The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

END CLINTON SNOW JOB

(Mr. SMITH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Texas. Mr. Speaker, as Washington, DC, recently struggled to dig out from the worst blizzard in years, Americans from across the Nation began to see through the Clinton snow job.

Consider the thoughts of a constituent, friend, and relative, Linda Seeligson from San Antonio. She rightly fears that the President's opposition to entitlement reform and lower taxes will steal our children's future. She sees through the President's Medicare tactics. And she resents the President's use of generational warfare to pit parents against children, employers against employees, and workers against retirees.

Millions of Americans agree. They reject the politics of envy and class warfare. They have real compassion for working families who must work longer to pay for big Government. They're tired of a welfare state paid for by the middle class. And they seek to

replace this welfare state with an opportunity society built on personal responsibility.

Bill Clinton ran for office claiming to represent the people who do the work, pay the taxes, and raise the children. Americans like Linda Seeligson want a balanced budget, lower taxes, and less government.

And they want an end to the Clinton blizzard of more spending and higher taxes.

DEFAULT THREAT HINTED AT WAS WAY TO SETTLE BUDGET

(Mr. BENTSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENTSEN. Mr. Speaker, a week ago, the chairman of the Committee on the Budget, Mr. KASICH, said that the Republicans had abandoned the idea of shutting down the Government and defaulting on the national debt. But yesterday, my colleague from Texas, the majority leader, Mr. ARMEY, said that default on the debt was again a threat, right here on the front page of the New York Times and on every paper across this country.

Mr. Speaker, I guess it is a case of dumb and dumber. It was dumb to shut down the Government; it is dumber to default on the debt of the Government. My Republican friends say we are doing this budget that cuts Medicare and Medicaid to do it for our children and our grandchildren. But the Republican plan is to hurt homeowners and to leave our children and grandchildren with a mountain of bad debt.

KEEP THE SEC FUNDED

(Ms. LOFGREN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. LOFGREN. Mr. Speaker, I have studied the materials about the Government shutdown that could happen this Friday. I'm worried about something nobody seems to be talking about—funding for the Securities and Exchange Commission.

I'm not an expert on the SEC; not many Members are. But, I know when the Stock Market crashed in 1929, it didn't do America much good. The SEC is supposed to keep that from happening again.

I have a letter from the SEC that says, "in the event of a disruption in funding . . . we fear the protection of investors and capital formation could be seriously hampered and it would seriously compromise the SEC's ability to oversee the securities markets . . . and could hamper the agency's ability to react quickly in the event of a market disruption."

The SEC would be unable to respond to requests for Commission action to facilitate capital raising, mergers and acquisitions, and tender offers. Initial public offerings couldn't move forward.

I represent Silicon Valley. How will America be improved if the high-tech, cutting-edge companies of Silicon Valley are stopped from raising Capital through IPO's?

We have 4 days to act—to fund the SEC at last year's level. Let's protect America's economy and get that job done tomorrow.

Mr. Speaker, I include for the RECORD the following material:

U.S. SECURITIES AND
EXCHANGE COMMISSION,

Washington, DC, January 19, 1996.

Hon. HAROLD ROGERS,
Chairman, Appropriations Subcommittee on
Commerce, Justice, and State, the Judiciary,
and Related Agencies, House of Representatives,
Washington, DC.

DEAR CHAIRMAN ROGERS: We are writing to request your help in the upcoming negotiations for a new Continuing Resolution or appropriation action. We strongly urge you to support language that maintains the SEC's 1005 funding level of \$297 million and maintains the fee rate at the current rate of 1/29th of one percent of the offering amount. In the event of a disruption in funding authority for the Securities and Exchange Commission, we fear the protection of investors and capital formation could be seriously hampered. In addition, the amount of money deposited into the U.S. Treasury from SEC filing fees would be reduced.

In our view, operating at this minimal emergency level would seriously compromise the SEC's ability to oversee the securities markets. The impact of a disruption in the SEC's funding authority would include:

No new investigations. Enforcement staff would be unable to open new cases. While emergency actions to freeze assets or otherwise protect assets would be permitted under the contingency plan, the agency's ability to detect developing situations which present imminent threat to investor assets would be impaired.

No work on existing investigations. Enforcement staff would have to cease ongoing investigative activity, except where appearances in court are required or investor funds are at active risk.

No review of corporate filings except in emergency situations. The normal processing of corporate filings by companies seeking to raise capital in the markets would be significantly impaired.

No regular examinations except in emergency situations. There are certain inspections that the SEC conducts regularly and continually; during a funding disruption, regular examinations and inspections of broker-dealers, investment companies, and investment advisers could not be performed. The absence of such reviews, in the worst case, could place the assets and retirement funds of investors at risk. The agency's ability to detect situations that present imminent threat to investor assets would be impaired.

No review of periodic filings. Quarterly and annual reports would not be reviewed. The assurance of adequate financial disclosure for investment decisions could be compromised.

Limited market oversight. A funding disruption would reduce market monitoring staffing to skeletal levels and could hamper the agency's ability to react quickly in the event of a market disruption. Regular inspections of stock exchanges and markets would cease.

No review of stock exchange (NYSE, AMEX, NASD, etc.) pending rule proposals except in emergency situations. The ability of exchanges to respond in a timely fashion

to changing market conditions and to introduce new products will be hampered without SEC approval of their filings.

No transactional assistance except in emergency situations. The staff would not be able to respond to regular requests for exemptions or other necessary Commission action to facilitate capital raising activities, mergers and acquisition transactions, and tender offers.

During the government-wide shutdown which occurred November 14 through November 20, the fee rate for registration statements filed pursuant to Section 6(b) of the Securities Act of 1933 reverted to the statutory rate of 1/50th of one percent from its current rate of 1/29th of one percent. Had the fee rate not been restored to 1/29th of one percent in a subsequent continuing resolution, the U.S. Treasury would have lost approximately \$30 million.

As you know, the SEC is funded through the Commerce-Justice-State (CJS) appropriations bill, which was vetoed by President Clinton on grounds unrelated to the SEC. The SEC portion of the CJS bill, however, is non-controversial. It would provide the SEC with funding at its fiscal 95 level of \$297 million, and provide the SEC with authority to continue to collect securities fees to offset much of its appropriation.

The SEC is a very small agency that is charged with a very large mission: promoting the fairness, efficiency, and preeminence of our nation's securities markets. We are aware of the many challenges you face and difficult decisions you must make in the days ahead. We respectfully request that you seriously consider the SEC's funding.

Sincerely,

STEVEN M.H. WALLMAN,
Commissioner.

WHY SEC CLOSURE HURTS TECH FIRMS

(By Steve Kaufman)

The initial public stock offerings of 60 technology companies—including about 10 technology firms based in Silicon Valley—are in jeopardy because of the pending shutdown of the Securities and Exchange Commission next week.

U.S. Rep. Zoe Lofgren, D-San Jose, said Friday the SEC is among the agencies that have been omitted from a list of those that will get interim funding until the resolution of the federal budget impasse. The SEC, which regulates the U.S. financial markets, must approve IPOs.

IPOs are one of the hottest market segments. Some IPO experts said the freeze in IPOs could have a negative effect on the companies involved, even if it is short-lived. They are fast-growing companies in rapidly changing markets. Such companies may lose brief opportunities to market their products if they don't quickly collect the capital they expect from the public sale of their stock, experts said.

For a company competing in Internet software or in medical devices, for example, "even a delay of a few weeks could mean lost market share and customers," said Kathy Smith, an analyst at Renaissance Capital, a Greenwich, Conn., institutional research firm that specializes in IPOs.

IPO watchers couldn't believe that the SEC plans to close, albeit temporarily. Because the nation's financial markets remain open, they said, its functions are essential. Smith said the closing, however brief, could damage the reputation of the U.S. markets as the most efficient and best regulated in the world.

"An SEC shutdown tells the world that maybe the U.S. financial markets aren't as dependable as it thought they were," Smith said.

According to Securities Data Co., a Newark, N.J., financial market research firm, 80 IPOs valued at \$2.32 billion have been approved by the SEC and will begin to go public next week.

But Renaissance Capital added that 60 more IPOs—including 41 technology companies—are expected to go public in January and February and are in various stages of the SEC IPO approval process. Smith believes that all but one of these deals will be snagged by an SEC shutdown, which reportedly could occur toward the end of next week. In aggregate, these deals are valued at about \$2 billion.

An SEC shutdown could affect the entire IPO market, not just the latest round of newcomers. But it is unclear whether that impact would be negative or positive.

It could be negative because a hot IPO market already has made investors nervous, IPO watchers say. Any unexpected problem could deflate interest in IPOs and conceivably pummel prices. "The market could lose a lot of momentum—and at a time when a lot more deals are ready to roll out," said David Gleba, chairman of Ventureone Corp., a San Francisco venture capital research firm.

On the other hand, Gleba said, a pause in the IPO market might provide a needed break. The breather could reduce speculative froth and ultimately lengthen the life of this cycle. "In the long term, this could actually turn out to be a positive," Gleba said.

Unlike others, Gleba was also ambivalent about the impact on delayed IPOs.

"Anything that risks getting money to grow your business is bad news," he said. On the other hand, he said, the timing of IPO deals has always been flexible, with no guarantee when deals will occur. Good IPO candidates are able to delay offerings by months, or even a year, an advantage because the stock market environment could change and no longer be favorable for an IPO.

HOUSE SHOULD ENACT A CLEAN DEBT CEILING

(Mrs. KENNELLY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. KENNELLY. Mr. Speaker, this House should enact a clean debt ceiling, and we should do it soon. The full faith and credit of the U.S. Government is not a political tool. It is one of the cornerstones of our economic stability. Its preservation is not a matter of politics; it is a matter of governance. It is one of the responsibilities that comes with being in the leadership in this House.

Over the last months, Members of this House insisted that Government shut down to force agreement on a balanced budget. We all saw the difficulties, inconveniences, waste, and other awful things that resulted. But the march of folly continues. Now there is talk of forcing default unless the majority's agenda is adopted.

There is no justification for this. This is an issue we agree on in substance. The long-term extension of the debt ceiling was contained in the reconciliation bill, and it is also the same number asked by the administration, \$5.5 trillion. We should not be at this time teetering on the brink of default.

We should not be playing games with this issue.

Mr. Speaker, I urge my colleagues to support a clean debt ceiling. Let us do it quickly and not to things that should not happen.

TIME FOR NEGOTIATION ON BUDGET

(Ms. DELAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DELAURO. Mr. Speaker, here is what Republican Budget Chairman JOHN KASICH said in November about the budget negotiations: "Frankly, we don't ask for a lot. We ask for nothing more than a commitment to do this in a 7-year period. The priorities within that 7-year plan are negotiable."

The President has done his part. He has given Republicans a 7-year balanced budget using their economic assumptions. But now, Republicans want to move the goalpost in the middle of the game.

Now, Mr. KASICH and his colleagues say they will not negotiate on the budget priorities. Mr. KASICH, keep your word and negotiate. For 220 years, that's how this democracy has worked. Let's make it work again. Government shutdowns, defaults on our debt—these tactics are an affront to democracy. It's time for people of good will from both parties to do what's best for our country. It's time to balance the budget while protecting Medicare, Medicaid, education, and the environment. The President's door is open.

TIDE OF PRO-LIFE BATTLE TURNING

(Mr. DORNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN. Mr. Speaker, what a pleasure to take the well of the House on this pro-life day. That is the mud of the White House lawn and the Ellipse, Mr. Speaker, you see on my shoes and on the trousers of the suit that I wore the day I nominated George Bush for President.

Following House rules here, because I just found out I cannot hold a little baby in my arms, here is Peg over here. Come here, Peg, just so I can use you as an A-frame.

This is Molly Christine Oona Dornan, number 10 BOB and Sally DORNAN grandchild; mommy Theresa doing well. She is 10 days old. She came a few days later than that Friday I said she was due any minute. That was a false alarm.

I now have five grandsons and five granddaughters and five grown wonderful kids. There is still a bachelor out there. God willing, there will be more to come. This little Molly O. Dornan is 10 days a person. But you know what I said to 75,000 pro-lifers today? We All know she was a person 20 days ago, 10

days before she was born, or 10 seconds or 10 minutes or 5 minutes, right up to the moment of conception.

We are going to win this pro-life battle, and the biggest battle is 288 days from today, putting a pro-life couple in the White House.

I yield back the balance of my time, and take little Molly in my arms again.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would remind the Member not to use others who are not Members as props on the floor.

BALANCED BUDGET PLAN DOES EXIST

(Mr. STUPAK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STUPAK. Mr. Speaker, first I would say congratulations to Grandpa DORNAN on his newest grandchild.

Mr. Speaker, as I was back home this last 2 weeks for the district work period, we had a lot of town hall meetings. I spoke with many other groups. For Mr. DORNAN's grandchild and other grandchildren and our children throughout this whole country, folks told me we need a balanced budget, we must have a balanced budget.

I say to my friends on this side of the aisle, there are actually three balanced budgets pending before the House that will meet the Congressional Budget Office requirement to balance the budget within 7 years. But of the three plans, what the voices from home told me is they need to balance the budget while protecting Medicare, education, and the environment. The plan the folks at home clearly supported was the plan that had the least amount of cuts in the Medicare programs. In fact, the folks back home are saying no tax breaks until we balance the budget.

So of those three plans, I hope we will look at those three plans in the next few weeks and actually in those three plans, let us look at the plan that has the least amount of cuts in Medicare, no cuts in education, that will protect our environment and balance the budget in 7 years. It can be done. That plan does exist.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, January 10, 1996.

Hon. NEWT GINGRICH,
*The Speaker, U.S. House of Representatives,
Washington, DC.*

DEAR MR. SPEAKER: Pursuant to the permission granted in clause 5 of rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope received from the White House on Wednesday, January 10, 1996 at 11:50 a.m. and said to contain a message from the President wherein he returns without his approval H.R. 4, the "Personal Responsibility and Work Opportunity Act of 1995."

With warm regards,

ROBIN H. CARLE,
Clerk, U.S. House of Representatives.

PERSONAL RESPONSIBILITY AND WORK OPPORTUNITY ACT OF 1995—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 104-164)

The SPEAKER pro tempore laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning herewith without my approval H.R. 4, the "Personal Responsibility and Work Opportunity Act of 1995." In disapproving H.R. 4, I am nevertheless determined to keep working with the Congress to enact real, bipartisan welfare reform. The current welfare system is broken and must be replaced, for the sake of the taxpayers who pay for it and the people who are trapped by it. But H.R. 4 does too little to move people from welfare to work. It is burdened with deep budget cuts and structural changes that fall short of real reform. I urge the Congress to work with me in good faith to produce

a bipartisan welfare reform agreement that is tough on work and responsibility, but not tough on children and on parents who are responsible and who want to work.

The Congress and the Administration are engaged in serious negotiations toward a balanced budget that is consistent with our priorities—one of which is to "reform welfare," as November's agreement between Republicans and Democrats made clear. Welfare reform must be considered in the context of other critical and related issues such as Medicaid and the Earned Income Tax Credit. Americans know we have to reform the broken welfare system, but they also know that welfare reform is about moving people from welfare to work, not playing budget politics.

The Administration has and will continue to set forth in detail our goals for reform and our objections to this legislation. The Administration strongly supported the Senate Democratic and House Democratic welfare reform bills, which ensured that States would have the resources and incentives to move people from welfare to work and that children would be protected. I strongly support time limits, work requirements, the toughest possible child support enforcement, and requiring minor mothers to live at home as a condition of assistance, and I am pleased that these central elements of my approach have been addressed in H.R. 4.

We remain ready at any moment to sit down in good faith with Republicans and Democrats in the Congress to work out an acceptable welfare reform plan that is motivated by the urgency of reform rather than by a budget plan that is contrary to America's values. There is a bipartisan consensus around the country on the fundamental elements of real welfare reform, and it would be a tragedy for this Congress to squander this historic opportunity to achieve it. It is essential for the Congress to address shortcomings in the legislation in the following areas:

—Work and Child Care: Welfare reform is first and foremost about work. H.R. 4 weakens several important work provisions that are vital to welfare reform's success. The final welfare reform legislation should provide sufficient child care to enable recipients to leave welfare for work; reward States for placing people in jobs; restore the guarantee of health coverage for poor families; require States to maintain their stake in moving people from welfare to work; and protect States and families in the event of economic downturn and population growth. In addition, the Congress should abandon efforts included in the budget reconciliation bill that would gut the Earned Income Tax Credit, a powerful work incentive that is enabling hundreds of thousands of families to choose work over welfare.

—Deep Budget Cuts and Damaging Structural Changes: H.R. 4 was de-

signed to meet an arbitrary budget target rather than to achieve serious reform. The legislation makes damaging structural changes and deep budget cuts that would fall hardest on children and undermine States' ability to move people from welfare to work. We should work together to balance the budget and reform welfare, but the Congress should not use the words "welfare reform" as a cover to violate the Nation's values. Making \$60 billion in budget cuts and massive structural changes in a variety of programs, including foster care and adoption assistance, help for disabled children, legal immigrants, food stamps, and school lunch is not welfare reform. The final welfare reform legislation should reduce the magnitude of these budget cuts and the sweep of structural changes that have little connection to the central goal of work-based reform. We must demand responsibility from young mothers and young fathers, not penalize children for their parents' mistakes. I am deeply committed to working with the Congress to reach bipartisan agreement on an acceptable welfare reform bill that addresses these and other concerns. We owe it to the people who sent us here not to let this opportunity slip away by doing the wrong thing or failing to act at all.

WILLIAM J. CLINTON,

THE WHITE HOUSE, *January 9, 1996.*

The SPEAKER pro tempore. The objections of the President will be spread at large upon the Journal, and the message and bill will be printed as a House document.

Mr. BUNNING of Kentucky. Mr. Speaker, I ask unanimous consent that the message together with the accompanying bill be referred to the Committee on Ways and Means.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

REPORT ON NATIONAL EMERGENCY WITH RESPECT TO LIBYA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 104-165)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations:

To the Congress of the United States:

I hereby report to the Congress on the developments since my last report of July 12, 1995, concerning the national emergency with respect to Libya that was declared in Executive Order No. 12543 of January 7, 1986. This report is submitted pursuant to section 401(c) of the National Emergencies Act, 50

U.S.C. 1641(c); section 204(c) of the International Emergency Economic Powers Act (IEEPA), 50 U.S.C. 1703(c); and section 505(c) of the International Security and Development Cooperation Act of 1985, 22 U.S.C. 2349aa-9(c).

1. On January 3, 1996, I renewed for another year the national emergency with respect to Libya pursuant to IEEPA. This renewal extended the current comprehensive financial and trade embargo against Libya in effect since 1986. Under these sanctions, all trade with Libya is prohibited, and all assets owned or controlled by the Libyan government in the United States or in the possession or control of U.S. persons are blocked.

2. There has been one amendment to the Libyan Sanctions Regulations, 31 C.F.R. Part 550 (the "Regulations"), administered by the Office of Foreign Assets Control (FAC) of the Department of the Treasury, since my last report on July 12, 1995. The amendment (60 Fed. Reg. 37940-37941, July 25, 1995) added three hotels in Malta to appendix A, Organizations Determined to Be Within the Term "Government of Libya" (Specifically Designated Nationals (SDNs) of Libya). A copy of the amendment is attached to this report.

Pursuant to section 550.304(a) of the Regulations, FAC has determined that these entities designated as SDNs are owned or controlled by, or acting or purporting to act directly or indirectly on behalf of, the Government of Libya, or are agencies, instrumentalities, or entities of that government. By virtue of this determination, all property and interests in property of these entities that are in the United States or in the possession or control of U.S. persons are blocked. Further, U.S. persons are prohibited from engaging in transactions with these entities unless the transactions are licensed by FAC. The designations were made in consultation with the Department of State.

3. During the current 6-month period, FAC made numerous decisions with respect to applications for licenses to engage in transactions under the Regulations, issuing 54 licensing determinations—both approvals and denials. Consistent with FAC's ongoing scrutiny of banking transactions, the largest category of license approvals (20) concerned requests by Libyan and non-Libyan persons or entities to unblock transfers interdicted because of an apparent Government of Libya interest. A license was also issued to a local taxing authority to foreclose on a property owned by the Government of Libya for failure to pay property tax arrearages.

4. During the current 6-month period, FAC continued to emphasize to the international banking community in the United States the importance of identifying and blocking payments made on or behalf of Libya. The Office worked closely with the banks to implement new interdiction software systems to identify such payments. As a result, during the reporting period,

more than 107 transactions potentially involving Libya, totaling more than \$26.0 million, were interdicted. As of December 4, 23 of these transactions had been authorized for release, leaving a net amount of more than \$24.6 million blocked.

Since my last report, FAC collected 27 civil monetary penalties totaling more than \$119,500, for violations of the U.S. sanctions against Libya. Fourteen of the violations involved the failure of banks or credit unions to block funds transfers to Libyan-owned or -controlled banks. Two other penalties were received from corporations for export violations or violative payments to Libya for unlicensed trademark transactions. Eleven additional penalties were paid by U.S. citizens engaging in Libyan oilfield-related transactions while another 40 cases involving similar violations are in active penalty processing.

In November 1995, guilty verdicts were returned in two cases involving illegal exportation of U.S. goods to Libya. A jury in Denver, Colorado, found a Denver businessman guilty of violating the Regulations and IEEPA when he exported 50 trailers from the United States to Libya in 1991. A Houston, Texas, jury found three individuals and two companies guilty on charges of conspiracy and violating the Regulations and IEEPA for transactions relating to the 1992 shipment of oilfield equipment from the United States to Libya. Also in November, a Portland, Oregon, lumber company entered a two-count felony information plea agreement for two separate shipments of U.S.-origin lumber to Libya during 1993. These three actions were the result of lengthy criminal investigations begun in prior reporting periods. Several other investigations from prior reporting periods are continuing and new reports of violations are being pursued.

5. The expenses incurred by the Federal Government in the 6-month period from July 6, 1995, through January 5, 1996, that are directly attributable to the exercise of powers and authorities conferred by the declaration of the Libyan national emergency are estimated at approximately \$990,000. Personnel costs were largely centered in the Department of the Treasury (particularly in the Office of Foreign Assets Control, the Office of the General Counsel, and the U.S. Customs Service), the Department of State, and the Department of Commerce.

6. The policies and actions of the Government of Libya continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. In adopting UNSCR 883 in November 1993, the Security Council determined that the continued failure of the Government of Libya to demonstrate by concrete actions its renunciation of terrorism, and in particular its continued failure to respond fully and effectively to the requests and decisions of the Security

Council in Resolutions 731 and 748, concerning the bombing of the Pan Am 103 and UTA 772 flights, constituted a threat to international peace and security. The United States will continue to coordinate its comprehensive sanctions enforcement efforts with those of other U.N. member states. We remain determined to ensure that the perpetrators of the terrorist acts against Pan Am 103 and UTA 772 are brought to justice. The families of the victims in the murderous Lockerbie bombing and other acts of Libyan terrorism deserve nothing less. I shall continue to exercise the powers at my disposal to apply economic sanctions against Libya fully and effectively, so long as those measures are appropriate, and will continue to report periodically to the Congress on significant developments as required by law.

WILLIAM J. CLINTON,

THE WHITE HOUSE, January 22, 1996.

COMMUNICATION FROM THE HONORABLE MARTIN R. HOKE, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable MARTIN R. HOKE, Member of Congress:

CONGRESS OF THE UNITED STATES,

Washington, DC, January 3, 1996.

Hon. NEWT GINGRICH,

Speaker of the House,

The Capitol, Washington, DC.

DEAR MR. SPEAKER: Pursuant to Rule L (50) of the Rules of the House of Representatives, this is to formally notify you that Thomas B. Boutall of my district office in Fairview Park, Ohio, has been served with a subpoena that was issued by the Cuyahoga County Court of Common Pleas (Ohio) in the matter of *Nix v. Hill*.

After consultation with the Office of General Counsel, it has been determined that compliance with the subpoena is consistent with the precedents and privileges of the U.S. House of Representatives.

Very truly yours,

MARTIN R. HOKE,

Member of Congress.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of May 12, 1995, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Dakota [Mr. POMEROY] is recognized for 5 minutes.

[Mr. POMEROY addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

EFFECT OF DEFAULTING ON THE NATIONAL DEBT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. BENTSEN] is recognized for 5 minutes.

Mr. BENTSEN. Mr. Speaker, I am a new Member in this body and I am not

one who comes down to the well to speak often, but having read through the papers this weekend and particularly today, I have become quite alarmed as a new Member of this 104th Congress to see that once again the majority leader and the majority party are advocating that we should default on our national debt. That is something that the United States, unlike many countries, has never done.

Mr. Speaker, it is something, if we were to default on the Treasury debt, that would preclude us from making payments to Social Security recipients, would preclude us from making payments to veterans benefits, but perhaps even more alarming is it would cause a dramatic rise in interest rates across the United States, affecting homeowners, people who are trying to buy their first home, families, people who are trying to take out loans to buy a car, kids who are trying to take out loans to go to college.

Quite frankly, it would probably drive this country into a recession, hardly a wise economic policy of the new majority.

But, Mr. Speaker, when you combine that with what the majority is proposing at this point in time after we have come off of what effectively has been a 3-week recess or adjournment, it now appears the majority has decided that we should adjourn until February 26 after we adjourn this Thursday.

Mr. Speaker, I started thinking about all the legislation that has not passed in this 104th Congress. We still are in a budget crisis, we still have not passed a number of our appropriations bills. But then the list goes on. We have the bank modernization, which is stalled. We have telecommunications reform, which is stalled. We have Superfund, which is stalled. We have not even taken up the water resources bill. We have immigration reform, which is stalled. We have housing reform, which is stalled. There is no talk of health care reform. But my constituents still ask about it. We have the safe drinking water bill, which is stalled. We have the clean water bill, which is stalled. We have the farm bill, which has heretofore disappeared.

Now, Mr. Speaker, it would appear in this monumental Congress, after 40 years of being in the minority, that the new majority, the Republican majority, would do something about it. While I was not around when Harry Truman was president and talked about the 83d Congress back in the 1950's as the do-nothing Congress, it would appear what we have now is the failed 104th, the failed 104th, which is incapable of doing the Nation's business.

Ms. LOFGREN. Mr. Speaker, will the gentleman yield?

Mr. BENTSEN. I yield to the gentleman from California.

Ms. LOFGREN. Mr. Speaker, as the gentleman is aware, I mentioned earlier this afternoon my concern that the Securities and Exchange Commission

is supposed to run out of money completely on Friday. I know the gentleman has a strong background in financial markets. I am wondering what is his point about the debt ceiling, defaulting on the debt while the Securities and Exchange Commission has to shut down. Would that be helpful to America's markets and the economy of not only America, but the world?

Mr. BENTSEN. Reclaiming my time, I thank the gentlewoman from California for commenting. The fact that under our system of finance the companies would not be able to go public and raise capital so they could create new jobs is ridiculous. We have an economic rebound going on, we have GDP growing at a rate of about 2 to 3 percent right now. What we want are companies raising capital, investing in their infrastructure and their human capital potential to create more jobs.

Yet this Congress, under the Republican majority, believes we ought to shut down the Securities and Exchange Commission, we ought to shut down contracts for large companies like Rockwell and others that are working on the space shuttle and the space station so people will get laid off; we ought to default on the national debt so interest rates go up, companies lay people off.

That is not an economic strategy, that is an economic disaster.

Ms. LOFGREN. Mr. Speaker, for a further question, I know that I was in local government for many years, a year ago I was sitting in a local government office, and I had the opportunity to speak to some of my former colleagues over this 3-week break period. They are having a very tough time putting their budget together, because they do not know what the Federal Government is going to do. So I know that had I been back where I was year ago, no way would they walk away and adjourn for a month's paid vacation without this job done.

But I am aware a year ago you were in the private sector in the business world. I am wondering, in the private sector employment, would a man in your position have taken a month's paid vacation with this amount of work done?

Mr. BENTSEN. Absolutely not. This is no way to run a country. This is certainly a revolution, but it is the wrong kind of revolution.

THE BUDGET AND THE ROLE OF GOVERNMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina [Mrs. CLAYTON] is recognized for 5 minutes.

Mrs. CLAYTON. Mr. Speaker, it greatly concerns me, and I believe it concerns most Americans, that we may face the prospect of not having a budget this year. As we consider the proper role of Government, let us not forget the natural dangers we face.

Over the past days and weeks, many of the Northeast have been held in the grip of inclement weather.

First, it was record-level snow that shut down the Government, without one Member of Congress being here. More recently, it was uncontrollable flooding that left many unable to function and caused one of our largest States, Pennsylvania, to make a public appeal for Federal intervention.

If nothing else proves that we need a Federal Government that works and works for all of us—it is nature's wrath that makes the point. I hope the pundits are wrong—I hope we will pass a budget that is not only cost efficient, but civil.

We have terrestrial problems that we cannot handle. We do not need to create more problems by functioning in a less than civil way and by failing to govern.

STATE OF THE UNION

The SPEAKER pro tempore (Mr. EVERETT). Under the Speaker's announced policy of May 12, 1995, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes as the designee of the minority leader.

Mr. OWENS. Mr. Speaker, we are about to begin the business of the 104th Congress again, the second year of this session. Tomorrow we will hear the State of the Union Address from the President. I look forward to that State of the Union Address.

The State of the Union Address, I think, will point us the way for the immediate future. The State of the Union also might certainly size up where we are at this point. There are a lot of good things that can be cited in that State of the Union Address. A lot of great things have been accomplished by this President. The Union is in a much better state in many ways and the world is in a much better state in many ways than it was before he became President.

I take this opportunity to celebrate the liberation of Haiti. Haiti has a situation now which has moved like clockwork toward a permanent democracy. Everything that was promised by General Bertrand Aristide and his leadership has been allowed to unfold. Elections have been held.

President Aristide will be resigning, stepping down next month. President Aristide will be replaced by a president who has been elected by the people of Haiti. The entire hemisphere benefits from this stabilization of Haiti because it sent a message to all the other criminals who wanted to take over. All the criminal military regimes that might have wanted to raise their ugly heads and try to take over their governments from duly elected representatives have certainly not done so. We have a more stable hemisphere. We can look forward to have democracy expanding in this hemisphere as a result

of the courageous actions taken by this administration in Haiti.

Also, I want to pause at this point to congratulate General Bertrand Aristide on his wedding. He has recently gotten married, I think it was yesterday. I take time to do that because on this floor on many occasions I have cited the wonders of the intellect and the temperament of General Bertrand Aristide, and in many cases it may appear that he may be some kind of little god. I have cited the fact that the man speaks eight languages. I have cited his long campaign against the oppression in Haiti, how he was nearly killed three times, guns were pointed at his head on three different occasions.

I have cited wondrous things that have happened to him and wondrous things that he has made happen. I think his marriage brought out some facts that shows that he is after all quite human. The announcement of the marriage said he was 40 years old. For the first time I realized that he is much younger than I am, this man that has accomplished so much for his country and set such a shining example for democratic leadership in this hemisphere.

So we want to congratulate President Aristide and congratulate the people who belong to his Lavalas Party in Haiti. We hope that they will not flinch, that they will, regardless of the circumstances, go forward and insist that democracy, the principles of democracy on which this liberation was based, will be carried forward by that government.

I also think it is time to celebrate the world being better off because of this courageous President's leadership in Yugoslavia. In Bosnia things are almost going like clockwork. We certainly are happy to see that deadlines that were set are being met. The Army of the United States, the military of the United States is there to assist in making peace happen. There is a clear framework for peace, and that peace is going forward.

I am proud of the fact that our Army could have no more noble mission in Yugoslavia. They will be feeding the hungry. They will be aiding the sick. They will be clothing the naked. They will be helping to provide shelter for the homeless. I can think of no more noble mission for an army than that, no more noble mission for a nation. So they represent a great deal of what this Nation is all about, and we salute them for that. The state of the world is better, and we are proud of the fact that we had the leadership of a President who made that happen.

Nineteen ninety-six will be a tumultuous year. There is no way we can avoid that. We hope that the Government would get back on track, that the legislative process will be allowed to go forward as it has for all the years that this Nation has existed, that there would be an end to the abuse of power by the leadership of the Republicans in the Congress, that that abuse of power

we thought had sort of played itself out and that the common sense of the American people had indicated that they were not impressed and indeed they were quite upset by this continual abuse of power that is reflected in the shutdowns of the Government to obtain legislative goals, legislative ends.

The shutdown was an attempt to blackmail the executive branch. That blackmail did not work. The American people with all of their common sense could clearly see that the blackmail was coming from one side and attempted to distort the democratic process. I think that the polls clearly show that the common sense of the American people has prevailed and that they clearly see what is happening. So I am shocked to hear that perhaps there may be a shutdown.

The shutdown this time may go even further than the previous shutdown. There may be another shutdown. This time it may lead to a default, the Government of the United States defaulting on its debts, on its obligations. A shutdown is abuse of power, and a large number of people have been hurt by that abuse of power. A large number of human beings out there who did not deserve to be hurt had to go through a whole holiday season with no checks or only one check, weekly pay, all kinds of things which mean a great deal to people who are on an income based on weekly wages or monthly wages.

They could not afford, they could not reach into a big bank account. They could not live off their investments. There are a whole lot of people in the Republican Party who do not understand this. But they created a whole lot of misery. People suffered. It is all right to suffer for a good purpose, but it was totally unnecessary.

In addition to this abuse of power causing such suffering, we are now going to cause a hemorrhaging of our economic system here in this country. A default will certainly have terrible consequences. A default is economic suicide. I hope that the leaders of the Republican Party who are now waving the threat of default in order to get more concessions will reconsider and let the debate go forward.

The Speaker has clearly stated that the objective of the Republicans in this House is to remake America. They want to try to remake America in 2 years. That is their goal. I think it is unfortunate that remaking America is a goal to begin with. I think it is more unfortunate that they are going to try to remake America in 2 years.

I do not think America needs to be remade. I think we have institutions, we have agencies, we have programs, we have a large number of things that could be improved. There ought to be a process of refining. There ought to be a process of adjusting. There ought to be a process of trimming, streamlining. There are a number of things that can go forward without having the kind of revolutionary proposal that is embodied in a call to remake America.

But if that is the way it is, the Speaker has the power and the leadership of the House has the power to set the parameters and determine the environment that we have to exist in, and that is the way it is.

Let us go forward in 1996 and deal with the drive to remake America. Let us look at the vision of America projected by the Republicans who control the House of Representatives and the Senate. Let us look at the vision of America projected by the President. I think the President will project some of his vision of America in his State of the Union Address tomorrow. I think the President in his behavior, the way the President has handled the budget certainly is a projection of part of his vision of America. The President has stood fast and insisted that in this re-making of America we shall not dump overboard the poorest Americans, we shall not dump overboard the powerless Americans. We shall not dump overboard the helpless Americans like children.

I think we heard earlier, less than an hour ago, a message of the President vetoing the Personal Responsibility Act. The Personal Responsibility Act is one of the most misnamed acts we might consider in a long time.

The President vetoed it and said: I want welfare reform; I started it. The President started the movement for welfare reform. I may not agree with all of his proposals. I certainly do not agree with the proposals made by the Republican majority in this House, but welfare reform is needed; reform, refinement, adjustment, streamlining, elimination of ridiculous parts of the program, making it work more effective administratively.

There are a lot things we need in welfare reform that are going to go forward, and the President is committed to that and it will happen. But I thank the President for vetoing the bill that was sent to him because it is not welfare reform. It is a destruction of a program to help the poorest people in our Nation.

Why have we used a hammer to bang on the program that provides aid to families with dependent children? The welfare reform program that was sent to the President by the Republicans was a program that was most cruel to children. It was a program which sought to end and still seeks to end the entitlement for children, the entitlement that is built into a part of the Social Security law.

There is a lot of concern about, are we going to tamper with Social Security, is Congress going to tamper with Social Security? Are the Republicans going to tamper with Social Security? Is Social Security safe? The answer is no, because most people do not know it, but aid to families with dependent children is part of the Social Security Act. Medicare is part of the Social Security Act. Medicaid is part of the Social Security Act. They are all part of Social Security. The part of Social Security which helps the people on the

bottom, those who are deemed to be the least powerful, who are not voting, who do not vote, certainly, for Republicans when they do vote, that is the part that we have bludgeoned already with a hammer.

Aid to families with dependent children, \$16 billion is the amount of money estimated for this program, aid to families with dependent children. That is less than we give to the farmers. The subsidies that go to farmers in various ways, cash subsidies, home mortgages and all kinds of various programs that go to farmers, those subsidies total far more than the aid to families with dependent children. The farmers do not have to pass a means test. People who get welfare, aid to families with dependent children, they must prove first that they need it. They must prove first that they are poor. So why are we bludgeoning them with a heavy hammer, when we refuse to touch these subsidies that farmers get who do not pass a means test? We tried to pass a bill on the floor of this House. I joined with the gentleman from New York [Mr. SCHUMER], on two occasions, a simple bill which said farmers who have income from whatever source of \$100,000 or more per year should not qualify for the cash subsidy program. I think we got about 60 votes the first year we tried to pass that and about 57 or 58 the second time we tried to pass that. So the overwhelming sentiment, Democrats and Republicans, was do not touch the cash subsidies for the farmers whether they are in need of it or not. But let us go after the people on welfare. It is not because they are getting more than anybody else. It is not because they are unworthy really. It is because they have no power. It is because they do not vote for Republicans. It is because in too many cases they do not vote for anybody, and that is a message I hope that the people who are, the parents of those poor children who get the aid will understand.

In America, in the final analysis, you have a weapon. In the final analysis, the fact that you do not vote is the critical action that you take. By not acting, you act. So every person out there who is an adult responsible for receiving the benefits for children who are in the aid to families with dependent children, you owe it to the children, you are neglecting the children when you do not vote. You are neglecting the children when you do not participate in the political process. If you start voting and you vote blindly for anybody who gives you some kind of divergent argument, you are also neglectful of the children. Vote for the people who say that they are interested in children and back that up with their votes on programs like aid to families with dependent children.

