ROCKEFELLER (AND OTHERS)  AMENDMENT NO. 2816

(Ordered to lie on the table.) Mr. ROCKEFELLER (for himself, Mr. DURBIN, and Mr. HARKIN) submitted an amendment intended to be proposed by them to the bill, S. 2057, supra; as follows:

On page 41, below line 23, add the following:

SEC. 219. DOD/VA COOPERATIVE RESEARCH PROGRAM.

(a) AVAILABILITY OF FUNDS.—Of the amount authorized to be appropriated by section 214(a), $20,000,000 shall be available for the DoD/VA Cooperative Research Program.

(b) EXECUTIVE AGENT.—The Secretary of Defense shall be the executive agent for the utilization of the funds made available by subsection (a).

Mr. ROCKEFELLER. Mr. President, as Ranking Member of the Senate Committee on Veterans' Affairs, I have an especially strong interest in the history of illnesses and health concerns that follow military deployments. We have all observed the effects of post-conflict illnesses among our Gulf War veterans who returned with poorly understood, undiagnosed illnesses, and our Vietnam veterans with health problems related to exposure to Agent Orange. This legacy is not just a problem of our most recent conflicts; our Atomic-era veterans are still fighting for recognition of health conditions related to radiation exposures they experienced in service to their country 50 years ago.

If military is any single lesson to be learned from this history, it is that the Department of Defense and the Department of Veterans Affairs have not always been aggressive enough in pursuing the immediate health consequences of military conflicts. Too many times our veterans have had to wait years before post-conflict illnesses are recognized as real problems that require firm commitments of research and treatment programs. These delays have come at a cost to the veterans who have had to fight for this recognition, and they have come at a cost to the government’s credibility on this important issue.

I believe it is time to consider establishing an independent entity with the capacity to provide government efforts to monitor the health of servicemembers following military conflicts, and to evaluate whether servicemembers are being effectively treated for illnesses that occur following such deployments. There have been suggestions that the need for government credibility within DoD and VA, but I believe that important health expertise outside these agencies is required as well. Indeed, it may be that the best approach is one that Pulls together expertise from VA, DoD, and health care professionals and researchers from centers of medical excellence in fields such as toxicology, occupational medicine, and other disciplines.

Therefore, I would like to submit an amendment to the Department of Defense Authorization to require the Secretary to enter into an agreement with the National Academy of Sciences to establish an independent entity, a National Center for the Study of Military Health.

The proposed Center for the Study of Military Health would evaluate and monitor interagency coordination on issues relating to post-deployment health concerns of members of the Armed Forces, including outreach and risk communication, recordkeeping, research, utilization of new technologies, international cooperation and research, health surveillance, and other health-related activities.

In addition, this Center would evaluate the health care provided to members of the Armed Forces both before and after their deployment on military operations. The proposed Center would monitor and direct government efforts to evaluate the health of servicemembers upon their return from military deployments, for purposes of ensuring the rapid identification of any trends in diseases or injuries that result from such operations. Such an independent health center could also serve an important role in providing training of health care professionals in DoD and VA in the evaluation and treatment of post-conflict diseases and health conditions, including nonspecific and unexplained illnesses.

While some have argued that it is time to take some of these responsibilities away from existing agencies, I would suggest that this is a matter for careful, deliberate deliberation. Therefore, this amendment would require the National Academy of Sciences to assess the feasibility of such an independent health entity. In their report to the Secretary of Defense, the Academy should provide a recommendation of the feasibility of such an entity and justification for such a recommendation. If such a center is recommended by the Academy, their report should also provide recommendations for organizational placement of the entity; the health and science expertise that would be necessary; the scope and nature of the activities and responsibilities of the entity; and mechanisms for ensuring that the recommendations of the entity are carried out by DoD and VA.

Mr. President, as Ranking Member of the Committee on Veterans' Affairs, there have been too many times when I have heard agency officials testify that poorly understood, unexplained illnesses occurred at an unacceptably high rate during every military conflict. With the tremendous advances achieved elsewhere in medical and military technologies, I find the acceptance of these illnesses as an inevitability to be unacceptable. I hope that this amendment will offer an initial step to better prevention and treatment of these post-conflict illnesses.

At the end of subtitle D of title X, add the following:

**SEC. 1064. SENSE OF CONGRESS REGARDING UNITED STATES FORCES IN OPERATIONS IN BOSNIA AND HERZEGOVINA.**

(a) Findings.—Congress makes the following findings:

(1) The contributions of the people of the United States and other nations have, in large measure, resulted in the suspension of fighting and alleviated the suffering of the people of Bosnia and Herzegovina since December 1995.

