

most importantly, he loved people, and he cared deeply for them. He loved his wife Bonnie, and their three children. I want to offer my sincerest condolences to them. I know the last few months since he was diagnosed with leukemia have been especially difficult for them. They will always miss Eddie, but they can take great pride in the life he led, and the hearts he touched along the way.●

NDSU WRESTLING TEAM FLOOR STATEMENT

● Mr. CONRAD. Mr. President, last month the North Dakota State University wrestling team once again showed the strength, grit and determination of North Dakotans by winning the NCAA Division II wrestling championship. Not only was this the second consecutive championship for the Bison, it was the fourth national title in school history.

As a native North Dakotan, I am exceptionally proud of this accomplishment. Defending their NCAA Division II Championship, the Bison finished 7½ points ahead of second place South Dakota State University in the NCAA Division II finals on March 10. This year's dramatic victory came down to the wire needing a victory by Bison heavyweight Nick Severson to secure the victory over second place rival South Dakota State. Severson rose to the occasion by pinning an opponent he has never previously beaten. The stage for the upset heavyweight finale was set when each of the other Bison finalists, Todd Fuller and Steve Saxlund, did their part by becoming national champs at 174 and 184 pounds. For Saxlund, this was an impressive third straight national championship.

I congratulate the Bison wrestling program. Exceptional coaching, determined wrestlers, and remarkable teamwork led the Bison to their fourth national championship. They qualified all 10 members of their wrestling squad for the NCAA tournament. With all but one returning for next season, I expect to have the opportunity to make a similar announcement next year regarding the Bison's success in the world's oldest sport. Again, on behalf of all North Dakotans, I extend congratulations to the Bison on yet another successful season and wish the best of luck to the entire team.●

TRIBUTE TO DR. THOMAS E. STARZL

● Mr. SPECTER. Mr. President, I wish to recognize and honor Dr. Thomas E. Starzl on the 20th anniversary of the first liver transplant performed in Pittsburgh.

On February 26, 1981, Dr. Starzl made history upon his performance of the first liver transplant at Presbyterian University Hospital (now UPMC Presbyterian). In the two decades since that remarkable accomplishment, Dr. Starzl has led the University of Pitts-

burgh transplant program to national and international prominence. UPMC, now the largest and most successful transplant center in the world, has performed more than 5,700 liver transplants; 3,500 kidney transplants; 1,000 heart transplants; and 500 lung transplants—largely attributed to Dr. Starzl's trailblazing vision.

Dr. Starzl's influence reaches well beyond western Pennsylvania. He has been a pioneer in the field of organ transplantation for more than 40 years, and has compiled a distinguished career that spans the country and medical technology. Dr. Starzl performed the world's first liver transplant in 1963 at the University of Colorado, and helped to develop the truly revolutionary surgical techniques and anti-rejection drugs which have brought organ transplantation to the mainstream of American medicine. Dr. Starzl has authored or co-authored more than 2,000 scientific articles and four books, received 21 honorary doctorates, and has been honored with more than 175 awards. Most recently, he was a co-winner of the King Faisal International Prize in Medicine for the year 2000, sharing the award with two other transplant pioneers. Although retired from clinical practice since 1991, Dr. Starzl continues to actively contribute to biomedical research as the director emeritus of the transplant institute in Pittsburgh, renamed in his honor in 1996. The Thomas E. Starzl Transplantation Institute and the University of Pittsburgh will pay tribute to Dr. Starzl this month with a "Festschrift," a collection of articles by colleagues, former students and others published in his honor. This special event will inaugurate the Starzl Prize in Surgery and Immunology and unveil a portrait of Dr. Starzl that will be displayed in the University of Pittsburgh School of Medicine.

With more than 20 years of landmark advancements in science and medicine to his credit, I salute Dr. Thomas E. Starzl for his remarkable dedication and honor his contribution to the life-saving field of organ transplantation.●

MARY WALTERS

● Mr. BINGAMAN. Mr. President, I learned this morning that Mary Walters, one of New Mexico's most outstanding citizens has died at age 79. She was a pioneering spirit if there ever was one, and many of us who knew and admired her feel this loss keenly.

Not yet twenty-one, she served as a WASP, Women's Auxiliary Service Pilots transport pilot during World War II. In a move that would shape her later career, she used her soon-to-expire GI benefits to go to college and then went on to earn a law degree at age forty. For the next half of her life, she went places no woman had gone before in New Mexico. She was President of the New Mexico Women's Political Caucus and served in a leadership position in the Constitutional Convention.

She was the first woman named to the district court. Her service on the New Mexico Court of Appeals, 1978–1984, led to the New Mexico Supreme Court where she became the first woman to sit on that bench.

During a critical period for women's rights, Mary Walters took the lead in our state and in our profession. She had many admirers. My wife, Anne, and I, were among them. She was a marvelous person whose life was a blessing to all who appreciated her strength and spirit, and whose death reminds us all what a force for good she was.●

CELEBRATION OF CHAUL CHHNAM, CAMBODIAN NEW YEAR

● Mr. REED. Mr. President, I rise today to join Cambodian-Americans in celebration of the traditional Cambodian New Year, Chaul Chhnam, one of the major celebrations of the Cambodian culture. For three days this month, there will be gatherings across the United States to celebrate the beginning of the year. I take this opportunity to wish all Cambodian Americans a very happy New Year.

New Year celebrations are about the passing of time and the rejuvenation of optimism for the future. The Cambodian New Year is this and more. It represents a traditional end of the harvest and a celebration of faith. Traditionally, it was a time for farmers to enjoy the fruits of their harvest and relax before the rainy season began. The start of the New Year is marked by the sounding of a bell. With the sounding, it is believed that the New Angel arrives. Throughout the day people participate in ceremonies and bring food to the Buddhist monks and religious leaders. The second day of celebration, or Vana Bat, is a time to show consideration for others. Gifts are given to parents, grandparents and teachers as a show of respect and charity is offered to the less fortunate. The third day, or Loeng Sak, includes more religious ceremonies and rituals to bring good luck and happiness to families.

In my home state of Rhode Island there are numerous businesses owned by Cambodian-American families, most of them in the capital city Providence. These families enrich Rhode Island with their diversity and culture, and their hard work contributes much to the local economy. I would like to wish each one of them a happy New Year.

The Cambodian New Year is an appropriate time to remind all Americans why we must support the political and economic stabilization of Cambodia. As Cambodia continues to recover from three decades of civil conflict, including the atrocities committed by the Khmer Rouge, it is critical that the United States and international community aid the Cambodian people in their efforts to build a lasting democracy.

As we approach the beginning of Chaul Chhnam, I encourage all U.S.
