for the taxable year by the amount of the corporation's net active income for such year.

(iv) Under these facts, X's taxable income for 1987 is \$20,000, computed as follows:

|                             |             |             |
|-----------------------------|-------------|-------------|
| Gross income .....          | \$195,000   |             |
| Deductions:                 |             |             |
| Total deductions .....      | (\$195,000) |             |
| Passive activity loss ..... | \$20,000    |             |
|                             | (\$175,000) | (\$175,000) |
| Taxable income .....        |             | \$20,000    |

*Example 2.* (i) The facts are the same as in Example 1, except that, in 1988, X has a loss from the trade or business activity, and a net operating loss ("NOL") of \$15,000 that is carried back under section 172(b) to 1987. Since NOL carrybacks are taken into account in computing net active income, X's

net active income for 1987 must be recomputed as follows:

|  |            |
|--|------------|
| Net active income before NOL carryback ..... | \$20,000   |
| NOL carryback .....                          | (\$15,000) |
| Net active income .....                      | \$5,000    |

(ii) Under these facts, X's disallowed passive activity loss for 1987 is \$35,000, the amount by which the passive activity deductions for the taxable year (\$100,000) exceed the sum of (a) the passive activity gross income for the taxable year (\$60,000) and (b) the net active income for the taxable year (\$5,000).

(iii) Under paragraph (f)(4) of this section, the \$35,000 of deductions from X's rental activity that are disallowed for 1987 are treated as deductions from the rental activity for 1988. X's taxable income for 1987 is \$20,000, computed as follows:

|                             |             |             |
|-----------------------------|-------------|-------------|
| Gross income .....          | \$195,000   |             |
| Deductions:                 |             |             |
| Total deductions .....      | (\$210,000) |             |
| Passive activity loss ..... | \$35,000    |             |
| Allowable deductions .....  | (\$175,000) | (\$175,000) |
| Taxable income .....        |             | \$20,000    |

Thus, taking the NOL carryback into account in computing net active income for 1987 does not affect X's taxable income for 1987, but increases the deductions treated under paragraph (f)(4) as deductions from X's rental activity for 1988 and decreases X's NOL carryover to years other than 1987.

(5) *Allowance of passive activity credit of closely held corporations to extent of*

*net active income tax liability*—(i) *In general.* Solely for purposes of determining the amount disallowed under paragraph (a)(1)(ii) of this section, a closely held corporation's passive activity credit for the taxable year shall be reduced by such corporation's net active income tax liability for such year.

(ii) *Net active income tax liability.* For purposes of paragraph (g)(5)(i) of this section, a corporation's net active income tax liability for a taxable year is the amount (if any) by which—

(A) The corporation's regular tax liability (within the meaning of section 26(b)) for the taxable year, determined by reducing the corporation's taxable income for such year by an amount equal to the excess (if any) of the corporation's passive activity gross income for such year over the corporation's passive activity deductions for such year; exceeds

(B) The sum of—

(1) The corporation's regular tax liability for the taxable year, determined by reducing the corporation's taxable income for such year by an amount equal to the excess (if any) of the sum of the corporation's net active income (within the meaning of paragraph (g)(4)(ii) of this section) and passive activity gross income for such year over the corporation's passive activity deductions for such year; and

(2) The corporation's credits (other than credits from passive activities) that are allowable for the taxable year (without regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469).

(h) *Special rules for affiliated group filing consolidated return.* (1)–(2) [Reserved]

(3) *Disallowance of consolidated group's passive activity loss or credit.* A consolidated group's passive activity loss or passive activity credit for the taxable year shall be disallowed to the extent provided in paragraph (a) of this section. For purposes of the preceding sentence, a consolidated group's passive activity loss and passive activity credit shall be determined by taking into account the following items of each member of such group:

- (i) Passive activity gross income;
- (ii) Passive activity deductions;

(iii) Net active income (in the case of a consolidated group treated as a closely held corporation under paragraph (h)(4)(ii) of this section); and

(iv) Credits from passive activities.

(4) [Reserved]. See §1.469-1(h)(4) for rules relating to this paragraph.

(5) *Modification of rules for identifying disallowed passive activity deductions and credits*—(i) *Identification of disallowed deductions.* In applying paragraphs (f)(2) and (4) of this section to a consolidated group for purposes of identifying the passive activity deductions of such consolidated group and of each member of such consolidated group that are disallowed for the taxable year and treated as deductions from activities for the succeeding taxable year, the following rules shall apply:

(A) A ratable portion (within the meaning of paragraph (h)(5)(ii) of this section) of the passive activity loss of the consolidated group that is disallowed for the taxable year shall be allocated to each member of the group;

(B) Paragraph (f)(2) of this section shall then be applied to each member of the group as if—

(1) Such member were a separate taxpayer; and

(2) The amount allocated to such member under paragraph (h)(5)(i)(A) of this section were the amount of such member's passive activity loss that is disallowed for the taxable year; and

(C) Paragraph (f)(4) of this section shall be applied to each member of the group as if it were a separate taxpayer.

(ii) *Ratable portion of disallowed passive activity loss.* For purposes of paragraph (h)(5)(i)(A) of this section, a member's ratable portion of the disallowed passive activity loss of the consolidated group is the amount of such disallowed loss multiplied by the fraction obtained by dividing—

(A) The amount of the passive activity loss of such member of the consolidated group that would be disallowed for the taxable year if the items of gross income and deduction of such member were the only items of the group for such year; by

(B) The sum of the amounts described in paragraph (h)(5)(ii)(A) of this section for all members of the group.

(iii) *Identification of disallowed credits.* In applying paragraph (f)(3) of this section to a consolidated group for purposes of identifying the credits from passive activities of members of such consolidated group that are disallowed for the taxable year, the consolidated group shall be treated as one taxpayer. Thus, a ratable portion of each of the group's credits from passive activities is disallowed.

(6) [Reserved]

(7) *Disposition of stock of a member of an affiliated group.* Any gain recognized by a member on the disposition of stock of a subsidiary (including income resulting from the recognition of an excess loss account under § 1.1502-19) shall be treated as portfolio income (within the meaning of § 1.469-2T (c)(3)(i)).

(8) *Dispositions of property used in multiple activities.* The determination of whether § 1.469-2T(c)(2)(ii) or (iii) or (d)(5)(ii) applies to a disposition (including a deemed disposition described in paragraph (h)(6)(iii)(C)(1) of this section) of property by a member of a consolidated group shall be made by treating such member as having held the property for the entire period that the group has owned such property and as having used the property in all of the activities in which the group has used such property

(i) [Reserved]

(j) *Spouses filing joint return—(1) In general.* Except as otherwise provided in the regulations under section 469, spouses filing a joint return for a taxable year shall be treated for such year as one taxpayer for purposes of section 469 and the regulations thereunder. Thus, for example, spouses filing a joint return are treated as one taxpayer for purposes of—

(i) Section 1.469-2T (relating generally to the computation of such taxpayer's passive activity loss); and

(ii) Paragraph (f) of this section (relating to the allocation of such taxpayer's disallowed passive activity loss and passive activity credit among activities and the identification of disallowed passive activity deductions and credits from passive activities).

(2) *Exceptions to treatment as one taxpayer—(i) Identification of disallowed deductions and credits.* For purposes of paragraphs (f)(2)(iii) and (3)(iii) of this

section, spouses filing a joint return for the taxable year must account separately for the deductions and credits attributable to the interests of each spouse in any activity.

(ii) *Treatment of deductions disallowed under sections 704(d), 1366(d), and 465.* Notwithstanding any other provision of this section or § 1.469-2T, this paragraph (j) shall not affect the application of section 704(d), section 1366(d), or section 465 to taxpayers filing a joint return for the taxable year.

(iii) *Treatment of losses from working interests.* Paragraph (e)(4) of this section (relating to losses and credits from certain interests in oil and gas wells) shall be applied by treating a husband and wife (whether or not filing a joint return) as separate taxpayers.

(3) *Joint return no longer filed.* If an individual—

(A) Does not file a joint return for the taxable years; and

(B) Filed a joint return for the immediately preceding taxable year;

then the passive activity deductions and credits allocable to such individual's activities for the taxable year under paragraph (f)(4) of this section shall be determined by taking into account the items of deduction and credit attributable to such individual's interests in passive activities for the immediately preceding taxable year. See paragraph (j)(2)(i) of this section.

(4) *Participation of spouses.* Rules treating an individual's participation in an activity as participation of such individual's spouse in such activity (without regard to whether the spouses file a joint return) are contained in § 1.469-5T(f)(3).