I hope that as we go forward for the rest of 1996, there will be an election, you are aware of it, in November 1996. Before we get to November, of course, there are many other elections that are taking place. In Iowa, in New Hamp-

shire, et cetera, this is an election year. So I hope that in this election year, we can continue to discuss the budget. I would like to see a budget agreement reached. I think the President has gone as far as he can go, however, I would not cry, if we do not reach one, if it is going to have to be reached at the expense of the people on the bottom and the President is going to have to give even more. I think the President has come a long way, and I am not happy and a lot of Democrats are not happy with the compromise that he has offered, which I think goes too far. But I admire him for stepping out there and trying to meet the Republicans halfway. I think he has gone more than halfway.

I hope that we do work out an agreement whereby we have a budget this year. The principle of a balanced budget, I do not agree with that, but it seems that most other people agree with it. So we will have a balanced budget.

I serve as the chairman of the Congressional Black Caucus alternative budget task force. We put a balanced budget on the floor of this House. We had to do it. In order to bring our budget and be able to discuss any of our ideas and our proposals, we had to come forward with a balanced budget. So we came forward with a balanced budget. The balanced budget we have submitted for the RECORD. It is in the RECORD.

We balanced the budget without cutting Medicaid. We balanced the budget without cutting Medicare. We balanced the budget and we increased education expenditures. We increased expenditures for job training. What we did was we cut defense, and that is a very reasonable proposition to cut defense, when the United States of America is spending more than all the other industrialized nations in the world put together, we are spending more than they are put together on defense. So it is possible to cut defense. This does not in any way hamper us in conducting noble missions like the liberation of Haiti or a mission to save the people of Bosnia from ethnic genocide.

There is still plenty of room for that, even if you cut the defense budget. So we cut the defense budget. But most of all we raised the tax burden of the corporations. We did two things. We closed corporate loopholes and we insisted that there be an increase in the taxes in certain places on corporations because corporations have steadily paid less and less of the income tax burden over the last 20 years. From 1943 to 1995, they have dropped from a corporate tax burden percentage of nearly 40 percent to a corporate tax burden now of about 11 percent, while individuals have gone up from their percentage of the tax burden being 27 percent to 48 or 49 percent in 1983, and now it is still as high as 44 percent. So we balanced the budget by implementing what I call revenue justice.

Let us have the revenue flow from the place where the most revenue is

being generated. Corporations are making enormous profits. That sector of the economy is booming. Individuals and families are suffering. Their incomes have stagnated. They are not making as much in terms of real terms when you look at inflation as they were making 10 years ago. Minimum wages are far too low, way behind inflation. With all those factors under consideration, we hear tax cut. For families and individuals starting with the families and individuals at the bottom of the scale, in our Congressional Black Caucus budget we started at the bottom of the scale with families and individuals who are working families. We started by giving them some tax relief.

What is being proposed now by the Republicans is just the opposite. They are proposing to change the earned income tax credit which the Congressional Black Caucus fought very hard to expand 2 years ago. They want to change the earned income tax credit which means they are increasing the taxes on the poorest people. At the same time they want to give huge tax cuts for the richest people. They have their opinion. The Republicans in the House and Senate, they have a position. It is a clear position. I want to congratulate them for clearly enunciating and setting forth exactly what their vision of America is. They think America should provide more and more for the rich who have gotten more and more out of our economy over the past 20 years. They want to give them even more. They are clearly willing to state that. They are not hedging. They are not fudging. So there is a clear choice being presented to the American people.

I hope that we will keep our eyes on this process and keep the debate going. If they insist, if they want the tax cut at the same level that they have it, let us keep focused on that. Let us not back away from the argument about the level of taxes. Let us talk about the flat tax. Let us talk about the possibility of a national sales tax, value added tax. Let us talk about changing tax rates. Let us take a hard look at the tax policies across the board, because what has often happened in the 13 years that I have been here, I am in my 14th year, is that the tax policies and whatever dealt with taxes was discussed behind closed doors, was decided behind closed doors. They had some hearings and long lines of people would line up to go, and you could barely get into the Ways and Means meetings. And then when they made the final decision, of course, they had closed meetings.

Then they would come to the floor and you would have 1 or 2 hours to debate the most important issue in the country; that is, how are we going to get the revenues to run the fiscal affairs of the Nation. The shortest period of time to debate the most important topic.

I understand that one of my colleagues in the Democratic Party has proposed that special orders be taxed, that every Member who makes special orders should pay the cost of special orders, that whatever it costs to keep the staff here and the guards and the light bill, whatever, we should be charged that, each Member should have to pay that out of his budget.

My first reaction to that proposal—it came from a Democrat that I respect a great deal, it is not trivial. I understand her concern. My first reaction to that is that I would gladly, I would gladly advocate that there be no special orders of any kind if you will give every Member of Congress the right to speak for 5 minutes on any issue that is on the floor that they want to speak on. When the important issues come to this floor, if I had the right to speak for 5 minutes, I would surrender any other compensatory arrangements like 1-minute and 5 minutes and 60 minutes, who needs it? The problem is that we are 435 Representatives of this Nation, people from across the Nation, and we seldom have a chance to speak on the most important issues. The 435 people in this House of Representatives spend less time talking on this floor than the 100 Members of the other body. The 100 Members of the other body spend more time debating on the floor than we spend for 435 Members in the House of Representatives.

The time is so tightly controlled. We have a Committee on Rules. And the amount of time spent on the floor here debating issues is in direct proportion to the importance of the issue as perceived by the leadership. If the leadership perceives an issue to be really important, they shorten the time greatly. You can check this with the records. This can be verified. It is not an empty statement that I am making.

On issues that they do not consider very important, we have open rules, unlimited debate. But never has a Ways and Means bill come to the floor in the 14 years that I have been here where there was an open rule, an unlimited debate.

If I had that privilege and that right to have at least 5 minutes to speak on a Ways and Means bill, at least 5 minutes to speak on a defense bill, by the time, if you have only 1 hour for each side, and there have been some times when there is only 30 minutes for each side, but if you have 1 hour for each side, by the time you get through the committee, the committee of jurisdiction and any Committee on Appropriations members who also relate to that particular item, the time is used up. If you are not on defense, if you are not on Ways and Means, on those important issues you cannot say, you cannot even get 1 minute. So those who propose that we eliminate special orders, I am with you if you will join me in a fight to guarantee the right of every Member of Congress, which it ought to be taken for granted, we are elected by the people, we should have 5 minutes,

just 5 minutes on any issue that we deem to be important. If every one of the 435 Members want to speak for 5 minutes, I assure you if you look at the calendar, it will not lengthen the session of Congress. We have a lot of down time, a lot of waste of time where nobody is doing anything on this floor. The Senate spends more time, as I said before, on the floor than we spend here. The other body, in terms of per Member time on the floor, is way ahead of us. So I pause to say that that is very important.

I would like to have us keep our eyes on the budget/fiscal debate. Let us go forward and talk about taxes and where they come from. Let us talk about revenue. Let us go forward and talk about expenditures. Let us keep the debate going.

I would like to see a pledge to avoid lapsing into diversionary issues. As we look forward toward November 1996, let us not back away from a discussion of revenue, taxes, programs, budget cuts, balancing the budget, et cetera. Let us keep the debate going. It is a very complicated nation that we have. It is a complicated budget. These are complicated times. We should not try to oversimplify.

For the first time I think many Americans are getting some indication of what it is all about. For good or ill, regardless of whether you agree with the position taken by one party or another or one individual or another, the debate is very healthy. Can we keep this debate going? I hope we will.

I hope that the President's State of the Union Address tomorrow will be a statement which allows us to go forward and consider his vision of America and what America would look like when he remakes America, if he had the opportunity to remake America, versus the vision that is envisaged in the Contract With America that was set forth by the House Republicans. Beyond the Contract With America, the House Republicans have done a lot of things that are not in that contract. The attack on organized labor, the attack on workers safety, the refusal to even deal with minimum wages, all of that was not stated in the contract, but some terrible things have happened. But those are worthy items.

If you want to debate the budget and talk about the fact that the Republicans, because they could not get certain things through the authorization process, because they are frustrated by the fact that the Senate will not approve some of the measures that they have passed because they are not reasonable, because the Senate wants to stay closer to the common sense agenda of the American people so they have reverted to the appropriations process.

They do not like the fact that we have an agency called OSHA, which is responsible for the occupational health and safety of workers. They want OSHA out of business. They have made a compact with some of the worst kinds of business people who want to

avoid having to meet their responsibilities to provide a safe workplace. Ten thousand workers died last year; 10,000 workers died in the workplace. We can debate about other workers who died as a result of conditions in the workplace. They contracted illnesses and then they died later or they had an accident and it led to complications and they died later. But on the job, on the job 10,000 workers died.

This is not a trivial matter. It is a critical matter. Yet because they do not want to disturb the business community, which unreasonably insists that OSHA is a bother, OSHA, the Occupational Safety and Health Administration has enough employees to inspect the businesses of America. And when you take the number of businesses of America that are in the category that need to be inspected and you divide that by the number of people who are employed by OSHA to do the inspections, it will take 87 years, given the number of employees that OSHA has before the budget cuts, it would take 87 years for each one of the business sites in America that are supposed to be inspected to be inspected by that group of inspectors, 87 years.

They are going to cut OSHA drastically. So that means that it will take 100 years to get around to inspecting each business. So the argument that the businesses are being harassed and OSHA is a regulatory burden and that an attempt to provide safe workplaces for workers results in empowering or hindering the economy, these arguments are ridiculous. But they go forward.

□ 1500

Let them keep proposing that and saying that we need to save money at the cost of risking more lives of workers. Let them say that between now and November. Let us keep that going. Let us debate it. You decide. Let the American people decide.

Let them continue to tell us that school lunch programs are not being cut; it is the rate of growth that is being decreased. Let them keep telling us that, and we will tell you that if you are cutting, putting money to cut the rate of growth of the program in dollar terms, you are not looking at the rate of growth in terms of youngsters, the number of children who are enrolled in school.

They ignore the fact that the number of children enrolled in school is increasing. You cannot cut the rate of growth of the program without reducing what is available for the children who are there unless you take into consideration the fact the number of children is increasing.

They tell us immigrant children should not be given free lunches and that the schools should go and search out the immigrant children and create an atmosphere of terror within certain schools while they search for immigrant children to deny them the school lunch program.

Let this debate go forward. It is about saving money on the one hand, but if you look at it closely, there is more to this than just saving money. There is more to this than just saving money; there are some attitudes.

I think President Clinton made it quite clear in his budget message. The President had a veto message, and then the President has also sent a message down with his new balanced budget. Let us look for a moment at what is happening here, and again, it is going to be a long year. It is going to be a long debate.

Please do not lose faith. Keep the faith. Keep listening, because this is all about the remaking of America; and your faith is involved here, your children's faith is involved here.

The President was accused of not being sincere about a balanced budget. He submitted a balanced budget one time and then he said, according to CBO estimates, it is \$400 billion out of balance; over a 7-year period, the President is still spending \$400 billion too much.

So the President has come back with a budget that balances in 7 years, and it also has a surplus at the end of the 7 years; and now we are being told that is totally unacceptable. We are going to shut down the Government because we do not like the way you balanced the budget.

Now, was the call to balance the budget in the beginning, when they asked the President to submit a balanced budget, did they say, submit a balanced budget that we like; submit a balanced budget that is good for America; submit a balanced budget that you like? The President submitted a balanced budget he thinks is good for America, and in his message he says the following: His balanced budget upholds our values, upholds America's values.

We want to balance the budget to limit the debt, the burden of debt on our children. We want to protect Medicare and Medicaid to honor our duty to our elderly, to people with disabilities and to children. We want to invest in education and training to honor our duty to our children and families. We want to protect the environment and public health so our children grow up in a clean and safe world. We want to reward work by not raising taxes on working families. We want to provide tax relief for middle-class families.

Now, that is the message that came back with the newly balanced budget of the President, which, as I said before, ends in 7 years with a surplus.

By the way, the Congressional Black Caucus alternative budget, which I put forth on the floor of the House, the Congressional Black Caucus alternative budget also had a surplus at the end of 7 years. We had a surplus of \$16 billion at the end of 7 years. I told you we balanced our budget without cutting Medicaid, without cutting Medicare, and we increased the amount of money for job training and education,

and we did this using assumptions and figures that were certified by the Congressional Budget Office.

The Republican majority would not let us bring the budget to the floor if we had not used assumptions that were set forth by the Congressional Budget Office. So we balanced the budget. The Congressional Black Caucus alternative budget is a long way from where the President is right now.

I am not happy with the President and the fact he is going to cut Medicare far more than we stated in the Congressional Black Caucus budget it should be cut. Let us forget about that. Later on there was a bill introduced by Democrats that said, OK, a commission study showed that there are problems with the Medicare program, and by the year 2002 you may have a real problem, so let us cut the budget by \$90 billion. I think the study said it would be a problem of \$89 billion.

This bill proposed cutting the budget by \$90 billion over a 7-year period. The \$90 billion cut would be focused on waste, streamlining more administrative efficiency, and cutting waste, \$90 billion. The President is far beyond that \$90 billion.

There is a group called the Blue Dogs who have a proposal that also goes beyond the \$90 billion. The President does not please me by cutting more than \$90 billion, but I congratulate him on making the effort. He is stretching as far as he can in order to accommodate and reach a compromise with the Republicans. But this compromise, this stretch, has not impressed the Republicans.

They say we are going to shut down the Government, and go even beyond shutting down the Government; we are going to tamper with the economy of the United States and maybe the economy of the world by going into default if you don't give us what we want.

Now, clearly, understand, you out there with your common sense, the American people should clearly understand the power that is being wielded here. The Republicans are saying, we will threaten to shut down the Government, we will throw the Nation into default if you do not give us what we want. And even after you do that, if you meet us part of the way, we are going to do something selective. We are going to reach in and provide funding for only those programs that we approve of; we are going to strangle, through the appropriations process, those we do not like.

We do not like funds for education. We have a cut. Republicans are proposing to cut Head Start about \$300 million. They will reach in and strangle Head Start a little bit.

We do not like title I, which is the largest Federal program providing aid to elementary and secondary schools. Ninety percent of the school districts across America get some portion of the title I program. They do not like it, so they will reach in and strangle that by cutting it \$1.1 billion. That is about

1/7th of the total. That is a huge cut; out of \$7 billion, they are going to cut \$1.1 billion.

So these are horrendous actions, but at least they obvious, open. The CIA is not involved here, so they are not hiding what they are doing. It is an open position. It is up to the American people to go forward and look at what they are doing and come to some conclusions.

They are not interested just in saving money or balancing the budget. The argument that every family balances its budget and so forth, the Nation therefore should balance its budget, that argument makes a lot of sense on the surface, but that is really not what it is all about.

In the first place, very few families balance their budget in a year. In a year's period, your family's budget is not balanced and you know that too. You have not paid for your home fully. Rich people can, but we are talking about 10 to 15 percent of Americans who can go out and pay cash for a car and cash for a condominium or for a house. That number of people is very much in the minority in America.

Most Americans have to get mortgages. Most Americans have to get loans to buy cars. So very few families have a balanced budget where exactly what they take in during a year is what they spend during a year. They have debts that are carried over, long-term investments and items, and it is just ridiculous to insist we have to have a balanced budget. But that is where we are.

I will not bore you anymore by explaining the weaknesses in the argument that we have to have a balanced budget. That is accepted. Let us start out, that that is an assumption.

Everybody now is basically agreed that we will have a balanced budget. The President has agreed that we will have a balanced budget. The President has moved to put forth a balanced budget which the Congressional Budget Office and the General Accounting Office and everybody who has to sign off, they all agree the numbers and assumptions are correct.

Nobody can accuse the President of not following the assumptions of the Congressional Budget Office regardless of whether they are sound or unsound or how uncomfortable the White House may feel about it. They have gone forward and done that. So, now, let the debate go forward and let the American people make judgments about the arguments that are being made.

The President says that his budget reflects the values of the American people. One of the latest polls taken, I think there was a poll taken by the Washington Post, which shows that 50 percent, according to the poll, 50 percent of the American people agree that the President's position is a sound position and they want to support that position. I think this was January 7, not too long ago. The poll finds that 50

percent approve of how Clinton is handling this dispute, and 22 percent approve of the way the Republicans are handling it. 50 percent.

So we are not talking about what Congressman OWENS and the Members of the Congressional Black Caucus, the members of the Progressive caucus, the liberal Democrats, we are not talking about their position at this point. We are talking about the position of the President, which is consistent with the position of 50 percent of the American people. They approve of his tremendous effort to stretch and meet the Republicans.

I just hope that he understands that they do not want him to go any further. I hope the President does not disappoint the American people by stretching further, because any further stretching would be disastrous, any further stretching. Because if you stretch further, what you are doing is abandoning the values of the American people and moving to the values of the Republican elite.

The Republicans do not value the same vital commitments in Medicaid. The Republicans want to eliminate the guarantee of quality nursing home care and meaningful health care benefits for older Americans. They want to eliminate it for individuals with disabilities. They want to eliminate it for pregnant women and poor children.

All this is not necessary to balance the budget, we are saying, but they want to do that. They want to leave a lot of their dirty work to the States. They want to say, well, let the States make the decisions. People have come up with this argument, of course, that States can do a better job. The closer you get to the people, the more likely you are to have effective government.

There is nothing in the history of government which shows that State governments are more effective than the Federal Government, or that local governments are more effective than the Federal Government. Some of the worst corruption and the worst mismanagement and the worst incompetency you find in America can be found at the local level.

In New York State right now, at this very moment, we have Governor Pataki, who sits in the Governor's mansion of New York, a Republican Governor, who has turned the State government into a clubhouse patronage meal. Never before in the history of New York State government has any Governor so blatantly used the treasury, used the State apparatus, the administration of government, to bolster partisan concerns.

He has openly said he will pick up certain parts of the government in the capital; Albany is the capital of New York State. He is going to move certain programs out of Albany into Poughkeepsie, where he lives, and into other areas where he got large amounts of votes.

This Republican Governor is not pretending to be a good-government advo-

cate. He is openly doing this. He is openly allowing certain members of his cabinet who are responsible for certain contracts to solicit in fundraising.

There are all kinds of things happening that Democrats might have done, but they never were so blatant about it; and some things, Democrats have never done in New York City.

We have a Republican mayor, Mayor Giuliani, and we have had some strong mayors in the history of our city. One of the most famous ones, who was accused of being arrogant, many times he behaved like an emperor, he was a former Member of this House, Mayor Koch. But Mayor Koch insisted on a merit system for the selection of judges. Whether he liked it or not, there were judicial panels that appointed judges, and he lived with those appointments. He followed the recommendations of the panels.

Mayor Dinkins, who followed him, did the same thing, merit appointments.

And the newspapers, the good-government organizations, applauded all this. Along comes Mayor Giuliani, Republican mayor, and he ignores or challenges the findings of the judicial review panels and appoints two people, who, in the opinion of many of the judges, the legal people who sit on the judicial review panels, are not qualified. He boasts about it, and he is going to do more of it.

In New York City the remaking of government is already going forward, the harassment of people who want to get on welfare. If you apply for welfare, there are all kinds of extra roadblocks thrown in your way, so that if you want to cut the welfare rolls, one simple way to do it is to make the paperwork more difficult. No matter how poor you are, if I insist that I am not taking your application unless you sign on just the right line, unless you answer every question, unless every "T" is crossed, and every "I" is dotted, I can keep you off welfare for months just through those technicalities.

In other words, if you have a system of values where you do not want to feed the hungry, you do not want to provide housing for the homeless or clothe the naked, you are totally out of sync with the Judeo-Christian values of this Nation, then you can proceed at the local level even with present regulations in place.

At this moment, people are still entitled to Aid to Families with Dependent Children. They are still entitled. The entitlement has not been taken away yet. It has been proposed by the Republicans in this House; it has been passed by the Republicans in the Senate, and a lot of Democrats in the Senate voted for it. So entitlement probably is going to be gone this time next year; the people who are poor families with children qualifying for Aid to Families with Dependent Children will not have a Federal entitlement. That will probably be gone next year.

I fear that that is one of the concessions that the President will make. I

hope he will not, but I fear that will be a concession he will make. But it is not gone yet. It is still there.

At the local government level in New York City, we have a mayor who has gone ahead and is already doing the kinds of dirty work you can expect once that entitlement is gone. He has taken it upon himself to come up with tricks and various means to keep people off the welfare roll and deny them even when they have great needs. So that process is going forward.

Medicaid. The Governor has proposed, and then he backed away, that the standards for nursing homes in New York be watered down, that the requirement that every nursing home has to take a certain percentage of poor people be eliminated. He has backed away temporarily, but those proposals are coming back, if the States are going to have an opportunity to administer Medicaid without the guarantees.

Let us understand States already administer these programs, localities already administer these programs. What they are trying to do is take away the Federal guarantees that if you are eligible, you should get it. They want to take away the Federal appeal procedures. They want to take away the Federal guidelines. They want to take away the Federal oversight. They want to be free to take taxpayers' money and use it the way they want to use it toward their own ends.

An example is being set by Mr. Pataki in New York State and Mr. Giuliani in New York City. Those are examples of the kind of thing you can look forward to: abuse of power, abuse of the poor, balancing the budget on the backs of the people who do not have political power.

So the President says the Republicans do not value these vital commitments, and between now and November 1996, November of this year, keep watching. Do not lose your gaze. Keep your eyes on the prize.

Where are the American values? Do they say, we want to cut Medicaid and leave the poorest people without health care, leave the people who are disabled without health care, leave pregnant women and poor children without health care? Are those American values?

In Medicare, the President says the Republicans want to charge 37 million Medicare recipients higher premiums and change the system so that it benefits the healthiest and wealthiest while allowing the traditional Medicare Program to wither on the vine. That is a quote from one of the great leaders of the Republican Party, even though it is not necessary to balance the budget.

The Republicans want to charge 37 million Medicare recipients higher premiums and change the system so that it benefits the healthiest and the wealthiest while leaving those who need it most in a state of stress. I know the stress because I get more questions in my district about Medicare and Medicaid than about any other programs.

People are feeling the stress already as they contemplate what is being proposed.

In education, the Republicans call for cuts in aid for smaller classrooms, cuts for Head Start. They call for cuts in basic skills and higher standards while ending the direct student loan program. What does the direct student loan program have to do with balancing the budget? Almost nothing. In fact, just the opposite. We will end up spending more money by ending the direct student loan program, but that is an activity which is offensive to the banking community, certain favorite communities that support the leadership, and they are out there making arguments that the student loan program, the direct student loan program is some kind of evil when it has obvious benefits.

Environment. They continually put the special interests over the environment and they want to take the environmental cop off the beat. These are Republican values versus American values.

The American people indicate that they are with the President. They are with the President. Let us keep our eyes on the two sets of values, the President's values versus the Republican values, as we go forward toward November 1996. Do not take your eyes off the prize. The budget debate, the fiscal debate, the tax debate, that is it; that is what we have to focus on.

I keep insisting that we ought to keep our eyes on the prize and Americans ought to welcome the opportunity to remake America or to refine America or to adjust America and make it a better America, because I know the surprise that is coming. The Republicans are planning to back away from these very important issues and move into diversionary tactics. They are going to try to ambush the voters with the usual diversionary issues.

What are the diversionary issues? Prayer in the schools, gun control, affirmative action, set-asides, voting rights, gays in the military. Those have nothing to do with the remaking of America in terms of fiscal and budget and tax issues, but they are going to switch to those and we have to be aware that as we go forward in 1996, these are very important issues.

Prayer in school is important. It is important to talk about guns. I am all in favor of more gun control. I understand the position of those who want less; I understand their position. I disagree with it thoroughly.

The murder rate has gone down in general, but among young people the murder rate, the rate of people being shot with guns, is dramatically increasing. So you have a young population using guns, and that young population is coming to the point where they are going to be a greater percentage of the overall population. So the decrease in crime we are watching now will be accompanied by an increase in crime later on as these young people

using guns reach the critical teenage ages. That is where we are going.

So we have to keep our eyes on the prize and beware of the diversionary issues. We have to keep our eyes on the prize and not let introductions of arguments about people being subhuman be introduced.

I was shocked that one of our leaders commented on a brutal crime in Chicago, indicating that a woman would not have been murdered and had the baby ripped out of her stomach if it was not for the welfare culture. That really shocked me greatly. I did not see any connection between the welfare culture and a brutal crime like that.

There are a lot of brutal crimes taking place in our country and across the world where people are not on welfare. Immorality has nothing to do directly with whether or not a person is on welfare or not. Nobody has commented on the fact that Princess Diana and Prince Charles have chosen not only to commit adultery, but to go on television and discuss it. That is being done by people who have never been on welfare, and it is the kind of horror that there is no excuse for.

It is bad enough that people have sins, and all of us sin, but to go on television and parade your sins, especially when you know you are a role model. They are role models for people in Britain. They insist on having this royal family, and sometimes Americans envy the fact that Britain has a royal family and we do not; but I think that is one great example why we do not need a royal family.

But Americans use the Royal Family of Britain as role models. Children use them as role models. Princess Diana, I am sure a lot of teenage girls identify with her, and on and on it goes.

So if welfare determines people's morality and we must get rid of welfare in order to have people become more moral, then how does the Royal Family behave this way, and they have never been on welfare? They have never worked for a living either.

Maybe they have it too easy. Maybe we are talking about decadence at a level which may be something that sociologists and psychologists and psychiatrists can deal with, but I just do not see why that has any bearing.

We are going to be talking about morality. We are going to be talking about sin versus nonsin. We are going to be talking about Whitewater. Nobody wants to talk about the real crime involved in the savings and loan association debacle. We talk about Whitewater having something to do with the savings and loans crisis. Occasionally they mention that. Most people just think it was invented by the Clintons. The Clintons lost money on a savings and loan venture in Whitewater; they lost money.

Let us look at Silverado in Colorado. I have a whole book here. I am a student of the savings and loan swindle, because the savings and loan swindle was the greatest swindle in the history

of civilization. In the economic history of civilization, nothing like this has ever happened before. And yet in America we do not even talk about it anymore. It is nearing a close, as far as the people who want to cover it up are concerned.

The greatest crime in terms of economic thievery was committed right here in this country through the savings and loan association swindle and the accompanying banks swindle.

Other banks that were not savings and loan associations did the same things, the misuse of the public trust. They took out deposits backed by the Federal Deposit Insurance Corporation, which meant that if anything happened, you, the taxpayer, stood behind it. They took that; they abused and misused that, and billions of dollars were lost. In fact, one estimate by Stanford University said we are talking about a loss of \$500 billion, a cost to the taxpayers eventually of \$500 billion.

There has been a process of going through the Resolution Trust Corporation and cleaning these things up, and negotiating out various arrangements, and it is all coming to a quiet close.

That is real criminality. That is real dishonesty. That is real thievery.

I have two reports. I read about them and I called for them. One is from the Department of Justice, Financial Institution Fraud, Special Report, Special Counsel for Financial Institution Fraud. That report I have looked at, am still looking at it.

Another is called "Attacking Financial Institution Fraud." It is from the U.S. Department of Justice, the U.S. Office of the Attorney General. It is a report to Congress that is required.

As I look at both of these reports, what strikes me is that they are deliberately confusing. They deliberately do not ever state clear facts. It is very hard to find out exactly how much money have the American taxpayers had to pour into bailing out the savings and loan associations. It is very hard to find out exactly how much.

I know on the floor of this House, when we appropriate in one bill \$50 billion for this, it is \$70 billion for that, and yet they do not talk in those kinds of numbers here. They talk about bringing this whole thing to a close; and you are not talking about hundreds of billions, you are talking about a few billion here and a few million there, and I cannot make them add up.

They have deliberately not reported anything in a summary fashion. I am still studying these reports to find out more about one of the greatest swindles that ever took place.

So if we get into discussions of morality and discussions of swindling, if we are going to continue the Whitewater discussions, then I think it is only fair to talk about the savings and loan association swindle in all of its dimensions and talk about the Silverado, \$2,286,901,934. That is the figure that they have said they ordered to

be recovered. We were talking about \$150 billion. Why has only \$2 billion been ordered to be recovered?

You will hear more about this later. This is the kind of morality discussion, if we are going to have a morality discussion, that we should get into.

But my final comment is, Mr. Speaker, let us keep our eyes on the prize, continue to focus on the budget, taxes, and expenditures. It is a discussion that the American people deserve.

(1) the Secretary determines that the technical risk associated with liquid propellant will increase costs and delay the initial operational capability of the Crusader; and

(2) the Secretary notifies the congressional defense committees of the proposed use of the funds and the reasons for the proposed use of the funds.

(b) LIMITATION.—The Secretary of the Army may not spend funds for the liquid propellant portion of the Crusader program after August 15, 1996, unless—

(1) the report required by subsection (c) has been submitted by that date; and

(2) such report includes documentation of significant progress, as determined by the Secretary, toward meeting the objectives for the liquid propellant portion of the program, as set forth in the baseline description for the Crusader program and approved by the Office of the Secretary of Defense on January 4, 1995.

(c) REPORT REQUIRED.—Not later than August 1, 1996, the Secretary of the Army shall submit to the congressional defense committees a report containing documentation of the progress being made in meeting the objectives set forth in the baseline description for the Crusader program and approved by the Office of the Secretary of Defense on January 4, 1995. The report shall specifically address the progress being made toward meeting the following objectives:

(1) Establishment of breech and ignition design criteria for rate of fire for the cannon of the Crusader.

(2) Selection of a satisfactory ignition concept for the next prototype of the cannon.

(3) Selection, on the basis of modeling and simulation, of design concepts to prevent chamber piston reversals, and validation of the selected concepts by gun and mock chamber firings.

Subtitle C—Ballistic Missile Defense Act of 1995

SEC. 231. SHORT TITLE.

This subtitle may be cited as the "Ballistic Missile Defense Act of 1995".

SEC. 232. FINDINGS.

Congress makes the following findings:

(1) The emerging threat that is posed to the national security interests of the United States by the proliferation of ballistic missiles is significant and growing, both in terms of numbers of missiles and in terms of the technical capabilities of those missiles.

(2) The deployment of ballistic missile defenses is a necessary, but not sufficient, element of a broader strategy to discourage both the proliferation of weapons of mass destruction and the proliferation of the means of their delivery and to defend against the consequences of such proliferation.

(3) The deployment of effective Theater Missile Defense systems can deter potential adversaries of the United States from escalating a conflict by threatening or attacking United States forces or the forces or territory of coalition partners or allies of the United States with ballistic missiles armed with weapons of mass destruction to offset the operational and technical advantages of the United States and its coalition partners and allies.

(4) United States intelligence officials have provided intelligence estimates to congressional committees that (A) the trend in missile proliferation is toward longer range and more sophisticated ballistic missiles, (B) North Korea may deploy an intercontinental ballistic missile capable of reaching Alaska or beyond within five years, and (C) although a new, indigenously developed ballistic missile threat to the continental United States is not foreseen within the next ten years, determined countries can acquire intercontinental ballistic missiles in the near future and with little warning by means other than indigenous development.

(5) The development and deployment by the United States and its allies of effective defenses against ballistic missiles of all ranges will reduce the incentives for countries to acquire such missiles or to augment existing missile capabilities.

(6) The concept of mutual assured destruction (based upon an offense-only form of deterrence), which is the major philosophical rationale underlying the ABM Treaty, is now questionable as a basis for stability in a multipolar world in which the United States and the states of the former Soviet Union are seeking to normalize relations and eliminate Cold War attitudes and arrangements.

(7) The development and deployment of a National Missile Defense system against the threat of limited ballistic missile attacks—

(A) would strengthen deterrence at the levels of forces agreed to by the United States and Russia under the Strategic Arms Reduction Talks Treaty (START-I); and

(B) would further strengthen deterrence if reductions below the levels permitted under START-I should be agreed to and implemented in the future.

(8) The distinction made during the Cold War, based upon the technology of the time, between strategic ballistic missiles and nonstrategic ballistic missiles, which resulted in the distinction made in the ABM Treaty between strategic defense and nonstrategic defense, has become obsolete because of technological advancement (including the development by North Korea of long-range Taepo-Dong I and Taepo-Dong II missiles) and, therefore, that distinction in the ABM Treaty should be reviewed.

SEC. 233. BALLISTIC MISSILE DEFENSE POLICY.

It is the policy of the United States—

(1) to deploy affordable and operationally effective theater missile defenses to protect forward-deployed and expeditionary elements of the Armed Forces of the United States and to complement the missile defense capabilities of forces of coalition partners and of allies of the United States; and

(2) to seek a cooperative, negotiated transition to a regime that does not feature an offense-only form of deterrence as the basis for strategic stability.

SEC. 234. THEATER MISSILE DEFENSE ARCHITECTURE.

(a) **ESTABLISHMENT OF CORE PROGRAM.**—To implement the policy established in paragraph (1) of section 233, the Secretary of Defense shall restructure the core theater missile defense program to consist of the following systems, to be carried out so as to achieve the specified capabilities:

(1) The Patriot PAC-3 system, with a first unit equipped (FUE) during fiscal year 1998.

(2) The Navy Lower Tier (Area) system, with a user operational evaluation system (UOES) capability during fiscal year 1997 and an initial operational capability (IOC) during fiscal year 1999.

(3) The Theater High-Altitude Area Defense (THAAD) system, with a user operational evaluation system (UOES) capability not later than fiscal year 1998 and a first unit equipped (FUE) not later than fiscal year 2000.

(4) The Navy Upper Tier (Theater Wide) system, with a user operational evaluation system (UOES) capability during fiscal year 1999 and an initial operational capability (IOC) during fiscal year 2001.

(b) **USE OF STREAMLINED ACQUISITION PROCEDURES.**—The Secretary of Defense shall prescribe and use streamlined acquisition policies and procedures to reduce the cost and increase the efficiency of developing and deploying the theater missile defense systems specified in subsection (a).

(c) **INTEROPERABILITY AND SUPPORT OF CORE SYSTEMS.**—To maximize effectiveness and flexibility of the systems comprising the core theater missile defense program, the Secretary of Defense shall ensure that those systems are integrated and complementary and are fully capable of exploiting external sensor and battle management support from systems such as—

(A) the Cooperative Engagement Capability (CEC) system of the Navy;

(B) airborne sensors; and

(C) space-based sensors (including, in particular, the Space and Missile Tracking System).

(d) **FOLLOW-ON SYSTEMS.**—(1) The Secretary of Defense shall prepare an affordable development plan for theater missile defense systems to be developed as follow-on systems to the core systems specified in subsection (a). The Secretary shall make the selection of a system for inclusion in the plan based on the capability of the system to satisfy military requirements not met by the systems in the

core program and on the capability of the system to use prior investments in technologies, infrastructure, and battle-management capabilities that are incorporated in, or associated with, the systems in the core program.

(2) The Secretary may not proceed with the development of a follow-on theater missile defense system beyond the Demonstration/Validation stage of development unless the Secretary designates that system as a part of the core program under this section and submits to the congressional defense committees notice of that designation. The Secretary shall include with any such notification a report describing—

(A) the requirements for the system and the specific threats that such system is designed to counter;

(B) how the system will relate to, support, and build upon existing core systems;

(C) the planned acquisition strategy for the system; and

(D) a preliminary estimate of total program cost for that system and the effect of development and acquisition of such system on Department of Defense budget projections.

(e) **PROGRAM ACCOUNTABILITY REPORT.**—(1) As part of the annual report of the Ballistic Missile Defense Organization required by section 224 of Public Law 101-189 (10 U.S.C. 2431 note), the Secretary of Defense shall describe the technical milestones, the schedule, and the cost of each phase of development and acquisition (together with total estimated program costs) for each core and follow-on theater missile defense program.

(2) As part of such report, the Secretary shall describe, with respect to each program covered in the report, any variance in the technical milestones, program schedule milestones, and costs for the program compared with the information relating to that program in the report submitted in the previous year and in the report submitted in the first year in which that program was covered.

(f) **REPORTS ON TMD SYSTEM LIMITATIONS UNDER ABM TREATY.**—(1) Whenever, after January 1, 1993, the Secretary of Defense issues a certification with respect to the compliance of a particular Theater Missile Defense system with the ABM Treaty, the Secretary shall transmit to the Committee on Armed Services of the Senate and the Committee on National Security of the House of Representatives a copy of such certification. Such transmittal shall be made not later than 30 days after the date on which such certification is issued, except that in the case of a certification issued before the date of the enactment of this Act, such transmittal shall be made not later than 60 days after the date of the enactment of this Act.

(2) If a certification under paragraph (1) is based on application of a policy concerning United States compliance with the ABM Treaty that differs from the policy described in section 235(b)(1), the Secretary shall include with the transmittal under that paragraph a report providing a detailed assessment of—

(A) how the policy applied differs from the policy described in section 235(b)(1); and

(B) how the application of that policy (rather than the policy described in section 235(b)(1)) will affect the cost, schedule, and performance of that system.

SEC. 235. PROHIBITION ON USE OF FUNDS TO IMPLEMENT AN INTERNATIONAL AGREEMENT CONCERNING THEATER MISSILE DEFENSE SYSTEMS.

(a) **FINDINGS.**—(1) Congress hereby reaffirms—

(A) the finding in section 234(a)(7) of the National Defense Authorization Act for Fiscal Year 1994 (Public Law 103-160; 107 Stat.

1595; 10 U.S.C. 2431 note) that the ABM Treaty was not intended to, and does not, apply to or limit research, development, testing, or deployment of missile defense systems, system upgrades, or system components that are designed to counter modern theater ballistic missiles, regardless of the capabilities of such missiles, unless those systems, system upgrades, or system components are tested against or have demonstrated capabilities to counter modern strategic ballistic missiles; and

(B) the statement in section 232 of the National Defense Authorization Act for Fiscal Year 1995 (Public Law 103-337; 108 Stat. 2700) that the United States shall not be bound by any international agreement entered into by the President that would substantively modify the ABM Treaty unless the agreement is entered into pursuant to the treaty making power of the President under the Constitution.

(2) Congress also finds that the demarcation standard described in subsection (b)(1) for compliance of a missile defense system, system upgrade, or system component with the ABM Treaty is based upon current technology.

