Title 40
Protection of Environment

Parts 96 to 99

Revised as of July 1, 2017

Containing a codification of documents
of general applicability and future effect

As of July 1, 2017

Published by the Office of the Federal Register
National Archives and Records Administration
as a Special Edition of the Federal Register
U.S. GOVERNMENT OFFICIAL EDITION NOTICE

Legal Status and Use of Seals and Logos

The seal of the National Archives and Records Administration (NARA) authenticates the Code of Federal Regulations (CFR) as the official codification of Federal regulations established under the Federal Register Act. Under the provisions of 44 U.S.C. 1507, the contents of the CFR, a special edition of the Federal Register, shall be judicially noticed. The CFR is prima facie evidence of the original documents published in the Federal Register (44 U.S.C. 1510).

It is prohibited to use NARA’s official seal and the stylized Code of Federal Regulations logo on any republication of this material without the express, written permission of the Archivist of the United States or the Archivist’s designee. Any person using NARA’s official seals and logos in a manner inconsistent with the provisions of 36 CFR part 1200 is subject to the penalties specified in 18 U.S.C. 506, 701, and 1017.

Use of ISBN Prefix

This is the Official U.S. Government edition of this publication and is herein identified to certify its authenticity. Use of the 0–16 ISBN prefix is for U.S. Government Publishing Office Official Editions only. The Superintendent of Documents of the U.S. Government Publishing Office requests that any reprinted edition clearly be labeled as a copy of the authentic work with a new ISBN.

Cite this Code: CFR

To cite the regulations in this volume use title, part and section number. Thus, 40 CFR 96.1 refers to title 40, part 96, section 1.
Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

- Title 1 through Title 16: as of January 1
- Title 17 through Title 27: as of April 1
- Title 28 through Title 41: as of July 1
- Title 42 through Title 50: as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, July 1, 2017), consult the “List of CFR Sections Affected (LSA),” which is issued monthly, and the “Cumulative List of Parts Affected,” which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cutoff date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96–511) requires Federal agencies to display an OMB control number with their information collection request.
Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

PAST PROVISIONS OF THE CODE

Provisions of the Code that are no longer in force and effect as of the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on any given date in the past by using the appropriate List of CFR Sections Affected (LSA). For the convenience of the reader, a “List of CFR Sections Affected” is published at the end of each CFR volume. For changes to the Code prior to the LSA listings at the end of the volume, consult previous annual editions of the LSA. For changes to the Code prior to 2001, consult the List of CFR Sections Affected compilations, published for 1949-1963, 1964-1972, 1973-1985, and 1986-2000.

“[RESERVED]” TERMINOLOGY

The term “[Reserved]” is used as a place holder within the Code of Federal Regulations. An agency may add regulatory information at a “[Reserved]” location at any time. Occasionally “[Reserved]” is used editorially to indicate that a portion of the CFR was left vacant and not accidentally dropped due to a printing or computer error.

INCORPORATION BY REFERENCE

What is incorporation by reference? Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

What is a proper incorporation by reference? The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

(a) The incorporation will substantially reduce the volume of material published in the Federal Register.

(b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.

(c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

What if the material incorporated by reference cannot be found? If you have any problem locating or obtaining a copy of material listed as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, or call 202-741-6010.

CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Authorities and Rules. A list of CFR titles, chapters, subchapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.
An index to the text of “Title 3—The President” is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency’s name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-741-6000 or write to the Director, Office of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001 or e-mail fedreg.info@nara.gov.

SALES

The Government Publishing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call toll-free, 866-512-1800, or DC area, 202-512-1800, M-F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2104, 24 hours a day. For payment by check, write to: US Government Publishing Office – New Orders, P.O. Box 979050, St. Louis, MO 63197-9000.

ELECTRONIC SERVICES

The full text of the Code of Federal Regulations, the LSA (List of CFR Sections Affected), The United States Government Manual, the Federal Register, Public Laws, Public Papers of the Presidents of the United States, Compilation of Presidential Documents and the Privacy Act Compilation are available in electronic format via www.ofr.gov. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800, or 866-512-1800 (toll-free). E-mail, ContactCenter@gpo.gov.

OLIVER A. POTTS,
Director,
Office of the Federal Register.
July 1, 2017.
Title 40—Protection of Environment is composed of thirty-seven volumes. The parts in these volumes are arranged in the following order: Parts 1–49, parts 50–51, part 52 (52.01–52.1018), part 52 (52.1019–52.2019), part 52 (52.2020–end of part 52), parts 53–59, part 60 (60.1–60.499), part 60 (60.500–end of part 60, sections), part 60 (Appendices), parts 61–62, part 63 (63.1–63.599), part 63 (63.600–63.1199), part 63 (63.1200–63.1439), part 63 (63.1440–63.6175), part 63 (63.6580–63.8830), part 63 (63.8980–end of part 63), parts 64–71, parts 72–79, part 80, part 81, parts 82–86, parts 87–95, parts 96–99, parts 100–135, parts 136–149, parts 150–189, parts 190–259, parts 260–265, parts 266–299, parts 300–399, parts 400–424, parts 425–699, parts 700–722, parts 723–789, parts 790–999, parts 1000–1059, and part 1060 to end. The contents of these volumes represent all current regulations codified under this title of the CFR as of July 1, 2017.

Chapter I—Environmental Protection Agency appears in all thirty-seven volumes. Regulations issued by the Council on Environmental Quality, including an Index to Parts 1500 through 1508, appear in the volume containing parts 1060 to end. The OMB control numbers for title 40 appear in §9.1 of this chapter.

For this volume, Susannah C. Hurley was Chief Editor. The Code of Federal Regulations publication program is under the direction of John Hyrum Martinez, assisted by Stephen J. Frattini.

SUBCHAPTER C—AIR PROGRAMS (CONTINUED)

PART 96—NOₓ BUDGET TRADING PROGRAM AND CAIR NOₓ AND SO₂ TRADING PROGRAMS FOR STATE IMPLEMENTATION PLANS

Subpart A—NOₓ Budget Trading Program General Provisions

Sec. 96.1 Purpose.  
96.2 Definitions.  
96.3 Measurements, abbreviations, and acronyms.  
96.4 Applicability.  
96.5 Retired unit exemption.  
96.6 Standard requirements.  
96.7 Computation of time.

Subpart B—Authorized Account Representative for NOₓ Budget Sources

96.10 Authorization and responsibilities of the NOₓ authorized account representative.  
96.11 Alternate NOₓ authorized account representative.  
96.12 Changing the NOₓ authorized account representative and the alternate NOₓ authorized account representative; changes in the owners and operators.  
96.13 Account certificate of representation.  
96.14 Objections concerning the NOₓ authorized account representative.

Subpart C—Permits

96.20 General NOₓ Budget trading program permit requirements.  
96.21 Submission of NOₓ Budget permit applications.  
96.22 Information requirements for NOₓ Budget permit applications.  
96.23 NOₓ Budget permit contents.  
96.24 Effective date of initial NOₓ Budget permit.  
96.25 NOₓ Budget permit revisions.

Subpart D—Compliance Certification

96.30 Compliance certification report.  
96.31 Permitting authority’s and Administrator’s action on compliance certifications.

Subpart E—NOₓ Allowance Allocations

96.40 State trading program budget.  
96.41 Timing requirements for NOₓ allowance allocations.  
96.42 NOₓ allowance allocations.

Subpart F—NOₓ Allowance Tracking System

96.50 NOₓ Allowance Tracking System accounts.  
96.51 Establishment of accounts.  
96.52 NOₓ Allowance Tracking System responsibilities of NOₓ authorized account representative.  
96.53 Recordation of NOₓ allowance allocations.  
96.54 Compliance.  
96.55 Banking.  
96.56 Account error.  
96.57 Closing of general accounts.

Subpart G—NOₓ Allowance Transfers

96.60 Submission of NOₓ allowance transfers.  
96.61 EPA recordation.  
96.62 Notification.

Subpart H—Monitoring and Reporting

96.70 General requirements.  
96.71 Initial certification and recertification procedures.  
96.72 Out of control periods.  
96.73 Notifications.  
96.74 Recordkeeping and reporting.  
96.75 Petitions.  
96.76 Additional requirements to provide heat input data for allocations purposes.

Subpart I—Individual Unit Opt-ins

96.80 Applicability.  
96.81 General.  
96.82 NOₓ authorized account representative.  
96.83 Applying for NOₓ Budget opt-in permit.  
96.84 Opt-in process.  
96.85 NOₓ Budget opt-in permit contents.  
96.86 Withdrawal from NOₓ Budget Trading Program.  
96.87 Change in regulatory status.  
96.88 NOₓ allowance allocations to opt-in units.

Subpart J—Mobile and Area Sources (Reserved)

Subparts K–Z (Reserved)

Subpart AA—CAIR NOₓ Annual Trading Program General Provisions

96.101 Purpose.  
96.102 Definitions.  
96.103 Measurements, abbreviations, and acronyms.  
96.104 Applicability.
96.105 Retired unit exemption.
96.106 Standard requirements.
96.107 Computation of time.
96.108 Appeal procedures.

Subpart BB—CAIR Designated Representative for CAIR NO\textsubscript{X} Sources

96.110 Authorization and responsibilities of CAIR designated representative.
96.111 Alternate CAIR designated representative.
96.112 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.
96.119 Certificate of representation.
96.114 Objections concerning CAIR designated representative.
96.115 Delegation by CAIR designated representative and alternate CAIR designated representative.

Subpart CC—Permits

96.120 General CAIR NO\textsubscript{X} Annual Trading Program permit requirements.
96.121 Submission of CAIR permit applications.
96.122 Information requirements for CAIR permit applications.
96.123 CAIR permit contents and term.
96.124 CAIR permit revisions.

Subpart DD [Reserved]

Subpart EE—CAIR NO\textsubscript{X} Allowance Allocations

96.140 State trading budgets.
96.141 Timing requirements for CAIR NO\textsubscript{X} allowance allocations.
96.142 CAIR NO\textsubscript{X} allowance allocations.
96.143 Compliance supplement pool.

Subpart FF—CAIR NO\textsubscript{X} Allowance Tracking System

96.150 [Reserved]
96.151 Establishment of accounts.
96.152 Responsibilities of CAIR authorized account representative.
96.153 Recordation of CAIR NO\textsubscript{X} allowance allocations.
96.154 Compliance with CAIR NO\textsubscript{X} emissions limitation.
96.155 Banking.
96.156 Account error.
96.157 Closing of general accounts.

Subpart GG—CAIR NO\textsubscript{X} Allowance Transfers

96.160 Submission of CAIR NO\textsubscript{X} allowance transfers.
96.161 EPA recordation.
96.162 Notification.

Subpart HH—Monitoring and Reporting

96.170 General requirements.
96.171 Initial certification and recertification procedures.
96.172 Out of control periods.
96.173 Notifications.
96.174 Recordkeeping and reporting.
96.175 Petitions.

Subpart II—CAIR NO\textsubscript{X} Opt-in Units

96.180 Applicability.
96.181 General.
96.182 CAIR designated representative.
96.183 Applying for CAIR opt-in permit.
96.184 Opt-in process.
96.185 CAIR opt-in permit contents.
96.186 Withdrawal from CAIR NO\textsubscript{X} Annual Trading Program.
96.187 Change in regulatory status.
96.188 CAIR NO\textsubscript{X} allowance allocations to CAIR NO\textsubscript{X} opt-in units.

Subparts JJ–ZZ [Reserved]

Subpart AAA—CAIR SO\textsubscript{2}; Trading Program General Provisions

96.201 Purpose.
96.202 Definitions.
96.203 Measurements, abbreviations, and acronyms.
96.204 Applicability.
96.205 Retired unit exemption.
96.206 Standard requirements.
96.207 Computation of time.
96.208 Appeal procedures.

Subpart BBB—CAIR Designated Representative for CAIR SO\textsubscript{2}Sources

96.210 Authorization and responsibilities of CAIR designated representative.
96.211 Alternate CAIR designated representative.
96.212 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.
96.213 Certificate of representation.
96.214 Objections concerning CAIR designated representative.
96.215 Delegation by CAIR designated representative and alternate CAIR designated representative.

Subpart CCC—Permits

96.220 General CAIR SO\textsubscript{2}; Trading Program permit requirements.
96.221 Submission of CAIR permit applications.
96.222 Information requirements for CAIR permit applications.
96.223 CAIR permit contents and term.
96.224 CAIR permit revisions.
Environmental Protection Agency

Subparts DDD–EEE [Reserved]

Subpart FFF—CAIR SO₂ Allowance Tracking System

96.250 [Reserved]
96.251 Establishment of accounts.
96.252 Responsibilities of CAIR authorized account representative.
96.253 Recordation of CAIR SO₂ allowances.
96.254 Compliance with CAIR SO₂ emissions limitation.
96.255 Banking.
96.256 Account error.
96.257 Closing of general accounts.

Subpart GGG—CAIR SO₂ Allowance Transfers

96.260 Submission of CAIR SO₂ allowance transfers.
96.261 EPA recordation.
96.262 Notification.

Subpart HHH—Monitoring and Reporting

96.270 General requirements.
96.271 Initial certification and recertification procedures.
96.272 Out of control periods.
96.273 Notifications.
96.274 Recordkeeping and reporting.
96.275 Petitions.

Subpart III—CAIR SO₂ Opt-in Units

96.280 Applicability.
96.281 General.
96.282 CAIR designated representative.
96.283 Applying for CAIR opt-in permit.
96.284 Opt-in process.
96.285 CAIR opt-in permit contents.
96.286 Withdrawal from CAIR SO₂ Trading Program.
96.287 Change in regulatory status.
96.288 CAIR SO₂ allowance allocations to CAIR SO₂ opt-in units.

Subparts JJJ–ZZZ [Reserved]

Subpart AAAA—CAIR NOₓ Ozone Season Trading Program General Provisions

96.301 Purpose.
96.302 Definitions.
96.303 Measurements, abbreviations, and acronyms.
96.304 Applicability.
96.305 Retired unit exemption.
96.306 Standard requirements.
96.307 Computation of time.

96.308 Appeal procedures.

Subpart BBBB—CAIR Designated Representative for CAIR NOₓ Ozone Season Sources

96.310 Authorization and responsibilities of CAIR designated representative.
96.311 Alternate CAIR designated representative.
96.312 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.
96.313 Certificate of representation.
96.314 Objections concerning CAIR designated representative.
96.315 Delegation by CAIR designated representative and alternate CAIR designated representative.

Subpart CCCC—Permits

96.320 General CAIR NOₓ Ozone Season Trading Program permit requirements.
96.321 Submission of CAIR permit applications.
96.322 Information requirements for CAIR permit applications.
96.323 CAIR permit contents and term.
96.324 CAIR permit revisions.

Subpart DDDD [Reserved]

Subpart EEEE—CAIR NOₓ Ozone Season Allowance Allocations

96.340 State trading budgets.
96.341 Timing requirements for CAIR NOₓ Ozone Season allowance allocations.
96.342 CAIR NOₓ Ozone Season allowance allocations.

Subpart FFFF—CAIR NOₓ Ozone Season Allowance Tracking System

96.350 [Reserved]
96.351 Establishment of accounts.
96.352 Responsibilities of CAIR authorized account representative.
96.353 Recordation of CAIR NOₓ Ozone Season allowance allocations.
96.354 Compliance with CAIR NOₓ emissions limitation.
96.355 Banking.
96.356 Account error.
96.357 Closing of general accounts.

Subpart GGGG—CAIR NOₓ Ozone Season Allowance Transfers

96.360 Submission of CAIR NOₓ Ozone Season allowance transfers.
96.361 EPA recordation.
96.362 Notification.
§ 96.1 Purpose.

This part establishes general provisions and the applicability, permitting, allowance, excess emissions, monitoring, and opt-in provisions for the NOx Budget Trading Program for State implementation plans as a means of mitigating the interstate transport of ozone and nitrogen oxides, an ozone precursor. The owner or operator of a unit, or any other person, shall comply with requirements of this part as a matter of federal law only to the extent a State that has jurisdiction over the unit incorporates by reference provisions of this part, or otherwise adopts such requirements of this part, and requires compliance, the State submits to the Administrator a State implementation plan including such adoption and such compliance requirement, and the Administrator approves the portion of the State implementation plan including such adoption and such compliance requirement. To the extent a State adopts requirements of this part, including at a minimum the requirements of subpart A (except for §96.4(b)), subparts B through D, subpart F (except for §96.55(c)), and subparts G and H of this part, the State authorizes the Administrator to assist the State in implementing the NOx Budget Trading Program by carrying out the functions set forth for the Administrator in such requirements.

§ 96.2 Definitions.

The terms used in this part shall have the meanings set forth in this section as follows:

Account certificate of representation means the completed and signed submission required by subpart B of this part for certifying the designation of a NOx authorized account representative for a NOx Budget source or a group of identified NOx Budget sources who is authorized to represent the owners and operators of such source or sources and of the NOx Budget units at such source or sources with regard to matters under the NOx Budget Trading Program.

Account number means the identification number given by the Administrator to each NOx Allowance Tracking System account.

Acid Rain emissions limitation means, as defined in §72.2 of this chapter, a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program under title IV of the CAA.

Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

Allocate or allocation means the determination by the permitting authority or the Administrator of the number of NOx allowances to be initially credited to a NOx Budget unit or an allocation set-aside.

Automated data acquisition and handling system or DAHS means that component of the CEMS, or other emissions monitoring system approved for use under subpart H of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the
measured parameters in the measurement units required by subpart H of this part.

*Boiler* means an enclosed fossil or other fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

*Combined cycle system* means a system comprised of one or more combustion turbines, heat recovery steam generators, and steam turbines configured to improve overall efficiency of electricity generation or steam production.

*Combustion turbine* means an enclosed fossil or other fuel-fired device that is comprised of a compressor, a combustor, and a turbine, and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine.

*Commence commercial operation* means, with regard to a unit that serves a generator, to have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation. Except as provided in §96.5, for a unit that is a NOX Budget unit under §96.4 on the date the unit commences commercial operation, such date shall remain the unit’s date of commencement of commercial operation even if the unit is subsequently modified, reconstructed, or repowered. Except as provided in §96.5 or subpart I of this part, for a unit that is a NOX Budget unit under §96.4 on the date the unit commences commercial operation, the date the unit becomes a NOX Budget unit under §96.4 shall be the unit’s date of commencement of operation.

*Common stack* means a single flue through which emissions from two or more units are exhausted.

*Compliance account* means a NOX Allowance Tracking System account, established by the Administrator for a NOX Budget unit under subpart F of this part, in which the NOX allowance allocations for the unit are initially recorded and in which are held NOX allowances available for use by the unit for a control period for the purpose of meeting the unit’s NOX Budget emissions limitation.

*Compliance certification* means a submission to the permitting authority or the Administrator, as appropriate, that is required under subpart D of this part to report a NOX Budget source’s or a NOX Budget unit’s compliance or non-compliance with this part and that is signed by the NOX authorized account representative in accordance with subpart B of this part.

*Continuous emission monitoring system* or CEMS means the equipment required under subpart H of this part to sample, analyze, measure, and provide, by readings taken at least once every 15 minutes of the measured parameters, a permanent record of nitrogen oxides emissions, expressed in tons per hour for nitrogen oxides. The following systems are component parts included, consistent with part 75 of this chapter, in a continuous emission monitoring system:

1. Flow monitor;
2. Nitrogen oxides pollutant concentration monitors;
3. Diluent gas monitor (oxygen or carbon dioxide) when such monitoring is required by subpart H of this part;
4. A continuous moisture monitor when such monitoring is required by subpart H of this part; and
5. An automated data acquisition and handling system.

*Control period* means the period beginning May 1 of a year and ending on September 30 of the same year, inclusive.

*Emissions* means air pollutants exhausted from a unit or source into the...
atmosphere, as measured, recorded, and reported to the Administrator by the NO\textsubscript{X} authorized account representative and as determined by the Administrator in accordance with subpart H of this part.

Excess emissions means any tonnage of nitrogen oxides emitted by a NO\textsubscript{X} Budget unit during a control period that exceeds the NO\textsubscript{X} Budget emissions limitation for the unit.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil fuel-fired means, with regard to a unit:

1. The combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises more than 50 percent of the annual heat input on a Btu basis during any year starting in 1995 or, if a unit had no heat input starting in 1995, during the last year of operation of the unit prior to 1995; or

2. The combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel is projected to comprise more than 50 percent of the annual heat input on a Btu basis during any year; provided that the unit shall be “fossil fuel-fired” as of the date, during such year, on which the unit begins combusting fossil fuel.

General account means a NO\textsubscript{X} Allowance Tracking System account, established under subpart F of this part, that is not a compliance account or an overdraft account.

Generator means a device that produces electricity.

Heat input means the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) and the fuel feed rate into a combustion device (in mass of fuel/time), as measured, recorded, and reported to the Administrator by the NO\textsubscript{X} authorized account representative and as determined by the Administrator in accordance with subpart H of this part, and does not include the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy from any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

1. For the life of the unit;

2. For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

3. For a period equal to or greater than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the ability of a unit to combust a stated maximum amount of fuel per hour on a steady state basis, as determined by the physical design and physical characteristics of the unit.

Maximum potential hourly heat input means an hourly heat input used for reporting purposes when a unit lacks certified monitors to report heat input. If the unit intends to use appendix D of part 75 of this chapter to report heat input, this value should be calculated, in accordance with part 75 of this chapter, using the maximum fuel flow rate and the maximum gross calorific value. If the unit intends to use a flow monitor and a diluent gas monitor, this value should be reported, in accordance with part 75 of this chapter, using the maximum potential flow rate and either the maximum carbon dioxide concentration (in percent CO\textsubscript{2}) or the minimum oxygen concentration (in percent O\textsubscript{2}).

Maximum potential NO\textsubscript{X} emission rate means the emission rate of nitrogen oxides (in lb/mmBtu) calculated in accordance with section 3 of appendix F of part 75 of this chapter, using the maximum potential nitrogen oxides concentration as defined in section 2 of appendix A of part 75 of this chapter.
and either the maximum oxygen concentration (in percent \( O_2 \)) or the minimum carbon dioxide concentration (in percent \( CO_2 \)), under all operating conditions of the unit except for unit startups, shutdowns, and upsets.

**Maximum rated hourly heat input** means a unit-specific maximum hourly heat input (\( \text{mmBtu} \)) which is the higher of the manufacturer’s maximum rated hourly heat input or the highest observed hourly heat input.

**Monitoring system** means any monitoring system that meets the requirements of subpart \( H \) of this part, including a continuous emissions monitoring system, an excepted monitoring system, or an alternative monitoring system.

**Most stringent State or Federal NO\(_X\) emissions limitation** means, with regard to a NO\(_X\) Budget opt-in source, the lowest NO\(_X\) emissions limitation (in terms of \( \text{lb/mmBtu} \)) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

**Nameplate capacity** means the maximum electrical generating output (in MW) that a generator can sustain over a specified period of time when not restricted by seasonal or other deratings as measured in accordance with the United States Department of Energy standards.

**Non-title \( V \) permit** means a federally enforceable permit administered by the permitting authority pursuant to the CAA and regulatory authority under the CAA, other than title \( V \) of the CAA and part 70 or 71 of this chapter.

**NO\(_X\) allowance** means an authorization by the permitting authority or the Administrator under the NO\(_X\) Budget Trading Program to emit up to one ton of nitrogen oxides during the control period of the specified year or of any year thereafter.

**NO\(_X\) allowance deduction or deduct NO\(_X\) allowances** means the permanent withdrawal of NO\(_X\) allowances by the Administrator from a NO\(_X\) Allowance Tracking System compliance account or overdraft account to account for the number of tons of NO\(_X\) emissions from a NO\(_X\) Budget unit for a control period, determined in accordance with subpart \( H \) of this part, or for any other allowance surrender obligation under this part.

**NO\(_X\) allowances held or hold NO\(_X\) allowances** means the NO\(_X\) allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts \( F \) and \( G \) of this part, in a NO\(_X\) Allowance Tracking System account.

**NO\(_X\) Allowance Tracking System means** the system by which the Administrator records allocations, deductions, and transfers of NO\(_X\) allowances under the NO\(_X\) Budget Trading Program.

**NO\(_X\) Allowance Tracking System account** means an account in the NO\(_X\) Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of NO\(_X\) allowances.

**NO\(_X\) allowance transfer deadline** means midnight of November 30 or, if November 30 is not a business day, midnight of the first business day thereafter and is the deadline by which NO\(_X\) allowances may be submitted for recordation in a NO\(_X\) Budget unit’s compliance account, or the overdraft account of the source where the unit is located, in order to meet the unit’s NO\(_X\) Budget emissions limitation for the control period immediately preceding such deadline.

**NO\(_X\) authorized account representative** means, for a NO\(_X\) Budget source or NO\(_X\) Budget unit at the source, the natural person who is authorized by the owners and operators of the source and all NO\(_X\) Budget units at the source, in accordance with subpart \( B \) of this part, to represent and legally bind each owner and operator in matters pertaining to the NO\(_X\) Budget Trading Program or, for a general account, the natural person who is authorized, in accordance with subpart \( F \) of this part, to transfer or otherwise dispose of NO\(_X\) allowances held in the general account.

**NO\(_X\) Budget emissions limitation** means, for a NO\(_X\) Budget unit, the tonnage equivalent of the NO\(_X\) allowances available for compliance deduction for the unit and for a control period under \$96.54(a) and (b), adjusted by any deductions of such NO\(_X\) allowances to account for actual utilization under \$96.42(e) for the control period or to account for excess emissions for a prior
control period under §96.54(d) or to account for withdrawal from the NOX Budget Program, or for a change in regulatory status, for a NOX Budget opt-in source under §96.86 or §96.87.

NOX Budget opt-in permit means a NOX Budget permit covering a NOX Budget opt-in source.

NOX Budget opt-in source means a unit that has been elected to become a NOX Budget unit under the NOX Budget Trading Program and whose NOX Budget opt-in permit has been issued and is in effect under subpart I of this part.

NOX Budget permit means the legally binding and federally enforceable written document, or portion of such document, issued by the permitting authority under this part, including any permit revisions, specifying the NOX Budget Trading Program requirements applicable to a NOX Budget source, to each NOX Budget unit at the NOX Budget source, and to the owners and operators and the NOX authorized account representative of the NOX Budget source and each NOX Budget unit.

NOX Budget source means a source that includes one or more NOX Budget units.

NOX Budget Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established in accordance with this part and pursuant to §51.121 of this chapter, as a means of mitigating the interstate transport of ozone and nitrogen oxides, an ozone precursor.

NOX Budget unit means a unit that is subject to the NOX Budget Trading Program emissions limitation under §96.4 or §96.88.

Operating means, with regard to a unit under §§96.22(d)(2) and 96.80, having documented heat input for more than 876 hours in the 6 months immediately preceding the submission of an application for an initial NOX Budget permit under §96.83(a).

Operator means any person who operates, controls, or supervises a NOX Budget unit, a NOX Budget source, or unit for which an application for a NOX Budget opt-in permit under §96.83 is submitted and not denied or withdrawn and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

Opt-in means to be elected to become a NOX Budget unit under the NOX Budget Trading Program through a final, effective NOX Budget opt-in permit under subpart I of this part.

Overdraft account means the NOX Allowance Tracking System account, established by the Administrator under subpart F of this part, for each NOX Budget source where there are two or more NOX Budget units.

Owner means any of the following persons:

1. Any holder of any portion of the legal or equitable title in a NOX Budget unit or in a unit for which an application for a NOX Budget opt-in permit under §96.83 is submitted and not denied or withdrawn; or

2. Any holder of a leasehold interest in a NOX Budget unit or in a unit for which an application for a NOX Budget opt-in permit under §96.83 is submitted and not denied or withdrawn; or

3. Any purchaser of power from a NOX Budget unit or from a unit for which an application for a NOX Budget opt-in permit under §96.83 is submitted and not denied or withdrawn under a life-of-the-unit, firm power contractual arrangement. However, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based, either directly or indirectly, upon the revenues or income from the NOX Budget unit or the unit for which an application for a NOX Budget opt-in permit under §96.83 is submitted and not denied or withdrawn; or

4. With respect to any general account, any person who has an ownership interest with respect to the NOX allowances held in the general account and who is subject to the binding agreement for the NOX authorized account representative to represent that person’s ownership interest with respect to NOX allowances.

Permitting authority means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the NOX...
Budget Trading Program in accordance with subpart C of this part.

Receive or receipt of means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in writing or by authorized electronic transmission), as indicated in an official correspondence log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to NO\textsubscript{X} allowances, the movement of NO\textsubscript{X} allowances by the Administrator from one NO\textsubscript{X} Allowance Tracking System account to another, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in appendix A of part 60 of this chapter.

Serial number means, when referring to NO\textsubscript{X} allowances, the unique identification number assigned to each NO\textsubscript{X} allowance by the Administrator, under §96.53(c).

Source means any governmental, institutional, commercial, or industrial structure, installation, plant, building, or facility that emits or has the potential to emit any regulated air pollutant under the CAA. For purposes of section 502(c) of the CAA, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the 48 contiguous States and the District of Columbia specified in §51.121 of this chapter, or any non-federal authority in or including such States or the District of Columbia (including local agencies, and Statewide agencies) or any eligible Indian tribe in an area of such State or the District of Columbia, that adopts a NO\textsubscript{X} Budget Trading Program pursuant to §51.121 of this chapter. To the extent a State incorporates by reference the provisions of this part, the term “State” shall mean the incorporating State. The term “State” shall have its conventional meaning wherever such meaning is clear from the context.

State trading program budget means the total number of NO\textsubscript{X} tons apportioned to all NO\textsubscript{X} Budget units in a given State, in accordance with the NO\textsubscript{X} Budget Trading Program, for use in a given control period.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

(1) In person;
(2) By United States Postal Service; or
(3) By other means of dispatch or transmission and delivery. Compliance with any “submission,” “service,” or “mailing” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the CAA and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the CAA and part 70 or 71 of this chapter.

Ton or tonnage means any “short ton” (i.e., 2,000 pounds). For the purpose of determining compliance with the NO\textsubscript{X} Budget emissions limitation, total tons for a control period shall be calculated as the sum of all recorded hourly emissions (or the tonnage equivalent of the recorded hourly emissions rates) in accordance with subpart H of this part, with any remaining fraction of a ton equal to or greater than 0.50 ton deemed to equal one ton and any fraction of a ton less than 0.50 ton deemed to equal zero tons.

Unit means a fossil fuel-fired stationary boiler, combustion turbine, or combined cycle system.

Unit load means the total (i.e., gross) output of a unit in any control period (or other specified time period) produced by combusting a given heat input of fuel, expressed in terms of:

(1) The total electrical generation (MWe) produced by the unit, including generation for use within the plant; or
(2) In the case of a unit that uses heat input for purposes other than electrical generation, the total steam pressure (psia) produced by the unit, including steam for use by the unit.

Unit operating day means a calendar day in which a unit combests any fuel.
Unit operating hour or hour of unit operation means any hour (or fraction of an hour) during which a unit combusts any fuel.

Utilization means the heat input (expressed in mmBtu/time) for a unit. The unit’s total heat input for the control period in each year will be determined in accordance with part 75 of this chapter if the NO\textsubscript{X} Budget unit was otherwise subject to the requirements of part 75 of this chapter for the year, or will be based on the best available data reported to the Administrator for the unit if the unit was not otherwise subject to the requirements of part 75 of this chapter for the year.

§ 96.3 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this part are defined as follows:

Btu—British thermal unit.
hr—hour.
Kwh—kilowatt hour.
lb—pounds.
mmBtu—million Btu.
MWe—megawatt electrical.
ton—2000 pounds.
CO\textsubscript{2}—carbon dioxide.
NO\textsubscript{X}—nitrogen oxides.
O\textsubscript{2}—oxygen.

§ 96.4 Applicability.

(a) The following units in a State shall be NO\textsubscript{X} Budget units, and any source that includes one or more such units shall be a NO\textsubscript{X} Budget source, subject to the requirements of this part:

(1) Any unit that, any time on or after January 1, 1995, serves a generator with a nameplate capacity greater than 25 MWe and sells any amount of electricity; or

(2) Any unit that is not a unit under paragraph (a) of this section and that has a maximum design heat input greater than 250 mmBtu/hr.

(b) Notwithstanding paragraph (a) of this section, a unit under paragraph (a) of this section shall be subject only to the requirements of this paragraph (b) if the unit has a federally enforceable permit that meets the requirements of paragraph (b)(1) of this section and restricts the unit to burning only natural gas or fuel oil during a control period in 2003 or later and each control period thereafter and restricts the unit’s operating hours during each such control period to the number of hours (determined in accordance with paragraph (b)(1)(ii) and (iii) of this section) that limits the unit’s potential NO\textsubscript{X} mass emissions for the control period to 25 tons or less. Notwithstanding paragraph (a) of this section, starting with the effective date of such federally enforceable permit, the unit shall not be a NO\textsubscript{X} Budget unit.

(1) For each control period under paragraph (b) of this section, the federally enforceable permit must:

(i) Restrict the unit to burning only natural gas or fuel oil.

(ii) Restrict the unit’s operating hours to the number calculated by dividing 25 tons of potential NO\textsubscript{X} mass emissions by the unit’s maximum potential hourly NO\textsubscript{X} mass emissions.

(iii) Require that the unit’s potential NO\textsubscript{X} mass emissions shall be calculated as follows:

(A) Select the default NO\textsubscript{X} emission rate in Table 2 of §75.19 of this chapter that would otherwise be applicable assuming that the unit burns only the type of fuel (i.e., only natural gas or only fuel oil) that has the highest default NO\textsubscript{X} emission factor of any type of fuel that the unit is allowed to burn under the fuel use restriction in paragraph (b)(1)(i) of this section; and

(B) Multiply the default NO\textsubscript{X} emission rate under paragraph (b)(1)(iii)(A) of this section by the unit’s maximum rated hourly heat input. The owner or operator of the unit may petition the permitting authority to use a lower value for the unit’s maximum rated hourly heat input than the value as defined under §96.2. The permitting authority may approve such lower value if the owner or operator demonstrates that the maximum hourly heat input specified by the manufacturer or the highest observed hourly heat input, or both, are not representative, and that such lower value is representative, of the unit’s current capabilities because modifications have been made to the unit, limiting its capacity permanently.

(iv) Require that the owner or operator of the unit shall retain at the source that includes the unit, for 5 years, records demonstrating that the
operating hours restriction, the fuel use restriction, and the other requirements of the permit related to these restrictions were met.

(v) Require that the owner or operator of the unit shall report the unit’s hours of operation (treating any partial hour of operation as a whole hour of operation) during each control period to the permitting authority by November 1 of each year for which the unit is subject to the federally enforceable permit.

(2) The permitting authority that issues the federally enforceable permit with the fuel use restriction under paragraph (b)(1)(i) and the operating hours restriction under paragraphs (b)(1)(ii) and (iii) of this section will notify the Administrator in writing of each unit under paragraph (a) of this section whose federally enforceable permit issued by the permitting authority includes such restrictions. The permitting authority will also notify the Administrator in writing of each unit under paragraph (a) of this section whose federally enforceable permit issued by the permitting authority is revised to remove any such restriction, whose federally enforceable permit issued by the permitting authority includes any such restriction that is no longer applicable, or which does not comply with any such restriction.

(3) If, for any control period under paragraph (b) of this section, the fuel use restriction under paragraph (b)(1)(i) and the operating hours restriction under paragraphs (b)(1)(ii) and (iii) of this section is removed from the unit’s federally enforceable permit or otherwise becomes no longer applicable or, if, for any such control period, the unit does not comply with the fuel use restriction under paragraph (b)(1)(i) of this section or the operating hours restriction under paragraphs (b)(1)(ii) and (iii) of this section, the unit shall be a NOX Budget unit, subject to the requirements of this part. Such unit shall be treated as commencing operation and, for a unit under paragraph (a)(1) of this section, commencing commercial operation on September 30 of the control period for which the fuel use restriction or the operating hours restriction.

§ 96.5 Retired unit exemption.

(a) This section applies to any NOX Budget unit, other than a NOX Budget opt-in source, that is permanently retired.

(b)(1) Any NOX Budget unit, other than a NOX Budget opt-in source, that is permanently retired shall be exempt from the NOX Budget Trading Program, except for the provisions of this section, §§96.2, 96.3, 96.4, 96.7 and subparts E, F, and G of this part.

(2) The exemption under paragraph (b)(1) of this section shall become effective the day on which the unit is permanently retired. Within 30 days of permanent retirement, the NOX authorized account representative (authorized in accordance with subpart B of this part) shall submit a statement to the permitting authority otherwise responsible for administering any NOX Budget permit for the unit. A copy of the statement shall be submitted to the Administrator. The statement shall state (in a format prescribed by the permitting authority) that the unit is permanently retired and will comply with the requirements of paragraph (c) of this section.

(3) After receipt of the notice under paragraph (b)(2) of this section, the permitting authority will amend any permit covering the source at which the unit is located to add the provisions and requirements of the exemption under paragraphs (b)(1) and (c) of this section.

(c) Special provisions. (1) A unit exempt under this section shall not emit any nitrogen oxides, starting on the date that the exemption takes effect. The owners and operators of the unit will be allocated allowances in accordance with subpart E of this part.

(2)(i) A unit exempt under this section and located at a source that is required, or but for this exemption would be required, to have a title V operating permit shall not resume operation unless the NOX authorized account representative of the source submits a complete NOX Budget permit application under §96.22 for the unit not less than 18 months (or such lesser time provided under the permitting...
§ 96.6 Standard requirements.

(a) Permit Requirements. (1) The NOx authorized account representative of each NOx Budget source required to have a federally enforceable permit and each NOx Budget unit required to have a federally enforceable permit at the source shall:

(i) Submit to the permitting authority a complete NOx Budget permit application under §96.22 in accordance with the deadlines specified in §96.21(b) and (c);

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a NOx Budget permit application and issue or deny a NOx Budget permit.

(2) The owners and operators of each NOx Budget source required to have a federally enforceable permit and each NOx Budget unit required to have a federally enforceable permit at the source shall:

(i) Submit to the permitting authority a complete NOx Budget permit application under §96.22 in accordance with the deadlines specified in §96.21(b) and (c);

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a NOx Budget permit application and issue or deny a NOx Budget permit.

(3) The owners and operators of a NOx Budget source that is not otherwise required to have a NOx Budget permit application under subpart C of this part for such NOx Budget source.

(b) Monitoring requirements. (1) The owners and operators of each NOx Budget source required to have a federally enforceable permit and each NOx Budget unit required to have a federally enforceable permit at the source shall:

(i) Submit to the permitting authority a complete NOx Budget permit application under §96.22 in accordance with the deadlines specified in §96.21(b) and (c);

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a NOx Budget permit application and issue or deny a NOx Budget permit.

(2) The owners and operators of each NOx Budget source that is not otherwise required to have a federally enforceable permit are not required to submit a NOx Budget permit application, and to have a NOx Budget permit, under subpart C of this part for such NOx Budget source.

(3) The owners and operators of a NOx Budget source that is not otherwise required to have a federally enforceable permit are not required to submit a NOx Budget permit application, and to have a NOx Budget permit, issued by the permitting authority and operate the unit in compliance with such NOx Budget permit.

(4) A unit that is exempt under this section is not eligible to be a NOx Budget opt-in source under subpart I of this part.

(5) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under this section shall retain at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time prior to the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(A) The date on which the NOx authorized account representative submits a NOx Budget permit application under paragraph (c)(2) of this section; or

(B) The date on which the NOx authorized account representative is required under paragraph (c)(2) of this section to submit a NOx Budget permit application.

(6) Loss of exemption. (1) On the earlier of the following dates, a unit exempt under paragraph (b) of this section shall lose its exemption:

(A) The date on which the NOx authorized account representative submits a NOx Budget permit application under paragraph (c)(2) of this section; or

(B) The date on which the NOx authorized account representative is required under paragraph (c)(2) of this section to submit a NOx Budget permit application.

(2) For the purpose of applying monitoring requirements under subpart H of this part, a unit that loses its exemption under this section shall be treated as a unit that commences operation or commercial operation on the first date on which the unit resumes operation.
subpart H of this part shall be used to determine compliance by the unit with the NO\textsubscript{X} Budget emissions limitation under paragraph (c) of this section.

(c) Nitrogen oxides requirements. (1) The owners and operators of each NO\textsubscript{X} Budget source and each NO\textsubscript{X} Budget unit at the source shall hold NO\textsubscript{X} allowances available for compliance deductions under §96.54, as of the NO\textsubscript{X} allowance transfer deadline, in the unit’s compliance account and the source’s overdraft account in an amount not less than the total NO\textsubscript{X} emissions for the control period from the unit, as determined in accordance with subpart H of this part, plus any amount necessary to account for actual utilization under §96.42(e) for the control period.

(2) Each ton of nitrogen oxides emitted in excess of the NO\textsubscript{X} Budget emissions limitation shall constitute a separate violation of this part, the CAA, and applicable State law.

(3) A NO\textsubscript{X} Budget unit shall be subject to the requirements under paragraph (c)(1) of this section starting on the later of May 1, 2003 or the date on which the unit commences operation.

(4) NO\textsubscript{X} allowances shall be held in, deducted from, or transferred among NO\textsubscript{X} Allowance Tracking System accounts in accordance with subparts E, F, G, and I of this part.

(5) A NO\textsubscript{X} allowance shall not be deducted, in order to comply with the requirements under paragraph (c)(1) of this section, for a control period in a year prior to the year for which the NO\textsubscript{X} allowance was allocated.

(6) A NO\textsubscript{X} allowance allocated by the permitting authority or the Administrator under the NO\textsubscript{X} Budget Trading Program is a limited authorization to emit one ton of nitrogen oxides in accordance with the NO\textsubscript{X} Budget Trading Program. No provision of the NO\textsubscript{X} Budget Trading Program, the NO\textsubscript{X} Budget permit application, the NO\textsubscript{X} Budget permit, or an exemption under §96.5 and no provision of law shall be construed to limit the authority of the United States or the State to terminate or limit such authorization.

(7) A NO\textsubscript{X} allowance allocated by the permitting authority or the Administrator under the NO\textsubscript{X} Budget Trading Program does not constitute a property right.

(8) Upon recordation by the Administrator under subpart F, G, or I of this part, every allocation, transfer, or deduction of a NO\textsubscript{X} allowance to or from a NO\textsubscript{X} Budget unit’s compliance account or the overdraft account of the source where the unit is located is deemed to amend automatically, and become a part of, any NO\textsubscript{X} Budget permit of the NO\textsubscript{X} Budget unit by operation of law without any further review.

(d) Excess emissions requirements. (1) The owners and operators of a NO\textsubscript{X} Budget unit that has excess emissions in any control period shall:

(i) Surrender the NO\textsubscript{X} allowances required for deduction under §96.54(d)(1); and

(ii) Pay any fine, penalty, or assessment or comply with any other remedy imposed under §96.54(d)(3).

(e) Recordkeeping and Reporting requirements. (1) Unless otherwise provided, the owners and operators of the NO\textsubscript{X} Budget source and each NO\textsubscript{X} Budget unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time prior to the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The account certificate of representation for the NO\textsubscript{X} authorized account representative for the source and each NO\textsubscript{X} Budget unit at the source and all documents that demonstrate the truth of the statements in the account certificate of representation, in accordance with §96.13; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new account certificate of representation changing the NO\textsubscript{X} authorized account representative.

(ii) All emissions monitoring information, in accordance with subpart H of this part; provided that to the extent that subpart H of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the NO\textsubscript{X} Budget Trading Program.
(iv) Copies of all documents used to complete a NOx Budget permit application and any other submission under the NOx Budget Trading Program or to demonstrate compliance with the requirements of the NOx Budget Trading Program.

(2) The NOx authorized account representative of a NOx Budget source and each NOx Budget unit at the source shall submit the reports and compliance certifications required under the NOx Budget Trading Program, including those under subparts D, H, or I of this part.

(f) Liability. (1) Any person who knowingly violates any requirement or prohibition of the NOx Budget Trading Program, a NOx Budget permit, or an exemption under §96.5 shall be subject to enforcement pursuant to applicable State or Federal law.

(2) Any person who knowingly makes a false material statement in any record, submission, or report under the NOx Budget Trading Program shall be subject to criminal enforcement pursuant to applicable State or Federal law.

(3) No permit revision shall excuse any violation of the requirements of the NOx Budget Trading Program that occurs prior to the date that the revision takes effect.

(4) Each NOx Budget source and each NOx Budget unit shall meet the requirements of the NOx Budget Trading Program.

(5) Any provision of the NOx Budget Trading Program that applies to a NOx Budget source (including a provision applicable to the NOx authorized account representative of a NOx Budget source) shall also apply to the owners and operators of such source and of the NOx Budget units at the source.

(6) Any provision of the NOx Budget Trading Program that applies to a NOx Budget unit (including a provision applicable to the NOx authorized account representative of a NOx Budget unit) shall also apply to the owners and operators of such unit. Except with regard to the requirements applicable to units with a common stack under subpart H of this part, the owners and operators and the NOx authorized account representative of one NOx Budget unit shall not be liable for any violation by any other NOx Budget unit of which they are not owners or operators or the NOx authorized account representative and that is located at a source of which they are not owners or operators or the NOx authorized account representative.

(g) Effect on other authorities. No provision of the NOx Budget Trading Program, a NOx Budget permit application, a NOx Budget permit, or an exemption under §96.5 shall be construed as exempting or excluding the owners and operators and, to the extent applicable, the NOx authorized account representative of a NOx Budget source or NOx Budget unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the CAA.

§96.7 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the NOx Budget Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the NOx Budget Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the NOx Budget Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

Subpart B—NOx Authorized Account Representative for NOx Budget Sources

§96.10 Authorization and responsibilities of the NOx authorized account representative.

(a) Except as provided under §96.11, each NOx Budget source, including all NOx Budget units at the source, shall have one and only one NOx authorized account representative, with regard to all matters under the NOx Budget Trading Program concerning the source or any NOx Budget unit at the source.
(b) The NO\textsubscript{X} authorized account representative of the NO\textsubscript{X} Budget source shall be selected by an agreement binding on the owners and operators of the source and all NO\textsubscript{X} Budget units at the source.  

(c) Upon receipt by the Administrator of a complete account certificate of representation under §96.13, the NO\textsubscript{X} authorized account representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the NO\textsubscript{X} Budget source represented and each NO\textsubscript{X} Budget unit at the source in all matters pertaining to the NO\textsubscript{X} Budget Trading Program, not withstanding any agreement between the NO\textsubscript{X} authorized account representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the NO\textsubscript{X} authorized account representative by the permitting authority, the Administrator, or a court regarding the source or unit.  

(d) No NO\textsubscript{X} Budget permit shall be issued, and no NO\textsubscript{X} Allowance Tracking System account shall be established for a NO\textsubscript{X} Budget unit at the source, until the Administrator has received a complete account certificate of representation under §96.13 for a NO\textsubscript{X} authorized account representative of the source and the NO\textsubscript{X} Budget units at the source.  

(e)(1) Each submission under the NO\textsubscript{X} Budget Trading Program shall be submitted, signed, and certified by the NO\textsubscript{X} authorized account representative for each NO\textsubscript{X} Budget source on behalf of which the submission is made. Each such submission shall include the following certification statement by the NO\textsubscript{X} authorized account representative: “I am authorized to make this submission on behalf of the owners and operators of the NO\textsubscript{X} Budget sources or NO\textsubscript{X} Budget units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”  

(2) The permitting authority and the Administrator will accept or act on a submission made on behalf of owner or operators of a NO\textsubscript{X} Budget source or a NO\textsubscript{X} Budget unit only if the submission has been made, signed, and certified in accordance with paragraph (e)(1) of this section.  

§96.11 Alternate NO\textsubscript{X} authorized account representative.  

(a) An account certificate of representation may designate one and only one alternate NO\textsubscript{X} authorized account representative who may act on behalf of the NO\textsubscript{X} authorized account representative. The agreement by which the alternate NO\textsubscript{X} authorized account representative is selected shall include a procedure for authorizing the alternate NO\textsubscript{X} authorized account representative to act in lieu of the NO\textsubscript{X} authorized account representative.  

(b) Upon receipt by the Administrator of a complete account certificate of representation under §96.13, any representation, action, inaction, or submission by the alternate NO\textsubscript{X} authorized account representative shall be deemed to be a representation, action, inaction, or submission by the NO\textsubscript{X} authorized account representative.  

(c) Except in this section and §§96.10(a), 96.12, 96.13, and 96.51, whenever the term “NO\textsubscript{X} authorized account representative” is used in this part, the term shall be construed to include the alternate NO\textsubscript{X} authorized account representative.  

§96.12 Changing the NO\textsubscript{X} authorized account representative and the alternate NO\textsubscript{X} authorized account representative; changes in the owners and operators.  

(a) Changing the NO\textsubscript{X} authorized account representative. The NO\textsubscript{X} authorized account representative may be changed at any time upon receipt by the Administrator of a superseding...
§ 96.13 Account certificate of representation.

(a) A complete account certificate of representation for a NOx authorized account representative or an alternate NOx authorized account representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the NOx Budget source and each NOx Budget unit at the source for which the account certificate of representation is submitted.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the NOx authorized account representative and any alternate NOx authorized account representative.

(3) A list of the owners and operators of the NOx Budget source and of each NOx Budget unit at the source.

(4) The following certification statement by the NOx authorized account representative and any alternate NOx authorized account representative, as applicable, by an agreement binding on the owners and operators of the NOx Budget source and each NOx Budget unit at the source, I certify that I have all the necessary authority to carry out my duties and responsibilities under the NOx Budget Trading Program on behalf of the owners and operators of the NOx Budget source and of each NOx Budget unit at the source. I certify that I was selected as the NOx authorized account representative or alternate NOx authorized account representative, as applicable, by an agreement binding on the owners and operators of the NOx Budget source and each NOx Budget unit at the source.

(5) The signature of the NOx authorized account representative and any alternate NOx authorized account representative and the dates signed.

(b) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the account certificate of representation shall submit a revision to the account certificate of representation amending the list of owners and operators to include the change.
representation shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

§ 96.14 Objections concerning the NO\textsubscript{X} authorized account representative.

(a) Once a complete account certificate of representation under §96.13 has been submitted and received, the permitting authority and the Administrator will rely on the account certificate of representation unless and until a superseding complete account certificate of representation under §96.13 is received by the Administrator.

(b) Except as provided in §96.12(a) or (b), no objection or other communication submitted to the permitting authority or the Administrator concerning the authorization, or any representation, action, inaction, or submission of the NO\textsubscript{X} authorized account representative shall affect any representation, action, inaction, or submission of the NO\textsubscript{X} authorized account representative or the finality of any decision or order by the permitting authority or the Administrator under the NO\textsubscript{X} Budget Trading Program.

(c) Neither the permitting authority nor the Administrator will adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any NO\textsubscript{X} authorized account representative, including private legal disputes concerning the proceeds of NO\textsubscript{X} allowance transfers.

Subpart C—Permits

§ 96.20 General NO\textsubscript{X} Budget trading program permit requirements.

(a) For each NO\textsubscript{X} Budget source required to have a federally enforceable permit, such permit shall include a NO\textsubscript{X} Budget permit administered by the permitting authority.

(1) For NO\textsubscript{X} Budget sources required to have a title V operating permit, the NO\textsubscript{X} Budget portion of the title V permit shall be administered in accordance with the permitting authority’s regulations promulgated to administer non-title V permits, except as provided otherwise by this subpart or subpart I of this part. The applicable provisions of such non-title V permits regulations may include, but are not limited to, provisions addressing permit applications, permit application shield, permit duration, permit issuance, permit revision and opening, public participation, State review, and review by the Administrator.

(b) Each NO\textsubscript{X} Budget permit (including a draft or proposed NO\textsubscript{X} Budget permit, if applicable) shall contain all applicable NO\textsubscript{X} Budget Trading Program requirements and shall be a complete and segregable portion of the permit under paragraph (a) of this section.

§ 96.21 Submission of NO\textsubscript{X} Budget permit applications.

(a) Duty to apply. The NO\textsubscript{X} authorized account representative of any NO\textsubscript{X} Budget source required to have a federally enforceable permit shall submit to the permitting authority a complete NO\textsubscript{X} Budget permit application under §96.22 by the applicable deadline in paragraph (b) of this section.

(b)(1) For NO\textsubscript{X} Budget sources required to have a title V operating permit:

(i) For any source, with one or more NO\textsubscript{X} Budget units under §96.4 that commence operation before January 1, 2000, the NO\textsubscript{X} authorized account representative shall submit a complete NO\textsubscript{X} Budget permit application under §96.22 covering such NO\textsubscript{X} Budget units to the permitting authority at least 18
§ 96.22 

Information requirements for NOₓ Budget permit applications.

A complete NOₓ Budget permit application shall include the following elements concerning the NOₓ Budget source for which the application is submitted, in a format prescribed by the permitting authority:

(a) Identification of the NOₓ Budget source, including plant name and the ORIS (Office of Regulatory Information Systems) or facility code assigned to the source by the Energy Information Administration, if applicable;

(b) Identification of each NOₓ Budget unit at the NOₓ Budget source and whether it is a NOₓ Budget unit under §96.4 or under subpart I of this part;

(c) The standard requirements under §96.6; and

(d) For each NOₓ Budget opt-in unit at the NOₓ Budget source, the following certification statements by the NOₓ authorized account representative:

(1) “I certify that each unit for which this permit application is submitted under subpart I of this part is not a NOₓ Budget unit under 40 CFR 96.4 and is not covered by a retired unit exemption under 40 CFR 96.5 that is in effect.”

(2) If the application is for an initial NOₓ Budget opt-in permit, “I certify that each unit for which this permit application is submitted under subpart I is currently operating, as that term is defined under 40 CFR 96.2.”

§ 96.23 NOₓ Budget permit contents.

(a) Each NOₓ Budget permit (including any draft or proposed NOₓ Budget permit, if applicable) will contain, in a format prescribed by the permitting authority, all elements required for a
§ 96.30 Compliance certification report.

(a) Applicability and deadline. For each control period in which one or more NOx Budget units at a source are subject to the NOx Budget emissions limitation, the NOx authorized account representative of the source shall submit to the permitting authority and the Administrator by November 30 of that year, a compliance certification report for each source covering all such units.

(b) Contents of report. The NOx authorized account representative shall include in the compliance certification report under paragraph (a) of this section the following elements, in a format prescribed by the Administrator, concerning each unit at the source and subject to the NOx Budget emissions limitation for the control period covered by the report:

(1) Identification of each NOx Budget unit;

(2) At the NOx authorized account representative’s option, the serial numbers of the NOx allowances that are to be deducted from each unit’s compliance account under §96.54 for the control period;

(3) At the NOx authorized account representative’s option, for units sharing a common stack and having NOx emissions that are not monitored separately or apportioned in accordance with subpart H of this part, the percentage of allowances that is to be deducted from each unit’s compliance account under §96.54(e); and

(4) The compliance certification under paragraph (c) of this section.

(c) Compliance certification. In the compliance certification report under paragraph (a) of this section, the NOx authorized account representative shall certify, based on reasonable inquiry of those persons with primary responsibility for operating the source and the NOx Budget units at the source in compliance with the NOx Budget Trading Program, whether each NOx Budget unit for which the compliance certification is submitted was operated during the calendar year covered by...
the report in compliance with the requirements of the NO\textsubscript{X} Budget Trading Program applicable to the unit, including:

(1) Whether the unit was operated in compliance with the NO\textsubscript{X} Budget emissions limitation;

(2) Whether the monitoring plan that governs the unit has been maintained to reflect the actual operation and monitoring of the unit, and contains all information necessary to attribute NO\textsubscript{X} emissions to the unit, in accordance with subpart H of this part;

(3) Whether all the NO\textsubscript{X} emissions from the unit, or a group of units (including the unit) using a common stack, were monitored or accounted for through the missing data procedures and reported in the quarterly monitoring reports, including whether conditional data were reported in the quarterly reports in accordance with subpart H of this part. If conditional data were reported, the owner or operator shall indicate whether the status of all conditional data has been resolved and all necessary quarterly report resubmissions has been made;

(4) Whether the facts that form the basis for certification under subpart H of this part of each monitor at the unit or a group of units (including the unit) using a common stack, or for using an excepted monitoring method or alternative monitoring method approved under subpart H of this part, if any, has changed; and

(5) If a change is required to be reported under paragraph (c)(4) of this section, specify the nature of the change, the reason for the change, when the change occurred, and how the unit’s compliance status was determined subsequent to the change, including what method was used to determine emissions when a change mandated the need for monitor recertification.

§ 96.31 Permitting authority’s and Administrator’s action on compliance certifications.

(a) The permitting authority or the Administrator may review and conduct independent audits concerning any compliance certification or any other submission under the NO\textsubscript{X} Budget Trading Program and make appropriate adjustments of the information in the compliance certifications or other submissions.

(b) The Administrator may deduct NO\textsubscript{X} allowances from or transfer NO\textsubscript{X} allowances to a unit’s compliance account or a source’s overdraft account based on the information in the compliance certifications or other submissions, as adjusted under paragraph (a) of this section.

Subpart E—NO\textsubscript{X} Allowance Allocations

§ 96.40 State trading program budget.

The State trading program budget allocated by the permitting authority under §96.42 for a control period will equal the total number of tons of NO\textsubscript{X} emissions apportioned to the NO\textsubscript{X} Budget units under §96.4 in the State for the control period, as determined by the applicable, approved State implementation plan.

§ 96.41 Timing requirements for NO\textsubscript{X} allowance allocations.

(a) By September 30, 1999, the permitting authority will submit to the Administrator the NO\textsubscript{X} allowance allocations, in accordance with §96.42, for the control periods in 2003, 2004, and 2005.

(b) By April 1, 2003 and April 1 of each year thereafter, the permitting authority will submit to the Administrator the NO\textsubscript{X} allowance allocations, in accordance with §96.42, for the control period in the year that is three years after the year of the applicable deadline for submission under this paragraph (b). If the permitting authority fails to submit to the Administrator the NO\textsubscript{X} allowance allocations in accordance with this paragraph (b), the Administrator will allocate, for the applicable control period, the same number of NO\textsubscript{X} allowances as were allocated for the preceding control period.

(c) By April 1, 2004 and April 1 of each year thereafter, the permitting authority will submit to the Administrator the NO\textsubscript{X} allowance allocations, in accordance with §96.42, for any NO\textsubscript{X} allowances remaining in the allocation set-aside for the prior control period.
§ 96.42 NOX allowance allocations.

(a)(1) The heat input (in mmBtu) used for calculating NOX allowance allocations for each NOX Budget unit under § 96.4 will be:

(i) For a NOX allowance allocation under § 96.4(a)(1), the average of the two highest amounts of the unit’s heat input for the control periods in 1995, 1996, and 1997 if the unit is under § 96.4(a)(1) or the control period in 1995 if the unit is under § 96.4(a)(2); and

(ii) For a NOX allowance allocation under § 96.4(a)(2), the unit’s heat input for the control period in the year that is four years before the year for which the NOX allocation is being calculated.

(b) For each control period under § 96.4(b), the permitting authority for the unit if the unit was not otherwise subject to the requirements of part 75 of this chapter for the year, or will be based on the best available data reported to the permitting authority for the unit if the unit was otherwise subject to the requirements of part 75 of this chapter for the year.

(b)(1) For each control period under § 96.4(b)(1) of this section, a total number of NOX allowances equal to 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the number of tons of NOX emissions in the State trading program budget apportioned to electric generates units, the permitting authority will adjust the total number of NOX allowances allocated to all such NOX Budget units for the control period under paragraph (b)(1) of this section so that the total number of NOX allowances allocated equals 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the number of tons of NOX emissions in the State trading program budget apportioned to electric generating units. This adjustment will be made by: multiplying each unit’s allocation by 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the number of tons of NOX emissions in the State trading program budget apportioned to electric generating units divided by the total number of NOX allowances allocated under paragraph (b)(1) of this section, and rounding to the nearest whole NOX allowance as appropriate.

(c) For each control period under § 96.4(c), the permitting authority will allocate to all NOX Budget units under § 96.4(a)(2) in the State that commenced operation before May 1 of the period used to calculate heat input under paragraph (a)(1) of this section, a total number of NOX allowances equal to 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the tons of NOX emissions in the State trading program budget apportioned to non-electric generating units under § 96.40 in accordance with the following procedures:

(1) The permitting authority will allocate NOX allowances to each NOX Budget unit under § 96.4(a)(1) in an amount equaling 0.17 lb/mmBtu multiplied by the heat input determined under paragraph (a)(1) of this section, rounded to the nearest whole NOX allowance as appropriate.

(2) If the initial total number of NOX allowances allocated to all NOX Budget units under § 96.4(a)(2) in the State for a control period under paragraph (c)(1) of this section does not equal 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the number of tons of NOX emissions in the State trading program budget apportioned to non-electric generating units, the permitting authority will adjust the total number of NOX allowances allocated to
§ 96.42 40 CFR Ch. I (7–1–17 Edition)

all such NO\textsubscript{X} Budget units for the control period under paragraph (c)(1) of this section so that the total number of NO\textsubscript{X} allowances allocated equals 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the number of tons of NO\textsubscript{X} emissions in the State trading program budget apportioned to non-electric generating units. This adjustment will be made by: multiplying each unit’s allocation by 95 percent in 2003, 2004, and 2005, or 98 percent thereafter, of the number of tons of NO\textsubscript{X} emissions in the State trading program budget apportioned to non-electric generating units divided by the total number of NO\textsubscript{X} allowances allocated under paragraph (c)(1) of this section, and rounding to the nearest whole NO\textsubscript{X} allowance as appropriate.

(d) For each control period under § 96.41, the permitting authority will allocate NO\textsubscript{X} allowances to NO\textsubscript{X} Budget units under § 96.4 in the State that commenced operation, or is projected to commence operation, on or after May 1 of the period used to calculate heat input under paragraph (a)(1) of this section, in accordance with the following procedures:

(1) The permitting authority will establish one allocation set-aside for each control period. Each allocation set-aside will be allocated NO\textsubscript{X} allowances equal to 5 percent in 2003, 2004, and 2005, or 2 percent thereafter, of the tons of NO\textsubscript{X} emissions in the State trading program budget under § 96.40, rounded to the nearest whole NO\textsubscript{X} allowance as appropriate.

(2) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit under paragraph (d) of this section may submit to the permitting authority a request, in writing or in a format specified by the permitting authority, to be allocated NO\textsubscript{X} allowances for no more than five consecutive control periods under § 96.41, starting with the control period during which the NO\textsubscript{X} Budget unit commenced, or is projected to commence, operation and ending with the control period preceding the control period for which it will receive an allocation under paragraph (b) or (c) of this section. The NO\textsubscript{X} allowance allocation request must be submitted prior to May 1 of the first control period for which the NO\textsubscript{X} allowance allocation is requested and after the date on which the permitting authority issues a permit to construct the NO\textsubscript{X} Budget unit.

(3) In a NO\textsubscript{X} allowance allocation request under paragraph (d)(2) of this section, the NO\textsubscript{X} authorized account representative for units under § 96.4(a)(1) may request for a control period NO\textsubscript{X} allowances in an amount that does not exceed 0.15 lb/mmBtu multiplied by the NO\textsubscript{X} Budget unit’s maximum design heat input (in mmBtu/hr) multiplied by the number of hours remaining in the control period starting with the first day in the control period on which the unit operated or is projected to operate.

(4) In a NO\textsubscript{X} allowance allocation request under paragraph (d)(2) of this section, the NO\textsubscript{X} authorized account representative for units under § 96.4(a)(2) may request for a control period NO\textsubscript{X} allowances in an amount that does not exceed 0.17 lb/mmBtu multiplied by the NO\textsubscript{X} Budget unit’s maximum design heat input (in mmBtu/hr) multiplied by the number of hours remaining in the control period starting with the first day in the control period on which the unit operated or is projected to operate.

(5) The permitting authority will review, and allocate NO\textsubscript{X} allowances pursuant to, each NO\textsubscript{X} allowance allocation request under paragraph (d)(2) of this section in the order that the request is received by the permitting authority.

(i) Upon receipt of the NO\textsubscript{X} allowance allocation request, the permitting authority will determine whether, and will make any necessary adjustments to the request to ensure that, for units under § 96.4(a)(1), the control period and the number of allowances specified are consistent with the requirements of paragraphs (d)(2) and (3) of this section and, for units under § 96.4(a)(2), the control period and the number of allowances specified are consistent with the requirements of paragraphs (d)(2) and (4) of this section.

(ii) If the allocation set-aside for the control period for which NO\textsubscript{X} allowances are requested has an amount of NO\textsubscript{X} allowances not less than the number requested (as adjusted under paragraph (d)(5)(i) of this section), the permitting authority will allocate the
Environmental Protection Agency

§ 96.42

amount of the NO\textsubscript{X} allowances requested (as adjusted under paragraph (d)(5)(i) of this section) to the NO\textsubscript{X} Budget unit.

(iii) If the allocation set-aside for the control period for which NO\textsubscript{X} allowances are requested has a smaller amount of NO\textsubscript{X} allowances than the number requested (as adjusted under paragraph (d)(5)(i) of this section), the permitting authority will deny in part the request and allocate only the remaining number of NO\textsubscript{X} allowances in the allocation set-aside to the NO\textsubscript{X} Budget unit.

(iv) Once an allocation set-aside for a control period has been depleted of all NO\textsubscript{X} allowances, the permitting authority will deny, and will not allocate any NO\textsubscript{X} allowances pursuant to, any NO\textsubscript{X} allowance allocation request under which NO\textsubscript{X} allowances have not yet been allocated for the control period.

(e) For a NO\textsubscript{X} Budget unit that is allocated NO\textsubscript{X} allowances under paragraph (d) of this section for a control period, the Administrator will deduct NO\textsubscript{X} allowances under §96.54(b) or (e) to account for the actual utilization of the unit during the control period. The Administrator will calculate the number of NO\textsubscript{X} allowances to be deducted as appropriate: NO\textsubscript{X} allowances deducted for actual utilization for units under §96.4(a)(1) = (Unit’s NO\textsubscript{X} allowances allocated for control period) – (Unit’s actual control period utilization × 0.17 lb/mmBtu); and NO\textsubscript{X} allowances deducted for actual utilization for units under §96.4(a)(2) = (Unit’s NO\textsubscript{X} allowances allocated for control period) – (Unit’s actual control period utilization × 0.17 lb/mmBtu)

Where:

“Unit’s NO\textsubscript{X} allowances allocated for control period” is the number of NO\textsubscript{X} allowances allocated to the unit for the control period under paragraph (d) of this section; and

“Unit’s actual control period utilization” is the utilization (in mmBtu), as defined in §96.2, of the unit during the control period.

(f) After making the deductions for compliance under §96.54(b) or (e) for a control period, the Administrator will notify the permitting authority whether any NO\textsubscript{X} allowances remain in the allocation set-aside for the control period. The permitting authority will allocate any such NO\textsubscript{X} allowances to the NO\textsubscript{X} Budget units in the State using the following formula and rounding to the nearest whole NO\textsubscript{X} allowance as appropriate:

Unit’s share of NO\textsubscript{X} allowances remaining in allocation set-aside = Total NO\textsubscript{X} allowances remaining in allocation set-aside × (Unit’s NO\textsubscript{X} allowance allocation – State trading program budget excluding allocation set-aside)

Where:

“Total NO\textsubscript{X} allowances remaining in allocation set-aside” is the total number of NO\textsubscript{X} allowances remaining in the allocation set-aside for the control period to which the allocation set-aside applies;

“Unit’s NO\textsubscript{X} allowance allocation” is the number of NO\textsubscript{X} allowances allocated under paragraph (b) or (c) of this section to the unit for the control period to which the allocation set-aside applies; and

“State trading program budget excluding allocation set-aside” is the State trading program budget under §96.40 for the control period to which the allocation set-aside applies multiplied by 96 percent if the control period is in 2002, 2004, or 2005 or 98 percent if the control period is in any year thereafter; rounded to the nearest whole NO\textsubscript{X} allowance as appropriate.

§ 96.50 NO\textsubscript{X} Allowance Tracking System accounts.

(a) Nature and function of compliance accounts and overdraft accounts. Consistent with §96.51(a), the Administrator will establish one compliance account for each NO\textsubscript{X} Budget unit and one overdraft account for each source with one or more NO\textsubscript{X} Budget units. Allocations of NO\textsubscript{X} allowances pursuant to subpart E of this part or §96.88 and deductions or transfers of NO\textsubscript{X} allowances pursuant to §96.31, §96.54, §96.56, subpart G of this part, or subpart I of this part will be recorded in the compliance accounts or overdraft accounts in accordance with this subpart.

(b) Nature and function of general accounts. Consistent with §96.51(b), the Administrator will establish, upon request, a general account for any person. Transfers of allowances pursuant to subpart G of this part will be recorded in the general account in accordance with this subpart.

§ 96.51 Establishment of accounts.

(a) Compliance accounts and overdraft accounts. Upon receipt of a complete account certificate of representation under §96.13, the Administrator will establish:

(1) A compliance account for each NO\textsubscript{X} Budget unit for which the account certificate of representation was submitted; and

(2) An overdraft account for each source for which the account certificate of representation was submitted and that has two or more NO\textsubscript{X} Budget units.

(b) General accounts. (1) Any person may apply to open a general account for the purpose of holding and transferring allowances. A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(i) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative;

(ii) At the option of the NO\textsubscript{X} authorized account representative, organization name and type of organization;

(iii) A list of all persons subject to a binding agreement for the NO\textsubscript{X} authorized account representative or any alternate NO\textsubscript{X} authorized account representative to represent their ownership interest with respect to the allowances held in the general account;

(iv) The following certification statement by the NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative: ‘‘I certify that I was selected as the NO\textsubscript{X} authorized account representative or the NO\textsubscript{X} alternate authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the NO\textsubscript{X} Budget Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account.’’

(v) The signature of the NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative and the dates signed.

(vi) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the account certificate of representation shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(2) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(i) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(ii) The NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative for the general account shall represent and, by
his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to NOX allowances held in the general account in all matters pertaining to the NOX Budget Trading Program, notwithstanding any agreement between the NOX authorized account representative or any alternate NOX authorized account representative and such person. Any such person shall be bound by any order or decision issued to the NOX authorized account representative or any alternate NOX authorized account representative by the Administrator or a court regarding the general account.

(ii) Each submission concerning the general account shall be submitted, signed, and certified by the NOX authorized account representative or any alternate NOX authorized account representative for the persons having an ownership interest with respect to NOX allowances held in the general account. Each such submission shall include the following certification statement by the NOX authorized account representative or any alternate NOX authorized account representative any: "I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the NOX allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(iv) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(iii) of this section.

§96.51

(iii) Each submission concerning the general account shall include the following certification statement by the NOX authorized account representative or any alternate NOX authorized account representative any: "I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(ii) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section, any representation, action, inaction, or submission by any alternate NOX authorized account representative shall be deemed to be a representation, action, inaction, or submission by the NOX authorized account representative.

(iv) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(iii) of this section.
(iii)(A) In the event a new person having an ownership interest with respect to NOX allowances in the general account is not included in the list of such persons in the account certificate of representation, such new person shall be deemed to be subject to and bound by the account certificate of representation, the representation, actions, inactions, and submissions of the NOX authorized account representative and any alternate NOX authorized account representative of the source or unit, and the decisions, orders, actions, and inactions of the Administrator, as if the new person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to NOX allowances in the general account, including the addition of persons, the NOX authorized account representative or any alternate NOX authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to NOX allowances in the general account to include the change.

5(i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (b)(4) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the NOX authorized account representative or any alternate NOX authorized account representative for a general account shall affect any representation, action, inaction, or submission of the NOX authorized account representative or any alternate NOX authorized account representative or the finality of any decision or order by the Administrator under the NOX Budget Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the NOX authorized account representative or any alternate NOX authorized account representative for a general account, including private legal disputes concerning the proceeds of NOX allowance transfers.

(c) Account identification. The Administrator will assign a unique identifying number to each account established under paragraph (a) or (b) of this section.

§ 96.52 NOX Allowance Tracking System responsibilities of NOX authorized account representative.

(a) Following the establishment of a NOX Allowance Tracking System account, all submissions to the Administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of NOX allowances in the account, shall be made only by the NOX authorized account representative for the account.

(b) Authorized account representative identification. The Administrator will assign a unique identifying number to each NOX authorized account representative.

§ 96.53 Recordation of NOX allowance allocations.

(a) The Administrator will record the NOX allowances for 2003 in the NOX Budget units' compliance accounts and the allocation set-asides, as allocated under subpart E of this part. The Administrator will also record the NOX allowances allocated under § 96.58(a)(1) for each NOX Budget opt-in source in its compliance account.

(b) Each year, after the Administrator has made all deductions from a NOX Budget unit's compliance account and the overdraft account for the year after the last year for which allowances were previously allocated to the compliance account. Each year, the Administrator will also record NOX allowances, as allocated under subpart E of this part, in the allocation set-aside for the year after the last year for which allowances were
Environmental Protection Agency

§ 96.54 Compliance.

(a) NOX allowance transfer deadline. The NOX allowances are available to be deducted for compliance with a unit’s NOX Budget emissions limitation for a control period in a given year only if the NOX allowances:

(1) Were allocated for a control period in a prior year or the same year; and

(2) Are held in the unit’s compliance account, or the overdraft account of the source where the unit is located, as of the NOX allowance transfer deadline for that control period or are transferred into the compliance account or overdraft account by a NOX allowance transfer correctly submitted for recordation under §96.60 by the NOX allowance transfer deadline for that control period.

(b) Deductions for compliance. (1) Following the recordation, in accordance with §96.61, of NOX allowance transfers submitted for recordation in the unit’s compliance account or the overdraft account of the source where the unit is located, by the NOX allowance transfer deadline for a control period, the Administrator will deduct NOX allowances available under paragraph (a) of this section to cover the unit’s NOX emissions (as determined in accordance with subpart H of this part), or to account for actual utilization under §96.42(e), for the control period:

(i) From the compliance account; and

(ii) Only if no more NOX allowances available under paragraph (a) of this section remain in the compliance account, from the overdraft account. In deducting allowances for units at the source from the overdraft account, the Administrator will begin with the unit having the compliance account with the lowest NOX Allowance Tracking System account number and end with the unit having the compliance account with the highest NOX Allowance Tracking System account number (with account numbers sorted beginning with the left-most character and ending with the right-most character and the letter characters assigned values in alphabetical order and less than all numeric characters).

(2) The Administrator will deduct NOX allowances first under paragraph (b)(1)(i) of this section and then under paragraph (b)(1)(ii) of this section:

(i) Until the number of NOX allowances deducted for the control period equals the number of tons of NOX emissions, determined in accordance with subpart H of this part, from the unit for the control period for which compliance is being determined, plus the number of NOX allowances required for deduction to account for actual utilization under §96.42(e) for the control period; or

(ii) Until no more NOX allowances available under paragraph (a) of this section remain in the respective account.

(c) Serial numbers for allocated NOX allowances. When allocating NOX allowances to and recording them in an account, the Administrator will assign each NOX allowance a unique identification number that will include digits identifying the year for which the NOX allowance is allocated.

(c)(1) Identification of NOX allowances by serial number. The NOX authorized account representative for each compliance account may identify by serial number the NOX allowances to be deducted from the unit’s compliance account under paragraph (b), (d), or (e) of this section. Such identification shall be made in the compliance certification report submitted in accordance with §96.30.

(2) First-in, first-out. The Administrator will deduct NOX allowances for a control period from the compliance account, in the absence of an identification or in the case of a partial identification of NOX allowances by serial number under paragraph (c)(1) of this section, or the overdraft account on a first-in, first-out (FIFO) accounting basis in the following order:

(i) Those NOX allowances that were allocated for the control period to the unit under subpart E or I of this part;

(ii) Those NOX allowances that were allocated for the control period to any unit and transferred and recorded in the account pursuant to subpart G of this part, in order of their date of recordation;

(iii) Those NOX allowances that were allocated for a prior control period to
the unit under subpart E or I of this part; and
(iv) Those NO\textsubscript{X} allowances that were allocated for a prior control period to any unit and transferred and recorded in the account pursuant to subpart G of this part, in order of their date of recordation.

(d) Deductions for excess emissions. (1) After making the deductions for compliance under paragraph (b) of this section, the Administrator will deduct from the unit's compliance account or the overdraft account of the source where the unit is located a number of NO\textsubscript{X} allowances, allocated for a control period after the control period in which the unit has excess emissions, equal to three times the number of the unit's excess emissions.

(2) If the compliance account or overdraft account does not contain sufficient NO\textsubscript{X} allowances, the Administrator will deduct the required number of NO\textsubscript{X} allowances, regardless of the control period for which they were allocated, whenever NO\textsubscript{X} allowances are recorded in either account.

(3) Any allowance deduction required under paragraph (d) of this section shall not affect the liability of the owners and operators of the NO\textsubscript{X} Budget unit for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violation, as ordered under the CAA or applicable State law. The following guidelines will be followed in assessing fines, penalties or other obligations:

(i) For purposes of determining the number of days of violation, if a NO\textsubscript{X} Budget unit has excess emissions for a control period, each day in the control period (153 days) constitutes a day in violation unless the owners and operators of the unit demonstrate that a lesser number of days should be considered.

(ii) Each ton of excess emissions is a separate violation.

(e) Deductions for units sharing a common stack. In the case of units sharing a common stack and having emissions that are not separately monitored or apportioned in accordance with subpart H of this part:

(1) The NO\textsubscript{X} authorized account representative of the units may identify the percentage of NO\textsubscript{X} allowances to be deducted from each such unit's compliance account to cover the unit's share of NO\textsubscript{X} emissions from the common stack for a control period. Such identification shall be made in the compliance certification report submitted in accordance with §96.30.

(2) Notwithstanding paragraph (b)(2)(i) of this section, the Administrator will deduct NO\textsubscript{X} allowances for each such unit until the number of NO\textsubscript{X} allowances deducted equals the unit's identified percentage (under paragraph (e)(1) of this section) of the number of tons of NO\textsubscript{X} emissions, as determined in accordance with subpart H of this part, from the common stack for the control period for which compliance is being determined or, if no percentage is identified, an equal percentage for each such unit, plus the number of allowances required for deduction to account for actual utilization under §96.42(e) for the control period.

(f) The Administrator will record in the appropriate compliance account or overdraft account all deductions from such an account pursuant to paragraphs (b), (d), or (e) of this section.

§ 96.55 Banking.

(a) NO\textsubscript{X} allowances may be banked for future use or transfer in a compliance account, an overdraft account, or a general account, as follows:

(1) Any NO\textsubscript{X} allowance that is held in a compliance account, an overdraft account, or a general account will remain in such account unless and until the NO\textsubscript{X} allowance is deducted or transferred under §96.31, §96.54, §96.56, subpart G of this part, or subpart I of this part.

(2) The Administrator will designate, as a “banked” NO\textsubscript{X} allowance, any NO\textsubscript{X} allowance that remains in a compliance account, an overdraft account, or a general account after the Administrator has made all deductions for a given control period from the compliance account or overdraft account pursuant to §96.54.

(b) Each year starting in 2004, after the Administrator has completed the designation of banked NO\textsubscript{X} allowances under paragraph (a)(2) of this section and before May 1 of the year, the Administrator will determine the extent to which banked NO\textsubscript{X} allowances may
be used for compliance in the control period for the current year, as follows:

(1) The Administrator will determine the total number of banked NO\textsubscript{X} allowances held in compliance accounts, overdraft accounts, or general accounts.

(2) If the total number of banked NO\textsubscript{X} allowances determined, under paragraph (b)(1) of this section, to be held in compliance accounts, overdraft accounts, or general accounts is less than or equal to 10% of the sum of the State trading program budgets for the control period for the States in which NO\textsubscript{X} Budget units are located, any banked NO\textsubscript{X} allowance may be deducted for compliance in accordance with §96.54.

(3) If the total number of banked NO\textsubscript{X} allowances determined, under paragraph (b)(1) of this section, to be held in compliance accounts, overdraft accounts, or general accounts exceeds 10% of the sum of the State trading program budgets for the control period for the States in which NO\textsubscript{X} Budget units are located, any banked allowance may be deducted for compliance in accordance with §96.54, except as follows:

(i) The Administrator will determine the following ratio: 0.10 multiplied by the sum of the State trading program budgets for the control period for the States in which NO\textsubscript{X} Budget units are located and divided by the total number of banked NO\textsubscript{X} allowances determined, under paragraph (b)(1) of this section, to be held in compliance accounts, overdraft accounts, or general accounts.

(ii) The Administrator will multiply the number of banked NO\textsubscript{X} allowances in each compliance account or overdraft account. The resulting product is the number of banked NO\textsubscript{X} allowances in the account that may be deducted for compliance in accordance with §96.54. Any banked NO\textsubscript{X} allowances in excess of the resulting product may be deducted for compliance in accordance with §96.54, except that, if such NO\textsubscript{X} allowances are used to make a deduction, two such NO\textsubscript{X} allowances must be deducted for each deduction of one NO\textsubscript{X} allowance required under §96.54.

(c) Any NO\textsubscript{X} Budget unit may reduce its NO\textsubscript{X} emission rate in the 2001 or 2002 control period, the owner or operator of the unit may request early reduction credits, and the permitting authority may allocate NO\textsubscript{X} allowances in 2003 to the unit in accordance with the following requirements.

(1) Each NO\textsubscript{X} Budget unit for which the owner or operator requests any early reduction credits under paragraph (c)(4) of this section shall monitor NO\textsubscript{X} emissions in accordance with subpart H of this part starting in the 2000 control period and for each control period for which such early reduction credits are requested. The unit’s monitoring system availability shall be not less than 90 percent during the 2000 control period, and the unit must be in compliance with any applicable State or Federal emissions or emissions-related requirements.

(2) NO\textsubscript{X} emission rate and heat input under paragraphs (c)(3) through (5) of this section shall be determined in accordance with subpart H of this part.

(3) Each NO\textsubscript{X} Budget unit for which the owner or operator requests any early reduction credits under paragraph (c)(4) of this section shall reduce its NO\textsubscript{X} emission rate, for each control period for which early reduction credits are requested, to less than both 0.25 lb/mmBtu and 80 percent of the unit’s NO\textsubscript{X} emission rate in the 2000 control period.

(4) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit that meets the requirements of paragraphs (c)(1) and (3) of this section may submit to the permitting authority a request for early reduction credits for the unit based on NO\textsubscript{X} emission rate reductions made by the unit in the control period for 2001 or 2002 in accordance with paragraph (c)(3) of this section.

(i) In the early reduction credit request, the NO\textsubscript{X} authorized account may request early reduction credits for such control period in an amount equal to the unit’s heat input for such control period multiplied by the difference between 0.25 lb/mmBtu and the unit’s NO\textsubscript{X} emission rate for such control period, divided by 2000 lb/ton, and rounded to the nearest ton.

(ii) The early reduction credit request must be submitted, in a format specified by the permitting authority, by October 31 of the year in which the NO\textsubscript{X} emission rate reductions on which
the request is based are made or such later date approved by the permitting authority.

(5) The permitting authority will allocate NOX allowances, to NOX Budget units meeting the requirements of paragraphs (c)(1) and (3) of this section and covered by early reduction requests meeting the requirements of paragraph (c)(4)(ii) of this section, in accordance with the following procedures:

(i) Upon receipt of each early reduction credit request, the permitting authority will accept the request only if the requirements of paragraphs (c)(1), (c)(3), and (c)(4)(ii) of this section are met and, if the request is accepted, will make any necessary adjustments to the request to ensure that the amount of the early reduction credits requested meets the requirement of paragraphs (c)(2) and (4) of this section.

(ii) If the State’s compliance supplement pool has an amount of NOX allowances not less than the number of early reduction credits in all accepted early reduction credit requests for 2001 and 2002 (as adjusted under paragraph (c)(5)(i) of this section), the permitting authority will allocate to each NOX Budget unit covered by such accepted requests one allowance for each early reduction credit requested (as adjusted under paragraph (c)(5)(i) of this section).

(iii) If the State’s compliance supplement pool has a smaller amount of NOX allowances than the number of early reduction credits in all accepted early reduction credit requests for 2001 and 2002, the permitting authority will allocate NOX allowances to each NOX Budget unit covered by such accepted requests according to the following formula:

\[
\text{Unit’s allocated early reduction credits} = \left( \frac{\text{Unit’s adjusted early reduction credits}}{\text{Total adjusted early reduction credits requested by all units}} \right) \times \text{(Available NOX allowances from the State’s compliance supplement pool)}
\]

where:

- “Unit’s adjusted early reduction credits” is the number of early reduction credits for the unit for 2001 and 2002 in accepted early reduction credit requests, as adjusted under paragraph (c)(5)(i) of this section.
- “Total adjusted early reduction credits requested by all units” is the number of early reduction credits for all units for 2001 and 2002 in accepted early reduction credit requests, as adjusted under paragraph (c)(5)(i) of this section.
- “Available NOX allowances from the State’s compliance supplement pool” is the number of NOX allowances in the State’s compliance supplement pool and available for early reduction credits for 2001 and 2002.

(6) By May 1, 2003, the permitting authority will submit to the Administrator the allocations of NOX allowances determined under paragraph (c)(5) of this section. The Administrator will record such allocations to the extent that they are consistent with the requirements of paragraphs (c)(1) through (5) of this section.

(7) NOX allowances recorded under paragraph (c)(6) of this section may be deducted for compliance under § 96.54 for the control periods in 2003 or 2004. Notwithstanding paragraph (a) of this section, the Administrator will deduct as retired any NOX allowance that is recorded under paragraph (c)(6) of this section and is not deducted for compliance in accordance with § 96.54 for the control period in 2003 or 2004.

(8) NOX allowances recorded under paragraph (c)(6) of this section are treated as banked allowances in 2004 for the purposes of paragraphs (a) and (b) of this section.

§ 96.56 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any NOX Allowance Tracking System account. Within 10 business days of making such correction, the Administrator will notify the NOX authorized account representative for the account.

§ 96.57 Closing of general accounts.

(a) The NOX authorized account representative of a general account may instruct the Administrator to close the account by submitting a statement requesting deletion of the account from the NOX Allowance Tracking System and by correctly submitting for recordation under § 96.60 an allowance transfer of all NOX allowances in the
account to one or more other NO\textsubscript{X} Allowance Tracking System accounts.

(b) If a general account shows no activity for a period of a year or more and does not contain any NO\textsubscript{X} allowances, the Administrator may notify the NO\textsubscript{X} authorized account representative for the account that the account will be closed and deleted from the NO\textsubscript{X} Allowance Tracking System following 20 business days after the notice is sent. The account will be closed after the 20-day period unless before the end of the 20-day period the Administrator receives a correctly submitted transfer of NO\textsubscript{X} allowances into the account under §96.60 or a statement submitted by the NO\textsubscript{X} authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

Subpart G—NO\textsubscript{X} Allowance Transfers

§96.60 Submission of NO\textsubscript{X} allowance transfers.

The NO\textsubscript{X} authorized account representatives seeking recordation of a NO\textsubscript{X} allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the NO\textsubscript{X} allowance transfer shall include the following elements in a format specified by the Administrator:

(a) The numbers identifying both the transferor and transferee accounts;

(b) A specification by serial number of each NO\textsubscript{X} allowance to be transferred; and

(c) The printed name and signature of the NO\textsubscript{X} authorized account representative of the transferor account and the date signed.

§96.61 EPA recordation.

(a) Within 5 business days of receiving a NO\textsubscript{X} allowance transfer, except as provided in paragraph (b) of this section, the Administrator will record a NO\textsubscript{X} allowance transfer by moving each NO\textsubscript{X} allowance from the transferor account to the transferee account as specified by the request, provided that:

(1) The transfer is correctly submitted under §96.60;

(2) The transferor account includes each NO\textsubscript{X} allowance identified by serial number in the transfer; and

(3) The transfer meets all other requirements of this part.

(b) A NO\textsubscript{X} allowance transfer that is submitted for recordation following the NO\textsubscript{X} allowance transfer deadline and that includes any NO\textsubscript{X} allowances allocated for a control period prior to or the same as the control period to which the NO\textsubscript{X} allowance transfer deadline applies will not be recorded until after completion of the process of recordation of NO\textsubscript{X} allowance allocations in §96.53(b).

(c) Where a NO\textsubscript{X} allowance transfer submitted for recordation fails to meet the requirements of paragraph (a) of this section, the Administrator will not record such transfer.

§96.62 Notification.

(a) Notification of recordation. Within 5 business days of recordation of a NO\textsubscript{X} allowance transfer under §96.61, the Administrator will notify each party to the transfer. Notice will be given to the NO\textsubscript{X} authorized account representatives of both the transferor and transferee accounts.

(b) Notification of non-recordation. Within 10 business days of receipt of a NO\textsubscript{X} allowance transfer that fails to meet the requirements of §96.61(a), the Administrator will notify the NO\textsubscript{X} authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer, and (2) The reasons for such non-recordation.

(c) Nothing in this section shall preclude the submission of a NO\textsubscript{X} allowance transfer for recordation following notification of non-recordation.

Subpart H—Monitoring and Reporting

§96.70 General requirements.

The owners and operators, and to the extent applicable, the NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit, shall comply with the monitoring and reporting requirements as provided in this subpart and in subpart
§ 96.70 H of part 75 of this chapter. For purposes of complying with such requirements, the definitions in §96.2 and in §72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be replaced by the terms “NO\textsubscript{X} Budget unit,” “NO\textsubscript{X} authorized account representative,” and “continuous emission monitoring system” (or “CEMS”), respectively, as defined in §96.2.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each NO\textsubscript{X} Budget unit must meet the following requirements. These provisions also apply to a unit for which an application for a NO\textsubscript{X} Budget opt-in permit is submitted and not denied or withdrawn, as provided in subpart I of this part:

(b) Compliance dates. The owner or operator must meet the requirements of paragraphs (a)(1) through (a)(3) of this section on or before the following dates and must record and report data on and after the following dates:

(i) NO\textsubscript{X} Budget units for which the owner or operator intends to apply for early reduction credits under §96.55(d) must comply with the requirements of this subpart by the later of the following dates:

(ii) The earlier of:

(A) 180 days after the date on which the unit commences operation or, (B) For units under §96.4(a)(1), 90 days after the date on which the unit commences commercial operation.

(c) Reporting data prior to initial certification. (1) The owner or operator of a NO\textsubscript{X} Budget unit that misses the certification deadline under paragraph (b)(4)(i) of this section must comply with the requirements of this subpart by the later of the following dates:

(ii) However, if the applicable deadline under paragraph (b)(5)(i) of this section does not occur during the control period, May 1 immediately following the applicable deadline in paragraph (b)(5)(i) of this section.

(2) Except for NO\textsubscript{X} Budget units under paragraph (b)(1) of this section, NO\textsubscript{X} Budget units under §96.4 that commence operation before January 1, 2002, must comply with the requirements of this subpart by May 1, 2002.
subject to the certification deadline under paragraph (b)(2) of this section.

(2) The owner or operator of a NO\textsubscript{X} Budget under paragraphs (b)(3) or (b)(4) of this section must determine, record and report NO\textsubscript{X} mass, heat input (if required for purposes of allocations) and any other values required to determine NO\textsubscript{X} Mass (e.g. NO\textsubscript{X} emission rate and heat input or NO\textsubscript{X} concentration and stack flow) using the provisions of §75.70(g) of this chapter, from the date and hour that the unit starts operating until all required certification tests are successfully completed.

(d) **Prohibitions.**

(1) No owner or operator of a NO\textsubscript{X} Budget unit or a non-NO\textsubscript{X} Budget unit monitored under §75.72(b)(2)(ii) shall use any alternative monitoring system, alternative reference method, or any other alternative for the required continuous emission monitoring system without having obtained prior written approval in accordance with §96.75.

(2) No owner or operator of a NO\textsubscript{X} Budget unit or a non-NO\textsubscript{X} Budget unit monitored under §75.72(b)(2) shall operate the unit so as to discharge, or allow to be discharged, NO\textsubscript{X} emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this subpart and part 75 of this chapter except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter except as provided for in §75.74 of this chapter.

(3) No owner or operator of a NO\textsubscript{X} Budget unit or a non-NO\textsubscript{X} Budget unit monitored under §75.72(b)(2)(ii) shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NO\textsubscript{X} mass emissions discharged into the atmosphere, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter except as provided for in §75.74 of this chapter.

(4) No owner or operator of a NO\textsubscript{X} Budget unit or a non-NO\textsubscript{X} Budget unit monitored under §75.72(b)(2)(ii) shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved emission monitoring system under this subpart, except under any one of the following circumstances:

   (i) During the period that the unit is covered by a retired unit exemption under §96.5 that is in effect;

   (ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the permitting authority for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

   (iii) The NO\textsubscript{X} authorized account representative submits notification of the date of certification testing of a replacement monitoring system in accordance with §96.71(b)(2).

§96.71 **Initial certification and recertification procedures.**

(a) The owner or operator of a NO\textsubscript{X} Budget unit that is subject to an Acid Rain emissions limitation shall comply with the initial certification and recertification procedures of part 75 of this chapter, except that:

(1) If, prior to January 1, 1998, the Administrator approved a petition under §75.17(a) or (b) of this chapter for apportioning the NO\textsubscript{X} emission rate measured in a common stack or a petition under §75.66 of this chapter for an alternative to a requirement in §75.17 of this chapter, the NO\textsubscript{X} authorized account representative shall resubmit the petition to the Administrator under §96.75(a) to determine if the approval applies under the NO\textsubscript{X} Budget Trading Program.

(2) For any additional CEMS required under the common stack provisions in §75.72 of this chapter, or for any NO\textsubscript{X} concentration CEMS used under the provisions of §75.71(a)(2) of this chapter, the owner or operator shall meet the requirements of paragraph (b) of this section.

(b) The owner or operator of a NO\textsubscript{X} Budget unit that is not subject to an Acid Rain emissions limitation shall comply with the following initial certification and recertification procedures, except that the owner or operator of a unit that qualifies to use the
low mass emissions excepted monitoring methodology under §75.19 shall also meet the requirements of paragraph (c) of this section and the owner or operator of a unit that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall also meet the requirements of paragraph (d) of this section. The owner or operator of a NO\textsubscript{X} Budget unit that is subject to an Acid Rain emissions limitation, but requires additional CEMS under the common stack provisions in §75.72 of this chapter, or that uses a NO\textsubscript{X} concentration CEMS under §75.71(a)(2) of this chapter also shall comply with the following initial certification and recertification procedures.

1. Requirements for initial certification. The owner or operator shall ensure that each monitoring system required by subpart H of part 75 of this chapter (which includes the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter. The owner or operator shall ensure that all applicable certification tests are successfully completed by the deadlines specified in §96.70(b).

In addition, whenever the owner or operator installs a monitoring system in order to meet the requirements of this part in a location where no such monitoring system was previously installed, certification according to §75.20 is required.

2. Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in a certified monitoring system that the Administrator or the permitting authority determines significantly affects the ability of the system to accurately measure or record NO\textsubscript{X} mass emissions or heat input or to meet the requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system according to §75.20(b) of this chapter. Examples of changes which require recertification include: replacement of the analyzer, change in location or orientation of the sampling probe or site, or changing of flow rate monitor polynomial coefficients.

3. Certification approval process for initial certifications and recertification—

i. Notification of certification. The NO\textsubscript{X} authorized account representative shall submit to the permitting authority, the appropriate EPA Regional Office and the permitting authority a written notice of the dates of certification.

ii. Certification application. The NO\textsubscript{X} authorized account representative shall submit to the permitting authority a certification application for each monitoring system required under subpart H of part 75 of this chapter. A complete certification application shall include the information specified in subpart H of part 75 of this chapter.

iii. Except for units using the low mass emission excepted methodology under §75.19 of this chapter, the provisional certification date for a monitor shall be determined using the procedures set forth in §75.20(a)(3) of this chapter. A complete certification application shall include the information specified in subpart H of part 75 of this chapter.

Data measured and recorded by the provisionally certified monitoring system or component thereof, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the permitting authority does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of receipt of the complete certification application by the permitting authority.
(iv) Certification application formal approval process. The permitting authority will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (b)(3)(ii) of this section. In the event the permitting authority does not issue such a notice within such 120-day period, each monitoring system which meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the NO\(_X\) Budget Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the permitting authority will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. A certification application will be considered complete when all of the applicable information required to be submitted under paragraph (b)(3)(ii) of this section has been received by the permitting authority. If the certification application is not complete, then the permitting authority will issue a written notice of incompleteness that sets a reasonable date by which the NO\(_X\) authorized account representative must submit the additional information required to complete the certification application. If the NO\(_X\) authorized account representative does not comply with the notice of incompleteness by the specified date, then the permitting authority may issue a notice of disapproval under paragraph (b)(3)(iv)(C) of this section.

(C) Disapproval notice. If the certification application shows that any monitoring system or component thereof does not meet the performance requirements of this part, or if the certification application is incomplete and the requirement for disapproval under paragraph (b)(3)(iv)(B) of this section has been met, the permitting authority will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the permitting authority and the data measured and recorded by each uncertified monitoring system or component thereof shall not be considered valid quality-assured data beginning with the date and hour of provisional certification. The owner or operator shall follow the procedures for loss of certification in paragraph (b)(3)(v) of this section for each monitoring system or component thereof which is disapproved for initial certification.

(D) Audit decertification. The permitting authority may issue a notice of disapproval of the certification status of a monitor in accordance with §96.72(b).

(v) Procedures for loss of certification. If the permitting authority issues a notice of disapproval of a certification application under paragraph (b)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (b)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each hour of unit operation during the period of invalid data beginning with the date and hour of provisional certification and continuing until the time, date, and hour specified under §75.20(a)(5)(i) of this chapter:

(1) For units using or intending to monitor for NO\(_X\) emission rate and heat input or for units using the low mass emission excepted methodology under §75.19 of this chapter, the maximum potential NO\(_X\) emission rate and the maximum potential hourly heat input of the unit.

(2) For units intending to monitor for NO\(_X\) mass emissions using a NO\(_X\) pollutant concentration monitor and a flow monitor, the maximum potential concentration of NO\(_X\) and the maximum potential flow rate of the unit under section 2.1 of appendix A of part 75 of this chapter;

(B) The NO\(_X\) authorized account representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (b)(3)(i) and (ii) of this section; and
(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the permitting authority’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(c) Initial certification and recertification procedures for low mass emission units using the excepted methodologies under §75.19 of this chapter. The owner or operator of a gas-fired or oil-fired unit using the low mass emissions excepted methodology under §75.19 of this chapter shall meet the applicable general operating requirements of §75.10 of this chapter, the applicable requirements of §75.19 of this chapter, and the applicable certification requirements of §96.71 of this chapter, except that the excepted methodology shall be deemed provisionally certified for use under the NO\textsubscript{X} Budget Trading Program, as of the following dates:

(i) For a unit that has commenced operation before its compliance deadline under §96.71(b), from January 1 of the year following submission of the certification application for approval to use the low mass emissions excepted methodology under §75.19 of this chapter until the completion of the period for the permitting authority review; or

(ii) For a unit that commenced operation after its compliance deadline under §96.71(b), where the unit commences operation before May 1, from May 1 of the year following submission of the certification application for approval to use the low mass emissions excepted methodology under §75.19 of this chapter until the completion of the period for the permitting authority’s review.

(d) Certification/recertification procedures for alternative monitoring systems. The NO\textsubscript{X} authorized account representative representing the owner or operator of each unit applying to monitor using an alternative monitoring system approved by the Administrator and, if applicable, the permitting authority under subpart E of part 75 of this chapter shall apply for certification to the permitting authority prior to use of the system under the NO\textsubscript{X} Trading Program. The NO\textsubscript{X} authorized account representative shall apply for recertification following a replacement, modification or change according to the procedures in paragraph (b) of this section. The owner or operator of an alternative monitoring system shall comply with the notification and application requirements for certification according to the procedures specified in paragraph (b)(3) of this section and §75.20(f) of this chapter.

§ 96.72 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality assurance requirements of appendix B of part 75 of
Environmental Protection Agency § 96.74

this chapter, data shall be substituted using the applicable procedures in subpart D, appendix D, or appendix E of part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any system or component should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §96.71 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the permitting authority will issue a notice of disapproval of the certification status of such system or component. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the permitting authority revokes prospectively the certification status of the system or component. The data measured and recorded by the system or component shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests. The owner or operator shall follow the initial certification or recertification procedures in §96.71 for each disapproved system.

§ 96.73 Notifications.

The NOx authorized account representative for a NOx Budget unit shall submit written notice to the permitting authority and the Administrator in accordance with §75.61 of this chapter, except that if the unit is not subject to an Acid Rain emissions limitation shall comply with requirements of §75.62 of this chapter, except that the monitoring plan shall also include all of the information required by subpart H of part 75 of this chapter.

(c) Certification applications. The NOx authorized account representative shall submit an application to the permitting authority within 45 days after completing all initial certification or recertification tests required under §96.71 including the information required under subpart H of part 75 of this chapter.

(d) Quarterly reports. The NOx authorized account representative shall submit quarterly reports, as follows:

(1) If a unit is subject to an Acid Rain emission limitation or if the owner or operator of the NOx budget unit chooses to meet the annual reporting requirements of this subpart H, the NOx authorized account representative shall submit a quarterly report for each calendar quarter beginning with:

(i) For units that elect to comply with the early reduction credit provisions under §96.55 of this part, the CALENDAR quarter that includes the date of initial provisional certification
under §96.71(b)(3)(iii). Data shall be reported from the date and hour corresponding to the date and hour of provisional certification; or

(ii) For units commencing operation prior to May 1, 2002 that are not required to certify monitors by May 1, 2000 under §96.70(b)(1), the earlier of the CALENDAR quarter that includes the date of initial provisional certification under §96.71(b)(3)(iii) or, if the certification tests are not completed by May 1, 2002, the partial CALENDAR quarter from May 1, 2002 through June 30, 2002. Data shall be recorded and reported from the earlier of the date and hour corresponding to the date and hour of provisional certification or the first hour on May 1, 2002; or

(iii) For a unit that commences operation after May 1, 2002, the calendar quarter in which the unit commences operation. Data shall be reported from the date and hour corresponding to when the unit commenced operation;

(2) If a NO\textsubscript{X} budget unit is not subject to an Acid Rain emission limitation, then the NO\textsubscript{X} authorized account representative shall either:

(i) Meet all of the requirements of part 75 related to monitoring and reporting NO\textsubscript{X} mass emissions during the entire year and meet the reporting deadlines specified in paragraph (d)(1) of this section; or

(ii) Submit quarterly reports only for the periods from the earlier of May 1 or the date and hour that the owner or operator successfully completes all of the recertification tests required under §75.74(d)(3) through September 30 of each year in accordance with the provisions of §75.74(b) of this chapter. The NO\textsubscript{X} authorized account representative shall submit a quarterly report for each calendar quarter, beginning with:

(A) For units that elect to comply with the early reduction credit provisions under §96.55, the CALENDAR quarter that includes the date of initial provisional certification under §96.71(b)(3)(iii). Data shall be reported from the date and hour corresponding to the date and hour of provisional certification; or

(B) For units commencing operation prior to May 1, 2002 that are not required to certify monitors by May 1, 2000 under §96.70(b)(1), the earlier of the
(i) For units subject to an Acid Rain Emissions limitation, quarterly reports shall include all of the data and information required in subpart H of part 75 of this chapter for each NO\textsubscript{X} Budget unit (or group of units using a common stack) as well as information required in subpart G of part 75 of this chapter.

(ii) For units not subject to an Acid Rain Emissions limitation, quarterly reports are only required to include all of the data and information required in subpart H of part 75 of this chapter for each NO\textsubscript{X} Budget unit (or group of units using a common stack).

(4) **Compliance certification.** The NO\textsubscript{X} authorized account representative shall submit to the Administrator a compliance certification in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(i) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications; and

(ii) For a unit with add-on NO\textsubscript{X} emission controls and for all hours where data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the monitoring plan and the substitute values do not systematically underestimate NO\textsubscript{X} emissions; and

(iii) For a unit that is reporting on a control period basis under §96.74(d) the NO\textsubscript{X} emission rate and NO\textsubscript{X} concentration values substituted for missing data under subpart D of part 75 of this chapter are calculated using only values from a control period and do not systematically underestimate NO\textsubscript{X} emissions.

§96.75 **Petitions.**

(a) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart.

(1) Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved by the Administrator, in consultation with the permitting authority.

(2) Notwithstanding paragraph (a)(1) of this section, if the petition requests approval to apply an alternative to a requirement concerning any additional CEMS required under the common stack provisions of §75.72 of this chapter, the petition is governed by paragraph (b) of this section.

(b) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit that is not subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the permitting authority and the Administrator requesting approval to apply an alternative to any requirement of this subpart.

(1) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the permitting authority and the Administrator requesting approval to apply an alternative to a requirement concerning any additional CEMS required under the common stack provisions of §75.72 of this chapter or a NO\textsubscript{X} concentration CEMS used under 75.71(a)(2) of this chapter.

(2) Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent the petition under paragraph (b) of this section is approved by both the permitting authority and the Administrator.

§96.76 **Additional requirements to provide heat input data for allocations purposes.**

(a) The owner or operator of a unit that elects to monitor and report NO\textsubscript{X} Mass emissions using a NO\textsubscript{X} concentration system and a flow system shall also monitor and report heat input at the unit level using the procedures set forth in part 75 of this chapter for any source located in a state developing...
source allocations based upon heat input.

(b) The owner or operator of a unit that monitor and report NO\textsubscript{X} Mass emissions using a NO\textsubscript{X} concentration system and a flow system shall also monitor and report heat input at the unit level using the procedures set forth in part 75 of this chapter for any source that is applying for early reduction credits under \$96.55.

Subpart I—Individual Unit Opt-ins

\$96.80 Applicability.

A unit that is in the State, is not a NO\textsubscript{X} Budget unit under \$96.4, vents all of its emissions to a stack, and is operating, may qualify, under this subpart, to become a NO\textsubscript{X} Budget opt-in source. A unit that is a NO\textsubscript{X} Budget unit, is covered by a retired unit exemption under \$96.5 that is in effect, or is not operating is not eligible to become a NO\textsubscript{X} Budget opt-in source.

\$96.81 General.

Except otherwise as provided in this part, a NO\textsubscript{X} Budget opt-in source shall be treated as a NO\textsubscript{X} Budget unit for purposes of applying subparts A through H of this part.

\$96.82 NO\textsubscript{X} authorized account representative.

A unit for which an application for a NO\textsubscript{X} Budget opt-in permit is submitted and not denied or withdrawn, or a NO\textsubscript{X} Budget opt-in source, located at the same source as one or more NO\textsubscript{X} Budget units, shall have the same NO\textsubscript{X} authorized account representative as such NO\textsubscript{X} Budget units.

\$96.83 Applying for NO\textsubscript{X} Budget opt-in permit.

(a) Applying for initial NO\textsubscript{X} Budget opt-in permit. In order to apply for an initial NO\textsubscript{X} Budget opt-in permit, the NO\textsubscript{X} authorized account representative of a unit qualified under \$96.80 may submit to the permitting authority at any time, except as provided under \$96.86(o):

(1) A complete NO\textsubscript{X} Budget permit application under \$96.22;

(2) A monitoring plan submitted in accordance with subpart H of this part; and

(3) A complete account certificate of representation under \$96.13. If no NO\textsubscript{X} authorized account representative has been previously designated for the unit.

(b) Duty to reapply. The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget opt-in source shall submit a complete NO\textsubscript{X} Budget permit application under \$96.22 to renew the NO\textsubscript{X} Budget opt-in permit in accordance with \$96.21(c) and, if applicable, an updated monitoring plan in accordance with subpart H of this part.

\$96.84 Opt-in process.

The permitting authority will issue or deny a NO\textsubscript{X} Budget opt-in permit for a unit for which an initial application for a NO\textsubscript{X} Budget opt-in permit under \$96.83 is submitted, in accordance with \$96.20 and the following:

(a) Interim review of monitoring plan. The permitting authority will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a NO\textsubscript{X} Budget opt-in permit under \$96.83. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NO\textsubscript{X} emissions rate and heat input of the unit are monitored and reported in accordance with subpart H of this part. A determination of sufficiency shall not be construed as acceptance or approval of the unit’s monitoring plan.

(b) If the permitting authority determines that the unit’s monitoring plan is sufficient under paragraph (a) of this section and after completion of monitoring system certification under subpart H of this part, the NO\textsubscript{X} emissions rate and the heat input of the unit shall be monitored and reported in accordance with subpart H of this part for one full control period during which monitoring system availability is not less than 90 percent and during which the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements. Solely for purposes of applying the requirements in the prior sentence, the unit shall be treated as a “NO\textsubscript{X} Budget unit” prior to issuance of a NO\textsubscript{X} Budget opt-in permit covering the unit.
(c) Based on the information monitored and reported under paragraph (b) of this section, the unit’s baseline heat rate shall be calculated as the unit’s total heat input (in mmBtu) for the control period and the unit’s baseline NO\textsubscript{X} emissions rate shall be calculated as the unit’s total NO\textsubscript{X} emissions (in lb) for the control period divided by the unit’s baseline heat rate.

(d) After calculating the baseline heat input and the baseline NO\textsubscript{X} emissions rate for the unit under paragraph (c) of this section, the permitting authority will serve a draft NO\textsubscript{X} Budget opt-in permit on the NO\textsubscript{X} authorized account representative of the unit.

(e) Confirmation of intention to opt-in. Within 20 days after the issuance of the draft NO\textsubscript{X} Budget opt-in permit, the NO\textsubscript{X} authorized account representative of the unit must submit to the permitting authority a confirmation of the intention to opt in the unit or a withdrawal of the application for a NO\textsubscript{X} Budget opt-in permit under § 96.83. The permitting authority will treat the failure to make a timely submission as a withdrawal of the NO\textsubscript{X} Budget opt-in permit application.

(f) Issuance of draft NO\textsubscript{X} Budget opt-in permit. If the NO\textsubscript{X} authorized account representative confirms the intention to opt-in the unit under paragraph (e) of this section, the permitting authority will issue the draft NO\textsubscript{X} Budget opt-in permit in accordance with § 96.20.

(g) Notwithstanding paragraphs (a) through (f) of this section, if at any time before issuance of a draft NO\textsubscript{X} Budget opt-in permit for the unit, the permitting authority determines that the unit does not qualify as a NO\textsubscript{X} Budget opt-in source under § 96.80, the permitting authority will issue a draft denial of a NO\textsubscript{X} Budget opt-in permit for the unit in accordance with § 96.20.

(h) Withdrawal of application for NO\textsubscript{X} Budget opt-in permit. A NO\textsubscript{X} authorized account representative of a unit may withdraw its application for a NO\textsubscript{X} Budget opt-in permit under § 96.83 at any time prior to the issuance of the final NO\textsubscript{X} Budget opt-in permit. Once the application for a NO\textsubscript{X} Budget opt-in permit is withdrawn, a NO\textsubscript{X} authorized account representative wanting to reapply must submit a new application for a NO\textsubscript{X} Budget permit under § 96.83.

(i) Effective date. The effective date of the initial NO\textsubscript{X} Budget opt-in permit shall be May 1 of the first control period starting after the issuance of the initial NO\textsubscript{X} Budget opt-in permit by the permitting authority. The unit shall be a NO\textsubscript{X} Budget opt-in source and a NO\textsubscript{X} Budget unit as of the effective date of the initial NO\textsubscript{X} Budget opt-in permit.

§ 96.85 NO\textsubscript{X} Budget opt-in permit contents.

(a) Each NO\textsubscript{X} Budget opt-in permit (including any draft or proposed NO\textsubscript{X} Budget opt-in permit, if applicable) will contain all elements required for a complete NO\textsubscript{X} Budget opt-in permit application under § 96.22 as approved or adjusted by the permitting authority.

(b) Each NO\textsubscript{X} Budget opt-in permit is deemed to incorporate automatically the definitions of terms under § 96.2 and, upon recordation by the Administrator under subpart F, G, or I of this part, every allocation, transfer, or deduction of NO\textsubscript{X} allowances to or from the compliance accounts of each NO\textsubscript{X} Budget opt-in source covered by the NO\textsubscript{X} Budget opt-in permit or the overdraft account of the NO\textsubscript{X} Budget source where the NO\textsubscript{X} Budget opt-in source is located.

§ 96.86 Withdrawal from NO\textsubscript{X} Budget Trading Program.

(a) Requesting withdrawal. To withdraw from the NO\textsubscript{X} Budget Trading Program, the NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget opt-in source shall submit to the permitting authority a request to withdraw effective as of a specified date prior to May 1 or after September 30. The submission shall be made no later than 90 days prior to the requested effective date of withdrawal.

(b) Conditions for withdrawal. Before a NO\textsubscript{X} Budget opt-in source covered by a request under paragraph (a) of this section may withdraw from the NO\textsubscript{X} Budget Trading Program and the NO\textsubscript{X} Budget opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

1. For the control period immediately before the withdrawal is to be effective, the NO\textsubscript{X} authorized account representative must submit or must...
have submitted to the permitting authority an annual compliance certification report in accordance with §96.30.

(2) If the NO\textsubscript{X} Budget opt-in source has excess emissions for the control period immediately before the withdrawal is to be effective, the Administrator will deduct or has deducted from the NO\textsubscript{X} Budget opt-in source’s compliance account, or the overdraft account of the NO\textsubscript{X} Budget source where the NO\textsubscript{X} Budget opt-in source is located, the full amount required under §96.54(d) for the control period.

(3) After the requirements for withdrawal under paragraphs (b)(1) and (2) of this section are met, the Administrator will deduct from the NO\textsubscript{X} Budget opt-in source’s compliance account, or the overdraft account of the NO\textsubscript{X} Budget source where the NO\textsubscript{X} Budget opt-in source is located, NO\textsubscript{X} allowances equal in number to and allocated for the same or a prior control period as any NO\textsubscript{X} allowances allocated to that source under §96.88 for any control period for which the withdrawal is to be effective. The Administrator will close the NO\textsubscript{X} Budget opt-in source’s compliance account and will establish, and transfer any remaining allowances to, a new general account for the owners and operators of the NO\textsubscript{X} Budget opt-in source. The NO\textsubscript{X} authorized account representative for the NO\textsubscript{X} Budget opt-in source shall become the NO\textsubscript{X} authorized account representative for the general account.

(c) A NO\textsubscript{X} Budget opt-in source that withdraws from the NO\textsubscript{X} Budget Trading Program shall comply with all requirements under the NO\textsubscript{X} Budget Trading Program concerning all years for which such NO\textsubscript{X} Budget opt-in source was a NO\textsubscript{X} Budget opt-in source, even if such requirements arise or must be complied with after the withdrawal takes effect.

(d) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of NO\textsubscript{X} allowances required), the permitting authority will issue a notification to the NO\textsubscript{X} authorized account representative of the NO\textsubscript{X} Budget opt-in source of the acceptance of the withdrawal of the NO\textsubscript{X} Budget opt-in source as of a specified effective date that is after such requirements have been met and that is prior to May 1 or after September 30.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the NO\textsubscript{X} authorized account representative of the NO\textsubscript{X} Budget opt-in source that the NO\textsubscript{X} Budget opt-in source’s request to withdraw is denied. If the NO\textsubscript{X} Budget opt-in source’s request to withdraw is denied, the NO\textsubscript{X} Budget opt-in source shall remain subject to the requirements for a NO\textsubscript{X} Budget opt-in source.

(e) Permit amendment. After the permitting authority issues a notification under paragraph (d)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the NO\textsubscript{X} Budget permit covering the NO\textsubscript{X} Budget opt-in source to terminate the NO\textsubscript{X} Budget opt-in permit as of the effective date specified under paragraph (d)(1) of this section. A NO\textsubscript{X} Budget opt-in source shall continue to be a NO\textsubscript{X} Budget opt-in source until the effective date of the termination.

(f) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the NO\textsubscript{X} Budget opt-in source’s request to withdraw, the NO\textsubscript{X} authorized account representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(g) Ability to return to the NO\textsubscript{X} Budget Trading Program. Once a NO\textsubscript{X} Budget opt-in source withdraws from the NO\textsubscript{X} Budget Trading Program and its NO\textsubscript{X} Budget opt-in permit is terminated under this section, the NO\textsubscript{X} authority account representative may not submit another application for a NO\textsubscript{X} Budget opt-in permit under §96.83 for the unit prior to the date that is 4 years after the date on which the terminated NO\textsubscript{X} Budget opt-in permit became effective.

§\textsection 96.87 Change in regulatory status.

(a) Notification. When a NO\textsubscript{X} Budget opt-in source becomes a NO\textsubscript{X} Budget unit under §96.4, the NO\textsubscript{X} authorized account representative shall notify in writing the permitting authority and the Administrator of such change in
the NO\textsubscript{X} Budget opt-in source’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s action. (1)(i) When the NO\textsubscript{X} Budget opt-in source becomes a NO\textsubscript{X} Budget unit under §96.4, the permitting authority will revise the NO\textsubscript{X} Budget opt-in source’s NO\textsubscript{X} Budget opt-in permit to meet the requirements of a NO\textsubscript{X} Budget permit under §96.23 as of an effective date that is the date on which the NO\textsubscript{X} Budget opt-in source becomes a NO\textsubscript{X} Budget unit under §96.4.

(ii) (A) The Administrator will deduct from the compliance account for the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section, or the overdraft account of the NO\textsubscript{X} Budget source where the unit is located, NO\textsubscript{X} allowances equal in number to and allocated for the same or a prior control period as:

(1) Any NO\textsubscript{X} allowances allocated to the NO\textsubscript{X} Budget unit (as a NO\textsubscript{X} Budget opt-in source) under §96.88 for any control period after the last control period during which the unit’s NO\textsubscript{X} Budget opt-in permit was effective; and

(2) If the effective date of the NO\textsubscript{X} Budget permit revision under paragraph (b)(1)(i) of this section is during a control period, the NO\textsubscript{X} allowances allocated for the same or a prior control period

(ii)(B) Notwithstanding paragraph (b)(1)(iii)(A) of this section, if the effective date of the NO\textsubscript{X} Budget permit revision under paragraph (b)(1)(i) of this section is during a control period, the following number of NO\textsubscript{X} allowances will be allocated to the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section under §96.42 for the control period: the number of NO\textsubscript{X} allowances otherwise allocated to the NO\textsubscript{X} Budget unit under §96.42 for the control period multiplied by the ratio of the number of days, in the control period, starting with the effective date of the permit revision under paragraph (b)(1)(i) of this section, divided by the total number of days in the control period.

(ii)(B) When the NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget opt-in source does not renew its NO\textsubscript{X} Budget opt-in permit under §96.83(b), the Administrator will deduct from the NO\textsubscript{X} Budget opt-in unit’s compliance account, or the overdraft account of the NO\textsubscript{X} Budget source where the NO\textsubscript{X} Budget opt-in source is located, NO\textsubscript{X} allowances equal in number to and allocated for the same or a prior control period as any NO\textsubscript{X} allowances allocated to the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section, or the overdraft account of the NO\textsubscript{X} Budget source where the unit is located, includes the NO\textsubscript{X} allowances necessary for completion of the deduction under paragraph (b)(1)(i)(A) of this section. If the compliance account or overdraft account does not contain sufficient NO\textsubscript{X} allowances, the Administrator will deduct the required number of NO\textsubscript{X} allowances, regardless of the control period for which they were allocated, whenever NO\textsubscript{X} allowances are recorded in either account.
§ 96.88 NO\textsubscript{X} allowance allocations to opt-in units.

(a) NO\textsubscript{X} allowance allocation. (1) By December 31 immediately before the first control period for which the NO\textsubscript{X} Budget opt-in permit is effective, the permitting authority will allocate NO\textsubscript{X} allowances to the NO\textsubscript{X} Budget opt-in source and submit to the Administrator the allocation for the control period in accordance with paragraph (b) of this section.

(2) By no later than December 31, after the first control period for which the NO\textsubscript{X} Budget opt-in permit is effective, and December 31 of each year thereafter, the permitting authority will allocate NO\textsubscript{X} allowances to the NO\textsubscript{X} Budget opt-in source and submit to the Administrator the allocation for the control period in accordance with paragraph (b) of this section.

(b) For each control period for which the NO\textsubscript{X} Budget opt-in source has an approved NO\textsubscript{X} Budget opt-in permit, the NO\textsubscript{X} Budget opt-in source will be allocated NO\textsubscript{X} allowances in accordance with the following procedures:

(1) The heat input (in mmBtu) used for calculating NO\textsubscript{X} allowance allocations will be the lesser of:

(i) The NO\textsubscript{X} Budget opt-in source’s baseline heat input determined pursuant to §96.84(c); or

(ii) The NO\textsubscript{X} Budget opt-in source’s heat input, as determined in accordance with subpart H of this part, for the control period in the year prior to the year of the control period for which the NO\textsubscript{X} allocations are being calculated.

(2) The permitting authority will allocate NO\textsubscript{X} allowances to the NO\textsubscript{X} Budget opt-in source in an amount equaling the heat input (in mmBtu) determined under paragraph (b)(1) of this section multiplied by the lesser of:

(i) The NO\textsubscript{X} Budget opt-in source’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined pursuant to §96.84(c); or

(ii) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the NO\textsubscript{X} Budget opt-in source during the control period.

Subpart J—Mobile and Area Sources [Reserved]

Subparts K–Z [Reserved]

Subpart AA—CAIR NO\textsubscript{X} Annual Trading Program General Provisions

SOURCE: 70 FR 25339, May 12, 2005, unless otherwise noted.

§ 96.101 Purpose.

This subpart and subparts BB through II establish the model rule comprising general provisions and the designated representative, permitting, allowance, monitoring, and opt-in provisions for the State Clean Air Interstate Rule (CAIR) NO\textsubscript{X} Annual Trading Program, under section 110 of the Clean Air Act and §51.123 of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides. The owner or operator of a unit or a source shall comply with the requirements of this subpart and subparts BB through II as a matter of federal law only if the State with jurisdiction over the unit and the source incorporates by reference such subparts or otherwise adopts the requirements of such subparts in accordance with §51.123(o)(1) or (2) of this chapter, the State submits to the Administrator one or more revisions of the State implementation plan that include such adoption, and the Administrator approves such revisions. If the State
adopts the requirements of such subparts in accordance with §51.123(o)(1) or (2) of this chapter, then the State authorizes the Administrator to assist the State in implementing the CAIR NO\textsubscript{X} Annual Trading Program by carrying out the functions set forth for the Administrator in such subparts.

§ 96.102 Definitions.

The terms used in this subpart and subparts BB through II shall have the meanings set forth in this section as follows:

**Account number** means the identification number given by the Administrator to each CAIR NO\textsubscript{X} Allowance Tracking System account.

**Acid Rain emissions limitation** means a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program.

**Acid Rain Program** means a multi-state sulfur dioxide and nitrogen oxides air pollution control and emission reduction program established by the Administrator under title IV of the CAA and parts 72 through 78 of this chapter.

**Administrator** means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

**Allocate** or **allocation** means, with regard to CAIR NO\textsubscript{X} allowances, the determination by a permitting authority or the Administrator of the amount of such CAIR NO\textsubscript{X} allowances to be initially credited to a CAIR NO\textsubscript{X} unit, a new unit set-aside, or other entity.

**Allowance transfer deadline** means, for a control period, midnight of March 1 (if it is a business day), or midnight of the first business day thereafter (if March 1 is not a business day), immediately following the control period and is the deadline by which a CAIR NO\textsubscript{X} allowance transfer must be submitted for recordation in a CAIR NO\textsubscript{X} source’s compliance account in order to be used to meet the source’s CAIR NO\textsubscript{X} emissions limitation for such control period in accordance with §96.154.

**Alternate CAIR designated representative** means, for a CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BB and II of this part, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR NO\textsubscript{X} source is also a CAIR SO\textsubscript{2} source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR SO\textsubscript{2} Trading Program. If the CAIR NO\textsubscript{X} source is also a CAIR NO\textsubscript{X} Ozone Season source, then this natural person shall be the same person as the alternate designated representative under the CAIR NO\textsubscript{X} Ozone Season Trading Program. If the CAIR NO\textsubscript{X} source is also subject to the Acid Rain Program, then this natural person shall be the same person as the alternate designated representative under the Acid Rain Program. If the CAIR NO\textsubscript{X} source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg Budget Trading Program.

**Automated data acquisition and handling system or DAHS** means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under subpart HH of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart HH of this part.

**Biomass** means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is:

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or
§ 96.102  A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

CAIR authorized account representative means, with regard to a general account, a responsible natural person who is authorized, in accordance with subparts BB, FF, and II of this part, to transfer and otherwise dispose of CAIR NOX allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.

CAIR designated representative means, for a CAIR NOX source and each CAIR NOX unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BB and II of this part, to represent and legally bind each owner and operator in matters pertaining to the CAIR NOX Annual Trading Program. If the CAIR NOX source is also a CAIR SO2 source, then this natural person shall be the same person as the CAIR designated representative under the CAIR SO2 Trading Program. If the CAIR NOX source is also a CAIR NOX Ozone Season source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NOX Ozone Season Trading Program. If the CAIR NOX source is also subject to the Acid Rain Program, then this natural person shall be the same person as the Hg designated representative under the Hg Budget Trading Program.

CAIR NOX allowance means a limited authorization issued by a permitting authority or the Administrator under provisions of a State implementation plan that are approved under §51.123(o)(1) or (2) or (p) of this chapter, or under subpart EE of part 97 or §97.188 of this chapter, to emit one ton of nitrogen oxides during a control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR NOX Program. An authorization to emit nitrogen oxides that is not issued under provisions of a State implementation plan that are approved under §51.123(o)(1) or (2) or (p) of this chapter or subpart EE of part 97 or §97.188 of this chapter shall not be a CAIR NOX allowance.

CAIR NOX allowance deduction or deduct CAIR NOX allowances means the permanent withdrawal of CAIR NOX allowances by the Administrator from a compliance account, e.g., in order to account for a specified number of tons of total nitrogen oxides emissions from all CAIR NOX units at a CAIR NOX source for a control period, determined in accordance with subpart EH of this part, or to account for excess emissions.

CAIR NOX Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of CAIR NOX allowances under the CAIR NOX Annual Trading Program. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.

CAIR NOX Allowance Tracking System account means an account in the CAIR NOX Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR NOX allowances.

CAIR NOX allowances held or hold CAIR NOX allowances means the CAIR NOX allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts FF, GG, and II of this part, in a CAIR NOX Allowance Tracking System account.

CAIR NOX Annual Trading Program means a multi-state nitrogen oxides air
pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AA through II of this part and §51.123(o)(1) or (2) of this chapter or established by the Administrator in accordance with subparts AA through III of this part and §§51.123(p) and 52.35 of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

CAIR NO\textsubscript{X} emissions limitation means, for a CAIR NO\textsubscript{X} source, the tonnage equivalent, in NO\textsubscript{X} emissions in a control period, of the CAIR NO\textsubscript{X} allowances available for deduction for the source under §96.154(a) and (b) for the control period.

CAIR NO\textsubscript{X} Ozone Season source means a source that is subject to the CAIR NO\textsubscript{X} Ozone Season Trading Program.

CAIR NO\textsubscript{X} Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AAA through III of this part and §§51.123(aa)(1) or (2) and (bb)(1), (bb)(2), or (dd) of this chapter or established by the Administrator in accordance with subparts AAA through III of part 97 of this chapter and §§51.123(ee) and 52.35 of this chapter, as a means of mitigating interstate transport of ozone and nitrogen oxides.

CAIR NO\textsubscript{X} source means a source that includes one or more CAIR NO\textsubscript{X} units.

CAIR NO\textsubscript{X} unit means a unit that is subject to the CAIR NO\textsubscript{X} Annual Trading Program under §96.104 and, except for purposes of §96.105 and subpart EE of this part, a CAIR NO\textsubscript{X} opt-in unit under subpart II of this part.

CAIR permit means the legally binding and federally enforceable written document, or portion of such document, issued by the permitting authority under subpart CC of this part, including any permit revisions, specifying the CAIR NO\textsubscript{X} Annual Trading Program requirements applicable to a CAIR NO\textsubscript{X} source, to each CAIR NO\textsubscript{X} unit at the source, and to the owners and operators and the CAIR designated representative of the source and each such unit.

CAIR SO\textsubscript{2} source means a source that is subject to the CAIR SO\textsubscript{2} Trading Program.

CAIR SO\textsubscript{2} Trading Program means a multi-state sulfur dioxide air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AAA through III of this part and §51.124(o)(1) or (2) of this chapter or established by the Administrator in accordance with subparts AAA through III of part 97 of this chapter and §§51.124(r) and 52.36 of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.

Clean Air Act or CAA means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Coal-fired means:

(1) Except for purposes of subpart EE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during any year; or

(2) For purposes of subpart EE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during a specified year.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:

(1) Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and

(2) Producing during the 12-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity—

(i) For a topping-cycle cogeneration unit,

(A) Useful thermal energy not less than 5 percent of total energy output; and
(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle cogeneration unit, useful power not less than 45 percent of total energy input;

(3) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit’s total energy input from all fuel except biomass if the unit is a boiler.

Combustion turbine means:

(1) An enclosed device comprising a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

(2) If the enclosed device under paragraph (1) of this definition is combined cycle, any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §96.105 and §96.184(h).

(i) For a unit that is a CAIR NO\textsubscript{X} unit under §96.104 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CAIR NO\textsubscript{X} unit under §96.104 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

Commence operation means:

(1) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber, except as provided in §96.184(h).

(2) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(3) For a unit that is replaced by a unit at the same source (e.g., repowered) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the replaced unit’s date of
commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1), (2), or (3) of this definition as appropriate, except as provided in §96.184(h).

Compliance account means a CAIR NOₓ Allowance Tracking System account, established by the Administrator for a CAIR NOₓ source under subpart FF or II of this part, in which any CAIR NOₓ allowance allocations for the CAIR NOₓ units at the source are initially recorded and in which are held any CAIR NOₓ allowances available for use for a control period in order to meet the source’s CAIR NOₓ emissions limitation in accordance with §96.154.

Continuous emission monitoring system or CEMS means the equipment required under subpart HH of this part to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of nitrogen oxides emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with part 75 of this chapter. The following systems are the principal types of continuous emission monitoring systems required under subpart HH of this part:

1. A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

2. A nitrogen oxides concentration monitoring system, consisting of a NOₓ pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NOₓ emissions, in parts per million (ppm); and

3. A nitrogen oxides emission rate (or NOₓ-diluent) monitoring system, consisting of a NOₓ pollutant concentration monitor, a diluent gas (CO₂ or O₂) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NOₓ concentration, in parts per million (ppm), diluent gas concentration, in percent CO₂ or O₂; and NOₓ emission rate, in pounds per million British thermal units (lb/mmBtu).

(4) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H₂O;

(5) A carbon dioxide monitoring system, consisting of a CO₂ pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO₂ concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO₂ emissions, in percent CO₂; and

(6) An oxygen monitoring system, consisting of an O₂ concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O₂, in percent O₂.

Control period means the period beginning January 1 of a calendar year, except as provided in §96.106(c)(2), and ending on December 31 of the same year, inclusive.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the CAIR designated representative and as determined by the Administrator in accordance with subpart HH of this part.

Excess emissions means any ton of nitrogen oxides emitted by the CAIR NOₓ units at a CAIR NOₓ source during a control period that exceeds the CAIR NOₓ emissions limitation for the source.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in any calendar year.

Fuel oil means any petroleum-based fuel (including diesel fuel or petroleum derivatives such as oil tar) and any recycled or blended petroleum products or petroleum by-products used as a fuel whether in a liquid, solid, or gaseous state.
§ 96.102 General account means a CAIR NO\textsubscript{X} Allowance Tracking System account, established under subpart FF of this part, that is not a compliance account.

Generator means a device that produces electricity.

Gross electrical output means, with regard to a cogeneration unit, electricity made available for use, including any such electricity used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Heat input means, with regard to a specified period of time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the CAIR designated representative and determined by the Administrator in accordance with subpart HH of this part and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Hg Budget Trading Program means a multi-state Hg air pollution control and emission reduction program approved and administered by the Administrator in accordance with subpart HHHH of part 60 of this chapter and §60.210(a)(6), or established by the Administrator under section 111 of the Clean Air Act, as a means of reducing national Hg emissions.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the maximum amount of fuel per hour (in Btu/hr) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

Monitoring system means any monitoring system that meets the requirements of subpart HH of this part, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Most stringent State or Federal NO\textsubscript{X} emissions limitation means, with regard to a unit, the lowest NO\textsubscript{X} emissions limitation (in terms of lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

Nameplate capacity means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.

Oil-fired means, for purposes of subpart EE of this part, combusting fuel
Environmental Protection Agency

§ 96.102

oil for more than 15.0 percent of the annual heat input in a specified year and not qualifying as coal-fired.

Operator means any person who operates, controls, or supervises a CAIR NOX unit or a CAIR NOX source and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

Owner means any of the following persons:

(1) With regard to a CAIR NOX source or a CAIR NOX unit at a source, respectively:
   (i) Any holder of any portion of the legal or equitable title in a CAIR NOX unit at the source or the CAIR NOX unit; 
   (ii) Any holder of a leasehold interest in a CAIR NOX unit at the source or the CAIR NOX unit; or
   (iii) Any purchaser of power from a CAIR NOX unit at the source or the CAIR NOX unit under a life-of-the-unit, firm power contractual arrangement, provided that, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CAIR NOX unit; or

(2) With regard to any general account, any person who has an ownership interest with respect to the CAIR NOX allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to represent the person’s ownership interest with respect to CAIR NOX allowances.

Permitting authority means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the CAIR NOX Annual Trading Program or, if no such agency has been so authorized, the Administrator.

Potential electrical output capacity means 33 percent of a unit’s maximum design heat input, divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

Receive or receipt of means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CAIR NOX allowances, the movement of CAIR NOX allowances by the Administrator into or between CAIR NOX Allowance Tracking System accounts, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shutdown unit (the replaced unit).

Repowered means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:

(1) Atmospheric or pressurized fluidized bed combustion;

(2) Integrated gasification combined cycle;

(3) Magnetohydrodynamics;

(4) Direct and indirect coal-fired turbines;

(5) Integrated gasification fuel cells; or

(6) As determined by the Administrator in consultation with the Secretary of Energy, a derivative of one or more of the technologies under paragraphs (1) through (5) of this definition and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.

Serial number means, for a CAIR NOX allowance, the unique identification
number assigned to each CAIR NO\textsubscript{X} allowance by the Administrator.

Sequential use of energy means:

(1) For a topping-cycle cogeneration unit, the use of reject heat from electricity production in a useful thermal energy application or process; or

(2) For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of section 502(c) of the Clean Air Act, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the States or the District of Columbia that adopts the CAIR NO\textsubscript{X} Annual Trading Program pursuant to §51.123(o)(1) or (2) of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

(1) In person;

(2) By United States Postal Service; or

(3) By other means of dispatch or transmission and delivery. Compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

Ton means 2,000 pounds. For the purpose of determining compliance with the CAIR NO\textsubscript{X} emissions limitation, total tons of nitrogen oxides emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with subpart HH of this part, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

Topping-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[
\text{LHV} = \text{HHV} - 10.55(W + 9H)
\]

Where:

LHV = lower heating value of fuel in Btu/lb,  
HHV = higher heating value of fuel in Btu/lb,  
W = Weight % of moisture in fuel, and  
H = Weight % of hydrogen in fuel.

Total energy output means, with regard to a cogeneration unit, the sum of useful power and useful thermal energy produced by the cogeneration unit.

Unit means a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device.

Unit operating day means a calendar day in which a unit combusts any fuel.

Unit operating hour or hour of unit operation means an hour in which a unit combusts any fuel.

Useful power means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Useful thermal energy means, with regard to a cogeneration unit, thermal energy that is:
§ 96.104 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State shall be CAIR NO\textsubscript{X} units, and any source that includes one or more such units shall be a CAIR NO\textsubscript{X} source, subject to the requirements of this subpart and subparts BB through HH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CAIR NO\textsubscript{X} unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR NO\textsubscript{X} unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) The units in a State that meet the requirements set forth in paragraph (b)(1)(i), (b)(2)(i), or (b)(2)(ii) of this section shall not be CAIR NO\textsubscript{X} units:

(1)(i) Any unit that is a CAIR NO\textsubscript{X} unit under paragraph (a)(1) or (2) of this section:

(A) Qualifying as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit; and

(B) Not serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe supplying in any calendar year more than one-third of the unit’s potential electric output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(ii) If a unit qualifies as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and meets the requirements of paragraphs (b)(1)(i) of this section for at least one calendar year, but subsequently no longer meets all such requirements, the unit shall become a CAIR NO\textsubscript{X} unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i)(B) of this section.

(2)(i) Any unit that is a CAIR NO\textsubscript{X} unit under paragraph (a)(1) or (2) of this section commencing operation before January 1, 1985:

(A) Qualifying as a solid waste incineration unit; and
§ 96.105 Retired unit exemption.

(a)(1) Any CAIR NO\textsubscript{x} unit that is permanently retired and is not a CAIR NO\textsubscript{x} opt-in unit under subpart II of this part shall be exempt from the CAIR NO\textsubscript{x} Annual Trading Program, except for the provisions of this section, §96.102, §96.103, §96.104, §96.106(c)(4) through (7), §96.107, §96.108, and subparts BB and EE through GG.

(2) The exemption under paragraph (a)(1) of this section shall become effective the day on which the CAIR NO\textsubscript{x} unit is permanently retired. Within 30 days of the unit’s permanent retirement, the CAIR designated representative shall submit a statement to the permitting authority otherwise responsible for administering any CAIR permit for the unit and shall submit a copy of the statement to the Administrator. The statement shall state, in a format prescribed by the permitting authority, that the unit was permanently retired on a specific date and will comply with the requirements of paragraph (b) of this section.

(b) Special provisions. (1) A unit exempt under paragraph (a) of this section shall not emit any nitrogen oxides, starting on the date that the exemption takes effect.

(2) The permitting authority will allocate CAIR NO\textsubscript{x} allowances under subpart EE of this part to a unit exempt under paragraph (a) of this section.