(k) *Former passive activities and changes in status of corporations.* [Reserved]

[T.D. 8175, 53 FR 5700, Feb. 25, 1988, as amended by T.D. 8253, 54 FR 20535, May 12, 1989; T.D. 8319, 55 FR 49038, Nov. 26, 1990; T.D. 8417, 57 FR 20753, May 15, 1992; 58 FR 29536, May 21, 1993; 58 FR 45059, Aug. 26, 1993; 59 FR 17478, Apr. 13, 1994; T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8597, 60 FR 36685, July 18, 1995; T.D. 8996, 67 FR 35012, May 17, 2002]

**§ 1.469-2 Passive activity loss.**

(a)-(c)(2)(ii) [Reserved]

(c)(2)(iii) *Disposition of substantially appreciated property formerly used in*

*nonpassive activity*—(A) *In general.* If an interest in property used in an activity is substantially appreciated at the time of its disposition, any gain from the disposition shall be treated as not from a passive activity unless the interest in property was used in a passive activity for either—

(1) 20 percent of the period during which the taxpayer held the interest in property; or

(2) The entire 24-month period ending on the date of the disposition.

(B) *Date of disposition.* For purposes of this paragraph (c)(2)(iii), a disposition of an interest in property is deemed to occur on the date that the interest in property becomes subject to an oral or written agreement that either requires the owner or gives the owner an option to transfer the interest in property for consideration that is fixed or otherwise determinable on that date.

(C) *Substantially appreciated property.* For purposes of this paragraph (c)(2)(iii), an interest in property is substantially appreciated if the fair market value of the interest in property exceeds 120 percent of the adjusted basis of the interest.

(D) *Investment property.* For purposes of this paragraph (c)(2)(iii), an interest in property is treated as an interest in property used in an activity other than a passive activity and as an interest in property held for investment for any period during which the interest is held through a C corporation or similar entity. An entity is similar to a C corporation for this purpose if the owners of interests in the entity derive only portfolio income (within the meaning of § 1.469-2T) from the interests.

(E) *Coordination with § 1.469-2T(c)(2)(ii).* If § 1.469-2T(c)(2)(ii) applies to the disposition of an interest in property, this paragraph (c)(2)(iii) applies only to that portion of the gain from the disposition of the interest in property that is characterized as gain from a passive activity after the application of § 1.469-2T(c)(2)(ii).

(F) *Coordination with section 163(d).* Gain that is treated as not from a passive activity under this paragraph (c)(2)(iii) is treated as income described in section 469(e)(1)(A) and § 1.469-2T(c)(3)(i) if and only if the gain is from the disposition of an interest in

property that was held for investment for more than 50 percent of the period during which the taxpayer held that interest in property in activities other than passive activities.

(G) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(iii):

*Example 1.* A acquires a building on January 1, 1993, and uses the building in a trade or business activity in which A materially participates until March 31, 2004. On April 1, 2004, A leases the building to B. On December 31, 2005, A sells the building. At the time of the sale, A's interest in the building is substantially appreciated (within the meaning of paragraph (c)(2)(iii)(C) of this section). Assuming A's lease of the building to B constitutes a rental activity (within the meaning of § 1.469-1T(e)(3)), the building is used in a passive activity for 21 months (April 1, 2004, through December 31, 2005). Thus, the building was not used in a passive activity for the entire 24-month period ending on the date of the sale. In addition, the 21-month period during which the building was used in a passive activity is less than 20 percent of A's holding period for the building (13 years). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

*Example 2.* (i) A, an individual, is a stockholder of corporation X. X is a C corporation until December 31, 1993, and is an S corporation thereafter. X acquires a building on January 1, 1993, and sells the building on March 1, 1994. At the time of the sale, A's interest in the building held through X is substantially appreciated (within the meaning of paragraph (c)(2)(iii)(C) of this section). The building is leased to various tenants at all times during the period in which it is held by X. Assume that the lease of the building would constitute a rental activity (within the meaning of § 1.469-1T(e)(3)) with respect to a person that holds the building directly or through an S corporation.

(ii) Paragraph (c)(2)(iii)(D) of this section provides that an interest in property is treated for purposes of this paragraph (c)(2)(iii) as used in an activity other than a passive activity and as held for investment for any period during which the interest is held through a C corporation. Thus, for purposes of determining the character of A's gain from the sale of the building, A's interest in the building is treated as an interest in property held for investment for the period from January 1, 1993, to December 31, 1993, and as an interest in property used in a passive activity for the period from January 1, 1994, to February 28, 1994.

(iii) A's interest in the building was not used in a passive activity for the entire 24-month period ending on the date of the sale.

In addition, the 2-month period during which A's interest in the building was used in a passive activity is less than 20 percent of the period during which A held an interest in the building (14 months). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

(iv) Under paragraph (c)(2)(iii)(F) of this section, gain that is treated as nonpassive under this paragraph (c)(2)(iii) is treated as portfolio income (within the meaning of § 1.469-2T(c)(3)(i)) if the gain is from the disposition of an interest in property that was held for investment for more than 50 percent of the period during which the taxpayer held the interest in activities other than passive activities. In this case, A's interest in the building was treated as held for investment for the entire period during which it was used in activities other than passive activities (*i.e.*, the 12-month period from January 1, 1993, to December 31, 1993). Accordingly, A's gain from the sale is treated under this paragraph (c)(2)(iii) as portfolio income.

(iv) *Taxable acquisitions.* If a taxpayer acquires an interest in property in a transaction other than a nonrecognition transaction (within the meaning of section 7701(a)(45)), the ownership and use of the interest in property before the transaction is not taken into account for purposes of applying this paragraph (c)(2) to any subsequent disposition of the interest in property by the taxpayer.

(v) *Property held for sale to customers—*  
(A) *Sale incidental to another activity—*  
(1) *Applicability—*(i) *In general.* This paragraph (c)(2)(v)(A) applies to the disposition of a taxpayer's interest in property if and only if—

(A) At the time of the disposition, the taxpayer holds the interest in property in an activity that, for purposes of section 1221(1), involves holding the property or similar property primarily for sale to customers in the ordinary course of a trade or business (a dealing activity);

(B) One or more other activities of the taxpayer do not involve holding similar property for sale to customers in the ordinary course of a trade or business (nondealing activities) and the interest in property was used in the nondealing activity or activities for more than 80 percent of the period during which the taxpayer held the interest in property; and

(C) The interest in property was not acquired and held by the taxpayer for

the principal purpose of selling the interest to customers in the ordinary course of a trade or business.

(ii) *Principal purpose.* For purposes of this paragraph (c)(2)(v)(A), a taxpayer is rebuttably presumed to have acquired and held an interest in property for the principal purpose of selling the interest to customers in the ordinary course of a trade or business if—

(A) The period during which the interest in property was used in nondealing activities of the taxpayer does not exceed the lesser of 24 months or 20 percent of the recovery period (within the meaning of section 168) applicable to the property; or

(B) The interest in property was simultaneously offered for sale to customers and used in a nondealing activity of the taxpayer for more than 25 percent of the period during which the interest in property was used in nondealing activities of the taxpayer.

For purposes of the preceding sentence, an interest in property is not considered to be offered for sale to customers solely because a lessee of the property has been granted an option to purchase the property.

(2) *Dealing activity not taken into account.* If paragraph (c)(2)(v)(A) applies to the disposition of a taxpayer's interest in property, holding the interest in the dealing activity is treated, for purposes of § 1.469-2T(c)(2), as the use of the interest in the last nondealing activity of the taxpayer in which the interest in property was used prior to its disposition.

(B) *Use in a nondealing activity incidental to sale.* If paragraph (c)(2)(v)(A) of this section does not apply to the disposition of a taxpayer's interest in property that is held in a dealing activity of the taxpayer at the time of disposition, the use of the interest in property in a nondealing activity of the taxpayer for any period during which the interest in property is also offered for sale to customers is treated, for purposes of § 1.469-2T(c)(2), as the use of the interest in property in the dealing activity of the taxpayer.

(C) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(v):

*Example 1.* (i) The taxpayer acquires a residential apartment building on January 1,

1993, and uses the building in a rental activity. In January 1996, the taxpayer converts the apartments into condominium units. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in condominium units. (Assume that these are dealing operations treated as separate activities under §1.469-4, and that the taxpayer materially participates in the activity.) In addition, the taxpayer continues to use the units in the rental activity until they are sold. The units are first held for sale on January 1, 1996, and the last unit is sold on December 31, 1996.

(i) This paragraph (c)(2)(v) provides that holding an interest in property in a dealing activity (the marketing of the property) is treated for purposes of §1.469-2T(c)(2) as the use of the interest in a nondealing activity if the marketing of the property is incidental to the nondealing use. Under paragraph (c)(2)(v)(A)(2) of this section, the interests in property are treated as used in the last nondealing activity in which they were used prior to their disposition. In addition, paragraph (c)(2)(v)(A)(1) of this section provides rules for determining whether the marketing of the property is incidental to the use of an interest in property in a nondealing activity. Under these rules, the marketing of the property is treated as incidental to the use in a nondealing activity if the interest in property was used in nondealing activities for more than 80 percent of the taxpayer's holding period in the property (the holding period requirement) and the taxpayer did not acquire and hold the interest in property for the principal purpose of selling it to customers in the ordinary course of a trade or business (a dealing purpose).

(iii) In this case, the apartments were used in a rental activity for the entire period during which they were held by the taxpayer. Thus, the apartments were used in a nondealing activity for more than 80 percent of the taxpayer's holding period in the property, and the marketing of the property satisfies the holding period requirement.

