

throughout the country, will take with them, as I know they will, a part of us, as we will keep with us a part of them.

I take occasion to talk with these young people every now and then. I have told them some stories over the days and weeks. I have told them the story of "The House with the Golden Windows." I have told them Tolstoy's story, "How Much Land Does a Man Need?" And then I related to them a story that was told by Russell Conwell, one of the early Chautauqua speakers, which he had related 5,000 times—the story titled "Acres of Diamonds." And, of course, there have been other stories. But I have found the pages to be so eager—eager to learn, eager to serve.

I think we can all be proud of our young people. We hear sometimes about the bad apples, and there are a few bad apples around. The problem is, they crowd out our view of the good apples. Most of our young people are wholesome, fine young people. They are working in the school rooms, the libraries, the laboratories, and seeking to develop their minds. Perhaps we don't hear as much of them. But they are the future citizens of this country, the great resource of the country. And one day, they will be the chemists, the architects, the teachers, the ministers, the lawyers, the Senators. I know, I have seen that gleam in their eyes. Some of them are thinking about coming back here already—as Senators.

I hope that we Senators have conducted ourselves in a way that will make the pages feel proud of us—proud that you have had the honor and the good fortune to serve here, because it is an honor and you have been fortunate. There are millions of young people throughout this country who would love to serve as pages in the Senate. So I hope that we have, in some way, inspired you to serve and to want to learn. I hope that you will continue to learn. Always seek to excel, to be the best at whatever you are doing. There is always a place for you at the top.

Unfortunately, not too many people want to start at the bottom anymore. But you should be willing to start at the bottom and seek to excel and to learn. In due time, you will be rewarded. Solon said, "I grow old in the pursuit of learning." So continue to learn all of your lives.

We praise the great athletes, but no ballgame ever changed the course of history. Study math, science, chemistry, physics, read well; and in due time, you will contribute to your community and to your country.

A careful man I want to be, a little fellow follows me.

I do not dare to go astray, for fear he will go the self same way.

He thinks that I am good and fine, believes in every word of mine.

The base in me he must not see, that little chap that follows me.

I must remember as I go, through summer's sun and winter's snow,

I am building for the years to be, that little chap that follows me.

That is the way we feel about you. Most of us, certainly, have children and grandchildren, and you are somebody's children and somebody's grandchildren, and we know that they are proud of you.

I took a piece of plastic clay,
And idly fashioned it one day.
And as my fingers pressed it still,
It moved and yielded to my will.
I came again when days were past,
The bit of clay was hard at last.
The form I gave it, it still bore,
And I could change that form no more.

I took a piece of living clay,
And gently formed it day by day.
And molded with my power and art,
A young child's soft and yielding heart.
I came again when years were gone,
He was a man I looked upon.
He still that early impress wore,
And I could change him nevermore.

As I look back across the 80 years of my life, I have lived a full life, and it seems that it was only a little while ago when I was young, like the boys and girls who are our pages. Even then, I wanted to learn all that I could cram into my head, and I wanted to make something of myself, and to be somebody when I grew up to be a man. I, too, like you, had dreams of all the future years, of what I would do in the days to come.

Ah, how great it is to believe the dream,
As we stand in youth by the starlit stream,
But greater still to live life through,
And find at the end that the dream is true.

One thing, finally, I want to leave with you. Always take God with you. I have lived beyond the psalmist's promise.

The days of our years are threescore years and ten, and if by reason of strength they be fourscore years, yet is their strength, labour and sorrow; for it is soon cut off, and we fly away.

I have lived almost 80 years and I have seen times when I have felt God was near me and listening to me, and you will see those times, too. There will be times in your lives when you will be walking in deep valleys, and you may walk in crowds, but there will be someone closer than the crowd to you. There may be no one else around you, but there is someone with whom you can communicate, someone who will share your grief, and someone who will give you strength, someone who will help lift you up from under great burdens, and that someone is the Heavenly Father. No man is good. We all fall short of the glory of God. But there is a God up there.

Look at the stars tonight, if the skies are clear, and see God's wonderful handiwork. And remember that some of those stars are so far away that the light from them has been traveling millions of light-years—millions of light-years, that some of those stars are so large that they would not be able to pass between the Sun and the Earth. The Sun is 93 million miles away. Yet there are stars so huge that they could not pass between the Earth and the Sun.

Napoleon, as he sat listening to the discussions about material things on

the deck of a ship one night, pointed upward and said, "Say what you wish. Who made all of that?"

So you will come across doubters and skeptics and cynics. But you can trust in God. Remember, there are great physicists, great scientists, men and women who have earned degrees from the higher institutions of learning, but they know that there is a hand greater than the hand of man that has created the Earth and the universe—the universes. Keep your faith in Him.

These are the little random thoughts that I have, as we say goodbye to you tomorrow. We will always wish for you these things: work for your hands, a straight path for your feet, sunshine on your windowpane in the morning, a song in your treetop at evening, soft rains for your garden, happiness in your hearts, love at your firesides, and God's blessings always.

Mr. President, I yield the floor.

ADJOURNMENT UNTIL 11 A.M., MONDAY, JUNE 16, 1997

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until 11 a.m. on Monday, June 16.

Thereupon, the Senate, at 6:49 p.m., adjourned until Monday, June 16, 1997, at 11 a.m.