(b) **SENSE OF CONGRESS CONCERNING COMPLIANCE POLICY.**—It is the sense of Congress that—

(1) unless a missile defense system, system upgrade, or system component (including one that exploits data from space-based or other external sensors) is flight tested in an ABM-qualifying flight test (as defined in subsection (e)), that system, system upgrade, or system component has not, for purposes of the ABM Treaty, been tested in an ABM mode nor been given capabilities to counter strategic ballistic missiles and, therefore, is not subject to any application, limitation, or obligation under the ABM Treaty; and

(2) any international agreement that would limit the research, development, testing, or deployment of missile defense systems, system upgrades, or system components that are designed to counter modern theater ballistic missiles in a manner that would be more restrictive than the compliance criteria specified in paragraph (1) should be entered into only pursuant to the treaty making powers of the President under the Constitution.

(c) **PROHIBITION ON FUNDING.**—Funds appropriated or otherwise made available to the Department of Defense for fiscal year 1996 may not be obligated or expended to implement an agreement, or any understanding with respect to interpretation of the ABM Treaty, between the United States and any of the independent states of the former Soviet Union entered into after January 1, 1995, that—

(1) would establish a demarcation between theater missile defense systems and anti-ballistic missile systems for purposes of the ABM Treaty; or

(2) would restrict the performance, operation, or deployment of United States theater missile defense systems.

(d) **EXCEPTIONS.**—Subsection (c) does not apply—

(1) to the extent provided by law in an Act enacted after this Act;

Subtitle B—Depot-Level Activities

SEC. 311. POLICY REGARDING PERFORMANCE OF DEPOT-LEVEL MAINTENANCE AND REPAIR FOR THE DEPARTMENT OF DEFENSE.

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense does not have a comprehensive policy regarding the performance of depot-level maintenance and repair of military equipment.

(2) The absence of such a policy has caused the Congress to establish guidelines for the performance of such functions.

(3) It is essential to the national security of the United States that the Department of Defense maintain an organic capability within the department, including skilled personnel, technical competencies, equipment, and facilities, to perform depot-level maintenance and repair of military equipment in order to ensure that the Armed Forces of the United States are able to meet training, operational, mobilization, and emergency requirements without impediment.

(4) The organic capability of the Department of Defense to perform depot-level maintenance and repair of military equip-

ment must satisfy known and anticipated core maintenance and repair requirements across the full range of peacetime and wartime scenarios.

(5) Although it is possible that savings can be achieved by contracting with private-sector sources for the performance of some work currently performed by Department of Defense depots, the Department of Defense has not determined the type or amount of work that should be performed under contract with private-sector sources nor the relative costs and benefits of contracting for the performance of such work by those sources.

(b) SENSE OF CONGRESS.—It is the sense of Congress that there is a compelling need for the Department of Defense to articulate known and anticipated core maintenance and repair requirements, to organize the resources of the Department of Defense to meet those requirements economically and efficiently, and to determine what work should be performed by the private sector and how such work should be managed.

(c) REQUIREMENT FOR POLICY.—Not later than March 31, 1996, the Secretary of Defense shall develop and report to the Committee on Armed Services of the Senate and the Committee on National Security of the House of Representatives a comprehensive policy on the performance of depot-level maintenance and repair for the Department of Defense that maintains the capability described in section 2464 of title 10, United States Code.

(d) CONTENT OF POLICY.—In developing the policy, the Secretary of Defense shall do each of the following:

(1) Identify for each military department, with the concurrence of the Secretary of that military department, those depot-level maintenance and repair activities that are necessary to ensure the depot-level maintenance and repair capability as required by section 2464 of title 10, United States Code.

(2) Provide for performance of core depot-level maintenance and repair capabilities in facilities owned and operated by the United States.

(3) Provide for the core capabilities to include sufficient skilled personnel, equipment, and facilities that—

(A) is of the proper size (i) to ensure a ready and controlled source of technical competence and repair and maintenance capability necessary to meet the requirements of the National Military Strategy and other requirements for responding to mobilizations and military contingencies, and (ii) to provide for rapid augmentation in time of emergency; and

(B) is assigned sufficient workload to ensure cost efficiency and technical proficiency in time of peace.

(4) Address environmental liability.

(5) In the case of depot-level maintenance and repair workloads in excess of the workload required to be performed by Department of Defense depots, provide for competition for those workloads between public and private entities when there is sufficient potential for realizing cost savings based on adequate private-sector competition and technical capabilities.

(6) Address issues concerning exchange of technical data between the Federal Government and the private sector.

(7) Provide for, in the Secretary's discretion and after consultation with the Secretaries of the military departments, the transfer from one military department to another, in accordance with merit-based selection processes, workload that supports the core depot-level maintenance and repair capabilities in facilities owned and operated by the United States.

(8) Require that, in any competition for a workload (whether among private-sector sources or between depot-level activities of the Department of Defense and private-sector sources), bids are evaluated under a methodology that ensures that appropriate costs to the Government and the private sector are identified.

(9) Provide for the performance of maintenance and repair for any new weapons systems defined as core, under section 2464 of title 10, United States Code, in facilities owned and operated by the United States.

(e) CONSIDERATIONS.—In developing the policy, the Secretary shall take into consideration the following matters:

(1) The national security interests of the United States.

(2) The capabilities of the public depots and the capabilities of businesses in the private sector to perform the maintenance and repair work required by the Department of Defense.

(3) Any applicable recommendations of the Defense Base Closure and Realignment Commission that are required to be implemented under the Defense Base Closure and Realignment Act of 1990.

(4) The extent to which the readiness of the Armed Forces would be affected by a necessity to construct new facilities to accommodate any redistribution of depot-level maintenance and repair workloads that is made in accordance with the recommendation of the Defense Base Closure and Realignment Commission, under the Defense Base Closure and Realignment Act of 1990, that such workloads be consolidated at Department of Defense depots or private-sector facilities.

(5) Analyses of costs and benefits of alternatives, including a comparative analysis of—

(A) the costs and benefits, including any readiness implications, of any proposed policy to convert to contractor performance of depot-level maintenance and repair workloads where the workload is being performed by Department of Defense personnel; and

(B) the costs and benefits, including any readiness implications, of a policy to transfer depot-level maintenance and repair workloads among depots.

(f) REPEAL OF 60/40 REQUIREMENT AND REQUIREMENT RELATING TO COMPETITION.—(1) Sections 2466 and 2469 of title 10, United States Code, are repealed.

(2) The table of sections at the beginning of chapter 146 of such title is amended by striking out the items relating to sections 2466 and 2469.

(3) The amendments made by paragraphs (1) and (2) shall take effect on the date (after the date of the enactment of this Act) on which legislation is enacted that contains a provision that specifically states one of the following:

(A) "The policy on the performance of depot-level maintenance and repair for the Department of Defense that was submitted by the Secretary of Defense to the Committee on Armed Services of the Senate and the Committee on National Security of the House of Representatives pursuant to section 311 of the National Defense Authorization Act for Fiscal Year 1996 is approved."; or

(B) "The policy on the performance of depot-level maintenance and repair for the Department of Defense that was submitted by the Secretary of Defense to the Committee on Armed Services of the Senate and the Committee on National Security of the House of Representatives pursuant to section 311 of the National Defense Authorization Act for Fiscal Year 1996 is approved with the following modifications:" (with the modifications being stated in matter appearing after the colon).

(1) specifies depot maintenance core capability requirements determined in accordance with the procedures established to comply with the policy prescribed pursuant to subsections (d)(2) and (d)(3);

(2) specifies the planned amount of workload to be accomplished by the depot-level activities of each military department in support of those requirements for the following fiscal year; and

(3) identifies the planned amount of workload, which—

(A) shall be measured by direct labor hours and by amounts to be expended; and

(B) shall be shown separately for each commodity group.

(1) An analysis of the need for and effect of the requirement under section 2466 of title 10, United States Code, that no more than 40 percent of the depot-level maintenance and repair work of the Department of Defense be contracted for performance by non-Government personnel, including a description of the effect on military readiness and the national security resulting from that requirement and a description of any specific difficulties experienced by the Department of Defense as a result of that requirement.

(2) An analysis of the distribution during the five fiscal years ending with fiscal year 1995 of the depot-level maintenance and repair workload of the Department of Defense between depot-level activities of the Department of Defense and non-Government personnel, measured by direct labor hours and by amounts expended, and displayed, for that five-year period and for each year of that period, so as to show (for each military department (and separately for the Navy and Marine Corps)) such distribution.

(3) A projection of the distribution during the five fiscal years beginning with fiscal year 1997 of the depot-level maintenance and repair workload of the Department of Defense between depot-level activities of the Department of Defense and non-Government personnel, measured by direct labor hours and by amounts expended, and displayed, for that five-year period and for each year of that period, so as to show (for each military department (and separately for the Navy and Marine Corps)) such distribution that would be accomplished under a new policy as required under subsection (c).

(j) OTHER REVIEW BY GENERAL ACCOUNTING OFFICE.—(1) The Comptroller General of the United States shall conduct an independent audit of the findings of the Secretary of Defense in the report under subsection (i). The Secretary of Defense shall provide to the

Comptroller General for such purpose all information used by the Secretary in preparing such report.

"(2) DETERMINATION OF DISCHARGES REQUIRED TO BE CONTROLLED BY MARINE POLLUTION CONTROL DEVICES.—

"(A) IN GENERAL.—The Administrator and the Secretary of Defense, after consultation with the Secretary of the department in which the Coast Guard is operating, the Secretary of Commerce, and interested States, shall jointly determine the discharges incidental to the normal operation of a vessel of the Armed Forces for which it is reasonable and practicable to require use of a marine pollution control device to mitigate adverse impacts on the marine environment. Notwithstanding subsection (a)(1) of section 553

of title 5, United States Code, the Administrator and the Secretary of Defense shall promulgate the determinations in accordance with such section. The Secretary of Defense shall require the use of a marine pollution control device on board a vessel of the Armed Forces in any case in which it is determined that the use of such a device is reasonable and practicable.

“(B) CONSIDERATIONS.—In making a determination under subparagraph (A), the Administrator and the Secretary of Defense shall take into consideration—

“(i) the nature of the discharge;

“(ii) the environmental effects of the discharge;

“(iii) the practicability of using the marine pollution control device;

“(iv) the effect that installation or use of the marine pollution control device would have on the operation or operational capability of the vessel;

“(v) applicable United States law;

“(vi) applicable international standards; and

“(vii) the economic costs of the installation and use of the marine pollution control device.

“(3) PERFORMANCE STANDARDS FOR MARINE POLLUTION CONTROL DEVICES.—

Notwithstanding subsection (a)(1) of section 553 of title 5, United States Code, the Administrator and the Secretary of Defense shall promulgate the standards in accordance with such section.

“(B) CONSIDERATIONS.—In promulgating standards under this paragraph, the Administrator and the Secretary of Defense shall take into consideration the matters set forth in paragraph (2)(B).

“(C) CLASSES, TYPES, AND SIZES OF VESSELS.—The standards promulgated under this paragraph may—

“(i) distinguish among classes, types, and sizes of vessels;

“(ii) distinguish between new and existing vessels; and

“(I) review the determinations; and

“(II) if necessary, revise the determinations based on significant new information.

“(B) STANDARDS.—The Administrator and the Secretary of Defense shall—

“(i) promulgate standards of performance for a marine pollution control device under

paragraph (3) not later than 2 years after the date of a determination under paragraph (2) that the marine pollution control device is required; and

“(ii) every 5 years—

“(I) review the standards; and

“(II) if necessary, revise the standards, consistent with paragraph (3)(B) and based on significant new information.

“(C) REGULATIONS.—The Secretary of Defense shall promulgate regulations with respect to a marine pollution control device under paragraph (4) as soon as practicable after the Administrator and the Secretary of Defense promulgate standards with respect to the device under paragraph (3), but not later than 1 year after the Administrator and the Secretary of Defense promulgate the standards. The regulations promulgated by the Secretary of Defense under paragraph (4) shall become effective upon promulgation unless another effective date is specified in the regulations.

“(D) PETITION FOR REVIEW.—The Governor of any State may submit a petition requesting that the Secretary of Defense and the Administrator review a determination under paragraph (2) or a standard under paragraph (3), if there is significant new information, not considered previously, that could reasonably result in a change to the particular determination or standard after consideration of the matters set forth in paragraph (2)(B). The petition shall be accompanied by the scientific and technical information on which the petition is based. The Administrator and the Secretary of Defense shall grant or deny the petition not later than 2 years after the date of receipt of the petition.

“(6) EFFECT ON OTHER LAWS.—

“(A) PROHIBITION ON REGULATION BY STATES OR POLITICAL SUBDIVISIONS OF STATES.—Beginning on the effective date of—

“(ii) regulations promulgated by the Secretary of Defense under paragraph (4);

except as provided in paragraph (7), neither a State nor a political subdivision of a State may adopt or enforce any statute or regulation of the State or political subdivision with respect to the discharge or the design, construction, installation, or use of any marine pollution control device required to control discharges from a vessel of the Armed Forces.

“(I) a determination under paragraph (2) that it is not reasonable and practicable to require use of a marine pollution control device regarding a particular discharge incidental to the normal operation of a vessel of the Armed Forces; or

“(II) regulations promulgated by the Secretary of Defense under paragraph (4);

if a State determines that the protection and enhancement of the quality of some or all of the waters within the State require greater environmental protection, the State may prohibit 1 or more discharges incidental to the normal operation of a vessel, whether treated or not treated, into the waters. No prohibition shall apply until the Administrator makes the determinations described

in subclauses (II) and (III) of subparagraph (B)(i).

“(ii) DOCUMENTATION.—To the extent that a prohibition under this paragraph would apply to vessels of the Armed Forces and not to other types of vessels, the State shall document the technical or environmental basis for the distinction.

“(B) PROHIBITION BY THE ADMINISTRATOR.—

“(i) IN GENERAL.—Upon application of a State, the Administrator shall by regulation prohibit the discharge from a vessel of 1 or more discharges incidental to the normal operation of a vessel, whether treated or not treated, into the waters covered by the application if the Administrator determines that—

“(I) the protection and enhancement of the quality of the specified waters within the State require a prohibition of the discharge into the waters;

The Secretary shall prescribe the rate on the basis of the best available estimate of risk and financial exposure, levels of subscription by members, and other relevant factors.

“(b) LEVEL PREMIUMS.—The premium rate prescribed for the first year of insurance coverage of an insured member shall be continued without change for subsequent years of insurance coverage, except that the Secretary, after consultation with the Board of Actuaries, may adjust the premium rate in order to fund inflation-adjusted benefit increases on an actuarially sound basis.

“§ 12527. Payment of premiums

“(a) METHODS OF PAYMENT.—(1) The monthly premium for coverage of a member under the insurance program shall be deducted and withheld from the insured member's pay for each month.

“(2) An insured member who does not receive pay on a monthly basis shall pay the Secretary directly the premium amount applicable for the level of benefits for which the member is insured.

“(b) ADVANCE PAY FOR PREMIUM.—The Secretary concerned may advance to an insured member the amount equal to the first insurance premium payment due under this chap-

ter. The advance may be paid out of appropriations for military pay. An advance to a member shall be collected from the member either by deducting and withholding the amount from basic pay payable for the member or by collecting it from the member directly. No disbursing or certifying officer shall be responsible for any loss resulting from an advance under this subsection.

“(c) PREMIUMS TO BE DEPOSITED IN FUND.—Premium amounts deducted and withheld from the pay of insured members and premium amounts paid directly to the Secretary shall be credited monthly to the Fund.

“(a) ESTABLISHMENT.—There is established on the books of the Treasury a fund to be known as the ‘Reserve Mobilization Income Insurance Fund’, which shall be administered by the Secretary of the Treasury. The Fund shall be used for the accumulation of funds in order to finance the liabilities of the insurance program on an actuarially sound basis.

“(b) ASSETS OF FUND.—There shall be deposited into the Fund the following:

The income on such investments shall be credited to the Fund.

“(e) ANNUAL ACCOUNTING.—At the beginning of each fiscal year, the Secretary, in consultation with the Board of Actuaries and the Secretary of the Treasury, shall determine the following:

The Board shall conduct the first valuation and determine a premium rate methodology not later than six months after the insurance program is established.

“(c) EFFECTS OF CHANGED BENEFITS.—If at the time of any actuarial valuation under subsection (b) there has been a change in benefits under the insurance program that has been made since the last such valuation

and such change in benefits increases or decreases the present value of amounts payable from the Fund, the Board of Actuaries shall determine a premium rate methodology, and recommend to the Secretary a premium schedule, for the liquidation of any liability (or actuarial gain to the Fund) resulting from such change and any previous such changes so that the present value of the sum of the scheduled premium payments (or reduction in payments that would otherwise be made) equals the cumulative increase (or decrease) in the present value of such benefits.

“(d) ACTUARIAL GAINS OR LOSSES.—If at the time of any such valuation the Board of Actuaries determines that there has been an actuarial gain or loss to the Fund as a result of changes in actuarial assumptions since the last valuation or as a result of any differences, between actual and expected experience since the last valuation, the Board shall recommend to the Secretary a premium rate schedule for the amortization of the cumulative gain or loss to the Fund resulting from such changes in assumptions and any previous such changes in assumptions or from the differences in actual and expected experience, respectively, through an increase or decrease in the payments that would otherwise be made to the Fund.

“(e) INSUFFICIENT ASSETS.—If at any time liabilities of the Fund exceed assets of the Fund as a result of members of the Ready Reserve being ordered to active duty as described in section 12521(2) of this title, and funds are unavailable to pay benefits completely, the Secretary shall request the President to submit to Congress a request for a special appropriation to cover the unfunded liability. If appropriations are not made to cover an unfunded liability in any fiscal year, the Secretary shall reduce the amount of the benefits paid under the insurance program to a total amount that does not exceed the assets of the Fund expected to accrue by the end of such fiscal year. Benefits that cannot be paid because of such a reduction shall be deferred and may be paid only after and to the extent that additional funds become available.

“(f) DEFINITION OF PRESENT VALUE.—The Board of Actuaries shall define the term ‘present value’ for purposes of this subsection.

“§ 12530. Payment of benefits

“(a) COMMENCEMENT OF PAYMENT.—An insured member who serves in excess of 30 days of covered service shall be paid the amount to which such member is entitled on a monthly basis beginning not later than one month after the 30th day of covered service.

“(b) METHOD OF PAYMENT.—The Secretary shall prescribe in the regulations the manner in which payments shall be made to the member or to a person designated in accordance with subsection (c).

“(c) DESIGNATED RECIPIENTS.—(1) A member may designate in writing another person (including a spouse, parent, or other person with an insurable interest, as determined in accordance with the regulations prescribed by the Secretary) to receive payments of insurance benefits under the insurance program.

“(2) A member may direct that payments of insurance benefits for a person designated under paragraph (1) be deposited with a bank or other financial institution to the credit of the designated person.

“(d) RECIPIENTS IN EVENT OF DEATH OF INSURED MEMBER.—Any insurance payable under the insurance program on account of a deceased member's period of covered service shall be paid, upon the establishment of a valid claim, to the beneficiary or beneficiaries which the deceased member designated in writing. If no such designation

has been made, the amount shall be payable in accordance with the laws of the State of the member's domicile.

“§ 12531. Purchase of insurance

“(a) PURCHASE AUTHORIZED.—The Secretary may, instead of or in addition to underwriting the insurance program through the Fund, purchase from one or more insurance companies a policy or policies of group insurance in order to provide the benefits required under this chapter. “(c) ADMINISTRATIVE PROVISIONS.—(1) An insurance company that issues a policy for purposes of subsection (a) shall establish an administrative office at a place and under a name designated by the Secretary.

“(2) For the purposes of carrying out this chapter, the Secretary may use the facilities and services of any insurance company issuing any policy for purposes of subsection (a), may designate one such company as the representative of the other companies for such purposes, and may contract to pay a reasonable fee to the designated company for its services.

“(d) REINSURANCE.—The Secretary shall arrange with each insurance company issuing any policy for purposes of subsection (a) to reinsure, under conditions approved by the Secretary, portions of the total amount of the insurance under such policy or policies with such other insurance companies (which meet qualifying criteria prescribed by the Secretary) as may elect to participate in such reinsurance.

“(e) TERMINATION.—The Secretary may at any time terminate any policy purchased under this section.

“§ 12532. Termination for nonpayment of premiums; forfeiture

“(a) TERMINATION FOR NONPAYMENT.—The coverage of a member under the insurance program shall terminate without prior notice upon a failure of the member to make required monthly payments of premiums for two consecutive months. The Secretary may provide in the regulations for reinstatement of insurance coverage terminated under this subsection.

“(b) FORFEITURE.—Any person convicted of mutiny, treason, spying, or desertion, or who refuses to perform service in the armed forces or refuses to wear the uniform of any of the armed forces shall forfeit all rights to insurance under this chapter.”

SEC. 522. AUTHORITY TO AWARD DECORATIONS RECOGNIZING ACTS OF VALOR PERFORMED IN COMBAT DURING THE VIETNAM CONFLICT.

(1) The Ia Drang Valley (Pleiku) campaign, carried out by the Armed Forces in the Ia Drang Valley of Vietnam from October 23, 1965, to November 26, 1965, is illustrative of the many battles during the Vietnam conflict which pitted forces of the United States against North Vietnamese Army regulars and Viet Cong in vicious fighting.

(2) Accounts of those battles that have been published since the end of that conflict authoritatively document numerous and repeated acts of extraordinary heroism, sacrifice, and bravery on the part of members of the Armed Forces, many of which have never been officially recognized.

(3) In some of those battles, United States military units suffered substantial losses, with some units sustaining casualties in excess of 50 percent.

(4) The incidence of heavy casualties throughout the Vietnam conflict inhibited the timely collection of comprehensive and detailed information to support recommendations for awards recognizing acts of heroism, sacrifice, and bravery.

(5) Subsequent requests to the Secretaries of the military departments for review of award recommendations for such acts have been denied because of restrictions in law and regulations that require timely filing of such recommendations and documented justification.

(6) Acts of heroism, sacrifice, and bravery performed in combat by members of the Armed Forces deserve appropriate and timely recognition by the people of the United States.

(7) It is appropriate to recognize acts of heroism, sacrifice, or bravery that are belatedly, but properly, documented by persons who witnessed those acts.

(b) **WAIVER OF TIME LIMITATIONS FOR RECOMMENDATIONS FOR AWARDS.**—(1) Any decoration covered by paragraph (2) may be awarded, without regard to any time limit imposed by law or regulation for a recommendation for such award to any person for actions by that person in the Southeast Asia theater of operations while serving on active duty during the Vietnam era. The waiver of time limitations under this paragraph applies only in the case of awards for acts of valor for which a request for consideration is submitted under subsection (c).

(2) Paragraph (1) applies to any decoration (including any device in lieu of a decoration) that, during or after the Vietnam era and before the date of the enactment of this Act, was authorized by law or under regulations of the Department of Defense or the military department concerned to be awarded to members of the Armed Forces for acts of valor.

(2) If the Secretary concerned determines, based upon the review under paragraph (1), that such an upgrade is appropriate in the case of any person, the Secretary shall submit to the President a recommendation that the President award the Medal of Honor to that person.

(b) WAIVER OF TIME LIMITATIONS.—A Medal of Honor may be awarded to a person referred to in subsection (a) in accordance with a recommendation of the Secretary concerned under that subsection without regard to—

(b) SENSE OF CONGRESS.—In light of the findings specified in subsection (a), it is the sense of Congress that—

(1) the Secretary of Defense should develop a program to ensure that such covered beneficiaries who reside in a region in which the TRICARE program has been implemented continue to have adequate access to health care services after the implementation of the TRICARE program; and

(2) as a means of ensuring such access, the budget for fiscal year 1997 submitted by the President under section 1105 of title 31, United States Code, should provide for reimbursement by the Health Care Financing Administration to the Department of Defense for health care services provided to such covered beneficiaries in medical treatment facilities of the Department of Defense.

The evaluation shall include an examination of whether the benefit fee and copayment schedule may—

(B) be inappropriate for a fully at-risk program similar to civilian health maintenance organizations; or

(C) result in an enrolled population dissimilar to the general beneficiary population.

(2) The Comptroller General shall not be required to prepare or submit the evaluation under paragraph (1) if the Uniformed Services Treatment Facilities fail to satisfactorily comply with subsection (b), as determined by the Comptroller General.

“(d) REPORT UPON DESIGNATION OF AN OPERATION.—Within 45 days after the Secretary of Defense identifies an operation pursuant to subsection (a)(2), the Secretary of Defense shall submit to Congress a report that sets forth the following:

“(g) INCREMENTAL COSTS.—For purposes of this section, incremental costs of the Department of Defense with respect to an operation are the costs of the Department that are directly attributable to the operation (and would not have been incurred but for the operation). Incremental costs do not include the cost of property or services acquired by the Department that are paid for by a source outside the Department or out of funds contributed by such a source.

SEC. 1013. CONTRACT OPTIONS FOR LMSR VESSELS.

(a) FINDINGS.—Congress makes the following findings:

(1) A requirement for the Department of the Navy to acquire 19 large, medium-speed, roll-on/roll-off (LMSR) vessels was established by the Secretary of Defense in the Mobility Requirements Study conducted after the Persian Gulf War pursuant to section 909 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510; 104 Stat. 1623) and was revalidated by the Secretary of Defense in the report entitled “Mobility Requirements Study Bottom-Up Review Update”, submitted to Congress in April 1995.

(2) The Strategic Sealift Program is a vital element of the national military strategy calling for the Nation to be able to fight and win two nearly simultaneous major regional contingencies.

(3) The Secretary of the Navy has entered into contracts with shipyards covering acquisition of a total of 17 such LMSR vessels, of which five are vessel conversions and 12 are new construction vessels. Under those contracts, the Secretary has placed orders for the acquisition of 11 vessels and has options for the acquisition of six more, all of which would be new construction vessels. The options allow the Secretary to place orders for one vessel to be constructed at each of two shipyards for award before December 31, 1995, December 31, 1996, and December 31, 1997, respectively.

(4) Acquisition of an additional two such LMSR vessels, for a total of 19 vessels (the requirement described in paragraph (1)) would contribute to preservation of the industrial base of United States shipyards capable of building auxiliary and sealift vessels.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of the Navy should plan for, and budget to provide for, the acquisition as soon as possible of a total of 19 large, medium-speed, roll-on/roll-off (LMSR) vessels (the number determined to be required in the Mobility Requirements Study referred to in subsection (a)(1)), rather than only 17 such vessels (the number of vessels under contract as of May 1995).

(c) ADDITIONAL NEW CONSTRUCTION CONTRACT OPTION.—The Secretary of the Navy should negotiate with each of the two shipyards holding new construction contracts referred to in subsection (a)(3) (Department of the Navy contracts numbered N00024-93-C-2203 and N00024-93-C-2205) for an option under each such contract for construction of one additional such LMSR vessel, with such option to be available to the Secretary for exercise during 1995, 1996, or 1997, subject to the availability of funds authorized and appropriated for such purpose. Nothing in this subsection shall be construed to preclude the Secretary of the Navy from competing the award of the two options between the two shipyards holding new construction contracts referred to in subsection (a)(3).

(d) REPORT.—The Secretary of the Navy shall submit to the congressional defense committees, by March 31, 1996, a report stating the intentions of the Secretary regarding the acquisition of options for the construction of two additional LMSR vessels as described in subsection (c).

For purposes of this section, the term "current system" shall be considered also to include any retirement system (besides the one in which the individual is participating at the time of making the election) in which such individual previously participated since the move on which the election is based.

(ii) CONDITION SUBSEQUENT RELATING TO PAYMENT OF LUMP-SUM CREDIT.—In the case of an individual who has received such individual's lump-sum credit (within the meaning of section 8401(19) of title 5, United States Code, or a similar payment) from such individual's previous system, the payment described in clause (i) shall not be made (and the election to which it relates shall be ineffective) unless such lump-sum credit is redeposited or otherwise paid at such time and in such manner as shall be required under applicable regulations. Regulations to carry out this clause shall include provisions for the computation of interest (consistent with section 8334(e) (2) and (3) of title 5, United States Code), if no provisions for such computation otherwise exist.

(II) PAYMENT OF DEFICIENCY.—A determination of a deficiency under this clause shall not render an election ineffective if the individual pays or arranges to pay, at a time and in a manner satisfactory to such administrative authority, the full amount of the deficiency described in subclause (I).

(D) ALTERNATIVE ELECTION FOR AN INDIVIDUAL THEN PARTICIPATING IN FERS.—

(i) APPLICABILITY.—This subparagraph applies with respect to any individual who—

(v) CONDITIONS.—An election under this subparagraph shall be subject to requirements, similar to those set forth in subparagraph (C), to ensure that—

(I) appropriate transfers of individual and Government contributions are made to the Civil Service Retirement and Disability Fund; and

(II) the actuarial present value of future benefits under FERS attributable to service made creditable by such election is fully funded.

(E) ALTERNATIVE ELECTION FOR AN INDIVIDUAL THEN PARTICIPATING IN A NAFI RETIREMENT SYSTEM.—

(i) APPLICABILITY.—This subparagraph applies with respect to any individual who—

(I) is then currently participating in any retirement system established for employees described in section 2105(c) of title 5, United States Code (in this subparagraph referred to as a "NAFI retirement system"); and

(II) would then otherwise be eligible to make an election under subparagraphs (A)

through (C) of this paragraph (determined disregarding the matter in subclause (I) of subparagraph (B) before the first semicolon therein) based on a move from FERS.

(ii) ELECTION.—An individual described in clause (i) may, instead of making an election for which such individual is otherwise eligible under this paragraph, elect to have all prior qualifying FERS service of such individual treated as creditable service for purposes of determining eligibility for benefits under a NAFI retirement system, but not for purposes of computing the amount of any such benefits except as provided in clause (v)(II).

(v) FUNDING REQUIREMENTS.—

(I) IN GENERAL.—Except as provided in subclause (II), nothing in this section or in any other provision of law or any other authority shall be considered to require any payment or transfer of monies in order for an election under this subparagraph to be effective.

(II) CONTRIBUTION REQUIRED ONLY IF INDIVIDUAL ELECTS TO HAVE SERVICE MADE CREDITABLE FOR COMPUTATION PURPOSES AS WELL.—Under regulations prescribed by the appropriate administrative authority, an individual making an election under this subparagraph may further elect to have the qualifying FERS service made creditable for computation purposes under a NAFI retirement system, but only if the individual pays or arranges to pay, at a time and in a manner satisfactory to such administrative authority, the amount necessary to fully fund the actuarial present value of future benefits under the NAFI retirement system attributable to the qualifying FERS service.

(3) INFORMATION.—The regulations under subsection (b) shall include provisions under which any individual—

(A) shall, upon request, be provided information or assistance in determining whether such individual is eligible to make an election under paragraph (2) and, if so, the exact amount of any payment which would be required of such individual in connection with any such election; and

(B) may seek any other information or assistance relating to any such election.

(2) stated it to be the sense of the Congress that the Soviet Union was in violation of its legal obligation under that treaty.

(c) FURTHER REFERENCE TO 1989 CONGRESSIONAL STATEMENTS.—Congress further notes that in section 1006(b) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1543) Congress also—

(1) again noted that in 1987 the President declared that radar to be a clear violation of the 1972 Anti-Ballistic Missile Treaty and noted that on October 23, 1989, the Foreign Minister of the Soviet Union conceded that the Krasnoyarsk radar is a violation of the 1972 Anti-Ballistic Missile Treaty; and

(2) stated it to be the sense of the Congress that the Soviet Union should dismantle the Krasnoyarsk radar expeditiously and without conditions and that until such radar was completely dismantled it would remain a clear violation of the 1972 Anti-Ballistic Missile Treaty.

(d) ADDITIONAL FINDINGS.—Congress also finds, with respect to the Krasnoyarsk radar, that retired Soviet General Y.V. Votintsev, Director of the Soviet National Air Defense Forces from 1967 to 1985, has publicly stated—

(1) that he was directed by the Chief of the Soviet General staff to locate the large phased-array radar at Krasnoyarsk despite the recognition by Soviet authorities that the location of such a radar at that location would be a clear violation of the 1972 Anti-Ballistic Missile Treaty; and

(2) that Marshal D.F. Ustinov, Soviet Minister of Defense, threatened to relieve from duty any Soviet officer who continued to object to the construction of a large-phased array radar at Krasnoyarsk.

(e) SENSE OF CONGRESS CONCERNING SOVIET TREATY VIOLATIONS.—It is the sense of Congress that the government of the Soviet Union intentionally violated its legal obligations under the 1972 Anti-Ballistic Missile Treaty in order to advance its national security interests.

(f) SENSE OF CONGRESS CONCERNING COMPLIANCE BY RUSSIA WITH ARMS CONTROL OBLIGATIONS.—In light of subsections (a) through (e), it is the sense of Congress that the United States should remain vigilant in ensuring compliance by Russia with its arms control obligations and should, when pursuing future arms control agreements with Russia, bear in mind violations of arms control obligations by the Soviet Union.

SEC. 1406. SENSE OF CONGRESS ON RATIFICATION OF CHEMICAL WEAPONS CONVENTION AND START II TREATY.

(a) FINDINGS.—Congress makes the following findings:

(1) Proliferation of chemical or nuclear weapons materials poses a danger to United States national security, and the threat or use of such materials by terrorists would directly threaten United States citizens at home and abroad.

(2) Events such as the March 1995 terrorist release of a chemical nerve agent in the Tokyo subway, the threatened use of chemical weapons during the 1991 Persian Gulf War, and the widespread use of chemical weapons during the Iran-Iraq War of the 1980's are all potent reminders of the menace posed by chemical weapons, of the fact that the threat of chemical weapons is not sufficiently addressed, and of the need to outlaw the development, production, and possession of chemical weapons.

(3) The Chemical Weapons Convention negotiated and signed by President Bush would make it more difficult for would-be proliferators, including terrorists, to acquire or use chemical weapons, if ratified and fully implemented, as signed, by all signatories.

(4) United States military authorities, including Chairman of the Joint Chiefs of Staff General John Shalikashvili, have stated that United States military forces will deter and respond to chemical weapons threats with a robust chemical defense and an overwhelming superior conventional response, as demonstrated in the Persian Gulf War, and have testified in support of the ratification of the Chemical Weapons Convention.

(5) The United States intelligence community has testified that the Convention will provide new and important sources of information, through regular data exchanges and routine and challenge inspections, to improve the ability of the United States to assess the chemical weapons status in countries of concern.

(6) The Convention has not entered into force for lack of the requisite number of ratifications.

(7) Russia has signed the Convention, but has not yet ratified it.

(8) There have been reports by Russian sources of continued Russian production and testing of chemical weapons, including a statement by a spokesman of the Russian Ministry of Defense on December 5, 1994, that "We cannot say that all chemical weapons production and testing has stopped altogether."

(9) The Convention will impose a legally binding obligation on Russia and other nations that possess chemical weapons and that ratify the Convention to cease offensive chemical weapons activities and to destroy their chemical weapons stockpiles and production facilities.

(10) The United States must be prepared to exercise fully its rights under the Convention, including the request of challenge inspections when warranted, and to exercise leadership in pursuing punitive measures against violators of the Convention, when warranted.

(11) The United States should strongly encourage full implementation at the earliest possible date of the terms and conditions of the United States-Russia bilateral chemical weapons destruction agreement signed in 1990.

(12) The START II Treaty negotiated and signed by President Bush would help reduce the danger of potential proliferators, including terrorists, acquiring nuclear warheads and materials, and would contribute to United States-Russian bilateral efforts to secure and dismantle nuclear warheads, if ratified and fully implemented as signed by both parties.

(13) It is in the national security interest of the United States to take effective steps to make it more difficult for proliferators or would-be terrorists to obtain chemical or nuclear materials for use in weapons.

(14) The President has urged prompt Senate action on, and advice and consent to ratification of, the START II Treaty and the Chemical Weapons Convention.

(15) The Chairman of the Joint Chiefs of Staff has testified to Congress that ratification and full implementation of both treaties by all parties is in the United States national interest and has strongly urged prompt Senate advice and consent to their ratification.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the United States, Russia, and all other parties to the START II Treaty and the Chemical Weapons Convention should promptly ratify and fully implement, as negotiated, both treaties.

(1) AUTHORITY.—The Secretary of Commerce shall, on the basis of standards and guidelines developed by the National Institute of Standards and Technology pursuant to paragraphs (2) and (3) of section 20(a) of the National Institute of Standards and Technology Act (15 U.S.C. 278g-3(a)), promulgate standards and guidelines pertaining to Federal computer systems. The Secretary shall make such standards compulsory and binding to the extent to which the Secretary determines necessary to improve the efficiency of operation or security and privacy of Federal computer systems. The President may disapprove or modify such standards and guidelines if the President determines such action to be in the public interest. The President's authority to disapprove or modify such standards and guidelines may not be delegated. Notice of such disapproval or modification shall be published promptly in the Federal Register. Upon receiving notice of such disapproval or modification, the Secretary of Commerce shall immediately rescind or modify such standards or guidelines as directed by the President.

(2) EXERCISE OF AUTHORITY.—The authority conferred upon the Secretary of Commerce by this section shall be exercised subject to direction by the President and in coordination with the Director to ensure fiscal and policy consistency.

(b) APPLICATION OF MORE STRINGENT STANDARDS.—The head of a Federal agency may employ standards for the cost-effective security and privacy of sensitive information in a Federal computer system within or under the supervision of that agency that are more stringent than the standards promulgated by the Secretary of Commerce under this section, if such standards contain, at a minimum, the provisions of those applicable standards made compulsory and binding by the Secretary of Commerce.

(c) WAIVER OF STANDARDS.—The standards determined under subsection (a) to be compulsory and binding may be waived by the Secretary of Commerce in writing upon a determination that compliance would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or cause a major adverse financial impact on the operator which is not offset by Government-wide savings. The Secretary may delegate to the head of one or more Federal agencies authority to waive such standards to the extent to which the Secretary determines such action to be necessary and desirable to allow for timely and effective implementation of Federal computer system standards. The head of such agency may redelegate such authority only to a Chief Information Officer designated pursuant to section 3506 of title 44, United States Code. Notice of each such waiver and delegation shall be transmitted promptly to Congress and shall be published promptly in the Federal Register.

(d) DEFINITIONS.—In this section, the terms "Federal computer system" and "operator of a Federal computer system" have the meanings given such terms in section 20(d) of the National Institute of Standards and Technology Act (15 U.S.C. 278g-3(d)).

