

Darlene always has a smile for everyone who walks into my office. She always knows who to call to solve a problem. She has been a mother figure and an inspiration to all of the young people who have interned in my Las Cruces office.

Darlene has been my representative to the business community, worked extensively with county and municipal government officials and of course, the Hispanic community. She has worked on border issues and has helped keep the Texans under control. The latter is no small feat.

I want to thank Darlene for all of her hard work, and wish her the best in retirement. God bless you, Darlene, for all that you have done for me and for the people of New Mexico.●

HONORING RODRIGO D'ESCOTO

● Ms. MOSELEY-BRAUN. Mr. President, it is my honor to rise today to recognize a distinguished resident and successful businessman from my home state of Illinois, Mr. Rodrigo d'Escoto. Last month, Mr. d'Escoto was named the National Minority Male Entrepreneur of the Year by the U.S. Department of Commerce's Minority Development Agency. This award recognizes Mr. d'Escoto's Hispanic heritage, his success as an entrepreneur, and his service and dedication to the community.

Mr. d'Escoto is the founder and chairman of d'Escoto, Inc., a Chicago-based architectural engineering firm. Established in 1972, d'Escoto, Inc. is one of the largest Hispanic-owned firms of its kind in the Midwest. Over the last twenty five years, the firm has participated in some of the most ambitious and important design/construction projects in the Chicago area. These projects include the Northwestern Memorial Hospital Expansion project, the expansion of the McCormick Place Convention Center and Hotel, the construction of the new Cook County Hospital, the ongoing expansion of O'Hare International Airport and the construction of the airport's new international terminal. Certainly, Rodrigo d'Escoto and d'Escoto Inc. have contributed greatly to the look and structure of Chicago, one of the world's great architectural cities.

As is often the case with someone who has achieved so much professionally, Rodrigo d'Escoto is a committed community member. Among the many boards and organizations that Mr. d'Escoto has given his time and expertise to are: the Harold Washington Foundation, the Urban League, the United Way, the United States Hispanic Chamber of Commerce, the Pilsen Resurrection Development Corporation, the National Association of Latino Elected and Appointed Officials, the Centro Hispano Americano, the City of Chicago Planning Commission, the Alliance of Latinos and Jews, and the Hispanic American Construction Industry Association. It is important

to note that this is only a partial list of the many worthwhile and important enterprises that Rodrigo d'Escoto has touched over the years.

Mr. President, as one can see, the dimensions of Rodrigo d'Escoto's professional and civic accomplishments are of breathtaking proportions. Indeed, he is quite deserving of being named the National Minority Male Entrepreneur of the Year. I am confident that my Senate colleagues will join me in congratulating Mr. d'Escoto and d'Escoto, Inc. for this prestigious award, and in wishing them much continued success in the future.●

HIGHER EDUCATION REAUTHORIZATION ACT

● Mr. ABRAHAM. Mr. President, I rise today to express my strong support for the Higher Education Reauthorization Act that passed the Senate by a 96-0 vote last week.

Mr. President, this legislation illustrates this Congress' strong support for education, particularly higher education. This bill will make strong investments in our future by increasing the availability of financial aid to students in need, thereby allowing more students to benefit from our higher education system. Specifically, the bill lowers students' five-year loan rate to the lowest it has been for 17 years. Congress was able to strike a balance of lowering the rates students pay on their loans to 7.46 percent while keeping commercial lenders in the market. This reduction in interest rates will result in a savings of \$700 on the average debt of \$13,000 and savings of more than \$1,000 on a \$20,000 debt. By striking this balance, the long-term stability of the student loan program will continue.

The Higher Education Reauthorization Act also increases the maximum Pell Grant available to low-income students. Beginning in 1999, the maximum student Pell Grant authorization level will increase gradually each year from the current level of \$3,000 to \$5,800 in 2003. This change will enable low-income students to afford college and accumulate less debt.

The bill also includes an important change to the State Student Incentive Grant (SSIG) program that is of particular importance to me. Under this legislation, the SSIG program was reformed and changed to the Special Leveraging Education Assistance Partnership (LEAP) Program. Working with Senators JEFFORDS, COLLINS, and REED, I was able to have language included under the LEAP Program to provide scholarships for low-income students studying mathematics, computer science, or engineering. I believe this language is particularly important given the current shortage of high-tech workers. Through the LEAP program, States are provided matching money from the Federal Government to provide grants for students entering various fields of study.

The Higher Education Reauthorization Act makes a strong commitment

to pre-K and K-12 education by creating a loan forgiveness program for students who earn a degree and obtain employment in the child care industry, as well as for students who gain teaching jobs in school districts serving large populations of low-income children. The loan forgiveness program will provide an important incentive for teachers to go into underserved areas and fields. Coupled with this provision, the Higher Education Act strengthens and promotes greater accountability within current teacher preparation programs. The legislation provides State and local partnerships with incentives to place a greater focus on academics and strong teaching skills for teacher certification programs. By focusing on teacher preparation, this bill increases the likelihood that students will be adequately prepared and able to succeed in our higher education system.

In all, this legislation demonstrates the bipartisan nature of this Congress' commitment to education. This bill will impact thousands of college-bound students each year and will prepare thousands of school-age children for higher education in the years to come.●

THE TRUE STORY OF HYDROGEN AND THE "HINDENBURG" DISASTER

● Mr. HARKIN. Mr. President, for many years I have spoken of the promise of hydrogen energy as our best hope for an environmentally safe sustainable energy future. My vision, and the vision of many of our top scientists is simple. Hydrogen, which is produced by renewable energy with absolutely no pollution and no resource depletion of any kind, will prove a truly sustainable energy option.

I recognize that hydrogen is not yet a form of energy widely known to the American public. In fact, hydrogen has an unfortunate association. I would like to spend a few minutes dispelling one unfortunate myth of hydrogen energy.

Mr. President, mention the word "hydrogen" and many people remember the *Hindenburg*—the dirigible that caught fire back in May of 1937, killing 36 of the 97 people on board. Now, thanks to the scientific sleuthing of Addison Bain, a retired NASA scientist with 30 years experience with hydrogen, we can state with a fair degree of certainty that the *Hindenburg* would have caught fire even without any hydrogen on board.

This detective story was reported in a recent issue of *Popular Science*. I ask that the *Popular Science* article be printed in the CONGRESSIONAL RECORD at the conclusion of my remarks.

Addison Bain collected actual samples from the *Hindenburg*—the cloth bags that contained the hydrogen—which were saved as souvenirs by the crowd awaiting the *Hindenburg* at Lakehurst, New Jersey on May 6, 1937. When these samples were analyzed by modern techniques, Bain discovered
