Gottlieb strengthened his bond with the Jewish community as an undergraduate and graduate student through his involvement with the Jewish Culture Foundation at New York University and B’nai B’rith Hillel at the University of Florida, where he served as a Reporter for the Jewish Student News, also a member of Community Board 13 and serves on its Education and Library and Youth Services committees. He also serves his neighbors as a member of the Board of Directors in Section 4 of Trump Village and as an Executive Board member of the 600-member Jewish Youth Services committee. Mr. Gottlieb is a tireless worker for the people of Brooklyn and Queens.

CONGRATULATING THE PASCACK HISTORICAL SOCIETY

HON. MARGE ROUKEMA
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, November 17, 1999

Mrs. ROUKEMA. Mr. Speaker, I rise to congratulate the Pascack Historical Society on the recent restoration of its museum, and for all the work the Society has done to preserve the heritage of the Pascack Valley.

The Pascack Historical Society Museum, located in Park Ridge, New Jersey, is a wonderful collection of artifacts depicting life in the region from the 18th Century through the early 20th Century. It is a popular destination for tourists and natives alike, and is a treasure-trove of archival information for scholars of local history.

Special recognition must go to a number of key individuals involved. The project was ably guided by Historical Society President Katharine P. Randall, Vice President Francesca M. Moskowitz, Secretary Ellen Kramer and Treasurer Richard Ross.

The renovation would not have been possible without the generosity of the late Ellen Berdais, a long-time member of the Historical Society who died of cancer in 1995, just after the project began. In her honor, the annex will be named the Ellen Berdais Hall. In addition, the main museum building will be named in memory of its longtime curator, Wilma Uder.

The museum is housed in the 19th century former First Congregational Church of Park Ridge. During the three-year, $275,000 renovation, the church building was substantially restored and a dilapidated barn was replaced with an 18,000-square-foot addition. Its exhibits include the facade of a country store, a turn-of-the-century parlor, and a recreation of rooms from a small, Colonial-era home. Artifacts include items the Leni-Lenape Indian tribe and early settlers used for trading, farming and manufacturing. A machine for making the “wampum” ornaments Native Americans once used as currency is part of the collection, along with a printing press from a local newspaper and a wooden horse used by a saddle maker.

The Historical Society was founded in the 1930s by John C. Storms, publisher of the Park Ridge Local, and was formally incorporated in 1942. A small group of area residents dedicated themselves to collecting and preserving artifacts and written accounts of Pascack Valley history, and sharing the collection through exhibits, lectures and a quarterly newsletter. The society’s collection was housed in various locations until it found a permanent home in 1952 with the purchase of the church, which had been a Park Ridge landmark since 1875.

During its nearly half-century of operation, thousands of school classes, civic organizations, researchers and individuals have visited the museum and attended the Historical Society’s lectures. Staffed entirely by volunteers, the museum has depended on the generosity of its members and friends for financial support.

It became obvious in 1994 that the adjacent bar—used as a meeting room, research center, storage area and workshop—was in such a dangerous state of disrepair that its demolition was ordered by the borough. With the loss of this facility, it was necessary to temporarily close the museum and begin a major fundraising campaign to rebuild. Supports worked for five years to make the dream a reality.

I ask my colleagues in the House of Representatives to join me in commending the Pascack Historical Society and all its members on the hard work and dedication that have preserved this American historic treasure for the benefit of all.

THE BICENTENNIAL OF MONROE, NEW YORK

HON. BENJAMIN A. GILMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, November 17, 1999

Mr. GILMAN. Mr. Speaker, I am pleased to note to our colleagues that the Town of Monroe, New York, in my congressional district is currently celebrating its 200th anniversary.