(3) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (a) of this section shall retain, at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(4) The owners and operators and, to the extent applicable, the CAIR designated representative of a unit exempt under paragraph (a) of this section shall comply with the requirements of the CAIR NO\textsubscript{x} Annual Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(5) A unit exempt under paragraph (a) of this section and located at a source that is required, or but for this exemption would be required, to have a Title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete Title V permit application under §96.122 for the unit not less than 30 days before resuming operation at the source.
Environmental Protection Agency

§ 96.106 Standard requirements.

(a) Permit requirements. (1) The CAIR designated representative of each CAIR NO\textsubscript{X} source required to have a title V operating permit and each CAIR NO\textsubscript{X} unit required to have a title V operating permit at the source shall:

(i) Submit to the permitting authority a complete CAIR permit application under §96.122 in accordance with the deadlines specified in §96.121; and

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.

(2) The owners and operators of each CAIR NO\textsubscript{X} source required to have a title V operating permit and each CAIR NO\textsubscript{X} unit required to have a title V operating permit at the source shall have a CAIR permit issued by the permitting authority under subpart CC of this part for the source and operate the source and the unit in compliance with such CAIR permit.

(3) Except as provided in subpart II of this part, the owners and operators of a CAIR NO\textsubscript{X} source that is not otherwise required to have a title V operating permit and each CAIR NO\textsubscript{X} unit that is not otherwise required to have a title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under subpart CC of this part for such CAIR NO\textsubscript{X} source and such CAIR NO\textsubscript{X} unit.

(b) Monitoring, reporting, and recordkeeping requirements. (1) The CAIR designated representative, of each CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of subpart HH of this part.

(2) The emissions measurements recorded and reported in accordance with subpart HH of this part shall be used to determine compliance by each CAIR NO\textsubscript{X} source with the CAIR NO\textsubscript{X} emissions limitation under paragraph (c) of this section.

(c) Nitrogen oxides emission requirements. (1) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source shall hold, in the source’s compliance account, CAIR NO\textsubscript{X} allowances available for compliance deductions for the control period under §96.154(a) in an amount not less than the tons of total nitrogen oxides emissions for the control period from all CAIR NO\textsubscript{X} units at the source, as determined in accordance with subpart HH of this part.

(2) A CAIR NO\textsubscript{X} unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of January 1, 2009 or the deadline for meeting the unit’s monitor certification requirements under §96.170(b)(1), (2), or (5) and for each control period thereafter.

(3) A CAIR NO\textsubscript{X} allowance shall not be deducted, for compliance with the requirements under paragraph (c)(1) of this section, for a control period in a calendar year before the year for which the CAIR NO\textsubscript{X} allowance was allocated.
(4) CAIR NOₓ allowances shall be held in, deducted from, or transferred into or among CAIR NOₓ Allowance Tracking System accounts in accordance with subparts FF, GG, and II of this part.

(5) A CAIR NOₓ allowance is a limited authorization to emit one ton of nitrogen oxides in accordance with the CAIR NOₓ Annual Trading Program. No provision of the CAIR NOₓ Annual Trading Program, the CAIR permit application, the CAIR permit, or an exemption under §96.105 and no provision of law shall be construed to limit the authority of the State or the United States to terminate or limit such authorization.

(6) A CAIR NOₓ allowance does not constitute a property right.

(7) Upon recordation by the Administrator under subpart EE, FF, GG, or II of this part, every allocation, transfer, or deduction of a CAIR NOₓ allowance to or from a CAIR NOₓ source’s compliance account is incorporated automatically in any CAIR permit of the source.

(d) Excess emissions requirements. If a CAIR NOₓ source emits nitrogen oxides during any control period in excess of the CAIR NOₓ emissions limitation, then:

(1) The owners and operators of the source and each CAIR NOₓ unit at the source shall surrender the CAIR NOₓ allowances required for deduction under §96.154(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable State law.

(2) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart, the Clean Air Act, and applicable State law.

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the CAIR NOₓ source and each CAIR NOₓ unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The certificate of representation under §96.113 for the CAIR designated representative for the source and each CAIR NOₓ unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation under §96.113 changing the CAIR designated representative.

(ii) All emissions monitoring information, in accordance with subpart HH of this part, provided that to the extent that subpart HH of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the CAIR NOₓ Annual Trading Program.

(iv) Copies of all documents used to complete a CAIR permit application and any other submission under the CAIR NOₓ Annual Trading Program or to demonstrate compliance with the requirements of the CAIR NOₓ Annual Trading Program.

(2) The CAIR designated representative of a CAIR NOₓ source and each CAIR NOₓ unit at the source shall submit the reports required under the CAIR NOₓ Annual Trading Program, including those under subpart HH of this part.

(3) The CAIR designated representative of a CAIR NOₓ source and each CAIR NOₓ unit at the source shall meet the requirements of the CAIR NOₓ Annual Trading Program.

(4) Any provision of the CAIR NOₓ Annual Trading Program that applies to a CAIR NOₓ source or the CAIR designated representative of a CAIR NOₓ source shall also apply to the owners and operators of such source and of the CAIR NOₓ units at the source.

(5) Any provision of the CAIR NOₓ Annual Trading Program that applies to a CAIR NOₓ unit or the CAIR designated representative of a CAIR NOₓ unit shall also apply to the owners and operators of such unit.

(c) Effect on other authorities. No provision of the CAIR NOₓ Annual Trading Program, a CAIR permit application, a
Environmental Protection Agency

§ 96.110 Authorization and responsibilities of CAIR designated representative.

(a) Except as provided under §96.111, each CAIR NO\textsubscript{X} source, including all CAIR NO\textsubscript{X} units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NO\textsubscript{X} Annual Trading Program concerning the source or any CAIR NO\textsubscript{X} unit at the source.

(b) The CAIR designated representative of the CAIR NO\textsubscript{X} source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NO\textsubscript{X} units at the source and shall act in accordance with the certification statement in §96.113(a)(4)(iv).

(c) Upon receipt by the Administrator of a complete certificate of representation under §96.113, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR NO\textsubscript{X} source represented and each CAIR NO\textsubscript{X} unit at the source in all matters pertaining to the CAIR NO\textsubscript{X} Annual Trading Program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the permitting authority, the Administrator, or a court regarding the source or unit.

(d) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NO\textsubscript{X} Allowance Tracking System account will be established for a CAIR NO\textsubscript{X} unit at a source, until the Administrator has received a complete certificate of representation under §96.113 for a CAIR designated representative of the source and the CAIR NO\textsubscript{X} units at the source.

(e)(1) Each submission under the CAIR NO\textsubscript{X} Annual Trading Program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR NO\textsubscript{X} source on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: “I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I

[70 FR 25339, May 12, 2005, as amended at 71 FR 25382, Apr. 28, 2006]
§ 96.111 Alternate CAIR designated representative.

(a) A certificate of representation under §96.113 may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.

(b) Upon receipt by the Administrator of a complete certificate of representation under §96.113, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be binding on the CAIR designated representative and the owners and operators of the CAIR NOₓ source and the CAIR NOₓ units at the source.

(c) Except in this section and §§96.102, 96.110(a) and (d), 96.112, 96.113, 96.115, 96.151, and 96.182, whenever the term “CAIR designated representative” is used in subparts AA through II of this part, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25382, Apr. 28, 2006]

§ 96.112 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

(a) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §96.113. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR NOₓ source and the CAIR NOₓ units at the source.

(b) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §96.113. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR NOₓ source and the CAIR NOₓ units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CAIR NOₓ source or a CAIR NOₓ unit is not included in the list of owners and operators in the certificate of representation under §96.113, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the Administrator, or a court, as if the owner or operator were included in such list.

(2) Within 30 days following any change in the owners and operators of a CAIR NOₓ source or a CAIR NOₓ unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under §96.113 amending the list.
§ 96.113 Certificate of representation.

(a) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the Administrator:

1. Identification of the CAIR NO\textsubscript{X} source, and each CAIR NO\textsubscript{X} unit at the source, for which the certificate of representation is submitted, including identification and nameplate capacity of each generator served by each such unit.

2. The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative.

3. A list of the owners and operators of the CAIR NO\textsubscript{X} source and of each CAIR NO\textsubscript{X} unit at the source.

4. The following certification statements by the CAIR designated representative and any alternate CAIR designated representative:

(i) "I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR NO\textsubscript{X} unit at the source."

(ii) "I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO\textsubscript{X} Annual Trading Program on behalf of the owners and operators of the source and each CAIR NO\textsubscript{X} unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions."

(iii) "I certify that the owners and operators of the source and each CAIR NO\textsubscript{X} unit at the source shall be bound by any order issued to me by the Administrator, the permitting authority, or a court regarding the source or unit."

(iv) "Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR NO\textsubscript{X} unit, or where a utility or industrial customer purchases power from a CAIR NO\textsubscript{X} unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘CAIR designated representative’ or ‘alternate CAIR designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR NO\textsubscript{X} unit at the source; and CAIR NO\textsubscript{X} allowances and proceeds of transactions involving CAIR NO\textsubscript{X} allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR NO\textsubscript{X} allowances by contract, CAIR NO\textsubscript{X} allowances and proceeds of transactions involving CAIR NO\textsubscript{X} allowances will be deemed to be held or distributed in accordance with the contract."

5. The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

(b) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25382, Apr. 28, 2006]

§ 96.114 Objections concerning CAIR designated representative.

(a) Once a complete certificate of representation under §96.113 has been submitted and received, the permitting authority and the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under §96.113 is received by the Administrator.
§ 96.115 Delegation by CAIR designated representative and alternate CAIR designated representative.

(a) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(b) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(c) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

(4) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:

(i) “I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.115(d) shall be deemed to be an electronic submission by me.”

(ii) “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.115(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.115 is terminated.”

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph (c)(4)(i) of this section and made in accordance with a notice of delegation effective under paragraph (d) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate

§ 96.115...
CAIR designated representative submitting such notice of delegation.

Subpart CC—Permits

SOURCE: 70 FR 25339, May 12, 2005, unless otherwise noted.

§ 96.120 General CAIR NOX Annual Trading Program permit requirements.

(a) For each CAIR NOX source required to have a title V operating permit or required, under subpart II of this part, to have a title V operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the permitting authority for the title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the title V permit or other federally enforceable permit as applicable shall be administered in accordance with the permitting authority’s title V operating permits regulations promulgated under part 70 or 71 of this chapter or the permitting authority’s regulations for other federally enforceable permits as applicable, except as provided otherwise by §96.105, this subpart, and subpart II of this part.

(b) Each CAIR permit shall contain, with regard to the CAIR NOX source and the CAIR NOX units at the source covered by the CAIR permit, all applicable CAIR NOX Annual Trading Program, CAIR NOX Ozone Season Trading Program, and CAIR SO2 Trading Program requirements and shall be a complete and separable portion of the title V operating permit or other federally enforceable permit under paragraph (a) of this section.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25383, Apr. 28, 2006]

§ 96.121 Submission of CAIR permit applications.

(a) Duty to apply. The CAIR designated representative of any CAIR NOX source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §96.122 for the source covering each CAIR NOX unit at the source at least 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2009 or the date on which the CAIR NOX unit commences commercial operation, except as provided in §96.183(a).

(b) Duty to Reapply. For a CAIR NOX source required to have a title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under §96.122 for the source covering each CAIR NOX unit at the source to renew the CAIR permit in accordance with the permitting authority’s title V operating permits regulations addressing permit renewal, except as provided in §96.183(b).

[70 FR 25339, May 12, 2005, as amended at 71 FR 25383, Apr. 28, 2006]

§ 96.122 Information requirements for CAIR permit applications.

A complete CAIR permit application shall include the following elements concerning the CAIR NOX source for which the application is submitted, in a format prescribed by the permitting authority:

(a) Identification of the CAIR NOX source;

(b) Identification of each CAIR NOX unit at the CAIR NOX source; and

(c) The standard requirements under §96.106.

§ 96.123 CAIR permit contents and term.

(a) Each CAIR permit will contain, in a format prescribed by the permitting authority, all elements required for a complete CAIR permit application under §96.122.

(b) Each CAIR permit is deemed to incorporate automatically the definitions of terms under §96.102 and, upon recordation by the Administrator under subpart EE, FF, GG, or II of this part, every allocation, transfer, or deduction of a CAIR NOX allowance to or from the compliance account of the CAIR NOX source covered by the permit.

(c) The term of the CAIR permit will be set by the permitting authority, as necessary to facilitate coordination of the renewal of the CAIR permit with issuance, revision, or renewal of the CAIR NOX source’s title V operating
§ 96.124 CAIR permit revisions.
Except as provided in §96.123(b), the permitting authority will revise the CAIR permit, as necessary, in accordance with the permitting authority’s title V operating permits regulations or the permitting authority’s regulations for other federally enforceable permits as applicable addressing permit revisions.

§ 96.141 Timing requirements for CAIR NO\textsubscript{X} allowance allocations.

(a) By October 31, 2006, the permitting authority will submit to the Administrator the CAIR NO\textsubscript{X} allowance allocations, in a format prescribed by the Administrator and in accordance with §96.142(a) and (b), for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014.

(b) By October 31, 2009 and October 31 of each year thereafter, the permitting authority will submit to the Administrator the CAIR NO\textsubscript{X} allowance allocations, in a format prescribed by the Administrator and in accordance with §96.142(a) and (b), for the control period in the sixth year after the year of the applicable deadline for submission under this paragraph.

(c) By October 31, 2009 and October 31 of each year thereafter, the permitting authority will submit to the Administrator the CAIR NO\textsubscript{X} allowance allocations, in a format prescribed by the Administrator and in accordance with §96.142(a), (c), and (d), for the control period in the year of the applicable deadline for submission under this paragraph.

§ 96.142 CAIR NO\textsubscript{X} allowance allocations.

(a)(1) The baseline heat input (in mmBtu) used with respect to CAIR NO\textsubscript{X} allowance allocations under paragraph (b) of this section for each CAIR NO\textsubscript{X} unit will be:

(i) For units commencing operation before January 1, 2001 the average of the 3 highest amounts of the unit’s adjusted control period heat input for 2000 through 2004, with the adjusted control period heat input for each year calculated as follows:

(A) If the unit is coal-fired during the year, the unit’s control period heat input for such year is multiplied by 100 percent;

(B) If the unit is oil-fired during the year, the unit’s control period heat input for such year is multiplied by 60 percent; and

(C) If the unit is not subject to paragraph (a)(1)(i)(A) or (B) of this section, the unit’s control period heat input for such year is multiplied by 40 percent.
(ii) For units commencing operation on or after January 1, 2001 and operating each calendar year during a period of 5 or more consecutive calendar years, the average of the 3 highest amounts of the unit’s total converted control period heat input over the first such 5 years.

(2)(i) A unit’s control period heat input, and a unit’s status as coal-fired or oil-fired, for a calendar year under paragraph (a)(1)(i) of this section, and a unit’s total tons of NO\textsubscript{X} emissions during a calendar year under paragraph (c)(3) of this section, will be determined in accordance with part 75 of this chapter, to the extent the unit was otherwise subject to the requirements of part 75 of this chapter for the year, or will be based on the best available data reported to the permitting authority for the unit, to the extent the unit was not otherwise subject to the requirements of part 75 of this chapter for the year.

(ii) A unit’s converted control period heat input for a calendar year specified under paragraph (a)(1)(ii) of this section equals:

(A) Except as provided in paragraph (a)(2)(ii)(B) or (C) of this section, the control period gross electrical output of the generator or generators served by the unit multiplied by 7,900 Btu/kWh, if the unit is coal-fired for the year, or 6,675 Btu/kWh, if the unit is not coal-fired for the year, and divided by 1,000,000 Btu/mmBtu, provided that if a generator is served by 2 or more units, then the gross electrical output of the generator will be attributed to each unit in proportion to the unit’s share of the total control period heat input of such units for the year.

(B) For a unit that is a boiler and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the total heat energy (in Btu) of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by 1,000,000 Btu/mmBtu.

(C) For a unit that is a combustion turbine and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the control period gross electrical output of the enclosed device comprising the compressor, combustor, and turbine multiplied by 3,413 Btu/kWh, plus the total heat energy (in Btu) of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by 1,000,000 Btu/mmBtu.

(b)(1) For each control period in 2009 and thereafter, the permitting authority will allocate to each CAIR NO\textsubscript{X} unit in the State that has a baseline heat input (as determined under paragraph (a) of this section) a total amount of CAIR NO\textsubscript{X} allowances equal to 95 percent for a control period during 2009 through 2014, and 97 percent for a control period during 2015 and thereafter, of the tons of NO\textsubscript{X} emissions in the State trading budget under §96.140 (except as provided in paragraph (d) of this section).

(2) The permitting authority will allocate CAIR NO\textsubscript{X} allowances to each CAIR NO\textsubscript{X} unit under paragraph (b)(1) of this section in an amount determined by multiplying the total amount of CAIR NO\textsubscript{X} allowances allocated under paragraph (b)(1) of this section by the ratio of the baseline heat input of such CAIR NO\textsubscript{X} unit to the total amount of baseline heat input of all such CAIR NO\textsubscript{X} units in the State and rounding to the nearest whole allowance as appropriate.

(c) For each control period in 2009 and thereafter, the permitting authority will allocate CAIR NO\textsubscript{X} allowances to CAIR NO\textsubscript{X} units in a State that are not allocated CAIR NO\textsubscript{X} allowances under paragraph (b) of this section because the units do not yet have a baseline heat input under paragraph (a) of this section or because the units have a baseline heat input but all CAIR NO\textsubscript{X} allowances available under paragraph (b) of this section for the control period are already allocated, in accordance with the following procedures:

(1) The permitting authority will establish a separate new unit set-aside for each control period. Each new unit set-aside will be allocated CAIR NO\textsubscript{X} allowances equal to 5 percent for a control period in 2009 through 2014, and 3 percent for a control period in 2015 and thereafter, of the amount of tons of...
NO\textsubscript{X} emissions in the State trading budget under §96.140.

(2) The CAIR designated representative of such a CAIR NO\textsubscript{X} unit may submit to the permitting authority a request, in a format specified by the permitting authority, to be allocated CAIR NO\textsubscript{X} allowances, starting with the later of the control period in 2009 or the first control period after the control period in which the CAIR NO\textsubscript{X} unit commences commercial operation and until the first control period for which the unit is allocated CAIR NO\textsubscript{X} allowances under paragraph (b) of this section. A separate CAIR NO\textsubscript{X} allowance allocation request for each control period for which CAIR NO\textsubscript{X} allowances are sought must be submitted on or before May 1 of such control period and after the date on which the CAIR NO\textsubscript{X} unit commences commercial operation.

(3) In a CAIR NO\textsubscript{X} allowance allocation request under paragraph (c)(2) of this section, the CAIR designated representative may request for a control period CAIR NO\textsubscript{X} allowances in an amount not exceeding the CAIR NO\textsubscript{X} unit’s total tons of NO\textsubscript{X} emissions during the calendar year immediately before such control period.

(4) The permitting authority will review each CAIR NO\textsubscript{X} allowance allocation request under paragraph (c)(2) of this section and will allocate CAIR NO\textsubscript{X} allowances for each control period pursuant to such request as follows:

(i) The permitting authority will accept an allowance allocation request only if the request meets, or is adjusted by the permitting authority as necessary to meet, the requirements of paragraphs (c)(2) and (3) of this section.

(ii) On or after May 1 of the control period, the permitting authority will determine the sum of the CAIR NO\textsubscript{X} allowances requested (as adjusted under paragraph (c)(4)(i) of this section) in all allowance allocation requests accepted under paragraph (c)(4)(i) of this section for the control period.

(iii) If the amount of CAIR NO\textsubscript{X} allowances in the new unit set-aside for the control period is greater than or equal to the sum under paragraph (c)(4)(ii) of this section, the permitting authority will allocate the amount of CAIR NO\textsubscript{X} allowances requested (as adjusted under paragraph (c)(4)(i) of this section) to each CAIR NO\textsubscript{X} unit covered by an allowance allocation request accepted under paragraph (c)(4)(i) of this section.

(iv) If the amount of CAIR NO\textsubscript{X} allowances in the new unit set-aside for the control period is less than the sum under paragraph (c)(4)(ii) of this section, the permitting authority will allocate to each CAIR NO\textsubscript{X} unit covered by an allowance allocation request accepted under paragraph (c)(4)(i) of this section the amount of the CAIR NO\textsubscript{X} allowances requested (as adjusted under paragraph (c)(4)(i) of this section), multiplied by the amount of CAIR NO\textsubscript{X} allowances in the new unit set-aside for the control period, divided by the sum determined under paragraph (c)(4)(ii) of this section, and rounded to the nearest whole allowance as appropriate.

(v) The permitting authority will notify each CAIR designated representative that submitted an allowance allocation request of the amount of CAIR NO\textsubscript{X} allowances (if any) allocated for the control period to the CAIR NO\textsubscript{X} unit covered by the request.

(d) If, after completion of the procedures under paragraph (c)(4) of this section for a control period, any unallocated CAIR NO\textsubscript{X} allowances remain in the new unit set-aside for the control period, the permitting authority will allocate to each CAIR NO\textsubscript{X} unit that was allocated CAIR NO\textsubscript{X} allowances under paragraph (b) of this section an amount of CAIR NO\textsubscript{X} allowances equal to the total amount of such remaining unallocated CAIR NO\textsubscript{X} allowances, multiplied by the unit's allocation under paragraph (b) of this section, divided by 95 percent for a control period during 2009 through 2014, and 97 percent for a control period during 2015 and thereafter, of the amount of tons of NO\textsubscript{X} emissions in the State trading budget under §96.140, and rounded to the nearest whole allowance as appropriate.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25383, Apr. 28, 2006]

§ 96.143 Compliance supplement pool.

(a) In addition to the CAIR NO\textsubscript{X} allowances allocated under §96.142, the permitting authority may allocate for
the control period in 2009 up to the following amount of CAIR NO\textsubscript{X} allowances to CAIR NO\textsubscript{X} units in the respective State:

(b) For any CAIR NO\textsubscript{X} unit in the State that achieves NO\textsubscript{X} emission reductions in 2007 and 2008 that are not necessary to comply with any State or federal emissions limitation applicable during such years, the CAIR designated representative of the unit may request the allocation of an amount of CAIR NO\textsubscript{X} allowances from the permitting authority for May 1, 2009 a request, in a format specified by the permitting authority, for allocation of an amount of CAIR NO\textsubscript{X} allowances from the compliance supplement pool under paragraph (a) of this section, in accordance with the following:

(1) The CAIR designated representative of such CAIR NO\textsubscript{X} unit shall submit to the permitting authority by May 1, 2009 a request, in a format specified by the permitting authority, for allocation of an amount of CAIR NO\textsubscript{X} allowances from the compliance supplement pool under paragraph (a) of this section for such early reduction credits, in accordance with the following:

(1) The owners and operators of such CAIR NO\textsubscript{X} unit shall monitor and report the NO\textsubscript{X} emissions rate and the heat input of the unit in accordance with subpart HH of this part in each control period for which early reduction credit is requested.

(2) The CAIR designated representative of such CAIR NO\textsubscript{X} unit shall submit to the permitting authority by May 1, 2009 a request, in a format specified by the permitting authority, for allocation of an amount of CAIR NO\textsubscript{X} allowances from the compliance supplement pool not exceeding the amount (in tons) of the unit’s NO\textsubscript{X} emission reductions in 2007 and 2008 that are not necessary to comply with any State or federal emissions limitation applicable during such years, determined in accordance with subpart HH of this part.

(c) For any CAIR NO\textsubscript{X} unit in the State whose compliance with the CAIR NO\textsubscript{X} emissions limitation for the control period in 2009 would create an undue risk to the reliability of electricity supply during such control period, the CAIR designated representative of the unit may request the allocation of CAIR NO\textsubscript{X} allowances from the compliance supplement pool under paragraph (a) of this section, in accordance with the following:

(1) The CAIR designated representative of such CAIR NO\textsubscript{X} unit shall submit to the permitting authority by May 1, 2009 a request, in a format specified by the permitting authority, for allocation of an amount of CAIR NO\textsubscript{X} allowances from the compliance supplement pool not exceeding the minimum amount of CAIR NO\textsubscript{X} allowances necessary to remove such undue risk to the reliability of electricity supply.

(2) In the request under paragraph (c)(1) of this section, the CAIR designated representative of such CAIR NO\textsubscript{X} unit shall demonstrate that, in the absence of allocation to the unit of the amount of CAIR NO\textsubscript{X} allowances requested, the unit’s compliance with the CAIR NO\textsubscript{X} emissions limitation for the control period in 2009 would create an undue risk to the reliability of electricity supply during such control period. This demonstration must include a showing that it would not be feasible for the owners and operators of the unit to:

(i) Obtain a sufficient amount of electricity from other electricity generation facilities, during the installation of control technology at the unit for compliance with the CAIR NO\textsubscript{X} emissions limitation, to prevent such undue risk; or

(ii) Obtain under paragraphs (b) and (d) of this section, or otherwise obtain, a sufficient amount of CAIR NO\textsubscript{X} allowances to prevent such undue risk.

(d) The permitting authority will review each request under paragraph (b) or (c) of this section submitted by May 1, 2009 and will allocate CAIR NO\textsubscript{X} allowances for the control period in 2009.
to CAIR NO\textsubscript{X} units in the State and covered by such request as follows:

(1) Upon receipt of each such request, the permitting authority will make any necessary adjustments to the request to ensure that the amount of the CAIR NO\textsubscript{X} allowances requested meets the requirements of paragraph (b) or (c) of this section.

(2) If the State’s compliance supplement pool under paragraph (a) of this section has an amount of CAIR NO\textsubscript{X} allowances not less than the total amount of CAIR NO\textsubscript{X} allowances in all such requests (as adjusted under paragraph (d)(1) of this section), the permitting authority will allocate to each CAIR NO\textsubscript{X} unit covered by such requests the amount of CAIR NO\textsubscript{X} allowances requested (as adjusted under paragraph (d)(1) of this section).

(3) If the State’s compliance supplement pool under paragraph (a) of this section has a smaller amount of CAIR NO\textsubscript{X} allowances than the total amount of CAIR NO\textsubscript{X} allowances in all such requests (as adjusted under paragraph (d)(1) of this section), the permitting authority will allocate CAIR NO\textsubscript{X} allowances to each CAIR NO\textsubscript{X} unit covered by such requests according to the following formula and rounding to the nearest whole allowance as appropriate:

\[ \text{Unit’s allocation} = \text{Unit’s adjusted allocation} \times \left( \frac{\text{State’s compliance supplement pool}}{\text{Total adjusted allocations for all units}} \right) \]

Where:

- ‘Unit’s allocation’ is the amount of CAIR NO\textsubscript{X} allowances allocated to the unit from the State’s compliance supplement pool.
- ‘Unit’s adjusted allocation’ is the amount of CAIR NO\textsubscript{X} allowances requested for the unit under paragraph (b) or (c) of this section, as adjusted under paragraph (d)(1) of this section.
- ‘State’s compliance supplement pool’ is the amount of CAIR NO\textsubscript{X} allowances in the State’s compliance supplement pool.
- ‘Total adjusted allocations for all units’ is the sum of the amounts of allocations requested for all units under paragraph (b) or (c) of this section, as adjusted under paragraph (d)(1) of this section.

(4) By November 30, 2009, the permitting authority will determine, and submit to the Administrator, the allocations under paragraph (d)(2) or (3) of this section.

(5) By January 1, 2010, the Administrator will record the allocations under paragraph (d)(4) of this section.

Subpart FF—CAIR NO\textsubscript{X} Allowance Tracking System

SOURCE: 70 FR 25339, May 12, 2005, unless otherwise noted.

§ 96.150 [Reserved]

§ 96.151 Establishment of accounts.

(a) Compliance accounts. Except as provided in §96.184(e), upon receipt of a complete certificate of representation under §96.113, the Administrator will establish a compliance account for the CAIR NO\textsubscript{X} source for which the certificate of representation was submitted unless the source already has a compliance account.

(b) General accounts—(1) Application for general account. (i) Any person may apply to open a general account for the purpose of holding and transferring CAIR NO\textsubscript{X} allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(B) Organization name and type of organization, if applicable;
(C) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership interest with respect to the CAIR NO\textsubscript{X} allowances held in the general account; 

(D) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: “I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR NO\textsubscript{X} allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO\textsubscript{X} Annual Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account.” 

(E) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed. 

(iii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted. 

(2) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative. 

(i) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section: 

(A) The Administrator will establish a general account for the person or persons for whom the application is submitted. 

(B) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR NO\textsubscript{X} allowances held in the general account in all matters pertaining to the CAIR NO\textsubscript{X} Annual Trading Program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the Administrator or a court regarding the general account. 

(C) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative. 

(ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR NO\textsubscript{X} allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: “I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR NO\textsubscript{X} allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or
omitting required statements and information, including the possibility of fine or imprisonment.’’

(iii) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(ii) of this section.

(3) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest. (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO\textsubscript{X} allowances in the general account.

(ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO\textsubscript{X} allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CAIR NO\textsubscript{X} allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to CAIR NO\textsubscript{X} allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR NO\textsubscript{X} allowances in the general account to include the change.

(4) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative. (i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (b)(3)(i) or (ii) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the Administrator under the CAIR NO\textsubscript{X} Annual Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the
proceeds of CAIR NO\textsubscript{X} allowance transfers.

(5) **Delegation by CAIR authorized account representative and alternate CAIR authorized account representative.**

(i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FF and GG of this part.

(ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FF and GG of this part.

(iii) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (b)(5)(i) or (ii) of this section, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (b)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: “I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.151(b)(5)(iv) shall be deemed to be an electronic submission by me.”;

(E) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.151(b)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.151(b)(5) is terminated.”

(iv) A notice of delegation submitted under paragraph (b)(5)(iii) of this section shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (b)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (b)(5)(iv) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

(c) **Account identification.** The Administrator will assign a unique identifying number to each account established under paragraph (a) or (b) of this section.

§96.152 Responsibilities of CAIR authorized account representative.

Following the establishment of a CAIR NO\textsubscript{X} Allowance Tracking System
§ 96.153 Recordation of CAIR NO\textsubscript{x} allowance allocations.

(a) By September 30, 2007, the Administrator will record in the CAIR NO\textsubscript{x} source’s compliance account the CAIR NO\textsubscript{x} allowances allocated for the CAIR NO\textsubscript{x} units at the source, as submitted by the permitting authority in accordance with §96.141(a), for the control period in 2007, 2008, 2009, 2010, 2011, 2012, 2013, and 2014.

(b) By December 1, 2009, the Administrator will record in the CAIR NO\textsubscript{x} source’s compliance account the CAIR NO\textsubscript{x} allowances allocated for the CAIR NO\textsubscript{x} units at the source, as submitted by the permitting authority in accordance with §96.141(b), for the control period in 2015.

(c) By December 1, 2009 and December 1 of each year thereafter, the Administrator will record in the CAIR NO\textsubscript{x} source’s compliance account the CAIR NO\textsubscript{x} allowances allocated for the CAIR NO\textsubscript{x} units at the source, as submitted by the permitting authority in accordance with §96.141(b), for the control period in the sixth year after the year of the applicable deadline for recordation under this paragraph.

(d) By December 1, 2009 and December 1 of each year thereafter, the Administrator will record in the CAIR NO\textsubscript{x} source’s compliance account the CAIR NO\textsubscript{x} allowances allocated for the CAIR NO\textsubscript{x} units at the source, as submitted by the permitting authority or determined by the Administrator in accordance with §96.141(c), for the control period in the year of the applicable deadline for recordation under this paragraph.

(e) Serial numbers for allocated CAIR NO\textsubscript{x} allowances. When recording the allocation of CAIR NO\textsubscript{x} allowances for a CAIR NO\textsubscript{x} unit in a compliance account, the Administrator will assign each CAIR NO\textsubscript{x} allowance a unique identification number that will include digits identifying the year of the control period for which the CAIR NO\textsubscript{x} allowance is allocated.

§ 96.154 Compliance with CAIR NO\textsubscript{x} emissions limitation.

(a) Allowance transfer deadline. The CAIR NO\textsubscript{x} allowances are available to be deducted for compliance with a source’s CAIR NO\textsubscript{x} emissions limitation for a control period in a given calendar year only if the CAIR NO\textsubscript{x} allowances:

(1) Were allocated for the control period in the year or a prior year; and

(2) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR NO\textsubscript{x} allowance transfer correctly submitted for recordation under §§96.160 and 96.161 by the allowance transfer deadline for the control period.

(b) Deductions for compliance. Following the recordation, in accordance with §96.161, of CAIR NO\textsubscript{x} allowance transfers submitted for recordation in a source’s compliance account by the allowance transfer deadline for a control period, the Administrator will deduct from the compliance account CAIR NO\textsubscript{x} allowances available under paragraph (a) of this section in order to determine whether the source meets the CAIR NO\textsubscript{x} emissions limitation for the control period, as follows:

(1) Until the amount of CAIR NO\textsubscript{x} allowances deducted equals the number of tons of total nitrogen oxides emissions, determined in accordance with subpart HH of this part, from all CAIR NO\textsubscript{x} units at the source for the control period; or

(2) If there are insufficient CAIR NO\textsubscript{x} allowances to complete the deductions in paragraph (b)(1) of this section, until no more CAIR NO\textsubscript{x} allowances available under paragraph (a) of this section remain in the compliance account.

(c)(1) Identification of CAIR NO\textsubscript{x} allowances by serial number. The CAIR authorized account representative for a source’s
Environmental Protection Agency § 96.157

A compliance account may request that specific CAIR NOX allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (b) or (d) of this section. Such request shall be submitted to the Administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the Administrator, the identification of the CAIR NOX source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CAIR NOX allowances under paragraph (b) or (d) of this section from the source’s compliance account, in the absence of an identification or in the case of a partial identification of CAIR NOX allowances by serial number under paragraph (c)(1) of this section, on a first-in, first-out (FIFO) accounting basis in the following order:

(i) Any CAIR NOX allowances that were allocated to the units at the source, in the order of recordation; and

(ii) Any CAIR NOX allowances that were allocated to any entity and transferred and recorded in the compliance account pursuant to subpart GG of this part, in the order of recordation.

(d) Deductions for excess emissions. (1) After making the deductions for compliance under paragraph (b) of this section for a control period in a calendar year in which the CAIR NOX source has excess emissions, the Administrator will deduct from the source’s compliance account an amount of CAIR NOX allowances, allocated for the control period in the immediately following calendar year, equal to 3 times the number of tons of the source’s excess emissions.

(2) Any allowance deduction required under paragraph (d)(1) of this section shall not affect the liability of the owners and operators of the CAIR NOX source or the CAIR NOX units at the source for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violations, as ordered under the Clean Air Act or applicable State law.

(e) Recordation of deductions. The Administrator will record in the appropriate compliance account all deductions from such an account under paragraphs (b) and (d) of this section and subpart II.

(f) Administrator’s action on submissions. (1) The Administrator may review and conduct independent audits concerning any submission under the CAIR NOX Annual Trading Program and make appropriate adjustments of the information in the submissions.

(2) The Administrator may deduct CAIR NOX allowances from or transfer CAIR NOX allowances to a source’s compliance account based on the information in the submissions, as adjusted under paragraph (f)(1) of this section, and record such deductions and transfers.

§ 96.155 Banking.

(a) CAIR NOX allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CAIR NOX allowance that is held in a compliance account or a general account will remain in such account unless and until the CAIR NOX allowance is deducted or transferred under §96.154, §96.156, or subpart GG or II of this part.

§ 96.156 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR NOX Allowance Tracking System account. Within 10 business days of making such correction, the Administrator will notify the CAIR authorized account representative for the account.

§ 96.157 Closing of general accounts.

(a) The CAIR authorized account representative of a general account may submit to the Administrator a request to close the account, which shall include a correctly submitted allowance transfer under §§96.160 and 96.161 for any CAIR NOX allowances in the account to one or more other CAIR NOX Allowance Tracking System accounts.
(b) If a general account has no allowance transfers in or out of the account for a 12-month period or longer and does not contain any CAIR NOX allowances, the Administrator may notify the CAIR authorized account representative for the account that the account will be closed following 20 business days after the notice is sent. The account will be closed after the 20-day period unless, before the end of the 20-day period, the Administrator receives a correctly submitted transfer of CAIR NOX allowances into the account under §§96.160 and 96.161 or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25384, Apr. 28, 2006]

Subpart GG—CAIR NOX Allowance Transfers

SOURCE: 70 FR 25339, May 12, 2005, unless otherwise noted.

§96.160 Submission of CAIR NOX allowance transfers.

A CAIR authorized account representative seeking recordation of a CAIR NOX allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the CAIR NOX allowance transfer shall include the following elements, in a format specified by the Administrator:

(a) The account numbers for both the transferor and transferee accounts;

(b) The serial number of each CAIR NOX allowance that is in the transferor account and is to be transferred; and

(c) The name and signature of the CAIR authorized account representative of the transferee account as specified by the request, provided that:

(1) The transfer is correctly submitted under §96.160; and

(2) The transferor account includes each CAIR NOX allowance identified by serial number in the transfer.

(b) A CAIR NOX allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR NOX allowances allocated for any control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions under §96.154 for the control period immediately before such allowance transfer deadline.

(c) Where a CAIR NOX allowance transfer submitted for recordation fails to meet the requirements of paragraph (a) of this section, the Administrator will not record such transfer.

§96.162 Notification.

(a) Notification of recordation. Within 5 business days of recordation of a CAIR NOX allowance transfer under §96.161, the Administrator will notify the CAIR authorized account representatives of both the transferor and transferee accounts.

(b) Notification of non-recordation. Within 10 business days of receipt of a CAIR NOX allowance transfer that fails to meet the requirements of §96.161(a), the Administrator will notify the CAIR authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer; and

(2) The reasons for such non-recordation.

(c) Nothing in this section shall preclude the submission of a CAIR NOX allowance transfer for recordation following notification of non-recordation.

Subpart HH—Monitoring and Reporting

SOURCE: 70 FR 25339, May 12, 2005, unless otherwise noted.

§96.170 General requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR NOX unit,
shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subpart H of part 75 of this chapter. For purposes of complying with such requirements, the definitions in §96.102 and in §72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CAIR NO\textsubscript{X} unit,” “CAIR designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively, as defined in §96.102. The owner or operator of a unit that is not a CAIR NO\textsubscript{X} unit but that is monitored under §75.72(b)(2)(ii) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CAIR NO\textsubscript{X} unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR NO\textsubscript{X} unit shall:

(1) Install all monitoring systems required under this subpart for monitoring NO\textsubscript{X} mass emissions and individual unit heat input (including all systems required to monitor NO\textsubscript{X} emission rate, NO\textsubscript{X} concentration, stack gas moisture content, stack gas flow rate, CO\textsubscript{2} or O\textsubscript{2} concentration, and fuel flow rate, as applicable, in accordance with §§75.71 and 75.72 of this chapter);

(2) Successfully complete all certification tests required under §96.171 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the following dates. The owner or operator shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the following dates.

(1) For the owner or operator of a CAIR NO\textsubscript{X} unit that commences commercial operation before July 1, 2007, by January 1, 2008.

(2) For the owner or operator of a CAIR NO\textsubscript{X} unit that commences commercial operation on or after July 1, 2007, by the later of the following dates:

(i) January 1, 2008; or

(ii) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation.

(3) For the owner or operator of a CAIR NO\textsubscript{X} unit for which construction of a new stack or flue or installation of add-on NO\textsubscript{X} emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (4), or (5) of this section, by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO\textsubscript{X} emissions controls.

(4) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, by the date specified in §96.184(b).

(5) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a CAIR NO\textsubscript{X} opt-in unit under subpart II of this part, by the date on which the CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program as provided in §96.184(g).

(c) Reporting data. The owner or operator of a CAIR NO\textsubscript{X} unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NO\textsubscript{X} concentration, NO\textsubscript{X} emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NO\textsubscript{X} mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter, section 2.4 of appendix D to part 75.
§ 96.171 Initial certification and recertification procedures.

(a) The owner or operator of a CAIR NOX unit shall be exempt from the initial certification requirements of this section for a monitoring system under §96.170(a)(1) if the following conditions are met:

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendix B, appendix D, and appendix E to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under §96.170(a)(1) exempt from initial certification requirements under paragraph (a) of this section.

(c) If the Administrator has previously approved a petition under §75.17(a) or (b) of this chapter for apportioning the NOX emission rate measured in a common stack or a petition under §75.66 of this chapter for an alternative to a requirement in §75.12 or §75.17 of this chapter, the CAIR designated representative shall resubmit the petition to the Administrator under §96.175(a) to determine whether the approval applies under the CAIR NOX Annual Trading Program.

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CAIR NOX unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendices D and E to part 75 of this chapter) under §96.170(a)(1).

The owner or operator of a unit that qualifies to use the low mass emissions of this chapter, or section 2.5 of appendix E to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CAIR NOX unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §96.175.

(2) No owner or operator of a CAIR NOX unit shall operate the unit so as to discharge, or allow to be discharged, NOX emissions to the atmosphere without accounting for all such emissions in accordance with this chapter.

(3) No owner or operator of a CAIR NOX unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NOX mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with this chapter.

(4) No owner or operator of a CAIR NOX unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under §96.106 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the permitting authority for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

(iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with §96.171(d)(3)(i).

(e) Long-term cold storage. The owner or operator of a CAIR NOX unit is subject to the applicable provisions of part 75 of this chapter concerning units in long-term cold storage.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25384, Apr. 28, 2006]
Environmental Protection Agency § 96.171

excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the procedures in paragraph (e) or (f) of this section respectively.

(1) Requirements for initial certification. The owner or operator shall ensure that each continuous monitoring system under §96.170(a)(1)(including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §96.170(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §96.170(a)(1) that may significantly affect the ability of the system to accurately measure or record NO\textsubscript{X} mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20 of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit's operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system, and any excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter, under §96.170(a)(1) are subject to the recertification requirements in §75.20(g)(6) of this chapter.

(3) Approval process for initial certification and recertification. Paragraphs (d)(3)(i) through (iv) of this section apply to both initial certification and recertification of a continuous monitoring system under §96.170(a)(1). For recertifications, replace the words “certification” and “initial certification” with the word “recertification”, replace the word “certified” with the word “recertified,” and follow the procedures in §§75.20(b)(5) and (g)(7) of this chapter in lieu of the procedures in paragraph (d)(3)(v) of this section.

(i) Notification of certification. The CAIR designated representative shall submit to the permitting authority, the appropriate EPA Regional Office, and the Administrator written notice of the dates of certification testing, in accordance with §96.173.

(ii) Certification application. The CAIR designated representative shall submit to the permitting authority a certification application for each monitoring system. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CAIR NO\textsubscript{X} Annual Trading Program for a period not to exceed 120 days after receipt by the permitting authority of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the permitting authority does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the permitting authority.

(iv) Certification application approval process. The permitting authority will issue a written notice of approval or
disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the permitting authority does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CAIR NO\textsubscript{X} Annual Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the permitting authority will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the permitting authority will issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the permitting authority may issue a notice of disapproval under paragraph (d)(3)(iv)(C) of this section. The 120-day review period shall not begin before receipt of a complete certification application.

(C) Disapproval notice. If the certification application shows that any monitoring system does not meet the specified date and hour specified under §75.20(a)(3) of this chapter). The owner or operator shall follow the procedures for disapproval of the certification status of a monitor in accordance with §96.172(b).

(v) Procedures for loss of certification. If the permitting authority or the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under §75.20(a)(4)(iii), §75.20(g)(7), or §75.21(e) of this chapter and continuing until the applicable date and hour specified under §75.20(a)(5)(i) or (g)(7) of this chapter:

1. For a disapproved NO\textsubscript{X} emission rate (i.e., NO\textsubscript{X}-diluent) system, the maximum potential NO\textsubscript{X} emission rate, as defined in §72.2 of this chapter.

2. For a disapproved NO\textsubscript{X} pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential NO\textsubscript{X} emission rate, as defined in sections 2.1.2.1 and 2.1.4.1 of appendix A to part 75 of this chapter.

3. For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO\textsubscript{2} concentration or the minimum potential O\textsubscript{2} concentration (as applicable), as defined in sections 2.1.5, 2.1.3.1, and 2.1.3.2 of appendix A to part 75 of this chapter.

4. For a disapproved fuel flowmeter system, the maximum potential fuel...
flow rate, as defined in section 2.4.2.1 of appendix D to part 75 of this chapter. 

(5) For a disapproved excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter, the fuel-specific maximum potential NO\textsubscript{X} emission rate, as defined in §72.2 of this chapter.

(B) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (d)(3)(i) and (ii) of this section.

(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the permitting authority's or the Administrator's notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(e) Initial certification and recertification procedures for units using the low mass emission excepted methodology under §75.19 of this chapter. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under §75.19 of this chapter shall meet the applicable certification and recertification requirements in §§75.19(a)(2) and 75.20(h) of this chapter. If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in §75.20(g) of this chapter.

(f) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator and, if applicable, the permitting authority under subpart E of part 75 of this chapter shall meet all applicable notification and application procedures of §75.20(f) of this chapter.

(70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006)

§ 96.172 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D or subpart H of, or appendix D or appendix E to, part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §96.171 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the permitting authority or, for a CAIR NO\textsubscript{X} opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the permitting authority or the Administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in §96.171 for each disapproved monitoring system.

§ 96.173 Notifications.

The CAIR designated representative for a CAIR NO\textsubscript{X} unit shall submit written notice to the permitting authority and the Administrator in accordance with §75.61 of this chapter.

(70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006)
§ 96.174 Recordkeeping and reporting.

(a) General provisions. The CAIR designated representative shall comply with all recordkeeping and reporting requirements in this section, the applicable recordkeeping and reporting requirements under §75.73 of this chapter, and the requirements of §96.110(e)(1).

(b) Monitoring Plans. The owner or operator of a CAIR NO\textsubscript{X} unit shall comply with requirements of §75.73(c) and (e) of this chapter and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, §§96.183 and 96.184(a).

(c) Certification Applications. The CAIR designated representative shall submit an application to the permitting authority within 45 days after completing all initial certification or recertification tests required under §96.171, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

(i) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering January 1, 2008 through March 31, 2008;

(ii) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §96.170(b), unless that quarter is the third or fourth quarter of 2007, in which case reporting shall commence in the quarter covering January 1, 2008 through March 31, 2008;

(iii) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, the calendar quarter corresponding to the date on which the CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program as provided in §96.184(g).

(iv) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a CAIR NO\textsubscript{X} opt-in unit under subpart II of this part, the calendar quarter corresponding to the date on which the CAIR NO\textsubscript{X} Annual Trading Program as provided in §96.184(g).

(2) The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.73(f) of this chapter.

(3) For CAIR NO\textsubscript{X} units that are also subject to an Acid Rain emissions limitation or the CAIR NO\textsubscript{X} Ozone Season Trading Program, CAIR SO\textsubscript{2} Trading Program, or Hg Budget Trading Program, quarterly reports shall include the applicable data and information required by subparts F through I of part 75 of this chapter as applicable, in addition to the NO\textsubscript{X} mass emission data, heat input data, and other information required by this subpart.

(e) Compliance certification. The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications; and

(2) For a unit with add-on NO\textsubscript{X} emission controls and for all hours where NO\textsubscript{X} data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate NO\textsubscript{X} emissions.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006]
§ 96.175 Petitions.
(a) Except as provided in paragraph (b)(2) of this section, the CAIR designated representative of a CAIR NO\textsubscript{X} unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by the Administrator.

(b)(1) The CAIR designated representative of a CAIR NO\textsubscript{X} unit that is not subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the permitting authority and the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by the permitting authority and the Administrator.

(2) The CAIR designated representative of a CAIR NO\textsubscript{X} unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the permitting authority and the Administrator requesting approval to apply an alternative to any requirement concerning any additional continuous emission monitoring system required under §75.72 of this chapter. Application of an alternative to any such requirement is in accordance with this subpart only to the extent that the petition is approved in writing by both the permitting authority and the Administrator.

Subpart II—CAIR NO\textsubscript{X} Opt-in Units

Source: 70 FR 25339, May 12, 2005, unless otherwise noted.

§ 96.180 Applicability.
A CAIR NO\textsubscript{X} opt-in unit must be a unit that:
(a) Is located in the State;
(b) Is not a CAIR NO\textsubscript{X} unit under §96.104 and is not covered by a retired unit exemption under §96.105 that is in effect;
(c) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;
(d) Has or is required or qualified to have a title V operating permit or other federally enforceable permit; and
(e) Vents all of its emissions to a stack and can meet the monitoring, recordkeeping, and reporting requirements of subpart HH of this part.

§ 96.181 General.
(a) Except as otherwise provided in §§96.101 through 96.104, §§96.106 through 96.108, and subparts BB and CC and subparts FF through HH of this part, a CAIR NO\textsubscript{X} opt-in unit shall be treated as a CAIR NO\textsubscript{X} unit for purposes of applying such sections and subparts of this part.

(b) Solely for purposes of applying, as provided in this subpart, the requirements of subpart HH of this part to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, such unit shall be treated as a CAIR NO\textsubscript{X} unit before issuance of a CAIR opt-in permit for such unit.

§ 96.182 CAIR designated representative.
Any CAIR NO\textsubscript{X} opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, located at the same source as one or more CAIR NO\textsubscript{X} units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR NO\textsubscript{X} units.

§ 96.183 Applying for CAIR opt-in permit.
(a) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR NO\textsubscript{X} opt-in unit in §96.180 may apply for an initial CAIR opt-in permit at any time, except as provided under §96.186(f) and (g), and, in order to apply, must submit the following:
(1) A complete CAIR permit application under §96.122;
(2) A certification, in a format specified by the permitting authority, that the unit:
   (i) Is not a CAIR NO\textsubscript{X} unit under §96.104 and is not covered by a retired unit exemption under §96.105 that is in effect;
   (ii) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;
   (iii) Vents all of its emissions to a stack, and
   (iv) Has documented heat input for more than 876 hours during the 6 months immediately preceding submission of the CAIR permit application under §96.122;

(3) A monitoring plan in accordance with subpart HH of this part;
(4) A complete certificate of representation under §96.113 consistent with §96.182, if no CAIR designated representative has been previously designated for the source that includes the unit; and
(5) A statement, in a format specified by the permitting authority, whether the CAIR designated representative for the CAIR NO\textsubscript{X} opt-in unit requests that the unit be allocated CAIR NO\textsubscript{X} allowances under §96.188(b) or §96.188(c) (subject to the conditions in §§96.194(h) and 96.186(g)). If allocation under §96.188(c) is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(b) Duty to reapply. (1) The CAIR designated representative of a CAIR NO\textsubscript{X} opt-in unit shall submit a complete CAIR permit application under §96.122 to renew the CAIR opt-in unit permit in accordance with the permitting authority’s regulations for title V operating permits, or the permitting authority’s regulations for other federally enforceable permits if applicable, addressing permit renewal.

(2) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR NO\textsubscript{X} opt-in unit from the CAIR NO\textsubscript{X} Annual Trading Program in accordance with §96.186 or the unit becomes a CAIR NO\textsubscript{X} unit under §96.104, the CAIR NO\textsubscript{X} opt-in unit shall remain subject to the requirements for a CAIR NO\textsubscript{X} opt-in unit, even if the CAIR designated representative for the CAIR NO\textsubscript{X} opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (b)(1) of this section.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006]
Baseline heat input. The unit's baseline heat input shall equal:

1. If the unit's NOx emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1)(i) of this section, the unit's total heat input (in mmBtu) for the control period; or

2. If the unit's NOx emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1)(ii) and (2) of this section, the average of the amounts of the unit's total heat input (in mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section.

Baseline NOx emission rate. The unit's baseline NOx emission rate shall equal:

1. If the unit's NOx emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit's NOx emissions rate (in lb/mmBtu) for the control period; or

2. If the unit's NOx emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, the average of the amounts of the unit's NOx emissions rate (in lb/mmBtu) for the control periods during which the unit has add-on NOx emission controls.

Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline NOx emissions rate for the unit under paragraphs (c) and (d) of this section and if the permitting authority determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR NOx opt-in unit in §96.180 and meets the elements certified in §96.183(a)(2), the permitting authority will issue a CAIR opt-in permit. The permitting authority will provide a copy of the CAIR opt-in permit to the Administrator, who will then establish a compliance account for the source that includes the CAIR NOx opt-in unit unless the source already has a compliance account.

Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (a) through (e) of this section, if at any time before issuance of a CAIR opt-in permit for the unit, the permitting authority determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR NOx opt-in unit in §96.180 or meets the elements certified in §96.183(a)(2), the permitting authority will issue a denial of a CAIR opt-in permit for the unit.

Date of entry into CAIR NOx Annual Trading Program. A unit for which an initial CAIR opt-in permit is issued by the permitting authority shall become a CAIR NOx opt-in unit, and a CAIR NOx unit, as of the later of January 1, 2009 or January 1 of the first control period during which such CAIR opt-in permit is issued.

Repowered CAIR NOx opt-in unit. (1) If CAIR designated representative...
requests, and the permitting authority issues a CAIR opt-in permit providing for, allocation to a CAIR NO\textsubscript{X} opt-in unit of CAIR NO\textsubscript{X} allowances under §96.188(c) and such unit is repowered after its date of entry into the CAIR NO\textsubscript{X} Annual Trading Program under paragraph (g) of this section, the repowered unit shall be treated as a CAIR NO\textsubscript{X} opt-in unit replacing the original CAIR NO\textsubscript{X} opt-in unit, as of the date of start-up of the repowered unit’s combustion chamber.

(2) Notwithstanding paragraphs (c) and (d) of this section, as of the date of start-up under paragraph (h)(1) of this section, the repowered unit shall be deemed to have the same date of commencement of operation, date of commencement of commercial operation, baseline heat input, and baseline NO\textsubscript{X} emission rate as the original CAIR NO\textsubscript{X} opt-in unit, and the original CAIR NO\textsubscript{X} opt-in unit shall no longer be treated as a CAIR NO\textsubscript{X} opt-in unit or a CAIR NO\textsubscript{X} unit.

§ 96.186 Withdrawal from CAIR NO\textsubscript{X} Annual Trading Program.

Except as provided under paragraph (g) of this section, a CAIR NO\textsubscript{X} opt-in unit may withdraw from the CAIR NO\textsubscript{X} Annual Trading Program, but only if the permitting authority issues a notification to the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit of the acceptance of the withdrawal of the CAIR NO\textsubscript{X} opt-in unit in accordance with paragraph (d) of this section.

(a) Requesting withdrawal. In order to withdraw a CAIR NO\textsubscript{X} opt-in unit from the CAIR NO\textsubscript{X} Annual Trading Program, the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit shall submit to the permitting authority a request to withdraw effective as of midnight of December 31 of a specified calendar year, which date must be at least 4 years after December 31 of the year of entry into the CAIR NO\textsubscript{X} Annual Trading Program under §96.184(g). The request must be submitted no later than 90 days before the requested effective date of withdrawal.

(b) Conditions for withdrawal. Before a CAIR NO\textsubscript{X} opt-in unit covered by a request under paragraph (a) of this section may withdraw from the CAIR NO\textsubscript{X} Annual Trading Program and the CAIR opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

(1) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR NO\textsubscript{X} opt-in unit must meet the requirements of §96.187.

(b) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under §96.102 and, upon recordation by the Administrator under subpart FF or GG of this part or this subpart, every allocation, transfer, or deduction of CAIR NO\textsubscript{X} allowances to or from the compliance account of the source that includes a CAIR NO\textsubscript{X} opt-in unit covered by the CAIR opt-in permit.

(c) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NO\textsubscript{X} opt-in unit is located and in a Title V operating permit or other federally enforceable permit for the source.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006]

§ 96.185 CAIR opt-in permit contents.

(a) Each CAIR opt-in permit will contain:

(1) All elements required for a complete CAIR permit application under §96.122;

(2) The certification in §96.183(a)(2);

(3) The unit’s baseline heat input under §96.184(c);

(4) The unit’s baseline NO\textsubscript{X} emission rate under §96.184(d);

(5) A statement whether the unit is to be allocated CAIR NO\textsubscript{X} allowances §96.188(b) or §96.188(c) (subject to the conditions in §§96.184(h) and 96.186(g));

(6) A statement that the unit may withdraw from the CAIR NO\textsubscript{X} Annual Trading Program only in accordance with §96.186; and

(7) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of §96.187.

(b) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under §96.102 and, upon recordation by the Administrator under subpart FF or GG of this part or this subpart, every allocation, transfer, or deduction of CAIR NO\textsubscript{X} allowances to or from the compliance account of the source that includes a CAIR NO\textsubscript{X} opt-in unit covered by the CAIR opt-in permit.

(c) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NO\textsubscript{X} opt-in unit is located and in a Title V operating permit or other federally enforceable permit for the source.

[70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006]
Environmental Protection Agency

§ 96.187

(2) After the requirement for withdrawal under paragraph (b)(1) of this section is met, the Administrator will deduct from the compliance account of the source that includes the CAIR NOX opt-in unit CAIR NOX allowances equal in amount to and allocated for the same or a prior control period as any CAIR NOX allowances allocated to the CAIR NOX opt-in unit under §96.188 for any control period for which the withdrawal is to be effective. If there are no remaining CAIR NOX units at the source, the Administrator will close the compliance account, and the owners and operators of the CAIR NOX opt-in unit may submit a CAIR NOX allowance transfer for any remaining CAIR NOX allowances to another CAIR NOX Allowance Tracking System in accordance with subpart GG of this part.

(c) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of CAIR NOX allowances required), the permitting authority will issue a notification to the CAIR designated representative of the CAIR NOX opt-in unit of the acceptance of the withdrawal of the CAIR NOX opt-in unit as of midnight on December 31 of the calendar year for which the withdrawal was requested.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the CAIR designated representative of the CAIR NOX opt-in unit that the CAIR NOX opt-in unit’s request to withdraw is denied. Such CAIR NOX opt-in unit shall continue to be a CAIR NOX opt-in unit.

(d) Permit amendment. After the permitting authority issues a notification under paragraph (c)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the CAIR permit covering the CAIR NOX opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (c)(1) of this section. The unit shall continue to be a CAIR NOX opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR NOX Annual Trading Program concerning any control periods for which the unit is a CAIR NOX opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(e) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the CAIR NOX opt-in unit’s request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(f) Ability to reapply to the CAIR NOX Annual Trading Program. Once a CAIR NOX opt-in unit withdraws from the CAIR NOX Annual Trading Program and its CAIR opt-in permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under §96.183 for such CAIR NOX opt-in unit before the date that is 4 years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit will be treated as an initial application for a CAIR opt-in permit under §96.184.

(g) Inability to withdraw. Notwithstanding paragraphs (a) through (f) of this section, a CAIR NOX opt-in unit shall not be eligible to withdraw from the CAIR NOX Annual Trading Program if the CAIR designated representative of the CAIR NOX opt-in unit requests, and the permitting authority issues a CAIR NOX opt-in permit providing for, allocation to the CAIR NOX opt-in unit of CAIR NOX allowances under §96.188(c).

[70 FR 25339, May 12, 2005, as amended at 71 FR 25385, Apr. 28, 2006]

§ 96.187 Change in regulatory status.

(a) Notification. If a CAIR NOX opt-in unit becomes a CAIR NOX unit under §96.104, then the CAIR designated representative shall notify in writing the permitting authority and the Administrator of such change in the CAIR NOX opt-in unit’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s actions. (1) If a CAIR NOX opt-in unit becomes a CAIR NOX unit under §96.104, the permitting authority will revise the CAIR NOX opt-in unit’s CAIR opt-in permit to meet the requirements.
§ 96.188 CAIR NOX allowance allocations to CAIR NOX opt-in units.

(a) Timing requirements. (1) When the CAIR opt-in permit is issued under §96.184(e), the permitting authority will allocate CAIR NOX allowances to the CAIR NOX opt-in unit, and submit to the Administrator the allocation for the control period in which a CAIR NOX opt-in unit enters the CAIR NOX Annual Trading Program under §96.184(g), in accordance with paragraph (b) or (c) of this section.

(2) By no later than October 31 of the control period after the control period in which a CAIR NOX opt-in unit enters the CAIR NOX Annual Trading Program under §96.184(g) and October 31 of each year thereafter, the permitting authority will allocate CAIR NOX allowances to the CAIR NOX opt-in unit, and submit to the Administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR NOX opt-in unit, in accordance with paragraph (b) or (c) of this section.

(b) Calculation of allocation. For each control period for which a CAIR NOX opt-in unit is to be allocated CAIR NOX allowances, the permitting authority will allocate in accordance with the following procedures:

(1) The heat input (in mmBtu) used for calculating the CAIR NOX allowance allocation will be the lesser of:

(i) The CAIR NOX opt-in unit’s baseline heat input determined under §96.184(c); or

(ii) The CAIR NOX opt-in unit’s heat input, as determined in accordance with subpart HH of this part, for the
Environmental Protection Agency

§ 96.188

immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program under §96.184(g).

(2) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} allowance allocations will be the lesser of:

(i) The CAIR NO\textsubscript{X} opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §96.184(d) and multiplied by 70 percent; or

(ii) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} allowances are to be allocated.

(3) The permitting authority will allocate CAIR NO\textsubscript{X} allowances to the CAIR NO\textsubscript{X} opt-in unit in an amount equaling the heat input under paragraph (b)(1) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (b)(2) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(c) Notwithstanding paragraph (b) of this section and if the CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under §96.183(a)(5)) providing for, allocation to a CAIR NO\textsubscript{X} opt-in unit of CAIR NO\textsubscript{X} allowances under this paragraph (subject to the conditions in §§96.184(h) and 96.186(g)), the permitting authority will allocate to the CAIR NO\textsubscript{X} opt-in unit as follows:

(1) For each control period in 2009 through 2014 for which the CAIR NO\textsubscript{X} opt-in unit is to be allocated CAIR NO\textsubscript{X} allowances,

(i) The heat input (in mmBtu) used for calculating CAIR NO\textsubscript{X} allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} allowance allocations will be the lesser of:

(A) The CAIR NO\textsubscript{X} opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §96.184(d); or

(B) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} opt-in unit at any time during the control period in which the CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program under §96.184(g).

(iii) The permitting authority will allocate CAIR NO\textsubscript{X} allowances to the CAIR NO\textsubscript{X} opt-in unit in an amount equaling the heat input under paragraph (c)(1)(i) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (c)(1)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(2) For each control period in 2015 and thereafter for which the CAIR NO\textsubscript{X} opt-in unit is to be allocated CAIR NO\textsubscript{X} allowances,

(i) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating the CAIR NO\textsubscript{X} allowance allocation will be the lesser of:

(A) 0.15 lb/mmBtu;

(B) The CAIR NO\textsubscript{X} opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §96.184(d); or

(C) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} allowances are to be allocated.

(iii) The permitting authority will allocate CAIR NO\textsubscript{X} allowances to the CAIR NO\textsubscript{X} opt-in unit in an amount equaling the heat input under paragraph (c)(2)(i) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (c)(2)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(d) Recordation. (1) The Administrator will record, in the compliance account of the source that includes the CAIR NO\textsubscript{X} opt-in unit, the CAIR NO\textsubscript{X} allowances allocated by the permitting authority to the CAIR NO\textsubscript{X} opt-in unit under paragraph (a)(1) of this section.

(2) By December 1 of the control period in which a CAIR NO\textsubscript{X} opt-in unit
§ 96.201 Purpose.

This subpart and subparts BBB through III establish the model rule comprising general provisions and the designated representative, permitting, allowance, monitoring, and opt-in provisions for the State Clean Air Interstate Rule (CAIR) SO₂ Trading Program, under section 110 of the Clean Air Act and § 51.124 of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide. The owner or operator of a unit or a source shall comply with the requirements of this subpart and subparts BBB through III as a matter of federal law only if the State with jurisdiction over the unit and the source incorporates by reference such subparts or otherwise adopts the requirements of such subparts in accordance with §51.124(o)(1) or (2) of this chapter, the State submits to the Administrator one or more revisions of the State implementation plan that include such adoption, and the Administrator approves such revisions. If the State adopts the requirements of such subparts in accordance with §51.124(o)(1) or (2) of this chapter, then the State authorizes the Administrator to assist the State in implementing the CAIR SO₂ Trading Program by carrying out the functions set forth for the Administrator in such subparts.

§ 96.202 Definitions.

The terms used in this subpart and subparts BBB through III shall have the meanings set forth in this section as follows:

Account number means the identification number given by the Administrator to each CAIR SO₂ Allowance Tracking System account.

Acid Rain emissions limitation means a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program.

Acid Rain Program means a multi-state sulfur dioxide and nitrogen oxides air pollution control and emission reduction program established by the Administrator under title IV of the CAA and parts 72 through 78 of this chapter.

Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

Allocate or allocation means, with regard to CAIR SO₂ allowances issued under the Acid Rain Program, the determination by the Administrator of the amount of such CAIR SO₂ allowances to be initially credited to a CAIR SO₂ unit or other entity and, with regard to CAIR SO₂ allowances issued under provisions of a State implementation plan that are approved under §51.124(o)(1) or (2) or (r) of this chapter or §97.288 of this chapter, the determination by a permitting authority of the amount of such CAIR SO₂ allowances to be initially credited to a CAIR SO₂ unit or other entity.

Allowance transfer deadline means, for a control period, midnight of March 1 (if it is a business day), or midnight of the first business day thereafter (if March 1 is not a business day), immediately following the control period and is the deadline by which a CAIR SO₂ source’s compliance account in order to be used to meet the source’s CAIR SO₂ emissions limitation for such control period in accordance with §96.254.

Alternate CAIR designated representative means, for a CAIR SO₂ source and each CAIR SO₂ unit at the source, the natural person who is authorized by the owners and operators of the source...
and all such units at the source, in accordance with subparts BBB and III of this part, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR SO\textsubscript{2} Trading Program. If the CAIR SO\textsubscript{2} source is also a CAIR NO\textsubscript{X} source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR SO\textsubscript{2} source is also a CAIR NO\textsubscript{X} Ozone Season source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO\textsubscript{X} Ozone Season Trading Program. If the CAIR SO\textsubscript{2} source is also subject to the Acid Rain Program, then this natural person shall be the same person as the alternate CAIR designated representative under the Acid Rain Program. If the CAIR SO\textsubscript{2} source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the alternate designated representative under the Hg Budget Trading Program.

Automated data acquisition and handling system or DAHS means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under subpart HHH of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart HHH of this part.

Biomass means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is;

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

(ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

CAIR authorized account representative means, with regard to a general account, a responsible natural person who is authorized, in accordance with subparts BBB, FFF, and III of this part, to transfer and otherwise dispose of CAIR SO\textsubscript{2} allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.

CAIR designated representative means, for a CAIR SO\textsubscript{2} source and each CAIR SO\textsubscript{2} unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBB and III of this part, to represent and legally bind each owner and operator in matters pertaining to the CAIR SO\textsubscript{2} Trading Program. If the CAIR SO\textsubscript{2} source is also a CAIR NO\textsubscript{X} source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR SO\textsubscript{2} source is also a CAIR NO\textsubscript{X} Ozone Season source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO\textsubscript{X} Ozone Season Trading Program. If the CAIR SO\textsubscript{2} source is also subject to the Acid Rain Program, then this natural person shall be the same person as the designated representative under the Acid Rain Program. If the CAIR SO\textsubscript{2} source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the designated representative under the Hg Budget Trading Program.
shall be the same person as the Hg designated representative under the Hg Budget Trading Program.

CAIR NO \times Annual Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AA through II of this part and §51.123(o)(1) or (2) of this chapter or established by the Administrator in accordance with subparts AA through II of part 97 of this chapter and §§51.123(p) and 52.35 of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

CAIR NO \times Ozone Season source means a source that includes one or more CAIR NO \times Ozone Season units.

CAIR NO \times Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AAAA through IIII of this part and §51.123(aa)(1) or (2) (and (bb)(1)), (bb)(2), or (dd) of this chapter or established by the Administrator in accordance with subparts AA through II of part 97 of this chapter and §§51.123(p) and 52.35 of this chapter, as a means of mitigating interstate transport of ozone and nitrogen oxides.

CAIR NO \times source means a source that is subject to the CAIR NO \times Ozone Season Trading Program.

CAIR permit means the legally binding and federally enforcable written document, or portion of such document, issued by the permitting authority under subpart CCC of this part, including any permit revisions, specifying the CAIR SO \times Trading Program requirements applicable to a CAIR SO \times source, to each CAIR SO \times unit at the source, and to the owners and operators and the CAIR designated representative of the source and each such unit.

CAIR SO \times allowance means a limited authorization issued by the Administrator under the Acid Rain Program, or by a permitting authority under provisions of a State implementation plan that are approved under §51.124(o)(1) or (2) or (r) of this chapter or §97.288 of this chapter, by designating the last sentence of the definition as paragraph (4), and by revising in paragraph (4) the words "(Program or under the provisions of a State implementation plan that is approved under §51.124(o)(1) or (2) of this chapter" to read "(Program, provisions of a State implementation plan that are approved under §51.124(o)(1) or (2) or (r) of this chapter, or §97.288 of this chapter, to emit sulfur dioxide during the control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR SO \times Trading Program as follows:

1. For one CAIR SO \times allowance allocated for a control period in a year before 2010, one ton of sulfur dioxide, except as provided in §96.254(b); and
2. For one CAIR SO \times allowance allocated for a control period in 2010 through 2014, 0.50 ton of sulfur dioxide, except as provided in §96.254(b); and
3. For one CAIR SO \times allowance allocated for a control period in 2015 or later, 0.35 ton of sulfur dioxide, except as provided in §96.254(b).

An authorization to emit sulfur dioxide that is not issued under the Acid Rain Program or under the provisions of a State implementation plan that is approved under §51.124(o)(1) or (2) of this chapter shall not be a CAIR SO \times allowance.

CAIR SO \times allowance deduction or deduct CAIR SO \times allowances means the permanent withdrawal of CAIR SO \times allowances by the Administrator from a compliance account, e.g., in order to account for a specified number of tons of total sulfur dioxide emissions from all CAIR SO \times units at a CAIR SO \times source for a control period, determined in accordance with subpart HHH of this part, or to account for excess emissions.

CAIR SO \times Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of CAIR SO \times allowances under the CAIR SO \times Trading Program. This is the same system as the Allowance Tracking System under §72.2 of this chapter by which the Administrator records allocations, deduction, and transfers of Acid Rain SO \times allowances under the Acid Rain Program.

CAIR SO \times Allowance Tracking System account means an account in the CAIR
SO\(_2\) Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR SO\(_2\) allowances. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.

CAIR SO\(_2\) allowances held or held CAIR SO\(_2\) allowances means the CAIR SO\(_2\) allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts FFF, GGG, and III of this part or part 73 of this chapter, in a CAIR SO\(_2\) Allowance Tracking System account.

CAIR SO\(_2\) emissions limitation means, for a CAIR SO\(_2\) source, the tonnage equivalent, in SO\(_2\) emissions in a control period, of the CAIR SO\(_2\) allowances available for deduction for the source under §96.254(a) and (b) for the control period.

CAIR SO\(_2\) source means a source that includes one or more CAIR SO\(_2\) units.

CAIR SO\(_2\) Trading Program means a multi-state sulfur dioxide air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AAA through III of this part and §51.124(o)(1) or (2) of this chapter or established by the Administrator in accordance with subparts AAA through III of part 97 of this chapter and §§51.124(r) and 52.36 of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.

CAIR SO\(_2\) unit means a unit that is subject to the CAIR SO\(_2\) Trading Program under §96.204 and, except for purposes of §96.205, a CAIR SO\(_2\) opt-in unit under subpart III of this part.

Clean Air Act or CAA means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Coal-fired meanscombusting any amount of coal or coal-derived fuel, alone, or in combination with any amount of any other fuel.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:

1. Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and
2. Producing during the 12-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity—

   (i) For a topping-cycle cogeneration unit,

   (A) Useful thermal energy not less than 5 percent of total energy output; and
   (B) Useful power that, when added to one-half of useful thermal energy produced, is not less then 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.
   (ii) For a bottoming-cycle cogeneration unit, useful power not less than 45 percent of total energy input;
3. Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit's total energy input from all fuel except biomass if the unit is a boiler.

Combustion turbine means:

1. An enclosed device comprising a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and
2. If the enclosed device under paragraph (1) of this definition is combined cycle, any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

1. To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §96.205 and §96.284(h).
2. For a unit that is a CAIR SO\(_2\) unit under §96.204 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in
paragraph (1) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CAIR SO\(_2\) unit under §96.204 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §96.205, for a unit that is not a CAIR SO\(_2\) unit under §96.204 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CAIR SO\(_2\) unit under §96.204.

(i) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Commence operation means:

(1) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber, except as provided in §96.284(h).

(2) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the date of commencement of operation of the unit, which shall continue to be treated as the same unit.

(3) For a unit that is replaced by a unit at the same source (e.g., repowered) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the replaced unit’s date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1), (2), or (3) of this definition as appropriate, except as provided in §96.284(h).

Compliance account means a CAIR SO\(_2\) Allowance Tracking System account, established by the Administrator for a CAIR SO\(_2\) source subject to an Acid Rain emissions limitations under §73.31(a) or (b) of this chapter or for any other CAIR SO\(_2\) source under subpart FFF or III of this part, in which any CAIR SO\(_2\) allocations for the CAIR SO\(_2\) units at the source are initially recorded and in which are held any CAIR SO\(_2\) allowances available for use for a control period in order to meet the source’s CAIR SO\(_2\) emissions limitation in accordance with §96.254.

Continuous emission monitoring system or CEMS means the equipment required under subpart HHH of this part to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of sulfur dioxide emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with part 75 of this chapter. The following systems are the principal types of continuous emission monitoring systems required under subpart HHH of this part:
(1) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

(2) A sulfur dioxide monitoring system, consisting of a SO$_2$ pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of SO$_2$ emissions, in parts per million (ppm);

(3) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H$_2$O;

(4) A carbon dioxide monitoring system, consisting of a CO$_2$ pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO$_2$ concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO$_2$ emissions, in percent CO$_2$; and

(5) An oxygen monitoring system, consisting of an O$_2$ concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O$_2$ in percent O$_2$.

Control period means the period beginning January 1 of a calendar year, except as provided in §96.206(c)(2), and ending on December 31 of the same year, inclusive.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the CAIR designated representative and as determined by the Administrator in accordance with subpart HHH of this part.

Excess emissions means any ton, or portion of a ton, of sulfur dioxide emitted by the CAIR SO$_2$ units at a CAIR SO$_2$ source during a control period that exceeds the CAIR SO$_2$ emissions limitation for the source, provided that any portion of a ton of excess emissions shall be treated as one ton of excess emissions.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in any calendar year.

General account means a CAIR SO$_2$ Allowance Tracking System account, established under subpart FFF of this part, that is not a compliance account.

Generator means a device that produces electricity.

Heat input means, with regard to a specified period of time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the CAIR designated representative and determined by the Administrator in accordance with subpart HHH of this part and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Hg Budget Trading Program means a multi-state Hg air pollution control and emission reduction program approved and administered by the Administrator in accordance with §60.24(h)(6), or established by the Administrator under section 111 of the Clean Air Act, as a means of reducing national Hg emissions.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit's total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or
(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the maximum amount of fuel per hour (in Btu/hr) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

Monitoring system means any monitoring system that meets the requirements of subpart HHH of this part, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Most stringent State or Federal SO\textsubscript{2} emissions limitation means, with regard to a unit, the lowest SO\textsubscript{2} emissions limitation (in terms of lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

Nameplate capacity means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.

Operator means any person who operates, controls, or supervises a CAIR SO\textsubscript{2} unit or a CAIR SO\textsubscript{2} source and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

Owner means any of the following persons:

1. With regard to a CAIR SO\textsubscript{2} source or a CAIR SO\textsubscript{2} unit at a source, respectively:
   1. Any holder of any portion of the legal or equitable title in a CAIR SO\textsubscript{2} unit at the source or the CAIR SO\textsubscript{2} unit;
   2. Any holder of a leasehold interest in a CAIR SO\textsubscript{2} unit at the source or the CAIR SO\textsubscript{2} unit; or
   3. Any purchaser of power from a CAIR SO\textsubscript{2} unit at the source or the CAIR SO\textsubscript{2} unit under a life-of-the-unit, firm power contractual arrangement; provided that, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CAIR SO\textsubscript{2} unit; or

2. With regard to any general account, any person who has an ownership interest with respect to the CAIR SO\textsubscript{2} allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to represent the person’s ownership interest with respect to CAIR SO\textsubscript{2} allowances.

Permitting authority means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the CAIR SO\textsubscript{2} Trading Program or, if no such agency has been so authorized, the Administrator.

Potential electrical output capacity means 33 percent of a unit’s maximum design heat input, divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

Receive or receipt of means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence,
Environmental Protection Agency § 96.202

by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CAIR SO₂ allowances, the movement of CAIR SO₂ allowances by the Administrator into or between CAIR SO₂ Allowance Tracking System accounts, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shutdown unit (the replaced unit).

Repowered means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:

1. Atmospheric or pressurized fluidized bed combustion;
2. Integrated gasification combined cycle;
3. Magnetohydrodynamics;
4. Direct and indirect coal-fired turbines;
5. Integrated gasification fuel cells; or
6. As determined by the Administrator in consultation with the Secretary of Energy, a derivative of one or more of the technologies under paragraphs (1) through (5) of this definition and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.

Serial number means, for a CAIR SO₂ allowance, the unique identification number assigned to each CAIR SO₂ allowance by the Administrator.

Sequential use of energy means:

1. For a topping-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.
2. For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of section 502(c) of the Clean Air Act, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the States or the District of Columbia that adopts the CAIR SO₂ Trading Program pursuant to §51.124 (o)(1) or (2) of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

1. In person;
2. By United States Postal Service; or
3. By other means of dispatch or transmission and delivery. Compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

Ton means 2,000 pounds. For the purpose of determining compliance with the CAIR SO₂ emissions limitation, total tons of sulfur dioxide emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with subpart HHH of this part, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any
remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

*Topping-cycle cogeneration unit* means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

*Total energy input* means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[ \text{LHV} = \text{HHV} - 10.55(W + 9H) \]

Where:

- LHV = lower heating value of fuel in Btu/lb,
- HHV = higher heating value of fuel in Btu/lb,
- W = Weight % of moisture in fuel,
- H = Weight % of hydrogen in fuel.

*Total energy output* means, with regard to a cogeneration unit, the sum of useful power and useful thermal energy produced by the cogeneration unit.

*Unit* means a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device.

*Unit operating day* means a calendar day in which a unit combusts any fuel.

*Unit operating hour* or *hour of unit operation* means an hour in which a unit combusts any fuel.

*Useful power* means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

*Useful thermal energy* means, with regard to a cogeneration unit, thermal energy that is:

1. Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;
2. Used in a heating application (e.g., space heating or domestic hot water heating); or
3. Used in a space cooling application (i.e., thermal energy used by an absorption chiller).

*Utility power distribution system* means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

§ 96.203 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this subpart and subparts BBB through III are defined as follows:

- Btu—British thermal unit
- CO₂—carbon dioxide
- H₂O—water
- Hg—mercury
- hr—hour
- kW—kilowatt electrical
- kWh—kilowatt hour
- lb—pound
- mmBtu—million Btu
- MWe—megawatt electrical
- MWh—megawatt hour
- NOₓ—nitrogen oxides
- O₂—oxygen
- ppm—parts per million
- scfh—standard cubic feet per hour
- SO₂—sulfur dioxide
- yr—year

§ 96.204 Applicability.

(a) Except as provided in paragraph (b) of this section:

1. The following units in a State shall be CAIR SO₂ units, and any source that includes one or more such units shall be a CAIR SO₂ source, subject to the requirements of this subpart
and subparts BBB through HHH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CAIR SO\textsubscript{2} unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR SO\textsubscript{2} unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) The units in a State that meet the requirements set forth in paragraph (b)(1)(i), (b)(2)(i), or (b)(2)(ii) of this section shall not be CAIR SO\textsubscript{2} units:

(1)(i) Any unit that is a CAIR SO\textsubscript{2} unit under paragraph (a)(1) or (2) of this section:

(A) Qualifying as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit; and

(B) Not serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe supplying in any calendar year more than one-third of the unit’s potential electric output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(ii) If a unit qualifies as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and meets the requirements of paragraphs (b)(1)(i)(A) and (B) of this section commencing operation before January 1, 1985:

(A) Qualifying as a solid waste incineration unit; and

(B) With an average annual fuel consumption of non-fossil fuel for 1985–1987 exceeding 80 percent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any 3 consecutive calendar years after 1990 exceeding 80 percent (on a Btu basis).

(iii) If a unit qualifies as a solid waste incineration unit and meets the requirements of paragraph (b)(2)(i) or (ii) of this section for at least 3 consecutive calendar years, but subsequently no longer meets all such requirements, the unit shall become a CAIR SO\textsubscript{2} unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 1990 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more.

§ 96.205 Retired unit exemption.

(a)(1) Any CAIR SO\textsubscript{2} unit that is permanently retired and is not a CAIR SO\textsubscript{2} opt-in unit under subpart III of this part shall be exempt from the CAIR SO\textsubscript{2} Trading Program, except for the provisions of this section, §96.202, §96.203, §96.204, §96.206(c)(4) through (7), §96.207, §96.208, and subparts BBB, FFF, and GGG of this part.
(2) The exemption under paragraph (a)(1) of this section shall become effective the day on which the CAIR SO$_2$ unit is permanently retired. Within 30 days of the unit’s permanent retirement, the CAIR designated representative shall submit a statement to the permitting authority otherwise responsible for administering any CAIR permit for the unit and shall submit a copy of the statement to the Administrator. The statement shall state, in a format prescribed by the permitting authority, that the unit was permanently retired on a specific date and will comply with the requirements of paragraph (b) of this section.

(3) After receipt of the statement under paragraph (a)(2) of this section, the permitting authority will amend any permit under subpart CCC of this part covering the source at which the unit is located to add the provisions and requirements of the exemption under paragraphs (a)(1) and (b) of this section.

(b) Special provisions. (1) A unit exempt under paragraph (a) of this section shall not emit any sulfur dioxide, starting on the date that the exemption takes effect.

(2) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (a) of this section shall retain, at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(3) The owners and operators and, to the extent applicable, the CAIR designated representative of a unit exempt under paragraph (a) of this section shall comply with the requirements of the CAIR SO$_2$ Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(4) A unit exempt under paragraph (a) of this section and located at a source that is required, or but for this exemption would be required, to have a title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete CAIR permit application under §96.222 for the unit not less than 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2010 or the date on which the unit resumes operation.

(5) On the earlier of the following dates, a unit exempt under paragraph (a) of this section shall lose its exemption:

(i) The date on which the CAIR designated representative submits a CAIR permit application for the unit under paragraph (b)(4) of this section;

(ii) The date on which the CAIR designated representative is required under paragraph (b)(4) of this section to submit a CAIR permit application for the unit; or

(iii) The date on which the unit resumes operation, if the CAIR designated representative is not required to submit a CAIR permit application for the unit.

(6) For the purpose of applying monitoring, reporting, and recordkeeping requirements under subpart HHH of this part, a unit that loses its exemption under paragraph (a) of this section shall be treated as a unit that commences commercial operation on the first date on which the unit resumes operation.

§ §96.206 Standard requirements.

(a) Permit requirements. (1) The CAIR designated representative of each CAIR SO$_2$ source required to have a title V operating permit and each CAIR SO$_2$ unit required to have a title V operating permit at the source shall:

(i) Submit to the permitting authority a complete CAIR permit application under §96.222 in accordance with the deadlines specified in §96.221; and

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.

(2) The owners and operators of each CAIR SO$_2$ source required to have a
title V operating permit and each CAIR SO₂ unit required to have a title V operating permit at the source shall have a CAIR permit issued by the permitting authority under subpart CCC of this part for the source and operate the source and the unit in compliance with such CAIR permit.

(3) Except as provided in subpart III of this part, the owners and operators of a CAIR SO₂ source that is not otherwise required to have a title V operating permit and each CAIR SO₂ unit that is not otherwise required to have a title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under subpart CCC of this part for such CAIR SO₂ source and such CAIR SO₂ unit.

(b) Monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the CAIR designated representative, of each CAIR SO₂ source and each CAIR SO₂ unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of subpart HHH of this part.

(2) The emissions measurements recorded and reported in accordance with subpart HHH of this part shall be used to determine compliance by each CAIR SO₂ source with the CAIR SO₂ emissions limitation under paragraph (c) of this section.

(c) Sulfur dioxide emission requirements. (1) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR SO₂ source and each CAIR SO₂ unit at the source shall hold, in the source's compliance account, a tonnage equivalent in CAIR SO₂ allowances available for compliance deductions for the control period, as determined in accordance with §96.254(a) and (b), not less than the tons of total sulfur dioxide emissions for the control period from all CAIR SO₂ units at the source, as determined in accordance with subpart HHH of this part.

(2) A CAIR SO₂ unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of January 1, 2010 or the deadline for meeting the unit's monitor certification requirements under §96.276(b)(1), (2), or (5) and for each control period thereafter.

(3) A CAIR SO₂ allowance shall not be deducted, for compliance with the requirements under paragraph (e)(1) of this section, for a control period in which the CAIR SO₂ allowance was allocated.

(4) CAIR SO₂ allowances shall be held in, deducted from, or transferred into or among CAIR SO₂ Allowance Tracking System accounts in accordance with subparts FFF, GGG, and III of this part.

(5) A CAIR SO₂ allowance is a limited authorization to emit sulfur dioxide in accordance with the CAIR SO₂ Trading Program. No provision of the CAIR SO₂ Trading Program, the CAIR permit application, the CAIR permit, or an exemption under §96.205 and no provision of law shall be construed to limit the authority of the State or the United States to terminate or limit such authorization.

(6) A CAIR SO₂ allowance does not constitute a property right.

(7) Upon recordation by the Administrator under subpart FFF, GGG, or III of this part, every allocation, transfer, or deduction of a CAIR SO₂ allowance to or from a CAIR SO₂ source's compliance account is incorporated automatically in any CAIR permit of the source.

(d) Excess emissions requirements— If a CAIR SO₂ source emits sulfur dioxide during any control period in excess of the CAIR SO₂ emissions limitation, then:

(1) The owners and operators of the source and each CAIR SO₂ unit at the source shall surrender the CAIR SO₂ allowances required for deduction under §96.254(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable State law; and

(2) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart, the Clean Air Act, and applicable State law.

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the CAIR SO₂ source and each CAIR SO₂ unit at the source shall keep on site at
§ 96.207 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CAIR SO₂ Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CAIR SO₂ Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CAIR SO₂ Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

§ 96.208 Appeal procedures.

The appeal procedures for decisions of the Administrator under the CAIR SO₂ Trading Program are set forth in part 78 of this chapter.

Subpart BBB—CAIR Designated Representative for CAIR SO₂ Sources

Source: 70 FR 25362, May 12, 2005, unless otherwise noted.

§ 96.210 Authorization and responsibilities of CAIR designated representative.

(a) Except as provided under §96.211, each CAIR SO₂ source, including all CAIR SO₂ units at the source, shall have one and only one CAIR designated representative of a CAIR SO₂ unit shall also apply to the owners and operators of such unit.
§ 96.211 Alternate CAIR designated representative.

(a) A certificate of representation under §96.213 may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.

(b) Upon receipt by the Administrator of a complete certificate of representation under §96.213, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.

(c) Except in this section and §§96.202, 96.210(a) and (d), 96.212, 96.213, 96.215, 96.231, and 96.232, whenever the term “CAIR designated representative” is used in subparts AAA through III of this part, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25388, Apr. 28, 2006]
§ 96.212 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

(a) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §96.213. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR SO\textsubscript{2} source and the CAIR SO\textsubscript{2} units at the source.

(b) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §96.213. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR SO\textsubscript{2} source and the CAIR SO\textsubscript{2} units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CAIR SO\textsubscript{2} source or a CAIR SO\textsubscript{2} unit is not included in the list of owners and operators in the certificate of representation under §96.213, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the Administrator, or a court, as if the owner or operator were included in such list.

(2) Within 30 days following any change in the owners and operators of a CAIR SO\textsubscript{2} source or a CAIR SO\textsubscript{2} unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under §96.213 amending the list of owners and operators to include the change.

§ 96.213 Certificate of representation.

(a) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the CAIR SO\textsubscript{2} source, and each CAIR SO\textsubscript{2} unit at the source, for which the certificate of representation is submitted, including identification and nameplate capacity of each generator served by each such unit.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative.

(3) A list of the owners and operators of the CAIR SO\textsubscript{2} source and of each CAIR SO\textsubscript{2} unit at the source.

(4) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative—

(i) “I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR SO\textsubscript{2} unit at the source.”

(ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO\textsubscript{2} Trading Program on behalf of the owners and operators of the source and each CAIR SO\textsubscript{2} unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions.”

(iii) “I certify that the owners and operators of the source and of each CAIR SO\textsubscript{2} unit at the source shall be bound by any order issued to me by the
Environmental Protection Agency

§ 96.215 Delegation by CAIR designated representative and alternate CAIR designated representative.

(a) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(b) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(c) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

1. The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;
§ 96.220 General CAIR SO₂ Trading Program permit requirements.

(a) For each CAIR SO₂ source required to have a title V operating permit or required, under subpart III of this part, to have a title V operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the permitting authority for the title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the title V permit or other federally enforceable permit as applicable shall be administered in accordance with the permitting authority’s title V operating permits regulations promulgated under part 70 or 71 of this chapter or the permitting authority’s regulations for other federally enforceable permits as applicable, except as provided otherwise by §96.205, this subpart, and subpart III of this part.

(b) Each CAIR permit shall contain, with regard to the CAIR SO₂ source and the CAIR SO₂ units at the source covered by the CAIR permit, all applicable CAIR SO₂ Trading Program, CAIR NOₓ Annual Trading Program, and CAIR NOₓ Ozone Season Trading Program requirements and shall be a complete and separable portion of the title V operating permit or other federally enforceable permit under paragraph (a) of this section.

§ 96.221 Submission of CAIR permit applications.

(a) Duty to apply. The CAIR designated representative of any CAIR SO₂ source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §96.222 for the source covering each CAIR SO₂ unit at
§ 96.251 Establishment of accounts.

(a) Compliance accounts. Except as provided in §96.223(b), the permitting authority will revise the CAIR permit, as necessary, in accordance with the permitting authority’s title V operating permits regulations or the permitting authority’s regulations for other federally enforceable permits as applicable addressing permit revisions.

§ 96.250 [Reserved]

§ 96.251 Establishment of accounts.

(a) Compliance accounts. Except as provided in §96.223(e), upon receipt of a complete certificate of representation under §96.213, the Administrator will establish a compliance account for the CAIR SO\textsubscript{2} source for which the certificate of representation was submitted, unless the source already has a compliance account.

(b) General accounts—(1) Application for general account. Any person may apply to open a general account for the purpose of holding and transferring CAIR SO\textsubscript{2} allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and
facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(B) Organization name and type of organization, if applicable;

(C) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership interest with respect to the CAIR SO₂ allowances held in the general account;

(D) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: "I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR SO₂ allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO₂ Trading Program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the Administrator or a court regarding the general account."

(E) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.

(iii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(2) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative.

(i) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(A) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(B) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR SO₂ allowances in the general account in all matters pertaining to the CAIR SO₂ Trading Program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the Administrator or a court regarding the general account.

(C) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.

(ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR SO₂ allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: "I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR SO₂ allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I
Environmental Protection Agency § 96.251

certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(iii) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(ii) of this section.

(3) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest. (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account.

(ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CAIR SO\textsubscript{2} allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to CAIR SO\textsubscript{2} allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account to include the change.

(4) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative. (i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (b)(3)(i) or (ii) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the Administrator under the CAIR SO\textsubscript{2} Trading Program.
(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR SO\textsubscript{2} allowance transfers.

(5) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative. (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FFF and GGG of this part.

(ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FFF and GGG of this part.

(iii) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (b)(5)(i) or (ii) of this section, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;

(B) The name, address, e-mail address, telephone number, and, facsimile transmission number (if any) of each such natural person (referred to as an "agent");

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (b)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.251(b)(5)(iv) shall be deemed to be an electronic submission by me."; and

(E) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.251 (b)(5(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.251 (b)(5) is terminated."

(iv) A notice of delegation submitted under paragraph (b)(5)(iii) of this section shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (b)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (b)(5)(iv) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

Environmental Protection Agency

§ 96.254 Compliance with CAIR SO₂ emissions limitation.

(a) Allowance transfer deadline. The CAIR SO₂ allowances are available to be deducted for compliance with a source’s CAIR SO₂ emissions limitation for a control period in a given calendar year only if the CAIR SO₂ allowances:

(1) Were allocated for the control period in the year or a prior year; and

(2) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR SO₂ allowance transfer correctly submitted for recordation under §§96.260 and 96.261 by the allowance transfer deadline for the control period.

(b) Deductions for compliance. Following the recordation, in accordance with §96.261, of CAIR SO₂ allowance transfers submitted for recordation in a source’s compliance account by the allowance transfer deadline for a control period, the Administrator will deduct from the compliance account CAIR SO₂ allowances available under paragraph (a) of this section in order to determine whether the source meets
the CAIR SO₂ emissions limitation for the control period as follows:

(1) For a CAIR SO₂ source subject to an Acid Rain emissions limitation, the Administrator will, in the following order:

(i) Deduct the amount of CAIR SO₂ allowances, available under paragraph (a) of this section and not issued by a permitting authority under §96.288, that is required under §§73.35(b) and (c) of this part. If there are sufficient CAIR SO₂ allowances to complete this deduction, the deduction will be treated as satisfying the requirements of §§73.35(b) and (c) of this chapter.

(ii) Deduct the amount of CAIR SO₂ allowances, not issued by a permitting authority under §96.288, that is required under §§73.35(d) and 77.5 of this part. If there are sufficient CAIR SO₂ allowances to complete this deduction, the deduction will be treated as satisfying the requirements of §§73.35(d) and 77.5 of this chapter.

(iii) Treating the CAIR SO₂ allowances deducted under paragraph (b)(1)(i) of this section as also being deducted under this paragraph (b)(1)(iii), deduct CAIR SO₂ allowances available under paragraph (a) of this section (including any issued by a permitting authority under §96.288) in order to determine whether the source meets the CAIR SO₂ emissions limitation for the control period, as follows:

(A) Until the tonnage equivalent of the CAIR SO₂ allowances deducted equals, or exceeds in accordance with paragraphs (c)(1) and (2) of this section, the number of tons of total sulfur dioxide emissions, determined in accordance with subpart HHH of this part, from all CAIR SO₂ units at the source for the control period; or

(B) If there are insufficient CAIR SO₂ allowances to complete the deductions in paragraph (b)(1)(iii)(A) of this section, until no more CAIR SO₂ allowances available under paragraph (a) of this section (including any issued by a permitting authority under §96.288) remain in the compliance account.

(2) First-in, first-out. The Administrator will deduct CAIR SO₂ allowances under paragraph (b) or (d) of this section from the source’s compliance account, in the absence of an identification of the source’s compliance account representative for a source’s compliance account may request that specific CAIR SO₂ allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (b) or (d) of this section. Such request shall be submitted to the Administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the Administrator, the identification of the CAIR SO₂ source and the appropriate serial numbers.

(i) Any CAIR SO₂ allowances that were allocated to the units at the source for a control period before 2010, in the order of recordation;

(ii) Any CAIR SO₂ allowances that were allocated to any entity for a control period before 2010 and transferred and recorded in the compliance account pursuant to subpart GGG of this
Environmental Protection Agency

§ 96.257

(a) CAIR SO₂ allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CAIR SO₂ allowance that is held in a compliance account or a general account will remain in such account unless and until the CAIR SO₂ allowance is deducted or transferred under §96.254, §96.256, or subpart GGG or III of this part.

[70 FR 25362, May 12, 2005, as amended at 71 FR 25389, Apr. 28, 2006]

§ 96.256 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR SO₂ Allowance Tracking System account. Within 10 business days of making such correction, the Administrator will notify the CAIR authorized account representative for the account.

§ 96.257 Closing of general accounts.

(a) The CAIR authorized account representative of a general account may submit to the Administrator a request to close the account, which shall include a correctly submitted allowance transfer under §§96.260 and 96.261 for...
any CAIR SO\textsubscript{2} allowances in the account to one or more other CAIR SO\textsubscript{2} Allowance Tracking System accounts.

(b) If a general account has no allowance transfers in or out of the account for a 12-month period or longer and does not contain any CAIR SO\textsubscript{2} allowances, the Administrator may notify the CAIR authorized account representative for the account that the account will be closed following 20 business days after the notice is sent. The account will be closed after the 20-day period unless, before the end of the 20-day period, the Administrator receives a correctly submitted transfer of CAIR SO\textsubscript{2} allowances into the account under §§ 96.260 and 96.261 or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

[70 FR 25362, May 12, 2005, as amended at 71 FR 25389, Apr. 28, 2006]

Subpart GGG—CAIR SO\textsubscript{2} Allowance Transfers

SOURCE: 70 FR 25362, May 12, 2005, unless otherwise noted.

§ 96.260 Submission of CAIR SO\textsubscript{2} allowance transfers.

(a) A CAIR authorized account representative seeking recordation of a CAIR SO\textsubscript{2} allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the CAIR SO\textsubscript{2} allowance transfer shall include the following elements, in a format specified by the Administrator:

(1) The account numbers of both the transferor and transferee accounts;

(2) The serial number of each CAIR SO\textsubscript{2} allowance identified by serial number in the transfer;

(3) The name and signature of the CAIR authorized account representative of the transferor and transferee accounts and the dates signed.

(b)(1) The CAIR authorized account representative for the transferee account can meet the requirements in paragraph (a)(3) of this section by submitting, in a format prescribed by the Administrator, a statement signed by the CAIR authorized account representative and identifying each account into which any transfer of allowances, submitted on or after the date on which the Administrator receives such statement, is authorized. Such authorization shall be binding on any CAIR authorized account representative for such account and shall apply to all transfers into the account that are submitted on or after such date of receipt, unless and until the Administrator receives a statement signed by the CAIR authorized account representative retracting the authorization for the account.

(2) The statement under paragraph (b)(1) of this section shall include the following: “By this signature I authorize any transfer of allowances into each account listed herein, except that I do not waive any remedies under State or Federal law to obtain correction of any erroneous transfers into such accounts. This authorization shall be binding on any CAIR authorized account representative for such account unless and until a statement signed by the CAIR authorized account representative retracting this authorization for the account is received by the Administrator.”

§ 96.261 EPA recordation.

(a) Within 5 business days (except as necessary to perform a transfer in perpetuity of CAIR SO\textsubscript{2} allowances allocated to a CAIR SO\textsubscript{2} unit or as provided in paragraph (b) of this section) of receiving a CAIR SO\textsubscript{2} allowance transfer, the Administrator will record a CAIR SO\textsubscript{2} allowance transfer by moving each CAIR SO\textsubscript{2} allowance from the transferor account to the transferee account as specified by the request, provided that:

(1) The transfer is correctly submitted under § 96.260;

(2) The transferor account includes each CAIR SO\textsubscript{2} allowance identified by serial number in the transfer; and

(3) The transfer is in accordance with the limitation on transfer under §74.42 of this chapter and §74.47(c) of this chapter, as applicable.

(b) A CAIR SO\textsubscript{2} allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR SO\textsubscript{2} allowances allocated for any
control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions under §96.254 for the control period immediately before such allowance transfer deadline.  

(c) Where a CAIR SO\textsubscript{2} allowance transfer submitted for recordation fails to meet the requirements of paragraph (a) of this section, the Administrator will not record such transfer.

[70 FR 25362, May 12, 2005, as amended at 71 FR 25389, Apr. 28, 2006]

§ 96.262 Notification.

(a) Notification of recordation. Within 5 business days of recordation of a CAIR SO\textsubscript{2} allowance transfer under §96.261, the Administrator will notify the CAIR authorized account representatives of both the transferor and transferee accounts.

(b) Notification of non-recordation. Within 10 business days of receipt of a CAIR SO\textsubscript{2} allowance transfer that fails to meet the requirements of §96.261(a), the Administrator will notify the CAIR authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer, and

(2) The reasons for such non-recordation.

(c) Nothing in this section shall preclude the submission of a CAIR SO\textsubscript{2} allowance transfer for recordation following notification of non-recordation.

Subpart HHH—Monitoring and Reporting

SOURCE: 70 FR 25362, May 12, 2005, unless otherwise noted.

§ 96.270 General requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR SO\textsubscript{2} unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subparts F and G of part 75 of this chapter. For purposes of complying with such requirements, the definitions in §96.202 and in §72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CAIR SO\textsubscript{2} unit,” “CAIR designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively, as defined in §96.202. The owner or operator of a unit that is not a CAIR SO\textsubscript{2} unit but that is monitored under §75.16(b)(2) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CAIR SO\textsubscript{2} unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR SO\textsubscript{2} unit shall:

(1) Install all monitoring systems required under this subpart for monitoring SO\textsubscript{2} mass emissions and individual unit heat input (including all systems required to monitor SO\textsubscript{2} concentration, stack gas moisture content, stack gas flow rate, CO\textsubscript{2} or O\textsubscript{2} concentration, and fuel flow rate, as applicable, in accordance with §§75.11 and 75.16 of this chapter);

(2) Successfully complete all certification tests required under §96.271 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the following dates. The owner or operator shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the following dates.

(1) For the owner or operator of a CAIR SO\textsubscript{2} unit that commences commercial operation before July 1, 2008, by January 1, 2009.

(2) For the owner or operator of a CAIR SO\textsubscript{2} unit that commences commercial operation on or after July 1, 2008, by the later of the following dates:

(i) January 1, 2009; or
§ 96.270

(i) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation.

(3) For the owner or operator of a CAIR SO₂ unit for which construction of a new stack or flue or installation of add-on SO₂ emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (4), or (5) of this section, by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation.

(3) For the owner or operator of a CAIR SO₂ unit for which construction of a new stack or flue or installation of add-on SO₂ emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (4), or (5) of this section, by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on SO₂ emissions controls.

(4) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, by the date specified in § 96.284(b).

(5) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a CAIR SO₂ opt-in unit under subpart III of this part, by the date on which the CAIR SO₂ opt-in unit enters the CAIR SO₂ Trading Program as provided in § 96.284(g).

(c) Reporting data. The owner or operator of a CAIR SO₂ unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for SO₂ concentration, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine SO₂ mass emissions and heat input in accordance with § 75.31(b)(2) or (c)(3) of this chapter or section 2.4 of appendix D to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CAIR SO₂ unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with § 96.275.

(2) No owner or operator of a CAIR SO₂ unit shall operate the unit so as to discharge, or allow to be discharged, SO₂ emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(iii) No owner or operator of a CAIR SO₂ unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording SO₂ mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CAIR SO₂ unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under § 96.205 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the permitting authority for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

(iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with § 96.271(d)(3)(i).

(e) Long-term cold storage. The owner or operator of a CAIR SO₂ unit is subject to the applicable provisions of part 75 of this chapter concerning units in long-term cold storage.
$ 96.271 Initial certification and recertification procedures.

(a) The owner or operator of a CAIR SO\textsubscript{2} unit shall be exempt from the initial certification requirements of this section for a monitoring system under § 96.270(a)(1) if the following conditions are met:

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of § 75.21 of this chapter and appendix B and appendix D to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under § 96.270(a)(1) exempt from initial certification requirements under paragraph (a) of this section.

(c) [Reserved]

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CAIR SO\textsubscript{2} unit shall comply with the following initial certification and recertification procedures, for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendix D to part 75 of this chapter) under § 96.270(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under § 75.19 of this chapter or that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the procedures in paragraphs (e) or (f) of this section respectively.

(1) Requirements for initial certification.

The owner or operator shall ensure that each continuous monitoring system under § 96.270(a)(1) (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under § 75.20 of this chapter by the applicable deadline in § 96.270(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with § 75.20 of this chapter is required.

(2) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under § 96.270(a)(1) that may significantly affect the ability of the system to accurately measure or record SO\textsubscript{2} mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of § 75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with § 75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with § 75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system under § 96.270(a)(1) is subject to the recertification requirements in § 75.20(g)(6) of this chapter.

(3) Approval process for initial certification and recertification. Paragraphs (d)(3)(i) through (iv) of this section apply to both initial certification and recertification of a continuous monitoring system under § 96.270(a)(1). For recertifications, replace the words “certification” and “initial certification” with the word “recertification”, replace the word “certified” with the word “recertified,” and follow the procedures in §§ 75.20(b)(5) and (g)(7) of this chapter in lieu of the procedures in paragraph (d)(3)(v) of this section.

(i) Notification of certification. The CAIR designated representative shall submit to the permitting authority, the appropriate EPA Regional Office, and the Administrator written notice of the dates of certification testing, in accordance with § 96.273.
(ii) Certification application. The CAIR designated representative shall submit to the permitting authority a certification application for each monitoring system. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CAIR SO\textsubscript{2} Trading Program for a period not to exceed 120 days after receipt by the permitting authority of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the permitting authority does not invalidate the provisional certification by issuing a notice of disapproval under paragraph (d)(3)(iv)(C) of this section. The 120-day review period shall not begin before receipt of a complete certification application.

(iv) Certification application approval process. The permitting authority will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the permitting authority does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CAIR SO\textsubscript{2} Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the permitting authority will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the permitting authority will issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the permitting authority may issue a notice of disapproval under paragraph (d)(3)(iv)(B) of this section. The 120-day review period shall not begin before receipt of a complete certification application.

(C) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of part 75 of this chapter or if the certification application is incomplete and the requirement for disapproval under paragraph (d)(3)(iv)(B) of this section is met, then the permitting authority will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the permitting authority and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter). The owner or operator shall follow the procedures for loss of certification in paragraph (d)(3)(v) of this section for each monitoring system that is disapproved for initial certification.

(D) Audit decertification. The permitting authority or, for a CAIR SO\textsubscript{2} opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §96.272(b).

(v) Procedures for loss of certification. If the permitting authority or the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this...
section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under §75.20(a)(5)(i) or (g)(7) of this chapter and continuing until the applicable date and hour specified under §75.20(a)(5)(i) or (g)(7) of this chapter:

(1) For a disapproved SO$_2$ pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of SO$_2$ and the maximum potential flow rate, as defined in sections 2.1.1.1 and 2.1.4.1 of appendix A to part 75 of this chapter.

(2) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO$_2$ concentration or the minimum potential O$_2$ concentration (as applicable), as defined in sections 2.1.5, 2.1.3.1, and 2.1.3.2 of appendix A to part 75 of this chapter.

(3) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in section 2.4.2.1 of appendix D to part 75 of this chapter.

(B) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (d)(3)(i) and (ii) of this section.

(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the permitting authority’s or the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(e) Initial certification and recertification procedures for units using the low mass emission excepted methodology under §75.19 of this chapter. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under §75.19 of this chapter shall meet the applicable certification and recertification requirements in §§75.19(a)(2) and 75.20(h) of this chapter. If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in §75.20(g) of this chapter.

(f) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator and, if applicable, the permitting authority under subpart E of part 75 of this chapter shall comply with the applicable notification and application procedures of §75.20(f) of this chapter.

§ 96.272 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D of or appendix D to part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §96.271 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the permitting authority or, for a CAIR SO$_2$ opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the permitting authority or
§ 96.273 Notifications.

The CAIR designated representative for a CAIR SO\textsubscript{2} unit shall submit written notice to the permitting authority and the Administrator in accordance with §75.61 of this chapter.

[70 FR 25362, May 12, 2005, as amended at 71 FR 25390, Apr. 28, 2006]

§ 96.274 Recordkeeping and reporting.

(a) General provisions. The CAIR designated representative shall comply with all recordkeeping and reporting requirements in this section, the applicable recordkeeping and reporting requirements in subparts F and G of part 75 of this chapter, and the requirements of §96.210(e)(1).

(b) Monitoring plans. The owner or operator of a CAIR SO\textsubscript{2} unit shall comply with requirements of §75.62 of this chapter and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the calendar quarter corresponding to the date specified in §96.284(b); and

(c) Certification applications. The CAIR designated representative shall submit an application to the permitting authority within 45 days after completing all initial certification or recertification tests required under §96.271, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

(1) The CAIR designated representative shall report the SO\textsubscript{2} mass emissions data and heat input data for the CAIR SO\textsubscript{2} unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

(i) For a unit that commences commercial operation before July 1, 2008, the calendar quarter covering January 1, 2009 through March 31, 2009;

(ii) For a unit that commences commercial operation on or after July 1, 2008, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §96.270(b), unless that quarter is the third or fourth quarter of 2008, in which case reporting shall commence in the quarter covering January 1, 2009 through March 31, 2009;

(iii) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the calendar quarter corresponding to the date on which the CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program as provided in §96.284(g).

(2) The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.64 of this chapter.

(3) For CAIR SO\textsubscript{2} units that are also subject to an Acid Rain emissions limitation or the CAIR NO\textsubscript{x} Annual Trading Program CAIR NO\textsubscript{x} Ozone Season Trading Program, or Hg Budget Trading Program, quarterly reports shall include the applicable data and information required by subparts F through I of part 75 of this chapter as applicable, in addition to the SO\textsubscript{2} mass emission data, heat input data, and other information required by this subpart.

(e) Compliance certification. The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each
quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications; and

(2) For a unit with add-on SO\textsubscript{2} emission controls and for all hours where SO\textsubscript{2} data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate SO\textsubscript{2} emissions.

§ 96.275 Petitions.

(a) The CAIR designated representative of a CAIR SO\textsubscript{2} unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by the Administrator, in consultation with the permitting authority.

(b) The CAIR designated representative of a CAIR SO\textsubscript{2} unit that is not subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by both the permitting authority and the Administrator.

Subpart III—CAIR SO\textsubscript{2} Opt-in Units

SOURCE: 70 FR 25362, May 12, 2005, unless otherwise noted.

§ 96.280 Applicability.

A CAIR SO\textsubscript{2} opt-in unit must be a unit that:

(a) Is located in the State;

(b) Is not a CAIR SO\textsubscript{2} unit under §96.204 and is not covered by a retired unit exemption under §96.205 that is in effect;

(c) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect and is not an opt-in source under part 74 of this chapter;

(d) Has or is required or qualified to have a title V operating permit or other federally enforceable permit; and

(e) Vents all of its emissions to a stack and can meet the monitoring, recordkeeping, and reporting requirements of subpart HHH of this part.

§ 96.281 General.

(a) Except as otherwise provided in §§96.201 through 96.204, §§96.206 through 96.208, and subparts BBB through CCC and subparts FFF through HHH of this part, a CAIR SO\textsubscript{2} opt-in unit shall be treated as a CAIR SO\textsubscript{2} unit for purposes of applying such sections and subparts of this part.

(b) Solely for purposes of applying, as provided in this subpart, the requirements of subpart HHH of this part to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, such unit shall be treated as a CAIR SO\textsubscript{2} unit before issuance of a CAIR opt-in permit for such unit.

§ 96.282 CAIR designated representative.

Any CAIR SO\textsubscript{2} opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, located at the same source as one or more CAIR SO\textsubscript{2} units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR SO\textsubscript{2} units.
§ 96.283 Applying for CAIR opt-in permit.

(a) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR SO\(_2\) opt-in unit in §96.280 may apply for an initial CAIR opt-in permit at any time, except as provided under §96.286(f) and (g), and, in order to apply, must submit the following:

(1) A complete CAIR permit application under §96.222;
(2) A certification, in a format specified by the permitting authority, that the unit:
   (i) Is not a CAIR SO\(_2\) unit under §96.204 and is not covered by a retired unit exemption under §96.205 that is in effect;
   (ii) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;
   (iii) Is not and, so long as the unit is a CAIR SO\(_2\) opt-in unit, will not become, an opt-in source under part 74 of this chapter;
   (iv) Vents all of its emissions to a stack; and
   (v) Has documented heat input for more than 876 hours during the 6 months immediately preceding submission of the CAIR permit application under §96.222;
(3) A monitoring plan in accordance with subpart HHH of this part;
(4) A complete certificate of representation under §96.213 consistent with §96.282, if no CAIR designated representative has been previously designated for the source that includes the unit; and
(5) A statement, in a format specified by the permitting authority, whether the CAIR designated representative requests that the unit be allocated CAIR SO\(_2\) allowances under §96.288(b) or §96.288(c) (subject to the conditions in §§96.284(h) and 96.286(g)). If allocation under §96.288(c) is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(b) Duty to reapply. (1) The CAIR designated representative of a CAIR SO\(_2\) opt-in unit shall submit a complete CAIR permit application under §96.222 to renew the CAIR opt-in unit permit in accordance with the permitting authority’s regulations for title V operating permits, or the permitting authority’s regulations for other federally enforceable permits if applicable, addressing permit renewal.

(2) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR SO\(_2\) opt-in unit from the CAIR SO\(_2\) Trading Program in accordance with §96.286 or the unit becomes a CAIR SO\(_2\) unit under §96.204, the CAIR SO\(_2\) opt-in unit shall remain subject to the requirements for a CAIR SO\(_2\) opt-in unit, even if the CAIR designated representative for the CAIR SO\(_2\) opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (b)(1) of this section.

[70 FR 25362, May 12, 2005, as amended at 71 FR 25390, Apr. 28, 2006]

§ 96.284 Opt-in process.

The permitting authority will issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under §96.283 is submitted in accordance with the following:

(a) Interim review of monitoring plan. The permitting authority and the Administrator will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under §96.283. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the SO\(_2\) emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with subpart HHH of this part. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.

(b) Monitoring and reporting. (1)(i) If the permitting authority and the Administrator determine that the monitoring plan is sufficient under paragraph (a) of this section, the owner or operator shall monitor and report the SO\(_2\) emissions rate and the heat input of the unit and all other applicable parameters, in accordance with subpart HHH of this part, starting on the date
of certification of the appropriate monitoring systems under subpart HHH of this part and continuing until a CAIR opt-in permit is denied under §96.284(f) or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR SO2 Trading Program in accordance with §96.286.

(ii) The monitoring and reporting under paragraph (b)(1)(i) of this section shall include the entire control period immediately before the date on which the unit enters the CAIR SO2 Trading Program under §96.284(g), during which period monitoring system availability must not be less than 90 percent under subpart HHH of this part and the unit must be in full compliance with any applicable State or Federal emissions or emissions-related requirements.

(2) To the extent the SO2 emissions rate and the heat input of the unit are monitored and reported in accordance with subpart HHH of this part for one or more control periods, in addition to the control period under paragraph (b)(1)(ii) of this section, during which control periods monitoring system availability is not less than 90 percent under subpart HHH of this part and the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements and which control periods begin not more than 3 years before the unit enters the CAIR SO2 Trading Program under §96.284(g), such information shall be used as provided in paragraphs (c) and (d) of this section.

(c) Baseline heat input. The unit’s baseline heat input shall equal:

(1) If the unit’s SO2 emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s total heat input (in mmBtu) for the control period; or

(2) If the unit’s SO2 emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, the average of the amounts of the unit’s total heat input (in mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section and the control periods under paragraph (b)(2) of this section.

(d) Baseline SO2 emission rate. The unit’s baseline SO2 emission rate shall equal:

(1) If the unit’s SO2 emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s SO2 emissions rate (in lb/mmBtu) for the control period;

(2) If the unit’s SO2 emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit does not have add-on SO2 emission controls during any such control periods, the average of the amounts of the unit’s SO2 emissions rate (in lb/mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section; or

(3) If the unit’s SO2 emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit has add-on SO2 emission controls during any such control periods, the average of the amounts of the unit’s SO2 emissions rate (in lb/mmBtu) for such control periods during which the unit has add-on SO2 emission controls.

(e) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline SO2 emissions rate for the unit under paragraphs (c) and (d) of this section and if the permitting authority determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR SO2 opt-in unit in §96.280 and meets the elements certified in §96.283(a)(2), the permitting authority will issue a CAIR opt-in permit. The permitting authority will provide a copy of the CAIR opt-in permit to the Administrator, who will then establish a compliance account for the source that includes the CAIR SO2 opt-in unit unless the source already has a compliance account.

(f) Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (a) through (e) of this section, if at any time before issuance of a CAIR opt-in permit for the unit, the permitting authority determines that the CAIR designated representative fails to show
§ 96.285 CAIR opt-in permit contents.

(a) Each CAIR opt-in permit will contain:

(1) All elements required for a complete CAIR permit application under § 96.222;

(2) The certification in § 96.283(a)(2);

(3) The unit’s baseline heat input under § 96.284(c);

(4) The unit’s baseline SO\textsubscript{2} emission rate under § 96.284(d);

(5) A statement whether the unit is to be allocated CAIR SO\textsubscript{2} allowances § 96.288(b) or § 96.288(c) (subject to the conditions in §§ 96.284(h) and 96.286(g));

(6) A statement that the unit may withdraw from the CAIR SO\textsubscript{2} Trading Program only in accordance with § 96.286; and

(7) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of § 96.287.

(b) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under § 96.202 and, upon recordation by the Administrator under subpart FFF or GGG of this part or this subpart, every allocation, transfer, or deduction of CAIR SO\textsubscript{2} allowances to or from the compliance account of the source that includes a CAIR SO\textsubscript{2} opt-in unit covered by the CAIR opt-in permit.

§ 96.286 Withdrawal from CAIR SO\textsubscript{2} Trading Program.

Except as provided under paragraph (g) of this section, a CAIR SO\textsubscript{2} opt-in unit may withdraw from the CAIR SO\textsubscript{2} Trading Program, but only if the permitting authority issues a notification to the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit of the acceptance of the withdrawal of the CAIR SO\textsubscript{2} opt-in unit in accordance with paragraph (d) of this section.

(a) Requesting withdrawal. In order to withdraw a CAIR SO\textsubscript{2} opt-in unit from the CAIR SO\textsubscript{2} Trading Program, the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit shall submit to the permitting authority a request to withdraw effective as of midnight of December 31 of a specified calendar year, which date must be at least 4 years after December 31 of the year of entry into the CAIR SO\textsubscript{2} Trading Program under § 96.284(g). The request must be submitted no later than 90
Environmental Protection Agency

§ 96.286

Allowance Tracking System in accordance with subpart GGG of this part.

(b) Conditions for withdrawal. Before a CAIR SO₂ opt-in unit covered by a request under paragraph (a) of this section may withdraw from the CAIR SO₂ Trading Program and the CAIR opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

(1) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR SO₂ opt-in unit must meet the requirement to hold CAIR SO₂ allowances under §96.206(c) and cannot have any excess emissions.

(2) After the requirement for withdrawal under paragraph (b)(1) of this section is met, the Administrator will deduct from the compliance account of the source that includes the CAIR SO₂ opt-in unit CAIR SO₂ allowances equal in amount to and allocated for the same or a prior control period as any CAIR SO₂ allowances allocated to the CAIR SO₂ opt-in unit under §96.284 for any control period for which the withdrawal is to be effective. If there are no remaining CAIR SO₂ units at the source, the Administrator will close the compliance account, and the owners and operators of the CAIR SO₂ opt-in unit may submit a CAIR SO₂ allowance transfer for any remaining CAIR SO₂ allowances to another CAIR SO₂ Allowance Tracking System in accordance with subpart GGG of this part.

(c) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of CAIR SO₂ allowances required), the permitting authority will issue a notification to the CAIR designated representative of the CAIR SO₂ opt-in unit of the acceptance of the withdrawal of the CAIR SO₂ opt-in unit as of midnight on December 31 of the calendar year for which the withdrawal was requested.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the CAIR designated representative of the CAIR SO₂ opt-in unit that the CAIR SO₂ opt-in unit’s request to withdraw is denied. Such CAIR SO₂ opt-in unit shall continue to be a CAIR SO₂ opt-in unit.

(d) Permit amendment. After the permitting authority issues a notification under paragraph (c)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the CAIR permit covering the CAIR SO₂ opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (c)(1) of this section. The unit shall continue to be a CAIR SO₂ opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR SO₂ Trading Program concerning any control periods for which the unit is a CAIR SO₂ opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(e) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the CAIR SO₂ opt-in unit’s request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(f) Ability to reapply to the CAIR SO₂ Trading Program. Once a CAIR SO₂ opt-in unit withdraws from the CAIR SO₂ Trading Program and its CAIR opt-in permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under §96.283 for such CAIR SO₂ opt-in unit before the date that is 4 years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit will be treated as an initial application for a CAIR opt-in permit under §96.284.

(g) Inability to withdraw. Notwithstanding paragraphs (a) through (f) of this section, a CAIR SO₂ opt-in unit shall not be eligible to withdraw from the CAIR SO₂ Trading Program if the CAIR designated representative of the CAIR SO₂ opt-in unit requests, and the permitting authority issues a CAIR opt-in permit providing for allocation to the CAIR SO₂ opt-in unit of CAIR SO₂ allowances under §96.288(c).

[70 FR 25362, May 12, 2005, as amended at 71 FR 25390, Apr. 28, 2006]
§ 96.287 Change in regulatory status.

(a) Notification. If a CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.284, then the CAIR designated representative shall notify in writing the permitting authority and the Administrator of such change in the CAIR SO\textsubscript{2} opt-in unit’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s actions.

(1) If a CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.284, the permitting authority will revise the CAIR SO\textsubscript{2} opt-in unit’s CAIR opt-in permit to meet the requirements of a CAIR permit under §96.223, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.204.

(2)(i) The Administrator will deduct from the compliance account of the source that includes a CAIR SO\textsubscript{2} opt-in unit that becomes a CAIR SO\textsubscript{2} unit under §96.204, CAIR SO\textsubscript{2} allowances equal in amount to and allocated for the same or a prior control period.

(A) Any CAIR SO\textsubscript{2} allowances allocated to the CAIR SO\textsubscript{2} opt-in unit under §96.288 for any control period after the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.204; and

(B) If the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.204 is not December 31, the CAIR SO\textsubscript{2} allowances allocated to the CAIR SO\textsubscript{2} opt-in unit under §96.288 for the control period that includes the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.204, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under §96.204 divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR SO\textsubscript{2} opt-in unit that becomes a CAIR SO\textsubscript{2} unit under §96.204 contains the CAIR SO\textsubscript{2} allowances necessary for completion of the deduction under paragraph (b)(2)(i) of this section.

§ 96.288 CAIR SO\textsubscript{2} allowance allocations to CAIR SO\textsubscript{2} opt-in units.

(a) Timing requirements.

(1) When the CAIR opt-in permit is issued under §96.284(e), the permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit, and submit to the Administrator the allocation for the control period in which a CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under §96.284(g). In accordance with paragraph (b) or (c) of this section.

(2) By no later than October 31 of the control period after the control period in which a CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under §96.284(g) and October 31 of each year thereafter, the permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit, and submit to the Administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR SO\textsubscript{2} opt-in unit, in accordance with paragraph (b) or (c) of this section.

(b) Calculation of allocation.

For each control period for which a CAIR SO\textsubscript{2} opt-in unit is to be allocated CAIR SO\textsubscript{2} allowances, the permitting authority will allocate in accordance with the following procedures:

(1) The heat input (in mmBtu) used for calculating the CAIR SO\textsubscript{2} allowance allocation will be the lesser of:

(i) The CAIR SO\textsubscript{2} opt-in unit’s baseline heat input determined under §96.284(c); or

(ii) The CAIR SO\textsubscript{2} opt-in unit’s heat input, as determined in accordance with subpart HHH of this part, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under §96.284(g).

(2) The SO\textsubscript{2} emission rate (in lb/ mmBtu) used for calculating CAIR SO\textsubscript{2} allowance allocations will be the lesser of:
(i) The CAIR SO₂ opt-in unit’s baseline SO₂ emissions rate (in lb/mmBtu) determined under §96.284(d) and multiplied by 70 percent; or

(ii) The most stringent State or Federal SO₂ emissions limitation applicable to the CAIR SO₂ opt-in unit at any time during the control period for which CAIR SO₂ allowances are to be allocated.

(3) The permitting authority will allocate CAIR SO₂ allowances to the CAIR SO₂ opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (b)(1) of this section, multiplied by the SO₂ emission rate under paragraph (b)(2) of this section, and divided by 2,000 lb/ton.

(c) Notwithstanding paragraph (b) of this section and if the CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under §96.283(a)(5)) providing for, allocation to a CAIR SO₂ opt-in unit of CAIR SO₂ allowances under this paragraph (subject to the conditions in §§96.284(h) and 96.286(g)), the permitting authority will allocate to the CAIR SO₂ opt-in unit as follows:

(1) For each control period in 2010 through 2014 for which the CAIR SO₂ opt-in unit is to be allocated CAIR SO₂ allowances,

(i) The heat input (in mmBtu) used for calculating CAIR SO₂ allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The SO₂ emission rate (in lb/mmBtu) used for calculating the CAIR SO₂ opt-in unit’s baseline SO₂ emissions rate (in lb/mmBtu) determined under §96.284(d) multiplied by 10 percent; or

(B) The most stringent State or Federal SO₂ emissions limitation applicable to the CAIR SO₂ opt-in unit at any time during the control period for which CAIR SO₂ allowances are to be allocated.

(iii) The permitting authority will allocate CAIR SO₂ allowances to the CAIR SO₂ opt-in unit under paragraph (a)(1) of this section.

(2) By December 1 of the control period in which a CAIR SO₂ opt-in unit enters the CAIR SO₂ Trading Program under §96.284(g), and December 1 of each year thereafter, the Administrator will record, in the compliance account of the source that includes the CAIR SO₂ opt-in unit, the CAIR SO₂ allowances allocated by the permitting authority to the CAIR SO₂ opt-in unit under paragraph (a)(2) of this section.

Subparts JJJ–ZZZ [Reserved]
§ 96.301 Purpose.

This subpart and subparts BBBB through IIII establish the model rule comprising general provisions and the designated representative, permitting, allowance, monitoring, and opt-in provisions for the State Clean Air Interstate Rule (CAIR) NO\textsubscript{X} Ozone Season Trading Program, under section 110 of the Clean Air Act and §51.123 of this chapter, as a means of mitigating interstate transport of ozone and nitrogen oxides. The owner or operator of a unit or a source shall comply with the requirements of this subpart and subparts BBBB through IIII as a matter of federal law only if the State with jurisdiction over the unit and the source incorporates by reference such subparts or otherwise adopts the requirements of such subparts in accordance with §51.123(aa)(1) or (2), of this chapter, the State submits to the Administrator one or more revisions of the State implementation plan that include such adoption, and the Administrator approves such revisions. If the State adopts the requirements of such subparts in accordance with §51.123(aa)(1) or (2), (bb), or (dd) of this chapter, then the State authorizes the Administrator to assist the State in implementing the CAIR NO\textsubscript{X} Ozone Season Trading Program by carrying out the functions set forth for the Administrator in such subparts.

§ 96.302 Definitions.

The terms used in this subpart and subparts BBBB through IIII shall have the meanings set forth in this section as follows:

Account number means the identification number given by the Administrator to each CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account.

Acid Rain emissions limitation means a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program.

Acid Rain Program means a multi-state sulfur dioxide and nitrogen oxides air pollution control and emission reduction program established by the Administrator under title IV of the CAA and parts 72 through 78 of this chapter.

Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

Allocate or allocation means, with regard to CAIR NO\textsubscript{X} Ozone Season allowances, the determination by a permitting authority or the Administrator of the amount of such CAIR NO\textsubscript{X} Ozone Season allowances to be initially credited to a CAIR NO\textsubscript{X} Ozone Season source unit, a new unit set-aside, or other entity.

Allowance transfer deadline means, for a control period, midnight of November 30 (if it is a business day), or midnight of the first business day thereafter (if November 30 is not a business day), immediately following the control period and is the deadline by which a CAIR NO\textsubscript{X} Ozone Season allowance transfer must be submitted for recordation in a CAIR NO\textsubscript{X} Ozone Season source’s compliance account in order to be used to meet the source’s CAIR NO\textsubscript{X} Ozone Season emissions limitation for such control period in accordance with §96.354.

Alternate CAIR designated representative means, for a CAIR NO\textsubscript{X} Ozone Season source and each CAIR NO\textsubscript{X} Ozone Season unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBBB and IIII of this part, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR NO\textsubscript{X} Ozone Season Trading Program. If the CAIR NO\textsubscript{X} Ozone Season source is also a CAIR NO\textsubscript{X} source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR NO\textsubscript{X} Ozone Season source is also a CAIR SO\textsubscript{2} source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR SO\textsubscript{2} Trading Program. If the CAIR NO\textsubscript{X} Ozone Season source is also subject to
the Acid Rain Program, then this natural person shall be the same person as the alternate designated representative under the Acid Rain Program. If the CAIR NO\textsubscript{X} Ozone Season source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg Budget Trading Program.

Automated data acquisition and handling system or DAHS means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under subpart HHHH of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart HHHH of this part.

**Biomass** means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is:

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

(ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

**Boiler** means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

**Bottoming-cycle cogeneration unit** means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

**CAIR authorized account representative** means, with regard to a general account, a responsible natural person who is authorized, in accordance with subparts BBBB, FFFF, and IIII of this part, to transfer and otherwise dispose of CAIR NO\textsubscript{X} Ozone Season allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.

**CAIR designated representative** means, for a CAIR NO\textsubscript{X} Ozone Season source and each CAIR NO\textsubscript{X} Ozone Season unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBBB and IIII of this part, to represent and legally bind each owner and operator in matters pertaining to the CAIR NO\textsubscript{X} Ozone Season Trading Program. If the CAIR NO\textsubscript{X} Ozone Season source is also a CAIR NO\textsubscript{X} source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR NO\textsubscript{X} Ozone Season source is also subject to the Acid Rain Program, then this natural person shall be the same person as the designated representative under the Acid Rain Program. If the CAIR NO\textsubscript{X} Ozone Season source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the Hg designated representative under the Hg Budget Trading Program.

**CAIR NO\textsubscript{X} Annual Trading Program** means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AA through II of this part and §51.123(o)(1) or (2) of this chapter or established by the Administrator in accordance with subparts AA through II of part 97 of this chapter and §§51.123(p) and 52.35 of this chapter, as
CAIR NO\textsubscript{X} Ozone Season allowance means a limited authorization issued by a permitting authority or the Administrator under provisions of a State implementation plan that are approved under §51.123(aa)(1) or (2) (and (bb)(1)), (bb)(2), (dd), or (ee) of this chapter, or under subpart EEEE of part 97 or §97.388 of this chapter, to emit one ton of nitrogen oxides during a control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR NO\textsubscript{X} Ozone Season Trading Program or a limited authorization issued by a permitting authority for a control period during 2003 through 2008 under the NO\textsubscript{X} Budget Trading Program in accordance with §51.121(p) of this chapter to emit one ton of nitrogen oxides during a control period, provided that the provision in §51.121(b)(2)(ii)(E) of this chapter shall not be applied in applying this definition and the limited authorization shall not have been used to meet the allowance-holding requirement under the NO\textsubscript{X} Budget Trading Program. An authorization to emit nitrogen oxides that is not issued under provisions of a State implementation plan approved under §51.123(aa)(1) or (2) (and (bb)(1)), (bb)(2), (dd), or (ee) of this chapter or subpart EEEE of part 97 or §97.388 of this chapter or under the NO\textsubscript{X} Budget Trading Program as described in the prior sentence shall not be a CAIR NO\textsubscript{X} Ozone Season allowance.

CAIR NO\textsubscript{X} Ozone Season allowance deduction or deduct CAIR NO\textsubscript{X} Ozone Season allowances means the permanent withdrawal of CAIR NO\textsubscript{X} Ozone Season allowances by the Administrator from a compliance account, e.g., in order to account for a specified number of tons of total nitrogen oxides emissions from all CAIR NO\textsubscript{X} Ozone Season units at a CAIR NO\textsubscript{X} Ozone Season source for a control period, determined in accordance with subpart HHHH of this part, or to account for excess emissions.

CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of CAIR NO\textsubscript{X} Ozone Season allowances under the CAIR NO\textsubscript{X} Ozone Season Trading Program. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.

CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account means an account in the CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR NO\textsubscript{X} Ozone Season allowances.

CAIR NO\textsubscript{X} Ozone Season allowances held or hold CAIR NO\textsubscript{X} Ozone Season allowances means the CAIR NO\textsubscript{X} Ozone Season allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts FFFF, GGGG, and IIII of this part, in a CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account.

CAIR NO\textsubscript{X} Ozone Season allowances limited means, for a CAIR NO\textsubscript{X} Ozone Season source, the tonnage equivalent, in NO\textsubscript{X} emissions in a control period, of the CAIR NO\textsubscript{X} Ozone Season allowances available for deduction for the source under §96.354(a) and (b) for the control period.

CAIR NO\textsubscript{X} Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AAAA through IIII of part 97 and §§51.123(ee) and 52.35 of this chapter, as a means of mitigating interstate transport of ozone and nitrogen oxides.

CAIR NO\textsubscript{X} Ozone Season source means a source that includes one or more CAIR NO\textsubscript{X} Ozone Season units.

CAIR NO\textsubscript{X} Ozone Season unit means a unit that is subject to the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.304 and, except for purposes of §96.305 and subpart EEEE of this part, a CAIR NO\textsubscript{X} Ozone Season opt-in unit under subpart IIII of this part.

CAIR NO\textsubscript{X} source means a source that is subject to the CAIR NO\textsubscript{X} Annual Trading Program.
CAIR permit means the legally binding and federally enforceable written document, or portion of such document, issued by the permitting authority under subpart CCCC of this part, including any permit revisions, specifying the CAIR NO\textsubscript{X} Ozone Season Trading Program requirements applicable to a CAIR NO\textsubscript{X} Ozone Season source, to each CAIR NO\textsubscript{X} Ozone Season unit at the source, and to the owners and operators and the CAIR designated representative of the source and each such unit.

CAIR SO\textsubscript{2} source means a source that is subject to the CAIR SO\textsubscript{2} Trading Program.

CAIR SO\textsubscript{2} Trading Program means a multi-state sulfur dioxide air pollution control and emission reduction program approved and administered by the Administrator in accordance with subparts AAA through III of this part and §51.124(o)(1) or (2) of this chapter or established by the Administrator in accordance with subparts AAA through III of part 97 of this chapter and §§51.124(r) and 52.36 of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.

Clean Air Act or CAA means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Coal-fired means:
(1) Except for purposes of subpart EEEE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during any year; or
(2) For purposes of subpart EEEE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during a specified year.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:
(1) Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and
(2) Producing during the 12-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity—
   (i) For a topping-cycle cogeneration unit,
      (A) Useful thermal energy not less than 5 percent of total energy output; and
      (B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.
   (ii) For a bottoming-cycle cogeneration unit, useful power not less than 45 percent of total energy input;
(3) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit's total energy input from all fuel except biomass if the unit is a boiler.

Combustion turbine means:
(1) An enclosed device comprising a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and
(2) If the enclosed device under paragraph (1) of this definition is combined cycle, any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:
(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §96.305 and §96.384(h).
(1) For a unit that is a CAIR NO\textsubscript{X} Ozone Season unit under §96.304 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of...
commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CAIR NO\textsubscript{X} Ozone Season unit under §96.304 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §96.305, for a unit that is not a CAIR NO\textsubscript{X} Ozone Season unit under §96.304 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CAIR NO\textsubscript{X} Ozone Season unit under §96.304.

(i) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Commence operation means:

(1) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber, except as provided in §96.384(h).

(2) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the date of commencement of operation of the unit, which shall continue to be treated as the same unit.

(3) For a unit that is replaced by a unit at the same source (e.g., repowered) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the replaced unit’s date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1) or (2) of this definition as appropriate, except as provided in §96.384(h).

Common stack means a single flue through which emissions from 2 or more units are exhausted.

Compliance account means a CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account, established by the Administrator for a CAIR NO\textsubscript{X} Ozone Season source under subpart FFFF or IIII of this part, in which any CAIR NO\textsubscript{X} Ozone Season allowance allocations for the CAIR NO\textsubscript{X} Ozone Season units at the source are initially recorded and in which are held any CAIR NO\textsubscript{X} Ozone Season allowances available for use for a control period in order to meet the source’s CAIR NO\textsubscript{X} Ozone Season emissions limitation in accordance with §96.354.

Continuous emission monitoring system or CEMS means the equipment required under subpart HHHH of this part to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of nitrogen oxides emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with part 75 of this chapter. The following systems are the principal types of continuous emission monitoring systems required under subpart HHHH of this part:
§ 96.302

(1) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

(2) A nitrogen oxides concentration monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NO\textsubscript{X} emissions, in parts per million (ppm);

(3) A nitrogen oxides emission rate (or NO\textsubscript{X}-diluent) monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor, a diluent gas (CO\textsubscript{2} or O\textsubscript{2}) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NO\textsubscript{X} concentration, in parts per million (ppm), diluent gas concentration, in percent CO\textsubscript{2} or O\textsubscript{2}, and NO\textsubscript{X} emission rate, in pounds per million British thermal units (lb/mmBtu);

(4) A moisture monitoring system, as defined in § 75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H\textsubscript{2}O;

(5) A carbon dioxide monitoring system, consisting of a CO\textsubscript{2} pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO\textsubscript{2} concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO\textsubscript{2} emissions, in percent CO\textsubscript{2}; and

(6) An oxygen monitoring system, consisting of an O\textsubscript{2} concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O\textsubscript{2} in percent O\textsubscript{2}.

Control period or ozone season means the period beginning May 1 of a calendar year, except as provided in § 96.306(c)(2), and ending on September 30 of the same year, inclusive.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the CAIR designated representative and as determined by the Administrator in accordance with subpart HHHH of this part.

Excess emissions means any ton of nitrogen oxides emitted by the CAIR NO\textsubscript{X} Ozone Season units at a CAIR NO\textsubscript{X} Ozone Season source during a control period that exceeds the CAIR NO\textsubscript{X} Ozone Season emissions limitation for the source.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil-fuel-fired means, with regard to a unit,combusting any amount of fossil fuel in any calendar year.

Fuel oil means any petroleum-based fuel (including diesel fuel or petroleum derivatives such as oil tar) and any recycled or blended petroleum products or petroleum by-products used as a fuel whether in a liquid, solid, or gaseous state.

General account means a CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account, established under subpart FFFF of this part, that is not a compliance account.

Generator means a device that produces electricity.

