CONGRESSIONAL RECORD – SENATE

S9421

JULY 30, 1998

COMMUNITY SERVICES BLOCK GRANT LEGISLATION

Mr. ASHCROFT. Mr. President, I would like to take this opportunity to thank Senator COATS, the Chairman of the Labor Committee’s Subcommittee on Children and Families, for the excellent work he has done in drafting legislation to authorize the Community Services Block Grant, which recently passed in the Senate. The CSBG program is intended to fight poverty and alleviate its effects on people and their communities. Through these block grants, federal money is given to the states and local communities to create programs that help low-income people secure employment, get an adequate education, make better use of their available income, obtain and maintain adequate housing, and ultimately achieve self-sufficiency. These block grants free states and local communities of federal red tape and give them the flexibility they desire to initiate programs that meet the needs of people who need help. As a former governor, I learned that state and local governments are far more effective in serving local communities than Washington’s bureaucracy.

Further, Community Services Block Grants provide opportunities for the government to partner with the non-governmental sector to provide a variety of services to the poor. I am grateful that Senator COATS has led a bipartisan effort in this regard. I commend the members of the Labor Committee, and I have made an oath of service, by my Operations Team, of excellence on a project undertaken by my Operations Team.

Since I was elected in 1994, my staff and I have made an oath of service, community, and dedication. We dedicate ourselves to quality service. America’s future will be determined by the character and productivity of our people. In this respect, we seek to lead by our example. We strive to lead with humility and honesty, and to work with energy and spirit. Our standard of productivity is accuracy, courtesy, efficiency, integrity, validity, and timeliness.

Arsalan has not only achieved this standard, he set a new standard on the project he was given. He exemplified a competitive level of work while maintaining a cooperative spirit. His performance truly was inspiring to me and my staff in our effort to fulfill our office pledge and to serve all people by whose consent we govern.

RECOGNITION OF ACHIEVEMENT

Mr. ASHCROFT. Mr. President, I rise today to extend appreciation to Arsalan Iftikhar for his service as an intern in my office during the Spring of 1998. Arsalan set the highest standard of excellence on a project undertaken by my Operations Team.

Since I was elected in 1994, my staff and I have made an oath of service, commitment, and dedication. We dedicate ourselves to quality service. America’s future will be determined by the character and productivity of our people. In this respect, we seek to lead by our example. We strive to lead with humility and honesty, and to work with energy and spirit. Our standard of productivity is accuracy, courtesy, efficiency, integrity, validity, and timeliness.

Arsalan has not only achieved this standard, he set a new standard on the project he was given. He exemplified a competitive level of work while maintaining a cooperative spirit. His performance truly was inspiring to me and my staff in our effort to fulfill our office pledge and to serve all people by whose consent we govern.

NUCLEAR NON-PROLIFERATION AND SENATE RATIFICATION OF THE COMPREHENSIVE NUCLEAR TEST-BAN TREATY

Mr. BIDEN. Thank you, Mr. President. It is a truism that despite the end of the Cold War, we live in a dangerous world. The ultimate danger we face, Mr. President, is that nuclear powers and the regional tensions that fuel their demand for those weapons will be obtained—or even used—by unstable countries or terrorist groups.

We must undertake a range of activities to reduce that danger. There is no silver bullet. No single initiative will rid the world of the threat of nuclear cataclysm at the hands of a new or unstable nuclear power.

Rather, we need a coherent strategy with many elements—a strategy designed to reduce both the supply of nuclear weapons technology to would-be nuclear powers and the regional tensions that fuel their demand for those weapons.

I would like to spend a few minutes today talking about one piece of that strategy that this body can implement: We can and should give our advice and consent to ratification of the Comprehensive Nuclear Test-Ban Treaty. And we should do that promptly.

In her speech on the 35th anniversary of John F. Kennedy’s American University speech, Secretary of State Madeleine Albright called for U.S. ratification of the Comprehensive Nuclear Test-Ban Treaty. Noting the recent Indian and Pakistani nuclear tests, she said that ratification was needed “now, more than ever.”
Senator SPECTER and I have also called for ratification now, both in floor statements and by drafting a resolution calling for expeditious Senate consideration of the Test-Ban Treaty. Why is the Test-Ban so crucial? Because it is the centerpiece of a global bargain that is the heart of the global nonproliferation regime. Other countries will give up their ambition to acquire nuclear weapons, but only if the declared nuclear powers honestly seek to end their nuclear advantage. We have already enabled the nuclear weapons states, for it gives them hope over the next 30 or 50 years, as some of the non-nuclear states will not feel bound to theirs.

One lesson of this decade's nuclear developments in India, Pakistan, Iraq and North Korea is that very basic nuclear weapon design information is no longer a tightly held secret. The technology required to produce nuclear weapons remains expensive and complex, but within the reach of literally scores of countries.

