

Other ongoing programs implemented through the Ocala Police Department are designed to address specific challenges in issue areas at various times. These projects may be operated for only a short time (one to two days) or for extended periods (a full year). We employ a concept of dynamic approach and response to community needs in order to provide our services in a timely manner. Programs can be implemented and discontinued as community needs indicate.

The following activities and events are only part of those conducted by Crime Prevention Section and the Ocala Police Department family as part of their regular duties:

- Business Police Academy.
- Citizens Police Academy.
- Citizens Police Academy Alumni Association.
- Bicycle Safety Rodeos.
- "Cops" Kids & Firemen Day.
- Crime Prevention Week.
- Neighborhood Watch.
- Business Watch.
- Safe Halloween.
- Community Clean-up Days.
- Special Olympics Picnic.
- DARE and GREAT Skate Nights.
- "AMI" (Aid to the Mentally Impaired).
- Police Explorers Post.
- Neighborhood Cookouts.
- "SAFE HOME" Program.
- Police Recruit Academy.
- Scholarships.
- Community Resource Center.
- Crime Prevention Programs.
- Security Surveys.
- McGruff Program Activity.
- "Crash Dummies" Program.
- "Casey" the talking car.
- Operation "Kid ID"
- Project Graduation.
- Host Statewide DARE Day.
- HUD Summer Programs.
- Red Ribbon Campaign.
- Vacation Bible School.
- Health Fairs.

The future of law enforcement is already here. Crime prevention has proven to be successful and will continue to be the foundation of progressive law enforcement as we move into the 21st century.

TWO FLOODS AND YOU ARE OUT

The SPEAKER pro tempore. Under the Speaker's announced policy of January 19, 1999, the gentleman from Oregon (Mr. BLUMENAUER) is recognized during morning hour debates for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, there is a theme this morning on the floor of the House: dealing with how we can promote livable communities. Whether it is dealing with community-oriented policing, "Weed and Seed," or associating the comments of the gentleman from Texas (Mr. DOGGETT) about Better America Bonds, there is a lot that the Federal Government can do to make a difference for things that people really care about, making their families safe, economically secure and healthy.

Mr. Speaker, a critical part of making the Federal Government a better partner in promoting livable communities is the work we do with basic infrastructure. Rather than spending a lot of new money, making new rules

and regulations and starting new programs, one the most important contributions the Federal Government can make is using our existing resources more wisely.

Nowhere is that more clearly illustrated than what we do with water resources. Currently, the Federal Government makes it easier to spend money paving a creek to stop flooding than to restore wetlands to achieve the same goal. I have already introduced legislation that would make it easier for communities to invest in cheaper, greener approaches to flood protection. This approach does not need to cost the Federal Government an additional dime, and it gives the communities more choices as they solve their problems and increase livability.

The National Flood Insurance program poses another critical water resource management challenge. It is appropriate for the Federal Government to step in when there is a case of unforeseen natural disaster. However, if it is clear that some people make it hard on themselves by continuing to invest in unwise anti-environmental, unsustainable situations, then we have an obligation to draw the line. The Federal taxpayer should not be paying for people to live in places where God repeatedly has shown that he does not want them.

There is a home in Houston which has an appraised value of \$114,000 which has received over \$800,000 in flood insurance payments in 16 events in the last 10 years. Over 5,600 properties, nearly 1 in 10, have loss claims which exceed the value of the property. Forty percent of our flood insurance goes to 2 percent of the property that is repeatedly flooded.

Mr. Speaker, if the local government and private property owners are going to be foolish, they need to do it on their own dime. Indeed, it is not just our money they are wasting; these development patterns take on a life of their own. They pressure organizations like the Corps of Engineers, FEMA and state and local communities to further engineer the environment and protect ill-advised development from flooding, often succeeding in making matters worse.

Despite having spent over \$40 billion since 1960, our losses adjusted for inflation are three times greater than when we started the building spree. Our disaster relief costs have increased 550 percent in the last 10 years.

It is time for us to rethink our policies and our investments. It is time to stop the waste of money, predictable loss of property, and threat to public safety. As a basic simple common sense step, it is time to reform the National Flood Insurance program.

Mr. Speaker, I am pleased to join with the gentleman from Nebraska, (Mr. BEREUTER) who has long been a champion of reforming the Flood Insurance Program to propose a simple approach to repetitive flood loss. We retool the Flood Insurance Program so

that rather than continuing to rebuild a repeatedly flooded home, the program would provide homeowners with money to help them move away from flood waters or at least floodproof their homes. Those who refuse assistance must start paying the real actuarial insurance costs for the risks that they choose to take.

This policy is both humanitarian and fiscally responsible, allowing people to move out of harm's way and protecting the Federal taxpayer by making the National Flood Insurance program solvent. We need to enforce the existing rules and regulations to keep people out of harm's way. We need to spend money to prevent loss rather than repeatedly cleaning up after it is too late.

This basic solution to more livable communities will not require more money or bureaucratic regulations. As usual, a livable community is possible if the Federal Government is a thoughtful partner with citizens and their local government. I would like to urge my colleagues to join with me and the gentleman from Nebraska (Mr. BEREUTER) to reform the National Flood Insurance program and to sign on as cosponsors of our "Two Floods and You're Out" legislation.

WHO IS RECKLESS?

The SPEAKER pro tempore. Under the Speaker's announced policy of January 19, 1999, the gentleman from Florida (Mr. MICA) is recognized during morning hour debates for 5 minutes.

Mr. MICA. Mr. Speaker, from time to time the comments from this administration and the President of the United States lead me to the floor to comment. I think my colleagues and the American people saw the President of the United States calling the Republicans reckless. And I guess I am included in that, I am a Republican. We were called reckless for proposing a significant tax cut for the American people.

Mr. Speaker, I almost had to chuckle to hear the President of the United States call me reckless and the Republicans for offering a tax cut. It is almost hysterical when we think about it when the other side of the aisle for some 40 years had control of this body and under the Constitution of the United States we all know bills, financial bills start in the House of Representatives on the basis of a judgment made by our founding fathers. For 40 years, the recklessness of the other side nearly bankrupt this Nation.

When I came into the House of Representatives in 1992, we were facing financial disaster. This was carried through with the reckless policy of this President who instituted one of the largest tax increases in American history a few months after his election. And again when he had complete majorities in the House, the Senate, and controlled the White House.

What was reckless is 40 years of taking money out of Social Security. It is
