

Under my legislation, seniors would also have the right to either keep their existing coverage or participate in the NICE program. No senior would be forced to change their current coverage. The NICE program is entirely voluntary.

Finally, my proposal is funded primarily from the on-budget surplus without any tax increase.

Mr. Speaker, Congress must act now to help seniors receive the vital prescription drug coverage they rely on to live. As a vigorous supporter of modernizing and strengthening Medicare, I will continue to do everything I can to make prescription drugs accessible for our senior citizens. For that reason, I am introducing the New Insurance Coverage Equity Act today, and I urge all my colleagues to join me in sponsoring this common sense approach to making prescriptions affordable for our seniors.

ART HOLBROOK

**HON. BOB BARR**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 18, 1999*

Mr. BARR of Georgia. Mr. Speaker, on an almost daily basis, politicians and news commentators in Washington bemoan the fact that not enough Americans get involved in public debates. Obviously, these people have never met Art Holbrook.

First, I'd like to add some background. Troup County, located in Georgia's Seventh District, is home to West Point Lake. For Troup residents, the lake provides many of life's basic necessities, such as sites for homes, sources of income, and recreation opportunities.

However, in recent years, those who manage the lake have dramatically lowered water levels to serve downstream water users. The result is that people who live on the lake and navigate its waters, have found themselves overlooking muddy flats and navigating non-existent waters.

Most people would look at this situation and complain, but do nothing to change it. Not Art Holbrook. Not only did he respond to our request to serve on our West Point Lake Task Force, but he took a leadership role in building a comprehensive case, with new, innovative, and scientific data, in support of higher water levels in the lake.

These efforts recently reached a pinnacle, as hundreds of Troup residents attended a weekday meeting about the lake, with one of the top Army officials responsible for overseeing lake management. Most meetings would attract a few dozen people at best. However, with Art Holbrook on the scene and in charge, an army of activists greeted Deputy Assistant Secretary of the Army for Civil Works Michael Davis, when he touched down in LaGrange.

Of course, I would expect no less from a man who left high school so he could serve in the Army during the Korean War at the age of seventeen; and who upon returning home, received degrees from the University of Florida and Emory Dental School, where he served for two years as class president. In the process, he also paid his bills by teaching at Emory.

When Art retired in 1985, he and his sons built a log cabin on the banks of West Point Lake, where he and his wife Dianne live today. Fortunately for all of us, Art didn't rest on his laurels, but has kept fighting to make his community better. He has truly become proof positive that local activism in American communities is alive and well.

TRIBUTE TO U.S. MARINE CORPS  
CAPTAIN SARAH DEAL

**HON. MARCY KAPTUR**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 18, 1999*

Ms. KAPTUR. Mr. Speaker, I rise today to recognize the achievements of U.S. Marine Corps Captain Sarah Deal. Captain Deal deserves the warmest, most heart-felt congratulations for her accomplishment of becoming the first female pilot in Marine Corps history. Her achievements reflect her courage, determination and self-belief. On behalf of Ohio's lawmakers and citizens, I wish to pay tribute to this outstanding young woman.

Growing up in Pemberville, Ohio, Captain Deal always had a passion for flying, in part inspired by her father, a former Marine, who worked as an engineer testing jet engines. A graduate from Eastwood High School, she went on to study Aviation at Kent State University. From there, she made the tough choice to join the United States Marine Corps to begin training as an air traffic control officer. Even though women were allowed to fly in the Army, Navy and Air Force, she still chose the Marines, knowing that the only way she would be allowed to fly would be recreationally. However, her difficult choice was rewarded with the landmark Defense Department decision in 1993, ordering the armed forces to end their ban on women flying combat missions. Following the announcement, Captain Deal immediately chose to attend Marine flight school despite being the only woman there. Her persistence and hard work were rewarded in April 1995, when her father had the pleasure of pinning her wings to her uniform at her graduation ceremony in Milton, Florida.

Abigail Adams once wrote in a letter to her husband, "all history and every age exhibit instances of patriotic virtue in the female sex; which considering our situation equals the most heroic of yours." Captain Deal follows in the footsteps of the legendary Grace Hopper, mathematician and computer pioneer, who became the first female Rear Admiral in the US Navy. And of Sally Ride, the first female U.S. astronaut. And of Mary Hallaren, champion for permanent status for women in the military after World War II and subsequent director of the Women's Auxiliary Corps from 1947-1953. All these women have proved there is nothing that cannot equally be achieved by women in our armed forces. Captain Deal's achievements are a proud demonstration of what can be achieved by women in today's society. Her achievements offer hope and encouragement to all women to follow their dreams and to pursue paths that have previously been unjustly denied them. Her efforts have been a key factor in breaking the gender barrier that existed in the armed forces and in opening the eyes of others to more tolerant attitudes.

This month Captain Deal will be inducted into the Ohio Women's Hall of Fame, in recognition of her achievements.

On behalf of Ohio's Ninth District, I would like to wish Captain Deal every success with her military career and in her current assignment with the Marine Corps Air Station in Miramar, California. We are truly grateful for her service to our country and once again congratulate her for all her achievements. Her virtue and patriotism are a shining example to all women, and indeed, all people in this Nation.

NATIONAL LABORATORIES

**HON. TOM UDALL**

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 18, 1999*

Mr. UDALL of New Mexico. Mr. Speaker, today, I introduce a bill that will allow our National Laboratories to more effectively perform their missions while also promoting economic development in the communities that surround the facilities. Specifically, this bill creates a win/win scenario for both the National Laboratories and the adjoining communities. The National Laboratories will advance their missions by benefiting from the cutting edge technology possessed by universities and companies near them and the community benefits from the creation of needed high quality infrastructure that will boost innovation and create job growth.

In recognizing the potential of involving the national laboratories in technical collaborations with institutions in their surrounding communities, Congress has in the past encouraged cooperative research and development agreements (known as "CRADAs"). This legislation builds upon the success of the collaborations.

Specifically, this bill will: Create an advocate for small business at each national laboratory who will focus on increasing the involvement of small businesses in the national laboratory's procurement and collaborative research; create a technology partnership ombudsman at each laboratory who will guarantee that the national laboratory remains a good partner; allow the Department of Energy to use more flexible contracting authority; and streamline current process concerning the cooperative research and development agreements; to make these agreements more appealing to technical organizations, such as companies and universities.

I have a national laboratory in the district that I represent, Los Alamos National Laboratory. As with other national laboratories, the Los Alamos National Laboratory has a very important relationship with the people in the surrounding communities and the region. As I am sure with all communities that surround our national laboratories, there is a need for greater economic prosperity. This bill creates a long term solution to this problem. Besides assisting the national laboratories in fulfilling their missions, this bill also lays the foundation to create high paying jobs that will directly benefit our communities.

This is a companion measure to a bill introduced in the other chamber by Senator JEFF BINGAMAN from New Mexico. This is an initiative that he has pursued for many years and I would like to recognize him for this effort.

Mr. Speaker, I ask my colleagues to support this worthy legislation.