With its population estimated in 1996 to be nearly 26,000, the Town of Monroe has long been considered one of the major hubs of our Hudson River valley. Within the boundaries of the Town are three incorporated villages: the Village of Harriman, which preserves for tourists and scholars a typical colonial community. The legendary showman, George M. Cohan, was a resident of Monroe. When in his declining years the classic motion picture biography of his life, “Yankee Doodle Dandy” was released, he was too ill to travel to New York City for the grand premiere. So a special screening for Cohan and his family was arranged to take place at the Mombasha Fire House. Mr. Cohan applauded the portrayal of his life story by the legendary Jimmy Cagney.

Today, as we stand on the threshold of a new millennium, the Town of Monroe and the three Villages within its boundaries all look forward to the third hundred years with a sense of confidence that the challenges of tomorrow will be met.

Mr. Speaker, I invite all of our colleagues to join me in saluting the Town of Monroe, New York, on this milestone occasion.

TRIBUTE TO STEPHEN M. MELTZ

HON. DAVID D. PHELPS
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, November 17, 1999

Mr. PHELPS. Mr. Speaker, I rise today to pay tribute to Stephen M. Meltz on his sixieth birthday. Stephen will gather with his friends and family to celebrate this momentous occasion just after Thanksgiving. Stephen was born in Chicago, Illinois, on December 15, 1939, to Jacob and Celia Meltz, who married to Nadine (Greenberg) Meltz and have two sons: David and Gary. Stephen has lived in Chicago his entire life. He attended college at
the University of Chicago, receiving both his undergraduate degree in political science and his M.B.A. at the prestigious university. He also served his country proudly in the United States Army Reserve.

Stephen M. Meltz is currently the President of Stephen Meltz and Associates, a CPA firm located in Lincolnwood, Illinois. It is a successful business, where his clients know that the work done by Stephen’s firm is both professional and honest. For the last year his son David Meltz has joined him at the firm, which now makes it truly a family business. But for all the honors that he has had in his professional life, I know that his family is his greatest sense of pride and accomplishment.

Stephen has always made the best interests of his family his primary concern. He has taken care of his wife, his children, his parents, his wife’s parents and many members of his extended family with loving care. He saw to it that his children received the best educations available. He made sure that the final years of his father, the late President of the Meltz and Associates CPA firm, were lived with dignity and comfort. Like many fathers, his devotion to his family has sometimes gone unnoticed, but he does not care for his loved ones for accolades, but because he loves his family, for all these reasons, Stephen is a patriarch in the truest sense of the term. A pillar of integrity that all his family can lean on in their hour of need and celebrate with during times of joy.

Mr. Speaker, it is often said, that the road to the Underworld is paved with good intentions. Contrary to this premise, Stephen M. Meltz has always had honor and a strong core of moral beliefs and intentions, and his actions have always had those values. Aristotle said, “In the arena of human life the honors and rewards fall to those who show their good qualities in action.” Stephen’s rewards are both a devout family and loyal friends who have witnessed his lifelong “good qualities in action” and will honor him over dinner on his sixtieth birthday.

Mr. Speaker, lastly, I am particularly pleased to have this opportunity to congratulate Stephen M. Meltz, on his sixtieth birthday, because his son Gary C. Meltz is a member of my staff here in Washington, D.C. Gary asked me to put into the CONGRESSIONAL RECORD a speech to commemorate his father’s birthday. I am honored to do this for Gary and his father. I urge all my colleagues to join me now in wishing Stephen M. Meltz a happy sixtieth birthday and Godspeed.

M.D. ANDERSON CANCER CENTER

HON. GENE GREEN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 17, 1999

Mr. GREEN of Texas. Mr. Speaker, I wish to bring to the attention of my colleagues in the House of Representatives a recent article about the wonderful medical advances at the M.D. Anderson Cancer Center in Houston, Texas. The article tells the stories of two people, a young college student and the former Speaker of the House Jim Wright, dealing with cancer of the jaw. They and their experiences with this once debilitating disease. Their respective stories highlight the need to support our Nation’s cancer centers and highlight how medical advances can truly give Americans hope where none previously existed.

Reconstructing Lives by Mary Jane Schier—For 19-year old James Smith, the quality of survival from cancer of the jaw is paramount in order to pursue his dream of playing professional football.

