

Penalty Focus Board, the Advisory Board of Nature Conservancy, the Western Opera Theatre, and the San Francisco Organizing Project. Walter has distinguished himself as founder and President of San Francisco Renaissance. In addition, he has been an active member of the Advisory Board of the Labor Archives and Research Center and the President's Advisory Board of San Francisco State University. In 1988, Mr. Johnson was chosen to receive the Bay Area Union Labor Party's "1988 Leadership Award" as an appreciation of his exemplary record of achievements.

Mr. Speaker, I invite my colleagues to join me in commending Walter L. Johnson for his dedication to our nation's working men and women, his exemplarily record of civic achievement, and his determination to better the condition of working people. Walter's service has shown us the meaning of courage, courtesy, compassion and commitment.

#### H.R. 3479, THE NATIONAL AVIATION CAPACITY ACT

SPEECH OF

**HON. JERRY F. COSTELLO**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, July 15, 2002*

Mr. COSTELLO. Mr. Speaker, I rise today in support of H.R. 3479, the National Aviation Capacity Act. This legislation was introduced by my good friend, Mr. LIPINSKI, and I would like to thank him for his hard work. I am pleased to join him as a cosponsor of this legislation.

O'Hare is a tremendously important airport in not only to Chicago and the Midwest, but also our entire national aviation system. It recently reclaimed the title of the world's busiest airport and is the only airport to serve as a hub for two major airlines. O'Hare serves 190,000 travelers and operates 2,700 flights daily, employs 50,000 people and generates \$37 billion in annual economic activity.

However, O'Hare needs to be redesigned to meet today's demands. It is laid out with seven runways, six of which intersect at least one other runway. The modernization plan would add one new runway. The seven existing runways will be reconfigured to include a southern runway for a total of eight runways, of which six would be parallel. These improvements would have a significant impact on reducing delays and cancellations: bad weather delays would decrease by 95 percent and overall delays would decrease by 79 percent.

On December 5, 2001, Mayor Daley and Governor Ryan reached a historic agreement to expand and improve O'Hare airport. The agreement would modernize O'Hare, create western access to the airport, provide additional funds for soundproofing home and schools near O'Hare, move forward with the construction of a third Chicago airport at the Peotone site and keep Meigs Field open until at least 2006, and likely until 2026.

H.R. 3479 would simply codify the deal so that a future governor does not rescind the agreement. Illinois is in a unique situation because the governor does have veto power. If this legislation is not enacted, it is possible that a future governor could undo all the hard work that the current governor and mayor of Chicago have done to reach this agreement.

There is some concern that this legislation sets a precedent by involving the federal government or creating a short-cut around environmental laws. Again, O'Hare is an exceptional situation which requires this limited federal action. Other cities and airport authorities do not have a governor with veto authority over this issue. The city of Chicago does not want the federal government to take over the modernization of O'Hare but the language is included in case the State delays the State Implementation Plan (SIP) of the Clean Air Act to slow down the project. The language granting priority consideration for a Letter of Intent from the FAA for Peotone is no different than language that can be found in any Transportation Appropriations bill.

Regarding environmental concerns, the bill says that implementation shall be subject to federal laws with respect to environmental protection and analysis, and that the environmental reviews will go forward in an expedited way. There is no attempt to go around existing state or federal environmental laws, and this legislation has the support of many environmental groups.

Mr. Speaker, this legislation will allow the much-needed expansion of O'Hare to move forward. I urge my colleagues to join me in supporting this bill.

#### INTRODUCTION OF BENEFICIAL USE OF DREDGED MATERIAL LEGISLATION

**HON. WALTER B. JONES**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 16, 2002*

Mr. JONES of North Carolina. Mr. Speaker, I rise today to inform the House of Representatives about the introduction of legislation to allow for the transfer of dredged material onto our Nation's beaches.

In my home state of North Carolina, our beaches are economic engines, providing thousands of jobs and millions of dollars in revenues. However, beach erosion threatens the existence of these economic engines and frankly the federal regulatory and statutory regimes do not move quickly enough to replace this lost infrastructure.

The current standard used by the U.S. Army Corps of Engineers requires the disposal of dredged material obtained from a Federal navigation project in the least costly manner. This method almost always results in the offshore placement of sand. However, when these facilities are dredged, the disposal of the dredged material offshore may not be the least cost disposal method. The offshore disposal option increase the costs of erosion so the regional and national economies are damaged by a reduction in recreation spending.

Therefore, I have introduced legislation today making it easier to place sand dredged from authorized navigation projects onto beaches in order to provide shore protection for years to come. My legislation would amend the least cost disposal method to allow municipalities to take these dredged spoils and place them on nearby beaches while adhering to the current 65/35 cost-share ratio.