(iv) The impact of the pilot program on small businesses and socially and economically disadvantaged small businesses.

(4) WITHDRAWAL OF SCHEDULE OR PORTION OF SCHEDULE FROM PILOT PROGRAM.—The Administrator may withdraw a multiple award schedule or portion of a schedule from the pilot program if the Administrator determines that (A) price competition is not available under such schedule or portion thereof, or (B) the cost to the Government for that schedule or portion thereof for the previous year was higher than it would have been if the contracts for such schedule or portion thereof had been awarded using procedures that would apply if the pilot program were not in effect. The Administrator shall notify Congress at least 30 days before the date on which the Administrator withdraws a schedule or portion thereof under this paragraph. The authority under this paragraph may not be delegated.

(5) TERMINATION OF PILOT PROGRAM.—Unless reauthorized by law, the authority of the Administrator to award contracts under the pilot program shall expire four years after the date on which the pilot program is established. JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1124) to authorize appropriations for fiscal year 1996 for military activities of the Department of Defense, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment that is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clerical changes.

All references in this joint statement to provisions of the House bill refer to the provisions of H.R. 1530 (The National Defense Authorization Act for Fiscal Year 1996), as passed by the House on June 15, 1995. All references to provisions of the Senate amendment refer to the Senate amendment to the text of H.R. 1530, as passed by the Senate on September 6, 1995.

The conference report on H.R. 1530 is set forth in House Report 104-406. The President vetoed H.R. 1530 on December 28, 1995.

In those cases in which the conference agreement requires the submission of a report to Congress or a committee of Congress, the report shall be submitted not later than the later of the date established in the Act or the statement of managers language for submission of the report or the date that is 45 days after the date of the enactment of this Act. The reason for this extension is that, while the conferees expect that reports will be submitted in a timely fashion, they recognize that the circumstances associated with this legislation may in some cases make compliance with deadlines impractical. The conferees intend that this authority be used sparingly and only in those few cases where an extension in filing the report is essential.

SUMMARY STATEMENT OF CONFERENCE ACTION

The conferees recommend authorizations for the Department of Defense for procurement, research and development, test and evaluation, operation and maintenance, working capital funds, military construction and family housing, weapons programs of the Department of Energy, and civil defense that have a budget authority implication of \$264.7 billion.

SUMMARY TABLE OF AUTHORIZATIONS

The defense authorization act provides authorizations for appropriations but does not generally provide budget authority. Budget authority is generally provided in appropriation acts.

In order to relate the conference recommendations to the Budget Resolution, matters in addition to the dollar authorizations contained in this bill must be taken into account. A number of programs in the defense function are authorized permanently or, in certain instances, authorized in other annual legislation. In addition, this authorization bill would establish personnel levels and include a number of legislative provisions affecting military compensation.

The following table summarizes authorizations included in the bill in fiscal year 1996 and, in addition, summarizes the implications of the conference action for the budget totals for national defense (budget function 050).

High mobility multipurpose wheeled vehicle

The budget request included \$57.7 million for 546 high mobility multipurpose wheeled vehicles (HMMWVs).

The House bill would authorize an increase of \$39.0 million to procure approximately 700 additional HMMWVs.

The Senate amendment would authorize an increase of \$72.0 million to procure approximately 1300 additional HMMWVs.

The House recedes.
The conferees agree that additional HMMWVs are required for both the Army and the Marine Corps, and expect the military services to include in future budget requests adequate funds to procure sufficient HMMWVs to meet validated service requirements and to meet minimum annual required production rates necessary to sustain the essential elements of the HMMWV industrial base.

Family of heavy tactical vehicles

The budget request included \$0.6 million for the family of heavy tactical vehicles (FHTV).

The House bill would authorize an increase of \$100.0 million for the FHTV program.

The Senate amendment would authorize an increase of \$125.0 million for the FHTV program.

The House recedes.
The conferees agree to authorize an increase to the budget request of \$125.0 million to procure the heavy tactical vehicles, as indicated below:

	Dollars (in mil- lions)	Quantity
Heavy equipment transporter	\$40.0	83
Heavy expanded mobility tactical transporter	33.0	115

	Dollars (in mil- lions)	Quantity
Palletized loading system	52.0	147

Medium truck extended service program

The budget request did not include funds for the medium truck extended service program (ESP).

The House bill would not authorize funds for medium truck ESP.

The Senate amendment would authorize \$30.0 million for medium truck ESP.

The conferees agree to authorize \$20.0 million for medium truck ESP. The conferees express their concern regarding the possibility of initiating multiple truck remanufacture programs, thereby creating excess capacity in the industry. The conferees prefer that maximum use be made of the medium truck ESP currently underway, that separate, additional procurements be kept to a minimum to avoid industrial overcapacity, and that, for future procurements, consideration be given to reliable manufacturers with demonstrated capabilities to produce military trucks.

GUARDRAIL tactical information broadcast service

The budget request included \$48.9 million for the GUARDRAIL common sensor program.

Both the House bill and the Senate amendment would authorize funding at the requested level.

The conferees have determined that there is a need for GUARDRAIL aircraft to be equipped with improved intelligence data dissemination capability and interoperability with other intelligence data producers. Therefore, the conferees agree to author-

ize an increase of \$9.0 million to the budget request for procurement and integration of tactical information broadcast service to provide this capability for existing GUARDRAIL aircraft.

Nonsystem training devices

The budget request included \$71.6 million for nonsystem training devices.

The House bill and the Senate amendment authorized the request.

The conferees are concerned that the Army is currently training firefighters using fossil-fueled techniques that are not only hazardous to the trainees but, in some cases, in violation of environmental regulations. Moreover, the conferees are aware that there are computer-controlled natural gas/propane firefighter training systems, currently used by other services, that provide safe training for individuals and minimize destruction to the environment. Accordingly, the conferees authorize \$4.5 million to procure an initial set of these systems.

Further, the conferees believe that the Army should develop a plan to replace current firefighting training sites in regions where multiple commands can take advantage of a single site.

Overview

The budget request for fiscal year 1996 contained an authorization of \$3,886.5 million for Aircraft Procurement, Navy in the Department of Defense. The House bill would authorize \$4,106.5 million. The Senate amendment would authorize \$4,916.6 million. The conferees recommended an authorization of \$4,572.4 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

AV-8B remanufacture

The budget request included \$148.2 million for the remanufacture of four Marine Corps AV-8B aircraft.

The House bill would add \$160.0 million for the remanufacture of eight additional aircraft.

The Senate amendment would authorize an additional \$100.0 million for the remanufacture of four more aircraft.

The conferees agree to authorize a total of \$229.4 million, \$81.3 million above the budget request, for the remanufacture of four additional aircraft.

Electronic warfare

The budget request included no funds to either expand the Navy's fleet of EA-6B Block 89 aircraft to accommodate the retirement of the EF-111 jammer aircraft or to improve the capabilities of the existing Block 89 EA-6B fleet.

The House bill would approve the budget request.

The Senate amendment would authorize \$216.0 million to modernize airborne electronic warfare (EW) capabilities of the EA-6B Block 89 aircraft and to expand the number of Block 89 aircraft by 20.

The conferees agree that modernization of the Department's tactical electronic warfare aircraft fleet is a priority item of special interest. Accordingly, the conferees agree to authorize \$165.0 million to initiate procurement of EA-6B modifications, as set forth below:

(1) \$100.0 million to modernize up to 20 older EA-6B Block 82 aircraft to the newer Block 89 configuration to offset EF-111 retirements;

(2) \$40.0 million to procure 60 band 9/10 transmitters; and

(3) \$25.0 million for 30 USQ-113 enhanced radio countermeasure sets.

The conferees also authorize an increase of \$10.0 million to Navy EW development (PE 64270N), to develop a low-cost, reactive jamming capability for the EA-6B. The conferees are especially interested in the Navy's completion of an affordable upgrade to the EA-6B reactive processor capability.

The conferees note the inconsistent nature of the Navy's actions regarding airborne tactical EW in recent years and are deeply concerned with the Navy's vacillating commitment and support for meaningful upgrades to the EA-6B aircraft. Accordingly, the Secretary of the Navy is directed to:

(1) initiate the EA-6B modifications identified above.

(2) provide the congressional defense committees with the following:

(a) a program and budget plan for completing the directed modifications.

(b) the Joint Tactical Airborne EW Study (JTAEWS).

In addition, the conferees agree that the Secretary of the Navy shall not obligate more than 75 percent of funds appropriated for procurement of the F/A-18C/D for fiscal year 1996 until he has accomplished the actions specified above.

F-14 modifications

The budget request included \$59.0 million for F-14 modifications. This amount did not include any funds for a forward-looking infrared (FLIR)/laser designator system for the F-14. The budget request included \$25.4 million in research and development funds for a precision strike upgrade, an effort to integrate the joint direct attack munition (JDAM) into the F-14.

The House bill would approve the budget request for F-14 modifications.

After completion of the House bill, the Navy informed the Senate that the requirements validation process had documented an operational requirement for a FLIR/laser designator system for the F-14, in lieu of the JDAM integration. The Senate considered this requirement to be a high priority for carrier operations. Therefore, the Senate amendment would authorize an increase of \$17.1 million for F-14 aircraft modifications in fiscal year 1996. This action was taken with the understanding that the Department of Defense would provide funding for the system in future budget requests.

The conferees agree to provide \$101.5 million for F-14 modifications, with an increase of \$42.5 million provided for the FLIR/laser designator effort. The conferees also agree to reduce the F-14 research and development request by \$25.4 million.

Additionally, the conferees agree to invite the Navy to reprogram funds originally authorized for JDAM integration into the FLIR/laser designator procurement effort, to expedite meeting the need for improving F-14 strike capability.

Overview

The budget request for fiscal year 1996 contained an authorization of \$1,787.1 million for Weapons Procurement, Navy in the Department of Defense. The House bill would authorize \$1,626.4 million. The Senate amendment would authorize \$1,771.4 million. The conferees recommended an authorization of \$1,659.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Submarine navigation sets

The budget request included \$4.1 million for the electrically suspended gyro navigator (ESGN), the navigation system currently installed on Navy submarines. It also included \$17.7 million for other navigation equipment.

The House bill would reduce ESGN funding by \$4.1 million and increase funding for other navigation equipment by \$10.0 million to purchase and install MK-49 ring laser gyro (RLG) navigators on Navy submarines.

The Senate amendment would reduce ESGN funding by \$2.5 million, the amount budgeted for ESGN reliability modifications. It would also increase funding for other navigation equipment by \$10.0 million to purchase and install MK-49 RLG navigators on Navy submarines.

The Senate recesses.

AN/BPS-16 submarine radar

The budget request included \$0.5 million for ship radar support.

The House bill would add \$9.0 million for procurement of AN/BPS-16 submarine radar systems because of a concern about the reliability and operational suitability of the existing AN/BPS-15 submarine navigation radar.

The Senate amendment would authorize the budget request.

The conferees are aware that there is a commercial off-the-shelf (COTS) variant of the AN/BPS-16 that could be procured and installed at a substantially lower cost than the AN/BPS-16 built to military specifications. The conferees are also aware that the reliability and maintenance challenges associated with the existing AN/BPS-15 have induced many Navy submarine crews to procure inexpensive commercial navigation radars with limited capability.

Based on these considerations, the conferees agree to authorize an increase of \$9.0 million for the procurement and installation of AN/BPS-16 submarine radar sets. The conferees encourage the Navy to take advantage of the new COTS variant of the AN/BPS-16 to achieve the maximum benefit from this additional funding.

Afloat planning system

The conferees have fully supported the Tomahawk cruise missile program and the associated support systems necessary for employment of Tomahawk for precision strike missions. The conferees note that the Tomahawk afloat planning system (APS) complements the Tomahawk mission planning system, located at the shore-based mission planning centers, and provides afloat battle group and battle force commanders or deployed joint staffs with an organic capability

to plan for the tactical employment of the conventional Tomahawk land attack missile (TLAM). APS is also an integral part of the Joint Service Imagery Processing System—Navy (JSIPS-N) and Challenge Athena systems. These systems support Tomahawk strike planning, but can also provide mission planning support for other precision guided munitions.

The conferees encourage the Department of Defense to:

(1) continue support and funding for APS; and

(2) consider extending APS's targeting and mission planning capabilities to other tactical command echelons, in order to meet the expanding requirement for tactical utilization of the Tomahawk system and improve its responsiveness to the demands of land battle.

Overview

The budget request for fiscal year 1996 contained an authorization of \$474.1 million for Marine Corps Procurement, Navy in the Department of Defense. The House bill would authorize \$399.2 million. The Senate amendment would authorize \$683.4 million. The conferees recommended an authorization of \$458.9 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Commander's Tactical Terminal

The budget request included no funding for USMC procurement of Commander's Tactical Terminal (CTT) radios.

Neither the House bill nor the Senate amendment authorized additional funding for CTT radios.

The conferees note that the Department's integrated (intelligence) broadcast service plan included migration to an interoperable family of transceivers known as the Joint Tactical Terminal. The conferees have been informed that Marine Corps procurement of CTTs will play a vital role in this plan, and therefore authorize an increase of \$12.5 million for this purpose.

Marine Corps intelligence support equipment

The budget request included no funding for Marine Corps procurement of Joint Surveillance and Target Attack Radar System (JSTARS) ground support module.

Neither the House bill nor the Senate amendment included additional funds for this purpose.

The conferees believe the Marine Corps should have more responsibility over its own procurement actions, and therefore agree to authorize an increase of \$16.5 million for Marine procurement of two JSTARS ground support modules.

Light reconnaissance/strike vehicles

The budget request did not include funds for procurement of any light reconnaissance/strike vehicles (LRV/LSV).

The House bill would add \$2.0 million to buy LRVs for the Marine Corps and \$6.0 million to buy LSVs for the special operations forces.

The conferees agree to authorize \$6.0 million for LSVs for the special operations forces.

The conferees understand that the Marine Corps has completed a mission needs statement (MNS) for an LRV. The MNS calls for fielding an LRV with the Fleet Marine Forces by fiscal year 1995. However, the Marine Corps has neither established a formal

requirement nor budgeted any resources against a possible requirement.

Therefore, the conferees direct the Secretary of the Navy to report to the congressional defense committees on whether the Marine Corps will translate the MNS into an operational requirement and the risks the Fleet Marine Force will incur if an LRV is not procured. The conferees expect the Secretary to submit this report by February 28, 1996.

Overview

The budget request for fiscal year 1996 contained an authorization of \$6,183.9 million for Aircraft Procurement, Air Force in the Department of Defense. The House bill would authorize \$7,032.0 million. The Senate amendment would authorize \$6,318.6 million. The conferees recommended an authorization of \$7,349.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Air Force fighter aircraft data link

The budget request included \$79.5 million for F-15 modifications.

The House bill would authorize the requested amount based on assurances from the Department of Defense that Air Force efforts to procure a tactical information data link for a portion of the F-15 fleet would be conducted within the scope of the Department's multifunction information distribution system (MIDS) program.

The Senate amendment would authorize the budget request. The Senate report (S. Rept. 104-112) expressed support for the Air Force's efforts to equip its fighter aircraft with "Link 16" data link capability, but questioned the Air Force's decision to pursue this capability for only a portion of the F-15 fleet. The Senate report also recommended that the Department continue MIDS acquisition and stated that it would not support any Air Force effort to start a new program, redundant to MIDS, to meet similar requirements.

The conferees note that the Under Secretary of Defense for Acquisition and Technology has terminated the F-15 data link procurement and that the Air Force now intends to pursue a MIDS variant data link to meet its requirements. The Department has informed the conferees that this program is to be a competitive solicitation that will require adherence to the MIDS architecture, MIDS software modularity, and MIDS hardware modularity as a design objective, and, for the F-15, reduced hardware and software functionality to reduce costs.

The conferees agree to authorize \$78.3 million for F-15 modifications. The conferees direct the Under Secretary of Defense for Acquisition and Technology to ensure that the Department uses a competitive acquisition strategy for fighter data link procurement. The strategy should promote full opportunity for U.S. companies to compete within the competitive solicitation outlined by the Under Secretary.

Defense support program procurement

The budget request included \$102.9 million for Defense Support Program (DSP) procurement.

The Senate amendment would authorize \$67.0 million, a reduction of \$35.9 million to the budget request.

The House bill would authorize the budget request.

The House recedes. The conferees are aware that \$35.9 million in fiscal year 1995 funds are excess and subject to consideration for reprogramming for non-DSP purposes. Therefore, the conferees agree to reduce the fiscal year 1996 DSP procurement budget by \$35.9 million, leaving \$67.0 million. The conferees direct the Air Force to use the excess fiscal year 1995 funds currently identified as a source on the fiscal year 1995 omnibus reprogramming request to fulfill fiscal year 1996 DSP requirements. Given that the fiscal year 1995 DSP procurement source has been denied as part of this year's omnibus reprogramming, the conferees direct that the full amount be restored to DSP.

RC-135 re-engining

The budget request included no funding for the Defense Airborne Reconnaissance Program (DARP) modifications line (P-1, line 57) in the Aircraft Procurement, Air Force account.

The House bill would authorize an increase of \$37.0 million for modification of an existing C-135 aircraft to the RC-135 RIVET JOINT configuration.

The Senate amendment would authorize an increase of \$48.0 million for re-engining of two existing RIVET JOINT aircraft. The Senate amendment would also authorize an increase of \$31.5 million in PE 64268F for non-recurring integration activity to facilitate an affordable program for converting two retired EC-135 aircraft to the RIVET JOINT configuration.

ENGINES AND INSTALLATION

The conferees concur with the cost effectiveness and increase in operational effec-

tiveness that could be provided by re-engining the existing fleet of RIVET JOINT aircraft and agree to authorize an increase of \$48.0 million to procure and install re-engining kits for two existing RIVET JOINT aircraft.

The conferees note that the theater Commanders-in-Chief (CINCs) have addressed additional RIVET JOINT aircraft as one of their highest intelligence priorities. The need for additional RIVET JOINT aircraft is further reinforced by the extremely high operational tempo currently experienced by this reconnaissance asset. The conferees support the theater CINCs' requirements for additional RIVET JOINT aircraft and strongly urge the Department to seek reprogramming authority to modify other existing C-135 assets to the RC-135 configuration.

SR-71

The conferees agree to provide an additional \$5.0 million for costs associated with the refurbishment of SR-71 aircraft.

ENGINE COMPONENT IMPROVEMENT PROGRAM

The conferees agree to authorize \$133.2 million for the engine component improvement program, an increase of \$29.5 million, consisting of two adjustments: (1) an additional \$31.5 million for the integration activity described in the Senate report (S. Rept. 104-112); and (2) a reduction of the \$2.0 million requested for the B-2 engine.

Overview

The budget request for fiscal year 1996 contained an authorization of \$3,647.7 million for Missile Procurement, Air Force in the Department of Defense. The House bill would authorize \$3,430.1 million. The Senate amendment would authorize \$3,627.5 million. The conferees recommended an authorization of \$2,938.9 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Defense airborne reconnaissance program procurement

The budget request included \$179.3 million in procurement for the Defense airborne reconnaissance program (DARP).

The House bill would approve the budget request.

The Senate amendment would increase the requested amount by \$4.5 million, and would direct the Department to change the priorities of some program elements. The conferees agree to an authorization of \$161.6 million, a reduction of \$17.7 million from the budget request.

JOINT TACTICAL UAV

The conferees agree to authorize a total of \$42.4 million for the joint tactical UAV (JT-UAV), a reduction of \$17.7 million from the budget request.

The conferees are particularly concerned about the continuing problems with the Hunter UAV in the JT-UAV program. Therefore, the conferees direct that none of the funds appropriated for fiscal year 1996 be used to procure production Hunter systems or additional low-rate initial production units, beyond those already ordered, until the Secretary of Defense provides to the Congressional defense committees the results of the Defense Acquisition Board (DAB) review of the Hunter program.

PIONEER UAV

Of the funds authorized and appropriated for defense-wide procurement, Defense Airborne Reconnaissance Programs (DARP), the

conferees direct that the Department use \$4.5 million to equip nine Pioneer UAV systems with the common automatic landing and recovery system (CARLS).

The conferees note the Department's continuing failure to equip UAVs with the CARLS system. The conferees are concerned with this result, particularly since the Department agrees that CARLS installation on UAVs in general, and Pioneer in particular, would reduce landing accidents and associated losses.

Automated document conversion system

The budget request did not include any additional funds for the automated document conversion system (ADCS). This is a program for converting the Department of Defense's engineering drawings from hard copy to electronic format.

The House bill would authorize \$20.0 million for this purpose.

The Senate amendment would approve the budget request.

The conferees are concerned with the lack of progress by the Department toward achieving major cost savings through the adoption of automated document conversion technology. The conferees are encouraged, however, that the Department has recently acknowledged such savings and has produced a roadmap to realize these savings by changing from raster to vector conversion. The conferees also understand this plan brings an upgrade and expansion of UNIX-based systems and will test several personal computer (PC)-based systems.

However, the conferees are concerned with the Department's plan for using \$10.0 million of these funds for "bulk" conversion purposes, since these funds were specifically appropriated for the purchase of ADCS equipment. The conferees are concerned that there may be a greater requirement for ADCS software and equipment than the Department currently has planned and that some or all of the funds planned for bulk conversion may be needed for software and equipment. Should the results of the Department's ongoing conversion survey confirm that additional software and equipment is needed, the conferees feel that the Department should address first the needs of UNIX-based engineering systems as the UNIX-based system has undergone extensive testing per Congressional direction. The conferees direct that the Secretary of Defense provide a report to the congressional defense committees by March 29, 1996, on the results of the PC-based system testing.

The budget request for fiscal year 1996 contained no authorization for National Guard and Reserve Procurement in the Department of Defense. The House bill would authorize \$770.0 million. The Senate amendment would authorize \$777.4 million. The conferees recommended an authorization of \$777.0 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Overview

The budget request for fiscal year 1996 contained an authorization of \$746.7 million for Chemical Agent and Munitions Destruction, Army in the Department of Defense. The House bill would authorize \$746.7 million. The Senate amendment would authorize \$671.7 million. The conferees recommended an authorization of \$672.3 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Aerial targets

The budget request included \$68.6 million for aerial targets.

The House bill and the Senate amendment authorized the request.

The conferees understand the Navy's current acquisition strategy for subscale subsonic aerial targets is to procure only the BQM-74E. However, the conferees understand the contractor may have taken some recent cost reduction initiatives on the BQM-34S subscale target. Therefore, the conferees believe that the Navy's non-competitive procurement of the BQM-74E may not provide the service with the best value target. Accordingly, the conferees urge the Navy to reassess its acquisition strategy for this target and conduct a competition based upon meeting a performance specification. The conferees believe that such a competition could result in buying a target that truly represents the best value to the Navy.

AN/ALE-47

The conferees are concerned that the current Air Force acquisition strategy for the follow-on production of lots IV through VII of the AN/ALE-47 Countermeasure Dispenser System may involve significant and unnecessary risks for the program. The conferees direct the Air Force to delay any procurement action regarding lots IV through VII of the AN/ALE-47 until 14 days after the date on which the Air Force has provided the congressional defense committees with a report that assesses the cost and acquisition strategy related to the introduction of new suppliers for the system.

Engineer construction equipment

The conferees are aware of the significant contribution National Guard engineer construction units have made to securing the southwest border. The construction efforts of the National Guard have been of singular assistance in providing for increased safety for U.S. Border Patrol agents and in facilitating the U.S. Border Patrol efforts to counter illegal drugs and illegal immigration along the southwest border. The conferees agree that sufficient funds should be allocated by the National Guard to purchase appropriate loaders, dozers, and road-grading equipment for use by National Guard engineer construction units that rotate to continue construction on projects along the United States-Mexican border.

The conferees have indicated elsewhere in this statement of managers, that the Department of Defense should, through normal reprogramming procedures, use available funds provided for counterdrug activities to continue construction to extend the fence constructed by the National Guard on the southwest border.

LPD-17 radio communications systems engineering support

The conferees note that, as a result of the base realignment and closure decisions, the Navy has reorganized and consolidated its radio communications systems (RCS) engineering, production, testing, integration, and training support activities. In assigning RCS engineering support workload for the LPD-17 class of ships, the conferees expect that the Navy will assign such workload to the best appropriate facility.

SH-60 modifications

The conferees understand that there are at least 60 AN/AQS-13F dipping sonars currently installed in the Navy's SH-60F helicopters that will not be replaced under the SH-60R program. These sonars could be upgraded to meet current shallow water operational requirements based on a modification already developed through the FMS program.

The conferees direct the Secretary of the Navy to evaluate the cost effectiveness of a modification program for the AQS-13F dipping sonars that will not be replaced in conjunction with the SH-60R program, and report the results to the congressional defense committees by March 15, 1996.

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations
Subtitle B—Army Programs

Procurement of OH-58D Armed Kiowa Warrior helicopters (sec. 111)

The House bill contained a provision (sec. 111) that would modify current law to permit procurement of twenty additional OH-58D AHIP scout helicopters.

The Senate amendment contained an identical provision (sec. 122).

The conferees understand that the procurement of twenty additional OH-58D Armed Kiowa Warrior helicopters will cost up to \$140.0 million and agree to amend the provision to authorize \$140.0 million to procure these helicopters.

Repeal of requirements for armored vehicle upgrades (sec. 112)

The House bill contained a provision (sec. 112) that would repeal subsection (j) of section 21 of the Arms Export Control Act (22 U.S.C. 2761).

The Senate amendment contained no similar provision.

The Senate recedes.

Multiyear procurement of helicopters (sec. 113)

The budget request included \$354.0 million to buy 18 AH-64D aircraft and 13 Longbow fire control radars.

The House bill would authorize the budget request.

The Senate amendment contained a provision (sec. 111) that would authorize an increase of \$82.0 million and the multiyear procurement of Longbow Apache helicopters.

The House recedes with an amendment.

The conferees agree to authorize an increase of \$76.2 million for the Longbow Apache attack helicopter program and multiyear procurement contracts for both the AH-64D Longbow Apache attack helicopter program and the UH-60 Black Hawk utility helicopter program.

Report on AH-64D engine upgrades (sec. 114)

The Senate amendment contained a provision (sec. 114) that would require the Secretary of the Army to submit a report to Congress on plans to procure T700-701C engine upgrade kits for Army AH-64D helicopters.

The House bill contained no similar provision.

The House recedes.

Requirement for use of previously authorized multiyear procurement authority for Army small arms procurement (sec. 115)

The budget request did not include any funds for procurement of small arms.

The House bill and the Senate amendment would authorize funds for the following small arms programs as indicated below:

	[In millions of dollars]	
	House	Senate
M-16 rifle	\$13.5	\$13.5
M4 carbine	6.5	13.5
M9 personal defense weapon	2.0	4.0
M249 squad automatic weapon	28.5	28.5
MK-19 grenade launcher	20.0	33.9
Medium machine gun (mod kits)	6.5	6.5

The conferees agree to provide funds for small arms programs as indicated below:

	Dollars (mil- lions)	Quan- tity
M-16 rifle	\$13.5	27,500

	Dollars (mil- lions)	Quan- tity
M4 carbine	6.5	12,000
M9 personal defense weapon	2.0	4,660
M249 squad automatic weapon	28.5	10,265
MK-19 grenade launcher	33.9	2,100
Medium machine gun (mod kits)	6.5	1,434

The conferees express their concern that the Army did not include funds for small arms programs in the fiscal year 1996 budget request, despite specific direction regarding multiyear procurement for small arms included in the Statement of Managers accompanying the National Defense Authorization Act for Fiscal Year 1995 (S. Rept. 103-701). The conferees expect the Secretary of the Army to comply with both the letter and intent of the law in this regard. The conferees further expect the Secretary of the Army to ensure that small arms programs are funded at levels approximating those in this report until requirements for each separate class of small arms are fully achieved and that appropriate multiyear contracts are executed. The conferees include a provision (sec. 116) that would direct the Secretary of the Army to enter into multiyear procurement contracts during fiscal year 1997, in accordance with section 115(b)(2) of the National Defense Authorization Act for Fiscal Year 1995.

Subtitle C—Navy Programs

Nuclear attack submarines (sec. 131)

The budget request reflected a policy, adopted by the Department of Defense as a consequence of its Bottom Up Review, that would cause all future nuclear submarines to be constructed by General Dynamics Electric Boat Division (Electric Boat). The budget request included the following funding for submarine construction programs:

- (1) \$1.5 billion for SSN-23, the final increment required for full funding of this *Seawolf* class submarine;
- (2) \$704.5 million advance procurement for the first of a new class of nuclear attack submarines, designated as the new attack submarine (NAS), whose construction would begin in fiscal year 1998; and
- (3) a total of \$455.4 million for research, development, test, and evaluation for the NAS program.

The House report (H. Rept. 104-131) reflected the view that changes in the Navy's plan for acquisition of nuclear attack submarines should be made to incorporate advanced technologies into these submarines' designs. These recommendations were based on an underlying premise that the Navy's NAS program would not provide an adequate technological advantage over foreign submarines presently under construction or in design. The House bill would:

- (1) not authorize SSN-23;
- (2) authorize \$550.0 million for Electric Boat to design, build, and incorporate a hull section into SSN-22 to create a lengthened, expanded capability variant of the basic *Seawolf* design, while retaining its full weapons load;
- (3) authorize \$704.5 million advance procurement for the fiscal year 1998 submarine that would be built by Electric Boat;
- (4) authorize \$300.0 million for Electric Boat to design and build a second hull section that would be incorporated into a fiscal year 1998 submarine, and convert that submarine from the lead ship of a serial-production class, based on the current NAS design, into an additional, one-of-a-kind, expanded capability platform that would be derived from the current NAS design;

(5) directs that \$10.0 million of the funds in the budget request for NAS detailed design work be used only for establishing and maintaining a cadre of Newport News submarine designers at Electric Boat and for transfer of

all NAS design data from Electric Boat's design data base to Newport News;

(6) authorize \$150.0 million to begin an effort at Newport News to design, develop, and build prototype versions of major submarine components that would result in a follow-on submarine design for serial production that represents a substantial improvement in affordability and capability over the current NAS design;

(7) direct the Advanced Research Projects Agency (ARPA) and the national laboratories to make new technologies available to both Electric Boat and Newport News that show potential for achieving a follow-on submarine design for serial production that represents a substantial improvement over the current NAS design; and

(8) include a provision (sec. 133) that would direct the Secretary of the Navy to award, on a competitive basis, contracts for attack submarines built after the fiscal year 1998 submarine.

The Senate amendment reflected an alternate view on how to acquire nuclear attack submarines. It contained a provision (sec. 121) that would:

(1) authorize the SSN-23 at \$1.5 billion, the budget request;

(2) limit the ability of the Secretary of the Navy to obligate or expend funds for SSN-23 until he restructures the NAS program to provide for:

(a) procurement of the lead NAS from Electric Boat in fiscal year 1998;

(b) procurement of the second NAS from Newport News Shipbuilding and Drydock (Newport News) in fiscal year 1999; and

(c) competitive procurement of any additional NAS vessels after the second. Potential competitors for these additional vessels would be contractors that have been awarded a contract by the Secretary of the Navy for construction of nuclear attack submarines during the past 10 years;

(3) place additional limits on the total amount of funds that may be expended for SSN-23 in fiscal years 1996, 1997, 1998, and 1999;

(4) direct the Secretary of the Navy to solicit competitive proposals and award the contract or contracts for NAS, after the second NAS, on the basis of price;

(5) direct the Secretary of the Navy to take no action that would impair the design, engineering, construction, and maintenance competencies of either Electric Boat or Newport News to construct the NAS;

(6) direct the Secretary of the Navy to report every six months to the Committee on Armed Services of the Senate and the Committee on National Security of the House the obligation and expenditure of funds for SSN-23 and the NAS;

(7) authorize \$814.5 million in fiscal year 1996 for design and advance procurement of the lead and second NAS, of which \$10.0 million would be available only for participation of Newport News in the NAS design, and \$100.0 million would be available only for advance procurement and design of the second submarine under the NAS program;

(8) place limits on the expenditure of advance procurement funds in fiscal year 1996 for the lead NAS, unless funds are also obligated or expended for the second NAS;

(9) authorized \$802.0 million in fiscal year 1997 for advance procurement of the lead and second NAS, of which \$75.0 million would be available only for participation by Newport News in the design of the NAS, and \$427.0 million would be available only for advance procurement and design of the second submarine under the NAS program; and

(10) authorized \$455.4 million, the budget request, for research, development, test, and evaluation for the NAS program.

The conferees agree to adopt a new provision dealing with the design and procurement of future Navy attack submarines. This provision would:

(1) authorize the SSN-23 at \$700.0 million;

(2) authorize \$804.5 million in fiscal year 1996 for design and advance procurement of the fiscal year 1998 and fiscal year 1999 submarines (previously designated by the Navy as the NAS), of which:

(a) \$704.5 million would be available only for long-lead and advance construction and procurement for the fiscal year 1998 submarine, which would be built by Electric Boat; and

(b) \$100.0 million would be available only for long-lead and advance construction and procurement for the fiscal year 1999 submarine, which would be built by Newport News;

(3) authorize \$10.0 million only for participation of Newport News in the design of the submarine previously designated by the Navy as the NAS;

(4) establish a special bipartisan congressional panel that would be briefed, at least annually, by the Secretary of the Navy on the status of the submarine modernization program and submarine-related research and development;

(5) direct the Secretary of Defense, not later than March 15, 1996, to accomplish the following:

(a) develop and submit a detailed plan for development of a program that will lead to production of more capable, less expensive submarines than the submarine previously designated as the NAS;

(b) ensure the plan includes a program for the design, development, and procurement of four nuclear attack submarines that would be procured during fiscal years 1998 through 2001 with each successive submarine being more capable and more affordable;

(c) structure the program so that:

(i) one of the four submarines would be constructed with funds appropriated for each fiscal year from fiscal year 1998 through fiscal year 2001;

(ii) to ensure flexibility for innovation, the fiscal year 1998 and the fiscal year 2000 submarines would be constructed by Electric Boat and the fiscal year 1999 and the fiscal year 2001 submarines would be constructed by Newport News;

(iii) the design previously designated as the NAS would be used as the base design by both contractors;

(iv) each contractor would be called on to propose improvements, including design improvements, for each successive submarine so that each of them would be more capable, more affordable, and their design would lead to a design for a future class of nuclear attack submarines that would possess the latest, best, and most affordable technology; and

(v) the fifth and subsequent nuclear attack submarines, proposed for construction after SSN-23, would be procured after a competition based on price;

(d) the Secretary of Defense's plan would also:

(i) set forth a program to accomplish the design, development, and construction of the four submarines that would take maximum advantage of a streamlined acquisition process;

(ii) culminate in selection of a design for a next submarine for serial production not earlier than fiscal year 2003 with procurement to occur after a competition based on price;

(iii) identify advanced technologies that are in various phases of research and development, as well as those that are commercially available off-the-shelf, that are candidates for incorporation into the plan to design, develop, and procure the submarines;

(iv) designate the fifth submarine procured after SSN-23 to be the lead ship in a next generation submarine class, unless the Secretary of the Navy, in consultation with the special congressional submarine review panel, determines that more submarines should be built before the design of a new class of submarines is fixed, in which case the fifth and each successive submarine would be procured after a competition based on price; and

(v) identify the impact of the submarine program on the remainder of the Navy's shipbuilding account;

(6) impose certain limits on the amounts that can be obligated and expended on the SSN-23 and the fiscal year 1998 and 1999 submarines until:

(a) the Secretary of the Navy has certified in writing to the Committee on Armed Services of the Senate and the Committee on National Security of the House that procurement of future nuclear attack submarines, except as stipulated elsewhere in this provision, would be accomplished through a competition based on price; and

(b) the Secretary of Defense, not later than March 15, 1996, has:

(i) submitted the submarine design and procurement plan that would be required by the provision;

(ii) directed the Under Secretary of Defense (Comptroller) to incorporate the costs of the submarine design and procurement plan into the future years defense program, even if the total cost of the plan's program exceeds the President's budget; and

(iii) directed that the Under Secretary of Defense for Acquisition and Technology conduct oversight of the development and improvement of the nuclear attack submarine program of the Navy and established reporting procedures to ensure that officials of the Department of the Navy, who exercise management oversight of the program, report to the Under Secretary of Defense for Acquisition and Technology with respect to that program;

(7) direct the Secretary of Defense to use streamlined acquisition policies to reduce the cost and increase the efficiency of the submarine program;

(8) direct the Secretary of Defense to submit to Congress an annual update of the submarine design and procurement plan with the submission of the President's budget, for each of fiscal years 1998 through 2002;

(9) direct that funds authorized for fiscal year 1996 by this provision may not be obligated or expended during fiscal year 1996 for the fiscal year 1998 submarine unless funds are also obligated and expended during fiscal year 1996 for the fiscal year 1999 submarine;

(10) authorize the Secretary of the Navy to enter into contracts with Electric Boat and Newport News, and suppliers of components during fiscal year 1996 for:

(a) the procurement of long-lead components for the fiscal year 1998 submarine and the fiscal year 1999 submarine; and

(b) advance construction of long-lead components and other components for such submarines;

(11) authorize that, of the amount provided in section 201(4) of this Act for ARPA, that \$100.0 million would be available only for development and demonstration of advanced technologies for incorporation into the submarines constructed as part of the submarine design and procurement plan specified under this provision, to include electric drive, hydrodynamic quieting, ship control automation, solid-state power electronics, wake reduction technologies, superconductor technologies, torpedo defense technologies, advanced control concepts, fuel cell technologies, and propulsors;

(12) direct that the Director of ARPA shall implement a rapid prototype acquisition strategy for both land-based and at-sea subsystem and system demonstrations of advanced technologies in concert with Electric Boat and Newport News; and

(13) define potential competitors, for the purposes of this provision, as those that have been awarded a contract by the Secretary of the Navy for construction of nuclear attack submarines during the past 10 years.

Research for advanced submarine technology (sec. 132)

The conferees agree to adopt a new provision that would direct that, of the amount appropriated for fiscal year 1996 for the national defense sealift fund, \$50.0 million would be available only for the Director of the Advance Research Projects Agency for advanced submarine technology activities.

