(Ms. NORTON) is recognized for 5 minutes.

(Ms. NORTON addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

THE BEGINNING OF THE END OF FIAT MONEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PAUL) is recognized for 5 minutes.

Mr. PAUL. Mr. Speaker, the golden new era of the 1990s has been welcomed and praised by many observers, but I am afraid a different type of new era is arriving, a dangerous one, heralding the end of 30 years of fiat money. If so, it is a serious matter that deserves close attention by Congress.

There is nothing to fear from globalism, free trade and a single worldwide currency, but a globalism where free trade is competitively subsidized by each nation, a continuous trade war is dictated by the WTO, and the single currency is pure fiat, fear is justified. That type of globalism is destined to collapse into economic despair, inflationism and protectionism and managed by resurgent militant nationalism.

Efforts to achieve globalist goals are quickly abandoned when the standard of living drops, unemployment rises, stock markets crash and artificially high wages are challenged by markets forces.

When tight budgets threaten spending cuts, cries for expanding the welfare state drown out any expression of concern for rising deficits.

The effort in recent decades to unify government surveillance over all world trade and international financial transaction through the UN, the IMF, the World Bank, the WTO, the ICC, the OECD and the Bank of International Settlements can never substitute for a peaceful world based on true free trade, freedom of movement, a single but sound market currency and voluntary contracts with property private rights.

Mr. Speaker, great emphasis in the last 6 years has been placed on so-called productivity increases that gave us the new-era economy. Its defenders proclaimed that a new paradigm had arrived. Though productivity increases have surely helped our economy, many astute observers have challenged the extent to which improvements in productivity have actually given us a distinctly new era. A case can be made that the great surge in new technology of the 1920s far surpassed the current age of fast computers, and we all know what happened in spite of it, after 1929.

A truly new era may well be upon us, but one quite different than what is generally accepted today. The biggest era in interrupting today's events is the totally ignoring of how monetary policy in a fiat system affects the entire economy.

Politicians and economists are very familiar with business cycles with

Mr. BILIRAKIS. Mr. Speaker, on rollcall No. 47 I was inadvertently detained. Had I been present, I would have voted "yea."
