

index for hospital and related services. I believe the measure I am offering will create a vastly improved funding system that better responds to the needs of our veterans.

Last week the President's Task Force to Improve Health Care Delivery For Our Nation's Veterans issued its final report. In it, the "growing mismatch between funding and demand" is repeatedly referenced. To address this problem, the report recommended: The Federal Government should provide full funding to ensure that enrolled veterans in Priority Groups 1 through 7 (new) are provided the current comprehensive benefit in accordance with VA's established access standards. Full funding should occur through modifications to the current budget and appropriations process, by using a mandatory funding mechanism, or by some other changes in the process that achieve the desired goal. (p. 77)

In addition, the Task Force addressed the need to clarify standards of access for Priority 8 veterans. Priority 8 veterans are the so-called "high-income" veterans without compensable service-connected conditions. Who are these individuals? Anyone with an income level of more than the geographically adjusted Housing and Urban Development threshold for low-income housing is considered "high income". In some communities, this means veterans with incomes of more than \$24,644—most often work-a-day folks who sometimes have to choose between prescription drugs and heat or groceries. My bill would cover these veterans.

Some will say that we've done well by our veterans this year. I would say it might well have gone the other way. This body passed a budget resolution that would have required us to cut veterans benefits during a period of war. It still remains unclear how veterans' health care will fare when pitted against such disparate programs as low-income housing, the space program and other independent agencies. Other health programs such as Medicare and TRICARE for Life are not subject to the same types of considerations because funding for these programs is based on need.

The result of this funding process is the "growing mismatch" addressed by the President's task force—the system is starving! We all have heard the numbers of veterans who have waited more than six months for health care services. There were more than 200,000 veterans in the queue at the beginning of the year. Even with increases proposed in the joint budget resolution, VA will still impose some regulatory constraints on access and has identified more than a billion in illusory "management efficiencies."

Last year, I cosponsored H.R. 5250, the "Veterans Health Care Funding Guarantee Act of 2002" with 129 other members of the House. The bill I am offering today closely resembles that legislation. The Congressional Budget Office slapped a hefty price tag on H.R. 5250 largely assuming huge increases in demand would result if the veterans' health care system were adequately funded! Think about this—our budget office assumes that our health care system for veterans is so fiscally deprived that a fairer funding system that responds to changes in demand would create a run on health care!

Our veterans deserve better than a chronically underfunded health care system. I believe veterans—all veterans—have earned the right to access the health care system that

was created to serve their needs. The price we pay as a Nation for assuring timely access to high-quality health care services is small in relation to the price we have asked them to pay in securing our freedom.

I urge my colleagues to join me and the 72 other members of the House that believe this is the right thing to do for our veterans. Every major veterans service organization, including The American Legion, Disabled American Veterans, and Veterans of Foreign Wars, has stated support for this bill. Join us in the fight to do the right thing for our veterans. Join me in cosponsoring the "Assured Funding for Veterans Health Care Act of 2003".