To keep countries from producing what scores of them could produce, you need more than pressure or sanctions. You must constantly maintain their consent to remain non-nuclear weapons states.

Ideally, we would maintain that consent by removing the security concerns that propel countries to seek nuclear weapons. But that is terribly difficult, be it in Kashmir or the Middle East, in the Balkans or the Korean Peninsula or the Taiwan Straits.

In the world of today and of the foreseeable future, peace does not reign. Nuclear non-proliferation will not prevail in this world either, unless we convince states that nuclear weapons are not the key to survival, to status or to power.

The Comprehensive Nuclear Test-Ban Treaty is not merely emblematic of the nuclear disarmament commitment to the non-nuclear weapons states. It also will put a cap on the development of new classes of nuclear weapons by the nuclear powers. The test-ban treaty will also limit the ability of any non-nuclear weapons state to develop sophisticated nuclear weapons or to gain confidence in more primitive nuclear weapons if it were to illegally acquire or produce them. If you can't test your weapon, you are very unlikely to rely upon it as an instrument of war.

These are important reassurances to the non-nuclear nations of the world. They are why those countries agreed to forewear all nuclear tests and to accept intrusive on-site inspection if a suspicion arose that they might have tested a nuclear device.

Will the Test-Ban Treaty also gradually reduce a country's confidence in the reliability of its nuclear weapons over the next 60 years, as the opponents assert? If so, that is actually reassuring to the non-nuclear weapons states, for it gives them hope of the eventual realization of that reason to reject the nuclear non-proliferation regime. And until we ratify the Treaty, the rest of the world will find it easier to reject U.S. calls for diplomatic and economic measures to pressure India and Pakistan.

We must keep the non-proliferation bargain, if we are to maintain U.S. leadership on non-proliferation, keep the rest of the world on board, and influence India and Pakistan. The truth is that we have little choice.

If we fail to keep faith with the non-nuclear states because we cannot even ratify the Test-Ban Treaty, then we will also fail to keep them from developing nuclear weapons of their own. And in that case, Mr. President, we might as well prepare for a world of at least 15 or 20 nuclear weapons states, rather than the 5 or 7 or 8 we have today. That is the stark reality we face.

The Fate of the Test-Ban Treaty

But we need not fail, Mr. President. The Comprehensive Nuclear Test-Ban Treaty is a very sensible treaty that is clearly in our national interest. It is the rest of the world's only weapon against the proliferation of nuclear weapons, but we are in a better position economically and scientifically to do that than is any other country in the world.

Treaty verification will require our attention and our resources, but those are resources that we would have to spend anyway in order to monitor world-wide nuclear weapons programs. Indeed, the International Monitoring System under the Treaty may save us money, as we will pay only a quarter of those costs for monitoring resources that otherwise we might well have to finance in full.

But we do have a problem. We have been unable to hold hearings on this treaty in the Foreign Relations Committee, even though committees with lesser roles have held them. And the Majority Leader has said that he will not bring this treaty to the floor.

Why is that, Mr. President? I know that my good friends the chairman and the majority leader have raised arguments against the Treaty, but they seem curiously unwilling to make those arguments in the context of a proper committee or floor debate on a resolution of ratification.

Could they be afraid of losing? Could they be afraid that, once the pros and cons are laid out with a resolution of ratification both sides of this body will support ratification? Perhaps; I know that I think the Treaty can readily get that support.

For the arguments in favor of ratification, there is plenty of evidence that the Senate will support ratification. The non-proliferation bargain, if we are to maintain our weapons and the ability to test them, and

that he will consider every year whether we must withdraw from the Treaty and resume testing to maintain nuclear deterrence.

I also know, Mr. President, that the American people overwhelmingly support the Comprehensive Test-Ban Treaty. A nation-wide poll in mid-May, after the Indian tests, found 73 percent in favor of ratification and just 16 percent against it. Later polls in 5 states—77 percent to 80 percent. The May poll also found that the American people knew there was a risk that other countries would try to cheat, but the public is not supporting ratification because they wear rose-colored glasses. The people are pretty level-headed on this issue, as on so many others. They know that no treaty is perfect. They also know that this Treaty, on balance, is good for America.

So perhaps those who block the Senate from fulfilling its Constitutional duty regarding this Treaty are doing that because they know the people overwhelmingly support this Treaty, and they know that ratification would pass.

Perhaps they just don’t like arms control treaties. Perhaps they would rather rely only upon American military might, including nuclear weapons tests. Perhaps they want a nation-wide ballistic missile defense and figure that then it won’t matter how many countries have nuclear weapons. Perhaps they figure our weapons will keep us safe, even if we let the rest of the world fall into the abyss of nuclear war.

I don’t share that view, Mr. President. I believe we can keep non-proliferation on track. I believe that we can maintain nuclear deterrence without engaging in nuclear testing, and that the Comprehensive Test-Ban Treaty is a demonstration of the non-nuclear states with us on an issue where the fate of the world is truly at stake.