(iv) Paragraph (c)(2)(v)(A)(1)(ii) of this section provides that a taxpayer is rebuttably presumed to have a dealing purpose unless the interest in property was used in nondealing activities for more than 24 months or 20 percent of the property's recovery period (whichever is less). The same presumption applies if the interest in property was offered for sale to customers during more than 25 percent of the period in which the interest was held in nondealing activities. In this case, the taxpayer used each apartment in a nondealing activity (the rental activity) for a period of 36 to 48 months (*i.e.*, from January 1, 1993, to the date of sale in the period from January through December 1996). Thus, the apartments were used in nondealing activities for more than 24 months, and the

first of the rebuttable presumptions described above does not apply. In addition, the apartments were offered for sale to customers for up to 12 months (depending on the month in which the apartment was sold) during the period in which the apartments were used in a nondealing activity. The percentage obtained by dividing the period during which an apartment was held for sale to customers by the period during which the apartment was used in nondealing activities ranges from zero in the case of apartments sold on January 1, 1996, to 25 percent (*i.e.*, 12 months/48 months) in the case of apartments sold on December 31, 1996. Thus, no apartment was offered for sale to customers during more than 25 percent of the period in which it was used in nondealing activities, and the second rebuttable presumption does not apply.

(v) Because neither of the rebuttable presumptions in paragraph (c)(2)(v)(A)(1)(ii) of this section applies in this case, the taxpayer will not be treated as having a dealing purpose unless other facts and circumstances establish that the taxpayer acquired and held the apartments for the principal purpose of selling the apartments to customers in the ordinary course of a trade or business. Assume that none of the facts and circumstances suggest that the taxpayer had such a purpose. If that is the case, the taxpayer does not have a dealing purpose.

(vi) The marketing of the property satisfies the holding period requirement, and the taxpayer does not have a dealing purpose. Thus, holding the apartments in the taxpayer's dealing activity is treated for purposes of this paragraph (c)(2) as the use of the apartments in a nondealing activity. In this case, the rental activity is the only nondealing activity in which the apartments were used prior to their disposition. Thus, the apartments are treated under paragraph (c)(2)(v)(A)(2) of this section as interests in property that were used only in the rental activity for the entire period during which the taxpayer held the interests. Accordingly, the rules in §1.469-2T(c)(2)(ii) and paragraph (c)(2)(iii) of this section do not apply, and all gain from the sale of the apartments is treated as passive activity gross income.

*Example 2.* (i) The taxpayer acquires a residential apartment building on January 1, 1993, and uses the building in a rental activity. The taxpayer converts the apartments into condominium units on July 1, 1993. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in condominium units. (Assume that these are dealing operations treated as separate activities under §1.469-4, and that the taxpayer materially participates in the activities.) In addition, the taxpayer continues to use the units in the rental activity until

they are sold. The first unit is sold on January 1, 1994, and the last unit is sold on December 31, 1996.

(ii) In this case, all of the apartments were simultaneously offered for sale to customers and used in a nondealing activity of the taxpayer for more than 25 percent of the period during which the apartments were used in nondealing activities. Thus, the taxpayer is rebuttably presumed to have acquired the apartments (including apartments that are used in the rental activity for at least 24 months) for the principal purpose of selling them to customers in the ordinary course of a trade or business. Assume that the facts and circumstances do not rebut this presumption. If that is the case, the taxpayer has a dealing purpose, and paragraph (c)(2)(v)(A) of this section does not apply to the disposition of the apartments.

(iii) Paragraph (c)(2)(v)(B) of this section provides that if paragraph (c)(2)(v)(A) of this section does not apply to the disposition of a taxpayer's interest in property that is held in a dealing activity of the taxpayer at the time of the disposition, the use of the interest in property in any nondealing activity of the taxpayer for any period during which the interest is also offered for sale to customers is treated as incidental to the use of the interest in the dealing activity. Accordingly, for purposes of applying the rules of § 1.469-2T(c)(2) to the disposition of the apartments, the rental of the apartments after July 1, 1993, is treated as the use of the apartments in the taxpayer's dealing activity.

*Example 3.* (i) The taxpayer acquires a residential apartment building on January 1, 1993, and uses the building in a rental activity. In January 1996, the taxpayer converts the apartments into condominium units. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in condominium units. (Assume that these are dealing operations treated as separate activities under § 1.469-4, and that the taxpayer materially participates in the activities.) In addition, the taxpayer continues to use the units in the rental activity until they are sold. The units are first held for sale on January 1, 1996, and the last unit is sold in 1997.

(ii) The treatment of apartments sold in 1996 is the same as in Example 1. The apartments sold in 1997, however, were simultaneously offered for sale to customers and used in a nondealing activity for more than 25 percent of the period during which the apartments were used in nondealing activities. (For example, an apartment that is sold on January 31, 1997, has been offered for sale for 13 months or 26.1 percent of the 49-month period during which it was used in nondealing activities.) Thus, the taxpayer is rebuttably presumed to have acquired the apartments sold in 1997 for the principal pur-

pose of selling them to customers in the ordinary course of a trade or business. Assume that the facts and circumstances do not rebut this presumption. In that case, the marketing of the apartments sold in 1997 does not satisfy the principal purpose requirement, and paragraph (c)(2)(v)(A) of this section does not apply to the disposition of those apartments. Accordingly, for purposes of applying the rules of § 1.469-2T(c)(2) to the disposition of the apartments sold in 1997, the rental of the apartments after January 1, 1996, is treated, under paragraph (c)(2)(v)(B) of this section, as the use of the apartments in the taxpayer's dealing activity.

(c)(3)-(c)(5) [Reserved]

(c)(6) *Gross income from certain oil or gas properties*—(i) *In general.* Notwithstanding any other provision of the regulations under section 469, passive activity gross income for any taxable year does not include an amount of the taxpayer's gross passive income for the year from a property described in this paragraph (c)(6)(i) equal to the taxpayer's net passive income from the property for the year. Property is described in this paragraph (c)(6)(i) if the property is—

(A) An oil or gas property that includes an oil or gas well if, for any prior taxable year beginning after December 31, 1986, any of the taxpayer's loss from the well was treated, solely by reason of § 1.469-1T(e)(4) (relating to a special rule for losses from oil and gas working interests), and not by reason of the taxpayer's material participation in the activity, as a loss that is not from a passive activity; or

(B) Any property the basis of which is determined in whole or in part by reference to the basis of property described in paragraph (c)(6)(i)(A) of this section.

(ii) *Gross and net passive income from the property.* For purposes of this paragraph (c)(6)—

(A) The taxpayer's gross passive income for any taxable year from any property described in paragraph (c)(6)(i) of this section is any passive activity gross income for the year (determined without regard to this paragraph (c)(6) and § 1.469-2T(f)) from the property;

(B) The taxpayer's net passive income for any taxable year from any property described in paragraph

(c)(6)(i) of this section is the excess, if any, of—

(1) The taxpayer's gross passive income for the taxable year from the property; over

(2) Any passive activity deductions for the taxable year (including any deduction treated as a deduction for the year under § 1.469-1T(f)(4)) that are reasonably allocable to the income; and

(C) if any oil or gas well or other item of property (the item) is included in two or more properties described in paragraph (c)(6)(i) of this section (the properties), the taxpayer must allocate the passive activity gross income (determined without regard to this paragraph (c)(6) and § 1.469-2T(f) from the item and the passive activity deductions reasonably allocable to the item among the properties.

(iii) *Property.* For purposes of paragraph (c)(6)(i)(A) of this section, the term "property" does not have the meaning given the term by section 614(a) or the regulations thereunder, and an oil or gas property that includes an oil or gas well is—

(A) The well; and

(B) Any other item of property (including any oil or gas well) the value of which is directly enhanced by any drilling, logging, seismic testing, or other activities the costs of which were taken into account in determining the amount of the taxpayer's income or loss from the well.

(iv) *Examples.* The following examples illustrate the application of this paragraph (c)(6):

*Example 1.* A is a general partner in partnership P and a limited partner in partnership R. P and R own oil and gas working interests in two separate tracts of land acquired from two separate landowners. In 1993, P drills a well on its tract, and A's distributive share of P's losses from drilling the well are treated under § 1.469-1T(e)(4) as not from a passive activity. In the course of selecting the drilling site and drilling the well, P develops information indicating that the reservoir in which the well was drilled underlies R's tract as well as P's. Under these facts, P's and R's tracts are treated as one property for purposes of this paragraph (c)(6), even if A's interests in the mineral deposits in the tracts are treated as separate properties under section 614(a). Accordingly, in 1994 and subsequent years, A's distributive share of both P's and R's income and expenses from their respective tracts is taken

into account in computing A's net passive income from the property for purposes of this paragraph (c)(6).

