

the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Commerce.

*To the Congress of the United States:*

As required by section 19(3) of the Public Telecommunications Act of 1992 (Public Law 102-356), I transmit herewith a report of the Corporation for Public Broadcasting. This report outlines, first, the Corporation's efforts to facilitate the continued development of superior, diverse, and innovative programming and, second, the Corporation's efforts to solicit the views of the public on current programming initiatives.

This report summarizes 1997 programming decisions and outlines how Corporation funds were distributed—\$47.9 million for television program development, \$18.8 million for radio programming development, and \$15.6 million for general system support. The report also reviews the Corporation's Open to the Public campaign, which allows the public to submit comments via mail, a 24-hour toll-free telephone line, or the Corporation's Internet website.

I am confident this year's report will meet with your approval and commend, as always, the Corporation's efforts to deliver consistently high quality programming that brings together American families and enriches all our lives.

WILLIAM J. CLINTON.

THE WHITE HOUSE, March 18, 1999.

ANNUAL REPORT OF NATIONAL ENDOWMENT FOR DEMOCRACY, 1998—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations:

*To the Congress of the United States:*

As required by the provisions of section 504(h) of Public Law 98-164, as amended (22 U.S.C. 4413(i)), I transmit herewith the 15th Annual Report of the National Endowment for Democracy, which covers fiscal year 1998.

WILLIAM J. CLINTON.

THE WHITE HOUSE, March 18, 1999.

PRAISE TO STUDENTS FROM COVENANT CHRISTIAN AND CLINTON HIGH SCHOOLS FOLLOWING AFTERMATH OF AMTRAK TRAIN CRASH

(Mr. SHOWS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHOWS. Mr. Speaker, today I stand before the American people and my colleagues to comment on the fatal Amtrak train crash that occurred earlier this week. I am saddened this ter-

rible tragedy took place. In their slumber, over late night snacks and conversations, fellow Americans aboard Amtrak's City of New Orleans were jolted into a reality of death and injury.

Today we mourn with our fellow Americans. In particular, I pause to offer condolences to fellow Mississippians who suffered losses in this crash. We pause to give thanks for life while seeking to understand why bad things happen. The American family stands with all those who have suffered.

Out of the tragedy came several stories of heroism. We can find the strength and endurance of the American spirit in many of the passengers who worked to protect and save the lives of others during this crash. I want to tell my colleagues about students from Mississippi who were on this train.

Young Mississippians from Covenant Christian School and Clinton High School were returning from a spring break trip. Out of the chaos and heartbreak, these Mississippi teenagers went to work securing the safety and well-being of fellow passengers. These students were courageous, caring, heroic, and brave.

I want all Americans to know about these teenagers from Clinton High School and Covenant Christian School. Why? Because we can all stand a little taller and feel a little better about our Nation and our future.

Mr. Speaker, I provide the names of these students for inclusion in the RECORD.

*List of Students:* Danielle Bell, Drew Bilbo, Chris Carter, Suzanne Cole, Emily Diffenderfer, Tim Farrar, Michael Freeman, Anna Fulgham, Stephanie Ly, Jeff Sartor, Shadia Slaieh, Jessica Switzer, Anshika Singh, Caleb McNair, Melissa Watson, and Christina Bomgaars.

*Chaperones:* Delores Bell, John Farrar, and Phyllis Hurley.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 1999, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

INTRODUCING LEGISLATION TO BRING FEDERAL GOVERNMENT UP-TO-DATE ON WATER RESOURCE MANAGEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. BLUMENAUER) is recognized for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, one of the characteristics of a livable community is the desire to promote the safety, health, and economic security of our families.

Today, in the newspapers around the country, people read of the expected flooding that is about to occur this spring. I, obviously, come from an area of the Pacific Northwest that will be particularly hard hit, although we are

often under water even in the best of times, and it may be less of a wrenching experience for some of us than around the country.

We are going to watch for an unusually harsh spring in the Pacific Northwest, in the Southwest, in the East, and it is an item that the Federal Government has been concerned about for a number of years. The Federal Government has been a partner working to protect against flood damage since 1960. Over \$40 billion Federal dollars have been invested in this effort.

Ironically, the losses from flood damage today, adjusted for inflation, are three times greater than before we started in 1960 and spent the \$40 billion. Why? In part, because we have not been as wise as we should have been in the expenditure of these funds. We have taken rivers across the country, we have narrowed and channelized them, we have encouraged people to live up to the river's edge with a false sense of security, we have paved over half our Nation's wetlands and, consequently, in many of these areas, there is simply no place for the water to go.

The result of our Federal disaster policy has been massive damage to a number of the same properties at a great cost to the taxpayer. One home in Houston that is appraised at less than \$115,000 has received over \$800,000 in federal flood insurance in less than 20 years.

There is, in fact, a smarter way to promote community livability. I have introduced legislation today, with the gentleman from Maryland (Mr. GILCREST), H.R. 1186, to bring the Federal Government up-to-date on water resource management.

The current system simply does not work well. The Corps of Engineers does cost-benefit analysis that simply does not recognize the benefit of flood damage avoided by moving communities out of harm's way and it, consequently, produces a flawed analysis.

Likewise, Federal financial assistance has a current cost-share formula that penalizes communities that make special efforts to develop and implement hazard mitigation and floodplain management.

Lastly, we do not give communities enough flexibility to fine-tune the projects that we have previously authorized.

As a result, on the books we have projects that are often expensive and do not adequately address the threat in today's needs, and communities are not allowed to be involved in this process directly.

Our legislation, H.R. 1186, would correct all of these items. It changes the cost-benefit ratio to fully reflect the benefits including avoided costs of moving people out of harm's way. It will provide the same financial incentives for the low-cost, innovative, less intrusive approaches to floodplain management as if people are going to use traditional dams, dikes and levies.

Finally, it will allow the private and public local partners, who are working