I cannot force a resolution of ratification on this Treaty through the Foreign Relations Committee and onto the floor of this body.

But the American people want us to ratify this Treaty. They are absolutely right to want that. I will remind my colleagues—however often I must—of their constitutional responsibility for keeping the non-nuclear states with us on an issue where the fate of the world is truly at stake.

My colleague, the senior Senator from Pennsylvania, and I have drafted a resolution calling for expeditious consideration of this Treaty. So far, we have been joined by 34 of our colleagues as co-sponsors of that resolution.

We know that many others support us quietly. Mr. President, but they do not want to part company with their leaders. We are confident, however, that as more of them reflect on what is at stake, and on the need for continued U.S. leadership in nuclear non-proliferation, they will realize that they will do their leaders a favor by helping the Senate to do what is so clearly in the national interest.

The Senate will give its advice and consent to ratification of the Comprehensive Nuclear Test-Ban Treaty. The only question is when.

The world is a dangerous place, Mr. President, and we must not underestimate the challenges we face. But the spirit of America lies in our ability to rise to those challenges and overcome them. The immediate challenge of non-proliferation is to bring forth a resolution of ratification on a useful treaty, Mr. President. We should show more of that American spirit in our approach to that task.

The Importance of IMF Funding

Mr. BIDEN. Mr. President, no less an authority than Alan Greenspan recently pronounced our economy in the best shape he has seen in his professional life.

Unemployment, inflation, and interest rates are low; incomes, investment, and optimism remain high. Clearly, Mr. President, now is the time to work.

Now is the time to worry, Mr. President, because these are exactly the circumstances that breed overconfidence and complacency. Pride, Mr. President, goeth before the fall.

Mr. President, we enjoy this excellent economic performance because we have got our own house in order—we have gone through a painful period of restructuring that has made our economy more efficient, and we have taken the tough steps to balance our federal budget.

So our factories and businesses are operating efficiently, our workers are earning more, and our sound government finances are helping to keep interest rates down. What could go wrong?

Well, what if the markets for this new, more productive economy were not there? What if international investors pull their money out of some of our major trading partners? What if those countries stop buying our products and services? What if they can’t pay back their loans, and American investments there lose money instead of sending profits back home?

Unfortunately, that is just what is happening now, and instead of acting quickly to limit the threat of these developments, the majority in the House of Representatives has chosen to play a dangerous game of chicken with international financial markets.

Mr. President, the Senate went on record in March, by an overwhelming vote of 84 to 16, in favor of full funding of U.S. participation in the International Monetary Fund. But those funds were dropped by the House in Conference.

I am pleased to see that Chairman STEVENS, who, along with my colleague Senator HAGEL on the Foreign Relations Committee has shown real leadership on this issue, has taken a second crack at the problem by including this funding on the Foreign Operations Appropriations bill. Unfortunately, we will now be acting on that bill until after the August recess.

But just last week, the House pulled its version of the Foreign Ops bill from further consideration because of their internal squabbling over funding for the IMF. Their squabbles may mask an even more cynical motive—to hold the IMF, and by extension global financial stability, hostage to increase their bargaining leverage on unrelated issues at the end of the legislative session this fall.

Mr. President, I want to stress what is at stake while the majority in the House dithers. The financial crisis that began a year ago in Asia has not gone away—it continues to fester, and plans to spread. Indeed, with the resources of the IMF already stretched thin, we may be entering the most critical phase of this threat to the global economy.

If the worst case happens, Mr. President, we will have no place to hide, no matter how well things have been going for us lately. Just look at the risks.

Japan is the keystone of the Asian economy—it could pull that already fragile region into a real depression if current trends are not quickly and dramatically reversed. That’s why the recent elections there were so important, and why international investors are watching closely to see if Japan has the political muscle to overhaul its financial system and restore growth at the same time. That is a lot to ask, and much hangs on the outcome, including the health of important markets for American exports throughout Asia.

Mr. President, in May our trade deficit soared to $15.8 billion, as exports to Asia dropped by 21 percent compared to a year ago. Still, our friends in the House suggest that we wait until the fall to see if things get worse.

Russia presents an additional threat to our economic and security interests. Despite the announcement of a new IMF package, the Moscow stock market index has dropped 24 percent. An economically foundering Russia, facing political collapse, opens up Far East Asia’s box of issues for stability in Europe and around the world.

On top of all this, other countries, including South Africa, Ukraine, and Malaysia, are lined up in the IMF’s waiting room.

But because of the severity of the Asian crisis, the IMF’s resources are so low that international investors must now have real fear that it will not be able to provide further support to its current clients, or support additional countries when the brink. This will add uncertainty to an already shaky situation, and can only make further panic more likely.