Cost limitation for Seawolf submarine program (sec. 133)

The Senate amendment would authorize the third *Seawolf* class submarine SSN-23. Consistent with this authorization, the Senate amendment included a provision (sec. 125) that would establish a combined cost cap on all three *Seawolf* submarines (SSN-21, SSN-22 and SSN-23). This cost cap would be in addition to a cost cap that Congress imposed on the first two *Seawolf* class submarines, SSN-21 and SSN-22, in fiscal year 1995.

The House bill included a provision (sec. 132) that would repeal the cost cap on SSN-21 and SSN-22.

The conferees agree to adopt a new provision that would:

(1) establish a combined cost cap on the three *Seawolf* submarines (SSN-21, SSN-22, and SSN-23); and

(2) repeal the combined cost cap on SSN-21 and SSN-22 that was imposed by the National Defense Authorization Act for Fiscal Year 1995.

Repeal of prohibition on backfit of Trident submarines (sec. 134)

The House bill contained a provision (sec. 131) that would repeal the provision of law that prohibits the backfit of Trident II (D-5) missiles into Trident I (C-4) missile-carrying submarines.

The Senate amendment contained an identical provision (sec. 122).

The conference agreement contains this provision.

The conferees endorse an all D-5 fleet of Trident submarines. But the conferees also believe that it is premature to rule out the option of retaining all 18 Trident submarines. Although the Nuclear Posture Review recommended a force of 14 Trident submarines equipped with the D-5 missile, circumstances may require the United States to retain a higher number of such submarines or, alternatively, reduce to a lower level.

Given this uncertainty, the conferees direct the Secretary of the Navy to take several actions: (1) fully fund all activities necessary for the backfitting of Trident II missiles into at least four west coast Trident submarines on the schedule recommended in the Nuclear Posture Review; and (2) continue to fund, in the fiscal year 1997 budget and in the Future Years Defense Program, adequate operational support for Trident I missiles to ensure the option of retaining all 18 Trident submarines on full operational status, assuming backfits of the final four submarines with D-5 missiles following the completion of the first four conversions.

Arleigh Burke class destroyer program (sec. 135)

The Senate amendment contained a provision (sec. 123) that would:

(1) authorize \$650.0 million as the first increment of split funding for two *Arleigh*

Burke class destroyers in accordance with a split funding provision (sec. 124) that was included elsewhere in the Senate amendment; and

(2) express the sense of Congress that the Secretary of the Navy should plan for and request the final increment of funding for the two *Arleigh Burke* class destroyers in fiscal year 1997, also in accordance with the split funding provision (sec. 124) of the Senate amendment.

The House bill contained no similar provision.

The conferees adopt a new provision that would:

(1) authorize six *Arleigh Burke* class destroyers;

(2) authorize \$2.17 billion, the budget request, for the construction, including advance procurement, for *Arleigh Burke* class destroyers;

(3) authorize the Secretary of the Navy to enter into contracts in fiscal year 1996 for the construction of three *Arleigh Burke* class destroyers;

(4) authorize the Secretary of the Navy to enter into contracts in fiscal year 1997 for the construction of three *Arleigh Burke* class destroyers, subject to the availability of appropriations for such destroyers;

(5) continue the contract award pattern and sequence used by the Navy for the procurement of *Arleigh Burke* class destroyers in fiscal years 1994 and 1995;

(6) limit the liability of the government for these vessels to the amounts appropriated for them; and

(7) encourage, subject to a prior notification to the congressional defense committees, the Secretary of the Navy to use shipbuilding and conversion savings, that become excess to the needs of the Navy from other programs, to fully fund *Arleigh Burke* class destroyer contracts entered into under the terms of the provision.

Acquisition program for crash attenuating seats (sec. 136)

The Senate amendment contained a provision (sec. 126) that would allow the Secretary of the Navy to establish a program to procure and install commercially developed, energy absorbing, crash attenuating seats in H-53E helicopters. The Senate provision would allow the Secretary to use up to \$10.0 million for the program out of unobligated balances in the Legacy Resource Management Program.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to establish such a program.

The conferees acknowledge the potential value of crash attenuating seats for passengers in military helicopters, and expect the Department to proceed quickly to define the technical specification and qualification for non-developmental seats. The conferees further expect the Department to ensure the acquisition program incorporates full and open competition.

T-39N trainer aircraft (sec. 137)

The budget request did not include funds to purchase the T-39N aircraft the Department of the Navy now uses to train naval flight officers. The government leases these aircraft as part of a service contract. The lessor has offered to sell these aircraft to the government, rather than continue the current leasing arrangement.

The House bill and the Senate amendment would support the budget request.

The Senate report (S. Rept 104-112) would direct the Secretary of the Navy to provide an analysis of the contractor's proposal to the Armed Services Committee of the Senate, so the proposal and the analysis could be reviewed for possible further action.

The conferees recommend \$45.0 million for purchasing T-39N aircraft, subject to certain conditions. The conferees believe that the proposal deserves further review before purchasing these aircraft. The conferees expect the Department's analysis to answer, at a minimum, the following questions:

(1) What would be the status of the training program for which T-39Ns are currently leased?

(2) For what purpose would the Navy spend procurement funds in fiscal year 1996?

(3) Is funding for this project contained anywhere in the future years defense program (FYDP)? If there is funding, how much?

(4) Is there an approved requirement in the Navy for acquiring this capability? Does this requirement supplant or supplement the current mission that is being filled by the T-39N leasing program?

(5) How much funding beyond \$45.0 million would be required to enable the T-39N system to meet future training requirements? If additional funds are required, how much of the additional cost is budgeted in the FYDP?

(6) What savings, in terms of both current and constant dollars, would accrue to the Navy by purchasing aircraft for this requirement on a non-competitive basis in fiscal year 1996, rather than selecting an aircraft under competitive procedures when the current lease program expires in fiscal year 1998? If savings will accrue, are they attributable to factors other than inflation? Are there savings in life cycle support costs beyond the initial acquisition costs?

(7) Would additional funding for the project now interfere with the Navy's opportunity to conduct a competitive procurement or better define the program's requirements?

(8) Are there other reasons that would prevent executing the program in fiscal year 1996?

(9) The conferees understand that the T-39N leasing contract provided for amortizing the full purchase price of the aircraft over the first five years of the lease. Since the contractor has already been reimbursed in full for purchase price, why would it be in the government's interests to pay more than a nominal amount for aircraft?

The conferees believe that the proposal to buy the aircraft could have merit; however, the conferees recommend a provision that would prohibit obligation of these acquisition funds until 60 days after the Under Secretary of Defense for Acquisition and Technology has submitted the analysis described above and has certified to the Armed Services Committee of the Senate and the National Security Committee of the House of Representatives that acquisition of the T-39N aircraft is in the best interest of the government and is the most cost effective alternative in meeting the requirements for training naval flight officers.

Pioneer unmanned aerial vehicle program (sec. 138)

The Senate amendment contained a provision (sec. 132) that would prohibit the Secretary of the Navy from spending more than one-sixth of the funds appropriated for fiscal year 1996, or any unobligated balances available from previous years, until the Secretary certifies that funds have been obligated to equip nine Pioneer Unmanned Aerial Vehicle systems with the Common Automatic Landing and Recovery System (CARLS).

The House bill contained no similar provision.

The House recedes.

Subtitle D—Air Force Programs

Repeal of limitations (secs. 141 and 142)

The budget request included \$279.9 million for B-2 procurement and \$623.6 million for B-

2 research and development for a B-2 program consisting of twenty aircraft. The House bill contained a provision (sec. 141) that would repeal limitations on the B-2 program, and provide an increase of \$553 million for B-2 procurement. The House bill would repeal:

Section 112 of the National Defense Act for Fiscal Years 1990 and 1991, which requires certification from the Secretary of Defense that the B-2 is meeting certain performance criteria.

Section 151(c) of the National Defense Authorization Act for Fiscal Year 1993, which limits B-2 procurement to 20 bombers and one test aircraft.

Section 131(c) of the National Defense Authorization Act for Fiscal Year 1994, which reaffirms the twenty one aircraft limitation.

Section 131(d) of the National Defense Authorization Act for Fiscal Year 1994, which limits the total program costs to \$28,968,000,000 in Fiscal Year 1981 constant dollars.

Section 133(e) of the National Defense Authorization Act for Fiscal Year 1995, which provides that none of the \$125.0 million authorized and appropriated for the Enhanced Bomber Capability Fund may be obligated for advance procurement of new B-2 aircraft (including long lead items).

The Senate amendment contained no additional funds, nor did it contain any repeal of the limitations provision.

The conferees agree to an amendment that would repeal the limitations imposed on the scope of the B-2 program, while retaining requirements for B-2 performance compliance in both the present authorization and any possible future acquisition of the aircraft.

The conferees agree to authorize the budget request for research and development and to increase the authorization for procurement by \$493.0 million. The conferees further agree that the \$493.0 million may not be spent until March 31, 1996.

The conferees believe that the B-2 bomber represents a major technological advance in strategic bomber capabilities. However, if a decision were made to acquire additional B-2 bombers, their high cost would result in funding reductions in the Administration's five year defense program. Therefore, the Senate conferees believe that the increased authorization of \$493.0 million provided for the B-2 bomber program may be expended only for procurement of B-2 components, upgrades, and modifications that would be of value for the existing fleet of B-2 bombers.

The conferees are concerned over the cost of producing modern, highly capable, long range bombers, and therefore strongly urge the Secretary of Defense to: (1) complete the study called for in section 133(d)(3) of the National Defense Act of 1995 (Public Law 103-337) for requirements formulation and conceptual studies for a conventional-conflict-oriented, lower-cost, next generation bomber; and (2) explore options, including adoption of streamlined acquisition policies and procedures, for reducing the costs of producing long-range bombers. Accordingly, the conferees agree to repeal the requirements contained in section 133(d)(3), which states that such a study may be carried out only if the previously-produced bomber force study found bomber capabilities to be inadequate.

The conferees note that section 133(d) permitted the Secretary to obligate up to \$25.0 million of the \$125.0 million authorized and appropriated in fiscal year 1995 for the Enhanced Bomber Capability Fund for such a study. The conferees direct that any remaining unobligated fiscal year 1995 funds from the \$125.0 million made available for B-2 bomber industrial base preservation and next-generation bomber study shall promptly be merged with the \$493.0 million in additional B-2 funds authorized in this Act.

In order to compare force capabilities with relative costs, the conferees urge the Secretary of Defense to provide a summary and detailed listing of program reductions and adjustments to the fiscal year 1997 budget request and the future years' defense program (FYDP) required by the possible acquisition of additional B-2 bombers. The Secretary should use the standard cost analysis approach used in the March 1995 Air Force cost estimate for further B-2 acquisition of one and one-half and three aircraft per year.

MC-130H Aircraft Program (sec. 143)

The conference agreement includes a new provision that would amend section 161 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (P.L. 101-189) to enable obligation of funds for award fee and procurement of contractor furnished equipment.

The conferees understand that the Air Force desires to grant an award fee to the MC-130H Combat Talon II development contractor, but is prohibited from doing so by a provision of Public Law 101-189. The conferees note that the prohibitive legislative provision requires the Director of Operational Test and Evaluation (DOT&E) to certify that the MC-130H Combat Talon II terrain avoidance radar performs in accordance with requirements outlined in the test and Evaluation Master Plan (TEMP) approved by the DOT&E in September 1988. The conferees have been informed that the aircraft cannot be certified as having met TEMP criteria because a specific test criterion referred to in the TEMP has been determined to be unmeasurable.

The conferees agree to include a provision that would allow the DOT&E to certify to the congressional defense committees that the MC-130H terrain avoidance radar is operationally effective in order to release the award fee for the MC-130H. The conferees direct the DOT&E to include in his report a statement that all unmeasurable test criteria included in the September 1988 TEMP have been appropriately corrected.

Subtitle E—Chemical Demilitarization Program

Chemical agents and munitions destruction program (secs. 107, 151-153)

The budget request contained \$746.7 million for operation and maintenance, research and development and procurement, for the defense chemical agents and munitions destruction program.

The House bill contained a series of provisions (secs. 106, 151-153, and 2407) that would: authorize the budget request; repeal a legislative requirement to develop a chemical demilitarization cryofracture facility; express congressional concern about the cost growth of destroying the unitary chemical stockpile and express a view that the Secretary of Defense should consider measures to reduce the overall cost; direct the Secretary of Defense to conduct a review and evaluation of issues associated with closure and reuse of the Department of Defense facilities that are co-located with the unitary chemical stockpile and demilitarization operations; and prohibit the obligation or expenditure of fiscal year 1996 funds, prior to March 1, 1996, for the construction of a chemical munitions incinerator facility at Umatilla Army Depot, Oregon.

The Senate amendment contained provisions (sec. 107 and 1099C) that would authorize \$671.7 million for the chemical agents and munitions destruction program, and direct the Department of Defense to review and assess the risk associated with the transportation of any portion of the unitary chemical stockpile, such as drained chemical agents or munitions from one location to another

within the continental United States, and review and evaluate issues associated with closure and reuse of the Department of Defense facilities that are co-located with the unitary chemical stockpile and demilitarization operations. The Senate report (S. Rept. 104-112) would recommend the use of unobligated fiscal years 1994 and 1995 procurement funds for procurement of equipment at Pine Bluff, Arkansas and Umatilla, Oregon.

The conferees agree to provisions that would authorize \$672.3 million for the defense chemical agents and munitions program, to include: \$265.0 million for procurement; \$353.8 million for operations and maintenance; and \$53.4 million for research and development. The provision would repeal the legislative requirement to develop a chemical demilitarization cryofracture facility.

Further, the conferees agree to provisions that would direct the Secretary of Defense to proceed with the destruction of the U.S. chemical stockpile using the current baseline technology. The conferees would also require the Secretary to ensure that support measures have been provided at each installation where a chemical agent and munitions demilitarization facility would be constructed, as required by the Department of Defense and the Department of Army regulations, the chemical demilitarization plans, and the Solid Waste Disposal Act permit. The conferees direct the Secretary to conduct an assessment of the current chemical demilitarization program and recommend measures that could reduce the total cost of the program. The provision would also direct the Secretary to review and evaluate issues associated with the closure and reutilization of Department of Defense facilities co-located with continuing chemical stockpile and chemical demilitarization operations. The conferees agree to authorize the use of funds appropriated for the defense chemical agents and munitions destruction program to support travel and associated travel costs of Commissioners of the Citizens' Advisory Commissions, when such travel is conducted at the invitation of the Assistant Secretary of the Army for Research, Development and Acquisition. The provision would modify existing law to permit the appointment of a civilian as project manager for the chemical agent and munitions destruction program. The Department would also be required to provide a quarterly report to Congress on the use of such funds to pay for the travel and associated travel costs.

COST OF THE CHEMICAL AGENTS AND MUNITIONS DESTRUCTION PROGRAM

The conferees remain concerned about the escalating costs associated with the chemical agents and munitions destruction program. The program has grown from its original estimate of \$1.7 billion in 1986 to the current estimated cost of \$11.9 billion, with expectations that costs will further increase. Continued delays in proceeding with the demilitarization and destruction of the chemical stockpile have added to the overall increases in the program. The conferees believe that the program should proceed expeditiously and utilize technology that minimizes risks to the public and the environment.

The conferees are concerned that continued delays, related to site operation systemization, environmental permits, and construction of the demilitarization and destruction facilities, would increase the overall program costs and risks to the public and the environment.

Finally, as the Department reviews measures that could be implemented to reduce the growth of the program costs, the conferees expect the Secretary to consider the potential for reconfiguration of the stockpile, as described in the October 19, 1995 letter from the Assistant Secretary of the

Army for Research, Development and Acquisition, and to ensure protection of the public and environment.

ALTERNATIVE TECHNOLOGIES

The Department of the Army is currently conducting research and development of chemical neutralization and biodegradation, in conjunction with neutralization, for use at the bulk-only storage sites. The conferees believe there is potential for the implementation of these processes at future demilitarization and destruction sites, which could reduce the requirement for a liquid incinerator. The conferees support the National Research Council's (NRC's) recommendation that the Army continues its current baseline incineration program until such time as the evaluation of these alternative technologies is concluded.

If the evaluation of the alternative technologies research and development program proves successful, the conferees would support inclusion of this process into the baseline process. In conducting the chemical demilitarization and destruction program and assessing measures to significantly reduce program costs, the conferees expect the Department to consider a wide range of alternatives to the current baseline incineration program, to include the use of alternative technologies.

Additionally, the conferees expect the Secretary's assessment of the current chemical demilitarization program and measures to reduce the overall cost of the program, to include a risk analysis specific to each chemical stockpile storage and demilitarization site, the results of the stockpile surveillance and stability analysis related to the physical and chemical integrity of the stockpile, and the potential reconfiguration of the chemical stockpile. In making such an assessment, the Secretary shall ensure the maximum protection of the environment, the general public, and the personnel involved in the destruction of the chemical stockpile, while minimizing total program costs. The conferees expect the assessment to yield potential revisions to the chemical agents and munitions destruction program that could reduce program costs and increase public safety.

LEGISLATIVE PROVISIONS NOT ADOPTED

Repeal of limitation on total cost for SSN-21 and SSN-22 Seawolf submarines

The budget request included \$1.5 billion for construction of the third *Seawolf* class submarine, SSN-23.

The House bill would not authorize SSN-23. However, consistent with other actions taken by the House on SSN-22, the House bill contained a provision (sec. 132) that would eliminate the existing cost cap on the first two *Seawolf* class submarines.

The Senate amendment would authorize SSN-23. It did not contain a provision that would repeal the cost cap on SSN-21 and SSN-22.

The House recedes.

Competition required for selection of shipyards for construction of vessels for next generation attack submarine program

The House bill contained a provision (sec. 133) that would:

(1) require the Secretary of the Navy to select on a competitive basis the shipyard for construction of each vessel of the next generation attack submarine program; and

(2) stipulate that the next generation attack submarine program shall begin with the first submarine that is programmed to be constructed after the submarine that is programmed to be constructed in fiscal year 1998.

The Senate amendment contained a provision (sec. 121) that would address competition as an integral part of the broader issue of current and future nuclear submarine construction programs.

The House recedes.

The conferees agree to incorporate the issue of competition for future submarines into a new, more comprehensive provision dealing with future submarine development and procurement.

Sonobuoy programs

The budget request included \$8.9 million for the procurement of AN/SSQ-53 sonobuoys and no funding for the procurement of AN/SSQ-110 sonobuoys.

The House bill contained a provision (sec. 134) that would:

(1) stipulate that no fiscal year 1996 funds could be used for procurement of AN/SSQ-53 sonobuoys; and

(2) authorize \$8.9 million for AN/SSQ-110 sonobuoys.

While the Senate amendment contained no similar provision, it did recommend funding adjustments to these two sonobuoy programs that would accomplish the intent underlying the House provision.

The conferees agree that the funding adjustment included in the House provision should be adopted, but do not believe that a legislative provision to that effect is necessary.

The House recedes.

Split funding for construction of naval vessels and incremental funding of procurement items

The Senate amendment contained a provision (sec. 124) that would authorize the Secretary of Defense to employ split funding for construction of certain naval vessels when developing the future years defense program. The provision would permit the Secretary to provide funding for these vessels over two years, but enter into a contract based on the first increment of funding. The intent of the provision would be to provide the Secretary with more flexibility to develop a uniform and cost effective shipbuilding program.

The House bill contained a provision (sec. 1007) that would prohibit the use of incremental funding, including split funding, for:

(1) the procurement of aircraft, missiles, or naval vessels;

(2) the procurement of tracked combat vehicles;

(3) the procurement of other weapons; and

(4) the procurement of naval torpedoes and related support equipment.

The House provision would not apply to funding classified as advance procurement funding.

These provisions were not included in the conference agreement.

Tier II predator unmanned aerial vehicle program

The Senate amendment contained a provision (sec. 131) that would prohibit the obligation of funds appropriated or otherwise made available for the Department of Defense in fiscal year 1996 for the Tier II Predator Unmanned Aerial Vehicle.

The House bill contained no similar provision.

The Senate recedes.

Joint primary aircraft training system program

The budget request included \$55.0 million for three joint primary aircraft training system (JPATS) aircraft. At the time of the budget submission, the Department of Defense (DOD) had not completed the JPATS competition. This amount was derived from an estimate of funding required to procure three aircraft from any of the potential competitors. After source selection, the Department determined that it could procure eight JPATS aircraft with the requested funds.

The Senate amendment contained a provision (sec. 133) that would increase the number of aircraft that the Department could procure, from three to eight, without changing the amount of the authorization.

The House bill contained no similar provision.

The Senate recedes.

The conferees agree that the Air Force should buy up to eight aircraft with authorized funds.

Weapons industrial facilities

The budget request included \$13.1 million for naval weapons industrial facilities.

The Senate amendment included a provision (sec. 391) that would authorize an increase of \$2.0 million in operations and maintenance accounts for essential safety functions for the Allegany Ballistics Laboratory.

The House bill contained no similar provision.

The Senate recedes. The conferees agree to provide an increase of \$30.0 million for naval weapons industrial facilities for continuation of the facility restoration program at Allegany Ballistics Laboratory.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Overview

The budget request for fiscal year 1996 contained an authorization of \$34,331.9 million for Research and Development in the Department of Defense. The House bill would authorize \$35,934.5 million. The Senate amendment would authorize \$35,959.9 million. The conferees recommended an authorization of \$35,730.4 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Passive millimeter wave camera

The budget request did not include funds for the passive millimeter wave camera.

The House bill would add \$6.0 million in PE 62120A for continuation of the program.

The Senate amendment contained no similar provision.

The Senate recesses.

Tractor rose

The budget request included \$4.5 million for Tractor Rose.

The House bill would authorize the requested amount.

The Senate amendment would authorize an additional \$13.5 million.

The conferees are aware of recent progress in the activities related to this program. As a consequence, the conferees recommend authorization of this project at the level of funds appropriated in fiscal year 1996. In addition, the conferees urge the Department of the Army to consider reprogramming funds below threshold to capitalize on the potential of this technology.

Electric gun technology

The budget request included \$9.0 million for the electric gun exploratory development program.

The House bill would authorize an additional \$6.0 million in PE 62618A to complete research team data gathering and assessment in order to refocus the effort on the most promising technologies.

The conferees agree to authorize an additional \$7.0 million for electric gun technology and an additional \$1.0 million for the electrothermal chemical gun.

Objective individual combat weapon (OICW)

The budget request included \$5.1 million in PE 62623A and \$4.5 million in PE 63607A for continuation of the joint service small arms program.

The House bill would authorize an additional \$2.0 million in PE 63607A for an advanced technology demonstration of light-weight, medium caliber, multi-shot, anti-armor weapon technology for application to a next-generation objective individual combat weapon system (OICW) for the Army and the Marines. The House report (H. Rept. 104-131) expressed the concern that funds requested for the OICW in fiscal year 1996 are insufficient to adequately conduct this advanced technology program. The House report also encouraged the Secretary of the Army to examine the current development strategy for the OICW to support the joint small arms master plan (JSAMP) and to request reprogramming of funds to carry out the plan.

The Senate amendment would authorize the requested amount.

The House recesses. The conferees strongly support the development of advanced technology for advanced individual weapons systems, as outlined in the JSAMP, and share the concerns expressed in the House report regarding adequacy of funding for development of the OICW. The conferees encourage the Secretary of the Army to request reprogramming of additional funds to compensate for any fiscal year 1996 funding shortfalls in the OICW program. The conferees also encourage the Secretary to include additional funds in the fiscal year 1997 budget request for OICW.

Advanced battery technology

The budget request did not include funding for advanced batteries.

The House bill would authorize \$3.0 million in PE 62705A for non-metallic lithium and low-cost reusable alkaline batteries.

The Senate recesses.

The conferees agree that the Army technology base has been underfunded in recent years. The conferees urge the Army leadership and the Office of the Secretary of Defense provide for balanced funding of the Army technology base program, as related to other Defense program accounts in the fiscal year 1997 budget request.

Medical advanced technology

The budget request included \$11.8 million for medical advanced technology.

The House bill would include an additional \$5.0 million for continuation of the battlefield tissue replacement program.

The Senate amendment would include an additional \$3.0 million for telemedicine.

The Senate amendment would also authorize an increase of \$4.0 million in PE 63006A to develop and test wave net technology for possible application to the Army's digitization initiatives.

The conferees agree to authorize the additional \$4.0 million to PE 63006A for development and testing of wave net technology.

Space applications technology program

The budget request included \$16.9 million in PE 63006A for command, control, and communications advanced technology, including \$498,000 for the Army's space applications technology program.

Both the House bill and the Senate amendment would authorize the budget request for the Army's space applications technology program.

The conferees agree to an additional \$5.0 million in PE 63006A for the space applications technology program. The conferees are aware of the program's success in demonstrating global positioning system and Wrasse weather data receivers during Operation Desert Storm/Desert Shield and other space technology applications, such as, the location of high value targets using hyperspectral sensing techniques, high data rate satellite communications on the move, and down link weather satellite technology. The conferees encourage the Army to continue support to the program in future budget requests.

Acquired immune deficiency syndrome

The budget request included \$2.9 million in PE 63105A.

Both the House bill and the Senate amendment authorized the requested amount.

The conferees agree to authorize the requested amount and concur with the Senate report (S. Rept. 104-112) that directed at least \$1.0 million of the authorized amount be used to continue domestic clinical HIV programs.

Joint precision strike demonstration programs

The budget request included \$34.1 million in PE 63238A for the joint air-land-sea precision strike demonstration (JPSD) program.

The House bill would direct that the JPSD program be expanded into a jointly manned program, with participation by all military services, and would recommend an increase of \$4.0 million for this purpose.

The Senate amendment would authorize the requested amount.

The House recesses. The conferees agree with the views expressed in the House report (H. Rept. 104-131) on the progress made by the Army in demonstrating advanced concepts for attack of time-critical targets. The conferees also agree with the House report recommendations for increased participation by the other military services in the JPSD. Attack of time-critical targets on the battlefield is a joint issue which requires the coordinated efforts of all the military services.

Missile and rocket advanced technology

The budget request included \$123.9 million in PE 63313A for missile and rocket advanced technology.

The House bill would reduce the requested amount by \$12.1 million by making the following adjustments: adding \$2.5 million for low cost autonomous attack submunition (LOCAAS) and \$5.0 million for low-cost guidance development for the multiple launch rocket system (MLRS); and reducing the amount requested for the rapid force projection initiative by \$19.6 million.

The Senate amendment would increase the requested amount by \$12.0 million, with \$5.0 million for LOCAAS and \$7.0 million for low-cost guidance for MLRS.

The conferees agree to authorize a total of \$118.9 million in PE 63313A. The conferees agree to reduce the requested amount by \$7.5 million for the Enhanced-Fiber Optic Guided (E-FOG) missile system, as a result of concerns expressed in the House report (H. Rept. 104-131), and to add \$2.5 million for LOCAAS within PE 63313A. The conferees would also increase the requested amount by \$2.5 million for LOCAAS in PE 63601F for the Air Force. The conferees continue to support low-cost guidance for the MLRS and urge the Army to reprogram funds for this program in fiscal year 1996 and to request adequate funds in the fiscal year 1997 budget request.

Landmine warfare and barrier advanced technology

The budget request included \$18.8 million for landmine warfare, and barrier advanced technology.

The House bill would authorize an additional \$10.0 million for continuation of the landmine neutralization program.

The conferees agree with the section of the Senate Report (S. Rept. 104-112) that deals with the medium tactical truck extended service program, including the requirements for a report from the Secretary of the Army on the medium truck ESP.

As the manager of tactical vehicles for the Department of Defense, the conferees expect the Army to manage the Army five-ton truck ESP and the Marine Corps MTVR program and ensure that Air Force and Navy requirements are included in executing the Army ESP. The conferees expect the Army to take maximum advantage of medium truck ESP currently underway, to minimize additional procurements to avoid industrial overcapacity, and to give consideration to reliable manufacturers that have demonstrated capabilities to produce military trucks.

Heavy tactical vehicles

The House bill would provide an increase of \$2.75 million in PE 64622A, \$1.9 million for water heater/chiller development for the Army's water tank semitrailer, and \$.85 million for a palletized loading system technology demonstration.

The Senate recedes.

High mobility multipurpose wheeled vehicle extended service program

The Senate amendment would include an increase of \$5.0 million in PE 64642A to initiate an extended service program (ESP) for the high mobility multipurpose wheeled vehicle (HMMWV).

The conferees recognize that the HMMWV fleet is reaching age and mileage levels leading to increased maintenance and operating costs and lower reliability. The conferees agree to provide an increase of \$2.0 million for initiation and prototype development for HMMWV ESP.

The conferees direct the Secretary of the Army to submit, with the fiscal year 1997 budget request, a report to the congressional defense committees that describes a program to develop and test prototypes, and to initiate a joint program to remanufacture HMMWV's for the Army and the Marine Corps, harmonizing their requirements for ESP. The conferees further direct the Secretary of the Army and the Secretary of the Navy to ensure this program is fully funded in future budgets.

Automated test equipment development

The budget request included \$5.4 million for automated test equipment development.

The House bill would authorize an additional \$10.0 million in PE 64746A for the integrated family of test equipment.

The Senate amendment would authorize \$0.5 million for type classification of a non-developmental universal mounting bracket for the MK-19 grenade machine gun.

The conferees agree to authorize \$0.5 million for the type classification of the MK-19 mounting bracket and \$1.6 million for the 120mm practice cartridge in PE 64802A.

Battlefield combat identification system (BCIS)

The conferees are disappointed with the fiscal constraints that precluded full funding of the administration's \$30.5 million request for non-cooperative target recognition (PE 64817A), particularly in relation to the battlefield combat identification system (BCIS). Fratricide on the battlefield is of great concern to our fighting forces, and BCIS is expected to significantly enhance the Army's ability to deal with this critical issue. The system has performed extremely well in Army testing to date, and the program enjoys widespread support, both within the military services and the warfighting Commanders-in-Chief. The conferees encourage the Secretary of the Army to aggressively pursue the program, and would entertain a reprogramming request to fund additional BCIS units or accelerated BCIS development.

Joint warfighter interoperability demonstration

The budget request included \$46.5 million in PE 65712A for support of Army operational testing.

The House bill would recommend an additional \$1.5 million for support of a joint warfighter interoperability demonstration, one of the key fiscal year 1996 funding shortfalls identified during evaluation of the Department of the Army budget request.

Missile/air defense product improvement

The budget request included \$17.1 million for the missile/air defense product improvement program element.

The House bill would authorize an increase of \$9.8 million for the evaluation of Stinger block II.

The Senate amendment would also authorize \$9.8 million for Stinger, and an additional \$35.0 million for Patriot cruise missile defense.

The conferees agree to authorize \$61.9 million in PE 23801A, an increase of \$44.8 million for both programs.

Instrumented factory for gear development

The budget request did not include funding for the continuation of the instrumented factory gear (INFAC).

The House bill would authorize an additional \$5.0 million for INFAC in PE 78045A.

The conferees agree to authorize an additional \$4.0 million for this PAN fibers program in PE 78045A.

Rotary winged aircraft repair

The budget request included no funding for manufacturing technology related to rotary winged aircraft repair.

The House bill would fence \$1.5 million of the Army MANTECH program for technologies related to industrial-academic partnerships for repair technology development and insertion for rotary winged aircraft.

The Senate amendment contained no similar provision.

The conferees agree to authorize \$1.5 million for the program in PE 78045A.

Task force XXI soldier

The conferees agree to authorize \$30.0 million for a program that consolidates the Army's Land warrior and Generation II (GEN II) soldier programs. The conferees agree to the following adjustment for the purpose of program consolidation:

	<i>Millions</i>
PE 63001A—Logistics Advanced Technology	-\$4.9
PE 63710A—Night Vision Advanced Technology	-4.2
PE 63772A—Advanced Tactical Computer Science and Technology	-5.0
PE 63747A—Soldier Support and Survivability	-25.9
Task Force XXI Soldier	+30.0

The conferees believe that the Army must examine and consider a full range of alternatives, including expansion of the dismounted soldier system of the applique program, execution of the Land Warrior program, and acceleration of the GEN II advanced technology demonstrator, to the extent that they support the new consolidated program.

Overview

The budget request for fiscal year 1996 contained an authorization of \$8,204.5 million for Navy, Research and Development in the Department of Defense. The House bill would authorize \$8,516.5 million. The Senate amendment would authorize \$8,624.2 million. The conferees recommended an authorization of \$8,474.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Long-range guided projectile technology

The budget request contained \$32.7 million for development and demonstration of the advanced global positioning system/inertial navigation system (GPS/INS) guidance and control technology for long range precision guided munitions used by Navy surface fire support and Army long-range artillery.

The House bill would authorize an additional \$9.0 million to accelerate the development and demonstration of the GPS/INS.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment.

The conferees agree to an additional \$2.0 million in PE 62111N for the purposes indicated in the House report (H. Rept. 104-131). The conferees are aware of a demonstrated rapid progress in the development and demonstration of miniaturized, gun-hardened GPS/INS technology in the Army's Low-Cost Competent Munition (LCCM) Program, the Navy's advanced technology demonstration program for an extended range guided projectile, and the cooperative LCCM technology program established between Departments of the Army and the Navy. The conferees believe that the technology may significantly improve the accuracy of existing and future gun-fired projectiles, missiles, and rockets, and that an opportunity exists to accelerate development and demonstration in these areas. The conferees strongly encourage increased funding in this area in future Army and Navy budget requests.

Surface ship technology

The budget request included \$36.8 million for surface ship technology.

The House bill would authorize an additional \$6.0 million for power electronics building blocks and \$10.0 million for advanced submarine technology development.

The Senate amendment would authorize an additional \$6.0 million for power electronics building blocks.

The conferees agree to authorize \$67.8 million in PE 62121N; an increase of \$31.0 million. That authorization includes \$6.0 million for power electronics building blocks, \$10.0 million for advanced submarine technology development and \$15.0 million for curved plate technology for ship construction.

Power electronic building blocks

The budget request did not include funding for the power electronic building blocks project.

Both the House bill and the Senate amendment contained \$6.0 million in PE 62121N to initiate a power electronics program based on metal oxide semiconductor (MOS) control thyristors for high speed switching.

The conferees agree that the program should be affiliated with academic institutions and, as recommended by the Senate, involve a computational test bed for system simulation. The conferees agree that at least one-third of the funding should be for university participation.

Flat panel, helmet-mounted display

The budget request included \$7.0 million in PE 62122N for exploratory development of air vehicle technology.

The House bill would authorize an additional \$2.5 million to continue exploratory development of flat panel, helmet-mounted displays for air crew helmets.

The Senate amendment would authorize the budget request.

The Senate recedes.

Communications technology

The budget request included \$9.2 million in PE 62232N to continue development of key communications technologies for air, ship, and submarine platforms.

The House bill would authorize an additional \$4.0 million for support of wireless and

satellite communications research in the areas of integrated antenna systems, communications hardware design, communication algorithm development and high-frequency device modeling and measurements.

The Senate amendment contained no similar recommendation.

The House recedes. The conferees recognize the importance of continued wireless and satellite communications research in the areas recommended in the House report (H. Rept. 104-131).

Air crew adaptive automation technology

The budget request included \$40.5 million in PE 62233N for exploratory development of enabling readiness, training, and environmental technologies that support the manning, operation, and maintenance of fleet assets, and that provide the necessary training, facilities, and equipment to maintain operational forces in a high state of readiness.

The House bill would authorize an additional \$2.7 million to continue development of adaptable automation technology for management of air crew workloads.

The Senate amendment would authorize the budget request.

The House recedes.

Embedded sensors

The budget request included \$74.8 million in PE 62234N for exploratory development in the areas of materials, electronics, and computer technology in support of Navy advanced weapon and platform systems.

The House bill would authorize an additional \$3.0 million to complete the exploratory development of embedded, remotely queried, microelectromechanical sensors in thick composites, which would be suitable for use in submarine, ships, and armored vehicles.

The Senate amendment would authorize the budget request.

The Senate recedes.

Parametric airborne dipping sonar

The budget request included \$51.2 million for exploratory development of undersea surveillance and weapons technology.

The Senate amendment would authorize an additional \$4.8 million in PE 62314N to expand the current scope of the demonstration and evaluation of parametric sonar technology to provide three dimensional stabilized steerable beams, around 360 degrees, at full source level, further characterize the technology for mine avoidance implications, and evaluate whether parametric sonar technology merits further development.

The House bill contained no similar provision.

The House recedes. The conferees agree that the Navy should complete evaluation of the limited capability laboratory prototype, in-depth technical review and assessment of the potential of parametric sonar for helicopter application, and in-water testing and evaluation of the parametric airborne dipping sonar prototype.

Polar Ozone Aerosol Monitor III

The budget request included \$45.5 million for exploratory development of oceanographic and atmospheric technology, in support of joint warfare mission area capabilities.

The House bill would authorize an additional \$5.0 million to complete engineering, integration and test of the Polar Ozone Aerosol Monitor (POAM) III payload on the SPOT 4 spacecraft, in anticipation of system launch in 1997.

The Senate amendment included no similar provision.

The conferees agree to authorize an additional \$2.5 million in PE 62435N to continue engineering, integration and test of the

POAM III payload on the SPOT 4 spacecraft. The conferees encourage the Secretary of the Navy to reprogram those funds necessary to complete the program and launch the POAM III payload on the SPOT 4 spacecraft in 1997.

Air crew protective clothing and devices

The budget request included \$1.7 million in PE 63216N for demonstration and validation of air crew protective clothing and devices.

The House bill would authorize an additional \$7.4 million to the budget request to continue development of the advanced integrated life support system and of an advanced technology escape system for air crews. The House report (H. Rept. 104-131) also directed the Navy to provide, by March 2, 1996, a report that would describe the program plan for these two programs and the coordination of each plan with programs under consideration in the Air Force and the Army.

The Senate amendment would authorize the budget request.

The Senate recedes.

The conferees direct the Secretary of the Navy to submit the report described in the House report (H. Rpt. 104-131).

Air systems and weapons advanced technology

The budget request included \$17.1 million for air systems advanced technology in PE 63217N. The request contained no specific funding for the maritime avionics subsystems and technology (MAST) program. MAST is a fiscal year 1995 "new start" that focuses on the development of scaleable, open, fault-tolerant, and common avionics architectures.