(2) The people of the United States have expended approximately $9,500,000,000 in tax dollars between 1992 and mid-1998 just in support of the United States military operations in Bosnia and Herzegovina.

(3) Efforts to restore the economy and political structure in Bosnia and Herzegovina have achieved some success; however, the Dayton Agreement did not achieve national security interests of the United States.

(4) In February 1998, the President certified to Congress that the continued presence of United States forces in Bosnia and Herzegovina after June 30, 1998, was necessary in order to maintain peace and stability in that region.

(5) The Dayton Agreement required the United States to have the funds required to buy sufficient supplies to maintain the United States ground combat forces from Bosnia and Herzegovina within a reasonable period of time, consistent with the safety of those forces and the accomplishment of the Stabilization Force's mission.

(b) Sense of Congress.—It is the sense of Congress that—

(1) United States ground combat forces should not remain in Bosnia and Herzegovina indefinitely in view of the world-wide commitments of the Armed Forces of the United States.

(2) The President should work with NATO allies and the other nations whose military forces are participating in the NATO-led Stabilization Force to withdraw United States ground combat forces from Bosnia and Herzegovina within a reasonable period of time, consistent with the safety of those forces and the accomplishment of the Stabilization Force's mission.

(3) The President should consult closely with the congressional leadership and the defense committees with respect to the progress being made toward achieving a sustainable peace in Bosnia and Herzegovina with the Dayton Agreement and should strongly urge the President to undertake the preparations for establishing a Western European Union-led or a NATO-led force as a follow-on force for Bosnia and Herzegovina.

(7) An estimate of the amount of income that could accrue to the Department as a result of the enhanced authority proposed under paragraph (6) during the five-year period beginning on the effective date of such enhanced authority;

(C) the potential for reducing the costs of research and development, and

(D) any other factors that the Secretary considers relevant.

(3) The Secretary shall not waive the imposition of charges under paragraph (1) if the Secretary determines that such research and activities are not in the public interest.

(c) BUDGETARY TREATMENT.—Within 2 years after the date of enactment of this Act, and any subsequent year that is submitted to Congress under section 1105 of title 31, United States Code, an assessment of the program under this subsection during the preceding year, including the effectiveness of the program in providing opportunities for small businesses to interact with and use the resources of the contractor-operated facilities of the Department of Energy and universities and private businesses.

Mr. DOMENICI. Mr. President, partnerships among our federal laboratories, universities, and industry provide important benefits to our nation. They help to create innovative new products and services that drive our economy and improve our quality of life. Today I submit the DOE Partnership Amendment to the National Defense Authorization Bill for Fiscal Year 1999. This Amendment improves the capabilities at the DOE sites for effective partnerships and interactions with the national, federal, and private sector, and with universities.

I have personally observed the positive impacts of well crafted partnerships. These partnerships enhance the effectiveness of the laboratory systems, and other contractor-operated facilities of the Department of Energy to accomplish their federal missions at the same time that the companies benefit though enhanced competitiveness from the technical resources available at these sites.

I also see the benefits achieved by other federal agencies and companies that utilized the resources of the national laboratories and other
Department sites through contract research mechanisms. Contract research enables these sites to contribute their technical expertise in cases where the private sector cannot supply a customer's needs. Partnerships and other internal and external mechanisms enable the Department and other agencies to accomplish their own missions better, faster, and cheaper.

I've seen spectacular examples where small businesses have been created around breakthrough technologies from the Department's contractor-operated and other contractor-operated sites of the DOE. But, at present, only the Department's Defense Programs has a specific program for small business partnerships and assistance.

All programs of the Department have expertise that can be driving small business successes. Historically, in the United States, small businesses have often been the most innovative and the fastest to exploit new technical opportunities—all of the Department's programs have contributed to the small business interactions that Defense Programs has so effectively utilized.

I have been concerned that barriers to these partnerships and interactions continually exist within the Department of Energy. In addition, the Department's laboratories and other sites need continuing encouragement to be fully receptive to partnership opportunities that meet both their own mission objectives and industry's goals. And finally, small business interactions should be encouraged across the Department of Energy, not only in Defense Programs.