*Example 2.* B is a general partner in partnership S. S owns an oil and gas working interest in a single tract of land. In 1993, S drills a well, and B's distributive share of S's losses from drilling the well is treated under § 1.469-1T(e)(4) as not from a passive activity. In the course of drilling the well, S discovers two oil-bearing formations, one underlying the other. On December 1, 1993, S completes the well in the underlying formation. On January 1, 1994, B converts B's entire general partnership interest in S into a limited partnership interest. In 1994, S completes in, and commences production from, the shallow formation. Under these facts, the two mineral deposits in S's tract are treated as one property for purposes of this paragraph (c)(6), even if they are treated as separate properties under section 614(a). Accordingly, B's distributive share of S's income and expenses from both the underlying formation and from recompletion in and production from the shallow formation is taken into account in computing B's net passive income from the property for purposes of this paragraph (c)(6).

(c)(6)(iv) *Example 3—(c)(7)(iii)* [Reserved]

(c)(7)(iv) Gross income of an individual from a covenant by such individual not to compete;

(v) Gross income that is treated as not from a passive activity under any provision of the regulations under section 469, including but not limited to § 1.469-1T(h)(6) (relating to income from intercompany transactions of members of an affiliated group of corporations filing a consolidated return) and § 1.469-2T(f) and paragraph (f) of this section (relating to recharacterized passive income);

(vi) Gross income attributable to the reimbursement of a loss from fire, storm, shipwreck, or other casualty, or from theft (as such terms are used in section 165(c)(3)) if—

(A) The reimbursement is included in gross income under § 1.165-1(d)(2)(iii) (relating to reimbursements of losses that the taxpayer deducted in a prior taxable year); and

(B) The deduction for the loss was not a passive activity deduction; and

(c)(7)(vii) Gross income or gain allocable to business or rental use of a dwelling unit for any taxable year in which section 280A(c)(5) applies to such business or rental use.

(d)(1)-(d)(2)(viii) [Reserved]

(ix) An item of loss or deduction that is carried to the taxable year under section 172(a), section 613A(d), section 1212(a)(1) (in the case of corporations), or section 1212(b) (in the case of taxpayers other than corporations);

(x) An item of loss or deduction that would have been allowed for a taxable year beginning before January 1, 1987, but for section 704(d), 1366, or 465;

(xi) A deduction for a loss from fire, storm, shipwreck, or other casualty, or from theft (as such terms are used in section 165(c)(3)) if losses that are similar in cause and severity do not recur regularly in the conduct of the activity; and

(xii) A deduction or loss allocable to business or rental use of a dwelling unit for any taxable year in which section 280A(c)(5) applies to such business or rental use.

(d)(3)-(d)(5)(ii) [Reserved]

(d)(5)(iii) *Other applicable rules—(A) Applicability of rules in § 1.469-2T(c)(2).* For purposes of this paragraph (d)(5), a taxpayer's interests in property used in an activity and the amounts allocated to the interests shall be determined under § 1.469-2T(c)(2)(i)(C). In addition, the rules contained in paragraph (c)(2)(iv) and (v) of this section apply in determining for purposes of this paragraph (d)(5) the activity (or activities) in which an interest in property is used at the time of its disposition and during the 12-month period ending on the date of its disposition.

(d)(5)(iii)(B)-(d)(6)(v)(D) [Reserved]

(d)(6)(v)(E) Are taken into account under section 613A(d) (relating to limitations on certain depletion deductions), section 1211 (relating to the limitation on capital losses), or section 1231 (relating to property used in a trade or business and involuntary conversions); or

(d)(6)(v)(F)-(d)(7) [Reserved]

(d)(8) *Taxable year in which item arises.* For purposes of § 1.469-2T(d), an item of deduction arises in the taxable year in which the item would be allowable as a deduction under the taxpayer's method of accounting if taxable income for all taxable years were determined without regard to sections 469, 613A(d) and 1211.

(e)(1)-(e)(2)(i) [Reserved]

(e)(2)(ii) *Section 707(c).* Except as provided in paragraph (e)(2)(iii)(B) of this section, any payment to a partner for services or the use of capital that is described in section 707(c), including any payment described in section 736(a)(2) (relating to guaranteed payments made in liquidation of the interest of a retiring or deceased partner), is characterized as a payment for services or as the payment of interest, respectively, and not as a distributive share of partnership income.

(iii) *Payments in liquidation of a partner's interest in partnership property—(A) In general.* If any gain or loss is taken into account by a retiring partner (or any other person that owns (directly or indirectly) an interest in the partner if the partner is a passthrough entity) or a deceased partner's successor in interest as a result of a payment to which section 736(b) (relating to payments made in exchange for a retired or deceased partner's interest in partnership property) applies, the gain or loss is treated as passive activity gross income or a passive activity deduction only to the extent that the gain or loss would have been passive activity gross income or a passive activity deduction of the retiring or deceased partner (or the other person) if it had been recognized at the time the liquidation of the partner's interest commenced.

(B) *Payments in liquidation of a partner's interest in unrealized receivables and goodwill under section 736(a).* (1) If a payment is made in liquidation of a retiring or deceased partner's interest, the payment is described in section 736(a), and any income—

(i) Is taken into account by the retiring partner (or any other person that owns (directly or indirectly) an interest in the partner if the partner is a passthrough entity) or the deceased partner's successor in interest as a result of the payment; and

(ii) Is attributable to the portion (if any) of the payment that is allocable to the unrealized receivables (within the meaning of section 751(c)) and goodwill of the partnership;

the percentage of the income that is treated as passive activity gross income shall not exceed the percentage of passive activity gross income that would be included in the gross income

that the retiring or deceased partner (or the other person) would have recognized if the unrealized receivables and goodwill had been sold at the time that the liquidation of the partner's interest commenced.

(2) For purposes of this paragraph (e)(2)(iii)(B), the portion (if any) of a payment under section 736(a) that is allocable to unrealized receivables and goodwill of a partnership shall be determined in accordance with the principles employed under §1.736-1(b) for determining the portion of a payment made under section 736 that is treated as a distribution under section 736(b).

(e)(3)(i)-(iii)(A) [Reserved]

(B) An amount of gain that would have been treated as gain that is not from a passive activity under paragraph (c)(2)(iii) of this section (relating to substantially appreciated property formerly used in a nonpassive activity), paragraph (c)(6) of this section (relating to certain oil or gas properties), §1.469-2T(f)(5) (relating to certain property rented incidental to development), paragraph (f)(6) of this section (relating to property rented to a nonpassive activity), or §1.469-2T(f)(7) (relating to certain interests in a passthrough entity engaged in the trade or business of licensing intangible property) would have been allocated to the holder (or such other person) with respect to the interest if all of the property used in the passive activity had been sold immediately prior to the disposition for its fair market value on the applicable valuation date (within the meaning of §1.469-2T(e)(3)(ii)(D)(I)); and

(e)(3)(iii)(C)-(f)(4) [Reserved]

(f)(5) *Net income from certain property rented incidental to development activity*—(i) *In general.* An amount of the taxpayer's gross rental activity income for the taxable year from an item of property equal to the net rental activity income for the year from the item of property shall be treated as not from a passive activity if—

(A) Any gain from the sale, exchange, or other disposition of the item of property is included in the taxpayer's income for the taxable year;

(B) The taxpayer's use of the item of property in an activity involving the rental of the property commenced less than 12 months before the date of the

disposition (within the meaning of paragraph (c)(2)(iii)(B) of this section) of such property; and

(C) The taxpayer materially participated (within the meaning of §1.469-5T) or significantly participated (within the meaning of §1.469-5T(c)(2)) for any taxable year in an activity that involved for such year the performance of services for the purpose of enhancing the value of such item of property (or any other item of property if the basis of the item of property that is sold, exchanged, or otherwise disposed of is determined in whole or in part by reference to the basis of such other item of property).

(ii) *Commencement of use*—(A) *In general.* For purposes of paragraph (f)(5)(i)(B) of this section, a taxpayer's use of an item of property in an activity involving the rental of the property commences on the first date on which—

(1) The taxpayer owns an interest in the property;

(2) Substantially all of the property is rented (or is held out for rent and is in a state of readiness for rental); and

(3) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

(B) *Value-enhancing services.* For purposes of this paragraph (f)(5)(ii), the term value-enhancing services means the services described in paragraphs (f)(5)(i)(C) and (iii) of this section, except that the term does not include lease-up. Thus, in cases in which this paragraph (f)(5) applies solely because substantial lease-up remains to be performed (see paragraph (f)(5)(iii)(C) of this section), the twelve month period described in paragraph (f)(5)(i)(B) of this section will begin when the taxpayer acquires an interest in the property if substantially all of the property is held out for rent and is in a state of readiness for rental on that date.

(iii) *Services performed for the purpose of enhancing the value of property.* For purposes of paragraph (f)(5)(i)(C) of this section, services that are treated as performed for the purpose of enhancing the value of an item of property include but are not limited to—

(A) Construction;

(B) Renovation; and

(C) Lease-up (unless more than 50 percent of the property is leased on the date that the taxpayer acquires an interest in the property).

