

emissions fell nearly 90 percent. To put it another way, we took nearly five ounces of lead out of the sky for every American man, woman, and child. Emissions of sulfur dioxide, carbon monoxide, and particulates are way down, and half as many Americans live in cities with unhealthy air as in 1970.

Our water is cleaner. You can swim without getting sick and eat the fish you catch in twice as many rivers and streams. Even the Cuyahoga River has revived, to become a center for tourism in downtown Cleveland. The bald eagle is back from the brink of extinction.

Overall, because of the work of Ed Muskie and his colleagues, our children are growing up in a more healthy and beautiful America.

Mr. President, I am reminded of the Latin epitaph on the tomb of Sir Christopher Wren, the architect of St. Paul's Cathedral. It's inside the cathedral, and it says, "If you would see his memorial, look around."

So it is with Ed Muskie. If you wish to see his memorial, look around you: at the air in our cities; at the Potomac River, or the Cuyahoga; at a cleaner environment from Maine to Montana; at a nation that is more healthy and more beautiful because of his work.

He was a great environmental statesman, and his passing diminishes us.

#### THE BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, as of the close of business yesterday, March 25, 1996, the Federal debt stood—down-to-the-penny—at \$5,063,054,197,564.33. On a per capita basis, every man, woman and child in America owes \$19,141.70 as his or her share of that debt.

#### TITLE I—MANAGEMENT OF GRAZING ON FEDERAL LAND

##### Subtitle A—General Provisions

##### SEC. 101. FINDINGS.

(a) FINDINGS.—Congress finds that—

(1) multiple use, as set forth in current law, has been and continues to be a guiding principle in the management of public lands and national forests;

(2) through the cooperative and concerted efforts of the Federal rangeland livestock industry, Federal and State land management agencies, and the general public, the Federal rangelands are in the best condition they have been in during this century, and their condition continues to improve;

(3) as a further consequence of those efforts, populations of wildlife are increasing and stabilizing across vast areas of the West;

(4) grazing preferences must continue to be adequately safeguarded in order to promote the economic stability of the western livestock industry;

(5) it is in the public interest to charge a fee for livestock grazing permits and leases on Federal land that is based on a formula that—

(A) reflects a fair return to the Federal Government and the true costs to the permittee or lessee; and

(B) promotes continuing cooperative stewardship efforts;

(6) opportunities exist for improving efficiency in the administration of the range programs on Federal land by—

(A) reducing planning and analysis costs and their associated paperwork, procedural, and clerical burdens; and

(B) refocusing efforts to the direct management of the resources themselves;

(7) in order to provide meaningful review and oversight of the management of the public rangelands and the grazing allotment on those rangelands, refinement of the reporting of costs of various components of the land management program is needed;

(8) greater local input into the management of the public rangelands is in the best interests of the United States;

(9) the western livestock industry that relies on Federal land plays an important role in preserving the social, economic, and cultural base of rural communities in the Western States and further plays an integral role in the economies of the 16 contiguous Western States with Federal rangelands;

(10) maintaining the economic viability of the western livestock industry is in the best interest of the United States in order to maintain open space and fish and wildlife habitat;

(11) since the enactment of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and the amendment of section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16

U.S.C. 1604) by the National Forest Management Act of 1976 (16 U.S.C. 472a et seq.), the Secretary of the Interior and the Secretary of Agriculture have been charged with coordinating land use inventory, planning and management programs on Bureau of Land Management and National Forest System lands with each other, other Federal departments and agencies, Indian tribes, and State and local governments within which the lands are located, but to date such coordination has not existed to the extent allowed by law; and

(12) it shall not be the policy of the United States to increase or reduce total livestock numbers on Federal land except as is necessary to provide for proper management of resources, based on local conditions, and as provided by existing law related to the management of Federal land and this title.

(b) REPEAL OF EARLIER FINDINGS.—Section 2(a) of the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901(a)) is amended—

(1) by striking paragraphs (1), (2), (3), and (4);

(2) by redesignating paragraphs (5) and (6) as paragraphs (1) and (2), respectively;

(3) in paragraph (1) (as so redesignated), by adding "and" at the end; and