Gross electrical output means, with regard to a cogeneration unit, electricity made available for use, including any such electricity used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Heat input means, with regard to a specified period of time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the CAIR designated representative and determined by the Administrator in accordance with subpart HHHH of this part and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu).
divided by the unit operating time (in hr) during which the unit combusts the fuel.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the maximum amount of fuel per hour (in Btu/hr) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

Monitoring system means any monitoring system that meets the requirements of subpart HHHH of this part, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Most stringent State or Federal NOₓ emissions limitation means, with regard to a unit, the lowest NOₓ emissions limitation (in terms of lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

Nameplate capacity means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by season or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by season or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.

Oil-fired means, for purposes of subpart EEEE of this part, combusting fuel oil for more than 15.0 percent of the annual heat input in a specified year and not qualifying as coal-fired.

Operator means any person who operates, controls, or supervises a CAIR NOₓ Ozone Season unit or a CAIR NOₓ Ozone Season source and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

Owner means any of the following persons:

(1) With regard to a CAIR NOₓ Ozone Season source or a CAIR NOₓ Ozone Season unit at a source, respectively:

(i) Any holder of any portion of the legal or equitable title in a CAIR NOₓ Ozone Season unit at the source or the CAIR NOₓ Ozone Season unit; or

(ii) Any holder of a leasehold interest in a CAIR NOₓ Ozone Season unit at the source or the CAIR NOₓ Ozone Season unit; or

(iii) Any purchaser of power from a CAIR NOₓ Ozone Season unit at the source or the CAIR NOₓ Ozone Season unit under a life-of-the-unit, firm power contractual arrangement; provided that, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CAIR NOₓ Ozone Season unit; or

(2) With regard to any general account, any person who has an ownership interest with respect to the CAIR NOₓ Ozone Season allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to
represent the person’s ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances.

Permitting authority means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the CAIR NO\textsubscript{X} Ozone Season Trading Program or, if no such agency has been so authorized, the Administrator.

Potential electrical output capacity means 33 percent of a unit’s maximum design heat input, divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

Receive or receipt of means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CAIR NO\textsubscript{X} Ozone Season allowances, the movement of CAIR NO\textsubscript{X} Ozone Season allowances by the Administrator into or between CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System accounts, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shutdown unit (the replaced unit).

Repowered means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:

(1) Atmospheric or pressurized fluidized bed combustion;

(2) Integrated gasification combined cycle;

(3) Magnetohydrodynamics;

(4) Direct and indirect coal-fired turbines;

(5) Integrated gasification fuel cells;

or

(6) As determined by the Administrator in consultation with the Secretary of Energy, a derivative of one or more of the technologies under paragraphs (1) through (5) of this definition and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.

Serial number means, for a CAIR NO\textsubscript{X} Ozone Season allowance, the unique identification number assigned to each CAIR NO\textsubscript{X} Ozone Season allowance by the Administrator.

Sequential use of energy means:

(1) For a topping-cycle cogeneration unit, the use of reject heat from electricity production in a useful thermal energy application or process; or

(2) For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of section 502(c) of the Clean Air Act, a “source” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the States or the District of Columbia that adopts the CAIR NO\textsubscript{X} Ozone Season Trading Program pursuant to §51.123(aa)(1) or (2), (bb), or (dd) of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

(1) In person;
(2) By United States Postal Service; or
(3) By other means of dispatch or transmission and delivery. Compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

Ton means 2,000 pounds. For the purpose of determining compliance with the CAIR NO\textsubscript{X}Ozone Season emissions limitation, total tons of nitrogen oxides emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with subpart HHHH of this part, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

Topping-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[ \text{LHV} = \text{HHV} - 10.55(W + 9H) \]

Where:

\( \text{LHV} \) = lower heating value of fuel in Btu/lb,
\( \text{HHV} \) = higher heating value of fuel in Btu/lb,
\( W \) = Weight % of moisture in fuel, and
\( H \) = Weight % of hydrogen in fuel.

Total energy output means, with regard to a cogeneration unit, the sum of useful power and useful thermal energy produced by the cogeneration unit.

Unit means a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device.

Unit operating day means a calendar day in which a unit combusts any fuel.

Unit operating hour or hour of unit operation means an hour in which a unit combusts any fuel.

Useful power means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Useful thermal energy means, with regard to a cogeneration unit, thermal energy that is:

(1) Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;
(2) Used in a heating application (e.g., space heating or domestic hot water heating); or
(3) Used in a space cooling application (i.e., thermal energy used by an absorption chiller).

Utility power distribution system means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

§ 96.303 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this subpart and subparts BBBB through IIII are defined as follows:

Btu—British thermal unit
CO\textsubscript{2}—carbon dioxide
H\textsubscript{2}O—water
Hg—mercury
hr—hour
kW—kilowatt electrical
kWh—kilowatt hour
lb—pound
mmBtu—million Btu
MWe—megawatt electrical
MWh—megawatt hour
§ 96.304 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State shall be CAIR NO\textsubscript{X} Ozone Season units, and any source that includes one or more such units shall be a CAIR NO\textsubscript{X} Ozone Season source, subject to the requirements of this subpart and subparts BBBB through HHHH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CAIR NO\textsubscript{X} Ozone Season unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR NO\textsubscript{X} Ozone Season unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) The units in a State that meet the requirements set forth in paragraph (b)(1)(i), (b)(2)(i), or (b)(2)(ii) of this section shall not be CAIR NO\textsubscript{X} Ozone Season units:

(1)(i) Any unit that is a CAIR NO\textsubscript{X} Ozone Season unit under paragraph (a)(1) or (2) of this section, is not a CAIR NO\textsubscript{X} Ozone Season unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR NO\textsubscript{X} Ozone Season unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(2)(i) Any unit that is a CAIR NO\textsubscript{X} Ozone Season unit under paragraph (a)(1) or (2) of this section commencing operation before January 1, 1985:

(A) Qualifying as a solid waste incineration unit; and

(B) With an average annual fuel consumption of non-fossil fuel for 1985–1987 exceeding 80 percent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any 3 consecutive calendar years after 1990 exceeding 80 percent (on a Btu basis).

(ii) Any unit that is a CAIR NO\textsubscript{X} Ozone Season unit under paragraph (a)(1) or (2) of this section commencing operation on or after January 1, 1985:

(A) Qualifying as a solid waste incineration unit; and

(B) With an average annual fuel consumption of non-fossil fuel for the first 3 calendar years of operation exceeding 80 percent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any 3 consecutive calendar years after 1990 exceeding 80 percent (on a Btu basis).

(iii) If a unit qualifies as a solid waste incineration unit and meets the requirements of paragraph (b)(2)(i) or (ii) of this section for at least 3 consecutive calendar years, but subsequently no longer meets all such requirements, the unit shall become a CAIR NO\textsubscript{X} Ozone Season unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(2)(i) or (ii) of this section.
§ 96.305 Retired unit exemption.

(a)(1) Any CAIR NO\textsubscript{X} Ozone Season unit that is permanently retired and is not a CAIR NO\textsubscript{X} Ozone Season opt-in unit under subpart IIII of this part shall be exempt from the CAIR NO\textsubscript{X} Ozone Season Trading Program, except for the provisions of this section, §96.302, §96.303, §96.304, §96.306(c)(4) through (7), §96.307, §96.308, and subparts BBBB and EEEE through GGGG of this part.

(2) The exemption under paragraph (a)(1) of this section shall become effective the day on which the CAIR NO\textsubscript{X} Ozone Season unit is permanently retired. Within 30 days of the unit’s permanent retirement, the CAIR designated representative shall submit a statement to the permitting authority otherwise responsible for administering any CAIR permit for the unit and shall submit a copy of the statement to the Administrator. The statement shall state, in a format prescribed by the permitting authority, that the unit was permanently retired on a specific date and will comply with the requirements of paragraph (b) of this section.

(b) Special provisions.

(1) A unit exempt under paragraph (a) of this section shall not emit any nitrogen oxides starting on the date that the exemption takes effect.

(2) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances under subpart EEEE of this part to a unit exempt under paragraph (a) of this section.

(3) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (a) of this section shall retain, at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(4) The owners and operators and, to the extent applicable, the CAIR designated representative of a unit exempt under paragraph (a) of this section shall comply with the requirements of the CAIR NO\textsubscript{X} Ozone Season Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(5) A unit exempt under paragraph (a) of this section and located at a source that is required, or but for this exemption would be required, to have a title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete CAIR permit application under §96.322 for the unit not less than 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2009 or the date on which the unit resumes operation.

(6) On the earlier of the following dates, a unit exempt under paragraph (a) of this section shall lose its exemption:

(i) The date on which the CAIR designated representative submits a CAIR permit application for the unit under paragraph (b)(5) of this section;

(ii) The date on which the CAIR designated representative is required under paragraph (b)(5) of this section to submit a CAIR permit application for the unit; or

(iii) The date on which the unit resumes operation, if the CAIR designated representative is not required to submit a CAIR permit application for the unit.

(7) For the purpose of applying monitoring, reporting, and recordkeeping requirements under subpart HHHH of this part, a unit that loses its exemption under paragraph (a) of this section shall be treated as a unit that commences commercial operation on the
first date on which the unit resumes operation.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25393, Apr. 28, 2006]

§ 96.306 Standard requirements.

(a) Permit requirements. (1) The CAIR designated representative of each CAIR NOX Ozone Season source required to have a title V operating permit and each CAIR NOX Ozone Season unit required to have a title V operating permit at the source shall:

(i) Submit to the permitting authority a complete CAIR permit application under §96.322 in accordance with the deadlines specified in §96.321; and

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.

(2) The owners and operators of each CAIR NOX Ozone Season source required to have a title V operating permit and each CAIR NOX Ozone Season unit required to have a title V operating permit at the source shall have a CAIR permit issued by the permitting authority under subpart CCCC of this part for the source and operate the source and the unit in compliance with such CAIR permit.

(3) Except as provided in subpart IIII of this part, the owners and operators of a CAIR NOX Ozone Season source that is not otherwise required to have a title V operating permit and each CAIR NOX Ozone Season unit that is not otherwise required to have a title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under subpart CCCC of this part for such CAIR NOX Ozone Season source and such CAIR NOX Ozone Season unit.

(b) Monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the CAIR designated representative, of each CAIR NOX Ozone Season source and each CAIR NOX Ozone Season unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of subpart HHHH of this part.

(2) The emissions measurements recorded and reported in accordance with subpart HHHH of this part shall be used to determine compliance by each CAIR NOX Ozone Season source with the CAIR NOX Ozone Season emissions limitation under paragraph (c) of this section.

(c) Nitrogen oxides ozone season emission requirements. (1) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR NOX Ozone Season source and each CAIR NOX Ozone Season unit at the source shall hold, in the source’s compliance account, CAIR NOX Ozone Season allowances available for compliance deductions for the control period under §96.334(a) in an amount not less than the tons of total nitrogen oxides emissions for the control period from all CAIR NOX Ozone Season units at the source, as determined in accordance with subpart HHHH of this part.

(2) A CAIR NOX Ozone Season unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of May 1, 2009 or the deadline for meeting the unit’s monitor certification requirements under §96.370(b)(1), (2), (3), or (7) and for each control period thereafter.

(3) A CAIR NOX Ozone Season allowance shall not be deducted, for compliance with the requirements under paragraph (c)(1) of this section, for a control period in a calendar year before the year for which the CAIR NOX Ozone Season allowance was allocated.

(4) CAIR NOX Ozone Season allowances shall be held in, deducted from, or transferred into or among CAIR NOX Ozone Season Allowance Tracking System accounts in accordance with subparts FFFF, GGGG, and IIII of this part.

(5) A CAIR NOX Ozone Season allowance is a limited authorization to emit one ton of nitrogen oxides in accordance with the CAIR NOX Ozone Season Trading Program. No provision of the CAIR NOX Ozone Season Trading Program, the CAIR permit, or an exemption under §96.305 and no provision of law shall be construed to limit the authority of the State or the United States to terminate or limit such authorization.

(6) A CAIR NOX Ozone Season allowance does not constitute a property right.
(7) Upon recordation by the Administrator under subpart FFFF, GGGG, or IIII of this part, every allocation, transfer, or deduction of a CAIR NO\textsubscript{X} Ozone Season allowance to or from a CAIR NO\textsubscript{X} Ozone Season source’s compliance account is incorporated automatically in any CAIR permit of the source.

(d) Excess emissions requirements. If a CAIR NO\textsubscript{X} Ozone Season source emits nitrogen oxides during any control period in excess of the CAIR NO\textsubscript{X} Ozone Season emissions limitation, then:

(1) The owners and operators of the source and each CAIR NO\textsubscript{X} Ozone Season unit at the source shall surrender the CAIR NO\textsubscript{X} Ozone Season allowances required for deduction under §96.354(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable State law; and

(2) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart, the Clean Air Act, and applicable State law.

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source and each CAIR NO\textsubscript{X} Ozone Season unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The certificate of representation under §96.313 for the CAIR designated representative for the source and each CAIR NO\textsubscript{X} Ozone Season unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation under §96.313 changing the CAIR designated representative.

(ii) All emissions monitoring information in accordance with subpart HHHH of this part, provided that to the extent that subpart HHHH of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) All emissions monitoring information in accordance with subpart HHHH of this part, provided that to the extent that subpart HHHH of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iv) Copies of all reports, compliance certifications, and other submissions and all records made or required under the CAIR NO\textsubscript{X} Ozone Season Trading Program.

(f) Liability. (1) Each CAIR NO\textsubscript{X} Ozone Season source and each CAIR NO\textsubscript{X} Ozone Season unit shall meet the requirements of the CAIR NO\textsubscript{X} Ozone Season Trading Program.

(2) Any provision of the CAIR NO\textsubscript{X} Ozone Season Trading Program that applies to a CAIR NO\textsubscript{X} Ozone Season source or the CAIR designated representative of a CAIR NO\textsubscript{X} Ozone Season source shall also apply to the owners and operators of such source and of the CAIR NO\textsubscript{X} Ozone Season units at the source.

(3) Any provision of the CAIR NO\textsubscript{X} Ozone Season Trading Program that applies to a CAIR NO\textsubscript{X} Ozone Season unit or the CAIR designated representative of a CAIR NO\textsubscript{X} Ozone Season unit shall also apply to the owners and operators of such unit.

(g) Effect on other authorities. No provision of the CAIR NO\textsubscript{X} Ozone Season Trading Program, a CAIR permit application, a CAIR permit, or an exemption under §96.305 shall be construed as exempting or excluding the owners and operators, and the CAIR designated representative, of a CAIR NO\textsubscript{X} Ozone Season source or CAIR NO\textsubscript{X} Ozone Season unit from compliance with any other provision of the applicable, approved State implementation plan, a...
federally enforceable permit, or the Clean Air Act.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25393, Apr. 28, 2006]

§ 96.307 Computation of time.
   (a) Unless otherwise stated, any time period scheduled, under the CAIR NOx Ozone Season Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.
   (b) Unless otherwise stated, any time period scheduled, under the CAIR NOx Ozone Season Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.
   (c) Unless otherwise stated, if the final day of any time period, under the CAIR NOx Ozone Season Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

§ 96.308 Appeal procedures.
   The appeal procedures for decisions of the Administrator under the CAIR NOx Ozone Season Trading Program are set forth in part 78 of this chapter.

Subpart BBBB—CAIR Designated Representative for CAIR NOx Ozone Season Sources

SOURCE: 70 FR 25382, May 12, 2005, unless otherwise noted.

§ 96.310 Authorization and responsibilities of CAIR designated representative.
   (a) Except as provided under §96.311, each CAIR NOx Ozone Season source, including all CAIR NOx Ozone Season units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NOx Ozone Season Trading Program concerning the source or any CAIR NOx Ozone Season unit at the source.
   (b) The CAIR designated representative of the CAIR NOx Ozone Season source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NOx Ozone Season units at the source and shall act in accordance with the certification statement in §96.313(a)(4)(iv).
   (c) Upon receipt by the Administrator of a complete certificate of representation under §96.313, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR NOx Ozone Season source represented and each CAIR NOx Ozone Season unit at the source in all matters pertaining to the CAIR NOx Ozone Season Trading Program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the permitting authority, the Administrator, or a court regarding the source or unit.
   (d) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NOx Ozone Season Allowance Tracking System account will be established for a CAIR NOx Ozone Season unit at a source, until the Administrator has received a complete certificate of representation under §96.313 for a CAIR designated representative of the source and the CAIR NOx Ozone Season units at the source.
   (e)(1) Each submission under the CAIR NOx Ozone Season Trading Program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR NOx Ozone Season source on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for
submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.’’

(2) The permitting authority and the Administrator will accept or act on a submission made on behalf of owner or operators of a CAIR NO\textsubscript{X} Ozone Season source or a CAIR NO\textsubscript{X} Ozone Season unit only if the submission has been made, signed, and certified in accordance with paragraph (e)(1) of this section.

§ 96.311 Alternate CAIR designated representative.

(a) A certificate of representation under §96.313 may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.

(b) Upon receipt by the Administrator of a complete certificate of representation under §96.313, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.

(c) Except in this section and §§96.302, 96.310(a) and (d), 96.312, 96.313, 96.315, and 96.392 whenever the term ‘‘CAIR designated representative’’ is used in subparts AAAA through IIII of this part, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25393, Apr. 28, 2006]

§ 96.312 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

(a) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §96.313. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source and the CAIR NO\textsubscript{X} Ozone Season units at the source.

(b) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §96.313. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source and the CAIR NO\textsubscript{X} Ozone Season units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CAIR NO\textsubscript{X} Ozone Season source or a CAIR NO\textsubscript{X} Ozone Season unit is not included in the list of owners and operators in the certificate of representation under §96.313, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the Administrator, or a court, as if the owner or operator were included in such list.

(2) Within 30 days following any change in the owners and operators of a CAIR NO\textsubscript{X} Ozone Season source or a CAIR NO\textsubscript{X} Ozone Season unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation.
under §96.313 amending the list of owners and operators to include the change.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25393, Apr. 28, 2006]

§ 96.313 Certificate of representation.

(a) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the CAIR NO\textsubscript{X} Ozone Season source, and each CAIR NO\textsubscript{X} Ozone Season unit at the source, for which the certificate of representation is submitted, including identification and nameplate capacity of each generator served by each such unit.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative.

(3) A list of the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source and of each CAIR NO\textsubscript{X} Ozone Season unit at the source.

(4) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative—

   (i) “I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR NO\textsubscript{X} Ozone Season unit at the source.”

   (ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO\textsubscript{X} Ozone Season Trading Program on behalf of the owners and operators of the source and each CAIR NO\textsubscript{X} Ozone Season unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions.”

   (iii) “I certify that the owners and operators of the source and of each CAIR NO\textsubscript{X} Ozone Season unit at the source shall be bound by any order issued to me by the Administrator, the permitting authority, or a court regarding the source or unit.”

   (iv) “Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR NO\textsubscript{X} Ozone Season unit, or where a utility or industrial customer purchases power from a CAIR NO\textsubscript{X} Ozone Season unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘CAIR designated representative’ or ‘alternate CAIR designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR NO\textsubscript{X} Ozone Season unit at the source; and CAIR NO\textsubscript{X} Ozone Season allowances and proceeds of transactions involving CAIR NO\textsubscript{X} Ozone Season allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR NO\textsubscript{X} Ozone Season allowances by contract, CAIR NO\textsubscript{X} Ozone Season allowances and proceeds of transactions involving CAIR NO\textsubscript{X} Ozone Season allowances will be deemed to be held or distributed in accordance with the contract.”

(5) The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

(b) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25393, Apr. 28, 2006]

§ 96.314 Objections concerning CAIR designated representative.

(a) Once a complete certificate of representation under §96.313 has been submitted and received, the permitting authority and the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation

143
§ 96.315 Delegation by CAIR designated representative and alternate CAIR designated representative.

(a) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(b) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(c) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

(4) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:

(i) “I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.315(d) shall be deemed to be an electronic submission by me.”

(ii) “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.315(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.315 is terminated.”

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph
Environmental Protection Agency

§ 96.323 Subsection of CAIR permit applications.

(a) Duty to apply. The CAIR designated representative of any CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §96.322 for the source covering each CAIR NO\textsubscript{X} Ozone Season unit at the source at least 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2009 or the date on which the CAIR NO\textsubscript{X} Ozone Season unit commences commercial operation, except as provided in §96.383(a).

(b) Duty to Reapply. For a CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under §96.322 for the source covering each CAIR NO\textsubscript{X} Ozone Season unit at the source to renew the CAIR permit in accordance with the permitting authority’s title V operating permits regulations addressing permit renewal, except as provided in §96.383(b).

[70 FR 25382, May 12, 2005, as amended at 71 FR 25394, Apr. 28, 2006]

§ 96.321 Submission of CAIR permit applications.

(a) [Duty to apply. The CAIR designated representative of any CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §96.322 for the source covering each CAIR NO\textsubscript{X} Ozone Season unit at the source at least 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2009 or the date on which the CAIR NO\textsubscript{X} Ozone Season unit commences commercial operation, except as provided in §96.383(a).]

(b) [Duty to Reapply. For a CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under §96.322 for the source covering each CAIR NO\textsubscript{X} Ozone Season unit at the source to renew the CAIR permit in accordance with the permitting authority’s title V operating permits regulations addressing permit renewal, except as provided in §96.383(b).]

[70 FR 25382, May 12, 2005, as amended at 71 FR 25394, Apr. 28, 2006]

§ 96.322 Information requirements for CAIR permit applications.

A complete CAIR permit application shall include the following elements concerning the CAIR NO\textsubscript{X} Ozone Season source for which the application is submitted, in a format prescribed by the permitting authority:

(a) Identification of the CAIR NO\textsubscript{X} Ozone Season source;

(b) Identification of each CAIR NO\textsubscript{X} Ozone Season unit at the CAIR NO\textsubscript{X} Ozone Season source; and

(c) The standard requirements under §96.306.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25394, Apr. 28, 2006]

§ 96.323 CAIR permit contents and term.

(a) Each CAIR permit will contain, in a format prescribed by the permitting authority, all elements required for a complete CAIR permit application under §96.322.

(b) Each CAIR permit is deemed to incorporate automatically the definitions of terms under §96.302 and, upon recordation by the Administrator
§ 96.324 CAIR permit revisions.

Except as provided in §96.323(b), the permitting authority will revise the CAIR permit, as necessary, in accordance with the permitting authority’s title V operating permits regulations or the permitting authority’s regulations for other federally enforceable permits as applicable addressing permit revisions.

(b) If a permitting authority issues additional CAIR NO\textsubscript{X} Ozone Season allowance allocations under §51.123(aa)(2)(iii)(A) of this chapter, the amount in the State trading budget for a control period in a calendar year will be the sum of the amount set forth for the State and for the year in paragraph (a) of this section and the amount of additional CAIR NO\textsubscript{X} Ozone Season allowance allocations issued under §51.123(aa)(2)(iii)(A) of this chapter for the year.

§ 96.341 Timing requirements for CAIR NO\textsubscript{X} Ozone Season allowance allocations.

(a) By October 31, 2006, the permitting authority will submit to the Administrator the CAIR NO\textsubscript{X} Ozone Season allowance allocations, in a format prescribed by the Administrator and in accordance with §96.342(a) and (b), for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014.

(b) By October 31, 2009 and October 31 of each year thereafter, the permitting authority will submit to the Administrator the CAIR NO\textsubscript{X} Ozone Season allowance allocations, in a format prescribed by the Administrator and in accordance with §96.342(a) and (b), for the control period in the sixth year after the year of the applicable deadline for submission under this paragraph.

(c) By July 31, 2009 and July 31 of each year thereafter, the permitting authority will submit to the Administrator the CAIR NO\textsubscript{X} Ozone Season allowance allocations, in a format prescribed by the Administrator and in accordance with §96.342(c), (a), and (d), for the control period in the year of the applicable deadline for submission under this paragraph.

[70 FR 25382, May 12, 2005, as amended at 71 FR 23394, Apr. 28, 2006]
Environmental Protection Agency

§ 96.342 CAIR NO\(_X\) Ozone Season allowance allocations.

(a)(1) The baseline heat input (in mmBtu) used with respect to CAIR NO\(_X\) Ozone Season allowance allocations under paragraph (b) of this section for each CAIR NO\(_X\) Ozone Season unit will be:

(i) For units commencing operation before January 1, 2001 the average of the 3 highest amounts of the unit’s adjusted control period heat input for 2000 through 2004, with the adjusted control period heat input for each year calculated as follows:

(A) If the unit is coal-fired during the year, the unit’s control period heat input for such year is multiplied by 100 percent;

(B) If the unit is oil-fired during the year, the unit’s control period heat input for such year is multiplied by 60 percent; and

(C) If the unit is not subject to paragraph (a)(1)(i)(A) or (B) of this section, the unit’s control period heat input for such year is multiplied by 40 percent.

(ii) For units commencing operation on or after January 1, 2001 and operating each calendar year during a period of 5 or more consecutive calendar years, the average of the 3 highest amounts of the unit’s total converted control period heat input over the first such 5 years.

(b)(1) For each control period in 2009 and thereafter, the permitting authority will allocate to all CAIR NO\(_X\) Ozone Season units in the State that have a baseline heat input (as determined under paragraph (a) of this section) a total amount of CAIR NO\(_X\) Ozone Season allowances equal to 95 percent for a control period during 2009 through 2014, and 97 percent for a control period during 2015 and thereafter, of the tons of NO\(_X\) emissions in the State trading budget under § 96.340 (except as provided in paragraph (d) of this section).

(b)(2) For each control period in 2009 and thereafter, the permitting authority will allocate CAIR NO\(_X\) Ozone Season allowances to each CAIR NO\(_X\) Ozone Season unit under paragraph (b)(1) of this section in an amount determined by multiplying the total amount of CAIR NO\(_X\) Ozone Season allowances allocated under paragraph (b)(1) of this section by the ratio of the baseline heat input of the generator or generators served by the unit multiplied by 7,900 Btu/kWh, if the unit is coal-fired for the year, or 6,675 Btu/kWh, if the unit is not coal-fired for the year, and divided by 1,000,000 Btu/mmBtu, provided that if a generator is served by 2 or more units, then the gross electrical output of the generator will be attributed to each unit in proportion to the unit’s share of the total control period heat input of such units for the year;

(B) For a unit that is a boiler and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the total heat energy (in Btu) of the steam produced by the boiler during the control period, divided by 0.8 and by 1,000,000 Btu/mmBtu; or

(C) For a unit that is a combustion turbine and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the control period gross electrical output of the enclosed device comprising the compressor, combustor, and turbine multiplied by 3,413 Btu/kWh, plus the total heat energy (in Btu) of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by 1,000,000 Btu/mmBtu.
of such CAIR NO\textsubscript{X} Ozone Season unit to the total amount of baseline heat input of all such CAIR NO\textsubscript{X} Ozone Season units in the State and rounding to the nearest whole allowance as appropriate.

(c) For each control period in 2009 and thereafter, the permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to CAIR NO\textsubscript{X} Ozone Season units in a State that are not allocated CAIR NO\textsubscript{X} Ozone Season allowances under paragraph (b) of this section because the units do not yet have a baseline heat input under paragraph (a) of this section or because the units have a baseline heat input but all CAIR NO\textsubscript{X} Ozone Season allowances available under paragraph (b) of this section for the control period are already allocated, in accordance with the following procedures:

(1) The permitting authority will establish a separate new unit set-aside for each control period. Each new unit set-aside will be allocated CAIR NO\textsubscript{X} Ozone Season allowances equal to 5 percent for a control period in 2009 through 2014, and 3 percent for a control period in 2015 and thereafter, of the amount of tons of NO\textsubscript{X} emissions in the State trading budget under § 96.340.

(2) The CAIR designated representative of such a CAIR NO\textsubscript{X} Ozone Season unit may submit to the permitting authority a request, in a format specified by the permitting authority, to be allocated CAIR NO\textsubscript{X} Ozone Season allowances, starting with the later of the control period in 2009 or the first control period after the control period in which the CAIR NO\textsubscript{X} Ozone Season unit commences commercial operation and until the first control period for which the unit is allocated CAIR NO\textsubscript{X} Ozone Season allowances under paragraph (b) of this section.

(3) In a CAIR NO\textsubscript{X} Ozone Season allowance allocation request for each control period for which CAIR NO\textsubscript{X} Ozone Season allowances are sought must be submitted on or before February 1 before such control period and after the date on which the CAIR NO\textsubscript{X} Ozone Season unit commences commercial operation.

(4) The permitting authority will review each CAIR NO\textsubscript{X} Ozone Season allowance allocation request under paragraph (c)(2) of this section and will allocate CAIR NO\textsubscript{X} Ozone Season allowances for each control period pursuant to such request as follows:

(i) The permitting authority will accept an allowance allocation request only if the request meets, or is adjusted by the permitting authority as necessary to meet, the requirements of paragraphs (c)(2) and (3) of this section.

(ii) On or after February 1 before the control period, the permitting authority will determine the sum of the CAIR NO\textsubscript{X} Ozone Season allowances requested (as adjusted under paragraph (c)(4)(i) of this section) in all allowance allocation requests accepted under paragraph (c)(4)(i) of this section for the control period.

(iii) If the amount of CAIR NO\textsubscript{X} Ozone Season allowances in the new unit set-aside for the control period is greater than or equal to the sum under paragraph (c)(4)(ii) of this section, then the permitting authority will allocate the amount of CAIR NO\textsubscript{X} Ozone Season allowances requested (as adjusted under paragraph (c)(4)(i) of this section) to each CAIR NO\textsubscript{X} Ozone Season unit covered by an allowance allocation request accepted under paragraph (c)(4)(i) of this section.

(iv) If the amount of CAIR NO\textsubscript{X} Ozone Season allowances in the new unit set-aside for the control period is less than the sum under paragraph (c)(4)(ii) of this section, then the permitting authority will allocate to each CAIR NO\textsubscript{X} Ozone Season unit covered by an allowance allocation request accepted under paragraph (c)(4)(i) of this section the amount of the CAIR NO\textsubscript{X} Ozone Season allowances requested (as adjusted under paragraph (c)(4)(i) of this section), multiplied by the amount of CAIR NO\textsubscript{X} Ozone Season allowances in the new unit set-aside for the control period, divided by the sum determined...
Environmental Protection Agency § 96.351

under paragraph (c)(4)(ii) of this section, and rounded to the nearest whole allowance as appropriate.

(v) The permitting authority will notify each CAIR designated representative that submitted an allowance allocation request of the amount of CAIR NO\textsubscript{X} Ozone Season allowances (if any) allocated for the control period to the CAIR NO\textsubscript{X} Ozone Season unit covered by the request.

(d) If, after completion of the procedures under paragraph (c)(4) of this section for a control period, any unallocated CAIR NO\textsubscript{X} Ozone Season allowances remain in the new unit set-aside for the control period, the permitting authority will allocate to each CAIR NO\textsubscript{X} Ozone Season unit that was allocated CAIR NO\textsubscript{X} Ozone Season allowances under paragraph (b) of this section an amount of CAIR NO\textsubscript{X} Ozone Season allowances equal to the total amount of such remaining unallocated CAIR NO\textsubscript{X} Ozone Season allowances, multiplied by the unit’s allocation under paragraph (b) of this section, divided by 95 percent for a control period during 2009 through 2014, and 97 percent for a control period during 2015 and thereafter, of the amount of tons of NO\textsubscript{X} emissions in the State trading budget under §96.340, and rounded to the nearest whole allowance as appropriate.

Subpart FFFF—CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System

SOURCE: 70 FR 25382, May 12, 2005, unless otherwise noted.

§ 96.350 [Reserved]

§ 96.351 Establishment of accounts.

(a) Compliance accounts. Except as provided in §96.384(e), upon receipt of a complete certificate of representation under §96.313, the Administrator will establish a compliance account for the CAIR NO\textsubscript{X} Ozone Season source for which the certificate of representation was submitted, unless the source already has a compliance account.

(b) General accounts—(1) Application for general account. (i) Any person may apply to open a general account for the purpose of holding and transferring CAIR NO\textsubscript{X} Ozone Season allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(B) Organization name and type of organization, if applicable;

(C) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership interest with respect to the CAIR NO\textsubscript{X} Ozone Season allowances held in the general account;

(D) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances held in the general account.

(E) A list of all persons subject to a binding agreement for the CAIR authorized account representative or the alternate CAIR authorized account representative: I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances held in the general account.

VerDate Sep<11>2014 13:36 Oct 20, 2017 Jkt 241173 PO 00000 Frm 00159 Fmt 8010 Sfmt 8010 Y:\SGML\241173.XXX 241173nlaroche on DSK9F9SC42PROD with CFR
inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account.’’

(E) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.

(iii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(2) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative. (i) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(A) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(B) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: ‘‘I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR NO\textsubscript{X} Ozone Season allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.’’

(iii) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(ii) of this section.

(3) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest. (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new
CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO\textsubscript{X} Ozone Season allowances in the general account.

(ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO\textsubscript{X} Ozone Season allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances in the general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(4) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative.

(i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (b)(3)(i) or (ii) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternative CAIR authorized account representative or the finality of any decision or order by the Administrator under the CAIR NO\textsubscript{X} Ozone Season Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR NO\textsubscript{X} Ozone Season allowance transfers.

(5) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative. (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FFFF and GGGG of this part.

(ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FFFF and GGGG of this part.

(iii) In order to delegate authority to make an electronic submission to the Administrator in accordance with
paragraph (b)(5)(i) or (ii) of this section, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;

(B) The name, address, e-mail address, telephone number, and, facsimile transmission number (if any) of each such natural person (referred to as an "agent");

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (b)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR designated representative submitting such notice of delegation.

(E) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.351(b)(5)(iv) I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.351(b)(5) is terminated."

(iv) A notice of delegation submitted under paragraph (b)(5)(iii) of this section shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (b)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (b)(5)(iv) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

(c) Account identification. The Administrator will assign a unique identifying number to each account established under paragraph (a) or (b) of this section.

§ 96.352 Responsibilities of CAIR authorized account representative.

Following the establishment of a CAIR NOx Ozone Season Allowance Tracking System account, all submissions to the Administrator pertaining to the account, including, but not limited to, submissions concerning the de-duction or transfer of CAIR NOx Ozone Season allowances in the account, shall be made only by the CAIR designated account representative for the account.

§ 96.353 Recordation of CAIR NOx Ozone Season allowance allocations.

(a) By September 30, 2007, the Administrator will record in the CAIR NOx Ozone Season source’s compliance account the CAIR NOx Ozone Season allowances allocated for the CAIR NOx Ozone Season units at the source, as submitted by the permitting authority in accordance with §96.341(a), for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014.

(b) By December 1, 2009, the Administrator will record in the CAIR NOx
Ozone Season source’s compliance account the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source, as submitted by the permitting authority in accordance with §96.341(b), for the control period in 2015.

(c) By December 1, 2010 and December 1 of each year thereafter, the Administrator will record in the CAIR NO\textsubscript{X} Ozone Season source’s compliance account the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source, as submitted by the permitting authority in accordance with §96.341(b), for the control period in the sixth year after the year of the applicable deadline for recordation under this paragraph.

(d) By September 1, 2009 and September 1 of each year thereafter, the Administrator will record in the CAIR NO\textsubscript{X} Ozone Season source’s compliance account the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source, as submitted by the permitting authority or determined by the Administrator in accordance with §96.341(c), for the control period in the year of the applicable deadline for recordation under this paragraph.

(e) Serial numbers for allocated CAIR NO\textsubscript{X} Ozone Season allowances. When recording the allocation of CAIR NO\textsubscript{X} Ozone Season allowances for a CAIR NO\textsubscript{X} Ozone Season unit in a compliance account, the Administrator will assign each CAIR NO\textsubscript{X} Ozone Season allowance a unique identification number that will include digits identifying the year of the control period for which the CAIR NO\textsubscript{X} Ozone Season allowance is allocated.

§96.354 Compliance with CAIR NO\textsubscript{X} emissions limitation.

(a) Allowance transfer deadline. The CAIR NO\textsubscript{X} Ozone Season allowances available to be deducted for compliance with a source’s CAIR NO\textsubscript{X} Ozone Season emissions limitation for a control period in a given calendar year only if the CAIR NO\textsubscript{X} Ozone Season allowances:

(1) Were allocated for the control period in the year or a prior year; and

(2) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR NO\textsubscript{X} Ozone Season allowance transfer correctly submitted for recordation under §§96.360 and 96.361 by the allowance transfer deadline for the control period.

(c) Identification of CAIR NO\textsubscript{X} Ozone Season allowances by serial number. The CAIR authorized account representative for a source’s compliance account may request that specific CAIR NO\textsubscript{X} Ozone Season allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (b) or (d) of this section. Such request shall be submitted to the Administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the Administrator, the identification of the CAIR NO\textsubscript{X} Ozone Season source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CAIR NO\textsubscript{X} Ozone Season allowances under paragraph (b) or (d) of this section from the source’s compliance account, in the absence of an identification or in the case of a partial identification of CAIR NO\textsubscript{X} Ozone Season allowances by serial number under paragraph (c)(1) of this section, on a first-in, first-out (FIFO) accounting basis in the following order:

(i) Any CAIR NO\textsubscript{X} Ozone Season allowances that were allocated to the units at the source, in the order of recordation; and then

(ii) Any CAIR NO\textsubscript{X} Ozone Season allowances that were allocated to any entity and transferred and recorded in the compliance account pursuant to part GGGG of this part, in the order of recordation.

(d) Deductions for excess emissions. (1) After making the deductions for compliance under paragraph (b) of this section for a control period in a calendar year in which the CAIR NO\textsubscript{X} Ozone Season source has excess emissions, the Administrator will deduct from the
source’s compliance account an amount of CAIR NO\textsubscript{X} Ozone Season allowances, allocated for the control period in the immediately following calendar year, equal to 3 times the number of tons of the source’s excess emissions.

(2) Any allowance deduction required under paragraph (d)(1) of this section shall not affect the liability of the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source or the CAIR NO\textsubscript{X} Ozone Season units at the source for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violations, as ordered under the Clean Air Act or applicable State law.

(e) Recordation of deductions. The Administrator will record in the appropriate compliance account all deductions from such an account under paragraphs (b) and (d) of this section and subpart III.

(f) Administrator’s action on submissions. (1) The Administrator may review and conduct independent audits concerning any submission under the CAIR NO\textsubscript{X} Ozone Season Trading Program and make appropriate adjustments of the information in the submissions.

(2) The Administrator may deduct CAIR NO\textsubscript{X} Ozone Season allowances from or transfer CAIR NO\textsubscript{X} Ozone Season allowances to a source’s compliance account based on the information in the submissions, as adjusted under paragraph (f)(1) of this section, and record such deductions and transfers.

§ 96.355 Banking.

(a) CAIR NO\textsubscript{X} Ozone Season allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CAIR NO\textsubscript{X} Ozone Season allowance that is held in a compliance account or a general account will remain in such account unless and until the CAIR NO\textsubscript{X} Ozone Season allowance is deducted or transferred under
Subpart GGGG—CAIR NO\textsubscript{X} Ozone Season Allowance Transfers

§ 96.360 Submission of CAIR NO\textsubscript{X} Ozone Season allowance transfers.

A CAIR authorized account representative seeking recordation of a CAIR NO\textsubscript{X} Ozone Season allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the CAIR NO\textsubscript{X} Ozone Season allowance transfer shall include the following elements, in a format specified by the Administrator:

(a) The account numbers for both the transferor and transferee accounts;
(b) The serial number of each CAIR NO\textsubscript{X} Ozone Season allowance that is in the transferor account and is to be transferred; and
(c) The name and signature of the CAIR authorized account representative of the transferor account and the date signed.

§ 96.361 EPA recordation.

(a) Within 5 business days (except as provided in paragraph (b) of this section) of receiving a CAIR NO\textsubscript{X} Ozone Season allowance transfer, the Administrator will record a CAIR NO\textsubscript{X} Ozone Season allowance transfer by moving each CAIR NO\textsubscript{X} Ozone Season allowance from the transferor account to the transferee account as specified by the request, provided that:

(1) A decision not to record the transfer, and
(2) The reasons for such non-recordation.

(b) Notification of non-recordation. Within 10 business days of receipt of a CAIR NO\textsubscript{X} Ozone Season allowance transfer that fails to meet the requirements of § 96.361(a), the Administrator will notify the CAIR authorized account representatives of both accounts subject to the transfer of:

(1) The reasons for such non-recordation.

(c) Nothing in this section shall preclude the submission of a CAIR NO\textsubscript{X} Ozone Season allowance transfer for recordation following notification of non-recordation.

Subpart HHHH—Monitoring and Reporting

§ 96.370 General requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR NO\textsubscript{X} Ozone Season unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subpart H of part 75 of this chapter. For purposes of complying with such requirements, the definitions in § 96.302 and in § 72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CAIR NO\textsubscript{X} Ozone Season unit,” “CAIR designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively, as defined in § 96.302.
NO\textsubscript{X} Ozone Season unit but that is monitored under §75.72(b)(2)(ii) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CAIR NO\textsubscript{X} Ozone Season unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR NO\textsubscript{X} Ozone Season unit shall:

(1) Install all monitoring systems required under this subpart for monitoring NO\textsubscript{X} mass emissions and individual unit heat input (including all systems required to monitor NO\textsubscript{X} emission rate, NO\textsubscript{X} concentration, stack gas moisture content, stack gas flow rate, CO\textsubscript{2} or O\textsubscript{2} concentration, and fuel flow rate, as applicable, in accordance with §§75.71 and 75.72 of this chapter);

(2) Successfully complete all certification tests required under §96.371 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the following dates. The owner or operator shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the following dates.

(1) For the owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit that commences commercial operation before July 1, 2007, by May 1, 2008.

(2) For the owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit that commences commercial operation on or after July 1, 2007 and that reports on a control period basis under §96.374(d)(2)(ii), by the later of the following dates:

(i) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation; or

(ii) If the compliance date under paragraph (b)(3)(i) of this section is not during a control period, May 1 immediately following the compliance date under paragraph (b)(3)(i) of this section.

(4) For the owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit for which construction of a new stack or flue or installation of add-on NO\textsubscript{X} emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (6), or (7) of this section and that reports on an annual basis under §96.374(d), by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO\textsubscript{X} emissions controls.

(5) For the owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit for which construction of a new stack or flue or installation of add-on NO\textsubscript{X} emission controls is completed after the applicable deadline under paragraph (b)(1), (3), (6), or (7) of this section and that reports on a control period basis under §96.374(d)(2)(ii), by the later of the following dates:

(i) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO\textsubscript{X} emissions controls; or

(ii) If the compliance date under paragraph (b)(5)(i) of this section is not during a control period, May 1 immediately following the compliance date under paragraph (b)(5)(i) of this section.

(6) Notwithstanding the dates in paragraphs (b)(1), (2), and (3) of this section, for the owner or operator of a unit for which a CAIR NO\textsubscript{X} Ozone Season opt-in permit application is submitted and not withdrawn and a CAIR...
Environmental Protection Agency  § 96.371

opt-in permit is not yet issued or denied under subpart III of this part, by the date specified in §96.384(b).

(7) Notwithstanding the dates in paragraphs (b)(1), (2), and (3) of this section, for the owner or operator of a CAIR NO\textsubscript{X} Ozone Season opt-in unit, by the date on which the CAIR NO\textsubscript{X} Ozone Season opt-in unit under subpart III of this part enters the CAIR NO\textsubscript{X} Ozone Season Trading Program as provided in §96.384(g).

(c) Reporting data. The owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NO\textsubscript{X} concentration, NO\textsubscript{X} emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NO\textsubscript{X} mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter, section 2.4 of appendix D to part 75 of this chapter, or section 2.5 of appendix E to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §96.375.

(2) No owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall operate the unit so as to discharge, or allow to be discharged, NO\textsubscript{X} emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(3) No owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NO\textsubscript{X} mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under §96.305 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the permitting authority for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

(iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with §96.371(d)(3)(i).

(e) Long-term cold storage. The owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit is subject to the applicable provisions of part 75 of this chapter concerning units in long-term cold storage.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25395, Apr. 28, 2006]

§ 96.371 Initial certification and recertification procedures.

(a) The owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall be exempt from the initial certification requirements of this section for a monitoring system under §96.370(a)(1) if the following conditions are met:

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendix B, appendix D, and appendix E to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.
(b) The recertification provisions of this section shall apply to a monitoring system under §96.370(a)(1) exempt from initial certification requirements under paragraph (a) of this section.

(c) If the Administrator has previously approved a petition under §75.17(a) or (b) of this chapter for apportioning the NO\textsubscript{X} emission rate measured in a common stack or a petition under §75.66 of this chapter for an alternative to a requirement in §75.12 or §75.17 of this chapter, the CAIR designated representative shall resubmit the petition to the Administrator under §96.375(a) to determine whether the approval applies under the CAIR NO\textsubscript{X} Ozone Season Trading Program.

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendices D and E to part 75 of this chapter) under §96.370(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system under §96.370(a)(1)(i) through (iv) of this section respectively.

(1) Requirements for initial certification. The owner or operator shall ensure that each continuous monitoring system under §96.370(a)(1)(i) through (iv) of this section completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §96.370(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §96.370(a)(1) that may significantly affect the ability of the system to accurately measure or record NO\textsubscript{X} mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter systems, and any excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter, under §96.370(a)(1) are subject to the recertification requirements in §75.20(g)(6) of this chapter.

(3) Approval process for initial certification and recertification. Paragraphs (d)(3)(i) through (iv) of this section apply to both initial certification and recertification of a continuous monitoring system under §96.370(a)(1). For recertifications, replace the word “certification” and “initial certification” with the word “recertification”; replace the word “certified,” and follow the procedures in §§75.20(b)(5) and (g)(7) of this chapter in lieu of the procedures in paragraph (d)(3)(v) of this section.

(i) Notification of certification. The CAIR designated representative shall submit to the permitting authority, the appropriate EPA Regional Office, and the Administrator written notice of the dates of certification testing, in accordance with §96.373.

(ii) Certification application. The CAIR designated representative shall submit to the permitting authority a certification application for each monitoring
system. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CAIR NO₃ Ozone Season Trading Program for a period not to exceed 120 days after receipt by the permitting authority of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the permitting authority does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the permitting authority.

(iv) Certification application approval process. The permitting authority will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the permitting authority does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CAIR NO₃ Ozone Season Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the permitting authority will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the permitting authority will issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the permitting authority may issue a notice of disapproval under paragraph (d)(3)(iv)(C) of this section. The 120-day review period shall not begin before receipt of a complete certification application.

(C) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of part 75 of this chapter or if the certification application is incomplete and the requirement for disapproval under paragraph (d)(3)(iv)(B) of this section is met, then the permitting authority will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the permitting authority and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter). The owner or operator shall follow the procedures for loss of certification in paragraph (d)(3)(v) of this section for each monitoring system that is disapproved for initial certification.

(D) Audit decertification. The permitting authority or, for a CAIR NO₃ Ozone Season opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §96.372(b).

(v) Procedures for loss of certification. If the permitting authority or the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:
§ 96.372 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D or subpart H of, or appendix D or appendix E to, part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §96.371 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the permitting authority or, for a CAIR NOx Ozone Season opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the Administrator will
issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the permitting authority or the Administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in §96.371 for each disapproved monitoring system.

§ 96.374 Recordkeeping and reporting.

(a) General provisions. The CAIR designated representative shall comply with all recordkeeping and reporting requirements in this section, the applicable recordkeeping and reporting requirements under §75.73 of this chapter, and the requirements of §96.310(e)(1).

(b) Monitoring plans. The owner or operator of a CAIR NOX Ozone Season unit shall comply with requirements of §75.73(c) and (e) of this chapter and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, §§96.383 and 96.384(a).

(c) Certification applications. The CAIR designated representative shall submit an application to the permitting authority within 45 days after completing all initial certification or recertification tests required under §96.371, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

(1) If the CAIR NOX Ozone Season unit is subject to an Acid Rain emissions limitation or a CAIR NOX emissions limitation or if the owner or operator of such unit chooses to report on an annual basis under this subpart, the CAIR designated representative shall meet the requirements of subpart H of part 75 of this chapter (concerning monitoring of NOX mass emissions) for such unit for the entire year and shall report the NOX mass emissions data and heat input data for such unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

(i) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 through June 30, 2008;

(ii) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the date specified in §96.384(b); and

(iii) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the calendar quarter corresponding to the date specified in §96.384(b); and

(iv) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a CAIR NOX Ozone Season opt-in unit under subpart III of this part, the calendar quarter corresponding to the date on which the CAIR NOX Ozone Season opt-in unit enters the CAIR NOX Ozone Season Trading Program as provided in §96.384(g).

(2) If the CAIR NOX Ozone Season unit is not subject to an Acid Rain emissions limitation or a CAIR NOX...
emissions limitation, then the CAIR designated representative shall either:

(i) Meet the requirements of subpart H of part 75 (concerning monitoring of NOX mass emissions) for such unit for the entire year and report the NOX mass emissions data and heat input data for such unit in accordance with paragraph (d)(1) of this section; or

(ii) Meet the requirements of subpart H of part 75 for the control period (including the requirements in §75.74(c) of this chapter) and report NOX mass emissions data and heat input data (including the data described in §75.74(c)(6) of this chapter) for such unit only for the control period of each year and report, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

(A) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 through June 30, 2008;

(B) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §96.376(b), unless that date is not during a control period, in which case reporting shall commence in the quarter that includes May 1 through June 30 of the first control period after such date;

(C) Notwithstanding paragraphs (d)(2)(ii)(A) and (2)(ii)(B) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the calendar quarter corresponding to the date specified in §96.384(b); and

(D) Notwithstanding paragraphs (d)(2)(ii)(A) and (2)(ii)(B) of this section, for a CAIR NOX Ozone Season opt-in unit under subpart III of this part, the calendar quarter corresponding to the date on which the CAIR NOX Ozone Season opt-in unit enters the CAIR NOX Ozone Season Trading Program as provided in §96.384(g).

(2) The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.73(f) of this chapter.

(3) For CAIR NOX Ozone Season units that are also subject to an Acid Rain emissions limitation or the CAIR NOX Annual Trading Program or CAIR SO2 Trading Program, quarterly reports shall include the applicable data and information required by subparts F through H of part 75 of this chapter as applicable, in addition to the NOX mass emission data, heat input data, and other information required by this subpart.

(e) Compliance certification. The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications;

(2) For a unit with add-on NOX emission controls and for all hours where NOX data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate NOX emissions; and

(3) For a unit that is reporting on a control period basis under paragraph (d)(2)(ii) of this section, the NOX emission rate and NOX concentration values substituted for missing data under subpart D of part 75 of this chapter are calculated using only values from a control period and do not systematically underestimate NOX emissions.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25395, Apr. 28, 2006]
Environmental Protection Agency

§ 96.375 Petitions.

(a) Except as provided in paragraph (b)(2) of this section, the CAIR designated representative of a CAIR NO$_X$ Ozone Season unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by the Administrator, in consultation with the permitting authority.

(b)(1) The CAIR designated representative of a CAIR NO$_X$ Ozone Season unit that is not subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the permitting authority and the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by both the permitting authority and the Administrator.

(2) The CAIR designated representative of a CAIR NO$_X$ Ozone Season unit that is subject to an Acid Rain emissions limitation may submit a petition under §75.66 of this chapter to the permitting authority and the Administrator requesting approval to apply an alternative to any requirement concerning any additional continuous emission monitoring system required under §75.72 of this chapter. Application of an alternative to any such requirement is in accordance with this subpart only to the extent that the petition is approved in writing by both the permitting authority and the Administrator.

Subpart III—CAIR NO$_X$ Ozone Season Opt-in Units

SOURCE: 70 FR 25382, May 12, 2005, unless otherwise noted.

§ 96.380 Applicability.

A CAIR NO$_X$ Ozone Season opt-in unit must be a unit that:

(a) Is located in the State;
(b) Is not a CAIR NO$_X$ Ozone Season unit under §96.304 and is not covered by a retired unit exemption under §96.305 that is in effect;
(c) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;
(d) Has or is required or qualified to have a title V operating permit or other federally enforceable permit; and
(e) Vents all of its emissions to a stack and can meet the monitoring, recordkeeping, and reporting requirements of subpart HHHH of this part.

§ 96.381 General.

(a) Except as otherwise provided in §§96.301 through 96.304, §§96.306 through 96.308, and subparts BBBB and CCCC and subparts FFFF through HHHH of this part, a CAIR NO$_X$ Ozone Season unit shall be treated as a CAIR NO$_X$ Ozone Season unit for purposes of applying such sections and subparts of this part.

(b) Solely for purposes of applying, as provided in this subpart, the requirements of subpart HHHH of this part to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, such unit shall be treated as a CAIR NO$_X$ Ozone Season unit before issuance of a CAIR opt-in permit for such unit.

§ 96.382 CAIR designated representative.

Any CAIR NO$_X$ Ozone Season opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, located at the same source as one or more CAIR NO$_X$ Ozone Season units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR NO$_X$ Ozone Season units.

§ 96.383 Applying for CAIR opt-in permit.

(a) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR NO$_X$ Ozone Season opt-in unit in §96.380 may apply for an initial CAIR opt-in permit at any time, except
as provided under §96.386 (f) and (g), and, in order to apply, must submit the following:

(1) A complete CAIR permit application under §96.322;

(2) A certification, in a format specified by the permitting authority, that the unit:
   (i) Is not a CAIR NO\textsubscript{X} Ozone Season unit under §96.304 and is not covered by a retired unit exemption under §96.305 that is in effect;
   (ii) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;
   (iii) Vents all of its emissions to a stack; and
   (iv) Has documented heat input for more than 676 hours during the 6 months immediately preceding submission of the CAIR permit application under §96.322;

(3) A monitoring plan in accordance with subpart HHHH of this part;

(4) A complete certificate of representation under §96.313 consistent with §96.382, if no CAIR designated representative has been previously designated for the source that includes the unit; and

(5) A statement, in a format specified by the permitting authority, whether the CAIR designated representative requests that the unit be allocated CAIR NO\textsubscript{X} Ozone Season allowances under §96.388(b) or §96.388(c) (subject to the conditions in §§96.384(b) and 96.386(g)). If allocation under §96.388(c) is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(b) Duty to reapply. (1) The CAIR designated representative of a CAIR NO\textsubscript{X} Ozone Season opt-in unit shall submit a complete CAIR permit application under §96.322 to renew the CAIR opt-in unit permit in accordance with the permitting authority’s regulations for Title V operating permits, or the permitting authority’s regulations for other federally enforceable permits if applicable, addressing permit renewal.

(2) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR NO\textsubscript{X} Ozone Season opt-in unit from the CAIR NO\textsubscript{X} Ozone Season Trading Program in accordance with §96.186 or the unit becomes a CAIR NO\textsubscript{X} Ozone Season unit under §96.304, the CAIR NO\textsubscript{X} opt-in unit shall remain subject to the requirements for a CAIR NO\textsubscript{X} Ozone Season opt-in unit, even if the CAIR designated representative for the CAIR NO\textsubscript{X} Ozone Season opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (b)(1) of this section.

§96.384 Opt-in process.

The permitting authority will issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under §96.383 is submitted in accordance with the following:

(a) Interim review of monitoring plan. The permitting authority and the Administrator will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under §96.383. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NO\textsubscript{X} emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with subpart HHHH of this part. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.

(b) Monitoring and reporting. (1)(i) If the permitting authority and the Administrator determine that the monitoring plan is sufficient under paragraph (a) of this section, the owner or operator shall monitor and report the NO\textsubscript{X} emissions rate and the heat input of the unit and all other applicable parameters, in accordance with subpart HHHH of this part, starting on the date of certification of the appropriate monitoring systems under subpart HHHH of this part and continuing until a CAIR opt-in permit is denied under §96.384(f) or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR NO\textsubscript{X} Ozone Season Trading Program in accordance with §96.386.
(i) The monitoring and reporting under paragraph (b)(1)(i) of this section shall include the entire control period immediately before the date on which the unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g), during which period monitoring system availability must not be less than 90 percent under subpart HHHH of this part and the unit must be in full compliance with any applicable State or Federal emissions or emissions-related requirements.

(2) To the extent the NO\textsubscript{X} emissions rate and the heat input of the unit are monitored and reported in accordance with subpart HHHH of this part for one or more control periods, in addition to the control period under paragraph (b)(1)(i) of this section, during which control periods monitoring system availability is not less than 90 percent under subpart HHHH of this part and the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements and which control periods begin not more than 3 years before the unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g), such information shall be used as provided in paragraphs (c) and (d) of this section.

(c) Baseline heat input. The unit’s baseline heat input shall equal:

(1) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s total heat input (in mmBtu) for the control period; or

(2) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit does not have add-on NO\textsubscript{X} emission controls during any such control periods, the average of the amounts of the unit’s NO\textsubscript{X} emissions rate (in lb/mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section; or

(3) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit has add-on NO\textsubscript{X} emission controls during any such control periods, the average of the amounts of the unit’s NO\textsubscript{X} emissions rate (in lb/mmBtu) for such control periods during which the unit has add-on NO\textsubscript{X} emission controls.

(e) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline NO\textsubscript{X} emissions rate for the unit under paragraphs (c) and (d) of this section and if the permitting authority determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR NO\textsubscript{X} Ozone Season opt-in unit in §96.380 and meets the elements certified in §96.383(a)(2), the permitting authority will issue a CAIR opt-in permit. The permitting authority will provide a copy of the CAIR opt-in permit to the Administrator, who will then establish a compliance account for the source that includes the CAIR NO\textsubscript{X} Ozone Season opt-in unit unless the source already has a compliance account.

(f) Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (a) through (e) of this section, if at any time before issuance of a CAIR opt-in permit for the unit, the permitting authority determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR NO\textsubscript{X} Ozone Season opt-in unit in §96.380 or meets the elements certified in §96.383(a)(2), the permitting authority will issue a denial of a CAIR opt-in permit for the unit.

(g) Date of entry into CAIR NO\textsubscript{X} Ozone Season Trading Program. A unit for which an initial CAIR opt-in permit is

Environmental Protection Agency

§ 96.384
§ 96.385 CAIR opt-in permit contents.

(a) Each CAIR opt-in permit will contain:

(1) All elements required for a complete CAIR permit application under § 96.322;

(2) The certification in § 96.383(a)(2);

(3) The unit’s baseline heat input under § 96.384(c);

(4) The unit’s baseline NO\textsubscript{X} emission rate under § 96.384(d);

(5) A statement whether the unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances under § 96.386(b) or § 96.386(c) (subject to the conditions in §§ 96.384(h) and 96.386(g));

(6) A statement that the unit may withdraw from the CAIR NO\textsubscript{X} Ozone Season Trading Program only in accordance with § 96.386; and

(7) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of § 96.387.

(b) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under § 96.302 and, upon recordation by the Administrator under subpart FFFF or GGGG of this part or this subpart, every allocation, transfer, or deduction of CAIR NO\textsubscript{X} Ozone Season allowances to or from the compliance account of the source that includes a CAIR NO\textsubscript{X} Ozone Season opt-in unit covered by the CAIR opt-in permit.

(c) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NO\textsubscript{X} Ozone Season opt-in unit is located and in a title V operating permit or other federally enforceable permit for the source.

[70 FR 25382, May 12, 2005, as amended at 71 FR 25396, Apr. 28, 2006]

§ 96.386 Withdrawal from CAIR NO\textsubscript{X} Ozone Season Trading Program.

Except as provided under paragraph (g) of this section, a CAIR NO\textsubscript{X} Ozone Season opt-in unit may withdraw from the CAIR NO\textsubscript{X} Ozone Season Trading Program, but only if the permitting authority issues a notification to the CAIR designated representative of the CAIR NO\textsubscript{X} Ozone Season opt-in unit of the acceptance of the withdrawal of the CAIR NO\textsubscript{X} Ozone Season opt-in unit in accordance with paragraph (d) of this section.

(a) Requesting withdrawal. In order to withdraw a CAIR NO\textsubscript{X} Ozone Season opt-in unit from the CAIR NO\textsubscript{X} Ozone Season Trading Program, the CAIR designated representative of the CAIR NO\textsubscript{X} Ozone Season opt-in unit shall submit to the permitting authority a request to withdraw effective as of midnight of September 30 of a specified calendar year, which date must be at least 4 years after September 30 of the year of entry into the CAIR NO\textsubscript{X} Ozone Season Trading Program under
Environmental Protection Agency

§ 96.386

§ 96.386(g). The request must be submitted no later than 90 days before the requested effective date of withdrawal.

(b) Conditions for withdrawal. Before a CAIR NOX Ozone Season opt-in unit covered by a request under paragraph (a) of this section may withdraw from the CAIR NOX Ozone Season Trading Program and the CAIR opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

(1) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR NOX Ozone Season opt-in unit must meet the requirement to hold CAIR NOX Ozone Season allowances equal in amount to and allocated for the same Ozone Season opt-in unit may submit a request to withdraw in accordance with subpart GGGG of this part.

(2) After the requirement for withdrawal under paragraph (b)(1) of this section is met, the Administrator will deduct from the compliance account of the source that includes the CAIR NOX Ozone Season opt-in unit CAIR NOX Ozone Season allowances equal in amount to and allocated for the same or a prior control period for any CAIR NOX Ozone Season allowances allocated to the CAIR NOX Ozone Season opt-in unit under § 96.388 for any control period for which the withdrawal is to be effective. If there are no remaining CAIR NOX Ozone Season units at the source, the Administrator will close the compliance account, and the owners and operators of the CAIR NOX Ozone Season opt-in unit may submit a CAIR NOX Ozone Season allowance transfer for any remaining CAIR NOX Ozone Season allowances to another CAIR NOX Ozone Season Allowance Tracking System in accordance with subpart GGGG of this part.

(c) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of CAIR NOX Ozone Season allowances required), the permitting authority will issue a notification to the CAIR designated representative of the CAIR NOX Ozone Season opt-in unit of the acceptance of the withdrawal of the CAIR NOX Ozone Season opt-in unit as of midnight on September 30 of the calendar year for which the withdrawal was requested.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the CAIR designated representative of the CAIR NOX Ozone Season opt-in unit that the CAIR NOX Ozone Season opt-in unit’s request to withdraw is denied. Such CAIR NOX Ozone Season opt-in unit shall continue to be a CAIR NOX Ozone Season opt-in unit.

(d) Permit amendment. After the permitting authority issues a notification under paragraph (c)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the CAIR permit covering the CAIR NOX Ozone Season opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (c)(1) of this section. The unit shall continue to be a CAIR NOX Ozone Season opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR NOX Ozone Season Trading Program concerning any control periods for which the unit is a CAIR NOX Ozone Season opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(e) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the CAIR NOX Ozone Season opt-in unit’s request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(f) Ability to reapply to the CAIR NOX Ozone Season Trading Program. Once a CAIR NOX Ozone Season opt-in unit withdraws from the CAIR NOX Ozone Season Trading Program and its CAIR opt-in permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under § 96.383 for such CAIR NOX Ozone Season opt-in unit before the date that is 4 years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit will be treated as an initial application for a CAIR opt-in permit under § 96.384.

(g) Inability to withdraw. Notwithstanding paragraphs (a) through (f) of this section, a CAIR NOX Ozone Season
opt-in unit shall not be eligible to withdraw from the CAIR NOX Ozone Season Trading Program if the CAIR designated representative of the CAIR NOX Ozone Season opt-in unit requests, and the permitting authority issues a CAIR opt-in permit providing for, allocation to the CAIR NOX Ozone Season opt-in unit of CAIR NOX Ozone Season allowances under §96.388(c).

[70 FR 25382, May 12, 2005, as amended at 71 FR 25396, Apr. 28, 2006]

§96.387 Change in regulatory status.

(a) Notification. If a CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304, then the CAIR designated representative shall notify in writing the permitting authority and the Administrator of such change in the CAIR NOX Ozone Season opt-in unit’s regulatory status within 30 days of such change.

(b) Permitting authority’s and Administrator’s actions. (1) If a CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304, the permitting authority will revise the CAIR NOX Ozone Season opt-in unit’s CAIR opt-in permit to meet the requirements of a CAIR permit under §96.323, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304.

(2)(i) The Administrator will deduct from the compliance account of the source that includes the CAIR NOX Ozone Season opt-in unit that becomes a CAIR NOX Ozone Season unit under §96.304, CAIR NOX Ozone Season allowances equal in amount to and allocated for the same or a prior control period as:

(A) Any CAIR NOX Ozone Season allowances allocated to the CAIR NOX Ozone Season opt-in unit under §96.388 for any control period after the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304; and

(B) If the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304 is not September 30, the CAIR NOX Ozone Season allowances allocated to the CAIR NOX Ozone Season opt-in unit under §96.388 for the control period that includes the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304 divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR NOX Ozone Season opt-in unit that becomes a CAIR NOX Ozone Season unit under §96.304 contains the CAIR NOX Ozone Season allowances necessary for completion of the deduction under paragraph (b)(2)(i) of this section.

(3)(i) For every control period after the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304 is not September 30, the following amount of CAIR NOX Ozone Season allowances will be allocated to the CAIR NOX Ozone Season opt-in unit (as a CAIR NOX Ozone Season unit) under §96.342 for the control period that includes the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304:

(A) The amount of CAIR NOX Ozone Season allowances otherwise allocated to the CAIR NOX Ozone Season opt-in unit (as a CAIR NOX Ozone Season unit) under §96.342 for the control period multiplied by;

(B) The ratio of the number of days, in the control period, starting with the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under §96.304, divided by the total number of days in the control period; and
§ 96.388 CAIR NO\textsubscript{X} Ozone Season allowance allocations to CAIR NO\textsubscript{X} Ozone Season opt-in units.

(a) Timing requirements. (1) When the CAIR opt-in permit is issued under §96.384(e), the permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit, and submit to the Administrator the allocation for the control period in which a CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g), in accordance with paragraph (b) or (c) of this section.

(2) By no later than July 31 of the control period after the control period in which a CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g) and July 31 of each year thereafter, the permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit, and submit to the Administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR NO\textsubscript{X} Ozone Season opt-in unit, in accordance with paragraph (b) or (c) of this section.

(b) Calculation of allocation. For each control period for which a CAIR NO\textsubscript{X} Ozone Season opt-in unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances, the permitting authority will allocate in accordance with the following procedures:

(1) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocation will be the lesser of:

(i) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline heat input determined under §96.384(c); or

(ii) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s heat input, as determined in accordance with subpart HHHH of this part, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g).

(2) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} Ozone Season allowance allocations will be the lesser of:

(i) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §96.384(d) and multiplied by 70 percent; or

(ii) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} Ozone Season allowances are to be allocated.

(3) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit in an amount equaling the heat input under paragraph (b)(1) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (b)(2) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(c) Notwithstanding paragraph (b) of this section and if the CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under §96.383(a)(5)) providing for, allocation to a CAIR NO\textsubscript{X} Ozone Season opt-in unit of CAIR NO\textsubscript{X} Ozone Season allowances under this paragraph (subject to the conditions in §§96.384(h) and 96.386(g)), the permitting authority will allocate to the CAIR NO\textsubscript{X} Ozone Season opt-in unit as follows:

(1) For each control period in 2009 through 2014 for which the CAIR NO\textsubscript{X} Ozone Season opt-in unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances, the permitting authority will allocate in accordance with the following procedures:

(i) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocation will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} Ozone Season allowance allocations will be the lesser of:

(A) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline NO\textsubscript{X} emissions rate
(in lb/mmBtu) determined under §96.384(d); or

(B) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period in which the CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g).

(iii) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit in an amount equaling the heat input under paragraph (c)(1)(i) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (c)(1)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(2) For each control period in 2015 and thereafter for which the CAIR NO\textsubscript{X} Ozone Season opt-in unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances,

(i) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocation will be the lesser of:

(A) 0.15 lb/mmBtu;

(B) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §96.384(d); or

(C) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period for which the CAIR NO\textsubscript{X} Ozone Season allowances are to be allocated.

(iii) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit in an amount equaling the heat input under paragraph (c)(2)(i) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (c)(2)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(d) Recordation. (1) The Administrator will record, in the compliance account of the source that includes the CAIR NO\textsubscript{X} Ozone Season opt-in unit, the CAIR NO\textsubscript{X} Ozone Season allowances allocated by the permitting authority to the CAIR NO\textsubscript{X} Ozone Season opt-in unit under paragraph (a)(1) of this section.

(2) By September 1, of the control period in which a CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §96.384(g), and September 1 of each year thereafter, the Administrator will record, in the compliance account of the source that includes the CAIR NO\textsubscript{X} Ozone Season opt-in unit, the CAIR NO\textsubscript{X} Ozone Season allowances allocated by the permitting authority to the CAIR NO\textsubscript{X} Ozone Season opt-in unit under paragraph (a)(2) of this section.

Subpart DD [Reserved]

Subpart EE—CAIR NOx Allowance Allocations
97.140 State trading budgets.
97.141 Timing requirements for CAIR NOx allowance allocations.
97.142 CAIR NOx allowance allocations.
97.143 Compliance supplement pool.
Pt. 97

97.144 Alternative of allocation of CAIR NO\textsubscript{x} allowances and compliance supplement pool by permitting authority.

APPENDIX A TO SUBPART EE OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING ALLOCATIONS

Subpart FF—CAIR NO\textsubscript{x} Allowance Tracking System

97.150 [Reserved]
97.151 Establishment of accounts.
97.152 Responsibilities of CAIR authorized account representative.
97.153 Recordation of CAIR NO\textsubscript{x} allowance allocations.
97.154 Compliance with CAIR NO\textsubscript{x} emissions limitation.
97.155 Banking.
97.156 Account error.
97.157 Closing of general accounts.

Subpart GG—CAIR NO\textsubscript{x} Allowance Transfers

97.160 Submission of CAIR NO\textsubscript{x} allowance transfers.
97.161 EPA recordation.
97.162 Notification.

Subpart HH—Monitoring and Reporting

97.170 General requirements.
97.171 Initial certification and recertification procedures.
97.172 Out of control periods.
97.173 Notifications.
97.174 Recordkeeping and reporting.
97.175 Petitions.

Subpart II—CAIR NO\textsubscript{x} Opt-in Units

97.180 Applicability.
97.181 General.
97.182 CAIR designated representative.
97.183 Applying for CAIR opt-in permit.
97.184 Opt-in process.
97.185 CAIR opt-in permit contents.
97.186 Withdrawal from CAIR NO\textsubscript{x} Annual Trading Program.
97.187 Change in regulatory status.
97.188 CAIR NO\textsubscript{x} allowance allocations to CAIR NO\textsubscript{x} opt-in units.

APPENDIX A TO SUBPART II OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING CAIR NO\textsubscript{x} OPT-IN UNITS

Subpart AAA—CAIR SO\textsubscript{2} Trading Program

General Provisions

97.201 Purpose.
97.202 Definitions.
97.203 Measurements, abbreviations, and acronyms.
97.204 Applicability.
97.205 Retired unit exemption.
97.206 Standard requirements.
97.207 Computation of time.
97.208 Appeal procedures.

Subpart BBB—CAIR Designated Representative for CAIR SO\textsubscript{2} Sources

97.210 Authorization and responsibilities of CAIR designated representative.
97.211 Alternate CAIR designated representative.
97.212 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.
97.213 Certificate of representation.
97.214 Objections concerning CAIR designated representative.
97.215 Delegation by CAIR designated representative and alternate CAIR designated representative.

Subpart CCC—Permits

97.220 General CAIR SO\textsubscript{2} Trading Program permit requirements.
97.221 Submission of CAIR permit applications.
97.222 Information requirements for CAIR permit applications.
97.223 CAIR permit contents and term.
97.224 CAIR permit revisions.

Subparts DDD—EEE [Reserved]

Subpart FFF—CAIR SO\textsubscript{2} Allowance Tracking System

97.250 [Reserved]
97.251 Establishment of accounts.
97.252 Responsibilities of CAIR authorized account representative.
97.253 Recordation of CAIR SO\textsubscript{2} allowances.
97.254 Compliance with CAIR SO\textsubscript{2} emissions limitation.
97.255 Banking.
97.256 Account error.
97.257 Closing of general accounts.

Subpart GGG—CAIR SO\textsubscript{2} Allowance Transfers

97.260 Submission of CAIR SO\textsubscript{2} allowance transfers.
97.261 EPA recordation.
97.262 Notification.

Subpart HHH—Monitoring and Reporting

97.270 General requirements.
97.271 Initial certification and recertification procedures.
97.272 Out of control periods.
97.273 Notifications.
97.274 Recordkeeping and reporting.
97.275 Petitions.
Environmental Protection Agency

Subpart III—CAIR SO₂ Opt-in Units

97.280 Applicability.
97.281 General.
97.282 CAIR designated representative.
97.283 Applying for CAIR opt-in permit.
97.284 Opt-in process.
97.285 CAIR opt-in permit contents.
97.286 Withdrawal from CAIR SO₂ Trading Program.
97.287 Change in regulatory status.
97.288 CAIR SO₂ allowance allocations to CAIR SO₂ opt-in units.

APPENDIX A TO SUBPART III OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING CAIR SO₂ OPT-IN UNITS

Subpart EEEE—CAIR NOₓ Ozone Season Allowance Allocations

97.340 State trading budgets.
97.341 Timing requirements for CAIR NOₓ Ozone Season allowance allocations.
97.342 CAIR NOₓ Ozone Season allowance allocations.
97.343 Alternative of allocation of CAIR NOₓ Ozone Season allowances by permitting authority.

APPENDIX A TO SUBPART EEEE OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING ALLOCATIONS

Subpart FFFF—CAIR NOₓ Ozone Season Allowance Tracking System

97.350 [Reserved]
97.351 Establishment of accounts.
97.352 Responsibilities of CAIR authorized account representative.
97.353 Recordation of CAIR NOₓ Ozone Season allowance allocations.
97.354 Compliance with CAIR NOₓ emissions limitation.
97.355 Banking.
97.356 Account error.
97.357 Closing of general accounts.

Subpart GGGG—CAIR NOₓ Ozone Season Allowance Transfers

97.360 Submission of CAIR NOₓ Ozone Season allowance transfers.
97.361 EPA recordation.
97.362 Notification.

Subpart HHHH—Monitoring and Reporting

97.370 General requirements.
97.371 Initial certification and recertification procedures.
97.372 Out of control periods.
97.373 Notifications.
97.374 Recordkeeping and reporting.
97.375 Petitions.

Subpart IIII—CAIR NOₓ Ozone Season Opt-in Units

97.380 Applicability.
97.381 General.
97.382 CAIR designated representative.
97.383 Applying for CAIR opt-in permit.
97.384 Opt-in process.
97.385 CAIR opt-in permit contents.
97.386 Withdrawal from CAIR NOₓ Ozone Season Trading Program.
97.387 Change in regulatory status.
97.388 CAIR NOₓ Ozone Season allowance allocations to CAIR NOₓ Ozone Season opt-in units.

VerDate Sep<11>2014 13:36 Oct 20, 2017 Jkt 241173 PO 00000 Frm 00183 Fmt 8010 Sfmt 8010 Y:\SGML\241173.XXX 241173nlaroche on DSK9F9SC42PROD with CFR
APPENDIX A TO SUBPART IIII OF PART 97—
STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING
CAIR NO\textsubscript{X} OZONE SEASON OPT-IN UNITS

Subpart AAAAA—CSAPR NO\textsubscript{X} Annual Trading Program

97.401 Purpose.
97.402 Definitions.
97.403 Measurements, abbreviations, and acronyms.
97.404 Applicability.
97.405 Retired unit exemption.
97.406 Standard requirements.
97.407 Computation of time.
97.408 Administrative appeal procedures.
97.409 [Reserved]
97.410 State NO\textsubscript{X} Annual trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.
97.411 Timing requirements for CSAPR NO\textsubscript{X} Annual allowance allocations.
97.412 CSAPR NO\textsubscript{X} Annual allowance allocations to new units.
97.413 Authorization of designated representative and alternate designated representative.
97.414 Responsibilities of designated representative and alternate designated representative.
97.415 Changing designated representative and alternate designated representative; changes in owners and operators.
97.416 Certificate of representation.
97.417 Objections concerning designated representative and alternate designated representative.
97.418 Delegation by designated representative and alternate designated representative.
97.419 [Reserved]
97.420 Establishment of compliance accounts and general accounts.
97.421 Recordation of CSAPR NO\textsubscript{X} Annual allowance allocations and auction results.
97.422 Submission of CSAPR NO\textsubscript{X} Annual allowance transfers.
97.423 Recordation of CSAPR NO\textsubscript{X} Annual allowance transfers.
97.424 Compliance with CSAPR NO\textsubscript{X} Annual emissions limitation.
97.425 Compliance with CSAPR NO\textsubscript{X} Annual assurance provisions.
97.426 Banking.
97.427 Account error.
97.428 Administrator’s action on submissions.
97.429 [Reserved]
97.430 General monitoring, recordkeeping, and reporting requirements.
97.431 Initial monitoring system certification and recertification procedures.
97.432 Monitoring system out-of-control periods.
97.433 Notifications concerning monitoring.

Subpart BBBBB—CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program

97.501 Purpose.
97.502 Definitions.
97.503 Measurements, abbreviations, and acronyms.
97.504 Applicability.
97.505 Retired unit exemption.
97.506 Standard requirements.
97.507 Computation of time.
97.508 Administrative appeal procedures.
97.509 [Reserved]
97.510 State NO\textsubscript{X} Ozone Season Group 1 trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.
97.511 Timing requirements for CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance allocations.
97.512 CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance allocations to new units.
97.513 Authorization of designated representative and alternate designated representative.
97.514 Responsibilities of designated representative and alternate designated representative.
97.515 Changing designated representative and alternate designated representative; changes in owners and operators.
97.516 Certificate of representation.
97.517 Objections concerning designated representative and alternate designated representative.
97.518 Delegation by designated representative and alternate designated representative.
97.519 [Reserved]
97.520 Establishment of compliance accounts and general accounts.
97.521 Recordation of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance allocations and auction results.
97.522 Submission of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfers.
97.523 Recordation of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfers.
97.524 Compliance with CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation.
97.525 Compliance with CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions.
97.526 Banking.
97.527 Account error.
97.528 Administrator’s action on submissions.
97.529 [Reserved]
97.530 General monitoring, recordkeeping, and reporting requirements.
Environmental Protection Agency

97.532 Monitoring system out-of-control periods.
97.533 Notifications concerning monitoring.
97.534 Recordkeeping and reporting.
97.535 Petitions for alternatives to monitoring, recordkeeping, or reporting requirements.

Subpart CCCCC—CSAPR SO₂ Group 1 Trading Program

97.601 Purpose.
97.602 Definitions.
97.603 Measurements, abbreviations, and acronyms.
97.604 Applicability.
97.605 Retired unit exemption.
97.606 Standard requirements.
97.607 Computation of time.
97.608 Administrative appeal procedures.
97.609 [Reserved]
97.610 State SO₂ Group 1 trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.
97.611 Timing requirements for CSAPR SO₂ Group 1 allowance allocations.
97.612 CSAPR SO₂ Group 1 allowance allocations to new units.
97.613 Authorization of designated representative and alternate designated representative.
97.614 Responsibilities of designated representative and alternate designated representative.
97.615 Changing designated representative and alternate designated representative; changes in owners and operators.
97.616 Certificate of representation.
97.617 Objections concerning designated representative and alternate designated representative.
97.618 Delegation by designated representative and alternate designated representative.
97.619 [Reserved]
97.620 Establishment of compliance accounts and general accounts.
97.621 Recordation of CSAPR SO₂ Group 1 allowance allocations and auction results.
97.622 Submission of CSAPR SO₂ Group 1 allowance transfers.
97.623 Recordation of CSAPR SO₂ Group 1 allowance transfers.
97.624 Compliance with CSAPR SO₂ Group 1 emissions limitation.
97.625 Compliance with CSAPR SO₂ Group 1 assurance provisions.
97.626 Banking.
97.627 Account error.
97.628 Administrator’s action on submissions.
97.629 [Reserved]
97.630 General monitoring, recordkeeping, and reporting requirements.
97.631 Initial monitoring system certification and recertification procedures.

Subpart DDDDD—CSAPR SO₂ Group 2 Trading Program

97.701 Purpose.
97.702 Definitions.
97.703 Measurements, abbreviations, and acronyms.
97.704 Applicability.
97.705 Retired unit exemption.
97.706 Standard requirements.
97.707 Computation of time.
97.708 Administrative appeal procedures.
97.709 [Reserved]
97.710 State SO₂ Group 2 trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.
97.711 Timing requirements for CSAPR SO₂ Group 2 allowance allocations.
97.712 CSAPR SO₂ Group 2 allowance allocations to new units.
97.713 Authorization of designated representative and alternate designated representative.
97.714 Responsibilities of designated representative and alternate designated representative.
97.715 Changing designated representative and alternate designated representative; changes in owners and operators.
97.716 Certificate of representation.
97.717 Objections concerning designated representative and alternate designated representative.
97.718 Delegation by designated representative and alternate designated representative.
97.719 [Reserved]
97.720 Establishment of compliance accounts and general accounts.
97.721 Recordation of CSAPR SO₂ Group 2 allowance allocations and auction results.
97.722 Submission of CSAPR SO₂ Group 2 allowance transfers.
97.723 Recordation of CSAPR SO₂ Group 2 allowance transfers.
97.724 Compliance with CSAPR SO₂ Group 2 emissions limitation.
97.725 Compliance with CSAPR SO₂ Group 2 assurance provisions.
97.726 Banking.
97.727 Account error.
97.728 Administrator’s action on submissions.
97.729 [Reserved]
97.730 General monitoring, recordkeeping, and reporting requirements.
97.731 Initial monitoring system certification and recertification procedures.
§ 97.1 Purpose.

This part establishes general provisions and the applicability, permitting, allowance, excess emissions, monitoring, and opt-in provisions for the federal NOx Budget Trading Program, under section 126 of the CAA and § 52.34 of this chapter, as a means of mitigating the interstate transport of ozone and nitrogen oxides, an ozone precursor.

§ 97.2 Definitions.

The terms used in this part shall have the meanings set forth in this section as follows:

Account number means the identification number given by the Administrator to each NOx Allowance Tracking System account.

Acid Rain emissions limitation means, as defined in § 72.2 of this chapter, a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program under title IV of the Clean Air Act.

Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

Allocate or allocation means, with regard to NOx allowances, the determination by the Administrator of the number of NOx allowances to be initially credited to a NOx Budget unit or an allocation set-aside.

Authority: 42 U.S.C. 7401, 7403, 7410, 7426, 7601, and 7651, et seq.

Source: 65 FR 2727, Jan. 18, 2000, unless otherwise noted. 71 FR 25396, 25422, and 25443, Apr. 28, 2006.

Subpart EEEE—CSAPR NOx Ozone Season Group 2 Trading Program

§ 97.801 Purpose.

§ 97.802 Definitions.

§ 97.803 Measurements, abbreviations, and acronyms.

§ 97.804 Applicability.

§ 97.805 Retired unit exemption.

§ 97.806 Standard requirements.

§ 97.807 Computation of time.

§ 97.808 Administrative appeal procedures.

§ 97.809 [Reserved]

§ 97.810 State NOx Ozone Season Group 2 trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.

§ 97.811 Timing requirements for CSAPR NOx Ozone Season Group 2 allowance allocations.

§ 97.812 CSAPR NOx Ozone Season Group 2 allowance allocations to new units.

§ 97.813 Authorization of designated representative and alternate designated representative.

§ 97.814 Responsibilities of designated representative and alternate designated representative.

§ 97.815 Changing designated representative and alternate designated representative; changes in owners and operators; changes in units at the source.

§ 97.816 Certificate of representation.

§ 97.817 Objections concerning designated representative and alternate designated representative.

§ 97.818 Delegation by designated representative and alternate designated representative.

§ 97.819 [Reserved]

§ 97.820 Establishment of compliance accounts, assurance accounts, and general accounts.

§ 97.821 Recordation of CSAPR NOx Ozone Season Group 2 allowance allocations and auction results.

§ 97.822 Submission of CSAPR NOx Ozone Season Group 2 allowance transfers.

§ 97.823 Recordation of CSAPR NOx Ozone Season Group 2 allowance transfers.

§ 97.824 Compliance with CSAPR NOx Ozone Season Group 2 emissions limitation.

§ 97.825 Compliance with CSAPR NOx Ozone Season Group 2 assurance provisions.

§ 97.826 Banking.

§ 97.827 Account error.

§ 97.828 Administrator’s action on submissions.

§ 97.829 [Reserved]
Automated data acquisition and handling system or DAHS means that component of the CEMS, or other emissions monitoring system approved for use under subpart H of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart H of this part.

Boiler means an enclosed fossil or other fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Clean Air Act means the Clean Air Act, 42 U.S.C. 7401 et seq.

Combined cycle system means a system comprised of one or more combustion turbines, heat recovery steam generators, and steam turbines configured to improve overall efficiency of electricity generation or steam production.

Combustion turbine means an enclosed fossil or other fuel-fired device that is comprised of a compressor, a combustor, and a turbine, and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine.

Commence commercial operation means, with regard to a unit that serves a generator, to have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation. Except as provided in §97.4(b), §97.5, or subpart I of this part, for a unit that is a NO\textsubscript{X} Budget unit under §97.4(a) on the date of commencement of operation, the date the unit becomes a NO\textsubscript{X} Budget unit under §97.4(a) shall be the unit’s date of commencement of operation.

Common stack means a single flue through which emissions from two or more units are exhausted.

Compliance account means a NO\textsubscript{X} Allowance Tracking System account, established by the Administrator for a NO\textsubscript{X} Budget unit under subpart F of this part, in which the NO\textsubscript{X} allowance allocations for the unit are initially recorded and in which are held NO\textsubscript{X} allowances available for use by the unit for a control period for the purpose of meeting the unit’s NO\textsubscript{X} Budget emissions limitation.

Continuous emission monitoring system or CEMS means the equipment required under subpart H of this part to sample, analyze, measure, and provide, by means of readings taken at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of nitrogen oxides (NO\textsubscript{X}) emissions, stack gas volumetric flow rate or stack gas moisture content (as applicable), in a manner consistent with part 75 of this chapter. The following are the principal types of continuous emission monitoring systems required under subpart H of this part:

1. A flow monitoring system, consisting of a stack flow rate monitor and an automated DAHS. A flow monitoring system provides a permanent, continuous record of stack gas volumetric flow rate, in units of standard cubic feet per hour (scfh);

2. A nitrogen oxides concentration monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor and electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber. Except as provided in §97.4(b), §97.5, or subpart I of this part for a unit that is a NO\textsubscript{X} Budget unit under §97.4(a) on the date of commencement of operation, such date shall remain the unit’s date of commencement of operation even if the unit is subsequently modified, reconstructed, or repowered. Except as provided in §97.4(b), §97.5, or subpart I of this part, for a unit that is not a NO\textsubscript{X} Budget unit under §97.4(a) on the date of commencement of operation, the date the unit becomes a NO\textsubscript{X} Budget unit under §97.4(a) shall be the unit’s date of commencement of operation.

Commence operation means to have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber. Except as provided in §97.4(b), §97.5, or subpart I of this part for a unit that is a NO\textsubscript{X} Budget unit under §97.4(a) on the date of commencement of operation, such date shall remain the unit’s date of commencement of operation even if the unit is subsequently modified, reconstructed, or repowered. Except as provided in §97.4(b), §97.5, or subpart I of this part, for a unit that is not a NO\textsubscript{X} Budget unit under §97.4(a) on the date of commencement of operation, the date the unit becomes a NO\textsubscript{X} Budget unit under §97.4(a) shall be the unit’s date of commencement of operation.

Common stack means a single flue through which emissions from two or more units are exhausted.

Compliance account means a NO\textsubscript{X} Allowance Tracking System account, established by the Administrator for a NO\textsubscript{X} Budget unit under subpart F of this part, in which the NO\textsubscript{X} allowance allocations for the unit are initially recorded and in which are held NO\textsubscript{X} allowances available for use by the unit for a control period for the purpose of meeting the unit’s NO\textsubscript{X} Budget emissions limitation.

Continuous emission monitoring system or CEMS means the equipment required under subpart H of this part to sample, analyze, measure, and provide, by means of readings taken at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of nitrogen oxides (NO\textsubscript{X}) emissions, stack gas volumetric flow rate or stack gas moisture content (as applicable), in a manner consistent with part 75 of this chapter. The following are the principal types of continuous emission monitoring systems required under subpart H of this part:

1. A flow monitoring system, consisting of a stack flow rate monitor and an automated DAHS. A flow monitoring system provides a permanent, continuous record of stack gas volumetric flow rate, in units of standard cubic feet per hour (scfh);

2. A nitrogen oxides concentration monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor and
an automated DAHS. A NO\textsubscript{X} concentration monitoring system provides a permanent, continuous record of NO\textsubscript{X} emissions in units of parts per million (ppm);

(3) A nitrogen oxides emission rate (or NO\textsubscript{X}-diluent) monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor, a diluent gas (CO\textsubscript{2} or O\textsubscript{2}) monitor, and an automated DAHS. A NO\textsubscript{X} concentration monitoring system provides a permanent, continuous record of: NO\textsubscript{X} concentration in units of parts per million (ppm), diluent gas concentration in units of percent O\textsubscript{2} or CO\textsubscript{2} (percent O\textsubscript{2} or CO\textsubscript{2}), and NO\textsubscript{X} emission rate in units of pounds per million British thermal units (lb/mmBtu); and

(4) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter. A moisture monitoring system provides a permanent, continuous record of the stack gas moisture content, in units of percent H\textsubscript{2}O (percent H\textsubscript{2}O).

Control period means the period beginning May 1 of a year and ending on September 30 of the same year, inclusive.

Electricity for sale under firm contract to the grid means electricity for sale where the capacity involved is intended to be available at all times during the period covered by a guaranteed commitment to deliver, even under adverse conditions.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the NO\textsubscript{X} authorized account representative and as determined by the Administrator in accordance with subpart H of this part.

Excess emissions means any tonnage of nitrogen oxides emitted by a NO\textsubscript{X} Budget unit during a control period that exceeds the NO\textsubscript{X} Budget emissions limitation for the unit.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil fuel fired means, with regard to a unit:

(1) For units that commenced operation before January 1, 1996, the combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises more than 50 percent of the annual heat input on a Btu basis during 1995, or, if a unit had no heat input in 1995, during the last year of operation of the unit prior to 1995;

(2) For units that commenced operation on or after January 1, 1996 and before January 1, 1997, the combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises more than 50 percent of the annual heat input on a Btu basis during 1996; or

(3) For units that commence operation on or after January 1, 1997:

(i) The combination of fossil fuel, alone or in combustion with any other fuel, where fossil fuel actually combusted comprises more than 50 percent of the annual heat input on a Btu basis during any year; or

(ii) The combination of fossil fuel, alone or in combination with any other fuel, where fossil fuel is projected to comprise more than 50 percent of the annual heat input on a Btu basis during any year, provided that the unit shall be “fossil fuel-fired” as of the date, during such year, on which the unit begins combusting fossil fuel.

General account means a NO\textsubscript{X} Allowance Tracking System account, established under subpart F of this part, that is not a compliance account or an overdraft account.

Generator means a device that produces electricity.

Heat input means, with regard to a specified period to time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the NO\textsubscript{X} authorized account representative and as determined by the Administrator in accordance with subpart H of this part. Heat input does not include the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.
Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy from any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

1. For the life of the unit;
2. For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or
3. For a period equal to or greater than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the ability of a unit to combust a stated maximum amount of fuel per hour (in mmBtu/hr) on a steady state basis, as determined by the physical design and physical characteristics of the unit.

Maximum potential hourly heat input means an hourly heat input (in mmBtu/hr) used for reporting purposes when a unit lacks certified monitors to report heat input. If the unit intends to use appendix D of part 75 of this chapter to report heat input, this value should be calculated, in accordance with part 75 of this chapter, using the maximum fuel flow rate and the maximum gross calorific value. If the unit intends to use a flow monitor and a diluent gas monitor, this value should be reported, in accordance with part 75 of this chapter, using the maximum potential flow rate and either the maximum carbon dioxide concentration (in percent CO₂) or the minimum oxygen concentration (in percent O₂).

Maximum rated hourly heat input means a unit specific maximum hourly heat input (in mmBtu/hr) which is the higher of the manufacturer’s maximum rated hourly heat input or the highest observed hourly heat input.

Monitoring system means any monitoring system that meets the requirements of subpart H of this part, including a continuous emissions monitoring system, an excepted monitoring system, or an alternative monitoring system.

Most stringent State or Federal NOₓ emissions limitation means the lowest NOₓ emissions limitation (in lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

Nameplate capacity means the maximum electrical generating output (in MWe) that a generator can sustain over a specified period of time when not restricted by seasonal or other deratings as measured in accordance with the United States Department of Energy standards.

Non-title V permit means a federally enforceable permit administered by the permitting authority pursuant to the Clean Air Act and regulatory authority under the Clean Air Act, other than title V of the Clean Air Act and part 70 or 71 of this chapter.

NOₓ allowance means a limited authorization by the Administrator under the NOₓ Budget Trading Program to emit up to one ton of nitrogen oxides during the control period of the specified year or of any year thereafter, except as provided under §97.4(b) or §97.5 and no provision of law shall be construed to
limit the authority of the United States to terminate or limit such authorization, which does not constitute a property right. For purposes of all sections of this part except §97.40, §97.41, §97.42, §97.43, or §97.88, “NOx allowance” also includes an authorization to emit up to one ton of nitrogen oxides during the control period of the specified year or of any year thereafter by the permitting authority or the Administrator in accordance with a State NOx Budget Trading Program established, and approved and administered by the Administrator, pursuant to §51.121 of this chapter.

NOx allowance deduction or deduct NOx allowances means the permanent withdrawal of NOx allowances by the Administrator from a NOx Allowance Tracking System compliance account or overdraft account to account for the number of tons of NOx emissions from a NOx Budget unit for a control period, determined in accordance with subparts H and F of this part, or for any other NOx allowance withdrawal requirement under this part.

NOx Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of NOx allowances under the NOx Budget Tracking Program.

NOx Allowance Tracking System account means an account in the NOx Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of NOx allowances.

NOx allowance transfer deadline means midnight of November 30 or, if November 30 is not a business day, midnight of the first business day thereafter and is the deadline by which NOx allowances must be submitted for recordation in a NOx Budget unit’s compliance account, or the overdraft account of the source where the unit is located, in order to meet the unit’s NOx Budget emissions limitation for the control period immediately preceding such deadline.

NOx allowances held or hold NOx allowances means the NOx allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts F and G of this part, in a NOx Allowance Tracking System account.

NOx authorized account representative means, for a NOx Budget source or NOx Budget unit at the source, the natural person who is authorized by the owners and operators of the source and all NOx Budget units at the source, in accordance with subpart B of this part, to represent and legally bind each owner and operator in matters pertaining to the NOx Budget Trading Program or, for a general account, the natural person who is authorized, in accordance with subpart F of this part, to transfer or otherwise dispose of NOx allowances held in the general account.

NOx Budget emissions limitation means, for a NOx Budget unit, the tonnage equivalent of the NOx allowances available for compliance deduction for the unit under §97.54(a), (b), (e), and (f) in a control period adjusted by deductions of such NOx allowances to account for actual heat input under §97.42(e) for the control period or to account for excess emissions for a prior control period under §97.54(d) or to account for withdrawal from the NOx Budget Trading Program, or for a change in regulatory status, of a NOx Budget opt-in unit under §97.86 or §97.87.

NOx Budget opt-in permit means a NOx Budget permit covering a NOx Budget opt-in unit.

NOx Budget opt-in unit means a unit that has been elected to become a NOx Budget unit under the NOx Budget Trading Program and whose NOx Budget opt-in permit has been issued and is in effect under subpart I of this part.

NOx Budget permit means the legally binding and federally enforceable written document, or portion of such document, issued by the permitting authority under this part, including any permit revisions, specifying the NOx Budget Trading Program requirements applicable to a NOx Budget source, to each NOx Budget unit at the NOx Budget source, and to the owners and operators and the NOx authorized account representative of the NOx Budget source and each NOx Budget unit.

NOx Budget source means a source that includes one or more NOx Budget units.
Environmental Protection Agency

§ 97.2

NOx Budget Trading Program means a multistate nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with this part and pursuant to §52.34 of this chapter, as a means of mitigating the interstate transport of ozone and nitrogen oxides, an ozone precursor.

NOx Budget unit means a unit that is subject to the NOx Budget emissions limitation under §97.4(a) or §97.36.

Operating means, with regard to a unit under §§97.22(d)(2) and 97.80, having documented heat input for more than 876 hours in the 6 months immediately preceding the submission of an application for an initial NOx Budget permit under §97.83(a). The unit’s documented heat input will be determined in accordance with part 75 of this chapter if the unit was otherwise subject to the requirements of part 75 of this chapter during that 6-month period or will be based on the best available data reported to the Administrator for the unit if the unit was not otherwise subject to the requirements of part 75 of this chapter during that 6-month period.

Operator means any person who operates, controls, or supervises a NOx Budget unit, a NOx Budget source, or a unit for which an application for a NOx Budget opt-in permit under §97.83 is submitted and not denied or withdrawn and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

Opt-in means to be elected to become a NOx Budget unit under the NOx Budget Trading Program through a final, effective NOx Budget opt-in permit under subpart I of this part.

Overdraft account means the NOx Allowance Tracking System account, established by the Administrator under subpart F of this part, for each NOx Budget source where there are two or more NOx Budget units.

Owner means any of the following persons:

(1) Any holder of any portion of the legal or equitable title in a NOx Budget unit or in a unit for which an application for a NOx Budget opt-in permit under §97.83 is submitted and not denied or withdrawn; or

(2) Any holder of a leasehold interest in a NOx Budget unit or in a unit for which an application for a NOx Budget opt-in permit under §97.83 is submitted and not denied or withdrawn; or

(3) Any purchaser of power from a NOx Budget unit or from a unit for which an application for a NOx Budget opt-in permit under §97.83 is submitted and not denied or withdrawn under a life-of-the-unit, firm power contractual arrangement. However, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based, either directly or indirectly, upon the revenues or income from the NOx Budget unit or the unit for which an application for a NOx Budget opt-in permit under §97.83 is submitted and not denied or withdrawn; or

(4) With respect to any general account, any person who has an ownership interest with respect to the NOx allowances held in the general account and who is subject to the binding agreement for the NOx authorized account representative to represent that person’s ownership interest with respect to the NOx allowances.

Percent monitor data availability means, for purposes of §97.43(a)(1) and §97.84(b), total unit operating hours for which quality-assured data were recorded under subpart H of this part in a control period, divided by the total number of unit operating hours in the control period, and multiplied by 100 percent.

Permitting authority means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the NOx Budget Trading Program in accordance with subpart C of this part.

Potential electrical output capacity means 33 percent of a unit’s maximum design heat input.

Receive or receipt means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in writing or by authorized electronic transmission), as indicated in an official...
correspondence log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to NOX allowances, the movement of NOX allowances by the Administrator from one NOX Allowance Tracking System account to another, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in appendix A of part 60 of this chapter.

Serial number means, when referring to NOX allowances, the unique identification number assigned to each NOX allowance by the Administrator, under §97.53(c).

Source means any governmental, institutional, commercial, or industrial structure, installation, plant, building, or facility that emits or has the potential to emit any regulated air pollutant under the Clean Air Act. For purposes of section 502(c) of the Clean Air Act, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the 48 contiguous States or a portion thereof or the District of Columbia that is specified in §52.34 of this chapter and in which are located units for which the Administrator makes an effective finding under §52.34 of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

1. In person;
2. By United States Postal Service; or
3. By other means of dispatch or transmission and delivery. Compliance with any “submission,” “service,” or “mailing” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

Ton or tonnage means any “short ton” (i.e., 2,000 pounds). For the purpose of determining compliance with the NOX Budget emissions limitation, total tons for a control period shall be calculated as the sum of all recorded hourly emissions (or the tonnage equivalent of the recorded hourly emissions rates) in accordance with subpart H of this part, with any remaining fraction of a ton equal to or greater than 0.50 ton deemed to equal one ton and any fraction of a ton less than 0.50 ton deemed to equal zero tons.

Unit means a fossil fuel-fired stationary boiler, combustion turbine, or combined cycle system.

Unit operating day means a calendar day in which a unit combusts any fuel.

Unit operating hour or hour of unit operation means any hour (or fraction of an hour) during which a unit combusts any fuel.

§ 97.3 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this part are defined as follows:

Btu-British thermal unit.

CO2-carbon dioxide.

hr-hour.

kW-kilowatt electrical.

kWh-kilowatt hour.

lb-pounds.

mmBtu-million Btu.

MWe-megawatt electrical.

NOX-nitrogen oxides.

O2-oxygen.

ton-2000 pounds.

§ 97.4 Applicability.

(a) The following units in a State shall be a NOX Budget unit, and any source that includes one or more such units shall be a NOX Budget source, subject to the requirements of this part:

1. For units other than cogeneration units—

   (1) For units commencing operation before January 1, 1997, a unit serving during 1995 or 1996 a generator—

   (1) With a nameplate capacity greater than 25 MWe and
(2) Producing electricity for sale under a firm contract to the electric grid.
(B) For units commencing operation in 1997 or 1998, a unit serving during 1997 or 1998 a generator—
   (i) With a nameplate capacity greater than 25 MWe and
   (ii) Producing electricity for sale under a firm contract to the electric grid.
(C) For units commencing operation on or after January 1, 1999, a unit serving a generator—
   (i) With a nameplate capacity greater than 25 MWe and
   (ii) Producing electricity for sale.
(ii) For cogeneration units—
   (A) For units commencing operation before January 1, 1997, a unit with a maximum design heat input greater than 250 mmBtu/hr and not serving during 1995 or 1996 a generator producing electricity for sale under a firm contract to the electric grid.
   (B) For units commencing operation in 1997 or 1998, a unit with a maximum design heat input greater than 250 mmBtu/hr and not serving during 1997 or 1998 a generator producing electricity for sale under a firm contract to the electric grid.
   (C) For units commencing operation on or after January 1, 1999, a unit with a maximum design heat input greater than 250 mmBtu/hr:
      (i) At no time serving a generator producing electricity for sale; or
      (ii) At any time serving a generator with a nameplate capacity of 25 MWe or less producing electricity for sale and with the potential to use no more than 50 percent of the potential electrical output capacity of the unit.
   (ii) For cogeneration units—
      (A) For units commencing operation before January 1, 1997, a unit with a maximum design heat input greater than 250 mmBtu/hr and qualifying as an unaffected unit under §72.6(b)(4) of this chapter under the Acid Rain Program.
      (B) For units commencing operation in 1997 or 1998, a unit with a maximum design heat input greater than 250 mmBtu/hr and qualifying as an unaffected unit under §72.6(b)(4) under the Acid Rain Program for 1997 and 1998.
      (C) For units commencing operation on or after January 1, 1999, a unit with a maximum design heat input greater than 250 mmBtu/hr and qualifying as an unaffected unit under §72.6(b)(4) of this chapter under the Acid Rain Program for each year.
   (b)(1) Notwithstanding paragraph (a) of this section, a unit under paragraph (a)(1) or (a)(2) of this section that has a federally enforceable permit that restricts the unit to combusting only natural gas or fuel oil (as defined in §75.2 of this chapter) during a control period includes a NO\textsubscript{X} emission limitation restricting NO\textsubscript{X} emissions during a control period to 25 tons or less, and includes the special provisions in paragraph (b)(4) of this section shall be exempt from the requirements of the NO\textsubscript{X} Budget Trading Program, except for the provisions of this paragraph (b), §97.2, §97.3, §97.4(a), §97.7, and subparts E, F, and G of this part. The NO\textsubscript{X} emission limitation under this paragraph (b)(1) shall restrict NO\textsubscript{X} emissions during the control period by limiting unit operating hours. The restriction on unit operating hours shall be calculated by dividing 25 tons by the unit's maximum potential hourly NO\textsubscript{X} mass emissions, which shall equal the unit's maximum rated hourly heat input greater than 250 mmBtu/hr.
§ 97.4

input multiplied by the highest default NO\textsubscript{X} emission rate otherwise applicable to the unit under §75.19 of this chapter.

(2) The exemption under paragraph (b)(1) of this section shall become effective as follows:

(i) The exemption shall become effective on the date on which the NO\textsubscript{X} emission limitation and the special provisions in the permit under paragraph (b)(1) of this section become final; or

(ii) If the NO\textsubscript{X} emission limitation and the special provisions in the permit under paragraph (b)(1) of this section become final during a control period and after the first date on which the unit operates during such control period, then the exemption shall become effective on May 1 of such control period, provided that such NO\textsubscript{X} emission limitation and special provisions do not apply to the unit as of such first date of operation. If such NO\textsubscript{X} emission limitation and special provisions do not apply to the unit as of such first date of operation, then the exemption under paragraph (b)(1) of this section shall become effective on October 1 of the year during which such NO\textsubscript{X} emission limitation and the special provisions become final.

(3) The permitting authority that issues a federally enforceable permit under paragraph (b)(1) of this section for a unit under paragraph (a)(1) or (a)(2) of this section will provide the Administrator written notice of the issuance of such permit and, upon request, a copy of the permit.

(4) Special provisions. (i) A unit exempt under paragraph (b)(1) of this section shall comply with the restriction on fuel use and unit operating hours described in paragraph (b)(1) of this section during the control period in each year.

(ii) The Administrator will allocate NO\textsubscript{X} allowances to the unit under §§97.41(a) through (c) and 97.42(a) through (c). For each control period for which the unit is allocated NO\textsubscript{X} allowances under §§97.41(a) through (c) and 97.42(a) through (c):

(A) The owners and operators of the unit must specify a general account, in which the Administrator will record the NO\textsubscript{X} allowances; and

(B) After the Administrator records a NO\textsubscript{X} allowance allocations under §§97.41(a) through (c) and 97.42(a) through (c), the Administrator will deduct, from the general account under paragraph (b)(4)(i)(A) of this section, NO\textsubscript{X} allowances that are allocated for the same or a prior control period as the NO\textsubscript{X} allowances allocated to the unit under §§97.41(a) through (c) and 97.42(a) through (c) and that equal the NO\textsubscript{X} emission limitation (in tons of NO\textsubscript{X}) on which the unit’s exemption under paragraph (b)(1) of this section is based. The NO\textsubscript{X} authorized account representative shall ensure that such general account contains the NO\textsubscript{X} allowances necessary for completion of such deduction.

(iii) A unit exempt under this paragraph (b) shall report hours of unit operation during the control period in each year to the permitting authority by November 1 of that year.

(iv) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (b)(1) of this section shall retain, at the source that includes the unit, records demonstrating that the conditions of the federally enforceable permit under paragraph (b)(1) of this section were met, including the restriction on fuel use or unit operating hours. The 5-year period for keeping records may be extended for cause, at any time prior to the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit met the restriction on fuel use or unit operating hours.

(v) The owners and operators and, to the extent applicable, the NO\textsubscript{X} authorized account representative of a unit exempt under paragraph (b)(1) of this section shall comply with the requirements of the NO\textsubscript{X} Budget Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(vi) On the earlier of the following dates, a unit exempt under paragraph (b)(1) of this section shall lose its exemption:
(A) The date on which the restriction on fuel use or unit operating hours described in paragraph (b)(1) of this section is removed from the unit's federally enforceable permit or otherwise becomes no longer applicable to any control period starting in 2004; or

(B) The first date on which the unit fails to comply, or with regard to which the owners and operators fail to meet their burden of proving that the unit is complying, with the restriction on fuel use or unit operating hours described in paragraph (b)(1) of this section during any control period starting in 2004.

(vii) A unit that loses its exemption in accordance with paragraph (b)(4)(vi) of this section shall be subject to the requirements of this part. For the purpose of applying permitting requirements under subpart C of this part, allocating allowances under subpart E of this part, and applying monitoring requirements under subpart H of this part, the unit shall be treated as commencing operation and, if the unit is covered by paragraph (a)(1) of this section, commencing commercial operation on the date the unit loses its exemption.

(viii) A unit that is exempt under paragraph (b)(1) of this section is not eligible to be a NO\textsubscript{X} Budget opt-in unit under subpart I of this part.

§97.5 Retired unit exemption.

(a) This section applies to any NO\textsubscript{X} Budget unit, other than a NO\textsubscript{X} Budget opt-in unit, that is permanently retired.

(b)(1) Any NO\textsubscript{X} Budget unit, other than a NO\textsubscript{X} Budget opt-in unit, that is permanently retired shall be exempt from the NO\textsubscript{X} Budget Trading Program, except for the provisions of this section, §97.2, §97.3, §97.4, §97.7, and subparts E, F, and G of this part.

(2) The exemption under paragraph (b)(1) of this section shall become effective the day on which the unit is permanently retired. Within 30 days of permanent retirement, the NO\textsubscript{X} authorized account representative (authorized in accordance with subpart B of this part) shall submit a statement to the permitting authority otherwise responsible for administering any NO\textsubscript{X} Budget permit for the unit. The NO\textsubscript{X} authorized account representative shall submit a copy of the statement to the Administrator. The statement shall state, in a format prescribed by the permitting authority, that the unit is permanently retired and will comply with the requirements of paragraph (c) of this section.

(3) After receipt of the notice under paragraph (b)(2) of this section, the permitting authority will amend any permit covering the source at which the unit is located to add the provisions and requirements of the exemption under paragraphs (b)(1) and (c) of this section.

(c) Special provisions. (1) A unit exempt under this section shall not emit any nitrogen oxides, starting on the date that the exemption takes effect.

(2) The Administrator will allocate NO\textsubscript{X} allowances under subpart E of this part to a unit exempt under this section. For each control period for which the unit is allocated one or more NO\textsubscript{X} allowances, the owners and operators of the unit shall specify a general account, in which the Administrator will record such NO\textsubscript{X} allowances.

(3) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under this section shall retain at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time prior to the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(4) The owners and operators and, to the extent applicable, the NO\textsubscript{X} authorized account representative of a unit exempt under this section shall comply with the requirements of the NO\textsubscript{X} Budget Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(5)(i) A unit exempt under this section and located at a source that is required, or but for this exemption would have been required, to report emissions of nitrogen oxides under regulations promulgated under sections 111 or 112 of the Clean Air Act shall cease to be required to prepare and submit such reports.
§ 97.6 Standard requirements.

(a) Permit requirements. (1) The NOX authorized account representative of each NOX Budget source required to have a federally enforceable permit and each NOX Budget unit required to have a federally enforceable permit at the source shall:
   (i) Submit to the permitting authority a complete NOX Budget permit application under §97.22 in accordance with the deadlines specified in §97.21(b) and (c);
   (ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a NOX Budget permit application and issue or deny a NOX Budget permit.

(2) The owners and operators of each NOX Budget source required to have a federally enforceable permit and each NOX Budget unit required to have a federally enforceable permit at the source shall have a NOX Budget permit issued by the permitting authority and operate the unit in compliance with such NOX Budget permit.

(3) The owners and operators of a NOX Budget source that is not otherwise required to have a federally enforceable permit are not required to submit a NOX Budget permit application, and to have a NOX Budget permit under subpart C of this part for such NOX Budget source.

(b) Monitoring requirements. (1) The owners and operators and, to the extent applicable, the NOX authorized account representative of each NOX Budget source and each NOX Budget unit at the source shall comply with the monitoring requirements of subpart H of this part.

(2) The emissions measurements recorded and reported in accordance with subpart H of this part shall be used to determine compliance by the unit with the NOX Budget emissions limitation under paragraph (c) of this section.

(c) Nitrogen oxides requirements. (1) The owners and operators of each NOX Budget source and each NOX Budget unit at the source shall hold NOX allowances available for compliance deductions under §97.54(a), (b), (e), or (f) as of the NOX allowance transfer deadline, in the unit’s compliance account and the source’s overdraft account in

[65 FR 2727, Jan. 18, 2000, as amended at 67 FR 21529, Apr. 30, 2002; 69 FR 21646, Apr. 21, 2004]
an amount not less than the total NO\textsubscript{X} emissions for the control period from the unit, as determined in accordance with subpart H of this part, plus any amount necessary to account for actual heat input under §97.42(e) for the control period or to account for excess emissions for a prior control period under §97.54(d) or to account for withdrawal from the NO\textsubscript{X} Budget Trading Program, or a change in regulatory status, of a NO\textsubscript{X} Budget opt-in unit under §97.86 or §97.87.

(2) Each ton of nitrogen oxides emitted in excess of the NO\textsubscript{X} Budget emissions limitation shall constitute a separate violation of this part, the Clean Air Act, and applicable State law.

(3) A NO\textsubscript{X} Budget unit shall be subject to the requirements under paragraph (c)(1) of this section starting on the later of May 31, 2004 or the date on which the unit commences operation.

(4) NO\textsubscript{X} allowances shall be held in, deducted from, or transferred among NO\textsubscript{X} Allowance Tracking System accounts in accordance with subparts E, F, G, and I of this part.

(5) A NO\textsubscript{X} allowance shall not be deducted, in order to comply with the requirements under paragraph (c)(1) of this section, for a control period in a year prior to the year for which the NO\textsubscript{X} allowance was allocated.

(6) A NO\textsubscript{X} allowance allocated by the Administrator under the NO\textsubscript{X} Budget Trading Program is a limited authorization to emit one ton of nitrogen oxides in accordance with the NO\textsubscript{X} Budget Trading Program. No provision of the NO\textsubscript{X} Budget Trading Program, the NO\textsubscript{X} Budget permit application, the NO\textsubscript{X} Budget permit, or an exemption under §97.42(h) or §97.42(i) and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization.

(7) A NO\textsubscript{X} allowance allocated by the Administrator under the NO\textsubscript{X} Budget Trading Program does not constitute a property right.

(8) Upon recordation by the Administrator under subpart F or G of this part, every allocation, transfer, or deduction of a NO\textsubscript{X} allowance to or from a NO\textsubscript{X} Budget unit’s compliance account or the overdraft account of the source where the unit is located is incorporated automatically in any NO\textsubscript{X} Budget permit of the NO\textsubscript{X} Budget unit.

(d) Excess emissions requirements. (1) The owners and operators of a NO\textsubscript{X} Budget unit that has excess emissions in any control period shall:

(i) Surrender the NO\textsubscript{X} allowances required for deduction under §97.54(d)(1); and

(ii) Pay any fine, penalty, or assessment or comply with any other remedy imposed under §97.54(d)(3).

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the NO\textsubscript{X} Budget source and each NO\textsubscript{X} Budget unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time prior to the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The account certificate of representation under §97.13 for the NO\textsubscript{X} authorized account representative for the source and each NO\textsubscript{X} Budget unit at the source and all documents that demonstrate the truth of the statements in the account certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new account certificate of representation under §97.13 changing the NO\textsubscript{X} authorized account representative.

(ii) All emissions monitoring information, in accordance with subpart H of this part; provided that to the extent that subpart H of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the NO\textsubscript{X} Budget Trading Program.

(iv) Copies of all documents used to complete a NO\textsubscript{X} Budget permit application and any other submission under the NO\textsubscript{X} Budget Trading Program or to demonstrate compliance with the requirements of the NO\textsubscript{X} Budget Trading Program.

(2) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget source and each NO\textsubscript{X} Budget unit at the source
§ 97.7 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the NOX Budget Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the NOX Budget Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the NOX Budget Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

Subpart B—NOX Authorized Account Representative for NOX Budget Sources

§ 97.10 Authorization and responsibilities of NOX authorized account representative.

(a) Except as provided under §97.11, each NOX Budget source, including all NOX Budget units at the source, shall have one and only one NOX authorized account representative, with regard to all matters under the NOX Budget Trading Program concerning the source or any NOX Budget unit at the source.

(b) The NOX authorized account representative of the NOX Budget source shall be selected by an agreement binding on the owners and operators of the source and all NOX Budget units at the source.

(c) Upon receipt by the Administrator of a complete account certificate of representation under §97.13, the NOX authorized account representative

shall submit the reports and compliance certifications required under the NOX Budget Trading Program, including those under subpart D, H, or I of this part.

(f) Liability. (1) Any person who knowingly violates any requirement or prohibition of the NOX Budget Trading Program, a NOX Budget permit, or an exemption under §97.4(b) or §97.5 shall be subject to enforcement pursuant to applicable State or Federal law.

(2) Any person who knowingly makes a false material statement in any record, submission, or report under the NOX Budget Trading Program shall be subject to criminal enforcement pursuant to the applicable State or Federal law.

(3) No permit revision shall excuse any violation of the requirements of the NOX Budget Trading Program that occurs prior to the date that the revision takes effect.

(4) Each NOX Budget source and each NOX Budget unit shall meet the requirements of the NOX Budget Trading Program.

(5) Any provision of the NOX Budget Trading Program that applies to a NOX Budget source or the NOX authorized account representative of a NOX Budget source shall also apply to the owners and operators of such source and of the NOX Budget units at the source.

(6) Any provision of the NOX Budget Trading Program that applies to a NOX Budget unit or the NOX authorized account representative of a NOX Budget unit shall also apply to the owners and operators of such unit. Except with regard to the requirements applicable to units with a common stack under subpart H of this part, the owners and operators of such unit and the NOX authorized account representative of one NOX Budget unit shall not be liable for any violation by any other NOX Budget unit of which they are not owners or operators or the NOX authorized account representative and that is located at a source of which they are not owners or operators or the NOX authorized account representative.

(g) Effect on other authorities. No provision of the NOX Budget Trading Program, a NOX Budget permit application, a NOX Budget permit, or an exemption under §97.4(b) or §97.5 shall be construed as exempting or excluding the owners and operators and, to the extent applicable, the NOX authorized account representative of a NOX Budget source or NOX Budget unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the Clean Air Act.

[65 FR 2727, Jan. 18, 2000, as amended at 67 FR 21529, Apr. 30, 2002]
of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the NO\textsubscript{X} Budget source represented and each NO\textsubscript{X} Budget unit at the source in all matters pertaining to the NO\textsubscript{X} Budget Trading Program, not withstanding any agreement between the NO\textsubscript{X} authorized account representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the NO\textsubscript{X} authorized account representative by the permitting authority, the Administrator, or a court regarding the source or unit.

(d) No NO\textsubscript{X} Budget permit shall be issued, and no NO\textsubscript{X} Allowance Tracking System account shall be established for a NO\textsubscript{X} Budget unit at a source, until the Administrator has received a complete account certificate of representation under §97.13 for a NO\textsubscript{X} authorized account representative of the source and the NO\textsubscript{X} Budget units at the source.

(e) (1) Each submission under the NO\textsubscript{X} Budget Trading Program shall be submitted, signed, and certified by the NO\textsubscript{X} authorized account representative for each NO\textsubscript{X} Budget source on behalf of which the submission is made. Each such submission shall include the following certification statement by the NO\textsubscript{X} authorized account representative: “I am authorized to make this submission on behalf of the owners and operators of the NO\textsubscript{X} Budget sources or NO\textsubscript{X} Budget units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(2) The permitting authority and the Administrator will accept or act on a submission made on behalf of owner or operators of a NO\textsubscript{X} Budget source or a NO\textsubscript{X} Budget unit only if the submission has been made, signed, and certified in accordance with paragraph (e)(1) of this section.

§97.11 Alternate NO\textsubscript{X} authorized account representative.

(a) An account certificate of representation may designate one and only one alternate NO\textsubscript{X} authorized account representative who may act on behalf of the NO\textsubscript{X} authorized account representative. The agreement by which the alternate NO\textsubscript{X} authorized account representative is selected shall include a procedure for authorizing the alternate NO\textsubscript{X} authorized account representative to act in lieu of the NO\textsubscript{X} authorized account representative.

(b) Upon receipt by the Administrator of a complete account certificate of representation under §97.13, any representation, action, inaction, or submission by the alternate NO\textsubscript{X} authorized account representative shall be deemed to be a representation, action, inaction, or submission by the NO\textsubscript{X} authorized account representative.

(c) Except in this section and §§97.10(a), 97.12, 97.13, and 97.51, whenever the term “NO\textsubscript{X} authorized account representative” is used in this part, the term shall be construed to include the alternate NO\textsubscript{X} authorized account representative.

§97.12 Changing NO\textsubscript{X} authorized account representative and alternate NO\textsubscript{X} authorized account representative; changes in owners and operators.

(a) Changing NO\textsubscript{X} authorized account representative. The NO\textsubscript{X} authorized account representative may be changed at any time upon receipt by the Administrator of a superseding complete account certificate of representation under §97.13. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous NO\textsubscript{X} authorized account representative prior to the time and date when the Administrator receives the superseding account certificate of representation shall be binding on the new NO\textsubscript{X} authorized account representative and the owners and operators of the NO\textsubscript{X} Budget source and the NO\textsubscript{X} Budget units at the source.
§ 97.13  Account certificate of representation.

(a) A complete account certificate of representation for a NO\textsubscript{X} authorized account representative or an alternate NO\textsubscript{X} authorized account representative shall include the following elements in a format prescribed by the Administrator:

1. Identification of the NO\textsubscript{X} Budget source and each NO\textsubscript{X} Budget unit at the source for which the account certificate of representation is submitted.

2. The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative.

3. A list of the owners and operators of the NO\textsubscript{X} Budget source and of each NO\textsubscript{X} Budget unit at the source.

4. Changes in owners and operators.
   (1) In the event a new owner or operator of a NO\textsubscript{X} Budget source or a NO\textsubscript{X} Budget unit is not included in the list of owners and operators submitted in the account certificate of representation under §97.13, such new owner or operator shall be deemed to be subject to and bound by the account certificate of representation, the representations, actions, inactions, and submissions of the NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative of the source or unit, and the decisions, orders, actions, and inactions of the permitting authority or the Administrator, as if the new owner or operator were included in such list.

   (2) Within 30 days following any change in the owners and operators of a NO\textsubscript{X} Budget source or a NO\textsubscript{X} Budget unit, including the addition of a new owner or operator, the NO\textsubscript{X} authorized account representative or alternate NO\textsubscript{X} authorized account representative shall submit a revision to the account certificate of representation under §97.13 amending the list of owners and operators to include the change.

§ 97.14  Objections concerning NO\textsubscript{X} authorized account representative.

(a) Once a complete account certificate of representation under §97.13 has
Environmental Protection Agency

§ 97.21 Submission of NOX Budget permit applications.

(a) Duty to apply. The NOX authorized account representative of any NOX Budget source required to have a federally enforceable permit shall submit to the permitting authority a complete NOX Budget permit application under §97.22 covering such NOX Budget units to the permitting authority at least 18 months (or such lesser time provided by the permitting authority) before May 31, 2004.

(b) Each NOX Budget permit shall contain all applicable NOX Budget Trading Program requirements and shall be a complete and segregable portion of the permit under paragraph (a) of this section.

§ 97.20 General NOX Budget Trading Program permit requirements.

(a) For each NOX Budget source required to have a federal-ly enforceable permit, such permit shall include a NOX Budget permit administered by the permitting authority for the federally enforceable permit.

(1) For NOX Budget sources required to have a title V operating permit, the NOX Budget portion of the title V permit shall be administered in accordance with the permitting authority’s title V operating permits regulations promulgated under part 70 or 71 of this chapter, except as provided otherwise by this subpart or subpart I of this part.

(b) Each NOX Budget permit shall contain all applicable NOX Budget Trading Program requirements and shall be a complete and segregable portion of the permit under paragraph (a) of this section.

(b)(1) For NOX Budget sources required to have a non-title V operating permit:

(i) For any source, with one or more NOX Budget units under §97.4(a) that commence operation before January 1, 2001, the NOX authorized account representative shall submit a complete NOX Budget permit application under §97.22 covering such NOX Budget units to the permitting authority at least 18 months (or such lesser time provided by the permitting authority) before May 31, 2004.

(ii) For any source, with any NOX Budget unit under §97.4(a) that commences operation on or after January 1, 2001, the NOX authorized account representative shall submit a complete NOX Budget permit application under §97.22 covering such NOX Budget unit to the permitting authority at least 18 months (or such lesser time provided by the permitting authority) before the later of May 31, 2004 or the date on which the NOX Budget unit commences operation.

(2) For NOX Budget sources required to have a non-title V permit:

(i) For any source, with one or more NOX Budget units under §97.4(a) that commence operation before January 1, 2001, the NOX authorized account representative shall submit a complete NOX Budget permit application under §97.22 covering such NOX Budget units to the permitting authority at least 18 months (or such lesser time provided by the permitting authority) before May 31, 2004.

(2) For NOX Budget sources required to have a non-title V permit:

(i) For any source, with one or more NOX Budget units under §97.4(a) that commence operation before January 1, 2001, the NOX authorized account representative shall submit a complete NOX Budget permit application under §97.22 covering such NOX Budget units to the permitting authority at least 18 months (or such lesser time provided by the permitting authority) before May 31, 2004.
(i) For any source, with any NO\textsubscript{X} Budget unit under §97.4(a) that commences operation on or after January 1, 2001, the NO\textsubscript{X} authorized account representative shall submit a complete NO\textsubscript{X} Budget permit application under §97.22 covering such NO\textsubscript{X} Budget unit to the permitting authority at least 18 months (or such lesser time provided by the permitting authority) before the later of May 31, 2004 or the date on which the NO\textsubscript{X} Budget unit commences operation.

(c) Duty to reapply. (1) For a NO\textsubscript{X} Budget source required to have a title V operating permit, the NO\textsubscript{X} authorized account representative shall submit a complete NO\textsubscript{X} Budget permit application under §97.22 for the NO\textsubscript{X} Budget source covering the NO\textsubscript{X} Budget units at the source in accordance with the permitting authority’s title V operating permits regulations addressing operating permit renewal.

(2) For a NO\textsubscript{X} Budget source required to have a non-title V permit, the NO\textsubscript{X} authorized account representative shall submit a complete NO\textsubscript{X} Budget permit application under §97.22 for the NO\textsubscript{X} Budget units at the source in accordance with the permitting authority’s non-title V permits regulations addressing permit renewal.

[65 FR 2727, Jan. 18, 2000, as amended at 67 FR 21529, Apr. 30, 2002]

§ 97.22 Information requirements for NO\textsubscript{X} Budget permit applications.

A complete NO\textsubscript{X} Budget permit application shall include the following elements concerning the NO\textsubscript{X} Budget source for which the application is submitted, in a format prescribed by the permitting authority:

(a) Identification of the NO\textsubscript{X} Budget source, including plant name and the ORIS (Office of Regulatory Information Systems) or facility code assigned to the source by the Energy Information Administration, if applicable;

(b) Identification of each NO\textsubscript{X} Budget unit at the NO\textsubscript{X} Budget source and whether it is a NO\textsubscript{X} Budget unit under §97.4(a) or under subpart I of this part;

(c) The standard requirements under §97.6; and

(d) For each NO\textsubscript{X} Budget opt-in unit at the NO\textsubscript{X} Budget source, the following certification statements by the NO\textsubscript{X} authorized account representative:

(1) “I certify that each unit for which this permit application is submitted under subpart I of this part is not a NO\textsubscript{X} Budget unit under 40 CFR 97.4(a) and is not covered by an exemption under 40 CFR 97.4(b) or 97.5 that is in effect.”

(2) If the application is for an initial NO\textsubscript{X} Budget opt-in permit, “I certify that each unit for which this permit application is submitted under subpart I of 40 CFR part 97 is operating, as that term is defined under 40 CFR 97.2.”

§ 97.23 NO\textsubscript{X} Budget permit contents.

(a) Each NO\textsubscript{X} Budget permit will contain, in a format prescribed by the permitting authority, all elements required for a complete NO\textsubscript{X} Budget permit application under §97.22.

(b) Each NO\textsubscript{X} Budget permit is deemed to incorporate automatically the definitions of terms under §97.2 and, upon recordation by the Administrator under subpart F or G of this part, every allocation, transfer, or deduction of a NO\textsubscript{X} allowance to or from the compliance accounts of the NO\textsubscript{X} Budget units covered by the permit or the overdraft account of the NO\textsubscript{X} Budget source covered by the permit.

§ 97.24 NO\textsubscript{X} Budget permit revisions.

(a) For a NO\textsubscript{X} Budget source with a title V operating permit, except as provided in §97.23(b), the permitting authority will revise the NO\textsubscript{X} Budget permit, as necessary, in accordance with the permitting authority’s title V operating permits regulations addressing permit revisions.

(b) For a NO\textsubscript{X} Budget source with a non-title V permit, except as provided in §97.23(b), the permitting authority will revise the NO\textsubscript{X} Budget permit, as necessary, in accordance with the permitting authority’s non-title V permits regulations addressing permit revisions.

Subpart D—Compliance Certification

§ 97.30 Compliance certification report.

(a) Applicability and deadline. For each control period in which one or
more NO\(_x\) Budget units at a source are subject to the NO\(_x\) Budget emissions limitation, the NO\(_x\) authorized account representative of the source shall submit to the permitting authority and the Administrator by November 30 of that year, a compliance certification report for each source covering all such units.

(b) Contents of report. The NO\(_x\) authorized account representative shall include in the compliance certification report under paragraph (a) of this section the following elements, in a format prescribed by the Administrator, concerning each unit at the source and subject to the NO\(_x\) Budget emissions limitation for the control period covered by the report:

(1) Identification of each NO\(_x\) Budget unit;

(2) At the NO\(_x\) authorized account representative’s option, the serial numbers of the NO\(_x\) allowances that are to be deducted from each unit’s compliance account under §97.54 for the control period;

(3) At the NO\(_x\) authorized account representative’s option, for units sharing a common stack and having NO\(_x\) emissions that are not monitored separately or apportioned in accordance with subpart H of this part, the percentage of allowances that is to be deducted from each unit’s compliance account under §97.54(e); and

(4) The compliance certification under paragraph (c) of this section.

(c) Compliance certification. In the compliance certification report under paragraph (a) of this section, the NO\(_x\) authorized account representative shall certify, based on reasonable inquiry of those persons with primary responsibility for operating the source and the NO\(_x\) Budget units at the source in compliance with the NO\(_x\) Budget Trading Program, whether each NO\(_x\) Budget unit for which the compliance certification is submitted was operated during the calendar year covered by the report in compliance with the requirements of the NO\(_x\) Budget Trading Program applicable to the unit, including:

(1) Whether the unit was operated in compliance with the NO\(_x\) Budget emissions limitation;

(2) Whether the monitoring plan that governs the unit has been maintained to reflect the actual operation and monitoring of the unit and contains all information necessary to attribute NO\(_x\) emissions to the unit, in accordance with subpart H of this part;

(3) Whether all the NO\(_x\) emissions from the unit, or a group of units (including the unit) using a common stack, were monitored or accounted for through the missing data procedures and reported in the quarterly monitoring reports, including whether conditional data were reported in the quarterly reports in accordance with subpart H of this part. If conditional data were reported, the owner or operator shall indicate whether the status of all conditional data has been resolved and all necessary quarterly report resubmissions have been made;

(4) Whether the facts that form the basis for certification under subpart H of this part of each monitor at the unit or a group of units (including the unit) using a common stack, or for using an excepted monitoring method or alternative monitoring method approved under subpart H of this part, if any, have changed; and

(5) If a change is required to be reported under paragraph (c)(4) of this section, specify the nature of the change, the reason for the change, when the change occurred, and how the unit’s compliance status was determined subsequent to the change, including what method was used to determine emissions when a change mandated the need for monitor recertification.

§97.31 Administrator’s action on compliance certifications.

(a) The Administrator may review and conduct independent audits concerning any compliance certification or any other submission under the NO\(_x\) Budget Trading Program and make appropriate adjustments of the information in the compliance certifications or other submissions.

(b) The Administrator may deduct NO\(_x\) allowances from or transfer NO\(_x\) allowances to a unit’s compliance account or a source’s overdraft account.
based on the information in the compliance certifications or other submissions, as adjusted under paragraph (a) of this section.

Subpart E—NO\textsubscript{X} Allowance Allocations

§ 97.40 Trading program budget.

In accordance with §§ 97.41 and 97.42, the Administrator will allocate to the NO\textsubscript{X} Budget units under § 97.4(a) in a State, for each control period specified in § 97.41, a total number of NO\textsubscript{X} allowances equal to the trading budget for the State, as set forth in appendix C to this subpart, less the sum of the NO\textsubscript{X} emission limitations (in tons) for each unit exempt under § 97.4(b) that is not allocated any NO\textsubscript{X} allowances under § 97.42(b) or (c) for the control period and whose NO\textsubscript{X} emission limitation (in tons of NO\textsubscript{X}) is not included in the amount calculated under § 97.42(d)(5)(ii)(B) for the control period.

§ 97.41 Timing requirements for NO\textsubscript{X} allowance allocations.

(a) The NO\textsubscript{X} allowance allocations, determined in accordance with §§ 97.42(a) through (c), for the control periods in 2004 through 2007 are set forth in appendices A and B to this subpart.
(b) By April 1, 2005, the Administrator will determine by order the NO\textsubscript{X} allowance allocations, in accordance with §§ 97.42(a) through (c), for the control periods in 2008 through 2012.
(c) By April 1, 2010, by April 1 of the year that is 5 years after the last year for which NO\textsubscript{X} allowances allocations are determined, the Administrator will determine by order the NO\textsubscript{X} allowance allocations, in accordance with §§ 97.42(a) through (c), for the control periods in the years that are 3, 4, 5, 6, and 7 years after the applicable deadline under this paragraph (c).
(d) By April 1, 2004 and April 1 of each year thereafter, the Administrator will determine by order the NO\textsubscript{X} allowance allocations in accordance with § 97.42(d), for the control period in the year of the applicable deadline under this paragraph (d).

(e) The Administrator will make available to the public each determination of NO\textsubscript{X} allowance allocations under paragraph (b), (c), or (d) of this section and will provide an opportunity for submission of objections to the determination. Objections shall be limited to addressing whether the determination is in accordance with § 97.42. Based on any such objections, the Administrator will adjust each determination to the extent necessary to ensure that it is in accordance with § 97.42.

§ 97.42 NO\textsubscript{X} allowance allocations.

(a)(1) The heat input (in mmBtu) used for calculating NO\textsubscript{X} allowance allocations for each NO\textsubscript{X} Budget unit under § 97.4(a) will be:
(A) For a NO\textsubscript{X} allowance allocation under § 97.41(a), the average of the two highest amounts of the unit’s heat input for the control periods in 1995 through 1998; or
(B) For a unit under § 97.4(a)(2), the control period in 1995 or, if the Administrator determines that reasonably reliable data are available for control periods in 1996 through 1998, the average of the two highest amounts of the unit’s heat input for the control periods in 1995 through 1998.

(i) For a NO\textsubscript{X} allowance allocation under § 97.41(a), such heat input will be determined using the best available data reported to the Administrator for

(ii) For a NO\textsubscript{X} allowance allocation under §97.41(b) or (c) for a unit exempt under §97.4(b), such heat input shall be treated as zero if the unit is exempt under §97.4(b) during the control period.

(b) For each group of control periods specified in §97.41(a) through (c), the Administrator will allocate to all NO\textsubscript{X} Budget units in a given State under §97.41(a)(1) that commenced operation before May 1, 1997 for allocations under §97.41(a), May 1, 2003 for allocations under §97.41(b), and May 1 of the year 5 years before the first year for which the allocation under §97.41(c) is being calculated, a total number of NO\textsubscript{X} allowances equal to 95 percent of the portion of the State’s trading program budget under §97.40 covering such units. The Administrator will allocate in accordance with the following procedures:

(1) The Administrator will allocate NO\textsubscript{X} allowances to each NO\textsubscript{X} Budget unit under §97.4(a)(1) for each control period in an amount equaling 0.17 lb/mmBtu multiplied by the heat input determined under paragraph (a) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole number of NO\textsubscript{X} allowances as appropriate.

(2) If the initial total number of NO\textsubscript{X} allowances allocated to all NO\textsubscript{X} Budget units under §97.4(a)(1) in the State for a control period under paragraph (b)(1) of this section does not equal 95 percent of the portion of the State’s trading program budget under §97.40 covering such units, the Administrator will adjust the total number of NO\textsubscript{X} allowances allocated to all such NO\textsubscript{X} Budget units for the control period under paragraph (b)(1) of this section so that the total number of NO\textsubscript{X} allowances allocated equals 95 percent of such portion of the State’s trading program budget. This adjustment will be made by: multiplying each unit’s allocation by 95 percent of such portion of the State’s trading program budget; dividing by the total number of NO\textsubscript{X} allowances allocated under paragraph (b)(1) of this section for the control period; and rounding to the nearest whole number of NO\textsubscript{X} allowances as appropriate.

(c) For each group of control periods specified in §97.41(a) through (c), the Administrator will allocate to all NO\textsubscript{X} Budget units in a given State under §97.4(a)(2) that commenced operation before May 1, 1997 for allocations under §97.41(a), May 1, 2003 for allocations under §97.41(b), and May 1 of the year 5 years before the first year for which the allocation under §97.41(c) is being calculated, a total number of NO\textsubscript{X} allowances equal to 95 percent of the portion of the State’s trading program budget under §97.40 covering such units. The Administrator will allocate in accordance with the following procedures:

(1) The Administrator will allocate NO\textsubscript{X} allowances to each NO\textsubscript{X} Budget unit under §97.4(a)(2) for each control period in an amount equaling 0.17 lb/mmBtu multiplied by the heat input determined under paragraph (a) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole number of NO\textsubscript{X} allowances as appropriate.

(2) If the initial total number of NO\textsubscript{X} allowances allocated to all NO\textsubscript{X} Budget units under §97.4(a)(2) in the State for a control period under paragraph (c)(1) of this section does not equal 95 percent of the portion of the State’s trading program budget under §97.40 covering such units, the Administrator will adjust the total number of NO\textsubscript{X} allowances allocated to all such NO\textsubscript{X} Budget units for the control period under paragraph (a)(1) of this section so that the total number of NO\textsubscript{X} allowances allocated equals 95 percent of such portion of the State’s trading program budget under §97.40 covering such units; dividing by the total number of NO\textsubscript{X} allowances allocated under paragraph (c)(1) of this section for the control period; and rounding to the nearest whole number of NO\textsubscript{X} allowances as appropriate.