For these reasons, I introduced S. 1874 on March 27, 1998, the Department of Energy Small Business and Industry Partnership Enhancement Act of 1998, which was co-sponsored by Senators Thompson, Craig, Kempthorne, Bingaman, Reid, and Lieberman. The National Coalition for Advanced Manufacturing, Inc. (NACFAM) endorsed S. 1874, describing it as "a crucial step in reducing barriers to cooperation between the national laboratories and private industry, higher education institutions, non-profit entities, and state and local governments."

NACFAM also noted that this "bill supports our shared conviction that collaborative R&D will further strengthen America's productivity growth and national security."

Together with Senator Bingaman as a co-sponsor, language for amendment of the National Defense Authorization Bill for Fiscal Year 1999 that accomplishes almost the same goals as S. 1874. This Amendment was developed through consultation with several of the co-sponsors, the Senate Energy and Natural Resources Committee, the Senate Committee on Armed Services, and the Department of Energy.

This Amendment removes barriers to more effective utilization of all of the Department's contractor-operated facilities by industry, other federal agencies, and universities. The Amendment covers all the Department's contractor-operated facilities—national laboratories and their other sites like Kansas City, Pantex, Hanford, Savannah River, or the Nevada Test Site.

The Amendment also provides important assistance to contract-operated sites to increase their partnerships and other interactions with universities and companies. And finally, it creates opportunities for small businesses to benefit from the technical resources available at all the Department's contractor-operated facilities.

This Amendment supplements the authority of the Atomic Energy Act, which limited the areas wherein the Department's facilities could provide research and other services, not in competition with the private sector, to only those mission areas undertaken in the earliest days of the AEC. My Amendment recognizes that the Department's responsibilities are far broader than the AEC, and that all parts of the Department should be available to help on a contract basis wherever capabilities are not available from private industry.

One barrier that the Department to contract research involves charges added by the Department to the cost of work accomplished by a site. At some laboratories, these charges now range up to 25%. This Amendment requires that charges to customers for research and other services at these facilities be fully recovered, and sharply limits addition of extra charges by the Department to only 3%. The Amendment further requires waiver of these extra charges for small business and non-profit entities and provides a process for the Secretary of Energy to continue any pre-existing waivers.

The Amendment creates a five-year pilot program for external customers that enables facilities to examine their overhead rates and determine if an alternative lower rate serves to cover services actually used by these customers. For example, where companies or universities do not require secure facilities or do not utilize the extensive special nuclear material capabilities of the laboratories, then the customer will be charged an overhead rate that excludes security costs and environmental legacy costs. This pilot program will enable the Department and facility to examine the impact of these lower overhead rates for one important class of external customers.

The Department is required to report in 2003 on the interim results of this Pilot and to provide recommendations on possibly continuing this Pilot and even extending it to include other federal customers.

The Amendment provides direct encouragement for expansion of partnerships and interactions with companies and universities by requiring that each facility be annually judged for success in expanding these interactions in ways that support each facility's missions. The Amendment requires that the external partnership and interaction program be considered as evaluating the annual contract performance at each site.

Finally, the Amendment sets up a new Small Business Partnership Program which will allow all the Department sites to participate. This action will enable small businesses across the United States to better access and partner with any of the Department's contractor-operated facilities. A partner such interactions up to 0.25 percent of the total site budget is available for these small business interactions.

With these changes, Mr. President, the Department of Energy facilities will be better able to meet their critical national missions, while at the same time assisting other federal agencies, large and small businesses, and universities in better meeting their goals and missions.

Thurmond and Domenici Amendment No. 2914

(Ordered to lie on the table.)

Mr. THURMOND (for himself and Mr. DOMENICI) submitted an amendment intended to be proposed to the Senate in the bill, S. 2057, supra; as follows:

At the appropriate place add the following:

Section 3307 of title 5, United States Code, is amended, as follows:

(2) by adding the following new subsection (f) after subsection (e):

"(f) The Secretary of Energy may determine and fix the maximum amount that shall be charged for an original appointment to a position as a Department of Energy nuclear materials courier, so defined by section 8331(27) of this title.

Sec. 2. Section 8331 of Title 5, United States Code, is amended as follows:

By adding the following new paragraph (27) after paragraph (26):

SEC. RUSSIAN NON-STRATEGIC NUCLEAR WARHEADS.