(iv) *Examples.* The following examples illustrate the application of this paragraph (f)(5):

*Example 1.* (i) A, a calendar year individual, is a partner in P, a calendar year partnership, which develops real estate. In 1993, P acquires an interest in undeveloped land and arranges for the financing and construction of an office building on the land. Construction is completed in February 1995, and substantially all of the building is either rented or held out for rent and in a state of readiness for rental beginning on March 1, 1995. Twenty percent of the building is leased as of March 1, 1995.

(ii) P rents the building (or holds it out for rent) for the remainder of 1995 and all of 1996, and sells the building on February 1, 1997, pursuant to a contract entered into on January 15, 1996. P did not hold the building (or any other buildings) for sale to customers in the ordinary course of P's trade or business (see paragraph (c)(2)(v) of this section). A's distributive share of P's taxable losses from the rental of the building is \$50,000 for 1995 and \$30,000 for 1996. All of A's losses from the rental of the building are disallowed under 1.469-1(a)(1)(i) (relating to the disallowance of the passive activity loss for the taxable year). A's distributive share of P's gain from the sale of the building is \$150,000. A has no other gross income or deductions from the activity of renting the building.

(iii) The real estate development activity that A holds through P in 1993, 1994, and 1995 involves the performance of services (e.g., construction) for the purpose of enhancing the value of the building. Accordingly, an amount equal to A's net rental activity income from the building may be treated as gross income that is not from a passive activity if A's use of the building in an activity involving the rental of the building commenced less than 12 months before the date of the disposition of the building. In this case, the date of the disposition of the building is January 15, 1996, the date of the binding contract for its sale.

(iv)(A) A taxpayer's use of an item of property in an activity involving the rental of the property commences on the first date on which—

(1) The taxpayer owns an interest in the item of property;

(2) Substantially all of the property is rented (or is held out for rent and is in a state of readiness for rental); and

(3) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

(B) In this case, A's use of the building in an activity involving the rental of the building commenced on March 1, 1995, less than 12 months before January 15, 1996, the date of disposition. Accordingly, if A materially (or significantly) participated in the real estate development activity in 1993, 1994, or 1995 (without regard to whether A materially participated in the activity in more than one of those years), an amount of A's gross rental activity income from the building for 1997 equal to A's net rental activity income from the building for 1997 is treated under this paragraph (f)(5) as gross income that is not from a passive activity. Under paragraph (f)(9)(iv) of this section, A's net rental activity income from the building for 1997 is \$70,000 (\$150,000 distributive share of gain from the disposition of the building minus \$80,000 of reasonably allocable passive activity deductions).

*Example 2.* (i) X, a calendar year taxpayer subject to section 469, acquires a building on February 1, 1994, when the building is 25 percent leased. During 1994, X rents the building (or holds it out for rent) and materially participates in an activity that involves the lease-up of the building. X's activities do not otherwise involve the performance of construction or other services for the purpose of enhancing the value of the building, and X does not hold the building (or any other building) for sale to customers in the ordinary course of X's trade or business. X sells the building on December 1, 1994.

(ii)(A) Under paragraph (f)(5)(iii)(C) of this section, lease-up is considered a service performed for the purpose of enhancing the value of property unless more than 50 percent of the property is leased on the date the taxpayer acquires an interest in the property. Under paragraph (f)(5)(ii)(B) of this section, however, lease-up is not considered a value-enhancing service for purposes of determining when the taxpayer commences using an item of property in an activity involving the rental of the property. Accordingly, X's acquisition of the building constitutes a commencement of X's use of the building in a rental activity, because February 1, 1994, is the first date on which—

(1) The taxpayer owns an interest in the item of property;

(2) Substantially all of the property is held out for rent; and

(3) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

(B) In this case, X disposes of the property within 12 months of the date X commenced using the building in a rental activity. Accordingly, an amount of X's gross rental activity income for 1994 equal to X's net rental activity income from the building for 1994 is treated under this paragraph (f)(5) as gain that is not from a passive activity.

*Example 3.* The facts are the same as in Example 2, except that at the time X acquires the building it is 60 percent leased. Under paragraph (f)(5)(iii)(C) of this section, lease-up is not considered a service performed for the purpose of enhancing the value of property if more than 50 percent of the property is leased on the date the taxpayer acquires an interest in the property. Therefore, additional lease-up performed by X is not taken into account under this paragraph (f)(5). Since X's activities do not otherwise involve the performance of services for the purpose of enhancing the value of the building, none of X's gross rental activity income from the building will be treated as income that is not from a passive activity under this paragraph (f)(5).

(f)(6) *Property rented to a nonpassive activity.* An amount of the taxpayer's gross rental activity income for the taxable year from an item of property equal to the net rental activity income for the year from that item of property is treated as not from a passive activity if the property—

(i) Is rented for use in a trade or business activity (within the meaning of paragraph (e)(2) of this section) in which the taxpayer materially participates (within the meaning of § 1.469-5T) for the taxable year; and

(ii) Is not described in § 1.469-2T(f)(5).

(f)(7)-(f)(9)(ii) [Reserved]

(f)(9)(iii) The gross rental activity income for a taxable year from an item of property is any passive activity gross income (determined without regard to § 1.469-2T(f)(2) through (f)(6)) that—

(A) Is income for the year from the rental or disposition of such item of property; and

(B) In the case of income from the disposition of such item of property, is income from an activity that involved the rental of such item of property during the 12-month period ending on the date of the disposition (see § 1.469-2T(c)(2)(ii)); and

(iv) The net rental activity income from an item of property for the taxable year is the excess, if any, of—

(A) The gross rental activity income from the item of property for the taxable year; over

(B) Any passive activity deductions for the taxable year (including any deduction treated as a deduction for the year under § 1.469-1(f)(4)) that are reasonably allocable to the income.

(10) *Coordination with section 163(d).* Gross income that is treated as not from a passive activity under § 1.469-2T(f)(3), (4), or (7) is treated as income described in section 469(e)(1)(A) and § 1.469-2T(c)(3)(i) except in determining whether—

(i) Any property is treated for purposes of section 469(e)(1)(A)(ii)(I) and § 1.469-2T(c)(3)(i)(C) as property that produces income of a type described in § 1.469-2T(c)(3)(i)(A);

(ii) Any property is treated for purposes of section 469(e)(1)(A)(ii)(II) and § 1.469-2T(c)(3)(i)(D) as property held for investment;

(iii) An expense (other than interest expense) is treated for purposes of section 469(e)(1)(A)(i)(II) and § 1.469-2T(d)(4) as clearly and directly allocable to portfolio income (within the meaning of § 1.469-2T(c)(3)(i)); and

(iv) Interest expense is allocated under § 1.163-8T to an investment expenditure (within the meaning of § 1.163-8T(b)(3)) or to a passive activity expenditure (within the meaning of § 1.163-8T(b)(4)).

(11) [Reserved]

[T.D. 8417, 57 FR 20754, May 15, 1992, as amended by T.D. 8477, 58 FR 11538, Feb. 26, 1993; 58 FR 13706, Mar. 15, 1993; 58 FR 29536, May 21, 1993; T.D. 8495, 58 FR 58787, Nov. 4, 1993; T.D. 8417, 59 FR 45623, Sept. 2, 1994]

#### § 1.469-2T Passive activity loss (temporary).

(a) *Scope of this section.* This section contains rules for determining the amount of the taxpayer's passive activity loss for the taxable year for purposes of section 469 and the regulations thereunder. The rules contained in this section—

(1) Provide general guidance for identifying items of income and deduction that are taken into account in determining the amount of the passive activity loss for the taxable year;

(2) Specify particular items of income and deduction that are not taken into account in determining the amount of the passive activity loss for the taxable year; and

(3) Specify the manner in which provisions of the Internal Revenue Code and the regulations, other than section 469 and the regulations thereunder, are applied for purposes of determining the

extent to which items of deduction are taken into account for a taxable year in computing the amount of the passive activity loss for such year.

(b) *Definition of passive activity loss*—

(1) *In general.* In the case of a taxpayer other than a closely held corporation (within the meaning of § 1.469-1T(g)(2)(ii)), the passive activity loss for the taxable year is the amount, if any, by which the passive activity deductions for the taxable year exceed the passive activity gross income for the taxable year.

(2) *Cross references.* See paragraph (c) of this section for the definition of “passive activity gross income,” paragraph (d) of this section for the definition of “passive activity deduction,” and § 1.469-1T(g)(4) for the computation of the passive activity loss of a closely held corporation.

(c) *Passive activity gross income*—(1) *In general.* Except as otherwise provided in the regulations under section 469, passive activity gross income for a taxable year includes an item of gross income if and only if such income is from a passive activity.

(2) *Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity*—(i) *In general*—(A) *Treatment of gain.* Except as otherwise provided in the regulations under section 469, any gain recognized upon the sale, exchange or other disposition (a “disposition”) of an interest in property used in an activity at the time of the disposition or of an interest in an activity held through a partnership or S corporation is treated in the following manner:

(1) The gain is treated as gross income from such activity for the taxable year or years in which it is recognized;

(2) If the activity is a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as passive activity gross income for the taxable year or years in which it is recognized; and

(3) If the activity is not a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as not from a passive activity.

