

There might be those who say we can't afford to care for our Nation's veterans, that the price is too high. But I say, if we don't stand by those who fought for us, we are unworthy of their sacrifice.

So on the Veteran's Day 2001, a day of remembrance and commitment, we salute the fighting men and women of our Nation, active duty, reserves, and veterans.

We look to them in our time of national need. They have never let us down. We pledge our support in the defense of freedom. We declare to them, we declare to each other, we will not allow the American dream to be diminished by fear, or our eyes dimmed by tears.

From the ashes of terrorism, we will build a new tower to freedom that will cast its light around the world. With God's help, we will prove again what the poet Carl Sandburg once said: "We are Americans. Nothing like us ever was."

VA-HUD APPROPRIATIONS

WATER PROJECTS

Mr. STEVENS. Mr. President, the conference report includes funding for water projects in the Ketchikan Borough. While the project will be located in the borough, technically the funds would be administered by the city of Ketchikan. Does the distinguished ranking member share my view that EPA should issue the grant to the city of Ketchikan which has agreed to administer the funds?

Mr. BOND. I agree that EPA should make the funds available to the city of Ketchikan, not the borough government.

NOBEL PRIZE TO DR. LEE HARTWELL

Mrs. MURRAY. Mr. President, I rise today to share with the Senate and the American people the remarkable work of Dr. Lee Hartwell, a respected scientist in Washington State. Dr. Hartwell was recently awarded the Nobel Prize for his groundbreaking research in cell division and cancer.

I'm especially proud that Dr. Hartwell conducted much of his research at the Fred Hutchinson Cancer Research Center in Seattle, where he serves as president and director.

On October 8, 2001, the Nobel Assembly announced that Dr. Hartwell, along with Paul Nurse and Timothy Hunt, has won the 2001 Nobel Prize in physiology or medicine. The award honors Dr. Hartwell's more than 30 years of pioneering work in yeast genetics. Dr. Hartwell's research into cell division has helped scientists throughout the world to better understand cancer and has laid the foundation for future cancer treatments.

Dr. Hartwell leads one of the finest research teams in the world at the Fred Hutchinson Cancer Research Cen-

ter. In the past five years, I've worked in Congress to double funding for the National Institutes of Health (NIH). This investment is intended to support the kind of groundbreaking research being conducted at the Research Center. In fact, as a member of the Senate HELP Committee and the Senate Labor, H.H.S. and Education Appropriations Subcommittee, I often point to the lifesaving research and care the center provides as an example of why this investment in NIH is so important.

Dr. Hartwell is not just a talented scientist. He is a real champion for cancer patients and their families. During consideration of a Patients' Bill of Rights, Dr. Hartwell often spoke out on behalf of cancer patients and explained the importance of access to clinical trials, which is sometimes the only hope for patients. Thanks to the advocacy of cancer researchers like Dr. Hartwell, the final legislation included this protection for patients.

Dr. Hartwell was born on October 30, 1939 in Los Angeles, California. He earned his Bachelor of Science in 1961 from the California Institute of Technology and his Ph.D in 1964 from the Massachusetts Institute of Technology. From 1965-68, he served as Associate Professor at the University of California. In 1968, he joined the faculty of the University of Washington and became a professor of genetics in 1973. In 1997, he became President and Director of the Fred Hutchinson Cancer Research Center. In 1987, he became a member of the U.S. National Academy of Sciences. He has received numerous honors including: the General Motors Sloan Award (1991), Gairdner Foundation International Award (1992), Genetics Society of America Medal (1994) and the Albert Lasker Basic Medical Research Award (1998).

Dr. Hartwell will be presented with the award on December 10, 2001, which is the 100th anniversary of the death of Alfred Nobel, after whom the award is named. The Nobel Committee has recognized what we in the Northwest have known for a long time; namely that because of Dr. Hartwell's hard work and dedication, the world is a better place. It is an honor and a distinct pleasure to join with the Nobel Committee in formally recognizing Dr. Lee Hartwell's many accomplishments.

KOREAN WAR VETERAN 1ST LT. LEON J. JACQUES, JR.

Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to the late 1st Lt. Leon J. Jacques, Jr., of Milford, NH, for his heroic services to the United States of America during the Korean war.

Leon was a graduate of Saint Anselm College and the United States Military Academy at West Point who also attended the Ground General School at Fort Riley, KS and the United States Army Infantry School at Fort Benning, GA.

He was assigned to the 21st Infantry Regiment, 24th Infantry Division in

Kumamoto, Japan. After the outbreak of war in Korea on June 25, 1950, Leon was committed to combat in Korea. During the first two weeks of combat, more than forty percent of the men fighting were killed, wounded, prisoners of war, or missing in action.

On July 12, 1950, Leon and his men were captured as prisoners of war and it was later learned that Leon had been killed by the enemy. He was in charge of several soldiers who were harassed by the enemy. Leon demanded that they stop and for making this statement, he was killed. According to a report received, "Lt. Jacques' complete disregard for his personal safety and valor in response to enemy aggression were in the finest tradition of military service and reflected great credit upon himself, the 21st Infantry Regiment and the United States Army."

Thanks to the generous efforts of Colonel Phil Day US Army (Ret), Leon has been honored with ten award medals including: Bronze Star Medal with "v" device, United Nations Service Medal, Presidential Unit Citation and the combat infantryman badge.

As the son of a World War II Naval aviator who was killed in a war related incident and a veteran of the Vietnam war, I empathize with the Jacques family. Leon is an American hero whose selfless dedication to his State and country has benefitted his fellow citizens with the blessings of freedom and liberty. It is truly an honor and a privilege to represent his family in the United States Senate.

RECOGNIZING THE HEROES OF THE ALEUTIANS CAMPAIGN

Mr. MURKOWSKI. Mr. President, I rise today to share a story about a remarkable group of veterans that fought for our freedom over 50 years ago. During October 4-7, 2001, a small band of World War II veterans and their families gathered in Anchorage for what was probably their last reunion. They shared the common experience of having fought an air war in one of the most difficult theaters of operations during World War II, the Aleutian Islands.

For those of you who have not had the opportunity to visit the Aleutians, let me tell you what you are missing. Some of the harshest and most unbearable weather exists in this region of my State. Some call the Aleutians the birth place of the winds. It is my honor to recognize these fine men who fought to protect our nation.

These courageous individuals are also the founders of today's Eleventh Air Force. Appropriately, those who spent their youth defending Alaska elected "Back to Our Roots," as their reunion theme.

The men and women of the Eleventh Air Force served their Nation well, helping drive the Japanese from the western Aleutian Islands of Attu and Kiska during the Aleutian Campaign. It was the only campaign fought on the