Mr. Speaker, I would ask my colleagues to join me today in cosponsoring this legislation. Four times more Americans visit the Nation's

beaches than our National Parks every year. Beach nourishment is good economic policy and this proposal will allow the Army Corps of Engineers to supplement its effective shore protection programs.

#### TRANSPORTATION OF NUCLEAR WASTE HAS IMPRESSIVE SAFETY RECORD

**HON. DOUG BEREUTER**

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 16, 2002*

Mr. BEREUTER. Mr. Speaker, this Member commends to his colleagues the following editorial from the July 15, 2002, Omaha World-Herald. The editorial offers insightful comments on the issue of transporting nuclear waste and highlights the impressive safety record of shipments which have been made over the years. For instance, 3,000 shipments of high-level nuclear waste have been safely completed over the past three decades. The containers for the waste have been subjected to numerous tests to ensure their strength and durability even in the most extreme circumstances.

Unfortunately, many opponents of the Yucca Mountain site have tried to use emotional scare tactics about the transportation of nuclear waste in hopes of derailing the entire project. However, as the editorial makes clear, central depository would greatly enhance safety.

[From the Omaha World-Herald, July 15, 2002]

#### HOW SAFE IS IT?

Now that the Senate has voted to allow the construction of a national high-level nuclear waste storage facility at Yucca Mountain, Department of Energy officials will have to confront a key issue: Transportation.

Officials expect up to 77,000 tons of dangerous radioactive material such as spent nuclear plant fuel rods to be transported to the remote Nevada desert for indefinite storage. That waste will come from all 39 states, encompassing 131 sites, that currently store the material in mostly above-ground facilities. The sites include not only nuclear power plants but also military weapons facilities and research institutions.

The waste will travel by truck and rail. It will have to pass through some of the nation's most populous areas. Some will come through the Midlands, on its Interstate highways and its many rail lines. The government has projected that as many as 100 truck or rail accidents might occur over the 25-year life of the project.

The question of safety is key.

Opponents of the project tried to attack transport of the waste before the Senate decision because methods and routes had not yet been specified. But they were premature. It's only now, as DOE applies for a license for the facility from the Nuclear Regulatory Commission, that such issues can be addressed.

Many critics of Yucca Mountain, by the way, aren't necessarily being open about their motives. Some may honestly believe approval of the site is potentially dangerous. Others, however, are simply anti-nuclear. They realize that without a disposal site, nuclear power in this country will likely die—"choking on its own waste," as one senator put it.

When critics raise their objections, they will have to overcome this fact; In the past

30 years, about 3,000 shipments of high-level waste have traveled around the United States safely. Not without accidents—trucks and trains are always vulnerable to accidents—but without any radiation leaks.

The Nuclear Energy Institute says that the waste transport containers used thus far, with their multiple layers of lead and other shielding, are built to withstand severe accidents. They have been tested: hit by a locomotive traveling at 60 miles per hour, driven into a concrete wall at 80 miles an hour, burned, submerged. They have withstood the worst flung at them without failure, whether in testing or in actual transportation-accident situations.

The presence of so many above-ground storage facilities for nuclear waste, in so many locations, near so many people—160 million by one estimate—amounts to an open invitation to accidents or terrorism. The chilling security uncertainties alone should predispose Americans toward a central, safe waste site.

Getting the waste materials there is a technical problem, not a reason to kill the construction of Yucca Mountain. If current methods of transportation aren't adequate—and such assertions are still far from proved—then federal officials and nuclear plant operators should find other ways to protect the shipments.

A single national repository is the only reasonable way to go. If Yucca Mountain is as desirable a site as its supporters say, then questions about transportation of the waste should not hold it back.

#### RECOGNIZING NATHAN WEINBERG

### HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 16, 2002*

Mr. CARDIN. Mr. Speaker, I rise today to ask my colleagues to recognize the accomplishments of Nathan Weinberg and thank him for his service to his country and his community as he retires as a trustee of the Harry and Jeannette Weinberg Foundation and his appointment as Civilian Aide to the Secretary of the Army.

In 1917, Nathan Weinberg was the first of his six siblings to be born in America, and in 1941, was inducted into the U.S. Army. On December 25, 1945, Mr. Weinberg was discharged as a 2nd Lieutenant after service in Texas, Australia, New Guinea and the Philippines.

After returning home to Baltimore, Mr. Weinberg worked in real estate and lived briefly in Texas and Pennsylvania working on business interests of his brother, Harry Weinberg. He remained a member of the standby reserve until October 1955 when he was honorably discharged.

In 1960, Mr. Weinberg became an active officer and trustee of the Harry and Jeannette Weinberg Foundation. Since his brother Harry's death in 1990, Mr. Weinberg has remained one of five trustees to the Foundation, which is one of the largest private foundations in the United States. His leadership on the board has included projects supported by his brother, particularly housing and amenities for the elderly from Coney Island to Tel Aviv to Hawaii.