(d) For each control period specified in §97.41(d), the Administrator will allocate NO\textsubscript{X} allowances to NO\textsubscript{X} Budget units in a given State under §97.4(a) (except for units exempt under §97.4(b))...
that commence operation, or are projected to commence operation, on or after: May 1, 1997 (for control periods under §97.41(a)); May 1, 2003, (for control periods under §97.41(b)); and May 1 of the year 5 years before the beginning of the group of 5 years that includes the control period (for control periods under §97.41(c)). The Administrator will make the allocations under this paragraph (d) in accordance with the following procedures:

1. The Administrator will establish one allocation set-aside for each control period. Each allocation set-aside will be allocated NOX allowances equal to 5 percent of the tons of NOX emission in the State’s trading program budget under §97.40, rounded to the nearest whole number of NOX allowances as appropriate.

2. The NOX authorized account representative for a NOX Budget unit specified in this paragraph (d) may submit to the Administrator a request, in a format specified by the Administrator, to be allocated NOX allowances for the control period. The NOX allowance allocation request must be received by the Administrator on or after the date on which the State permitting authority issues a permit to construct the unit and by January 1 before the control period for which NOX allowances are requested.

3. In a NOX allowance allocation request under paragraph (d)(2) of this section, the NOX authorized account representative for a NOX Budget unit under §97.4(a)(1) may request for the control period NOX allowances in an amount that does not exceed the lesser of:

   (i) 0.15 lb/mmBtu multiplied by the unit’s maximum design heat input, multiplied by the lesser of 3,672 hours or the number of hours remaining in the control period starting with the day in the control period on which the unit commences operation or is projected to commence operation, divided by 2,000 lb/ton, and rounded to the nearest whole number of NOX allowances as appropriate.

   (ii) The unit’s most stringent State or Federal NOX emission limitation multiplied by the unit’s maximum design heat input, multiplied by the lesser of 3,672 hours or the number of hours remaining in the control period starting with the day in the control period on which the unit commences operation or is projected to commence operation, divided by 2,000 lb/ton, and rounded to the nearest whole number of NOX allowances as appropriate.

4. In a NOX allowance allocation request under paragraph (d)(2) of this section, the NOX authorized account representative for a NOX Budget unit under §97.4(a)(2) may request for the control period NOX allowances in an amount that does not exceed the lesser of:

   (i) 0.17 lb/mmBtu multiplied by the unit’s maximum design heat input, multiplied by the lesser of 3,672 hours or the number of hours remaining in the control period starting with the day in the control period on which the unit commences operation or is projected to commence operation, divided by 2,000 lb/ton, and rounded to the nearest whole number of NOX allowances as appropriate.

   (ii) The unit’s most stringent State or Federal NOX emission limitation multiplied by the unit’s maximum design heat input, multiplied by the lesser of 3,672 hours or the number of hours remaining in the control period starting with the day in the control period on which the unit commences operation or is projected to commence operation, divided by 2,000 lb/ton, and rounded to the nearest whole number of NOX allowances as appropriate.

5. The Administrator will review each NOX allowance allocation request submitted in accordance with paragraph (d)(2) of this section and will allocate NOX allowances pursuant to such request as follows:

   (i) Upon receipt of the NOX allowance allocation request, the Administrator will make any necessary adjustments to the request to ensure that the requirements of paragraphs (d) introductory text, (d)(2), (d)(3), and (d)(4) are met.

   (ii) The Administrator will determine the following amounts:

      (A) The sum of the NOX allowances requested (as adjusted under paragraph (d)(5)(1) of this section) in all NOX allowance allocation requests under paragraph (d)(2) of this section for the control period; and
(B) For units exempt under §97.4(b) in the State that commenced operation, or are projected to commence operation, on or after May 1, 1997 (for control periods under §97.41(a)); May 1, 2003, (for control periods under §97.41(b)); and May 1 of the year 5 years before beginning of the group of 5 years that includes the control period (for control periods under §97.41(c)), the sum of the NO\textsubscript{X} emission limitations (in tons of NO\textsubscript{X}) on which each unit’s exemption under §97.4(b) is based.

(iv) If the number of NO\textsubscript{X} allowances in the allocation set-aside for the control period less the amount under paragraph (d)(5)(i)(B) of this section is less than the amount determined under paragraph (d)(5)(i)(A) of this section, the Administrator will allocate the amount of the NO\textsubscript{X} allowances requested (as adjusted under paragraph (d)(5)(i) of this section) to the NO\textsubscript{X} Budget unit for which the allocation request was submitted.

(f) After making the deductions for actual heat input under §97.54(b), (e), or (f) for a control period, the Administrator will determine whether any NO\textsubscript{X} allowances remain in the allocation set-aside for the control period. The Administrator will allocate any such NO\textsubscript{X} allowances to the NO\textsubscript{X} Budget units in the State using the following formula and rounding to the nearest whole number of NO\textsubscript{X} allowances as appropriate:

$$
\text{Unit’s share of NO}_x \text{ allowances remaining in allocation set-aside} = \frac{\text{Total NO}_x \text{ allowances remaining in allocation set-aside} \times \text{Unit’s NO}_x \text{ allowance allocation} - \text{State’s trading program budget excluding allocation set-aside}}{\text{Total number of NO}_x \text{ allowances remaining in allocation set-aside for the control period}}
$$

Where: “Total NO\textsubscript{X} allowances remaining in allocation set-aside” is the total number of NO\textsubscript{X} allowances remaining in the allocation set-aside for the control period.
§ 97.43 Compliance Supplement Pool.

(a) For any NO\textsubscript{X} Budget unit that reduces its NO\textsubscript{X} emission rate in the 2001 through 2003 control period, the owners and operators may request early reduction credits in accordance with the following requirements:

(1) Each NO\textsubscript{X} Budget unit that reduces its NO\textsubscript{X} emission rate in the 2001 through 2002.

(2) NO\textsubscript{X} emission rate and heat input under paragraphs (a)(3) and (4) of this section shall be determined in accordance with subpart H of this part.

(3) Each NO\textsubscript{X} Budget unit for which the owners and operators intend to request, or request, any early reduction credits under paragraph (a)(4) of this section shall reduce its NO\textsubscript{X} emission rate, for each control period for which early reduction credits are requested, to less than both 0.25 lb/mmBtu and 80 percent of the unit’s NO\textsubscript{X} emission rate in the 2000 control period.

(4) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit that meets the requirements of paragraphs (a)(1) and (3) of this section may submit to the Administrator a request for early reduction credits for the unit, based on NO\textsubscript{X} emission rate reductions.
made by the unit in the control period for 2001 through 2003.

(i) In the early reduction credit request, the NO\textsubscript{X} authorized account may request early reduction credits for such control period in an amount equal to the unit’s heat input for such control period multiplied by the difference between 0.25 lb/mmBtu and the unit’s NO\textsubscript{X} emission rate for such control period, divided by 2000 lb/ton, and rounded to the nearest whole number of tons.

(ii) The early reduction credit request must be submitted, in a format specified by the Administrator, by February 1, 2004.

(b) For any NO\textsubscript{X} Budget unit that is subject to the Ozone Transport Commission NO\textsubscript{X} Budget Program under title I of the Clean Air Act, the owners and operators may request early reduction credits in accordance with the following requirements:

(1) The NO\textsubscript{X} authorized account representative of the unit may submit to the Administrator a request for early reduction credits in an amount equal to the amount of banked allowances under the Ozone Transport Commission NO\textsubscript{X} Budget Program that were allocated for the control period in 2001 through 2003 and are held by the unit, in accordance with the Ozone Transport Commission NO\textsubscript{X} Budget Program, as of the date of submission of the request. During the entire control period in 2001 through 2003 for which the allowances were allocated, the unit must have monitored and reported NO\textsubscript{X} emissions in accordance with part 75 (except for subpart H) of this chapter and the Guidance for Implementation of Emission Monitoring Requirements for the NO\textsubscript{X} Budget Program (January 28, 1997).

(2) The early reduction credit request under paragraph (b)(1) must be submitted, in a format specified by the Administrator, by February 1, 2004.

(3) The NO\textsubscript{X} authorized account representative of the unit shall not submit a request for early reduction credits under paragraph (b)(1) of this section for banked allowances under the Ozone Transport Commission NO\textsubscript{X} Budget Program that were allocated for any control period during which the unit made NO\textsubscript{X} emission reductions for which he or she submits a request for early reduction credits under paragraph (a) of this section for the unit.

(c) The Administrator will review each early reduction credit request submitted in accordance with paragraph (a) or (b) of this section and will allocate NO\textsubscript{X} allowances to NO\textsubscript{X} Budget units in a given State and covered by such request as follows:

(1) Upon receipt of each early reduction credit request, the Administrator will make any necessary adjustments to the request to ensure that the amount of the early reduction credits requested meets the requirements of paragraph (a) or (b) of this section.

(2) After February 1, 2004, the Administrator will make available to the public a statement of the total number of early reduction credits requested by NO\textsubscript{X} Budget units in the State.

(3) If the State’s compliance supplement pool set forth in appendix D to this subpart has a number of NO\textsubscript{X} allowances not less than the amount of early reduction credits in all early reduction credit requests under paragraph (a) or (b) of this section for 2001 through 2003 (as adjusted under paragraph (c)(1) of this section) submitted by February 1, 2004, the Administrator will allocate to each NO\textsubscript{X} Budget unit covered by such requests one allowance for each early reduction credit requested (as adjusted under paragraph (c)(1) of this section).

(4) If the State’s compliance supplement pool set forth in appendix D to this subpart has a smaller number of NO\textsubscript{X} allowances than the amount of early reduction credits in all early reduction credit requests under paragraph (a) or (b) of this section for 2001 through 2003 (as adjusted under paragraph (c)(1) of this section) submitted by February 1, 2004, the Administrator will allocate NO\textsubscript{X} allowances to each NO\textsubscript{X} Budget unit covered by such requests according to the following formula and rounding to the nearest whole number of NO\textsubscript{X} allowances as appropriate:

\[
\text{Unit's allocation for early reduction credits} = \text{Unit's adjusted early reduction credits} \times \left( \frac{\text{State's compliance supplement pool}}{\text{Total adjusted early reduction credits for all units}} \right)
\]
Where:

“Unit’s allocation for early reduction credits” is the number of NOx allowances allocated to the unit for early reduction credits.

“Unit’s adjusted early reduction credits” is the amount of early reduction credits requested for the unit for 2001 and 2002 in early reduction credit requests under paragraph (a) or (b) of this section, as adjusted under paragraph (c)(1) of this section.

“State’s compliance supplement pool” is the number of NOx allowances in the State’s compliance supplement pool set forth in appendix D to this subpart.

“Total adjusted early reduction credits for all units” is the amount of early reduction credits requested for all units for 2001 and 2002 in early reduction credit requests under paragraph (a) or (b) of this section, as adjusted under paragraph (c)(1) of this section.

(5) By April 1, 2004, the Administrator will determine by order the allocations for early reduction credits. The Administrator will make available to the public each determination of NOx allowance allocations and will provide an opportunity for submission of objections to the determination. Objections shall be limited to addressing whether the determination is in accordance with paragraph (c)(1), (3), or (4) of this section. Based on any such objections, the Administrator will adjust each determination to the extent necessary to ensure that it is in accordance with paragraph (c)(1), (3), or (4) of this section.

(6) By May 1, 2004, the Administrator will record the allocations under paragraph (c)(3) or (4) of this section.

(7) NOx allowances recorded under paragraph (c)(6) of this section may be deducted for compliance under §97.54 for the control period in 2004 or 2005. Notwithstanding §97.55(a), the Administrator will deduct as retired any NOx allowance that is recorded under paragraph (c)(6) of this section and that is not deducted for compliance under §97.54 for the control period in 2003 or 2004.

§ 97.50 NOx Allowance Tracking System

(a) Nature and function of compliance accounts and overdraft accounts. Consistent with §97.51(a), the Administrator will establish one compliance account for each NOx Budget unit and one overdraft account for each source with two or more NOx Budget units. Allocations of NOx allowances pursuant to subpart E of this part or §97.88, and deductions or transfers of NOx allowances pursuant to §97.31, §96.54, §96.56, subpart G of this part, or subpart I of this part will be recorded in compliance accounts or overdraft accounts in accordance with this subpart.

(b) Nature and function of general accounts. Consistent with §97.51(b), the Administrator will establish, upon request, a general account for any person. Allocations of NOx allowances pursuant to §97.4(b)(4)(i) or §97.5(c)(2) and transfers of allowances pursuant to subpart G of this part or subpart I of this part will be recorded in general accounts in accordance with this subpart.

§ 97.51 Establishment of accounts.

(a) Compliance accounts and overdraft accounts. Upon receipt of a complete account certificate of representation under §97.13, the Administrator will establish:

(1) A compliance account for each NOx Budget unit for which the account certificate of representation was submitted; and

(2) An overdraft account for each source for which the account certificate of representation was submitted and that has two or more NOx Budget units.

(b) General accounts—(1) Application for general account. (i) Any person may apply to open a general account for the purpose of holding and transferring allowances. An application for a general account may designate one and only one NOx authorized account representative and one and only one alternate NOx authorized account representative who may act on behalf of the NOx authorized account representative. The agreement by which the alternate NOx authorized account representative is selected shall include a procedure for authorizing the alternate NOx authorized account representative to act in lieu of the NOx authorized account representative. A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the NOx authorized account representative and any alternate NOx authorized account representative;

(B) At the option of the NOx authorized account representative, organization name and type of organization;

(C) A list of all persons subject to a binding agreement for the NOx authorized account representative and any alternate NOx authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to the allowances held in the general account;

(D) The following certification statement by the NOx authorized account representative and any alternate NOx authorized account representative: ‘‘I certify that I was selected as the NOx authorized account representative or the NOx alternate authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to NOx allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the NOx Budget Tracking Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account.’’

(ii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to
§ 97.51

the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(2) Authorization of NO\textsubscript{X} authorized account representative. Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(i) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(ii) The NO\textsubscript{X} authorized account representative and any alternate NO\textsubscript{X} authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to NO\textsubscript{X} allowances held in the general account in all matters pertaining to the NO\textsubscript{X} Budget Trading Program, not withstanding any agreement between the NO\textsubscript{X} authorized account representative and such person. Any such person shall be bound by any order or decision issued to the NO\textsubscript{X} authorized account representative or any alternate NO\textsubscript{X} authorized account representative by the Administrator or a court regarding the general account.

(iii) Any representation, action, inaction, or submission by any alternate NO\textsubscript{X} authorized account representative or any alternate NO\textsubscript{X} authorized account representative shall be deemed to be a representation, action, inaction, or submission by the NO\textsubscript{X} authorized account representative.

(iv) Each submission concerning the general account shall be submitted, signed, and certified by the NO\textsubscript{X} authorized account representative or any alternate NO\textsubscript{X} authorized account representative for the persons having an ownership interest with respect to NO\textsubscript{X} allowances held in the general account. Each such submission shall include the following certification statement by the NO\textsubscript{X} authorized account representative or any alternate NO\textsubscript{X} authorized account representative: ‘‘I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the NO\textsubscript{X} allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.’’

(v) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(iv) of this section.

(3) Changing NO\textsubscript{X} authorized account representative and alternate NO\textsubscript{X} authorized account representative; changes in persons with ownership interest. (i) The NO\textsubscript{X} authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous NO\textsubscript{X} authorized account representative prior to the time and date when the Administrator receives the superseding application for a general account shall be binding on the new NO\textsubscript{X} authorized account representative and the persons with an ownership interest with respect to the NO\textsubscript{X} allowances in the general account.

(ii) The alternate NO\textsubscript{X} authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate NO\textsubscript{X} authorized account representative prior to the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate NO\textsubscript{X} authorized account representative.
§ 97.52 NO\textsubscript{X} Allowance Tracking System responsibilities of NO\textsubscript{X} authorized account representative.

(a) Following the establishment of a NO\textsubscript{X} Allowance Tracking System account, all submissions to the Administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of NO\textsubscript{X} allowances in the account, shall be made only by the NO\textsubscript{X} authorized account representative for the account.

(b) Authorized account representative identification. The Administrator will assign a unique identifying number to each NO\textsubscript{X} authorized account representative.

§ 97.53 Recordation of NO\textsubscript{X} allowance allocations.

(a) The Administrator will record the NO\textsubscript{X} allowances for 2004 for a NO\textsubscript{X} Budget unit allocated under subpart E of this part in the unit’s compliance account, except for NO\textsubscript{X} allowances under §97.4(b)(4)(i) or §97.5(c)(2), which will be recorded in the general account specified by the owners and operators of the unit. The Administrator will record NO\textsubscript{X} allowances for 2004 for a NO\textsubscript{X} Budget opt-in unit in the unit’s compliance account as allocated under §97.88(a).

(b) By May 1, 2003, the Administrator will record the NO\textsubscript{X} allowances for 2005 for a NO\textsubscript{X} Budget unit allocated under subpart E of this part in the unit’s compliance account, except for NO\textsubscript{X} allowances under §97.4(b)(4)(i) or §97.5(c)(2), which will be recorded in the general account specified by the owners and operators of the unit. The Administrator will record NO\textsubscript{X} allowances for 2005 for a NO\textsubscript{X} Budget opt-in unit in the unit’s compliance account as allocated under §97.88(a).
compliance account, except for NO\textsubscript{X} allowances under §\textsubscript{97.4(b)(4)(ii)} or §\textsubscript{97.5(c)(2)}, which will be recorded in the general account specified by the owners and operators of the unit. The Administrator will record NO\textsubscript{X} allowances for 2005 for a NO\textsubscript{X} Budget opt-in unit in the unit’s compliance account as allocated under §\textsubscript{97.88(a)}.

(c) By May 1, 2003, the Administrator will record the NO\textsubscript{X} allowances for 2006 for a NO\textsubscript{X} Budget unit allocated under subpart E of this part in the unit’s compliance account, except for NO\textsubscript{X} allowances under §\textsubscript{97.4(b)(4)(ii)} or §\textsubscript{97.5(c)(2)}, which will be recorded in the general account specified by the owners and operators of the unit. The Administrator will record NO\textsubscript{X} allowances for 2006 for a NO\textsubscript{X} Budget opt-in unit in the unit’s compliance account as allocated under §\textsubscript{97.88(a)}.

(d) By May 1, 2004, the Administrator will record the NO\textsubscript{X} allowances for 2007 for a NO\textsubscript{X} Budget unit allocated under subpart E of this part in the unit’s compliance account, except for NO\textsubscript{X} allowances under §\textsubscript{97.4(b)(4)(ii)} or §\textsubscript{97.5(c)(2)}, which will be recorded in the general account specified by the owners and operators of the unit. The Administrator will record NO\textsubscript{X} allowances for 2007 for a NO\textsubscript{X} Budget opt-in unit in the unit’s compliance account as allocated under §\textsubscript{97.88(a)}.

(e) Each year starting with 2005, after the Administrator has made all deductions from a NO\textsubscript{X} Budget unit’s compliance account and the overdraft account pursuant to §\textsubscript{97.54} (except deductions pursuant to §\textsubscript{97.54(d)(2)}), the Administrator will record:

1. NO\textsubscript{X} allowances, in the compliance account, as allocated to the unit under subpart E of this part for the third year after the year of the control period for which such deductions were or could have been made;

2. NO\textsubscript{X} allowances, in the general account specified by the owners and operators of the unit, as allocated under §\textsubscript{97.4(b)(4)(ii)} or §\textsubscript{97.5(c)(2)} for the third year after the year of the control period for which such deductions are or could have been made; and

3. NO\textsubscript{X} allowances, in the compliance account, as allocated to the unit under §\textsubscript{97.88(a)}.

(f) Serial numbers for allocated NO\textsubscript{X} allowances. When allocating NO\textsubscript{X} allowances to a NO\textsubscript{X} Budget unit and recording them in an account, the Administrator will assign each NO\textsubscript{X} allowance a unique identification number that will include digits identifying the year for which the NO\textsubscript{X} allowance is allocated.

[65 FR 2727, Jan. 18, 2000, as amended at 67 FR 21530, Apr. 30, 2002]

§\textsubscript{97.54} Compliance.

(a) NO\textsubscript{X} allowance transfer deadline. The NO\textsubscript{X} allowances are available to be deducted for compliance with a unit’s NO\textsubscript{X} Budget emissions limitation for a control period in a given year only if the NO\textsubscript{X} allowances:

1. Were allocated for a control period in a prior year or the same year; and

2. Are held in the unit’s compliance account, or the overdraft account of the source where the unit is located, as of the NO\textsubscript{X} allowance transfer deadline for that control period or are transferred into the compliance account or overdraft account by a NO\textsubscript{X} allowance transfer correctly submitted for recordation under §\textsubscript{97.60} by the NO\textsubscript{X} allowance transfer deadline for that control period.

(b) Deductions for compliance. (1) Following the recordation, in accordance with §\textsubscript{97.61}, of NO\textsubscript{X} allowance transfers submitted for recordation in the unit’s compliance account or the overdraft account of the source where the unit is located by the NO\textsubscript{X} allowance transfer deadline for a control period, the Administrator will deduct NO\textsubscript{X} allowances available under paragraph (a) of this section to cover the unit’s NO\textsubscript{X} emissions (as determined in accordance with subpart H of this part), or to account for actual heat input under §\textsubscript{97.42(e)}, for the control period:

1. From the compliance account; and

2. Only if no more NO\textsubscript{X} allowances available under paragraph (a) of this section remain in the compliance account, from the overdraft account. In deducting allowances for units at the source from the overdraft account, the Administrator will begin with the unit having the compliance account with the lowest account number and end with the unit having the compliance...
account with the highest account number (with account numbers sorted beginning with the left-most character and ending with the right-most character and the letter characters assigned values in alphabetical order and less than all numeric characters).

(2) The Administrator will deduct NOX allowances first under paragraph (b)(1)(i) of this section and then under paragraph (b)(1)(ii) of this section:

(i) Until the number of NOX allowances deducted for the control period equals the number of tons of NOX emissions, determined in accordance with subpart H of this part, from the unit for the control period for which compliance is being determined, plus the number of NOX allowances required for deduction to account for actual heat input under §97.42(e) for the control period; or

(ii) Until no more NOX allowances available under paragraph (a) of this section remain in the respective account.

(c)(1) Identification of NOX allowances by serial number. The NOX authorized account representative for each compliance account may identify by serial number the NOX allowances to be deducted from the unit's compliance account under paragraph (b), (d), (e), or (f) of this section. Such identification shall be made in the compliance certification report submitted in accordance with §97.30.

(2) First-in, first-out. The Administrator will deduct NOX allowances for a control period from the compliance account, in the absence of an identification or in the case of a partial identification of NOX allowances by serial number under paragraph (c)(1) of this section, or the overdraft account on a first-in, first-out (FIFO) accounting basis in the following order:

(i) Those NOX allowances that were allocated for the control period to the unit under subpart E or I of this part; and

(iv) Those NOX allowances that were allocated for a prior control period to any unit and transferred and recorded in the account pursuant to subpart G of this part, in order of their date of recordation.

(d) Deductions for excess emissions. (1) After making the deductions for compliance under paragraph (b) of this section, the Administrator will deduct from the unit's compliance account or the overdraft account of the source where the unit is located a number of NOX allowances, allocated for a control period after the control period in which the unit has excess emissions, equal to three times the number of the unit's excess emissions.

(2) If the compliance account or overdraft account does not contain sufficient NOX allowances, the Administrator will deduct the required number of NOX allowances, regardless of the control period for which they were allocated, whenever NOX allowances are recorded in either account.

(3) Any allowance deduction required under paragraph (d) of this section shall not affect the liability of the owners and operators of the NOX Budget unit for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violation, as ordered under the Clean Air Act or applicable State law. The following guidelines will be followed in assessing fines, penalties or other obligations:

(i) For purposes of determining the number of days of violation, if a NOX Budget unit has excess emissions for a control period, each day in the control period (153 days) constitutes a day in violation unless the owners and operators of the unit demonstrate that a lesser number of days should be considered.

(ii) Each ton of excess emissions is a separate violation.

(e) Deductions for units sharing a common stack. In the case of units sharing a common stack and having emissions that are not separately monitored or apportioned in accordance with subpart H of this part:

(1) The NOX authorized account representative of the units may identify
the percentage of NO\textsubscript{X} allowances to be deducted from each such unit’s compliance account to cover the unit’s share of NO\textsubscript{X} emissions from the common stack for a control period. Such identification shall be made in the compliance certification report submitted in accordance with §97.30.

(2) Notwithstanding paragraph (b)(2)(i) of this section, the Administrator will deduct NO\textsubscript{X} allowances for each such unit until the number of NO\textsubscript{X} allowances deducted equals the unit’s identified percentage under paragraph (e)(1) of this section or, if no percentage is identified, an equal percentage for each unit multiplied by the number of tons of NO\textsubscript{X} emissions, as determined in accordance with subpart H of this part, from the common stack for the control period for which compliance is being determined. In addition to the deductions under the first sentence of this paragraph (e)(1), the Administrator will deduct NO\textsubscript{X} allowances for each such unit until the number of NO\textsubscript{X} allowances deducted equals the number of NO\textsubscript{X} allowances required to account for actual heat input under §97.42(e) for the unit for the control period.

(f) Deduction of banked allowances. Each year starting in 2006, after the Administrator has completed the designation of banked NO\textsubscript{X} allowances under §97.55(b) and before May 1 of the year, the Administrator will determine the extent to which banked NO\textsubscript{X} allowances otherwise available under paragraph (a) of this section are available for compliance in the control period for the current year, as follows. For each State NO\textsubscript{X} Budget Trading Program that is established, and approved and administered by the Administrator pursuant to §51.121 of this chapter, the terms “compliance account” or “compliance accounts”, “overdraft account” or “overdraft accounts”, “general account” or “general accounts”, “States”, and “trading program budgets under §97.40” in paragraphs (f)(1) through (f)(3) of this section shall be read to include respectively: A compliance account or compliance accounts established under such State NO\textsubscript{X} Budget Trading Program; a general account or general accounts established under such State NO\textsubscript{X} Budget Trading Program; the State or portion of a State covered by such State NO\textsubscript{X} Budget Trading Program; and the trading program budget of the State or portion of a State covered by such State NO\textsubscript{X} Budget Trading Program.

(1) The Administrator will determine the total number of banked NO\textsubscript{X} allowances held in compliance accounts, overdraft accounts, or general accounts.

(2) If the total number of banked NO\textsubscript{X} allowances determined, under paragraph (f)(1) of this section, to be held in compliance accounts, overdraft accounts, or general accounts is less than or equal to 10 percent of the sum of the trading program budgets under §97.40 for all States for the control period, any banked NO\textsubscript{X} allowance may be deducted for compliance in accordance with paragraphs (a) through (e) of this section.

(3) If the total number of banked NO\textsubscript{X} allowances determined, under paragraph (f)(1) of this section, to be held in compliance accounts, overdraft accounts, or general accounts exceeds 10 percent of the sum of the trading program budgets under §97.40 for all States for the control period, any banked allowance may be deducted for compliance in accordance with paragraphs (a) through (e) of this section, except as follows:

(i) The Administrator will determine the following ratio: 0.10 multiplied by the sum of the trading program budgets under §97.40 for all States for the control period and divided by the total number of banked NO\textsubscript{X} allowances determined, under paragraph (f)(1) of this section, to be held in compliance accounts, overdraft accounts, or general accounts.

(ii) The Administrator will multiply the number of banked NO\textsubscript{X} allowances in each compliance account or overdraft account by the ratio determined under paragraph (f)(3)(i) of this section. The resulting product is the number of banked NO\textsubscript{X} allowances in the account that may be deducted for compliance in accordance with paragraphs (a) through (e) of this section. Any banked
§ 97.55 Banking.

NO\textsubscript{X} allowances may be banked for future use or transfer in a compliance account, an overdraft account, or a general account, as follows:

(a) Any NO\textsubscript{X} allowance that is held in a compliance account, an overdraft account, or a general account will remain in such account unless and until the NO\textsubscript{X} allowance is deducted or transferred under §97.31, §97.54, §97.56, or subpart G or I of this part.

(b) The Administrator will designate, as a “banked” NO\textsubscript{X} allowance, any NO\textsubscript{X} allowance that remains in a compliance account, an overdraft account, or a general account after the Administrator has made all deductions for a given control period from the compliance account or overdraft account pursuant to §97.54 (except deductions pursuant to §97.54(d)(2)) and that was allocated for that control period or a control period in a prior year.

§ 97.57 Closing of general accounts.

(a) The NO\textsubscript{X} authorized account representative of a general account may instruct the Administrator to close the account by submitting a statement requesting deletion of the account from the NO\textsubscript{X} Allowance Tracking System and by correctly submitting for recordation under §97.60 an allowance transfer of all NO\textsubscript{X} allowances in the account to one or more other NO\textsubscript{X} Allowance Tracking System accounts.

(b) If a general account shows no activity for a period of a year or more and does not contain any NO\textsubscript{X} allowances, the Administrator may notify the NO\textsubscript{X} authorized account representative for the account that the account will be closed and deleted from the NO\textsubscript{X} Allowance Tracking System following 20 business days after the notice is sent. The account will be closed after the 20-day period unless before the end of the 20-day period the Administrator receives a correctly submitted transfer of NO\textsubscript{X} allowances into the account under §97.60 or a statement submitted by the NO\textsubscript{X} authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

Subpart G—NO\textsubscript{X} Allowance Transfers

§ 97.60 Submission of NO\textsubscript{X} allowance transfers.

The NO\textsubscript{X} authorized account representatives seeking recordation of a NO\textsubscript{X} allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the NO\textsubscript{X} allowance transfer shall include the following elements in a format specified by the Administrator:

(a) The numbers identifying both the transferor and transferee accounts;

(b) A specification by serial number of each NO\textsubscript{X} allowance to be transferred; and

(c) The printed name and signature of the NO\textsubscript{X} authorized account representative of the transferor account and the date signed.
§ 97.61  EPA recordation.

(a) Within 5 business days of receiving a NOX allowance transfer, except as provided in paragraph (b) of this section, the Administrator will record a NOX allowance transfer by moving each NOX allowance from the transferor account to the transferee account as specified by the request, provided that:

(1) The transfer is correctly submitted under § 97.60; and

(2) The transferor account includes each NOX allowance identified by serial number in the transfer.

(b) A NOX allowance transfer that is submitted for recordation following the NOX allowance transfer deadline and that includes any NOX allowances allocated for a control period prior to or the same as the control period to which the NOX allowance transfer deadline applies will not be recorded until after the Administrator completes the recordation of NOX allowance allocations under § 97.53 for the control period in the fourth year after the control period to which the NOX allowance transfer deadline applies.

(c) Where a NOX allowance transfer submitted for recordation fails to meet the requirements of paragraph (a) of this section, the Administrator will not record such transfer.

[65 FR 2727, Jan. 18, 2000, as amended at 69 FR 21647, Apr. 21, 2004]

§ 97.62  Notification.

(a) Notification of recordation. Within 5 business days of recordation of a NOX allowance transfer under § 97.61, the Administrator will notify the NOX authorized account representatives of both the transferor and transferee accounts.

(b) Notification of non-recordation. Within 10 business days of receipt of a NOX allowance transfer that fails to meet the requirements of § 97.61(a), the Administrator will notify the NOX authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer; and

(2) The reasons for such non-recordation.

(c) Nothing in this section shall preclude the submission of a NOX allowance transfer for recordation following notification of non-recordation.

Subpart H—Monitoring and Reporting

§ 97.70  General requirements.

The owners and operators, and to the extent applicable, the NOX authorized account representative of a NOX Budget unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subpart H of part 75 of this chapter. For purposes of complying with such requirements, the definitions in § 97.2 and in § 72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “NOX Budget unit,” “NOX authorized account representative,” and “continuous emission monitoring system” (or “CEMS”) respectively, as defined in § 97.2. The owner or operator of a unit that is not a NOX Budget unit but that is monitored under § 75.72(b)(2)(ii) of this chapter shall comply with the monitoring, recordkeeping, and reporting requirements for a NOX Budget unit under this part. (a) Requirements for installation, certification, and data accounting. The owner or operator of each NOX Budget unit shall comply with the following requirements. These provisions shall also apply to a unit for which an application for a NOX Budget opt-in permit is submitted and not denied or withdrawn, as provided in subpart I of this part:

(1) Install all monitoring systems required under this subpart for monitoring NOX mass emissions. This includes all systems required to monitor NOX emission rate, NOX concentration, heat input rate, and stack flow rate, in accordance with §§ 75.71 and 75.72 of this chapter.

(2) Install all monitoring systems for monitoring heat input rate.

(3) Successfully complete all certification tests required under § 97.71 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems.
§ 97.70  

(b) Compliance deadlines. The owner or operator shall meet the certification and other requirements of paragraphs (a)(1) through (a)(3) of this section on or before the following dates. The owner or operator shall record, report and quality-ensure the data from the monitoring systems under paragraphs (a)(1) and (a)(2) of this section on and after the following dates.

(1) For the owner or operator of a NO\textsubscript{X} Budget unit for which the owner or operator intends to apply for early reduction credits under §97.43, by May 1, 2001. If the owner or operator of a NO\textsubscript{X} Budget unit fails to meet this deadline, he or she is not eligible to apply for early reduction credits and is subject to the deadline under paragraph (b)(2) of this section.

(2) For the owner or operator of a NO\textsubscript{X} Budget unit under §97.4(a) that commences operation before January 1, 2003 and that is not subject to or does not meet the deadline under paragraph (b)(1) of this section, by May 1, 2003.

(3) For the owner or operator of a NO\textsubscript{X} Budget unit under §97.4(a) that commences operation on or after January 1, 2003 and that reports on an annual basis under §97.74(d), by the following dates:

(i) The earlier of 90 unit operating days after the date on which the unit commences commercial operation; or

(ii) May 1, 2003, if the compliance date under paragraph (b)(3)(i) of this section is before May 1, 2003.

(4) For the owner or operator of a NO\textsubscript{X} Budget unit under §97.4(a) that commences operation on or after January 1, 2003 and that reports on a control period basis under §97.74(d)(2)(ii), by the following dates:

(i) The earlier of 90 unit operating days or 180 calendar days after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO\textsubscript{X} emission controls, if this compliance date is during a control period; or

(ii) May 1 immediately following the compliance date under paragraph (b)(4)(i) of this section, if such compliance date is not during a control period.

(5) For the owner or operator of a NO\textsubscript{X} Budget unit that has a new stack or flue or add-on NO\textsubscript{X} emission controls for which construction is completed after the applicable deadline under paragraph (b)(1), (b)(2), (b)(3), or (b)(4) of this section or under subpart I of this part and that reports on an annual basis under §97.74(d), by the earlier of 90 unit operating days or 180 calendar days after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO\textsubscript{X} emission controls.

(6) For the owner or operator of a NO\textsubscript{X} Budget unit that has a new stack or flue or add-on NO\textsubscript{X} emission controls for which construction is completed after the applicable deadline under paragraph (b)(1), (b)(2), (b)(3), or (b)(4) of this section or under subpart I of this part and that reports on a control period basis under §97.74(d)(2)(ii), by the following dates:

(i) The earlier of 90 unit operating days or 180 calendar days after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO\textsubscript{X} emission controls, if this compliance date is during a control period; or

(ii) May 1 immediately following the compliance date under paragraph (b)(6)(i) of this section, if such compliance date is not during a control period.

(7) For the owner or operator of a unit for which an application for a NO\textsubscript{X} Budget opt-in permit is submitted and not denied or withdrawn, by the date specified under subpart I of this part.

(c) Commencement of data reporting. (1) The owner or operator of NO\textsubscript{X} Budget units under paragraph (b)(1) or (b)(2) of this section shall determine, record and report NO\textsubscript{X} mass emissions, heat input rate, and any other values required to determine NO\textsubscript{X} mass emissions (e.g., NO\textsubscript{X} emission rate and heat input rate, or NO\textsubscript{X} concentration and stack flow rate) in accordance with §75.70(g) of this chapter, beginning on
Environmental Protection Agency

§ 97.71 Initial certification and recertification procedures.

(a) The owner or operator of a NOₓ Budget unit that is subject to an Acid Rain emissions limitation shall comply with the initial certification and recertification procedures of part 75 of this chapter for NOₓ-diluent CEMS, flow monitors, NOₓ concentration CEMS, or excepted monitoring systems under appendix E of part 75 of this chapter for NOₓ under appendix D for heat input, or under §75.19 for NOₓ and heat input, except that:

(1) If, prior to January 1, 1998, the Administrator approved a petition under §75.17(a) or (b) of this chapter for apportioning the NOₓ emission rate measured in a common stack or a petition under §75.66 of this chapter for an
alternative to a requirement in §75.17 of this chapter, the NOₓ authorized account representative shall resubmit the petition to the Administrator under §97.75(a) to determine if the approval applies under the NOₓ Budget Trading Program.

(2) For any additional CEMS required under the common stack provisions in §75.72 of this chapter or for any NOₓ concentration CEMS used under the provisions of §75.71(a)(2) of this chapter, the owner or operator shall meet the requirements of paragraph (b) of this section.

(b) The owner or operator of a NOₓ Budget unit that is not subject to an Acid Rain emissions limitation shall comply with the following initial certification and recertification procedures. The owner or operator of such a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the following procedures, as modified by paragraph (c) or (d) of this section. The owner or operator of a NOₓ Budget unit that is subject to an Acid Rain emissions limitation and that requires additional CEMS under the common stack provisions in §75.72 of this chapter or uses a NOₓ concentration CEMS under §75.71(a)(2) of this chapter shall comply with the following procedures.

(1) Requirements for initial certification. The owner or operator shall ensure that each emission monitoring system required by subpart H of part 75 of this chapter (which includes the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §97.70(b). In addition, whenever the owner or operator installs an emission monitoring system in order to meet the requirements of this part in a location where no such emission monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in a certified emission monitoring system that may significantly affect the ability of the system to accurately measure or record NOₓ mass emissions or heat input rate or to meet the requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the emission monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify the continuous emissions monitoring system in accordance with §75.20(b) of this chapter. Examples of changes that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site.

(3) Certification approval process for initial certification and recertification—(i) Notification of certification. The NOₓ authorized account representative shall submit to the Administrator, the appropriate EPA Regional Office and the permitting authority written notice of the dates of certification in accordance with §97.73.

(ii) Certification application. The NOₓ authorized account representative shall submit to the Administrator, the appropriate EPA Regional Office and the permitting authority a certification application for each emission monitoring system required under subpart H of part 75 of this chapter. A complete certification application shall include the information specified in subpart H of part 75 of this chapter.

(iii) Except for units using the low mass emission excepted methodology under §75.19 of this chapter, the provisional certification date for a monitor shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitor may be used under the NOₓ Budget Trading Program for a period not to exceed 120 days after receipt by the Administrator of the complete certification application for the monitoring system under paragraph (b)(3)(ii) of this section. Data measured and recorded by the
provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the Administrator does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of receipt of the complete certification application by the Administrator.

(iv) Certification application formal approval process. The Administrator will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (b)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the NO\textsubscript{X} Budget Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. A certification application will be considered complete when all of the applicable information required to be submitted under paragraph (b)(3)(ii) of this section has been received by the Administrator. If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by which the NO\textsubscript{X} authorized account representative must submit the additional information required to complete the certification application. If the NO\textsubscript{X} authorized account representative does not comply with the notice of incompleteness by the specified date, then the Administrator may issue a notice of disapproval under paragraph (b)(3)(iv)(C) of this section. The 120-day review period shall not begin prior to receipt of a complete certification application.

(C) Disapproval notice. If the certification application shows that any monitoring system or component thereof does not meet the performance requirements of this part, or if the certification application is incomplete and the requirement for disapproval under paragraph (b)(3)(iv)(B) of this section has been met, then the Administrator will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the Administrator and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter). The owner or operator shall follow the procedures for loss of certification in paragraph (b)(3)(v) of this section for each monitoring system that is disapproved for initial certification.

(D) Audit decertification. The Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §97.72(b).

(v) Procedures for loss of certification. If the Administrator issues a notice of disapproval of a certification application under paragraph (b)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (b)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each hour of unit operation during the period of invalid data specified under §75.20(a)(4)(iii), §75.20(b)(5), §75.20(h)(4), or §75.21(e) and continuing until the date and hour specified under §75.20(a)(5)(i) of this chapter:

(1) For units that the owner or operator intends to monitor or monitors for NO\textsubscript{X} emission rate and heat input rate or intends to determine or determines NO\textsubscript{X} mass emissions using the low mass emission excepted methodology under §75.19 of this chapter, the maximum potential NO\textsubscript{X} emission rate and the maximum potential hourly heat input of the unit; and

(2) For units that the owner or operator intends to monitor or monitors for...
§ 97.72 Out of control periods.

(a) Whenever any emission monitoring system fails to meet the quality assurance or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable procedures in subpart D, subpart H, appendix D, or appendix E of part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of an emission monitoring system and a review of the initial certification or recertification application reveal that any system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §97.71 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the Administrator will issue a notice of disapproval of the certification status of such system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the Administrator revokes prospectively the certification status of the system. The data measured and recorded by the system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification.

(d) Certification/recertification procedures for alternative monitoring systems. The NOX authorized account representative of each unit not subject to an Acid Rain emissions limitation for which the owner or operator intends to use an alternative monitoring system approved by the Administrator under subpart E of part 75 of this chapter shall comply with the applicable certification procedures of paragraph (b) of this section before using the system under the NOX Budget Trading Program. The NOX authorized account representative shall also comply with the applicable recertification procedures of paragraph (b) of this section. Section 75.20(f) of this chapter shall apply to such alternative monitoring system.

§ 97.72 NOX mass emissions using a NOX pollutant concentration monitor and a flow monitor, the maximum potential concentration of NOX and the maximum potential flow rate of the unit under section 2 of appendix A of part 75 of this chapter.

(B) The NOX authorized account representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (b)(3)(i) and (ii) of this section.

(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(c) Initial certification and recertification procedures for low mass emission units using the excepted methodologies under §75.19 of this chapter. The owner or operator of a gas-fired or oil-fired unit using the low mass emissions excepted methodology under §75.19 of this chapter and not subject to an Acid Rain emissions limitation shall meet the applicable general operating requirements of §75.10 of this chapter and the applicable requirements of §75.19 of this chapter. The owner or operator of such a unit shall also meet the applicable certification and recertification procedures of paragraph (b) of this section, except that the excepted methodology shall be deemed provisionally certified for use under the NOX Budget Trading Program as of the date on which a complete certification application is received by the Administrator. The methodology shall be considered to be certified either upon receipt of a written notice of approval from the Administrator or, if such notice is not provided, at the end of the Administrator’s 120 day review period. However, a provisionally certified or certified low mass emissions excepted methodology shall not be used to report data under the NOX Budget Trading Program prior to the applicable commencement date specified in §75.19(a)(1)(ii) of this chapter.

(d) Certification/recertification procedures for alternative monitoring systems. The NOX authorized account representative shall comply with the applicable certification procedures of paragraph (b) of this section before using the system under the NOX Budget Trading Program. The NOX authorized account representative shall also comply with the applicable recertification procedures of paragraph (b) of this section. Section 75.20(f) of this chapter shall apply to such alternative monitoring system.

[65 FR 2727, Jan. 18, 2000, as amended at 69 FR 21647, Apr. 21, 2004]
Environmental Protection Agency § 97.74

or recertification tests for the system. The owner or operator shall follow the initial certification or recertification procedures in §97.71 for each disapproved system.

§ 97.73 Notifications.

(a) The NOX authorized account representative for a NOX Budget unit shall submit written notice to the Administrator, the appropriate EPA Regional Office, and the permitting authority in accordance with §75.61 of this chapter.

(b) For any unit that does not have an Acid Rain emissions limitation, the permitting authority may waive the requirement to notify the permitting authority in paragraph (a) of this section.

§ 97.74 Recordkeeping and reporting.

(a) General provisions. (1) The NOX authorized account representative shall comply with all recordkeeping and reporting requirements in this section, with the recordkeeping and reporting requirements under §75.73 of this chapter, and with the requirements of §97.10(e)(1).

(2) If the NOX authorized account representative for a NOX Budget unit subject to an Acid Rain emission limitation who signed and certified any submission that is made under subpart F or G of part 75 of this chapter and that includes data and information required by this part 97, the NOX authorized account representative shall submit quarterly reports, as follows:

(i) For a unit that commences operation on or after January 1, 2003:

(A) The calendar quarter in which the unit commences operation, if the unit commences operation during a control period; or

(B) The calendar quarter which includes May 1 through June 30 of the first control period following the date on which the unit commences operation, if the unit does not commence operation during a control period.

(ii) For a unit that commences operation on or after January 1, 2003:

(A) The calendar quarter in which the unit commences operation, if the unit commences operation during a control period; or

(B) The calendar quarter which includes May 1 through June 30 of the first control period following the date on which the unit commences operation, if the unit does not commence operation during a control period.
§ 97.74

(iv) A calendar quarter before the quarter specified in paragraph (d)(1)(i), (d)(1)(ii), or (d)(1)(iii)(B) of this section, if the owner or operator elects to begin reporting early under §97.70(c)(3).

(2) If a NOX budget unit is not subject to an Acid Rain emission limitation, then the NOX authorized account representative shall either:

(i) Meet all of the requirements of part 75 related to monitoring and reporting NOX mass emissions during the entire year and meet the deadlines specified in paragraph (d)(1) of this section; or

(ii) Submit quarterly reports, documenting NOX mass emissions from the unit, only for the period from May 1 through September 30 of each year and including the data described in §75.74(c)(6) of this chapter. The NOX authorized account representative shall submit such quarterly reports, beginning with:

(A) For a unit for which the owner or operator intends to apply or applies for the early reduction credits under §97.43, the calendar quarter that covers May 1, 2000 through June 30, 2000. The NOX mass emission data shall be recorded and reported from the first hour on May 1, 2000; or

(B) For a unit that commences operation before January 1, 2003 and that is not subject to paragraph (d)(2)(ii)(A) of this section, the calendar quarter covering May 1, 2003 through June 30, 2003. The NOX mass emission data shall be recorded and reported from the first hour on May 1, 2003; or

(C) For a unit that commences operation on or after January 1, 2003 and during a control period, the calendar quarter in which the unit commences operation. The NOX mass emission data shall be recorded and reported from the date and hour when the unit commences operation; or

(D) For a unit that commences operation on or after January 1, 2003 and not during a control period, the calendar quarter which includes May 1 through June 30 of the first control period following the date on which the unit commences operation. The NOX mass emission data shall be recorded and reported from the first hour on May 1 of that control period.

(3) The NOX authorized account representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in subpart H of part 75 of this chapter and §75.64 of this chapter.

(i) For units subject to an Acid Rain emissions limitation, quarterly reports shall include all of the data and information required in subpart H of part 75 of this chapter and §75.74(c)(6) of this chapter.

(ii) For units not subject to an Acid Rain emissions limitation, quarterly reports are only required to include all of the data and information required in subpart H of part 75 of this chapter for each NOX Budget unit (or group of units using a common stack) and the data and information required in subpart G of part 75 of this chapter.

(4) Compliance certification. The NOX authorized account representative shall submit to the Administrator a compliance certification in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(i) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications;

(ii) For a unit with add-on NOX emission controls and for all hours where data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B of part 75 of this chapter and the substitute values do not systematically underestimate NOX emissions; and

(iii) For a unit that is reporting on a control period basis under paragraph (d)(2)(ii) of this section, the NOX emission rate and NOX concentration values substituted for missing data under subpart D of part 75 of this chapter are calculated using only values from a
control period and do not systematically underestimate NO\textsubscript{X} emissions.

[65 FR 2727, Jan. 18, 2000, as amended at 67 FR 21530, Apr. 30, 2002; 69 FR 21648, Apr. 21, 2004]

§ 97.75 Petitions.

(a) The NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget unit may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart.

(b) Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved by the Administrator under §75.66 of this chapter.

§ 97.76 Additional requirements to provide heat input data.

The owner or operator of a NO\textsubscript{X} Budget unit that monitors and reports NO\textsubscript{X} mass emissions using a NO\textsubscript{X} concentration system and a flow system shall also monitor and report heat input rate at the unit level using the procedures set forth in part 75 of this chapter.

Subpart I—Individual Unit Opt-ins

§ 97.80 Applicability.

A unit that is in a State (as defined in §97.2), is not a NO\textsubscript{X} Budget unit under §97.4(a), is not a unit exempt under §97.4(b), vents all of its emissions to a stack, and is operating, may qualify to be a NO\textsubscript{X} Budget opt-in unit under this subpart. A unit that is a NO\textsubscript{X} Budget unit under §97.4(a), is covered by an exemption under §97.4(b) or §97.5 that is in effect, or is not operating is not eligible to be a NO\textsubscript{X} Budget opt-in unit.

§ 97.81 General.

Except otherwise as provided in this part, a NO\textsubscript{X} Budget opt-in unit shall be treated as a NO\textsubscript{X} Budget unit for purposes of applying subparts A through H of this part.

§ 97.82 NO\textsubscript{X} authorized account representative.

A unit for which an application for a NO\textsubscript{X} Budget opt-in permit is submitted, or a NO\textsubscript{X} Budget opt-in unit, located at the same source as one or more NO\textsubscript{X} Budget units, shall have the same NO\textsubscript{X} authorized account representative as such NO\textsubscript{X} Budget units.

§ 97.83 Applying for NO\textsubscript{X} Budget opt-in permit.

(a) Applying for initial NO\textsubscript{X} Budget opt-in permit. In order to apply for an initial NO\textsubscript{X} Budget opt-in permit, the NO\textsubscript{X} authorized account representative of a unit qualified under §97.80 may submit to the Administrator and the permitting authority at any time, except as provided under §97.86(g):

(1) A complete NO\textsubscript{X} Budget permit application under §97.22;

(2) A monitoring plan submitted in accordance with subpart H of this part; and

(3) A complete account certificate of representation under §97.13, if no NO\textsubscript{X} authorized account representative has been previously designated for the unit.

(b) Duty to reapply. Unless the NO\textsubscript{X} Budget opt-in permit is terminated or revised under §97.86(e) or §97.87(b)(1)(i), the NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget opt-in unit shall submit to the Administrator and permitting authority a complete NO\textsubscript{X} Budget permit application under §97.22 to renew the NO\textsubscript{X} Budget opt-in permit in accordance with §97.22(c) and, if applicable, an updated monitoring plan in accordance with subpart H of this part.

§ 97.84 Opt-in process.

The permitting authority will issue or deny an initial NO\textsubscript{X} Budget opt-in permit for a unit for which an application for a NO\textsubscript{X} Budget opt-in permit under §97.83 is submitted, in accordance with §97.20 and the following:

(a) Interim review of monitoring plan. The Administrator will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a NO\textsubscript{X} Budget opt-in permit under §97.83. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NO\textsubscript{X} emissions rate and heat input rate of the unit are monitored and reported in accordance with subpart H of this part. A determination of
§ 97.85 40 CFR Ch. I (7–1–17 Edition)

sufficiency shall not be construed as acceptance or approval of the unit’s monitoring plan.

(b) If the Administrator determines that the unit’s monitoring plan is sufficient under paragraph (a) of this section and after completion of monitoring system certification under subpart H of this part, the NOx emissions rate and the heat input of the unit shall be monitored and reported in accordance with subpart H of this part for one full control period during which percent monitor data availability is not less than 90 percent and during which the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements. Solely for purposes of applying the requirements in the prior sentence, the unit shall be treated as a “NOx Budget unit” prior to issuance of a NOx Budget opt-in permit covering the unit.

(c) Based on the information monitored and reported under paragraph (b) of this section, the Administrator will calculate the unit’s baseline heat input, which will equal the unit’s total heat input (in mmBtu) for the control period, and the unit’s baseline NOx emissions rate, which will equal the unit’s total NOx mass emissions (in lb) for the control period divided by the unit’s baseline heat input.

(d) Issuance of draft NOx Budget opt-in permit for public comment. The permitting authority will issue a draft NOx Budget opt-in permit for public comment in accordance with §97.20.

(e) Notwithstanding paragraphs (a) through (d) of this section, if at any time before issuance of a draft NOx Budget opt-in permit for public comment, the Administrator or the permitting authority determines that the unit does not qualify as a NOx Budget opt-in unit under §97.80, the permitting authority will issue a draft denial of a NOx Budget opt-in permit for public comment for the unit in accordance with §97.20.

(f) Withdrawal of application for NOx Budget opt-in permit. A NOx authorized account representative of a unit may withdraw its application for an initial NOx Budget opt-in permit under §97.83 at any time prior to the issuance of the initial NOx Budget opt-in permit. Once the application for a NOx Budget opt-in permit is withdrawn, a NOx authorized account representative wanting to reapply must submit a new application for an initial NOx Budget permit under §97.83.

(g) The unit shall be a NOx Budget opt-in unit and a NOx Budget unit starting May 1 of the first control period starting after the issuance of the initial NOx Budget opt-in permit by the permitting authority.

§ 97.85 NOx Budget opt-in permit contents

(a) Each NOx Budget opt-in permit will contain all elements required for a complete NOx Budget opt-in permit application under §97.22.

(b) Each NOx Budget opt-in permit is deemed to incorporate automatically the definitions of terms under §97.2 and, upon recorodation by the Administrator under subpart F or G of this part, every allocation, transfer, or deduction of NOx allowances to or from the compliance accounts of each NOx Budget opt-in unit covered by the NOx Budget opt-in permit or the overdraft account of the NOx Budget source where the NOx Budget opt-in unit is located.

§ 97.86 Withdrawal from NOx Budget Trading Program

(a) Requesting withdrawal. To withdraw from the NOx Budget Trading Program, the NOx authorized account representative of a NOx Budget opt-in unit shall submit to the Administrator and the permitting authority a request to withdraw effective as of a specified date prior to May 1 or after September 30. The submission shall be made no later than 90 days prior to the requested effective date of withdrawal.

(b) Conditions for withdrawal. Before a NOx Budget opt-in unit covered by a request under paragraph (a) of this section may withdraw from the NOx Budget Trading Program and the NOx Budget opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

(1) For the control period immediately before the withdrawal is to be effective, the NOx authorized account representative must submit or must have submitted to the Administrator...
and the permitting authority an annual compliance certification report in accordance with §97.30.

(2) If the NOₓ Budget opt-in unit has excess emissions for the control period immediately before the withdrawal is to be effective, the Administrator will deduct or has deducted from the NOₓ Budget opt-in unit’s compliance account, or the overdraft account of the NOₓ Budget source where the NOₓ Budget opt-in unit is located, the full amount required under §97.34(d) for the control period.

(3) After the requirements for withdrawal under paragraphs (b)(1) and (2) of this section are met, the Administrator will deduct from the NOₓ Budget opt-in unit’s compliance account, or the overdraft account of the NOₓ Budget source where the NOₓ Budget opt-in unit is located, NOₓ allowances equal in number to and allocated for the same or a prior control period as any NOₓ allowances allocated to that source under §97.88 for any control period for which the withdrawal is to be effective. The Administrator will close the NOₓ Budget opt-in unit’s compliance account and transfer any remaining allowances to a general account specified by the owners and operators of the NOₓ Budget opt-in unit.

(c) A NOₓ Budget opt-in unit that withdraws from the NOₓ Budget Trading Program shall comply with all requirements under the NOₓ Budget Trading Program concerning all years for which such NOₓ Budget opt-in unit was a NOₓ Budget opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(d) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of NOₓ allowances required), the Administrator will issue a notification to the permitting authority and the NOₓ authorized account representative of the NOₓ Budget opt-in unit of the acceptance of the withdrawal of the NOₓ Budget opt-in unit as of a specified effective date that is after such requirements have been met and that is prior to May 1 or after September 30.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the Administrator will issue a notification to the permitting authority and the NOₓ authorized account representative of the NOₓ Budget opt-in unit that the request to withdraw is denied. If the NOₓ Budget opt-in unit’s request to withdraw is denied, the NOₓ Budget opt-in unit shall remain subject to the requirements for a NOₓ Budget opt-in unit.

(e) Permit revision. After the Administrator issues a notification under paragraph (d)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the NOₓ Budget permit covering the NOₓ Budget opt-in unit to terminate the NOₓ Budget opt-in permit as of the effective date specified under paragraph (d)(1) of this section. A NOₓ Budget opt-in unit shall continue to be a NOₓ Budget opt-in unit until the effective date of the termination.

(f) Reapplication upon failure to meet conditions of withdrawal. If the Administrator denies the request to withdraw the NOₓ Budget opt-in unit, the NOₓ authorized account representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(g) Ability to return to the NOₓ Budget Trading Program. Once a NOₓ Budget opt-in unit withdraws from the NOₓ Budget Trading Program and its NOₓ Budget opt-in permit is terminated under paragraph (e) of this section, the NOₓ authorized account representative may not submit another application for a NOₓ Budget opt-in permit under §97.83 for the unit prior to the date that is 4 years after the date on which the terminated NOₓ Budget opt-in permit became effective.

§97.87 Change in regulatory status.

(a) Notification. When a NOₓ Budget opt-in unit becomes a NOₓ Budget unit under §97.4(a), the NOₓ authorized account representative shall notify in writing the permitting authority and the Administrator of such change in the NOₓ Budget opt-in unit’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s action. (1)(i) When the NOₓ Budget opt-in unit becomes a NOₓ
§ 97.87

40 CFR Ch. 1 (7–1–17 Edition)

Budget unit under §97.4(a), the permitting authority will revise the NO\textsubscript{X} Budget opt-in unit’s NO\textsubscript{X} Budget opt-in permit to meet the requirements of a NO\textsubscript{X} Budget permit under §97.23 as of an effective date that is the date on which such NO\textsubscript{X} Budget opt-in unit becomes a NO\textsubscript{X} Budget unit under §97.4(a).

(ii)(A) The Administrator will deduct from the compliance account for the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section, or the overdraft account of the NO\textsubscript{X} Budget source where the unit is located, NO\textsubscript{X} allowances equal in number to and allocated for the same or a prior control period as:

(1) Any NO\textsubscript{X} allowances allocated to the NO\textsubscript{X} Budget unit (as a NO\textsubscript{X} Budget opt-in unit) under §97.88 for any control period after the last control period during which the unit’s NO\textsubscript{X} Budget opt-in permit was effective; and

(2) If the effective date of the NO\textsubscript{X} Budget permit revision under paragraph (b)(1)(i) of this section is during a control period, the NO\textsubscript{X} allowances allocated to the NO\textsubscript{X} Budget unit (as a NO\textsubscript{X} Budget opt-in unit) under §97.88 for the control period multiplied by the number of days in the control period starting with the effective date of the permit revision under paragraph (b)(1)(i) of this section, divided by the total number of days in the control period, and rounded to the nearest whole number of NO\textsubscript{X} allowances as appropriate.

(B) The NO\textsubscript{X} authorized account representative shall ensure that the compliance account of the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section, or the overdraft account of the NO\textsubscript{X} Budget source where the unit is located, contains the NO\textsubscript{X} allowances necessary for completion of the deduction under paragraph (b)(1)(ii)(A) of this section. If the compliance account or overdraft account does not contain the necessary NO\textsubscript{X} allowances, the Administrator will deduct the required number of NO\textsubscript{X} allowances, regardless of the control period for which they were allocated, whenever NO\textsubscript{X} allowances are recorded in either account.

(iii)(A) For every control period during which the NO\textsubscript{X} Budget permit revised under paragraph (b)(1)(i) of this section is in effect, the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section will be treated, solely for purposes of NO\textsubscript{X} allowance allocations under §97.42, as a unit that commenced operation on the effective date of the NO\textsubscript{X} Budget permit revision under paragraph (b)(1)(i) of this section and will be allocated NO\textsubscript{X} allowances under §97.42. The unit’s deadline under §97.84(b) for meeting monitoring requirements in accordance with subpart H of this part shall not be changed by the change in the unit’s regulatory status or by the revision of the NO\textsubscript{X} Budget permit under paragraph (b)(1)(i) of this section.

(B) Notwithstanding paragraph (b)(1)(iii)(A) of this section, if the effective date of the NO\textsubscript{X} Budget permit revision under paragraph (b)(1)(i) of this section is during a control period, the following number of NO\textsubscript{X} allowances will be allocated to the NO\textsubscript{X} Budget unit under paragraph (b)(1)(i) of this section under §97.42 for the control period: the number of NO\textsubscript{X} allowances otherwise allocated to the NO\textsubscript{X} Budget unit under §97.42 for the control period multiplied by the number of days in the control period starting with the effective date of the permit revision under paragraph (b)(1)(i) of this section, divided by the total number of days in the control period, and rounded to the nearest whole number of NO\textsubscript{X} allowances as appropriate.

(2)(i) When the NO\textsubscript{X} authorized account representative of a NO\textsubscript{X} Budget opt-in unit does not renew its NO\textsubscript{X} Budget opt-in permit under §97.83(b), the Administrator will deduct from the NO\textsubscript{X} Budget opt-in unit’s compliance account, or the overdraft account of the NO\textsubscript{X} Budget source where the NO\textsubscript{X} Budget opt-in unit is located, NO\textsubscript{X} allowances equal in number to and allocated for the same or a prior control period as any NO\textsubscript{X} allowances allocated to the NO\textsubscript{X} Budget opt-in unit under §97.88 for any control period after the last control period for which the NO\textsubscript{X} Budget opt-in permit was effective. The NO\textsubscript{X} authorized account representative shall ensure that the NO\textsubscript{X} Budget opt-in unit’s compliance account or the overdraft account of the NO\textsubscript{X} Budget source where the NO\textsubscript{X} Budget opt-in
§ 97.101 Purpose.

This subpart and subparts BB through II set forth the general provisions and the designated representative, permitting, allowance, monitoring, and opt-in provisions for the Federal Clean Air Interstate Rule (CAIR) NO\textsubscript{X} Annual Trading Program, under section 110 of the Clean Air Act and §52.35 of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.
§ 97.102 Definitions.

The terms used in this subpart and subparts BB through II shall have the meanings set forth in this section as follows:

Account number means the identification number given by the Administrator to each CAIR NO\textsubscript{X} Allowance Tracking System account.

Acid Rain emissions limitation means a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program.

Acid Rain Program means a multi-state sulfur dioxide and nitrogen oxides air pollution control and emission reduction program established by the Administrator under title IV of the CAA and parts 72 through 78 of this chapter.

Actual weighted average NO\textsubscript{X} emission rate means, for a NO\textsubscript{X} averaging plan under §76.11 of this chapter and for a year:

1. The sum of the products of the actual annual average NO\textsubscript{X} emission rate and actual annual heat input (as determined in accordance with part 75 of this chapter) for all units in the NO\textsubscript{X} averaging plan for the year; divided by

2. The sum of the actual annual heat input (as determined in accordance with part 75 of this chapter) for all units in the NO\textsubscript{X} averaging plan for the year.

Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

Allocate or allocation means, with regard to CAIR NO\textsubscript{X} allowances, the determination by a permitting authority or the Administrator of the amount of such CAIR NO\textsubscript{X} allowances to be initially credited to a CAIR NO\textsubscript{X} unit, a new unit set-aside, or other entity.

Allowance transfer deadline means, for a control period, midnight of March 1 (if it is a business day), or midnight of the first business day thereafter (if March 1 is not a business day), immediately following the control period and is the deadline by which a CAIR NO\textsubscript{X} allowance transfer must be submitted for recordation in a CAIR NO\textsubscript{X} source’s compliance account in order to be used to meet the source’s CAIR NO\textsubscript{X} emissions limitation for such control period in accordance with §97.154.

Alternate CAIR designated representative means, for a CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BB and II of this part, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR NO\textsubscript{X} source is also a CAIR SO\textsubscript{2} source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR SO\textsubscript{2} Trading Program. If the CAIR NO\textsubscript{X} source is also subject to the Acid Rain Program, then this natural person shall be the same person as the alternate designated representative under the Acid Rain Program. If the CAIR NO\textsubscript{X} source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg Budget Trading Program.

Automated data acquisition and handling system or DAHS means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under subpart HH of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart HH of this part.

Biomass means—

1. Any organic material grown for the purpose of being converted to energy;

2. Any organic byproduct of agriculture that can be converted into energy; or
Environmental Protection Agency

§ 97.102

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is;

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

(ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

CAIR authorized account representative means, with regard to a general account, a responsible natural person who is authorized, in accordance with subparts BB, FF, and II of this part, to transfer and otherwise dispose of CAIR NO\textsubscript{X} allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.

CAIR designated representative means, for a CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BB and II of this part, to represent and legally bind each owner and operator in matters pertaining to the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR NO\textsubscript{X} source is also a CAIR SO\textsubscript{2} source, then this natural person shall be the same person as the CAIR designated representative under the CAIR SO\textsubscript{2} Trading Program. If the CAIR NO\textsubscript{X} source is also a CAIR Ozone Season source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO\textsubscript{X} Ozone Season Trading Program. If the CAIR NO\textsubscript{X} source is also subject to the Acid Rain Program, then this natural person shall be the same person as the designated representative under the Acid Rain Program.

CAIR NO\textsubscript{X} allowance means a limited authorization issued by a permitting authority or the Administrator under subpart EE of this part or §97.188, or under provisions of a State implementation plan that are approved under §51.123(o)(1) or (2) or (p) of this chapter, to emit one ton of nitrogen oxides during a control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR NO\textsubscript{X} Program. An authorization to emit nitrogen oxides that is not issued under subpart EE of this part, §97.188, or provisions of a State implementation plan that are approved under §51.123(o)(1) or (2) or (p) of this chapter shall not be a CAIR NO\textsubscript{X} allowance.

CAIR NO\textsubscript{X} allowance deduction or deduction CAIR NO\textsubscript{X} allowances means the permanent withdrawal of CAIR NO\textsubscript{X} allowances by the Administrator from a compliance account, e.g., in order to account for a specified number of tons of total nitrogen oxides emissions from all CAIR NO\textsubscript{X} units at a CAIR NO\textsubscript{X} source for a control period, determined in accordance with subpart HH of this part, or to account for excess emissions.

CAIR NO\textsubscript{X} Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of CAIR NO\textsubscript{X} allowances under the CAIR NO\textsubscript{X} Annual Trading Program. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.

CAIR NO\textsubscript{X} Allowance Tracking System account means an account in the CAIR NO\textsubscript{X} Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR NO\textsubscript{X} allowances.

CAIR NO\textsubscript{X} allowances held or hold CAIR NO\textsubscript{X} allowances means the CAIR
NOx allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts FF, GG, and II of this part, in a CAIR NOx Allowance Tracking System account.

CAIR NOx Annual Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AA through II of this part and §§51.123(p) and 52.35 of this chapter or approved and administered by the Administrator in accordance with subparts AA through II of part 96 of this chapter and §§51.123(o)(1) or (2) of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

CAIR NOx emissions limitation means, for a CAIR NOx source, the tonnage equivalent, in NOx emissions in a control period, of the CAIR NOx allowances available for deduction for the source under §97.154 (a) and (b) for the control period.

CAIR NOx Ozone Season source means a source that is subject to the CAIR NOx Ozone Season Trading Program.

CAIR NOx Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AAAA through IIII of this part and §§51.123(ee) and 52.35 of this chapter or approved and administered by the Administrator in accordance with subparts AAAA through IIII of part 96 of this chapter and §§51.123(o)(1) or (2) of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

Certifying official means:
(1) For a corporation, a president, secretary, treasurer, or vice-president or the corporation in charge of a principal business function or any other person who performs similar policy or decision-making functions for the corporation;
(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or
(3) For a local government entity or State, Federal, or other public agency, a principal executive officer or ranking elected official.

CAIR NOx unit means a unit that is subject to the CAIR NOx Annual Trading Program under §97.104 and, except for purposes of §97.105 and subpart EE of this part, a CAIR NOx opt-In unit under subpart II of this part.

CAIR permit means the legally binding and federally enforceable written document, or portion of such document, issued by the permitting authority under subpart CC of this part, including any permit revisions, specifying the CAIR NOx Annual Trading Program requirements applicable to a CAIR NOx source, to each CAIR NOx unit at the source, and to the owners and operators and the CAIR designated representative of the source and each such unit.

CAIR SO2 source means a source that is subject to the CAIR SO2 Trading Program.

CAIR SO2 Trading Program means a multi-state sulfur dioxide air pollution control and emission reduction program established by the Administrator in accordance with subparts AAA through III of this part and §§51.124(r) and 52.36 of this chapter or approved and administered by the Administrator in accordance with subparts AAA through III of part 96 of this chapter and §§51.124(o)(1) or (2) of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.

Coal means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Coal-fired means:
(1) Except for purposes of subpart EE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during any year; or
(2) For purposes of subpart EE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during a specified year.
Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:

(1) Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and

(2) Producing during the 12-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity—

(i) For a topping-cycle cogeneration unit, (A) Useful thermal energy not less than 5 percent of total energy output; and

(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle cogeneration unit, useful power not less than 45 percent of total energy input;

(3) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit’s total energy input from all fuel except biomass if the unit is a boiler.

Combustion turbine means:

(1) An enclosed device comprising a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

(2) If the enclosed device under paragraph (1) of this definition is combined cycle, any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.105 and §97.184(h).

(i) For a unit that is a CAIR NOX unit under §97.104 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CAIR NOX unit under §97.104 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §97.105, for a unit that is not a CAIR NOX unit under §97.104 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CAIR NOX unit under §97.104.

(i) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Commence operation means:
(1) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber, except as provided in §97.184(h).

(2) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the date of commencement of operation of the unit, which shall continue to be treated as the same unit.

(3) For a unit that is replaced by a unit at the same source (e.g., repowered) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the replaced unit’s date of commencement of operation and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1), (2), or (3) of this definition as appropriate, except as provided in §97.184(h).

Common stack means a single flue through which emissions from 2 or more units are exhausted.

Compliance account means a CAIR NO\_X Allowance Tracking System account, established by the Administrator for a CAIR NO\_X source under subpart FF or II of this part, in which any CAIR NO\_X allowance allocations for the CAIR NO\_X units at the source are initially recorded and in which are held any CAIR NO\_X allowances available for use for a control period in order to meet the source’s CAIR NO\_X emissions limitation in accordance with §97.154.

Continuous emission monitoring system or CEMS means the equipment required under subpart HH of this part to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of nitrogen oxides emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with part 75 of this chapter. The following systems are the principal types of continuous emission monitoring systems required under subpart HH of this part:

(1) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

(2) A nitrogen oxides concentration monitoring system, consisting of a NO\_X pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NO\_X emissions, in parts per million (ppm);

(3) A nitrogen oxides emission rate (or NO\_X-diluent) monitoring system, consisting of a NO\_X pollutant concentration monitor, a diluent gas (CO\_2 or O\_2) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NO\_X concentration, in parts per million (ppm), diluent gas concentration, in percent CO\_2 or O\_2, and NO\_X emission rate, in pounds per million British thermal units (lb/mmBtu);

(4) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H\_2O;

(5) A carbon dioxide monitoring system, consisting of a CO\_2 pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO\_2 concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO\_2 emissions, in percent CO\_2; and

(6) An oxygen monitoring system, consisting of an O\_2 concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O\_2, in percent O\_2.

Control period means the period beginning January 1 of a calendar year, except as provided in §97.106(c)(2), and ending on December 31 of the same year, inclusive.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the CAIR designated representative...
Environmental Protection Agency

§ 97.102

and as determined by the Administrator in accordance with subpart HH of this part.

Excess emissions means any ton of nitrogen oxides emitted by the CAIR NO\textsubscript{X} units at a CAIR NO\textsubscript{X} source during a control period that exceeds the CAIR NO\textsubscript{X} emissions limitation for the source.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in any calendar year.

Fuel oil means any petroleum-based fuel (including diesel fuel or petroleum derivatives such as oil tar) and any recycled or blended petroleum products or petroleum by-products used as a fuel whether in a liquid, solid, or gaseous state.

General account means a CAIR NO\textsubscript{X} Allowance Tracking System account, established under subpart FF of this part, that is not a compliance account.

Generator means a device that produces electricity.

Gross electrical output means, with regard to a cogeneration unit, electricity made available for use, including any such electricity used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Heat input means, with regard to a specified period of time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the CAIR designated representative and determined by the Administrator in accordance with subpart HH of this part and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusted the fuel.

Hg Budget Trading Program means a multi-state Hg air pollution control and emission reduction program approved and administered by the Administrator in accordance with the provision of part 60 of this chapter and §60.24(h)(6), or established by the Administrator under section 111 of the Clean Air Act, as a means of reducing national Hg emissions.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit's total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the maximum amount of fuel per hour (in Btu/hr) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

Monitoring system means any monitoring system that meets the requirements of subpart HH of this part, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Most stringent State or Federal NO\textsubscript{X} emissions limitation means, with regard to a unit, the lowest NO\textsubscript{X} emissions limitation (in terms of lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.
Nameplate capacity means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.

Oil-fired means, for purposes of subpart EE of this part, combusting fuel oil for more than 15.0 percent of the annual heat input in a specified year and not qualifying as coal-fired.

Operator means any person who operates, controls, or supervises a CAIR NOₓ unit or a CAIR NOₓ source and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

Owner means any of the following persons:
(1) With regard to a CAIR NOₓ source or a CAIR NOₓ unit at a source, respectively:
   (i) Any holder of any portion of the legal or equitable title in a CAIR NOₓ unit at the source or the CAIR NOₓ unit;
   (ii) Any holder of a leasehold interest in a CAIR NOₓ unit at the source or the CAIR NOₓ unit;
   (iii) Any purchaser of power from a CAIR NOₓ unit at the source or the CAIR NOₓ unit;
(2) With regard to any general account, any person who has an ownership interest with respect to the CAIR NOₓ allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to represent the person’s ownership interest with respect to CAIR NOₓ allowances.

Permitting authority means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the CAIR NOₓ Annual Trading Program or, if no such agency has been so authorized, the Administrator.

Potential electrical output capacity means 33 percent of a unit’s maximum design heat input, divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

Receive or receipt of means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CAIR NOₓ allowances, the movement of CAIR NOₓ allowances by the Administrator into or between CAIR NOₓ Allowance Tracking System accounts, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shutdown unit (the replaced unit).

Repowered means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:
(1) Atmospheric or pressurized fluidized bed combustion;
(2) Integrated gasification combined cycle;
(3) Magnetohydrodynamics;
(4) Direct and indirect coal-fired turbines;
(5) Integrated gasification fuel cells;
or
(6) As determined by the Administrator in consultation with the Secretary of Energy, a derivative of one or more of the technologies under paragraphs (1) through (5) of this definition and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.

**Sequential use of energy** means:
(1) For a topping-cycle cogeneration unit, the use of reject heat from electricity production in a useful thermal energy application or process; or
(2) For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.

**Serial number** means, for a CAIR NOx allowance, the unique identification number assigned to each CAIR NOx allowance by the Administrator.

**Solid waste incineration unit** means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

**Source** means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of section 502(c) of the Clean Air Act, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

**State** means one of the States or the District of Columbia that is subject to the CAIR NOx Annual Trading Program pursuant to §52.35 of this chapter.

**Submit or serve** means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

(1) In person;
(2) By United States Postal Service;
or
(3) By other means of dispatch or transmission and delivery. Compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

**Title V operating permit** means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

**Title V operating permit regulations** means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

**Ton** means 2,000 pounds. For the purpose of determining compliance with the CAIR NOx emissions limitation, total tons of nitrogen oxides emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with subpart HH of this part, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

**Topping-cycle cogeneration unit** means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

**Total energy input** means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[
LHV = HHV - 10.55(W + 9H)
\]

Where:

- \(LHV\) = lower heating value of fuel in Btu/lb
- \(HHV\) = higher heating value of fuel in Btu/lb
- \(W\) = Weight % of moisture in fuel
- \(H\) = Weight % of hydrogen in fuel

**Total energy output** means, with regard to a cogeneration unit, the sum of
useful power and useful thermal energy produced by the cogeneration unit.

Unit means a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device.

Unit operating day means a calendar day in which a unit combusts any fuel.

Unit operating hour or hour of unit operation means an hour in which a unit combusts any fuel.

Useful power means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Useful thermal energy means, with regard to a cogeneration unit, thermal energy that is:

(1) Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;

(2) Used in a heating application (e.g., space heating or domestic hot water heating); or

(3) Used in a space cooling application (i.e., thermal energy used by an absorption chiller).

Utility power distribution system means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

NOx—nitrogen oxides
O2—oxygen
ppm—parts per million
scfh—standard cubic feet per hour
SO2—sulfur dioxide
yr—year

§ 97.103 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State shall be CAIR NOx units, and any source that includes one or more such units shall be a CAIR NOx source, subject to the requirements of this subpart and subparts BB through HH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CAIR NOx unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR NOx unit provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) The units in a State that meet the requirements set forth in paragraph (b)(1)(i), (b)(2)(i), or (b)(2)(ii) of this section shall not be CAIR NOx units:

(1)(i) Any unit that is a CAIR NOx unit under paragraph (a)(1) or (2) of this section:

(A) Qualifying as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit; and

(B) Not serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe supplying in any calendar year more than one-third of the unit’s potential electric output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.
(i) If a unit qualifies as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and meets the requirements of paragraphs (b)(1)(i) of this section for at least one calendar year, but subsequently no longer meets all such requirements, the unit shall become a CAIR NOX unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i)(B) of this section.

(2)(i) Any unit that is a CAIR NOX unit under paragraph (a)(1) or (2) of this section commencing operation before January 1, 1985:

(A) Qualifying as a solid waste incineration unit; and

(B) With an average annual fuel consumption of non-fossil fuel for 1985–1987 exceeding 80 percent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any 3 consecutive calendar years after 1990 exceeding 80 percent (on a Btu basis).

(ii) Any unit that is a CAIR NOX unit under paragraph (a)(1) or (2) of this section commencing operation on or after January 1, 1985:

(A) Qualifying as a solid waste incineration unit; and

(B) With an average annual fuel consumption of non-fossil fuel for the first 3 calendar years of operation exceeding 80 percent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any 3 consecutive calendar years after 1990 exceeding 80 percent (on a Btu basis).

(iii) If a unit qualifies as a solid waste incineration unit and meets the requirements of paragraph (b)(2)(i) or (ii) of this section for at least 3 consecutive calendar years, but subsequently no longer meets all such requirements, the unit shall become a CAIR NOX unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 1990 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more.

(c) A certifying official of an owner or operator of any unit may petition the Administrator at any time for a determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CAIR NOX Annual Trading Program to the unit.

(1) Petition content. The petition shall be in writing and include the identification of the unit and the relevant facts about the unit. The petition and any other documents provided to the Administrator in connection with the petition shall include the following certification statement, signed by the certifying official: "I am authorized to make this submission on behalf of the owners and operators of the unit for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(2) Submission. The petition and any other documents provided in connection with the petition shall be submitted to the Director of the Clean Air Markets Division (or its successor), U.S. Environmental Protection Agency, who will act on the petition as the Administrator's duly authorized representative.

(3) Response. The Administrator will issue a written response to the petition and may request supplemental information relevant to such petition. The Administrator's determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CAIR NOX Annual Trading Program to the unit shall be binding on the permitting authority unless the petition or other information or documents provided in connection with the petition are found to have contained significant, relevant errors or omissions.
§ 97.105 Retired unit exemption.

(a)(1) Any CAIR NOX unit that is permanently retired and is not a CAIR NOX opt-in unit under subpart II of this part shall be exempt from the CAIR NOX Annual Trading Program, except for the provisions of this section, §§97.102, 97.103, 97.104, 97.106(c)(4) through (7), 97.107, 97.108, and subparts BB and EE through GG of this part.

(b) Special provisions.

(1) A unit exempt under paragraph (a) of this section shall not emit any nitrogen oxides, starting on the date that the exemption takes effect.

(2) The Administrator or the permitting authority will allocate CAIR NOX allowances under subpart EE of this part to a unit exempt under paragraph (a) of this section.

(3) For the purpose of applying monitoring, reporting, and recordkeeping requirements under subpart HH of this part, a unit that loses its exemption under paragraph (a) of this section shall be treated as a unit that commences commercial operation on the first date on which the unit resumes operation.

§ 97.106 Standard requirements.

(a) Permit requirements. (1) The CAIR designated representative of each CAIR NOX source required to have a Title V operating permit and each CAIR NOX
unit required to have a title V operating permit at the source shall:

(i) Submit to the permitting authority a complete CAIR permit application under §97.122 in accordance with the deadlines specified in §97.121; and

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.

(2) The owners and operators of each CAIR NO\textsubscript{X} source required to have a title V operating permit and each CAIR NO\textsubscript{X} unit required to have a title V operating permit at the source shall have a CAIR permit issued by the permitting authority under subpart CC of this part for the source and operate the source and the unit in compliance with such CAIR permit.

(3) Except as provided in subpart II of this part, the owners and operators of a CAIR NO\textsubscript{X} source that is not otherwise required to have a title V operating permit and each CAIR NO\textsubscript{X} unit that is not otherwise required to have a title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under subpart CC of this part for such CAIR NO\textsubscript{X} source and such CAIR NO\textsubscript{X} unit.

(b) Monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the CAIR designated representative, of each CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of subpart HH of this part.

(2) The emissions measurements recorded and reported in accordance with subpart HH of this part shall be used to determine compliance by each CAIR NO\textsubscript{X} source with the CAIR NO\textsubscript{X} emissions limitation under paragraph (c) of this section.

(c) Nitrogen oxides emission requirements. (1) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source shall hold, in the source’s compliance account, CAIR NO\textsubscript{X} allowances available for compliance deductions for the control period under §97.154(a) in an amount not less than the tons of total nitrogen oxides emissions for the control period from all CAIR NO\textsubscript{X} units at the source, as determined in accordance with subpart HH of this part.

(2) A CAIR NO\textsubscript{X} unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of January 1, 2009 or the deadline for meeting the unit’s monitor certification requirements under §97.170(b)(1), (2), or (5) and for each control period thereafter.

(3) A CAIR NO\textsubscript{X} allowance shall not be deducted, for compliance with the requirements under paragraph (c)(1) of this section, for a control period in a calendar year before the year for which the CAIR NO\textsubscript{X} allowance was allocated.

(4) CAIR NO\textsubscript{X} allowances shall be held in, deducted from, or transferred into or among CAIR NO\textsubscript{X} Allowance Tracking System accounts in accordance with subparts EE, FF, GG, and II of this part.

(5) A CAIR NO\textsubscript{X} allowance is a limited authorization to emit one ton of nitrogen oxides in accordance with the CAIR NO\textsubscript{X} Annual Trading Program. No provision of the CAIR NO\textsubscript{X} Annual Trading Program, the CAIR permit application, the CAIR permit, or an exemption under §97.105 and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization.

(6) A CAIR NO\textsubscript{X} allowance does not constitute a property right.

(7) Upon recordation by the Administrator under subpart EE, FF, GG, or II of this part, every allocation, transfer, or deduction of a CAIR NO\textsubscript{X} allowance to or from a CAIR NO\textsubscript{X} source’s compliance account is incorporated automatically in any CAIR permit of the source.

(d) Excess emissions requirements. If a CAIR NO\textsubscript{X} source emits nitrogen oxides during any control period in excess of the CAIR NO\textsubscript{X} emissions limitation, then:

(1) The owners and operators of the source and each CAIR NO\textsubscript{X} unit at the source shall surrender the CAIR NO\textsubscript{X} allowances required for deduction under §97.154(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable State law; and
(2) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart, the Clean Air Act, and applicable State law.

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The certificate of representation under \$97.113 for the CAIR designated representative for the source and each CAIR NO\textsubscript{X} unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation under \$97.113 changing the CAIR designated representative.

(ii) All emissions monitoring information, in accordance with subpart HH of this part, provided that to the extent that subpart HH of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the CAIR NO\textsubscript{X} Annual Trading Program.

(iv) Copies of all documents used to complete a CAIR permit application and any other submission under the CAIR NO\textsubscript{X} Annual Trading Program or to demonstrate compliance with the requirements of the CAIR NO\textsubscript{X} Annual Trading Program.

(2) The CAIR designated representative of a CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit at the source shall submit the reports required under the CAIR NO\textsubscript{X} Annual Trading Program, including those under subpart HH of this part.

(f) Liability. (1) Each CAIR NO\textsubscript{X} source and each CAIR NO\textsubscript{X} unit shall meet the requirements of the CAIR NO\textsubscript{X} Annual Trading Program.

(2) Any provision of the CAIR NO\textsubscript{X} Annual Trading Program that applies to a CAIR NO\textsubscript{X} source or the CAIR designated representative of a CAIR NO\textsubscript{X} source shall also apply to the owners and operators of such source and of the CAIR NO\textsubscript{X} units at the source.

(3) Any provision of the CAIR NO\textsubscript{X} Annual Trading Program that applies to a CAIR NO\textsubscript{X} unit or the CAIR designated representative of a CAIR NO\textsubscript{X} unit shall also apply to the owners and operators of such unit.

(g) Effect on other authorities. No provision of the CAIR NO\textsubscript{X} Annual Trading Program, a CAIR permit application, a CAIR permit, or an exemption under \$97.105 shall be construed as exempting or excluding the owners and operators, and the CAIR designated representative, of a CAIR NO\textsubscript{X} source or CAIR NO\textsubscript{X} unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the Clean Air Act.

§97.107 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CAIR NO\textsubscript{X} Annual Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CAIR NO\textsubscript{X} Annual Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CAIR NO\textsubscript{X} Annual Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

§97.108 Appeal procedures.

The appeal procedures for decisions of the Administrator under the CAIR NO\textsubscript{X} Annual Trading Program are set forth in part 78 of this chapter.
Environmental Protection Agency

Subpart BB—CAIR Designated Representative for CAIR NO\textsubscript{X} Sources

§ 97.110 Authorization and responsibilities of CAIR designated representative.

(a) Except as provided under § 97.111, each CAIR NO\textsubscript{X} source, including all CAIR NO\textsubscript{X} units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NO\textsubscript{X} Annual Trading Program concerning the source or any CAIR NO\textsubscript{X} unit at the source.

(b) The CAIR designated representative of the CAIR NO\textsubscript{X} source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NO\textsubscript{X} units at the source and shall act in accordance with the certification statement in § 97.113(a)(4)(iv).

(c) Upon receipt by the Administrator of a complete certificate of representation under § 97.113 for a CAIR designated representative, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.

(d) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NO\textsubscript{X} Allowance Tracking System account will be established for a CAIR NO\textsubscript{X} unit at a source, until the Administrator has received a complete certificate of representation under § 97.113 for a CAIR designated representative of the source and the CAIR NO\textsubscript{X} units at the source.

(e)(1) Each submission under the CAIR NO\textsubscript{X} Annual Trading Program shall be submitted, signed, and certified by the CAIR designated representative on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(2) The permitting authority and the Administrator will accept or act on a submission made on behalf of owner or operators of a CAIR NO\textsubscript{X} source or a CAIR NO\textsubscript{X} unit only if the submission has been made, signed, and certified in accordance with paragraph (e)(1) of this section.

§ 97.111 Alternate CAIR designated representative.

(a) A certificate of representation under § 97.113 may designate one and only one alternate CAIR designated representative, who may act on behalf of and under authority of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.

(b) Upon receipt by the Administrator of a complete certificate of representation under § 97.113, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.

(c) Except in this section and §§ 97.102, 97.110(a) and (d), 97.112, 97.113, 97.115, 97.151 and 97.182, whenever the term "CAIR designated representative" is used in subparts AA through II.
§ 97.112 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

(a) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under § 97.113. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR NOX source and the CAIR NOX units at the source.

(b) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under § 97.113. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR NOX source and the CAIR NOX units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CAIR NOX source or a CAIR NOX unit is not included in the list of owners and operators in the certificate of representation under § 97.113, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the Administrator, or a court, as if the owner or operator were included in such list.

(2) Within 30 days following any change in the owners and operators of a CAIR NOX source or a CAIR NOX unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under § 97.113 amending the list of owners and operators to include the change.

§ 97.113 Certificate of representation.

(a) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the CAIR NOX source, and each CAIR NOX unit at the source, including identification and nameplate capacity of each generator served by each such unit.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative.

(3) A list of the owners and operators of the CAIR NOX source and of each CAIR NOX unit at the source.

(4) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative—

(i) “I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR NOX unit at the source.”

(ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NOX Annual Trading Program on behalf of the owners and operators of the source and each CAIR NOX unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions.”
(iii) “I certify that the owners and operators of the source and of each CAIR NO\textsubscript{X} unit at the source shall be bound by any order issued to me by the Administrator, the permitting authority, or a court regarding the source or unit.”

(iv) Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR NO\textsubscript{X} unit, or where a utility or industrial customer purchases power from a CAIR NO\textsubscript{X} unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘CAIR designated representative’ or ‘alternate CAIR designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR NO\textsubscript{X} unit at the source; and CAIR NO\textsubscript{X} allowances and proceeds of transactions involving CAIR NO\textsubscript{X} allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR NO\textsubscript{X} allowances by contract, CAIR NO\textsubscript{X} allowances and proceeds of transactions involving CAIR NO\textsubscript{X} allowances will be deemed to be held or distributed in accordance with the contract.”

(5) The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

(b) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

§ 97.114 Objections concerning CAIR designated representative.

(a) Once a complete certificate of representation under §97.113 has been submitted and received, the permitting authority and the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under §97.113 is received by the Administrator.

(b) Except as provided in §97.112(a) or (b), no objection or other communication submitted to the permitting authority or the Administrator concerning the authorization, or any representation, action, inaction, or submission, of the CAIR designated representative shall affect any representation, action, inaction, or submission of the CAIR designated representative or the finality of any decision or order by the permitting authority or the Administrator under the CAIR NO\textsubscript{X} Annual Trading Program.

(c) Neither the permitting authority nor the Administrator will adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any CAIR designated representative, including private legal disputes concerning the proceeds of CAIR NO\textsubscript{X} allowance transfers.

§ 97.115 Delegation by CAIR designated representative and alternate CAIR designated representative.

(a) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(b) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(c) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:
(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

(4) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:

(i) “I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.115(d) shall be deemed to be an electronic submission by me.”

(ii) “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.115(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.115 is terminated.”

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph (c) of this section and made in accordance with a notice of delegation effective under paragraph (d) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

Subpart CC—Permits

§ 97.120 General CAIR NO\textsubscript{X} Annual Trading Program permit requirements.

(a) For each CAIR NO\textsubscript{X} source required to have a title V operating permit or required, under subpart II of this part, to have a title V operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the permitting authority for the title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the title V permit or other federally enforceable permit as applicable shall be administered in accordance with the permitting authority’s title V operating permits regulations promulgated under part 70 or 71 of this chapter or the permitting authority’s regulations for other federally enforceable permits as applicable, except as provided otherwise by §97.105, this subpart, and subpart II of this part.

(b) Each CAIR permit shall contain, with regard to the CAIR NO\textsubscript{X} source and the CAIR NO\textsubscript{X} units at the source covered by the CAIR permit, all applicable CAIR NO\textsubscript{X} Annual Trading Program, CAIR NO\textsubscript{X} Ozone Season Trading Program, and CAIR SO\textsubscript{2} Trading Program requirements and shall be a complete and separable portion of the title V operating permit or other federally enforceable permit under paragraph (a) of this section.

§ 97.121 Submission of CAIR permit applications.

(a) Duty to apply. The CAIR designated representative of any CAIR NO\textsubscript{X} source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §97.122 for the source covering each CAIR NO\textsubscript{X} unit at the source at least 18 months (or such lesser time provided by the permitting
§ 97.141 Timing requirements for CAIR NO\textsubscript{x} allowance allocations.

(a) The Administrator will determine by order the CAIR NO\textsubscript{x} allowance allocations, in accordance with §97.142(a) and (b), for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014.

Subpart DD [Reserved]

Subpart EE—CAIR NO\textsubscript{x} Allowance Allocations

§ 97.140 State trading budgets.

The State trading budgets for annual allocations of CAIR NO\textsubscript{x} allowances for the control periods in 2009 through 2014 and in 2015 and thereafter are respectively as follows:

<table>
<thead>
<tr>

</table>
(b) By July 31, 2011 and July 31 of each year thereafter, the Administrator will determine by order the CAIR NO\textsubscript{X} allowance allocations, in accordance with §97.142(a) and (b), for the control period in the fourth year after the year of the applicable deadline for determination under this paragraph.

(c) By July 31, 2009 and July 31 of each year thereafter, the Administrator will determine by order the CAIR NO\textsubscript{X} allowance allocations, in accordance with §97.142(a), (c), and (d), for the control period in the year of the applicable deadline for determination under this paragraph.

(d) The Administrator will make available to the public each determination of CAIR NO\textsubscript{X} allowances under paragraph (a), (b), or (c) of this section and will provide an opportunity for submission of objections to the determination. Objections shall be limited to addressing whether the determination is in accordance with §97.142. Based on any such objections, the Administrator will adjust each determination to the extent necessary to ensure that it is in accordance with §97.142.

§ 97.142 CAIR NO\textsubscript{X} allowance allocations.

(a)(1) The baseline heat input (in mmBtu) used with respect to CAIR NO\textsubscript{X} allowance allocations under paragraph (b) of this section for each CAIR NO\textsubscript{X} unit will be:

(i) For units commencing operation before January 1, 2001 the average of the 3 highest amounts of the unit’s adjusted control period heat input for 2000 through 2004, with the adjusted control period heat input for each year calculated as follows:

(A) If the unit is coal-fired during the year, the unit’s control period heat input for such year is multiplied by 100 percent;

(B) If the unit is oil-fired during the year, the unit’s control period heat input for such year is multiplied by 60 percent; and

(C) If the unit is not subject to paragraph (a)(1)(i)(A) or (B) of this section, the unit’s control period heat input for such year is multiplied by 40 percent.

(ii) For units commencing operation on or after January 1, 2001 and operating each calendar year during a period of 5 or more consecutive calendar years, the average of the 3 highest amounts of the unit’s total converted control period heat input over the first such 5 years.

(2)(i) A unit’s control period heat input, and a unit’s status as coal-fired or oil-fired, for a calendar year under paragraph (a)(1)(i) of this section, and a unit’s total tons of NO\textsubscript{X} emissions during a calendar year under paragraph (c)(3) of this section, will be determined in accordance with part 75 of this chapter, to the extent the unit was otherwise subject to the requirements of part 75 of this chapter for the year, or will be based on the best available data reported to the Administrator for the unit (in a format prescribed by the Administrator), to the extent the unit was not otherwise subject to the requirements of part 75 of this chapter for the year.

(ii) A unit’s converted control period heat input for a calendar year specified under paragraph (a)(1)(ii) of this section equals:

(A) Except as provided in paragraph (a)(2)(ii)(B) or (C) of this section, the control period gross electrical output of the generator or generators served by the unit multiplied by 7,900 Btu/kWh, if the unit is coal-fired for the year, or 6,675 Btu/kWh, if the unit is not coal-fired for the year, and divided by 1,000,000 Btu/mmBtu, provided that if a generator is served by 2 or more units, then the gross electrical output of the generator will be attributed to each unit in proportion to the unit’s share of the total control period heat input of such units for the year;

(B) For a unit that is a boiler and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the total heat energy (in Btu) of the steam produced by the boiler during the control period, divided by 0.8 and by 1,000,000 Btu/mmBtu; or

(C) For a unit that is a combustion turbine and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the control period gross electrical output of
the enclosed device comprising the compressor, combustor, and turbine multiplied by 3,413 Btu/kWh, plus the total heat energy (in Btu) of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by 1,000,000 Btu/mmBtu.

(e) of this section).

except as provided in paragraphs (d) and thereafter, the Administrator will appropriate to all CAIR NOx and thereafter, the Administrator will appropriate to all CAIR NOx.

(2) The Administrator will allocate CAIR NOx allowances to each CAIR NOx unit under paragraph (b)(1) of this section in an amount determined by multiplying the total amount of CAIR NOx allowances allocated under paragraph (b)(1) of this section by the ratio of the baseline heat input of such CAIR NOx unit to the total amount of baseline heat input of all such CAIR NOx units in the State and rounding to the nearest whole allowance as appropriate.

(c) For each control period in 2009 and thereafter, the Administrator will allocate CAIR NOx allowances to CAIR NOx units in a State that are not allocated CAIR NOx allowances under paragraph (b) of this section because the units do not yet have a baseline heat input under paragraph (a) of this section or because the units have a baseline heat input but all CAIR NOx allowances available under paragraph (b) of this section for the control period are already allocated, in accordance with the following procedures:

(1) The Administrator will establish a separate new unit set-aside for each control period. Each new unit set-aside will be allocated CAIR NOx allowances equal to 5 percent for a control period in 2009 through 2014, and 3 percent for a control period in 2015 and thereafter, of the amount of tons of NOx emissions in the applicable State trading budget under §97.140.

(2) The CAIR designated representative of such a CAIR NOx unit may submit to the Administrator a request, in a format specified by the Administrator, to be allocated CAIR NOx allowances, starting with the later of the control period in 2009 or the first control period after the control period in which the CAIR NOx unit commences commercial operation and until the first control period for which the unit is allocated CAIR NOx allowances under paragraph (b) of this section. A separate CAIR NOx allowance allocation request for each control period for which CAIR NOx allowances are sought must be submitted on or before May 1 of such control period and after the date on which the CAIR NOx unit commences commercial operation.

(3) In a CAIR NOx allowance allocation request under paragraph (c)(2) of this section, the CAIR designated representative may request for a control period CAIR NOx allowances in an amount not exceeding the CAIR NOx unit’s total tons of NOx emissions during the calendar year immediately before such control period.

(4) The Administrator will review each CAIR NOx allowance allocation request under paragraph (c)(2) of this section and will allocate CAIR NOx allowances for each control period pursuant to such request as follows:

(i) The Administrator will accept an allowance allocation request only if the request meets, or is adjusted by the Administrator as necessary to meet, the requirements of paragraphs (c)(2) and (3) of this section.

§ 97.142
§ 97.142

(1) On or after May 1 of the control period, the Administrator will determine the sum of the CAIR NO\textsubscript{X} allowances requested (as adjusted under paragraph (c)(4)(i) of this section) in all allowance allocation requests accepted under paragraph (c)(4)(l) of this section for the control period.

(2) If the Administrator already recorded such CAIR NO\textsubscript{X} allowances under §97.153 and if the Administrator makes such determination before making deductions for the source that includes such recipient under §97.154(b) for the control period, then the Administrator will deduct from the account in which such CAIR NO\textsubscript{X} allowances were recorded under §97.153 an amount of CAIR NO\textsubscript{X} allowances allocated for the same or a prior control period equal to the amount of such already recorded CAIR NO\textsubscript{X} allowances. The CAIR designated representative shall ensure that there are sufficient CAIR NO\textsubscript{X} allowances in such account for completion of the deduction.

(3) If the Administrator already recorded such CAIR NO\textsubscript{X} allowances under §97.153 and if the Administrator makes such determination after making deductions for the source that includes such recipient under §97.154(b) for the control period, then the Administrator will apply paragraph (e)(1) or (2) of this section, as appropriate, to any subsequent control period for which CAIR NO\textsubscript{X} allowances were allocated to such recipient.

(4) The Administrator will transfer the CAIR NO\textsubscript{X} allowances that are not...
Environmental Protection Agency

§ 97.143 Compliance supplement pool.

(a) In addition to the CAIR NO\textsubscript{X} allowances allocated under §97.142, the Administrator may allocate for the control period in 2009 up to the following amount of CAIR NO\textsubscript{X} allowances to CAIR NO\textsubscript{X} units in the respective State:

(b) For any CAIR NO\textsubscript{X} unit in a State, if the unit’s average annual NO\textsubscript{X} emission rate for 2007 or 2008 is less than 0.25 lb/mmBtu and, where such unit is included in a NO\textsubscript{X} averaging plan under §76.11 of this chapter under the Acid Rain Program for such year, the unit’s NO\textsubscript{X} averaging plan has an actual weighted average NO\textsubscript{X} emission rate for such year equal to or less than the actual weighted average NO\textsubscript{X} emission rate for the year before such year and if the unit achieves NO\textsubscript{X} emission reductions in 2007 and 2008, the CAIR designated representative of the unit may request early reduction credits, and allocation of CAIR NO\textsubscript{X} allowances from the compliance supplement pool under paragraph (a) of this section for such early reduction credits, in accordance with the following:

(1) The owners and operators of such CAIR NO\textsubscript{X} unit shall monitor and report the NO\textsubscript{X} emissions rate and the heat input of the unit in accordance with subpart HH of this part in each control period for which early reduction credit is requested.

(2) The CAIR designated representative of such CAIR NO\textsubscript{X} unit shall submit to the Administrator by May 1, 2009 a request, in a format specified by the Administrator, for allocation of an amount of CAIR NO\textsubscript{X} allowances from the compliance supplement pool not exceeding the sum of the unit’s heat input for the control period in 2007 multiplied by the difference (if any greater than zero) between 0.25 lb/mmBtu and the unit’s NO\textsubscript{X} emission rate for the control period in 2007 plus the unit’s heat input for the control period in 2008 multiplied by the difference (if any greater than zero) between 0.25 lb/mmBtu and the unit’s NO\textsubscript{X} emission rate for the control period in 2008, determined in accordance with subpart HH of this part and with the sum divided by 2,000 lb/ton and rounded to the nearest whole number of tons as appropriate.

(c) For any CAIR NO\textsubscript{X} unit in a State whose compliance with the CAIR NO\textsubscript{X} emissions limitation for the control period in 2009 would create an undue risk to the reliability of electricity supply during such control period, the CAIR designated representative of the unit may request the allocation of CAIR NO\textsubscript{X} allowances from the compliance supplement pool under paragraph (a) of this section, in accordance with the following:

(1) The CAIR designated representative of such CAIR NO\textsubscript{X} unit shall submit to the Administrator by May 1, 2009 a request, in a format specified by the Administrator, for allocation of an amount of CAIR NO\textsubscript{X} allowances from the compliance supplement pool not exceeding the minimum amount of CAIR NO\textsubscript{X} allowances necessary to remove such undue risk to the reliability of electricity supply.

(2) In the request under paragraph (c)(1) of this section, the CAIR designated representative of such CAIR NO\textsubscript{X} unit shall demonstrate that, in
the absence of allocation to the unit of the amount of CAIR NO\textsubscript{X} allowances requested, the unit’s compliance with the CAIR NO\textsubscript{X} emissions limitation for the control period in 2009 would create an undue risk to the reliability of electricity supply during such control period. This demonstration must include a showing that it would not be feasible for the owners and operators of the unit to:

(i) Obtain a sufficient amount of electricity from other electricity generation facilities, during the installation of control technology at the unit for compliance with the CAIR NO\textsubscript{X} emissions limitation, to prevent such undue risk; or

(ii) Obtain under paragraphs (b) and (d) of this section, or otherwise obtain, a sufficient amount of CAIR NO\textsubscript{X} allowances to prevent such undue risk.

(d) The Administrator will review each request under paragraph (b) or (c) of this section submitted by May 1, 2009 and will allocate CAIR NO\textsubscript{X} allowances for the control period in 2009 to CAIR NO\textsubscript{X} units in a State and covered by such request as follows:

(1) Upon receipt of each such request, the Administrator will make any necessary adjustments to the request to ensure that the amount of the CAIR NO\textsubscript{X} allowances requested meets the requirements of paragraph (b) or (c) of this section.

(2) If the State’s compliance supplement pool under paragraph (a) of this section has an amount of CAIR NO\textsubscript{X} allowances not less than the total amount of CAIR NO\textsubscript{X} allowances in all such requests (as adjusted under paragraph (d)(1) of this section), the Administrator will allocate to each CAIR NO\textsubscript{X} unit covered by such requests the amount of CAIR NO\textsubscript{X} allowances requested (as adjusted under paragraph (d)(1) of this section).

(3) If the State’s compliance supplement pool under paragraph (a) of this section has a smaller amount of CAIR NO\textsubscript{X} allowances than the total amount of CAIR NO\textsubscript{X} allowances in all such requests (as adjusted under paragraph (d)(1) of this section), the Administrator will allocate CAIR NO\textsubscript{X} allowances to each CAIR NO\textsubscript{X} unit covered by such requests according to the following formula and rounding to the nearest whole allowance as appropriate:

Unit’s allocation = Unit’s adjusted allocation × (State’s compliance supplement pool + Total adjusted allocations for all units)

Where:

“Unit’s allocation” is the amount of CAIR NO\textsubscript{X} allowances allocated to the unit from the State’s compliance supplement pool.

“Unit’s adjusted allocation” is the amount of CAIR NO\textsubscript{X} allowances requested for the unit under paragraph (b) or (c) of this section, as adjusted under paragraph (d)(1) of this section.

“State’s compliance supplement pool” is the amount of CAIR NO\textsubscript{X} allowances in the State’s compliance supplement pool.

“Total adjusted allocations for all units” is the sum of the amounts of allocations requested for all units under paragraph (b) or (c) of this section, as adjusted under paragraph (d)(1) of this section.

(4) By July 31, 2009, the Administrator will determine by order the allocations under paragraph (d)(2) or (3) of this section. The Administrator will make available to the public each determination of CAIR NO\textsubscript{X} allowances under such paragraph and will provide an opportunity for submission of objections to the determination. Objections shall be limited to addressing whether the determination is in accordance with paragraph (b) or (c) of this section and paragraph (d)(2) or (3) of this section, as appropriate. Based on any such objections, the Administrator will adjust each determination to the extent necessary to ensure that it is in accordance with such paragraphs.

(5) By January 1, 2010, the Administrator will record the allocations under paragraph (d)(4) of this section.

[65 FR 2727, Jan. 18, 2000, as amended at 71 FR 74795, Dec. 13, 2006]
then the permitting authority shall make such allocations in accordance with such approved State implementation plan revision, the Administrator will not make allocations under §§97.141 and 97.142 for the CAIR NO\textsubscript{X} units in the State, and under §97.153, the Administrator will record the allocations made under such approved State implementation plan revision instead of allocations made under §§97.141 and 97.142.

(b) Notwithstanding §97.143, if a State submits, and the Administrator approves, a State implementation plan revision in accordance with §51.123(p)(2) of this chapter providing for allocation of the State’s compliance supplement pool by the permitting authority, then the permitting authority shall make such allocations in accordance with such approved State implementation plan revision, the Administrator will not make allocations under §97.143(d)(4) for the CAIR NO\textsubscript{X} units in the State, and under §97.143(d)(5), the Administrator will record the allocations of the State’s compliance supplement pool made under such approved State implementation plan revision instead of allocations made under §97.143(d)(4).

(c)(1) In implementing paragraph (a) of this section and §§97.141, 97.142, and 97.153, the Administrator will ensure that the total amount of CAIR NO\textsubscript{X} allowances allocated, under such provisions and under a State’s State implementation plan revision approved in accordance with §51.123(p)(1) of this chapter, for CAIR NO\textsubscript{X} sources in the State or for other entities specified by the permitting authority will not exceed the State’s State trading budget for the year of the control period.

(2) In implementing paragraph (b) of this section and §97.143, the Administrator will ensure that the total amount of CAIR NO\textsubscript{X} allowances allocated, under such provisions and under a State’s State implementation plan revision approved in accordance with §51.123(p)(2), for CAIR NO\textsubscript{X} sources in the State will not exceed the State’s compliance supplement pool.

APPENDIX A TO SUBPART EE OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING ALLOCATIONS

1. The following States have State Implementation Plan revisions under §51.123(p)(1) of this chapter approved by the Administrator and providing for allocation of CAIR NO\textsubscript{X} allowances by the permitting authority under §97.144(a):

   Indiana
   Louisiana
   Michigan
   New Jersey
   North Carolina
   Ohio
   South Carolina
   Tennessee
   Texas (for control periods 2009–2014)
   West Virginia (for control periods 2009–2014)
   Wisconsin

2. The following States have State Implementation Plan revisions under §51.123(p)(2) of this chapter approved by the Administrator and providing for allocation of the Compliance Supplement Pool by the permitting authority under §97.144(b):

   Indiana
   Michigan
   New Jersey
   Ohio
   South Carolina
   Texas

Subpart FF—CAIR NO\textsubscript{X} Allowance Tracking System

§97.150 [Reserved]

§97.151 Establishment of accounts.

(a) Compliance accounts. Except as provided in §97.184(e), upon receipt of a complete certificate of representation under §97.113, the Administrator will establish a compliance account for the CAIR NO\textsubscript{X} source for which the certificate of representation was submitted, unless the source already has a compliance account.

(b) General accounts. (1) Application for general account. (i) Any person may apply to open a general account for the purpose of holding and transferring CAIR NO\textsubscript{X} allowances. An application
for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(B) Organization name and type of organization, if applicable;

(C) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership interest with respect to the CAIR NOx allowances held in the general account;

(D) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: “I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR NOx allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NOx Annual Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account.”

(E) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.

(iii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

2 Authorization of CAIR authorized account representative and alternate CAIR authorized account representative.

(i) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(A) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(B) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR NOx allowances held in the general account in all matters pertaining to the CAIR NOx Annual Trading Program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the Administrator or a court regarding the general account.

(C) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.

(ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an
ownership interest with respect to CAIR NOx allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: ‘I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR NOx allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.’

(iii) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(ii) of this section.

(3) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest. (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NOx allowances in the general account.

(ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NOx allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CAIR NOx allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to CAIR NOx allowances in the general account, including the addition of a new person, the CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR NOx allowances in the general account to include the change.

(4) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative. (i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.
(ii) Except as provided in paragraph (b)(3)(i) or (ii) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR NOX allowance transfers.

(5) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative. (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FF and GG of this part.

(ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FF and GG of this part.

(iii) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (b)(5)(i) or (ii) of this section, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (b)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: “I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.151(b)(5)(iv) shall be deemed to be an electronic submission by me.”; and

(E) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.151(b)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.151(b)(5) is terminated.”.

(iv) A notice of delegation submitted under paragraph (b)(5)(iii) of this section shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.
§ 97.152 Responsibilities of CAIR designated account representative.

Following the establishment of a CAIR NOX Allowance Tracking System account, all submissions to the Administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of CAIR NOX allowances in the account, shall be made only by the CAIR designated account representative for the account.

§ 97.153 Recordation of CAIR NOX allowance allocations.

(a) By September 30, 2007, the Administrator will record in the CAIR NOX source’s compliance account the CAIR NOX allowances allocated for the CAIR NOX units at the source in accordance with §97.142(a) and (b) for the control period in 2009.

(b) By September 30, 2008, the Administrator will record in the CAIR NOX source’s compliance account the CAIR NOX allowances allocated for the CAIR NOX units at the source in accordance with §97.142(a) and (b) for the control period in 2010.

(c) By September 30, 2009, the Administrator will record in the CAIR NOX source’s compliance account the CAIR NOX allowances allocated for the CAIR NOX units at the source in accordance with §97.142(a) and (b) for the control period in 2011.

(d) By December 1, 2010 and December 1 of each year thereafter, the Administrator will record in the CAIR NOX source’s compliance account the CAIR NOX allowances allocated for the CAIR NOX units at the source in accordance with §97.142(a) and (c) for the control period in the year of the applicable deadline for recordation under this paragraph.

(e) By December 1, 2009 and December 1 of each year thereafter, the Administrator will record in the CAIR NOX source’s compliance account the CAIR NOX allowances allocated for the CAIR NOX units at the source in accordance with §97.142(a) and (c) for the control period in the year of the applicable deadline for recordation under this paragraph.

(f) Serial numbers for allocated CAIR NOX allowances. When recording the allocation of CAIR NOX allowances for a CAIR NOX unit in a compliance account, the Administrator will assign each CAIR NOX allowance a unique identification number that will include digits identifying the year of the control period for which the CAIR NOX allowance is allocated.

§ 97.154 Compliance with CAIR NOX emissions limitation.

(a) Allowance transfer deadline. The CAIR NOX allowances are available to be deducted for compliance with a source’s CAIR NOX emissions limitation for a control period in a given calendar year only if the CAIR NOX allowances:

(1) Were allocated for the control period in the year or a prior year; and

(2) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR NOX allowance transfer correctly submitted for recordation under §§97.160 and 97.161 by the allowance transfer deadline for the control period.

(b) Deductions for compliance. Following the recordation, in accordance with §97.161, of CAIR NOX allowance transfers submitted for recordation in a source’s compliance account by the allowance transfer deadline for a control period, the Administrator will deduct from the compliance account CAIR NOX allowances available under paragraph (a) of this section in order to determine whether the source meets the CAIR NOX emissions limitation for the control period, as follows:

(1) Until the amount of CAIR NOX allowances deducted equals the number
§ 97.155 Banking.

(a) CAIR NO\textsubscript{X} allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CAIR NO\textsubscript{X} allowance that is held in a compliance account or a general account will remain in such account unless and until the CAIR NO\textsubscript{X} allowance is deducted or transferred under §97.142, §97.154, §97.156, or subpart GG or II of this part.

§ 97.156 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR NO\textsubscript{X} Allowance Tracking System account. Within 10 business days of making such correction, the Administrator will notify the CAIR authorized account representative for the account.
§ 97.157 Closing of general accounts.
(a) The CAIR authorized account representative of a general account may submit to the Administrator a request to close the account, which shall include a correctly submitted allowance transfer under §§97.160 and 97.161 for any CAIR NO\textsubscript{X} allowances in the account to one or more other CAIR NO\textsubscript{X} Allowance Tracking System accounts.
(b) If a general account has no allowance transfers in or out of the account for a 12-month period or longer and does not contain any CAIR NO\textsubscript{X} allowances, the Administrator may notify the CAIR authorized account representative for the account that the account will be closed following 20 business days after the notice is sent. The account will be closed after the 20-day period unless, before the end of the 20-day period, the Administrator receives a correctly submitted transfer of CAIR NO\textsubscript{X} allowances into the account under §§97.160 and 97.161 or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

Subpart GG—CAIR NO\textsubscript{X} Allowance Transfers

§ 97.160 Submission of CAIR NO\textsubscript{X} allowance transfers.
A CAIR authorized account representative seeking recordation of a CAIR NO\textsubscript{X} allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the CAIR NO\textsubscript{X} allowance transfer shall include the following elements, in a format specified by the Administrator:
(a) The account numbers for both the transferor and transferee accounts;
(b) The serial number of each CAIR NO\textsubscript{X} allowance that is in the transferor account and is to be transferred; and
(c) The name and signature of the CAIR authorized account representative of the transferor account and the date signed.

§ 97.161 EPA recordation.
(a) Within 5 business days (except as provided in paragraph (b) of this section) of receiving a CAIR NO\textsubscript{X} allowance transfer, the Administrator will record a CAIR NO\textsubscript{X} allowance transfer by moving each CAIR NO\textsubscript{X} allowance from the transferor account to the transferee account as specified by the request, provided that:
(1) The transfer is correctly submitted under §97.160; and
(2) The transferor account includes each CAIR NO\textsubscript{X} allowance identified by serial number in the transfer.
(b) A CAIR NO\textsubscript{X} allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR NO\textsubscript{X} allowances allocated for any control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions under §97.154 for the control period immediately before such allowance transfer deadline.
(c) Where a CAIR NO\textsubscript{X} allowance transfer submitted for recordation fails to meet the requirements of paragraph (a) of this section, the Administrator will not record such transfer.

§ 97.162 Notification.
(a) Notification of recordation. Within 5 business days of recordation of a CAIR NO\textsubscript{X} allowance transfer under §97.161, the Administrator will notify the CAIR authorized account representatives of both the transferor and transferee accounts.
(b) Notification of non-recordation. Within 10 business days of receipt of a CAIR NO\textsubscript{X} allowance transfer that fails to meet the requirements of §97.161(a), the Administrator will notify the CAIR authorized account representatives of both accounts subject to the transfer of:
(1) A decision not to record the transfer, and
(2) The reasons for such non-recordation.
(c) Nothing in this section shall preclude the submission of a CAIR NO\textsubscript{X} allowance transfer for recordation following notification of non-recordation.

Subpart HH—Monitoring and Reporting

§ 97.170 General requirements.
The owners and operators, and to the extent applicable, the CAIR designated...
representative, of a CAIR NOₓ unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subpart H of part 75 of this chapter. For purposes of complying with such requirements, the definitions in §97.102 and in §72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CAIR NOₓ unit,” “CAIR designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively, as defined in §97.102. The owner or operator of a unit that is not a CAIR NOₓ unit but that is monitored under §75.72(b)(2)(ii) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CAIR NOₓ unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR NOₓ unit shall:

(1) Install all monitoring systems required under this subpart for monitoring NOₓ mass emissions and individual unit heat input (including all systems required to monitor NOₓ emission rate, NOₓ concentration, stack gas moisture content, stack gas flow rate, CO₂ or O₂ concentration, and fuel flow rate, as applicable, in accordance with §§75.71 and 75.72 of this chapter);

(2) Successfully complete all certification testing required under §97.171 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the following dates. The owner or operator shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the following dates.

(1) For the owner or operator of a CAIR NOₓ unit that commences commercial operation before July 1, 2007, by January 1, 2008.

(2) For the owner or operator of a CAIR NOₓ unit that commences commercial operation on or after July 1, 2007, by the later of the following dates:

(i) January 1, 2008; or

(ii) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation.

(3) For the owner or operator of a CAIR NOₓ unit for which construction of a new stack or flue or installation of add-on NOₓ emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (4), or (5) of this section, by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NOₓ emission controls.

(4) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, by the date specified in §97.184(b).

(5) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a CAIR NOₓ opt-in unit under subpart II of this part, by the date on which the CAIR NOₓ opt-in unit enters the CAIR NOₓ Annual Trading Program as provided in §97.184(g).

(c) Reporting data. The owner or operator of a CAIR NOₓ unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NOₓ concentration, NOₓ emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NOₓ mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter, section 2.4 of appendix D to part 75.
Environmental Protection Agency

§ 97.171 Initial certification and recertification procedures.

(a) The owner or operator of a CAIR NOx unit shall be exempt from the initial certification requirements of this section for a monitoring system under §97.170(a)(1) if the following conditions are met:

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendix B, appendix D, and appendix E to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under §97.170(a)(1) exempt from initial certification requirements under paragraph (a) of this section.

(c) If the Administrator has previously approved a petition under §75.17(a) or (b) of this chapter for apportioning the NOx emission rate measured in a common stack or a petition under §75.66 of this chapter for an alternative to a requirement in §75.12 or §75.17 of this chapter, the CAIR designated representative shall resubmit the petition to the Administrator under §97.175 to determine whether the approval applies under the CAIR NOx Annual Trading Program.

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CAIR NOx unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendices D and E to part 75 of this chapter) under §97.170(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that

of this chapter, or section 2.5 of appendix E to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CAIR NOx unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §97.175.

(2) No owner or operator of a CAIR NOx unit shall operate the unit so as to discharge, or allow to be discharged, NOx emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(3) No owner or operator of a CAIR NOx unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NOx mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CAIR NOx unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under §97.106 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the Administrator for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

(iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with §97.171(d)(3)(i).

(e) Long-term cold storage. The owner or operator of a CAIR NOx unit is subject to the applicable provisions of part 75 of this chapter concerning units in long-term cold storage.

§ 97.171 Initial certification and recertification procedures.
qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the procedures in paragraph (e) or (f) of this section respectively.

(1) **Requirements for initial certification.** The owner or operator shall ensure that each continuous monitoring system under §97.170(a)(1) (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §97.170(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) **Requirements for recertification.** Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §97.170(a)(1) that may significantly affect the ability of the system to accurately measure or record NO\textsubscript{X} mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system, and any excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter, under §97.170(a)(1) are subject to the recertification requirements in §75.20(g)(6) of this chapter.

(3) **Approval process for initial certification and recertification.** Paragraphs (d)(3)(i) through (iv) of this section apply to both initial certification and recertification of a continuous monitoring system under §97.170(a)(1). For recertifications, replace the words “certification” and “initial certification” with the word “recertification”, replace the word “certified” with the word “recertified”, and follow the procedures in §§75.20(b)(5) and (g)(7) of this chapter in lieu of the procedures in paragraph (d)(3)(v) of this section.

(i) **Notification of certification.** The CAIR designated representative shall submit to the appropriate EPA Regional Office and the Administrator written notice of the dates of certification testing, in accordance with §75.173.

(ii) **Certification application.** The CAIR designated representative shall submit to the Administrator a certification application for each monitoring system. A complete certification application shall include the information specified in §75.63 of this chapter. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) **Provisional certification date.** The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CAIR NO\textsubscript{X} Annual Trading Program for a period not to exceed 120 days after receipt by the Administrator of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the Administrator does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the Administrator.

(iv) **Certification application approval process.** The Administrator will issue a
written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CAIR NO\textsubscript{X} Annual Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the Administrator may issue a notice of disapproval under paragraph (d)(3)(iv)(C) of this section. The 120-day review period shall not begin before receipt of a complete certification application.

(C) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of part 75 of this chapter or if the certification application is incomplete and the requirement for disapproval under paragraph (d)(3)(iv)(B) of this section is met, then the Administrator will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the Administrator and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter). The owner or operator shall follow the procedures for loss of certification in paragraph (d)(3)(v) of this section for each monitoring system that is disapproved for initial certification.

(D) Audit decertification. The Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §97.172(b).

(v) Procedures for loss of certification. If the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under §75.20(a)(4)(iii), §75.20(g)(7), or §75.21(e) of this chapter and continuing until the applicable date and hour specified under §75.20(a)(5)(i) or (g)(7) of this chapter:

(I) For a disapproved NO\textsubscript{X} emission rate (i.e., NO\textsubscript{X}-diluent) system, the maximum potential NO\textsubscript{X} emission rate, as defined in §72.2 of this chapter.

(2) For a disapproved NO\textsubscript{X} pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of NO\textsubscript{X} and the maximum potential flow rate, as defined in sections 2.1.2.1 and 2.1.3.1 of appendix A to part 75 of this chapter.

(3) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO\textsubscript{2} concentration or the minimum potential O\textsubscript{2} concentration (as applicable), as defined in sections 2.1.3.1, 2.1.3.2, and 2.1.3.3 of appendix A to part 75 of this chapter.

(4) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in section 2.4.2.1 of appendix D to part 75 of this chapter.

(5) For a disapproved excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter, the fuel-specific maximum potential NO\textsubscript{X} emission rate, as defined in §72.2 of this chapter.

269
(B) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (d)(3)(i) and (ii) of this section.

(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(e) Initial certification and recertification procedures for units using the low mass emission excepted methodology under §75.19 of this chapter. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under §75.19 of this chapter shall meet the applicable certification and recertification requirements in §§75.19(a)(2) and 75.20(h) of this chapter. If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in §75.20(g) of this chapter.

(f) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator under subpart E of part 75 of this chapter shall comply with the applicable notification and application procedures of §75.20(f) of this chapter.

§97.172 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D or subpart H of, or appendix D or appendix E to, part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §97.171 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the Administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in §97.171 for each disapproved monitoring system.

§97.173 Notifications.

The CAIR designated representative for a CAIR NOX unit shall submit written notice to the Administrator in accordance with §75.61 of this chapter.

§97.174 Recordkeeping and reporting.

(a) General provisions. The CAIR designated representative shall comply with all recordkeeping and reporting requirements in this section, the applicable recordkeeping and reporting requirements under §75.73 of this chapter, and the requirements of §97.110(e)(1).

(b) Monitoring plans. The owner or operator of a CAIR NOX unit shall comply with requirements of §75.73(c) and (e) of this chapter and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, §§97.183 and 97.184(a).

(c) Certification applications. The CAIR designated representative shall
submit an application to the Administrator within 45 days after completing all initial certification or recertification tests required under §97.171, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

(1) The CAIR designated representative shall report the NOX mass emissions data and heat input data for the CAIR NOX unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

(i) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering January 1, 2008 through March 31, 2008;

(ii) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §97.170(b), unless that quarter is the third or fourth quarter of 2007, in which case reporting shall commence in the quarter covering January 1, 2008 through March 31, 2008;

(iii) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart II of this part, the calendar quarter corresponding to the date specified in §97.184(b); and

(iv) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a CAIR NOX opt-in unit under subpart II of this part, the calendar quarter corresponding to the date on which the CAIR NOX opt-in unit enters the CAIR NOX Annual Trading Program as provided in §97.184(g).

(2) The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.73(f) of this chapter.

(3) For CAIR NOX units that are also subject to an Acid Rain emissions limitation or the CAIR NOX Ozone Season Trading Program, CAIR SO2 Trading Program, or Hg Budget Trading Program, quarterly reports shall include the applicable data and information required by subparts F through I of part 76 of this chapter as applicable, in addition to the NOX mass emission data, heat input data, and other information required by this subpart.

(e) Compliance certification. The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications; and

(2) For a unit with add-on NOX emission controls and for all hours where NOX data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate NOX emissions.

§97.175 Petitions.

The CAIR designated representative of a CAIR NOX unit may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by the Administrator, in consultation with the permitting authority.

Subpart II—CAIR NOx Opt-In Units

§97.180 Applicability.

A CAIR NOX opt-in unit must be a unit that:

(a) Is located in a State that submits, and for which the Administrator approves, a State implementation plan...
§ 97.181 General.

(a) Except as otherwise provided in §§97.101 through 97.104, §§97.106 through 97.108, and subparts FF through HH of this part, a CAIR NOₓ opt-in unit shall be treated as a CAIR NOₓ unit for purposes of applying such sections and subparts of this part.

(b) Solely for purposes of applying, as provided in this subpart, the requirements of subpart HH of this part to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, such unit shall be treated as a CAIR NOₓ unit before issuance of a CAIR opt-in permit for such unit.

§ 97.182 CAIR designated representative.

Any CAIR NOₓ opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, located at the same source as one or more CAIR NOₓ units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR NOₓ units.

§ 97.183 Applying for CAIR opt-in permit.

(a) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR NOₓ opt-in unit in §97.180 may apply for an initial CAIR opt-in permit at any time, except as provided under §97.186(f) and (g), and, in order to apply, must submit the following:

1. A complete CAIR permit application under §97.122;
2. A certification, in a format specified by the permitting authority, that the unit:
   (i) Is not a CAIR NOₓ unit under §97.104 and is not covered by a retired unit exemption under §97.105 that is in effect;
   (ii) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;
   (iii) Vents all of its emissions to a stack; and
   (iv) Has documented heat input for more than 876 hours during the 6 months immediately preceding submission of the CAIR permit application under §97.122;
3. A monitoring plan in accordance with subpart HH of this part;
4. A complete certificate of representation under §97.113 consistent with §97.182, if no CAIR designated representative has been previously designated for the source that includes the unit; and
5. A statement, in a format specified by the permitting authority, whether the CAIR designated representative requests that the unit be allocated CAIR NOₓ allowances under §97.188(b) or §97.188(c) (subject to the conditions in §§97.184(h) and 97.186(g)), to the extent such allocation is provided in a State implementation plan revision submitted in accordance with §§51.123(p)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator. If allocation under §97.188(c) is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(b) Duty to reapply. (1) The CAIR designated representative of a CAIR NOₓ opt-in unit shall submit a complete CAIR permit application under §97.122 to renew the CAIR opt-in unit permit in accordance with the permitting authority’s regulations for title V operating permits, or the permitting
authority’s regulations for other federally enforceable permits if applicable, addressing permit renewal. (2) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR NO\(_X\) opt-in unit from the CAIR NO\(_X\) Annual Trading Program in accordance with §97.186 or the unit becomes a CAIR NO\(_X\) unit under §97.104, the CAIR NO\(_X\) opt-in unit shall remain subject to the requirements for a CAIR NO\(_X\) opt-in unit, even if the CAIR designated representative for the CAIR NO\(_X\) opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (b)(1) of this section.

§ 97.184 Opt-in process.

The permitting authority will issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under §97.183 is submitted in accordance with the following, to the extent provided in a State implementation plan revision submitted in accordance with §51.123(p)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

(a) Interim review of monitoring plan. The permitting authority and the Administrator will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under §97.183. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NO\(_X\) emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with subpart HH of this part. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.

(b) Monitoring and reporting. (1)(i) If the permitting authority and the Administrator determine that the monitoring plan is sufficient under paragraph (a) of this section, the owner or operator shall monitor and report the NO\(_X\) emissions rate and the heat input of the unit and all other applicable parameters, in accordance with subpart HH of this part, starting on the date of certification of the appropriate monitoring systems under subpart HH of this part and continuing until a CAIR opt-in permit is denied under §97.184(f) or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR NO\(_X\) Annual Trading Program in accordance with §97.186.

(ii) The monitoring and reporting under paragraph (b)(1)(i) of this section shall include the entire control period immediately before the date on which the unit enters the CAIR NO\(_X\) Annual Trading Program under §97.184(g), during which period monitoring system availability must not be less than 90 percent under subpart HH of this part and the unit must be in full compliance with any applicable State or Federal emissions or emissions-related requirements.

(2) To the extent the NO\(_X\) emissions rate and the heat input of the unit are monitored and reported in accordance with subpart HH of this part for one or more control periods, in addition to the control period under paragraph (b)(1)(ii) of this section, during which control periods monitoring system availability is not less than 90 percent under subpart HH of this part and the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements and which control periods begin not more than 3 years before the unit enters the CAIR NO\(_X\) Annual Trading Program under §97.184(g), such information shall be used as provided in paragraphs (c) and (d) of this section.

(c) Baseline heat input. The unit’s baseline heat input shall equal:

(1) If the unit’s NO\(_X\) emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s total heat input (in mmBtu) for the control period; or

(2) If the unit’s NO\(_X\) emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, the average of the amounts of the unit’s total heat input (in mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section.

(d) Baseline NO\(_X\) emission rate. The unit’s baseline NO\(_X\) emission rate shall equal:
§ 97.185

(1) If the unit’s NOx emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s NOx emissions rate (in lb/mmBtu) for the control period;

(2) If the unit’s NOx emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit does not have add-on NOx emission controls during any such control periods, the average of the amounts of the unit’s NOx emissions rate (in lb/mmBtu) for the control periods during which the unit has add-on NOx (b)(1) and (2) of this section, and the unit has add-on NOx emission controls.

(3) If the unit’s NOx emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit has add-on NOx emission controls during any such control periods, the average of the amounts of the unit’s NOx emissions rate (in lb/mmBtu) for the control periods during which the unit has add-on NOx emission controls.

(e) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline NOx emissions rate for the unit under paragraphs (c) and (d) of this section and if the permitting authority determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR NOx opt-in unit in §97.180 and meets the elements certified in §97.183(a)(2), the permitting authority will issue a CAIR opt-in permit. The permitting authority will provide a copy of the CAIR opt-in permit to the Administrator, who will then establish a compliance account for the source that includes the CAIR NOx opt-in unit unless the source already has a compliance account.

(f) Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (a) through (e) of this section, if at any time before issuance of a CAIR opt-in permit for the unit, the permitting authority determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR NOx opt-in unit in §97.180 or meets the elements certified in §97.183(a)(2), the permitting authority will issue a denial of a CAIR opt-in permit for the unit.

(g) Date of entry into CAIR NOx Annual Trading Program. A unit for which an initial CAIR opt-in permit is issued by the permitting authority shall become a CAIR NOx opt-in unit, and a CAIR NOx unit, as of the later of January 1, 2009 or January 1 of the first control period during which such CAIR opt-in permit is issued.

(h) Repowered CAIR NOx opt-in unit. (1) If CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit providing for, allocation to a CAIR NOx opt-in unit of CAIR NOx allowances under §97.188(c) and such unit is repowered after its date of entry into the CAIR NOx Annual Trading Program under paragraph (g) of this section, the repowered unit shall be treated as a CAIR NOx opt-in unit replacing the original CAIR NOx opt-in unit, as of the date of start-up of the repowered unit’s combustion chamber.

(2) Notwithstanding paragraphs (c) and (d) of this section, as of the date of start-up under paragraph (h)(1) of this section, the repowered unit shall be treated as a CAIR NOx opt-in unit replacing the original CAIR NOx opt-in unit, as of the later of January 1, 2009 or January 1 of the first control period during which such CAIR opt-in permit is issued.

40 CFR Ch. 1 (7-1-17 Edition)
(6) A statement that the unit may withdraw from the CAIR NO\textsubscript{X} Annual Trading Program only in accordance with §97.186; and

(7) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of §97.187.

(b) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under §97.102 and, upon recordation by the Administrator under subpart FF or GG of this part or this subpart, every allocation, transfer, or deduction of CAIR NO\textsubscript{X} allowances to or from the compliance account of the source that includes a CAIR NO\textsubscript{X} opt-in unit covered by the CAIR opt-in permit.

(c) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NO\textsubscript{X} opt-in unit is located and in a title V operating permit or other federally enforceable permit for the source.

§97.186 Withdrawal from CAIR NO\textsubscript{X} Annual Trading Program.

Except as provided under paragraph (g) of this section, a CAIR NO\textsubscript{X} opt-in unit may withdraw from the CAIR NO\textsubscript{X} Annual Trading Program, but only if the permitting authority issues a notification to the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit of the acceptance of the withdrawal of the CAIR NO\textsubscript{X} opt-in unit in accordance with paragraph (d) of this section.

(a) Requesting withdrawal. In order to withdraw a CAIR NO\textsubscript{X} opt-in unit from the CAIR NO\textsubscript{X} Annual Trading Program, the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit shall submit to the permitting authority a request to withdraw effective as of midnight of December 31 of a specified calendar year, which date must be at least 4 years after December 31 of the year of entry into the CAIR NO\textsubscript{X} Annual Trading Program under §97.188(g).

(b) Conditions for withdrawal. Before a CAIR NO\textsubscript{X} opt-in unit covered by a request under paragraph (a) of this section may withdraw from the CAIR NO\textsubscript{X} Annual Trading Program and the CAIR opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

(1) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR NO\textsubscript{X} opt-in unit must meet the requirement to hold CAIR NO\textsubscript{X} allowances under §97.106(c) and cannot have any excess emissions.

(2) After the requirement for withdrawal under paragraph (b)(1) of this section is met, the Administrator will deduct from the compliance account of the source that includes the CAIR NO\textsubscript{X} opt-in unit CAIR NO\textsubscript{X} allowances equal in amount to and allocated for the same or a prior control period as any CAIR NO\textsubscript{X} allowances allocated to the CAIR NO\textsubscript{X} opt-in unit under §97.188 for any control period for which the withdrawal is to be effective. If there are no remaining CAIR NO\textsubscript{X} units at the source, the Administrator will close the compliance account, and the owners and operators of the CAIR NO\textsubscript{X} opt-in unit may submit a CAIR NO\textsubscript{X} allowance transfer for any remaining CAIR NO\textsubscript{X} allowances to another CAIR NO\textsubscript{X} Allowance Tracking System in accordance with subpart GG of this part.

(c) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of CAIR NO\textsubscript{X} allowances required), the permitting authority will issue a notification to the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit of the acceptance of the withdrawal of the CAIR NO\textsubscript{X} opt-in unit as of midnight on December 31 of the calendar year for which the withdrawal was requested.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit that the CAIR NO\textsubscript{X} opt-in unit’s request to withdraw is denied. Such CAIR NO\textsubscript{X} opt-in unit shall continue to be a CAIR NO\textsubscript{X} opt-in unit.

(d) Permit amendment. After the permitting authority issues a notification under paragraph (c)(1) of this section that the requirements for withdrawal
have been met, the permitting authority will revise the CAIR permit covering the CAIR NO\textsubscript{X} opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (c)(1) of this section. The unit shall continue to be a CAIR NO\textsubscript{X} opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR NO\textsubscript{X} Annual Trading Program concerning any control periods for which the unit is a CAIR NO\textsubscript{X} opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(e) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the CAIR NO\textsubscript{X} opt-in unit’s request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(f) Ability to reapply to the CAIR NO\textsubscript{X} Annual Trading Program. Once a CAIR NO\textsubscript{X} opt-in unit withdraws from the CAIR NO\textsubscript{X} Annual Trading Program and its CAIR opt-in permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under §97.183 for such CAIR NO\textsubscript{X} opt-in unit before the date that is 4 years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit will be treated as an initial application for a CAIR opt-in permit under §97.184.

(g) Inability to withdraw. Notwithstanding paragraphs (a) through (f) of this section, a CAIR NO\textsubscript{X} opt-in unit shall not be eligible to withdraw from the CAIR NO\textsubscript{X} Annual Trading Program if the CAIR designated representative of the CAIR NO\textsubscript{X} opt-in unit requests, and the permitting authority issues a CAIR NO\textsubscript{X} opt-in permit providing for, allocation to the CAIR NO\textsubscript{X} opt-in unit of CAIR NO\textsubscript{X} allowances under §97.188(c).

§97.187 Change in regulatory status.

(a) Notification. If a CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104, then the CAIR designated representative shall notify in writing the permitting authority and the Administrator of such change in the CAIR NO\textsubscript{X} opt-in unit’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s actions. (1) If a CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104, the permitting authority will revise the CAIR NO\textsubscript{X} opt-in unit’s CAIR opt-in permit to meet the requirements of a CAIR permit under §97.123, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104.

(2)(i) The Administrator will deduct from the compliance account of the source that includes the CAIR NO\textsubscript{X} opt-in unit that becomes a CAIR NO\textsubscript{X} unit under §97.104. CAIR NO\textsubscript{X} allowances equal in amount to and allocated for the same or a prior control period as:

(A) Any CAIR NO\textsubscript{X} allowances allocated to the CAIR NO\textsubscript{X} opt-in unit under §97.188 for any control period after the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104; and

(B) If the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104 is not December 31, the CAIR NO\textsubscript{X} allowances allocated to the CAIR NO\textsubscript{X} opt-in unit under §97.188 for the control period that includes the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104 divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR NO\textsubscript{X} opt-in unit that becomes a CAIR NO\textsubscript{X} unit under §97.104 contains the CAIR NO\textsubscript{X} allowances necessary for completion of the deduction under paragraph (b)(2)(i) of this section.

(3)(i) For every control period after the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104, the CAIR NO\textsubscript{X} opt-in unit will be allocated CAIR NO\textsubscript{X} allowances under §97.142.