The House bill would authorize an additional \$35.0 million for the advanced anti-radiation guided missile (AARGM). The House report (H. Rept. 104-131) encouraged the Navy and the Air Force to pursue the technology objectives of the MAST program under respective avionics technology development programs and the Joint Advanced Strike Technology (JAST) program.

The Senate amendment would authorize an additional \$9.0 million for rapid response technologies.

The conferees agree to authorize an additional \$35.0 million in PE 63217N for AARGM and \$9.0 million for rapid response technologies for the specific purposes detailed in the respective House and Senate reports (H. Rept. 104-131; S. Rept. 104-112). The conferees also agree to authorize an additional \$10.0 million for continuation of the MAST program in fiscal year 1996, and recommend that the Secretary of the Navy consider requirements for continuation of the MAST program in the Navy's fiscal year 1997 budget request.

Mobile off-shore base (MOBS)

The budget request included \$14.7 million in PE 63238N to begin using ARPA developed technology for a mobile offshore base (MOB) and to initiate sub-scale tests of a complete system for the purpose of evaluating risks associated with full scale construction.

The House bill would authorize the budget request. The House report (H. Rept. 104-131), citing the potential cost of the MOBS system, noted that the Department of Defense had failed to comply with guidance provided in the Statement of Managers (H. Rept. 103-701) accompanying the National Defense Authorization Act for Fiscal Year 1995 (Public Law 103-337). The House report directed that any fiscal year 1996 funds authorized and appropriated for MOBS or for the Landing Ship Quay/Causeway not be obligated until the Department provides the reports and certification previously directed by Congress.

The Senate amendment would authorize the budget request.

The House recedes from its restriction on the obligation of fiscal year 1996 funds for

the MOBS project. The conferees note, however, the point made in the House report (H. Rept. 104-131) about the large potential cost of the MOBS program if carried to completion. The conferees further note that, in accordance with section 2430, title 10, United States Code, MOBS qualifies as an Acquisition Category I major defense acquisition program. Therefore, it is subject to the review and approval procedures for major defense acquisition programs established in Department of Defense instructions, regulations, and procedures. Under these review and approval procedures, a Milestone 0 (concept exploration and definition) review of the MOBS project is required by the Defense Acquisition Board (DAB). The conferees direct the Secretary of Defense to report to the congressional defense committees, by March 31, 1996, the plan and schedule for incorporating MOBS into the DAB process and accomplishing a Milestone 0 review.

Medical development

The conferees agreed to authorize an additional \$1.0 million (PE 63706N) for acceleration of blood storage development and an additional \$3.0 million (PE 63706N) for the Naval Biodynamics Laboratory (NBDL) for infrastructure transfer activities.

Sensor integration and decision support systems

The budget request contained \$17.8 million in PE 63707N for advanced development of manpower, personnel, and training technology, including \$1.1 million for air human factors engineering.

The House bill would authorize an additional \$1.5 million in PE 63707N for development and evaluation of intelligent, multi-source, multi-platform sensor integration and cockpit decision support systems.

The Senate amendment would authorize the budget request.

The House recedes.

Navy advanced technology demonstration

The budget request included \$96.8 million in PE 63792N for advanced development and demonstration of high payoff, emerging technologies that could significantly improve Navy warfighting capabilities.

Both the House bill and the Senate amendment would authorize the budget request.

The conferees agree that the program for advanced technology demonstration of low cost, highly accurate guidance and control for improved naval surface fire support from surface 5" guns shall be fully funded at the level established in the budget request.

Remote controlled minehunting vehicle

The budget request included \$7.6 million in PE 63502N for development and demonstration of improvements in minehunting sonar and remotely controlled minehunting systems.

The House bill would authorize an additional \$1.65 million in PE 63502N to accelerate the remote minehunting operational prototype (RMOP) development program and provide an interim operational capability to the fleet.

The Senate amendment would authorize an additional \$7.5 million in PE 63502N to accelerate development of RMOP.

The Senate recedes. The conferees agree that the mine detection and location capability demonstrated by the RMOP vehicle during a joint amphibious exercise in March-April 1995 suggests that it has the potential to fill a gap in the Navy's mine countermeasures operational capabilities. Therefore, the conferees conclude that the RMOP program should be accelerated to provide a contingency capability for fleet use. The conferees encourage the Secretary of the Navy to include additional funds for this purpose in the fiscal year 1997 budget request.

Non-acoustic antisubmarine warfare program

The House bill would authorize \$23.2 million to reestablish a separate Navy non-

acoustic antisubmarine warfare (NAASW) program in PE 63528N that would be on par with the Department of Defense's advanced sensor applications program.

The Senate amendment contained no funding for a Navy specific research and development program. However, the Senate amendment did provide \$10.0 million of additional funding in PE 63714D, the Department of Defense's advanced sensor applications program, to continue development for a NAASW program, ATD-111, that is being executed by the Navy.

The conferees authorize an increase of \$10.0 million in PE 63528N for the ATD-111 NAASW program. The funding is authorized to: (1) test system upgrades; (2) correct system defects identified during field tests; (3) bring the test systems to a common configuration; and (4) evaluate carriage on alternate airborne platforms.

The conferees recommend that the Navy conduct a comparative evaluation of the ATD-111 laser radar (LIDAR) system with other approaches. Comparative testing of competing non-acoustic approaches to anti-submarine warfare and other applications should provide a basis for establishing a firm requirement for follow-on systems.

The conferees also agree that there is a need for two viable, independent, but coordinated and complementary NAASW programs, one in the Navy and one in the Office of the Secretary of Defense. To reestablish the Navy's independent NAASW program, the conferees encourage the Secretary of the Navy to provide funding for it in the fiscal year 1997 budget request. Further guidance with respect to the NAASW program is contained in the classified annex.

Advanced submarine technology development

The budget request included \$18.4 million in PE 62121N for exploratory development of submarine systems technology and \$30.9 million in PE 63561N for advanced submarine systems development.

The House bill would authorize an increase of \$10.0 million in PE 62121N. Of this amount, \$7.0 million is to continue the transfer of technology to the Navy for active control of machinery platforms demonstrated in the Advanced Research Projects Agency's (ARPA's) Project M. The House bill would also authorize an additional \$13.1 million in PE 63561N. The House report (H. Rept. 104-131) expressed concern over the overall reduction in submarine research and development funding, reflecting in the budget request, and the belief that this level of funding would be inadequate to support the type of long-term research necessary to ensure the availability of advanced technologies that could maintain the superior technological capability of the U.S. submarine force. The House report directed the Secretary of Defense to develop a plan for long-term submarine research and development aimed at ensuring U.S. technological superiority and to report this plan to the congressional defense committees with the submission of the fiscal year 1997 budget request.

The Senate amendment would approve the budget request.

The conferees agree to an increase of \$10.0 million in PE 62121N. This increase would not include any reservations for ARPA's Project M. The conferees would authorize the transition effort associated with Project M in PE 63569E. The conferees also agree to an increase of \$20.0 million in PE 63561N. The conferees would also adopt a provision, discussed in greater detail in the procurement section of the conference report, that would direct the Secretary of the Defense to develop a plan for long-term submarine research and development aimed at ensuring U.S. technological superiority and to report

this plan to the congressional defense committees no later than March 15, 1996.

Intercooled recuperated gas turbine engine

The budget request included \$25.6 million in PE 63508N, a technology base program element, for continued development of the intercooled recuperated (ICR) gas turbine.

The House bill expressed concern that the budget request had transferred the ICR gas turbine engine from the Advanced Surface Machinery (ASM) Program (PE 63573N), where it had been previously budgeted, because of the possibility of disruption in the relationship between the ICR program and other elements of the ASM program. In order to restore ASM program integrity, the House bill would direct the transfer of \$25.6 million from PE 63508N to PE 63573N. Additionally, the House bill would increase funding for the ICR engine by \$21.5 million to support ICR engine tests at the Navy's land-based test site and, based on elements of the Navy's revised ICR development plan, direct the Navy to proceed with a second 500 hour engine test and other associated testing at the site.

The Senate amendment also directed transfer of \$25.6 million from PE 63508N to PE 63573N, but did not increase funding for the ICR engine.

The conferees agree to a funding level of \$82.9 million in PE 63573N. The conferees direct that, of the total amount authorized for PE 63573N, \$41.0 million is authorized for the ICR program.

Cooperative engagement capability

The budget request included \$180.0 million in PE 63755N for development of the cooperative engagement capability (CEC).

The House bill would authorize the requested amount, but would direct that no more than \$102.0 million be obligated until the Secretary of Defense notifies the congressional defense committees that the test and evaluation master plan for the CEC program has been approved by the Director, Operational Test and Evaluation.

The Senate amendment would add \$22.5 million to continue accelerated development of the airborne component of CEC and an additional \$20.0 million to accelerate joint Army-Navy and Air Force-Navy exploitation of CEC for cruise missile defense and theater missile defense.

The conferees agree to an additional \$42.5 million for CEC for the purposes described in Senate amendment. The House recedes from its funding limitation. The conferees note the concerns expressed in the House report (H. Rept. 104-131) regarding developmental testing and independent operational testing required to insure that the CEC is operationally effective and suitable when deployed to the fleet. They direct the Secretary of the Navy to submit to the congressional defense committees, by March 31, 1996, a report on the status of plans for developmental and independent operational testing of the CEC.

Naval surface fire support

The Navy's budget request included \$12.0 million in PE 63795N to develop the gun weapon system technology needed by the Navy to resolve major deficiencies in its ability to provide naval surface fire support (NSFS) to amphibious operations.

The House report (H. Rept. 104-131) noted that the budget request was sharply reduced during the budget formulation process. It further observed that the future years defense plan for gun system technology had been left under funded by over \$160 million and did not include an adequate plan to meet long-term requirements for advanced NSFS weapons systems. To address these concerns the House bill would increase funding in PE 63795N by \$25.0 million to:

(1) accelerate the development of a long range guided projectile that would incorporate advanced low cost global positioning

system/inertial navigation system (GPS/INS) guidance;

(2) improve the existing MK-45 5-inch naval gun; and

(3) permit the Navy to place increased emphasis on satisfying long-term requirements for advanced gun systems in addition to its near-term focus on modifications to the MK-45 gun.

The Senate amendment would add \$19.2 million to PE 63795N. The Senate's evaluation noted in the Senate report (S. Rept. 104-112) of the Navy's NSFS program, as reflected in the budget request, yielded conclusions similar to those of the House.

The conferees note that in May 1995 the Secretary of the Navy, based on a recently completed cost and operational effectiveness analysis (COEA), reported the following conclusions to Congress regarding NSFS:

(1) a 155 millimeter/60-caliber naval gun, employing precision guided munitions, is the most cost effective NSFS solution; and

(2) a combination of guns, missiles, and tactical aviation is needed to fully meet NSFS requirements.

The Secretary also reported that, as a result of the NSFS COEA, the Navy's NSFS program had been structured to:

(1) proceed with the long-term development of a 155 millimeter gun;

(2) develop a gun-launched precision guided munition; and

(3) modify the Navy's existing MK-45, 5-inch gun to deal with long-term and near-term challenges.

However, as reflected in the budget request, affordability constraints and a desire to field an enhanced NSFS capability prior to Fiscal Year 2001 have moved the Navy to embrace a near-term program reflecting the following priorities:

(1) develop a global positioning system/inertial navigation system 5-inch guided projectile;

(2) improve the existing MK-45 5-inch gun; and

(3) demonstrate the NSFS capabilities of Army Tactical Missile System (ATACMS), Sea Standoff Land Attack Missile (SLAM), and STANDARD Missiles.

To confirm the cost effectiveness of this near-term approach, which was not thoroughly evaluated in the NSFS COEA, the Navy has directed the Center for Naval Analysis to perform supplemental analysis to evaluate its cost effectiveness. The need for this supplemental analysis was reinforced by the General Accounting Office, which strongly recommended in May 1995 that the Navy revalidate its NSFS requirements and conduct a comprehensive supplemental analysis to the COEA that would include all available gun and missile alternatives.

The conferees agree to authorize \$34.0 million, an increase of \$22.0 million, in PE 63795N. Over the past several years, the conferees have repeatedly stressed the issue of NSFS, but have found the Navy's response to be highly variable as new programs or approaches have succeeded one another from year to year. Because of a strong need and the Navy's apparent commitment to pursue the program to completion, the conferees are willing to provide initial support, in fiscal year 1996, to the Navy's effort to upgrade the capability of its 5-inch guns and projectiles. The conferees take this action based on the Navy leadership's assurances that the Navy will follow through with consistent, stable, and adequate future years funding.

The conferees affirm their conclusion that the Navy needs to place increased emphasis on pursuing a long-term program to satisfy NSFS mission requirements. The conferees direct that the Secretary of the Navy include a report on the plans for such a program in the fiscal year 1997 budget submission. The

conferees also affirm the need for an updated COEA that considers all available gun and missile alternatives, including extended range multiple launch rockets and existing and improved 5-inch guns, to support future acquisition milestone decisions related to the Navy's near-term and long-term programs.

AH-1W integrated weapons system upgrade

The budget request included \$14.9 million in PE 64212N for engineering and manufacturing development of upgrades to the AH-1W Cobra attack helicopter for the Marine Corps.

The House bill recommended a reduction of \$11.6 million to the budget request, based on the understanding that the Marine Corps had decided to suspend development of the integrated weapon systems (IWS) for the AH-1W.

The Senate amendment would authorize the budget request.

The House recedes. The conferees understand that the Department of the Navy has suspended the IWS upgrade, based on identification of other urgent requirements for modification of Marine Corps helicopters. The upgrade program would now focus on the adaptation of both the AH-1W attack helicopter and the UH-1N utility helicopter, and their respective power trains, to a 4-blade rotor system which will increase the operational safety power margin and useful mission payload of both helicopters. The IWS upgrade for the AH-1W will be deferred until later in the program. The conferees further understand, based upon the Department's analysis, that the revised program will provide growth potential to bridge the gap until the joint replacement aircraft would become available around the year 2020, and is reportedly more cost effective than the adoption of other, more modern attack and utility helicopters that have already been fielded or are under development.

The conferees note that the Department plans a defense acquisition milestone II decision to proceed with engineering and manufacturing development in late fiscal year 1996 and also plans to use the fiscal year 1996 funds made available for the program for pre-milestone IV/II engineering studies. The conferees are aware of a Department of the Navy experience with harmonic coupling problems encountered during a previous major helicopter power train upgrade that contributed to a number of aircraft mishaps. Accordingly, this issue must be addressed in detail during pre-milestone engineering studies and in the milestone II decision process, and the absence of the problem demonstrated prior to milestone III. The Secretary of the Navy is directed to report the results of these engineering studies and the milestone II decision with the submission of the fiscal year 1998 budget request.

AV-8B Harrier weapons system improvements

The budget request included \$11.3 million in PE 64214N for integration and testing of weapons and aircraft improvements for the AV-8B Harrier aircraft.

The House bill would authorize an increase of \$15.6 million to the budget request to support the United States' share of the AV-8B production memorandum of understanding between the United States, Spain, and Italy, and for concurrent integration of the AIM-120 missile and 1760 data bus during remanufacture of the day-only AV-8As to the AV-8B radar configuration.

The Senate amendment would authorize the budget request.

The Senate recedes. The conferees agree to authorize the increase of \$15.6 million to the budget request with the understanding that the Department of the Navy would include in the fiscal year 1997 budget request the balance of the \$11.7 million required by the memorandum of understanding.

S-3B Project Gray Wolf

The budget request included \$12.9 million in PE 64217N for continued development of weapon system improvements for the S-3 aircraft.

The House bill would authorize an additional \$15.0 million for continued evaluation and potential establishment of an advanced concept technology demonstration of "Project Gray Wolf", a fleet proof of concept demonstration of the ability of an S-3B aircraft equipped with a multi-mode synthetic aperture radar designed to provide real time stand-off surveillance, targeting, and strike support for littoral operations.

The Senate amendment would authorize an additional \$13.2 million for the same purpose.

The conferees agree to authorize the requested amount.

The conferees agree that "Project Gray Wolf" demonstrates potential for providing the Department of the Navy with a versatile carrier-based capability to provide real time, stand-off surveillance, targeting, and strike support. The conferees encourage the Secretary of the Navy to consider a reprogramming request to support this program, should any funds become available during fiscal year 1996. The conferees further encourage the Secretary to include funds for the program in his fiscal year 1997 budget request.

P-3 maritime patrol aircraft sensor integration

The budget request included \$1.9 million in PE 64221N for the P-3 maritime patrol aircraft (MPA) modernization program.

The House bill would authorize an increase of \$15.0 million to the budget request. That increase would include \$12.0 million to restore the schedule for integration of the improved extended echo ranging (IEER) and the anti-surface warfare improvement program (AIP) capabilities in the P-3, and \$3.0 million for upgrade of P-3 stores management, to permit integration of advanced weapons systems. In relation to the fiscal year 1995 budget projections for fiscal year 1996, the House report (H. Rept. 104-131) noted that sharp funding reductions in the P-3 modernization program would result in an overall program cost increase and multi-year delays in fielding capability improvements needed to offset decreases in MPA force structure. The House report also expressed the House's expectation that the Navy's future budget requests would include the increased funding necessary to complete the IEER and AIP capabilities integration in the P-3, the P-3 stores management upgrades, and procurement of sufficient quantities of the AIP and update III kits to appropriately outfit the active and reserve MPA force.

The Senate amendment would authorize the budget request.

The Senate recedes.

Air crew systems development

The budget request included \$9.8 million in PE 64264N for the development of aviation life support systems for air crews.

The House bill would authorize an increase of \$7.9 million to transition the Navy's Day/Night/All Weather Helmet Mounted Display to operational evaluation in F/A-18 and AV-8B aircraft, to upgrade current escape systems, and to develop crashworthy troop seats in the H-1, H-3 and H-46 helicopters.

The Senate amendment would authorize the budget request.

The Senate recedes.

AEGIS combat systems engineering

The budget request included \$105.9 million in PE 64307N, including \$90.0 million for continued development of improvements in the AEGIS combat system.

The House bill would authorize \$89.9 million, a reduction of \$15.8 million from the requested amount. In support of the funding

reduction, the House report (H. Rept. 104-131) cited the deferred release of fiscal year 1995 funds, which led to a corresponding, but unnecessary, increase in the Navy's budget request. The House report (H. Rept. 104-131) also expressed concern about the Navy's revised strategy for development of the AEGIS baseline 6.

The Senate amendment would authorize the requested amount.

The conferees agree to a reduction of \$11.0 million in PE 64307N for AEGIS combat systems engineering. The conferees note that the Navy included the \$11.0 million in its budget request in anticipation of losing \$15.8 million of fiscal year 1995 funds through the omnibus reprogramming process. The use of these fiscal year 1995 funds as a reprogramming source has been specifically denied by Congress. The conferees direct the Office of the Secretary of Defense to return these funds to the Navy without delay to permit orderly execution of the AEGIS program. Further, the navy should review its program for development of the AEGIS baseline 6 with a view to minimizing concurrency.

Enhanced modular signal processor

The budget request included \$8.3 million in PE 64507N for development and risk mitigation testing of the AN/UYS-2 enhanced modular signal processor (EMSP) and software development, integration, testing, and critical engineering design support in the airborne low-frequency sonar (ALFS), surveillance towed array sensor system (SURTASS), AN/SQQ-89 surface combat system, and AN/BSY-2 submarine combat system.

Both the House bill and the Senate amendment would authorize the budget request.

The conferees understand that the Navy is considering development of a commercial-off-the-shelf (COTS) variant of the EMSP, as discussed in the House report (H. Rept. 104-131). The conferees authorize an increase of \$6.5 million in PE 64507N for development of this COTS variant. The conferees encourage the Navy to include additional funds that may be required to complete the EMSP COTS development in its fiscal year 1997 budget request.

Submarine combat system

The budget request included \$42.3 million in PE 64524N for development of the AN/BSY-2 submarine combat system.

The House bill would reduce the authorization by \$6.2 million, the amount requested for delivery of the AN/BSY-2 system for the SSN-23.

The Senate amendment would authorize the budget request.

The House recedes.

Submarine tactical warfare system

The budget request included \$38.5 million in PE 64562N for continued development of improvements in SSN combat control systems.

The House bill recommended a reduction of \$18.0 million to the budget request.

The Senate amendment would authorize the requested amount.

The House recedes.

Advanced tactical air command central

The budget request included \$8.4 million in PE 604719M to continue development of the advanced tactical air command central (ATACC) for the Marine Corps.

The House bill would reduce the PE by \$5.0 million and direct that the details of the operational requirement and a revised program plan be provided with the fiscal year 1997 budget request. The house report (H. Rept. 104-131) expressed concerns regarding the marked growth in program costs for fiscal year 1996 and succeeding years, changes

in the acquisition strategy, and significant revisions in the program schedule. These concerns raise questions regarding how well the operational requirement is defined and whether the system should continue in engineering and manufacturing systems development, or whether a demonstration/validation program would be more appropriate.

The Senate amendment would authorize the requested amount.

The House recedes.

The conferees agree that the concerns expressed by the House should be addressed following submission of the fiscal year 1997 defense budget request.

Ship self-defense system

SUMMARY

The budget request included \$166.0 million in PE 64755N for the ship self-defense program.

The House bill would approve the budget request. The House report (H. Rept. 104-131) expressed concern that the Navy had failed to include funding in its budget request to continue development of either the infrared search and track (IRST) system or NULKA, an electronic warfare countermeasures system, despite the apparently high priority that the Navy has placed on these systems in the past. The House report argued that such funding lapses point to the absence of clearly defined program baselines in the ship self-defense programs.

The Senate amendment would authorize \$184.5 million in PE 64755N, an increase of \$18.5 million. It would authorize an additional \$9.5 million for IRST and \$9.0 million for NULKA. The Senate report (S. Rept. 104-112) also discussed evaluation of existing self-defense systems, such as the BARAK 1 missile system, for installation on active and new construction Navy ships.

The conferees agree to authorize \$183.5 million for the ship self-defense program in PE 64755N. Funding increases and areas of emphasis are discussed in the following paragraphs. The conferees also agree that the year-to-year volatility of the Navy's budget requests for ship self-defense programs appear to contradict the Navy's oft stated emphasis on littoral warfare. Therefore, the conferees direct the Secretary of the Navy to provide to the congressional defense committees, as a part of the annual update of the "Ship Anti-Air Warfare (AAW) Report", an assessment of progress in establishing program baselines for the ship self-defense program and the degree to which these baselines are being met.

IRST

The budget requested reduced funding for and restructured the infrared search and track (IRST) program for affordability reasons. The conferees believe that the IRST system has the potential to play a very important role in defending naval ships against sea skimming antiship missiles. A recently completed cost and operational effectiveness analysis (COEA) supports this conclusion. The conferees agree that the Navy should emphasize early integration of the IRST system with both Aegis and non-Aegis ships, and place priority on early completion of its development. Therefore, the conferees authorize an increase of \$9.5 million in PE 64755N to accelerate plans for combat system integration and design of the IRST system.

NULKA

NULKA is a joint United States/Australian project to develop an anti-ship missile decoy system. Increased funding in fiscal year 1996 would allow the Navy to integrate NULKA with the ship self-defense system (SSDS), for installation on amphibious ships and other self-defense ships, to conduct testing of the integrated system, and to commence devel-

opment of improvements to the payload needed to counter improvements in anti-ship missile technology. The conferees strongly support these objectives and authorize an increase of \$8.0 million in PE 64755N.

BARAK 1

The Senate report expressed concern about the need to protect Navy ships from the proliferation of maneuvering, sea-skimming, low observable, anti-ship cruise missiles. It also recognizes the fact that the Navy's evaluation of existing systems, such as the BARAK 1 missile, as candidates for the LPD-17 class's self-defense suite, could produce the most cost-effective solution to this threat. Development costs could be avoided through such an approach.

While addressing ship self-defense in some detail, the House report did not discuss this aspect of the requirement.

The conferees agree that the incorporation of weapons systems that are already in production, such as BARAK 1, into the combat systems of active or new construction ships could be a cost effective means to deal with a rapidly proliferating and evolving cruise missile threat. The conferees desire to be kept informed on the progress and results of the LPD-17 cost and operational effectiveness analysis (COEA). Furthermore, the conferees direct the Navy to present, by February 1996, a plan that could lead to testing of the BARAK 1 system in the United States during fiscal year 1996, should the LPD-17 COEA demonstrate that self-defense systems such as BARAK 1 would be cost effective.

Because of the advantage to the fleet of an early deployment of a robust ship self-defense system, the committee directs the Navy to also examine and report on BARAK 1 applicability to other ship classes. The results of this analysis should be provided to the congressional defense committees by February 1996.

Fixed distributed system—deployable

The budget request included \$93.5 million in PE 64784N for the fixed distribution surveillance system (FDS), but included no funding for the deployable (FDS-D) prototype.

The House bill would add \$10.0 million to the budget request to refurbish the FDS-D prototype and improve its capability to provide an interim deployable undersea surveillance, until the Advanced Deployable System becomes available.

The Senate amendment would authorize the budget request.

The conferees authorize \$103.5 million in PE 64784N, of which \$10.0 million would be used to refurbish the FDS-D prototype and improve its surveillance capability. Further guidance is contained in the classified annex. *SSBN security and survivability program*

The budget request included \$25.1 million in PE 12224N for the SSBN security and survivability program.

The House bill would provide an increase of \$9.5 million to the budget request. The House bill would also direct the Secretary of the Navy to provide to the congressional defense committees, within 60 days of enactment, an assessment of the potential threat to the U.S. SSBN force an analysis of the SSBN security program needed to counter that threat.

The Senate amendment would authorize the budget request.

The conferees agree to authorize an additional \$5.5 million in PE 12224N for the SSBN security and survivability program. The conferees agree with the House direction to the Secretary of Defense regarding the SSBN security program, contained in the House report (H. Rept. 104-131). Further guidance regarding the program is provided in the classified annex.

Cryptologic system trainer

The budget request included \$7.0 million in PE 24571N to continue development and evaluation of the Navy's surface tactical team trainer.

The House bill would authorize an additional \$3.0 million for:

(1) integration and evaluation of the cryptologic systems trainer in the battle force tactical training system; and

(2) the development of related information warfare/command and control warfare shipboard training systems.

The Senate amendment would authorize the budget request.

The conferees authorize \$10.0 million in PE 24571N. Of this amount, \$3.0 million is for the

purposes discussed in the House report (H. Rept. 104-131).

Optoelectronics

The budget request did not include funding for optoelectronics manufacturing.

The House bill would provide \$10.0 million to initiate partnerships with industry, government laboratories and other research organizations to allow the development of manufacturing technologies that would support optoelectronics devices and components.

The Senate amendment contained no similar provision.

The conferees agree to authorize an additional \$10.0 million for this program in PE 78011N. The conferees also agree to authorize

an additional \$2.0 million for advanced bulk manufacturing of mercury cadmium telluride (MCT) for low cost sensors, also in PE 78011N.

Overview

The budget request for fiscal year 1996 contained an authorization of \$12,598.4 million for Air Force, Research and Development in the Department of Defense. The House bill would authorize \$13,184.1 million. The Senate amendment would authorize \$13,087.4 million. The conferees recommended an authorization of \$12,914.9 million. Defense research sciences

The budget request included \$239.893 million for defense research sciences in PE 61102F.

The House bill would authorize an additional \$5.0 million for adaptive optics research.

The Senate amendment would reduce the budget request by \$9.0 million and authorize \$5.0 million for adaptive optics research.

The conferees agree, that of the \$249.5 million authorized in this program element, \$5.0 million shall be authorized for adaptive optics research.

Robotics corrosion inspection system

The House bill would authorize \$8.0 million in PE 62102F to conduct a competitive program to demonstrate the feasibility of non-contact robotic corrosion inspection for detection of hidden corrosion and metal fatigue.

The Senate amendment did not include such authorization.

The conferees strongly encourage the Air Force to consider environmentally benign technologies that demonstrate the potential to provide a 25 percent savings in cargo and fighter aircraft inspection and repair costs through the use of non-contact robotic corrosion inspection.

Firefighting clothing

The conferees encourage the Department of Defense to continue to make greater use of commercial off-the-shelf technologies that meet military requirements without extensive development programs. The conferees are aware of recent commercial developments in thermal absorbing materials that would have the potential to significantly increase personnel protection for fighting aircraft, ship-board, and chemical fires. Accordingly, the conferees authorize an additional \$1.25 million in PE 62201F for the development of a firefighting suit that would incorporate these technologies.

Aerospace propulsion

The budget request included \$3.7 million in PE 62203F for the high thermal stability and the endothermic hydrocarbon fuels project 3048.

The House bill and Senate amendment would authorize an additional \$3.0 million for the acceleration of this project.

The conferees agree that of the \$75.0 million authorized for this program element that \$6.7 million be authorized for project 3048.

High frequency active auroral research program (HAARP)

The conferees agree to a \$5.0 million increase in PE 62601F for the high frequency active auroral research program (HAARP).

Rocket propulsion technology

The House bill would authorize an additional \$13.0 million for rocket propulsion technology programs in PE 62601F, PE 63302F, and PE 62111N.

The Senate amendment contained no similar provision.

The conferees agree to provide an additional \$13.0 million, as specified in the House report (H. Rept. 104-131).

Computer security

The budget request included \$98.5 million for Command, Control, and Communications in PE 62702F.

The House bill would authorize an additional \$3.0 million to evaluate voice recognition computer security systems.

The Senate amendment contained no similar authorization.

The conferees direct that, of the \$96.5 million authorized, \$3.0 million be authorized for evaluation of voice recognition computer

security systems, as specified in the House report (H. Rept. 104-131).

Aircraft ejection seats

The budget request included \$19.0 million in PE 63231F for crew systems and personnel protection technology.

The House bill would authorize an additional \$3.0 million to test existing Navy, Marine Corps, and Air Force front-line trainer and tactical aircraft ejection seats. Ejection seat tests would be conducted to verify predicted performance and to identify existing problems and the required corrective action.

The Senate amendment had no similar provision.

The conferees agree to authorize an additional \$3.0 million in PE 63231F for the purposes specified in the House report (H. Rept. 104-131).

Micro-satellite development program

The budget request included \$32.6 million in PE 63401F for Advanced Spacecraft Technology.

The Senate amendment would authorize an additional \$20.0 million for a micro-satellite development program.

The House bill would authorize the budget request.

The House recedes.

The Air Force Phillips Laboratory, in conjunction with the Air Force Space Command's Space Warfare Center, has initiated a small satellite program to develop and demonstrate a variety of miniaturized space technologies. The micro-satellite program builds upon the highly successful Clementine satellite program. The conferees strongly support this effort and direct that it be placed under the control of the Space Warfare Center and be executed by the Clementine Team (Phillips Laboratory, Naval Research Laboratory, and Lawrence Livermore National Laboratory).

Intercontinental ballistic missile (ICBM) research and development and associated issues

ICBM DEMONSTRATION/VALIDATION

The budget request included \$20.3 million in PE 63851F for six Minuteman-related projects.

The House bill would authorize an additional \$14.5 million to complete acquisition and requirement documentation efforts and to conduct missile guidance technology experiments. The House report (H. Rept. 104-131) expressed concern that the budget request failed to include pre-milestone 0 and phase 0 funding for the command signal decoder, the modified miniature receive terminal for launch control centers, the safety enhanced reentry vehicle, and inertial measurement modifications.

The Senate amendment would authorize an additional \$4.3 million to bolster the Air Force reentry vehicle applications project. The Senate report (S. Rept. 104-112) expressed concern that the reentry vehicle nose tip requirements were not adequately funded.

The conferees agree to authorize the budget request. The conferees also reiterate the concerns expressed in the House and Senate reports. The conferees understand that the Air Force is considering options to address these concerns from within their existing fiscal year 1996 budget, in particular the documentation issues identified in the House report. The conferees strongly urge the Air Force to fulfill these requirements.

ICBM ENGINEERING AND MANUFACTURING DEVELOPMENT

The budget request contained \$192.7 million in PE 64851F to fund the Minuteman guidance and propulsion replacement programs.

The House bill would authorize an additional \$8.0 million to fund the initial integration design and testing of the capability to integrate the Mk21 warhead on the new Minuteman guidance set. The House report (H. Rept. 104-131) endorsed using the Mk21, the safest warhead in the inventory, on the Minuteman, if and when it becomes available as a result of arms control treaties. The House report expressed concern that the current guidance replacement program fails to fund the design and testing necessary to ensure the Mk21 capability prior to initiation of the guidance set production.

The Senate amendment would authorize the budget request.

The conferees agree to authorize the budget request. The conferees, however, reiterate the concerns expressed in the House report (H. Rept. 104-131), and support the recommendations made therein. The conferees are concerned that the Department of Defense and the Air Force have failed to take the necessary action to ensure that the safest nuclear warheads are compatible with the new Minuteman guidance sets. Therefore, the conferees direct that, of the funds authorized for fiscal year 1996 in PE 64851F, up to \$4.0 million shall be available to initiate efforts to ensure that the new Minuteman guidance sets are capable of accommodating the Mk21 warhead. The conferees further direct the Secretary of Defense to ensure that the funds necessary to continue this effort are included in the fiscal year 1997 budget request.

REENTRY VEHICLE MATERIALS

The Senate amendment would authorize \$750,000 above the budget request in PE 62102F for the Thermal Protection Materials Reentry Vehicle project to purchase, test, and evaluate three nose tip billets and related technologies.

The House bill would not authorize additional funds for reentry vehicle materials.

The Senate recedes. Nevertheless, the conferees reiterate the concerns expressed in the Senate report (S. Rept. 104-112) regarding the adequacy of the reentry vehicle applications program, and, in particular, the reentry vehicle materials program. Therefore, the conferees direct that, of the funds available in PE 62102F, up to \$750,000 shall be available for the Thermal Protection Materials Reentry Vehicle project to purchase, test, and evaluate three ICBM reentry vehicle nose tip billets and related thermal technologies.

BALLISTIC MISSILE TECHNOLOGY

The budget request contained \$3.1 million in PE 63311F to conduct guidance and range safety technology experiments.

The House bill would authorize an additional \$5.7 million for Minuteman class range tracking and safety equipment based on Global Positioning System (GPS) equipment developments.

The Senate amendment would authorize an additional \$5.0 million for suborbital flight testing conducted at White Sands Missile Range for ballistic missile guidance, range tracking, and safety equipment, based on existing GPS equipment.

The conferees agree to authorize \$5.7 million above the budget request to enhance ballistic missile technology experiments and to proceed with a follow-on to the successful Missile Technology Demonstration Flight 1 (MTD-1). The conferees commend the participants in this joint effort and encourage the Air Force, the Ballistic Missile Defense Organization, the Defense Nuclear Agency, and the Phillips Laboratory to continue to pursue such joint efforts. Prior to completing plans for a MTD follow-on, the conferees direct the Air Force to consult with the Senate Committee on Armed Services and the House Committee on National Security on

the issues and options associated with the following: (1) the technologies to be tested; (2) the type of booster configuration to be employed; and (3) the test range to be used.

PEACEKEEPER CONTINGENCY PLANNING

The conferees direct the Secretary of the Air Force to submit a report to the congressional defense committees, by March 1, 1996, that outlines the Air Force's current plans for retiring Peacekeeper, and maintaining the system in the interim. The report should also address the additional actions and funding that would be required to maintain the option of retaining up to 50 Peacekeeper ICBMs in an operational status beyond 2003. The report should include a timetable that outlines when such actions and funding would be needed.

Weapon impact assessment system

The conferees are aware of innovative technologies that may significantly resolve the battlefield damage assessment problems related to tactical aviation. The conferees support the priorities established in the fiscal year 1996 Department of Defense Small Business Innovative Research Program solicitation (96.1) to expeditiously pursue weapon impact assessment technology. Accordingly, the conferees authorize \$950,000, distributed equally between PE 64618N and PE 64618F, for a joint Navy-Air Force flight demonstration of a weapon impact assessment system that uses a video sensor-transmitter with precision guided munitions.

Stand-off land attack missiles

The budget request contained \$40.5 million in PE 64603N for continued development of the stand-off land attack missile-enhanced response (SLAM-ER) as an interim replacement for the canceled tri-service stand-off attack missile (TSSAM) for the Navy.

The House bill would authorize the budget request for SLAM-ER. However, the House report (H. Rept. 104-131) would prohibit the Navy from obligating more than \$10.0 million for the program without specific approval by the congressional defense committees.

The House bill would also provide an additional \$37.5 million in PE 64312N for the Navy and an additional \$37.5 million in PE 27160F for the Air Force to establish a joint program for accelerated development and evaluation of candidate joint air-to-surface stand-off missile (JASSM) systems as a near-term replacement for TSSAM. The House report would direct the Secretary of Defense to establish immediately such a program and would further direct the Secretary to report to the congressional defense committees within 60 days of the enactment of the Act on:

- (1) the Department's plan to address near-term Navy and Air Force requirements for an interim TSSAM replacement;
- (2) the Department's plans to satisfy these near-term requirements; and
- (3) the long-term plan for development of a TSSAM replacement that will satisfy the requirements of both services.

The Senate amendment would authorize the budget request in PE 64603N for continued development of SLAM-ER, and would provide an additional \$50.0 million for the Air Force in PE 27160F to initiate a JASSM program, with the expectation that the De-

partment of Defense would establish a joint program to meet Air Force and Navy needs for a replacement for TSSAM.

The House recedes with an amendment. The conferees agree to:

- (1) authorize the SLAM-ER budget request;
- (2) provide \$25.0 million for JASSM in the Air Force budget; and
- (3) require the Department to report on plans for meeting near-term and long-term Air Force and Navy requirements for stand-off weapons systems.

JOINT AIR-TO-SURFACE STAND-OFF MISSILE (JASSM)

In testimony before the Congress this year, the Air Force and the Navy continued to support the requirement for a survivable, precision strike stand-off weapon. The DOD decision to cancel the TSSAM program exacerbated an already significant shortfall in this capability. The conferees stress the urgent need for the operational capability that would be provided by the TSSAM, and expect the Secretary of Defense to establish a joint program in the Air Force and the Navy for development of a TSSAM replacement, as recommended in both the House report (H. Rept. 104-131) and the Senate report (S. Rept. 104-112).