Smith is a junior majoring in health and human performance at McNeese State University in Lake Charles, LA, where he was an outstanding defensive tackle until diagnosed with a disease uncommon among teenagers. He and his family were stunned to learn in November 1998 that he had a tumor in his right mandible, the horseshoe-shaped bone that forms the lower jaw. The mandible, he knows, is the largest and strongest bone in the face.

Smith was forced to take an extended time-out from the football team to begin the biggest challenge of his young life. Upon coming to M.D. Anderson, he joined a new team whose members are nationally ranked for treating head and neck cancers.

The head coaches in the multidisciplinary treatment team that Smith received are Dr. Helmut Goepfert and Dr. Geoffrey L. Robb, who chair the Department of Head and Neck Surgery and the Department of Plastic Surgery, respectively. For the coaches and their specialty colleagues, the common goal centers on removing the cancers and restoring optimal form and function.

Smith’s surgery 3 days before last Christmas involved cutting out his diseased jaw and reconstructing the mandible with bone and tissue taken from his left leg. Although he couldn’t talk or eat his favorite pizza for a while, Smith says now, “I’m getting stronger every day . . . and I’m eager to play again.”

At the other end of the age spectrum is former U.S. House Speaker Jim Wright, who at age 76 also illustrates the importance of high quality in one’s life. “I’ve always been a talker, so I was a little concerned before the surgery that I wouldn’t be able to talk well enough for people to understand me,” confides Wright, a Fort Worth Democrat whose 34-year span in Congress was complete.

During more than 13 hours of surgery at M.D. Anderson last March 12, Wright’s cancerous right mandible, an adjacent segment of the tongue and eight teeth were removed, then a six inch piece of bone from his left leg was used to form a new jaw. Skin from his left thigh overlying the bone was also transplanted to replace part of his inside of his mouth and tongue and the external skin of his cheek.

“Believe me, I feel truly blessed,” Wright says in a strong and clear voice. His gratitude to his doctors and his triumphed by recalling how his father lost a jaw to cancer more than 30 years ago. “There was no thought then of replacing it with bone from somewhere else in the body . . . (He) spent his last days with a facial disfigurement that was the mark then of many cancer victims,” Wright remembers.

This was Wright’s second bout with an oral cancer. In 1991, he had surgery at M.D. fol- lowed by radiation treatments. Since his latest extensive surgery, he has resumed most of his favorite activities, including writing a regular newspaper column and, of course, “talking with anyone who’ll listen.”

Intensive collaboration among head and neck surgeons and plastic surgeons in recent years has “greatly improved our ability to resect all sizes of tumors and to restore vital function and appearance as well as to extend survival,” observes Dr. Goepfert, who holds the M.G. and Lillie A. Johnson Chair for Cancer Treatment and Research.

New techniques developed by plastic surgeons permit reconstruction of the oral cavity safely and with increasingly good outcomes. The key to success involves transferring tissues— together with vital blood vessels and nerves—from elsewhere in a patient’s body to use for rebuilding parts of the head and neck affected by cancer.

Dr. Robb explains, “The head and neck is the most difficult area to reconstruct. But through specialized Micro vascular techniques, we can move tissues, muscle, fat and bone, along with their blood supply, to use in re-shaping jaws, the tongue, and parts of the nose, ears, and throat.”

Age is no obstacle for performing big reconstructive procedures so long as older patients have good blood vessels to transfer with the tissues. Regardless of age, Dr. Robb says, “Our primary aim is to restore form, contour and function to the body parts affected by cancer surgery so that patients can enjoy the highest quality of life.”

For Wright, being able to talk, chew, swallow and look virtually normal is a “miracle” stemming from remarkable medical progress and his religious faith. “The good news is that cancer is conquerable” and “useful life is prolongable.

Realizing the best quality of cancer survival for Smith, however, will occur when he can return to the football field. During a recent fol- low-up visit to M.D. Anderson, his doctors encouraged him to continue that dream.