(a) SENSE OF THE SENATE.—It is the Sense of the Senate that:

(1) the 7,000 to 12,000 or more non-strategic (or “tactical”) nuclear weapons estimated by the United States Strategic Command to be in the Russian arsenal may present the greatest threat of sale or theft of a nuclear warhead in the world today;

(2) as the number of deployed strategic warheads in the Russian and United States arsenals has fallen by a few thousand under the START accords, Russia’s vast superiority in tactical nuclear warheads—many of which have yields equivalent to strategic nuclear weapons—could become strategically destabilizing;

(3) while the United States has unilaterally reduced its inventory of tactical nuclear warheads, Russia’s nuclear arsenal reductions pledged by former Soviet President Gorbachev in 1987 and signed by Russian President Yeltsin in 1992, perpetuating the dangers from Russia’s tactical nuclear stockpile;

(4) the President of the United States should call on the Russian Federation to expedite reduction of its tactical nuclear arsenals in accordance with the promises made in 1991 and 1992, and pledge continued cooperation from the United States in reducing Russia’s tactical nuclear stockpile; and

(5) it is a priority of the United States to work aggressively to reduce the threats from the non-strategic nuclear arsenal of the Russian Federation, through continued cooperation on accounting for, security, and reducing Russia’s stockpile of tactical nuclear warheads and associated fissile materials.

(b) REPORT.—Not later than March 15, 1999, the Secretary of Defense shall submit to the Senate a report on Russia’s non-strategic nuclear weapons program. The report shall:

(1) estimate the current numbers, types, yields, viability, and locations of such warheads;

(2) assess the strategic implications of the Russian Federation’s non-strategic arsenal, including the potential use of such warheads in a strategic role or the use of their components in strategic nuclear systems;

(3) an assessment of the extent of the current threat of theft, sale, or unauthorized use of such warheads, including an analysis of Russian command and control as it concerns the use of tactical nuclear warheads;

(4) assess the current, and planned efforts to work cooperatively with the Russian Federation to account for, secure, and reduce Russia’s stockpile of tactical nuclear warheads and associated fissile material; and

(5) options for additional threat reduction initiatives concerning Russia’s tactical nuclear stockpile.

This report shall include the views of the Director of Central Intelligence and the Commander-in-Chief of the United States Strategic Command.

SEC. 11. The Sense of Congress with respect to the report shall be to maintain a high level of cooperation with the Russian Federation while ensuring that Russian nuclear warhead inventories are reduced to levels consistent with the intended limits of the START arms control agreements.

SEC. 12. These amendments are effective at the beginning of the first pay period after the date of enactment of this Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, in considering the nomination of Louis Caldera before the Senate Armed Services Committee to be the Secretary of the Army, I raised the issue of the Washington Aqueduct—the public water system for the Metropolitan Washington area that is owned by the Federal government and administered by the Corps of Engineers.

As my colleagues may recall, the conditions at the Washington Aqueduct are critical. The National Association of State Environmental Protection Agency issued a “boil-water” order in December 1993 for the metropolitan Washington region. There was significant concern that the water supply for the nation’s capital was contaminated. The incident brought to light the significant capital improvements that are needed at the facility to meet current federal drinking water standards.

In order to address the tremendous water quality issues that are facing the District, Arlington County, and the city of Falls Church, I included in the Safe Drinking Water Act Amendments of 1996, Section 306 entitled the Washington Aqueduct. I wrote this section so that the customers of the Washington Aqueduct would have a reliable and safe source of drinkable water. The Aqueduct is in need of many capital improvements to insure that the water remains safe and drinkable. Improvements to the Aqueduct are self-financed by the users. It is estimated that significant costs remain, between $250 and $400 million.

To allow for these crucial improvements, Section 306 directs the Army Corps of Engineers to transfer the Washington Aqueduct, with the consent of a majority of the three customers, to a non-federal, public or private entity. Since this effort would be a significant undertaking, the Safe Drinking Water Act gave the customers and the Corps three years, until August 6, 1999, to gain consensus. Congress authorized the Corps to borrow funds from the Treasury during an interim three year period to begin the necessary infrastructure improvements. This borrowing authority totaled $75 million and would be repaid by the ratepayers.

There are problems with the Corps remaining the owner of the Washington Aqueduct, besides issues that is inconsistent with existing law. First and foremost, the Corps does not have the means to finance the capital improvements that are needed. Once the three year borrowing expires, the Corps only has the authority to finance new operations at the Corps. Given the current condition at the Aqueduct, this is hardly the way to insure that the ratepayers have drinkable water. In addition, in the event of another boil water scare, the Corps would have to address the immediate problem. If the Corps does not have funding to perform needed upgrades to the Aqueduct nor have the financing to address an emergency...