The conferees are concerned about the approach the services may pursue to fulfill the JASSM requirement. The conferees note that there are a number of competing alternatives upon which the JASSM could be based. The conferees believe that JASSM could evolve from an existing, or planned interim weapons system. The conferees believe that, if the Department decides that a new weapon development is appropriate, the new development program should be based on technologies that have already been developed in the TSSAM program, or in other existing or planned stand-off weapons systems, including technologies relating to low and very low observability/stealth.

The conferees note that there are a number of competing alternatives upon which the JASSM could be based, and want to ensure that due consideration is given to all competing approaches. Therefore, the conferees direct the Department to consider the following in conducting the JASSM program: (1) the results of the TSSAM development program, and the potential for using technology and components derived from that program; and (2) the results of programs for development of other stand-off weapons systems, and the potential for using technologies derived from those programs. The conferees direct the Secretary of Defense to include, in his report on precision guided munitions, information on the extent to which the Department may avail itself of TSSAM-derivative components and technology, as well as, components and technologies derived from other stand-off weapons programs, in meeting the JASSM requirement.

REQUIRED REPORT

The conferees direct the Secretary of Defense to include in the report on the analysis required by the provision on precision guided munitions, the Department's plan for meeting near-term Navy and Air Force requirements for an interim TSSAM replacement

and the long-term plan for development of a TSSAM replacement that will meet the requirements of both services. The conferees expect that the Department would establish the following for JASSM weapons system at the next milestone: design-to-unit cost goals; minimum performance parameters; and interface requirements between JASSM and launch platforms.

Mobile missile launch detection and tracking

The conferees are aware of a proposal to use specialized processing techniques on synthetic aperture radar data to detect medium-range ballistic missiles shortly after launch. The conferees urge the Air Force to consider this promising concept and agree to authorize the use of up to \$1.0 million in funds made available in PE 28060F to demonstrate the feasibility of this concept.

Rivet joint technology transfer program

The Senate amendment recommended a \$28.0 million increase to the theater missile defense program element (PE 28060F) to initiate the migration of the Cobra Ball medium wave infrared acquisition technology for the Rivet Joint RC-135 tactical reconnaissance fleet.

The House bill did not contain a similar recommendation.

The Senate recedes.

The conferees encourage the Air Force to move forward with this near term, cost effective program. With the transfer of this mature technology, the Rivet Joint fleet would offer early deployment and provide a significant improvement to the Department of Defense's capabilities in long range surveillance, warning, rapid cueing for attack operations, and impact point prediction. To achieve this goal, the conferees would consider a reprogramming in fiscal year 1996. The conferees understand that funds for the completion of this technology migration are included in the Air Force future year defense plans for this program.

Information systems security

The budget request included \$11.3 million in PE 33140F for the Air Force's Information Systems Security program.

The Senate amendment would authorize an additional \$1.5 million to complete research and development of the Trusted RUBIX multi-level security database management system.

The House bill would authorize the budget request.

The House recedes.

Computer-assisted technology transfer

The conferees agree to authorize \$7.2 million in PE 78011F to continue the computer-assisted technology transfer program.

Overview

The budget request for fiscal year 1996 contained an authorization of \$8,802.9 million for Defense-Wide, Research and Development in the Department of Defense. The House bill would authorize \$9,287.1 million. The Senate amendment would authorize \$9,271.2 million. The conferees recommended an authorization of \$9,419.5 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

University research initiative

The budget request included \$236.2 million in PE 61103D.

The House bill would authorize an additional \$20.0 million above the requested amount for the continuation of the Defense Experimental Program to Stimulate Competitive Research (DEPSCoR).

The Senate amendment would apply a general reduction of \$15.0 million to the requested amount and would add \$10.0 million for the acceleration of research activities at universities affecting combat readiness. The Senate amendment would also authorize \$10.0 million within the authorized amount for the continuation of the DODDS Director's fund for Science, Mathematics, and Engineering.

The conferees agree to an authorization of \$231.2 million in PE 61103D, of which \$20.0 million shall be for the continuation of the DEPSCoR program and \$10.0 million for the continuation of the DODDS Director's fund for Science, Mathematics and Engineering. The conferees also agree to authorize an additional \$10.0 million for the Combat Readiness Research program described on page 169 of the Senate report (104-112) and direct that an institution awarded a contract, grant or agreement under the program be required to contribute at least three times the amount provided by the Federal government to execute the program.

Chemical-biological defense program

The budget request contained \$383.5 million for the Department of Defense chemical-biological defense program, including \$243.0 million for research, development, test and evaluation and \$140.5 million for procurement of chemical and biological defense non-medical and medical systems.

The House bill would authorize a \$57.1 million increase to the budget request for the following chemical-biological defense research and development programs: \$4.6 million for PE 61384BP; \$23.5 million for PE 62384BP; \$12.6 million for PE 63384BP; \$4.4 million for PE 63884BP; and \$12.0 million for PE 64384BP. The House bill would also authorize a total of an additional \$50.0 million in operations and maintenance funding for chemical defense training and chemical medical defense training in the Army, Navy, Marine Corps, and Air Force.

The Senate amendment would authorize the budget request.

The conferees agree to authorize an increase to the budget request in the following program elements: \$4.6 million for PE 61384BP; \$7.8 million for PE 62384BP; \$10.0 million for PE 63384BP; and \$1.6 million for PE 63884BP. The increased authorizations would augment and accelerate research and development in medical and non-medical chemical and biological defense. Prior to obligation or expenditure of funds authorized above the budget request, the conferees direct the Department to report on the projected use of these funds.

The conferees also agree to a \$50.0 million increase in the military services operations and maintenance accounts for chemical defense training and chemical medical defense training. The conferees direct the Department to provide a report to Congress on the use of this increased funding in the Department's chemical defense training and chemical medical defense training. Additionally, the Department is directed to notify Congress 15 days in advance of obligation or expenditure of funds, and to provide a justification for the use of such funds in connection with the procurement of chemical-biological defense equipment.

Computing systems and communications technology

The budget request included \$403.9 million for computing systems and communications technology in PE 62301E.

The House bill would reduce the budget request by \$25.0 million. The House bill would authorize an additional \$11.0 million for accelerated development of improved nuclear detection and forensic analysis capabilities.

The Senate amendment would authorize an additional \$3.0 million for software reuse activities and \$30.0 million in procurement for the global broadcast service.

The conferees agree to authorize \$396.3 million in PE 62301E, to include: \$11.0 million for nuclear monitoring and detection; \$8.0 million for global broadcast service; \$7.5 million for software reuse; and a general reduction of \$29.6 million.

Global broadcast service

The budget request contained no funds for global broadcast service (GBS).

The Senate amendment would authorize \$30.0 million in weapons procurement, Navy, for a GBS pilot program. The Senate report (S. Rept. 104-112) endorsed insertion of this technology into the military communications master plan and the Navy's proposal to use the ultra-high frequency follow-on (UFO) satellite system as a host for an interim GBS capability.

Neither the House bill nor the House report (H. Rept. 104-131) addressed the subject.

The Senate recedes on the \$30.0 million authorization in weapons procurement, Navy. The conferees, however, agree to authorize \$8.0 million for fiscal year 1996 in PE 62301E to support this effort.

The conferees endorse the Senate language regarding the insertion of DBS/GBS technology into the communications master plan. The conferees, however, do not believe that the Department of Defense (DOD) has adequately evaluated all alternatives and associated issues. The conferees support proceeding swiftly with this program, but require additional information before endorsing any particular technical approach or acquisition strategy.

The conferees are aware of the time-sensitivity surrounding the Navy's proposal to use UFO satellites 8, 9, and 10 as host platforms, and that a protracted period of study and review may preclude this option (insofar as it is dependent on use of satellite 8, which is currently scheduled to be launched no later than December 1997). The conferees are also aware that the Deputy Under Secretary of Defense for Space has tentatively endorsed the UFO approach as an interim bridge to an objective GBS system.

Nonetheless, the conferees remain concerned that no detailed analysis of options and requirements has been presented to Congress. Not wanting to prematurely endorse any particular GBS option nor preclude any promising alternative, the conferees direct the Under Secretary of Defense for Acquisition and Technology to submit a report to the congressional defense committees that addresses the following issues regarding the development and deployment of interim and objective GBS capabilities: (1) the military requirement to be satisfied; (2) the cost, schedule, technical risk, and operational effectiveness of all hosted and free-flyer options; (3) the issues involved with the use of competitive procedures or other than competitive procedures; and (4) the role of GBS capabilities in the DOD's future military satellite communications architecture and the Department's strategy for acquiring and integrating such capabilities.

The conferees encourage early involvement by the Commanders-in-Chief (CINCs) to ensure that GBS capabilities support a broad range of joint missions in the CINCs' areas of responsibility. The conferees also believe that the Under Secretary for Acquisition and Technology should conduct a broad survey of the capabilities and views of industry prior

to selecting a particular technical approach or acquisition strategy.

Once the congressional defense committees have received the report described above, the conferees would consider a reprogramming request to satisfy any outstanding fiscal year 1996 funding requirements. The conferees' approval of such a request would depend largely on the content of the report submitted, the offsets identified, and the degree to which the chosen GBS acquisition strategy is funded in the Secretary of Defense's fiscal year 1997 budget request and Future Years Defense Program.

Materials and electronics technology

The budget request included \$226.1 million for material and electronics technology.

The House bill would authorize an additional \$3.0 million for chemical vapor deposition (CVD) and \$2.0 million for chemical vapor composite (CVC) deposition. The bill would also provide an additional \$5.0 million for higher transition temperature superconducting (HTS) materials, \$7.5 million for seamless high off-chip connectivity (SHOCC) and \$10.0 million for non-woven aramide fiber packaging.

The Senate amendment would authorize an additional \$8.0 million for CVD and \$8.0 million for HTS.

The conferees agree to authorize \$242.0 million in PE 62712E, an increase of \$16.0 million. This increase provides \$4.0 million each for CVC deposition and CVD diamond material development and \$8.0 million for HTS. The HTS authorization shall include HTS wire applications and precision band pass filters and high "Q" antennae for military communication systems that operate in signal rich environments.

Counterterror technical support

The budget request included \$12.0 million for the counterterror technical support program.

The House bill would authorize the budget request.

The Senate amendment would authorize an increase of \$2.0 million to the budget request for the continued development of pulsed fast neutron analysis (PFNA) cargo inspection technology.

The House recedes.

Joint Department of Defense/Department of Energy munitions technology development

The budget request included \$16.8 million for the joint Department of Defense and Department of Energy munitions program.

The House bill would authorize \$31.8 million for the program, a \$15.0 million increase to the budget request for environmentally compliant demilitarization and disposal of unserviceable, obsolete, or non-treaty compliant munitions, rocket motors, and explosives.

The Senate amendment would authorize the budget request.

The conferees agree to a \$5.0 million increase to the budget request for joint DOD/DOE munitions technology development (PE 63225D). In addition, the conferees agree to provide \$15.0 million for explosives demilitarization technology (PE 63104D), discussed elsewhere in the report.

Experimental evaluation of major innovative technologies (EEMIT)

The budget request included \$618.0 million for Experimental Evaluation of Major Innovative Technologies (EEMIT).

The House bill would authorize an additional \$55.8 million for several programs, to include: global grid communications (\$5.0 million); safety and survivability (\$2.0 million); synthetic theater of war (\$6.8 million); cruise missile defense (\$35.0 million); and antisubmarine warfare (ASW) (\$7.0 million).

The Senate amendment would authorize an increase of \$18.0 million for several programs, to include: cruise missile defense

(\$10.0 million); thermophotovoltaics (\$5.0 million); and funding for a large millimeter wave telescope (\$3.0 million). The Senate would also authorize a general reduction of \$10.0 million to the EEMIT program element.

The conferees agree to authorize \$613.7 million in PE 63226E, the highest level of appropriation, and specifically identify the following programs for authorization: cruise missile defense (\$10.0 million); large millimeter wave telescope (\$3.0 million); safety and survivability (\$2.0 million); ASW (\$5.0 million); deep ocean relocation (\$2.5 million); and Crown Royal (\$5.0 million).

Safety and survivability

The House bill would authorize an additional \$2.0 million in PE 65864N and an additional \$2.0 million in PE 63226E for safety and survivability enhancements.

The Senate amendment contained no additional authorization for these purposes.

The conferees direct that of the funds authorized in PE 64864N and PE 63226E, \$2.0 million each shall be used for safety and survivability enhancements, as specified in the House report (H. Rept. 104-131).

Shallow water anti-submarine warfare

The budget request included \$16.5 million in PE 63226E for development and demonstration of advanced technologies for shallow water anti-submarine warfare operations.

The House bill would authorize an additional \$7.0 million to begin an assessment by ARPA and the Navy of the use of newly developed and maturing multi-static acoustic, electromagnetic and electro-optic sensor technologies integrated into existing aircraft, ship, and submarine platforms in a combined system of sensors to provide the joint amphibious operational commander an integrated picture of the littoral maritime environment.

The Senate amendment contained no similar provision.

The House recedes with an amendment. The conferees agree to authorize an additional \$5.0 million to the budget request to continue the development and demonstration of advanced technologies for shallow water anti-submarine warfare.

Synthetic theater of war

The budget request included \$79.1 million in PE 63226E for the Advanced Distributed Simulation program.

The House bill would authorize an additional \$6.8 million to maintain the program and schedule for the 1997 Synthetic Theater of War (STOW-97) advanced concept technology demonstration.

The Senate amendment would authorize the budget request.

The House recedes. The conferees are impressed by the results of the STOW-95 demonstration and the potential to meet the warfighting commanders' requirements for development and integration of improved simulation technologies for training and mission rehearsal. The conferees recognize that the STOW program could prove to be the foundation for the future Joint Simulations System for all the military services. The conferees strongly encourage the Secretary of Defense to maintain funding levels necessary to sustain the objectives and schedule of the STOW-97 advanced concept technology demonstration.

Tactical technology

The budget request included \$113.2 million for this tactical technology program.

The House bill would authorize an additional \$7.0 million for the tactical landing system project and an additional \$7.0 million for a high resolution, mobile multiple object tracking system project.

The Senate amendment would authorize an additional \$6.5 million for the tactical landing system project.

The conferees agree to authorize an additional \$6.5 million in PE 63226E for completion of the tactical landing system project and an additional \$7.0 million in PE 63226E for a high resolution, mobile multiple object tracking system.

Advanced submarine technology development

The budget request included \$7.5 million in PE 63569E for the Advanced Research Projects Agency's (ARPA's) advanced submarine technology program.

The House bill would authorize an additional \$23.0 million in PE 63569E. This increase would permit ARPA to pursue innovative technologies that could improve the capability of Navy submarines to operate in littoral regions, develop and demonstrate new concepts for structural acoustics and management of submarine signatures, and enhance the multi-mission capabilities of Navy submarines.

The Senate amendment would authorize the budget request.

The conferees agree to authorize \$30.5 million in PE 63569E, an increase of \$23.0 million. Of the \$23.0 million, \$7.0 million shall only be available to continue transfer of technology to the Navy for active control of machinery platforms demonstrated in ARPA's Project M.

Rapid acquisition of manufactured parts

The House bill would authorize an increase of \$12.0 million above the requested amount of \$21.5 million in PE 63712N for the continuation of the rapid acquisition of manufactured parts (RAMP) program.

The Senate amendment would authorize an increase of \$12.0 million above the requested amount of \$6.5 million in PE 63736D for the RAMP program.

The House recedes.

Advanced lithography program

The budget request included \$39.0 million in PE 63739E for advanced lithography programs.

The House bill would authorize an additional \$25.0 million in PE 63739E for advanced lithography programs.

The Senate amendment would authorize the requested amount.

The conferees agree to authorize \$60.0 million, an additional \$21.0 million, in PE 63739E, for advanced lithography programs.

Advanced electronics technologies

The budget request included \$420.0 million for advanced electronics technologies in PE 63739E.

The House bill would authorize an additional \$25.0 million for advanced lithography and a reduction of \$23.6 million in project MT-07.

The Senate amendment reduced the budget request by a cumulative \$50.0 million for three separate programs.

The conferees agree to a funding level of \$409.0 million, which includes an additional \$21.0 million for advanced lithography, \$7.5 million for seamless high off-chip connectivity, and full funding for project MT-08. The conferees consider the work of the Center for Advanced Technologies to be worthy of continuation. The conferees note that the Department of Defense may, at its discretion, use funds authorized in PE 61101E to continue the program at the requested level.

Joint robotics program

The budget request included \$17.4 million for the joint robotics program.

The House bill would authorize an additional \$10.0 million for the mobile detection assessment response system (MDARS).

The Senate amendment contained no similar provision.

The conferees agree to an increased funding authorization of \$5.0 million for MDARS in PE 63709D.

Advanced sensor applications program

The budget request included \$17.4 million in PE 63714D for the advanced sensor applications program.

The House bill would authorize an increase of \$10.0 million to the budget request, including \$5.0 million for continued development of a research prototype laser radar anti-submarine warfare (LIDAR ASW) system concept, which is being investigated by the Office of the Secretary of Defense advanced sensor applications program (OSD ASAP), and \$5.0 million for continued development of the Navy ATD-111 LIDAR ASW system. The House bill would encourage comparative testing of the two systems as a basis for establishing the requirement for a follow-on system.

The Senate amendment would authorize an additional \$10.0 million for upgrade test and evaluation of the ATD-111 system, and would direct the Secretary of the Navy to prepare a plan for acquisition and deployment of the ATD-111.

The conferees have agreed to provide \$10.0 million in PE 63528N for the Navy ATD-111 non-acoustic anti-submarine warfare program, as discussed elsewhere in this statement of managers. The conferees strongly support the comparative evaluation of the LIDAR ASW alternatives, and direct the Department of the Navy and the OSD ASAP to develop jointly a plan for testing these two alternative approaches to LIDAR ASW. The conferees expect that funds to complete the evaluation will be included in the fiscal year 1997 defense budget request.

Industrial preparedness (manufacturing technology) programs

The budget request included \$17.8 million for the Army, \$41.2 million for the Navy, \$53.3 million for the Air Force, and \$7.0 million for the Defense Agencies to fund the manufacturing technology (MANTECH) programs within these agencies.

The House bill would include an additional \$10.0 million for the Army, an additional \$10.0 million for the Navy, and approve the requested amount for the Air Force and the Defense. The House bill would also transfer funding from advanced development (6.3) program elements to industrial preparedness (7.8) program elements.

The Senate amendment would authorize all the manufacturing technology programs at the requested amounts and would transfer the funding from the program elements in the budget request.

The conferees agree to authorize funding for manufacturing technology programs, as follows:

	<i>Millions</i>
Army (PE 78045A)	\$26.8
Navy (PE 78011N)	88.0
Air Force (PE 78011F)	60.9
Def. Ag. (PE 78011S)	7.0

Integrated bridge system for MK V special operations craft

The budget request included \$13.3 million in PE 1160402BB for special operations advanced technology development.

The House bill would authorize an additional \$1.5 million for development of a prototype maritime integrated bridge system for the MK V special operations craft to demonstrate the potential for advanced display and control technologies to enhance mission performance.

The Senate amendment would authorize the budget request.

The House recedes.

Quiet Knight advanced concept and technology demonstration

The budget request included \$101.6 million in PE 1160404BB for Special Operations tactical systems development, to include \$3.5

million allocated by the U.S. Special Operations Command to continue the Quiet Knight advanced avionics technology demonstration.

The House bill would authorize the budget request. The House report (H. Rept. 104-131) expressed strong support for a Phase I (component development and demonstration) of an advanced concept technology demonstration of Quiet Knight for both fixed and rotary wing aircraft, and the continuation to a Phase II full scale demonstration and flight test of the integrated Quiet Knight capability. The House report also expressed the expectation that funding requirements for completion of the Phase II demonstration would be included in the fiscal year 1997 budget request.

The Senate amendment would authorize the budget request.

The conferees support completion of the Quiet Knight technology demonstration, and encourage the Department of Defense to validate the requirements for advanced low probability of intercept/low probability of detection avionics for special operations aircraft.

Advanced SEAL delivery system

The budget request included \$24.6 million in PE 1160404BB to complete fabrication and integration of the first Advanced SEAL Delivery System (ASDS) and begin system level testing.

The House bill would authorize an additional \$4.0 million to complete evaluation of the ASDS employed on the SSN-688 class submarine.

The Senate amendment contained a similar provision.

The conferees are pleased with the joint efforts of the U.S. Special Operations Command and the Navy in the development of ASDS. The conferees agree to increase the budget request by \$4.0 million to complete evaluation of the ASDS.

Rigid hull inflatable boat

The budget request contained \$11.7 million for procurement of special warfare equipment, including \$10.1 million for procurement of the Naval Special Warfare 10 meter Rigid Hull Inflatable Boat (RHIB).

The House bill would authorize the budget request.

The Senate amendment noted that the U.S. Special Operations Command had reported that the 10 meter RHIB, on which initial developmental effort had been focused, performed unsatisfactorily during operational testing. As a result, a new strategy was adopted for development of a RHIB to meet Special Operations Forces' requirements. The Senate amendment would authorize an increase of \$4.3 million in PE 1160404BB to support this developmental effort and would direct a corresponding reduc-

tion in the procurement account for special warfare equipment to offset the increase.

The House recedes. The conferees understand that the \$4.3 million increase in PE 1160404BB for this purpose will support the competitive procurement of three to four prototype RHIBs for developmental testing and early operational assessment. The remaining \$5.8 million authorized for procurement of special warfare RHIBs will be used to procure approximately 30 interim 24-foot RHIBs to alleviate deficiencies caused by the estimated three-year delay in initial operation capability for the new RHIBs.

Ballistic missile defense funding and programmatic guidance

The budget request contained \$2,912.9 million for the Ballistic Missile Defense Organization (BMDO), including \$2,442.2 million for Research, Development, Test, and Evaluation (RDT&E), \$453.7 million for Procurement, and \$17.0 million for Military Construction.

The House bill would authorize an additional \$628.0 million for BMDO.

The Senate amendment would authorize an additional \$490.5 million for BMDO.

The conferees agree to authorize a total of \$3,516.9 million for BMDO, an increase of \$603.9 million above the budget request. The conferees set forth specific funding allocations and programmatic guidance below.

Theater High Altitude Area Defense (THAAD)—The conferees agree to authorize the budget request of \$576.3 million in PE 63861C for THAAD Demonstration/Validation (Dem/Val).

The conferees endorse the language in the House report (H. Rept. 104-131) and the Senate report (S. Rept. 104-112) regarding the THAAD User Operational Evaluation System (UOES) option, and the need to ensure a smooth and timely transition from the Dem/Val phase to the Engineering and Manufacturing Development (EMD) phase. The conferees direct the Secretary of Defense to restructure the THAAD program so as to achieve a First Unit Equipped (FUE) by fiscal year 2000. The conferees believe that this objective can be facilitated by making only minor modifications to the UOES design and beginning Low-Rate Initial Production as soon as the EMD missiles have been adequately tested. Subsequent performance improvements to the initial system configuration should be incorporated through block upgrades, as appropriate and necessary. The conferees note that this approach would reduce overall THAAD development costs while significantly accelerating fielding of an operational system. Therefore, the conferees urge the Secretary of Defense to re-

lease the THAAD engineering and manufacturing development (EMD) request for proposal. Finally, the conferees direct the Secretary of Defense to promptly initiate development of all battle management software for the THAAD system, including that necessary to receive cueing information from external sensors.

Navy Upper Tier—The budget request included \$30.4 million in PE 63868C for the Navy Upper Tier program.

The conferees agree to authorize an increase of \$170.0 million for a total Navy Upper Tier authorization of \$200.4 million. The conferees direct the Secretary of Defense to include the Navy Upper Tier program in the core theater missile defense (TMD) program and to structure the Navy Upper Tier development and acquisition program so as to achieve an initial operational capability (IOC) not later than fiscal year 2001, with a UOES capability not later than fiscal year 1999. The conferees look forward to receiving the results of the various studies that are assessing Navy Upper Tier technical issues and deployment options. The conferees agree to require the Director of BMDO to provide a status report to the congressional defense committees, not later than March 1, 1996, that summarizes the find-

ings and recommendations (as available) of these analyses. The Director of BMDO should include in such report an assessment of options for reducing risk and enhancing competition in the Navy Upper Tier program, including the option of establishing a competitive development and flight test program between the Lightweight Exoatmospheric Projectile (LEAP) and THAAD kill vehicles.

The conferees believe that competition within the Navy Upper Tier program is desirable, but do not support the notion of competition between the Navy Upper Tier and THAAD programs. The conferees are convinced that the United States can and should develop and deploy both sea-based and land-based upper tier programs. Although there may be an opportunity to reduce the number of TMD programs being developed by the Department of Defense, the conferees strongly oppose the notion of a competition and down-select between the THAAD and Navy Upper Tier systems. The conferees view these as critical and complementary systems.

Patriot—The budget request included \$247.9 million in PE 64865C for PAC-3 EMD, \$19.5 million in PE 64866C for PAC-3 risk reduction, and \$399.5 million for Patriot procurement.

The conferees agree to authorize the overall amount requested for the Patriot program and related activities. Within this overall authorization, the conferees agree to transfer \$104.5 million from Patriot procurement to PAC-3 EMD, a total authorization of \$352.4 million in PE 64865C.

Navy Lower Tier—The budget request included \$237.5 million in PE 64867C for Navy Lower Tier EMD and \$16.9 million for Navy Lower Tier procurement.

The conferees agree to authorize an increase of \$45.0 million for Navy Lower Tier Dem/Val and to transfer \$140.0 million from Navy Lower Tier EMD to Navy Lower Tier Dem/Val, a total of \$185.0 million in PE 63867C.

Corps SAM—The budget request included \$30.4 million in PE 63869C for the Corps Surface to Air Missile (Corps SAM) system.

The conferees agree to authorize \$20.4 million for Corps SAM, a reduction of \$10.0 million. Although the conferees support the Corps SAM requirement, they remain concerned by several aspects of the current Corps SAM program, now known as the medium extended air defense system (MEADS). The conferees support an effort to explore alternative means to satisfy the Corps SAM requirement. Given the investments that have already been made in developing systems such as PAC-3 and THAAD, reintegration of existing systems and technologies may offer an achievable, cost-effective, and expeditious alternative. The conferees direct the Secretary of Defense to submit a report to the congressional defense committees on the options associated with the use of existing systems, technologies, and program management mechanisms to satisfy the Corps SAM requirement, including an assessment of cost and schedule implications. The conferees direct that, of the funds authorized in fiscal year 1996 for the Corps SAM program, not more than \$15.0 million may be obligated until such report has been submitted to the congressional defense committees.

Boost-Phase Intercept—The budget request included \$49.1 million in PE 63870C for the kinetic energy Boost-Phase Intercept (BPI) program.

The House bill would authorize \$29.1 million for the kinetic BPI program.

The Senate amendment would authorize no funds for the kinetic BPI program in PE 63870C. However, the Senate amendment would authorize \$15.0 million in the Other TMD (OTMD) program element (PE 63872C) to initiate a joint United States-Israel BPI program based on unmanned aerial vehicles (UAVs).

The conferees agree to authorize no funds for the kinetic BPI program due to continuing skepticism about the operational and technical effectiveness of a BPI system based on a manned tactical aircraft. However, the conferees agree to authorize the use of up to \$15.0 million, from within funds made available in the OTMD program element, for a UAV-based BPI program. The conferees support a joint U.S.-Israel UAV-BPI program focused on risk mitigation, provided that an equitable cost-sharing arrangement can be reached and that the program will be structured to satisfy the BPI requirements of both sides. The conferees also support continuation of the Atmospheric Interceptor Technology (AIT) program, which is being developed as an advanced multi-purpose kill vehicle. The conferees authorize the use of up to \$30.0 million, from within funds made available in the OTMD program element, to continue the AIT program. The conferees are disappointed that the Department has not completed its review of BPI programs and options in time to inform the conferees' deliberations and decisions. Therefore, the conferees agree to require the Director of BMDO

to submit a report to the congressional defense committees, not later than February 1, 1996, that summarizes the findings and recommendations of the Department's BPI study. This report should also address promising options and technical approaches associated with a UAV BPI program.

Other TMD—The budget request contained \$460.5 million in PE 63872C for OTMD programs, projects, and activities.

The House bill would authorize \$423.5 million for OTMD.

The Senate amendment would authorize \$475.5 million, including the \$15.0 million for the UAV-BPI program cited above.

The conferees agree to authorize \$438.5 million for OTMD. Of this amount, the conferees authorize the use of up to \$15.0 million to explore a UAV-BPI program and up to \$30.0 million to continue the AIT advanced kill vehicle program.

National Missile Defense—The budget request contained \$370.6 million in PE 63871C for National Missile Defense (NMD).

The House bill would authorize \$820.6 million for NMD.

The Senate amendment would authorize \$670.6 million for NMD.

The conferees agree to authorize \$820.6 million for NMD.

Support Technologies—The budget request contained \$93.3 million in PE 62173C and \$79.4 million in PE 63173C for ballistic missile defense (BMD) support technologies.

The House bill would authorize the budget request for BMD Support Technologies.

The Senate amendment would authorize an increase of \$70.0 million in PE 63173C for the Space-Based Laser (SBL) program.

The conferees agree to authorize the budget request in PE 62173C and to authorize an increase in the SBL program of \$50.0 million, for a total authorization of \$129.4 million in PE 63173C. The conferees believe that it is critical for the United States to continue developing the technology for space-based defenses, to preserve the option of deploying highly effective global defenses in the future. The conferees note that a space-based laser would likely be the most effective system for intercepting ballistic missiles of virtually all ranges in the boost phase. Therefore, the conferees direct the Secretary of Defense to take the following actions: (1) continue integration and testing of the laser, mirror, and beam control components of the Alpha-Lamp Integration program; (2) accelerate design activities on the StarLITE space demonstration configuration; (3) produce the concept of operations and design requirements for a follow-on operational space-based laser deployment; and (4) revitalize the technology development efforts most likely to yield significant cost and weight savings for a future SBL spacecraft. The conferees direct the Secretary of Defense to ensure that sufficient funds are provided in the outyears for continuation of a robust SBL effort, and submit to the congressional defense committees, by March 1, 1996, a report that outlines a program and funding profile that could lead to an on-orbit test of a demonstration system by the end of 1999 if approved.

The conferees note that the Director, BMDO, has testified to Congress that BMDO's follow-on technology programs are severely under-funded and that the Director is seeking to increase such funding to approximately 12 percent of the overall BMDO budget. The conferees support the efforts of the Director of BMDO to increase funding for advanced technology development. However, the conferees note that such increases will require an overall increase in the funds allocated to BMDO. The conferees support such an increase in order to reinvigorate and advanced technology programs and to help sustain the development and acquisition activities endorsed by the conferees.

BMDO is required to set aside 2.15 percent of extramural research, development, test, and evaluation authorized and appropriated (RDT&E) funds for Small Business Innovative Research (SBIR) efforts. Since the conferees recommend a level of funding for BMD programs exceeding the budget request, and programmed funding for SBIR represents a level below the mandated percentage, the Director of BMDO is authorized to transfer such funds as necessary from BMD program elements into PE 62173C to achieve the required percentage for SBIR.

BMDO Management—The budget request contained \$185.5 million in PE 65218C for BMD Management.

The House bill would authorize \$165.5 million for BMD Management.

The Senate amendment would authorize \$155.5 million for BMD Management.

The conferees agree to authorize \$155.5 million for BMD Management. The conferees recognize that BMDO must maintain the integrity of its oversight of the overall BMD program. The conferees are concerned, however, that BMD management infrastructure may be unnecessarily duplicated in one or more of the services. Therefore, the conferees direct that BMDO identify any such duplication and take actions to eliminate it. The conferees request that the Director of BMDO consult with the Senate Committee on Armed Services and the House Committee on National Security regarding the Director's findings and proposed actions. The conferees further direct that BMDO show no increase in fiscal year 1997, after adjustments for inflation and any change in mission, over the level appropriated for management in fiscal year 1996.

Cruise missile defense funding

The House bill would authorize an increase of \$76.0 million above the budget request for cruise missile defense programs, projects, and activities.

The Senate amendment would authorize an increase of \$145.0 million above the budget request for a similar group of programs, projects, and activities.

The conferees agree to authorize an increase of \$85.0 million above the budget request for cruise missile defense programs, projects, and activities. The conferees provide additional guidance in the classified annex.

ITEMS OF SPECIAL INTEREST

Anti-submarine warfare program

The conferees share the concerns raised in the House report (H. Rept. 104-131), and in the classified annex to that report, regarding the apparent decline in priority of the Navy's anti-submarine warfare (ASW) program. The conferees agree that there is a need for an assessment of the nation's overall ASW program. The conferees' concerns are addressed further in the classified annex to this Statement of Managers.

The conferees direct the Secretary of Defense to assess the current and projected United States ASW capability in light of the continuing development of quieter nuclear submarines, the proliferation of very capable diesel submarines, the sale of sophisticated, submarine launched weapons, and the declining trend in budget resources associated with ASW programs. This assessment should identify both short-term and long-term improvements that are needed to cope with the evolving submarine threat in both littoral and open ocean areas. The results of this assessment and the plan for the United States ASW program shall be reported to the congressional defense committees by July 1, 1996.

Geosat follow-on program

The House report (H. Rept. 104-131) addressed the issue of converging the Navy's

Geosat Follow-On (GFO) altimetry program with the National Aeronautics and Space Administration's TOPEX/Poseidon Follow-On (TPFO) altimetry program.

The Senate report (S. Rept. 104-112) did not address the issue.

The conferees share the concerns raised in the House report. The conferees are dismayed that the report to Congress on altimetry convergence was submitted more than three months later than an already extended deadline. The conferees are also troubled that the report recommends proceeding with the TPFO option, despite the fact that this approach would cost more, not involve U.S. construction and control of the satellite, and not provide the same level of data security. The TPFO option would require the Navy to spend an additional \$5.2 million, for which it has not budgeted, to add global positioning system (GPS) and direct downlink capabilities critical for satisfying Navy requirements. The conferees direct that no funds authorized for the Department of Defense be obligated or expended during fiscal year 1996 for activities associated with adding GPS and direct downlink capabilities to TPFO.

High performance computing modernization program

In addition to supporting efforts to reduce the RDT&E infrastructure, the conferees continue to support investment in high performance computing (HPC) resources for use in the developmental test and evaluation (DT&E) community and recognize the need for a transition to HPC-based resources, integrated DT&E, and operational test and evaluation (OT&E). The conferees direct the Secretary of Defense to prepare a long-term plan for modernization of HPC resources at test and evaluation centers, and for the integration of HPC-based models, advanced data bases, and other decision support resources into the RDT&E infrastructure. In preparing the plan, the Secretary should rely on the collaborative input from the Director of Defense Research and Engineering, the Director of Test Systems Engineering and Evaluation, and the Director of Operational Test and Evaluation. The plan shall address budgeting options that provide for a realistic program and propose financing methods that can insure that needed infrastructure investments are made in a timely manner. The conferees direct the Secretary to submit the proposed plan with the Department of Defense budget recommendations to the congressional defense committees, no later than March 31, 1996.

Low-low frequency acoustics

The conferees share the understanding expressed in the House report (H. Rept. 104-131) that of the funds authorized and appropriated in fiscal year 1994 and 1995 for the low-low frequency acoustics (LLFA) technology program approximately \$30.0 million remain available and are sufficient to continue the program through fiscal year 1996. The conferees further understand that the fiscal year 1996 program will focus on operational concepts for the LLFA, technical performance, command and control, environmental considerations, and the transition of the LLFA technology to existing fleet platforms. The conferees agree with the House that based on the emerging results of the fiscal year 1996 program consideration of additional funding for LLFA technology program, should be deferred until the fiscal year 1997 budget request.

Machine tool controller

The conferees are aware of a recent cooperative research and development agreement, entered into by the Department of Energy, two national laboratories, and a private sector consortium, to develop and test an open-

architecture machine tool controller. The conferees encourage the Secretary of Defense to develop a plan to ensure a thorough evaluation of the technology and its application to the specific needs of defense contractors. *National security space policy, management, and oversight*

The House report (H. Rept. 104-131) and the Senate report (S. Rept. 104-112) each contained reporting requirements concerning policy, management, and oversight of U.S. national security space programs. In lieu of the reporting requirements contained in those reports, the conferees direct the Secretary of Defense to submit a report to the Congress, not later than April 15, 1996, that addresses in detail the following matters:

(1) *The results of the Administration's reviews of U.S. national and military space policies*—The conferees direct that copies of any updated policy directives (including unclassified and classified forms) that result from the reviews be included as attachments to the Secretary's report. The conferees view the Administration's decision to initiate such reviews as appropriate in light of changes in the international security environment, and expect the reviews will be completed in time to permit Departmental witnesses to discuss the results in hearings on the President's fiscal year 1997 budget request.

(2) *The activities of the Joint Department of Defense Intelligence Community Space Management Board (JSMB)*—The report shall include a copy of the charter for the Board and a description of its planned functions, operations, and staffing. The report shall address the responsibilities for the development of an integrated national security space architecture and the integrated acquisition of national security space systems. In addition, the report shall describe the Board's plans for reviewing military and intelligence satellite communications architectures and systems. The conferees endorse the establishment of the JSMB, noting that improved integration of military and intelligence satellite architectures and systems can result in significant cost-savings and efficiencies in the acquisition and operation of those systems.

(3) *The status of and plans for completing a national security space master plan to guide investments in military and intelligence space architectures and systems for the coming decade*—The conferees note with concern that the Department failed in a similar, but more narrowly focused, undertaking when, in the Statement of Managers to accompany the National Defense Authorization Act for Fiscal Year 1993 (H. Rept. 102-966), the conferees directed the Department to develop "a comprehensive acquisition strategy for developing, fielding, and operating DOD space programs." Nonetheless, the conferees applaud the decision of the Deputy Under Secretary of Defense for Space to begin drafting such a master plan, and request that the report include an estimated completion date for the plan.