(ii) If the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under §97.104 is not December 31,
the following amount of CAIR NO\textsubscript{X} allowances will be allocated to the CAIR NO\textsubscript{X} opt-in unit (as a CAIR NO\textsubscript{X} unit) under \(97.142\) for the control period that includes the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under \$97.104:\n
(A) The amount of CAIR NO\textsubscript{X} allowances otherwise allocated to the CAIR NO\textsubscript{X} opt-in unit (as a CAIR NO\textsubscript{X} unit) under \$97.142 for the control period multiplied by:

(B) The ratio of the number of days, in the control period, starting with the date on which the CAIR NO\textsubscript{X} opt-in unit becomes a CAIR NO\textsubscript{X} unit under \$97.104, divided by the total number of days in the control period; and

(C) Rounded to the nearest whole allowance as appropriate.

\[65 \text{ FR 2727, Jan. 18, 2000, as amended at 71 FR 74795, Dec. 13, 2006}\]

\$97.188\quad \text{CAIR NO}_\text{X} \text{ allowance allocations to CAIR NO}_\text{X} \text{ opt-in units.}\]

(a) \textit{Timing requirements.} (1) When the CAIR opt-in permit is issued under \$97.184(e), the permitting authority will allocate CAIR NO\textsubscript{X} allowances to the CAIR NO\textsubscript{X} opt-in unit, and submit to the Administrator the allocation for the control period in which a CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program under \$97.184(g), in accordance with paragraph (b) or (c) of this section.

(2) By no later than October 31 of the control period after the control period in which a CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program under \$97.184(g) and October 31 of each year thereafter, the permitting authority will allocate CAIR NO\textsubscript{X} allowances to the CAIR NO\textsubscript{X} opt-in unit, and submit to the Administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR NO\textsubscript{X} opt-in unit, in accordance with paragraph (b) or (c) of this section.

(b) \textit{Calculation of allocation.} For each control period for which a CAIR NO\textsubscript{X} opt-in unit is to be allocated CAIR NO\textsubscript{X} allowances, the permitting authority will allocate in accordance with the following procedures, if provided in a State implementation plan revision submitted in accordance with \$51.123(p)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

(1) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} allowance allocation will be the lesser of:

(i) The CAIR NO\textsubscript{X} opt-in unit’s baseline heat input determined under \$97.184(c); or

(ii) The CAIR NO\textsubscript{X} opt-in unit’s heat input, as determined in accordance with subpart HH of this part, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NO\textsubscript{X} opt-in unit enters the CAIR NO\textsubscript{X} Annual Trading Program under \$97.184(g).

(2) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} allowance allocations will be the lesser of:

(i) The CAIR NO\textsubscript{X} opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under \$97.184(d) and multiplied by 70 percent; or

(ii) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} allowances are to be allocated.

(3) The permitting authority will allocate CAIR NO\textsubscript{X} allowances to the CAIR NO\textsubscript{X} opt-in unit in an amount equaling the heat input under paragraph (b)(1) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (b)(2) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(c) Notwithstanding paragraph (b) of this section and if the CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under \$97.183(a)(5)) providing for, allocation to a CAIR NO\textsubscript{X} opt-in unit of CAIR NO\textsubscript{X} allowances under this paragraph (subject to the conditions in §§97.184(h) and 97.186(g)), the permitting authority will allocate to the CAIR NO\textsubscript{X} opt-in unit as follows, if provided in a State implementation plan revision submitted in accordance with (51.123(p)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

(1) For each control period in 2009 through 2014 for which the CAIR NO\textsubscript{X}
opt-in unit is to be allocated CAIR NO\_X allowances.

(i) The heat input (in mmBtu) used for calculating CAIR NO\_X allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\_X emission rate (in lb/mmBtu) used for calculating CAIR NO\_X allowance allocations will be the lesser of:

(A) The CAIR NO\_X opt-in unit’s baseline NO\_X emissions rate (in lb/mmBtu) determined under §97.184(d); or

(B) The most stringent State or Federal NO\_X emissions limitation applicable to the CAIR NO\_X opt-in unit at any time during the control period in which the CAIR NO\_X opt-in unit enters the CAIR NO\_X Annual Trading Program under §97.184(g).

(iii) The permitting authority will allocate CAIR NO\_X allowances to the CAIR NO\_X opt-in unit in an amount equaling the heat input under paragraph (c)(1)(i) of this section, multiplied by the NO\_X emission rate under paragraph (c)(1)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(2) For each control period in 2015 and thereafter for which the CAIR NO\_X opt-in unit is to be allocated CAIR NO\_X allowances,

(i) The heat input (in mmBtu) used for calculating the CAIR NO\_X allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\_X emission rate (in lb/mmBtu) used for calculating the CAIR NO\_X allowance allocation will be the lesser of:

(A) 0.15 lb/mmBtu;

(B) The CAIR NO\_X opt-in unit’s baseline NO\_X emissions rate (in lb/mmBtu) determined under §97.184(d); or

(C) The most stringent State or Federal NO\_X emissions limitation applicable to the CAIR NO\_X opt-in unit at any time during the control period for which CAIR NO\_X allowances are to be allocated.

(iii) The permitting authority will allocate CAIR NO\_X allowances to the CAIR NO\_X opt-in unit in an amount equaling the heat input under paragraph (c)(2)(i) of this section, multiplied by the NO\_X emission rate under paragraph (c)(2)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(d) Recordation. If provided in a State implementation plan revision submitted in accordance with §51.123(p)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

(1) The Administrator will record, in the compliance account of the source that includes the CAIR NO\_X opt-in unit, the CAIR NO\_X allowances allocated by the permitting authority to the CAIR NO\_X opt-in unit under paragraph (a)(1) of this section.

(2) By December 1 of the control period in which a CAIR NO\_X opt-in unit enters the CAIR NO\_X Annual Trading Program under §97.184(g) and December 1 of each year thereafter, the Administrator will record, in the compliance account of the source that includes the CAIR NO\_X opt-in unit, the CAIR NO\_X allowances allocated by the permitting authority to the CAIR NO\_X opt-in unit under paragraph (a)(2) of this section.

APPENDIX A TO SUBPART II OF PART 97—
STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING CAIR NO\_X OPT-IN UNITS

1. The following States have State Implementation Plan revisions under §51.123(p)(3) of this chapter approved by the Administrator and establishing procedures providing for CAIR NO\_X opt-in units under subpart II of this part and allocation of CAIR NO\_X allowances to such units under §97.188(b):

   Indiana
   Michigan
   North Carolina
   Ohio
   South Carolina
   Tennessee

2. The following States have State Implementation Plan revisions under §51.128(p)(3) of this chapter approved by the Administrator and establishing procedures providing for CAIR NO\_X opt-in units under subpart II of this part and allocation of CAIR NO\_X allowances to such units under §97.188(c):

   Indiana
   Michigan
   Ohio
   North Carolina
   South Carolina
Subpart AAA—CAIR SO\textsubscript{2} Trading Program General Provisions

§ 97.201 Purpose.

This subpart and subparts BBB through III set forth the general provisions and the designated representative, permitting, allowance, monitoring, and opt-in provisions for the Federal Clean Air Interstate Rule (CAIR) SO\textsubscript{2} Trading Program, under section 110 of the Clean Air Act and §52.36 of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.

§ 97.202 Definitions.

The terms used in this subpart and subparts BBB through III shall have the meanings set forth in this section as follows:

Account number means the identification number given by the Administrator to each CAIR SO\textsubscript{2} Allowance Tracking System account.

Acid Rain emissions limitation means a limitation on emissions of sulfur dioxide or nitrogen oxides under the Acid Rain Program.

Acid Rain Program means a multi-state sulfur dioxide and nitrogen oxides air pollution control and emission reduction program established by the Administrator under title IV of the CAA and parts 72 through 78 of this chapter.

Administrator means the Administrator of the United States Environmental Protection Agency or the Administrator’s duly authorized representative.

Allocate or allocation means, with regard to CAIR SO\textsubscript{2} allowances issued under the Acid Rain Program, the determination by the Administrator of the amount of such CAIR SO\textsubscript{2} allowances to be initially credited to a CAIR SO\textsubscript{2} unit or other entity and, with respect to such CAIR SO\textsubscript{2} allowances issued under §97.288 or provisions of a State implementation plan that are approved under §51.129(c) or (2) or (r) of this chapter, the determination by a permitting authority of the amount of such CAIR SO\textsubscript{2} allowances to be initially credited to a CAIR SO\textsubscript{2} unit or other entity.

Allowance transfer deadline means, for a control period, midnight of March 1 (if it is a business day), or midnight of the first business day thereafter (if March 1 is not a business day), immediately following the control period and is the deadline by which a CAIR SO\textsubscript{2} allowance transfer must be submitted for recordation in a CAIR SO\textsubscript{2} source’s compliance account and is used to meet the source’s CAIR SO\textsubscript{2} emissions limitation for such control period in accordance with §97.254.

Alternate CAIR designated representative means, for a CAIR SO\textsubscript{2} source and each CAIR SO\textsubscript{2} unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBB and III of this part, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR SO\textsubscript{2} Trading Program. If the CAIR SO\textsubscript{2} source is also a CAIR NO\textsubscript{X} source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO\textsubscript{X} Annual Trading Program. If the CAIR SO\textsubscript{2} source is also a CAIR NO\textsubscript{X} Ozone Season source, then this natural person shall be the same person as the alternate CAIR designated representative under the Acid Rain Program. If the CAIR SO\textsubscript{2} source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg Budget Trading Program.

Automated data acquisition and handling system or DAHS means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under subpart HHH of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors,
diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart HHH of this part.

Biomass means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is;

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

(ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

CAIR authorized account representative means, with regard to a general account, a responsible natural person who is authorized, in accordance with subparts BBB, FFF, and III of this part, to transfer and otherwise dispose of CAIR SO₂ allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.

CAIR designated representative means, for a CAIR SO₂ source and each CAIR SO₂ unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBB and III of this part, to represent and legally bind each owner and operator in matters pertaining to the CAIR SO₂ Trading Program. If the CAIR SO₂ source is also a CAIR NOₓ source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NOₓ Annual Trading Program. If the CAIR SO₂ source is also a CAIR NOₓ Ozone Season source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NOₓ Ozone Season Trading Program. If the CAIR SO₂ source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the designated representative under the Hg Budget Trading Program.

CAIR NOₓ Annual Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AA through II of this part and §51.123(p) and 52.35 of this chapter or approved and administered by the Administrator in accordance with subparts AA through II of part 96 of this chapter and §51.123(aa)(1) or (2) of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

CAIR NOₓ Ozone Season source means a source that is subject to the CAIR NOₓ Ozone Season Trading Program.

CAIR NOₓ Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AAAA through IIII of this part and §51.123(ee) and 52.35 of this chapter or approved and administered by the Administrator in accordance with subparts AAAA through IIII of part 96 and §51.123(aa)(1) or (2) and (bb)(1)), (bb)(2), or (dd) of this chapter, as a means of mitigating interstate transport of ozone and nitrogen oxides.

CAIR NOₓ source means a source that is subject to the CAIR NOₓ Annual Trading Program.
CAIR permit means the legally binding and federally enforceable written document, or portion of such document, issued by the permitting authority under subpart CCC of this part, including any permit revisions, specifying the CAIR SO₂ Trading Program requirements applicable to a CAIR SO₂ source, to each CAIR SO₂ unit at the source, and to the owners and operators and the CAIR designated representative of the source and each such unit.

CAIR SO₂ allowance means a limited authorization issued by the Administrator under the Acid Rain Program, by a permitting authority under §97.288, or by a permitting authority under provisions of a State implementation plan that are approved under §51.124(o)(1) or (2) or (r) of this chapter, to emit sulfur dioxide during the control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR SO₂ Trading Program as follows:

(1) For one CAIR SO₂ allowance allocated for a control period in a year before 2010, one ton of sulfur dioxide, except as provided in §97.254(b);
(2) For one CAIR SO₂ allowance allocated for a control period in 2010 through 2014, 0.50 ton of sulfur dioxide, except as provided in §97.254(b); and
(3) For one CAIR SO₂ allowance allocated for a control period in 2015 or later, 0.35 ton of sulfur dioxide, except as provided in §97.254(b).

(4) An authorization to emit sulfur dioxide that is not issued under the Acid Rain Program, §97.288, or provisions of a State implementation plan that are approved under §51.124(o)(1) or (2) or (r) of this chapter shall not be a CAIR SO₂ allowance.

CAIR SO₂ allowance deduction or deduct CAIR SO₂ allowances means the permanent withdrawal of CAIR SO₂ allowances by the Administrator from a compliance account, e.g., in order to account for a specified number of tons of total sulfur dioxide emissions from all CAIR SO₂ units at a CAIR SO₂ source for a control period, determined in accordance with subpart HHH of this part, or to account for excess emissions.

CAIR SO₂ Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of CAIR SO₂ allowances under the CAIR SO₂ Trading Program. This is the same system as the Allowance Tracking System under §72.2 of this chapter by which the Administrator records allocations, deduction, and transfers of Acid Rain SO₂ allowances under the Acid Rain Program.

CAIR SO₂ Allowance Tracking System account means an account in the CAIR SO₂ Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR SO₂ allowances. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.

CAIR SO₂ allowances held or hold CAIR SO₂ allowances means the CAIR SO₂ allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts FFF, GGG, and III of this part or part 73 of this chapter, in a CAIR SO₂ Allowance Tracking System account.

CAIR SO₂ emissions limitation means, for a CAIR SO₂ source, the tonnage equivalent, in SO₂ emissions in a control period, of the CAIR SO₂ allowances available for deduction for the source under §97.254(a) and (b) for the control period.

CAIR SO₂ source means a source that includes one or more CAIR SO₂ units.

CAIR SO₂ Trading Program means a multi-state sulfur dioxide air pollution control and emission reduction program established by the Administrator in accordance with subparts AAA through III of this part and §§51.124(r) and 52.36 of this chapter or approved and administered by the Administrator in accordance with subparts AAA through III of part 96 of this chapter and §51.124(o) (1) or (2) of this chapter, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.

CAIR SO₂ unit means a unit that is subject to the CAIR SO₂ Trading Program under §97.204 and, except for purposes of §97.205, a CAIR SO₂ opt-in unit under subpart III of this part.

Certifying official means:
§ 97.202 282

(1) For a corporation, a president, secretary, treasurer, or vice-president or the corporation in charge of a principal business function or any other person who performs similar policy or decision-making functions for the corporation;

(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or

(3) For a local government entity or State, Federal, or other public agency, a principal executive officer or ranking elected official.

Clean Air Act or CAA means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Coal-fired means combusting any amount of coal or coal-derived fuel, alone, or in combination with any amount of any other fuel.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:

(1) Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and

(2) Producing during the 12-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity—

(i) For a topping-cycle cogeneration unit,

(A) Useful thermal energy not less than 5 percent of total energy output; and

(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle cogeneration unit, useful power not less than 45 percent of total energy input;

(3) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit’s total energy input from all fuel except biomass if the unit is a boiler.

Combustion turbine means:

(1) An enclosed device comprising a compressor, a combustor, and a turbine in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

(2) If the enclosed device under paragraph (1) of this definition is combined cycle, any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.205 and §97.284(h).

(i) For a unit that is a CAIR SO₂ unit under §97.204 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CAIR SO₂ unit under §97.204 on the later of November 15, 1990 or the date the unit commences commercial operation and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §97.205, for a unit that is not a CAIR SO₂ unit under §97.204 on the later of November 15, 1990 or the date the unit commences commercial operation as...
defined in paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CAIR SO₂ unit under §97.204.

(i) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in paragraph (2) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Commence operation means:

(1) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit’s combustion chamber, except as provided in §97.284(h).

(2) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the date of commencement of operation of the unit, which shall continue to be treated as the same unit.

(3) For a unit that is replaced by a unit at the same source (e.g., repowered) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the replaced unit’s date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1), (2), or (3) of this definition as appropriate, except as provided in §97.284(h).

Common stack means a single flue through which emissions from 2 or more units are exhausted.

Compliance account means a CAIR SO₂ Allowance Tracking System account, established by the Administrator for a CAIR SO₂ source subject to an Acid Rain emissions limitations under §73.31(a) or (b) of this chapter or for any other CAIR SO₂ source under subpart FFF or III of this part, in which any CAIR SO₂ allowance allocations for the CAIR SO₂ units at the source are initially recorded and in which are held any CAIR SO₂ allowances available for use for a control period in order to meet the source’s CAIR SO₂ emissions limitation in accordance with §97.254.

Continuous emission monitoring system or CEMS means the equipment required under subpart HHH of this part to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes (using an automated data acquisition and handling system (DAHS)), a permanent record of sulfur dioxide emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with part 75 of this chapter. The following systems are the principal types of continuous emission monitoring systems required under subpart HHH of this part:

(1) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

(2) A sulfur dioxide monitoring system, consisting of a SO₂ pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of SO₂ emissions, in parts per million (ppm);

(3) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H₂O;

(4) A carbon dioxide monitoring system, consisting of a CO₂ pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO₂ concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous
record of CO₂ emissions, in percent CO₂; and

(5) An oxygen monitoring system, consisting of an O₂ concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O₂ in percent O₂.

Control period means the period beginning January 1 of a calendar year, except as provided in §97.206(c)(2), and ending on December 31 of the same year, inclusive.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the CAIR designated representative and as determined by the Administrator in accordance with subpart HHH of this part.

Excess emissions means any ton, or portion of a ton, of sulfur dioxide emitted by the CAIR SO₂ units at a CAIR SO₂ source during a control period that exceeds the CAIR SO₂ emissions limitation for the source, provided that any portion of a ton of excess emissions shall be treated as one ton of excess emissions.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in any calendar year.

General account means a CAIR SO₂ Allowance Tracking System account, established under subpart FFF of this part, that is not a compliance account.

Generator means a device that produces electricity.

Heat input means, with regard to a specified period of time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the CAIR designated representative and determined by the Administrator in accordance with subpart HHH of this part and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Hg Budget Trading Program means a multi-state Hg air pollution control and emission reduction program approved and administered by the Administrator in accordance with subpart HHHH of part 60 of this chapter and §60.24(h)(6), or established by the Administrator under section 111 of the Clean Air Act, as a means of reducing national Hg emissions.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit's total costs, pursuant to a contract:

(1) For the life of the unit;
(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or
(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input means the maximum amount of fuel per hour (in Btu/hr) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

Monitoring system means any monitoring system that meets the requirements of subpart HHH of this part, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Most stringent State or Federal SO₂ emissions limitation means, with regard
to a unit, the lowest SO\textsubscript{2} emissions limitation (in terms of lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

**Nameplate capacity** means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.

**Operator** means any person who operates, controls, or supervises a CAIR SO\textsubscript{2} unit or a CAIR SO\textsubscript{2} source and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

**Owner** means any of the following persons:

1. With regard to a CAIR SO\textsubscript{2} source or a CAIR SO\textsubscript{2} unit at a source, respectively:
   1. Any holder of any portion of the legal or equitable title in a CAIR SO\textsubscript{2} unit at the source or the CAIR SO\textsubscript{2} unit;
   2. Any holder of a leasehold interest in a CAIR SO\textsubscript{2} unit at the source or the CAIR SO\textsubscript{2} unit; or
   3. Any purchaser of power from a CAIR SO\textsubscript{2} unit at the source or the CAIR SO\textsubscript{2} unit under a life-of-the-unit, firm power contractual arrangement; provided that, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CAIR SO\textsubscript{2} unit; or
2. With regard to any general account, any person who has an ownership interest with respect to the CAIR SO\textsubscript{2} allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to represent the person’s ownership interest with respect to CAIR SO\textsubscript{2} allowances.

**Permitting authority** means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the CAIR SO\textsubscript{2} Trading Program or, if no such agency has been so authorized, the Administrator.

**Potential electrical output capacity** means 33 percent of a unit’s maximum design heat input, divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

**Receive or receipt of** means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

**Recordation, record, or recorded** means, with regard to CAIR SO\textsubscript{2} allowances, the movement of CAIR SO\textsubscript{2} allowances by the Administrator into or between CAIR SO\textsubscript{2} Allowance Tracking System accounts, for purposes of allocation, transfer, or deduction.

**Reference method** means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

**Replacement, replace, or replaced** means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shutdown unit (the replaced unit).

**Repowered** means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:
§ 97.202

(1) Atmospheric or pressurized fluidized bed combustion;
(2) Integrated gasification combined cycle;
(3) Magnetohydrodynamics;
(4) Direct and indirect coal-fired turbines;
(5) Integrated gasification fuel cells;
or
(6) As determined by the Administrator in consultation with the Secretary of Energy, a derivative of one or more of the technologies under paragraphs (1) through (5) of this definition and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.

Sequential use of energy means:
(1) For a topping-cycle cogeneration unit, the use of reject heat from electricity production in a useful thermal energy application or process; or
(2) For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.

Serial number means, for a CAIR SO\textsubscript{2} allowance, the unique identification number assigned to each CAIR SO\textsubscript{2} allowance by the Administrator.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of section 502(c) of the Clean Air Act, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the States or the District of Columbia that is subject to the CAIR SO\textsubscript{2} Trading Program pursuant to §52.35 of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

(1) In person;
(2) By United States Postal Service; or
(3) By other means of dispatch or transmission and delivery. Compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

Ton means 2,000 pounds. For the purpose of determining compliance with the CAIR SO\textsubscript{2} emissions limitation, total tons of sulfur dioxide emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with subpart HHH of this part, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

Topping-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[
\text{LHV} = \text{HHV} - 10.55(W + 9H)
\]

Where:
\(\text{LHV}\) = lower heating value of fuel in Btu/lb,
\(\text{HHV}\) = higher heating value of fuel in Btu/lb,
\(W\) = Weight % of moisture in fuel, and
\(H\) = Weight % of hydrogen in fuel.

Total energy output means, with regard to a cogeneration unit, the sum of
useful power and useful thermal energy produced by the cogeneration unit.

Unit means a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device. Unit operating day means a calendar day in which a unit combusts any fuel.

Unit operating hour or hour of unit operation means an hour in which a unit combusts any fuel.

Useful power means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Useful thermal energy means, with regard to a cogeneration unit, thermal energy that is:

(1) Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;

(2) Used in a heating application (e.g., space heating or domestic hot water heating); or

(3) Used in a space cooling application (i.e., thermal energy used by an absorption chiller).

Utility power distribution system means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

§ 97.204 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State shall be CAIR SO₄ units, and any source that includes one or more such units shall be a CAIR SO₂ source, subject to the requirements of this subpart and subparts BBB through HHH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CAIR SO₂ unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR SO₂ unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) The units in a State that meet the requirements set forth in paragraph (b)(1)(i), (b)(2)(i), or (b)(2)(ii) of this section shall not be CAIR SO₂ units:

(1)(i) Any unit that is a CAIR SO₂ unit under paragraph (a)(1) or (2) of this section:

(A) Qualifying as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit; and

(B) Not serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe supplying in any calendar year more than one-third of the unit’s potential electric output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

NOₓ—nitrogen oxides.
O₂—oxygen.
ppm—parts per million.
scfh—standard cubic feet per hour.
SO₂—sulfur dioxide.
yr—year.

§ 97.204 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State shall be CAIR SO₂ units, and any source that includes one or more such units shall be a CAIR SO₂ source, subject to the requirements of this subpart and subparts BBB through HHH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.
(i) If a unit qualifies as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and meets the requirements of paragraphs (b)(1)(i) of this section for at least one calendar year, but subsequently no longer meets all such requirements, the unit shall become a CAIR SO₂ unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i)(B) of this section.

(ii) Any unit that is a CAIR SO₂ unit under paragraph (a)(1) or (2) of this section commencing operation before January 1, 1985:
   (A) Qualifying as a solid waste incineration unit; and
   (B) With an average annual fuel consumption of non-fossil fuel for 1985–1987 exceeding 80 percent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any 3 consecutive calendar years after 1990 exceeding 80 percent (on a Btu basis).

(iii) If a unit qualifies as a solid waste incineration unit and meets the requirements of paragraph (b)(2)(i) or (ii) of this section for at least 3 consecutive calendar years, but subsequently no longer meets all such requirements, the unit shall become a CAIR SO₂ unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 1990 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more.

(c) A certifying official of an owner or operator of any unit may petition the Administrator at any time for a determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CAIR SO₂ Trading Program to the unit.

(1) Petition content. The petition shall be in writing and include the identification of the unit and the relevant facts about the unit. The petition and any other documents provided to the Administrator in connection with the petition shall include the following certification statement, signed by the certifying official: “I am authorized to make this submission on behalf of the owners and operators of the unit for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all of its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(2) Submission. The petition and any other documents provided in connection with the petition shall be submitted to the Director of the Clean Air Markets Division (or its successor), U.S. Environmental Protection Agency, who will act on the petition as the Administrator's duly authorized representative.

(3) Response. The Administrator will issue a written response to the petition and may request supplemental information relevant to such petition. The Administrator’s determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CAIR SO₂ Trading Program to the unit shall be binding on the permitting authority unless the petition or other information or documents provided in connection with the petition are found to have contained significant, relevant errors or omissions.
§ 97.205 Retired unit exemption.

(a)(1) Any CAIR SO\textsubscript{2} unit that is permanently retired and is not a CAIR SO\textsubscript{2} opt-in unit under subpart III of this part shall be exempt from the CAIR SO\textsubscript{2} Trading Program, except for the provisions of this section, §§ 97.202, 97.203, 97.204, 97.206(c)(4) through (7), 97.207, 97.208, and subparts BBB, FFF, and GGG of this part.

(2) The exemption under paragraph (a)(1) of this section shall become effective the day on which the CAIR SO\textsubscript{2} unit is permanently retired. Within 30 days of the unit’s permanent retirement, the CAIR designated representative shall submit a statement to the permitting authority otherwise responsible for administering any CAIR permit for the unit and shall submit a copy of the statement to the Administrator. The statement shall state, in a format prescribed by the permitting authority, that the unit was permanently retired on a specific date and will comply with the requirements of paragraph (b) of this section.

(3) After receipt of the statement under paragraph (a)(2) of this section, the permitting authority will amend any permit under subpart CCC of this part covering the source at which the unit is located to add the provisions and requirements of the exemption under paragraphs (a)(1) and (b) of this section.

(b) Special provisions.

(1) A unit exempt under paragraph (a) of this section shall not emit any sulfur dioxide, starting on the date that the exemption takes effect.

(2) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (a) of this section shall retain, at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(3) The owners and operators and, to the extent applicable, the CAIR designated representative of a unit exempt under paragraph (a) of this section shall comply with the requirements of the CAIR SO\textsubscript{2} Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(4) A unit exempt under paragraph (a) of this section and located at a source that is required, or but for this exemption would be required, to have a title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete CAIR permit application under §97.222 for the unit not less than 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2010 or the date on which the unit resumes operation.

(5) On the earlier of the following dates, a unit exempt under paragraph (a) of this section shall lose its exemption:

(i) The date on which the CAIR designated representative submits a CAIR permit application for the unit under paragraph (b)(4) of this section;

(ii) The date on which the CAIR designated representative is required under paragraph (b)(4) of this section to submit a CAIR permit application for the unit; or

(iii) The date on which the unit resumes operation, if the CAIR designated representative is not required to submit a CAIR permit application for the unit.

(b) For the purpose of applying monitoring, reporting, and recordkeeping requirements under subpart HHH of this part, a unit that loses its exemption under paragraph (a) of this section shall be treated as a unit that commences commercial operation on the first date on which the unit resumes operation.

§ 97.206 Standard requirements.

(a) Permit requirements.

(1) The CAIR designated representative of each CAIR SO\textsubscript{2} source required to have a title V operating permit and each CAIR SO\textsubscript{2} unit required to have a title V operating permit at the source shall:

(i) Submit to the permitting authority a complete CAIR permit application under §97.222 in accordance with the deadlines specified in §97.221; and

(2) The CAIR designated representative of each CAIR SO\textsubscript{2} source required to have a title V operating permit and each CAIR SO\textsubscript{2} unit required to have a title V operating permit at the source shall:
(i) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.

(2) The owners and operators of each CAIR SO₂ source required to have a title V operating permit and each CAIR SO₂ unit required to have a title V operating permit at the source shall have a CAIR permit issued by the permitting authority under subpart CCC of this part for such source and operate the source and the unit in compliance with such CAIR permit.

(3) Except as provided in subpart III of this part, the owners and operators of a CAIR SO₂ source that is not otherwise required to have a title V operating permit and each CAIR SO₂ unit that is not otherwise required to have a title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under subpart CCC of this part for such CAIR SO₂ source and such CAIR SO₂ unit.

(b) Monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the CAIR designated representative, of each CAIR SO₂ source and each CAIR SO₂ unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of subpart HHH of this part.

(2) The emissions measurements recorded and reported in accordance with subpart HHH of this part shall be used to determine compliance by each CAIR SO₂ source with the CAIR SO₂ emissions limitation under paragraph (c) of this section.

(c) Sulfur dioxide emission requirements. (1) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR SO₂ source and each CAIR SO₂ unit at the source shall hold, in the source’s compliance account, a tonnage equivalent in CAIR SO₂ allowances available for compliance deductions for the control period, as determined in accordance with §97.254(a) and (b), not less than the tons of total sulfur dioxide emissions for the control period from all CAIR SO₂ units at the source, as determined in accordance with subpart HHH of this part.

(2) A CAIR SO₂ unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of January 1, 2010 or the deadline for meeting the unit’s monitor certification requirements under §97.276(b)(1),(2), or (3) and for each control period thereafter.

(3) A CAIR SO₂ allowance shall not be deducted, for compliance with the requirements under paragraph (c)(1) of this section, for a control period in a calendar year before the year for which the CAIR SO₂ allowance was allocated.

(4) CAIR SO₂ allowances shall be held in, deducted from, or transferred into or among CAIR SO₂ Allowance Tracking System accounts in accordance with subparts FFF, GGG, and III of this part.

(5) A CAIR SO₂ allowance is a limited authorization to emit sulfur dioxide in accordance with the CAIR SO₂ Trading Program. No provision of the CAIR SO₂ Trading Program, the CAIR permit application, the CAIR permit, or an exemption under §97.203 and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization.

(6) A CAIR SO₂ allowance does not constitute a property right.

(7) Upon recordation by the Administrator under subpart FFF, GGG, or III of this part, every allocation, transfer, or deduction of a CAIR SO₂ allowance to or from a CAIR SO₂ source’s compliance account is incorporated automatically in any CAIR permit of the source.

(d) Excess emissions requirements. If a CAIR SO₂ source emits sulfur dioxide during any control period in excess of the CAIR SO₂ emissions limitation, then:

(1) The owners and operators of the source and each CAIR SO₂ unit at the source shall surrender the CAIR SO₂ allowances required for deduction under §97.254(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable State law; and

(2) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of
this subpart, the Clean Air Act, and applicable State law.

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the CAIR SO\textsubscript{2} source and each CAIR SO\textsubscript{2} unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The certificate of representation under §97.213 for the CAIR designated representative for the source and each CAIR SO\textsubscript{2} unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation under §97.213 changing the CAIR designated representative.

(ii) All emissions monitoring information, in accordance with subpart HHH of this part, provided that to the extent that subpart HHH of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the CAIR SO\textsubscript{2} Trading Program.

(iv) Copies of all documents used to complete a CAIR permit application and any other submission under the CAIR SO\textsubscript{2} Trading Program or to demonstrate compliance with the requirements of the CAIR SO\textsubscript{2} Trading Program.

(2) The CAIR designated representative of a CAIR SO\textsubscript{2} source and each CAIR SO\textsubscript{2} unit at the source shall submit the reports required under the CAIR SO\textsubscript{2} Trading Program, including those under subpart HHH of this part.

(f) Liability. (1) Each CAIR SO\textsubscript{2} source and each CAIR SO\textsubscript{2} unit shall meet the requirements of the CAIR SO\textsubscript{2} Trading Program.

(2) Any provision of the CAIR SO\textsubscript{2} Trading Program that applies to a CAIR SO\textsubscript{2} source or the CAIR designated representative of a CAIR SO\textsubscript{2} source shall also apply to the owners and operators of such source and of the CAIR SO\textsubscript{2} units at the source.

(3) Any provision of the CAIR SO\textsubscript{2} Trading Program that applies to a CAIR SO\textsubscript{2} unit or the CAIR designated representative of a CAIR SO\textsubscript{2} unit shall also apply to the owners and operators of such unit.

(g) Effect on other authorities. No provision of the CAIR SO\textsubscript{2} Trading Program, a CAIR permit application, a CAIR permit, or an exemption under §97.205 shall be construed as exempting or excluding the owners and operators, and the CAIR designated representative, of a CAIR SO\textsubscript{2} source or CAIR SO\textsubscript{2} unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the Clean Air Act.

§97.207 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CAIR SO\textsubscript{2} Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CAIR SO\textsubscript{2} Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CAIR SO\textsubscript{2} Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

§97.208 Appeal procedures.

The appeal procedures for decisions of the Administrator under the CAIR SO\textsubscript{2} Trading Program are set forth in part 78 of this chapter.

Subpart BBB—CAIR Designated Representative for CAIR SO\textsubscript{2} Sources

§97.210 Authorization and responsibilities of CAIR designated representative.

(a) Except as provided under §97.211, each CAIR SO\textsubscript{2} source, including all CAIR SO\textsubscript{2} units at the source, shall have one and only one CAIR designated
§ 97.211 Alternate CAIR designated representative.

(a) A certificate of representation under §97.213 may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.

(b) Upon receipt by the Administrator of a complete certificate of representation under §97.213 for a CAIR designated representative, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.

(c) Except in this section and §§97.202, 97.210(a) and (d), 97.213, 97.215, 97.216, and 97.282, whenever the term “CAIR designated representative” is used in subparts AAA through III of this part, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

§ 97.212 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

(a) Changing CAIR designated representative. The CAIR designated representative may be changed at any
time upon receipt by the Administrator of a superseding complete certificate of representation under §97.213. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR SO$_2$ source and the CAIR SO$_2$ units at the source.

(b) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.213. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR SO$_2$ source and the CAIR SO$_2$ units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CAIR SO$_2$ source or a CAIR SO$_2$ unit is not included in the list of owners and operators in the certificate of representation under §97.213, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the Administrator, or a court, as if the owner or operator were included in such list.

(2) Within 30 days following any change in the owners and operators of a CAIR SO$_2$ source or a CAIR SO$_2$ unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under §97.213 amending the list of owners and operators to include the change.

§97.213 Certificate of representation.

(a) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the CAIR SO$_2$ source, and each CAIR SO$_2$ unit at the source, for which the certificate of representation is submitted, including identification and nameplate capacity of each generator served by each such unit.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative.

(3) A list of the owners and operators of the CAIR SO$_2$ source and of each CAIR SO$_2$ unit at the source.

(4) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative—

(i) “I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR SO$_2$ unit at the source.”

(ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO$_2$ Trading Program on behalf of the owners and operators of the source and of each CAIR SO$_2$ unit at the source.”

(iii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO$_2$ Trading Program on behalf of the owners and operators of the source and each CAIR SO$_2$ unit at the source.”

(iv) “Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR SO$_2$ unit, or where a utility or industrial customer purchases power from a CAIR...
SO\textsubscript{2} unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘CAIR designated representative’ or ‘alternate CAIR designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR SO\textsubscript{2} unit at the source; and CAIR SO\textsubscript{2} allowances and proceeds of transactions involving CAIR SO\textsubscript{2} allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR SO\textsubscript{2} allowances by contract, CAIR SO\textsubscript{2} allowances and proceeds of transactions involving CAIR SO\textsubscript{2} allowances will be deemed to be held or distributed in accordance with the contract.’’

(5) The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

(b) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator will be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

§ 97.215 Delegation by CAIR designated representative and alternate CAIR designated representative.

(a) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(b) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(c) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and
(4) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:

(i) "I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.215(d) shall be deemed to be an electronic submission by me."

(ii) "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.215(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.215 is terminated."

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph (c)(4)(i) of this section and made in accordance with a notice of delegation effective under paragraph (d) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

Subpart CCC—Permits

§ 97.220 General CAIR SO2 Trading Program permit requirements.

(a) For each CAIR SO2 source required to have a title V operating permit or required, under subpart III of this part, to have a title V operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the permitting authority for the title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the title V permit or other federally enforceable permit as applicable shall be administered in accordance with the permitting authority’s title V operating permits regulations promulgated under part 70 or 71 of this chapter or the permitting authority’s regulations for other federally enforceable permits as applicable, except as provided otherwise by §97.205, this subpart, and subpart III of this part.

(b) Each CAIR permit shall contain, with regard to the CAIR SO2 source and the CAIR SO2 units at the source covered by the CAIR permit, all applicable CAIR SO2 Trading Program, CAIR NOX Annual Trading Program, and CAIR NOX Ozone Season Trading Program requirements and shall be a complete and separable portion of the title V operating permit or other federally enforceable permit under paragraph (a) of this section.

§ 97.221 Submission of CAIR permit applications.

(a) Duty to apply. The CAIR designated representative of any CAIR SO2 source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §97.222 for the source covering each CAIR SO2 unit at the source at least 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2010 or the date on which the CAIR SO2 unit commences commercial operation, except as provided in §97.283(a).

(b) Duty to reapply. For a CAIR SO2 source required to have a title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under §97.222 for the source covering each CAIR SO2 unit at the source to renew the CAIR permit in accordance with the permitting authority’s title V operating permits regulations addressing permit renewal, except as provided in §97.283(b).
§ 97.222 Information requirements for CAIR permit applications.

A complete CAIR permit application shall include the following elements concerning the CAIR SO₂ source for which the application is submitted, in a format prescribed by the permitting authority:

(a) Identification of the CAIR SO₂ source;
(b) Identification of each CAIR SO₂ unit at the CAIR SO₂ source; and
(c) The standard requirements under § 97.206.

§ 97.223 CAIR permit contents and term.

(a) Each CAIR permit will contain, in a format prescribed by the permitting authority, all elements required for a complete CAIR permit application under § 97.222.

(b) Each CAIR permit is deemed to incorporate automatically the definitions of terms under § 97.202 and, upon recordation by the Administrator under subpart FFF, GGG, or III of this part, every allocation, transfer, or deduction of a CAIR SO₂ allowance to or from the compliance account of the CAIR SO₂ source covered by the permit.

(c) The term of the CAIR permit will be set by the permitting authority, as necessary to facilitate coordination of the renewal of the CAIR permit with issuance, revision, or renewal of the CAIR SO₂ source’s title V operating permit or other federally enforceable permit as applicable.

§ 97.224 CAIR permit revisions.

Except as provided in § 97.223(b), the permitting authority will revise the CAIR permit, as necessary, in accordance with the permitting authority’s title V operating permits regulations or the permitting authority’s regulations for other federally enforceable permits as applicable addressing permit revisions.

Subparts DDD–EEE [Reserved]
authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR SO₂ allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO₂ Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account."

(E) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.

(iii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(2) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative.

(i) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(A) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(B) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR SO₂ allowances held in the general account in all matters pertaining to the CAIR SO₂ Trading Program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the Administrator or a court regarding the general account.

(C) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.

(ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR SO₂ allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: "I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR SO₂ allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(iii) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(ii) of this section.

(3) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest.

(i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by
the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account.

(ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CAIR SO\textsubscript{2} allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to CAIR SO\textsubscript{2} allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR SO\textsubscript{2} allowances in the general account to include the change.

(4) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative. (i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (b)(3)(i) or (ii) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the Administrator under the CAIR SO\textsubscript{2} Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR SO\textsubscript{2} allowance transfers.

(5) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative. (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts FFF and GGG of this part.

(ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her
authority to make an electronic submission to the Administrator provided for or required under subparts FFF and GGG of this part.

(iii) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (b)(5)(i) or (ii) of this section, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an “agent”);

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (b)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: “I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.251(b)(5)(iv) shall be deemed to be an electronic submission by me.”;

(E) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.251(b)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address, unless all delegation of authority by me under 40 CFR 97.251(b)(5) is terminated.”.

(iv) A notice of delegation submitted under paragraph (b)(5)(iii) of this section shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (b)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (b)(5)(iv) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

(c) Account identification. The Administrator will assign a unique identifying number to each account established under paragraph (a) or (b) of this section.

§ 97.252 Responsibilities of CAIR authorized account representative.

Following the establishment of a CAIR SO₂ Allowance Tracking System account, all submissions to the Administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of CAIR SO₂ allowances in the account, shall be made only by the CAIR authorized account representative for the account.

§ 97.253 Recordation of CAIR SO₂ allowances.

(a)(1) After a compliance account is established under §97.251(a) or §73.31(a) or (b) of this chapter, the Administrator will record in the compliance account any CAIR SO₂ allowance allocated to any CAIR SO₂ unit at the source for each of the 30 years starting the later of 2010 or the year in which
§ 97.254-compliance with CAIR SO₂ emissions limitation.

(a) Allowance transfer deadline. The CAIR SO₂ allowances are available to be deducted for compliance with a source’s CAIR SO₂ emissions limitation for a control period in a given calendar year only if the CAIR SO₂ allowances:

1. Were allocated for the control period in the year or a prior year; and

2. Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR SO₂ allowance transfer correctly submitted for recordation under §§ 97.260 and 97.261 by the allowance transfer deadline for the control period.

(b) Deductions for compliance. Following the recordation, in accordance with §97.261, of CAIR SO₂ allowance transfers submitted for recordation in a source’s compliance account by the allowance transfer deadline for a control period, the Administrator will deduct from the compliance account CAIR SO₂ allowances available under paragraph (a) of this section in order to determine whether the source meets the CAIR SO₂ emissions limitation for the control period as follows:

1. For a CAIR SO₂ source subject to an Acid Rain emissions limitation, the Administrator will, in the following order:

   (i) Deduct the amount of CAIR SO₂ allowances, available under paragraph (a) of this section and not issued by a permitting authority under §97.288, that is required under §§ 73.35(b) and (c) of this chapter. If there are sufficient CAIR SO₂ allowances to complete this deduction, the deduction will be treated as satisfying the requirements of §§ 73.35(b) and (c) of this chapter.

   (ii) Deduct the amount of CAIR SO₂ allowances, not issued by a permitting authority under §97.288, that is required under §§ 73.35(d) and 77.5 of this part. If there are sufficient CAIR SO₂ allowances to complete this deduction, the deduction will be treated as satisfying the requirements of §§ 73.35(d) and 77.5 of this chapter.

   (iii) Treating the CAIR SO₂ allowances deducted under paragraph (b)(1)(i) of this section as also being deducted under this paragraph (b)(1)(ii),
deduct CAIR SO$_2$ allowances available under paragraph (a) of this section (including any issued by a permitting authority under §97.288) in order to determine whether the source meets the CAIR SO$_2$ emissions limitation for the control period, as follows:

(A) Until the tonnage equivalent of the CAIR SO$_2$ allowances deducted equals, or exceeds in accordance with paragraphs (c)(1) and (2) of this section, the number of tons of total sulfur dioxide emissions, determined in accordance with subpart HHH of this part, from all CAIR SO$_2$ units at the source for the control period; or

(B) If there are insufficient CAIR SO$_2$ allowances to complete the deductions in paragraph (b)(1)(iii)(A) of this section, until no more CAIR SO$_2$ allowances available under paragraph (a) of this section (including any issued by a permitting authority under §97.288) remain in the compliance account.

(2) For a CAIR SO$_2$ source not subject to an Acid Rain emissions limitation, the Administrator will deduct CAIR SO$_2$ allowances available under paragraph (a) of this section (including any issued by a permitting authority under §97.288) in order to determine whether the source meets the CAIR SO$_2$ emissions limitation for the control period, as follows:

(i) Until the tonnage equivalent of the CAIR SO$_2$ allowances deducted equals, or exceeds in accordance with paragraphs (c)(1) and (2) of this section, the number of tons of total sulfur dioxide emissions, determined in accordance with subpart HHH of this part, from all CAIR SO$_2$ units at the source for the control period; or

(ii) If there are insufficient CAIR SO$_2$ allowances to complete the deductions in paragraph (b)(2)(i) of this section, until no more CAIR SO$_2$ allowances available under paragraph (a) of this section (including any issued by a permitting authority under §97.288) remain in the compliance account.

(c)(1) Identification of CAIR SO$_2$ allowances by serial number. The CAIR authorized account representative for a source’s compliance account may request that specific CAIR SO$_2$ allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (b) or (d) of this section. Such request shall be submitted to the Administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the Administrator, the identification of the CAIR SO$_2$ source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CAIR SO$_2$ allowances under paragraph (b) or (d) of this section from the source’s compliance account, in the absence of an identification or in the case of a partial identification of CAIR SO$_2$ allowances by serial number under paragraph (c)(1) of this section, on a first-in, first-out (FIFO) accounting basis in the following order:

(i) Any CAIR SO$_2$ allowances that were allocated to the units at the source for a control period before 2010, in the order of recordation;

(ii) Any CAIR SO$_2$ allowances that were allocated to any entity for a control period before 2010 and transferred and recorded in the compliance account pursuant to subpart GGG of this part or subpart D of part 73 of this chapter, in the order of recordation;

(iii) Any CAIR SO$_2$ allowances that were allocated to any entity for a control period during 2010 through 2014, in the order of recordation;

(iv) Any CAIR SO$_2$ allowances that were allocated to any entity for a control period during 2010 through 2014 and transferred and recorded in the compliance account pursuant to subpart GGG of this part or subpart D of part 73 of this chapter, in the order of recordation;

(v) Any CAIR SO$_2$ allowances that were allocated to the units at the source for a control period before 2010, in the order of recordation; and

(vi) Any CAIR SO$_2$ allowances that were allocated to any entity for a control period in 2015 or later, in the order of recordation; and

(d) Deductions for excess emissions. (1) After making the deductions for compliance under paragraph (b) of this section for a control period in a calendar...
§ 97.255 Banking.

(a) CAIR SO₂ allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CAIR SO₂ allowance that is held in a compliance account or a general account will remain in such account unless and until the CAIR SO₂ allowance is deducted or transferred under §97.254, §97.256, or subpart GGG or III of this part.

§ 97.256 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR SO₂ Allowance Tracking System account. Within 10 business days of making such correction, the Administrator will notify the CAIR authorized account representative for the account.

§ 97.257 Closing of general accounts.

(a) The CAIR authorized account representative of a general account may submit to the Administrator a request to close the account, which shall include a correctly submitted allowance transfer under §§97.260 and 97.261 for any CAIR SO₂ allowances in the account to one or more other CAIR SO₂ Allowance Tracking System accounts.

(b) If a general account has no allowance transfers in or out of the account for a 12-month period or longer and does not contain any CAIR SO₂ allowances, the Administrator may notify the CAIR authorized account representative for the account that the account will be closed following 20 business days after the notice is sent. The account will be closed after the 20-day period unless, before the end of the 20-day period, the Administrator receives a correctly submitted transfer of CAIR SO₂ allowances into the account under §§97.260 and 97.261 or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

Subpart GGG—CAIR SO₂ Allowance Transfers

§ 97.260 Submission of CAIR SO₂ allowance transfers.

(a) A CAIR authorized account representative seeking recordation of a CAIR SO₂ allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the CAIR SO₂ allowance transfer shall include the following elements, in a format specified by the Administrator:
Environmental Protection Agency

§ 97.270 General requirements.

The owners and operators, and to the extent applicable, the CAIR designated

as specified by the request, provided that:

(1) The transfer is correctly submitted under §97.260;
(2) The transferor account includes each CAIR SO₂ allowance identified by serial number in the transfer; and
(3) The transfer is in accordance with the limitation on transfer under §74.42 of this chapter and §74.47(c) of this chapter, as applicable.

(b) A CAIR SO₂ allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR SO₂ allowances allocated for any control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions under §97.254 for the control period immediately before such allowance transfer deadline.

(c) Where a CAIR SO₂ allowance transfer submitted for recordation fails to meet the requirements of paragraph (a) of this section, the Administrator will not record such transfer.

§ 97.262 Notification.

(a) Notification of recordation. Within 5 business days of recordation of a CAIR SO₂ allowance transfer under §97.261, the Administrator will notify the CAIR authorized account representatives of both the transferor and transferee accounts.

(b) Notification of non-recordation. Within 10 business days of receipt of a CAIR SO₂ allowance transfer that fails to meet the requirements of §97.261(a), the Administrator will notify the CAIR authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer, and
(2) The reasons for such non-recording.

(c) Nothing in this section shall preclude the submission of a CAIR SO₂ allowance transfer for recordation following notification of non-recordation.

Subpart HHH—Monitoring and Reporting

§ 97.270 General requirements.

The owners and operators, and to the extent applicable, the CAIR designated
representative, of a CAIR SO\textsubscript{2} unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subparts F and G of part 75 of this chapter. For purposes of complying with such requirements, the definitions in §97.202 and in §72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CAIR SO\textsubscript{2} unit,” “CAIR designated representative,” and “continuous emission monitoring system” or (“CEMS”) respectively, as defined in §97.202. The owner or operator of a unit that is not a CAIR SO\textsubscript{2} unit but that is monitored under §75.16(b)(2) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CAIR SO\textsubscript{2} unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR SO\textsubscript{2} unit shall:

(1) Install all monitoring systems required under this subpart for monitoring SO\textsubscript{2} mass emissions and individual unit heat input (including all systems required to monitor SO\textsubscript{2} concentration, stack gas moisture content, stack gas flow rate, CO\textsubscript{2} or O\textsubscript{2} concentration, and fuel flow rate, as applicable, in accordance with §§75.11 and 75.16 of this chapter);

(2) Successfully complete all certification tests required under §97.271 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the following dates. The owner or operator shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the following dates.

(1) For the owner or operator of a CAIR SO\textsubscript{2} unit that commences commercial operation before July 1, 2008, by January 1, 2009.

(2) For the owner or operator of a CAIR SO\textsubscript{2} unit that commences commercial operation on or after July 1, 2008, by the later of the following dates:

(i) January 1, 2009; or

(ii) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation.

(3) For the owner or operator of a CAIR SO\textsubscript{2} unit for which construction of a new stack or flue or installation of add-on SO\textsubscript{2} emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (4), or (5) of this section, by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on SO\textsubscript{2} emissions controls.

(4) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, by the date specified in §97.284(b).

(5) Notwithstanding the dates in paragraphs (b)(1) and (2) of this section, for the owner or operator of a CAIR SO\textsubscript{2} opt-in unit under subpart III of this part, by the date on which the CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program as provided in §97.284(g).

(c) Reporting data. The owner or operator of a CAIR SO\textsubscript{2} unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for SO\textsubscript{2} concentration, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine SO\textsubscript{2} mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter or section 2.4 of
Environmental Protection Agency

§ 97.271 Initial certification and recertification procedures.

(a) The owner or operator of a CAIR SO₂ unit shall be exempt from the initial certification requirements of this section for a monitoring system under §97.270(a)(1) if the following conditions are met:

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendix B and appendix D to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under §97.270(a)(1) exempt from initial certification requirements under paragraph (a) of this section.

(c) [Reserved]

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CAIR SO₂ unit shall comply with the following initial certification and recertification procedures, for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendix D to part 75 of this chapter) under §97.270(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system and an excepted monitoring system under appendix D to part 75 of this chapter by the applicable deadline in §97.270(b) in

VerDate Sep<11>2014 13:36 Oct 20, 2017 Jkt 241173 PO 00000 Frm 00315 Fmt 8010 Sfmt 8010 Y:\SGML\241173.XXX 241173nlaroche on DSK9F9SC42PROD with CFR

appendix D to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CAIR SO₂ unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §97.275.

(2) No owner or operator of a CAIR SO₂ unit shall operate the unit so as to discharge, or allow to be discharged, SO₂ emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(3) No owner or operator of a CAIR SO₂ unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording SO₂ mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CAIR SO₂ unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under §97.205 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the Administrator for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

(iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with §97.271(d)(3)(i).

(e) Long-term cold storage. The owner or operator of a CAIR SO₂ unit is subject to the applicable provisions of part 75 of this chapter concerning units in long-term cold storage.
addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §97.270(a)(1) that may significantly affect the ability of the system to accurately measure or record SO\(_2\) mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system under §97.270(a)(1) is subject to the recertification requirements in §75.20(g)(6) of this chapter.

(3) Approval process for initial certification and recertification. Paragraphs (d)(3)(i) through (iv) of this section and recertification of a continuous monitoring system under §97.270(a)(1). For recertifications, replace the words “certification” and “initial certification” with the word “recertification,” replace the word “certified” with the word “recertified,” and follow the procedures in §§75.20(b)(5) and (g)(7) of this chapter in lieu of the procedures in paragraph (d)(3)(v) of this section.

(ii) Certification application. The CAIR designated representative shall submit to the Administrator a certification application for each monitoring system. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CAIR SO\(_2\) Trading Program for a period not to exceed 120 days after receipt by the Administrator of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the Administrator does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the Administrator.

(iv) Certification application approval process. The Administrator will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CAIR SO\(_2\) Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a
written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the Administrator may issue a notice of disapproval under paragraph (d)(3)(iv)(C) of this section. The 120-day review period shall not begin before receipt of a complete certification application.

(C) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of part 75 of this chapter or if the certification application is incomplete and the requirement for disapproval under paragraph (d)(3)(iv)(B) of this section is met, then the Administrator will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the Administrator and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter).

The owner or operator shall follow the procedures for loss of certification in paragraph (d)(3)(iv) of this section for each monitoring system that is disapproved for initial certification.

(D) Audit decertification. The Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §97.272(b).

(v) Procedures for loss of certification. If the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under §75.20(a)(4)(iii), §75.20(g)(7), or §75.21(e) of this chapter and continuing until the applicable date and hour specified under §75.20(a)(5)(i) or (g)(7) of this chapter:

(1) For a disapproved SO$_2$ pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of SO$_2$ and the maximum potential flow rate, as defined in sections 2.1.1.1 and 2.1.4.1 of appendix A to part 75 of this chapter.

(2) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO$_2$ concentration or the minimum potential O$_2$ concentration (as applicable), as defined in sections 2.1.5, 2.1.3.1, and 2.1.3.2 of appendix A to part 75 of this chapter.

(3) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in section 2.4.2.1 of appendix D to part 75 of this chapter.

(B) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (d)(3)(i) and (ii) of this section.

(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(e) Initial certification and recertification procedures for units using the low mass emission excepted methodology under §75.19 of this chapter. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under §75.19 of this chapter shall meet the applicable certification and recertification requirements in §§75.19(a)(2) and 75.20(h) of this chapter. If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in §75.20(g) of this chapter.
§ 97.272 Certification/recertification procedures for alternative monitoring systems.
The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator under subpart E of part 75 of this chapter shall comply with the applicable notification and application procedures of § 75.20(f) of this chapter.

§ 97.272 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D of appendix D to part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under § 97.271 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the Administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in § 97.271 for each disapproved monitoring system.

§ 97.273 Notifications.
The CAIR designated representative for a CAIR SO\(_2\) unit shall submit written notice to the Administrator in accordance with § 75.61 of this chapter.

§ 97.274 Recordkeeping and reporting.

(a) General provisions. The CAIR designated representative shall comply with all recordkeeping and reporting requirements in this section, the applicable recordkeeping and reporting requirements in subparts F and G of part 75 of this chapter, and the requirements of § 97.20(e)(1).

(b) Monitoring Plans. The owner or operator of a CAIR SO\(_2\) unit shall comply with requirements of § 75.62 of this chapter and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, §§ 97.283 and 97.284(a).

(c) Certification Applications. The CAIR designated representative shall submit an application to the Administrator within 45 days after completing all initial certification or recertification tests required under § 97.271, including the information required under § 75.63 of this chapter.

(d) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

(i) The CAIR designated representative shall report the SO\(_2\) mass emissions data and heat input data for the CAIR SO\(_2\) unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

(i) For a unit that commences commercial operation before July 1, 2008, the calendar quarter covering January 1, 2009 through March 31, 2009;

(ii) For a unit that commences commercial operation on or after July 1, 2008, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under § 97.270(b), unless that quarter is the third or fourth quarter of 2008, in which case reporting shall commence in the quarter covering January 1, 2009 through March 31, 2009; and

(iii) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a unit for which a CAIR opt-in permit
application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the calendar quarter corresponding to the date specified in §97.284(b); and

(iv) Notwithstanding paragraphs (d)(1)(i) and (ii) of this section, for a CAIR SO₂ opt-in unit under subpart III of this part, the calendar quarter corresponding to the date on which the CAIR SO₂ opt-in unit enters the CAIR SO₂ Trading Program as provided in §97.284(g).

(2) The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.64 of this chapter.

(3) For CAIR SO₂ units that are also subject to an Acid Rain emissions limitation or the CAIR NOₓ Annual Trading Program, CAIR NOₓ Ozone Season Trading Program, or Hg Budget Trading Program, quarterly reports shall include the applicable data and information required by subparts F through I of part 75 of this chapter as applicable, in addition to the SO₂ mass emission data, heat input data, and other information required by this subpart.

(e) Compliance certification. The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications; and

(2) For a unit with add-on SO₂ emission controls and for all hours where SO₂ data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate SO₂ emissions.

§ 97.275 Petitions.

The CAIR designated representative of a CAIR SO₂ unit may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with this subpart only to the extent that the petition is approved in writing by the Administrator, in consultation with the permitting authority.

Subpart III—CAIR SO₂ Opt-in Units

§ 97.280 Applicability.

A CAIR SO₂ opt-in unit must be a unit that:

(a) Is located in a State that submits, and for which the Administrator approves, a State implementation plan revision in accordance with §51.124(r)(1), (2), or (3) of this chapter establishing procedures concerning CAIR opt-in units;

(b) Is not a CAIR SO₂ unit under §97.204 and is not covered by a retired unit exemption under §97.205 that is in effect;

(c) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect and is not an opt-in source under part 74 of this chapter;

(d) Has or is required or qualified to have a title V operating permit or other federally enforceable permit; and

(e) Vents all of its emissions to a stack and can meet the monitoring, recordkeeping, and reporting requirements of subpart HH of this part.

§ 97.281 General.

(a) Except as otherwise provided in §§97.201 through 97.204, §§97.206 through 97.208, and subparts BBB and CCC and subparts FFF through HHH of this part, a CAIR SO₂ opt-in unit shall be treated as a CAIR SO₂ unit for purposes of applying such sections and subparts of this part.

(b) Solely for purposes of applying, as provided in this subpart, the requirements of subpart HH of this part to a unit for which a CAIR opt-in permit
§ 97.282 Application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, such unit shall be treated as a CAIR SO₂ unit before issuance of a CAIR opt-in permit for such unit.

§ 97.282 CAIR designated representative.

Any CAIR SO₂ opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, located at the same source as one or more CAIR SO₂ units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR SO₂ units.

§ 97.283 Applying for CAIR opt-in permit.

(a) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR SO₂ opt-in unit in §97.280 may apply for an initial CAIR opt-in permit at any time, except as provided under §97.286(f) and (g), and, in order to apply, must submit the following:

(1) A complete CAIR permit application under §97.222;

(2) A certification, in a format specified by the permitting authority, that the unit:

(i) Is not a CAIR SO₂ unit under §97.204 and is not covered by a retired unit exemption under §97.205 that is in effect;

(ii) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;

(iii) Is not and, so long as the unit is a CAIR SO₂ opt-in unit, will not become, an opt-in source under part 74 of this chapter;

(iv) Vents all of its emissions to a stack; and

(v) Has documented heat input for more than 876 hours during the 6 months immediately preceding submission of the CAIR permit application under §97.222;

(3) A monitoring plan in accordance with subpart HHH of this part;

(4) A complete certificate of representation under §97.213 consistent with §97.222, if no CAIR designated representative has been previously designated for the source that includes the unit; and

(5) A statement, in a format specified by the permitting authority, whether the CAIR designated representative requests that the unit be allocated CAIR SO₂ allowances under §§97.288(b) or 97.288(c) (subject to the conditions in §§97.284(h) and 97.286(g)), to the extent such allocation is provided in a State implementation plan revision submitted in accordance with §51.124(r)(1), (2), or (3) of this chapter and approved by the Administrator. If allocation under §97.288(c) is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(b) Duty to reapply. (1) The CAIR designated representative of a CAIR SO₂ opt-in unit shall submit a complete CAIR permit application under §97.222 to renew the CAIR opt-in unit permit in accordance with the permitting authority’s regulations for title V operating permits, or the permitting authority’s regulations for other federally enforceable permits if applicable, addressing permit renewal.

(2) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR SO₂ opt-in unit from the CAIR SO₂ Trading Program in accordance with §97.286 or the unit becomes a CAIR SO₂ unit under §97.204, the CAIR SO₂ opt-in unit shall remain subject to the requirements for a CAIR SO₂ opt-in unit, even if the CAIR designated representative for the CAIR SO₂ opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (b)(1) of this section.

§ 97.284 Opt-in process.

The permitting authority will issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under §97.183 is submitted in accordance with the following, to the extent provided in a State implementation plan revision submitted in accordance with
§ 97.284
Monitoring and reporting.

(a) Interim review of monitoring plan. The permitting authority and the Administrator will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under § 97.283. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the SO₂ emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with subpart HHH of this part. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.

(b) Monitoring and reporting. (1)(i) If the permitting authority and the Administrator determine that the monitoring plan is sufficient under paragraph (a) of this section, the owner or operator shall monitor and report the SO₂ emissions rate and the heat input of the unit and all other applicable parameters, in accordance with subpart HHH of this part, starting on the date of certification of the appropriate monitoring systems under subpart HHH of this part and continuing until a CAIR opt-in permit is issued under § 97.284(f) or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR SO₂ Trading Program in accordance with § 97.286.

(ii) The monitoring and reporting under paragraph (b)(1)(i) of this section shall include the entire control period immediately before the date on which the unit enters the CAIR SO₂ Trading Program under § 97.284(g), during which period monitoring system availability must not be less than 90 percent under subpart HHH of this part and the unit must be in full compliance with any applicable State or Federal emissions or emissions-related requirements.

(2) To the extent the SO₂ emissions rate and the heat input of the unit are monitored and reported in accordance with subpart HHH of this part for one or more control periods, in addition to the control period under paragraph (b)(1)(ii) of this section, during which control periods monitoring system availability is not less than 90 percent under subpart HHH of this part and the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements and which control periods begin not more than 3 years before the unit enters the CAIR SO₂ Trading Program under § 97.284(g), such information shall be used as provided in paragraphs (c) and (d) of this section.

(c) Baseline heat input. The unit's baseline heat input shall equal:

(1) If the unit's SO₂ emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit's total heat input (in mmBtu) for the control period; or

(2) If the unit's SO₂ emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1)(ii) and (2) of this section, the average of the amounts of the unit's total heat input (in mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section.

(d) Baseline SO₂ emission rate. The unit's baseline SO₂ emission rate shall equal:

(1) If the unit's SO₂ emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit's SO₂ emissions rate (in lb/mmBtu) for the control period;

(2) If the unit's SO₂ emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit does not have add-on SO₂ emission controls during any such control periods, the average of the amounts of the unit's SO₂ emission rate (in lb/mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section; or

(3) If the unit's SO₂ emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit has add-on SO₂ emission controls during any such control periods, the average of the amounts of the unit's SO₂ emission rate (in lb/mmBtu) for such control periods during which the unit has add-on SO₂ emission controls.
Issuance of CAIR opt-in permit.

After calculating the baseline heat input and the baseline SO\textsubscript{2} emissions rate for the unit under paragraphs (c) and (d) of this section and if the permitting authority determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR SO\textsubscript{2} opt-in unit in §97.280 and meets the elements certified in §97.283(a)(2), the permitting authority will issue a CAIR opt-in permit. The permitting authority will provide a copy of the CAIR opt-in permit to the Administrator, who will then establish a compliance account for the source that includes the CAIR SO\textsubscript{2} opt-in unit unless the source already has a compliance account.

Issuance of denial of CAIR opt-in permit.

Notwithstanding paragraphs (a) through (e) of this section, if at any time before issuance of a CAIR opt-in permit for the unit, the permitting authority determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR SO\textsubscript{2} opt-in unit in §97.280 or meets the elements certified in §97.283(a)(2), the permitting authority will issue a denial of a CAIR opt-in permit for the unit.

Date of entry into CAIR SO\textsubscript{2} Trading Program.

A unit for which an initial CAIR opt-in permit is issued by the permitting authority shall become a CAIR SO\textsubscript{2} opt-in unit, and a CAIR SO\textsubscript{2} unit, as of the later of January 1, 2010 or January 1 of the first control period during which such CAIR opt-in permit is issued.

Repowered CAIR SO\textsubscript{2} opt-in unit.

(1) If CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit providing for, allocation to a CAIR SO\textsubscript{2} opt-in unit of CAIR SO\textsubscript{2} allowances under §97.288(c) and such unit is repowered after its date of entry into the CAIR SO\textsubscript{2} Trading Program under paragraph (g) of this section, the repowered unit shall be treated as a CAIR SO\textsubscript{2} opt-in unit replacing the original CAIR SO\textsubscript{2} opt-in unit, as of the date of start-up of the repowered unit’s combustion chamber.

(2) Notwithstanding paragraphs (c) and (d) of this section, as of the date of start-up under paragraph (h)(1) of this section, the repowered unit shall be deemed to have the same date of commencement of operation, date of commencement of commercial operation, baseline heat input, and baseline SO\textsubscript{2} emission rate as the original CAIR SO\textsubscript{2} opt-in unit, and the original CAIR SO\textsubscript{2} opt-in unit shall no longer be treated as a CAIR SO\textsubscript{2} opt-in unit or a CAIR SO\textsubscript{2} unit.
§ 97.286 Withdrawal from CAIR SO\textsubscript{2} Trading Program.

Except as provided under paragraph (g) of this section, a CAIR SO\textsubscript{2} opt-in unit may withdraw from the CAIR SO\textsubscript{2} Trading Program, but only if the permitting authority issues a notification to the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit of the acceptance of the withdrawal of the CAIR SO\textsubscript{2} opt-in unit in accordance with paragraph (d) of this section.

(a) Requesting withdrawal. In order to withdraw a CAIR SO\textsubscript{2} opt-in unit from the CAIR opt-in Trading Program, the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit shall submit to the permitting authority a request to withdraw effective as of midnight of December 31 of a specified calendar year, which date must be at least 4 years after December 31 of the year of entry into the CAIR SO\textsubscript{2} Trading Program under §97.284(g). The request must be submitted no later than 90 days before the requested effective date of withdrawal.

(b) Conditions for withdrawal. Before a CAIR SO\textsubscript{2} opt-in unit covered by a request under paragraph (a) of this section may withdraw from the CAIR SO\textsubscript{2} Trading Program and the CAIR opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

1. For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR SO\textsubscript{2} opt-in unit must meet the requirement to hold CAIR SO\textsubscript{2} allowances under §97.206(c) and cannot have any excess emissions.

2. After the requirement for withdrawal under paragraph (b)(1) of this section is met, the Administrator will deduct from the compliance account of the source that includes the CAIR SO\textsubscript{2} opt-in unit CAIR SO\textsubscript{2} allowances equal in amount to and allocated for the same or a prior control period as any CAIR SO\textsubscript{2} allowances allocated to the CAIR SO\textsubscript{2} opt-in unit under §97.288 for any control period for which the withdrawal is to be effective. If there are no remaining CAIR SO\textsubscript{2} units at the source, the Administrator will close the compliance account, and the owners and operators of the CAIR SO\textsubscript{2} opt-in unit may submit a CAIR SO\textsubscript{2} allowance transfer for any remaining CAIR SO\textsubscript{2} allowances to another CAIR SO\textsubscript{2} Allowance Tracking System in accordance with subpart GGG of this part.

(c) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of CAIR SO\textsubscript{2} allowances required), the permitting authority will issue a notification to the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit of the acceptance of the withdrawal of the CAIR SO\textsubscript{2} opt-in unit as of midnight on December 31 of the calendar year for which the withdrawal was requested.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit that the CAIR SO\textsubscript{2} opt-in unit’s request to withdraw is denied. Such CAIR SO\textsubscript{2} opt-in unit shall continue to be a CAIR SO\textsubscript{2} opt-in unit.

(d) Permit amendment. After the permitting authority issues a notification under paragraph (c)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the CAIR permit covering the CAIR SO\textsubscript{2} opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (c)(1) of this section. The unit shall continue to be a CAIR SO\textsubscript{2} opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR SO\textsubscript{2} Trading Program concerning any control periods for which the unit is a CAIR SO\textsubscript{2} opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(e) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the CAIR SO\textsubscript{2} opt-in unit’s request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(f) Ability to reapply to the CAIR SO\textsubscript{2} Trading Program. Once a CAIR SO\textsubscript{2} opt-in unit withdraws from the CAIR SO\textsubscript{2} Trading Program and its CAIR opt-in
permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under § 97.283 for such CAIR SO\textsubscript{2} opt-in unit before the date that is 4 years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit will be treated as an initial application for a CAIR opt-in permit under § 97.284.

(g) Inability to withdraw. Notwithstanding paragraphs (a) through (f) of this section, a CAIR SO\textsubscript{2} opt-in unit shall not be eligible to withdraw from the CAIR SO\textsubscript{2} Trading Program if the CAIR designated representative of the CAIR SO\textsubscript{2} opt-in unit requests, and the permitting authority issues a CAIR opt-in permit providing for, allocation to the CAIR SO\textsubscript{2} opt-in unit of CAIR SO\textsubscript{2} allowances under § 97.288(c).

§ 97.287 Change in regulatory status.

(a) Notification. If a CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204, then the CAIR designated representative shall notify in writing the permitting authority and the Administrator of such change in the CAIR SO\textsubscript{2} opt-in unit’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s actions. (1) If a CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204, the permitting authority will revise the CAIR SO\textsubscript{2} opt-in unit’s CAIR opt-in permit to meet the requirements of a CAIR permit under § 97.223, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204.

(2)(i) The Administrator will deduct from the compliance account of the source that includes the CAIR SO\textsubscript{2} opt-in unit that becomes a CAIR SO\textsubscript{2} unit under § 97.204, CAIR SO\textsubscript{2} allowances equal in amount to and allocated for the same or a prior control period as:

(A) Any CAIR SO\textsubscript{2} allowances allocated to the CAIR SO\textsubscript{2} opt-in unit under § 97.283 for any control period after the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204; and

(B) If the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204 is not December 31, the CAIR SO\textsubscript{2} allowances allocated to the CAIR SO\textsubscript{2} opt-in unit under § 97.283 for the control period that includes the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR SO\textsubscript{2} opt-in unit becomes a CAIR SO\textsubscript{2} unit under § 97.204 divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR SO\textsubscript{2} opt-in unit that becomes a CAIR SO\textsubscript{2} unit under § 97.204 contains the CAIR SO\textsubscript{2} allowances necessary for completion of the deduction under paragraph (b)(2)(i) of this section.

§ 97.288 CAIR SO\textsubscript{2} allowance allocations to CAIR SO\textsubscript{2} opt-in units.

(a) Timing requirements. (1) When the CAIR opt-in permit is issued under § 97.284(e), the permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit, and submit to the Administrator the allocation for the control period in which a CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under § 97.284(g), in accordance with paragraph (b) or (c) of this section.

(2) By no later than October 31 of the control period in which a CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under § 97.284(g) and October 31 of each year thereafter, the permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit, and submit to the Administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR SO\textsubscript{2} opt-in unit, in accordance with paragraph (b) or (c) of this section.

(b) Calculation of allocation. For each control period for which a CAIR SO\textsubscript{2} opt-in unit is to be allocated CAIR SO\textsubscript{2} allowances, the permitting authority will allocate in accordance with the following procedures, if provided in a State implementation plan revision submitted in accordance with
§ 97.288

(1) The heat input (in mmBtu) used for calculating the CAIR SO\textsubscript{2} allowance allocation will be the lesser of:

(i) The CAIR SO\textsubscript{2} opt-in unit’s baseline heat input determined under § 97.284(c); or

(ii) The CAIR SO\textsubscript{2} opt-in unit’s heat input, as determined in accordance with subpart HHH of this part, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under § 97.284(g).

(2) The SO\textsubscript{2} emission rate (in lb/mmBtu) used for calculating CAIR SO\textsubscript{2} allowance allocations will be the lesser of:

(i) The CAIR SO\textsubscript{2} opt-in unit’s baseline SO\textsubscript{2} emission rate (in lb/mmBtu) determined under § 97.284(d) multiplied by 70 percent; or

(ii) The most stringent State or Federal SO\textsubscript{2} emissions limitation applicable to the CAIR SO\textsubscript{2} opt-in unit at any time during the control period for which CAIR SO\textsubscript{2} allowances are to be allocated.

(3) The permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (b)(1) of this section, multiplied by the SO\textsubscript{2} emission rate under paragraph (b)(2) of this section, and divided by 2,000 lb/ton.

(c) Notwithstanding paragraph (b) of this section and if the CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under § 97.283(a)(5)) providing for, allocation to a CAIR SO\textsubscript{2} opt-in unit of CAIR SO\textsubscript{2} allowances under this paragraph (subject to the conditions in §§ 97.284(h) and 97.286(g)), the permitting authority will allocate to the CAIR SO\textsubscript{2} opt-in unit as follows, if provided in a State implementation plan revision submitted in accordance with § 51.124(r)(1), (2), or (3) of this chapter and approved by the Administrator:

(i) For each control period in 2010 through 2014 for which the CAIR SO\textsubscript{2} opt-in unit is to be allocated CAIR SO\textsubscript{2} allowances,

(ii) The heat input (in mmBtu) used for calculating CAIR SO\textsubscript{2} allowance allocations will be determined as described in paragraph (b)(1) of this section.

(iii) The permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (c)(1)(i) of this section, multiplied by the SO\textsubscript{2} emission rate under paragraph (c)(1)(ii) of this section, and divided by 2,000 lb/ton.

(2) For each control period in 2015 and thereafter for which the CAIR SO\textsubscript{2} opt-in unit is to be allocated CAIR SO\textsubscript{2} allowances,

(i) The heat input (in mmBtu) used for calculating the CAIR SO\textsubscript{2} allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The SO\textsubscript{2} emission rate (in lb/mmBtu) used for calculating the CAIR SO\textsubscript{2} allowance allocation will be the lesser of:

(A) The CAIR SO\textsubscript{2} opt-in unit’s baseline SO\textsubscript{2} emissions rate (in lb/mmBtu) determined under § 97.284(d); or

(B) The most stringent State or Federal SO\textsubscript{2} emissions limitation applicable to the CAIR SO\textsubscript{2} opt-in unit at any time during the control period for which the CAIR SO\textsubscript{2} opt-in unit enters the CAIR SO\textsubscript{2} Trading Program under § 97.284(g).

(iii) The permitting authority will allocate CAIR SO\textsubscript{2} allowances to the CAIR SO\textsubscript{2} opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (c)(2)(1) of this section.
section, multiplied by the SO₂ emission rate under paragraph (c)(2)(ii) of this section, and divided by 2,000 lb/ton.

(d) Recordation. If provided in a State implementation plan revision submitted in accordance with §51.124(r)(1), (2), or (3) of this chapter and approved by the Administrator:

(1) The Administrator will record, in the compliance account of the source that includes the CAIR SO₂ opt-in unit, the CAIR SO₂ allowances allocated by the permitting authority to the CAIR SO₂ opt-in unit under paragraph (a)(1) of this section.

(2) By December 1 of the control period in which a CAIR SO₂ opt-in unit enters the CAIR SO₂ Trading Program under §97.284(g) and December 1 of each year thereafter, the Administrator will record, in the compliance account of the source that includes the CAIR SO₂ opt-in unit, the CAIR SO₂ allowances allocated by the permitting authority to the CAIR SO₂ opt-in unit under paragraph (a)(2) of this section.

APPENDIX A TO SUBPART III OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING CAIR SO₂ OPT-IN UNITS

1. The following States have State Implementation Plan revisions under §51.124(c) of this chapter approved by the Administrator and establishing procedures providing for CAIR SO₂ opt-in units under subpart III of this part and allocation of CAIR SO₂ allowances to such units under §97.288(b):
   Indiana
   North Carolina
   Ohio
   South Carolina
   Tennessee

2. The following States have State Implementation Plan revisions under §51.124(c) of this chapter approved by the Administrator and establishing procedures providing for CAIR SO₂ opt-in units under subpart III of this part and allocation of CAIR SO₂ allowances to such units under §97.288(c):
   Indiana
   North Carolina
   Ohio
   South Carolina
   Tennessee

CAIR NOₓ Ozone Season source’s compliance account in order to be used to meet the source’s CAIR NOₓ Ozone Season emissions limitation for such control period in accordance with §97.354.

Alternate CAIR designated representative means, for a CAIR NOₓ Ozone Season source and each CAIR NOₓ Ozone Season unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBBB and IIII of this part, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR NOₓ Ozone Season Trading Program. If the CAIR NOₓ Ozone Season source is also a CAIR NOₓ source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NOₓ Annual Trading Program. If the CAIR NOₓ Ozone Season source is also a CAIR SO₂ source, then this natural person shall be the same person as the alternate designated representative under the CAIR NOₓ Annual Trading Program.

Automated data acquisition and handling system or DAHS means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under subpart HHHH of this part, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by subpart HHHH of this part.

Biomass means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is:

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

(ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

CAIR authorized account representative means, with regard to a general account, a responsible natural person who is authorized, in accordance with subparts BBBB, FFFF, and IIII of this part, to transfer and otherwise dispose of CAIR NOₓ Ozone Season allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.

CAIR designated representative means, for a CAIR NOₓ Ozone Season source and each CAIR NOₓ Ozone Season unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with subparts BBBB and IIII of this part, to represent and legally bind each owner and operator in matters pertaining to the CAIR NOₓ Ozone Season Trading Program. If the CAIR NOₓ Ozone Season source is also a CAIR NOₓ source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NOₓ Annual Trading Program.
Program. If the CAIR NO\textsubscript{X} Ozone Season source is also a CAIR SO\textsubscript{2} source, then this natural person shall be the same person as the CAIR designated representative under the CAIR SO\textsubscript{2} Trading Program. If the CAIR NO\textsubscript{X} Ozone Season source is also subject to the Acid Rain Program, then this natural person shall be the same person as the designated representative under the Acid Rain Program. If the CAIR NO\textsubscript{X} Ozone Season source is also subject to the Hg Budget Trading Program, then this natural person shall be the same person as the Hg designated representative under the Hg Budget Trading Program.

CAIR NO\textsubscript{X} Annual Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AA through II of this part and §§51.123(p) and 52.35 of this chapter or approved and administered by the Administrator in accordance with subparts AA through II of part 96 of this chapter and §51.123(o)(1) or (2) of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

CAIR NO\textsubscript{X} Ozone Season allowance means a limited authorization issued by a permitting authority or the Administrator under subpart EEEE of this part, §97.388, or provisions of a State implementation plan that are approved under §51.123(aa)(1) or (2) and (bb)(1), (bb)(2), (dd), or (ee) of this chapter or under the NO\textsubscript{X} Budget Trading Program as described in the prior sentence shall not be a CAIR NO\textsubscript{X} Ozone Season allowance.

CAIR NO\textsubscript{X} Ozone Season allowance deduction or deduct CAIR NO\textsubscript{X} Ozone Season allowances means the permanent withdrawal of CAIR NO\textsubscript{X} Ozone Season allowances by the Administrator from a compliance account, e.g., in order to account for a specified number of tons of total nitrogen oxides emissions from all CAIR NO\textsubscript{X} Ozone Season units at a CAIR NO\textsubscript{X} Ozone Season source for a control period, determined in accordance with subpart HHHH of this part, or to account for excess emissions.

CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System means the system by which the Administrator records allocations, deductions, and transfers of CAIR NO\textsubscript{X} Ozone Season allowances under the CAIR NO\textsubscript{X} Ozone Season Trading Program. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.

CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account means an account in the CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System established by the Administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR NO\textsubscript{X} Ozone Season allowances.

CAIR NO\textsubscript{X} Ozone Season allowances held or hold CAIR NO\textsubscript{X} Ozone Season allowances means the CAIR NO\textsubscript{X} Ozone Season allowances recorded by the Administrator, or submitted to the Administrator for recordation, in accordance with subparts FFFF, GGGG, and IIII of this part, in a CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account.

CAIR NO\textsubscript{X} Ozone Season emissions limitation means, for a CAIR NO\textsubscript{X} Ozone Season source, the tonnage equivalent, in NO\textsubscript{X} emissions in a control period, of the CAIR NO\textsubscript{X} Ozone Season allowances available for deduction for the source under §97.354(a) and (b) for the control period.
CAIR NO\textsubscript{X} Ozone Season source means a source that includes one or more CAIR NO\textsubscript{X} Ozone Season units.

CAIR NO\textsubscript{X} Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AAAA through IIII of part 96 of this part and §§51.123(ce) and 52.3 of this chapter or approved and administered by the Administrator in accordance with under subparts AAAA through IIII of this part.

CAIR NO\textsubscript{X} Ozone Season Trading Program means a multi-state nitrogen oxides air pollution control and emission reduction program established by the Administrator in accordance with subparts AAAA through IIII of part 96 of this part and §§51.123(ce) and 52.35 of this chapter or approved and administered by the Administrator in accordance with under subparts AAAA through IIII of this part and §§ 51.123(ee) and 52.3 of this chapter or approved and administered by the Administrator in accordance with under subparts AAAA through IIII of this part.

CAIR NO\textsubscript{X} Ozone Season Opt-in Unit means a unit that is subject to the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.304 and, except for purposes of §97.305 and subpart EEEE of this part, a CAIR NO\textsubscript{X} Ozone Season opt-in unit under subpart III of this part.

CAIR NO\textsubscript{X} source means a source that is subject to the CAIR NO\textsubscript{X} Annual Trading Program.

Certifying official means:
(1) For a corporation, a president, secretary, treasurer, or vice-president or the corporation in charge of a principal business function or any other person who performs similar policy or decision-making functions for the corporation;
(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or
(3) For a local government entity or State, Federal, or other public agency, a principal executive officer or ranking elected official.

Clean Air Act orCAA means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Coal-fired means:
(1) Except for purposes of subpart EEEE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during any year; or
(2) For purposes of subpart EEEE of this part, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during a specified year.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:
(1) Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and
(2) Producing during the 12-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity—

(A) Useful thermal energy not less than 5 percent of total energy output; and
(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of
total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle cogeneration unit, useful power not less than 45 percent of total energy input;

(3) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit's total energy input from all fuel except biomass if the unit is a boiler.

Combustion turbine means:

(1) An enclosed device comprising a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

(2) If the enclosed device under paragraph (1) of this definition is combined cycle, any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.305 and §97.384(h).

(i) For a unit that is a CAIR NO\textsubscript{X} Ozone Season unit under §97.304 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CAIR NO\textsubscript{X} Ozone Season unit under §97.304 on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (1) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1), (2), or (3) of this definition as appropriate.

(3) Notwithstanding paragraphs (1) and (2) of this definition, for a unit not serving a generator producing electricity for sale, the unit's date of commencement of operation shall also be the unit's date of commencement of commercial operation.

Commence operation means:

(1) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit's combustion chamber, except as provided in §97.384(h).

(i) For a unit that undergoes a physical change (other than replacement of the unit by a unit at the same source) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain
the date of commencement of operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is replaced by a unit at the same source (e.g., repowered) after the date the unit commences operation as defined in paragraph (1) of this definition, such date shall remain the replaced unit’s date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1) or (2) of this definition as appropriate, except as provided in §97.384(h).

(2) Notwithstanding paragraph (1) of this definition and solely for purposes of subpart HHHH of this part, for a unit that is not a CAIR NO\textsubscript{X} Ozone Season unit under §97.304(d) on the later of November 15, 1990 or the date the unit commences operation as defined in paragraph (1) of this definition and subsequently becomes such a CAIR NO\textsubscript{X} Ozone Season unit, the unit’s date for commencement of operation shall be the date on which the unit becomes a CAIR NO\textsubscript{X} Ozone Season unit under §97.304(d).

(i) For a unit with a date for commencement of operation as defined in paragraph (2) of this definition and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of operation as defined in paragraph (2) of this definition and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit’s date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (1) or (2) of this definition as appropriate.

**Common stack** means a single flue through which emissions from 2 or more units are exhausted.

**Compliance account** means a CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account, established by the Administrator for a CAIR NO\textsubscript{X} Ozone Season source under subpart FFFF or IIII of this part, in which any CAIR NO\textsubscript{X} Ozone Season allowance allocations for the CAIR NO\textsubscript{X} Ozone Season units at the source are initially recorded and in which are held any CAIR NO\textsubscript{X} Ozone Season allowances available for use for a control period in order to meet the source’s CAIR NO\textsubscript{X} Ozone Season emissions limitation in accordance with §97.354.

**Continuous emission monitoring system** or CEMS means the equipment required under subpart HHHH of this part to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes (using an automated data acquisition and handling system (DA\$H\$S)), a permanent record of nitrogen oxides emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with part 75 of this chapter. The following systems are the principal types of continuous emission monitoring systems required under subpart HHHH of this part:

1. A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

2. A nitrogen oxides concentration monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NO\textsubscript{X} emissions, in parts per million (ppm);

3. A nitrogen oxides emission rate (or NO\textsubscript{X}-diluent) monitoring system, consisting of a NO\textsubscript{X} pollutant concentration monitor, a diluent gas (CO\textsubscript{2} or O\textsubscript{2}) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NO\textsubscript{X} concentration, in parts per million (ppm), diluent gas concentration, in percent CO\textsubscript{2} or O\textsubscript{2}, and NO\textsubscript{X} emission rate, in pounds per million British thermal units (lb/mmBtu);

4. A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H\textsubscript{2}O;
(5) A carbon dioxide monitoring system, consisting of a CO\textsubscript{2} pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO\textsubscript{2} concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO\textsubscript{2} emissions, in percent CO\textsubscript{2}; and

(6) An oxygen monitoring system, consisting of an O\textsubscript{2} concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O\textsubscript{2}, in percent O\textsubscript{2}.

Control period or ozone season means the period beginning May 1 of a calendar year, except as provided in §97.306(c)(2) and ending on September 30 of the same year, inclusive.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the CAIR designated representative and as determined by the Administrator in accordance with subpart HHHH of this part.

Excess emissions means any ton of nitrogen oxides emitted by the CAIR NO\textsubscript{X} Ozone Season units at a CAIR NO\textsubscript{X} Ozone Season source during a control period that exceeds the CAIR NO\textsubscript{X} Ozone Season emissions limitation for the source.

Fossil fuel means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in any calendar year.

Fuel oil means any petroleum-based fuel (including diesel fuel or petroleum derivatives such as oil tar) and any recycled or blended petroleum products or petroleum by-products used as a fuel whether in a liquid, solid, or gaseous state.

General account means a CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account, established under subpart FFFF of this part, that is not a compliance account.

Generator means a device that produces electricity.

Gross electrical output means, with regard to a cogeneration unit, electricity made available for use, including any such electricity used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Heat input means, with regard to a specified period of time, the product (in mmBtu/time) of the gross calorific value of the fuel (in Btu/lb) divided by 1,000,000 Btu/mmBtu and multiplied by the fuel feed rate into a combustion device (in lb of fuel/time), as measured, recorded, and reported to the Administrator by the CAIR designated representative and determined by the Administrator in accordance with subpart HHHH of this part and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

Heat input rate means the amount of heat input (in mmBtu) divided by unit operating time (in hr) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Hg Budget Trading Program means a multi-state Hg air pollution control and emission reduction program approved and administered by the Administrator in accordance subpart HHHH of part 60 of this chapter and §60.24(h)(6), or established by the Administrator under section 111 of the Clean Air Act, as a means of reducing national Hg emissions.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option
Environmental Protection Agency § 97.302

rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

*Maximum design heat input* means the maximum amount of fuel per hour (in Btu/hr) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

*Monitoring system* means any monitoring system that meets the requirements of subpart HHHH of this part, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

*Most stringent State or Federal NOₓ emissions limitation* means, with regard to a unit, the lowest NOₓ emissions limitation (in terms of lb/mmBtu) that is applicable to the unit under State or Federal law, regardless of the averaging period to which the emissions limitation applies.

*Nameplate capacity* means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.

*Oil-fired* means, for purposes of subpart EEEE of this part, combusting fuel oil for more than 15.0 percent of the annual heat input in a specified year and not qualifying as coal-fired.

*Operator* means any person who operates, controls, or supervises a CAIR NOₓ Ozone Season source or a CAIR NOₓ Ozone Season unit at a source, respectively.

*Owner* means any of the following persons:

1. With regard to a CAIR NOₓ Ozone Season source or a CAIR NOₓ Ozone Season unit at a source, respectively:
   1. Any holder of any portion of the legal or equitable title in a CAIR NOₓ Ozone Season unit at the source or the CAIR NOₓ Ozone Season unit;
   2. Any holder of a leasehold interest in a CAIR NOₓ Ozone Season unit at the source or the CAIR NOₓ Ozone Season unit; or
   3. Any purchaser of power from a CAIR NOₓ Ozone Season unit at the source or the CAIR NOₓ Ozone Season unit under a life-of-the-unit, firm power contractual arrangement; provided that, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CAIR NOₓ Ozone Season unit; or
2. With regard to any general account, any person who has an ownership interest with respect to the CAIR NOₓ Ozone Season allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to represent the person's ownership interest with respect to CAIR NOₓ Ozone Season allowances.

*Permitting authority* means the State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to issue or revise permits to meet the requirements of the CAIR NOₓ Ozone Season Trading Program or, if no such agency has been so authorized, the Administrator.

*Potential electrical output capacity* means 33 percent of a unit's maximum design heat input, divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

*Receive or receipt of* means, when referring to the permitting authority or the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard
copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the permitting authority or the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CAIR NO\textsubscript{X} Ozone Season allowances, the movement of CAIR NO\textsubscript{X} Ozone Season allowances by the Administrator into or between CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System accounts, for purposes of allocation, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shutdown unit (the replaced unit).

Repowered means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:

1. Atmospheric or pressurized fluidized bed combustion;
2. Integrated gasification combined cycle;
3. Magnetohydrodynamics;
4. Direct and indirect coal-fired turbines;
5. Integrated gasification fuel cells; or
6. As determined by the Administrator in consultation with the Secretary of Energy, a derivative of one or more of the technologies under paragraphs (1) through (5) of this definition and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.

Sequential use of energy means:

1. For a topping-cycle cogeneration unit, the use of reject heat from electricity production in a useful thermal energy application or process; or
2. For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.

Serial number means, for a CAIR NO\textsubscript{X} Ozone Season allowance, the unique identification number assigned to each CAIR NO\textsubscript{X} Ozone Season allowance by the Administrator.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of section 502(c) of the Clean Air Act, a “source,” including a “source” with multiple units, shall be considered a single “facility.”

State means one of the States or the District of Columbia that is subject to the CAIR NO\textsubscript{X} Ozone Season Trading Program pursuant to §52.35 of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

1. In person;
2. By United States Postal Service; or
3. By other means of dispatch or transmission and delivery. Compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Title V operating permit means a permit issued under title V of the Clean Air Act and part 70 or part 71 of this chapter.

Title V operating permit regulations means the regulations that the Administrator has approved or issued as meeting the requirements of title V of the Clean Air Act and part 70 or 71 of this chapter.

Ton means 2,000 pounds. For the purpose of determining compliance with the CAIR NO\textsubscript{X} Ozone Season emissions
limitation, total tons of nitrogen oxides emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with subpart HHHH of this part, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

Topping-cycle cogeneration unit means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[ LHV = HHV - 10.55(W + 9H) \]

Where:

\[ LHV \] = lower heating value of fuel in Btu/lb,
\[ HHV \] = higher heating value of fuel in Btu/lb,
\[ W \] = Weight % of moisture in fuel, and
\[ H \] = Weight % of hydrogen in fuel.

Total energy output means, with regard to a cogeneration unit, the sum of useful power and useful thermal energy produced by the cogeneration unit.

Unit means a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device.

Unit operating day means a calendar day in which a unit combusts any fuel.

Unit operating hour or hour of unit operation means an hour in which a unit combusts any fuel.

Useful power means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Useful thermal energy means, with regard to a cogeneration unit, thermal energy that is:

(1) Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;

(2) Used in a heating application (e.g., space heating or domestic hot water heating); or

(3) Used in a space cooling application (i.e., thermal energy used by an absorption chiller).

Utility power distribution system means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

§ 97.304 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State shall be CAIR NOX Ozone Season units, and any source that includes one or more such units shall be a CAIR NOX Ozone Season source, subject to the requirements of this subpart and subparts BBBB through HHHH of this part: any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any
time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CAIR NO\textsubscript{X} Ozone Season unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CAIR NO\textsubscript{X} Ozone Season unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) The units in a State that meet the requirements set forth in paragraph (b)(1)(i), (b)(2)(i), or (b)(2)(ii) of this section shall not be CAIR NO\textsubscript{X} Ozone Season units:

(i) Any unit that is a CAIR NO\textsubscript{X} Ozone Season unit under paragraph (a)(1) or (2) of this section:

(A) Qualifying as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit; and

(B) Not serving at any time, since the later of November 15, 1990 or the start-up of the unit’s combustion chamber, a generator with nameplate capacity of more than 25 MWe supplying in any calendar year more than one-third of the unit’s potential electric output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(ii) If a unit qualifies as a cogeneration unit during the 12-month period starting on the date the unit first produces electricity and meets the requirements of paragraphs (b)(1)(i) of this section for at least one calendar year, but subsequently no longer meets all such requirements, the unit shall become a CAIR NO\textsubscript{X} Ozone Season unit during the 12-month period starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 1990 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more.

(c) A certifying official of an owner or operator of any unit may petition the Administrator at any time for a determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CAIR NO\textsubscript{X} Ozone Season Trading Program to the unit.

(1) Petition content. The petition shall be in writing and include the identification of the unit and the relevant facts about the unit. The petition and any other documents provided to the Administrator in connection with the petition shall include the following certification statement, signed by the certifying official: “I am authorized to make this submission on behalf of the owners and operators of the unit for
which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(2) Submission. The petition and any other documents provided in connection with the petition shall be submitted to the Director of the Clean Air Markets Division (or its successor), U.S. Environmental Protection Agency, who will act on the petition as the Administrator's duly authorized representative.

(3) Response. The Administrator will issue a written response to the petition and may request supplemental information relevant to the petition. The Administrator's determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CAIR NOX Ozone Season Trading Program to the unit shall be binding on the permitting authority unless the petition or other information or documents provided in connection with the petition are found to have contained significant, relevant errors or omissions.

(d) Notwithstanding paragraphs (a) and (b) of this section, if a State submits, and the Administrator approves, a State implementation plan revision in accordance with §51.123(ee)(1) of this chapter providing for the inclusion in the CAIR NOX Ozone Season Trading Program of all units that are not otherwise CAIR NOX Ozone Season units under paragraphs (a) and (b) of this section and that are NOX Budget units covered by the State's emissions trading program approved under §51.121(p) of this chapter, such units shall be CAIR NOX Ozone Season units as of the first date that they are NOX Budget units under the NOX Budget Trading Program under §51.121(p) of this chapter.

§ 97.305 Retired unit exemption.

(a)(1) Any CAIR NOX Ozone Season unit that is permanently retired and is not a CAIR NOX Ozone Season opt-in unit under subpart III of this part shall be exempt from the CAIR NOX Ozone Season Trading Program, except for the provisions of this section, §§97.302, 97.303, 97.304, 97.306(c)(4) through (7), 97.307, 97.308, and subparts BBBB and EEEE through GGGG of this part.

(2) The exemption under paragraph (a)(1) of this section shall become effective the day on which the CAIR NOX Ozone Season unit is permanently retired. Within 30 days of the unit's permanent retirement, the CAIR designated representative shall submit a statement to the permitting authority otherwise responsible for administering any CAIR permit for the unit and shall submit a copy of the statement to the Administrator. The statement shall state, in a format prescribed by the permitting authority, that the unit was permanently retired on a specific date and will comply with the requirements of paragraph (b) of this section.

(3) After receipt of the statement under paragraph (a)(2) of this section, the permitting authority will amend any permit under subpart CCCC of this part covering the source at which the unit is located to add the provisions and requirements of the exemption under paragraphs (a)(1) and (b) of this section.

(b) Special provisions. (1) A unit exempt under paragraph (a) of this section shall not emit any nitrogen oxides, starting on the date that the exemption takes effect.

(2) The Administrator or the permitting authority will allocate CAIR NOX Ozone Season allowances under subpart EEEE of this part to a unit exempt under paragraph (a) of this section.

(3) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (a) of this section shall retain at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-
year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the permitting authority or the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(4) The owners and operators and, to the extent applicable, the CAIR designated representative of a unit exempt under paragraph (a) of this section shall comply with the requirements of the CAIR NO\textsubscript{X} Ozone Season Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(5) A unit exempt under paragraph (a) of this section and located at a source that is required, or but for this exemption would be required, to have a title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete CAIR permit application under §97.322 for the unit not less than 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2009 or the date on which the unit resumes operation.

(6) On the earlier of the following dates, a unit exempt under paragraph (a) of this section shall lose its exemption:

(i) The date on which the CAIR designated representative submits a CAIR permit application for the unit under paragraph (b)(5) of this section;

(ii) The date on which the CAIR designated representative is required under paragraph (b)(5) of this section to submit a CAIR permit application for the unit; or

(iii) The date on which the unit resumes operation, if the CAIR designated representative is not required to submit a CAIR permit application for the unit.

(7) For the purpose of applying monitoring, reporting, and recordkeeping requirements under subpart HHHH of this part, a unit that loses its exemption under paragraph (a) of this section shall be treated as a unit that commences commercial operation on the first date on which the unit resumes operation.

§97.306 Standard requirements.

(a) Permit requirements. (1) The CAIR designated representative of each CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit and each CAIR NO\textsubscript{X} Ozone Season unit required to have a title V operating permit at the source shall:

(i) Submit to the permitting authority a complete CAIR permit application under §97.322 in accordance with the deadlines specified in §97.321; and

(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.

(2) The owners and operators of each CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit and each CAIR NO\textsubscript{X} Ozone Season unit required to have a title V operating permit at the source shall have a CAIR permit issued by the permitting authority under subpart CCCC of this part for the source and operate the source and the unit in compliance with such CAIR permit.

(3) Except as provided in subpart III of this part, the owners and operators of a CAIR NO\textsubscript{X} Ozone Season source that is not otherwise required to have a title V operating permit and each CAIR NO\textsubscript{X} Ozone Season unit that is not otherwise required to have a title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under subpart CCCC of this part for such CAIR NO\textsubscript{X} Ozone Season source and such CAIR NO\textsubscript{X} Ozone Season unit.

(b) Monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the CAIR designated representative, of each CAIR NO\textsubscript{X} Ozone Season source and each CAIR NO\textsubscript{X} Ozone Season unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of subpart HHHH of this part.

(2) The emissions measurements recorded and reported in accordance with subpart HHHH of this part shall be used to determine compliance by each CAIR NO\textsubscript{X} Ozone Season source with the CAIR NO\textsubscript{X} Ozone Season emissions limitation under paragraph (c) of this section.
Environmental Protection Agency § 97.306

(c) Nitrogen oxides ozone season emission requirements. (1) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR NOx Ozone Season source and each CAIR NOx Ozone Season unit at the source shall hold, in the source’s compliance account, CAIR NOx Ozone Season allowances available for compliance deductions for the control period under §97.354(a) in an amount not less than the tons of total nitrogen oxides emissions for the control period from all CAIR NOx Ozone Season units at the source, as determined in accordance with subpart HHHH of this part.

(2) A CAIR NOx Ozone Season unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of May 1, 2009 or the deadline for meeting the unit’s monitor certification requirements under §97.370(b)(1), (2), (3), or (7) and for each control period thereafter.

(3) A CAIR NOx Ozone Season allowance shall not be deducted, for compliance with the requirements under paragraph (c)(1) of this section, for a control period in a calendar year before the year for which the CAIR NOx Ozone Season allowance was allocated.

(4) CAIR NOx Ozone Season allowances shall be held in, deducted from, or transferred into or among CAIR NOx Ozone Season Allowance Tracking System accounts in accordance with subparts EEEE, FFFF, GGGG, and IIII of this part.

(5) A CAIR NOx Ozone Season allowance is a limited authorization to emit one ton of nitrogen oxides in accordance with the CAIR NOx Ozone Season Trading Program. No provision of the CAIR NOx Ozone Season Trading Program, the CAIR permit application, the CAIR permit, or an exemption under §97.305 and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization.

(6) A CAIR NOx Ozone Season allowance does not constitute a property right.

(7) Upon recordation by the Administrator under subpart EEEE, FFFF, GGGG, or IIII of this part, every allocation, transfer, or deduction of a CAIR NOx Ozone Season allowance to or from a CAIR NOx Ozone Season source’s compliance account is incorporated automatically in any CAIR permit of the source.

(d) Excess emissions requirements. If a CAIR NOx Ozone Season source emits nitrogen oxides during any control period in excess of the CAIR NOx Ozone Season emissions limitation, then:

(1) The owners and operators of the source and each CAIR NOx Ozone Season unit at the source shall surrender the CAIR NOx Ozone Season allowances required for deduction under §97.354(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable State law; and

(2) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart, the Clean Air Act, and applicable State law.

(e) Recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of the CAIR NOx Ozone Season source and each CAIR NOx Ozone Season unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the permitting authority or the Administrator.

(i) The certificate of representation under §97.313 for the CAIR designated representative for the source and each CAIR NOx Ozone Season unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the submission of a new certificate of representation under §97.313 changing the CAIR designated representative.

(ii) All emissions monitoring information, in accordance with subpart HHHH of this part, provided that to the extent that subpart HHHH of this part provides for a 3-year period for recordkeeping, the 3-year period shall apply.
§ 97.307 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CAIR NO$_X$ Ozone Season Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CAIR NO$_X$ Ozone Season Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CAIR NO$_X$ Ozone Season Trading Program, falls on a weekend or a State or Federal holiday, the time period shall be extended to the next business day.

§ 97.308 Appeal procedures.

The appeal procedures for decisions of the Administrator under the CAIR NO$_X$ Ozone Season Trading Program are set forth in part 78 of this chapter.

APPENDIX A TO SUBPART AAAA OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVIZIONS CONCERNING APPLICABILITY

The following States have State Implementation Plan revisions under §51.123(ee)(1) of this chapter approved by the Administrator and providing for expansion of the applicability provisions to include all non-EGUs subject to the respective State’s emission trading program approved under §51.121(p) of this chapter:

- Michigan
- Tennessee

[65 FR 2727, Jan. 18, 2000, as amended at 72 FR 72262, Dec. 20, 2007; 74 FR 61537, Nov. 25, 2009]

Subpart BBBB—CAIR Designated Representative for CAIR NO$_X$ Ozone Season Sources

§ 97.310 Authorization and responsibilities of CAIR designated representative.

(a) Except as provided under §97.311, each CAIR NO$_X$ Ozone Season source, including all CAIR NO$_X$ Ozone Season units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NO$_X$ Ozone Season Trading Program concerning the source or any CAIR NO$_X$ Ozone Season unit at the source.
Environmental Protection Agency

§ 97.312

(b) The CAIR designated representative of the CAIR NO\textsubscript{X} Ozone Season source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NO\textsubscript{X} Ozone Season units at the source and shall act in accordance with the certification statement in §97.313(a)(4)(iv).

(c) Upon receipt by the Administrator of a complete certificate of representation under §97.313, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR NO\textsubscript{X} Ozone Season source represented and each CAIR NO\textsubscript{X} Ozone Season unit at the source in all matters pertaining to the CAIR NO\textsubscript{X} Ozone Season Trading Program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the permitting authority, the Administrator, or a court regarding the source or unit.

(d) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account will be established for a CAIR NO\textsubscript{X} Ozone Season unit at a source, until the Administrator has received a complete certificate of representation under §97.313 for a CAIR designated representative of the source and the CAIR NO\textsubscript{X} Ozone Season units at the source.

(e)(1) Each submission under the CAIR NO\textsubscript{X} Ozone Season Trading Program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR NO\textsubscript{X} Ozone Season source on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: “I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(2) The permitting authority and the Administrator will accept or act on a submission made on behalf of owner or operators of a CAIR NO\textsubscript{X} Ozone Season source or a CAIR NO\textsubscript{X} Ozone Season unit only if the submission has been made, signed, and certified in accordance with paragraph (e)(1) of this section.

§ 97.311 Alternate CAIR designated representative.

(a) A certificate of representation under §97.313 may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.

(b) Upon receipt by the Administrator of a complete certificate of representation under §97.313, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.

(c) Except in this section and §§97.302, 97.310(a) and (d), 97.312, 97.313, 97.315, 97.351, and 97.382, whenever the term “CAIR designated representative” is used in subparts AAAAA through IIII of this part, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

§ 97.312 Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

(a) Changing CAIR designated representative. The CAIR designated representative may be changed at any
§ 97.313 Certificate of representation.

(a) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the CAIR NO\textsubscript{X} Ozone Season source and each CAIR NO\textsubscript{X} Ozone Season unit at the source.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative.

(3) A list of the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source and of each CAIR NO\textsubscript{X} Ozone Season unit at the source.

(4) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative—

(i) "I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR NO\textsubscript{X} Ozone Season unit at the source."

(ii) "I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO\textsubscript{X} Ozone Season Trading Program on behalf of the owners and operators of the source and of each CAIR NO\textsubscript{X} Ozone Season unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions."

(iii) "I certify that the owners and operators of the source and of each CAIR NO\textsubscript{X} Ozone Season unit at the source shall be bound by any order issued to me by the Administrator, the permitting authority, or a court regarding the source or unit."

(b) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.313. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR NO\textsubscript{X} Ozone Season source and the CAIR NO\textsubscript{X} Ozone Season units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CAIR NO\textsubscript{X} Ozone Season source or a CAIR NO\textsubscript{X} Ozone Season unit is not included in the list of owners and operators in the certificate of representation under §97.313, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the Administrator, or a court, as if the owner or operator were included in such list.

(2) Within 30 days following any change in the owners and operators of a CAIR NO\textsubscript{X} Ozone Season source or a CAIR NO\textsubscript{X} Ozone Season unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under §97.313 amending the list of owners and operators to include the change.
Environmental Protection Agency § 97.315

(iv) "Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR NOX Ozone Season unit, or where a utility or industrial customer purchases power from a CAIR NOX Ozone Season unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the 'CAIR designated representative' or 'alternate CAIR designated representative', as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR NOX Ozone Season unit at the source; and CAIR NOX Ozone Season allowances and proceeds of transactions involving CAIR NOX Ozone Season allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR NOX Ozone Season allowances by contract, CAIR NOX Ozone Season allowances and proceeds of transactions involving CAIR NOX Ozone Season allowances will be deemed to be held or distributed in accordance with the contract."

§ 97.315 Delegation by CAIR designated representative and alternate CAIR designated representative.

(a) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(b) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this part.

(c) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such CAIR designated representative and alternate CAIR designated representative.

§ 97.314 Objections concerning CAIR designated representative.

(a) Once a complete certificate of representation under §97.313 has been submitted and received, the permitting authority and the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under §97.313 is received by the Administrator.

(b) Except as provided in §97.312(a) or (b), no objection or other communication submitted to the permitting authority or the Administrator concerning the authorization, or any representation, action, inaction, or submission, of the CAIR designated representative shall affect any representation, action, inaction, or submission of the CAIR designated representative or the finality of any decision or order by the permitting authority or the Administrator under the CAIR NOX Ozone Season Trading Program.

(c) Neither the permitting authority nor the Administrator will adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any CAIR designated representative, including private legal disputes concerning the proceeds of CAIR NOX Ozone Season allowance transfers.
natural person (referred to as an "agent");

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

(4) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:

(i) "I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.315(d) shall be deemed to be an electronic submission by me."

(ii) "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.315(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.315 is terminated."

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation must contain, with regard to the CAIR NO\textsubscript{X} Ozone Season source and the CAIR NO\textsubscript{X} Ozone Season units at the source covered by the CAIR permit, all applicable CAIR NO\textsubscript{X} Ozone Season Trading Program, CAIR NO\textsubscript{X} Annual Trading Program, and CAIR SO\textsubscript{2} Trading Program requirements and shall be a complete and separable portion of the title V operating permit or other federally enforceable permit under paragraph (a) of this section.

§97.321 Submission of CAIR permit applications.

(a) Duty to apply. The CAIR designated representative of any CAIR NO\textsubscript{X} Ozone Season source required to have a title V operating permit shall submit to the permitting authority a complete CAIR permit application under §97.322 for the source covering each CAIR NO\textsubscript{X} Ozone Season unit at the source at least 18 months (or such lesser time provided by the permitting authority) before the later of January 1, 2009 or the date on which the CAIR NO\textsubscript{X} Ozone Season unit commences commercial operation, except as provided in §97.383(b).

(b) Duty to reapply. For a CAIR NO\textsubscript{X} Ozone Season source required to have a
title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under §97.322 for the source covering each CAIR NOx Ozone Season unit at the source to renew the CAIR permit in accordance with the permitting authority’s title V operating permits regulations addressing permit renewal, except as provided in §97.383(b).

§ 97.322 Information requirements for CAIR permit applications.
A complete CAIR permit application shall include the following elements concerning the CAIR NOx Ozone Season source for which the application is submitted, in a format prescribed by the permitting authority:
(a) Identification of the CAIR NOx Ozone Season source;
(b) Identification of each CAIR NOx Ozone Season unit at the CAIR NOx Ozone Season source; and
(c) The standard requirements under §97.306.

§ 97.323 CAIR permit contents and term.
(a) Each CAIR permit will contain, in a format prescribed by the permitting authority, all elements required for a complete CAIR permit application under §97.322.
(b) Each CAIR permit is deemed to incorporate automatically the definitions of terms under §97.302 and, upon recordation by the Administrator under subpart EEEE, FFFF, GGGG, or IIII of this part, every allocation, transfer, or deduction of a CAIR NOx Ozone Season allowance to or from the compliance account of the CAIR NOx Ozone Season source covered by the permit.
(c) The term of the CAIR permit will be set by the permitting authority, as necessary to facilitate coordination of the renewal of the CAIR permit with issuance, revision, or renewal of the CAIR NOx Ozone Season source’s title V operating permit or other federally enforceable permit as applicable.

§ 97.324 CAIR permit revisions.
Except as provided in §97.323(b), the permitting authority will revise the CAIR permit, as necessary, in accordance with the permitting authority’s title V operating permits regulations or the permitting authority’s regulations for other federally enforceable permits as applicable addressing permit revisions.

Subpart DDDD [Reserved]

Subpart EEEE—CAIR NOx Ozone Season Allowance Allocations

§ 97.340 State trading budgets.
(a) Except as provided in paragraph (b) of this section, the State trading budgets for annual allocations of CAIR NOx Ozone Season allowances for the control periods in 2009 through 2014 and in 2015 and thereafter are respectively as follows:

<table>
<thead>
<tr>
<th>State</th>
<th>State trading budget for 2009–2014 (tons)</th>
<th>State trading budget for 2015 and thereafter (tons)</th>

(b) Upon approval by the Administrator of a State’s State implementation plan revision under §51.123(ee)(1) of this chapter providing for the inclusion in the CAIR NOx Ozone Season Trading Program of all units that are not otherwise CAIR NOx Ozone Season units under §97.304(a) and (b) and that are NOx Budget units covered by the State’s emissions trading program approved under §51.121(p), the amount in the State trading budget for a control period in a calendar year will be the sum of the amount set forth for the
§ 97.341 Timing requirements for CAIR NOx Ozone Season allowance allocations.

(a) The Administrator will determine by order the CAIR NOx Ozone Season allowance allocations, in accordance with §97.342(a) and (b), for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014.

(b) By July 31, 2011 and July 31 of each year thereafter, the Administrator will determine by order the CAIR NOx Ozone Season allowance allocations, in accordance with §97.342(a) and (b), for the control period in the fourth year after the year of the applicable deadline for determination under this paragraph.

(c) By April 30, 2009 and April 30 of each year thereafter, the Administrator will determine by order the CAIR NOx Ozone Season allowance allocations, in accordance with §97.342(a), (c), and (d), for the control period in the year of the applicable deadline for determination under this paragraph.

(d) The Administrator will make available to the public each determination of CAIR NOx Ozone Season allowance allocations under paragraph (a) of this section for each CAIR NOx Ozone Season unit, in accordance with §97.342. Based on any such objections, the Administrator will adjust each determination to the extent necessary to ensure that it is in accordance with §97.342.

§ 97.342 CAIR NOx Ozone Season allowance allocations.

(a)(1) The baseline heat input (in mmBtu) used with respect to CAIR NOx Ozone Season allowance allocations under paragraph (b) of this section for each CAIR NOx Ozone Season unit will be:

(i) For units commencing operation before January 1, 2001 the average of the 3 highest amounts of the unit’s adjusted control period heat input for 2000 through 2004, with the adjusted control period heat input for each year calculated as follows:

(A) If the unit is coal-fired during the year, the unit’s control period heat input for such year is multiplied by 100 percent;

(B) If the unit is oil-fired during the year, the unit’s control period heat input for such year is multiplied by 60 percent; and

(C) If the unit is not subject to paragraph (a)(1)(i)(A) or (B) of this section, the unit’s control period heat input for such year is multiplied by 40 percent.

(ii) For units commencing operation on or after January 1, 2001 and operating each calendar year during a period of 5 or more consecutive calendar years, the average of the 3 highest amounts of the unit’s total converted control period heat input over the first such 5 years.

(b)(i) A unit’s control period heat input, and a unit’s status as coal-fired or oil-fired, for a calendar year under paragraph (a)(1)(i) of this section, and a unit’s total tons of NOx emissions during a control period in a calendar year under paragraph (c)(3) of this section, will be determined in accordance with part 75 of this chapter, to the extent the unit was otherwise subject to the requirements of part 75 of this chapter for the year, or will be based on the best available data reported to the Administrator for the unit (in a format prescribed by the Administrator), to the extent the unit was not otherwise subject to the requirements of part 75 of this chapter for the year.

(ii) A unit’s converted control period heat input for a calendar year specified under paragraph (a)(1)(i) of this section equals:

(A) Except as provided in paragraph (a)(2)(ii)(B) or (C) of this section, the control period gross electrical output of the generator or generators served by the unit multiplied by 7,900 Btu/kWh, if the unit is coal-fired for the year, or 6,675 Btu/kWh, if the unit is not coal-fired for the year, and divided by 1,000,000 Btu/mmBtu, provided that if a generator is served by 2 or more units, the gross electrical output of the generator will be attributed to
(B) For a unit that is a boiler and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the total heat energy (in Btu) of the steam produced by the boiler during the control period, divided by 0.8 and by 1,000,000 Btu/mmBtu; or

(C) For a unit that is a combustion turbine and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the control period gross electrical output of the enclosed device comprising the compressor, combustor, and turbine multiplied by 3,413 Btu/kWh, plus the total heat energy (in Btu) of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by 1,000,000 Btu/mmBtu.

(iii) Gross electrical output and total heat energy under paragraph (a)(2)(ii) of this section will be determined based on the best available data reported to the Administrator for the unit (in a format prescribed by the Administrator).

(3) The Administrator will determine what data are the best available data under paragraph (a)(2) of this section by weighing the likelihood that data are accurate and reliable and giving greater weight to data submitted to a governmental entity in compliance with legal requirements or substantiated by an independent entity.

(b)(1) For each control period in 2009 and thereafter, the Administrator will allocate CAIR NOX Ozone Season allowances to each CAIR NOX Ozone Season unit under paragraph (b)(1) of this section in an amount determined by multiplying the total amount of CAIR NOX Ozone Season allowances allocated under paragraph (b)(1) of this section by the ratio of the baseline heat input of such CAIR NOX Ozone Season unit to the total amount of baseline heat input of all such CAIR NOX Ozone Season units in the State and rounding to the nearest whole allowance as appropriate.

(c) For each control period in 2009 and thereafter, the Administrator will allocate CAIR NOX Ozone Season allowances to CAIR NOX Ozone Season units in a State that are not allocated CAIR NOX Ozone Season allowances under paragraph (b) of this section because the units do not yet have a baseline heat input under paragraph (a) of this section or because the units have a baseline heat input but all CAIR NOX Ozone Season allowances available under paragraph (b) of this section for the control period are already allocated, in accordance with the following procedures:

(1) The Administrator will establish a separate new unit set-aside for each control period. Each new unit set-aside will be allocated CAIR NOX Ozone Season allowances equal to 5 percent for a control period in 2009 through 2014, and 3 percent for a control period in 2015 and thereafter, of the amount of tons of NOX emissions in the applicable State trading budget under §97.340.

(2) The CAIR designated representative of such a CAIR NOX Ozone Season unit may submit to the Administrator a request, in a format specified by the Administrator, to be allocated CAIR NOX Ozone Season allowances, starting with the later of the control period in 2009 or the first control period after the control period in which the CAIR NOX Ozone Season unit commences commercial operation and until the first control period for which the unit is allocated CAIR NOX Ozone Season allowances under paragraph (b) of this section. A separate CAIR NOX Ozone Season allowance allocation request for each control period for which CAIR NOX Ozone Season allowances are sought must be submitted on or before
February 1 before such control period and after the date on which the CAIR NOₓ Ozone Season unit commences commercial operation.

(3) In a CAIR NOₓ Ozone Season allowance allocation request under paragraph (c)(2) of this section, the CAIR designated representative may request for a control period CAIR NOₓ Ozone Season allowances in an amount not exceeding the CAIR NOₓ Ozone Season unit's total tons of NOₓ emissions during the control period immediately before such control period.

(4) The Administrator will review each CAIR NOₓ Ozone Season allowance allocation request under paragraph (c)(2) of this section and will allocate CAIR NOₓ Ozone Season allowances for each control period pursuant to such request as follows:

(i) The Administrator will accept an allowance allocation request only if the request meets, or is adjusted by the Administrator as necessary to meet, the requirements of paragraphs (c)(2) and (3) of this section.

(ii) On or after February 1 before the control period, the Administrator will determine the sum of the CAIR NOₓ Ozone Season allowances requested (as adjusted under paragraph (c)(4)(i) of this section) in all allowance allocation requests accepted under paragraph (c)(4)(i) of this section for the control period.

(iii) If the amount of CAIR NOₓ Ozone Season allowances in the new unit set-aside for the control period is greater than or equal to the sum under paragraph (c)(4)(ii) of this section, then the Administrator will allocate the amount of CAIR NOₓ Ozone Season allowances requested (as adjusted under paragraph (c)(4)(i) of this section) to each CAIR NOₓ Ozone Season unit covered by an allowance allocation request accepted under paragraph (c)(4)(i) of this section.

(iv) If the amount of CAIR NOₓ Ozone Season allowances in the new unit set-aside for the control period is less than the sum under paragraph (c)(4)(ii) of this section, then the Administrator will allocate to each CAIR NOₓ Ozone Season unit covered by an allowance allocation request accepted under paragraph (c)(4)(i) of this section the amount of the CAIR NOₓ Ozone Season allowances requested (as adjusted under paragraph (c)(4)(i) of this section), multiplied by the amount of CAIR NOₓ Ozone Season allowances in the new unit set-aside for the control period, divided by the sum determined under paragraph (c)(4)(ii) of this section, and rounded to the nearest whole allowance as appropriate.

(v) The Administrator will notify each CAIR designated representative that submitted an allowance allocation request of the amount of CAIR NOₓ Ozone Season allowances (if any) allocated for the control period to the CAIR NOₓ Ozone Season unit covered by the request.

(d) If, after completion of the procedures under paragraph (c)(4) of this section for a control period, any unallocated CAIR NOₓ Ozone Season allowances remain in the new unit set-aside under paragraph (c) of this section for a State for the control period, the Administrator will allocate to each CAIR NOₓ Ozone Season unit that was allocated CAIR NOₓ Ozone Season allowances under paragraph (b) of this section in the State an amount of CAIR NOₓ Ozone Season allowances equal to the total amount of such remaining unallocated CAIR NOₓ Ozone Season allowances, multiplied by the unit's allocation under paragraph (b) of this section, divided by 95 percent for a control period during 2009 through 2014, and 97 percent for a control period during 2015 and thereafter, of the amount of tons of NOₓ emissions in the applicable State trading budget under §97.340, and rounded to the nearest whole allowance as appropriate.

(e) If the Administrator determines that CAIR NOₓ Ozone Season allowances were allocated under paragraphs (a) and (b) of this section, paragraphs (a) and (c) of this section, or paragraph (d) of this section for a control period and that the recipient of the allocation is not actually a CAIR NOₓ Ozone Season unit under §97.304 in such control period, then the Administrator will notify the CAIR designated representative and will act in accordance with the following procedures:

(1) Except as provided in paragraph (e)(2) or (3) of this section, the Administrator will not record such CAIR NOₓ Ozone Season allowances under §97.353.
(2) If the Administrator already recorded such CAIR NO\textsubscript{X} Ozone Season allowances under §97.353 and if the Administrator makes such determinations before making deductions for the source that includes such recipient under §97.354(b) for the control period, then the Administrator will deduct from the account in which such CAIR NO\textsubscript{X} Ozone Season allowances were recorded under §97.353 an amount of CAIR NO\textsubscript{X} Ozone Season allowances allocated for the same or a prior control period equal to the amount of such already recorded CAIR NO\textsubscript{X} Ozone Season allowances. The CAIR designated representative shall ensure that there are sufficient CAIR NO\textsubscript{X} Ozone Season allowances in such account for completion of the deduction.

(3) If the Administrator already recorded such CAIR NO\textsubscript{X} Ozone Season allowances under §97.353 and if the Administrator makes such determinations after making deductions for the source that includes such recipient under §97.354(b) for the control period, then the Administrator will apply paragraph (e)(1) or (2) of this section, as appropriate, to any subsequent control period for which CAIR NO\textsubscript{X} Ozone Season allowances were allocated to such recipient.

(4) The Administrator will transfer the CAIR NO\textsubscript{X} Ozone Season allowances that are not recorded, or that are deducted, in accordance with paragraphs (e)(1), (2), and (3) of this section to a new unit set-aside for the State in which such recipient is located.

§97.343 Alternative of allocation of CAIR NO\textsubscript{X} Ozone Season allowances by permitting authority.

(a) Notwithstanding §§97.341, 97.342, and 97.353 if a State submits, and the Administrator approves, a State implementation plan revision in accordance with §51.123(ee)(2) of this chapter providing for allocation of CAIR NO\textsubscript{X} Ozone Season allowances by the permitting authority, then the permitting authority shall make such allocations in accordance with such approved State implementation plan revision.

(b) In implementing paragraph (a) of this section and §§97.341, 97.342, and 97.353, the Administrator will ensure that the total amount of CAIR NO\textsubscript{X} Ozone Season allowances allocated, under such provisions and under a State’s State implementation plan revision approved in accordance with §51.123(ee)(2) of this chapter, for a control period for CAIR NO\textsubscript{X} Ozone Season sources in the State or for other entities specified by the permitting authority will not exceed the State’s State trading budget for the year of the control period.

APPENDIX A TO SUBPART EEEE OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING ALLOCATIONS

The following States have State Implementation Plan revisions under §51.123(ee)(2) of this chapter approved by the Administrator and providing for allocation of CAIR NO\textsubscript{X} Ozone Season allowances by the permitting authority under §97.343(a):

Indiana
Louisiana
Michigan
North Carolina
Ohio
South Carolina
Tennessee
West Virginia (for control periods 2009–2014)
Wisconsin

Subpart FFFF—CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System

§97.350 [Reserved]

§97.351 Establishment of accounts.

(a) Compliance accounts. Except as provided in §97.384(e), upon receipt of a complete certificate of representation under §97.313, the Administrator will establish a compliance account for the
CAIR NO\textsubscript{X} Ozone Season source for which the certificate of representation was submitted, unless the source already has a compliance account.

(b) General accounts—(1) Application for general account. (i) Any person may apply to open a general account for the purpose of holding and transferring CAIR NO\textsubscript{X} Ozone Season allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the Administrator and shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(B) Organization name and type of organization, if applicable;

(C) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership interest with respect to the CAIR NO\textsubscript{X} Ozone Season allowances held in the general account;

(D) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: ‘‘I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO\textsubscript{X} Ozone Season Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the Administrator or a court regarding the general account.’’

(E) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.

(iii) Unless otherwise required by the permitting authority or the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the permitting authority or the Administrator. Neither the permitting authority nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(2) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative.

(i) Upon receipt by the Administrator of a complete application for a general account under paragraph (b)(1) of this section:

(A) The Administrator will establish a general account for the person or persons for whom the application is submitted.

(B) The CAIR authorized account representative and any alternate CAIR authorized account representative shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR NO\textsubscript{X} Ozone Season allowances held in the general account in all matters pertaining to the CAIR NO\textsubscript{X} Ozone Season Trading Program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the Administrator or a court regarding the general account.

(C) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be binding on the person or persons subject to the binding agreement with the CAIR authorized account representative or the alternate CAIR authorized account representative and each such person shall be fully bound by such representations, actions, inactions, or submissions and by any order or decision issued to such person by the Administrator or a court regarding the general account.
CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.

(ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR NOx Ozone Season allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: “I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR NOx Ozone Season allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(iii) The Administrator will accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (b)(2)(ii) of this section.

(3) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest. (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative and any alternate CAIR authorized account representative shall be binding on the new CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NOx Ozone Season allowances in the general account.

(ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (b)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NOx Ozone Season allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CAIR NOx Ozone Season allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the Administrator or a court, as if the person were included in such list.

(B) Within 30 days following any change in the persons having an ownership interest with respect to CAIR NOx Ozone Season allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR NOx Ozone Season allowances in the general account to include the change.
(4) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative. (i) Once a complete application for a general account under paragraph (b)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (b)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (b)(3)(i) or (ii) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the Administrator under the CAIR NO\textsubscript{X} Ozone Season Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR NO\textsubscript{X} Ozone Season allowance transfers.

(5) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative. (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts PFFF and GGGG of this part.

(ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under subparts PFFF and GGGG of this part.

(iii) In order to delegate authority to make an electronic submission to the Administrator in accordance with paragraph (b)(5)(i) or (ii) of this section, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (b)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: ‘‘I agree that any electronic submission to the Administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.351(b)(5)(iv) shall be deemed to be an electronic submission by me.’’; and

(E) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.351(b)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.351(b)(5) is terminated.’’.

(iv) A notice of delegation submitted under paragraph (b)(5)(iii) of this section shall be effective, with regard to
the CAIR authorized account rep-resentative or alternate CAIR author-ized account representative identified in such notice, upon receipt of such no-tice by the Administrator and until re-cipt by the Administrator of a super-seding notice of delegation submitted by such CAIR authorized account rep-resentative or alternate CAIR author-ized account representative, as appro-priate. The superseding notice of dele-gation may replace any previously identified agent, add a new agent, or elimi-nate entirely any delegation of authority.

(v) Any electronic submission cov-ered by the certification in paragraph (b)(5)(ii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (b)(5)(iv) of this section shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative sub-mitting such notice of delegation.

(c) Account identification. The Adminis-trator will assign a unique identi-fying number to each account estab-lished under paragraph (a) or (b) of this section.

§ 97.353 Recordation of CAIR NO\textsubscript{X} Ozone Season allowance allocations.

(a) By September 30, 2007, the Adminis-trator will record in the CAIR NO\textsubscript{X} Ozone Season sources compliance account the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source in ac-cordance with §97.342(a) and (b) for the control period in 2009.

(b) By September 30, 2008, the Adminis-trator will record in the CAIR NO\textsubscript{X} Ozone Season sources compliance account the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source in ac-cordance with §97.342(a) and (b) for the control period in 2010.

(c) By September 30, 2009, the Adminis-trator will record in the CAIR NO\textsubscript{X} Ozone Season source’s compliance ac-count the CAIR Ozone Season NO\textsubscript{X} allow-lows allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source in ac-cordance with §97.342(a) and (b) for the control periods in 2011, 2012, and 2013.

(d) By December 1, 2010 and December 1 of each year thereafter, the Adminis-trator will record in the CAIR NO\textsubscript{X} Ozone Season source’s compliance ac-count the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source in ac-cordance with §97.342(a) and (b) for the control period in the fourth year after the year of the applicable deadline for recordation under this paragraph.

(e) By September 1, 2009 and Sep-tember 1 of each year thereafter, the Adminis-trator will record in the CAIR NO\textsubscript{X} Ozone Season source’s compliance account the CAIR NO\textsubscript{X} Ozone Season allowances allocated for the CAIR NO\textsubscript{X} Ozone Season units at the source in ac-cordance with §97.342(a) and (c) for the control period in the year of the appli-cable deadline for recordation under this paragraph.

(f) Serial numbers for allocated CAIR NO\textsubscript{X} Ozone Season allowances. When re-cording the allocation of CAIR NO\textsubscript{X} Ozone Season allowances for a CAIR NO\textsubscript{X} Ozone Season unit in a compliance account, the Administrator will assign each CAIR NO\textsubscript{X} Ozone Season allowance a unique identification number that will include digits identifying the year of the control period for which the CAIR NO\textsubscript{X} Ozone Season allowance is allocated.

§ 97.354 Compliance with CAIR NO\textsubscript{X} emissions limitation.

(a) Allowance transfer deadline. The CAIR NO\textsubscript{X} Ozone Season allowances are available to be deducted for compliance with a source’s CAIR NO\textsubscript{X} Ozone Sea-son emissions limitation for a control period in a given calendar year only if the CAIR NO\textsubscript{X} Ozone Season allowances:

(1) Were allocated for the control pe-riod in the year or a prior year; and
(2) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR NOX Ozone Season allowance transfer correctly submitted for recordation under §§97.360 and 97.361 by the allowance transfer deadline for the control period.

(b) Deductions for compliance. Following the recordation, in accordance with §97.361, of CAIR NOX Ozone Season allowance transfers submitted for recordation in a source’s compliance account by the allowance transfer deadline for a control period, the Administrator will deduct from the compliance account CAIR NOX Ozone Season allowances available under paragraph (a) of this section in order to determine whether the source meets the CAIR NOX Ozone Season emissions limitation for the control period, as follows:

(1) Until the amount of CAIR NOX Ozone Season allowances deducted equals the number of tons of total nitrogen oxides emissions, determined in accordance with subpart HHHH of this part, from all CAIR NOX Ozone Season units at the source for the control period; or

(2) If there are insufficient CAIR NOX Ozone Season allowances to complete the deductions in paragraph (b)(1) of this section, until no more CAIR NOX Ozone Season allowances available under paragraph (a) of this section remain in the compliance account.

(c)(1) Identification of CAIR NOX Ozone Season allowances by serial number. The CAIR authorized account representative for a source’s compliance account may request that specific CAIR NOX Ozone Season allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (b) or (d) of this section. Such request shall be submitted to the Administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the Administrator, the identification of the CAIR NOX Ozone Season source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CAIR NOX Ozone Season allowances under paragraph (b) or (d) of this section from the source’s compliance account, in the absence of an identification or in the case of a partial identification of CAIR NOX Ozone Season allowances by serial number under paragraph (c)(1) of this section, on a first-in, first-out (FIFO) accounting basis in the following order:

(i) Any CAIR NOX Ozone Season allowances that were allocated to the units at the source, in the order of recordation; and then

(ii) Any CAIR NOX Ozone Season allowances that were allocated to any entity and transferred and recorded in the compliance account pursuant to subpart GGGG of this part, in the order of recordation.

(d) Deductions for excess emissions. (1) After making the deductions for compliance under paragraph (b) of this section for a control period in a calendar year in which the CAIR NOX Ozone Season source has excess emissions, the Administrator will deduct from the source’s compliance account an amount of CAIR NOX Ozone Season allowances, allocated for the control period in the immediately following calendar year, equal to 3 times the number of tons of the source’s excess emissions.

(2) Any allowance deduction required under paragraph (d)(1) of this section shall not affect the liability of the owners and operators of the CAIR NOX Ozone Season source or the CAIR NOX Ozone Season units at the source for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violations, as ordered under the Clean Air Act or applicable State law.

(e) Recordation of deductions. The Administrator will record in the appropriate compliance account all deductions from such an account under paragraphs (b) and (d) of this section and subpart III.

(f) Administrator’s action on submissions. (1) The Administrator may review and conduct independent audits concerning any submission under the CAIR NOX Ozone Season Trading Program and make appropriate adjustments of the information in the submissions.

(2) The Administrator may deduct CAIR NOX Ozone Season allowances
from or transfer CAIR NO\textsubscript{X} Ozone Season allowances to a source's compliance account based on the information in the submissions, as adjusted under paragraph (d)(1) of this section, and record such deductions and transfers.

§ 97.355 Banking.
(a) CAIR NO\textsubscript{X} Ozone Season allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.
(b) Any CAIR NO\textsubscript{X} Ozone Season allowance that is held in a compliance account or a general account will remain in such account unless and until the CAIR NO\textsubscript{X} Ozone Season allowance is deducted or transferred under §97.342, §97.354, §97.356, or subpart GGGG or IIII of this part.

§ 97.356 Account error.
The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System account. Within 10 business days of making such correction, the Administrator will notify the CAIR authorized account representative for the account.

§ 97.357 Closing of general accounts.
(a) The CAIR authorized account representative of a general account may submit to the Administrator a request to close the account, which shall include a correctly submitted allowance transfer under §§97.360 and 97.361 for any CAIR NO\textsubscript{X} Ozone Season allowances in the account to one or more other CAIR NO\textsubscript{X} Ozone Season Allowance Tracking System accounts.
(b) If a general account has no allowance transfers in or out of the account for a 12-month period or longer and does not contain any CAIR NO\textsubscript{X} Ozone Season allowances, the Administrator may notify the CAIR authorized account representative for the account that the account will be closed following 20 business days after the notice is sent. The account will be closed after the 20-day period unless, before the end of the 20-day period, the Administrator receives a correctly submitted transfer of CAIR NO\textsubscript{X} Ozone Season allowances into the account under §§97.360 and 97.361 or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

Subpart GGGG—CAIR NO\textsubscript{X} Ozone Season Allowance Transfers

§ 97.360 Submission of CAIR NO\textsubscript{X} Ozone Season allowance transfers.
A CAIR authorized account representative seeking recordation of a CAIR NO\textsubscript{X} Ozone Season allowance transfer shall submit the transfer to the Administrator. To be considered correctly submitted, the CAIR NO\textsubscript{X} Ozone Season allowance transfer shall include the following elements, in a format specified by the Administrator:
(a) The account numbers for both the transferor and transferee accounts;
(b) The serial number of each CAIR NO\textsubscript{X} Ozone Season allowance that is in the transferor account and is to be transferred; and
(c) The name and signature of the CAIR authorized account representative of the transferor account and the date signed.

§ 97.361 EPA recordation.
(a) Within 5 business days (except as provided in paragraph (b) of this section) of receiving a CAIR NO\textsubscript{X} Ozone Season allowance transfer, the Administrator will record a CAIR NO\textsubscript{X} Ozone Season allowance transfer by moving each CAIR NO\textsubscript{X} Ozone Season allowance from the transferor account to the transferee account as specified by the request, provided that:
(1) The transfer is correctly submitted under §97.360; and
(2) The transferor account includes each CAIR NO\textsubscript{X} Ozone Season allowance identified by serial number in the transfer.
(b) A CAIR NO\textsubscript{X} Ozone Season allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR NO\textsubscript{X} Ozone Season allowances allocated for any control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions under §97.354 for the control
§ 97.362 Notification.

(a) Notification of recordation. Within 5 business days of recordation of a CAIR NOx Ozone Season allowance transfer under §97.361, the Administrator will notify the CAIR authorized account representatives of both the transferor and transferee accounts.

(b) Notification of non-recordation. Within 10 business days of receipt of a CAIR NOx Ozone Season allowance transfer that fails to meet the requirements of §97.361(a), the Administrator will notify the CAIR authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer, and
(2) The reasons for such non-recordation.

(c) Nothing in this section shall preclude the submission of a CAIR NOx Ozone Season allowance transfer for recordation following notification of non-recordation.

Subpart HHHH—Monitoring and Reporting

§ 97.370 General requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR NOx Ozone Season unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and in subpart H of part 75 of this chapter. For purposes of complying with such requirements, the definitions in §97.302 and in §72.2 of this chapter shall apply, and the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CAIR NOx Ozone Season unit,” “CAIR designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively, as defined in §97.302. The owner or operator of a unit that is not a CAIR NOx Ozone Season unit but that is monitored under §75.72(b)(2)(i) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CAIR NOx Ozone Season unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR NOx Ozone Season unit shall:

(1) Install all monitoring systems required under this subpart for monitoring NOx mass emissions and individual unit heat input (including all systems required to monitor NOx emission rate, NOx concentration, stack gas moisture content, stack gas flow rate, CO2 or O2 concentration, and fuel flow rate, as applicable, in accordance with §§75.71 and 75.72 of this chapter);

(2) Successfully complete all certification tests required under §97.371 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the following dates. The owner or operator shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the following dates.

(1) For the owner or operator of a CAIR NOx Ozone Season unit that commences commercial operation before July 1, 2007, by May 1, 2008.

(2) For the owner or operator of a CAIR NOx Ozone Season unit that commences commercial operation on or after July 1, 2007 and that reports on an annual basis under §97.374(d), by the later of the following dates:

(i) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation; or
(ii) May 1, 2008.
(3) For the owner or operator of a CAIR NOₓ Ozone Season unit that commences commercial operation on or after July 1, 2007 and that reports on a control period basis under §97.374(d)(2)(ii), by the later of the following dates:

(i) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which the unit commences commercial operation; or

(ii) If the compliance date under paragraph (b)(3)(i) of this section is not during a control period, May 1 immediately following the compliance date under paragraph (b)(3)(i) of this section.

(4) For the owner or operator of a CAIR NOₓ Ozone Season unit for which construction of a new stack or flue or installation of add-on NOₓ emission controls is completed after the applicable deadline under paragraph (b)(1), (2), (6), or (7) of this section and that reports on an annual basis under §97.374(d), by 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NOₓ emissions controls.

(5) For the owner or operator of a CAIR NOₓ Ozone Season unit for which construction of a new stack or flue or installation of add-on NOₓ emission controls is completed after the applicable deadline under paragraph (b)(1), (3), (6), or (7) of this section and that reports on a control period basis under §97.374(d)(2)(ii), by the later of the following dates:

(i) 90 unit operating days or 180 calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NOₓ emissions controls; or

(ii) If the compliance date under paragraph (b)(5)(i) of this section is not during a control period, May 1 immediately following the compliance date under paragraph (b)(5)(i) of this section.

(6) Notwithstanding the dates in paragraphs (b)(1), (2), and (3) of this section, for the owner or operator of a unit for which a CAIR NOₓ Ozone Season opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, by the date specified in §97.384(b).

