

The SPEAKER pro tempore. Without objection, the resignation of Mr. HOYER as a conferee on the primary panel of conferees is accepted, the gentleman from Ohio, Mr. STOKES is appointed to fill the resulting vacancy among the primary panel of conferees, and is reappointed as a conferee for consideration of section 101(c) of the House bill and section 101(d) of the Senate amendment and modifications committed to conference.

There was no objection.

The SPEAKER pro tempore. The Clerk will notify the Senate of the change in conferees.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has concluded on all motions to suspend the rules but not before 5 p.m. today.

#### BATTERY RECYCLING AND OTHER ENVIRONMENTAL ISSUES

Mr. RICHARDSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Without objection, the gentleman from New Mexico is recognized for 1 minute.

There was no objection.

Mr. RICHARDSON. Mr. Speaker, on the issue of the environment and Earth Day, we have to be very careful not to politicize these issues. We are about to take up a battery recycling bill, which is a good bill. By the way, it used to be my bill and FRANK PALLONE' bill, now is a Republican bill. We accept that. Things change.

But we should not, by passing this bill, say that we have ended our tasks in protecting the environment. Battery recycling is important, but it does not correct the environmental rollbacks that many in this Republican majority have pursued this year: Weakening the Clean Water Act, slashing funding for the EPA, weakening the Endangered Species Act, attempting to close down some of our national parks.

We want to take some positive steps on the environment. We also should pass a bipartisan Superfund bill that does not pass the cost of cleanups on to the taxpayer, a safe drinking water bill that keeps public health as a top priority, a park concessions bill that allows fair competition to concessionaires and keeps the cost of visiting our parks down to all Americans.

I do want to commend, I will be commending Chairman BLILEY, Chairman OXLEY, Chairman DINGELL, and ranking member PALLONE for their efforts

to bring this battery recycling bill to the floor. Hopefully this will be a good precedent for the Republican majority to celebrate our environment, not just on Earth Day by going to a zoo and exhibiting concern for animals, but by passing concrete legislation.

Mr. Speaker, I think that this is starting to happen with our majority here that realizes that taking on the environment has not been a good issue, that going out and weakening our environmental laws has rebounded negatively with voters. This is a good bill, and our colleague, the gentleman from Wisconsin [Mr. KLUG], should be commended for it.

I especially want to commend the work of the gentleman from New Jersey [Mr. PALLONE], who has been a leader in the fight on mercury poisoning; that is, reducing it. He has been a leader in many issues relating to recycling.

Mr. Speaker, I yield to the gentleman from New Jersey [Mr. PALLONE].

Mr. PALLONE. Mr. Speaker, I want to thank the gentleman from New Mexico for those very kind remarks and, of course, say the same thing about him. I know this battery bill has been very important to him and the whole issue of battery recycling and concern for mercury in the atmosphere.

I agree with him completely when he says that as much as we believe that this bill is important today and we certainly do want it to pass, that that should not take away from what the Republican majority and the Republican leadership are doing about the environment in general, and how they are continuing to try to move legislation on the floor of this House that would tear down the environmental protections we have had in place for a number of years.

Particularly, today I found out in the Committee on Appropriations, although they are very close to agreement on a spending bill that would take us through the remainder of this year, that the disagreement once again is over environmental issues and over the fact that the Republican leadership insists on these environmental riders or antienvironmental riders that are placed in the appropriations bill that would, among other things, prohibit new Superfund sites from being designated, prohibit the EPA from designating standards for radon in drinking water, prohibit the EPA from being involved in wetlands protection, and the list goes on and on.

□ 1445

So they are continuing their assault on the environment; that is, the Republican majority, at the same time they are making an effort today, or at least to seem to try to show today, that they do bring some environmental legislation to the floor. We cannot mask the fact that some of these measures like the battery recycling bill, even though they are very important, are small measures compared to the

damage the Republican majority is doing to the environment.

If I could just for a minute quote what I thought was a great editorial in yesterday's New York Times, just some of it, that is called "Defunding Mother Earth." It says:

There are many destructive proposals on the Congressional agenda, including several bills that would transfer millions of acres of public land to state and commercial jurisdiction. But the most urgent example of bad legislation is an omnibus appropriations bill now under consideration in a House Senate conference. The bill sharply reduces appropriations for the Environmental Protection Agency and the Interior Department and contains a dozen or so crippling anti-environmental riders.

Today marks the 26th anniversary of Earth Day. In full knowledge of that, House Speaker Newt Gingrich recently formed a 77-member Republican environmental task force. Although 36 members of this task force earned "zero" ratings from the League of Conservation Voters for their routine support of anti-environmental legislation, many of them are likely to spend the week planting trees, visiting zoos and striking friendly poses next to recycling bins. But the best thing Mr. Gingrich could do for his country and his party would be to recognize that what counts here is content, not imagery—and remove those riders from the appropriations bill.

Once again, we need to keep pressing the point that you cannot talk about the environment in a favorable way, and move some bills, and at the same time continue the assault on the environment to tear down the last 25 years of environmental protection since Earth Day.

Mr. RICHARDSON. Mr. Speaker, reclaiming my time, I thank the gentleman from New Jersey. I hope our friends from the majority are on their way. Here is their opportunity to do a real environmental bill. I hope they are not hesitating. I am sure they are on their way. I thank the Chair for allowing this dialog.

This does not diminish the fact this is a good bill, this battery recycling bill. It is something I will say industry, some industry, has taken a very positive role in changing this, in being constructive about change. Hopefully, it will lead to other issues that involve protecting the environment. I think it is very important that we have a bipartisan bill on Superfund, a meaningful bipartisan bill, that does not pass the cost of cleanups on to the taxpayer.

Next, this is the very glorious Committee on Commerce, a safe drinking water bill that keeps public health as a top priority.

#### MERCURY-CONTAINING AND RECHARGEABLE BATTERY MANAGEMENT ACT

Mr. OXLEY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2024) to phase out the use of mercury in batteries and provide for the efficient and cost-effective collection and recycling or proper disposal of used nickel cadmium batteries, small sealed lead-acid batteries, and certain other