(4) *The Department's plans for ensuring that, even as oversight of national security space acquisition and planning is centralized, each of the military services is able to influence decisions regarding space architectures and systems*—The conferees direct that the report include: (a) an assessment of progress to date in centralizing DOD space management; (b) the organizational structure that will be achieved upon completion of the planned consolidation, and an estimated completion date for such consolidation; (c) a description of how the DOD plans to protect service-unique interests and other equities in the new centralized organization; (d) the anticipated reductions in personnel and infrastruc-

ture that will result from such consolidation; and (e) the degree to which effectiveness and efficiency will be enhanced by the new structure and associated procedures.

The conferees are aware that the Department has established a Space Architect Office as part of the space management reorganization. Given that this is a new function and organization, budget planning was not completed prior to submittal of the amended fiscal year 1996 budget request. Therefore, the conferees agree to authorize the use of up to \$10.0 million in Air Force research, development, test, and evaluation funds to operate the Space Architect Office in fiscal year 1996.

Shortstop

The conferees stress the need to move forward without delay on the Shortstop countermeasure system, and encourage the Secretary of the Army to maintain funding for the currently planned program leading to procurement.

Softwar operations

The conferees direct the Air Force's Phillips Laboratory Combat Space Operations Program Office to examine the use of commercially developed Information Warfare Systems that use television enhanced situational awareness for "softwar" operations. The Secretary of the Air Force shall report to the congressional defense committees by January 1, 1996 on the results of the Phillips Laboratory examination and the possibility to fund a technology demonstration in "softwar" operations. The conferees direct the Secretary to pursue this technology if the examination results in a favorable recommendation.

LEGISLATIVE PROVISIONS

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations
Modifications to strategic environmental research and development program (sec. 203)

The House bill contained a provision (sec. 203) that would make certain modifications to chapter 172 of title 10, United States Code, which governs the Strategic Environmental Research and Development Program.

Senate amendment contained no similar provision.

The Senate recedes with an amendment that would streamline and simplify program activities, facilitate program management, and promote cost effectiveness. The existing annual reporting requirement would continue until fiscal year 1997, at which point an abbreviated annual reporting requirement would become effective. The Senate amendment would ensure that the level of participation by the Secretary of Energy would not be subject to change. The conferees agree that there is a continuing need for Department of Energy participation in the program, and the retention of some reporting requirements.

Defense dual-use technology initiative (sec. 204)

The House bill would deny the entire funding request of \$500.0 million for the Defense Reinvestment Program (PE 63570E).

The Senate amendment would rename the program the Defense Dual-Use Technology Initiative and reduce the requested authorization for the program by \$262.0 million.

The conferees agree to change the name of the program and to authorize \$195.0 million for the program. The conferees have included a provision that would limit the availability of the funds authorized in PE 63570E only for the purpose of continuation or completion of projects initiated before October 1, 1995. The conferees have also included language that would require the Secretary of Defense, prior to obligation of funds, to provide the congressional defense committees with notice

regarding the projects to be funded with \$145.0 million of the amount authorized for the program. The conferees have also required that, for the remaining \$50.0 million of the total amount authorized, the Secretary should certify, prior to obligation of funds, that the projects that would be carried out using such funds have been determined by the Joint Requirements Oversight Council to be of significant military priority.

Subtitle B—Program Requirements, Restrictions, and Limitations

Space launch modernization (sec. 211)

The House bill contained a provision (sec. 211) that would authorize \$100.0 million for a competitive reusable rocket technology program, and \$7.5 million for evaluation of prototype hardware of low-cost expendable launch vehicles.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize \$50.0 million for a competitive reusable rocket technology program, provided that the National Aeronautics and Space Administration allocates at least an equal amount for its reusable space launch program.

Tactical manned reconnaissance (sec. 212)

The House bill contained a provision (sec. 212) that would prohibit the Air Force from conducting any research and development on tactical manned reconnaissance systems.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require a report explaining the Air Force's planned uses of funds for the tactical manned reconnaissance mission.

Joint advanced strike technology (JAST) program (sec. 213)

The budget request included three requests for research and development funding for the joint advanced strike technology (JAST) program: \$149.3 million for the Navy, \$151.2 million for the Air Force, and \$30.7 million for the Advanced Research Projects Agency.

The House bill contained a provision (sec. 213) that would reduce the request for JAST by \$51.0 million, evenly divided between the Navy and the Air Force, and limit to 75 percent the obligation of fiscal year 1996 appropriations until the Secretary of Defense provides a report to the congressional defense committees. The provision would require that the Secretary's report specify the numbers and capabilities of JAST-derivative aircraft and related weapons systems necessary to support two major regional contingencies.

The Senate amendment would approve the JAST request. The Senate amendment also contained a provision (sec. 213) that would require the Navy to evaluate a variant of the F-117 stealth fighter to fulfill Navy requirements within the JAST program. The Senate amendment would add \$175.0 million to the Navy program for this propose, with \$25.0 million to provide initial engineering analysis and specific risk reduction efforts, and \$150.0 million to develop a flying prototype. Authorization of a flying prototype would be contingent on approval by the Secretary of the Navy's approval of results of initial analytical efforts.

The Senate report (S. Rept. 104-112) questioned whether the program could fulfill the needs of the three services, and directed the Department to include two separate approaches in the JAST program to reduce program risk. The Senate amendment directed the Secretary of the Navy to:

(1) ensure that the JAST program leads to competitive demonstration involving tests of full scale, full thrust aircraft by competitors to provide test data for evaluation by the services; and

(2) evaluate at least two propulsion concepts from competing engine companies as part of those demonstrations.

Subsequent to passage of the Senate amendment and the House bill, the Department redefined the JAST program. Although additional resources will be necessary, from fiscal year 1997 onward, to execute this new program, these changes have led to fiscal year 1996 deferral of \$131.0 million.

The conferees share the concerns expressed in the Senate report (S. Rept. 104-112) regarding the lack of engine competition and the size of flying prototypes. The conferees direct the Under Secretary of Defense (Acquisition & Technology) (USD (A&T)) to ensure that: (1) the Department's JAST program plan provides for adequate engine competition in the program; and (2) the scale of the proposed demonstrator aircraft is consistent with both adequately demonstrating JAST concepts and lowering the risk of entering engineering and manufacturing development (EMD). The conferees direct the Secretary of Defense to include in the report required by section 213(d) the Department's plan for competitive engine programs and demonstrator aircraft.

The conferees recommend authorization of funds reflecting these changes, and agree to a provision (sec. 213) that would:

(1) require that the Secretary of Defense provide a report to the congressional defense committees specifying the:

(a) the numbers and capabilities of JAST-derivative aircraft and related weapons systems required to support two major regional contingencies; and

(b) the department's plan for competitive engine programs and demonstrator aircraft;

(2) limit obligations for the JAST program to no more than 75 per cent of fiscal year 1996 appropriations, until the Secretary of Defense provides this report;

(3) authorize up to \$25.0 million from Navy Research, Development, Test and Evaluation to conduct a six month program definition phase for the A/F-117X to determine whether such an aircraft could affordably meet the Navy's next generation aircraft strike requirements;

(a) if the USD (A&T) determines that a six month definition phase is warranted, he shall provide a report on the results of the concept definition phase to the congressional defense committees, not later than May 1, 1996;

(b) if the USD (A&T) determines otherwise and certifies that an A/F-117X aircraft is not needed to meet the Navy requirements and is not a cost effective approach to meeting Navy needs, the provision would allow the Department to use the \$25.0 million for other JAST activities.

(4) authorize \$7.0 million for competitive engine concepts.

Continuous wave, superconducting radio frequency, free electron laser (sec. 214)

The House bill contained a provision (sec. 214) that would authorize \$9.0 million in PE 62111N for the establishment of a continuous wave, superconducting radio frequency, free electron laser program within the Office of the Secretary of the Navy.

The Senate amendment contained no similar provision.

The Senate recedes.

Navy mine countermeasure program (sec. 215)

The Senate amendment contained a provision (sec. 215) that would transfer primary responsibility for developing and testing naval mine countermeasures from the Director, Defense Research and Engineering to the Under Secretary of Defense for Acquisition and Technology. It would provide for the exercise of this responsibility during fiscal years 1997 through 1999.

The House bill contained no similar provision.

The House recedes with an amendment that would establish fiscal years 1996 through 1999 as the period for exercise of the responsibility.

The conferees note that section 216(b) of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102-190) provides that the Secretary of Defense may waive this assignment of responsibility if he annually certifies the adequacy of:

(1) the mine countermeasures master plan prepared by the Department of the Navy; and

(2) the budget resources provided for implementation of the plan.

Space-Based Infrared System (sec. 216)

The Senate amendment contained a provision (sec. 216) that would accelerate development and deployment of the Space and Missile Tracking System (SMTS), formerly known as Brilliant Eyes, and that would require the Secretary of the Air Force to obtain the concurrence of the Director of the Ballistic Missile Defense Organization (BMDO) before implementing any decision that would impact the SMTS program.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to establish a program baseline for the overall Space-Based Infrared System (SBIRS) program. The baseline would include the following:

(1) overall program structure, including: (A) program cost and an estimate of the funds required in each fiscal year in which development and acquisition activities are planned, (B) a comprehensive schedule with program milestones and exit criteria, and (C) optimized performance parameters for each segment of the integrated system;

(2) a development schedule for SMTS structured to achieve the first launch of a Block I satellite in fiscal year 2002, and initial operational capability (IOC) of the system in fiscal year 2003;

(3) full integration of SMTS into the overall SBIRS architecture; and

(4) establishment of the performance parameters of all space segment components so as to optimize the performance of the integrated system while minimizing unnecessary redundancy and cost.

The provision adopted by the conferees would require the Secretary of Defense to provide a report to the congressional defense committees on the SBIRS program baseline not later than 60 days after the enactment of this Act.

The conference provision would also establish the following program elements for the SBIRS program:

(1) Space Segment High;

(2) Space Segment Low (SMTS); and

(3) Ground Segment.

The conference provision requires the SBIRS baseline to include an SMTS IOC by fiscal year 2003 to support national and theater missile defenses. The conferees understand that the Air Force has defined this IOC as consisting of 12-18 satellites. The conferees urge the Air Force to make every effort to achieve an 18 satellite IOC by fiscal year 2003.

In accelerating the SMTS program, it is not the conferees' intent to reduce the priority and importance of the SBIRS High components. The conferees endorse the schedule that the Air Force has established for the SBIRS High components. The SBIRS program should feature complementary and mutually supportive elements that do not include excessive technical and functional redundancy.

Although SMTS can, over time, become a multi-functional sensor system capable of

fulfilling missions such as technical intelligence and battlespace characterization, the conferees direct the Air Force to ensure that the SMTS Flight Demonstration System (FDS) and Block I system be designed primarily to satisfy the missile defense mission. Missions not related to theater and/or national ballistic missile defense should not be allowed to add significant cost, weight or delay to the SMTS FDS or Block I system. This scaled-down approach will ameliorate the technical challenges associated with an accelerated schedule while contributing to overall affordability.

To support this schedule and missile defense focus, the conferees direct the Secretary of Defense to commence SMTS pre-engineering and manufacturing development (EMD) activities in fiscal year 1996 and to ensure that the FDS and Block I satellites are equipped with long-wave infrared sensors. The conferees endorse the design characteristics specified in the Senate report (S. Rept. 104-112) regarding the objective SMTS system. The conferees have authorized sufficient funds in fiscal year 1996 to commence these activities and to prepare the way for a fiscal year 1998 FDS launch.

Over time, as the Air Force gains operational experience with the High and Low Block I systems, it is likely that SMTS will be able to assume a much larger share of the SBIRS requirements burden. In the meantime, the conferees urge the Secretary of Defense to initiate technical and cost trade studies among the SBIRS space systems and include any preliminary findings and recommendations in the SBIRS baseline report.

The budget request for SBIRS included \$130.7 million for demonstration/validation (Dem/Val), \$152.2 million for EMD, and \$19.9 million for procurement. Of the funds requested for Dem/Val, \$114.8 million was for SMTS. The conferees agree on the following authorizations:

(1) \$265.7 million in PE 63441F for SBIRS Dem/Val, of which \$249.8 million is for SMTS; and

(2) \$162.2 million in PE 64441F for SBIRS EMD, of which \$9.4 million is for the Miniature Sensor Technology Integration (MSTI) program.

The conferees are aware of a recent proposal to increase competition and reduce risk in the SMTS program through a low-cost flight experiment. The conferees direct the Air Force and BMDO to carefully assess the merits of this concept and to include their joint findings and recommendations in the SBIRS baseline report. If the Air Force Acquisition Executive and the Director of BMDO certify to the congressional defense committees that such a flight experiment is in the overall interest of the SMTS program (measured in terms of risk reduction and schedule acceleration), the conferees authorize the use of up to \$40.0 million of the funds authorized for SMTS in fiscal year 1996 to begin a low-cost flight experiment.

The conferees congratulate the Air Force and BMDO for reaching agreement on the acquisition management relationship for execution of the SMTS program. In light of the Memorandum of Agreement between the Air Force Acquisition Executive and the Director of BMDO, the Senate recedes on its language dealing with management oversight of the SMTS program. As with all aspects of the SMTS program, however, the conferees will continue to monitor management oversight with great interest. If the present management structure does not fulfill the expectations of the conferees, or lead to implementation of the guidance provided above, the conferees will reconsider transferring SMTS back to BMDO.

Defense Nuclear Agency programs (sec. 217)

The budget request contained \$219.0 million for research and development at the Defense Nuclear Agency.

The Senate amendment contained a provision (sec. 216) that would authorize \$242.0 million for fiscal year 1996 for research and development programs (PE 62715H), a \$23.0 increase to the budget request. The increase would provide: \$3.0 million for the establishment of the tunnel characterization/neutralization program; \$6.0 million for the establishment of a long-term radiation tolerant microelectronics program and require the Secretary to report to Congress on the program and future year funding; \$4.0 million for the electro-thermal gun program; and transfer the Air Force thermionics program and any unobligated funds to the DNA and provide \$10.0 to accelerate that program.

The House report (H. Rept. 104-131) would provide a \$4.0 million increase to the budget request for the electro-thermal gun technology.

The conferees agree to a provision that would authorize \$241.7 million, including a reduction of \$5.0 for environmental pollutant research. This represents a \$27.7 million increase over the budget request. Of that amount, \$3.0 million shall be used for a tunnel characterization/neutralization program, \$4.0 million shall be available for the electro-thermal gun technology program, \$6.0 million shall be available for the establishment of a long-term radiation tolerant microelectronics program and development of long pulse, high power microwave technology, \$10 million shall be available for the thermionics program; and \$4.0 million shall be available for the counterterror explosives research program. Additionally, the Secretary is directed to provide a report to Congress, 120 days after enactment of this Act, on the conduct of the long-term radiation tolerant microelectronics program and future years funding for this program. The remainder of the increase should be used to supplement the tunnel characterization/neutralization program and the long-term radiation tolerant microelectronics program, as appropriate.

TUNNEL CHARACTERIZATION/NEUTRALIZATION PROGRAM

The conferees understand that the Department of Defense has allocated \$10.0 million of funds requested in the budget for the counterproliferation support program for a tunnel characterization/neutralization program. Although the DNA tunnel characterization/neutralization target tests and program would be executed independently of the Department's counterproliferation efforts, the conferees expect close coordination between the two programs to ensure that common concerns are addressed. The conferees urge the DNA to utilize, to the maximum extent possible, the Nevada Test Site infrastructure for the tunnel target characterization/neutralization tests and program.

THERMIONICS

The conferees directed the transfer of the thermionics conversion technology from the Air Force Weapons program (PE 62601F), together with all unobligated funds authorized and appropriated in prior years, totalling up to \$12.0 million, to the Defense Nuclear Agency program (PE 62715H).

Counterproliferation support program (sec. 218)

The budget request contained \$108.2 million for the defense counterproliferation support program.

The Senate amendment contained a provision (sec. 217) that would authorize \$144.5 million for the program, a \$36.3 million increase to the budget request. Of the funds authorized in this section, \$6.3 million would

be available to the Special Operations Command (SOCOM) for purposes of broadening SOCOM's counterproliferation activities and \$30.0 million would be available for the continuation of the Army tactical antisatellite technologies (ASAT) program (PE 63392A) for a user operation evaluation system (UOES) contingency capability. The provision would authorize the Department of Defense to transfer up to \$50.0 million from fiscal year 1996 defense research and development accounts for counterproliferation support activities.

The House bill would authorize the budget request for the counterproliferation support program and include \$11.0 million for the development of improved nuclear detection and forensics analysis by the Advanced Projects Research Agency (ARPA).

The conferees agree to a provision that would authorize \$138.2 million for the counterproliferation support program, of which \$30.0 million shall be available for the continuation of the Army tactical antisatellite technologies program. Of the funds authorized in fiscal year 1996, the conferees recommend that \$1.5 million be available for the exploration of the "deep digger" concept for hard target characterization, and that \$5.0 million be available for the high frequency active auroral research program (HAARP).

The conferees acknowledge concerns raised in the Senate report (S. Rept. 104-112) regarding the need for the Department to continue the aggressive pursuit of discriminate detection and attack capabilities of deep underground structures. The Department should continue to develop the capability to detect and defend against biological agents through the use of technologies, available through universities and non-profit industries, that have been developed for biological detection, emergency preparedness and response. The Department should also continue to develop a capability to counter technological gains by proliferant countries that could gain access to a broad mix of commercial-off-the-shelf space technologies which could provide these countries with significant space capabilities or access to space-derived data and could negatively impact a spectrum of multi-service and joint warfighting capabilities.

TACTICAL ANTISATELLITE TECHNOLOGY

The conferees direct the Secretary of Defense to include sufficient resources in fiscal year 1997, and throughout the future year defense plan (FYDP), for the following: a user operation evaluation system (UOES) contingency capability to produce 10 kill vehicles with the appropriate boosters by fiscal year 1999; a review to determine the appropriate management structure and military service responsibility; report on the current status of antisatellite development worldwide and the degree to which United States antisatellite development efforts may contribute to similar development among other nations and their impact on U.S. operational capabilities; and to report the Department's recommendations to Congress in the fiscal year 1997 budget request. To avoid significant or lengthy delays in developing a needed capability, the conferees direct the Department to leverage, or build upon the current Army tactical antisatellite technology program. The conferees note that authorization of funds for continued development of the tactical antisatellite system does not constitute a decision to deploy the system.

MISSION PLANNING AND ANALYSIS

The conferees recommend that \$2.5 million from Air Force operation and maintenance (O&M) be made available for Strategic Air Command (STRATCOM) mission planning and analysis. The STRATCOM program provides support to the regional commanders-

in-chief (CINCs) in advance planning for counterproliferation contingencies. This program aids commanders in identifying and characterizing current and emerging proliferation threats. In instances in which proliferation activities challenge the interests of the United States and its military forces and operations, STRATCOM mission planning and analysis capabilities allow defense planners to: identify a variety of potential military targets; assess the effectiveness, consequences and costs of military options; and develop alternative contingency plans that would maximize mission effectiveness, and minimize the risks, costs, and collateral effects.

IMPROVED NUCLEAR DETECTION AND FORENSIC ANALYSIS CAPABILITIES

Due to an increase in international terrorism and attempts by criminal elements to acquire weapons-grade nuclear material, the conferees recommend \$11.0 million to accelerate the development of improved nuclear detection and forensic analysis capabilities in PE 62301E, project ST23. The conferees direct the ARPA to closely coordinate its efforts in this area closely coordinate with the counterproliferation support program manager in the Department of Defense and the interagency group on counterproliferation.

Nonlethal Weapons Program (sec. 219)

The Senate bill contained a provision (sec. 218) that would establish a new, consolidated program for non-lethal systems and technology. The program would be managed by the Office of Strategic and Tactical Systems of the Under Secretary of Defense for Acquisition and Technology. The provision would create a new program element within the defense budget for this program, and transfer funds from PE 603570D, PE 603750D, PE 603702E, and PE 603226E into this new program element.

The House bill contained no similar provision.

The House recedes with an amendment that would express congressional recognition of the U.S. armed forces increasing role in operations other than war, recognition of support for the use of nonlethal weapons and systems across the spectrum of conflict, and concern that development of these technologies is being spread across the budgets of the military services and defense agencies. The conferees direct the Department of Defense to submit a report to Congress by February 15, 1996 and direct the Secretary of Defense to assign responsibility for the nonlethal weapons program to an existing office within the Office of the Secretary of Defense or designate an executive agent from the military services, to establish centralized responsibility for development and fielding of nonlethal weapons technology. The conferees authorize \$37.2 million in a new defense program element for nonlethal weapons programs and nonlethal technologies programs.

The conferees believe that centralized responsibility for the nonlethal weapons program will ensure effective program management and expeditious development, acquisition, and fielding of nonlethal weapons and systems. The conferees further understand that both the Department of the Army and the Marine Corps are the primary users of these technologies and recommend the designation of either military service as the executive agent for this important program. Further, the conferees understand that the Department of the Army and the Marine Corps have closely coordinated their efforts in this area and expect this coordination to continue to ensure centralized management and improved budgetary focus for the nonlethal weapons program. The provision would also require the Department to report

to Congress by February 15, 1996 on the designation of the executive agent for oversight of the program, the acquisition plan, the time frame for fielding systems, current and anticipated military requirements, and the Department of Defense policy regarding the nonlethal weapons program.

Federally-Funded Research and Development Centers (sec. 220)

The House bill contained a provision (sec. 257) that would require the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force to reevaluate the functions of Federally-Funded Research and Development Centers (FFRDCs) and to achieve certain reductions, consolidations and management goals. The provision would limit FFRDC funding to \$1.15 billion and reduce funding for FFRDCs and University-Affiliated Research Centers (UARC) by \$90.1 million.

The Senate amendment contained a provision (sec. 219) that would require an undistributed reduction in FFRDC funding of \$90.0 million, below the ceiling for fiscal year 1995, and would establish a statutory ceiling for FFRDCs of \$1.2 billion in fiscal year 1996.

The Senate recedes with an amendment. The conferees agree to reduce the funding for FFRDCs and UARCs by \$90.0 million in fiscal year 1996 and direct that not more than \$9.0 million of this reduction be applied to funding for UARCs. The conferees have included language that would require the Secretary of Defense to manage the UARCs at the fiscal year 1995 level. The conferees direct the Secretary of Defense to ensure adequate funding in fiscal year 1996 for those FFRDCs that engage in studies and analysis for the Office of the Secretary of Defense and the services. The conferees also direct the Secretary to examine the possibility of increasing the use of the Software Engineering Institute in support of command, control, communications, computing, and intelligence programs managed by the Office of the Secretary of Defense.

Joint seismic program and global seismic network (sec. 221)

The Senate amendment contained a provision (sec. 224) that would authorize \$9.5 million of unobligated fiscal year 1995 funds in Air Force research and development for the joint seismic program (JSP) and the global seismic network (GSN) to provide more robust monitoring research and expanded seismic monitoring of potential nuclear tests.

The House bill contained no similar provision.

The conferees agree to a provision that would authorize \$9.5 million in fiscal year 1996 for the joint seismic and global seismic network programs. The conferees understand that no future year funds would be required for this program. Further, the conferees direct the Department of Defense Comptroller to release the funds in a timely manner so that the programs can be completed.

Hydra-70 rocket product improvement program (sec. 222)

The Senate amendment contained a provision (sec. 113) that would prohibit the obligation of funds to procure Hydra-70 rockets until the Secretary of the Army submitted certifications regarding: identification of causes and technical corrections of Hydra-70 rocket failures; comparative cost of correcting all Hydra-70 rockets versus the non-recurring costs of acquiring improved rockets; review and qualification of commercial, nondevelopmental systems to replace Hydra-70 rockets; the availability of training rockets to meet Army requirements; and the attainment of competition in future procurements of training rockets.

The House bill contained no similar provision.

The House recedes with an amendment.

The conferees agree to authorize up to \$10.0 million for full qualification and operational platform certification of a Hydra-70 rocket with a 2.75-inch rocket motor with composite propellant, for use on the AH-64D Apache helicopter.

Limitation on obligation of funds until receipt of electronic combat consolidation master plan (sec. 223)

The conferees agree to a provision that limits the obligation of appropriations for PE 65896A, PE 65864N, PE 65807F, and PE 65804D until 14 days after the Department of Defense submits to the congressional defense committees its master plan for the consolidation of electronic combat test and evaluation assets.

The House report (H. Rept. 103-499) directed the Secretary of Defense to develop a master plan for future consolidation of all DOD electronic combat test and evaluation assets. Further, the House report directed that no fiscal year 1995 or prior year funds be used to transfer or consolidate electronic combat test and evaluation assets until 30 days after the submission of the master plan to the congressional defense committees. To date, the master plan has not been provided to the congressional defense committees and funds continue to be obligated for purposes that contravene the House report language.

Requirement for report on reductions in research, development, test, and evaluation (sec. 225)

The conferees agree to a provision that requires the Under Secretary of Defense (Comptroller) to submit a report to the congressional defense committees by March 15, 1996 detailing the allocation of the following reductions in research, development, test, and evaluation required by the Department of Defense Appropriations Act of 1996: (1) general reductions; (2) reductions to reflect savings from revised economic assumptions; (3) reductions to reflect the funding ceiling for federally funded research and development centers; and (4) reductions for savings through improved management of contractor automatic data processing cost charged through indirect rates on Department of Defense acquisition contracts.

Advanced field artillery system (Crusader) (sec. 226)

The House bill contained a provision (sec. 255) that would impose spending authority limitations on the Secretary of the Army, unless certain technical performance criteria are achieved in the Crusader program. The provision would permit the Secretary to significantly alter the Crusader acquisition plan for the cannon propellant, if it is required to achieve the objectives of the Advanced Field Artillery System, provided notification is given to the defense committees of the Senate and House of Representatives.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would terminate funding for the liquid propellant portion of the Crusader program in the event that the Secretary fails to provide a report to the congressional defense committees by August 1, 1996, documenting that significant progress has been made in the liquid propellant and regenerative liquid propellant gun, in accordance with the acquisition program baseline objectives.

Demilitarization of conventional munitions, rockets, and explosives (sec. 227)

The House bill contained a provision (sec. 263) that would authorize \$15.0 million for the establishment of an integrated program for the development and demonstration of environmentally compliant technologies for

the demilitarization of conventional munitions, explosives, and rocket motors, and indicated specific technologies that should be considered in the program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would delete reference to specific technologies that should be considered in the program. The amendment reflects a conference agreement to authorize \$15.0 million in PE 63104D for the Conventional Munitions, Rockets, and Explosives Demilitarization account.

The conferees are concerned about requirements for disposal by the military services and defense agencies of growing numbers of unserviceable, obsolete, or non-treaty compliant munitions, rocket motors and explosives. As environmental constraints increasingly restrict the traditional disposal methods of open burning or open detonation, development and demonstration of environmentally compliant technologies for this purpose become even more urgent.

The conferees believe that a centralized conventional munitions and explosives disposal program should be established for this purpose within the Department of Defense (DOD) under a single program element, and that consideration should be given to the model of the Large Rocket Motor Demilitarization program, centrally managed by the Army as executive agent, with the requirements of the military services integrated through the Joint Ordnance Commanders' Group. In such a program, the conferees encourage the consideration of a range of competitively selected potential resource recovery and alternative demilitarization technologies, including (but not limited to) cryogenic washout, supercritical water oxidation, molten metal pyrolysis, plasma arc, catalytic fluid bed oxidation, molten salt pyrolysis, plasma arc, catalytic fluid bed oxidation, molten salt oxidation, incineration, critical fluid extraction and ingredient recovery, and underground contained burning.

The conferees direct the Secretary of Defense to submit a report of the DOD plan for the establishment of such a program to the congressional defense committees by March 31, 1996.

Defense airborne reconnaissance program (sec. 228)

The budget request included \$525.2 million for research and development for the Defense airborne reconnaissance program (DARP).

The House bill would add a total of \$121.6 million to the requested amount. The Senate amendment would increase the request by \$33.0 million. Details of the adjustments in the House bill and the Senate amendment, as well as the final conference agreement, are displayed in the table below:

	Budget request	House bill	Senate amendment	Conference agreement
Total	\$525.2	+\$121.6	+\$33.0	+\$114.8

MANNED AND UNMANNED RECONNAISSANCE SYSTEMS

The conferees remain optimistic about the future contributions of unmanned aerial ve-

hicle (UAV) systems to the Department of Defense's (DOD) reconnaissance missions. However, the conferees remain unwilling to sacrifice proven manned systems in the near-term for the promise of unproven future systems. Further, the conferees believe five major UAV programs are overly redundant. The conferees are aware of the Department's intent to reduce the number of UAVs to satisfy the tactical, theater, and strategic missions. The conferees agree that it is important for the Department to satisfy these three distinct missions.

Further, the conferees believe the Department's endurance UAV programs must be viewed in the larger context of the broad area search/wide area surveillance missions. The conferees are concerned that the current and projected array of sensors (including Tier II+ and Tier III- UAVs, SR-71, U-2, and national systems) are not simply "complementary", but are "duplicative". The conferees will, therefore, remain extremely interested in the Department's future directions with respect to high altitude endurance UAV efforts.

MANEUVER UAV

The budget request included \$36.8 million for the maneuver UAV.

The House will deny any authorization for the maneuver UAV because the Department had failed to provide either a joint operational requirements document (JORD) or a cost and operational effectiveness analysis (COEA) in a timely manner.

The Senate amendment would approve the budget request.

The conferees agree to authorize \$26.8 million for the maneuver UAV. The conferees are disappointed that the Department took so long to complete the JORD and the COEA. The conferees hope that the results of the ongoing review of the various UAV programs will be provided to the congressional defense and intelligence committees in a more timely fashion.

JOINT TACTICAL UAV

The conferees remain particularly concerned about the Department's inability to develop and pursue a cohesive joint tactical UAV (JT-UAV) master plan for longer than a four month period. The conferees direct the Department not to use appropriated fiscal year 1996 funds to procure production Hunter UAV systems or additional low rate initial production units beyond those already ordered. The conferees intend that this prohibition remain in effect until the Department provides the congressional defense and intelligence committees with the results of its UAV program review. Accordingly, if the Department's review results in the cancellation of one or more of the currently planned UAV programs, the conferees direct the Department to seek reprogramming actions to use those funds to satisfy other CINC near-term reconnaissance support requirements. Any funds made available as a result of Department decisions on UAVs will remain within the DARP account. Of any resources made available from UAV restructuring, the conferees direct that the Department use them to fully fund the U-2 sensor upgrades described later in this section. Any additional excess resources over those used for U-2 sensor upgrades may be used for the naval variant (VTOL). Further, the conferees specifically deny authorization of any fiscal year 1996 funds for marinization of the Hunter UAV.

NAVAL VARIANT UAV

The conferees agree that development and evaluation of a joint tactical UAV (JT-UAV) short or vertical take-off and landing (STOL/VTOL) variant for naval applications should be continued and structured on existing suc-

cessful efforts. The conferees agree to authorize an additional \$12.5 million to support continued development and evaluation of VTOL JT-UAV variants, as detailed in the Senate report (S. Rept. 104-112). The conferees intend that the Department limit its air vehicle evaluation to items that are low risk, currently available off-the-shelf, and have the demonstrated potential to meet joint tactical UAV interoperability and performance requirements.

MEDIUM ALTITUDE ENDURANCE UAV (PREDATOR)

The House bill would authorize an additional \$25.9 million for the Tier II medium altitude endurance UAV (Predator).

The Senate amendment included a provision (sec. 131) that would deny funds for the Tier II system.

The Senate recedes.

The conferees agree to authorize an additional \$25.3 million for another Predator system (air vehicles and ground station) and replacement air vehicles. The conferees are encouraged by the successes of the Predator advanced concept technology program, and particularly by the theater commanders' praise for its contributions in the Bosnia area. The conferees strongly support continuation of this ACTD, and encourage the Department to take the necessary steps to make a full production decision. The conferees believe this vehicle could satisfy multiple operational roles, including the theater and maritime roles. The conferees encourage the Department to develop plans for a maritime use of this vehicle. Such planning should include conducting an operational demonstration at sea. Finally, the conferees agree to authorize all prior year allocated funds.

HIGH ALTITUDE ENDURANCE UAVS

The House bill would authorize an additional \$60.0 million for the Tier II+ and \$35.0 million for the Tier III-.

The Senate amendment would authorize the budget request for both programs.

The House recedes on Tier II+. The Senate recedes on the Tier III-. The conferees agree to authorize an additional \$18.0 million for Tier III-.

As with the JT-UAV, the conferees expect the Department to make acquisition decisions on this issue based on operational requirements. However, the conferees emphasize that the Department needs a more capable, low observable vehicle. The conferees agree that the Department should use the additional \$18.0 million for Tier III- to buy the third air vehicle in fiscal year 1996, instead of fiscal year 1997. The conferees direct the Department to provide the congressional defense and intelligence committees with a report on the operational user needs for such a vehicle. If the current estimate of the Tier III- system capabilities fall short of those needs, the Department should outline its technical proposals to improve this vehicle, in response to those user requirements.

U-2 SENSOR UPGRADES

The House bill would authorize an additional \$14.0 million to upgrade all Senior Year electro-optical reconnaissance sensors (SYERS) to the newest configuration, upgrade existing ground stations, and improve geolocational accuracy through various product improvements.

The Senate amendment would authorize an additional \$20.0 million to initiate the remote airborne SIGINT system upgrade program.

The Senate report (S. Rept. 104-112) contained a technical error in the table for Research, Development, Test, and Evaluation (RDT&E), Defense-Wide, that shows an increase in the DARP PE 35154D, line 102, rather than in line 124. This error was facilitated

by the Department's budget exhibit for RDT&E programs (R-1) in which both of these budget lines are associated with the same program element. The conferees encourage the Defense Airborne Reconnaissance Office (DARO) to carry a single R-1 line for an individual program element in the future.

The conferees view with concern the DARO's lack of emphasis on manned reconnaissance upgrades, and include a provision that requires the Director of the DARO to expeditiously carry out those upgrades. The conferees agree to authorize \$34.0 million to meet U-2 sensor upgrade requirements, and direct the Secretary of Defense to provide a report on the Department's plans to obligate funds for U-2 upgrades prior to February 1, 1996.

U-2 DEFENSIVE SYSTEMS

The conferees agree to authorize \$10.0 million to upgrade U-2 defensive systems for the purposes specified in the Senate Report (S. Rept. 104-112).

COMMON IMAGERY GROUND/SURFACE SYSTEM (CIGSS)

The budget request included \$161.8 million for the CIGSS effort.

The House bill would authorize an additional \$16.0 million. This increase would be used to mitigate a near-term funding shortfall for DARO's "migration" of the various imagery ground stations to a common architecture.

The Senate amendment would approve the budget request.

The conferees agree to authorize an additional \$11.0 million for this effort.

INTELLIGENCE DISSEMINATION

The budget request included funds for numerous intelligence dissemination systems and data links.

The House bill would restrict the use of funds pending the Department's development of a coherent, long-term intelligence dissemination architecture and a plan for development of a joint tactical transceiver (JTT).

The Senate amendment would authorize the requested amounts.

The House recedes.

The conferees are pleased with the Department's response to the House bill provision. The conferees believe that the Department is moving in the right direction to ensure service interoperability and to reduce the number of unique tactical intelligence transceivers. Additionally, the conferees are aware that the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence is monitoring efforts to develop advanced software reprogrammable radios. The conferees strongly encourage continued involvement in this technology development, as it appears to have great potential for future application in the JTT program. The conferees will continue to monitor the progress of the Department's approach.

ELECTRO-OPTICAL FRAMING SENSOR DEVELOPMENT

The House would authorize an additional \$5.0 million to continue development and evaluation of airborne electro-optic framing sensor and multi-spectral framing technologies with on-chip forward motion compensation. These improved capabilities could be used to support precision targeting.

The Senate amendment included no similar adjustment.

The conferees agree to authorize \$7.0 million for this purpose.

The conferees are pleased with the results of the four million picture element (four mega-pixel) framing demonstration. The conferees encourage the Department to program funding to accelerate the four mega-

pixel and the 25 mega-pixel sensor initiatives.

MULTI-FUNCTION SELF-ALIGNED GATE TECHNOLOGY

The conferees agree to authorize \$8.0 million for multi-function self-aligned gate (MSAG) technology for the purposes specified in the House report (H. Rept. 104-131).

JOINT AIRBORNE SIGINT ARCHITECTURE

The budget request included \$88.8 million for the joint airborne signals intelligence (SIGINT) architecture (JASA) program.

The House bill would restrict obligation of fiscal year 1996 funds for JASA to no more than 25 percent of available funds until the Department submits an analysis and report that includes a comparison of future years defense programs (FYDP) and life cycle costs for development and fielding of the joint airborne SIGINT system (JASS), and that address a more conventional, evolutionary, product-improvement approach.

The Senate amendment would authorize the requested amount.

The House recedes on the funding restrictions.

Despite their support for the evolving concept and development of JASA, the conferees remain concerned about several issues:

- (1) the Department's ability to sustain current operational systems;
- (2) elimination of the potential for airborne SIGINT modernization gaps prior to fielding JASA components;
- (3) the projected costs of the JASS program; and

(4) the risk that current approaches may sacrifice near and mid-term operational requirements for promised long-term common solutions.

The conferees believe that there is a need to continue interim, affordable, incremental upgrades, and to provide quick reaction capability improvements to meet emerging requirements, while continuing the JASA architectural approach. The conferees encourage competitive evolutionary solutions to satisfy existing and projected SIGINT requirements, and urge the earliest delivery of architecturally compliant components for evolving current and future systems. The conferees expect future budget requests for the DARO to include funding for these efforts. The conferees direct the DARO Director to certify to the congressional defense and intelligence committees that the individual SIGINT systems will be upgraded to incorporate these interim needs, as identified by the operational users.

The conferees direct the Department to provide an interim report by March 1, 1996, with a completed report by August 1, 1996, that includes:

(1) an independent cost and operational effectiveness analysis that compares the FYDP and life-cycle costs of the JASS program to an evolutionary product improvement approach, based on equivalent system performance;

(2) an evaluation of cost, technical and schedule risks, as well as a comparison of technical requirements and JASS performance; and

(3) the Department's assessment of its ability to predict both the future threat and technology environments necessary to determine whether a single approach is viable and in the nation's best interests.
