

and second time by unanimous consent, and referred as indicated:

By Mr. MURKOWSKI:

S. 691. A bill entitled the "Public Land Management Participation Act of 1997"; to the Committee on Energy and Natural Resources.

By Mr. REID:

S. 692. A bill to require that applications for passports for minors have parental signatures; to the Committee on Foreign Relations.

By Mr. D'AMATO:

S. 693. A bill to amend the Internal Revenue Code of 1986 to provide that the value of qualified historic property shall not be included in determining the taxable estate of a decedent; to the Committee on Finance.

By Ms. SNOWE:

S. 694. A bill to establish reform criteria to permit payment of United States arrearages in assessed contributions to the United Nations; to the Committee on Foreign Relations.

S. 695. A bill to restrict intelligence sharing with the United Nations; to the Committee on Foreign Relations.

S. 696. A bill to establish limitations on the use of funds for United Nations peace-keeping activities; to the Committee on Foreign Relations.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BENNETT (for himself, Mr. D'AMATO, Mr. HELMS, Mr. DODD, Mr. ASHCROFT, Mrs. HUTCHISON, and Mr. BROWNBACK):

S. Res. 82. A resolution expressing the sense of the Senate to urge the Clinton Administration to enforce the provisions of the Iran-Iraq Arms Non-Proliferation Act of 1992 with respect to the acquisition by Iran of C-802 cruise missiles; to the Committee on Foreign Relations.

By Ms. SNOWE:

S. Con. Res. 24. A concurrent resolution expressing the sense of Congress on the importance of the Eastern Orthodox Ecumenical Patriarchate; to the Committee on Foreign Relations.

S. Con. Res. 25. A concurrent resolution expressing the sense of the Congress that the Russian Federation should be strongly condemned for its plan to provide nuclear technology to Iran, and that such nuclear transfer would make Russia ineligible under terms of the Freedom Support Act; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MURKOWSKI:

S. 691. A bill entitled the "Public Land Management Participation Act of 1997"; to the Committee on Energy and Natural Resources.

THE PUBLIC LAND MANAGEMENT PARTICIPATION ACT OF 1997

Mr. MURKOWSKI. Mr. President, I will take this opportunity to rise this afternoon to introduce a very important piece of legislation that I know the occupant of the chair will find interesting. It is called the Public Land Management Participation Act of 1997.

This legislation is intended to put the word "public" and the populace

back into public land management and the word "environment," back into environmental protection.

Passage of this act will ensure that all the gains that we made over the past quarter of a century in creating an open, participatory Government which affords strong environmental protection for our public lands are really protected.

For those who thought that those battles were fought and won with the passage of the National Environmental Protection Act in 1969 and the Federal Land Policy Management Act in 1976, I have some bad news. There is one last battle to be fought.

Standing in this very Chamber on January 20, 1975, Mr. President, Senator Henry "Scoop" Jackson of Washington State spoke to the passion Americans feel for their public lands. He said:

The public lands of the United States have always provided the arena in which we Americans have struggled to fulfill our dreams. Even today dreams of wealth, adventure, and escape are still being acted out on those far-flung public lands. These lands and the dreams—fulfilled and unfulfilled—which they foster are part of our national destiny. They belong to all Americans.

I quote and emphasize, Mr. President, "They belong to all Americans."

Amazingly—there exist today legal authorities by which the President, without the public process or congressional approval, can create vast land management units called national monuments, world heritage sites, and biospheric reserves.

Special management units which affect how millions of acres of our public lands are managed. What people can do on those lands is also affected, what the future will be for surrounding communities.

That is a powerful trust to bestow on anyone, even a President.

On September 12, 1996, the good people of Utah woke up to find themselves the most recent recipient of a philosophy that says, "Trust us. We are from the Government, and we know what is best for you." On that day, standing not in Utah but in the State of Arizona, our President invoked the 1906 Antiquities Act to create 1.7 million acres of national monument in southern Utah.

Notice, Mr. President, he did not do this in Utah. He did it in Arizona. One can only assume he might have had some protests if he had done it in Utah. The withdrawal, however, took place in Utah. It created a 1.7 million acre national monument in the southern part of the State. By utilizing this antiquated law, the President was able to avoid—that's right, avoid—Nation's environmental laws and ignore public participation laws as well. With one swipe of the pen, every shred of public input and environmental law promulgated in this country over the past quarter of a century was shoved into the trash heap of political expediency.

What happened in Utah last fall is but the latest example of a small cadre

of administration officials deciding for all Americans how our public lands should be used. It is by no means the only one, Mr. President. As the Senator from Alaska, I have had a great deal of personal experience in this area.

In 1978, President Jimmy Carter created 17 national monuments in Alaska covering more than 55 million acres of lands. That is an area about the size of South Carolina. He withdrew these lands, with the stroke of his pen—no public process, no hearing, no participation from the State. This was then followed in short order by Secretary of the Interior Cecil Andrus, who withdrew an additional 50 million. A total of 105 million acres, Mr. President. All this land was withdrawn for multiple use without any input from the people of my State, the public, or the Congress of the United States. With over 100 million acres of withdrawn land held over Alaska's head, like the sword of Damocles; we were forced to cut the best deal we could. Twenty years later, the people of my State are still struggling to cope with the weight of these decisions.

I would not be here this afternoon if the public, the people of Utah and Congress, had not been denied a voice in the creation of the Grand Staircase-Escalante National Monument. I would not be here if environmental protection procedures had not been ignored.

But the people were denied the opportunity to speak. Mr. President, Congress was denied its opportunity to participate, and environmental procedure was simply ignored. The only voice we have heard was the President's. Without bothering to ask us what we thought about it, he told the citizens of Utah and the rest of the country that he knew better than we did what was good for us.

Now, this is an administration that prides itself in a public process. There was no public process here, Mr. President. We had been debating for some time the issue of Utah wilderness. It was ongoing, but the President, for political expediency, took it upon himself to invoke the Antiquities Act. It has been a long time since anyone has had the right to make those kind of unilateral public land decisions for the American public. Since the passages of the Federal Land Policy and Management Act in 1976, we have had a system of law underpinning public land use decisions. Embodied with this law is public participation. Agencies propose an action, they present the action to the public, the public debates the issue. The public can then appeal bad decisions, the courts resolve the disputes, and the management unit is then created.

Where was this public process, Mr. President, in the special use designation of 1.7 million acres of Federal land in southern Utah? The answer is clear: There wasn't any. Since the passage of the National Environmental Policy Act
