

fireworks and then puts him in the bedroom with the radio on so he won't be frightened at the explosions. In all those years together Gene could never convince Charlie not to be afraid of the fireworks.

Mr. Speaker, downtown Martinez and all the friends of Gene and Marge Ross are going to miss both Charlie and the special relationship that they enjoyed. Following is a letter that Gene wrote that was published in our local paper:

[From the Contra Costa Times, May 2000]

MAIN STREET POOCH WON'T BE FORGOTTEN

DEAR GARY: On Monday we suffered the loss of our beloved golden retriever, Charlie.

Charlie was a fixture on Main Street in Martinez. He went to work with me every day for 14 years and had so many people that loved him. This is our way of letting them know about him.

Last Friday, Dr. Ruth Adams, our veterinarian, diagnosed Charlie with a fast-growing bone cancer. There was no hope of saving him, only of keeping him happy for the few remaining days.

Charlie loved greeting visitors to our office, visiting with clients (as long as they didn't try to sit in "his" chair) and going down Main Street with me to take care of his business. He brought a smile to everyone's face.

He ran in Briones Park with our running group, Rob, Peter, Paul and myself, for 14 years. His excitement over our long runs never altered. If we ran 10 miles, he ran at least 15, always checking back to make sure we weren't lost.

He loved hiking in the Sierra, swimming in Donner Lake and cheering on our bocce team. His energy was boundless.

He talked, really "talked" to my wife, Margie, every night to let her know how our day at the office went. And always with two or three tennis balls in his mouth.

He let our two little grand-daughters cuddle and climb on him with such patience.

On Monday he went to the office with me for the last time. By noon I could see that he was not doing well. I took him home to my wife who "talked" to him. He told her he was in pain and that it was time. She gave him medication to ease his pain.

As he wagged his tail and held his tennis ball in his mouth, we held him close, and Dr. Adams eased him into the world where his puppyhood friends, RJ and Morgan, waited for him at the Rainbow Bridge.

His tennis balls are still scattered around the house. Not to tell us he is coming back, but to tell us he will always be with us.

Thanks to all of Charlie's friends who have been so supportive and kind. And to you, for letting us share our loss.

GENE ROSS, *Martinez.*

RECOGNITION OF THE SALT RIVER PROJECT AS A LOCAL LEGACY

HON. JOHN B. SHADEGG

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 24, 2000

Mr. SHADEGG. Mr. Speaker, I rise today to applaud the inclusion of the Salt River Project in the Local Legacies Program of the Library of Congress. I nominated the Salt River Project for this honor because of the pivotal role which it has played in the growth of the City of Phoenix and Central Arizona. This nomination was a natural decision for me: my father Stephen Shadegg wrote several books

on the Salt River Project, including its first narrative history in 1942, and subsequent works on the importance of the Project to Arizona's development. These books include: *Arizona: An Adventure in Irrigation* (1949), *The Phoenix Story: An Adventure in Reclamation* (1958), and *Century One: One Hundred Years of Water Development* (1969).

In 1868, Phoenix had a population of 100 people; it is now the sixth largest metropolitan area in the United States. All of this growth was made possible by the development of water storage and irrigation facilities and, since 1903, the Salt River Project has played a central role in this development.

In a desert state like Arizona, access to a reliable supply of water is literally a matter of life and death. The early settlers recognized this fact and constructed the first of many water supply canals in Phoenix in 1868. These early canals relied on diverting water from the rivers but did not include the construction of dams to create water storage reservoirs. This failure to store water proved to be a fatal flaw when drought hit in the 1890's. For three years, there was no rain and the rivers ceased to run. The population of Phoenix plummeted and conflicts, some of them deadly, erupted over the limited water available.

This devastating drought forced the citizens of Phoenix to band together and create an organization capable of financing, constructing, and operating a water storage and delivery system. It required the highest degree of personal commitment: each property owner in the Phoenix area pledged his or her property as collateral to finance the construction of the system. In 1903, this organization took shape as the Salt River Water Users' Association, now a part of the Salt River Project, and became the first water storage system organized under the Federal Reclamation Act.

Today, it is easy to take the necessities of life for granted, including the ability to get water by simply turning on a faucet. However, the laws of nature still apply and, in a desert, a reliable supply of water will always be a matter of life and death. Life in Arizona, Southern California, and other desert regions is only possible because a guaranteed, permanent supply of water is available.

While the laws of nature should be self-evident, there are some individuals and organizations who refuse to accept them and instead advocate the destruction of the water supply reservoirs which make life in the desert possible. We are currently locked in a struggle against the willful ignorance of these groups and individuals and, while we are supported by the facts, we must not underestimate the zealous dedication of the other side. We must not allow such destructive proposals as the draining of Lake Powell to lead to a repeat of the devastation inflicted on Phoenix by the drought of the 1890's.

As long as people live in the desert, there will be a need for organizations like the Salt River Project to supply them with the most basic substance needed for life. I salute the Salt River Project for its historic role in the development of Phoenix and its continued importance, and welcome its inclusion in the Local Legacies Program.

COLORADO STATE SENATE
PRESIDENT RAY POWERS

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 24, 2000

Mr. McINNIS. Mr. Speaker, I want to take this moment to recognize the career of one of Colorado's leading statesmen, President of the Senate, Ray Powers. In doing so, I would like to honor this individual who, for so many years, has exemplified the notion of public service and civic duty. It is clear that Senator Powers' dynamic leadership will be greatly missed and difficult to replace.

Elected to the State Senate in 1980, he sponsored many bills addressing, for example, death penalty, highway funding and more judicial requirements for judges. In 1983, Ray served as the Majority Caucus Chairman and then moved to the position of the Assistant Majority Leader.

Senator Powers also received many honors. He has received the United States Veterans Committee Distinguished Service Award and was named by the Colorado Springs Chamber of Commerce and the Colorado Public Affairs Council as Legislator of the Year.

This year marked the end of Senator Powers' tenure in elected office. His career embodied the citizen-legislator ideal and was a model that every official in elected office should seek to emulate. The citizens of Colorado owe Senator Powers a debt of gratitude and I wish him well.

MUHAMMED ALI BOXING REFORM ACT

SPEECH OF

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 22, 2000

Mr. GOODLING. Mr. Speaker, four years ago, the Congress passed the Professional Boxing Safety Act, an Act within the primary jurisdiction of the Committee on Education and the Workforce. This Act created comprehensive nationwide regulations for the sport of boxing. It was a first step establishing a uniform system of licensing and minimum health and safety standards for boxers.

Because of the Professional Boxing Safety Act, for the first time, states could keep track of and protect professional boxers with appropriate oversight and supervision.

Corruption continues to taint the sport of boxing. A major international sanctioning body has been charged with bribery, racketeering and money laundering. And, the sport continues to endure allegations of fixed fights. The Miami Herald has reported that over 30 prizefights in the last 12 years have been fixed. Tragically, the boxers themselves suffer the most from the exploitation and anti-competitive business practices seemingly endemic to the sport.

The Muhammed Ali Boxing Reform Act would help to put an end to this corruption. It requires the establishment of objective and consistent criteria for the ratings of professional boxers. It requires the disclosure of compensation received in connection with a
