

the common man and that we would be a society that would be so prosperous that even the common man could own the product of his labor, could live in peace and harmony with his family. Unlike the other societies in Europe and in the vast stretches of Asia, tyranny would not reign in America because we believed in freedom and individual rights. Part of freedom and individual rights is the right of people to control their own creations, at least for a period of time in which they own that which they created. It is a precious right and as important to our society as any of the other rights Americans have enjoyed over these two hundred years, and now we have an unelected official, Bruce Lehman, making a secret deal with the Japanese, a deal that means that patent rights forever will be diminished for the American people, and we are supposed to accept that this will just be slipped through the system on a piece of legislation, the GATT implementation legislation in which it had no right to be in the first place, and we had to vote yes on everything unless we wanted to say no in order to get that one little piece out.

This is a crime in progress. It is a rip-off of historic magnitude, and I can swear to you tonight they will not get away with it. We will alert the American people. This Congress is alerted to it already, and one man will not stand in the way.