(B) *Dispositions of partnership interests and S corporation stock.* A partnership interest or S corporation stock is not

property used in an activity for purposes of this paragraph (c)(2). See paragraph (e)(3) of this section for rules treating the gain recognized upon the disposition of a partnership interest or S corporation stock as gain from the disposition of interests in the activities in which the partnership or S corporation has an interest.

(C) *Interest in property.* For purposes of applying this paragraph (c)(2) to a disposition of property—

(1) Any material portion of the property that was used, at any time before the disposition, in any activity at a time when the remainder of the property was not used in such activity shall be treated as a separate interest in property; and

(2) The amount realized from the disposition and the adjusted basis of the property must be allocated among the separate interests in a reasonable manner.

(D) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(i):

*Example 1.* A owns an interest in a trade or business activity in which A has never materially participated. In 1987, A sells equipment that was used exclusively in the activity and realizes a gain on the sale. Under paragraph (c)(2)(i)(A)(2) of this section, the gain is passive activity gross income.

*Example 2.* B owns an interest in a trade or business activity in which B materially participates for 1987. In 1987, B sells a building used in the activity in an installment sale and realizes a gain on the sale. B does not materially participate in the activity for 1988 or any subsequent year. Under paragraph (c)(2)(i)(A)(3) of this section, none of B’s gain from the sale (including gain taken into account after 1987) is passive activity gross income.

*Example 3.* C enters into a contract to acquire property used by the seller in a rental activity. Before acquiring the property pursuant to the contract, C sells all rights under the contract and realizes a gain on the sale. Since C’s rights under the contract are not property used in a rental activity, the gain is not income from a rental activity. The result would be the same if C owned an option to acquire the property and sold the option.

*Example 4.* D sells a ten-floor office building. D owned the building for three years preceding the sale and at all times during that period used seven floors of the building in a trade or business activity and three floors in a rental activity. The fair market value per square foot is substantially the same throughout the building, and D did not

maintain a separate adjusted basis for any part of the building. Under paragraph (c)(2)(i)(C)(I) of this section, the seven floors used in the trade or business activity and the three floors used in the rental activity are treated as separate interests in property. Under paragraph (c)(2)(i)(C)(2) of this section, the amount realized and the adjusted basis of the building must be allocated between the separate interests in a reasonable manner. Under these facts, an allocation based on the square footage of the parts of the building used in each activity would be reasonable.

*Example 5.* The facts are the same as in Example 4, except that two of the seven floors used in the trade or business activity were used in the rental activity until five months before the sale. Under paragraph (c)(2)(i)(C)(I) of this section, the five floors used exclusively in the trade or business activity and the two floors used first in the rental activity and then in the trade or business activity are treated as separate interests in property. See paragraph (c)(2)(ii) of this section for rules for allocating amount realized and adjusted basis upon a disposition of an interest in property used in more than one activity during the 12-month period ending on the date of the disposition.

(ii) *Disposition of property used in more than one activity in 12-month period preceding disposition.* In the case of a disposition of an interest in property that is used in more than one activity during the 12-month period ending on the date of the disposition, the amount realized from the disposition and the adjusted basis of such interest must be allocated among such activities on a basis that reasonably reflects the use of such interest in property during such 12-month period. For purposes of this paragraph (c)(2)(ii), an allocation of the amount realized and adjusted basis solely to the activity in which an interest in property is predominantly used during the 12-month period ending on the date of the disposition reasonably reflects the use of such interest in property if the fair market value of such interest does not exceed the lesser of—

(A) \$10,000; and

(B) 10 percent of the sum of the fair market value of such interest and the fair market value of all other property used in such activity immediately before the disposition.

The following examples illustrate the application of this paragraph (c)(2)(ii):

*Example 1.* The facts are the same as in Example 5 of paragraph (c)(2)(i)(D) of this section. Under paragraph (c)(2)(i)(C)(2) of this section, D allocates the amount realized and adjusted basis of the building 30 percent to the three floors used exclusively in the rental activity, 50 percent to the five floors used exclusively in the trade or business activity, and 20 percent to the two floors used first in the rental activity and then in the trade or business activity. Under this paragraph (c)(2)(ii), the amount realized and adjusted basis allocated to the two floors that were used in both activities during the 12-month period ending on the date of the disposition must also be allocated between such activities. Under these facts, an allocation of  $\frac{7}{12}$  of such amounts to the rental activity and  $\frac{5}{12}$  of such amounts to the trade or business activity would reasonably reflect the use of the two floors during the 12-month period ending on the date of the disposition.

*Example 2.* B is a limited partner in a partnership that sells a tractor-trailer. During the 12-month period ending on the date of the sale, the tractor-trailer was used in several activities, and the partnership allocates the amount realized from the disposition and the adjusted basis of the tractor-trailer among the activities based on the number of days during the 12-month period that the partnership used the tractor-trailer in each activity. Under these facts, the partnership's allocation reasonably reflects the use of the tractor-trailer during the 12-month period ending on the date of the sale.

*Example 3.* C sells a personal computer for \$8,000. During the 12-month period ending on the date of the sale, 70 percent of C's use of the computer was in a passive activity. Immediately before the sale, the fair market value of all property used in the passive activity (including the personal computer) was \$200,000. Under these facts, the computer was predominately used in the passive activity during the 12-month period ending on the date of the sale, and the value of the computer, as measured by its sale price (\$8,000), does not exceed the lesser of (a) \$10,000, and (b) 10 percent of the value of all property used in the activity immediately before the sale (\$20,000). C allocates the amount realized and the adjusted basis solely to the passive activity. Under this paragraph (c)(2)(ii), C's allocation reasonably reflects the use of the computer during the 12-month period ending on the date of the sale.

(iii) *Disposition of substantially appreciated property formerly used in nonpassive activity.* [Reserved]. See § 1.469-4(c)(2)(iii) for rules relating to this paragraph.

(iv) *Taxable acquisitions.* [Reserved]. See § 1.469-2(c)(iv) for rules relating to this paragraph.

(v) *Property held for sale to customers.* [Reserved]. See § 1.469-2(c)(v) for rules relating to this paragraph.

(3) *Items of portfolio income specifically excluded*—(i) *In general.* Passive activity gross income does not include portfolio income. For purposes of the preceding sentence, portfolio income includes all gross income, other than income derived in the ordinary course of a trade or business (within the meaning of paragraph (c)(3)(ii) of this section), that is attributable to—

(A) Interest (including amounts treated as interest under paragraph (e)(2)(ii) of this section, relating to certain payments to partners for the use of capital); annuities; royalties (including fees and other payments for the use of intangible property); dividends on C corporation stock; and income (including dividends) from a real estate investment trust (within the meaning of section 856), regulated investment company (within the meaning of section 851), real estate mortgage investment conduit (within the meaning of section 860D), common trust fund (within the meaning of section 584), controlled foreign corporation (within the meaning of section 957), qualified electing fund (within the meaning of section 1295(a)), or cooperative (within the meaning of section 1381(a));

(B) Dividends on S corporation stock (within the meaning of section 1368(c)(2));

(C) The disposition of property that produces income of a type described in paragraph (c)(3)(i)(A) of this section; and

(D) The disposition of property held for investment (within the meaning of section 163(d)).

(ii) *Gross income derived in the ordinary course of a trade or business.* Solely for purposes of paragraph (c)(3)(i) of this section, gross income derived in the ordinary course of a trade or business includes only—

(A) Interest income on loans and investments made in the ordinary course of a trade or business of lending money;

(B) Interest on accounts receivable arising from the performance of services or the sale of property in the ordinary course of a trade or business of performing such services or selling

such property, but only if credit is customarily offered to customers of the business;

(C) Income from investments made in the ordinary course of a trade or business of furnishing insurance or annuity contracts or reinsuring risks underwritten by insurance companies;

(D) Income or gain derived in the ordinary course of an activity of trading or dealing in any property if such activity constitutes a trade or business (but see paragraph (c)(3)(iii)(A) of this section);

(E) Royalties derived by the taxpayer in the ordinary course of a trade or business of licensing intangible property (within the meaning of paragraph (c)(3)(iii)(B) of this section);

(F) Amount included in the gross income of a patron of a cooperative (within the meaning of section 1381(a), without regard to paragraph (2)(A) or (C) thereof) by reason of any payment or allocation to the patron based on patronage occurring with respect to a trade or business of the patron; and

(G) Other income identified by the Commissioner as income derived by the taxpayer in the ordinary course of a trade or business.

(iii) *Special rules*—(A) *Income from property held for investment by dealer.* For purposes of paragraph (c)(3)(i) of this section, a dealer's income or gain from an item of property is not derived by the dealer in the ordinary course of a trade or business of dealing in such property if the dealer held the property for investment at any time before such income or gain is recognized.

(B) *Royalties derived in the ordinary course of the trade or business of licensing intangible property*—(1) *In general.* Royalties received by any person with respect to a license or other transfer of any rights in intangible property shall be considered to be derived in the ordinary course of the trade or business of licensing such property only if such person—

(i) Created such property; or

(ii) Performed substantial services or incurred substantial costs with respect to the development or marketing of such property.