(7) Notwithstanding the dates in paragraphs (b)(1), (2), and (3) of this section, for the owner or operator of a CAIR NOₓ Ozone Season opt-in unit under subpart III of this part, by the date on which the CAIR NOₓ Ozone Season opt-in unit enters the CAIR NOₓ Ozone Season Trading Program as provided in §97.384(g).

(c) Reporting data. The owner or operator of a CAIR NOₓ Ozone Season unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NOₓ concentration, NOₓ emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NOₓ mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter, section 2.4 of appendix D to part 75 of this chapter, or section 2.5 of appendix E to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CAIR NOₓ Ozone Season unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §97.375.

(2) No owner or operator of a CAIR NOₓ Ozone Season unit shall operate the unit so as to discharge, or allow to be discharged, NOₓ emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(3) No owner or operator of a CAIR NOₓ Ozone Season unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NOₓ mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration,
quality assurance testing, or maintenance is performed in accordance with
the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CAIR NO\textsubscript{X} Ozone Season unit shall retire or
permanently discontinue use of the continuous emission monitoring sys-
tem, any component thereof, or any other approved monitoring system
under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is
covered by an exemption under §97.306
that is in effect;

(ii) The owner or operator is moni-
toring emissions from the unit with an-
other certified monitoring system ap-
proved, in accordance with the applica-
ble provisions of this subpart and part
75 of this chapter, by the Adminis-
trator for use at that unit that pro-
vides emission data for the same poll-
utant or parameter as the retired or
discontinued monitoring system; or

(iii) The CAIR designated representa-
tive submits notification of the date of
certification testing of a replacement
monitoring system for the retired or
discontinued monitoring system in ac-
cordance with §97.371(d)(3)(i).

(e) Long-term cold storage. The owner
or operator of a CAIR NO\textsubscript{X} Ozone Sea-
son unit is subject to the applicable
provisions of part 75 of this chapter
concerning units in long-term cold
storage.

§97.371 Initial certification and recer-
tification procedures.

(a) The owner or operator of a CAIR
NO\textsubscript{X} Ozone Season unit shall be exempt
from the initial certification require-
ments of this section for a monitoring
system under §97.370(a)(1) if the fol-
lowing conditions are met:

(1) The monitoring system has been
previously certified in accordance with
part 75 of this chapter; and

(2) The applicable quality-assurance
and quality-control requirements of
§75.21 of this chapter and appendix B,
appendix D, and appendix E to part 75
of this chapter are fully met for the
certified monitoring system described
in paragraph (a)(1) of this section.

(b) The recertification provisions of
this section shall apply to a moni-
toring system under §97.370(a)(1) ex-
empt from initial certification require-
ments under paragraph (a) of this sec-
tion.

(c) If the Administrator has pre-
viously approved a petition under
§75.17(a) or (b) of this chapter for ap-
portioning the NO\textsubscript{X} emission rate
measured in a common stack or a peti-
tion under §75.66 of this chapter for an
alternative to a requirement in §75.12
or §75.17 of this chapter, the CAIR des-
ignated representative shall resubmit
the petition to the Administrator
under §97.375 to determine whether the
approval applies under the CAIR NO\textsubscript{X}
Ozone Season Trading Program.

(d) Except as provided in paragraph
(a) of this section, the owner or oper-
or of a CAIR NO\textsubscript{X} Ozone Season unit
shall comply with the following initial
certification and recertification proce-
dures for a continuous monitoring sys-
tem (i.e., a continuous emission moni-
toring system and an excepted moni-
toring system under appendices D and
E to part 75 of this chapter) under
§97.370(a)(1). The owner or operator of a
unit that qualifies to use the low mass
emissions excepted monitoring meth-
odology under §75.19 of this chapter or
that qualifies to use an alternative
monitoring system under subpart E of
part 75 of this chapter shall comply
with the procedures in paragraph (e) or
(f) of this section respectively.

(1) Requirements for initial certification.
The owner or operator shall ensure
that each continuous monitoring sys-
tem under §97.370(a)(1) (including the
automated data acquisition and han-
dling system) successfully completes
all of the initial certification testing
required under §75.20 of this chapter by
the applicable deadline in §97.370(b). In
addition, whenever the owner or oper-
or installs a monitoring system to
meet the requirements of this subpart
in a location where no such monitoring
system was previously installed, initial
certification in accordance with §75.20
of this chapter is required.

(2) Requirements for recertification.
Whenever the owner or operator makes
a replacement, modification, or change
in any certified continuous emission
monitoring system under §97.370(a)(1)
that may significantly affect the abil-
ity of the system to accurately meas-
ure or record NO\textsubscript{X} mass emissions or
heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter systems, and any excepted NOX monitoring system under appendix E to part 75 of this chapter, under §97.370(a)(1) are subject to the recertification requirements in §75.20(g)(6) of this chapter.

(iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CAIR NOX Ozone Season Trading Program for a period not to exceed 120 days after receipt by the Administrator of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the Administrator does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the Administrator.

(iv) Certification application approval process. The Administrator will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CAIR NOX Ozone Season Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by
which the CAIR designated representa-
tive must submit the additional infor-
mation required to complete the cer-
tification application. If the CAIR des-
ignated representative does not comply
with the notice of incompleteness by
the specified date, then the Adminis-
trator may issue a notice of dis-
approval under paragraph (d)(3)(iv)(C)
of this section. The 120-day review pe-
riod shall not begin before receipt of a
complete certification application.

(C) Disapproval notice. If the certifi-
cation application shows that any
monitoring system does not meet the
performance requirements of part 75 of
this chapter or if the certification ap-
plication is incomplete and the re-
quirement for disapproval under para-
graph (d)(3)(iv)(B) of this section is
met, then the Administrator will issue
a written notice of disapproval of the
certification application. Upon
issuance of such notice of disapproval,
the provisional certification is invalid-
dated by the Administrator and the
data measured and recorded by each
uncertified monitoring system shall
not be considered valid quality-assured
data beginning with the date and hour
of provisional certification (as defined
under § 75.20(a)(3) of this chapter). The
owner or operator shall follow the pro-
cedures for loss of certification in para-
graph (d)(3)(v) of this section for each
monitoring system that is disapproved
for initial certification.

(D) Audit decertification. The Adminis-
trator may issue a notice of dis-
approval of the certification status of a
monitor in accordance with §97.372(b).

(v) Procedures for loss of certification.
If the Administrator issues a notice of
disapproval of a certification applica-
tion under paragraph (d)(3)(iv)(C) of
this section or a notice of disapproval
of certification status under paragraph
(d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall sub-
stitute the following values, for each
disapproved monitoring system, for
each hour of unit operation during the
period of invalid data specified under
§75.20(a)(4)(ii), §75.20(g)(7), or §75.21(e)
of this chapter and continuing until the
applicable date and hour specified
under §75.20(a)(5)(i) or (g)(7) of this
chapter:

(1) For a disapproved NO\textsubscript{X} emission
rate (i.e., NO\textsubscript{X}-diluent) system, the
maximum potential NO\textsubscript{X} emission rate,
as defined in (72.2 of this chapter.

(2) For a disapproved NO\textsubscript{X} pollutant
concentration monitor and disapproved
flow monitor, respectively, the max-
imum potential concentration of NO\textsubscript{X}
and the maximum potential flow rate,
as defined in sections 2.1.2.1 and 2.1.4.1
of appendix A to part 75 of this chapter.

(3) For a disapproved moisture moni-
toring system and disapproved diluent
gas monitoring system, respectively,
the minimum potential moisture per-
centage and either the maximum po-
tential CO\textsubscript{2} concentration or the min-
imum potential O\textsubscript{2} concentration (as
applicable), as defined in sections 2.1.5,
2.1.3.1, and 2.1.3.2 of appendix A to part
75 of this chapter.

(B) The CAIR designated representa-
tive shall submit a notification of cer-
tification retest dates and a new cer-
tification application in accordance
with paragraphs (d)(3)(i) and (ii) of this
section.

(C) The owner or operator shall re-
peat all certification tests or other re-
quirements that were failed by the
monitoring system, as indicated in the
Administrator's notice of disapproval,
nor later than 30 unit operating days
after the date of issuance of the notice
of disapproval.

(e) Initial certification and recerti-
fication procedures for units using the low
mass emission excepted methodology
under §75.19 of this chapter. The owner
or operator of a unit qualified to use
the low mass emissions (LME) excepted
methodology under §75.19 of this chap-
ter shall meet the applicable certifi-
cation and recertification require-
ments in §§75.19(a)(2) and 75.20(h) of
this chapter. If the owner or operator
of such a unit elects to certify a fuel
flowmeter system for heat input deter-
mination, the owner or operator shall
Environmental Protection Agency § 97.374

also meet the certification and recertification requirements in §75.20(g) of this chapter.

(f) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator under subpart E of part 75 of this chapter shall comply with the applicable notification and application procedures of §75.20(f) of this chapter.

§ 97.372 Out of control periods.

(a) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation approved initial certification requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D or subpart H of, or appendix D or appendix E to, part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §97.371 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the permitting authority or the Administrator. By issuing the notice of disapproval, the Administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in §97.371 for each disapproved monitoring system.

§ 97.373 Notifications.

The CAIR designated representative for a CAIR NOX Ozone Season unit shall submit written notice to the Administrator in accordance with §75.61 of this chapter.

§ 97.374 Recordkeeping and reporting.

(a) General provisions. The CAIR designated representative shall comply with all recordkeeping and reporting requirements in this section, the applicable recordkeeping and reporting requirements under §75.73 of this chapter, and the requirements of §75.10(e)(1).

(b) Monitoring Plans. The owner or operator of a CAIR NOX Ozone Season unit shall comply with requirements of §75.73 (c) and (e) of this chapter and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, §§97.383 and 97.384(a).

(c) Certification Applications. The CAIR designated representative shall submit an application to the Administrator within 45 days after completing all initial certification or recertification tests required under §97.371, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

(1) If the CAIR NOX Ozone Season unit is subject to an Acid Rain emissions limitation or a CAIR NOX emissions limitation or if the owner or operator of such unit chooses to report on an annual basis under this subpart, the CAIR designated representative shall meet the requirements of subpart H of part 75 of this chapter (concerning monitoring of NOX mass emissions) for such unit for the entire year and shall report the NOX mass emissions data and heat input data for such unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

351
§ 97.374

(i) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 through June 30, 2008;

(ii) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under § 97.370(b), unless that quarter is the third or fourth quarter of 2007 or the first quarter of 2008, in which case reporting shall commence in the quarter covering May 1, 2008 through June 30, 2008;

(iii) Notwithstanding paragraphs (d)(1) (i) and (ii) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued under subpart III of this part, the calendar quarter corresponding to the date specified in § 97.384(b); and

(iv) Notwithstanding paragraphs (d)(1) (i) and (ii) of this section, for a CAIR NOx Ozone Season opt-in unit under subpart III of this part, the calendar quarter corresponding to the date on which the CAIR NOx Ozone Season opt-in unit enters the CAIR NOx Ozone Season Trading Program as provided in § 97.384(g).

(2) If the CAIR NOx Ozone Season unit is not subject to an Acid Rain emissions limitation or a CAIR NOx emissions limitation, then the CAIR designated representative shall either:

(i) Meet the requirements of subpart H of part 75 (concerning monitoring of NOx mass emissions) for each control period covered by the report. Quarterly reports shall be submitted in the manner specified in § 75.73(f) of this chapter;

(ii) Meet the requirements of subpart H of part 75 for each control period (including the requirements in § 75.74(c) of this chapter) and report NOx mass emissions data and heat input data for such unit in accordance with paragraph (d)(1) of this section; or

(A) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 through June 30, 2008;

(B) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under § 97.370(b), unless that date is not during a control period, in which case reporting shall commence in the quarter that includes May 1 through June 30 of the first control period after such date;

(C) Notwithstanding paragraphs (d)(2)(ii)(A) and (2)(ii)(B) of this section, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under subpart III of this part, the calendar quarter corresponding to the date specified in § 97.384(b); and

(D) Notwithstanding paragraphs (d)(2)(ii)(A) and (2)(ii)(B) of this section, for a CAIR NOx Ozone Season opt-in unit under subpart III of this part, the calendar quarter corresponding to the date on which the CAIR NOx Ozone Season opt-in unit enters the CAIR NOx Ozone Season Trading Program as provided in § 97.384(g).

(3) The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in § 75.73(f) of this chapter.

(4) For CAIR NOx Ozone Season units that are also subject to an Acid Rain emissions limitation or the CAIR NOx Annual Trading Program, CAIR SO2 Trading Program, or Hg Budget Trading Program, quarterly reports shall include the applicable data and information required by subparts F through I of part 75 of this chapter as applicable, in addition to the NOx mass emission data, heat input data, and other information required by this subpart.

(e) Compliance certification. The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable
Environmental Protection Agency § 97.383

inquiry of those persons with primary responsibility for ensuring that all of the unit's emissions are correctly and fully monitored. The certification shall state that:

1. The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications;

2. For a unit with add-on NOX emission controls and for all hours where NOX data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate NOX emissions; and

3. For a unit that is reporting on a control period basis under paragraph (d)(2)(ii) of this section, the NOX emission rate and NOX concentration values substituted for missing data under subpart D of part 75 of this chapter are calculated using only values from a control period and do not systematically underestimate NOX emissions.

§ 97.375 Petitions.

The CAIR designated representative of a CAIR NOX Ozone Season unit may submit a petition under §75.66 of this chapter to the Administrator requesting approval to apply an alternative to any requirement of this subpart. Application of an alternative to any requirement of this subpart is in accordance with §75.66 of this chapter.

§ 97.380 Applicability.

A CAIR NOX Ozone Season opt-in unit must be a unit that:

(a) Is located in a State that submits, and for which the Administrator approves, a State implementation plan revision in accordance with §51.129(d)(3), (i), (ii), or (iii) of this chapter establishing procedures concerning CAIR Ozone Season opt-in units;

(b) Is a CAIR NOX Ozone Season unit under §97.304 and is not covered by a retired unit exemption under §97.305 that is in effect;

(c) Is not covered by a retired unit exemption under §72.8 of this chapter that is in effect;

(d) Has or is required or qualified to have a title V operating permit or other federally enforceable permit; and

(e) Vents all of its emissions to a stack and can meet the monitoring, recordkeeping, and reporting requirements of subpart HHHH of this part.

§ 97.381 General.

(a) Except as otherwise provided in §§97.301 through 97.304, §§97.306 through 97.308, and subparts BBBBB through CCCCC and subparts FFFFF through HHHH of this part, a CAIR NOX Ozone Season opt-in unit shall be treated as a CAIR NOX Ozone Season unit for purposes of applying such sections and subparts of this part.

(b) Solely for purposes of applying, as provided in this subpart, the requirements of subpart HHHH of this part to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, such unit shall be treated as a CAIR NOX Ozone Season unit before issuance of a CAIR opt-in permit for such unit.

§ 97.382 CAIR designated representative.

Any CAIR NOX Ozone Season opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this subpart, located at the same source as one or more CAIR NOX Ozone Season units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR NOX Ozone Season units.

§ 97.383 Applying for CAIR opt-in permit.

(a) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR NOX Ozone Season opt-in unit in §97.380 may apply for an initial
§ 97.384 Opt-in process.

The permitting authority will issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under § 97.383 is submitted in accordance with the following:

(a) Interim review of monitoring plan. The permitting authority and the Administrator will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under § 97.383. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NOX emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with subpart HHHH of this part. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.

(b) Duty to reapply. (1) The CAIR designated representative of a CAIR NOX Ozone Season opt-in unit shall submit a complete CAIR permit application under § 97.322 to renew the CAIR opt-in unit permit in accordance with the permitting authority’s regulations for T
c

(2) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR NOX Ozone Season opt-in unit from the CAIR NOX Ozone Season Trading Program in accordance with § 97.386 or the unit becomes a CAIR NOX Ozone Season unit under § 97.304, the CAIR NOX Ozone Season opt-in unit shall remain subject to the requirements for a CAIR NOX Ozone Season opt-in unit, even if the CAIR designated representative for the CAIR NOX Ozone Season opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (b)(1) of this section.

§ 97.384 Opt-in process.

The permitting authority will issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under § 97.383 is submitted in accordance with the following:

(a) Interim review of monitoring plan.

(b) Duty to reapply.

(c) Monitoring and reporting.

(d) Other permits.

(e) Monitoring and reporting.

(f) Certification.

(g) Other permits.

(h) Other permits.

(i) Other permits.

(j) Other permits.

(k) Other permits.

(l) Other permits.

(m) Other permits.

(n) Other permits.

(o) Other permits.

(p) Other permits.

(q) Other permits.

(r) Other permits.

(s) Other permits.

(t) Other permits.

(u) Other permits.

(v) Other permits.

(w) Other permits.

(x) Other permits.

(y) Other permits.

(z) Other permits.
of certification of the appropriate monitoring systems under subpart HHHH of this part and continuing until a CAIR opt-in permit is denied under §97.384(f) or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR NO\textsubscript{X} Ozone Season Trading Program in accordance with §97.386.

(ii) The monitoring and reporting under paragraph (b)(1)(i) of this section shall include the entire control period immediately before the date on which the unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g), during which period monitoring system availability must not be less than 90 percent under subpart HHHH of this part and the unit must be in full compliance with any applicable State or Federal emissions or emissions-related requirements.

(2) To the extent the NO\textsubscript{X} emissions rate and the heat input of the unit are monitored and reported in accordance with subpart HHHH of this part for one or more control periods, in addition to the control period under paragraph (b)(1)(ii) of this section, during which control periods monitoring system availability is not less than 90 percent under subpart HHHH of this part and the unit is in full compliance with any applicable State or Federal emissions or emissions-related requirements.

(c) Baseheat input. The unit’s baseline heat input shall equal:

(1) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s total heat input (in mmBtu) for the control period;

(2) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, the average of the amounts of the unit’s total heat input (in mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section.

(d) Baseline NO\textsubscript{X} emission rate. The unit’s baseline NO\textsubscript{X} emission rate shall equal:

(1) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (b)(1) of this section, the unit’s NO\textsubscript{X} emissions rate (in lb/mmBtu) for the control period;

(2) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit does not have add-on NO\textsubscript{X} emission controls during any such control periods, the average of the amounts of the unit’s NO\textsubscript{X} emissions rate (in lb/mmBtu) for the control periods under paragraphs (b)(1)(ii) and (2) of this section;

(3) If the unit’s NO\textsubscript{X} emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (b)(1) and (2) of this section, and the unit has add-on NO\textsubscript{X} emission controls during any such control periods, the average of the amounts of the unit’s NO\textsubscript{X} emissions rate (in lb/mmBtu) for such control periods during which the unit has add-on NO\textsubscript{X} emission controls.

(e) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline NO\textsubscript{X} emissions rate for the unit under paragraphs (c) and (d) of this section and if the permitting authority determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR NO\textsubscript{X} Ozone Season opt-in unit in §97.380 and meets the elements certified in §97.383(a)(2), the permitting authority will issue a CAIR opt-in permit. The permitting authority will provide a copy of the CAIR opt-in permit to the Administrator, who will then establish a compliance account for the source that includes the CAIR NO\textsubscript{X} Ozone Season opt-in unit unless the source already has a compliance account.

(f) Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (a) through (e) of this section, if at any time before issuance of a CAIR opt-in...
§ 97.385 CAIR opt-in permit contents.

(a) Each CAIR opt-in permit will contain:

(1) All elements required for a complete CAIR permit application under § 97.322;

(2) The certification in § 97.383(a)(2);

(3) The unit’s baseline heat input under § 97.384(c);

(4) The unit’s baseline NO\textsubscript{X} emission rate under § 97.384(d);

(5) A statement whether the unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances under § 97.388(b) or § 97.388(c) (subject to the conditions in §§ 97.384(h) and 97.386(g));

(6) A statement that the unit may withdraw from the CAIR NO\textsubscript{X} Ozone Season Trading Program only in accordance with § 97.386; and

(7) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of § 97.387.

(b) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under § 97.302 and, upon recordation by the Administrator under subpart FFFF or GGGG of this part or this subpart, every allocation, transfer, or deduction of CAIR NO\textsubscript{X} Ozone Season allowances to or from the compliance account of the source that includes a CAIR NO\textsubscript{X} Ozone Season opt-in unit covered by the CAIR opt-in permit.

(c) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NO\textsubscript{X} Ozone Season opt-in unit is located and in a title V operating permit or other federally enforceable permit for the source.

§ 97.386 Withdrawal from CAIR NO\textsubscript{X} Ozone Season Trading Program.

Except as provided under paragraph (g) of this section, a CAIR NO\textsubscript{X} Ozone Season opt-in unit may withdraw from the CAIR NO\textsubscript{X} Ozone Season Trading Program, but only if the permitting authority issues a notification to the CAIR designated representative of the CAIR NO\textsubscript{X} Ozone Season opt-in unit of the acceptance of the withdrawal of the CAIR NO\textsubscript{X} Ozone Season opt-in unit in accordance with paragraph (d) of this section.

(a) Requesting withdrawal. In order to withdraw a CAIR NO\textsubscript{X} Ozone Season opt-in unit from the CAIR NO\textsubscript{X} Ozone Season Trading Program, the CAIR designated representative of the CAIR NO\textsubscript{X} Ozone Season opt-in unit shall
submit to the permitting authority a request to withdraw effective as of midnight of September 30 of a specified calendar year, which date must be at least 4 years after September 30 of the year of entry into the CAIR NOX Ozone Season Trading Program under §97.384(g). The request must be submitted no later than 90 days before the requested effective date of withdrawal.

(b) Conditions for withdrawal. Before a CAIR NOX Ozone Season opt-in unit covered by a request under paragraph (a) of this section may withdraw from the CAIR NOX Ozone Season Trading Program and the CAIR opt-in permit may be terminated under paragraph (e) of this section, the following conditions must be met:

(1) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR NOX Ozone Season opt-in unit must meet the requirement to hold CAIR NOX Ozone Season allowances equal in amount to and allocated for the same or a prior control period as any CAIR NOX Ozone Season allowances allocated to the CAIR NOX Ozone Season opt-in unit under §97.388 for any control period for which the withdrawal is to be effective. If there are no remaining CAIR NOX Ozone Season units at the source, the Administrator will close the compliance account, and the owners and operators of the CAIR NOX Ozone Season opt-in unit may submit a CAIR NOX Ozone Season allowance transfer for any remaining CAIR NOX Ozone Season allowances to another CAIR NOX Ozone Season Allowance Tracking System in accordance with subpart GGGG of this part.

(c) Notification. (1) After the requirements for withdrawal under paragraphs (a) and (b) of this section are met (including deduction of the full amount of CAIR NOX Ozone Season allowances required), the permitting authority will issue a notification to the CAIR designated representative of the CAIR NOX Ozone Season opt-in unit of the acceptance of the withdrawal of the CAIR NOX Ozone Season opt-in unit as of midnight on September 30 of the calendar year for which the withdrawal was requested.

(2) If the requirements for withdrawal under paragraphs (a) and (b) of this section are not met, the permitting authority will issue a notification to the CAIR designated representative of the CAIR NOX Ozone Season opt-in unit that the CAIR NOX Ozone Season opt-in unit’s request to withdraw is denied. Such CAIR NOX Ozone Season opt-in unit shall continue to be a CAIR NOX Ozone Season opt-in unit.

(d) Permit amendment. After the permitting authority issues a notification under paragraph (c)(1) of this section that the requirements for withdrawal have been met, the permitting authority will revise the CAIR permit covering the CAIR NOX Ozone Season opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (c)(1) of this section. The unit shall continue to be a CAIR NOX Ozone Season opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR NOX Ozone Season Trading Program concerning any control periods for which the unit is a CAIR NOX Ozone Season opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

(e) Reapplication upon failure to meet conditions of withdrawal. If the permitting authority denies the CAIR NOX Ozone Season opt-in unit’s request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (a) and (b) of this section.

(f) Ability to reapply to the CAIR NOX Ozone Season Trading Program. Once a CAIR NOX Ozone Season opt-in unit withdraws from the CAIR NOX Ozone Season Trading Program and its CAIR opt-in permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under §97.383 for such CAIR NOX Ozone Season opt-in unit before the date that is 4 years after the date on which the
withdrawal became effective. Such new application for a CAIR opt-in permit will be treated as an initial application for a CAIR opt-in permit under § 97.384.

(g) Inability to withdraw. Notwithstanding paragraphs (a) through (f) of this section, a CAIR NOX Ozone Season opt-in unit shall not be eligible to withdraw from the CAIR NOX Ozone Season Trading Program if the CAIR designated representative of the CAIR NOX Ozone Season opt-in unit requests, and the permitting authority issues a CAIR opt-in permit providing for allocation to the CAIR NOX Ozone Season opt-in unit of CAIR NOX Ozone Season allowances under § 97.388(c).

§ 97.387 Change in regulatory status.

(a) Notification. If a CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304, then the CAIR designated representative shall notify in writing the permitting authority and the Administrator of such change in the CAIR NOX Ozone Season opt-in unit’s regulatory status, within 30 days of such change.

(b) Permitting authority’s and Administrator’s actions. (1) If a CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304, the permitting authority will revise the CAIR NOX Ozone Season opt-in unit’s CAIR opt-in permit to meet the requirements of a CAIR permit under § 97.323, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304.

(2)(i) The Administrator will deduct from the compliance account of the source that includes the CAIR NOX Ozone Season opt-in unit that becomes a CAIR NOX Ozone Season unit under § 97.304, CAIR NOX Ozone Season allowances equal in amount to and allocated for the same or a prior control period as:

(A) Any CAIR NOX Ozone Season allowances allocated to the CAIR NOX Ozone Season opt-in unit under § 97.388 for any control period after the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304, and

(B) If the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304 is not September 30, the CAIR NOX Ozone Season allowances allocated to the CAIR NOX Ozone Season opt-in unit under § 97.388 for the control period that includes the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304 divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(i) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR NOX Ozone Season opt-in unit that becomes a CAIR NOX Ozone Season unit under § 97.304 contains the CAIR NOX Ozone Season allowances necessary for completion of the deduction under paragraph (b)(2)(i) of this section.

(3)(i) For every control period after the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304, the CAIR NOX Ozone Season opt-in unit will be allocated CAIR NOX Ozone Season allowances under § 97.342.

(ii) If the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304 is not September 30, the following amount of CAIR NOX Ozone Season allowances will be allocated to the CAIR NOX Ozone Season opt-in unit (as a CAIR NOX Ozone Season unit) under § 97.342 for the control period that includes the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304:

(A) The amount of CAIR NOX Ozone Season allowances otherwise allocated to the CAIR NOX Ozone Season opt-in unit (as a CAIR NOX Ozone Season unit) under § 97.342 for the control period multiplied by;

(B) The ratio of the number of days, in the control period, starting with the date on which the CAIR NOX Ozone Season opt-in unit becomes a CAIR NOX Ozone Season unit under § 97.304,
Environmental Protection Agency § 97.388

divided by the total number of days in
the control period; and

(C) Rounded to the nearest whole al-
lowance as appropriate.

[65 FR 2727, Jan. 18, 2000, as amended at 71 FR 74795, Dec. 13, 2006]

§ 97.388 CAIR NO\textsubscript{X} Ozone Season al-
lowance allocations to CAIR NO\textsubscript{X} Ozone Season opt-in units.

(a) **Timing requirements.** (1) When the CAIR opt-in permit is issued under §97.384(e), the permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit, and submit to the Administrator the allocation for the control period in which a CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g), in accordance with paragraph (b) or (c) of this section.

(2) By no later than July 31 of the control period after the control period in which a CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g) and July 31 of each year thereafter, the permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit, and submit to the Administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR NO\textsubscript{X} Ozone Season opt-in unit, in accordance with paragraph (b) or (c) of this section.

(b) **Calculation of allocation.** For each control period for which a CAIR NO\textsubscript{X} Ozone Season opt-in unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances, the permitting authority will allocate in accordance with the following procedures, if provided in a State implementation plan revision submitted in accordance with §51.123(ee)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

(1) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocation will be the lesser of:

(i) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline heat input determined under §97.384(c); or

(ii) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s heat input, as determined in accordance with subpart HHHH of this part, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g).

(2) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} Ozone Season allowance allocations will be the lesser of:

(i) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §97.384(d) and multiplied by 70 percent; or

(ii) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} Ozone Season allowances are to be allocated.

(3) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit in an amount equaling the heat input under paragraph (b)(1) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (b)(2) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(c) Notwithstanding paragraph (b) of this section and if the CAIR designated representative requests, and the permitting authority issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under §97.383 (a)(5)) providing for, allocation to a CAIR NO\textsubscript{X} Ozone Season opt-in unit of CAIR NO\textsubscript{X} Ozone Season allowances under this paragraph (subject to the conditions in §§97.384(h) and 97.386(g)), the permitting authority will allocate to the CAIR NO\textsubscript{X} Ozone Season opt-in unit as follows, if provided in a State implementation plan revision submitted in accordance with §51.123(ee)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

(1) For each control period in 2009 through 2014 for which the CAIR NO\textsubscript{X} Ozone Season opt-in unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances,

(i) The heat input (in mmBtu) used for calculating CAIR NO\textsubscript{X} Ozone Season allowance allocation will be the lesser of:

(i) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline heat input determined under §97.384(c); or

(ii) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s heat input, as determined in accordance with subpart HHHH of this part, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g).

(ii) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} Ozone Season allowances are to be allocated.

Show this information to a human to confirm the text is accurate.
allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating CAIR NO\textsubscript{X} Ozone Season allowance allocations will be the lesser of:

(A) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §97.384(d); or

(B) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period in which the CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g).

(iii) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit in an amount equaling the heat input under paragraph (c)(1)(i) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (c)(1)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(2) For each control period in 2015 and thereafter for which the CAIR NO\textsubscript{X} Ozone Season opt-in unit is to be allocated CAIR NO\textsubscript{X} Ozone Season allowances,

(i) The heat input (in mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocations will be determined as described in paragraph (b)(1) of this section.

(ii) The NO\textsubscript{X} emission rate (in lb/mmBtu) used for calculating the CAIR NO\textsubscript{X} Ozone Season allowance allocation will be the lesser of:

(A) 0.15 lb/mmBtu;

(B) The CAIR NO\textsubscript{X} Ozone Season opt-in unit’s baseline NO\textsubscript{X} emissions rate (in lb/mmBtu) determined under §97.384(d); or

(C) The most stringent State or Federal NO\textsubscript{X} emissions limitation applicable to the CAIR NO\textsubscript{X} Ozone Season opt-in unit at any time during the control period for which CAIR NO\textsubscript{X} Ozone Season allowances are to be allocated.

(iii) The permitting authority will allocate CAIR NO\textsubscript{X} Ozone Season allowances to the CAIR NO\textsubscript{X} Ozone Season opt-in unit in an amount equaling the heat input under paragraph (c)(2)(i) of this section, multiplied by the NO\textsubscript{X} emission rate under paragraph (c)(2)(ii) of this section, divided by 2,000 lb/ton, and rounded to the nearest whole allowance as appropriate.

(d) Recordation. If provided in a State implementation plan revision submitted in accordance with §51.123(ee)(3)(i), (ii), or (iii) of this chapter and approved by the Administrator:

1. The Administrator will record, in the compliance account of the source that includes the CAIR NO\textsubscript{X} Ozone Season opt-in unit, the CAIR NO\textsubscript{X} Ozone Season allowances allocated by the permitting authority to the CAIR NO\textsubscript{X} Ozone Season opt-in unit under paragraph (a)(1) of this section.

2. By September 1 of the control period in which a CAIR NO\textsubscript{X} Ozone Season opt-in unit enters the CAIR NO\textsubscript{X} Ozone Season Trading Program under §97.384(g) and September 1 of each year thereafter, the Administrator will record, in the compliance account of the source that includes the CAIR NO\textsubscript{X} Ozone Season opt-in unit, the CAIR NO\textsubscript{X} Ozone Season allowances allocated by the permitting authority to the CAIR NO\textsubscript{X} Ozone Season opt-in unit under paragraph (a)(2) of this section.

APPENDIX A TO SUBPART IIII OF PART 97—STATES WITH APPROVED STATE IMPLEMENTATION PLAN REVISIONS CONCERNING CAIR NO\textsubscript{X} OZONE SEASON OPT-IN UNITS

1. The following States have State Implementation Plan revisions under §51.123(ee)(3) of this chapter approved by the Administrator and establishing procedures providing for CAIR NO\textsubscript{X} Ozone Season opt-in units under subpart IIII of this part and allocation of CAIR NO\textsubscript{X} Ozone Season allowances to such units under §97.388(b):

Indiana
Michigan
North Carolina
Ohio
South Carolina
Tennessee

2. The following States have State Implementation Plan revisions under §51.123(ee)(3) of this chapter approved by the Administrator and establishing procedures providing for CAIR NO\textsubscript{X} Ozone Season opt-in units under subpart IIII of this part and allocation of CAIR NO\textsubscript{X} Ozone Season allowances to such units under §97.388(c):

Indiana
§ 97.401 Purpose.
This subpart sets forth the general, designated representative, allowance, and monitoring provisions for the Cross-State Air Pollution Rule (CSAPR) NO\textsubscript{X} Annual Trading Program, under section 110 of the Clean Air Act and § 52.38 of this chapter, as a means of mitigating interstate transport of fine particulates and nitrogen oxides.

§ 97.402 Definitions.
The terms used in this subpart shall have the meanings set forth in this section as follows, provided that any term that includes the acronym “CSAPR” shall be considered synonymous with a term that is used in a SIP revision approved by the Administrator under §52.38 or §52.39 of this chapter and that is substantively identical except for the inclusion of the acronym “TR” in place of the acronym “CSAPR”:

Acid Rain Program means a multi-state SO\textsubscript{2} and NO\textsubscript{X} air pollution control and emission reduction program established by the Administrator under title IV of the Clean Air Act and parts 72 through 78 of this chapter.

Administrator means the Administrator of the United States Environmental Protection Agency or the Director of the Clean Air Markets Division (or its successor determined by the Administrator) of the United States Environmental Protection Agency, the Administrator’s duly authorized representative under this subpart.

Allocate or allocation means, with regard to CSAPR NO\textsubscript{X} Annual allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under §52.38(a)(3), (4), or (5) of this chapter, of the amount of such CSAPR NO\textsubscript{X} Annual allowances to be initially credited, at no cost to the recipient, to:
1. A CSAPR NO\textsubscript{X} Annual unit;
2. A new unit set-aside;
3. An Indian country new unit set-aside; or
4. An entity not listed in paragraphs (1) through (3) of this definition;

Allowable NO\textsubscript{X} emission rate means, for a unit, the most stringent State or federal NO\textsubscript{X} emission rate limit (in lb/MWh or, if in lb/mmBtu, converted to lb/MWh by multiplying it by the unit’s heat rate in mmBtu/MWh) that is applicable to the unit and covers the longest averaging period not exceeding one year.

Allowance Management System means the system by which the Administrator records allocations, auctions, transfers, and deductions of CSAPR NO\textsubscript{X} Annual allowances under the CSAPR NO\textsubscript{X} Annual Trading Program. Such allowances are allocated, auctioned, recorded, held, transferred, or deducted only as whole allowances.

Allowance Management System account means an account in the Allowance Management System established by the Administrator for purposes of recording the allocation, auction, holding, transfer, or deduction of CSAPR NO\textsubscript{X} Annual allowances.

Allowance transfer deadline means, for a control period in a given year, midnight of March 1 (if it is a business day), or midnight of the first business day of the following year.

Allocate or allocation means, with regard to CSAPR NO\textsubscript{X} Annual allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under §52.38(a)(3), (4), or (5) of this chapter, of the amount of such CSAPR NO\textsubscript{X} Annual allowances to be initially credited, at no cost to the recipient, to:
1. A CSAPR NO\textsubscript{X} Annual unit;
2. A new unit set-aside;
3. An Indian country new unit set-aside; or
4. An entity not listed in paragraphs (1) through (3) of this definition;

Allocate or allocation means, with regard to CSAPR NO\textsubscript{X} Annual allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under §52.38(a)(3), (4), or (5) of this chapter, of the amount of such CSAPR NO\textsubscript{X} Annual allowances to be initially credited, at no cost to the recipient, to:
1. A CSAPR NO\textsubscript{X} Annual unit;
2. A new unit set-aside;
3. An Indian country new unit set-aside; or
4. An entity not listed in paragraphs (1) through (3) of this definition;

Allocate or allocation means, with regard to CSAPR NO\textsubscript{X} Annual allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under §52.38(a)(3), (4), or (5) of this chapter, of the amount of such CSAPR NO\textsubscript{X} Annual allowances to be initially credited, at no cost to the recipient, to:
1. A CSAPR NO\textsubscript{X} Annual unit;
2. A new unit set-aside;
3. An Indian country new unit set-aside; or
4. An entity not listed in paragraphs (1) through (3) of this definition;

Allocate or allocation means, with regard to CSAPR NO\textsubscript{X} Annual allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under §52.38(a)(3), (4), or (5) of this chapter, of the amount of such CSAPR NO\textsubscript{X} Annual allowances to be initially credited, at no cost to the recipient, to:
1. A CSAPR NO\textsubscript{X} Annual unit;
2. A new unit set-aside;
3. An Indian country new unit set-aside; or
4. An entity not listed in paragraphs (1) through (3) of this definition;
day thereafter (if March 1 is not a business day), immediately after such control period and is the deadline by which a CSAPR NO\textsubscript{X} Annual allowance transfer must be submitted for recordation in a CSAPR NO\textsubscript{X} Annual source’s compliance account in order to be available for use in complying with the source’s CSAPR NO\textsubscript{X} Annual emissions limitation for such control period in accordance with §§97.406 and 97.424.

Alternate designated representative means, for a CSAPR NO\textsubscript{X} Annual source and each CSAPR NO\textsubscript{X} Annual unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with this subpart, to act on behalf of the designated representative in matters pertaining to the CSAPR NO\textsubscript{X} Annual Trading Program. If the CSAPR NO\textsubscript{X} Annual source is also subject to the Acid Rain Program, CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program, CSAPR NO\textsubscript{X} Ozone Season Group 2 Trading Program, CSAPR SO\textsubscript{2} Group 1 Trading Program, or CSAPR SO\textsubscript{2} Group 2 Trading Program, then this natural person shall be the same natural person as the alternate designated representative as defined in the respective program.

Assurance account means an Allowance Management System account, established by the Administrator under §97.425(b)(3) for certain owners and operators of a group of one or more CSAPR NO\textsubscript{X} Annual sources and units in a given State (and Indian country within the borders of such State), in which are held CSAPR NO\textsubscript{X} Annual allowances available for use for a control period in a given year in complying with the CSAPR NO\textsubscript{X} Annual assurance provisions in accordance with §§97.406 and 97.425.

Auction means, with regard to CSAPR NO\textsubscript{X} Annual allowances, the sale to any person by a State or permitting authority, in accordance with a SIP revision submitted by the State and approved by the Administrator under §52.38(a)(4) or (5) of this chapter, of such CSAPR NO\textsubscript{X} Annual allowances to be initially recorded in an Allowance Management System account.

Authorized account representative means, for a general account, the natural person who is authorized, in accordance with this subpart, to transfer and otherwise dispose of CSAPR NO\textsubscript{X} Annual allowances held in the general account and, for a CSAPR NO\textsubscript{X} Annual source’s compliance account, the designated representative of the source.

Automated data acquisition and handling system or DAHS means the component of the continuous emission monitoring system, or other emissions monitoring system approved for use under this subpart, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by this subpart.

Biomass means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other material that is nonmerchantable for other purposes, and that is:

(i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

(ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle unit means a unit in which the energy input to the unit is first used to produce useful thermal energy, where at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.
Business day means a day that does not fall on a weekend or a federal holiday.

Certifying official means a natural person who is:

(1) For a corporation, a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function or any other person who performs similar policy- or decision-making functions for the corporation;

(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or

(3) For a local government entity or State, federal, or other public agency, a principal executive officer or ranking elected official.

Clean Air Act means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means "coal" as defined in §72.2 of this chapter.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Cogeneration system means an integrated group, at a source, of equipment (including a boiler, or combustion turbine, and a generator) designed to produce useful thermal energy for industrial, commercial, heating, or cooling purposes and electricity through the sequential use of energy.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a topping-cycle unit or a bottoming-cycle unit:

(1) Operating as part of a cogeneration system; and

(2) Producing on an annual average basis—

(i) For a topping-cycle unit,

(A) Useful thermal energy not less than 5 percent of total energy output; and

(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle unit, useful power not less than 45 percent of total energy input;

(3) Provided that the requirements in paragraph (2) of this definition shall not apply to a calendar year referenced in paragraph (2) of this definition during which the unit did not operate at all;

(4) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit's total energy input from all fuel, except biomass if the unit is a boiler; and

(5) Provided that, if, throughout its operation during the 12-month period or a calendar year referenced in paragraph (2) of this definition, a unit is operated as part of a cogeneration system and the cogeneration system meets on a system-wide basis the requirement in paragraph (2)(i)(B) or (2)(ii) of this definition, the unit shall be deemed to meet such requirement during that 12-month period or calendar year.

Combustion turbine means an enclosed device comprising:

(1) If the device is simple cycle, a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

(2) If the device is combined cycle, the equipment described in paragraph (1) of this definition and any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.405.

(i) For a unit that is a CSAPR NOX Annual unit under §97.404 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that subsequently undergoes a physical change or is moved to a new location or source, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

363
§ 97.402  
40 CFR Ch. I (7–1–17 Edition)

(i) For a unit that is a CSAPR NO\textsubscript{X} Annual unit under §97.404 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §97.405, for a unit that is not a CSAPR NO\textsubscript{X} Annual unit under §97.404 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CSAPR NO\textsubscript{X} Annual unit under §97.404.

(i) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that subsequently undergoes a physical change or is moved to a different location or source, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Common designated representative’s assurance level means, with regard to a specific common designated representative and a State (and Indian country within the borders of such State) and control period in a given year for which the State assurance level is exceeded as described in §97.406(c)(2)(iii), the common designated representative’s share of the State NO\textsubscript{X} Annual trading budget with the variability limit for the State for such control period.

Common designated representative’s share means, with regard to a specific common designated representative for a control period in a given year:

(1) With regard to a total amount of NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Annual units in a State (and Indian country within the borders of such State) during such control period, the total tonnage of NO\textsubscript{X} emissions during such control period from a group of one or more CSAPR NO\textsubscript{X} Annual units located in such State (and such Indian country) and having the common designated representative for such control period:

(2) With regard to a State NO\textsubscript{X} Annual trading budget with the variability limit for such control period, the amount (rounded to the nearest allowance) equal to the sum of the total amount of CSAPR NO\textsubscript{X} Annual allowances allocated for such control period to a group of one or more CSAPR NO\textsubscript{X} Annual units located in the State (and Indian country within the borders of such State) and having the common designated representative for such control period and the total amount of CSAPR NO\textsubscript{X} Annual allowances purchased by an owner or operator of such CSAPR NO\textsubscript{X} Annual units in an auction for such control period and submitted by the State or the permitting authority to the Administrator for recordation in the compliance accounts for such CSAPR NO\textsubscript{X} Annual units in accordance with the CSAPR NO\textsubscript{X} Annual allowance auction provisions in a SIP revision approved by the Administrator.
under §52.38(a)(4) or (5) of this chapter, multiplied by the sum of the State NOx Annual trading budget under §97.410(a) and the State’s variability limit under §97.410(b) for such control period and divided by such State NOx Annual trading budget.

(3) Provided that, in the case of a unit that operates during, but has no amount of CSAPR NOx Annual allowances allocated under §§ 97.411 and 97.412 for such control period, the unit shall be treated, solely for purposes of this definition, as being allocated an amount (rounded to the nearest allowable amount of CSAPR NOx units that operates during, but has no annual allowance allocations to the unit’s allowable NOx emissions equal to the unit’s trading budget; trading budget;

(4) Provided that, in the case of a unit that operates during, but has no amount of CSAPR NOx Annual allowances allocated under §§ 97.411 and 97.412 for such control period, the unit shall be treated, solely for purposes of this definition, as being allocated an amount (rounded to the nearest allowable amount of CSAPR NOx unit’s NOx emissions for such control period equal to the unit’s allowable NOx emission rate applicable to such control period, multiplied by the capacity factor of 0.85 (if the unit is a boiler combusting any amount of coal or coal-derived fuel during such control period), 0.24 (if the unit is a simple combustion turbine during such control period), 0.67 (if the unit is a combined cycle turbine during such control period), or 0.36 (for any other unit), multiplied by the unit’s maximum hourly load as reported in accordance with this subpart and by 8,760 hours/control period, and divided by 2,000 lb/ton.

**Common stack** means a single flue through which emissions from 2 or more units are exhausted.

**Compliance account** means an Allowance Management System account, established by the Administrator for a CSAPR NOx Annual source under this subpart, in which any CSAPR NOx Annual allowances allocated to the CSAPR NOx units at the source are recorded and in which are held any CSAPR NOx Annual allowances available for use for a control period in a given year in complying with the source’s CSAPR NOx Annual emissions limit in accordance with §§97.406 and 97.424.

**Continuous emission monitoring system** or CEMS means the equipment required under this subpart to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes and using an automated data acquisition and handling system (DAHS), a permanent record of NOx emissions, stack gas volumetric flow rate, stack gas moisture content, and O2 or CO2 concentration (as applicable), in a manner consistent with part 75 of this chapter and §§97.430 through 97.435.

The following systems are the principal types of continuous emission monitoring systems:

1. A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh); and the State’s variability limit under §52.38(a)(4) or (5) of this chapter.

2. A NOx concentration monitoring system, consisting of a NOx pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NOx emissions, in parts per million (ppm);

3. A NOx emission rate (or NOx-diluent) monitoring system, consisting of a NOx pollutant concentration monitor, a diluent gas (CO2 or O2) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NOx concentration, in parts per million (ppm), diluent gas concentration, in percent CO2 or O2, and NOx emission rate, in pounds per million British thermal units (lb/mmBtu);

4. A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H2O;

5. A CO2 monitoring system, consisting of a CO2 pollutant concentration monitor (or an O2 monitor plus suitable mathematical equations from which the CO2 concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO2 emissions, in percent CO2; and

6. An O2 monitoring system, consisting of an O2 concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O2, in percent O2.

**Control period** means the period starting January 1 of a calendar year, except as provided in §97.406(c)(3), and
§ 97.402 40 CFR Ch. I (7–1–17 Edition)

ending on December 31 of the same year, inclusive.

CSAPR NOX Annual allowance means a limited authorization issued and allocated or auctioned by the Administrator under this subpart, or by a State or permitting authority under a SIP revision approved by the Administrator under §52.38(a)(3), (4), or (5) of this chapter, to emit one ton of NOX during a control period of the specified calendar year for which the authorization is allocated or auctioned or of any calendar year thereafter under the CSAPR NOX Annual Trading Program.

CSAPR NOx Annual allowance deduction or deduct CSAPR NOx Annual allowances means the permanent withdrawal of CSAPR NOx Annual allowances by the Administrator from a compliance account (e.g., in order to account for compliance with the CSAPR NOx Annual emissions limitation) or from an assurance account (e.g., in order to account for compliance with the assurance provisions under §§97.406 and 97.425).

CSAPR NOx Annual allowances held or hold CSAPR NOx Annual allowances means the CSAPR NOx Annual allowances treated as included in an Allowance Management System account as of a specified point in time because at that time they:

(1) Have been recorded by the Administrator in the account or transferred into the account by a correctly submitted, but not yet recorded, CSAPR NOx Annual allowance transfer in accordance with this subpart; and

(2) Have not been transferred out of the account by a correctly submitted, but not yet recorded, CSAPR NOx Annual allowance transfer in accordance with this subpart.

CSAPR NOx Annual emissions limitation means, for a CSAPR NOx Annual source, the tonnage of NOx emissions authorized in a control period in a given year by the CSAPR NOx Annual allowances available for deduction for the source under §97.424(a) for such control period.

CSAPR NOx Annual source means a source that includes one or more CSAPR NOx Annual units.

CSAPR NOx Annual Trading Program means a multi-state NOx air pollution control and emission reduction program established in accordance with this subpart and §52.38(a) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(a)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(a)(6) of this chapter), as a means of mitigating interstate transport of fine particulates and NOx.

CSAPR NOx Annual unit means a unit that is subject to the CSAPR NOx Annual Trading Program.

CSAPR NOx Ozone Season Group 1 Trading Program means a multi-state NOx air pollution control and emission reduction program established in accordance with subpart EEEE of this part and §52.38(b)(1), (b)(2)(i) and (ii), (b)(3) through (5), and (b)(10) through (12) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(b)(5) of this chapter), as a means of mitigating interstate transport of ozone and NOx.

CSAPR NOx Ozone Season Group 2 Trading Program means a multi-state NOx air pollution control and emission reduction program established in accordance with subpart FFFF of this part and §52.38(b)(1) through (l) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(7) or (8) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(b)(5) of this chapter), as a means of mitigating interstate transport of ozone and NOx.

CSAPR SO2 Group 1 Trading Program means a multi-state SO2 air pollution control and emission reduction program established in accordance with subpart CCCC of this part and §52.39(a), (b), (d) through (f), and (j) through (l) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.39(d) or (e) of this chapter or that is established in a SIP revision approved by the Administrator under §52.39(f) of this chapter), as a means of mitigating interstate transport of ozone and SO2.
Environmental Protection Agency § 97.402

mitigating interstate transport of fine particulates and SO2.

CSAPR SO2 Group 2 Trading Program means a multi-state SO2 air pollution control and emission reduction program established in accordance with subpart DDDD of this part and §52.39(a), (c), (g) through (k), and (m) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.39(g) or (h) of this chapter or that is established in a SIP revision approved by the Administrator under §52.39(l) of this chapter), as a means of mitigating interstate transport of fine particulates and SO2.

Designated representative means, for a CSAPR NOX Annual source and each CSAPR NOX Annual unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with this subpart, to represent and legally bind each owner and operator in matters pertaining to the CSAPR NOX Annual Trading Program. If the CSAPR NOX Annual source is also subject to the Acid Rain Program, CSAPR NOX Ozone Season Group 1 Trading Program, CSAPR NOX Ozone Season Group 2 Trading Program, CSAPR SO2 Group 1 Trading Program, or CSAPR SO2 Group 2 Trading Program, then this natural person shall be the same natural person as the designated representative as defined in the respective program.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the designated representative and as modified by the Administrator: 

(1) In accordance with this subpart; and

(2) With regard to a period before the unit or source is required to measure, record, and report such air pollutants in accordance with this subpart, in accordance with part 75 of this chapter.

Excess emissions means any ton of emissions from the CSAPR NOX Annual units at a CSAPR NOX Annual source during a control period in a given year that exceeds the CSAPR NOX Annual emissions limitation for the source for such control period.

Fossil fuel means—

(1) Natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material; or

(2) For purposes of applying the limitation on “average annual fuel consumption of fossil fuel” in §97.404(b)(2)(i)(B) and (ii), natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material for the purpose of creating useful heat.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in 2005 or any calendar year thereafter.

General account means an Allowance Management System account, established under this subpart, that is not a compliance account or an assurance account.

Generator means a device that produces electricity.

Heat input means, for a unit for a specified period of unit operating time, the product (in mmBtu) of the gross calorific value of the fuel (in mmBtu/lb) fed into the unit multiplied by the fuel feed rate (in lb of fuel/time) and unit operating time, as measured, recorded, and reported to the Administrator by the designated representative and as modified by the Administrator in accordance with this subpart and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust.

Heat input rate means, for a unit, the quotient (in mmBtu/hr) of the amount of heat input for a specified period of unit operating time (in mmBtu) divided by unit operating time (in hr) or, for a unit and a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Heat rate means, for a unit, the quotient (in mmBtu/unit of load) of the unit’s maximum design heat input rate (in Btu/hr) divided by the product of 1,000,000 Btu/mmBtu and the unit’s maximum hourly load.

Indian country means “Indian country” as defined in 18 U.S.C. 1151.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified
amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

*Maximum design heat input rate* means, for a unit, the maximum amount of fuel per hour (in Btu/hr) that the unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

*Monitoring system* means any monitoring system that meets the requirements of this subpart, including a continuous emission monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

*Nameplate capacity* means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe, rounded to the nearest tenth) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount (in MWe, rounded to the nearest tenth) as of such completion as specified by the person conducting the physical change.

*Natural gas* means “natural gas” as defined in §72.2 of this chapter.

*Newly affected CSAPR NOX Annual unit* means a unit that was not a CSAPR NOX Annual unit when it began operating but that thereafter becomes a CSAPR NOX Annual unit.

*Operate or operation* means, with regard to a unit, to combust fuel.

*Operator* means, for a CSAPR NOX Annual source or a CSAPR NOX Annual unit at a source respectively, any person who operates, controls, or supervises a CSAPR NOX Annual unit at the source or the CSAPR NOX Annual unit and shall include, but not be limited to, any holding company, utility system, or plant manager of such source or unit.

*Owner* means, for a CSAPR NOX Annual source or a CSAPR NOX Annual unit at a source respectively, any of the following persons:

(1) Any holder of any portion of the legal or equitable title in a CSAPR NOX Annual unit at the source or the CSAPR NOX Annual unit;

(2) Any holder of a leasehold interest in a CSAPR NOX Annual unit at the source or the CSAPR NOX Annual unit, provided that, unless expressly provided for in a leasehold agreement, “owner” shall not include a passive lessee, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CSAPR NOX Annual unit; and

(3) Any purchaser of power from a CSAPR NOX Annual unit at the source or the CSAPR NOX Annual unit under a life-of-the-unit, firm power contractual arrangement.

*Permanently retired* means, with regard to a unit, a unit that is unavailable for service and that the unit’s owners and operators do not expect to return to service in the future.

*Permitting authority* means “permitting authority” as defined in §§70.2 and 71.2 of this chapter.

*Potential electrical output capacity* means, for a unit (in MWh/yr), 33 percent of the unit’s maximum design heat input rate (in Btu/hr), divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

*Receive or receipt of* means, when referring to the Administrator, to come into possession of a document, information, or correspondence (whether
sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CSAPR NOX Annual allowances, the moving of CSAPR NOX Annual allowances by the Administrator into, out of, or between Allowance Management System accounts, for purposes of allocation, auction, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent retirement and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or retired unit (the replaced unit).

Sequential use of energy means:

(1) The use of reject heat from electricity production in a useful thermal energy application or process; or

(2) The use of reject heat from a useful thermal energy application or process in electricity production.

Serial number means, for a CSAPR NOX Annual allowance, the unique identification number assigned to each CSAPR NOX Annual allowance by the Administrator.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. This definition does not change or otherwise affect the definition of “major source”, “stationary source”, or “source” as set forth and implemented in a title V operating permit program or any other program under the Clean Air Act.

State means one of the States that is subject to the CSAPR NOX Annual Trading Program pursuant to §52.38(a) of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

(1) In person;

(2) By United States Postal Service;

(3) By other means of dispatch or transmission and delivery;

(4) Provided that compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Topping-cycle unit means a unit in which the energy input to the unit is first used to produce useful power, including electricity, where at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, for a unit, total energy of all forms supplied to the unit, excluding energy produced by the unit. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[ LHV = HHV - 10.55(W + 9H) \]

where:

- \( LHV \) = lower heating value of the form of energy in Btu/lb,
- \( HHV \) = higher heating value of the form of energy in Btu/lb,
- \( W \) = weight % of moisture in the form of energy, and
- \( H \) = weight % of hydrogen in the form of energy.

Total energy output means, for a unit, the sum of useful power and useful thermal energy produced by the unit.

Unit means a stationary, fossil-fuel-fired boiler, stationary, fossil-fuel-fired combustion turbine, or other stationary, fossil-fuel-fired combustion device. A unit that undergoes a physical change or is moved to a different location or source shall continue to be treated as the same unit. A unit (the replaced unit) that is replaced by another unit (the replacement unit) at the same or a different source shall continue to be treated as the same unit, and the replacement unit shall be treated as a separate unit.

Unit operating day means, with regard to a unit, a calendar day in which the unit combusts any fuel.
§ 97.403 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this subpart are defined as follows:

Btu—British thermal unit
CO₂—carbon dioxide
CSAPR—Cross-State Air Pollution Rule
H₂O—water
hr—hour
kWh—kilowatt-hour
lb—pound
mmBtu—million Btu
MWe—megawatt electrical
MWh—megawatt-hour
NOₓ—nitrogen oxides
O₂—oxygen
ppm—parts per million
scfh—standard cubic feet per hour
SIP—State implementation plan
SO₂—sulfur dioxide
TR—Transport Rule
yr—year

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74605, Oct. 26, 2016]

§ 97.404 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State (and Indian country within the borders of such State) shall be CSAPR NOₓ Annual units, and any source that includes one or more such units shall be a CSAPR NOₓ Annual source, subject to the requirements of this subpart: Any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, on or after January 1, 2005, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CSAPR NOₓ Annual unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CSAPR NOₓ Annual unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) Any unit in a State (and Indian country within the borders of such State) that otherwise is a CSAPR NOₓ Annual unit under paragraph (a) of this section and that meets the requirements set forth in paragraph (b)(1)(i) or (2)(i) of this section shall not be a CSAPR NOₓ Annual unit:

(1)(i) Any unit:

(A) Qualifying as a cogeneration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit throughout each calendar year ending after the later of 2005 or such 12-month period; and

(B) Not supplying in 2005 or any calendar year thereafter more than one-third of the unit’s potential electrical output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(ii) If, after qualifying under paragraph (b)(1)(i) of this section as not being a CSAPR NOₓ Annual unit, a unit subsequently no longer meets all the requirements of paragraph (b)(1)(i) of this section, the unit shall become a CSAPR NOₓ Annual unit starting on the earlier of January 1 after the first...
calendar year during which the unit first no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i)(B) of this section. The unit shall thereafter continue to be a CSAPR NOX Annual unit.

(2)(i) Any unit:

(A) Qualifying as a solid waste incineration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a solid waste incineration unit throughout each calendar year ending after the later of 2005 or such 12-month period; and

(B) With an average annual fuel consumption of fossil fuel for the first 3 consecutive calendar years of operation starting no earlier than 2005 of less than 20 percent (on a Btu basis) and an average annual fuel consumption of fossil fuel for any 3 consecutive calendar years thereafter of less than 20 percent (on a Btu basis).

(ii) If, after qualifying under paragraph (b)(2)(i) of this section as not being a CSAPR NOX Annual unit, a unit subsequently no longer meets all the requirements of paragraph (b)(2)(i) of this section, the unit shall become a CSAPR NOX Annual unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 2005 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more. The unit shall thereafter continue to be a CSAPR NOX Annual unit.

(c) A certifying official of an owner or operator of any unit or other equipment may submit a petition (including any supporting documents) to the Administrator at any time for a determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CSAPR NOX Annual Trading Program to the unit or other equipment. The petition and any other documents provided to the Administrator in connection with the petition shall include the following certification statement, signed by the certifying official: ‘‘I am authorized to make this submission on behalf of the owners and operators of the unit or other equipment for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.’’

(2) Response. The Administrator will issue a written response to the petition and may request supplemental information determined by the Administrator to be relevant to such petition. The Administrator’s determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CSAPR NOX Annual Trading Program to the unit or other equipment shall be binding on any State or permitting authority unless the Administrator determines that the petition or other documents or information provided in connection with the petition contained significant, relevant errors or omissions.

§ 97.405 Retired unit exemption.

(a)(1) Any CSAPR NOX Annual unit that is permanently retired shall be exempt from §97.406(b) and (c)(1), §97.424, and §§97.430 through 97.435.

(2) The exemption under paragraph (a)(1) of this section shall become effective the day on which the CSAPR NOX Annual unit is permanently retired. Within 30 days of the unit’s permanent retirement, the designated representative shall submit a statement to the Administrator. The statement shall
§ 97.406 Standard requirements.

(a) Designated representative requirements. The owners and operators shall comply with the requirement to have a designated representative, and may have an alternate designated representative, in accordance with §§97.413 through 97.418.

(b) Emissions monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the designated representative, of each CSAPR NOX Annual source and each CSAPR NOX Annual unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of §§97.430 through 97.435.

(2) The emissions data determined in accordance with §§97.430 through 97.435 shall be used to calculate allocations of CSAPR NOX Annual allowances under §§97.411(a)(2) and (b) and 97.412 and to determine compliance with the CSAPR NOX Annual emissions limitation and assurance provisions under paragraph (c) of this section, provided that, for each monitoring location from which mass emissions are reported, the mass emissions amount used in calculating such allocations and determining such compliance shall be the mass emissions amount for the monitoring location determined in accordance with §§97.430 through 97.435 and rounded to the nearest ton, with any fraction of a ton less than 0.50 being deemed to be zero.

(c) NOX emissions requirements—(1) CSAPR NOX Annual emissions limitation.

(i) As of the allowance transfer deadline for a control period in a given year, the owners and operators of each CSAPR NOX Annual source and each CSAPR NOX Annual unit at the source shall hold, in the source’s compliance account, CSAPR NOX Annual allowances available for deduction for such control period under §97.424(a) in an amount not less than the tons of total NOX emissions for such control period from all CSAPR NOX Annual units at the source.

(ii) If total NOX emissions during a control period in a given year from the CSAPR NOX Annual source are in excess of the CSAPR NOX Annual emissions limitation set forth in paragraph (c)(1)(i) of this section, then:

(A) The owners and operators of the source and each CSAPR NOX Annual unit at the source shall hold the CSAPR NOX Annual allowances required for deduction under §97.424(d); and

(B) The owners and operators of the source and each CSAPR NOX Annual unit at the source shall pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act.
Act, and each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart and the Clean Air Act.

(2) CSAPR NO\textsubscript{X} Annual assurance provisions. (i) If total NO\textsubscript{X} emissions during a control period in a given year from all CSAPR NO\textsubscript{X} Annual units at CSAPR NO\textsubscript{X} Annual sources in a State (and Indian country within the borders of such State) exceed the State assurance level, then the owners and operators of such sources and units in each group of one or more sources and units having a common designated representative for such control period, where the common designated representative’s share of such NO\textsubscript{X} emissions during such control period exceeds the common designated representative’s assurance level for the State and such control period, shall hold (in the assurance account established for the owners and operators of such group) CSAPR NO\textsubscript{X} Annual allowances for a control period under §97.425(a) in an amount equal to two times the product (rounded to the nearest whole number), as determined by the Administrator in accordance with §97.425(b), of multiplying—

(A) The quotient of the amount by which the common designated representative’s share of such NO\textsubscript{X} emissions exceeds the common designated representative’s assurance level divided by the sum of the amounts, determined for all common designated representatives for such sources and units in the State (and Indian country within the borders of such State) for such control period, by which each common designated representative’s share of such NO\textsubscript{X} emissions exceeds the respective common designated representative’s assurance level; and

(B) The amount by which total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Annual units at CSAPR NO\textsubscript{X} Annual sources in the State (and Indian country within the borders of such State) for such control period exceed the State assurance level.

(ii) The owners and operators shall hold the CSAPR NO\textsubscript{X} Annual allowances required under paragraph (c)(2)(i) of this section, as of midnight of November 1 (if it is a business day), or midnight of the first business day thereafter (if November 1 is not a business day), immediately after the year of such control period.

(iii) Total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Annual units at CSAPR NO\textsubscript{X} Annual sources in a State (and Indian country within the borders of such State) during a control period in a given year exceed the State assurance level if such total NO\textsubscript{X} emissions exceed the sum, for such control period, of the State NO\textsubscript{X} Annual trading budget under §97.410(a) and the State’s variability limit under §97.410(b).

(iv) It shall not be a violation of this subpart or of the Clean Air Act if total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Annual units at CSAPR NO\textsubscript{X} Annual sources in a State (and Indian country within the borders of such State) during a control period exceed the State assurance level or if a common designated representative’s share of total NO\textsubscript{X} emissions from the CSAPR NO\textsubscript{X} Annual units at CSAPR NO\textsubscript{X} Annual sources in a State (and Indian country within the borders of such State) during a control period exceeds the common designated representative’s assurance level.

(v) To the extent the owners and operators fail to hold CSAPR NO\textsubscript{X} Annual allowances for a control period in a given year in accordance with paragraphs (c)(2)(i) through (iii) of this section,

(A) The owners and operators shall pay any fine, penalty, or assessment or comply with any other remedy imposed under the Clean Air Act; and

(B) Each CSAPR NO\textsubscript{X} Annual allowance that the owners and operators fail to hold for such control period in accordance with paragraphs (c)(2)(i) through (iii) of this section and each day of such control period shall constitute a separate violation of this subpart and the Clean Air Act.

(3) Compliance periods. (i) A CSAPR NO\textsubscript{X} Annual unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of January 1, 2015 or the deadline for meeting the unit’s monitor certification requirements under §97.430(b) and for each control period thereafter.
(i) A CSAPR NO\textsubscript{X} Annual unit shall be subject to the requirements under paragraph (c)(2) of this section for the control period starting on the later of January 1, 2017 or the deadline for meeting the unit's monitor certification requirements under §97.430(b) and for each control period thereafter.

(4) **Vintage of CSAPR NO\textsubscript{X} Annual allowances held for compliance.** (i) A CSAPR NO\textsubscript{X} Annual allowance held for compliance with the requirements under paragraph (c)(1)(i) of this section for a control period in a given year must be a CSAPR NO\textsubscript{X} Annual allowance that was allocated or auctioned for such control period or a control period in a prior year.

(ii) A CSAPR NO\textsubscript{X} Annual allowance held for compliance with the requirements under paragraphs (c)(1)(ii)(A) and (2)(i) through (iii) of this section for a control period in a given year must be a CSAPR NO\textsubscript{X} Annual allowance that was allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year.

(5) **Allowance Management System requirements.** Each CSAPR NO\textsubscript{X} Annual allowance shall be held in, deducted from, or transferred into, out of, or between Allowance Management System accounts in accordance with this subpart.

(6) **Limited authorization.** A CSAPR NO\textsubscript{X} Annual allowance is a limited authorization to emit one ton of NO\textsubscript{X} during the control period in one year. Such authorization is limited in its use and duration as follows:

(i) Such authorization shall only be used in accordance with the CSAPR NO\textsubscript{X} Annual Trading Program; and

(ii) Notwithstanding any other provision of this subpart, the Administrator has the authority to terminate or limit the use and duration of such authorization to the extent the Administrator determines is necessary or appropriate to implement any provision of the Clean Air Act.

(7) **Property right.** A CSAPR NO\textsubscript{X} Annual allowance does not constitute a property right.

(d) **Title V permit requirements.** (1) No Title V permit revision shall be required for any allocation, holding, deduction, or transfer of CSAPR NO\textsubscript{X} Annual allowances in accordance with this subpart.

(2) A description of whether a unit is required to monitor and report NO\textsubscript{X} emissions using a continuous emission monitoring system (under subpart NO of part 75 of this chapter), an excepted monitoring system (under appendices D and E to part 75 of this chapter), a low mass emissions excepted monitoring methodology (under §75.19 of this chapter), or an alternative monitoring system (under subpart E of part 75 of this chapter) in accordance with §§97.430 through 97.435 may be added to, or changed in, a Title V permit using minor permit modification procedures in accordance with §§70.7(e)(2) and 71.7(e)(1) of this chapter, provided that the requirements applicable to the described monitoring and reporting (as added or changed, respectively) are already incorporated in such permit. This paragraph explicitly provides that the addition of, or change to, a unit’s description as described in the prior sentence is eligible for minor permit modification procedures in accordance with §§70.7(e)(2)(i)(B) and 71.7(e)(1)(i)(B) of this chapter.

(e) **Additional recordkeeping and reporting requirements.** (1) Unless otherwise provided, the owners and operators of each CSAPR NO\textsubscript{X} Annual source and each CSAPR NO\textsubscript{X} Annual unit at the source shall keep on site at the source each of the following documents (in hardcopy or electronic format) for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the Administrator.

(i) The certificate of representation under §97.416 for the designated representative for the source and each CSAPR NO\textsubscript{X} Annual unit at the source shall keep on site at the source each of the following documents (in hardcopy or electronic format) for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the Administrator.

(ii) The certificate of representation under §97.416 for the designated representative for the source and each CSAPR NO\textsubscript{X} Annual unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such certificate of representation and documents are superseded because of the submission of a new certificate of representation under §97.416 changing the designated representative.
(ii) All emissions monitoring information, in accordance with this subpart.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under, or to demonstrate compliance with the requirements of, the CSAPR NO\textsubscript{X} Annual Trading Program.

(2) The designated representative of a CSAPR NO\textsubscript{X} Annual source and each CSAPR NO\textsubscript{X} Annual unit at the source shall make all submissions required under the CSAPR NO\textsubscript{X} Annual Trading Program, except as provided in §97.418. This requirement does not change, create an exemption from, or otherwise affect the responsible official submission requirements under a title V operating permit program in parts 70 and 71 of this chapter.

(f) Liability. (1) Any provision of the CSAPR NO\textsubscript{X} Annual Trading Program that applies to a CSAPR NO\textsubscript{X} Annual source or the designated representative of a CSAPR NO\textsubscript{X} Annual source shall also apply to the owners and operators of such source and of the CSAPR NO\textsubscript{X} Annual units at the source.

(2) Any provision of the CSAPR NO\textsubscript{X} Annual Trading Program that applies to a CSAPR NO\textsubscript{X} Annual unit or the designated representative of a CSAPR NO\textsubscript{X} Annual unit shall also apply to the owners and operators of such unit.

(g) Effect on other authorities. No provision of the CSAPR NO\textsubscript{X} Annual Trading Program or exemption under §97.405 shall be construed as exempting or excluding the owners and operators, and the designated representative, of a CSAPR NO\textsubscript{X} Annual source or CSAPR NO\textsubscript{X} Annual unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the Clean Air Act.

§97.407 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CSAPR NO\textsubscript{X} Annual Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CSAPR NO\textsubscript{X} Annual Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CSAPR NO\textsubscript{X} Annual Trading Program, is not a business day, the time period shall be extended to the next business day.

§97.408 Administrative appeal procedures.

The administrative appeal procedures for decisions of the Administrator under the CSAPR NO\textsubscript{X} Annual Trading Program are set forth in part 78 of this chapter.

§97.409 [Reserved]

§97.410 State NO\textsubscript{X} Annual trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.

(a) The State NO\textsubscript{X} Annual trading budgets, new unit set-asides, and Indian country new unit set-asides for allocations of CSAPR NO\textsubscript{X} Annual allowances for the control periods in 2015 and thereafter are as follows:

(i) Alabama. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 72,691 tons.

(ii) The new unit set-aside for 2015 and 2016 is 1,454 tons.

(iii) [Reserved]

(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 71,962 tons.

(v) The new unit set-aside for 2017 and thereafter is 1,439 tons.

(vi) [Reserved]

(ii) The new unit set-aside for 2015 and 2016 is 1,454 tons.

(iii) [Reserved]

(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 71,962 tons.

(v) The new unit set-aside for 2017 and thereafter is 1,439 tons.

(2) Georgia. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 62,010 tons.

(ii) The new unit set-aside for 2015 and 2016 is 1,240 tons.

(iii) [Reserved]

(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 53,738 tons.

(v) The new unit set-aside for 2017 and thereafter is 1,075 tons.
(vi) [Reserved]

(3) Illinois. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 47,872 tons.
(ii) The new unit set-aside for 2015 and 2016 is 3,830 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 47,872 tons.
(v) The new unit set-aside for 2017 and thereafter is 3,830 tons.
(vi) [Reserved]

(4) Indiana. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 109,726 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 108,424 tons.
(v) The new unit set-aside for 2017 and thereafter is 3,253 tons.
(vi) [Reserved]

(5) Iowa. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 38,335 tons.
(ii) The new unit set-aside for 2015 and 2016 is 729 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 38 tons.
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 37,498 tons.
(v) The new unit set-aside for 2017 and thereafter is 712 tons.
(vi) [Reserved]

(6) Kansas. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 31,354 tons.
(ii) The new unit set-aside for 2015 and 2016 is 596 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 31 tons.
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 31,354 tons.
(v) The new unit set-aside for 2017 and thereafter is 712 tons.
(vi) [Reserved]

(7) Kentucky. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 85,086 tons.
(ii) The new unit set-aside for 2015 and 2016 is 3,403 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 85,086 tons.
(v) The new unit set-aside for 2017 and thereafter is 3,403 tons.
(vi) [Reserved]

(8) Maryland. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 16,633 tons.
(ii) The new unit set-aside for 2015 and 2016 is 333 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 16,574 tons.
(v) The new unit set-aside for 2017 and thereafter is 331 tons.
(vi) [Reserved]

(9) Michigan. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 65,421 tons.
(ii) The new unit set-aside for 2015 and 2016 is 1,243 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 65 tons.
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 63,040 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,198 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 63 tons.

(10) Minnesota. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 29,572 tons.
(ii) The new unit set-aside for 2015 and 2016 is 561 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 30 tons.
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 29,572 tons.
(v) The new unit set-aside for 2017 and thereafter is 561 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 30 tons.

(11) Missouri. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 62,400 tons.
(ii) The new unit set-aside for 2015 is 1,572 tons and for 2016 is 3,144 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 48,743 tons.
(v) The new unit set-aside for 2017 and thereafter is 2,925 tons.
(vi) [Reserved]

(12) Nebraska. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 30,039 tons.
(ii) The new unit set-aside for 2015 and 2016 is 1,772 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 30 tons.
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 30,039 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,772 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 30 tons.  
(13) New Jersey. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 8,218 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 164 tons.  
(iii) [Reserved]  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 7,945 tons.  
(v) The new unit set-aside for 2017 and thereafter is 159 tons.  
(vi) [Reserved]  
(14) New York. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 21,722 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 412 tons.  
(iii) The Indian country new unit set-aside for 2015 and 2016 is 22 tons.  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 21,722 tons.  
(v) The new unit set-aside for 2017 and thereafter is 412 tons.  
(vi) The Indian country new unit set-aside for 2017 and thereafter is 22 tons.  
(15) North Carolina. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 50,587 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 2,984 tons.  
(iii) The Indian country new unit set-aside for 2015 and 2016 is 51 tons.  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 41,553 tons.  
(v) The new unit set-aside for 2017 and thereafter is 2,451 tons.  
(vi) The Indian country new unit set-aside for 2017 and thereafter is 42 tons.  
(16) Ohio. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 95,468 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 1,909 tons.  
(iii) [Reserved]  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 90,258 tons.  
(v) The new unit set-aside for 2017 and thereafter is 1,805 tons.  
(vi) [Reserved]  
(17) Pennsylvania. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 119,986 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 2,400 tons.  
(iii) [Reserved]  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 119,184 tons.  
(v) The new unit set-aside for 2017 and thereafter is 2,384 tons.  
(vi) [Reserved]  
(18) South Carolina. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 32,498 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 617 tons.  
(iii) The Indian country new unit set-aside for 2015 and 2016 is 33 tons.  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 32,498 tons.  
(v) The new unit set-aside for 2017 and thereafter is 617 tons.  
(vi) The Indian country new unit set-aside for 2017 and thereafter is 33 tons.  
(19) Tennessee. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 35,703 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 714 tons.  
(iii) [Reserved]  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 387 tons.  
(v) The new unit set-aside for 2017 and thereafter is 387 tons.  
(vi) [Reserved]  
(20) Texas. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 137,701 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 5,370 tons.  
(iii) The Indian country new unit set-aside for 2015 and 2016 is 138 tons.  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 33,242 tons.  
(v) The new unit set-aside for 2017 and thereafter is 5,370 tons.  
(vi) The Indian country new unit set-aside for 2017 and thereafter is 138 tons.  
(21) Virginia. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 33,242 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 1,662 tons.  
(iii) [Reserved]  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 33,242 tons.  
(v) The new unit set-aside for 2017 and thereafter is 1,662 tons.  
(vi) [Reserved]  
(22) West Virginia. (i) The NO\textsubscript{X} Annual trading budget for 2015 and 2016 is 59,472 tons.  
(ii) The new unit set-aside for 2015 and 2016 is 2,974 tons.  
(iii) [Reserved]  
(iv) The NO\textsubscript{X} Annual trading budget for 2017 and thereafter is 54,582 tons.  
(v) The new unit set-aside for 2017 and thereafter is 2,729 tons.
(vi) [Reserved]

(23) Wisconsin. (i) The NOX Annual trading budget for 2015 and 2016 is 34,101 tons.
   (ii) The new unit set-aside for 2015 and 2016 is 2,612 tons.
   (iii) The Indian country new unit set-aside for 2015 and 2016 is 34 tons.
   (iv) The NOX Annual trading budget for 2017 and thereafter is 32,871 tons.
   (v) The new unit set-aside for 2017 and thereafter is 1,939 tons.
   (vi) The Indian country new unit set-aside for 2017 and thereafter is 33 tons.

(b) The States’ variability limits for the State NOX Annual trading budgets for the control periods in 2017 and thereafter are as follows:
   (1) The variability limit for Alabama is 12,953 tons.
   (2) The variability limit for Georgia is 9,673 tons.
   (3) The variability limit for Illinois is 8,617 tons.
   (4) The variability limit for Indiana is 19,516 tons.
   (5) The variability limit for Iowa is 6,750 tons.
   (6) The variability limit for Kansas is 5,644 tons.
   (7) The variability limit for Kentucky is 13,903 tons.
   (8) The variability limit for Maryland is 2,983 tons.
   (9) The variability limit for Michigan is 11,347 tons.
   (10) The variability limit for Minnesota is 5,323 tons.
   (11) The variability limit for Missouri is 6,774 tons.
   (12) The variability limit for Nebraska is 5,467 tons.
   (13) The variability limit for New Jersey is 1,430 tons.
   (14) The variability limit for New York is 3,910 tons.
   (15) The variability limit for North Carolina is 7,480 tons.
   (16) The variability limit for Ohio is 16,246 tons.
   (17) The variability limit for Pennsylvania is 21,455 tons.
   (18) The variability limit for South Carolina is 5,850 tons.
   (19) The variability limit for Tennessee is 3,481 tons.
   (20) The variability limit for Texas is 24,786 tons.

(21) The variability limit for Virginia is 5,984 tons.
(22) The variability limit for West Virginia is 9,825 tons.
(23) The variability limit for Wisconsin is 5,917 tons.

(c) Each State NOX Annual trading budget in this section includes any tons in a new unit set-aside or Indian country new unit set-aside but does not include any tons in a variability limit.

§ 97.411 Timing requirements for CSAPR NOX Annual allowance allocations.

(a) Existing units. (1) CSAPR NOX Annual allowances are allocated, for the control periods in 2015 and each year thereafter, as provided in a notice of data availability issued by the Administrator. Providing an allocation to a unit in such notice does not constitute a determination that the unit is a CSAPR NOX Annual unit, and not providing an allocation to a unit in such notice does not constitute a determination that the unit is not a CSAPR NOX Annual unit.

(2) Notwithstanding paragraph (a)(1) of this section, if a unit provided an allocation in the notice of data availability issued under paragraph (a)(1) of this section does not operate, starting after 2014, during the control period in two consecutive years, such unit will not be allocated the CSAPR NOX Annual allowances that would otherwise have been allocated to such unit. The Administrator will allocate CSAPR NOX Annual allowances to the unit in accordance with paragraph (b) of this section.

(b) New units—(1) New unit set-asides. (i) By June 1, 2015 and June 1 of each year thereafter, the Administrator will calculate the CSAPR NOX Annual allowance allocation to each CSAPR NOX...
Environmental Protection Agency § 97.411

Annual unit in a State, in accordance with §97.412(a)(2) through (7) and (12), for the control period in the year of the applicable calculation deadline under this paragraph and will promulgate a notice of data availability of the results of the calculations.

(ii) For each notice of data availability required in paragraph (b)(1)(i) of this section, the Administrator will provide an opportunity for submission of objections to the calculations referenced in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(1)(i) of this section and shall be limited to addressing whether the calculations (including the identification of the CSAPR NO\textsubscript{X} Annual units) are in accordance with §97.412(a)(2) through (7) and (12) and §§97.406(b)(2) and 97.430 through 97.435.

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(1)(ii)(A) of this section. By August 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments that the Administrator determines to be necessary with regard to allocations under §97.412(a)(2) through (7) and (12) and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(1)(ii)(A) of this section.

(iii) If the new unit set-aside for such control period contains any CSAPR NO\textsubscript{X} Annual allowances that have not been allocated in the applicable notice of data availability required in paragraph (b)(1)(ii) of this section, the Administrator will promulgate, by December 15 immediately after such notice, a notice of data availability that identifies any CSAPR NO\textsubscript{X} Annual units that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period.

(iv) For each notice of data availability required in paragraph (b)(1)(iii) of this section, the Administrator will provide an opportunity for submission of objections to the identification of CSAPR NO\textsubscript{X} Annual units in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(1)(iii) of this section and shall be limited to addressing whether the identification of CSAPR NO\textsubscript{X} Annual units in such notice is in accordance with paragraph (b)(1)(iii) of this section.

(B) The Administrator will adjust the identification of CSAPR NO\textsubscript{X} Annual units in each notice of data availability required in paragraph (b)(1)(iii) of this section to the extent necessary to ensure that it is in accordance with paragraph (b)(1)(iii) of this section and will calculate the CSAPR NO\textsubscript{X} Annual allowance allocation to each CSAPR NO\textsubscript{X} Annual unit in accordance with §97.412(a)(9), (10), and (12) and §§97.406(b)(2) and 97.430 through 97.435. By February 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(iii) of this section, the Administrator will promulgate a notice of data availability of any adjustments of the identification of CSAPR NO\textsubscript{X} Annual units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(1)(iv)(A) of this section, and the results of such calculations.

(v) To the extent any CSAPR NO\textsubscript{X} Annual allowances are added to the new unit set-aside after promulgation of each notice of data availability required in paragraph (b)(1)(iv) of this section, the Administrator will promulgate additional notices of data availability, as deemed appropriate, of the allocation of such CSAPR NO\textsubscript{X} Annual allowances in accordance with §97.412(a)(10).

(2) Indian country new unit set-asides.

(i) By June 1, 2015 and June 1 of each year thereafter, the Administrator will calculate the CSAPR NO\textsubscript{X} Annual allowance allocation to each CSAPR NO\textsubscript{X} Annual unit in Indian country within the borders of a State, in accordance with §97.412(b)(2) through (7) and (12), for the control period in the year of the applicable calculation deadline under
this paragraph and will promulgate a notice of data availability of the results of the calculations.

(ii) For each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will provide an opportunity for submission of objections to the calculations referenced in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(2)(i) of this section and shall be limited to addressing whether the calculations (including the identification of the CSAPR NO\textsubscript{X} Annual units) are in accordance with §97.412(b)(2) through (7) and (12) and §§97.406(b)(2) and 97.430 through 97.435.

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(i)(A) of this section. By August 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments that the Administrator determines to be necessary with regard to allocations under §97.412(b)(2) through (7) and (12) and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(i)(A) of this section.

(iii) If the Indian country new unit set-aside for such control period contains any CSAPR NO\textsubscript{X} Annual allowances that have not been allocated in the applicable notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will promulgate, by December 15 immediately after such notice, a notice of data availability that identifies any CSAPR NO\textsubscript{X} Annual units that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period.

(iv) For each notice of data availability required in paragraph (b)(2)(iii) of this section, the Administrator will provide an opportunity for submission of objections to the identification of CSAPR NO\textsubscript{X} Annual units in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(2)(iii) of this section and shall be limited to addressing whether the identification of CSAPR NO\textsubscript{X} Annual units in such notice is in accordance with paragraph (b)(2)(iii) of this section.

(B) The Administrator will adjust the identification of CSAPR NO\textsubscript{X} Annual units in each notice of data availability required in paragraph (b)(2)(iii) of this section to the extent necessary to ensure that it is in accordance with paragraph (b)(2)(iii) of this section and will calculate the CSAPR NO\textsubscript{X} Annual allowance allocation to each CSAPR NO\textsubscript{X} Annual unit in accordance with §97.412(b)(9), (10), and (12) and §§97.406(b)(2) and 97.430 through 97.435. By February 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii) of this section, the Administrator will promulgate a notice of data availability of any adjustments of the identification of CSAPR NO\textsubscript{X} Annual units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iv)(A) of this section, and the results of such calculations.

(v) To the extent any CSAPR NO\textsubscript{X} Annual allowances are added to the Indian country new unit set-aside after promulgation of each notice of data availability required in paragraph (b)(2)(iv) of this section, the Administrator will promulgate additional notices of data availability, as deemed appropriate, of the allocation of such CSAPR NO\textsubscript{X} Annual allowances in accordance with §97.412(b)(10).

(c) Units incorrectly allocated CSAPR NO\textsubscript{X} Annual allowances. (1) For each control period in 2015 and thereafter, if the Administrator determines that CSAPR NO\textsubscript{X} Annual allowances were allocated under paragraph (a) of this section, or under a provision of a SIP revision approved under §52.38(a)(3), (4), or (5) of this chapter, where such control period and the recipient are covered by the provisions of paragraph (c)(1)(i) of this section or were allocated under §97.412(a)(2) through (7),
Environmental Protection Agency

§ 97.411

(9), and (12) and (b)(2) through (7), (9), and (12), or under a provision of a SIP revision approved under §52.38(a)(4) or (5) of this chapter, where such control period and the recipient are covered by the provisions of paragraph (c)(1)(ii) of this section, then the Administrator will notify the designated representative of the recipient and will act in accordance with the procedures set forth in paragraphs (c)(2) through (5) of this section:

(i)(A) The recipient is not actually a CSAPR NOx Annual unit under §97.404 as of January 1, 2015 and is allocated CSAPR NOx Annual allowances for such control period or, in the case of an allocation under a provision of a SIP revision approved under §52.38(a)(3), (4), or (5) of this chapter, the recipient is not actually a CSAPR NOx Annual unit as of January 1, 2015 and is allocated CSAPR NOx Annual allowances for such control period that the SIP revision provides should be allocated only to recipients that are CSAPR NOx Annual units as of January 1, 2015; or

(B) The recipient is not located as of January 1 of the control period in the State from whose NOx Annual trading budget the CSAPR NOx Annual allowances allocated under paragraph (a) of this section, or under a provision of a SIP revision approved under §52.38(a)(3), (4), or (5) of this chapter, were allocated for such control period.

(ii) The recipient is not actually a CSAPR NOx Annual unit under §97.404 as of January 1 of such control period and is allocated CSAPR NOx Annual allowances for such control period or, in the case of an allocation under a provision of a SIP revision approved under §52.38(a)(4) or (5) of this chapter, the recipient is not actually a CSAPR NOx Annual unit as of January 1 of such control period and is allocated CSAPR NOx Annual allowances for such control period that the SIP revision provides should be allocated only to recipients that are CSAPR NOx Annual units as of January 1 of such control period.

(2) Except as provided in paragraph (c)(3) or (4) of this section, the Administrator will not record such CSAPR NOx Annual allowances under §97.421 and if the Administrator makes the determination under paragraph (c)(1) of this section before making deductions for the source that includes such recipient under §97.424(b) for such control period, then the Administrator will deduct from the account in which such CSAPR NOx Annual allowances were recorded an amount of CSAPR NOx Annual allowances allocated for the same or a prior control period equal to the amount of such already recorded CSAPR NOx Annual allowances. The authorized account representative shall ensure that there are sufficient CSAPR NOx Annual allowances in such account for completion of the deduction.

(4) If the Administrator already recorded such CSAPR NOx Annual allowances under §97.421 and if the Administrator makes the determination under paragraph (c)(1) of this section after making deductions for the source that includes such recipient under §97.424(b) for such control period, then the Administrator will not make any deduction to take account of such already recorded CSAPR NOx Annual allowances.

(5)(i) With regard to the CSAPR NOx Annual allowances that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(i) of this section, the Administrator will:

(A) Transfer such CSAPR NOx Annual allowances to the new unit set-aside for such control period for the State from whose NOx Annual trading budget the CSAPR NOx Annual allowances were allocated; or

(B) If the State has a SIP revision approved under §52.38(a)(4) or (5) of this chapter covering such control period, include such CSAPR NOx Annual allowances in the portion of the State NOx Annual trading budget that may be allocated for such control period in accordance with such SIP revision.

(ii) With regard to the CSAPR NOx Annual allowances that were not allocated from the Indian country new unit set-aside for such control period and that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under
paragraph (c)(1)(ii) of this section, the Administrator will:

(A) Transfer such CSAPR NO\textsubscript{X} Annual allowances to the new unit set-aside for such control period; or

(B) If the State has a SIP revision approved under §52.38(a)(4) or (5) of this chapter covering such control period, include such CSAPR NO\textsubscript{X} Annual allowances in the portion of the State NO\textsubscript{X} Annual trading budget that may be allocated for such control period in accordance with such SIP revision.

(iii) With regard to the CSAPR NO\textsubscript{X} Annual allowances that were allocated from the Indian country new unit set-aside for such control period and that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(ii) of this section, the Administrator will transfer such CSAPR NO\textsubscript{X} Annual allowances to the Indian country new unit set-aside for such control period.

§ 97.412 CSAPR NO\textsubscript{X} Annual allowance allocations to new units.

(a) For each control period in 2015 and thereafter and for the CSAPR NO\textsubscript{X} Annual units in each State, the Administrator will allocate CSAPR NO\textsubscript{X} Annual allowances to the CSAPR NO\textsubscript{X} Annual units as follows:

(1) The CSAPR NO\textsubscript{X} Annual allowances will be allocated to the following CSAPR NO\textsubscript{X} Annual units, except as provided in paragraph (a)(10) of this section:

(i) CSAPR NO\textsubscript{X} Annual units that are not allocated an amount of CSAPR NO\textsubscript{X} Annual allowances in the notice of data availability issued under §97.411(a)(1);

(ii) CSAPR NO\textsubscript{X} Annual units whose allocation of an amount of CSAPR NO\textsubscript{X} Annual allowances for such control period in the notice of data availability issued under §97.411(a)(1) is covered by §97.411(c)(2) or (3);

(iii) CSAPR NO\textsubscript{X} Annual units that are allocated an amount of CSAPR NO\textsubscript{X} Annual allowances for such control period in the notice of data availability issued under §97.411(a)(1), which allocation is terminated for such control period pursuant to §97.411(a)(2), and that operate during the control period immediately preceding such control period; or

(iv) For purposes of paragraph (a)(9) of this section, CSAPR NO\textsubscript{X} Annual units under §97.411(c)(1)(ii) whose allocation of an amount of CSAPR NO\textsubscript{X} Annual allowances for such control period in the notice of data availability issued under §97.411(b)(1)(i)(B) is covered by §97.411(c)(2) or (3).

(2) The Administrator will establish a separate new unit set-aside for the State for each such control period. Each such new unit set-aside will be allocated CSAPR NO\textsubscript{X} Annual allowances in an amount equal to the applicable amount of tons of NO\textsubscript{X} emissions as set forth in §97.410(a) and will be allocated additional CSAPR NO\textsubscript{X} Annual allowances (if any) in accordance with §97.411(a)(2) and (c)(5) and paragraph (b)(10) of this section.

(3) The Administrator will determine, for each CSAPR NO\textsubscript{X} Annual unit described in paragraph (a)(1) of this section, an allocation of CSAPR NO\textsubscript{X} Annual allowances for the later of the following control periods and for each subsequent control period:

(i) The control period in 2015;

(ii) The first control period after the control period in which the CSAPR NO\textsubscript{X} Annual unit commences commercial operation;

(iii) For a unit described in paragraph (a)(1)(ii) of this section, the first control period in which the CSAPR NO\textsubscript{X} Annual unit operates in the State after operating in another jurisdiction and for which the unit is not already allocated one or more CSAPR NO\textsubscript{X} Annual allowances; and

(iv) For a unit described in paragraph (a)(1)(iii) of this section, the first control period after the control period in which the unit resumes operation.

(4)(i) The allocation to each CSAPR NO\textsubscript{X} Annual unit described in paragraphs (a)(1)(i) through (iii) of this section and for each control period described in paragraph (a)(3) of this section will be an amount equal to the unit’s total tons of NO\textsubscript{X} emissions during the immediately preceding control period.
(i) The Administrator will adjust the allocation amount in paragraph (a)(4)(i) of this section in accordance with paragraphs (a)(5) through (7) and (12) of this section.

(5) The Administrator will calculate the sum of the CSAPR NO\textsubscript{X} Annual allowances determined for all such CSAPR NO\textsubscript{X} Annual units under paragraph (a)(4)(i) of this section in the State for such control period.

(6) If the amount of CSAPR NO\textsubscript{X} Annual allowances in the new unit set-aside for the State for such control period is greater than or equal to the sum under paragraph (a)(5) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Annual allowances determined for each such CSAPR NO\textsubscript{X} Annual unit under paragraph (a)(4)(i) of this section.

(7) If the amount of CSAPR NO\textsubscript{X} Annual allowances in the new unit set-aside for the State for such control period is less than the sum under paragraph (a)(5) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{X} Annual unit the amount of the CSAPR NO\textsubscript{X} Annual allowances determined under paragraph (a)(4)(i) of this section, multiplied by the amount of CSAPR NO\textsubscript{X} Annual allowances in the new unit set-aside for such control period, divided by the sum under paragraph (a)(5) of this section, and rounded to the nearest allowance.

(8) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.411(b)(1)(i) and (ii), of the amount of CSAPR NO\textsubscript{X} Annual allowances allocated under paragraphs (a)(2) through (7) and (12) of this section for such control period to each CSAPR NO\textsubscript{X} Annual unit eligible for such allocation.

(9) If, after completion of the procedures under paragraphs (a)(5) through (8) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Annual allowances remain in the new unit set-aside for the State for such control period, the Administrator will allocate such CSAPR NO\textsubscript{X} Annual allowances as follows—

(i) The Administrator will determine, for each unit described in paragraph (a)(1) of this section that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of CSAPR NO\textsubscript{X} Annual allowances referenced in the notice of data availability required under §97.411(b)(1)(ii) for the unit for such control period;

(ii) The Administrator will determine the sum of the positive differences determined under paragraph (a)(9)(i) of this section;

(iii) If the amount of unallocated CSAPR NO\textsubscript{X} Annual allowances remaining in the new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (a)(9)(ii) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Annual allowances determined for each such CSAPR NO\textsubscript{X} Annual unit under paragraph (a)(9)(i) of this section; and

(iv) If the amount of unallocated CSAPR NO\textsubscript{X} Annual allowances remaining in the new unit set-aside for the State for such control period is less than the sum under paragraph (a)(9)(ii) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{X} Annual unit the amount of the CSAPR NO\textsubscript{X} Annual allowances determined under paragraph (a)(9)(i) of this section for the unit, multiplied by the amount of unallocated CSAPR NO\textsubscript{X} Annual allowances remaining in the new unit set-aside for such control period, divided by the sum under paragraph (a)(9)(ii) of this section, and rounded to the nearest allowance.

(10) If, after completion of the procedures under paragraphs (a)(9) and (12) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Annual allowances remain in the new unit set-aside for the State for such control period, the Administrator will allocate to each CSAPR NO\textsubscript{X} Annual unit that is in the State, is allocated an amount of CSAPR NO\textsubscript{X} Annual allowances in the notice of data availability issued under §97.411(a)(1), and continues to be allocated CSAPR NO\textsubscript{X} Annual allowances for such control period in accordance with §97.411(a)(2), an amount of CSAPR.
NO\textsubscript{X} Annual allowances equal to the following: The total amount of such remaining unallocated CSAPR NO\textsubscript{X} Annual allowances in such new unit set-aside, multiplied by the unit’s allocation under §97.411(a) for such control period, divided by the remainder of the amount of tons in the applicable State NO\textsubscript{X} Annual trading budget minus the sum of the amounts of tons in such new unit set-aside and the Indian country new unit set-aside for the State for such control period, and rounded to the nearest allowance.

(11) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.411(b)(1)(i), (iv), and (v), of the amount of CSAPR NO\textsubscript{X} Annual allowances allocated under paragraphs (a)(9), (10), and (12) of this section for such control period to each CSAPR NO\textsubscript{X} Annual unit eligible for such allocation.

(12)(i) Notwithstanding the requirements of paragraphs (a)(2) through (11) of this section, if the calculations of allocations of a new unit set-aside for a control period in a given year under paragraph (a)(7) of this section, paragraphs (a)(6) and (9)(iv) of this section, or paragraphs (a)(6), (9)(ii), and (10) of this section would otherwise result in total allocations of such new unit set-aside exceeding the total amount of such new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (a)(7), (9)(iv), or (10) of this section, as applicable, and, in cases of equal allocation amounts, in alphabetical order of the relevant unit’s identification number, and will increase each unit’s allocation under paragraph (a)(10) of this section by one CSAPR NO\textsubscript{X} Annual allowance in the order in which the units are listed and will repeat this increase process as necessary, until the total allocations of such new unit set-aside equal the total amount of such new unit set-aside.

(ii) Notwithstanding the requirements of paragraphs (a)(10) and (11) of this section, if the calculations of allocations of a new unit set-aside for a control period in a given year under paragraphs (a)(6), (9)(iii), and (10) of this section would otherwise result in a total allocations of such new unit set-aside less than the total amount of such new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (a)(10) of this section, as follows. The Administrator will list the CSAPR NO\textsubscript{X} Annual units in descending order based on the amount of such units’ allocations under paragraph (a)(10) of this section and, in cases of equal allocation amounts, in alphabetical order of the relevant source’s name and numerical order of the relevant unit’s identification number, and will decrease each unit’s allocation under paragraph (a)(10) of this section by one CSAPR NO\textsubscript{X} Annual allowance in the order in which the units are listed and will repeat this decrease process as necessary, until the total allocations of such new unit set-aside equal the total amount of such new unit set-aside.

(b) For each control period in 2015 and thereafter and for the CSAPR NO\textsubscript{X} Annual units located in Indian country within the borders of each State, the Administrator will allocate CSAPR NO\textsubscript{X} Annual allowances to the CSAPR NO\textsubscript{X} Annual units as follows:

(1) The CSAPR NO\textsubscript{X} Annual allowances will be allocated to the following CSAPR NO\textsubscript{X} Annual units, except as provided in paragraph (b)(10) of this section:

(i) CSAPR NO\textsubscript{X} Annual units that are not allocated an amount of CSAPR NO\textsubscript{X} Annual allowances in the notice of data availability issued under §97.411(a)(1); or

(ii) For purposes of paragraph (b)(9) of this section, CSAPR NO\textsubscript{X} Annual units under §97.411(c)(1)(ii) whose allocation of an amount of CSAPR NO\textsubscript{X} Annual allowances for such control period in the notice of data availability issued under §97.411(b)(2)(ii)(B) is covered by §97.411(c)(2) or (3).

(2) The Administrator will establish a separate Indian country new unit set-aside for the State for each such control period. Each such Indian country
new unit set-aside will be allocated CSAPR NO\textsubscript{X} Annual allowances in an amount equal to the applicable amount of tons of NO\textsubscript{X} emissions as set forth in §97.410(a) and will be allocated additional CSAPR NO\textsubscript{X} Annual allowances (if any) in accordance with §97.411(c)(5).

(3) The Administrator will determine, for each CSAPR NO\textsubscript{X} Annual unit described in paragraph (b)(1) of this section, an allocation of CSAPR NO\textsubscript{X} Annual allowances for the later of the following control periods and for each subsequent control period:

(i) The control period in 2015; and
(ii) The first control period after the control period in which the CSAPR NO\textsubscript{X} Annual unit commences commercial operation.

(4)(i) The allocation to each CSAPR NO\textsubscript{X} Annual unit described in paragraph (b)(1)(i) of this section and for each control period described in paragraph (b)(3) of this section will be an amount equal to the unit’s total tons of NO\textsubscript{X} emissions during the immediately preceding control period.

(ii) The Administrator will adjust the allocation amount in paragraph (b)(4)(i) of this section in accordance with paragraphs (b)(5) through (7) and (12) of this section.

(5) The Administrator will calculate the sum of the CSAPR NO\textsubscript{X} Annual allowances determined for all such CSAPR NO\textsubscript{X} Annual units under paragraph (b)(4)(i) of this section in Indian country within the borders of the State for such control period.

(6) If the amount of CSAPR NO\textsubscript{X} Annual allowances in the Indian country new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (b)(5) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Annual allowances determined for each such CSAPR NO\textsubscript{X} Annual unit under paragraph (b)(4)(i) of this section.

(7) If the amount of CSAPR NO\textsubscript{X} Annual allowances in the Indian country new unit set-aside for the State for such control period is less than the sum determined under paragraph (b)(5) of this section, then the Administrator will allocate the amount of the CSAPR NO\textsubscript{X} Annual allowances determined under paragraph (b)(4)(i) of this section for the unit, multiplied by the amount of CSAPR NO\textsubscript{X} Annual allowances in the Indian country new unit set-aside for such control period, divided by the sum under paragraph (b)(5) of this section, and rounded to the nearest allowance.

(8) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.411(b)(2)(i) and (ii), of the amount of CSAPR NO\textsubscript{X} Annual allowances allocated under paragraphs (b)(2) through (7) and (12) of this section for such control period to each CSAPR NO\textsubscript{X} Annual unit eligible for such allocation.

(9) If, after completion of the procedures under paragraphs (b)(5) through (8) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Annual allowances remain in the Indian country new unit set-aside for the State for such control period, the Administrator will allocate such CSAPR NO\textsubscript{X} Annual allowances as follows—

(i) The Administrator will determine, for each unit described in paragraph (b)(1) of this section that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of CSAPR NO\textsubscript{X} Annual allowances referenced in the notice of data availability required under §97.411(b)(2)(ii) for the unit for such control period;

(ii) The Administrator will determine the sum of the positive differences determined under paragraph (b)(9)(i) of this section;

(iii) If the amount of unallocated CSAPR NO\textsubscript{X} Annual allowances remaining in the Indian country new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (b)(9)(ii) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Annual allowances determined for each such CSAPR NO\textsubscript{X} Annual unit under paragraph (b)(9)(i) of this section; and
(iv) If the amount of unallocated CSAPR NO\textsubscript{X} Annual allowances remaining in the Indian country new unit set-aside for the State for such control period is less than the sum under paragraph (b)(9)(i) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{X} Annual unit the amount of the CSAPR NO\textsubscript{X} Annual allowances determined under paragraph (b)(9)(i) of this section for the unit, multiplied by the amount of unallocated CSAPR NO\textsubscript{X} Annual allowances remaining in the Indian country new unit set-aside for such control period, divided by the sum under paragraph (b)(9)(ii) of this section, and rounded to the nearest allowance.

(10) If, after completion of the procedures under paragraphs (b)(9) and (12) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Annual allowances remain in the Indian country new unit set-aside for the State for such control period, the Administrator will:

(i) Transfer such unallocated CSAPR NO\textsubscript{X} Annual allowances to the new unit set-aside for the State for such control period; or

(ii) If the State has a SIP revision approved under §52.38(a)(4) or (5) of this chapter covering such control period, include such unallocated CSAPR NO\textsubscript{X} Annual allowances in the portion of the State NO\textsubscript{X} Annual trading budget that may be allocated for such control period in accordance with such SIP revision.

(11) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.411(b)(2)(iii), (iv), and (v), of the amount of CSAPR NO\textsubscript{X} Annual allowances allocated under paragraphs (b)(9), (10), and (12) of this section for such control period to each CSAPR NO\textsubscript{X} Annual unit eligible for such allocation.

(12)(i) Notwithstanding the requirements of paragraphs (b)(2) through (11) of this section, if the calculations of allocations of an Indian country new unit set-aside for a control period in a given year under paragraphs (b)(6), (9)(iii), and (10) of this section would otherwise result in total allocations of such Indian country new unit set-aside exceeding the total amount of such Indian country new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, as follows. The Administrator will list the CSAPR NO\textsubscript{X} Annual units in descending order based on the amount of such units’ allocations under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, and, in cases of equal allocation amounts, in alphabetical order of the relevant source’s name and numerical order of the relevant unit’s identification number, and will reduce each unit’s allocation under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, by one CSAPR NO\textsubscript{X} Annual allowance (but not below zero) in the order in which the units are listed and will repeat this reduction process as necessary, until the total allocations of such Indian country new unit set-aside equal the total amount of such Indian country new unit set-aside.

(ii) Notwithstanding the requirements of paragraphs (b)(10) and (11) of this section, if the calculations of allocations of an Indian country new unit set-aside for a control period in a given year under paragraphs (b)(6), (9)(iii), and (10) of this section would otherwise result in a total allocations of such Indian country new unit set-aside less than the total amount of such Indian country new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (b)(10) of this section, as follows. The Administrator will list the CSAPR NO\textsubscript{X} Annual units in descending order based on the amount of such units’ allocations under paragraph (b)(10) of this section and, in cases of equal allocation amounts, in alphabetical order of the relevant source’s name and numerical order of the relevant unit’s identification number, and will increase each unit’s allocation under paragraph (b)(10) of this section by one CSAPR NO\textsubscript{X} Annual allowance in the order in which the units are listed and will repeat this increase process as necessary, until the total allocations of such Indian country new unit set-aside equal
Environmental Protection Agency

§ 97.414

Responsibilities of designated representative and alternate designated representative.

(a) Except as provided under §97.418 concerning delegation of authority to make submissions, each submission under the CSAPR NO\textsubscript{X} Annual Trading Program shall be made, signed, and certified by the designated representative or alternate designated representative for each CSAPR NO\textsubscript{X} Annual source and CSAPR NO\textsubscript{X} Annual unit for which the submission is made. Each such submission shall include the following certification statement by the designated representative or alternate designated representative: “I am authorized to make this submission on behalf of the owners and operators of the source and all CSAPR NO\textsubscript{X} Annual units at the source and shall act in accordance with the certification statement in §97.416(a)(4)(iii).”

(b) Except as provided under §97.415, each CSAPR NO\textsubscript{X} Annual source may have one and only one alternate designated representative, who may act on behalf of the designated representative. The agreement by which the alternate designated representative is selected shall include a procedure for authorizing the alternate designated representative to act in lieu of the designated representative.

(i) The alternate designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR NO\textsubscript{X} Annual units at the source, but shall have one and only one designated representative, with regard to all matters under the CSAPR NO\textsubscript{X} Annual Trading Program.

(1) The designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR NO\textsubscript{X} Annual units at the source, and shall act in accordance with the certification statement in §97.416(a)(4)(iii).

(2) Upon and after receipt by the Administrator of a complete certificate of representation under §97.416,

(i) The alternate designated representative shall be authorized;

(ii) Any representation, action, inaction, or submission by the alternate designated representative shall be deemed to be a representation, action, inaction, or submission by the designated representative; and

(iii) The owners and operators of the source and each CSAPR NO\textsubscript{X} Annual unit at the source shall be bound by any decision or order issued to the alternate designated representative by the Administrator regarding the source or any such unit.

(c) Except in this section, §97.402, and §§97.414 through 97.418, whenever the term “designated representative” (as distinguished from the term “common designated representative”) is used in this subpart, the term shall be construed to include the designated representative or any alternate designated representative.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74604, Oct. 26, 2016]

§ 97.413 Authorization of designated representative and alternate designated representative.

(a) Except as provided under §97.415, each CSAPR NO\textsubscript{X} Annual source, including all CSAPR NO\textsubscript{X} Annual units at the source, shall have one and only one designated representative, with regard to all matters under the CSAPR NO\textsubscript{X} Annual Trading Program.

(1) The designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR NO\textsubscript{X} Annual units at the source and shall act in accordance with the certification statement in §97.416(a)(4)(iii).

(2) Upon and after receipt by the Administrator of a complete certificate of representation under §97.416,

(i) The designated representative shall be authorized and shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the source and each CSAPR NO\textsubscript{X} Annual unit at the source in all matters pertaining to the CSAPR NO\textsubscript{X} Annual Trading Program, notwithstanding any agreement between the designated representative and such owners and operators; and

(ii) The owners and operators of the source and each CSAPR NO\textsubscript{X} Annual unit at the source shall be bound by any decision or order issued to the designated representative by the Administrator regarding the source or any such unit.

(b) Except as provided under §97.415, each CSAPR NO\textsubscript{X} Annual source may have one and only one alternate designated representative, who may act on behalf of the designated representative.

(1) The designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR NO\textsubscript{X} Annual units at the source and shall act in accordance with the certification statement in §97.416(a)(4)(iii).

(2) Upon and after receipt by the Administrator of a complete certificate of representation under §97.416,

(i) The alternate designated representative shall be authorized;

(ii) Any representation, action, inaction, or submission by the alternate designated representative shall be deemed to be a representation, action, inaction, or submission by the designated representative; and

(iii) The owners and operators of the source and each CSAPR NO\textsubscript{X} Annual unit at the source shall be bound by any decision or order issued to the alternate designated representative by the Administrator regarding the source or any such unit.

(c) Except in this section, §97.402, and §§97.414 through 97.418, whenever the term “designated representative” (as distinguished from the term “common designated representative”) is used in this subpart, the term shall be construed to include the designated representative or any alternate designated representative.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74604, Oct. 26, 2016]
in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(b) The Administrator will accept or act on a submission made for a CSAPR NOX Annual source or a CSAPR NOX Annual unit only if the submission has been made, signed, and certified in accordance with paragraph (a) of this section and §97.418.

§ 97.415 Changing designated representative and alternate designated representative; changes in owners and operators; changes in units at the source.

(a) Changing designated representative. The designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.416. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new designated representative and the owners and operators of the CSAPR NOX Annual source and the CSAPR NOX Annual units at the source.

(b) Changing alternate designated representative. The alternate designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.416. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate designated representative.

(c) Changes in owners and operators. (1) In the event an owner or operator of a CSAPR NOX Annual source or a CSAPR NOX Annual unit at the source is not included in the list of owners and operators in the certificate of representation under §97.416, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the designated representative and any alternate designated representative of the source or unit, and the decisions and orders of the Administrator, as if the owner or operator were included in such list.

(2) Within 30 days after any change in the owners and operators of a CSAPR NOX Annual source or a CSAPR NOX Annual unit at the source, including the addition or removal of an owner or operator, the designated representative or any alternate designated representative shall submit a revision to the certificate of representation under §97.416 amending the list of owners and operators to reflect the change.

(d) Changes in units at the source. Within 30 days of any change in which units are located at a CSAPR NOX Annual source (including the addition or removal of a unit), the designated representative or any alternate designated representative shall submit a certificate of representation under §97.416 amending the list of units to reflect the change.

(1) If the change is the addition of a unit that operated (other than for purposes of testing by the manufacturer before initial installation) before being located at the source, then the certificate of representation shall identify, in a format prescribed by the Administrator, the entity from whom the unit was purchased or otherwise obtained (including name, address, telephone number, and facsimile number (if any)), the date on which the unit was purchased or otherwise obtained, and the date on which the unit became located at the source.
Environmental Protection Agency § 97.416

(2) If the change is the removal of a unit, then the certificate of representation shall identify, in a format prescribed by the Administrator, the entity to which the unit was sold or that otherwise obtained the unit (including name, address, telephone number, and facsimile number (if any)), the date on which the unit was sold or otherwise obtained, and the date on which the unit became no longer located at the source.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74604, Oct. 26, 2016]

§ 97.416 Certificate of representation.

(a) A complete certificate of representation for a designated representative or an alternate designated representative shall include the following elements in a format prescribed by the Administrator:

(1) Identification of the CSAPR NO\textsubscript{X} Annual source, and each CSAPR NO\textsubscript{X} Annual unit at the source, for which the certificate of representation is submitted, including source name, source category and NAICS code (or, in the absence of a NAICS code, an equivalent code), State, plant code, county, latitude and longitude, unit identification number and type, identification number and nameplate capacity (in MWe, rounded to the nearest tenth) of each generator served by each such unit, actual or projected date of commencement of commercial operation, and a statement of whether such source is located in Indian country. If a projected date of commencement of commercial operation is provided, the actual date of commencement of commercial operation shall be provided when such information becomes available.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the designated representative and any alternate designated representative.

(3) A list of the owners and operators of the CSAPR NO\textsubscript{X} Annual source and of each CSAPR NO\textsubscript{X} Annual unit at the source.

(4) The following certification statements by the designated representative and any alternate designated representative—

(i) "I certify that I was selected as the designated representative or alternate designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CSAPR NO\textsubscript{X} Annual unit at the source."

(ii) "I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR NO\textsubscript{X} Annual Trading Program on behalf of the owners and operators of the source and of each CSAPR NO\textsubscript{X} Annual unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the source or unit."

(iii) "Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CSAPR NO\textsubscript{X} Annual unit, or where a utility or industrial customer purchases power from a CSAPR NO\textsubscript{X} Annual unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘designated representative’ or ‘alternate designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CSAPR NO\textsubscript{X} Annual unit at the source; and CSAPR NO\textsubscript{X} Annual allowances and proceeds of transactions involving CSAPR NO\textsubscript{X} Annual allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CSAPR NO\textsubscript{X} Annual allowances by contract, CSAPR NO\textsubscript{X} Annual allowances and proceeds of transactions involving CSAPR NO\textsubscript{X} Annual allowances will be deemed to be held or distributed in accordance with the contract."

(5) The signature of the designated representative and any alternate designated representative and the dates signed.

(b) Unless otherwise required by the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted.
§ 97.417 Objections concerning designated representative and alternate designated representative.

(a) Once a complete certificate of representation under §97.416 has been submitted and received, the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under §97.416 is received by the Administrator.

(b) Except as provided in paragraph (a) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission, of a designated representative or alternate designated representative shall affect any representation, action, inaction, or submission of the designated representative or alternate designated representative or the finality of any decision or order by the Administrator under the CSAPR NOx Annual Trading Program.

(c) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any designated representative or alternate designated representative, including private legal disputes concerning the proceeds of CSAPR NOx Annual allowance transfers.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74604, Oct. 26, 2016]

§ 97.418 Delegation by designated representative and alternate designated representative.

(a) A designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(b) An alternate designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(c) In order to delegate authority to a natural person to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the designated representative or alternate designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

1. The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to in this section as an “agent”);

2. For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

3. The following certification statements by such designated representative or alternate designated representative:

   (i) “I agree that any electronic submission to the Administrator that is made by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a designated representative or alternate designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.418(d) shall be deemed to be an electronic submission by me.”
(ii) “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.418(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.418 is terminated.”

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the designated representative or alternate designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such designated representative or alternate designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph (c)(4)(i) of this section and made in accordance with a notice of delegation effective under paragraph (d) of this section shall be deemed to be an electronic submission by the designated representative or alternate designated representative submitting such notice of delegation.

§ 97.419 [Reserved]

§ 97.420 Establishment of compliance accounts, assurance accounts, and general accounts.

(a) Compliance accounts. Upon receipt of a complete certificate of representation under §97.416, the Administrator will establish a compliance account for the CSAPR NO\textsubscript{X} Annual source for which the certificate of representation was submitted, unless the source already has a compliance account. The designated representative and any alternate designated representative of the source shall be the authorized account representative and the alternate authorized account representative respectively of the compliance account.

(b) Assurance accounts. The Administrator will establish assurance accounts for certain owners and operators and States in accordance with §97.425(b)(3).

(c) General accounts—(1) Application for general account. (i) Any person may apply to open a general account, for the purpose of holding and transferring CSAPR NO\textsubscript{X} Annual allowances, by submitting to the Administrator a complete application for a general account. Such application shall designate one and only one authorized account representative and may designate one and only one alternate authorized account representative who may act on behalf of the authorized account representative.

(A) The authorized account representative and alternate authorized account representative shall be selected by an agreement binding on the persons who have an ownership interest with respect to CSAPR NO\textsubscript{X} Annual allowances held in the general account.

(B) The agreement by which the alternate authorized account representative is selected shall include a procedure for authorizing the alternate authorized account representative to act in lieu of the authorized account representative.

(ii) A complete application for a general account shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the authorized account representative and any alternate authorized account representative submitting such notice of delegation.

(B) An identifying name for the general account;

(C) A list of all persons subject to a binding agreement for the authorized account representative and any alternate authorized account representative to represent their ownership interest with respect to the CSAPR NO\textsubscript{X} Annual allowances held in the general account;

(D) The following certification statement by the authorized account representative and any alternate authorized account representative: “I certify that I was selected as the authorized account representative or the alternate authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CSAPR NO\textsubscript{X} Annual allowances held in the general account. I certify that I
§ 97.420

40 CFR Ch. I (7–1–17 Edition)

have all the necessary authority to carry out my duties and responsibilities under the CSAPR NOx Annual Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the general account.”

(E) The signature of the authorized account representative and any alternate authorized account representative and the dates signed.

(iii) Unless otherwise required by the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the Administrator. The Administrator shall not be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(iv) An application for a general account under paragraph (c)(1) of this section that complies with the provisions of such paragraph except that it contains the acronym “TR” in place of the acronym “CSAPR” in the required certification statement will be considered a complete application for a general account under such paragraph, and the certification statement included in such application for a general account will be interpreted as if the acronym “CSAPR” appeared in place of the acronym “TR”.

(2) Authorization of authorized account representative and alternate authorized account representative. (i) Upon receipt by the Administrator of a complete application for a general account under paragraph (c)(1) of this section, the Administrator will establish a general account for the person or persons for whom the application is submitted, and upon and after such receipt by the Administrator:

(A) The authorized account representative of the general account shall be authorized and shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CSAPR NOx Annual allowances held in the general account in all matters pertaining to the CSAPR NOx Annual Trading Program, notwithstanding any agreement between the authorized account representative and such person.

(B) Any alternate authorized account representative shall be authorized, and any representation, action, inaction, or submission by any alternate authorized account representative shall be deemed to be a representation, action, inaction, or submission by the authorized account representative.

(C) Each person who has an ownership interest with respect to CSAPR NOx Annual allowances held in the general account shall be bound by any decision or order issued to the authorized account representative or alternate authorized account representative by the Administrator regarding the general account.

(ii) Except as provided in paragraph (c)(5) of this section concerning delegation of authority to make submissions, each submission concerning the general account shall be made, signed, and certified by the authorized account representative or any alternate authorized account representative for the persons having an ownership interest with respect to CSAPR NOx Annual allowances held in the general account. Each such submission shall include the following certification statement by the authorized account representative or any alternate authorized account representative for the persons having an ownership interest with respect to CSAPR NOx Annual allowances held in the general account: I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(iii) Except in this section, whenever the term “authorized account representative” is used in this subpart, the term shall be construed to include
the authorized account representative or any alternate authorized account representative.

(iv) A certification statement submitted in accordance with paragraph (c)(2)(ii) of this section that contains the acronym “TR” will be interpreted as if the acronym “CSAPR” appeared in place of the acronym “TR”.

(3) Changing authorized account representative and alternate authorized account representative; changes in persons with ownership interest. (i) The authorized account representative of a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (c)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new authorized account representative and the persons with an ownership interest with respect to the CSAPR NOX Annual allowances in the general account.

(ii) The alternate authorized account representative of a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (c)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate authorized account representative, the authorized account representative, and the persons with an ownership interest with respect to the CSAPR NOX Annual allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CSAPR NOX Annual allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the authorized account representative and any alternate authorized account representative of the account, and the decisions and orders of the Administrator, as if the person were included in such list.

(B) Within 30 days after any change in the persons having an ownership interest with respect to NOX Annual allowances in the general account, including the addition or removal of a person, the authorized account representative or any alternate authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CSAPR NOX Annual allowances in the general account to include the change.

(4) Objections concerning authorized account representative and alternate authorized account representative. (i) Once a complete application for a general account under paragraph (c)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (c)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (c)(4)(i) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative of a general account shall affect any representation, action, inaction, or submission of the authorized account representative or the finality of any decision or order by the Administrator under the CSAPR NOX Annual Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative of a general account, including private legal disputes concerning the proceeds of CSAPR NOX Annual allowance transfers.
(5) Delegation by authorized account representative and alternate authorized account representative. (i) An authorized account representative of a general account may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(ii) An alternate authorized account representative of a general account may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(iii) In order to delegate authority to a natural person to make an electronic submission to the Administrator in accordance with paragraph (c)(5)(i) or (ii) of this section, the authorized account representative or alternate authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such authorized account representative or alternate authorized account representative;

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to in this section as an “agent”);

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (c)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such authorized account representative or alternate authorized account representative: “I agree that any electronic submission to the Administrator that is made by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am an authorized account representative or alternate authorized account representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.420(c)(5)(iv) shall be deemed to be an electronic submission by me.”; and

(E) The following certification statement by such authorized account representative or alternate authorized account representative: “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.420(c)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.420(c)(5) is terminated.”.

(iv) A notice of delegation submitted under paragraph (c)(5)(iii) of this section shall be effective, with regard to the authorized account representative or alternate authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such authorized account representative or alternate authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (c)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (c)(5)(iv) of this section shall be deemed to be an electronic submission by the authorized account representative or alternate authorized account representative submitting such notice of delegation.

(6) Closing a general account. (i) The authorized account representative or alternate authorized account representative of a general account may submit to the Administrator a request to close the account. Such request shall include a correctly submitted CSAPR NOX Annual allowance transfer under §97.422 for any CSAPR NOX Annual allowances in the account to one or more other Allowance Management System accounts.

(ii) If a general account has no CSAPR NOX Annual allowance transfers to or from the account for a 12-month period or longer and does not contain any CSAPR NOX Annual allowances, the Administrator may notify
the authorized account representative for the account that the account will be closed after 30 days after the notice is sent. The account will be closed after the 30-day period unless, before the end of the 30-day period, the Administrator receives a correctly submitted CSAPR NOx Annual allowance transfer under §97.422 to the account or a statement submitted by the authorized account representative or alternate authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

(d) Account identification. The Administrator will assign a unique identifying number to each account established under paragraph (a), (b), or (c) of this section.

(e) Responsibilities of authorized account representative and alternate authorized account representative. After the establishment of a compliance account or general account, the Administrator will accept or act on a submission pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of CSAPR NOx Annual allowances in the account, only if the submission has been made, signed, and certified in accordance with §§97.414(a) and 97.418 or paragraphs (c)(2)(ii) and (c)(5) of this section.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74606, Oct. 26, 2016]

§97.421 Recoordation of CSAPR NOx Annual allowance allocations and auction results.

(a) By November 7, 2011, the Administrator will record in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source in accordance with §97.411(a) for the control period in 2015.

(b) By November 7, 2011, the Administrator will record in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source in accordance with §97.411(a) for the control period in 2016, unless the State in which the source is located notifies the Administrator in writing by October 17, 2011 of the State’s intent to submit to the Administrator a complete SIP revision by April 1, 2015 meeting the requirements of §52.38(a)(3)(i) through (iv) of this chapter.

(1) If, by April 1, 2015, the State does not submit to the Administrator such complete SIP revision, the Administrator will record by April 15, 2015 in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source in accordance with §97.411(a) for the control period in 2016.

(2) If the State submits to the Administrator by April 1, 2015, and the Administrator approves by October 1, 2015, such complete SIP revision, the Administrator will record by October 1, 2015 in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source as provided in such approved, complete SIP revision for the control period in 2016.

(3) If the State submits to the Administrator by April 1, 2015, and the Administrator does not approve by October 1, 2015, such complete SIP revision, the Administrator will record by October 1, 2015 in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source in accordance with §97.411(a) for the control period in 2016.

(c) By July 1, 2016, the Administrator will record in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Annual allowances auctioned to CSAPR NOx Annual units, in accordance with §97.411(a), or with a SIP revision approved under §52.38(a)(4) or (5) of this chapter, for the control periods in 2017 and 2018.

(d) By July 1, 2017, the Administrator will record in each CSAPR NOx Annual source’s compliance account the CSAPR NOx Annual allowances allocated to the CSAPR NOx Annual units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Annual allowances auctioned to CSAPR NOx Annual units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Annual allowances auctioned to CSAPR NOx Annual
units, in accordance with §97.411(a), or with a SIP revision approved under §52.38(a)(4) or (5) of this chapter, for the control periods in 2019 and 2020.

(e) By July 1, 2018, the Administrator will record in each CSAPR NO\textsubscript{X} Annual source’s compliance account the CSAPR NO\textsubscript{X} Annual allowances allocated to the CSAPR NO\textsubscript{X} Annual units at the source, or in each appropriate Allowance Management System account the CSAPR NO\textsubscript{X} Annual allowances auctioned to CSAPR NO\textsubscript{X} Annual units, in accordance with §97.411(a), or with a SIP revision approved under §52.38(a)(4) or (5) of this chapter, for the control periods in 2019 and 2020.

(f) By July 1, 2019 and July 1 of each year thereafter, the Administrator will record in each CSAPR NO\textsubscript{X} Annual source’s compliance account the CSAPR NO\textsubscript{X} Annual allowances allocated to the CSAPR NO\textsubscript{X} Annual units at the source, or in each appropriate Allowance Management System account the CSAPR NO\textsubscript{X} Annual allowances auctioned to CSAPR NO\textsubscript{X} Annual units, in accordance with §97.411(a), or with a SIP revision approved under §52.38(a)(4) or (5) of this chapter, for the control period in the fourth year after the year of the applicable recordation deadline under this paragraph.

(g) By August 1, 2015 and August 1 of each year thereafter, the Administrator will record in each CSAPR NO\textsubscript{X} Annual source’s compliance account the CSAPR NO\textsubscript{X} Annual allowances allocated to the CSAPR NO\textsubscript{X} Annual units at the source, or in each appropriate Allowance Management System account the CSAPR NO\textsubscript{X} Annual allowances auctioned to CSAPR NO\textsubscript{X} Annual units, in accordance with §97.411(a), or with a SIP revision approved under §52.38(a)(4) or (5) of this chapter, for the control period in the year after the year of the applicable recordation deadline under this paragraph.

(h) By August 1, 2015 and August 1 of each year thereafter, the Administrator will record in each CSAPR NO\textsubscript{X} Annual source’s compliance account the CSAPR NO\textsubscript{X} Annual allowances allocated to the CSAPR NO\textsubscript{X} Annual units at the source in accordance with §97.412(a)(2) through (8) and (12) for the control period in the year of the applicable recordation deadline under this paragraph.

(i) By February 15, 2016 and February 15 of each year thereafter, the Administrator will record in each CSAPR NO\textsubscript{X} Annual source’s compliance account the CSAPR NO\textsubscript{X} Annual allowances auctioned to CSAPR NO\textsubscript{X} Annual units at the source in accordance with §97.412(a)(9) through (12) for the control period in the year before the year of the applicable recordation deadline under this paragraph.

(j) By February 15, 2016 and February 15 of each year thereafter, the Administrator will record in each CSAPR NO\textsubscript{X} Annual source’s compliance account the CSAPR NO\textsubscript{X} Annual allowances allocated to the CSAPR NO\textsubscript{X} Annual units at the source in accordance with §97.412(b)(9) through (12) for the control period in the year before the year of the applicable recordation deadline under this paragraph.

(k) By the date 15 days after the date on which any allocation or auction results described in paragraphs (a) through (j) of this section, of CSAPR NO\textsubscript{X} Annual allowances to a recipient is made by or are submitted to the Administrator in accordance with §97.411 or §97.412 or with a SIP revision approved under §52.38(a)(4) or (5) of this chapter, the Administrator will record such allocation or auction results in the appropriate Allowance Management System account.

(l) When recording the allocation or auction of CSAPR NO\textsubscript{X} Annual allowances to a CSAPR NO\textsubscript{X} Annual unit or other entity in an Allowance Management System account, the Administrator will assign each CSAPR NO\textsubscript{X} Annual allowance a unique identification number that will include digits identifying the year of the control period for which the CSAPR NO\textsubscript{X} Annual allowance is allocated or auctioned.
submit the transfer to the Administrator.

(b) A CSAPR NO\textsubscript{X} Annual allowance transfer shall be correctly submitted if:

(1) The transfer includes the following elements, in a format prescribed by the Administrator:
   (i) The account numbers established by the Administrator for both the transferor and transferee accounts;
   (ii) The serial number of each CSAPR NO\textsubscript{X} Annual allowance that is in the transferor account and is to be transferred; and
   (iii) The name and signature of the authorized account representative of the transferor account and the date signed; and

(2) When the Administrator attempts to record the transfer, the transferor account includes each CSAPR NO\textsubscript{X} Annual allowance identified by serial number in the transfer.

\section*{§ 97.423 Recordation of CSAPR NO\textsubscript{X} Annual allowance transfers.}

(a) Within 5 business days (except as provided in paragraph (b) of this section) of receiving a CSAPR NO\textsubscript{X} Annual allowance transfer that is correctly submitted under § 97.422, the Administrator will record a CSAPR NO\textsubscript{X} Annual allowance transfer by moving each CSAPR NO\textsubscript{X} Annual allowance from the transferor account to the transferee account as specified in the transfer.

(b) A CSAPR NO\textsubscript{X} Annual allowance transfer to or from a compliance account that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CSAPR NO\textsubscript{X} Annual allowances allocated or auctioned for any control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions from such compliance account under § 97.424 for the control period immediately before such allowance transfer deadline.

(c) Where a CSAPR NO\textsubscript{X} Annual allowance transfer is not correctly submitted under § 97.422, the Administrator will not record such transfer.

(d) Within 5 business days of recordation of a CSAPR NO\textsubscript{X} Annual allowance transfer under paragraphs (a) and (b) of the section, the Administrator will notify the authorized account representatives of both the transferor and transferee accounts.

(e) Within 10 business days of receipt of a CSAPR NO\textsubscript{X} Annual allowance transfer that is not correctly submitted under § 97.422, the Administrator will notify the authorized account representatives of both accounts subject to the transfer of:

(1) A decision not to record the transfer; and

(2) The reasons for such non-recordation.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74607, Oct. 26, 2016]

\section*{§ 97.424 Compliance with CSAPR NO\textsubscript{X} Annual emissions limitation.}

(a) Availability for deduction for compliance. CSAPR NO\textsubscript{X} Annual allowances are available to be deducted for compliance with a source’s CSAPR NO\textsubscript{X} Annual emissions limitation for a control period in a given year only if the CSAPR NO\textsubscript{X} Annual allowances:

(1) Were allocated or auctioned for such control period or a control period in a prior year; and

(2) Are held in the source’s compliance account as of the allowance transfer deadline for such control period.

(b) Deductions for compliance. After the recordation, in accordance with § 97.423, of CSAPR NO\textsubscript{X} Annual allowance transfers submitted by the allowance transfer deadline for a control period in a given year, the Administrator will deduct from each source’s compliance account CSAPR NO\textsubscript{X} Annual allowances available under paragraph (a) of this section in order to determine whether the source meets the CSAPR NO\textsubscript{X} Annual emissions limitation for such control period, as follows:

(1) Until the amount of CSAPR NO\textsubscript{X} Annual allowances deducted equals the number of tons of total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Annual units at the source for such control period; or

(2) If there are insufficient CSAPR NO\textsubscript{X} Annual allowances to complete the deductions in paragraph (b)(1) of this section, until no more CSAPR NO\textsubscript{X} Annual allowances available under paragraph (a) of this section remain in the compliance account.

(c)(1) Identification of CSAPR NO\textsubscript{X} Annual allowances by serial number. The
authorized account representative for a source’s compliance account may request that specific CSAPR NO\textsubscript{X} Annual allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in a given year in accordance with paragraph (b) or (d) of this section. In order to be complete, such request shall be submitted to the Administrator by the allowance transfer deadline for such control period and include, in a format prescribed by the Administrator, the identification of the CSAPR NO\textsubscript{X} Annual source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CSAPR NO\textsubscript{X} Annual allowances under paragraph (b) or (d) of this section from the source’s compliance account in accordance with a complete request under paragraph (c)(1) of this section or, in the absence of such request or in the case of identification of an insufficient amount of CSAPR NO\textsubscript{X} Annual allowances in such request, on a first-in, first-out accounting basis in the following order:

(i) Any CSAPR NO\textsubscript{X} Annual allowances that were recorded in the compliance account pursuant to §97.421 and not transferred out of the compliance account, in the order of recordation; and then

(ii) Any other CSAPR NO\textsubscript{X} Annual allowances that were transferred to and recorded in the compliance account pursuant to this subpart, in the order of recordation.

(d) Deductions for excess emissions. After making the deductions for compliance under paragraph (b) of this section for a control period in a year in which the CSAPR NO\textsubscript{X} Annual source has excess emissions, the Administrator will deduct from the source’s compliance account an amount of CSAPR NO\textsubscript{X} Annual allowances, allocated or auctioned for a control period in a prior year or the control period in the year of the excess emissions or in the immediately following year, equal to two times the number of tons of the source’s excess emissions.

(e) Recordation of deductions. The Administrator will record in the appropriate compliance account all deductions from such an account under paragraphs (b) and (d) of this section.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74607, Oct. 26, 2016]

§ 97.425 Compliance with CSAPR NO\textsubscript{X} Annual assurance provisions

(a) Availability for deduction. CSAPR NO\textsubscript{X} Annual allowances are available to be deducted for compliance with the CSAPR NO\textsubscript{X} Annual assurance provisions for a control period in a given year by the owners and operators of a group of one or more CSAPR NO\textsubscript{X} Annual sources and units in a State (and Indian country within the borders of such State) only if the CSAPR NO\textsubscript{X} Annual allowances:

(1) Were allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year; and

(2) Are held in the assurance account, established by the Administrator for such owners and operators of such group of CSAPR NO\textsubscript{X} Annual sources and units in such State (and Indian country within the borders of such State) under paragraph (b)(3) of this section, as of the deadline established in paragraph (b)(4) of this section.

(b) Deductions for compliance. The Administrator will deduct CSAPR NO\textsubscript{X} Annual allowances available under paragraph (a) of this section for compliance with the CSAPR NO\textsubscript{X} Annual assurance provisions for a State for a control period in a given year in accordance with the following procedures:

(1) By June 1, 2018 and June 1 of each year thereafter, the Administrator will:

(i) Calculate, for each State (and Indian country within the borders of such State), the total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Annual units at CSAPR NO\textsubscript{X} Annual sources in the State (and Indian country within the borders of such State) during the control period in the year before the year of this calculation deadline and the amount, if any, by which such total NO\textsubscript{X} emissions exceed the State assurance level as described in §97.406(c)(2)(ii); and

(ii) Promulgate a notice of data availability of the results of the calculations required in paragraph (b)(1)(i)
of this section, including separate calculations of the NOx emissions from each CSAPR NOx Annual source.

(2) For each notice of data availability required in paragraph (b)(1)(ii) of this section and for any State (and Indian country within the borders of such State) identified in such notice as having CSAPR NOx Annual units with total NOx emissions exceeding the State assurance level for a control period in a given year, as described in §97.406(c)(2)(iii):

(i) By July 1 immediately after the promulgation of such notice, the designated representative of each CSAPR NOx Annual source in each such State (and Indian country within the borders of such State) shall submit a statement, in a format prescribed by the Administrator, providing for each CSAPR NOx Annual unit (if any) at the source that operates during, but is not allocated an amount of CSAPR NOx Annual allowances for, such control period, the unit’s allowable NOx emission rate for such control period and, if such rate is expressed in lb per mmBtu, the unit’s heat rate.

(ii) By August 1 immediately after the promulgation of such notice, the Administrator will calculate, for each such State (and Indian country within the borders of such State) and each common designated representative for such control period for a group of one or more CSAPR NOx Annual sources and units in the State (and Indian country within the borders of such State), the common designated representative’s share of the total NOx emissions from all CSAPR NOx Annual units at CSAPR NOx Annual sources in the State (and Indian country within the borders of such State), the common designated representative’s assurance level, and the amount (if any) of CSAPR NOx Annual allowances that the owners and operators of such group of sources and units must hold in accordance with the calculation formula in §97.406(c)(2)(i).

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(iii)(A) of this section. By October 1 immediately after the promulgation of such notice, the Administrator will promulgate a notice of data availability of the calculations incorporating any adjustments that the Administrator determines to be necessary and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iii)(A) of this section.

(3) For any State (and Indian country within the borders of such State) referenced in each notice of data availability required in paragraph (b)(2)(ii) of this section as having CSAPR NOx Annual units with total NOx emissions exceeding the State assurance level for a control period in a given year, the Administrator will establish one assurance account for each set of owners and operators referenced, in the notice of data availability required under paragraph (b)(2)(ii)(B) of this section, as all of the owners and operators of a group of CSAPR NOx Annual sources and units in the State (and Indian country within the borders of such State) having a common designated representative for such control period and as being required to hold CSAPR NOx Annual allowances.

(4)(i) As of midnight of November 1 immediately after the promulgation of
each notice of data availability required in paragraph (b)(2)(iii)(B) of this section, the owners and operators described in paragraph (b)(3) of this section shall hold in the assurance account established for them and for the appropriate CSAPR NO\textsubscript{X} Annual sources, CSAPR NO\textsubscript{X} Annual units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section a total amount of CSAPR NO\textsubscript{X} Annual allowances, available for deduction under paragraph (a) of this section, equal to the amount such owners and operators are required to hold with regard to such sources, units and State (and Indian country within the borders of such State) as calculated by the Administrator and referenced in such notice.

(ii) Notwithstanding the allowance-holding deadline specified in paragraph (b)(4)(i) of this section, if November 1 is not a business day, then such allowance-holding deadline shall be midnight of the first business day thereafter.

(5) After November 1 (or the date described in paragraph (b)(4)(ii) of this section) immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section and after the recordation, in accordance with §97.423, of CSAPR NO\textsubscript{X} Annual allowance transfers submitted by midnight of such date, the Administrator will determine whether the owners and operators described in paragraph (b)(3) of this section hold, in the assurance account for the appropriate CSAPR NO\textsubscript{X} Annual sources, CSAPR NO\textsubscript{X} Annual units, and State (and Indian country within the borders of such State) involved, provided that such litigation under part 78 of this chapter, or the proceeding under part 78 of this chapter that resulted in the decision appealed in such litigation under section 307 of the Clean Air Act, was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.

(ii) If any such data are revised by the owners and operators of a CSAPR NO\textsubscript{X} Annual source and CSAPR NO\textsubscript{X} Annual unit whose designated representative submitted such data under paragraph (b)(2)(i) of this section, as a result of a decision in or settlement of litigation concerning such data submitted under part 78 of this chapter, or the proceeding under part 78 of this chapter that resulted in the decision appealed in such litigation under section 307 of the Clean Air Act, the Administrator will use the data as so revised to recalculate the amounts of CSAPR NO\textsubscript{X} Annual allowances that owners and operators are required to hold in accordance with the calculation formula in §97.406(c)(2)(i) for such control period with regard to the CSAPR NO\textsubscript{X} Annual sources, CSAPR NO\textsubscript{X} Annual units, and State (and Indian country within the borders of such State) involved, provided that such litigation under part 78 of this chapter, or the proceeding under part 78 of this chapter that resulted in the decision appealed in such litigation under section 307 of the Clean Air Act, was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.
(and Indian country within the borders of such State) involved, provided that such litigation was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.

