

this killer. Amazingly, nearly two-thirds of women who died suddenly of heart attack had no prior history of heart disease, and no risk was detected.

Public health experts have drawn many links between the difficulties poor and working women face and increased risk of disease. Cardiovascular diseases are no exception to these health effects of inequality.

Furthermore, cardiovascular diseases strike African-American women particular hard. African-American women die of heart attacks at twice the rate of other women, and die from strokes at a 33-percent higher rate than white women.

The risk factors that increase likelihood of cardiovascular diseases are also greater for African-American women than white women, including a higher incidence of diabetes, higher percentage with elevated cholesterol levels, less physical activity, and a greater rate of obesity.

These factors—often stemming from stress and struggle of trying to make ends meet—are commonly known with health care professionals—yet these factors and the deadly cardiovascular diseases that result are almost invisible in the policy debates and public discussions of our Nation's health and welfare.

That is why I urge you to join me in supporting the Women's Cardiovascular Diseases Research and Prevention Act. We who know better must create the kind of pressure, through broad education and study that will put this issue at the center of our public health initiatives, not stuck on the fringes, while striking, literally, at the heart of the women in America.

This bill aims to lay the critical foundation for the research and public education that is needed to turn around this largely silent killer of America's women. The bill authorizes \$140 million to the National Heart, Lung, and Blood Institute of the National Institutes of Health to expand studies on heart diseases to include women and conduct outreach that will reach women. This authorization will start to make up for the many years in which women and minorities have been greatly underrepresented in heart and stroke research.

Currently, most if not all, diagnostic equipment and treatments are based on studies limited to men. The results of this research bias has meant many health care professionals remain unaware of the varied and often subtle symptoms of heart diseases women may have, like dizziness, breathlessness, and arm pain.

This bill will provide those responsible for detecting and treating women with the knowledge necessary to combat these diseases among women.

This bill seeks to use the results of this research as well, spreading this knowledge beyond the hospitals and laboratories. This bill would establish targeted outreach programs for women and health care providers alike to educate all of us on the common symptoms of and risk factors contributing to cardiovascular diseases among women.

The Women's Cardiovascular Diseases Research and Prevention Act can be a crucial first step in getting timely diagnosis, effective treatment and broad, effective prevention measures for the leading killer of American women. I look forward to working with the members of the Congressional Caucus of Women's Issues, and all other interested Members of Congress to pass this legislation.

Again, I would like to thank you for the opportunity to speak to you today.

#### GENERAL LEAVE

Mr. ROEMER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of this special order this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

#### REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2, HOUSING OPPORTUNITY AND RESPONSIBILITY ACT OF 1997

Ms. PRYCE of Ohio (during the special order of the gentlewoman from Maryland, Mrs. MORELLA) from the Committee on Rules, submitted a privileged report (Rept. No. 105-81) on the resolution (H. Res. 133) providing for consideration of the bill (H.R. 2) to repeal the United States Housing Act of 1937, deregulate the public housing program and the program for rental housing assistance for low-income families, and increase community control over such programs, and for other purposes, which was referred to the House Calendar and ordered to be printed.

#### REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 867, ADOPTION PROMOTION ACT OF 1997

Ms. PRYCE of Ohio (during the special order of the gentlewoman from Maryland, Mrs. MORELLA) from the Committee on Rules, submitted a privileged report (Rept. No. 105-82) on the resolution (H. Res. 134) providing for consideration of the bill (H.R. 867) to promote the adoption of children in foster care, which was referred to the House Calendar and ordered to be printed.

#### THE NORTH AMERICAN FREE TRADE AGREEMENT

The SPEAKER pro tempore. Under the Speaker's announced policy of January 7, 1997, the gentleman from Michigan [Mr. BONIOR] is recognized for 60 minutes as the designee of the minority leader.

Mr. BONIOR. Mr. Speaker, I will insert in the RECORD the statement by the gentleman from California [Mr. MILLER] under the remarks of this special order.

Mr. Speaker, I would also say to my friend and colleagues that I am joined this evening by a distinguished colleague of mine from the State of Vermont who has been a champion on fair trade in this country, BERNIE SANDERS. If I could, I would like to make a few brief remarks and then yield to my

friend from Vermont, [Mr. SANDERS] or whomever else would like to engage in this debate.

Mr. Speaker, we have been meeting here on a weekly basis to talk about the effects of the North American Free Trade Agreement. Let me just begin by saying after 3 years, actually 40 months, we are now able to look closely at the effects of the North American Free Trade Agreement, and I would recommend to my colleagues an editorial today in the New York Times because this editorial really shows us how the issues of trade and protecting the environment are really inseparably linked. We are going to talk about the environment a little bit, and then we are going to get to some other issues with respect to corporations. The editorial discussed the environmental challenges that the Nation of Chile is facing.

Mr. Speaker, I insert in the RECORD a copy of that editorial that was in the New York Times this morning.

The article referred to is as follows:

#### SLIGHTING NATURE IN CHILE

When Augusto Pinochet stepped down as President in 1990, Chile's people hoped that democracy would bring an improvement in the country's environment. The dictatorship had listened mainly to its friends in industry, and Chileans hoped that a new government would heed conservationists and public health advocates. What they did not count on was that in Chile, like most developing countries eager to attract foreign investment, the desire for growth outweighed environmental concerns.

As a result, air and water pollution remain serious threats to public health. Chile is also destroying irreplaceable natural resources through logging of old-growth forests and overfishing.

Chile has some tough environmental laws but, as in other Latin nations, they are not well enforced—in part because of the desire for growth. Chile is justifiably proud of a decade of growth at more than 5 percent, much of it from exports from mining, forest products and fishing, which damaged the environment unless carefully regulated.

These extractive industries exercise great political influence. Moreover, unlike their American and European counterparts, business leaders in Chile see no particular public relations value in supporting environmental causes. The Chilean industrialists' group has even hinted that it will organize a boycott of "Oro Verde," a prime-time soap opera with an environmental theme.

Businesses commission the required environmental impact statements, and the government board that evaluates them often cannot afford to hire experts to do a thorough job. On several occasions when the board has rejected major investment proposals, political commissions have allowed the projects to proceed. President Eduardo Frei has often said he will not let environmental concerns stand in the way of growth.

Chile's environmental groups are small and rely heavily on volunteers. But they have helped raise public awareness of environmental issues to the point where politicians cannot risk ignoring them. And they have mounted successful court challenges. Chile's supreme court just blocked a major logging project by an American company, declaring that Chile's basic environmental law was too vague. New regulations were quickly passed.

The court is surely on the right track. No one has calculated the yearly cost of environmental damage to Chileans' health and