(2) *Substantial services or costs*—(i) *In general.* Except as provided in paragraph (c)(3)(iii)(B)(2)(ii) of this section,

the determination of whether a person has performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property shall be made on the basis of all the facts and circumstances.

(ii) *Exception.* A person has performed substantial services or incurred substantial costs for a taxable year with respect to the development or marketing of an item of intangible property if—

(a) The expenditures reasonably incurred by such person in such taxable year with respect to the development or marketing of the property exceed 50 percent of the gross royalties from licensing such property that are includible in such person's gross income for the taxable year; or

(b) The expenditures reasonably incurred by such person in such taxable year and all prior taxable years with respect to the development or marketing of the property exceed 25 percent of the aggregate capital expenditures (without any adjustment of amortization) made by such person with respect to the property in all such taxable years.

(iii) *Expenditures taken into account.* For purposes of paragraph (c)(3)(iii)(B)(2)(ii) of this section, expenditures in a taxable year include amounts chargeable to capital account for such year without regard to the year or years (if any) in which any deduction for such expenditure is allowed.

(3) *Passthrough entities.* For purposes of this paragraph (c)(3)(iii)(B), in the case of any intangible property held by a partnership, S corporation, estate, or trust, the determination of whether royalties from such property are derived in the ordinary course of a trade or business shall be made by applying the rules of this paragraph (c)(3)(iii)(B) to such entity and not to any holder of an interest in such entity.

(4) *Cross reference.* For special rules applicable to certain gross income from a trade or business of licensing intangible property, see paragraph (f)(7) of this section.

(C) *Mineral production payments.* For purposes of section 469 and the regulations thereunder—

(1) If a mineral production payment is treated as a loan under section 636, the portion of any payment in discharge of the production payment that is the equivalent of interest shall be treated as interest; and

(2) If a mineral production payment is not treated as a loan under section 636, payments in discharge of the production payment shall be treated as royalties.

(iv) *Examples.* The following examples illustrate the application of this paragraph (c)(3):

*Example 1.* A, an individual engaged in the trade or business of farming, disposes of farmland in an installment sale. A is not engaged in a trade or business of selling farmland. Therefore, A's interest income from the installment note is not gross income derived in the ordinary course of a trade or business.

*Example 2.* P, a partnership, operates a rental apartment building for low-income tenants in City Y. Under Y's laws relating to the operation of low-income housing, P is required to maintain a reserve fund to pay for the maintenance and repair of the building. P invests the reserve fund in short-term interest-bearing deposits. Because P's interest income from the investment of the reserve fund is not interest income described in paragraph (c)(3)(ii) of this section, such income is not treated as derived in the ordinary course of a trade or business. Accordingly, P's interest income from the deposits is portfolio income (within the meaning of paragraph (c)(3)(i) of this section).

*Example 3.* (i) B is a partner in a partnership that is engaged in an activity involving the conduct of a trade or business of dealing in securities. On February 1, the partnership acquires certain securities for investment (within the meaning of section 163(d)). On February 2, before recognizing any income with respect to the securities, the partnership determines that it would be advisable to hold the securities primarily for sale to customers and subsequently sells them to customers in the ordinary course of its business.

(ii) Under paragraph (c)(3)(iii)(A) of this section, income or gain from any security (including any security acquired pursuant to an investment of working capital) held by a dealer for investment at any time before such income or gain is recognized is not treated for purposes of paragraph (c)(3)(i) of this section as derived by the dealer in the ordinary course of its trade or business of dealing in securities. Accordingly, B's distributive share of the partnership's interest, dividends, or gains from the securities acquired by the partnership for investment on February 1 is portfolio income of B, notwithstanding that such securities were held by

the partnership, subsequent to February 1, primarily for sale to customers in the ordinary course of the partnership's trade or business of dealing in securities.

*Example 4.* C is a partner in a partnership that is engaged in an activity of trading or dealing in royalty interests in mineral properties. The partnership derives royalty income from royalty interests held in the activity. If the activity is a trade or business activity, C's distributive share of the partnership's royalty income from such royalty interests is treated under paragraph (c)(3)(ii)(D) of this section as derived in the ordinary course of the partnership's trade or business.

*Example 5.* (i) D, a calendar year individual, is a partner in a calendar year partnership that is engaged in an activity of developing and marketing a design for a system that reduces air pollution in office buildings. D has a 10 percent distributive share of all items of partnership income, gain, loss, deduction, and credit. In 1987, the partnership acquired the rights to the design for \$100,000. In 1987, 1988, and 1989, the partnership incurs expenditures with respect to the development and marketing of the design, and derives gross royalties from licensing the design, in the amounts set forth in the table below. The expenditures incurred in 1987 and 1988 are currently deductible expenses. The expenditures incurred in 1989 are capitalized and may be deducted only in subsequent taxable years.

| Year       | Gross royalties | Expenditures | Cumulative capital expenditures |
|------------|-----------------|--------------|---------------------------------|
| 1987 ..... | \$20,000        | \$8,000      | \$100,000                       |
| 1988 ..... | 20,000          | 12,000       | 100,000                         |
| 1989 ..... | 60,000          | 15,000       | 115,000                         |
| 1990 ..... | 120,000         | 0            | 115,000                         |

(ii) Under paragraph (c)(3)(iii)(B)(3) of this section, the determination of whether royalties from intangible property are derived in the ordinary course of a trade or business of a partnership is made by applying the rules of paragraph (c)(3)(iii)(B) of this section to the partnership rather than the partners. The expenditures reasonably incurred by the partnership in 1987 with respect to the development or marketing of the design (\$8,000) do not exceed 50 percent of the partnership's gross royalties for such year from licensing the design (\$20,000). In addition, the sum of such expenditures incurred in 1987 and all prior taxable years (\$8,000) does not exceed 25 percent of the aggregate capital expenditures made by the partnership in all such taxable years with respect to the design (\$100,000). Accordingly, for 1987, the partnership is not treated under paragraph (c)(3)(iii)(B)(2)(ii) of this section as performing substantial services or incurring substantial costs with respect to the development or marketing of the design. There-

fore, unless all of the facts and circumstances indicate that the partnership performed substantial services or incurred substantial costs with respect to the development or marketing of the design, D's distributive share of the partnership's royalty income for 1987 is portfolio income.

(iii) As of the end of 1988, the sum of the expenditures reasonably incurred by the partnership during such taxable year and all prior taxable years with respect to the development or marketing of the design (\$20,000) does not exceed 25 percent of the aggregate capital expenditures made by the partnership in all such years with respect to the design (\$100,000). However, the amount of such expenditures incurred by the partnership in 1988 (\$12,000) exceeds 50 percent of the partnership's gross royalties for such year from licensing the design (\$20,000). Accordingly, for 1988, under paragraph (c)(3)(iii)(B)(2)(ii)(a) of this section, the partnership is treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design, and D's distributive share of the partnership's royalty income for 1988 is considered for purposes of paragraph (c)(3)(i) of this section to be derived in the ordinary course of a trade or business and therefore is not portfolio income.

(iv) The expenditures reasonably incurred by the partnership in 1989 with respect to the development or marketing of the design (\$15,000) do not exceed 50 percent of the partnership's gross royalties for such year from licensing the design (\$60,000). However, the sum of such expenditures incurred by the partnership in 1989 and all prior taxable years (\$35,000) exceeds 25 percent of the partnership's aggregate capital expenditures made in all such years with respect to the design (\$115,000). Accordingly, for 1989, under paragraph (c)(3)(iii)(B)(2)(ii)(b) of this section, the partnership is treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design, and D's distributive share of the partnership's royalty income in 1989 is considered for purposes of paragraph (c)(3)(i) of this section to be derived in the ordinary course of a trade or business and therefore is not portfolio income.

(v) The result for 1990 is the same as for 1989, notwithstanding that the partnership incurs no expenditures in 1990 with respect to the development or marketing of the design.

*Example 6.* The facts are the same as in Example 5, except that, for 1987, D's distributive share of the partnership's development and marketing costs is 15 percent, while D's distributive share of the partnership's gross royalties is 10 percent. Although D's distributive share of the expenditures reasonably incurred by the partnership during 1987

with respect to the development and marketing of the design (\$1,200) is more than 50 percent of D's distributive share of the partnership's gross royalties from licensing the design (\$2,000), D is not treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design for 1987 under paragraph (c)(3)(iii)(B)(2)(ii)(a) of this section. This is because, under paragraph (c)(3)(iii)(B)(3) of this section, the determination of whether the royalties are derived in the ordinary course of a trade or business is made by applying paragraph (c)(3)(iii)(B) of this section to the partnership, and not to D.

