

COMMITTEE ON ENERGY AND NATURAL  
RESOURCES

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be granted permission to meet during the session of the Senate on Thursday, March 5, for purposes of conducting a full committee hearing which is scheduled to begin at 9:30 a.m. The purpose of this oversight hearing is to consider the President's proposed budget for FY1999 for the Department of the Interior.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. CHAFEE. Mr. President, I ask unanimous consent on behalf of the Governmental Affairs Committee to meet on Thursday, March 5, 1998, at 4 p.m. for a business meeting. The agenda will be the approval of the Committee Report on the Special Investigation of Illegal and Improper Activities in Connection with 1996 Federal Election Campaigns.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE ON THE JUDICIARY

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on the Judiciary, be authorized to hold an executive business meeting during the session of the Senate on Thursday, March 5, 1998, at 10 a.m., in room 226 of the Senate Dirksen Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SUBCOMMITTEE ON CHILDREN AND FAMILIES

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources, Subcommittee on Children and Families, be authorized to meet for a hearing on after school child care during the session of the Senate on Thursday, March 5, 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SUBCOMMITTEE ON IMMIGRATION

Mr. CHAFEE. Mr. President, I ask unanimous consent that the subcommittee on Immigration, of the Senate Judiciary Committee, be authorized to meet during the session of the Senate on Thursday, March 5, 1998, at 2 p.m. to hold a hearing in room 226, Senate Dirksen Building, on: "Immigration and Naturalization Service Oversight: Reforming the Naturalization Process."

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND  
SPACE

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology and Space of the Committee on Commerce, Science, and Transportation be authorized to meet on Thursday, March 5, 1998, at 2 p.m. on commercialization of space.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

RECOGNITION OF LT. COL. EILEEN  
COLLINS, THE FIRST WOMAN SE-  
LECTED TO COMMAND A MIS-  
SION OF THE SPACE SHUTTLE

• Mr. MOYNIHAM. Mr. President, I rise to recognize the accomplishments of Lt. Col. Eileen Collins, a New York native who earlier this morning was named the first female space shuttle commander by first lady Hillary Rodham Clinton.

Ms. Collins was born in Elmira, New York and graduated from the Elmira Free Academy in 1974. She received her associate's degree in mathematics and science from Corning Community College in 1976, and a Bachelor of Arts degree in mathematics from Syracuse University in 1978. Ms. Collins later received graduate degrees in operations research and space systems management at Stanford University and Webster University.

Ms. Collins has logged over 4,700 hours in thirty different types of aircraft. She was an assistant professor of mathematics at the Air Force Academy in Colorado from 1986 to 1989 and also served as an instructor pilot during her time there. Her many awards include the Department of Defense Superior Service Medal, the Armed Forces Expeditionary Medal for service in Grenada, and the NASA Space Flight Medal.

Lt. Col. Collins has soared to great heights, both literally and figuratively. She is, in several senses, a modern day pioneer. Her career has already been distinguished by efforts to push forward the frontiers of knowledge, through her work as a scientist and as a professor. She has contributed to efforts to bridge gaps between Russia and the United States, though her service as the first woman to pilot the space shuttle during the first flight of the new joint Russian-American Space Program—a program which embodies our vision of a new era of international scientific collaboration. Moreover, she is a member of an elite cadre of women who have served in our astronaut program. Ms. Collins is one of only 27 women who have flown in the history of the U.S. space shuttle program, out of a total of 229 people. Today, she steps up to her place in history as the first woman to be assigned command of a space shuttle mission, and in so doing expands our national vision of the opportunities and possibilities open to all American women.

I am proud to claim Lt. Col. Collins as a native of New York State, and as a product of New York educational institutions through her undergraduate years. Good luck, congratulations, and Godspeed, Lt. Col. Collins. •

NEW HAMPSHIRE'S 1998 OLYMPIC  
GOLD MEDALISTS

• Mr. SMITH of New Hampshire. Mr. President, I rise today to congratulate

Sarah Tueting, Gretchen Ulion, Katie King, Tarah Mounsey, Tricia Dunn, Sue Merz, Colleen Coyne and Karyn Bye, all distinguished athletes, for bringing home an Olympic gold medal in women's hockey. This gold medal symbolizes their dedication to excellence, relentless drive for greatness and unflinching crusade to become the best of the best.