(iii) If the revised data are used to recalculate, in accordance with paragraphs (b)(6)(i) and (ii) of this section, the amount of CSAPR NO\textsubscript{X} Annual allowances that the owners and operators are required to hold for such control period with regard to the CSAPR NO\textsubscript{X} Annual sources, CSAPR NO\textsubscript{X} Annual units, and State (and Indian country within the borders of such State) involved—

(A) Where the amount of CSAPR NO\textsubscript{X} Annual allowances that the owners and operators are required to hold increases as a result of the use of all such revised data, the Administrator will establish a new, reasonable deadline on which the owners and operators shall hold the additional amount of CSAPR NO\textsubscript{X} Annual allowances in the assurance account established by the Administrator for the appropriate CSAPR NO\textsubscript{X} Annual sources, CSAPR NO\textsubscript{X} Annual units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section. The owners’ and operators’ failure to hold such additional amount, as required, before the new deadline shall not be a violation of the Clean Air Act. Each CSAPR NO\textsubscript{X} Annual allowance that the owners and operators fail to hold as required, as of the new deadline shall be a violation of the Clean Air Act. Each CSAPR NO\textsubscript{X} Annual allowance that the owners and operators fail to hold as required of the new deadline shall be a separate violation of the Clean Air Act.

(B) For the owners and operators for which the amount of CSAPR NO\textsubscript{X} Annual allowances required to be held decreases as a result of the use of all such revised data, the Administrator will record, in all accounts from which CSAPR NO\textsubscript{X} Annual allowances were transferred by such owners and operators for such control period to the assurance account established by the Administrator for the appropriate CSAPR NO\textsubscript{X} Annual sources, CSAPR NO\textsubscript{X} Annual units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section, a total amount of the CSAPR NO\textsubscript{X} Annual allowances held in such assurance account equal to the amount of the decrease. If CSAPR NO\textsubscript{X} Annual allowances were transferred to such assurance account from more than one account, the amount of CSAPR NO\textsubscript{X} Annual allowances recorded in each such transferor account will be in proportion to the percentage of the total amount of CSAPR NO\textsubscript{X} Annual allowances transferred to such assurance account for such control period from such transferor account.

(C) Each CSAPR NO\textsubscript{X} Annual allowance held under paragraph (b)(6)(iii)(A) of this section as a result of recalculation of requirements under the CSAPR NO\textsubscript{X} Annual assurance provisions for such control period must be a CSAPR NO\textsubscript{X} Annual allowance allocated for a control period in a year before or the year immediately following, or in the same year as, the year of such control period.

§ 97.426 Banking.

(a) A CSAPR NO\textsubscript{X} Annual allowance may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CSAPR NO\textsubscript{X} Annual allowance that is held in a compliance account or a general account in accordance with paragraph (b) of this section.

§ 97.427 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any Allowance Management System account. Within 10 business days of making such correction, the Administrator will notify the authorized account representative for the account.
§ 97.428 Administrator’s action on submissions.
(a) The Administrator may review and conduct independent audits concerning any submission under the CSAPR NO\textsubscript{X} Annual Trading Program and make appropriate adjustments of the information in the submission.
(b) The Administrator may deduct CSAPR NO\textsubscript{X} Annual allowances from or transfer CSAPR NO\textsubscript{X} Annual allowances to a compliance account or an assurance account, based on the information in a submission, as adjusted under paragraph (a) of this section, and record such deductions and transfers.

§ 97.429 [Reserved]

§ 97.430 General monitoring, recordkeeping, and reporting requirements.
The owners and operators, and to the extent applicable, the designated representative, of a CSAPR NO\textsubscript{X} Annual unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and subpart H of part 75 of this chapter. For purposes of applying such requirements, the definitions in §97.402 and in §72.2 of this chapter shall apply, the terms “affected unit,” “designated representative,” “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CSAPR NO\textsubscript{X} Annual unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively as defined in §97.402, and the term “newly affected unit” shall be deemed to mean “newly affected CSAPR NO\textsubscript{X} Annual unit”. The owner or operator of a unit that is not a CSAPR NO\textsubscript{X} Annual unit but that is monitored under §75.72(b)(2)(ii) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CSAPR NO\textsubscript{X} Annual unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CSAPR NO\textsubscript{X} Annual unit shall:
(1) Install all monitoring systems required under this subpart for monitoring NO\textsubscript{X} mass emissions and individual unit heat input (including all systems required to monitor NO\textsubscript{X} emission rate, NO\textsubscript{X} concentration, stack gas moisture content, stack gas flow rate, CO\textsubscript{2} or O\textsubscript{2} concentration, and fuel flow rate, as applicable, in accordance with §§75.71 and 75.72 of this chapter);
(2) Successfully complete all certification tests required under §97.431 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and
(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the later of the following dates and shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the later of the following dates:
(1) January 1, 2015; or
(2) 180 calendar days after the date on which the unit commences commercial operation.

(3) The owner or operator of a CSAPR NO\textsubscript{X} Annual unit for which construction of a new stack or flue or installation of add-on NO\textsubscript{X} emission controls is completed after the applicable deadline under paragraph (b)(1) or (2) of this section shall meet the requirements of §75.4(e)(1) through (4) of this chapter, except that:
(i) Such requirements shall apply to the monitoring systems required under §97.430 through §97.435, rather than the monitoring systems required under part 75 of this chapter;
(ii) NO\textsubscript{X} emission rate, NO\textsubscript{X} concentration, stack gas moisture content, stack gas volumetric flow rate, and O\textsubscript{2} or CO\textsubscript{2} concentration data shall be determined and reported, rather than the data listed in §75.4(e)(2) of this chapter; and
(iii) Any petition for another procedure under §75.4(e)(2) of this chapter shall be submitted under §97.435, rather than §75.66 of this chapter.
(c) **Reporting data.** The owner or operator of a CSAPR NO\textsubscript{X} Annual unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NO\textsubscript{X} concentration, NO\textsubscript{X} emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NO\textsubscript{X} mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter, section 2.4 of appendix D to part 75 of this chapter, or section 2.5 of appendix E to part 75 of this chapter, as applicable.

(d) **Prohibitions.**

(1) No owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §97.435.

(2) No owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall operate the unit so as to discharge, or allow to be discharged, NO\textsubscript{X} to the atmosphere without accounting for all such NO\textsubscript{X} in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(3) No owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NO\textsubscript{X} mass discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under §97.405 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the Administrator for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or

(iii) The designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with §97.431(d)(3)(i).

(e) **Long-term cold storage.** The owner or operator of a CSAPR NO\textsubscript{X} Annual unit is subject to the applicable provisions of §75.4(d) of this chapter concerning units in long-term cold storage.

§97.431 Initial monitoring system certification and recertification procedures.

(a) The owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall be exempt from the initial certification requirements of this section for a monitoring system under §97.430(a)(1) if the following conditions are met:

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendices B, D, and E to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under §97.430(a)(1) that is exempt from initial certification requirements under paragraph (a) of this section.

(c) If the Administrator has previously approved a petition under §75.37(a) or (b) of this chapter for apportioning the NO\textsubscript{X} emission rate
measured in a common stack or a petition under §75.66 of this chapter for an alternative to a requirement in §75.12 or §75.17 of this chapter, the designated representative shall resubmit the petition to the Administrator under §97.435 to determine whether the approval applies under the CSAPR NO\textsubscript{X} Annual Trading Program.

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system \textit{(i.e., a continuous emission monitoring system and an excepted monitoring system under appendices D and E to part 75 of this chapter)} under §97.430(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the procedures in paragraph (e) or (f) of this section respectively.

(1) Requirements for initial certification.
The owner or operator shall ensure that each continuous monitoring system under §97.430(a)(1) (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §97.430(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification.
Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §97.430(a)(1) that may significantly affect the ability of the system to accurately measure or record NO\textsubscript{X} mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system, and any excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter, under §97.430(a)(1) are subject to the recertification requirements in §75.20(g)(6) of this chapter.

(3) Approval process for initial certification and recertification.
For initial certification of a continuous monitoring system under §97.430(a)(1), paragraphs (d)(3)(i) through (v) of this section apply. For recertifications of such monitoring systems, paragraphs (d)(3)(i) through (iv) of this section and the procedures in §75.20(b)(5) and (g)(7) of this chapter (in lieu of the procedures in paragraph (d)(3)(v) of this section) apply, provided that in applying paragraphs (d)(3)(i) through (iv) of this section, the words “certification” and “initial certification” are replaced by the word “recertification” and the word “certified” is replaced by with the word “recertified”.

(i) Notification of certification.
The designated representative shall submit to the appropriate EPA Regional Office and the Administrator written notice of the dates of certification testing, in accordance with §97.433.

(ii) Certification application.
The designated representative shall submit to the Administrator a certification application for each monitoring system. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) Provisional certification date.
The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter.
chapter. A provisionally certified monitoring system may be used under the CSAPR NO\textsubscript{X} Annual Trading Program for a period not to exceed 120 days after receipt by the Administrator of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and time of provisional certification), provided that the Administrator does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the Administrator.

(iv) Certification application approval process. The Administrator will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CSAPR NO\textsubscript{X} Annual Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by which the designated representative must submit the additional information required to complete the certification application. If the designated representative does not comply with the notice of incompleteness by the specified date, then the Administrator may issue a notice of disapproval under paragraph (d)(3)(iv)(C) of this section.

(C) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of part 75 of this chapter or if the certification application is incomplete and the requirement for disapproval under paragraph (d)(3)(iv)(B) of this section is met, then the Administrator will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the Administrator and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter).

(D) Audit decertification. The Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §97.432(b).

(v) Procedures for loss of certification. If the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under §75.20(a)(4)(iii), §75.20(g)(7), or §75.21(e) of this chapter and continuing until the applicable date and hour specified under §75.20(a)(5)(i) or (g)(7) of this chapter:

(1) For a disapproved NO\textsubscript{X} emission rate \textit{(i.e., NO\textsubscript{X}-diluent)} system, the maximum potential NO\textsubscript{X} emission rate, as defined in §72.2 of this chapter.

(2) For a disapproved NO\textsubscript{X} pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of NO\textsubscript{X} and the maximum potential flow rate, as defined in sections 2.1.2.1 and 2.1.4.1 of appendix A to part 75 of this chapter.

(3) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively.
the minimum potential moisture percentage and either the maximum potential CO₂ concentration or the minimum potential O₂ concentration (as applicable), as defined in sections 2.1.5, 2.1.3.1, and 2.1.3.2 of appendix A to part 75 of this chapter.

(d) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in section 2.4.2.1 of appendix D to part 75 of this chapter.

(5) For a disapproved excepted NOₓ monitoring system under appendix E to part 75 of this chapter, the fuel-specific maximum potential NOₓ emission rate, as defined in §72.2 of this chapter.

(B) The designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (d)(3)(i) and (ii) of this section.

(C) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(e) The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under §75.19 of this chapter shall meet the applicable certification and recertification requirements in §§75.19(a)(2) and 75.20(b) of this chapter. If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in §75.20(g) of this chapter.

(f) The designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator under subpart E of part 75 of this chapter shall comply with the applicable notification and application procedures of §75.20(f) of this chapter.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74607, Oct. 26, 2016]

§ 97.433 Notifications concerning monitoring.

The designated representative of a CSAPR NOₓ Annual unit shall submit written notice to the Administrator in accordance with §75.61 of this chapter.

§ 97.434 Recordkeeping and reporting.

(a) General provisions. The designated representative shall comply with all recordkeeping and reporting requirements in paragraphs (b) through (e) of
(b) Monitoring plans. The owner or operator of a CSAPR NO\textsubscript{X} Annual unit shall comply with the requirements of §75.73(c) and (e) of this chapter.

(c) Certification applications. The designated representative shall submit an application to the Administrator within 45 days after completing all initial certification or recertification tests required under §97.431, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The designated representative shall submit quarterly reports, as follows:

(1) The designated representative shall report the NO\textsubscript{X} mass emissions data and heat input data for a CSAPR NO\textsubscript{X} Annual unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with the later of:

- The calendar quarter covering January 1, 2015 through March 31, 2015; or
- The calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §97.430(b).

(2) The designated representative shall submit each quarterly report to the Administrator within 30 days after the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.73(f) of this chapter.

(3) For CSAPR NO\textsubscript{X} Annual units that are also subject to the Acid Rain Program, CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program, CSAPR NO\textsubscript{X} Ozone Season Group 2 Trading Program, CSAPR SO\textsubscript{2} Group 1 Trading Program, or CSAPR SO\textsubscript{2} Group 2 Trading Program, quarterly reports shall include the applicable data and information required by subparts F through H of part 75 of this chapter as applicable, in addition to the NO\textsubscript{X} mass emission data, heat input data, and other information required by this subpart.

(4) The Administrator may review and conduct independent audits of any quarterly report in order to determine whether the quarterly report meets the requirements of this subpart and part 75 of this chapter, including the requirement to use substitute data.

(i) The Administrator will notify the designated representative of any determination that the quarterly report fails to meet any such requirements and specify in such notification any corrections that the Administrator believes are necessary to make through resubmission of the quarterly report and a reasonable time period within which the designated representative must respond. Upon request by the designated representative, the Administrator may specify reasonable extensions of such time period. Within the time period (including any such extensions) specified by the Administrator, except to the extent the designated representative provides information demonstrating that a specified correction is not necessary because the quarterly report already meets the requirements of this subpart and part 75 of this chapter that are relevant to the specified correction.

(ii) Any resubmission of a quarterly report shall meet the requirements applicable to the submission of a quarterly report under this subpart and part 75 of this chapter, except for the deadline set forth in paragraph (d)(2) of this section.

(e) Compliance certification. The designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications; and

(2) For a unit with add-on NO\textsubscript{X} emission controls and for all hours where NO\textsubscript{X} data are substituted in accordance with §75.34(a)(1) of this chapter, the
add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate NO\textsubscript{X} emissions.

§ 97.435 Petitions for alternatives to monitoring, recordkeeping, or reporting requirements.

(a) The designated representative of a CSAPR NO\textsubscript{X} Annual unit may submit a petition under §75.66 of this chapter to the Administrator, requesting approval to apply an alternative to any requirement of §§97.430 through 97.434.

(b) A petition submitted under paragraph (a) of this section shall include sufficient information for the evaluation of the petition, including, at a minimum, the following information:

1. Identification of each unit and source covered by the petition;
2. A detailed explanation of why the proposed alternative is being suggested in lieu of the requirement;
3. A description and diagram of any equipment and procedures used in the proposed alternative;
4. A demonstration that the proposed alternative is consistent with the purposes of the requirement for which the alternative is proposed and with the purposes of this subpart and part 75 of this chapter and that any adverse effect of approving the alternative will be de minimis; and
5. Any other relevant information that the Administrator may require.

(c) Use of an alternative to any requirement referenced in paragraph (a) of this section is in accordance with such requirement only to the extent that the petition is approved in writing by the Administrator and that such use is in accordance with such approval.

[76 FR 48379, Aug. 8, 2011, as amended at 81 FR 74607, Oct. 26, 2016]
the Administrator under §52.38(b)(3), (4), or (5) of this chapter, of the amount of such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to be initially credited, at no cost to the recipient, to:

(1) A CSAPR NO\textsubscript{X} Ozone Season Group 1 unit;

(2) A new unit set-aside;

(3) An Indian country new unit set-aside; or

(4) An entity not listed in paragraphs (1) through (3) of this definition;

(5) Provided that, if the Administrator, State, or permitting authority initially credits, to a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit qualifying for an initial credit, a credit in the amount of zero CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances, the CSAPR NO\textsubscript{X} Ozone Season Group 1 unit will be treated as being allocated an amount (i.e., zero) of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances.

Allowable NO\textsubscript{X} emission rate means, for a unit, the most stringent State or federal NO\textsubscript{X} emission rate limit (in lb/MWh or, if in lb/mmBtu, converted to lb/MWh by multiplying it by the unit’s heat rate in mmBtu/MWh) that is applicable to the unit and covers the longest averaging period not exceeding one year.

Allowance Management System means the system by which the Administrator records allocations, auctions, transfers, and deductions of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program. Such allowances are allocated, auctioned, recorded, held, transferred, or deducted only as whole allowances.

Allowance Management System account means an account in the Allowance Management System established by the Administrator for purposes of recording the allocation, auction, holding, transfer, or deduction of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances.

Allowance transfer deadline means, for a control period in 2015 or 2016, midnight of December 1, 2015 or December 1, 2016, respectively, or for a control period in any other given year, midnight of March 1 (if it is a business day), or midnight of the first business day thereafter (if March 1 is not a business day), immediately after such control period and is the deadline by which a CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfer must be submitted for recordation in a CSAPR NO\textsubscript{X} Ozone Season Group 1 source’s compliance account in order to be available for use in complying with the source’s CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation for such control period in accordance with §§97.506 and 97.524.

Alternate designated representative means, for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with this subpart, to act on behalf of the designated representative in matters pertaining to the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program. If the CSAPR NO\textsubscript{X} Ozone Season Group 1 source is also subject to the Acid Rain Program, CSAPR NO\textsubscript{X} Annual Trading Program, CSAPR SO\textsubscript{2} Group 1 Trading Program, or CSAPR SO\textsubscript{2} Group 2 Trading Program, then this natural person shall be the same natural person as the alternate designated representative as defined in the respective program.

Assurance account means an Allowance Management System account, established by the Administrator under §97.525(b)(3) for certain owners and operators of a group of one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 sources and units in a given State (and Indian country within the borders of such State), in which are held CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available for use for a control period in a given year in complying with the CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions in accordance with §§97.506 and 97.525.

Auction means, with regard to CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances, the sale to any person by a State or permitting authority, in accordance with a SIP revision submitted by the State and approved by the Administrator under §52.38(b)(4) or (5) of this chapter, of such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to be initially recorded in an Allowance Management System account.
Authorized account representative means, for a general account, the natural person who is authorized, in accordance with this subpart, to transfer and otherwise dispose of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account and, for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source’s compliance account, the designated representative of the source.

Automated data acquisition and handling system or DAHS means the component of the continuous emission monitoring system, or other emissions monitoring system approved for use under this subpart, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by this subpart.

Biomass means—

(1) Any organic material grown for the purpose of being converted to energy;

(2) Any organic byproduct of agriculture that can be converted into energy; or

(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other material that is nonmerchantable for other purposes, and that is:

   (i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or

   (ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Botomming-cycle unit means a unit in which the energy input to the unit is first used to produce useful thermal energy, where at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

Business day means a day that does not fall on a weekend or a federal holiday.

Certifying official means a natural person who is:

(1) For a corporation, a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function or any other person who performs similar policy-or decision-making functions for the corporation;

(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or

(3) For a local government entity or State, federal, or other public agency, a principal executive officer or ranking elected official.

Clean Air Act means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means “coal” as defined in §72.2 of this chapter.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Cogeneration system means an integrated group, at a source, of equipment (including a boiler, or combustion turbine, and a generator) designed to produce useful thermal energy for industrial, commercial, heating, or cooling purposes and electricity through the sequential use of energy.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a topping-cycle unit or a bottoming-cycle unit:

(1) Operating as part of a cogeneration system; and

(2) Producing on an annual average basis—

   (i) For a topping-cycle unit,

      (A) Useful thermal energy not less than 5 percent of total energy output; and

      (B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than
45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle unit, useful power not less than 45 percent of total energy input;

(3) Provided that the requirements in paragraph (2) of this definition shall not apply to a calendar year referenced in paragraph (2) of this definition during which the unit did not operate at all;

(4) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit’s total energy input from all fuel, except biomass if the unit is a boiler; and

(5) Provided that, if, throughout its operation during the 12-month period or a calendar year referenced in paragraph (2) of this definition, a unit is operated as part of a cogeneration system and the cogeneration system meets on a system-wide basis the requirement in paragraph (2)(i)(B) or (2)(ii) of this definition, the unit shall be deemed to meet such requirement during that 12-month period or calendar year.

Combustion turbine means an enclosed device comprising:

(1) If the device is simple cycle, a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

(2) If the device is combined cycle, the equipment described in paragraph (1) of this definition and any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:

(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.505.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §97.505, for a unit that is not a CSAPR NOX Ozone Season Group 1 unit under §97.504 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CSAPR NOX Ozone Season Group 1 unit under §97.504.

(i) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that subsequently undergoes a physical change or is moved to a different location or source, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CSAPR NOX Ozone Season Group 1 unit under §97.504 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Common designated representative means, with regard to a control period...
in a given year, a designated representative where, as of April 1 immediately after the allowance transfer deadline for such control period, the same natural person is authorized under §§97.513(a) and 97.515(a) as the designated representative for a group of one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 sources and units located in a State (and Indian country within the borders of such State).

**Common designated representative’s assurance level** means, with regard to a specific common designated representative and a State (and Indian country within the borders of such State) and control period in a given year for which the State assurance level is exceeded as described in §§97.506(c)(2)(ii), the common designated representative’s share of the State NO\textsubscript{X} Ozone Season Group 1 trading budget with the variability limit for the State for such control period.

**Common designated representative’s share** means, with regard to a specific common designated representative for a control period in a given year:

1. With regard to a total amount of NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units in a State (and Indian country within the borders of such State) during such control period, the total tonnage of NO\textsubscript{X} emissions during such control period from a group of one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 units located in such State (and such Indian country) and having the common designated representative for such control period;

2. With regard to a State NO\textsubscript{X} Ozone Season Group 1 trading budget with the variability limit for such control period, the amount (rounded to the nearest allowance) equal to the sum of the total amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated for such control period to a group of one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 units located in the State (and Indian country within the borders of such State) and having the common designated representative for such control period and the total amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances purchased by an owner or operator of such CSAPR NO\textsubscript{X} Ozone Season Group 1 units in an auction for such control period and submitted by the State or the permitting authority to the Administrator for recordation in the compliance accounts for such CSAPR NO\textsubscript{X} Ozone Season Group 1 units in accordance with the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance auction provisions in a SIP revision approved by the Administrator under §52.38(b)(4) or (5) of this chapter, multiplied by the sum of the State NO\textsubscript{X} Ozone Season Group 1 trading budget under §97.510(a) and the State’s variability limit under §97.510(b) for such control period and divided by such State NO\textsubscript{X} Ozone Season Group 1 trading budget;

3. Provided that, in the case of a unit that operates during, but has no NO\textsubscript{X} emissions from such unit for such control period, a capacity factor of 0.92 (if the unit is a boiler combusting any amount of coal or coal-derived fuel during such control period), 0.32 (if the unit is a simple combined cycle turbine during such control period), 0.73 (if the unit is an integrated coal gasification combined cycle unit during such control period), or 0.44 (for any other unit), multiplied by the unit’s maximum hourly load as reported in accordance with this subpart and by 3,672 hours/control period, and divided by 2,000 lb/ton.

**Common stack** means a single flue through which emissions from 2 or more units are exhausted.

**Compliance account** means an Allowance Management System account, established by the Administrator for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source under this subpart, in which any CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available for use for a control period in a given year in
§ 97.502

Complying with the source’s CSAPR NOX Ozone Season Group 1 emissions limitation in accordance with §§97.506 and 97.524.

Continuous emission monitoring system or CEMS means the equipment required under this subpart to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes and using an automated data acquisition and handling system (DAHS), a permanent record of NOX emissions, stack gas volumetric flow rate, stack gas moisture content, and O2 or CO2 concentration (as applicable), in a manner consistent with part 75 of this chapter and §§97.530 through 97.535.

The following systems are the principal types of continuous emission monitoring systems:

(1) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

(2) A NOX concentration monitoring system, consisting of a NOX pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NOX emissions, in parts per million (ppm);

(3) A NOX emission rate (or NOX-diluent) monitoring system, consisting of a NOX pollutant concentration monitor, a diluent gas (CO2 or O2) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NOX concentration, in parts per million (ppm), diluent gas concentration, in percent CO2 or O2, and NOX emission rate, in pounds per million British thermal units (lb/mmBtu);

(4) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H2O;

(5) A CO2 monitoring system, consisting of a CO2 pollutant concentration monitor (or an O2 monitor plus suitable mathematical equations from which the CO2 concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO2 emissions, in percent CO2; and

(6) An O2 monitoring system, consisting of an O2 concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O2, in percent O2.

Control period means the period starting May 1 of a calendar year, except as provided in §97.506(c)(3), and ending on September 30 of the same year, inclusive.

CSAPR NOX Annual Trading Program means a multi-state NOX air pollution control and emission reduction program established in accordance with subpart AAAAA of this part and §52.38(a) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(a)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(a)(5) of this chapter), as a means of mitigating interstate transport of fine particulates and NOX.

CSAPR NOX Ozone Season Group 1 allowance means a limited authorization issued and allocated or auctioned by the Administrator under this subpart, or by a State or permitting authority under a SIP revision approved by the Administrator under §52.38(b)(3), (4), or (5) of this chapter, to emit one ton of NOX during a control period of the specified calendar year for which the authorization is allocated or auctioned or of any calendar year thereafter under the CSAPR NOX Ozone Season Group 1 Trading Program.

CSAPR NOX Ozone Season Group 1 allowance deduction or deduct CSAPR NOX Ozone Season Group 1 allowances means the permanent withdrawal of CSAPR NOX Ozone Season Group 1 allowances by the Administrator from a compliance account (e.g., in order to account for compliance with the CSAPR NOX Ozone Season Group 1 emissions limitation) or from an assurance account (e.g., in order to account for compliance with the assurance provisions under §§97.506 and 97.525).

CSAPR NOX Ozone Season Group 1 allowances held or hold CSAPR NOX Ozone Season Group 1 allowances means the
CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances treated as included in an Allowance Management System account as of a specified point in time because at that time they:

(1) Have been recorded by the Administrator in the account or transferred into the account by a correctly submitted, but not yet recorded, CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfer in accordance with this subpart;

(2) Have not been transferred out of the account by a correctly submitted, but not yet recorded, CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfer in accordance with this subpart.

CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation means, for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source, the tonnage of NO\textsubscript{X} emissions authorized in a control period in a given year by the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available for deduction for the source under §97.524(a) for such control period.

CSAPR NO\textsubscript{X} Ozone Season Group 1 source means a source that includes one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 units.

CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program means a multi-state NO\textsubscript{X} air pollution control and emission reduction program established in accordance with this subpart and §52.38(b)(1), (b)(2)(i) and (ii), (b)(3) through (5), and (b)(10) through (12) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(6) or (9) of this chapter), as a means of mitigating interstate transport of ozone and NO\textsubscript{X}.

CSAPR SO\textsubscript{2} Ozone Season Group 1 source means a source that includes one or more CSAPR SO\textsubscript{2} Ozone Season Group 1 units.

CSAPR SO\textsubscript{2} Ozone Season Group 1 Trading Program means a multi-state SO\textsubscript{2} air pollution control and emission reduction program established in accordance with subpart CCCCCC of this part and §52.39(a), (b), (d) through (f), and (j) through (l) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.39(d) or (e) of this chapter or that is established in a SIP revision approved by the Administrator under §52.39(f) of this chapter), as a means of mitigating interstate transport of fine particulates and SO\textsubscript{2}.

CSAPR NO\textsubscript{X} Ozone Season Group 1 unit means a unit that is subject to the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program.

CSAPR NO\textsubscript{X} Ozone Season Group 2 allowance means a limited authorization issued and allocated or auctioned by the Administrator under subpart EEEEE of this part or §97.526(c), or by a State or permitting authority under a SIP revision approved by the Administrator under §52.38(b)(6), (7), (8), or (9) of this chapter, to emit one ton of NO\textsubscript{X} during a control period of the specified calendar year for which the authorization is allocated or auctioned or of any calendar year thereafter under the CSAPR NO\textsubscript{X} Ozone Season Group 2 Trading Program.

CSAPR NO\textsubscript{X} Ozone Season Group 2 Trading Program means a multi-state NO\textsubscript{X} air pollution control and emission reduction program established in accordance with subpart EEEEE of this part and §52.38(b)(1), (b)(2)(i) and (ii), (b)(6) through (11), and (b)(13) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(7) or (8) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(b)(6) or (9) of this chapter), as a means of mitigating interstate transport of ozone and NO\textsubscript{X}.

CSAPR SO\textsubscript{2} Group 1 Trading Program means a multi-state SO\textsubscript{2} air pollution control and emission reduction program established in accordance with subpart DDDD of this part and §52.39(a), (c), (g) through (k), and (m) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.39(g) or (h) of this chapter or that is established in a SIP revision approved by the Administrator under §52.39(i) of this chapter), as a means of mitigating interstate transport of fine particulates and SO\textsubscript{2}.

Designated representative means, for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source, the natural person who is authorized by the owners and operators of the source
and all such units at the source, in accordance with this subpart, to represent and legally bind each owner and operator in matters pertaining to the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program. If the CSAPR NO\textsubscript{X} Ozone Season Group 1 source is also subject to the Acid Rain Program, CSAPR NO\textsubscript{X} Annual Trading Program, CSAPR SO\textsubscript{2} Group 1 Trading Program, or CSAPR SO\textsubscript{2} Group 2 Trading Program, then this natural person shall be the same natural person as the designated representative as defined in the respective program.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the designated representative, and as modified by the Administrator:

1. In accordance with this subpart; and
2. With regard to a period before the unit or source is required to measure, record, and report such air pollutants in accordance with this subpart, in accordance with part 75 of this chapter.

Excess emissions means any ton of emissions from the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at a CSAPR NO\textsubscript{X} Ozone Season Group 1 source during a control period in a given year that exceeds the CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation for the source for such control period.

Fossil fuel means—

1. Natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material; or
2. For purposes of applying the limitation on “average annual fuel consumption of fossil fuel” in §97.504(b)(2)(i)(B) and (ii), natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material for the purpose of creating useful heat.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in 2005 or any calendar year thereafter.

General account means an Allowance Management System account, established under this subpart, that is not a compliance account or an assurance account.

Generator means a device that produces electricity.

Heat input means, for a unit for a specified period of unit operating time, the product (in mmBtu) of the gross calorific value of the fuel (in mmBtu/lb) fed into the unit multiplied by the fuel feed rate (in lb of fuel/time) and unit operating time, as measured, recorded, and reported to the Administrator by the designated representative and as modified by the Administrator in accordance with this subpart and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust.

Heat input rate means, for a unit, the quotient (in mmBtu/hr) of the amount of heat input for a specified period of unit operating time (in mmBtu) divided by the unit operating time (in hr) or, for a unit and a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combusts the fuel.

Heat rate means, for a unit, the quotient (in mmBtu/unit of load) of the unit’s maximum design heat input rate (in Btu/hr) divided by the product of 1,000,000 Btu/mmBtu and the unit’s maximum hourly load.

Indian country means “Indian country” as defined in 18 U.S.C. 1151.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

1. For the life of the unit;
2. For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or
3. For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input rate means, for a unit, the maximum amount of fuel per hour (in Btu/hr) that the unit is capable of combusting.
on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.

Monitoring system means any monitoring system that meets the requirements of this subpart, including a continuous emission monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Nameplate capacity means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe, rounded to the nearest tenth) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount (in MWe, rounded to the nearest tenth) as of such completion as specified by the person conducting the physical change.

Natural gas means “natural gas” as defined in §72.2 of this chapter.

Newly affected CSAPR NOX Ozone Season Group 1 unit means a unit that was not a CSAPR NOX Ozone Season Group 1 unit when it began operating but that thereafter becomes a CSAPR NOX Ozone Season Group 1 unit.

Operate or operation means, with regard to a unit, to combust fuel.

Operator means, for a CSAPR NOX Ozone Season Group 1 source or a CSAPR NOX Ozone Season Group 1 unit at a source respectively, any person who operates, controls, or supervises a CSAPR NOX Ozone Season Group 1 unit at the source or the CSAPR NOX Ozone Season Group 1 unit and shall include, but not be limited to, any holding company, utility system, or plant manager of such source or unit.

Owner means, for a CSAPR NOX Ozone Season Group 1 source or a CSAPR NOX Ozone Season Group 1 unit at a source respectively, any of the following persons:

1. Any holder of any portion of the legal or equitable title in a CSAPR NOX Ozone Season Group 1 unit at the source or the CSAPR NOX Ozone Season Group 1 unit;
2. Any holder of a leasehold interest in a CSAPR NOX Ozone Season Group 1 unit at the source or the CSAPR NOX Ozone Season Group 1 unit, provided that, unless expressly provided for in a leasehold agreement, “owner” shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CSAPR NOX Ozone Season Group 1 unit; and
3. Any purchaser of power from a CSAPR NOX Ozone Season Group 1 unit at the source or the CSAPR NOX Ozone Season Group 1 unit under a life-of-the-unit, firm power contractual arrangement.

Permanently retired means, with regard to a unit, a unit that is unavailable for service and that the unit’s owners and operators do not expect to return to service in the future.

Permitting authority means “permitting authority” as defined in §§70.2 and 71.2 of this chapter.

Potential electrical output capacity means, for a unit (in MWh/yr), 33 percent of the unit’s maximum design heat input rate (in Btu/hr), divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

Receive or receipt of means, when referring to the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CSAPR NOX Ozone Season Group 1 allowances, the moving of CSAPR NOX Ozone Season Group 1 allowances by the Administrator into, out of, or between Allowance Management System accounts, for purposes of allocation, auction, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing
for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent retirement and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or retired unit (the replaced unit).

Sequential use of energy means:
(1) The use of reject heat from electricity production in a useful thermal energy application or process; or
(2) The use of reject heat from a useful thermal energy application or process in electricity production.

Serial number means, for a CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance, the unique identification number assigned to each CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance by the Administrator.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a “solid waste incineration unit” as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. This definition does not change or otherwise affect the definition of “major source”, “stationary source”, or “source” as set forth and implemented in a title V operating permit program or any other program under the Clean Air Act.

State means one of the States that is subject to the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program pursuant to §52.38(b)(1), (b)(2)(i) and (ii), (b)(3) through (5), and (b)(10) through (12) of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:
(1) In person;
(2) By United States Postal Service; or
(3) By other means of dispatch or transmission and delivery;
(4) Provided that compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Topping-cycle unit means a unit in which the energy input to the unit is first used to produce useful power, including electricity, where at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, for a unit, total energy of all forms supplied to the unit, excluding energy produced by the unit. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[
LHV = HHV - 10.55 (W + 9H)
\]

where:
- \(LHV\) = lower heating value of the form of energy in Btu/lb,
- \(HHV\) = higher heating value of the form of energy in Btu/lb,
- \(W\) = weight % of moisture in the form of energy,
- \(H\) = weight % of hydrogen in the form of energy.

Total energy output means, for a unit, the sum of useful power and useful thermal energy produced by the unit.

Unit means a stationary, fossil-fuel-fired boiler, stationary, fossil-fuel-fired combustion turbine, or other stationary, fossil-fuel-fired combustion device. A unit that undergoes a physical change or is moved to a different location or source shall continue to be treated as the same unit. A unit (the replaced unit) that is replaced by another unit (the replacement unit) at the same or a different source shall continue to be treated as the same unit, and the replacement unit shall be treated as a separate unit.

Unit operating day means, with regard to a unit, a calendar day in which the unit combusts any fuel.

Unit operating hour or hour of unit operation means, with regard to a unit, an hour in which the unit combusts any fuel.

Useful power means, with regard to a unit, electricity or mechanical energy that the unit makes available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).
Useful thermal energy means thermal energy that is:

(1) Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;

(2) Used in a heating application (e.g., space heating or domestic hot water heating); or

(3) Used in a space cooling application (i.e., in an absorption chiller).

Utility power distribution system means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

§ 97.503 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this subpart are defined as follows:

Btu—British thermal unit

CO₂—carbon dioxide

CSAPR—Cross-State Air Pollution Rule

H₂O—water

hr—hour

kWh—kilowatt-hour

lb—pound

mmBtu—million Btu

MWe—megawatt electrical

MWh—megawatt-hour

NOₓ—nitrogen oxides

O₂—oxygen

ppm—parts per million

scfh—standard cubic feet per hour

SIP—State implementation plan

SO₂—sulfur dioxide

TR—Transport Rule

yr—year

§ 97.504 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State (and Indian country within the borders of such State) shall be CSAPR NOₓ Ozone Season Group 1 units, and any source that includes one or more such units shall be a CSAPR NOₓ Ozone Season Group 1 source, subject to the requirements of this subpart: Any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, or on or after January 1, 2005, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CSAPR NOₓ Ozone Season Group 1 unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than 25 MWe producing electricity for sale, the unit shall become a CSAPR NOₓ Ozone Season Group 1 unit as provided in paragraph (a)(1) of this section on the first date on which it both combats fossil fuel and serves such generator.

(b) Any unit in a State (and Indian country within the borders of such State) that otherwise is a CSAPR NOₓ Ozone Season Group 1 unit under paragraph (a) of this section and that meets the requirements set forth in paragraph (b)(1)(i) or (2)(i) of this section shall not be a CSAPR NOₓ Ozone Season Group 1 unit:

(1)(i) Any unit:

(A) Qualifying as a cogeneration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit throughout each calendar year ending after the later of 2005 or such 12-month period; and

(B) Not supplying in 2005 or any calendar year thereafter more than one-third of the unit’s potential electrical output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(2)(i) Any unit:

(A) Qualifying as a cogeneration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit throughout each calendar year ending after the later of 2005 or such 12-month period; and

(B) Not supplying in 2005 or any calendar year thereafter more than one-third of the unit’s potential electrical output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(ii) If, after qualifying under paragraph (b)(1)(i) of this section as not being a CSAPR NOₓ Ozone Season Group 1 unit, a unit subsequently no longer meets all the requirements of paragraph (b)(1)(i) of this section, the unit shall become a CSAPR NOₓ Ozone Season Group 1 unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i)(B) of this section. The unit shall thereafter continue to be a CSAPR NOₓ Ozone Season Group 1 unit.

(2)(i) Any unit:
(A) Qualifying as a solid waste incineration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a solid waste incineration unit throughout each calendar year ending after the later of 2005 or such 12-month period; and

(B) With an average annual fuel consumption of fossil fuel for the first 3 consecutive calendar years of operation starting no earlier than 2005 of less than 20 percent (on a Btu basis) and an average annual fuel consumption of fossil fuel for any 3 consecutive calendar years thereafter of less than 20 percent (on a Btu basis).

(ii) If, after qualifying under paragraph (b)(2)(i) of this section as not being a CSAPR NO\text{X} Ozone Season Group 1 unit, a unit subsequently no longer meets all the requirements of paragraph (b)(2)(i) of this section, the unit shall become a CSAPR NO\text{X} Ozone Season Group 1 unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 2005 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more. The unit shall thereafter continue to be a CSAPR NO\text{X} Ozone Season Group 1 unit.

(c) A certifying official of an owner or operator of any unit or other equipment may submit a petition (including any supporting documents) to the Administrator at any time for a determination concerning the applicability, under paragraphs (a) and (b) of this section or a SIP revision approved under §52.38(b)(4) or (5) of this chapter, of the CSAPR NO\text{X} Ozone Season Group 1 Trading Program to the unit or other equipment.

1. **Petition content.** The petition shall be in writing and include the identification of the unit or other equipment and the relevant facts about the unit or other equipment. The petition and any other documents provided to the Administrator in connection with the petition shall include the following certification statement, signed by the certifying official: "I am authorized to make this submission on behalf of the owners and operators of the unit or other equipment for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

2. **Response.** The Administrator will issue a written response to the petition and may request supplemental information determined by the Administrator to be relevant to such petition. The Administrator’s determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CSAPR NO\text{X} Ozone Season Group 1 Trading Program to the unit or other equipment shall be binding on any State or permitting authority unless the Administrator determines that the petition or other documents or information provided in connection with the petition contained significant, relevant errors or omissions.

§ 97.505 Retired unit exemption.

(a)(1) Any CSAPR NO\text{X} Ozone Season Group 1 unit that is permanently retired shall be exempt from §97.506(b) and (c)(1), §97.524, and §§97.530 through 97.535.

2. **Exemption under paragraph (a)(1) of this section shall become effective the day on which the CSAPR NO\text{X} Ozone Season Group 1 unit is permanently retired. Within 30 days of the unit’s permanent retirement, the designated representative shall submit a statement to the Administrator. The statement shall state, in a format prescribed by the Administrator, that the unit was permanently retired on a specified date and will comply with the requirements of paragraph (b) of this section.
§ 97.506 Standard requirements.

(a) Designated representative requirements. The owners and operators shall comply with the requirement to have a designated representative, and may have an alternate designated representative, in accordance with §§97.513 through 97.518.

(b) Emissions monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the designated representative, of each CSAPR NO\textsubscript{X} Ozone Season Group 1 source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of §§97.530 through 97.535.

(2) The emissions data determined in accordance with §§97.530 through 97.535 shall be used to calculate allocations of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances under §§97.511(a)(2) and (b) and 97.512 and to determine compliance with the CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation and assurance provisions under paragraph (c) of this section, provided that, for each monitoring location from which mass emissions are reported, the mass emissions amount used in calculating such allocations and determining such compliance shall be the mass emissions amount for the monitoring location determined in accordance with §§97.530 through 97.535 and rounded to the nearest ton, with any fraction of a ton less than 0.50 being deemed to be zero.

(c) NO\textsubscript{X} emissions requirements—(1) CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation. (i) As of the allowance transfer deadline for a control period in a given year, the owners and operators of each CSAPR NO\textsubscript{X} Ozone Season Group 1 source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source shall hold, in the source’s compliance account, CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available for deduction for such control period under §97.524(a) in an amount not less than the tons of total NO\textsubscript{X} emissions for such control period from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source.

(ii) If total NO\textsubscript{X} emissions during a control period in a given year from the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at a CSAPR NO\textsubscript{X} Ozone Season Group 1 source are in excess of the CSAPR NO\textsubscript{X} Ozone Season Group 1 emissions limitation set forth in paragraph (c)(1)(i) of this section, then: (A) The owners and operators of the source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source shall hold the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances required for deduction under §97.524(d); and (B) The owners and operators of the source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source shall pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act, and each ton of such excess emissions and each day of such occurrence...
control period shall constitute a separate violation of this subpart and the Clean Air Act.

(2) CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions. (i) If total NO\textsubscript{X} emissions during a control period in a given year from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in a State (and Indian country within the borders of such State) exceed the State assurance level, then the owners and operators of such sources and units in each group of one or more sources and units having a common designated representative for such control period, where the common designated representative’s share of such NO\textsubscript{X} emissions during such control period exceeds the common designated representative’s assurance level for the State and such control period, shall hold (in the assurance account established for the owners and operators of such group) CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available for deduction for such control period under §97.525(a) in an amount equal to two times the product (rounded to the nearest whole number), as determined by the Administrator in accordance with §97.525(b), of multiplying—

(A) The quotient of the amount by which the common designated representative’s share of such NO\textsubscript{X} emissions exceeds the common designated representative’s assurance level for the State and such control period; and

(B) The amount by which total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in the State (and Indian country within the borders of such State) exceed the State assurance level for the respective common designated representative’s assurance level; and

(ii) The owners and operators shall hold the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances required under paragraph (c)(2)(i) of this section, as of midnight of November 1 (if it is a business day), or midnight of the first business day thereafter (if November 1 is not a business day), immediately after the year of such control period.

(iii) Total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in a State (and Indian country within the borders of such State) during a control period in a given year exceed the State assurance level if such total NO\textsubscript{X} emissions exceed the sum, for such control period, of the State NO\textsubscript{X} Ozone Season Group 1 trading budget under §97.510(a) and the State’s variability limit under §97.510(b).

(iv) It shall not be a violation of this subpart or of the Clean Air Act if total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in a State (and Indian country within the borders of such State) during a control period exceed the State assurance level or if a common designated representative’s share of total NO\textsubscript{X} emissions from the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in a State (and Indian country within the borders of such State) during a control period exceeds the common designated representative’s assurance level.

(v) To the extent the owners and operators fail to hold CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for a control period in a given year in accordance with paragraphs (c)(2)(i) through (iii) of this section, the owners and operators shall pay any fine, penalty, or assessment or comply with any other remedy imposed under the Clean Air Act; and

(A) The owners and operators shall hold the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances required under paragraph (c)(2)(i) of this section, as of midnight of November 1, or the deadline for meeting the year of such control period.

(B) Each CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance that the owners and operators fail to hold for such control period in accordance with paragraphs (c)(2)(i) through (iii) of this section and each day of such control period shall constitute a separate violation of this subpart and the Clean Air Act.

(3) Compliance periods. (i) A CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of May 1, 2015 or the deadline for meeting...
the unit’s monitor certification requirements under §97.530(b) and for each control period thereafter.

(ii) A CSAPR NOX Ozone Season Group 1 unit shall be subject to the requirements under paragraph (c)(2) of this section for the control period starting on the later of May 1, 2017 or the deadline for meeting the unit’s monitor certification requirements under §97.530(b) and for each control period thereafter.

(4) Vintage of CSAPR NOX Ozone Season Group 1 allowances held for compliance. (i) A CSAPR NOX Ozone Season Group 1 allowance held for compliance with the requirements under paragraph (c)(1)(i) of this section for a control period in a given year must be a CSAPR NOX Ozone Season Group 1 allowance that was allocated or auctioned for such control period or a control period in a prior year.

(ii) A CSAPR NOX Ozone Season Group 1 allowance held for compliance with the requirements under paragraphs (c)(1)(i)(A) and (2)(i) through (iii) of this section for a control period in a given year must be a CSAPR NOX Ozone Season Group 1 allowance that was allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year.

(5) Allowance Management System requirements. Each CSAPR NOX Ozone Season Group 1 allowance shall be held in, deducted from, or transferred into, out of, or between Allowance Management System accounts in accordance with this subpart.

(6) Limited authorization. A CSAPR NOX Ozone Season Group 1 allowance is a limited authorization to emit one ton of NOX during the control period in one year. Such authorization is limited in its use and duration as follows:

(i) Such authorization shall only be used in accordance with the CSAPR NOX Ozone Season Group 1 Trading Program; and

(ii) Notwithstanding any other provision of this subpart, the Administrator has the authority to terminate or limit the use and duration of such authorization to the extent the Administrator determines is necessary or appropriate to implement any provision of the Clean Air Act.

(7) Property right. A CSAPR NOX Ozone Season Group 1 allowance does not constitute a property right.

(d) Title V permit requirements. (1) No title V permit revision shall be required for any allocation, holding, deduction, or transfer of CSAPR NOX Ozone Season Group 1 allowances in accordance with this subpart.

(2) A description of whether a unit is required to monitor and report NOX emissions using a continuous emission monitoring system (under subpart H of part 75 of this chapter), an excepted monitoring system (under appendices D and E to part 75 of this chapter), a low mass emissions excepted monitoring methodology (under §75.19 of this chapter), or an alternative monitoring system (under subpart E of part 75 of this chapter) in accordance with §§97.530 through 97.535 may be added to, or changed in, a title V permit using minor permit modification procedures in accordance with §§70.7(e)(2) and 71.7(e)(1) of this chapter, provided that the requirements applicable to the described monitoring and reporting (as added or changed, respectively) are already incorporated in such permit. This paragraph explicitly provides that the addition of, or change to, a unit’s description as described in the prior sentence is eligible for minor permit modification procedures in accordance with §§70.7(e)(2)(i)(B) and 71.7(e)(1)(i)(B) of this chapter.

(e) Additional recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of each CSAPR NOX Ozone Season Group 1 source and each CSAPR NOX Ozone Season Group 1 unit at the source shall keep on site at the source each of the following documents (in hardcopy or electronic format) for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the Administrator.

(i) The certificate of representation under §97.516 for the designated representative for the source and each CSAPR NOX Ozone Season Group 1 unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and
documents shall be retained on site at
the source beyond such 5-year period until such certificate of representation and
documents are superseded because of the submission of a new certificate of representation under §97.516 changing the designated representative.

(ii) All emissions monitoring information, in accordance with this subpart.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under, or to demonstrate compliance with the requirements of, the CSAPR NOX Ozone Season Group 1 Trading Program.

(2) The designated representative of a CSAPR NOX Ozone Season Group 1 source and each CSAPR NOX Ozone Season Group 1 unit at the source shall make all submissions required under the CSAPR NOX Ozone Season Group 1 Trading Program, except as provided in §97.518. This requirement does not change, create an exemption from, or otherwise affect the responsible official submission requirements under a title V operating permit program in parts 70 and 71 of this chapter.

(f) Liability. (1) Any provision of the CSAPR NOX Ozone Season Group 1 Trading Program that applies to a CSAPR NOX Ozone Season Group 1 source or the designated representative of a CSAPR NOX Ozone Season Group 1 source shall also apply to the owners and operators of such source and of the CSAPR NOX Ozone Season Group 1 units at the source.

(2) Any provision of the CSAPR NOX Ozone Season Group 1 Trading Program that applies to a CSAPR NOX Ozone Season Group 1 unit or the designated representative of a CSAPR NOX Ozone Season Group 1 unit shall also apply to the owners and operators of such unit.

(g) Effect on other authorities. No provision of the CSAPR NOX Ozone Season Group 1 Trading Program or exemption under §97.505 shall be construed as exempting or excluding the owners and operators, and the designated representative, of a CSAPR NOX Ozone Season Group 1 source or CSAPR NOX Ozone Season Group 1 unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the Clean Air Act.

§ 97.507 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CSAPR NOX Ozone Season Group 1 Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CSAPR NOX Ozone Season Group 1 Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CSAPR NOX Ozone Season Group 1 Trading Program, is not a business day, the time period shall be extended to the next business day.

§ 97.508 Administrative appeal procedures.

The administrative appeal procedures for decisions of the Administrator under the CSAPR NOX Ozone Season Group 1 Trading Program are set forth in part 78 of this chapter.

§ 97.509 [Reserved]

§ 97.510 State NOX Ozone Season Group 1 trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.

(a) The State NOX Ozone Season Group 1 trading budgets, new unit set-asides, and Indian country new unit set-asides for allocations of CSAPR NOX Ozone Season Group 1 allowances for the control periods in 2015 and thereafter are as follows:

(i) The new unit set-aside for 2015 is 635 tons.

(ii) The new unit set-aside for 2016 is 630 tons.

(iii) The new unit set-aside for 2017 is 630 tons.

(iv) The new unit set-aside for 2018 is 630 tons.

(v) The new unit set-aside for 2019 is 630 tons.
Arkansas. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 15,110 tons.
(ii) The new unit set-aside for 2015 and 2016 is 756 tons.
(iii) [Reserved]
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 15,110 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,209 tons.
(vi) [Reserved]

Florida. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 28,644 tons.
(ii) The new unit set-aside for 2015 and 2016 is 544 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 29 tons.
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 27,825 tons.
(v) The new unit set-aside for 2017 and thereafter is 529 tons.
(vi) [Reserved]

Georgia. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 27,944 tons.
(ii) The new unit set-aside for 2015 and 2016 is 559 tons.
(iii) [Reserved]
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 24,041 tons.
(v) The new unit set-aside for 2017 and thereafter is 481 tons.
(vi) [Reserved]

Illinois. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 46,876 tons.
(ii) The new unit set-aside for 2015 and 2016 is 1,406 tons.
(iii) [Reserved]
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 46,175 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,385 tons.
(vi) [Reserved]

Iowa. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 16,532 tons.
(ii) The new unit set-aside for 2015 and 2016 is 314 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 17 tons.
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 16,207 tons.
(v) The new unit set-aside for 2017 and thereafter is 308 tons.
(vi) [Reserved]

Kentucky. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 36,167 tons.
(ii) The new unit set-aside for 2015 and 2016 is 1,447 tons.
(iii) [Reserved]
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 32,674 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,307 tons.
(vi) [Reserved]

Louisiana. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 18,115 tons.
(ii) The new unit set-aside for 2015 and 2016 is 344 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 18 tons.
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 18,115 tons.
(v) The new unit set-aside for 2017 and thereafter is 344 tons.
(vi) [Reserved]

Maryland. (i) The NOX Ozone Season Group 1 trading budget for 2015 and 2016 is 7,179 tons.
(ii) The new unit set-aside for 2015 and 2016 is 144 tons.
(iii) [Reserved]
(iv) The NOX Ozone Season Group 1 trading budget for 2017 and thereafter is 7,179 tons.
(v) The new unit set-aside for 2017 and thereafter is 144 tons.
(vi) [Reserved]
(11) **Michigan.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 28,041 tons.
(ii) The new unit set-aside for 2015 and 2016 is 533 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 28 tons.
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 27,016 tons.
(v) The new unit set-aside for 2017 and thereafter is 513 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 27 tons.

(12) **Mississippi.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 12,429 tons.
(ii) The new unit set-aside for 2015 and 2016 is 237 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 12 tons.
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 12,429 tons.
(v) The new unit set-aside for 2017 and thereafter is 237 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 12 tons.

(13) **Missouri.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 22,788 tons.
(ii) The new unit set-aside for 2015 is 684 tons and for 2016 is 1,367 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 21,099 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,266 tons.
(vi) [Reserved]

(14) **New Jersey.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 4,128 tons.
(ii) The new unit set-aside for 2015 and 2016 is 83 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 3,731 tons.
(v) The new unit set-aside for 2017 and thereafter is 75 tons.
(vi) [Reserved]

(15) **New York.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 10,369 tons.
(ii) The new unit set-aside for 2015 and 2016 is 197 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 10 tons.
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 10,369 tons.
(v) The new unit set-aside for 2017 and thereafter is 197 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 10 tons.

(16) **North Carolina.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 22,168 tons.
(ii) The new unit set-aside for 2015 and 2016 is 1,308 tons.
(iii) The Indian country new unit set-aside for 2015 and 2016 is 22 tons.
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 18,455 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,089 tons.
(vi) The Indian country new unit set-aside for 2017 and thereafter is 18 tons.

(17) **Ohio.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 and 2016 is 41,284 tons.
(ii) The new unit set-aside for 2015 and 2016 is 826 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 39,013 tons.
(v) The new unit set-aside for 2017 and thereafter is 780 tons.
(vi) [Reserved]

(18) **Oklahoma.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 is 36,567 tons and for 2016 is 22,694 tons.
(ii) The new unit set-aside for 2015 is 731 tons and for 2016 is 454 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 22,694 tons.
(v) The new unit set-aside for 2017 and thereafter is 454 tons.
(vi) [Reserved]

(19) **Pennsylvania.** (i) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2015 is 52,201 tons.
(ii) The new unit set-aside for 2015 and 2016 is 1,044 tons.
(iii) [Reserved]
(iv) The NO\textsubscript{X} Ozone Season Group 1 trading budget for 2017 and thereafter is 51,912 tons.
(v) The new unit set-aside for 2017 and thereafter is 1,038 tons.
(vi) [Reserved]
§ 97.510

(20) South Carolina. (i) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2015 and 2016 is 13,909 tons.

(ii) The new unit set-aside for 2015 and 2016 is 264 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 14 tons.

(iv) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2017 and thereafter is 13,909 tons.

(v) The new unit set-aside for 2017 and thereafter is 264 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 14 tons.

(21) Tennessee. (i) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2015 and 2016 is 14,908 tons.

(ii) The new unit set-aside for 2015 and 2016 is 298 tons.

(iii) [Reserved]

(iv) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2017 and thereafter is 8,016 tons.

(v) The new unit set-aside for 2017 and thereafter is 160 tons.

(vi) [Reserved]

(22) Texas. (i) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2015 and 2016 is 65,560 tons.

(ii) The new unit set-aside for 2015 and 2016 is 2,556 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 66 tons.

(iv) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2017 and thereafter is 65,560 tons.

(v) The new unit set-aside for 2017 and thereafter is 2,556 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 66 tons.

(23) Virginia. (i) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2015 and 2016 is 14,432 tons.

(ii) The new unit set-aside for 2015 and 2016 is 723 tons.

(iii) [Reserved]

(iv) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2017 and thereafter is 14,432 tons.

(v) The new unit set-aside for 2017 and thereafter is 723 tons.

(vi) [Reserved]

(24) West Virginia. (i) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2015 and 2016 is 25,283 tons.

(ii) The new unit set-aside for 2015 and 2016 is 1,264 tons.

(iii) [Reserved]

(iv) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2017 and thereafter is 23,291 tons.

(v) The new unit set-aside for 2017 and thereafter is 1,165 tons.

(vi) [Reserved]

(25) Wisconsin. (i) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2015 and 2016 is 14,784 tons.

(ii) The new unit set-aside for 2015 and 2016 is 872 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 15 tons.

(iv) The NO\textsubscript{x} Ozone Season Group 1 trading budget for 2017 and thereafter is 14,296 tons.

(v) The new unit set-aside for 2017 and thereafter is 844 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 14 tons.

(b) The States’ variability limits for the State NO\textsubscript{x} Ozone Season Group 1 trading budgets for the control periods in 2017 and thereafter are as follows:

(1) The variability limit for Alabama is 6,615 tons.

(2) The variability limit for Arkansas is 3,173 tons.

(3) The variability limit for Florida is 5,843 tons.

(4) The variability limit for Georgia is 5,049 tons.

(5) The variability limit for Illinois is 4,454 tons.

(6) The variability limit for Indiana is 9,697 tons.

(7) The variability limit for Iowa is 3,403 tons.

(8) The variability limit for Kentucky is 6,862 tons.

(9) The variability limit for Louisiana is 3,804 tons.

(10) The variability limit for Maryland is 1,508 tons.

(11) The variability limit for Michigan is 5,673 tons.

(12) The variability limit for Mississippi is 2,610 tons.

(13) The variability limit for Missouri is 4,331 tons.

(14) The variability limit for New Jersey is 784 tons.

(15) The variability limit for New York is 2,177 tons.

(16) The variability limit for North Carolina is 3,976 tons.

(17) The variability limit for Ohio is 8,193 tons.
§ 97.511 Timing requirements for CSAPR NO<sub>x</sub> Ozone Season Group 1 allowance allocations.

(a) Existing units. (1) CSAPR NO<sub>x</sub> Ozone Season Group 1 allowances are allocated, for the control periods in 2015 and each year thereafter, as provided in a notice of data availability issued by the Administrator. Providing an allocation to a unit in such notice does not constitute a determination that the unit is a CSAPR NO<sub>x</sub> Ozone Season Group 1 unit, and not providing an allocation to a unit in such notice does not constitute a determination that the unit is not a CSAPR NO<sub>x</sub> Ozone Season Group 1 unit.

(2) Notwithstanding paragraph (a)(1) of this section, if a unit provided an allocation in the notice of data availability issued under paragraph (a)(1) of this section does not operate, starting after 2014, during the control period in two consecutive years, such unit will not be allocated the CSAPR NO<sub>x</sub> Ozone Season Group 1 allowances provided in such notice for the unit for the control periods in the fifth year after the first such year and in each year after that fifth year. All CSAPR NO<sub>x</sub> Ozone Season Group 1 allowances that would otherwise have been allocated to such unit will be allocated to the new unit set-aside for the State where such unit is located and for the respective years involved. If such unit resumes operation, the Administrator will allocate CSAPR NO<sub>x</sub> Ozone Season Group 1 allowances to the unit in accordance with paragraph (b) of this section.

(b) New units—(1) New unit set-asides. (i) By June 1, 2015 and June 1 of each year thereafter, the Administrator will calculate the CSAPR NO<sub>x</sub> Ozone Season Group 1 allowance allocation to each CSAPR NO<sub>x</sub> Ozone Season Group 1 unit in a State, in accordance with §97.512(a)(2) through (7) and (12), for the control period in the year of the applicable calculation deadline under this paragraph and will promulgate a notice of data availability of the results of the calculations.

(ii) For each notice of data availability required in paragraph (b)(1)(i) of this section, the Administrator will provide an opportunity for submission of objections to the calculations referenced in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(1)(i) of this section and shall be limited to addressing whether the calculations (including the identification of the CSAPR NO<sub>x</sub> Ozone Season Group 1 units) are in accordance with §§97.512(a)(2) through (7) and (12) and §§97.506(b)(2) and 97.530 through 97.535.

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(1)(ii)(A) of this section. By August 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments that the Administrator determines to be necessary with regard to allocations under §97.512(a)(2) through (7) and (12) and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(1)(ii)(A) of this section.

(iii)(A) If the new unit set-aside for the control period in 2015 or 2016 contains any CSAPR NO<sub>x</sub> Ozone Season Group 1 allowances that have not been...
allocated in the applicable notice of data availability required in paragraph (b)(1)(ii) of this section, the Administrator will promulgate, by September 15 immediately after such notice, a notice of data availability that identifies any CSAPR NOX Ozone Season Group 1 units that commenced commercial operation during the period starting May 1 of the year before the year of such control period and ending August 31 of the year of such control period.

(B) If the new unit set-aside for the control period in 2017 or any subsequent year contains any CSAPR NOX Ozone Season Group 1 allowances that have not been allocated in the applicable notice of data availability required in paragraph (b)(1)(ii) of this section, the Administrator will promulgate, by December 15 immediately after such notice, a notice of data availability that identifies any CSAPR NOX Ozone Season Group 1 units that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period.

(iv) For each notice of data availability required in paragraph (b)(1)(iii) of this section, the Administrator will provide an opportunity for submission of objections to the identification of CSAPR NOX Ozone Season Group 1 units in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(1)(iii) of this section and shall be limited to addressing whether the identification of CSAPR NOX Ozone Season Group 1 units in such notice is in accordance with paragraph (b)(1)(iii) of this section.

(B) The Administrator will adjust the identification of CSAPR NOX Ozone Season Group 1 units in each notice of data availability required in paragraph (b)(1)(iii) of this section to the extent necessary to ensure that it is in accordance with paragraph (b)(1)(iii) of this section and will calculate the CSAPR NOX Ozone Season Group 1 allowance allocation to each CSAPR NOX Ozone Season Group 1 unit in accordance with §97.512(a)(9), (10), and (12) and §§97.506(b)(2) and 97.530 through 97.535. By November 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(iii)(A) of this section, or by February 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(iii)(B) of this section, the Administrator will promulgate a notice of data availability of any adjustments of the identification of CSAPR NOX Ozone Season Group 1 units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(1)(iv)(A) of this section, and the results of such calculations.

(v) To the extent any CSAPR NOX Ozone Season Group 1 allowances are added to the new unit set-aside after promulgation of each notice of data availability required in paragraph (b)(1)(iv) of this section, the Administrator will promulgate additional notices of data availability, as deemed appropriate, of the allocation of such CSAPR NOX Ozone Season Group 1 allowances in accordance with §97.512(a)(10).

(2) Indian country new unit set-asides.

(i) By June 1, 2015 and June 1 of each year thereafter, the Administrator will calculate the CSAPR NOX Ozone Season Group 1 allowance allocation to each CSAPR NOX Ozone Season Group 1 unit in Indian country within the borders of a State, in accordance with §97.512(b)(2) through (7) and (12), for the control period in the year of the applicable calculation deadline under this paragraph and will promulgate a notice of data availability of the results of the calculations.

(ii) For each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will provide an opportunity for submission of objections to the calculations referenced in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(2)(i) of this section and shall be limited to addressing whether the calculations (including the identification of the CSAPR NOX Ozone Season Group 1 units) are in accordance with §97.512(b)(2) through (7) and (12) and §§97.506(b)(2) and 97.530 through 97.535.
(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(ii)(A) of this section. By August 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments that the Administrator determines to be necessary with regard to allocations under §97.512(b)(2) through (7) and (12) and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(i)(A) of this section.

(iii)(A) If the Indian country new unit set-aside for the control period in 2015 or 2016 contains any CSAPR NOx Ozone Season Group 1 allowances that have not been allocated in the applicable notice of data availability required in paragraph (b)(2)(ii) of this section, the Administrator will promulgate, by September 15 immediately after such notice, a notice of data availability that identifies any CSAPR NOx Ozone Season Group 1 units that commenced commercial operation during the period starting May 1 of the year before the year of such control period and ending August 31 of the year of such control period.

(B) If the Indian country new unit set-aside for the control period in 2017 or any subsequent year contains any CSAPR NOx Ozone Season Group 1 allowances that have not been allocated in the applicable notice of data availability required in paragraph (b)(2)(ii) of this section, the Administrator will promulgate, by December 15 immediately after such notice, a notice of data availability that identifies any CSAPR NOx Ozone Season Group 1 units that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period.

(iv) For each notice of data availability required in paragraph (b)(2)(iii) of this section, the Administrator will provide an opportunity for submission of objections to the identification of CSAPR NOx Ozone Season Group 1 units in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(2)(iii) of this section and shall be limited to addressing whether the identification of CSAPR NOx Ozone Season Group 1 units in such notice is in accordance with paragraph (b)(2)(iii) of this section.

(B) The Administrator will adjust the identification of CSAPR NOx Ozone Season Group 1 units in each notice of data availability required in paragraph (b)(2)(iii) of this section to the extent necessary to ensure that it is in accordance with paragraph (b)(2)(iii) of this section and will calculate the CSAPR NOx Ozone Season Group 1 allowance allocation to each CSAPR NOx Ozone Season Group 1 unit in accordance with §97.512(b)(9), (10), and (12) and §§97.506(b)(2) and 97.530 through 97.535. By November 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(A) of this section, or by February 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section, the Administrator will promulgate a notice of data availability of any adjustments of the identification of CSAPR NOx Ozone Season Group 1 units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iv)(A) of this section, and the results of such calculations.

(v) To the extent any CSAPR NOx Ozone Season Group 1 allowances are added to the Indian country new unit set-aside after promulgation of each notice of data availability required in paragraph (b)(2)(iv) of this section, the Administrator will promulgate additional notices of data availability, as deemed appropriate, of the allocation of such CSAPR NOx Ozone Season Group 1 allowances in accordance with §97.512(b)(10).

(c) Units incorrectly allocated CSAPR NOx Ozone Season Group 1 allowances.

(1) For each control period in 2015 and thereafter, if the Administrator determines that CSAPR NOx Ozone Season
Group 1 allowances were allocated under paragraph (a) of this section, or under a provision of a SIP revision approved under §52.38(b)(3), (4), or (5) of this chapter, where such control period and the recipient are covered by the provisions of paragraph (c)(1)(i) of this section or were allocated under §97.512(a)(2) through (7), (9), and (12) and (b)(2) through (7), (9), and (12), or under a provision of a SIP revision approved under §52.38(b)(4) or (5) of this chapter, where such control period and the recipient are covered by the provisions of paragraph (c)(1)(i) of this section, then the Administrator will notify the designated representative of the recipient and will act in accordance with the procedures set forth in paragraphs (c)(2) through (5) of this section:

(i) (A) The recipient is not actually a CSAPR NOx Ozone Season Group 1 unit as of May 1, 2015 and is allocated CSAPR NOx Ozone Season Group 1 allowances for such control period or, in the case of an allocation under a provision of a SIP revision approved under §52.38(b)(3), (4), or (5) of this chapter, the recipient is not actually a CSAPR NOx Ozone Season Group 1 unit as of May 1, 2015 and is allocated CSAPR NOx Ozone Season Group 1 allowances for such control period that the SIP revision provides should be allocated only to recipients that are CSAPR NOx Ozone Season Group 1 units as of May 1 of such control period.

(B) The recipient is not located as of May 1 of the control period in the State from whose NOx Ozone Season Group 1 trading budget the CSAPR NOx Ozone Season Group 1 allowances allocated under paragraph (a) of this section, or under a provision of a SIP revision approved under §52.38(b)(3), (4), or (5) of this chapter, were allocated for the same or a prior control period equal to the amount of such already recorded CSAPR NOx Ozone Season Group 1 allowances. The authorized account representative shall ensure that there are sufficient CSAPR NOx Ozone Season Group 1 allowances in such account for completion of the deduction.

4) If the Administrator already recorded such CSAPR NOx Ozone Season Group 1 allowances under §97.521 and if the Administrator makes the determination under paragraph (c)(1) of this section before making deductions for the source that includes such recipient under §97.524(b) for such control period, then the Administrator will deduct from the account in which such CSAPR NOx Ozone Season Group 1 allowances were recorded an amount of CSAPR NOx Ozone Season Group 1 allowances allocated for the same or a prior control period under §97.524(b) for such control period.

5) (i) With regard to the CSAPR NOx Ozone Season Group 1 allowances that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(i) of this section, the Administrator will:

(A) Transfer such CSAPR NOx Ozone Season Group 1 allowances to the new unit set-aside for such control period for the State from whose NOx Ozone Season Group 1 trading budget the
CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances were allocated; or
(B) If the State has a SIP revision approved under §52.38(b)(4) or (5) of this chapter covering such control period, include such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the portion of the State NO\textsubscript{X} Ozone Season Group 1 trading budget that may be allocated for such control period in accordance with such SIP revision.

(ii) With regard to the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that were not allocated from the Indian country new unit set-aside for such control period and that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(ii) of this section, the Administrator will:

(A) Transfer such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to the new unit set-aside for such control period; or

(B) If the State has a SIP revision approved under §52.38(b)(4) or (5) of this chapter covering such control period, include such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the portion of the State NO\textsubscript{X} Ozone Season Group 1 trading budget that may be allocated for such control period in accordance with such SIP revision.

(iii) With regard to the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that were allocated from the Indian country new unit set-aside for such control period and that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(ii) of this section, the Administrator will:

(A) Transfer such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to the new unit set-aside for such control period; or

(B) If the State has a SIP revision approved under §52.38(b)(4) or (5) of this chapter covering such control period, include such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the portion of the State NO\textsubscript{X} Ozone Season Group 1 trading budget that may be allocated for such control period in accordance with such SIP revision.

§97.512 CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance allocations to new units.

(a) For each control period in 2015 and thereafter and for the CSAPR NO\textsubscript{X} Ozone Season Group 1 units in each State, the Administrator will allocate CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to the CSAPR NO\textsubscript{X} Ozone Season Group 1 units as follows:

(1) The CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances will be allocated to the following CSAPR NO\textsubscript{X} Ozone Season Group 1 units, except as provided in paragraph (a)(10) of this section:

(i) CSAPR NO\textsubscript{X} Ozone Season Group 1 units that are not allocated an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the notice of data availability issued under §97.511(a)(1);

(ii) CSAPR NO\textsubscript{X} Ozone Season Group 1 units whose allocation of an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for such control period in the notice of data availability issued under §97.511(a)(1) is covered by §97.511(c)(2) or (3);

(iii) CSAPR NO\textsubscript{X} Ozone Season Group 1 units that are allocated an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for such control period in the notice of data availability issued under §97.511(a)(1), which allocation is terminated for such control period pursuant to §97.511(a)(2), and that operate during the control period immediately preceding such control period;

(iv) For purposes of paragraph (a)(9) of this section, CSAPR NO\textsubscript{X} Ozone Season Group 1 units under §97.511(c)(1)(ii) whose allocation of an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for such control period in the notice of data availability issued under §97.511(b)(1)(ii)(B) is covered by §97.511(c)(2) or (3).

(2) The Administrator will establish a separate new unit set-aside for the State for each such control period. Each such new unit set-aside will be allocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in an amount equal to the applicable amount of tons of NO\textsubscript{X} emissions as set forth in §97.510(a) and will be allocated additional CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances (if any) in accordance with §97.511(a)(2) and (c)(5) and paragraph (b)(10) of this section.

(3) The Administrator will determine, for each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit described in paragraph (a)(1) of this section, an allocation of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for the later of the following
control periods and for each subsequent control period:

(i) The control period in 2015;

(ii) The first control period after the control period in which the CSAPR NO\textsubscript{X} Ozone Season Group 1 unit commences commercial operation;

(iii) For a unit described in paragraph (a)(1)(ii) of this section, the first control period in which the CSAPR NO\textsubscript{X} Ozone Season Group 1 unit operates in the State after operating in another jurisdiction and for which the unit is not already allocated one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances; and

(iv) For a unit described in paragraph (a)(1)(iii) of this section, the first control period after the control period in which the unit resumes operation.

(4)(i) The allocation to each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit described in paragraphs (a)(1)(i) through (iii) of this section and for each control period described in paragraph (a)(3) of this section will be an amount equal to the unit’s total tons of NO\textsubscript{X} emissions during the immediately preceding control period.

(ii) The Administrator will adjust the allocation amount in paragraph (a)(4)(i) of this section in accordance with paragraphs (a)(5) through (7) and (12) of this section.

(5) The Administrator will calculate the sum of the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined for all such CSAPR NO\textsubscript{X} Ozone Season Group 1 units under paragraph (a)(4)(i) of this section in the State for such control period.

(6) If the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the new unit set-aside for the State for such control period is greater than or equal to the sum under paragraph (a)(5) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined for each such CSAPR NO\textsubscript{X} Ozone Season Group 1 unit under paragraph (a)(4)(i) of this section.

(7) If the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the new unit set-aside for the State for such control period is less than the sum under paragraph (a)(5) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{X} Ozone Season Group 1 unit the amount of the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined under paragraph (a)(4)(i) of this section for the unit, multiplied by the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the new unit set-aside for such control period, divided by the sum under paragraph (a)(5) of this section, and rounded to the nearest allowance.

(8) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.511(b)(1)(i) and (ii), of the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated under this section for each control period to each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit eligible for such allocation.

(9) If, after completion of the procedures under paragraphs (a)(5) through (8) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances remain in the new unit set-aside for the State for such control period, the Administrator will allocate such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances as follows—

(i)(A) For the control period in 2015 or 2016, the Administrator will determine, for each unit described in paragraph (a)(1) of this section that commenced commercial operation during the period starting May 1 of the year before the year of such control period and ending August 31 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances referenced in the notice of data availability required under §97.511(b)(1)(ii) for the unit for such control period;

(B) For the control period in 2017 or any subsequent year, the Administrator will determine, for each unit described in paragraph (a)(1) of this section that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of
CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances referenced in the notice of data availability required under §97.511(b)(1)(ii) for the unit for such control period;

(ii) The Administrator will determine the sum of the positive differences determined under paragraph (a)(9)(i) of this section;

(iii) If the amount of unallocated CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances remaining in the new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (a)(9)(ii) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances determined for each such CSAPR NO\textsubscript{x} Ozone Season Group 1 unit under paragraph (a)(9)(i) of this section; and

(iv) If the amount of unallocated CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances remaining in the new unit set-aside for the State for such control period is less than the sum under paragraph (a)(9)(ii) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{x} Ozone Season Group 1 unit the amount of the CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances determined under paragraph (a)(9)(i) of this section for the unit, multiplied by the amount of unallocated CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances remaining in the new unit set-aside for such control period, divided by the sum under paragraph (a)(9)(ii) of this section, and rounded to the nearest allowance.

(10) If, after completion of the procedures under paragraphs (a)(9) and (12) of this section for such control period, any unallocated CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances remain in the new unit set-aside for the State for such control period, the Administrator will allocate to each CSAPR NO\textsubscript{x} Ozone Season Group 1 unit that is in the State, an amount of CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances in the notice of data availability issued under §97.511(a)(1), and continues to be allocated CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances for such control period in accordance with §97.511(a), an amount of CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances equal to the following: The total amount of such remaining unallocated CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances in such new unit set-aside, multiplied by the unit’s allocation under §97.511(a) for such control period, divided by the remainder of the amount of tons in the applicable State NO\textsubscript{x} Ozone Season Group 1 trading budget minus the sum of the amounts of tons in such new unit set-aside and the Indian country new unit set-aside for the State for such control period, and rounded to the nearest allowance.

(11) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.511(b)(1)(iii), (iv), and (v), of the amount of CSAPR NO\textsubscript{x} Ozone Season Group 1 allowances allocated under paragraphs (a)(9), (10), and (12) of this section for such control period to each CSAPR NO\textsubscript{x} Ozone Season Group 1 unit eligible for such allocation.

(12)(i) Notwithstanding the requirements of paragraphs (a)(2) through (11) of this section, if the calculations of allocations of a new unit set-aside for a control period in a given year under paragraph (a)(7) of this section, paragraphs (a)(6) and (9)(iv) of this section, or paragraphs (a)(6), (9)(iii), and (10) of this section would otherwise result in total allocations of such new unit set-aside exceeding the total amount of such new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (a)(7), (9)(iv), or (10) of this section, as applicable, and, in cases of equal allocation amounts, in alphabetical order of the relevant source’s name and numerical order of the relevant unit’s identification number, and will reduce each unit’s allocation under paragraph (a)(7), (9)(iv), or (10) of this section, as applicable, by one CSAPR NO\textsubscript{x} Ozone Season Group 1 allowance (but not below zero) in the order in which the units are listed and will repeat this reduction process as necessary, until the total allocations of such new unit set-aside equal the total amount of such new unit set-aside.
§ 97.512 40 CFR Ch. I (7–1–17 Edition)

(ii) Notwithstanding the requirements of paragraphs (a)(10) and (11) of this section, if the calculations of allocations of a new unit set-aside for a control period in a given year under paragraphs (a)(6), (9)(iii), and (10) of this section would otherwise result in a total allocations of such new unit set-aside less than the total amount of such new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (a)(10) of this section, as follows. The Administrator will list the CSAPR NO\textsubscript{X} Ozone Season Group 1 units in descending order based on the amount of such units' allocations under paragraph (a)(10) of this section and, in cases of equal allocation amounts, in alphabetical order of the relevant source's name and numerical order of the relevant unit's identification number, and will increase each unit's allocation under paragraph (a)(10) of this section by one CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance in the order in which the units are listed and will repeat this increase process as necessary, until the total allocations of such new unit set-aside equal the total amount of such new unit set-aside.

(b) For each control period in 2015 and thereafter and for the CSAPR NO\textsubscript{X} Ozone Season Group 1 units located in Indian country within the borders of each State, the Administrator will allocate CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to the CSAPR NO\textsubscript{X} Ozone Season Group 1 units as follows:

(1) The CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances will be allocated to the following CSAPR NO\textsubscript{X} Ozone Season Group 1 units, except as provided in paragraph (b)(10) of this section:

(i) CSAPR NO\textsubscript{X} Ozone Season Group 1 units that are not allocated an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the notice of data availability issued under §97.511(a)(1); or

(ii) For purposes of paragraph (b)(9) of this section, CSAPR NO\textsubscript{X} Ozone Season Group 1 units under §97.511(c)(1)(ii) whose allocation of an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for such control period in the notice of data availability issued under §97.511(b)(2)(ii)(B) is covered by §97.511(c)(2) or (3).

(2) The Administrator will establish a separate Indian country new unit set-aside for the State for each such control period. Each such Indian country new unit set-aside will be allocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in an amount equal to the applicable amount of tons of NO\textsubscript{X} emissions as set forth in §97.510(a) and will be allocated additional CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances (if any) in accordance with §97.511(c)(5).

(3) The Administrator will determine, for each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit described in paragraph (b)(1) of this section, an allocation of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for the later of the following control periods and for each subsequent control period:

(i) The control period in 2015; and

(ii) The first control period after the control period in which the CSAPR NO\textsubscript{X} Ozone Season Group 1 unit commences commercial operation.

(4)(i) The allocation to each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit described in paragraph (b)(1)(i) of this section and for each control period described in paragraph (b)(3) of this section will be an amount equal to the unit's total tons of NO\textsubscript{X} emissions during the immediately preceding control period.

(ii) The Administrator will adjust the allocation amount in paragraph (b)(4)(i) of this section in accordance with paragraphs (b)(5) through (7) and (12) of this section.

(5) The Administrator will calculate the sum of the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined for all such CSAPR NO\textsubscript{X} Ozone Season Group 1 units under paragraph (b)(4)(i) of this section in Indian country within the borders of the State for such control period.

(6) If the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the Indian country new unit set-aside for the State for such control period is greater than or equal to the sum under paragraph (b)(5) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined for each such CSAPR NO\textsubscript{X} Ozone Season Group 1 unit under paragraph (b)(4)(i) of this section.
(7) If the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the Indian country new unit set-aside for the State for such control period is less than the sum under paragraph (b)(5) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{X} Ozone Season Group 1 unit the amount of the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined under paragraph (b)(4)(i) of this section for the unit, multiplied by the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the Indian country new unit set-aside for such control period, divided by the sum under paragraph (b)(5) of this section, and rounded to the nearest allowance.

(8) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.511(b)(2)(i) and (ii), of the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated under paragraphs (b)(2) through (7) and (12) of this section for such control period to each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit eligible for such allocation.

(9) If, after completion of the procedures under paragraphs (b)(5) through (8) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances remain in the Indian country new unit set-aside for the State for such control period, the Administrator will allocate such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances as follows—

(i)(A) For the control period in 2015 or 2016, the Administrator will determine, for each unit described in paragraph (b)(1) of this section that commenced commercial operation during the period starting May 1 of the year before the year of such control period and ending August 31 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances referenced in the notice of data availability required under §97.511(b)(2)(ii) for the unit for such control period;

(ii) The Administrator will determine the sum of the positive differences determined under paragraph (b)(9)(i) of this section;

(iii) If the amount of unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances remaining in the Indian country new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (b)(9)(ii) of this section, then the Administrator will allocate the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined for each such CSAPR NO\textsubscript{X} Ozone Season Group 1 unit under paragraph (b)(9)(i) of this section; and

(iv) If the amount of unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances remaining in the Indian country new unit set-aside for the State for such control period is less than the sum under paragraph (b)(9)(ii) of this section, then the Administrator will allocate to each such CSAPR NO\textsubscript{X} Ozone Season Group 1 unit the amount of the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances determined under paragraph (b)(9)(i) of this section for the unit, multiplied by the amount of unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances remaining in the Indian country new unit set-aside for such control period, divided by the sum under paragraph (b)(9)(ii) of this section, and rounded to the nearest allowance.

(10) If, after completion of the procedures under paragraphs (b)(9) and (12) of this section for such control period, any unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances remain in the Indian country new unit set-aside for the State for such control period, the Administrator will:

(i) Transfer such unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances...
to the new unit set-aside for the State for such control period; or
(ii) If the State has a SIP revision approved under §52.38(b)(4) or (5) of this chapter covering such control period, include such unallocated CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the portion of the State NO\textsubscript{X} Ozone Season Group 1 trading budget that may be allocated for such control period in accordance with such SIP revision.

(11) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.511(b)(2)(iii), (iv), and (v), of the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated under paragraphs (b)(9), (10), and (12) of this section for such control period to each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit eligible for such allocation.

(12)(i) Notwithstanding the requirements of paragraphs (b)(2) through (11) of this section, if the calculations of allocations of an Indian country new unit set-aside for a control period in a given year under paragraph (b)(7) of this section, paragraphs (b)(6), (9)(iv), and (10) of this section would otherwise result in total allocations of such Indian country new unit set-aside exceeding the total amount of such Indian country new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, as follows. The Administrator will list the CSAPR NO\textsubscript{X} Ozone Season Group 1 units in descending order based on the amount of such units’ allocations under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, and, in cases of equal allocation amounts, in alphabetical order of the relevant source’s name and numerical order of the relevant unit’s identification number, and will reduce each unit’s allocation under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, by one CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance in the order in which the units are listed and will repeat this reduction process as necessary, until the total allocations of such Indian country new unit set-aside equal the total amount of such Indian country new unit set-aside.

(ii) Notwithstanding the requirements of paragraphs (b)(10) and (11) of this section, if the calculations of allocations of an Indian country new unit set-aside for a control period in a given year under paragraphs (b)(6), (9)(iii), and (10) of this section would otherwise result in a total allocations of such Indian country new unit set-aside less than the total amount of such Indian country new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (b)(10) of this section, as follows. The Administrator will list the CSAPR NO\textsubscript{X} Ozone Season Group 1 units in descending order based on the amount of such units’ allocations under paragraph (b)(10) of this section and, in cases of equal allocation amounts, in alphabetical order of the relevant source’s name and numerical order of the relevant unit’s identification number, and will increase each unit’s allocation under paragraph (b)(10) of this section by one CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance in the order in which the units are listed and will repeat this increase process as necessary, until the total allocations of such Indian country new unit set-aside equal the total amount of such Indian country new unit set-aside.

§97.513 Authorization of designated representative and alternate designated representative.

(a) Except as provided under §97.515, each CSAPR NO\textsubscript{X} Ozone Season Group 1 source, including all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source, shall have one and only one designated representative, with regard to all matters under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program.

(1) The designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source and shall act in accordance with the certification statement in §97.516(a)(4)(iii).
§ 97.514 Responsibilities of designated representative and alternate designated representative.

(a) Except as provided under §97.518 concerning delegation of authority to make submissions, each submission under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program shall be made, signed, and certified by the designated representative or alternate designated representative for each CSAPR NO\textsubscript{X} Ozone Season Group 1 source and CSAPR NO\textsubscript{X} Ozone Season Group 1 unit for which the submission is made. Each such submission shall include the following certification statement by the designated representative or alternate designated representative: “I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(b) The Administrator will accept or act on a submission made for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source or a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit only if the submission has been made, signed, and certified in accordance with paragraph (a) of this section and §97.518.
§ 97.515 Changing designated representative and alternate designated representative; changes in owners and operators; changes in units at the source.

(a) Changing designated representative. The designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.516. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new designated representative and the owners and operators of the CSAPR NO\textsubscript{X} Ozone Season Group 1 source and the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source.

(b) Changing alternate designated representative. The alternate designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.516. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate designated representative and the owners and operators of the CSAPR NO\textsubscript{X} Ozone Season Group 1 source and the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source.

(c) Changes in owners and operators. (1) In the event an owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 source or a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source is not included in the list of owners and operators in the certificate of representation under §97.516, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the designated representative and any alternate designated representative of the source or unit, and the decisions and orders of the Administrator, as if the owner or operator were included in such list.

(2) Within 30 days after any change in the owners and operators of a CSAPR NO\textsubscript{X} Ozone Season Group 1 source or a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source, including the addition or removal of an owner or operator, the designated representative or any alternate designated representative shall submit a revision to the certificate of representation under §97.516 amending the list of owners and operators to reflect the change.

(d) Changes in units at the source. Within 30 days after any change in which units are located at a CSAPR NO\textsubscript{X} Ozone Season Group 1 source (including the addition or removal of a unit), the designated representative or any alternate designated representative shall submit a certificate of representation under §97.516 amending the list of units to reflect the change.

(1) If the change is the addition of a unit that operated (other than for purposes of testing by the manufacturer before initial installation) before being located at the source, then the certificate of representation shall identify, in a format prescribed by the Administrator, the entity from whom the unit was purchased or otherwise obtained (including name, address, telephone number, and facsimile number (if any)), the date on which the unit was purchased or otherwise obtained, and the date on which the unit became located at the source.

(2) If the change is the removal of a unit, then the certificate of representation shall identify, in a format prescribed by the Administrator, the entity to which the unit was sold or that otherwise obtained the unit (including name, address, telephone number, and facsimile number (if any)), the date on which the unit was sold or otherwise obtained, and the date on which the unit became no longer located at the source.

§ 97.516 Certificate of representation.

(a) A complete certificate of representation for a designated representative or an alternate designated representative shall include the following elements in a format prescribed by the Administrator:

---

438
(1) Identification of the CSAPR NO\textsubscript{X} Ozone Season Group 1 source, and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source, for which the certificate of representation is submitted, including source name, source category and NAICS code (or, in the absence of a NAICS code, an equivalent code), State, plant code, county, latitude and longitude, unit identification number and type, identification number and nameplate capacity (in MWe, rounded to the nearest tenth) of each generator served by each such unit, actual or projected date of commencement of commercial operation, and a statement of whether such source is located in Indian country. If a projected date of commencement of commercial operation is provided, the actual date of commencement of commercial operation shall be provided when such information becomes available.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the designated representative and any alternate designated representative.

(3) A list of the owners and operators of the CSAPR NO\textsubscript{X} Ozone Season Group 1 source and of each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source.

(4) The following certification statements by the designated representative and any alternate designated representative—

(i) “I certify that I was selected as the designated representative or alternate designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source.”

(ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program on behalf of the owners and operators of the source and each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the source or unit.”

(iii) “Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit, or where a utility or industrial customer purchases power from a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘designated representative’ or ‘alternate designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit; and CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances and proceeds of transactions involving CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances by contract, CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances and proceeds of transactions involving CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances will be deemed to be held or distributed in accordance with the contract.”

(5) The signature of the designated representative and any alternate designated representative and the dates signed.

(b) Unless otherwise required by the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the Administrator. The Administrator shall not be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(c) A certificate of representation under this section that complies with the provisions of paragraph (a) of this section except that it contains the phrase “TR NO\textsubscript{X} Ozone Season” in place of the phrase “CSAPR NO\textsubscript{X} Ozone Season Group 1” in the required certification statements will be considered a complete certificate of representation under this section, and the certification statements included in such certificate of representation will be interpreted for purposes of this subpart as if the phrase “CSAPR NO\textsubscript{X} Ozone Season
§ 97.517 Objections concerning designated representative and alternate designated representative.

(a) Once a complete certificate of representation under §97.516 has been submitted and received, the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under §97.516 is received by the Administrator.

(b) Except as provided in paragraph (a) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of a designated representative or alternate designated representative shall affect any representation, action, inaction, or submission of the designated representative or alternate designated representative or the finality of any decision or order by the Administrator under the CSAPR NOX Ozone Season Group 1 Trading Program.

(c) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any designated representative or alternate designated representative, including private legal disputes concerning the proceeds of CSAPR NOX Ozone Season Group 1 allowance transfers.

§ 97.518 Delegation by designated representative and alternate designated representative.

(a) A designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(b) An alternate designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(c) In order to delegate authority to a natural person to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the designated representative or alternate designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such designated representative or alternate designated representative;

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to in this section as an “agent”);

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

(4) The following certification statements by such designated representative or alternate designated representative:

(i) “I agree that any electronic submission to the Administrator that is made by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a designated representative or alternate designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.518(d) shall be deemed to be an electronic submission by me.”

(ii) “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.518(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.518 is terminated.”

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the designated representative or alternate designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such designated representative or alternate
Environmental Protection Agency

§ 97.520 Establishment of compliance accounts, assurance accounts, and general accounts.

(a) Compliance accounts. Upon receipt of a complete certificate of representation under §97.516, the Administrator will establish a compliance account for the CSAPR NO\textsubscript{X} Ozone Season Group 1 source for which the certificate of representation was submitted, unless the source already has a compliance account. The designated representative and any alternate designated representative of the source shall be the authorized account representative and the alternate authorized account representative respectively of the compliance account.

(b) Assurance accounts. The Administrator will establish assurance accounts for certain owners and operators and States in accordance with §97.525(b)(3).

(c) General accounts—(i) Application for general account. (A) Any person may apply to open a general account, for the purpose of holding and transferring CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances, by submitting to the Administrator a complete application for a general account. Such application shall designate one and only one authorized account representative and may designate one and only one alternate authorized account representative who may act on behalf of the authorized account representative.

(B) The signature of the authorized account representative and any alternate authorized account representative shall be selected by an agreement binding on the persons who have an ownership interest with respect to CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account.

(ii) A complete application for a general account shall include the following elements in a format prescribed by the Administrator:

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the authorized account representative and any alternate authorized account representative;

(B) An identifying name for the general account;

(C) A list of all persons subject to a binding agreement for the authorized account representative and any alternate authorized account representative to represent their ownership interest with respect to the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account;

(D) The following certification statement by the authorized account representative and any alternate authorized account representative: "I certify that I was selected as the authorized account representative or the alternate authorized account representative, as applicable, by a binding agreement that is binding on all persons who have an ownership interest with respect to CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the general account."

(E) The signature of the authorized account representative and any alternate authorized account representative and the dates signed.
(iii) Unless otherwise required by the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the Administrator. The Administrator shall not be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(iv) An application for a general account under paragraph (c)(1) of this section that complies with the provisions of such paragraph except that it contains the phrase ‘‘TR NO\textsubscript{X} Ozone Season’’ in place of the phrase ‘‘CSAPR NO\textsubscript{X} Ozone Season Group 1’’ in the required certification statement will be considered a complete application for a general account under such paragraph, and the certification statement included in such application for a general account will be interpreted for purposes of this subpart as if the phrase ‘‘CSAPR NO\textsubscript{X} Ozone Season Group 1’’ appeared in place of the phrase ‘‘TR NO\textsubscript{X} Ozone Season’’.

(2) Authorization of authorized account representative and alternate authorized account representative. (i) Upon receipt by the Administrator of a complete application for a general account under paragraph (c)(1) of this section, the Administrator will establish a general account for the person or persons for whom the application is submitted, and upon and after such receipt by the Administrator:

(A) The authorized account representative of the general account shall be authorized and shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account in all matters pertaining to the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program, notwithstanding any agreement between the authorized account representative and such person.

(B) Any alternate authorized account representative shall be authorized, and any representation, action, inaction, or submission by any alternate authorized account representative shall be deemed to be a representation, action, inaction, or submission by the authorized account representative.

(C) Each person who has an ownership interest with respect to CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account shall be bound by any decision or order issued to the authorized account representative or alternate authorized account representative by the Administrator regarding the general account.

(ii) Except as provided in paragraph (c)(5) of this section concerning delegation of authority to make submissions, each submission concerning the general account shall be made, signed, and certified by the authorized account representative or any alternate authorized account representative for the persons having an ownership interest with respect to CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account. Each such submission shall include the following certification statement by the authorized account representative or any alternate authorized account representative: ‘‘I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.’’

(iii) Except in this section, whenever the term ‘‘authorized account representative’’ is used in this subpart, the term shall be construed to include the authorized account representative or any alternate authorized account representative.

(iv) A certification statement submitted in accordance with paragraph (c)(2)(ii) of this section that contains the phrase ‘‘TR NO\textsubscript{X} Ozone Season’’ will be interpreted for purposes of this subpart as if the phrase ‘‘CSAPR NO\textsubscript{X} Ozone Season’’.
§ 97.520  

Ozone Season Group 1” appeared in place of the phrase “TR NOX Ozone Season”.

(3) Changing authorized account representative and alternate authorized account representative; changes in persons with ownership interest.  (i) The authorized account representative of a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (c)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new authorized account representative and the persons with an ownership interest with respect to the CSAPR NOX Ozone Season Group 1 allowances in the general account.

(ii) The alternate authorized account representative of a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (c)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate authorized account representative, the authorized account representative, and the persons with an ownership interest with respect to the CSAPR NOX Ozone Season Group 1 allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CSAPR NOX Ozone Season Group 1 allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the authorized account representative and any alternate authorized account representative of the account, and the decisions and orders of the Administrator, as if the person were included in such list.

(B) Within 30 days after any change in the persons having an ownership interest with respect to NOX Ozone Season Group 1 allowances in the general account, including the addition or removal of a person, the authorized account representative or any alternate authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CSAPR NOX Ozone Season Group 1 allowances in the general account to include the change.

(4) Objections concerning authorized account representative and alternate authorized account representative.  (i) Once a complete application for a general account under paragraph (c)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (c)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (c)(4)(i) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative of a general account shall affect any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative or any alternate authorized account representative or the finality of any decision or order by the Administrator under the CSAPR NOX Ozone Season Group 1 Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative of a general account, including private legal disputes concerning the proceeds of CSAPR NOX Ozone Season Group 1 allowance transfers.

(5) Delegation by authorized account representative and alternate authorized account representative; disposing of NOX Ozone Season Group 1 allowances in a general account. 

(A) A person having an ownership interest with respect to CSAPR NOX Ozone Season Group 1 allowances in the general account may delegate all or any portion of such ownership interest to another person or persons who may dispose of such allowances in the manner specified by the delegating person. The delegating person will notify the Administrator of any such delegation.

(B) The Administrator will rely on a delegation as expressed in the general account and any dispositions in the manner specified by the delegating person unless and until a superseding delegation is received by the Administrator.
account representative. (i) An authorized account representative of a general account may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(ii) An alternate authorized account representative of a general account may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(iii) In order to delegate authority to a natural person to make an electronic submission to the Administrator in accordance with paragraph (c)(5)(i) or (ii) of this section, the authorized account representative or alternate authorized account representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such authorized account representative or alternate authorized account representative;

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to in this section as an ‘‘agent’’);

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (c)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such authorized account representative or alternate authorized account representative: ‘‘I agree that any electronic submission to the Administrator that is made by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am an authorized account representative or alternate authorized account representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.520(c)(5)(iv) shall be deemed to be an electronic submission by me.’’; and

(E) The following certification statement by such authorized account representative or alternate authorized account representative: ‘‘Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.520(c)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.520(c)(5) is terminated.’’.

(iv) A notice of delegation submitted under paragraph (c)(5)(iii) of this section shall be effective, with regard to the authorized account representative or alternate authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such authorized account representative or alternate authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (c)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (c)(5)(iv) of this section shall be deemed to be an electronic submission by the authorized account representative or alternate authorized account representative submitting such notice of delegation.

(6) Closing a general account. (i) The authorized account representative or alternate authorized account representative of a general account may submit to the Administrator a request to close the account. Such request shall include a correctly submitted CSAPR NOx Ozone Season Group 1 allowance transfer under §97.522 for any CSAPR NOx Ozone Season Group 1 allowances in the account to one or more other Allowance Management System accounts.

(ii) If a general account has no CSAPR NOx Ozone Season Group 1 allowance transfers to or from the account for a 12-month period or longer and does not contain any CSAPR NOx Ozone Season Group 1 allowances, the
Environmental Protection Agency

§ 97.521 Recordation of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance allocations and auction results.

(a) By November 7, 2011 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, March 26, 2015, the Administrator will record in each CSAPR NO\textsubscript{X} Ozone Season Group 1 source’s compliance account the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated to the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source in accordance with §97.511(a) for the control period in 2015.

(b) By November 7, 2011 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, March 26, 2015, the Administrator will record in each CSAPR NO\textsubscript{X} Ozone Season Group 1 source’s compliance account the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated to the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source in accordance with §97.511(a) for the control period in 2016, unless the State in which the source is located notifies the Administrator in writing by October 17, 2011 or, with regard to CSAPR NO\textsubscript{X} Ozone Season Group 1 units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, March 6, 2015 of the State’s intent to submit to the Administrator a complete SIP revision by April 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, October 1, 2015 meeting the requirements of §52.38(b)(3)(i) through (iv) of this chapter.

(1) If, by April 1, 2015 or, with regard to CSAPR NO\textsubscript{X} Ozone Season Group 1 units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, by October 1, 2015, the State does not submit to the Administrator such complete SIP revision, the Administrator will record by April 15, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, October 15, 2015 in each CSAPR NO\textsubscript{X} Ozone Season Group 1 source’s compliance account the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated to the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source in accordance with §97.511(a) for the control period in 2016.

(2) If the State submits to the Administrator by April 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, October 1, 2015, and the Administrator approves by October 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, April 1, 2016, such complete SIP revision, the Administrator will record by October 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, April 1, 2016 in each CSAPR NO\textsubscript{X} Ozone Season Group 1 source’s compliance account the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated to the CSAPR NO\textsubscript{X} Ozone Season Group 1 units at the source as provided in such approved, complete SIP revision for the control period in 2016.
§ 97.521

(3) If the State submits to the Administrator by April 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, October 1, 2015, and the Administrator does not approve by October 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, April 1, 2016, such complete SIP revision, the Administrator will record by October 1, 2015 or, with regard to units in Iowa, Michigan, Missouri, Oklahoma, and Wisconsin, April 1, 2016 in each CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source in accordance with §97.511(a) for the control period in 2016.

(c) By January 9, 2017, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source’s compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Ozone Season Group 1 allowances auctioned to CSAPR NOx Ozone Season Group 1 units, in accordance with §97.511(a), or with a SIP revision approved under §52.38(b)(4) or (5) of this chapter, for the control periods in 2017 and 2018.

(d) By July 1, 2017, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source’s compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Ozone Season Group 1 allowances auctioned to CSAPR NOx Ozone Season Group 1 units, in accordance with §97.511(a), or with a SIP revision approved under §52.38(b)(4) or (5) of this chapter, for the control periods in 2019 and 2020.

(e) By July 1, 2018, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source’s compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Ozone Season Group 1 allowances auctioned to CSAPR NOx Ozone Season Group 1 units, in accordance with §97.511(a), or with a SIP revision approved under §52.38(b)(4) or (5) of this chapter, for the control periods in 2021 and 2022.

(f) By July 1, 2019 and July 1 of each year thereafter, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source’s compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Ozone Season Group 1 allowances auctioned to CSAPR NOx Ozone Season Group 1 units, in accordance with §97.511(a), or with a SIP revision approved under §52.38(b)(4) or (5) of this chapter, for the control period in the fourth year after the year of the applicable recordation deadline under this paragraph.

(g) By August 1, 2015 and August 1 of each year thereafter, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source’s compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR NOx Ozone Season Group 1 allowances auctioned to CSAPR NOx Ozone Season Group 1 units, in accordance with §97.512(a)(2) through (8) and (12), or with a SIP revision approved under §52.38(b)(4) or (5) of this chapter, for the control period in the year of the applicable recordation deadline under this paragraph.

(h) By August 1, 2015 and August 1 of each year thereafter, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source’s compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source in accordance with §97.512(a)(2) through (8) and (12) for the control period in the year of the applicable recordation deadline under this paragraph.

(i) By November 15, 2015 and November 15, 2016, the Administrator will...
Environmental Protection Agency § 97.523

record in each CSAPR NOx Ozone Season Group 1 source's compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units. The Administrator will record in the CSAPR NOx Ozone Season Group 1 accounts the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source in accordance with §97.512(a)(9) through (12) for the control period in the year of the applicable recordation deadline under this paragraph.

(2) By February 15, 2018 and February 15 of each year thereafter, the Administrator will record in each CSAPR NOx Ozone Season Group 1 source's compliance account the CSAPR NOx Ozone Season Group 1 allowances allocated to the CSAPR NOx Ozone Season Group 1 units at the source in accordance with §97.512(a)(9) through (12) for the control period in the year before the year of the applicable recordation deadline under this paragraph.

§97.522 Submission of CSAPR NOx Ozone Season Group 1 allowance transfers.

(a) An authorized account representative seeking recordation of a CSAPR NOx Ozone Season Group 1 allowance transfer shall submit the transfer to the Administrator.

(b) A CSAPR NOx Ozone Season Group 1 allowance transfer shall be correctly submitted if:

(1) The transfer includes the following elements, in a format prescribed by the Administrator:

(i) The account numbers established by the Administrator for both the transferor and transferee accounts;

(ii) The serial number of each CSAPR NOx Ozone Season Group 1 allowance that is in the transferor account and is to be transferred; and

(iii) The name and signature of the authorized account representative of the transferor account and the date signed; and

(2) When the Administrator attempts to record the transfer, the transferor account includes each CSAPR NOx Ozone Season Group 1 allowance identified by serial number in the transfer.

§97.523 Recordation of CSAPR NOx Ozone Season Group 1 allowance transfers.

(a) Within 5 business days (except as provided in paragraph (b) of this section) of receiving a CSAPR NOx Ozone Season Group 1 allowance transfer that is correctly submitted under §97.522, the Administrator will record a CSAPR

VerDate Sep<11>2014 13:36 Oct 20, 2017 Jkt 241173 PO 00000 Frm 00457 Fmt 8010 Sfmt 8002 Y:\SGML\241173.XXX 241173nlaroche on DSK9F9SC42PROD with CFR
§ 97.524 Compliance with CSAPR \(\text{NO}_x\) Ozone Season Group 1 emissions limitation.

(a) Availability for deduction for compliance. CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances are available to be deducted for compliance with a source’s CSAPR \(\text{NO}_x\) Ozone Season Group 1 emissions limitation for a control period in a given year only if the CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances:

1. Were allocated or auctioned for such control period or a control period in a prior year; and
2. Are held in the source’s compliance account as of the allowance transfer deadline for such control period.

(b) Deductions for compliance. After the recordation, in accordance with §97.523, of CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowance transfers submitted by the allowance transfer deadline for a control period in a given year, the Administrator will deduct from each source’s compliance account CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances available under paragraph (a) of this section in order to determine whether the source meets the CSAPR \(\text{NO}_x\) Ozone Season Group 1 emissions limitation for such control period, as follows:

1. Until the amount of CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances deducted equals the number of tons of total \(\text{NO}_x\) emissions from all CSAPR \(\text{NO}_x\) Ozone Season Group 1 units at the source for such control period; or
2. If there are insufficient CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances to complete the deductions in paragraph (b)(1) of this section, until no more CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances available under paragraph (a) of this section remain in the compliance account.

(c)(1) Identification of CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances by serial number. The authorized account representative for a source’s compliance account may request that specific CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in a given year in accordance with paragraph (b) or (d) of this section. In order to be complete, such request shall be submitted to the Administrator by the allowance transfer deadline for such control period and include, in a format prescribed by the Administrator, the identification of the CSAPR \(\text{NO}_x\) Ozone Season Group 1 source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CSAPR \(\text{NO}_x\) Ozone Season Group 1 allowances under paragraph (b) or (d) of this section from the...
source’s compliance account in accordance with a complete request under paragraph (c)(1) of this section or, in the absence of such request or in the case of identification of an insufficient amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in such request, on a first-in, first-out accounting basis in the following order:

(i) Any CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that were recorded in the compliance account pursuant to §97.521 and not transferred out of the compliance account, in the order of recordation; and then

(ii) Any other CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that were transferred to and recorded in the compliance account pursuant to this subpart, in the order of recordation.

(d) Deductions for excess emissions. After making the deductions for compliance under paragraph (b) of this section for a control period in a year in which the CSAPR NO\textsubscript{X} Ozone Season Group 1 source has excess emissions, the Administrator will deduct from the source’s compliance account an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances, allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year, equal to two times the number of tons of the source’s excess emissions.

(e) Recordation of deductions. The Administrator will record in the appropriate compliance account all deductions from such an account under paragraphs (b) and (d) of this section.

[76 FR 48406, Aug. 8, 2011, as amended at 81 FR 74612, Oct. 26, 2016]

§ 97.525 Compliance with CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions.

(a) Availability for deduction. CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances are available to be deducted for compliance with the CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions for a control period in a given year by the owners and operators of a group of one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 sources and units in a State (and Indian country within the borders of such State) only if the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances:

1. Were allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year; and

2. Are held in the assurance account, established by the Administrator for such owners and operators of such group of CSAPR NO\textsubscript{X} Ozone Season Group 1 sources and units in such State (and Indian country within the borders of such State) under paragraph (b)(3) of this section, as of the deadline established in paragraph (b)(4) of this section.

(b) Deductions for compliance. The Administrator will deduct CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available under paragraph (a) of this section for compliance with the CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions for a State for a control period in a given year in accordance with the following procedures:

1. By June 1, 2018 and June 1 of each year thereafter, the Administrator will:

   (i) Calculate, for each State (and Indian country within the borders of such State), the total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in the State (and Indian country within the borders of such State) during the control period in the year before the year of this calculation deadline and the amount, if any, by which such total NO\textsubscript{X} emissions exceed the State assurance level as described in §97.506(c)(2)(iii); and

   (ii) Promulgate a notice of data availability of the results of the calculations required in paragraph (b)(1)(i) of this section, including separate calculations of the NO\textsubscript{X} emissions from each CSAPR NO\textsubscript{X} Ozone Season Group 1 source.

2. For each notice of data availability required in paragraph (b)(1)(ii) of this section and for any State (and Indian country within the borders of such State) identified in such notice as having CSAPR NO\textsubscript{X} Ozone Season Group 1 units with total NO\textsubscript{X} emissions exceeding the State assurance level for a control period in a given year, as described in §97.506(c)(2)(iii):

   (i) By July 1 immediately after the promulgation of such notice, the designated representative of each CSAPR

449
NO\textsubscript{X} Ozone Season Group 1 source in each such State (and Indian country within the borders of such State) shall submit a statement, in a format prescribed by the Administrator, providing for each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit (if any) at the source that operates during, but is not allocated an amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for, such control period, the unit’s allowable NO\textsubscript{X} emission rate for such control period and, if such rate is expressed in lb per mmBtu, the unit’s heat rate.

(ii) By August 1 immediately after the promulgation of such notice, the Administrator will calculate, for each such State (and Indian country within the borders of such State) and such control period and each common designated representative for such control period for a group of one or more CSAPR NO\textsubscript{X} Ozone Season Group 1 sources and units in the State (and Indian country within the borders of such State), the common designated representative’s share of the total NO\textsubscript{X} emissions from all CSAPR NO\textsubscript{X} Ozone Season Group 1 units at CSAPR NO\textsubscript{X} Ozone Season Group 1 sources in the State (and Indian country within the borders of such State), the common designated representative’s assurance level, and the amount (if any) of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that the owners and operators of such group of sources and units must hold in accordance with the calculation formula in §97.506(c)(2)(i) and will promulgate a notice of data availability of the results of these calculations.

(iii) The Administrator will provide an opportunity for submission of objections to the calculations referenced in paragraph (b)(2)(ii) of this section and the calculations referenced by the relevant notice of data availability required in paragraph (b)(1)(ii) of this section.

(A) Objections shall be submitted by the deadline specified in such notice and shall be limited to addressing whether the calculations referenced in the relevant notice required under paragraph (b)(1)(ii) of this section and referenced in the notice required under paragraph (b)(2)(ii) of this section are in accordance with §97.506(c)(2)(iii), §§97.506(b) and 97.530 through 97.535, the definitions of “common designated representative”, “common designated representative’s assurance level”, and “common designated representative’s share” in §97.502, and the calculation formula in §97.506(c)(2)(i).

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(iii)(A) of this section. By October 1 immediately after the promulgation of such notice, the Administrator will promulgate a notice of data availability of the calculations incorporating any adjustments that the Administrator determines to be necessary and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iii)(A) of this section.

(3) For any State (and Indian country within the borders of such State) referenced in each notice of data availability required in paragraph (b)(2)(iii)(B) of this section as having CSAPR NO\textsubscript{X} Ozone Season Group 1 units with total NO\textsubscript{X} emissions exceeding the State assurance level for a control period in a given year, the Administrator will establish one assurance account for each set of owners and operators referenced, in the notice of data availability required under paragraph (b)(2)(iii)(B) of this section, as all of the owners and operators of a group of CSAPR NO\textsubscript{X} Ozone Season Group 1 sources and units in the State (and Indian country within the borders of such State) having a common designated representative for such control period and as being required to hold CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances.

(4)(i) As midnight of November 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section, the owners and operators described in paragraph (b)(3) of this section shall hold in the assurance account established for them and for the appropriate CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section a total amount of CSAPR
NO\textsubscript{X} Ozone Season Group 1 allowances, available for deduction under paragraph (a) of this section, equal to the amount such owners and operators are required to hold with regard to such sources, units and State (and Indian country within the borders of such State) as calculated by the Administrator and referenced in such notice.

(ii) Notwithstanding the allowance-holding deadline specified in paragraph (b)(4)(i) of this section, if November 1 is not a business day, then such allowance-holding deadline shall be midnight of the first business day thereafter.

(5) After November 1 (or the date described in paragraph (b)(4)(ii) of this section) immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section and after the recordation, in accordance with §97.523, of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfers submitted by midnight of such date, the Administrator will determine whether the owners and operators described in paragraph (b)(3) of this section hold, in the assurance account for the appropriate CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) established under paragraph (b)(3) of this section, the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances available under paragraph (a) of this section that the owners and operators are required to hold with regard to such sources, units, and State (and Indian country within the borders of such State) as calculated by the Administrator and referenced in the notice required in paragraph (b)(2)(iii)(B) of this section.

(6) Notwithstanding any other provision of this subpart and any revision, made by or submitted to the Administrator after the promulgation of the notice of data availability required in paragraph (b)(2)(iii)(B) of this section for a control period in a given year, of any data used in making the calculations referenced in such notice, the amounts of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that the owners and operators are required to hold in accordance with §97.506(c)(2)(i) for such control period shall continue to be such amounts as calculated by the Administrator and referenced in such notice required in paragraph (b)(2)(iii)(B) of this section, except as follows:

(i) If any such data are revised by the Administrator as a result of a decision in or settlement of litigation concerning such data on appeal under part 78 of this chapter of such notice, or on appeal under section 307 of the Clean Air Act of a decision rendered under part 78 of this chapter on appeal of such notice, then the Administrator will use the data as so revised to recalculate the amounts of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that owners and operators are required to hold in accordance with §97.506(c)(2)(i) for such control period with regard to the CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) involved, provided that such litigation under part 78 of this chapter, or the proceeding under part 78 of this chapter that resulted in the decision appealed in such litigation under section 307 of the Clean Air Act, was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.

(ii) If any such data are revised by the owners and operators of a CSAPR NO\textsubscript{X} Ozone Season Group 1 source and CSAPR NO\textsubscript{X} Ozone Season Group 1 unit whose designated representative submitted such data under paragraph (b)(2)(i) of this section, as a result of a decision in or settlement of litigation concerning such submission, then the Administrator will use the data as so revised to recalculate the amounts of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that owners and operators are required to hold in accordance with the calculation formula in §97.506(c)(2)(i) for such control period with regard to the CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) involved, provided that such litigation was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.
(iii) If the revised data are used to recalculate, in accordance with paragraphs (b)(6)(i) and (ii) of this section, the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that the owners and operators are required to hold for such control period with regard to the CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) involved—

(A) Where the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances that the owners and operators are required to hold increases as a result of the use of all such revised data, the Administrator will establish a new, reasonable deadline on which the owners and operators shall hold the additional amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in the assurance account established by the Administrator for the appropriate CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section. The owners' and operators' failure to hold such additional amount, as required, before the new deadline shall not be a violation of the Clean Air Act. The owners' and operators' failure to hold such additional amount, as required, as of the new deadline shall be a violation of the Clean Air Act. Each CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance that the owners and operators fail to hold as required of the new deadline, and each day in such control period, shall be a separate violation of the Clean Air Act.

(B) For the owners and operators for which the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances required to be held decreases as a result of the use of all such revised data, the Administrator will record, in all accounts from which CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances were transferred by such owners and operators for such control period to the assurance account established by the Administrator for the appropriate CSAPR NO\textsubscript{X} Ozone Season Group 1 sources, CSAPR NO\textsubscript{X} Ozone Season Group 1 units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section, a total amount of the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances transferred to such assurance account from more than one account, the amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances recorded in each such transferor account shall be in proportion to the percentage of the total amount of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances transferred to such assurance account for such control period from such transferor account.

(C) Each CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance held under paragraph (b)(6)(iii)(A) of this section as a result of recalculation of requirements under the CSAPR NO\textsubscript{X} Ozone Season Group 1 assurance provisions for such control period must be a CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance allocated for a control period in a year before or the year immediately following, or in the same year as, the year of such control period.

§ 97.526 Banking.

(a) A CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance that is held in a compliance account or a general account will remain in such account unless and until the CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance is deducted or transferred under §97.511(c), §97.522, §97.524, §97.525, §97.527, or §97.528 or removed under paragraph (c) of this section.

(c) Replacement of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances with CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances. Notwithstanding any other provision of this subpart or any provision of a SIP revision approved under §52.38(b)(4) or (5) of this chapter, the Administrator will remove CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances from compliance accounts and general accounts and allocate in their place amounts of
CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances as provided in paragraphs (c)(1) through (5) of this section and will record CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances in lieu of initially recording CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances as provided in paragraph (c)(6) of this section.

(1) As soon as practicable after the completion of deductions under §97.524 for the control period in 2016, but not later than March 1, 2018, the Administrator will temporarily suspend acceptance of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfers submitted under §97.522 and, before resuming acceptance of such transfers, will take the following actions with regard to every general account and every compliance account except a compliance account for a CSAPR NO\textsubscript{X} Ozone Season Group 1 source located in a State listed in §52.38(b)(2)(i) of this chapter or Indian country within the borders of such a State:

(i) The Administrator will remove all CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances allocated for the control periods in 2015 and 2016 from each such account.

(ii) The Administrator will determine a conversion factor equal to the greater of 1.0000 or the quotient, expressed to four decimal places, of the sum of all CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances removed from all such accounts under paragraph (c)(1)(i) of this section divided by the product of 1.5 times the sum of the variability limits for the control period in 2017 set forth in §97.810(b) for all States except a State listed in §52.38(b)(2)(i) of this chapter.

(iii) The Administrator will allocate to and record in each such account an amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances for the control period in 2017, where such amount is determined as the quotient of the number of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances removed from such account under paragraph (c)(1)(i) of this section divided by the conversion factor determined under paragraph (c)(1)(ii) of this section, rounded up to the nearest whole allowance, except as provided in paragraphs (c)(4) and (5) of this section.

(2) As soon as practicable after approval of a SIP revision under §52.38(b)(6) of this chapter for a State listed in §52.38(b)(2)(i) of this chapter, but not later than the allowance transfer deadline defined under §97.802 for the initial control period described with regard to such SIP revision in §52.38(b)(6)(i)(A) of this chapter, the Administrator will temporarily suspend acceptance of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowance transfers submitted under §97.522 and, before resuming acceptance of such transfers, will take the following actions with regard to every general account and every compliance account, unless otherwise provided in such approval of the SIP revision:

(i) The Administrator will remove from each such account all CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for such initial control period and each subsequent control period that were allocated to units located in such State under this subpart or that were allocated or auctioned to any entity under a SIP revision for such State approved by the Administrator under §52.38(b)(4) or (5) of this chapter, whether such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances were initially recorded in such account or were transferred to such account from another account.

(ii) The Administrator will determine a conversion factor equal to the greater of 1.0000 or the quotient, expressed to four decimal places, of the NO\textsubscript{X} Ozone Season Group 1 trading budget set forth for such State in §97.510(a) divided by the NO\textsubscript{X} Ozone Season Group 2 trading budget set forth for such State in §97.810(a).

(iii) The Administrator will allocate to and record in each such account an amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances for the control period in 2017, where such amount is determined as the quotient of the number of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances removed from such account under paragraph (c)(2)(i) of this section divided by the conversion factor determined under paragraph (c)(2)(ii) of this section, rounded up to the nearest whole allowance, except as provided in paragraphs (c)(4) and (5) of this section.
(3) As soon as practicable after approval of a SIP revision under § 52.38(b)(6) of this chapter for a State listed in § 52.38(b)(2)(i) of this chapter, but not before the completion of deductions under § 97.524 for the control period before the initial control period described with regard to such SIP revision in § 52.38(b)(6)(ii)(A) of this chapter and not later than the allowance transfer deadline defined under § 97.802 for such initial control period, the Administrator will temporarily suspend acceptance of CSAPR NOₓ Ozone Season Group 1 allowance transfers submitted under § 97.522 and, before resuming acceptance of such transfers, will take the following actions with regard to every compliance account for a CSAPR NOₓ Ozone Season Group 1 source located in such State, provided that if the provisions of § 52.38(b)(6) of this chapter or a SIP revision approved under § 52.38(b)(5) of this chapter will no longer apply to any source in any State or Indian country within the borders of any State with regard to emissions occurring in such initial control period or any subsequent control period, the Administrator instead will permanently end acceptance of CSAPR NOₓ Ozone Season Group 1 allowances removed from under § 97.522 and will take the following actions with regard to every general account and every compliance account:

(i) The Administrator will remove from each such account all CSAPR NOₓ Ozone Season Group 1 allowances allocated for all control periods before such initial control period.

(ii) The Administrator will determine a conversion factor equal to the greater of 1.0000 or the quotient, expressed to four decimal places, of the sum of all CSAPR NOₓ Ozone Season Group 1 allowances removed from under § 97.522 and will take the following actions with regard to every general account:

(iii) The Administrator will allocate to and record in each such account an amount of CSAPR NOₓ Ozone Season Group 2 allowances for the control periods and in the amounts determined in accordance with paragraph (c)(1)(i), (c)(2)(i), or (c)(3)(i) of this section, respectively, provided that the designated representative for such source identifies such other account in a submission to the Administrator and further provided that any compliance account identified in such a submission is for a source located in a State listed in § 52.38(b)(2)(iii) of this chapter or Indian country within the borders of such a State.

(4) Where, pursuant to paragraph (c)(3)(i) of this section, the Administrator removes CSAPR NOₓ Ozone Season Group 1 allowances from the compliance account for a source located in a State not listed in § 52.38(b)(2)(iii) of this chapter or Indian country within the borders of such a State, the Administrator will not record CSAPR NOₓ Ozone Season Group 2 allowances in that account but instead will allocate to and record in another compliance account or general account CSAPR NOₓ Ozone Season Group 2 allowances for the control periods and in the amounts determined in accordance with paragraph (c)(1)(ii), (c)(2)(ii), or (c)(3)(ii) of this section, respectively, provided that the designated representative for such source identifies such other account in a submission to the Administrator and further provided that any compliance account identified in such a submission is for a source located in a State listed in § 52.38(b)(2)(iii) of this chapter or Indian country within the borders of such a State.

(5)(i) In computing any amounts of CSAPR NOₓ Ozone Season Group 2 allowances to be allocated to and recorded in general accounts under paragraphs (c)(1)(iii), (c)(2)(iii), or (c)(3)(iii) of this section, the Administrator may group multiple general accounts whose ownership interests are held by the same or related persons or entities and treat the group of accounts as a single account for purposes of such computation.

(ii) Following a computation for a group of general accounts in accordance with paragraph (c)(5)(i) of this section, the Administrator will allocate to and record in each individual account in such group a proportional share of the quantity of CSAPR NOₓ Ozone Season Group 2 allowances computed for such group, basing such shares on the respective quantities of CSAPR NOₓ Ozone Season Group 1 allowances removed from such individual
accounts under paragraph (c)(1)(i), (c)(2)(i), or (c)(3)(i) of this section, as applicable.

(iii) In determining the proportional shares under paragraph (c)(5)(ii) of this section, the Administrator may employ any reasonable adjustment methodology to truncate or round each such share up or down to a whole number and to cause the total of such whole numbers to equal the amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances computed for such group of accounts in accordance with paragraph (c)(5)(i) of this section, even where such adjustments cause the numbers of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances allocated to some individual accounts to equal zero.

(6) After the Administrator has carried out the procedures set forth in paragraph (c)(1), (2), or (3) of this section, upon any determination that would otherwise result in the initial recordation of any CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances in any account, where if such allowances had been recorded before the Administrator had carried out such procedures the allowances would have been removed from such account under paragraph (c)(1)(i), (c)(2)(i), or (c)(3)(i) of this section, respectively, the Administrator will not record such CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances but instead will record CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances for the control periods and in the amounts determined in accordance with paragraph (c)(1)(iii), (c)(2)(iii), or (c)(3)(iii) of this section, respectively, in such account or another account identified in accordance with paragraph (c)(4) of this section.

(7) Notwithstanding any other provision of this subpart or subpart EEEEE of this part, CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances may be used to satisfy requirements to hold CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances under this subpart as follows, provided that nothing in this paragraph alters the time as of which any such allowance holding requirement must be met or limits any consequence of a failure to timely meet any such allowance holding requirement:

(i) After the Administrator has carried out the procedures set forth in paragraph (c)(1) of this section, the owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit in a State listed in §52.38(b)(2)(iii) of this chapter or Indian country within the borders of such a State may satisfy a requirement to hold a given number of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for the control period in 2015 or 2016 by holding instead, in a general account established for this sole purpose, an amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances for the control period in 2017, such amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances is computed as the quotient of such given number of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances divided by the conversion factor determined under paragraph (c)(1)(ii) of this section, rounded up to the nearest whole allowance.

(ii) After the Administrator has carried out the procedures set forth in paragraph (c)(3) of this section, the owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit in a State listed in §52.38(b)(2)(i) of this chapter may satisfy a requirement to hold a given number of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances for a control period before the initial control period described with regard to the State’s SIP revision in §52.38(b)(6)(ii)(A) of this chapter by holding instead, in a general account established for this sole purpose, an amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances for such initial control period or any previous control period, where such amount of CSAPR NO\textsubscript{X} Ozone Season Group 2 allowances is computed as the quotient of such given number of CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances divided by the conversion factor determined under paragraph (c)(3)(ii) of this section, rounded up to the nearest whole allowance.

[76 FR 48406, Aug. 8, 2011, as amended at 81 FR 74612, Oct. 26, 2016]

§ 97.527 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any Allowance Management System account. Within 10 business days of making such
correction, the Administrator will notify the authorized account representative for the account.

§ 97.528 Administrator’s action on submissions.

(a) The Administrator may review and conduct independent audits concerning any submission under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program and make appropriate adjustments of the information in the submission.

(b) The Administrator may deduct CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances from or transfer CSAPR NO\textsubscript{X} Ozone Season Group 1 allowances to a compliance account or an assurance account, based on the information in a submission, as adjusted under paragraph (a) of this section, and record such deductions and transfers.

§ 97.529 [Reserved]

§ 97.530 General monitoring, recordkeeping, and reporting requirements.

The owners and operators, and to the extent applicable, the designated representative, of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit, shall comply with the monitoring, recordkeeping, and reporting requirements as a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall:

1. Install all monitoring systems required under this subpart for monitoring NO\textsubscript{X} mass emissions and individual unit heat input (including all systems required to monitor NO\textsubscript{X} emission rate, NO\textsubscript{X} concentration, stack gas moisture content, stack gas flow rate, CO\textsubscript{2} or O\textsubscript{2} concentration, and fuel flow rate, as applicable, in accordance with §§75.71 and 75.72 of this chapter); and

2. Successfully complete all certification tests required under §97.531 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section.

3. Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the latest of the following dates and shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the latest of the following dates:

1. May 1, 2015;

2. 180 calendar days after the date on which the unit commences commercial operation; or

3. Where data for the unit are reported on a control period basis under §97.534(d)(1)(ii)(B), and where the compliance date under paragraph (b)(2) of this section is not in a month from May through September, May 1 immediately after the compliance date under paragraph (b)(2) of this section.

4. The owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit for which construction of a new stack or flue or installation of add-on NO\textsubscript{X} emission controls is completed after the applicable deadline under paragraph (b)(1), (2), or (3) of this section shall
meet the requirements of §75.4(e)(1) through (4) of this chapter, except that:

(i) Such requirements shall apply to the monitoring systems required under §97.530 through §97.535, rather than the monitoring systems required under part 75 of this chapter;

(ii) NO\textsubscript{X} emission rate, NO\textsubscript{X} concentration, stack gas moisture content, stack gas volumetric flow rate, and \textsubscript{O}\textsubscript{2} or \textsubscript{CO}\textsubscript{2} concentration data shall be determined and reported, rather than the data listed in §75.4(e)(2) of this chapter; and

(iii) Any petition for another procedure under §75.4(e)(2) of this chapter shall be submitted under §97.535, rather than §75.66 of this chapter.

(c) Reporting data. The owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NO\textsubscript{X} concentration, NO\textsubscript{X} emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NO\textsubscript{X} mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter, section 2.4 of appendix D to part 75 of this chapter, or section 2.5 of appendix E to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §97.535.

(2) No owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall operate the unit so as to discharge, or allow to be discharged, NO\textsubscript{X} to the atmosphere without accounting for all such NO\textsubscript{X} in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(3) No owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NO\textsubscript{X} mass discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this subpart and part 75 of this chapter.

(4) No owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this subpart, except under any one of the following circumstances:

(i) During the period that the unit is covered by an exemption under §97.505 that is in effect;

(ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this subpart and part 75 of this chapter, by the Administrator for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system;

(iii) The designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with §97.531(d)(3)(i).

(e) Long-term cold storage. The owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit is subject to the applicable provisions of §75.4(d) of this chapter concerning units in long-term cold storage.

§ 97.531 40 CFR Ch. I (7–1–17 Edition)

(1) The monitoring system has been previously certified in accordance with part 75 of this chapter; and

(2) The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendices B, D, and E to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under §97.530(a)(1) that is exempt from initial certification requirements under paragraph (a) of this section.

(c) If the Administrator has previously approved a petition under §75.17(a) or (b) of this chapter for apportioning the NO\textsubscript{X} emission rate measured in a common stack or a petition under §75.66 of this chapter for an alternative to a requirement in §75.12 or §75.17 of this chapter, the designated representative shall resubmit the petition to the Administrator under §97.535 to determine whether the approval applies under the CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program.

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendices D and E to part 75 of this chapter) under §97.530(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the procedures in paragraph (e) or (f) of this section respectively.

(1) Requirements for initial certification. The owner or operator shall ensure that each continuous monitoring system under §97.530(a)(1) (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §97.530(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §97.530(a)(1) that may significantly affect the ability of the system to accurately measure or record NO\textsubscript{X} mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system, and any excepted NO\textsubscript{X} monitoring system under appendix E to part 75 of this chapter under §97.530(a)(1) are subject to the recertification requirements in §75.20(g)(6) of this chapter.

(3) Approval process for initial certification and recertification. For initial certification of a continuous monitoring system under §97.530(a)(1), paragraphs (d)(3)(i) through (v) of this section apply. For recertifications of such monitoring systems, paragraphs (d)(3)(i) through (iv) of this section and the procedures in §75.20(b)(5) and (g)(7) of this chapter (in lieu of the procedures in paragraph (d)(3)(v) of this section) apply, provided that in applying paragraphs (d)(3)(i) through (iv) of this section, the words “certification” and
“initial certification” are replaced by the word “recertification” and the word “certified” is replaced by with the word “recertified”.

(i) **Notification of certification.** The designated representative shall submit to the appropriate EPA Regional Office and the Administrator written notice of the dates of certification testing, in accordance with §97.533.

(ii) **Certification application.** The designated representative shall submit to the Administrator a certification application for each monitoring system. A complete certification application shall include the information specified in §75.63 of this chapter.

(iii) **Provisional certification date.** The provisional certification date for a monitoring system shall be determined in accordance with §75.20(a)(3) of this chapter. A provisionally certified monitoring system may be used under the CSAPR NOX Ozone Season Group 1 Trading Program for a period not to exceed 120 days after receipt by the Administrator of the complete certification application for the monitoring system under paragraph (d)(3)(ii) of this section. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of part 75 of this chapter, will be considered valid quality-assured data (retroactive to the date and hour of provisional certification) provided that the Administrator does not invalidate the provisional certification by issuing a notice of disapproval within 120 days of the date of receipt of the complete certification application by the Administrator.

(iv) **Certification application approval process.** The Administrator will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CSAPR NOX Ozone Season Group 1 Trading Program.

(A) **Approval notice.** If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a written notice of approval of the certification application within 120 days of receipt.

(B) **Incomplete application notice.** If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by which the designated representative must submit the additional information required to complete the certification application. If the designated representative does not comply with the notice of incompleteness by the specified date, then the Administrator may issue a notice of disapproval under paragraph (d)(3)(iv)(C) of this section.

(C) **Disapproval notice.** If the certification application shows that any monitoring system does not meet the performance requirements of part 75 of this chapter or if the certification application is incomplete and the requirement for disapproval under paragraph (d)(3)(iv)(B) of this section is met, then the Administrator will issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the Administrator and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under §75.20(a)(3) of this chapter).

(D) **Audit decertification.** The Administrator may issue a notice of disapproval of the certification status of a monitor in accordance with §97.532(b).

(v) **Procedures for loss of certification.** If the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section or a notice of disapproval of certification status under paragraph (d)(3)(iv)(D) of this section, then:

(A) The owner or operator shall substitute the following values, for each disapproved monitoring system, for
§ 97.532 Monitoring system out-of-control periods.

(a) General provisions. Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in subpart D or subpart H of, or appendix D or appendix E to, part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §97.531 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the Administrator or any State or permitting authority. By issuing the notice of disapproval, the Administrator revokes prospectively the certification status of such monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time of the notification.

(c) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(d) The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under §75.19 of this chapter shall meet the applicable certification and recertification requirements in §§75.19(a)(2) and 75.20(b) of this chapter. If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in §75.20(g) of this chapter.

(f) The designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the Administrator under subpart E of part 75 of this chapter shall comply with the applicable notification and application procedures of §75.20(f) of this chapter.

time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in §97.531 for each disapproved monitoring system.

§ 97.533 Notifications concerning monitoring.

The designated representative of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall submit written notice to the Administrator in accordance with §75.61 of this chapter.

§ 97.534 Recordkeeping and reporting.

(a) General provisions. The designated representative shall comply with all recordkeeping and reporting requirements in paragraphs (b) through (e) of this section, the applicable recordkeeping and reporting requirements under §75.73 of this chapter, and the requirements of §97.514(a).

(b) Monitoring plans. The owner or operator of a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit shall comply with the requirements of §75.73(c) and (e) of this chapter.

(c) Certification applications. The designated representative shall submit an application to the Administrator within 45 days after completing all initial certification or recertification tests required under §97.531, including the information required under §75.60 of this chapter.

(d) Quarterly reports. The designated representative shall submit quarterly reports, as follows:

(i) If a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit is subject to the Acid Rain Program or the CSAPR NO\textsubscript{X} Annual Trading Program or if the owner or operator of such unit chooses to report on an annual basis under this subpart, then the designated representative shall meet the requirements of subpart H of part 75 of this chapter (concerning monitoring of NO\textsubscript{X} mass emissions) for such unit for the entire year and report the NO\textsubscript{X} mass emissions data and heat input data for such unit for the entire year in accordance with paragraph (d)(1)(i) of this section; or

(ii) If a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit is not subject to the Acid Rain Program or the CSAPR NO\textsubscript{X} Annual Trading Program, then the designated representative shall either:

(A) Meet the requirements of subpart H of part 75 of this chapter for such unit for the entire year and report the NO\textsubscript{X} mass emissions data and heat input data for such unit for the entire year in accordance with paragraph (d)(1)(i) of this section; or

(B) Meet the requirements of subpart H of part 75 of this chapter (including the requirements in §75.74(c) of this chapter) for such unit for the control period and report the NO\textsubscript{X} mass emissions data and heat input data (including the data described in §75.74(c)(6) of this chapter) for such unit only for the control period of each year.

(2) The designated representative shall report the NO\textsubscript{X} mass emissions data and heat input data for a CSAPR NO\textsubscript{X} Ozone Season Group 1 unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter indicated under paragraph (d)(1) of this section beginning by the latest of:

(i) The calendar quarter covering May 1, 2015 through June 30, 2015;

(ii) The calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §97.530(b); or

(iii) For a unit that reports on a control period basis under paragraph (d)(1)(ii)(B) of this section, if the calendar quarter under paragraph (d)(1)(ii) of this section does not include a month from May through September, the calendar quarter covering May 1 through June 30 immediately after the calendar quarter under paragraph (d)(2)(ii) of this section.

(3) The designated representative shall submit each quarterly report to the Administrator within 30 days after the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.73(f) of this chapter.

(4) For CSAPR NO\textsubscript{X} Ozone Season Group 1 units that are also subject to the Acid Rain Program, CSAPR NO\textsubscript{X} Annual Trading Program, CSAPR SO\textsubscript{2} Group 1 Trading Program, or CSAPR SO\textsubscript{2} Group 2 Trading Program, quarterly reports shall include the applicable data and information required by
subparts F through H of part 75 of this chapter as applicable, in addition to the NOx mass emission data, heat input data, and other information required by this subpart.

(5) The Administrator may review and conduct independent audits of any quarterly report in order to determine whether the quarterly report meets the requirements of this subpart and part 75 of this chapter, including the requirement to use substitute data.

(i) The Administrator will notify the designated representative of any determination that the quarterly report fails to meet any such requirements and specify in such notification any corrections that the Administrator believes are necessary to make through resubmission of the quarterly report and a reasonable time period within which the designated representative must respond. Upon request by the designated representative, the Administrator may specify reasonable extensions of such time period specified by the Administrator, the designated representative shall resubmit the quarterly report with the corrections specified by the Administrator, except to the extent the designated representative provides information demonstrating that a specified correction is not necessary because the quarterly report already meets the requirements of this subpart and part 75 of this chapter that are relevant to the specified correction.

(ii) Any resubmission of a quarterly report shall meet the requirements applicable to the submission of a quarterly report under this subpart and part 75 of this chapter, except for the deadline set forth in paragraph (d)(3) of this section.

(e) **Compliance certification.** The designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit’s emissions are correctly and fully monitored. The certification shall state that:

(1) The monitoring data submitted were recorded in accordance with the applicable requirements of this subpart and part 75 of this chapter, including the quality assurance procedures and specifications;

(2) For a unit with add-on NOx emission controls and for all hours where NOx data are substituted in accordance with §75.34(a)(1) of this chapter, the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to part 75 of this chapter and the substitute data values do not systematically underestimate NOx emissions; and

(3) For a unit that is reporting on a control period basis under paragraph (d)(1)(ii)(B) of this section, the NOx emission rate and NOx concentration values substituted for missing data under subpart D of part 75 of this chapter are calculated using only values from a control period and do not systematically underestimate NOx emissions.

§ 97.535 **Petitions for alternatives to monitoring, recordkeeping, or reporting requirements.**

(a) The designated representative of a CSAPR NOx Ozone Season Group 1 unit may submit a petition under §75.66 of this chapter to the Administrator, requesting approval to apply an alternative to any requirement of §§97.530 through 97.534.

(b) A petition submitted under paragraph (a) of this section shall include sufficient information for the evaluation of the petition, including, at a minimum, the following information:

(1) Identification of each unit and source covered by the petition;

(2) A detailed explanation of why the proposed alternative is being suggested in lieu of the requirement;

(3) A description and diagram of any equipment and procedures used in the proposed alternative;

(4) A demonstration that the proposed alternative is consistent with the purposes of the requirement for which the alternative is proposed and with the purposes of this subpart and part 75
§ 97.602 Definitions.

The terms used in this subpart shall have the meanings set forth in this section as follows, provided that any term that includes the acronym “CSAPR” shall be considered synonymous with a term that is used in a SIP revision approved by the Administrator under §52.38 or §52.39 of this chapter and that is substantively identical except for the inclusion of the acronym “TR” in place of the acronym “CSAPR”:

Acid Rain Program means a multi-state SO\(_2\) and NO\(_x\) air pollution control and emission reduction program established by the Administrator under title IV of the Clean Air Act and parts 72 through 78 of this chapter.