(4) *Items of personal service income specifically excluded*—(i) *In general.* Passive activity gross income does not include compensation paid to or on behalf of an individual for personal services performed or to be performed by such individual at any time. For purposes of this paragraph (c)(4), compensation for personal services includes only—

(A) Earned income (within the meaning of section 911(d)(2)(A)), including gross income from a payment described in paragraph (e)(2) of this section that represents compensation for the performance of services by a partner;

(B) Amounts includible in gross income under section 83;

(C) Amounts includible in gross income under sections 402 and 403;

(D) Amounts (other than amounts described in paragraph (c)(4)(i)(C) of this section) paid pursuant to retirement, pension, and other arrangements for deferred compensation for services;

(E) Social security benefits (within the meaning of section 86(d)) includible in gross income under section 86; and

(F) Other income identified by the Commissioner as income derived by the taxpayer from personal services;

provided, however, that no portion of a partner's distributive share of partnership income (within the meaning of section 704(b)) or a shareholder's pro rata share of income from an S corporation (within the meaning of section 1377(a)) shall be treated as compensation for personal services.

(ii) *Example.* The following example illustrates the application of this paragraph (c)(4):

*Example.* C owns 50 percent of the stock of X, an S corporation. X owns rental real estate, which it manages. X pays C a salary for services performed by C on behalf of X in

connection with the management of X's rental properties. Under this paragraph (c)(4), although C's pro rata share of X's gross rental income is passive activity gross income (even if the salary paid to C is less than the fair market value of C's services), the salary paid to C does not constitute passive activity gross income.

(5) *Income from section 481 adjustment*—(i) *In general.* If a change in accounting method results in a positive section 481 adjustment with respect to an activity, a ratable portion (within the meaning of paragraph (c)(5)(iii) of this section) of the amount taken into account for a taxable year as a net positive section 481 adjustment by reason of such change shall be treated as gross income from the activity for such taxable year, and such gross income shall be treated as passive activity gross income if and only if such activity is a passive activity for the year of the change (within the meaning of section 481(a)).

(ii) *Positive section 481 adjustments.* For purposes of applying this paragraph (c)(5)—

(A) The term "net positive section 481 adjustment" means the increase (if any) in taxable income taken into account under section 481(a) to prevent amounts from being duplicated or omitted by reason of a change in accounting method; and

(B) The term "positive section 481 adjustment with respect to an activity" means the increase (if any) in taxable income that would be taken into account under section 481(a) to prevent only the duplication or omission of amounts from such activity by reason of the change in accounting method.

(iii) *Ratable portion.* The ratable portion of the amount taken into account as a net positive section 481 adjustment for a taxable year by reason of a change in accounting method is determined with respect to an activity by multiplying such amount by the fraction obtained by dividing—

(A) The positive section 481 adjustment with respect to the activity; by

(B) The sum of the positive section 481 adjustments with respect to all of the activities of the taxpayer.

(6) *Gross income from certain oil or gas properties*—(i) *In general.* [Reserved]. See § 1.469-2(c)(6)(i) for rules relating to this paragraph.

(ii) *Gross and net passive income from the property.* [Reserved]. See §1.469-2(c)(6)(ii) for rules relating to this paragraph.

(iii) *Property.* [Reserved]. See 1.469-2(c)(6)(iii) for rules relating to this paragraph.

(iv) *Examples.* The following examples illustrate the application of this (c)(6):

*Example 1.* [Reserved]. See §1.469-2(c)(6)(iv) *Example 1.*

*Example 2.* [Reserved]. See §1.469-2(c)(6)(iv) *Example 2.*

*Example 3.* C is a general partner in partnership T and a limited partner in partnership U. T and U both own oil and gas working interests in tracts of land in County X. In 1987, T drills a well, and C's distributive share of T's losses from drilling the well is treated under §1.469-1T(e)(4) as not from a passive activity. In the course of selecting the drilling site and drilling the well, T develops information indicating a significant probability that substantial oil and gas reserves underlie most portions of County X. As a result, the value of all oil and gas properties in County X is enhanced. The information developed by T does not, however, indicate that the reservoir in which T's well is drilled underlies U's tract. Under these facts, T's and U's tracts are not treated as one property for purposes of this paragraph (c)(6), because the value of U's tract is not directly enhanced by T's activities.

(7) *Other items specifically excluded.* Notwithstanding any other provision of the regulations under section 469, passive activity gross income does not include the following:

(i) Gross income of an individual from intangible property, such as a patent, copyright, or literary, musical, or artistic composition, if the taxpayer's personal efforts significantly contributed to the creation of such property;

(ii) Gross income from a qualified low-income housing project (within the meaning of section 502 of the Tax Reform Act of 1986) for any taxable year in the relief period (within the meaning of section 502(b) of such Act);

(iii) Gross income attributable to a refund of any state, local, or foreign income, war profits, or excess profits tax;

(iv) [Reserved]. See §1.469-2(c)(7)(iv) for rules relating to this paragraph (c)(7)(iv).

(v) [Reserved]. See §1.469-2(c)(7)(v) for rules relating to this paragraph (c)(7)(v).

(vi) [Reserved]. See §1.469-2(c)(7)(vi) for rules relating to this paragraph (c)(7)(vi).

(d) *Passive activity deductions—(1) In general.* Except as otherwise provided in section 469 and the regulations thereunder, a deduction is a passive activity deduction for a taxable year if and only if such deduction—

(i) Arises (within the meaning of paragraph (d)(8) of this section) in connection with the conduct of an activity that is a passive activity for the taxable year; or

(ii) Is treated as a deduction from an activity under §1.469-1T(f)(4) for the taxable year.

The following example illustrates the application of this paragraph (d)(1):

*Example.* (i) In 1987, A, a calendar year individual, acquires a partnership interest in R, a calendar year partnership. R's only activity is a trade or business activity in which A materially participates for 1987. R incurs a loss in 1987. A's distributive share of R's 1987 loss is \$1,000. However, A's basis in the partnership interest at the end of 1987 (without regard to A's distributive share of partnership loss) is \$600; accordingly, section 704(d) disallows any deduction in 1987 for \$400 of A's distributive share of R's loss. The remainder of A's distributive share of R's loss would be allowed as a deduction for 1987 if taxable income for all taxable years were determined without regard to sections 469, 613A(d), and 1211. See paragraph (d)(8) of this section.

(ii) A does not materially participate in R's activity for 1988. In 1988, R again incurs a loss, and A's distributive share of the loss is again \$1,000. At the end of 1988, A's basis in the partnership interest (without regard to A's distributive share of partnership loss) is \$2,000; accordingly, in 1988 section 704(d) does not limit A's deduction for either A's \$1,000 distributive share of R's 1988 loss or the \$400 loss carried over from 1987 under the second sentence of section 704(d). These losses would be allowed as a deduction for 1988 if taxable income for all taxable years were determined without regard to sections 469, 613A(d) and 1211. See paragraph (d)(8) of this section.

(iii) Under these facts, only \$400 of A's distributive share of R's deductions from the activity are disallowed under section 704(d) in 1987. A's remaining deductions from the activity are treated as deductions that arise in connection with the activity for 1987 under paragraph (d)(8) of this section. Because A materially participates in the activity for 1987, the activity is not a passive activity (within the meaning of §1.469-1T(e)(1)) of A for such year. Accordingly, the deductions that are not disallowed in 1987 are not passive activity deductions.

(iv) A does not materially participate in R's activity for 1988. Accordingly, the activity is a passive activity of A for such year. No portion of A's distributive share of R's deductions from the activity is disallowed under section 704(d) in 1988. Accordingly, A's distributive share of R's deductions for 1988 and the \$400 of deductions carried over from 1987 are both treated under paragraph (d)(8) of this section as deductions that arise in 1988. Since the activity is a passive activity for 1988, such deductions are passive activity deductions.

(2) *Exceptions.* Passive activity deductions do not include—

(i) A deduction for an item of expense (other than interest) that is clearly and directly allocable (within the meaning of paragraph (d)(4) of this section) to portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(ii) A deduction allowed under section 243, 244, or 245 with respect to any dividend that is not included in passive activity gross income;

(iii) Interest expense (other than interest expense described in paragraph (d)(3) of this section);

(iv) A deduction for a loss from the disposition of property of a type that produces portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(v) A deduction that, under section 469(g) and § 1.469-6T (relating to the allowance of passive activity losses upon certain dispositions of interests in passive activities), is treated as a deduction that is not a passive activity deduction;

(vi) A deduction for any state, local, or foreign income, war profits, or excess profits tax;

(vii) A miscellaneous itemized deduction (within the meaning of section 67(b)) that is subject to disallowance in whole or in part under section 67(a) (without regard to whether any amount of such deduction is disallowed under section 67);

(viii) A deduction allowed under section 170 for a charitable contribution;

(ix) [Reserved]. See § 1.469-2(d)(2)(ix) for rules relating to this paragraph.

(x) [Reserved]. See § 1.469-2(d)(2)(x) for rules relating to this paragraph (d)(2)(x).

(xi) [Reserved]. See § 1.469-2(d)(2)(xi) for rules relating to this paragraph (d)(2)(xi).

(xii) [Reserved]. See § 1.469-2(d)(2)(xii) for rules relating to this paragraph (d)(2)(xii).

(3) *Interest expense.* Except as otherwise provided in the regulations under section 469, interest expense is taken into account as a passive activity deduction if and only if such interest expense—