Mr. Weinberg was appointed Civilian Aide to the Secretary of the Army in 2000. His military experience and his dedication to the Maryland

Army National Guard has provided leadership, friendship and financial support for community outreach.

Mr. Weinberg has a strong sense of family and a firmly held belief in equality and equitable treatment for all people. At ground breakings and ribbon cuttings, he is not shy about expressing his concern for the welfare of the audience, unhappy that the dignitaries receive special treatment while the audience is left to stand, swelter in the heat or freeze in the cold. His sense of justice guides his dealings with others and he expects others to pass along that philosophy as well. He is a leader by example and deeds.

I would ask my colleagues to please join me in congratulating Mr. Weinberg on a life well lived and in thanking him for his service to his country. Our appreciation extends to his family, his wife Lillian and his three sons, Donn, Glenn and Joseph, their wives and children.

#### PHILADELPHIA HOUSING AUTHORITY'S PRE-APPRENTICE- SHIP PROGRAM

### HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 16, 2002*

Mr. BORSKI. Mr. Speaker, I rise in honor of the upcoming graduation services of the latest class of the Philadelphia Housing Authority's Pre-Apprenticeship building, maintenance and construction trades program.

This will be the seventh graduating class of this model program that originated in 1999. Carl R. Greene, the Executive Director of the Philadelphia Housing Authority is proud of the program that will enable residents of public housing to improve their lives by providing them with skills to secure meaningful employment.

The program has won recognition from the Department of Housing and Urban Development and the Department of Labor. It is also supported by the Philadelphia Building and Construction Trades Council, Metropolitan Regional Council of the United Brotherhood of Carpenters and Joiners of America, Cement Masons Local Union 592, International Brotherhood of Painters and Allied Trades, District Council 21, International Brotherhood of Electrical workers, Local Union 98, Laborers' Local 332, and Plumbers Union Local 690.

The Pre-Apprenticeship program provides vocational and educational skills through a hands-on, 21-week training program designed to help participants pass the apprenticeship test for the construction unions. Upon completion of the program, graduates can work in the construction industry as qualified apprentices. The trainees will work with PHA and union contractors to rehabilitate, modernize and build at various Housing Authority properties.

PHA continues to be nationally recognized for its innovation in public housing. It has the distinction of being the first housing authority in America to be designed by the Institute of Real Estate Management (IREM) of the National Association of Realtors as an "Accredit Management Operation." This designation is awarded to firms engaged in property management, which have met IREM's high standards in the areas of education, experience, integrity, and financial stability.

#### AMERICAN LEGION AMENDMENT ACT, VETERANS OF FOREIGN WARS CHARTER AMENDMENT ACT

SPEECH OF

### HON. JERRY F. COSTELLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, July 15, 2002*

Mr. COSTELLO. Mr. Speaker, I rise today in strong support of two bills, H.R. 3988, the American Legion Amendment Act, and H.R. 3838, the Veterans of Foreign Wars Charter Amendment Act. Both of these measures seek to broaden membership to their respective organizations. H.R. 3838, the American Legion Amendment Act, revises American Legion eligibility requirements by providing that individuals who are currently serving honorably in the armed forces are eligible for membership in the American Legion, H.R. 3838, the Veterans of Foreign Wars Charter Amendment Act, amends the charter of the Veterans of Foreign Wars of the United States (VFW) to allow members of the armed services who have received special pay for duty subject to hostile fire or imminent danger to be a member of the VFW. The bill also clarifies that the VFW would be considered "charitable" in order to qualify the organization's member activities for tax purposes.

Mr. Speaker, these measures send a strong message to our Nation's veterans. I am pleased that the House is taking action on these measures and will continue to strive to meet the needs of our veterans of today and tomorrow. As a father of a Gulf War veteran, I am proud that he will have the opportunity to join a major veterans organization, as well as the thousands of other deserving military service members who served in dangerous military campaigns such as Somalia, Kosovo and more recently, the war on terrorism in Afghanistan. I, along with my colleagues in Congress, are committed to serving America's veterans and their families with dignity and compassion. For these reasons, I strongly support these two measures.

#### IN RECOGNITION OF THE LAO- HMONG WIDOWS

### HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 16, 2002*

Mr. UDALL. Mr. Speaker, I rise today both to honor and thank the widows of the brave men who fought alongside American soldiers during the Vietnam War. This week, members of the Lao-Hmong community will celebrate the first Lao-Hmong Recognition Day. This day will be a time to reflect on the important friendship between the Lao-Hmong and the American people, and to thank the Lao-Hmong for the sacrifices they have made.

The husbands of these brave women fought against communism in the name of freedom and democracy. Their dedication to this country and its ideals is admirable, and we owe it to them to honor their wives who risked their lives and the lives of their families to defend our Nation.

Mr. Speaker, this Congress has shown its appreciation for the Lao-Hmong veterans in
