H.R. 4274

OFFERED BY: MR. STEARNS

AMENDMENT NO. 32: Page 53, after line 8, insert the following section:

SEC. 221. Section 421 of the Public Health Service Act (42 U.S.C. 285b-3) is amended by adding at the end the following subsection:

"(c) Programs under subsection (a)(1)(E) (relating to emergency medical services and preventive, diagnostic, therapeutic, and rehabilitative approaches) shall include programs for the following:

"(1) The development and dissemination, in coordination with the emergency services guidelines promulgated under section 402(a) of title 23, United States Code, by the Associate Administrator for Traffic Safety Programs, Department of Transportation, of a core content for a model State training program applicable to cardiac arrest for inclusion in appropriate current emergency medical services educational curricula and training programs that address lifesaving interventions, including cardiopulmonary resuscitation and defibrillation. In developing the core content for such program, the Director of the Institute may rely upon the content of similar curricula and training programs developed by national nonprofit entities. The core content of such program—

"(A) may be used by health care professionals, allied health personnel, emergency medical services personnel, public safety per-

sonnel, and any other persons who are likely to arrive immediately at the scene of a sudden cardiac arrest (in this subsection referred to as 'cardiac arrest care providers') to provide lifesaving interventions, including cardiopulmonary resuscitation and defibrillation;

"(B) shall include age-specific criteria for the use of particular techniques, which shall include infants and children; and

"(C) shall be reevaluated as additional interventions are shown to be effective.

"(2) The operation of a limited demonstration project to provide training in such core content for cardiac arrest care providers to validate the effectiveness of the training program.

"(3) The definition and identification of cardiac arrest care providers, by personal relationship, exposure to arrest or trauma, occupation (including health professionals), or otherwise, who could provide benefit to victims of out-of-hospital arrest by comprehension of such core content.

"(4) The establishment of criteria for completion and comprehension of such core content, including consideration of inclusion in health and safety educational curricula.

"(5) The identification of equipment and supplies that should be accessible to cardiac arrest care providers to permit lifesaving interventions by preplacement of such equipment in appropriate locations insofar as such activities are consistent with the development of the core content and utilize information derived from such studies by the National Institutes of Health on investigation in cardiac resuscitation.

"(6) The development in accordance with this paragraph of model State legislation (or Federal legislation applicable to Federal territories, facilities, and employees). In developing the model legislation, the Director of the Institute shall cooperate with the Attorney General, and may consult with nonprofit private organizations that are involved in the drafting of model State legislation. The model legislation should take into consideration the following:

"(A) The purpose of the model legislation shall be to ensure—

"(i) access to emergency medical services through consideration of a requirement for public placement of lifesaving equipment; and

"(ii) good samaritan immunity for cardiac arrest care providers; those involved with the instruction of the training programs; and owners and managers of property where equipment is placed.

"(B) In the development of the model legislation, there shall be consideration of requirements for training in the core content and use of lifesaving equipment for State licensure or credentialing of health professionals or other occupations or employment of other individuals who may be defined as cardiac arrest care providers under paragraph (3).

"(7) The coordination of a national database for reporting and collecting information relating to the incidence of cardiac arrest, the circumstances surrounding such arrests, the rate of survival, the effect of age, and whether interventions, including cardiac arrest care provider interventions, or other aspects of the chain of survival, improve the rate of survival. The development of such database shall be coordinated with other existing databases on emergency care that have been developed under the authority of the National Highway Traffic Safety Administration and the Centers for Disease Control and Prevention."
