

Helen were held in a detention center in Beijing and interrogated. They were not allowed to see each other or communicate with the outside world. Later they were moved to a facility where conditions were less harsh and were finally permitted to speak with each other. Helen was released from custody on November 16 and allowed to return home to Carlisle, but Yongyi remained in detention. On December 24, Song Yongyi was arrested and charged with the "purchase and illegal provision of intelligence to foreign people."

Mr. Song's arrest generated an outpouring of support from scholars in the United States and abroad, as well as from politicians. As of result of the vigorous campaign to secure Mr. Song's release, the Chinese government announced their decision to free Song Yongyi.

On behalf of the many Pennsylvanians who diligently kept the Song family in their thoughts and prayers, I would like to extend my heartfelt congratulations and warmest wishes on the safe return of Song Yongyi.●

#### HATS OFF TO THE ALL-STAR RESEARCH TEAM AT NORTH DAKOTA STATE UNIVERSITY

● Mr. DORGAN. Mr. President, well over a decade ago, plant pathologists at North Dakota State University's Agricultural Experiment Station observed signs of a plant disease called Fusarium Head Blight—more commonly known as scab—in a few of the region's wheat fields. Upon this discovery, the researchers swung into action, not knowing they were about to do battle with an insidious plant disease which would eventually devastate wheat fields across the Northern Plains during the 1990s. Since 1993, scab has been an ever present scourge. Losses to the region's farmers from this cereal crop disease have been estimated to be as high as \$2.6 billion during the last decade, the most costly plant disease outbreak ever in the United States.

Earlier this month, though, some good news was delivered on this front by those researchers who have battled this disease for so long. The North Dakota State University Agricultural Experiment Station announced the release of a new scab resistant spring wheat variety named Alsen. The new variety is named after the town of Alsen, located on route 66 in Northeastern North Dakota, an area which was particularly hard hit by this disease.

The researchers say that while this variety is not immune to scab, it can fight off the disease. This is excellent progress and welcome news. And, while this is the first spring wheat variety to exhibit scab resistance, it certainly won't be the last.

My hat is off to these researchers from North Dakota State University! There are many long, tedious, and unglamorous hours involved in cross-breeding wheat plants. The farmers of

the region will be served well by this research, and it is proper and fitting that we recognize the dedicated efforts of those who have contributed their life's work to combat this disease which threatens the livelihood of our producers.

On behalf of all who are involved with, or impacted by, the agricultural economy of the Northern Plains—which includes just about everyone living in the region—I am proud to be able to take this opportunity to say thank you for a job well done to the researchers and support staff of the North Dakota State University Agricultural Experiment Station.●

#### TRIBUTE TO BARBARA BUSCH

● Mr. COVERDELL. Mr. President, I rise today to pay tribute to an American who has given graciously and unselfishly to her country. For over 36 years, Barbara Busch served this nation with great distinction in her many different capacities at the U.S. Peace Corps: from a staff assistant when she first began in 1964, to Executive Officer of the Recruitment and Communications Division, to Chief of Operations of Volunteer Recruitment and Selection, to Acting Director of the Peace Corps. It is truly a story of hard work and dedication.

Barbara retired from public service just under one month ago. Mr. President, I wanted to take this opportunity to congratulate her for a remarkable career and wish her well as she moves on to the next stage of her life. She leaves the Peace Corps with a better understanding of its importance and its role in the world than anyone that comes to mind. She will be greatly missed.

When I had the privilege to serve as Peace Corps Director, Barbara was working in the Office of Planning, Budget, and Finance. She was a diligent worker, excellent manager, and had a wonderful rapport with Peace Corp volunteers and returned volunteers alike. She was one of the few, courageous supporters of World Wise Schools, an innovative global education program that provides students in the United States with a view of life in countries around the globe. Since its inception in 1989, more than a million students in all 50 states have "put a face on a place" through World Wise Schools.

Back in 1964, when Barbara began her service, the Peace Corps was operating in 48 countries. Today, after her 36 years, the Peace Corps has 7,000 volunteers in 78 countries around the globe. It is because of dedicated public servants like Barbara that the Peace Corps continues to build on its distinguished record of service and continues to provide unique leadership around the world. There is no doubt that Barbara embodies the very spirit of the Peace Corps: a strong work ethic, generosity of spirit, and a commitment to service—the finest characteristics of the America people.

The Peace Corps continues to be the most successful program of its kind precisely because of its commitment to serving others. It is this legacy of service and commitment to others that Barbara leaves behind and for which she will be remembered.●

THE HONORABLE IKRAM U. KHAN,  
M.D.

● Mr. JOHNSON. Mr. President, I rise today to honor my good friend, the Honorable Ikram U. Khan, M.D.

I have had the honor of knowing Ikram for several years and I am fortunate we have developed a good friendship. Because of that friendship, I am doubly pleased that Ikram has been appointed by President Clinton to the Board of Regents for the Uniformed Services University of the Health Sciences.

This is an extremely prestigious appointment, one that Ikram richly deserves. During his twenty-one years of private practice, he has served not only his patients and the institution of medicine, but also his community and state. He has been honored by his hometown of Las Vegas and various local organizations for his community service and achievements. He has been nominated to serve on Nevada's State Board of Medical Examiners and on the state Legislature's Health Care Cost Containment committee. On the national scene, Congresswoman Barbara Vucanovich, in 1993, asked Ikram to advise her on health care delivery issues specific to Medicare, and President Clinton, in 1995, recognized Ikram for his health care reform efforts. He is a very fine man, and his years of dedication to military medicine and to the health industry in general ensures he will perform a great service in this position.

Mr. President, I would like to again congratulate my friend, Dr. Ikram Khan, on his appointment to the Board of Regents and wish him the best on his new challenges managing the Uniformed Services University of Health Sciences. I trust the University and Secretary Cohen will find him a valuable asset and a skilled adviser.●

#### NATIONAL HEART FAILURE AWARENESS WEEK

● Mr. SANTORUM. Mr. President, on February 10th, I phoned in a request to become a cosponsor of S. Res. 256, a resolution designating the week of February 14 through 18, 2000, as "National Heart Failure Awareness Week". Unfortunately, my name was inadvertently not included in the list of cosponsors at that time. Hence, I ask unanimous consent that the RECORD reflect my support and cosponsorship of the resolution.

Mr. President, I cosponsored this important resolution because it will help to promote research related to all aspects of heart failure and enhance the quality and duration of life for those