It is a special honor to have these Granite Staters represent our country and the State of New Hampshire while competing in Nagano, Japan. Concord's Tara Mounsey and Salem's Katie King both went to Brown University in Rhode Island. Tricia Dunn, a resident of Derry graduated from the University of New Hampshire.

I also feel New Hampshire has a special claim to the Olympiads that attended Granite State Universities. Sarah Tueting and Gretchen Ulion both went to Dartmouth College. Sarah is from Winnetka, Illinois, and Gretchen is from Marlborough, Connecticut. Also, Colleen Coyne, Sue Merz, and Karyn Bye all went to the University of New Hampshire. Colleen is from East Falmouth, Massachusetts, Sue is from Greenwich, Connecticut, and Karyn is from River Falls, Wisconsin.

The team was a strong medal contender coming into the Games, however, the Canadian team had a stronger pre-Olympic record. Nonetheless, they beat the odds and prevailed. Team USA went undefeated, winning the final gold medal game against Team Canada, 3 to 1.

Their triumph created an immediate boom to women's hockey. Like pioneers, they have forged ahead in a sport historically not common for women and have proven to the world that it is no longer a sport just for men. As a result, they have become a catalyst for significant change in the interest of women's hockey. Already, local skating rinks across the country are reporting huge increases in lesson sign-ups.

These young Americans have reached the pinnacle of success, achieved what most only dream about, and have proven once again that Americans continue to achieve great feats. They are very much like diplomats, proudly representing America and delivering a superb performance in the world arena of Olympiads.

This Olympic team best exemplifies the qualities of a winning team. Four words come to mind that best represent the tools they used to bring home the gold: teamwork, dedication, hard work, and perseverance. Their attributes are an example for all that inspire others to succeed and reach that dream of dreams.

As a participant in the Olympics, they have joined an elite group of athletes who have continued a tradition rooted since the days of the ancient Greeks. The Olympics are a time when countries come together and put aside their differences to celebrate not only competition but humanity. It is a gathering of diverse cultures, beliefs and

traditions which are brought together for a common cause. This event, for which these women have worked so hard is one of the few times the world can concur this way. To not only attend the Olympics but to win a gold medal is an honor of which they should all be proud.

Mr. President, I want to congratulate Sarah Tueting, Tarah Mounsey, Tricia Dunn, Sue Merz, Colleen Coyne and Karyn Bye for their outstanding accomplishments and I am proud to represent them in the U.S. Senate.●

#### INTERNATIONAL WOMEN'S DAY

● Mr. FEINGOLD. Mr. President, this weekend, on Sunday, March 8, 1998, the world community will celebrate International Women's Day. This day is a time to mark the achievements and progress of women around the world, but also to consider the long road we still have to travel to reach equality and respect for the basic human rights for all women.

Many women and men will mark this day by reflecting on how far women have come in many societies and by continuing to work toward true equality for women all across the globe. The United States has a lot to be proud of in this regard. Women make significant contributions at every level of our society, including in this distinguished body.

Unfortunately, a large number of women will not even know of this day, which is meant to be a celebration of their achievements and accomplishments. On International Women's Day, many women will continue to be subjugated by their husbands or their governments, and many will be unaware of the basic human rights to which they are entitled as members of the world community. In cities and towns all over the world—including in the United States—International Women's Day will be just another day in the long struggle for women to achieve equal pay for equal work, full political and religious rights, access to adequate health care and child care, and the right to control their own destinies. It is troubling that, while women make up approximately 51 percent of the world's population, many of them have little or no civil or political rights.

As Ranking Member on the Subcommittee on African Affairs of the Senate Committee on Foreign Relations, I have had no opportunity to learn much about the status of women on that continent. The conditions into which women are born in Africa vary from country to country and impact greatly on their chances for a successful, happy life. According to the United Nations, baby girls born between 1995 and 2000 in the West African country of Sierra Leone can expect to live approximately 39 years, the lowest for women born on that continent. In this small, war-torn nation, the infant mortality rate is 169 per 1,000 live births, the highest in Africa.