Administrator means the Administrator of the United States Environmental Protection Agency or the Director of the Clean Air Markets Division (or its successor determined by the Administrator) of the United States Environmental Protection Agency, the Administrator’s duly authorized representative under this subpart.

Allocate or allocation means, with regard to CSAPR SO\(_2\) Group 1 allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under §52.39(d), (e), or (f) of this chapter, of the amount of such CSAPR SO\(_2\) Group 1 allowances to be initially credited, at no cost to the recipient, to:

(1) A CSAPR SO\(_2\) Group 1 unit;
(2) A new unit set-aside;
(3) An Indian country new unit set-aside; or
(4) An entity not listed in paragraphs (1) through (3) of this definition;

Provided that, if the Administrator, State, or permitting authority initially credits, to a CSAPR SO\(_2\) Group 1 unit qualifying for an initial credit, a credit in the amount of zero CSAPR SO\(_2\) Group 1 allowances, the CSAPR SO\(_2\) Group 1 unit will be treated as being allocated an amount (i.e., zero) of CSAPR SO\(_2\) Group 1 allowances.

Allowable SO\(_2\) emission rate means, for a unit, the most stringent State or federal SO\(_2\) emission rate limit (in lb/MWh or, if in lb/mmBtu, converted to lb/MWh by multiplying it by the unit’s heat rate in mmBtu/MWh) that is applicable to the unit and covers the longest averaging period not exceeding one year.

Allowance Management System means the system by which the Administrator records allocations, auctions, transfers, and deductions of CSAPR SO\(_2\) Group 1 allowances under the CSAPR SO\(_2\) Group 1 Trading Program. Such allowances are allocated, auctioned, recorded, held, transferred, or deducted only as whole allowances.

Allowance Management System account means an account in the Allowance Management System established by...
§ 97.602  the Administrator for purposes of re-
cording the allocation, auction, hold-
ing, transfer, or deduction of CSAPR 
SO\textsubscript{2} Group 1 allowances.

*Allowance transfer deadline* means, for 
a control period in a given year, mid-
night of March 1 (if it is a business 
day), or midnight of the first business 
day thereafter (if March 1 is not a busi-
ness day), immediately after such con-
trol period and is the deadline by which 
a CSAPR SO\textsubscript{2} Group 1 allowance trans-
fer must be submitted for recordation 
in a CSAPR SO\textsubscript{2} Group 1 source’s com-
pliance account in order to be available 
for use in complying with the source’s 
CSAPR SO\textsubscript{2} Group 1 emissions limita-
tion for such control period in accord-
ance with §§97.606 and 97.624.

*Alternate designated representative* 
means, for a CSAPR SO\textsubscript{2} Group 1 
source and each CSAPR SO\textsubscript{2} Group 1 
unit at the source, the natural person 
who is authorized by the owners and 
operators of the source and all such 
units at the source, in accordance with 
this subpart, to act on behalf of the 
designated representative in matters 
pertaining to the CSAPR SO\textsubscript{2} Group 1 
Trading Program. If the CSAPR SO\textsubscript{2} 
Group 1 source is also subject to the 
Acid Rain Program, CSAPR NO\textsubscript{X} An-
nual Trading Program, CSAPR NO\textsubscript{X} 
Ozone Season Group 1 Trading Pro-
gram, or CSAPR NO\textsubscript{X} Ozone Season 
Group 2 Trading Program, then this 
natural person shall be the same nat-
ural person as the alternate designated 
representative as defined in the respec-
tive program.

*Assurance account* means an Allow-
ance Management System account, es-
ablished by the Administrator under 
§97.625(b)(3) for certain owners and op-
erators of a group of one or more 
CSAPR SO\textsubscript{2} Group 1 sources and units 
in a given State (and Indian country 
within the borders of such State), in 
which are held CSAPR SO\textsubscript{2} Group 1 al-
lowances available for use for a control 
period in a given year in complying 
with the CSAPR SO\textsubscript{2} Group 1 assurance 
provisions in accordance with §§97.606 
and 97.625.

*Auction* means, with regard to 
CSAPR SO\textsubscript{2} Group 1 allowances, the 
sale to any person by a State or per-
mitting authority, in accordance with 
a SIP revision submitted by the State 
and approved by the Administrator 
under §52.39(e) or (l) of this chapter, of 
such CSAPR SO\textsubscript{2} Group 1 allowances to 
be initially recorded in an Allowance 
Management System account.

*Authorized account representative* 
means, for a general account, the nat-
ural person who is authorized, in ac-
cordance with this subpart, to transfer 
and otherwise dispose of CSAPR SO\textsubscript{2} 
Group 1 allowances held in the general 
account and, for a CSAPR SO\textsubscript{2} Group 1 
source’s compliance account, the des-
ignated representative of the source.

*Automated data acquisition and han-
dling system* or DAHS means the compo-
nent of the continuous emission moni-
toring system, or other emissions mon-
itoring system approved for use under 
this subpart, designed to interpret and 
convert individual output signals from 
pollutant concentration monitors, flow 
monitors, diluent gas monitors, and 
other component parts of the moni-
toring system to produce a continuous 
record of the measured parameters in 
the measurement units required by 
this subpart.

*Biomass* means—
(1) Any organic material grown for 
the purpose of being converted to en-
ergy;
(2) Any organic byproduct of agri-
culture that can be converted into en-
ergy; or
(3) Any material that can be con-
verted into energy and is nonmerchant-
able for other purposes, that is seg-
regated from other material that is 
nonmerchantable for other purposes, 
and that is;
   (i) A forest-related organic resource, 
      including mill residues, precommercial 
      thinnings, slash, brush, or byproduct 
      from conversion of trees to merchant-
      able material; or
   (ii) A wood material, including pal-
      lets, crates, dunnage, manufacturing 
      and construction materials (other than 
      pressure-treated, chemically-treated, 
      or painted wood products), and land-
      scape or right-of-way tree trimmings.

*Boiler* means an enclosed fossil- or 
other-fuel-fired combustion device used 
to produce heat and to transfer heat to 
recirculating water, steam, or other 
medium.

*Bottoming-cycle unit* means a unit in 
which the energy input to the unit is
first used to produce useful thermal energy, where at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

Business day means a day that does not fall on a weekend or a federal holiday.

Certifying official means a natural person who is:
(1) For a corporation, a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function or any other person who performs similar policy- or decision-making functions for the corporation;
(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or
(3) For a local government entity or State, federal, or other public agency, a principal executive officer or ranking elected official.

Clean Air Act means the Clean Air Act, 42 U.S.C. 7401, et seq.

Coal means “coal” as defined in §72.2 of this chapter.

Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.

Cogeneration system means an integrated group, at a source, of equipment (including a boiler, or combustion turbine, and a generator) designed to produce useful thermal energy for industrial, commercial, heating, or cooling purposes and electricity through the sequential use of energy.

Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a topping-cycle unit or a bottoming-cycle unit:
(1) Operating as part of a cogeneration system; and
(2) Producing on an annual average basis—
(A) Useful thermal energy not less than 5 percent of total energy output; and
(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.

(ii) For a bottoming-cycle unit, useful power not less than 45 percent of total energy input;

(3) Provided that the requirements in paragraph (2) of this definition shall not apply to a calendar year referenced in paragraph (2) of this definition during which the unit did not operate at all;

(4) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit’s total energy input from all fuel, except biomass if the unit is a boiler; and

(5) Provided that, if, throughout its operation during the 12-month period or a calendar year referenced in paragraph (2) of this definition, a unit is operated as part of a cogeneration system and the cogeneration system meets on a system-wide basis the requirement in paragraph (2)(i)(B) or (2)(ii) of this definition, the unit shall be deemed to meet such requirement during that 12-month period or calendar year.

Combustion turbine means an enclosed device comprising:
(1) If the device is simple cycle, a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and
(2) If the device is combined cycle, the equipment described in paragraph (1) of this definition and any associated duct burner, heat recovery steam generator, and steam turbine.

Commence commercial operation means, with regard to a unit:
(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.605.

(i) For a unit that is a CSAPR SO:\ Group I unit under §97.604 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that subsequently undergoes a physical change or is moved to a new location or source, such date shall remain the
date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit that is a CSAPR SO\textsubscript{2} Group 1 unit under §97.604 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

(2) Notwithstanding paragraph (1) of this definition and except as provided in §97.605, for a unit that is not a CSAPR SO\textsubscript{2} Group 1 unit under §97.604 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CSAPR SO\textsubscript{2} Group 1 unit under §97.604.

(i) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that subsequently undergoes a physical change or is moved to a different location or source, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Common designated representative’s assurance level means, with regard to a specific common designated representative and a State (and Indian country within the borders of such State) and control period in a given year for which the State assurance level is exceeded as described in §97.606(c)(2)(iii), the common designated representative’s share of the State SO\textsubscript{2} Group 1 trading budget with the variability limit for the State for such control period.

Common designated representative’s share means, with regard to a specific common designated representative for a control period in a given year:

(1) With regard to a total amount of SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 1 units in a State (and Indian country within the borders of such State) during such control period, the total tonnage of SO\textsubscript{2} emissions during such control period from a group of one or more CSAPR SO\textsubscript{2} Group 1 units located in such State (and such Indian country) and having the common designated representative for such control period:

(2) With regard to a State SO\textsubscript{2} Group 1 trading budget with the variability limit for such control period, the amount (rounded to the nearest allowance) equal to the sum of the total amount of CSAPR SO\textsubscript{2} Group 1 allowances allocated for such control period to a group of one or more CSAPR SO\textsubscript{2} Group 1 units located in the State (and Indian country within the borders of such State) and having the common designated representative for such control period and the total amount of CSAPR SO\textsubscript{2} Group 1 allowances purchased by an owner or operator of such CSAPR SO\textsubscript{2} Group 1 units in an auction for such control period and submitted by the State or the permitting authority to the Administrator for recordation in the compliance accounts for
such CSAPR SO\textsubscript{2} Group 1 units in accordance with the CSAPR SO\textsubscript{2} Group 1 allowance auction provisions in a SIP revision approved by the Administrator under §52.38(e) or (f) of this chapter, multiplied by the sum of the State SO\textsubscript{2} Group 1 trading budget under §97.610(a) and the State’s variability limit under §97.610(b) for such control period and divided by such State SO\textsubscript{2} Group 1 trading budget;

(3) Provided that, in the case of a unit that operates during, but has no amount of CSAPR SO\textsubscript{2} Group 1 allowances allocated under §§97.611 and 97.612 for, such control period, the unit shall be treated, solely for purposes of this definition, as being allocated an amount (rounded to the nearest allowance) of CSAPR SO\textsubscript{2} Group 1 allowances for such control period equal to the unit’s allowable SO\textsubscript{2} emission rate applicable to such control period, multiplied by a capacity factor of 0.85 (if the unit is a boiler combusting any amount of coal or coal-derived fuel during such control period), 0.24 (if the unit is a simple combustion turbine during such control period), 0.67 (if the unit is a combined cycle turbine during such control period), 0.74 (if the unit is an integrated coal gasification combined cycle unit during such control period), or 0.36 (for any other unit), multiplied by the unit’s maximum hourly load as reported in accordance with this subpart and by 8,760 hours/ control period, and divided by 2,000 lb/ ton.

Common stack means a single flue through which emissions from 2 or more units are exhausted.

Compliance account means an Allowance Management System account, established by the Administrator for a CSAPR SO\textsubscript{2} Group 1 source under this subpart, in which any CSAPR SO\textsubscript{2} Group 1 allowance allocations to the CSAPR SO\textsubscript{2} Group 1 units at the source are recorded and in which any CSAPR SO\textsubscript{2} Group 1 allowances available for use for a control period in a given year in complying with the source’s CSAPR SO\textsubscript{2} Group 1 emissions limitation in accordance with §§97.606 and 97.624.

Continuous emission monitoring system or CEMS means the equipment required under this subpart to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes and using an automated data acquisition and handling system (DAHS), a permanent record of SO\textsubscript{2} emissions, stack gas volumetric flow rate, stack gas moisture content, and O\textsubscript{2} or CO\textsubscript{2} concentration (as applicable), in a manner consistent with part 75 of this chapter and §§97.630 through 97.635.

The following systems are the principal types of continuous emission monitoring systems:

(1) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);

(2) A SO\textsubscript{2} monitoring system, consisting of a SO\textsubscript{2} pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of SO\textsubscript{2} emissions, in parts per million (ppm);

(3) A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H\textsubscript{2}O;

(4) A CO\textsubscript{2} monitoring system, consisting of a CO\textsubscript{2} pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of CO\textsubscript{2} emissions, in percent CO\textsubscript{2}; and

(5) An O\textsubscript{2} monitoring system, consisting of an O\textsubscript{2} concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O\textsubscript{2}, in percent O\textsubscript{2}.

Control period means the period starting January 1 of a calendar year, except as provided in §97.606(c)(3), and ending on December 31 of the same year, inclusive.

CSAPR NO\textsubscript{x} Annual Trading Program means a multi-state NO\textsubscript{x} air pollution control and emission reduction program established in accordance with subpart AAAAA of this part and §52.38(a) of this chapter (including such
a program that is revised in a SIP revision approved by the Administrator under §52.38(a)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(a)(5) of this chapter), as a means of mitigating interstate transport of fine particulates and NOX.

CSAPR NOX Ozone Season Group 1 Trading Program means a multi-state NOX air pollution control and emission reduction program established in accordance with subpart BBBBBB of this part and §52.38(b)(1), (b)(2)(i) and (ii), (b)(3) through (5), and (b)(10) through (12) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(b)(5) of this chapter), as a means of mitigating interstate transport of ozone and NOX.

CSAPR NOX Ozone Season Group 2 Trading Program means a multi-state NOX air pollution control and emission reduction program established in accordance with subpart EEEEE of this part and §52.38(b)(1), (b)(2)(i) and (iii), (b)(6) through (11), and (b)(13) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(7) or (8) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(b)(6) or (9) of this chapter), as a means of mitigating interstate transport of ozone and NOX.

CSAPR SO2 Group 1 allowance means a limited authorization issued and allocated or auctioned by the Administrator under this subpart, or by a State or permitting authority under a SIP revision approved by the Administrator under §52.39(d), (e), or (f) of this chapter, to emit one ton of SO2 during a control period of the specified calendar year for which the authorization is allocated or auctioned or of any calendar year thereafter under the CSAPR SO2 Group 1 Trading Program.

CSAPR SO2 Group 1 allowance deduction or deduct CSAPR SO2 Group 1 allowances means the permanent withdrawal of CSAPR SO2 Group 1 allowances by the Administrator from a compliance account (e.g., in order to account for compliance with the CSAPR SO2 Group 1 emissions limitation) or from an assurance account (e.g., in order to account for compliance with the assurance provisions under §§97.606 and 97.625).

CSAPR SO2 Group 1 allowances held or hold CSAPR SO2 Group 1 allowances means the CSAPR SO2 Group 1 allowances treated as included in an Allowance Management System account as of a specified point in time because at that time they:

1. Have been recorded by the Administrator in the account or transferred into the account by a correctly submitted, but not yet recorded, CSAPR SO2 Group 1 allowance transfer in accordance with this subpart; and

2. Have not been transferred out of the account by a correctly submitted, but not yet recorded, CSAPR SO2 Group 1 allowance transfer in accordance with this subpart.

CSAPR SO2 Group 1 emissions limitation means, for a CSAPR SO2 Group 1 source, the tonnage of SO2 emissions authorized in a control period by the CSAPR SO2 Group 1 allowances available for deduction for the source under §97.624(a) for such control period.

CSAPR SO2 Group 1 source means a source that includes one or more CSAPR SO2 Group 1 units.

CSAPR SO2 Group 1 Trading Program means a multi-state SO2 air pollution control and emission reduction program established in accordance with this subpart and §52.39(d) or (e) of this chapter, as a means of mitigating interstate transport of fine particulates and SO2.

CSAPR SO2 Group 1 unit means a unit that is subject to the CSAPR SO2 Group 1 Trading Program under §97.604.

Designated representative means, for a CSAPR SO2 Group 1 source and each CSAPR SO2 Group 1 unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with this subpart, to represent and legally bind each owner and operator in matters pertaining to the
Environmental Protection Agency § 97.602

CSAPR SO\textsubscript{2} Group 1 Trading Program. If the CSAPR SO\textsubscript{2} Group 1 source is also subject to the Acid Rain Program, CSAPR NO\textsubscript{x} Annual Trading Program, CSAPR NO\textsubscript{x} Ozone Season Group 1 Trading Program, or CSAPR NO\textsubscript{x} Ozone Season Group 2 Trading Program, then this natural person shall be the same natural person as the designated representative as defined in the respective program.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the designated representative, and as modified by the Administrator:

(1) In accordance with this subpart; and

(2) With regard to a period before the unit or source is required to measure, record, and report such air pollutants in accordance with this subpart, in accordance with part 75 of this chapter.

Excess emissions means any ton of emissions from the CSAPR SO\textsubscript{2} Group 1 units at a CSAPR SO\textsubscript{2} Group 1 source during a control period in a given year that exceeds the CSAPR SO\textsubscript{2} Group 1 emissions limitation for the source for such control period.

Fossil fuel means—

(1) Natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material; or

(2) For purposes of applying the limitation on “average annual fuel consumption of fossil fuel” in §97.604(b)(2)(i)(B) and (ii), natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material for the purpose of creating useful heat.

Fossil-fuel-fired means, with regard to a unit, combusting any amount of fossil fuel in 2005 or any calendar year thereafter.

General account means an Allowance Management System account, established under this subpart, that is not a compliance account or an assurance account.

Generator means a device that produces electricity.

Heat input means, for a unit for a specified period of unit operating time, the product (in mmBtu) of the gross calorific value of the fuel (in mmBtu/lb) fed into the unit multiplied by the fuel feed rate (in lb of fuel/time) and unit operating time, as measured, recorded, and reported to the Administrator by the designated representative and as modified by the Administrator in accordance with this subpart and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust.

Heat input rate means, for a unit, the quotient (in mmBtu/hr) of the amount of heat input for a specified period of unit operating time (in mmBtu) divided by unit operating time (in hr) or, for a unit and a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hr) during which the unit combuts the fuel.

Heat rate means, for a unit, the quotient (in mmBtu/unit of load) of the unit’s maximum design heat input rate (in Btu/hr) divided by the product of 1,000,000 Btu/mmBtu and the unit’s maximum hourly load.

Indian country means “Indian country” as defined in 18 U.S.C. 1151.

Life-of-the-unit, firm power contractual arrangement means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit’s total costs, pursuant to a contract:

(1) For the life of the unit;

(2) For a cumulative term of no less than 30 years, including contracts that permit an election for early termination; or

(3) For a period no less than 25 years or 70 percent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

Maximum design heat input rate means, for a unit, the maximum amount of fuel per hour (in Btu/hr) that the unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.
§ 97.602  Monitoring system means any monitoring system that meets the requirements of this subpart, including a continuous emission monitoring system, an alternative monitoring system, or an excepted monitoring system under part 75 of this chapter.

Nameplate capacity means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe, rounded to the nearest tenth) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount (in MWe, rounded to the nearest tenth) as of such completion as specified by the person conducting the physical change.

Natural gas means “natural gas” as defined in §72.2 of this chapter.

Newly affected CSAPR SO\textsubscript{2} Group 1 unit means a unit that was not a CSAPR SO\textsubscript{2} Group 1 unit when it began operating but that thereafter becomes a CSAPR SO\textsubscript{2} Group 1 unit.

Operate or operation means, with regard to a unit, to combust fuel.

Operator means, for a CSAPR SO\textsubscript{2} Group 1 source or a CSAPR SO\textsubscript{2} Group 1 unit at a source respectively, any person who operates, controls, or supervises a CSAPR SO\textsubscript{2} Group 1 unit at the source or the CSAPR SO\textsubscript{2} Group 1 unit and shall include, but not be limited to, any holding company, utility system, or plant manager of such source or unit.

Owner means, for a CSAPR SO\textsubscript{2} Group 1 source or a CSAPR SO\textsubscript{2} Group 1 unit at a source respectively, any of the following persons:

(1) Any holder of any portion of the legal or equitable title in a CSAPR SO\textsubscript{2} Group 1 unit at the source or the CSAPR SO\textsubscript{2} Group 1 unit;

(2) Any holder of a leasehold interest in a CSAPR SO\textsubscript{2} Group 1 unit at the source or the CSAPR SO\textsubscript{2} Group 1 unit, provided that, unless expressly provided for in a leasehold agreement, “owner” shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CSAPR SO\textsubscript{2} Group 1 unit; and

(3) Any purchaser of power from a CSAPR SO\textsubscript{2} Group 1 unit at the source or the CSAPR SO\textsubscript{2} Group 1 unit under a life-of-the-unit, firm power contractual arrangement.

Permanently retired means, with regard to a unit, a unit that is unavailable for service and that the unit’s owners and operators do not expect to return to service in the future.

Permitting authority means “permitting authority” as defined in §§70.2 and 71.2 of this chapter.

Potential electrical output capacity means, for a unit (in MWh/yr), 33 percent of the unit’s maximum design heat input rate (in Btu/hr), divided by 3,413 Btu/kWh, divided by 1,000 kWh/MWh, and multiplied by 8,760 hr/yr.

Receive or receipt of means, when referring to the Administrator, to come into possession of a document, information, or correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the Administrator in the regular course of business.

Recordation, record, or recorded means, with regard to CSAPR SO\textsubscript{2} allowances, the moving of CSAPR SO\textsubscript{2} allowances by the Administrator into, out of, or between Allowance Management System accounts, for purposes of allocation, auction, transfer, or deduction.

Reference method means any direct test method of sampling and analyzing for an air pollutant as specified in §75.22 of this chapter.

Replacement, replace, or replaced means, with regard to a unit, the demolishing of a unit, or the permanent retirement and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or retired unit (the replaced unit).
Sequential use of energy means:

1. The use of reject heat from electricity production in a useful thermal energy application or process; or
2. The use of reject heat from a useful thermal energy application or process in electricity production.

Serial number means, for a CSAPR SO₂ Group 1 allowance, the unique identification number assigned to each CSAPR SO₂ Group 1 allowance by the Administrator.

Solid waste incineration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a "solid waste incineration unit" as defined in section 129(g)(1) of the Clean Air Act.

Source means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. This definition does not change or otherwise affect the definition of "major source", "stationary source", or "source" as set forth and implemented in a title V operating permit program or any other program under the Clean Air Act.

State means one of the States that is subject to the CSAPR SO₂ Group 1 Trading Program pursuant to §52.39(a), (b), (d) through (j) of this chapter.

Submit or serve means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:

1. In person;
2. By United States Postal Service; or
3. By other means of dispatch or transmission and delivery;
4. Provided that compliance with any “submission” or “service” deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.

Topping-cycle unit means a unit in which the energy input to the unit is first used to produce useful power, including electricity, where at least some of the reject heat from the electricity production is then used to provide useful thermal energy.

Total energy input means, for a unit, total energy of all forms supplied to the unit, excluding energy produced by the unit. Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

\[ LHV = HHV - 10.55(W + 9H) \]

where:

- \( LHV \) = lower heating value of the form of energy in Btu/lb,
- \( HHV \) = higher heating value of the form of energy in Btu/lb,
- \( W \) = weight % of moisture in the form of energy, and
- \( H \) = weight % of hydrogen in the form of energy.

Total energy output means, for a unit, the sum of useful power and useful thermal energy produced by the unit.

Unit means a stationary, fossil-fuel-fired boiler, stationary, fossil-fuel-fired combustion turbine, or other stationary, fossil-fuel-fired combustion device. A unit that undergoes a physical change or is moved to a different location or source shall continue to be treated as the same unit. A unit (the replaced unit) that is replaced by another unit (the replacement unit) at the same or a different source shall continue to be treated as the same unit, and the replacement unit shall be treated as a separate unit.

Unit operating day means, with regard to a unit, a calendar day in which the unit combusts any fuel.

Unit operating hour or hour of unit operation means, with regard to a unit, an hour in which the unit combusts any fuel.

Useful power means, with regard to a unit, electricity or mechanical energy that the unit makes available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

Useful thermal energy means thermal energy that is:

1. Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;
2. Used in a heating application (e.g., space heating or domestic hot water heating); or
3. Used in a space cooling application (i.e., in an absorption chiller).
Utility power distribution system means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

§ 97.603 Measurements, abbreviations, and acronyms.

Measurements, abbreviations, and acronyms used in this subpart are defined as follows:

- Btu—British thermal unit
- CO₂—carbon dioxide
- CSAPR—Cross-State Air Pollution Rule
- H₂O—water
- hr—hour
- kWh—kilowatt-hour
- lb—pound
- mmBtu—million Btu
- MWe—megawatt electrical
- MWh—megawatt-hour
- NOₓ—nitrogen oxides
- O₂—oxygen
- ppm—parts per million
- scfh—standard cubic feet per hour
- SIP—State implementation plan
- SO₂—sulfur dioxide
- TR—Transport Rule
- yr—year

§ 97.604 Applicability.

(a) Except as provided in paragraph (b) of this section:

(1) The following units in a State (and Indian country within the borders of such State) shall be CSAPR SO₂ Group 1 units, and any source that includes one or more such units shall be a CSAPR SO₂ Group 1 source, subject to the requirements of this subpart: Any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, on or after January 1, 2005, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

(2) If a stationary boiler or stationary combustion turbine that, under paragraph (a)(1) of this section, is not a CSAPR SO₂ Group 1 unit as provided in paragraph (a)(1) of this section on the first date on which it both combusts fossil fuel and serves such generator.

(b) Any unit in a State (and Indian country within the borders of such State) that otherwise is a CSAPR SO₂ Group 1 unit under paragraph (a) of this section and that meets the requirements set forth in paragraph (b)(1)(i) or (2)(i) of this section shall not be a CSAPR SO₂ Group 1 unit:

(1)(i) Any unit:

(A) Qualifying as a cogeneration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit throughout each calendar year ending after the later of 2005 or such 12-month period; and

(B) Not supplying in 2005 or any calendar year thereafter more than one-third of the unit’s potential electrical output capacity or 219,000 MWh, whichever is greater, to any utility power distribution system for sale.

(ii) If, after qualifying under paragraph (b)(1)(i) of this section as not being a CSAPR SO₂ Group 1 unit, a unit subsequently no longer meets all the requirements of paragraph (b)(1)(i) of this section, the unit shall become a CSAPR SO₂ Group 1 unit starting on the earlier of January 1 after the first calendar year during which the unit no longer qualifies as a cogeneration unit or January 1 after the first calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i)(B) of this section. The unit shall thereafter continue to be a CSAPR SO₂ Group 1 unit.

(2)(i) Any unit:

(A) Qualifying as a solid waste incineration unit throughout the later of 2005 or the 12-month period starting on the date the unit first produces electricity and continuing to qualify as a solid waste incineration unit throughout each calendar year during which the unit no longer meets the requirements of paragraph (b)(1)(i) of this section.

(B) With an average annual fuel consumption of fossil fuel for the first 3 consecutive calendar years of operation starting no earlier than 2005 of less than 20 percent (on a Btu basis) and an average annual fuel consumption of fossil fuel for any 3 consecutive
calendar years thereafter of less than 20 percent (on a Btu basis).

(ii) If, after qualifying under paragraph (b)(2)(i) of this section as not being a CSAPR SO$_2$ Group 1 unit, a unit subsequently no longer meets all the requirements of paragraph (b)(2)(i) of this section, the unit shall become a CSAPR SO$_2$ Group 1 unit starting on the earlier of January 1 after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January 1 after the first 3 consecutive calendar years after 2005 for which the unit has an average annual fuel consumption of fossil fuel of 20 percent or more. The unit shall thereafter continue to be a CSAPR SO$_2$ Group 1 unit.

(c) A certifying official of an owner or operator of any unit or other equipment may submit a petition (including any supporting documents) to the Administrator at any time for a determination concerning the applicability, under paragraphs (a) and (b) of this section or a SIP revision approved under § 52.39(e) or (f) of this chapter, of the CSAPR SO$_2$ Group 1 Trading Program to the unit or other equipment.

(1) Petition content. The petition shall be in writing and include the identification of the unit or other equipment and the relevant facts about the unit or other equipment. The petition and any other documents provided to the Administrator in connection with the petition shall include the following certification statement, signed by the certifying official: "I am authorized to make this submission on behalf of the owners and operators of the unit or other equipment for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

(2) Response. The Administrator will issue a written response to the petition and may request supplemental information determined by the Administrator to be relevant to such petition. The Administrator’s determination concerning the applicability, under paragraphs (a) and (b) of this section, of the CSAPR SO$_2$ Group 1 Trading Program to the unit or other equipment shall be binding on any State or permitting authority unless the Administrator determines that the petition or other documents or information provided in connection with the petition contained significant, relevant errors or omissions.

§ 97.605 Retired unit exemption.

(a)(1) Any CSAPR SO$_2$ Group 1 unit that is permanently retired shall be exempt from § 97.606(b) and (c)(1), § 97.624, and §§ 97.630 through 97.635.

(2) The exemption under paragraph (a) of this section shall become effective the day on which the CSAPR SO$_2$ Group 1 unit is permanently retired. Within 30 days of the unit’s permanent retirement, the designated representative shall submit a statement to the Administrator. The statement shall state, in a format prescribed by the Administrator, that the unit was permanently retired on a specified date and will comply with the requirements of paragraph (b) of this section.

(b) Special provisions. (1) A unit exempt under paragraph (a) of this section shall not emit any SO$_2$, starting on the date that the exemption takes effect.

(2) For a period of 5 years from the date the records are created, the owners and operators of a unit exempt under paragraph (a) of this section shall retain, at the source that includes the unit, records demonstrating that the unit is permanently retired. The 5-year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the Administrator. The owners and operators bear the burden of proof that the unit is permanently retired.

(3) The owners and operators and, to the extent applicable, the designated representative of a unit exempt under
paragraph (a) of this section shall comply with the requirements of the CSAPR SO\textsubscript{2} Group 1 Trading Program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

(4) A unit exempt under paragraph (a) of this section shall lose its exemption on the first date on which the unit resumes operation. Such unit shall be treated, for purposes of applying allocation, monitoring, reporting, and recordkeeping requirements under this subpart, as a unit that commences commercial operation on the first date on which the unit resumes operation.

§ 97.606 Standard requirements.

(a) Designated representative requirements. The owners and operators shall comply with the requirement to have a designated representative, and may have an alternate designated representative, in accordance with §§97.613 through 97.618.

(b) Emissions monitoring, reporting, and recordkeeping requirements. (1) The owners and operators, and the designated representative, of each CSAPR SO\textsubscript{2} Group 1 source and each CSAPR SO\textsubscript{2} Group 1 unit at the source shall comply with the monitoring, reporting, and recordkeeping requirements of §§97.630 through 97.635.

(2) The emissions data determined in accordance with §§97.630 through 97.635 shall be used to calculate allocations of CSAPR SO\textsubscript{2} Group 1 allowances under §§97.611(a)(2) and (b) and 97.612 and to determine compliance with the CSAPR SO\textsubscript{2} Group 1 emissions limitation and assurance provisions under paragraph (c) of this section, provided that, for each monitoring location from which mass emissions are reported, the mass emissions amount used in calculating such allocations and determining such compliance shall be the mass emissions amount for the monitoring location determined in accordance with §§97.630 through 97.635 and rounded to the nearest ton, with any fraction of a ton less than 0.50 being deemed to be zero.

(c) SO\textsubscript{2} emissions requirements—(1) CSAPR SO\textsubscript{2} Group 1 emissions limitation.

(i) As of the allowance transfer deadline for a control period in a given year, the owners and operators of each CSAPR SO\textsubscript{2} Group 1 source and each CSAPR SO\textsubscript{2} Group 1 unit at the source shall hold, in the source’s compliance account, CSAPR SO\textsubscript{2} Group 1 allowances available for deduction for such control period under §97.624(a) in an amount not less than the tons of total SO\textsubscript{2} emissions for such control period from all CSAPR SO\textsubscript{2} Group 1 units at the source.

(ii) If total SO\textsubscript{2} emissions during a control period in a given year from the CSAPR SO\textsubscript{2} Group 1 units at a CSAPR SO\textsubscript{2} Group 1 source are in excess of the CSAPR SO\textsubscript{2} Group 1 emissions limitation set forth in paragraph (c)(1)(i) of this section, then:

(A) The owners and operators of the source and each CSAPR SO\textsubscript{2} Group 1 unit at the source shall hold the CSAPR SO\textsubscript{2} Group 1 allowances required for deduction under §97.624(d); and

(B) The owners and operators of the source and each CSAPR SO\textsubscript{2} Group 1 unit at the source shall pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act, and each ton of such excess emissions and each day of such control period shall constitute a separate violation of this subpart and the Clean Air Act.

(2) CSAPR SO\textsubscript{2} Group 1 assurance provisions. (i) If total SO\textsubscript{2} emissions during a control period in a given year from all CSAPR SO\textsubscript{2} Group 1 units at CSAPR SO\textsubscript{2} Group 1 sources in a State (and Indian country within the borders of such State) exceed the State assurance level, then the owners and operators of such sources and units in each group of one or more sources and units having a common designated representative for such control period, where the common designated representative’s share of such SO\textsubscript{2} emissions during such control period exceeds the common designated representative’s assurance level for the State and such control period, shall hold (in the assurance account established for the owners and operators of such group) CSAPR SO\textsubscript{2} Group 1 allowances available for deduction for such control period under §97.625(a) in an amount equal to two times the product (rounded to the nearest whole number).
as determined by the Administrator in accordance with §97.625(b), of multiplying—

(A) The quotient of the amount by which the common designated representative’s share of such SO\textsubscript{2} emissions exceeds the common designated representative’s assurance level divided by the sum of the amounts, determined for all common designated representatives for such sources and units in the State (and Indian country within the borders of such State) for such control period, by which each common designated representative’s share of such SO\textsubscript{2} emissions exceeds the respective common designated representative’s assurance level; and

(B) The amount by which total SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 1 units at CSAPR SO\textsubscript{2} Group 1 sources in the State (and Indian country within the borders of such State) for such control period exceed the State assurance level.

(ii) The owners and operators shall hold the CSAPR SO\textsubscript{2} Group 1 allowances required under paragraph (c)(2)(i) of this section, as of midnight of November 1 (if it is a business day), or midnight of the first business day thereafter (if November 1 is not a business day), immediately after the year of such control period.

(iii) Total SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 1 units at CSAPR SO\textsubscript{2} Group 1 sources in a State (and Indian country within the borders of such State) during a control period in a given year exceed the State assurance level if such total SO\textsubscript{2} emissions exceed the sum, for such control period, of the State SO\textsubscript{2} Group 1 trading budget under §97.610(b) and the State’s variability limit under §97.620(b).

(iv) It shall not be a violation of this subpart or of the Clean Air Act if total SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 1 units at CSAPR SO\textsubscript{2} Group 1 sources in a State (and Indian country within the borders of such State) during a control period exceed the State assurance level or if a common designated representative’s share of total SO\textsubscript{2} emissions from the CSAPR SO\textsubscript{2} Group 1 units at CSAPR SO\textsubscript{2} Group 1 sources in a State (and Indian country within the borders of such State) during a control period exceeds the common designated representative’s assurance level.

(v) To the extent the owners and operators fail to hold CSAPR SO\textsubscript{2} Group 1 allowances for a control period in a given year in accordance with paragraphs (c)(2)(i) through (iii) of this section,

(A) The owners and operators shall pay any fine, penalty, or assessment or comply with any other remedy imposed under the Clean Air Act; and

(B) Each CSAPR SO\textsubscript{2} Group 1 allowance that the owners and operators fail to hold for such control period in accordance with paragraphs (c)(2)(i) through (iii) of this section and each day of such control period shall constitute a separate violation of this subpart and the Clean Air Act.

(3) Compliance periods. (i) A CSAPR SO\textsubscript{2} Group 1 unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of January 1, 2015 or the deadline for meeting the unit’s monitor certification requirements under §97.630(b) and for each control period thereafter.

(ii) A CSAPR SO\textsubscript{2} Group 1 unit shall be subject to the requirements under paragraph (c)(2) of this section for the control period starting on the later of January 1, 2017 or the deadline for meeting the unit’s monitor certification requirements under §97.630(b) and for each control period thereafter.

(4) Vintage of CSAPR SO\textsubscript{2} Group 1 allowances held for compliance. (i) A CSAPR SO\textsubscript{2} Group 1 allowance held for compliance with the requirements under paragraph (c)(1)(i) of this section for a control period in a given year must be a CSAPR SO\textsubscript{2} Group 1 allowance that was allocated or auctioned for such control period or a control period in a prior year.

(ii) A CSAPR SO\textsubscript{2} Group 1 allowance held for compliance with the requirements under paragraphs (c)(1)(i)(A) and (2)(i) through (iii) of this section for a control period in a given year must be a CSAPR SO\textsubscript{2} Group 1 allowance that was allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year.
allowance shall be held in, deducted from, or transferred into, out of, or between Allowance Management System accounts in accordance with this subpart.

(6) Limited authorization. A CSAPR SO\textsubscript{2} Group 1 allowance is a limited authorization to emit one ton of SO\textsubscript{2} during the control period in one year. Such authorization is limited in its use and duration as follows:

(i) Such authorization shall only be used in accordance with the CSAPR SO\textsubscript{2} Group 1 Trading Program; and

(ii) Notwithstanding any other provision of this subpart, the Administrator has the authority to terminate or limit the use and duration of such authorization to the extent the Administrator determines is necessary or appropriate to implement any provision of the Clean Air Act.

(7) Property right. A CSAPR SO\textsubscript{2} Group 1 allowance does not constitute a property right.

(d) Title V permit requirements. (1) No title V permit revision shall be required for any allocation, holding, deduction, or transfer of CSAPR SO\textsubscript{2} Group 1 allowances in accordance with this subpart.

(2) A description of whether a unit is required to monitor and report SO\textsubscript{2} emissions using a continuous emission monitoring system (under subpart B of part 75 of this chapter), an excepted monitoring system (under appendices D and E to part 75 of this chapter), a low mass emissions excepted monitoring methodology (under §75.19 of this chapter), or an alternative monitoring system (under subpart E of part 75 of this chapter) in accordance with §§75.630 through 97.635 may be added to, or changed in, a Title V permit using minor permit modification procedures in accordance with §§70.7(e)(2) and 71.7(e)(1) of this chapter, provided that the requirements applicable to the described monitoring and reporting (as added or changed, respectively) are already incorporated in such permit. This paragraph explicitly provides that the addition of, or change to, a unit’s description as described in the prior sentence is eligible for minor permit modification procedures in accordance with §§70.7(e)(2)(ii)(B) and 71.7(e)(1)(i)(B) of this chapter.

(e) Additional recordkeeping and reporting requirements. (1) Unless otherwise provided, the owners and operators of each CSAPR SO\textsubscript{2} Group 1 source and each CSAPR SO\textsubscript{2} Group 1 unit at the source shall keep on site at the source each of the following documents (in hardcopy or electronic format) for a period of 5 years from the date the document is created. This period may be extended for cause, at any time before the end of 5 years, in writing by the Administrator.

(i) The certificate of representation under §97.616 for the designated representative for the source and each CSAPR SO\textsubscript{2} Group 1 unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such certificate of representation and documents are superseded because of the submission of a new certificate of representation under §97.616 changing the designated representative.

(ii) All emissions monitoring information, in accordance with this subpart.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under, or to demonstrate compliance with the requirements of, the CSAPR SO\textsubscript{2} Group 1 Trading Program.

(2) The designated representative of a CSAPR SO\textsubscript{2} Group 1 source and each CSAPR SO\textsubscript{2} Group 1 unit at the source shall make all submissions required under the CSAPR SO\textsubscript{2} Group 1 Trading Program, except as provided in §97.618. This requirement does not change, create an exemption from, or otherwise affect the responsible official submission requirements under a title V operating permit program in parts 70 and 71 of this chapter.

(f) Liability. (1) Any provision of the CSAPR SO\textsubscript{2} Group 1 Trading Program that applies to a CSAPR SO\textsubscript{2} Group 1 source or the designated representative of a CSAPR SO\textsubscript{2} Group 1 source shall also apply to the owners and operators of such source and of the CSAPR SO\textsubscript{2} Group 1 units at the source.

(2) Any provision of the CSAPR SO\textsubscript{2} Group 1 Trading Program that applies
to a CSAPR SO\(_2\) Group 1 unit or the designated representative of a CSAPR SO\(_2\) Group 1 unit shall also apply to the owners and operators of such unit.

(g) **Effect on other authorities.** No provision of the CSAPR SO\(_2\) Group 1 Trading Program or exemption under §97.605 shall be construed as exempting or excluding the owners and operators, and the designated representative, of a CSAPR SO\(_2\) Group 1 source or CSAPR SO\(_2\) Group 1 unit from compliance with any other provision of the applicable, approved State implementation plan, a federally enforceable permit, or the Clean Air Act.

§ 97.607 Computation of time.

(a) Unless otherwise stated, any time period scheduled, under the CSAPR SO\(_2\) Group 1 Trading Program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.

(b) Unless otherwise stated, any time period scheduled, under the CSAPR SO\(_2\) Group 1 Trading Program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.

(c) Unless otherwise stated, if the final day of any time period, under the CSAPR SO\(_2\) Group 1 Trading Program, is not a business day, the time period shall be extended to the next business day.

§ 97.608 Administrative appeal procedures.

The administrative appeal procedures for decisions of the Administrator under the CSAPR SO\(_2\) Group 1 Trading Program are set forth in part 78 of this chapter.

§ 97.609 [Reserved]

§ 97.610 State SO\(_2\) Group 1 trading budgets, new unit set-asides, Indian country new unit set-asides, and variability limits.

(a) The State SO\(_2\) Group 1 trading budgets, new unit set-asides, and Indian country new unit set-asides for allocations of CSAPR SO\(_2\) Group 1 allowances for the control periods in 2015 and thereafter are as follows:

1. **Illinois.** (i) The SO\(_2\) Group 1 trading budget for 2015 and 2016 is 234,889 tons.

(ii) The new unit set-aside for 2015 and 2016 is 11,744 tons.

(iii) [Reserved]

(iv) The SO\(_2\) Group 1 trading budget for 2017 and thereafter is 124,123 tons.

(v) The new unit set-aside for 2017 and thereafter is 6,206 tons.

(vi) [Reserved]

2. **Indiana.** (i) The SO\(_2\) Group 1 trading budget for 2015 and 2016 is 290,762 tons.

(ii) The new unit set-aside for 2015 and 2016 is 8,723 tons.

(iii) [Reserved]

(iv) The SO\(_2\) Group 1 trading budget for 2017 and thereafter is 166,449 tons.

(v) The new unit set-aside for 2017 and thereafter is 4,993 tons.

(vi) [Reserved]

3. **Iowa.** (i) The SO\(_2\) Group 1 trading budget for 2015 and 2016 is 107,085 tons.

(ii) The new unit set-aside for 2015 and 2016 is 2,035 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 107 tons.

(iv) The SO\(_2\) Group 1 trading budget for 2017 and thereafter is 75,184 tons.

(v) The new unit set-aside for 2017 and thereafter is 1,429 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 75 tons.

4. **Kentucky.** (i) The SO\(_2\) Group 1 trading budget for 2015 and 2016 is 232,662 tons.

(ii) The new unit set-aside for 2015 and 2016 is 13,960 tons.

(iii) [Reserved]

(iv) The SO\(_2\) Group 1 trading budget for 2017 and thereafter is 106,284 tons.

(v) The new unit set-aside for 2017 and thereafter is 6,377 tons.

(vi) [Reserved]

5. **Maryland.** (i) The SO\(_2\) Group 1 trading budget for 2015 and 2016 is 30,120 tons.

(ii) The new unit set-aside for 2015 and 2016 is 602 tons.

(iii) [Reserved]

(iv) The SO\(_2\) Group 1 trading budget for 2017 and thereafter is 28,203 tons.

(v) The new unit set-aside for 2017 and thereafter is 564 tons.

(vi) [Reserved]
§ 97.610  

(6) Michigan. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 229,303 tons.

(ii) The new unit set-aside for 2015 and 2016 is 4,357 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 229 tons.

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 143,995 tons.

(v) The new unit set-aside for 2017 and thereafter is 2,736 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 144 tons.

(7) Missouri. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 207,466 tons.

(ii) The new unit set-aside for 2015 is 4,149 tons and for 2016 is 6,224 tons.

(iii) [Reserved]

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 165,941 tons.

(v) The new unit set-aside for 2017 and thereafter is 4,978 tons.

(vi) [Reserved]

(8) New Jersey. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 7,670 tons.

(ii) The new unit set-aside for 2015 and 2016 is 153 tons.

(iii) [Reserved]

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 5,574 tons.

(v) The new unit set-aside for 2017 and thereafter is 111 tons.

(vi) [Reserved]

(9) New York. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 36,296 tons.

(ii) The new unit set-aside for 2015 and 2016 is 690 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 36 tons.

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 27,556 tons.

(v) The new unit set-aside for 2017 and thereafter is 523 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 28 tons.

(10) North Carolina. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 136,681 tons.

(ii) The new unit set-aside for 2015 and 2016 is 10,813 tons.

(iii) The Indian country new unit set-aside for 2015 and 2016 is 36 tons.

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 57,620 tons.

(v) The new unit set-aside for 2017 and thereafter is 4,552 tons.

(vi) The Indian country new unit set-aside for 2017 and thereafter is 58 tons.

(11) Ohio. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 315,393 tons.

(ii) The new unit set-aside for 2015 and 2016 is 6,308 tons.

(iii) [Reserved]

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 142,240 tons.

(v) The new unit set-aside for 2017 and thereafter is 2,845 tons.

(vi) [Reserved]

(12) Pennsylvania. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 278,651 tons.

(ii) The new unit set-aside for 2015 and 2016 is 5,573 tons.

(iii) [Reserved]

(iv) The SO₂ Group 1 trading budget for 2017 and thereafter is 148,150 tons.

(v) The new unit set-aside for 2017 and thereafter is 1,177 tons.

(16) Wisconsin. (i) The SO₂ Group 1 trading budget for 2015 and 2016 is 79,480 tons.
§ 97.611 Timing requirements for CSAPR SO\(_2\) Group 1 allowance allocations.

(a) Existing units. (1) CSAPR SO\(_2\) Group 1 allowances are allocated, for the control periods in 2015 and each year thereafter, as provided in a notice of data availability issued by the Administrator. Providing an allocation to a unit in such notice does not constitute a determination that the unit is a CSAPR SO\(_2\) Group 1 unit, and not providing an allocation to a unit in such notice does not constitute a determination that the unit is not a CSAPR SO\(_2\) Group 1 unit.

(2) Notwithstanding paragraph (a)(1) of this section, if a unit provided an allocation in the notice of data availability issued under paragraph (a)(1) of this section does not operate, starting after 2014, during the control period in two consecutive years, such unit will not be allocated the CSAPR SO\(_2\) Group 1 allowances provided in such notice for the unit for the control periods in the fifth year after the first such year and in each year after that fifth year. All CSAPR SO\(_2\) Group 1 allowances that would otherwise have been allocated to such unit will be allocated to the new unit set-aside for the State where such unit is located and for the respective years involved. If such unit resumes operation, the Administrator will allocate CSAPR SO\(_2\) Group 1 allowances to the unit in accordance with paragraph (b) of this section.

(b) New units—(1) New unit set-asides. (i) By June 1, 2015 and June 1 of each year thereafter, the Administrator will calculate the CSAPR SO\(_2\) Group 1 allowance allocation to each CSAPR SO\(_2\) Group 1 unit in a State, in accordance with \$97.612(a)(2) through (7) and (12), for the control period in the year of the applicable calculation deadline under this paragraph and will promulgate a notice of data availability of the results of the calculations.

(ii) For each notice of data availability required in paragraph (b)(1)(i) of this section, the Administrator will provide an opportunity for submission of objections to the calculations referenced in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph...
(b)(1)(i) of this section and shall be limited to addressing whether the calculations (including the identification of the CSAPR SO₂ Group 1 units) are in accordance with §97.612(a)(2) through (7) and (12) and §§97.606(b)(2) and 97.630 through 97.635.

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(1)(ii)(A) of this section. By August 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments that the Administrator determines to be necessary with regard to allocations under §97.612(a)(2) through (7) and (12) and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(1)(ii)(A) of this section.

(iii) If the new unit set-aside for such control period contains any CSAPR SO₂ Group 1 allowances that have not been allocated in the applicable notice of data availability in paragraph (b)(1)(ii) of this section, the Administrator will promulgate, by December 15 immediately after such notice, a notice of data availability that identifies any CSAPR SO₂ Group 1 units that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period.

(iv) For each notice of data availability required in paragraph (b)(1)(iii) of this section, the Administrator will provide an opportunity for submission of objections to the identification of CSAPR SO₂ annual units in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(1)(iii) of this section and shall be limited to addressing whether the identification of CSAPR SO₂ annual units in such notice is in accordance with paragraph (b)(1)(iii) of this section.

(B) The Administrator will adjust the identification of CSAPR SO₂ Group 1 units in each notice of data availability required in paragraph (b)(1)(iii) of this section to the extent necessary to ensure that it is in accordance with paragraph (b)(1)(iii) of this section and will calculate the CSAPR SO₂ Group 1 allowance allocation to each CSAPR SO₂ Group 1 unit in accordance with §97.612(a)(9), (10), and (12) and §§97.606(b)(2) and 97.630 through 97.635. By February 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(1)(iii) of this section, the Administrator will promulgate a notice of availability of any adjustments of the identification of CSAPR SO₂ Group 1 units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(1)(iv)(A) of this section, and the results of such calculations.

(v) To the extent any CSAPR SO₂ Group 1 allowances are added to the new unit set-aside after promulgation of each notice of data availability required in paragraph (b)(1)(iv) of this section, the Administrator will promulgate additional notices of data availability, as deemed appropriate, of the allocation of such CSAPR SO₂ Group 1 allowances in accordance with §97.612(a)(10).

(2) Indian country new unit set-asides. (i) By June 1, 2015 and June 1 of each year thereafter, the Administrator will calculate the CSAPR SO₂ Group 1 allowance allocation to each CSAPR SO₂ Group 1 unit in Indian country within the borders of a State, in accordance with §97.612(b)(2) through (7) and (12), for the control period in the year of the applicable calculation deadline under this paragraph and will promulgate a notice of data availability of the results of the calculations.

(ii) For each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will provide an opportunity for submission of objections to the calculations referenced in such notice.

(A) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(2)(i) of this section and shall be limited to addressing whether the calculations (including the identification of the CSAPR SO₂ Group 1 units) are in
accordance with §97.612(b)(2) through (7) and (12) and §§97.606(b)(2) and 97.630 through 97.635.

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(ii)(A) of this section. By August 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments of the identification of CSAPR SO\textsubscript{2} Group 1 units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iv)(A) of this section, and the results of such calculations.

(2) If the Indian country new unit set-aside for such control period contains any CSAPR SO\textsubscript{2} Group 1 allowances that have not been allocated in the applicable notice of data availability required in paragraph (b)(2)(ii) of this section, the Administrator will promulgate, by December 15 immediately after such notice, a notice of data availability that identifies any CSAPR SO\textsubscript{2} annual units in such notice.

(B) Objections shall be submitted by the deadline specified in each notice of data availability required in paragraph (b)(2)(iii) of this section and shall be limited to addressing whether the identification of CSAPR SO\textsubscript{2} annual units is in accordance with the provisions of paragraph (b)(2)(iii) of this section.

(B) The Administrator will adjust the identification of CSAPR SO\textsubscript{2} Group 1 units in each notice of data availability required in paragraph (b)(2)(iii) of this section to the extent necessary to ensure that it is in accordance with paragraph (b)(2)(iii) of this section and will calculate the CSAPR SO\textsubscript{2} Group 1 allowance allocation to each CSAPR SO\textsubscript{2} Group 1 unit in accordance with §97.612(b)(9), (10), and (12) and §§97.606(b)(2) and 97.630 through 97.635. By February 15 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(i) of this section, the Administrator will promulgate a notice of data availability of any adjustments of the identification of CSAPR SO\textsubscript{2} Group 1 units that the Administrator determines to be necessary, the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iv)(A) of this section, and the results of such calculations.

(c) Units incorrectly allocated CSAPR SO\textsubscript{2} Group 1 allowances. (1) For each control period in 2015 and thereafter, if the Administrator determines that CSAPR SO\textsubscript{2} Group 1 allowances were allocated under paragraph (a) of this section, or under a provision of a SIP revision approved under §52.39(d), (e), or (f) of this chapter, where such control period and the recipient are covered by the provisions of paragraph (c)(1)(i) of this section, or were allocated under §97.612(a)(2) through (7), (9), and (12) and (b)(2) through (7), (9), and (12), or under a provision of a SIP revision approved under §52.39(e) or (f) of this chapter, where such control period and the recipient are covered by the provisions of paragraph (c)(1)(ii) of this section, then the Administrator will notify the designated representative of the recipient and will act in accordance with the procedures set forth in paragraphs (c)(2) through (5) of this section:

(i)(A) The recipient is not actually a CSAPR SO\textsubscript{2} Group 1 unit under §97.604 as of January 1, 2015 and is allocated CSAPR SO\textsubscript{2} Group 1 allowances for such control period or, in the case of an
allocation under a provision of a SIP revision approved under §52.39(d), (e), or (f) of this chapter, the recipient is not actually a CSAPR SO₂ Group 1 unit as of January 1, 2015 and is allocated CSAPR SO₂ Group 1 allowances for such control period that the SIP revision provides should be allocated only to recipients that are CSAPR SO₂ Group 1 units as of January 1, 2015; or

(B) The recipient is not located as of January 1 of the control period in the State from whose SO₂ Group 1 trading budget the CSAPR SO₂ Group 1 allowances allocated under paragraph (a) of this section, or under a provision of a SIP revision approved under §52.39(e), (e), or (f) of this chapter, were allocated for such control period.

(ii) The recipient is not actually a CSAPR SO₂ Group 1 unit under §97.604 as of January 1 of such control period, and is allocated CSAPR SO₂ Group 1 allowances for such control period or, in the case of an allocation under a provision of a SIP revision approved under §52.39(e) or (f) of this chapter, the recipient is not actually a CSAPR SO₂ Group 1 unit as of January 1 of such control period and is allocated CSAPR SO₂ Group 1 allowances for such control period that the SIP revision provides should be allocated only to recipients that are CSAPR SO₂ Group 1 units as of January 1 of such control period.

(2) Except as provided in paragraph (c)(3) or (4) of this section, the Administrator will not record such CSAPR SO₂ Group 1 allowances under §97.621.

(3) If the Administrator already recorded such CSAPR SO₂ Group 1 allowances under §97.621 and if the Administrator makes the determination under paragraph (c)(1) of this section before making deductions for the source that includes such recipient under §97.624(b) for such control period, then the Administrator will not make any deduction to take account of such already recorded CSAPR SO₂ Group 1 allowances in such account for completion of the deduction.

(4) If the Administrator already recorded such CSAPR SO₂ Group 1 allowances under §97.621 and if the Administrator makes the determination under paragraph (c)(1) of this section after making deductions for the source that includes such recipient under §97.624(b) for such control period, then the Administrator will not make any deduction to take account of such already recorded CSAPR SO₂ Group 1 allowances.

(5)(i) With regard to the CSAPR SO₂ Group 1 allowances that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(i) of this section, the Administrator will:

(A) Transfer such CSAPR SO₂ Group 1 allowances to the new unit set-aside for such control period for the State from whose SO₂ Group 1 trading budget the CSAPR SO₂ Group 1 allowances were allocated; or

(B) If the State has a SIP revision approved under §52.39(e) or (f) of this chapter covering such control period, include such CSAPR SO₂ Group 1 allowances in such account for completion of the deduction.

(ii) With regard to the CSAPR SO₂ Group 1 allowances that were not allocated from the Indian country new unit set-aside for such control period and that are not recorded, or that are deducted as an incorrect allocation, in accordance with paragraphs (c)(2) and (3) of this section for a recipient under paragraph (c)(1)(i) of this section, the Administrator will:

(A) Transfer such CSAPR SO₂ Group 1 allowances to the new unit set-aside for such control period; or

(B) If the State has a SIP revision approved under §52.39(e) or (f) of this chapter covering such control period, include such CSAPR SO₂ Group 1 allowances in such account for completion of the deduction.

(iii) With regard to the CSAPR SO₂ Group 1 allowances that were allocated from the Indian country new unit set-
Environmental Protection Agency

§ 97.612 CSAPR SO\textsubscript{2} Group 1 allowance allocations to new units.

(a) For each control period in 2015 and thereafter and for the CSAPR SO\textsubscript{2} Group 1 units in each State, the Administrator will allocate CSAPR SO\textsubscript{2} Group 1 allowances to the CSAPR SO\textsubscript{2} Group 1 units as follows:

(1) The CSAPR SO\textsubscript{2} Group 1 allowances will be allocated to the following CSAPR SO\textsubscript{2} Group 1 units, except as provided in paragraph (a)(10) of this section:

(i) CSAPR SO\textsubscript{2} Group 1 units that are not allocated an amount of CSAPR SO\textsubscript{2} Group 1 allowances in the notice of data availability issued under §97.611(a)(1);

(ii) CSAPR SO\textsubscript{2} Group 1 units whose allocation of an amount of CSAPR SO\textsubscript{2} Group 1 allowances for such control period in the notice of data availability issued under §97.611(a)(1) is covered by §97.611(c)(2) or (3);

(iii) CSAPR SO\textsubscript{2} Group 1 units that are allocated an amount of CSAPR SO\textsubscript{2} Group 1 allowances for such control period in the notice of data availability issued under §97.611(a)(1), which allocation is terminated for such control period pursuant to §97.611(a)(2), and that operate during the control period immediately preceding such control period; or

(iv) For purposes of paragraph (a)(9) of this section, CSAPR SO\textsubscript{2} Group 1 units under §97.611(c)(1)(ii) whose allocation of an amount of CSAPR SO\textsubscript{2} Group 1 allowances for such control period in the notice of data availability issued under §97.611(b)(1)(ii)(B) is covered by §97.611(c)(2) or (3).

(2) The Administrator will establish a separate new unit set-aside for the State for each such control period.

Each such new unit set-aside will be allocated CSAPR SO\textsubscript{2} Group 1 allowances in an amount equal to the applicable amount of tons of SO\textsubscript{2} emissions as set forth in §97.610(a) and will be allocated additional CSAPR SO\textsubscript{2} Group 1 allowances (if any) in accordance with §97.611(a)(2) and (c)(3) and paragraph (b)(10) of this section.

(3) The Administrator will determine, for each CSAPR SO\textsubscript{2} Group 1 unit described in paragraph (a)(1) of this section, an allocation of CSAPR SO\textsubscript{2} Group 1 allowances for the later of the following control periods and for each subsequent control period:

(i) The control period in 2015;

(ii) The first control period after the control period in which the CSAPR SO\textsubscript{2} Group 1 unit commences commercial operation;

(iii) For a unit described in paragraph (a)(1)(ii) of this section, the first control period in which the CSAPR SO\textsubscript{2} Group 1 unit operates in the State after operating in another jurisdiction and for which the unit is not already allocated one or more CSAPR SO\textsubscript{2} Group 1 allowances; and

(iv) For a unit described in paragraph (a)(1)(iii) of this section, the first control period after the control period in which the unit resumes operation.

(4)(i) The allocation to each CSAPR SO\textsubscript{2} annual unit described in paragraphs (a)(1)(i) through (iii) of this section and for each control period described in paragraph (a)(3) of this section will be an amount equal to the unit’s total tons of SO\textsubscript{2} emissions during the immediately preceding control period.

(ii) The Administrator will adjust the allocation amount in paragraph (a)(4)(i) of this section in accordance with paragraphs (a)(5) through (7) and (12) of this section.

(5) The Administrator will calculate the sum of the CSAPR SO\textsubscript{2} Group 1 allowances determined for all such CSAPR SO\textsubscript{2} Group 1 units under paragraph (a)(4)(i) of this section in the State for such control period.

(6) If the amount of CSAPR SO\textsubscript{2} Group 1 allowances in the new unit set-aside for the State for such control period is greater than or equal to the sum under paragraph (a)(5) of this section, then the Administrator will allocate
the amount of CSAPR \( \text{SO}_2 \) Group 1 allowances determined for each such CSAPR \( \text{SO}_2 \) Group 1 unit under paragraph (a)(4)(i) of this section.

(7) If the amount of CSAPR \( \text{SO}_2 \) Group 1 allowances in the new unit set-aside for the State for such control period is less than the sum under paragraph (a)(5) of this section, then the Administrator will allocate to each such CSAPR \( \text{SO}_2 \) Group 1 unit the amount of the CSAPR \( \text{SO}_2 \) Group 1 allowances determined under paragraph (a)(4)(i) of this section for the unit, multiplied by the amount of CSAPR \( \text{SO}_2 \) Group 1 allowances in the new unit set-aside for such control period, divided by the sum under paragraph (a)(5) of this section, and rounded to the nearest allowance.

(8) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.611(b)(1)(i) and (ii), of the amount of CSAPR \( \text{SO}_2 \) Group 1 allowances allocated under paragraphs (a)(2) through (7) and (12) of this section for such control period to each CSAPR \( \text{SO}_2 \) Group 1 unit eligible for such allocation.

(9) If, after completion of the procedures under paragraphs (a)(5) through (8) of this section for such control period, any unallocated CSAPR \( \text{SO}_2 \) Group 1 allowances remain in the new unit set-aside for the State for such control period, the Administrator will allocate such CSAPR \( \text{SO}_2 \) Group 1 allowances as follows—

(i) The Administrator will determine, for each unit described in paragraph (a)(1) of this section that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of CSAPR \( \text{SO}_2 \) Group 1 allowances referenced in the notice of data availability required under §97.611(b)(1)(i) for the unit for such control period;

(ii) The Administrator will determine the sum of the positive differences determined under paragraph (a)(9)(i) of this section;

(iii) If the amount of unallocated CSAPR \( \text{SO}_2 \) Group 1 allowances remaining in the new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (a)(9)(ii) of this section, then the Administrator will allocate the amount of CSAPR \( \text{SO}_2 \) Group 1 allowances determined for each such CSAPR \( \text{SO}_2 \) Group 1 unit under paragraph (a)(9)(i) of this section; and

(iv) If the amount of unallocated CSAPR \( \text{SO}_2 \) Group 1 allowances remaining in the new unit set-aside for the State for such control period is less than the sum under paragraph (a)(9)(ii) of this section, then the Administrator will allocate to each such CSAPR \( \text{SO}_2 \) Group 1 unit the amount of the CSAPR \( \text{SO}_2 \) Group 1 allowances determined under paragraph (a)(9)(i) of this section, multiplied by the amount of unallocated CSAPR \( \text{SO}_2 \) Group 1 allowances remaining in the new unit set-aside for such control period, divided by the sum under paragraph (a)(9)(ii) of this section, and rounded to the nearest allowance.

(10) If, after completion of the procedures under paragraphs (a)(9) and (12) of this section for such control period, any unallocated CSAPR \( \text{SO}_2 \) Group 1 allowances remain in the new unit set-aside for the State for such control period, the Administrator will allocate to each CSAPR \( \text{SO}_2 \) Group 1 unit that is in the State, is allocated an amount of CSAPR \( \text{SO}_2 \) Group 1 allowances in the notice of data availability issued under §97.611(a)(1), and continues to be allocated CSAPR \( \text{SO}_2 \) Group 1 allowances for such control period in accordance with §97.611(a)(2), an amount of CSAPR \( \text{SO}_2 \) Group 1 allowances equal to the following: The total amount of such remaining unallocated CSAPR \( \text{SO}_2 \) Group 1 allowances in such new unit set-aside, multiplied by the unit’s allocation under §97.611(a) for such control period, divided by the remainder of the amount of tons in the applicable State \( \text{SO}_2 \) Group 1 trading budget minus the sum of the amounts of tons in such new unit set-aside and the Indian country new unit set-aside for the State for such control period, and rounded to the nearest allowance.
(11) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.611(b)(1)(iii), (iv), and (v), of the amount of CSAPR SO₂ Group 1 allowances allocated under paragraphs (a)(9), (10), and (12) of this section for such control period to each CSAPR SO₂ Group 1 unit eligible for such allocation.

(12)(i) Notwithstanding the requirements of paragraphs (a)(2) through (11) of this section, if the calculations of allocations of a new unit set-aside for a control period in a given year under paragraph (a)(7) of this section, paragraphs (a)(6) and (9)(iv) of this section, or paragraphs (a)(6), (9)(i), and (10) of this section would otherwise result in total allocations of such new unit set-aside exceeding the total amount of such new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (a)(7), (9)(iv), or (10) of this section, as applicable, as follows. The Administrator will list the CSAPR SO₂ Group 1 units in descending order based on the amount of such units' allocations under paragraph (a)(7), (9)(iv), or (10) of this section, as applicable, and, in cases of equal allocation amounts, in alphabetical order of the relevant unit's identification number, and will reduce each unit's allocation under paragraph (a)(7), (9)(iv), or (10) of this section in the order in which the units are listed and will repeat this increase process as necessary, until the total allocations of such new unit set-aside equal the total amount of such new unit set-aside.

(b) For each control period in 2015 and thereafter and for the CSAPR SO₂ Group 1 units located in Indian country within the borders of each State, the Administrator will allocate CSAPR SO₂ Group 1 allowances to the CSAPR SO₂ Group 1 units as follows:

(1) The CSAPR SO₂ Group 1 allowances will be allocated to the following CSAPR SO₂ Group 1 units, except as provided in paragraph (b)(10) of this section:

(i) CSAPR SO₂ Group 1 units that are not allocated an amount of CSAPR SO₂ Group 1 allowances in the notice of data availability issued under §97.611(a)(1); or

(ii) For purposes of paragraph (b)(9) of this section, CSAPR SO₂ Group 1 units under §97.611(c)(1)(ii) whose allocation of an amount of CSAPR SO₂ Group 1 allowances for such control period in the notice of data availability issued under §97.611(b)(2)(ii)(B) is covered by §97.611(c)(2) or (3).

(2) The Administrator will establish a separate Indian country new unit set-aside for the State for each such control period. Each such Indian country new unit set-aside will be allocated CSAPR SO₂ Group 1 allowances in an amount equal to the applicable amount of tons of SO₂ emissions as set forth in §97.610(a) and will be allocated additional CSAPR SO₂ Group 1 allowances (if any) in accordance with §97.611(c)(5).

(3) The Administrator will determine, for each CSAPR SO₂ Group 1 unit described in paragraph (b)(1) of this section, an allocation of CSAPR SO₂ Group 1 allowances for the later of the following control periods and for each subsequent control period:
§ 97.612

(i) The control period in 2015; and

(ii) The first control period after the control period in which the CSAPR SO₂ Group 1 unit commences commercial operation.

(4)(i) The allocation to each CSAPR SO₂ annual unit described in paragraph (b)(1)(i) of this section and for each control period described in paragraph (b)(3) of this section will be an amount equal to the unit’s total tons of SO₂ emissions during the immediately preceding control period.

(ii) The Administrator will adjust the allocation amount in paragraph (b)(4)(i) of this section in accordance with paragraphs (b)(5) through (7) and (12) of this section.

(5) The Administrator will calculate the sum of the CSAPR SO₂ Group 1 allowances determined for all such CSAPR SO₂ Group 1 units under paragraph (b)(4)(i) of this section in Indian country within the borders of the State for such control period.

(6) If the amount of CSAPR SO₂ Group 1 allowances in the Indian country new unit set-aside for the State for such control period is greater than or equal to the sum under paragraph (b)(5) of this section, then the Administrator will allocate the amount of CSAPR SO₂ Group 1 allowances determined for each such CSAPR SO₂ Group 1 unit under paragraph (b)(4)(i) of this section.

(7) If the amount of CSAPR SO₂ Group 1 allowances in the Indian country new unit set-aside for the State for such control period is less than the sum under paragraph (b)(5) of this section, then the Administrator will allocate the amount of CSAPR SO₂ Group 1 allowances determined under paragraph (b)(4)(i) of this section for the unit, multiplied by the amount of CSAPR SO₂ Group 1 allowances in the Indian country new unit set-aside for the State for such control period, divided by the sum under paragraph (b)(5) of this section, and rounded to the nearest allowance.

(8) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.611(b)(2)(i) and (ii), of the amount of CSAPR SO₂ Group 1 allowances allocated under paragraphs (b)(2) through (7) and (12) of this section for such control period to each CSAPR SO₂ Group 1 unit eligible for such allocation.

(9) If, after completion of the procedures under paragraphs (b)(5) through (8) of this section for such control period, any unallocated CSAPR SO₂ Group 1 allowances remain in the Indian country new unit set-aside for the State for such control period, the Administrator will allocate such CSAPR SO₂ Group 1 allowances as follows—

(i) The Administrator will determine, for each unit described in paragraph (b)(1) of this section that commenced commercial operation during the period starting January 1 of the year before the year of such control period and ending November 30 of the year of such control period, the positive difference (if any) between the unit’s emissions during such control period and the amount of CSAPR SO₂ Group 1 allowances referenced in the notice of data availability required under §97.611(b)(2)(ii) for the unit for such control period;

(ii) The Administrator will determine the sum of the positive differences determined under paragraph (b)(9)(i) of this section;

(iii) If the amount of unallocated CSAPR SO₂ Group 1 allowances remaining in the Indian country new unit set-aside for the State for such control period is greater than or equal to the sum determined under paragraph (b)(9)(ii) of this section, then the Administrator will allocate the amount of CSAPR SO₂ Group 1 allowances determined for each such CSAPR SO₂ Group 1 unit under paragraph (b)(9)(i) of this section;

(iv) If the amount of unallocated CSAPR SO₂ Group 1 allowances remaining in the Indian country new unit set-aside for the State for such control period is less than the sum under paragraph (b)(9)(ii) of this section, then the Administrator will allocate to each such CSAPR SO₂ Group 1 unit the amount of the CSAPR SO₂ Group 1 allowances determined under paragraph (b)(9)(i) of this section for the unit, multiplied by the amount of unallocated CSAPR SO₂ Group 1 allowances remaining in the Indian country.
Environmental Protection Agency § 97.613

new unit set-aside for such control period, divided by the sum under paragraph (b)(9)(ii) of this section, and rounded to the nearest allowance.

(10) If, after completion of the procedures under paragraphs (b)(9) and (12) of this section for such control period, any unallocated CSAPR SO\textsubscript{2} Group 1 allowances remain in the Indian country new unit set-aside for the State for such control period, the Administrator will:

(i) Transfer such unallocated CSAPR SO\textsubscript{2} Group 1 allowances to the new unit set-aside for the State for such control period; or

(ii) If the State has a SIP revision approved under §52.39(e) or (f) of this chapter covering such control period, include such unallocated CSAPR SO\textsubscript{2} Group 1 allowances in the portion of the State SO\textsubscript{2} Group 1 trading budget that may be allocated for such control period in accordance with such SIP revision.

(11) The Administrator will notify the public, through the promulgation of the notices of data availability described in §97.611(b)(2)(iii), (iv), and (v), of the amount of CSAPR SO\textsubscript{2} Group 1 allowances allocated under paragraphs (b)(9), (10), and (12) of this section for such control period to each CSAPR SO\textsubscript{2} Group 1 unit eligible for such allocation.

(12)(i) Notwithstanding the requirements of paragraphs (b)(2) through (11) of this section, if the calculations of allocations of an Indian country new unit set-aside for a control period in a given year under paragraphs (b)(7), (9)(iv), and (10) of this section would otherwise result in a total allocations of such Indian country new unit set-aside less than the total amount of such Indian country new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (b)(10) of this section, as follows. The Administrator will list the CSAPR SO\textsubscript{2} Group 1 units in descending order based on the amount of such units' allocations under paragraph (b)(10) of this section and, in cases of equal allocation amounts, in alphabetical order of the relevant source's name and numerical order of the relevant unit's identification number, and will increase each unit's allocation under paragraph (b)(10) of this section by one CSAPR SO\textsubscript{2} Group 1 allowance in the order in which the units are listed and will repeat this increase process as necessary, until the total allocations of such Indian country new unit set-aside equal the total amount of such Indian country new unit set-aside.

(ii) Notwithstanding the requirements of paragraphs (b)(10) and (11) of this section, if the calculations of allocations of an Indian country new unit set-aside for a control period in a given year under paragraphs (b)(6), (9)(iii), and (10) of this section would otherwise result in total allocations of such Indian country new unit set-aside exceeding the total amount of such Indian country new unit set-aside, then the Administrator will adjust the results of the calculations under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, and, in cases of equal allocation amounts, in alphabetical order of the relevant source's name and numerical order of the relevant unit's identification number, and will reduce each unit's allocation under paragraph (b)(7), (9)(iv), or (10) of this section, as applicable, by one CSAPR SO\textsubscript{2} Group 1 allowance (but not below zero) in the order in which the units are listed and will repeat this reduction process as necessary, until the total allocations of such Indian country new unit set-aside equal the total amount of such Indian country new unit set-aside.

§ 97.613 Authorization of designated representative and alternate designated representative.

(a) Except as provided under §97.615, each CSAPR SO\textsubscript{2} Group 1 source, including all CSAPR SO\textsubscript{2} Group 1 units at the source, shall have one and only one designated representative, with regard to all matters under the CSAPR SO\textsubscript{2} Group 1 Trading Program.
(1) The designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR SO$_2$ Group 1 units at the source and shall act in accordance with the certification statement in §97.616(a)(4)(iii).

(2) Upon and after receipt by the Administrator of a complete certificate of representation under §97.616:

(i) The designated representative shall be authorized and shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the source and each CSAPR SO$_2$ Group 1 unit at the source in all matters pertaining to the CSAPR SO$_2$ Group 1 Trading Program, notwithstanding any agreement between the designated representative and such owners and operators; and

(ii) The owners and operators of the source and each CSAPR SO$_2$ Group 1 unit at the source shall be bound by any decision or order issued to the designated representative by the Administrator regarding the source or any such unit.

(b) Except as provided under §97.615, each CSAPR SO$_2$ Group 1 source may have one and only one alternate designated representative, who may act on behalf of the designated representative. The agreement by which the alternate designated representative is selected shall include a procedure for authorizing the alternate designated representative to act in lieu of the designated representative.

(1) The alternate designated representative shall be selected by an agreement binding on the owners and operators of the source and all CSAPR SO$_2$ Group 1 units at the source and shall act in accordance with the certification statement in §97.616(a)(4)(iii).

(2) Upon and after receipt by the Administrator of a complete certificate of representation under §97.616:

(i) The alternate designated representative shall be authorized;

(ii) Any representation, action, inaction, or submission by the alternate designated representative shall be deemed to be a representation, action, inaction, or submission by the designated representative; and

(iii) The owners and operators of the source and each CSAPR SO$_2$ Group 1 unit at the source shall be bound by any decision or order issued to the alternate designated representative by the Administrator regarding the source or any such unit.

(c) Except in this section, §97.602, and §§97.614 through 97.618, whenever the term “designated representative” (as distinguished from the term “common designated representative”) is used in this subpart, the term shall be construed to include the designated representative or any alternate designated representative.

§97.614 Responsibilities of designated representative and alternate designated representative.

(a) Except as provided under §97.618 concerning delegation of authority to make submissions, each submission under the CSAPR SO$_2$ Group 1 Trading Program shall be made, signed, and certified by the designated representative or alternate designated representative for each CSAPR SO$_2$ Group 1 source and CSAPR SO$_2$ Group 1 unit for which the submission is made. Each such submission shall include the following certification statement by the designated representative or alternate designated representative: “I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(b) The Administrator will accept or act on a submission made for a CSAPR SO$_2$ Group 1 source or a CSAPR SO$_2$ Group 1 unit only if the submission has
§ 97.615 Changing designated representative and alternate designated representative; changes in owners and operators; changes in units at the source.

(a) Changing designated representative. The designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.616. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new designated representative and the owners and operators of the CSAPR SO$_2$ Group 1 source and the CSAPR SO$_2$ Group 1 units at the source.

(b) Changing alternate designated representative. The alternate designated representative may be changed at any time upon receipt by the Administrator of a superseding complete certificate of representation under §97.616. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate designated representative before the time and date when the Administrator receives the superseding certificate of representation shall be binding on the new alternate designated representative and the designated representative, and the owners and operators of the CSAPR SO$_2$ Group 1 source and the CSAPR SO$_2$ Group 1 units at the source.

(c) Changes in owners and operators.

(1) In the event an owner or operator of a CSAPR SO$_2$ Group 1 source or a CSAPR SO$_2$ Group 1 unit at the source is not included in the list of owners and operators in the certificate of representation under §97.616, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the designated representative and any alternate designated representative of the source or unit, and the decisions and orders of the Administrator, as if the owner or operator were included in such list.

(2) Within 30 days after any change in the owners and operators of a CSAPR SO$_2$ Group 1 source or a CSAPR SO$_2$ Group 1 unit at the source, including the addition or removal of an owner or operator, the designated representative or any alternate designated representative shall submit a revision to the certificate of representation under §97.616 amending the list of owners and operators to reflect the change.

(d) Changes in units at the source. Within 30 days of any change in which units are located at a CSAPR SO$_2$ Group 1 source (including the addition or removal of a unit), the designated representative or any alternate designated representative shall submit a certificate of representation under §97.616 amending the list of units to reflect the change.

(1) If the change is the addition of a unit that operated (other than for purposes of testing by the manufacturer before initial installation) before being located at the source, then the certificate of representation shall identify, in a format prescribed by the Administrator, the entity from whom the unit was purchased or otherwise obtained (including name, address, telephone number, and facsimile number (if any)), the date on which the unit was purchased or otherwise obtained, and the date on which the unit became located at the source.

(2) If the change is the removal of a unit, then the certificate of representation shall identify, in a format prescribed by the Administrator, the entity to which the unit was sold or that otherwise obtained the unit (including name, address, telephone number, and facsimile number (if any)), the date on which the unit was sold or otherwise obtained, and the date on which the unit became no longer located at the source.

§ 97.616 Certificate of representation.

(a) A complete certificate of representation for a designated representative or an alternate designated representative shall include the following elements in a format prescribed by the Administrator:

VerDate Sep<11>2014 13:36 Oct 20, 2017 Jkt 241173 PO 00000 Frm 00499 Fmt 8010 Sfmt 8002 Y:\SGML\241173.XXX 241173nlaroche on DSK9F9SC42PROD with CFR
(1) Identification of the CSAPR SO\textsuperscript{2} Group 1 source, and each CSAPR SO\textsuperscript{2} Group 1 unit at the source, for which the certificate of representation is submitted, including source name, source category and NAICS code (or, in the absence of a NAICS code, an equivalent code), State, plant code, county, latitude and longitude, unit identification number and type, identification number and nameplate capacity (in MWe, rounded to the nearest tenth) of each generator served by each such unit, actual or projected date of commencement of commercial operation, and a statement of whether such source is located in Indian country. If a projected date of commencement of commercial operation is provided, the actual date of commencement of commercial operation shall be provided when such information becomes available.

(2) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the designated representative and any alternate designated representative.

(3) A list of the owners and operators of the CSAPR SO\textsuperscript{2} Group 1 source and of each CSAPR SO\textsuperscript{2} Group 1 unit at the source.

(4) The following certification statements by the designated representative and any alternate designated representative—

(i) “I certify that I was selected as the designated representative or alternate designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CSAPR SO\textsuperscript{2} Group 1 unit at the source.”

(ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR SO\textsuperscript{2} Group 1 Trading Program on behalf of the owners and operators of the source and of each CSAPR SO\textsuperscript{2} Group 1 unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the source or unit.”

(iii) “Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CSAPR SO\textsuperscript{2} Group 1 unit, or where a utility or industrial customer purchases power from a CSAPR SO\textsuperscript{2} Group 1 unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the ‘designated representative’ or ‘alternate designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CSAPR SO\textsuperscript{2} Group 1 unit at the source; and CSAPR SO\textsuperscript{2} Group 1 allowances and proceeds of transactions involving CSAPR SO\textsuperscript{2} Group 1 allowances will be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CSAPR SO\textsuperscript{2} Group 1 allowances by contract, CSAPR SO\textsuperscript{2} Group 1 allowances and proceeds of transactions involving CSAPR SO\textsuperscript{2} Group 1 allowances will be deemed to be held or distributed in accordance with the contract.”

(5) The signature of the designated representative and any alternate designated representative and the dates signed.

(b) Unless otherwise required by the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the Administrator. The Administrator shall not be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(c) A certificate of representation under this section that complies with the provisions of paragraph (a) of this section except that it contains the acronym “TR” in place of the acronym “CSAPR” in the required certification statements will be considered a complete certificate of representation under this section, and the certification statements included in such certificate of representation will be interpreted as if the acronym “CSAPR” appeared in place of the acronym “TR.”

[76 FR 48432, Aug. 8, 2011, as amended at 81 FR 74616, Oct. 26, 2016]

§ 97.617 Objections concerning designated representative and alternate designated representative.

(a) Once a complete certificate of representation under §97.616 has been
submitted and received, the Administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under §97.616 is received by the Administrator.

(b) Except as provided in paragraph (a) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission, of a designated representative or alternate designated representative shall affect any representation, action, inaction, or submission of the designated representative or alternate designated representative or the finality of any decision or order by the Administrator under the CSAPR SO2 Group 1 Trading Program.

(c) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any designated representative or alternate designated representative, including private legal disputes concerning the proceeds of CSAPR SO2 Group 1 allowance transfers.

§97.618 Delegation by designated representative and alternate designated representative.

(a) A designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(b) An alternate designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(c) In order to delegate authority to a natural person to make an electronic submission to the Administrator in accordance with paragraph (a) or (b) of this section, the designated representative or alternate designated representative, as appropriate, must submit to the Administrator a notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(1) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such designated representative or alternate designated representative;

(2) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to in this section as an ‘‘agent’’);

(3) For each such natural person, a list of the type or types of electronic submissions under paragraph (a) or (b) of this section for which authority is delegated to him or her; and

(4) The following certification statements by such designated representative or alternate designated representative:

(i) ‘‘I agree that any electronic submission to the Administrator that is made by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a designated representative or alternate designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.618(d) shall be deemed to be an electronic submission by me.’’

(ii) ‘‘Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.618(d), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.618 is terminated.’’

(d) A notice of delegation submitted under paragraph (c) of this section shall be effective, with regard to the designated representative or alternate designated representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such designated representative or alternate designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph
§ 97.619 [Reserved]  

§ 97.620 Establishment of compliance accounts, assurance accounts, and general accounts.  

(a) Compliance accounts. Upon receipt of a complete certificate of representation under §97.616, the Administrator will establish a compliance account for the CSAPR SO\textsubscript{2} Group 1 source for which the certificate of representation was submitted, unless the source already has a compliance account. The designated representative and any alternate designated representative of the source shall be the authorized account representative and the alternate authorized account representative respectively of the compliance account.  

(b) Assurance accounts. The Administrator will establish assurance accounts for certain owners and operators and States in accordance with §97.625(b)(3).  

(c) General accounts—(1) Application for general account. (i) Any person may apply to open a general account, for the purpose of holding and transferring CSAPR SO\textsubscript{2} Group 1 allowances, by submitting to the Administrator a complete application for a general account. Such application shall designate one and only one authorized account representative and may designate one and only one alternate authorized account representative who may act on behalf of the authorized account representative.  

(A) The authorized account representative and alternate authorized account representative shall be selected by an agreement binding on the persons who have an ownership interest with respect to CSAPR SO\textsubscript{2} Group 1 allowances held in the general account.  

(B) The agreement by which the alternate authorized account representative is selected shall include a procedure for authorizing the alternate authorized account representative to act in lieu of the authorized account representative.  

(ii) A complete application for a general account shall include the following elements in a format prescribed by the Administrator:  

(A) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the authorized account representative and any alternate authorized account representative;  

(B) An identifying name for the general account;  

(C) A list of all persons subject to a binding agreement for the authorized account representative and any alternate authorized account representative to represent their ownership interest with respect to the CSAPR SO\textsubscript{2} Group 1 allowances held in the general account;  

(D) The following certification statement by the authorized account representative and any alternate authorized account representative: “I certify that I was selected as the authorized account representative or the alternate authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CSAPR SO\textsubscript{2} Group 1 allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR SO\textsubscript{2} Group 1 Trading Program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the general account.”  

(E) The signature of the authorized account representative and any alternate authorized account representative and the dates signed.  

(iii) Unless otherwise required by the Administrator, documents of agreement referred to in the application for a general account shall not be submitted to the Administrator. The Administrator shall not be under any obligation to review or evaluate the sufficiency of such documents, if submitted.  

(iv) An application for a general account under paragraph (c)(1) of this
section that complies with the provisions of such paragraph except that it contains the acronym “TR” in place of the acronym “CSAPR” in the required certification statement will be considered a complete application for a general account under such paragraph, and the certification statement included in such application for a general account will be interpreted as if the acronym “CSAPR” appeared in place of the acronym “TR”.

(2) Authorization of authorized account representative and alternate authorized account representative. (i) Upon receipt by the Administrator of a complete application for a general account under paragraph (c)(1) of this section, the Administrator will establish a general account for the person or persons for whom the application is submitted, and upon and after such receipt by the Administrator:

(A) The authorized account representative of the general account shall be authorized and shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CSAPR SO$_2$ Group 1 allowances held in the general account in all matters pertaining to CSAPR SO$_2$ Group 1 Trading Program, notwithstanding any agreement between the authorized account representative and such person.

(B) Any alternate authorized account representative shall be authorized, and any representation, action, inaction, or submission by any alternate authorized account representative shall be deemed to be a representation, action, inaction, or submission by the authorized account representative.

(C) Each person who has an ownership interest with respect to CSAPR SO$_2$ Group 1 allowances held in the general account shall be bound by any decision or order issued to the authorized account representative or alternate authorized account representative by the Administrator regarding the general account.

(ii) Except as provided in paragraph (c)(5) of this section concerning delegation of authority to make submissions, each submission concerning the general account shall be made, signed, and certified by the authorized account representative or any alternate authorized account representative for the persons having an ownership interest with respect to CSAPR SO$_2$ Group 1 allowances held in the general account. Each such submission shall include the following certification statement by the authorized account representative or any alternate authorized account representative: “I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CSAPR SO$_2$ Group 1 allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”

(iii) Except in this section, whenever the term “authorized account representative” is used in this subpart, the term shall be construed to include the authorized account representative or any alternate authorized account representative.

(iv) A certification statement submitted in accordance with paragraph (c)(2)(ii) of this section that contains the acronym “TR” will be interpreted as if the acronym “CSAPR” appeared in place of the acronym “TR”.

(3) Changing authorized account representative and alternate authorized account representative; changes in persons with ownership interest. (i) The authorized account representative of a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (c)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous authorized account representative before the time and date when the Administrator receives the superseding application for a
general account shall be binding on the new authorized account representative and the persons with an ownership interest with respect to the CSAPR SO\(_2\) Group 1 allowances in the general account.

(ii) The alternate authorized account representative of a general account may be changed at any time upon receipt by the Administrator of a superseding complete application for a general account under paragraph (c)(1) of this section. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate authorized account representative before the time and date when the Administrator receives the superseding application for a general account shall be binding on the new alternate authorized account representative, the authorized account representative, and the persons with an ownership interest with respect to the CSAPR SO\(_2\) Group 1 allowances in the general account.

(iii)(A) In the event a person having an ownership interest with respect to CSAPR SO\(_2\) Group 1 allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the authorized account representative and any alternate authorized account representative of the account, and the decisions and orders of the Administrator, as if the person were included in such list.

(B) Within 30 days after any change in the persons having an ownership interest with respect to SO\(_2\) Group 1 allowances in the general account, including the addition or removal of a person, the authorized account representative or any alternate authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CSAPR SO\(_2\) Group 1 allowances in the general account to include the change.

(4) Objections concerning authorized account representative and alternate authorized account representative. (i) Once a complete application for a general account under paragraph (c)(1) of this section has been submitted and received, the Administrator will rely on the application unless and until a superseding complete application for a general account under paragraph (c)(1) of this section is received by the Administrator.

(ii) Except as provided in paragraph (c)(4)(i) of this section, no objection or other communication submitted to the Administrator concerning the authorization, or any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative of a general account shall affect any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative or the finality of any decision or order by the Administrator under the CSAPR SO\(_2\) Group 1 Trading Program.

(iii) The Administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the authorized account representative or any alternate authorized account representative of a general account, including private legal disputes concerning the proceeds of CSAPR SO\(_2\) Group 1 allowance transfers.

(5) Delegation by authorized account representative and alternate authorized account representative. (i) An authorized account representative of a general account may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(ii) An alternate authorized account representative of a general account may delegate, to one or more natural persons, his or her authority to make an electronic submission to the Administrator provided for or required under this subpart.

(iii) In order to delegate authority to a natural person to make an electronic submission to the Administrator in accordance with paragraph (c)(5)(i) or (ii) of this section, the authorized account representative or alternate authorized account representative, as appropriate, must submit to the Administrator a
notice of delegation, in a format prescribed by the Administrator, that includes the following elements:

(A) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such authorized account representative or alternate authorized account representative;

(B) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to in this section as an “agent”);

(C) For each such natural person, a list of the type or types of electronic submissions under paragraph (c)(5)(i) or (ii) of this section for which authority is delegated to him or her;

(D) The following certification statement by such authorized account representative or alternate authorized account representative: “I agree that any electronic submission to the Administrator that is made by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am an authorized account representative or alternate authorized account representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 97.620(c)(5)(iv) shall be deemed to be an electronic submission by me.”; and

(E) The following certification statement by such authorized account representative or alternate authorized account representative: “Until this notice of delegation is superseded by another notice of delegation under 40 CFR 97.620(c)(5)(iv), I agree to maintain an e-mail account and to notify the Administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 97.620(c)(5) is terminated.”.

(iv) A notice of delegation submitted under paragraph (c)(5)(iii) of this section shall be effective, with regard to the authorized account representative or alternate authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the Administrator of a superseding notice of delegation submitted by such authorized account representative or alternate authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(v) Any electronic submission covered by the certification in paragraph (c)(5)(iii)(D) of this section and made in accordance with a notice of delegation effective under paragraph (c)(5)(iv) of this section shall be deemed to be an electronic submission by the authorized account representative or alternate authorized account representative submitting such notice of delegation.

(6) Closing a general account. (i) The authorized account representative or alternate authorized account representative of a general account may submit to the Administrator a request to close the account. Such request shall include a correctly submitted CSAPR SO\textsubscript{2} Group 1 allowance transfer under §97.622 for any CSAPR SO\textsubscript{2} Group 1 allowances in the account to one or more other Allowance Management System accounts.

(ii) If a general account has no CSAPR SO\textsubscript{2} Group 1 allowance transfers to or from the account for a 12-month period or longer and does not contain any CSAPR SO\textsubscript{2} Group 1 allowances, the Administrator may notify the authorized account representative for the account that the account will be closed after 30 days after the notice is sent. The account will be closed after the 30-day period unless, before the end of the 30-day period, the Administrator receives a correctly submitted CSAPR SO\textsubscript{2} Group 1 allowance transfer under §97.622 to the account or a statement submitted by the authorized account representative or alternate authorized account representative demonstrating to the satisfaction of the Administrator good cause as to why the account should not be closed.

(d) Account identification. The Administrator will assign a unique identifying number to each account established under paragraph (a), (b), or (c) of this section.

(e) Responsibilities of authorized account representative and alternate authorized account representative. After
§ 97.621 Recordation of CSAPR SO\(_2\) Group 1 allowance allocations and auction results.

(a) By November 7, 2011, the Administrator will record in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source in accordance with § 97.611(a) for the control period in 2015.

(b) By November 7, 2011, the Administrator will record in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source in accordance with § 97.611(a) for the control period in 2016, unless the State in which the source is located notifies the Administrator in writing by October 17, 2011 of the State’s intent to submit to the Administrator a complete SIP revision by April 1, 2015 meeting the requirements of § 52.39(d)(1) through (4) of this chapter.

(1) If, by April 1, 2015, the State does not submit to the Administrator such complete SIP revision, the Administrator will record by April 15, 2015 in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source in accordance with § 97.611(a) for the control period in 2016.

(2) If the State submits to the Administrator by April 1, 2015, and the Administrator approves by October 1, 2015, such complete SIP revision, the Administrator will record by October 1, 2015 in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source as provided in such approved, complete SIP revision for the control period in 2016.

(3) If the State submits to the Administrator by April 1, 2015, and the Administrator does not approve by October 1, 2015, such complete SIP revision, the Administrator will record by October 1, 2015 in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source in accordance with § 97.611(a) for the control period in 2016.

(c) By July 1, 2016, the Administrator will record in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source in accordance with § 97.611(a), or with a SIP revision approved under § 52.39(e) or (f) of this chapter, for the control period in 2017 and 2018.

(d) By July 1, 2017, the Administrator will record in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR SO\(_2\) Group 1 allowances auctioned to CSAPR SO\(_2\) Group 1 units, in accordance with § 97.611(a), or with a SIP revision approved under § 52.39(e) or (f) of this chapter, for the control period in 2019 and 2020.

(e) By July 1, 2018, the Administrator will record in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source, or in each appropriate Allowance Management System account the CSAPR SO\(_2\) Group 1 allowances auctioned to CSAPR SO\(_2\) Group 1 units, in accordance with § 97.611(a), or with a SIP revision approved under § 52.39(e) or (f) of this chapter, for the control period in 2021 and 2022.

(f) By July 1, 2019 and July 1 of each year thereafter, the Administrator will record in each CSAPR SO\(_2\) Group 1 source’s compliance account the CSAPR SO\(_2\) Group 1 allowances allocated to the CSAPR SO\(_2\) Group 1 units at the source as provided in such approved, complete SIP revision for the control period in 2022.
§ 97.622 Submission of CSAPR SO\textsubscript{2} Group 1 allowance transfers.

(a) An authorized account representative seeking recordation of a CSAPR SO\textsubscript{2} Group 1 allowance transfer shall submit the transfer to the Administrator.

(b) A CSAPR SO\textsubscript{2} Group 1 allowance transfer shall be correctly submitted if:

(1) The transfer includes the following elements, in a format prescribed by the Administrator:

(i) The account numbers established by the Administrator for both the transferor and transferee accounts;

(ii) The serial number of each CSAPR SO\textsubscript{2} Group 1 allowance that is in the transferor account and is to be transferred; and

(iii) The name and signature of the authorized account representative of the transferor account and the date signed; and

(2) When the Administrator attempts to record the transfer, the transferor account includes each CSAPR SO\textsubscript{2} Group 1 allowance identified by serial number in the transfer.
§ 97.623 Recordation of CSAPR SO\textsubscript{2} Group 1 allowance transfers.

(a) Within 5 business days (except as provided in paragraph (b) of this section) of receiving a CSAPR SO\textsubscript{2} Group 1 allowance transfer that is correctly submitted under §97.622, the Administrator will record a CSAPR SO\textsubscript{2} Group 1 allowance transfer by moving each CSAPR SO\textsubscript{2} Group 1 allowance from the transferor account to the transferee account as specified in the transfer.

(b) A CSAPR SO\textsubscript{2} Group 1 allowance transfer to or from a compliance account that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CSAPR SO\textsubscript{2} Group 1 allowances allocated or auctioned for any control period before such allowance transfer deadline will not be recorded until after the Administrator completes the deductions from such compliance account under §97.624 for the control period immediately before such allowance transfer deadline.

(c) Where a CSAPR SO\textsubscript{2} Group 1 allowance transfer is not correctly submitted under §97.622, the Administrator will not record such transfer.

(d) Within 5 business days of recordation of a CSAPR SO\textsubscript{2} Group 1 allowance transfer under paragraphs (a) and (b) of the section, the Administrator will notify the authorized account representatives of both the transferor and transferee accounts.

(e) Within 10 business days of receipt of a CSAPR SO\textsubscript{2} Group 1 allowance transfer that is not correctly submitted under §97.622, the Administrator will notify the authorized account representatives of both accounts subject to the transfer of:
   (1) A decision not to record the transfer, and
   (2) The reasons for such non-recording.

§ 97.624 Compliance with CSAPR SO\textsubscript{2} Group 1 emissions limitation.

(a) Availability for deduction for compliance. CSAPR SO\textsubscript{2} Group 1 allowances are available to be deducted for compliance with a source’s CSAPR SO\textsubscript{2} Group 1 emissions limitation for a control period in a given year only if the CSAPR SO\textsubscript{2} Group 1 allowances:
   (1) Were allocated or auctioned for such control period or a control period in a prior year; and
   (2) Are held in the source’s compliance account as of the allowance transfer deadline for such control period.

(b) Deductions for compliance. After the recordation, in accordance with §97.623, of CSAPR SO\textsubscript{2} Group 1 allowance transfers submitted by the allowance transfer deadline for a control period in a given year, the Administrator will deduct from each source’s compliance account CSAPR SO\textsubscript{2} Group 1 allowances available under paragraph (a) of this section in order to determine whether the source meets the CSAPR SO\textsubscript{2} Group 1 emissions limitation for such control period, as follows:
   (1) Until the amount of CSAPR SO\textsubscript{2} Group 1 allowances deducted equals the number of tons of total SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 1 units at the source for such control period; or
   (2) If there are insufficient CSAPR SO\textsubscript{2} Group 1 allowances to complete the deductions in paragraph (b)(1) of this section, until no more CSAPR SO\textsubscript{2} Group 1 allowances available under paragraph (a) of this section remain in the compliance account.

(c)(1) Identification of CSAPR SO\textsubscript{2} Group 1 allowances by serial number. The authorized account representative for a source’s compliance account may request that specific CSAPR SO\textsubscript{2} Group 1 allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in a given year in accordance with paragraph (b) or (d) of this section. In order to be complete, such request shall be submitted to the Administrator by the allowance transfer deadline for such control period and include, in a format prescribed by the Administrator, the identification of the CSAPR SO\textsubscript{2} Group 1 source and the appropriate serial numbers.

(2) First-in, first-out. The Administrator will deduct CSAPR SO\textsubscript{2} Group 1 allowances under paragraph (b) or (d) of this section from the source’s compliance account in accordance with a complete request under paragraph (c)(1) of this section or, in the absence of such request or in the case of identification of an insufficient amount of
CSAPR SO₂ Group 1 allowances in such request, on a first-in, first-out accounting basis in the following order:

(i) Any CSAPR SO₂ Group 1 allowances that were recorded in the compliance account pursuant to §97.621 and not transferred out of the compliance account, in the order of recordation; and then

(ii) Any other CSAPR SO₂ Group 1 allowances that were transferred to and recorded in the compliance account pursuant to this subpart, in the order of recordation.

(d) Deductions for excess emissions. After making the deductions for compliance under paragraph (b) of this section for a control period in a year in which the CSAPR SO₂ Group 1 source has excess emissions, the Administrator will deduct from the source’s compliance account an amount of CSAPR SO₂ Group 1 allowances, allocated or auctioned for a control period in a prior year or the control period in the year of the excess emissions or in the immediately following year, equal to two times the number of tons of the source’s excess emissions.

e) Recordation of deductions. The Administrator will record in the appropriate compliance account all deductions from such an account under paragraphs (b) and (d) of this section.

§ 97.625 Compliance with CSAPR SO₂ Group 1 assurance provisions.

(a) Availability for deduction. CSAPR SO₂ Group 1 allowances are available to be deducted for compliance with the CSAPR SO₂ Group 1 assurance provisions for a control period in a given year by the owners and operators of a group of one or more CSAPR SO₂ Group 1 sources and units in a State (and Indian country within the borders of such State) only if the CSAPR SO₂ Group 1 allowances:

(1) Were allocated or auctioned for a control period in a prior year or the control period in the given year or in the immediately following year; and

(2) Are held in the assurance account, established by the Administrator for such owners and operators of such group of CSAPR SO₂ Group 1 sources and units in such State (and Indian country within the borders of such State) under paragraph (b)(3) of this section, as of the deadline established in paragraph (b)(4) of this section.

(b) Deductions for compliance. The Administrator will deduct CSAPR SO₂ Group 1 allowances available under paragraph (a) of this section for compliance with the CSAPR SO₂ Group 1 assurance provisions for a State for a control period in a given year in accordance with the following procedures:

(1) By June 1, 2018 and June 1 of each year thereafter, the Administrator will:

(i) Calculate, for each State (and Indian country within the borders of such State), the total SO₂ emissions from all CSAPR SO₂ Group 1 units at CSAPR SO₂ Group 1 sources in the State (and Indian country within the borders of such State) during the control period in the year before the year of this calculation deadline and the amount, if any, by which such total SO₂ emissions exceed the State assurance level as described in §97.606(c)(2)(iii); and

(ii) Promulgate a notice of data availability of the results of the calculations required in paragraph (b)(1)(i) of this section, including separate calculations of the SO₂ emissions from each CSAPR SO₂ Group 1 source.

(2) For each notice of data availability required in paragraph (b)(1)(ii) of this section and for any State (and Indian country within the borders of such State) identified in such notice as having CSAPR SO₂ Group 1 units with total SO₂ emissions exceeding the State assurance level for a control period in a given year, as described in §97.606(c)(2)(iii):

(i) By July 1 immediately after the promulgation of such notice, the designated representative of each CSAPR SO₂ Group 1 source in each such State (and Indian country within the borders of such State) shall submit a statement, in a format prescribed by the Administrator, providing for each CSAPR SO₂ Group 1 unit (if any) at the source that operates during, but is not allocated an amount of CSAPR SO₂ Group 1 allowances for such control period, the unit’s allowable SO₂ emission rate for such control period and, if such rate is expressed in lb per mmBtu, the unit’s heat rate.
(ii) By August 1 immediately after the promulgation of such notice, the Administrator will calculate, for each such State (and Indian country within the borders of such State) and such control period and each common designated representative for such control period for a group of one or more CSAPR SO\textsubscript{2} Group 1 sources and units in the State (and Indian country within the borders of such State), the common designated representative’s share of the total SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 1 units at CSAPR SO\textsubscript{2} Group 1 sources in the State (and Indian country within the borders of such State), the common designated representative’s assurance level, and the amount (if any) of CSAPR SO\textsubscript{2} Group 1 allowances that the owners and operators of such group of sources and units must hold in accordance with the calculation formula in §97.606(c)(2)(i) and will promulgate a notice of data availability of the results of these calculations.

(iii) The Administrator will provide an opportunity for submission of objections to the calculations referenced by the notice of data availability required in paragraph (b)(2)(ii) of this section and the calculations referenced by the relevant notice of data availability required in paragraph (b)(1)(ii) of this section.

(A) Objections shall be submitted by the deadline specified in such notice and shall be limited to addressing whether the calculations referenced in the relevant notice required under paragraph (b)(1)(ii) of this section and referenced in the notice required under paragraph (b)(2)(ii) of this section are in accordance with §97.606(c)(2)(iii), §§97.606(b) and 97.630 through 97.635, the definitions of “common designated representative”, “common designated representative’s assurance level”, and “common designated representative’s share” in §97.602, and the calculation formula in §97.606(c)(2)(i).

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(iii)(A) of this section. By October 1 immediately after the promulgation of such notice, the Administrator will promulgate a notice of data availability of the calculations incorporating any adjustments that the Administrator determines to be necessary and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iii)(A) of this section.

(3) For any State (and Indian country within the borders of such State) referenced in each notice of data availability required in paragraph (b)(2)(iii)(B) of this section as having CSAPR SO\textsubscript{2} Group 1 units with total SO\textsubscript{2} emissions exceeding the State assurance level for a control period in a given year, the Administrator will establish one assurance account for each set of owners and operators referenced, in the notice of data availability required under paragraph (b)(2)(iii)(B) of this section, as all of the owners and operators of a group of CSAPR SO\textsubscript{2} Group 1 sources and units in the State (and Indian country within the borders of such State) having a common designated representative for such control period and as being required to hold CSAPR SO\textsubscript{2} Group 1 allowances.

(4)(i) As of midnight of November 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section, the owners and operators described in paragraph (b)(3) of this section shall hold in the assurance account established for them and for the appropriate CSAPR SO\textsubscript{2} Group 1 sources, CSAPR SO\textsubscript{2} Group 1 units, and State (and Indian country within the borders of such State) under paragraph (b)(3) of this section a total amount of CSAPR SO\textsubscript{2} Group 1 allowances, available for deduction under paragraph (a) of this section, equal to the amount such owners and operators are required to hold with regard to such sources, units and State (and Indian country within the borders of such State) as calculated by the Administrator and referenced in such notice.

(ii) Notwithstanding the allowance-holding deadline specified in paragraph (b)(4)(i) of this section, if November 1 is not a business day, then such allowance-holding deadline shall be midnight of the first business day thereafter.

(5) After November 1 (or the date described in paragraph (b)(4)(ii) of this
section) immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section and after the recordation, in accordance with §97.623, of CSAPR SO\textsubscript{2} Group 1 allowances transfers submitted by midnight of such date, the Administrator will determine whether the owners and operators described in paragraph (b)(3) of this section hold, in the assurance account for the appropriate CSAPR SO\textsubscript{2} Group 1 sources, CSAPR SO\textsubscript{2} Group 1 units, and State (and Indian country within the borders of such State) established under paragraph (b)(3) of this section, the amount of CSAPR SO\textsubscript{2} Group 1 allowances available under paragraph (a) of this section that the owners and operators are required to hold with regard to such sources, units, and State (and Indian country within the borders of such State) as calculated by the Administrator and referenced in the notice required in paragraph (b)(2)(iii)(B) of this section.

(6) Notwithstanding any other provision of this subpart and any revision, made by or submitted to the Administrator after the promulgation of the notice of data availability required in paragraph (b)(2)(iii)(B) of this section for a control period in a given year, of any data used in making the calculations referenced in such notice, the amounts of CSAPR SO\textsubscript{2} Group 1 allowances that the owners and operators are required to hold in accordance with §97.606(c)(2)(i) for such control period with regard to the CSAPR SO\textsubscript{2} Group 1 sources, CSAPR SO\textsubscript{2} Group 1 units, and State (and Indian country within the borders of such State) involved, provided that such litigation under part 78 of this chapter, or the proceeding under part 78 of this chapter that resulted in the decision appealed in such litigation under section 307 of the Clean Air Act, was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.

(ii) If any such data are revised by the owners and operators of a CSAPR SO\textsubscript{2} Group 1 source and CSAPR SO\textsubscript{2} Group 1 unit whose designated representative submitted such data under paragraph (b)(2)(i) of this section, as a result of a decision in or settlement of litigation concerning such submission, then the Administrator will use the data as so revised to recalculate the amounts of CSAPR SO\textsubscript{2} Group 1 allowances that owners and operators are required to hold in accordance with the calculation formula in §97.606(c)(2)(i) for such control period with regard to the CSAPR SO\textsubscript{2} Group 1 sources, CSAPR SO\textsubscript{2} Group 1 units, and State (and Indian country within the borders of such State) involved, provided that such litigation was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.

(iii) If the revised data are used to recalculate, in accordance with paragraphs (b)(6)(i) and (ii) of this section, the amount of CSAPR SO\textsubscript{2} Group 1 allowances that the owners and operators are required to hold for such control period with regard to the CSAPR SO\textsubscript{2} Group 1 sources, CSAPR SO\textsubscript{2} Group 1 units, and State (and Indian country within the borders of such State) involved—

(A) Where the amount of CSAPR SO\textsubscript{2} Group 1 allowances that the owners and operators are required to hold increases as a result of the use of all such revised data, the Administrator will establish a new, reasonable deadline on which the owners and operators shall hold the additional amount of CSAPR SO\textsubscript{2} Group 1 allowances in the assurance account established by the Administrator for the appropriate CSAPR SO\textsubscript{2} Group 1 sources, CSAPR SO\textsubscript{2} Group
§ 97.626 Banking.

(a) A CSAPR SO₂ Group 1 allowance may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (b) of this section.

(b) Any CSAPR SO₂ Group 1 allowance that is held in a compliance account or a general account will remain in such account unless and until the CSAPR SO₂ Group 1 allowance is deducted or transferred under §97.611(c), §97.623, §97.624, §97.625, §97.627, or §97.628.

§ 97.627 Account error.

The Administrator may, at his or her sole discretion and on his or her own motion, correct any error in any Allowance Management System account. Within 10 business days of making such correction, the Administrator will notify the authorized account representative for the account.

§ 97.628 Administrator’s action on submissions.

(a) The Administrator may review and conduct independent audits concerning any submission under the CSAPR SO₂ Group 1 Trading Program and make appropriate adjustments of the information in the submission.

(b) The Administrator may deduct CSAPR SO₂ Group 1 allowances from or transfer CSAPR SO₂ Group 1 allowances to a compliance account or an assurance account, based on the information in a submission, as adjusted under paragraph (a) of this section, and record such deductions and transfers.

§ 97.629 [Reserved]

§ 97.630 General monitoring, recordkeeping, and reporting requirements.

The owners and operators, and to the extent applicable, the designated representative, of a CSAPR SO₂ Group 1 unit, shall comply with the monitoring, recordkeeping, and reporting requirements as provided in this subpart and subparts F and G of part 75 of this chapter. For purposes of applying such requirements, the definitions in §97.602 and in §72.2 of this chapter shall

apply, the terms “affected unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) in part 75 of this chapter shall be deemed to refer to the terms “CSAPR SO₂ Group 1 unit,” “designated representative,” and “continuous emission monitoring system” (or “CEMS”) respectively as defined in §97.602, and the term “newly affected unit” shall be deemed to mean “newly affected CSAPR SO₂ Group 1 unit”. The owner or operator of a unit that is not a CSAPR SO₂ Group 1 unit but that is monitored under §75.16(b)(2) of this chapter shall comply with the same monitoring, recordkeeping, and reporting requirements as a CSAPR SO₂ Group 1 unit.

(a) Requirements for installation, certification, and data accounting. The owner or operator of each CSAPR SO₂ Group 1 unit shall:

(1) Install all monitoring systems required under this subpart for monitoring SO₂ mass emissions and individual unit heat input (including all systems required to monitor SO₂ concentration, stack gas moisture content, stack gas flow rate, CO₂ or O₂ concentration, and fuel flow rate, as applicable, in accordance with §§75.11 and 75.16 of this chapter);

(2) Successfully complete all certification tests required under §97.631 and meet all other requirements of this subpart and part 75 of this chapter applicable to the monitoring systems under paragraph (a)(1) of this section; and

(3) Record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section.

(b) Compliance deadlines. Except as provided in paragraph (e) of this section, the owner or operator of a CSAPR SO₂ Group 1 unit shall meet the monitoring system certification and other requirements of paragraphs (a)(1) and (2) of this section on or before the later of the following dates and shall record, report, and quality-assure the data from the monitoring systems under paragraph (a)(1) of this section on and after the later of the following dates:

(1) January 1, 2015; or

(2) 180 calendar days after the date on which the unit commences commercial operation.

(3) The owner or operator of a CSAPR SO₂ Group 1 unit for which construction of a new stack or flue or installation of add-on SO₂ emission controls is completed after the applicable deadline under paragraph (b)(1) or (2) of this section shall meet the requirements of §75.4(e)(1) through (4) of this chapter, except that:

(i) Such requirements shall apply to the monitoring systems required under §97.630 through §97.635, rather than the monitoring systems required under part 75 of this chapter;

(ii) SO₂ concentration, stack gas moisture content, stack gas volumetric flow rate, and O₂ or CO₂ concentration data shall be determined and reported, rather than the data listed in §75.4(e)(2) of this chapter; and

(iii) Any petition for another procedure under §75.4(e)(2) of this chapter shall be submitted under §97.635, rather than §75.66 of this chapter.

(c) Reporting data. The owner or operator of a CSAPR SO₂ Group 1 unit that does not meet the applicable compliance date set forth in paragraph (b) of this section for any monitoring system under paragraph (a)(1) of this section shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for SO₂ concentration, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine SO₂ mass emissions and heat input in accordance with §75.31(b)(2) or (c)(3) of this chapter or section 2.4 of appendix D to part 75 of this chapter, as applicable.

(d) Prohibitions. (1) No owner or operator of a CSAPR SO₂ Group 1 unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this subpart without having obtained prior written approval in accordance with §97.635.

(2) No owner or operator of a CSAPR SO₂ Group 1 unit shall operate the unit so as to discharge, or allow to be discharged, SO₂ to the atmosphere without accounting for all such SO₂ in accordance with the applicable provisions of this subpart and part 75 of this chapter.
§ 97.631 Initial monitoring system certification and recertification procedures.

(a) The owner or operator of a CSAPR SO_2 Group 1 unit shall be exempt from the initial certification requirements of this section for a monitoring system under §97.630(a)(1) if the following conditions are met:

1. The monitoring system has been previously certified in accordance with part 75 of this chapter; and
2. The applicable quality-assurance and quality-control requirements of §75.21 of this chapter and appendices B and D to part 75 of this chapter are fully met for the certified monitoring system described in paragraph (a)(1) of this section.

(b) The recertification provisions of this section shall apply to a monitoring system under §97.630(a)(1) that is exempt from initial certification requirements under paragraph (a) of this section.

(c) [Reserved]

(d) Except as provided in paragraph (a) of this section, the owner or operator of a CSAPR SO_2 Group 1 unit shall comply with the following initial certification and recertification procedures, for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under appendix D to part 75 of this chapter) under §97.630(a)(1). The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under §75.19 of this chapter or that qualifies to use an alternative monitoring system under subpart E of part 75 of this chapter shall comply with the procedures in paragraph (e) or (f) of this section respectively.

(1) Requirements for initial certification.

The owner or operator shall ensure that each continuous monitoring system under §97.630(a)(1) (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under §75.20 of this chapter by the applicable deadline in §97.630(b). In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this subpart in a location where no such monitoring system was previously installed, initial certification in accordance with §75.20 of this chapter is required.

(2) Requirements for recertification.

Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under §97.630(a)(1)
that may significantly affect the ability of the system to accurately measure or record SO₂ mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of §75.21 of this chapter or appendix B to part 75 of this chapter, the owner or operator shall recertify the monitoring system in accordance with §75.20(b) of this chapter. Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit’s operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with §75.20(b) of this chapter. Examples of changes to a continuous emission monitoring system that require recertification include replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system under §97.630(a)(1) is subject to the recertification requirements in §75.20(g)(6) of this chapter.

(ii) Notification of certification. The designated representative shall submit to the appropriate EPA Regional Office and the Administrator written notice of the dates of certification testing, in accordance with §75.20(b)(5) of this chapter.

(iv) Certification application approval process. The Administrator will issue a written notice of approval or disapproval of the certification application to the owner or operator within 120 days of receipt of the complete certification application under paragraph (d)(3)(ii) of this section. In the event the Administrator does not issue such a notice within such 120-day period, each monitoring system that meets the applicable performance requirements of part 75 of this chapter and is included in the certification application will be deemed certified for use under the CSAPR SO₂ Group 1 Trading Program.

(A) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of part 75 of this chapter, then the Administrator will issue a written notice of approval of the certification application within 120 days of receipt.

(B) Incomplete application notice. If the certification application is not complete, then the Administrator will issue a written notice of incompleteness that sets a reasonable date by
§ 97.632 Monitoring system out-of-control periods.

(a) General provisions. Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of part 75 of this chapter, data shall be substituted using the applicable missing data procedures in §75.20 of this chapter.

(b) Audit recertification. The designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (d)(3)(i) and (ii) of this section.

(c) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the Administrator’s notice of disapproval, no later than 30 unit operating days after the date of issuance of the notice of disapproval.

(d) Procedures for loss of certification. If the Administrator issues a notice of disapproval of a certification application under paragraph (d)(3)(iv)(C) of this section, then:

(1) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under §75.20(a)(4)(iii), §75.20(g)(7), or §75.21(e) of this chapter and continuing until the applicable date and hour specified under §75.20(a)(5)(i) or (g)(7) of this chapter:

(i) For a disapproved SO\(_2\) pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of SO\(_2\) and the maximum potential flow rate, as defined in sections 2.1.1.1 and 2.1.4.1 of appendix A to part 75 of this chapter.

(ii) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO\(_2\) concentration or the minimum potential O\(_2\) concentration (as applicable), as defined in sections 2.1.5, 2.1.3.1, and 2.1.3.2 of appendix A to part 75 of this chapter.

(iii) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in section 2.4.2.1 of appendix D to part 75 of this chapter.

[76 FR 48432, Aug. 8, 2011, as amended at 81 FR 74618, Oct. 26, 2016]
subpart D or appendix D to part 75 of this chapter.

(b) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under §97.631 or the applicable provisions of part 75 of this chapter, both at the time of the initial certification or recertification application submission and at the time of the audit, the Administrator will issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the Administrator or any State or permitting authority. By issuing the notice of disapproval, the Administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in §97.631 for each disapproved monitoring system.

§ 97.633 Notifications concerning monitoring.

The designated representative of a CSAPR SO$_2$ Group 1 unit shall submit written notice to the Administrator in accordance with §75.61 of this chapter.

§ 97.634 Recordkeeping and reporting.

(a) General provisions. The designated representative shall comply with all recordkeeping and reporting requirements in paragraphs (b) through (e) of this section, the applicable recordkeeping and reporting requirements in subparts F and G of part 75 of this chapter, and the requirements of §97.614(a).

(b) Monitoring plans. The owner or operator of a CSAPR SO$_2$ Group 1 unit shall comply with the requirements of §75.62 of this chapter.

(c) Certification applications. The designated representative shall submit an application to the Administrator within 45 days after completing all initial certification or recertification tests required under §97.631, including the information required under §75.63 of this chapter.

(d) Quarterly reports. The designated representative shall submit quarterly reports, as follows:

1. The designated representative shall report the SO$_2$ mass emissions data and heat input data for a CSAPR SO$_2$ Group 1 unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with the later of:
   (i) The calendar quarter covering January 1, 2015 through March 31, 2015; or
   (ii) The calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under §97.630(b).

2. The designated representative shall submit each quarterly report to the Administrator within 30 days after the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in §75.64 of this chapter.

3. For CSAPR SO$_2$ Group 1 units that are also subject to the Acid Rain Program, CSAPR NO$_x$ Annual Trading Program, CSAPR NO$_x$ Ozone Season Group 1 Trading Program, or CSAPR NO$_x$ Ozone Season Group 2 Trading Program, quarterly reports shall include the applicable data and information required by subparts F through H of part 75 of this chapter as applicable, in addition to the SO$_2$ mass emission data, heat input data, and other information required by this subpart.

4. The Administrator may review and conduct independent audits of any quarterly report in order to determine whether the quarterly report meets the requirements of this subpart and part 75 of this chapter, including the requirement to use substitute data.
§ 97.635 Petitions for alternatives to monitoring, recordkeeping, or reporting requirements.

(a) The designated representative of a CSAPR SO₂ Group 1 unit may submit a petition under §75.66 of this chapter to the Administrator, requesting approval to apply an alternative to any requirement of §§97.630 through 97.634.

(b) A petition submitted under paragraph (a) of this section shall include sufficient information for the evaluation of the petition, including, at a minimum, the following information:

(1) Identification of each unit and source covered by the petition;

(2) A detailed explanation of why the proposed alternative is being suggested in lieu of the requirement;

(3) A description and diagram of any equipment and procedures used in the proposed alternative;

(4) A demonstration that the proposed alternative is consistent with the purposes of the requirement for which the alternative is proposed and with the purposes of this subpart and part 75 of this chapter and that any adverse effect of approving the alternative will be de minimis; and

(5) Any other relevant information that the Administrator may require.

(c) Use of an alternative to any requirement referenced in paragraph (a) of this section is in accordance with this subpart only to the extent that the petition is approved in writing by the Administrator and that such use is in accordance with such approval.

78 FR 48432, Aug. 8, 2011, as amended at 81 FR 74618

Subpart DDDDD—CSAPR SO₂ Group 2 Trading Program

SOURCE: 76 FR 48458, Aug. 8, 2011, unless otherwise noted.

§ 97.702 Definitions.

The terms used in this subpart shall have the meanings set forth in this section as follows, provided that any term that includes the acronym “CSAPR” shall be considered synonymous with a term that is used in a SIP revision approved by the Administrator under § 52.38 or § 52.39 of this chapter and that is substantively identical except for the inclusion of the acronym “TR” in place of the acronym “CSAPR”:

Acid Rain Program means a multi-state SO$_2$ and NO$_x$ air pollution control and emission reduction program established by the Administrator under title IV of the Clean Air Act and parts 72 through 78 of this chapter.

Administrator means the Administrator of the United States Environmental Protection Agency or the Director of the Clean Air Markets Division (or its successor determined by the Administrator) of the United States Environmental Protection Agency, the Administrator's duly authorized representative under this subpart.

Allocate or allocation means, with regard to CSAPR SO$_2$ Group 2 allowances, the determination by the Administrator, State, or permitting authority, in accordance with this subpart and any SIP revision submitted by the State and approved by the Administrator under § 52.38(g), (h), or (i) of this chapter, of the amount of such CSAPR SO$_2$ Group 2 allowances to be initially credited, at no cost to the recipient, to:

(1) A CSAPR SO$_2$ Group 2 unit;

(2) A new unit set-aside;

(3) An Indian country new unit set-aside; or

(4) An entity not listed in paragraphs (1) through (3) of this definition;

(5) Provided that, if the Administrator, State, or permitting authority initially credits, to a CSAPR SO$_2$ Group 2 unit qualifying for an initial credit, a credit in the amount of zero CSAPR SO$_2$ Group 2 allowances, the CSAPR SO$_2$ Group 2 unit will be treated as being allocated an amount (i.e., zero) of CSAPR SO$_2$ Group 2 allowances.

Allowable SO$_2$ emission rate means, for a unit, the most stringent State or federal SO$_2$ emission rate limit (in lb/MWh or, if in lb/mmBtu, converted to lb/MWh by multiplying it by the unit’s heat rate in mmBtu/MWh) that is applicable to the unit and covers the longest averaging period not exceeding one year.

Allowance Management System means the system by which the Administrator records allocations, auctions, transfers, and deductions of CSAPR SO$_2$ Group 2 allowances under the CSAPR SO$_2$ Group 2 Trading Program. Such allowances are allocated, auctioned, recorded, held, transferred, or deducted only as whole allowances.

Allowance Management System account means an account in the Allowance Management System established by the Administrator for purposes of recording the allocation, auction, holding, transfer, or deduction of CSAPR SO$_2$ Group 2 allowances.

Allowance transfer deadline means, for a control period in a given year, midnight of March 1 (if it is a business day), or midnight of the first business day thereafter (if March 1 is not a business day), immediately after such control period and is the deadline by which a CSAPR SO$_2$ Group 2 allowance transfer must be submitted for recordation in a CSAPR SO$_2$ Group 2 source’s compliance account in order to be available for use in complying with the source’s CSAPR SO$_2$ Group 2 emissions limitation for such control period in accordance with §§ 97.706 and 97.724.

Alternate designated representative means, for a CSAPR SO$_2$ Group 2 source and each CSAPR SO$_2$ Group 2 unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with
this subpart, to act on behalf of the designated representative in matters pertaining to the CSAPR SO₂ Group 2 Trading Program. If the CSAPR SO₂ Group 2 source is also subject to the Acid Rain Program, CSAPR NOₓ Annual Trading Program, CSAPR NOₓ Ozone Season Group 1 Trading Program, or CSAPR NOₓ Ozone Season Group 2 Trading Program, then this natural person shall be the same natural person as the alternate designated representative as defined in the respective program.

Assurance account means an Allowance Management System account, established by the Administrator under §97.725(b)(3) for certain owners and operators of a group of one or more CSAPR SO₂ Group 2 sources and units in a given State (and Indian country within the borders of such State), in which are held CSAPR SO₂ Group 2 allowances available for use for a control period in a given year in complying with the CSAPR SO₂ Group 2 assurance provisions in accordance with §§97.706 and 97.725.

Auction means, with regard to CSAPR SO₂ Group 2 allowances, the sale to any person by a State or permitting authority, in accordance with a SIP revision submitted by the State and approved by the Administrator under §52.39(h) or (i) of this chapter, of such CSAPR SO₂ Group 2 allowances to be initially recorded in an Allowance Management System account.

Authorized account representative means, for a general account, the natural person who is authorized, in accordance with this subpart, to transfer and otherwise dispose of CSAPR SO₂ Group 2 allowances held in the general account and, for a CSAPR SO₂ Group 2 source’s compliance account, the designated representative of the source.

Automated data acquisition and handling system or DAHS means the component of the continuous emission monitoring system, or other emissions monitoring system approved for use under this subpart, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by this subpart.

Biomass means—
(1) Any organic material grown for the purpose of being converted to energy;
(2) Any organic byproduct of agriculture that can be converted into energy; or
(3) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other material that is nonmerchantable for other purposes, and that is:
   (i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or byproduct from conversion of trees to merchantable material; or
   (ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.

Boiler means an enclosed fossil- or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium.

Bottoming-cycle unit means a unit in which the energy input to the unit is first used to produce useful thermal energy, where at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.

Business day means a day that does not fall on a weekend or a federal holiday.

Certifying official means a natural person who is:
(1) For a corporation, a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function or any other person who performs similar policy- or decision-making functions for the corporation;
(2) For a partnership or sole proprietorship, a general partner or the proprietor respectively; or
(3) For a local government entity or State, federal, or other public agency, a principal executive officer or ranking elected official.

Clean Air Act means the Clean Air Act, 42 U.S.C. 7401, et seq.
Coal means “coal” as defined in §72.2 of this chapter.
Coal-derived fuel means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.
Cogeneration system means an integrated group, at a source, of equipment (including a boiler, or combustion turbine, and a generator) designed to produce useful thermal energy for industrial, commercial, heating, or cooling purposes and electricity through the sequential use of energy.
Cogeneration unit means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a topping-cycle unit or a bottoming-cycle unit:
(1) Operating as part of a cogeneration system; and
(2) Producing on an annual average basis—
(i) For a topping-cycle unit,
(A) Useful thermal energy not less than 5 percent of total energy output; and
(B) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 percent of total energy input, if useful thermal energy produced is 15 percent or more of total energy output, or not less than 45 percent of total energy input, if useful thermal energy produced is less than 15 percent of total energy output.
(ii) For a bottoming-cycle unit, useful power not less than 45 percent of total energy input;
(3) Provided that the requirements in paragraph (2) of this definition shall not apply to a calendar year referenced in paragraph (2) of this definition during which the unit did not operate at all;
(4) Provided that the total energy input under paragraphs (2)(i)(B) and (2)(ii) of this definition shall equal the unit’s total energy input from all fuel, except biomass if the unit is a boiler; and
(5) Provided that, if, throughout its operation during the 12-month period or a calendar year referenced in paragraph (2) of this definition, a unit is operated as part of a cogeneration system and the cogeneration system meets on a system-wide basis the requirement in paragraph (2)(i)(B) or (2)(ii) of this definition, the unit shall be deemed to meet such requirement during that 12-month period or calendar year.
Combustion turbine means an enclosed device comprising:
(1) If the device is simple cycle, a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and
(2) If the device is combined cycle, the equipment described in paragraph (1) of this definition and any associated duct burner, heat recovery steam generator, and steam turbine.
Commence commercial operation means, with regard to a unit:
(1) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in §97.705.
(i) For a unit that is a CSAPR SO2 Group 2 unit under §97.704 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that subsequently undergoes a physical change or is moved to a new location or source, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.
(ii) For a unit that is a CSAPR SO2 Group 2 unit under §97.704 on the later of January 1, 2005 or the date the unit commences commercial operation as defined in the introductory text of paragraph (1) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.
(2) Notwithstanding paragraph (1) of this definition and except as provided in §97.705, for a unit that is not a CSAPR SO2 Group 2 unit under §97.704 on the later of January 1, 2005 or the date the unit commences commercial
operation as defined in the introductory text of paragraph (1) of this definition, the unit’s date for commencement of commercial operation shall be the date on which the unit becomes a CSAPR SO\textsubscript{2} Group 2 unit under §97.704.

(i) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that subsequently undergoes a physical change or is moved to a different location or source, such date shall remain the date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

(ii) For a unit with a date for commencement of commercial operation as defined in the introductory text of paragraph (2) of this definition and that is subsequently replaced by a unit at the same or a different source, such date shall remain the replaced unit’s date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (1) or (2) of this definition as appropriate.

Common designated representative means, with regard to a control period in a given year, a designated representative where, as of April 1 immediately after the allowance transfer deadline for such control period, the same natural person is authorized under §§97.713(a) and 97.715(a) as the designated representative for a group of one or more CSAPR SO\textsubscript{2} Group 2 sources and units located in a State (and Indian country within the borders of such State).

Common designated representative’s assurance level means, with regard to a specific common designated representative and a State (and Indian country within the borders of such State) and control period in a given year for which the State assurance level is exceeded as described in §97.706(c)(2)(iii), the common designated representative’s share of the State SO\textsubscript{2} Group 2 trading budget with the variability limit for the State for such control period.

Common designated representative’s share means, with regard to a specific common designated representative for a control period in a given year:

(1) With regard to a total amount of SO\textsubscript{2} emissions from all CSAPR SO\textsubscript{2} Group 2 units in a State (and Indian country within the borders of such State) during such control period, the total tonnage of SO\textsubscript{2} emissions during such control period from a group of one or more CSAPR SO\textsubscript{2} Group 2 units located in such State (and such Indian country) and having the common designated representative for such control period;

(2) With regard to a State SO\textsubscript{2} Group 2 trading budget with the variability limit for such control period, the amount (rounded to the nearest allowance) equal to the sum of the total amount of CSAPR SO\textsubscript{2} Group 2 allowances allocated for such control period to a group of one or more CSAPR SO\textsubscript{2} Group 2 units located in the State (and Indian country within the borders of such State) and having the common designated representative for such control period and the total amount of CSAPR SO\textsubscript{2} Group 2 allowances purchased by an owner or operator of such CSAPR SO\textsubscript{2} Group 2 units in an auction for such control period and submitted by the State or the permitting authority to the Administrator for recordation in the compliance accounts for such CSAPR SO\textsubscript{2} Group 2 units in accordance with the CSAPR SO\textsubscript{2} Group 2 allowance auction provisions in a SIP revision approved by the Administrator under §52.39(h) or (i) of this chapter, multiplied by the sum of the State SO\textsubscript{2} Group 2 trading budget under §97.710(a) and the State’s variability limit under §97.710(b) for such control period and divided by such State SO\textsubscript{2} Group 2 trading budget;

(3) Provided that, in the case of a unit that operates during, but has no amount of CSAPR SO\textsubscript{2} Group 2 allowances allocated under §§97.711 and 97.712 for, such control period, the unit shall be treated, solely for purposes of this definition, as being allocated an amount (rounded to the nearest allowance) of CSAPR SO\textsubscript{2} Group 2 allowances for such control period equal to the unit’s allowable SO\textsubscript{2} emission rate multiplied by a capacity factor of 0.85 (if the unit is a boiler combusting any
amount of coal or coal-derived fuel during such control period), 0.24 (if the unit is a simple combustion turbine during such control period), 0.67 (if the unit is a combined cycle unit during such control period), 0.74 (if the unit is an integrated coal gasification combined cycle unit during such control period), or 0.36 (for any other unit), multiplied by the unit’s maximum hourly load as reported in accordance with this subpart and by 8,760 hours/control period, and divided by 2,000 lb/ton.

*Common stack* means a single flue through which emissions from 2 or more units are exhausted.

*Compliance account* means an Allowance Management System account, established by the Administrator for a CSAPR SO\textsubscript{2} Group 2 source under this subpart, in which any CSAPR SO\textsubscript{2} Group 2 allowance allocations to the CSAPR SO\textsubscript{2} Group 2 units at the source are recorded and in which are held any CSAPR SO\textsubscript{2} Group 2 allowances available for use for a control period in a given year in complying with the source’s CSAPR SO\textsubscript{2} Group 2 emissions limitation in accordance with §§97.706 and 97.724.

*Continuous emission monitoring system* or *CEMS* means the equipment required under this subpart to sample, analyze, measure, and provide, by means of readings recorded at least once every 15 minutes and using an automated data acquisition and handling system (DAHS), a permanent record of SO\textsubscript{2} emissions, stack gas volumetric flow rate, stack gas moisture content, and O\textsubscript{3} or CO\textsubscript{2} concentration (as applicable), in a manner consistent with part 75 of this chapter and §§97.730 through 97.735. The following systems are the principal types of continuous emission monitoring systems:

1. A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour (scfh);
2. A SO\textsubscript{2} monitoring system, consisting of a SO\textsubscript{2} pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of SO\textsubscript{2} emissions, in parts per million (ppm);
3. A moisture monitoring system, as defined in §75.11(b)(2) of this chapter and providing a permanent, continuous record of the stack gas moisture content, in percent H\textsubscript{2}O;
4. A CO\textsubscript{2} monitoring system, consisting of a CO\textsubscript{2} pollutant concentration monitor (or an O\textsubscript{3} monitor plus suitable mathematical equations from which the CO\textsubscript{2} concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO\textsubscript{2} emissions, in percent CO\textsubscript{2}; and
5. An O\textsubscript{3} monitoring system, consisting of an O\textsubscript{3} concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O\textsubscript{3}, in percent O\textsubscript{3}.

*Control period* means the period starting January 1 of a calendar year, except as provided in §§97.706(c)(3), and ending on December 31 of the same year, inclusive.

*CSAPR NO\textsubscript{X} Annual Trading Program* means a multi-state NO\textsubscript{X} air pollution control and emission reduction program established in accordance with subpart AAAAA of this part and §52.38(a) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(a)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(a)(5) of this chapter), as a means of mitigating interstate transport of fine particulates and NO\textsubscript{X}.

*CSAPR NO\textsubscript{X} Ozone Season Group 1 Trading Program* means a multi-state NO\textsubscript{X} air pollution control and emission reduction program established in accordance with subpart BBBBB of this part and §52.38(b) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under §52.38(b)(3) or (4) of this chapter or that is established in a SIP revision approved by the Administrator under §52.38(b)(5) of this chapter), as a means of mitigating interstate transport of ozone and NO\textsubscript{X}.

*CSAPR NO\textsubscript{X} Ozone Season Group 2 Trading Program* means a multi-state...
§ 97.702  NOx air pollution control and emission reduction program established in accordance with subpart EEEEEE of this part and § 52.38(b)(1), (b)(2)(i) and (iii), (b)(6) through (11), and (b)(13) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under § 52.38(b)(7) or (8) of this chapter or that is established in a SIP revision approved by the Administrator under § 52.38(b)(6) or (9) of this chapter), as a means of mitigating interstate transport of ozone and NOx.

CSAPR SO2 Group 2 allowance means a limited authorization issued and allocated or auctioned by the Administrator under this subpart, or by a State or permitting authority under a SIP revision approved by the Administrator under § 52.38(g), (h), or (i) of this chapter, to emit one ton of SO2 during a control period of the specified calendar year for which the authorization is allocated or auctioned or of any calendar year thereafter under the CSAPR SO2 Group 2 Trading Program.

CSAPR SO2  Group 2 allowance deduction or deduct CSAPR SO2 Group 2 allowances means the permanent withdrawal of CSAPR SO2 Group 2 allowances by the Administrator from a compliance account (e.g., in order to account for compliance with the CSAPR SO2 Group 2 emissions limitation) or from an assurance account (e.g., in order to account for compliance with the assurance provisions under §§97.706 and 97.725).

CSAPR SO2 Group 2 allowances held or hold CSAPR SO2 Group 2 allowances means the CSAPR SO2 Group 2 allowances treated as included in an Allowance Management System account as of a specified point in time because at that time they were:

(1) Have been recorded by the Administrator in the account or transferred into the account by a correctly submitted, but not yet recorded, CSAPR SO2 Group 2 allowance transfer in accordance with this subpart; and

(2) Have not been transferred out of the account by a correctly submitted, but not yet recorded, CSAPR SO2 Group 2 allowance transfer in accordance with this subpart.

CSAPR SO2 Group 2 emissions limitation means, for a CSAPR SO2 Group 2 source, the tonnage of SO2 emissions authorized in a control period by the CSAPR SO2 Group 2 allowances available for deduction for the source under §97.724(a) for such control period.

CSAPR SO2 Group 2 source means a source that includes one or more CSAPR SO2 Group 2 units.

CSAPR SO2 Group 2 Trading Program means a multi-state SO2 air pollution control and emission reduction program established in accordance with this subpart and § 52.38(a), (c), (g) through (k), and (m) of this chapter (including such a program that is revised in a SIP revision approved by the Administrator under § 52.38(g) or (h) of this chapter or that is established in a SIP revision approved by the Administrator under § 52.38(i) of this chapter), as a means of mitigating interstate transport of fine particulates and SO2.

CSAPR SO2 Group 2 unit means a unit that is subject to the CSAPR SO2 Group 2 Trading Program under §97.704.

Designated representative means, for a CSAPR SO2 Group 2 source and each CSAPR SO2 Group 2 unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with this subpart, to represent and legally bind each owner and operator in matters pertaining to the CSAPR SO2 Group 2 Trading Program. If the CSAPR SO2 Group 2 source is also subject to the Acid Rain Program, CSAPR NOx Annual Trading Program, CSAPR NOx Ozone Season Group 1 Trading Program, or CSAPR NOx Ozone Season Group 2 Trading Program, then this natural person shall be the same natural person as the designated representative as defined in the respective program.

Emissions means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the Administrator by the designated representative, and as modified by the Administrator:

(1) In accordance with this subpart; and

(2) With regard to a period before the unit or source is required to measure, record, and report such air pollutants in accordance with this subpart, in accordance with part 75 of this chapter.

Excess emissions means any ton of emissions from the CSAPR SO2 Group 2
units at a CSAPR SO\textsubscript{2} Group 2 source during a control period in a given year that exceeds the CSAPR SO\textsubscript{2} Group 2 emissions limitation for the source for such control period.

_Fossil fuel_ means—

(1) Natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material; or

(2) For purposes of applying the limitation on “average annual fuel consumption of fossil fuel” in §97.704(b)(2)(i)(B) and (ii), natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material for the purpose of creating useful heat.

_Fossil-fuel-fired_ means, with regard to a unit, combusting any amount of fossil fuel in 2005 or any calendar year thereafter.

_General account_ means an Allowance Management System account, established under this subpart, that is not a compliance account or an assurance account.

_Generator_ means a device that produces electricity.