By contrast, the United Nations says, baby girls born in the United States during the same period, 1995–2000, can expect to live 80 years, more than twice as long as baby girls born in Sierra Leone. The infant mortality rate in this country is seven per 1,000 live births—162 less than that of Sierra Leone. The vast majority of baby girls born in the United States have a bright future ahead of them; their counterparts in Sierra Leone face instability and the constant threat of war. A baby girl born today in Wisconsin will share approximately 39 of her birthdays with a baby girl born today in Sierra Leone—sadly, it is unlikely that the baby girl in Sierra Leone will reach her 40th birthday.

In another war-torn African nation, Angola, the conditions are not much better. The thousands of unmarked landmines that riddle that country have contributed to the low 48-year life expectancy of Angolan women. According to the United Nations, women make up 46 percent of the nation's workforce, and 73 percent of women 15 and over contribute to the nation's economy. These women are indicative of those all over the African continent—and indeed all over the world. They literally carry the economy on their backs by producing handmade products and carrying them to markets, or single-handedly transporting bundles of wood or vessels of water for their families.

But, fortunately, not all of the women in Africa or the rest of the world experience such bleak circumstances. For example, women around the world have made great strides in business with the help of microcredit programs. These programs extend loans, often less than \$100, to women who need assistance starting or expanding a small business. The benefits of these loans, which are almost always repaid, far exceed their monetary worth. Domestic and international microcredit programs have enabled thousands of women to find the confidence necessary to become self-sufficient and to support their families without government assistance—often for the first time.

In a 1997 speech commemorating International Women's Day, Secretary of State Madeleine K. Albright said, "Advancing the status of women is not only a moral imperative; it is being actively integrated into the foreign policy of the United States. It is our mission. It is the right thing to do, and, frankly, it is the smart thing to do." I wholeheartedly agree with this statement. I am pleased that the United States is taking an active role in the worldwide promotion of the rights of women. These efforts include working with the United Nations High Commissioner for Refugees to establish guidelines to protect female refugees from sexual and physical assault and exploitation. The United States is also working to ensure that the War Crimes Tribunals for Rwanda and the Former

Yugoslavia will vigorously prosecute rape as a war crime. Too often, women have been the forgotten casualties of war. I am pleased that the United States government is working to ensure that female refugees are protected and that those who would use rape as a tactic of war are punished.

So, Mr. President, as the world prepares to celebrate International Women's Day, we should honor the achievements of women around the world, but we should not forget those who have little to celebrate.●

#### RECOGNITION OF ROSELLA SCHNAKENBERG

● Mr. BOND. Mr. President, I rise today to recognize Rosella Schnakenberg for her fifty years of service to First Community Bank in Ionia. On March 18, 1947, Rosella began working as a teller for the First Community Bank, then the Bank of Ionia. At the time she received a salary of \$75 a month. Today she is Vice President and Facility Manager of the Bank and oversees the day-to-day operations.

Through the years Rosella has watched the economic ups and downs of the bank and through it all has made sure that people have received quality service and the assistance they need. Watching people start businesses, purchase homes and pay for their children's college education has allowed her to see first hand the help she has given to others.

In addition to Rosella's faithful service to her work, she is a community leader in Cole Camp, Missouri. She has been playing the organ at St. John's Lutheran Church in Cole Camp for more than fifty years and volunteers much of her free time to visiting nursing homes so that residents have company. I wish her continued success and congratulate her for fifty years of loyal service.●

#### RED CROSS MONTH

● Mr. SARBANES. Mr. President, I rise today to pay tribute to the achievement and service of the American Red Cross. March has been declared "Red Cross Month" by Presidential Proclamation, and I can think of no more appropriate a season to recognize an organization whose mission centers on renewing hope for the citizens of our Nation.

Founded in May, 1881 by Clara Barton, the American Red Cross was charged with providing emergency relief in times of war and natural disaster. Today, the American Red Cross is the largest grass-roots volunteer organization in the United States with 2658 chapters and over a million volunteers. I am pleased that the United States Congress had the foresight in 1905 to designate the American Red Cross as the lead voluntary agency responsible for national and international relief in times of peace. In over a century of service, this organization has grown
