

come to the same conclusion. These numbers are about a year and a half old and the numbers have changed slightly, but the percentages are still the same.

Augmentin, the average price in the United States for a 30-day supply is \$55.50. In Europe that drug can be bought for \$8.75, and in Canada the price is \$12.

Cipro, a very effective antibiotic, and probably when we had the scare with the anthrax, one of the most effective antibiotics ever developed, developed by a German company called Bayer. They sell the drug here in the United States for about \$88. They sell it in Canada for \$53, but in Europe you can buy the same drug for \$46.

Glucophage, one of the most effective antidiabetic drugs, developed here in the United States. Somehow it is hard to explain to our constituents that here in the United States that drug will sell for \$124.65. One can buy it in Canada for \$26.47, but it is available in Europe for \$22.

Why is it so much cheaper in Canada and Europe and some people say they have price controls, and we do not believe in price controls. In some respects that is true, but in Europe they make the drugs less expensive because they allow parallel trading. So a pharmacist in Germany if he can buy that Glucophage cheaper in Spain or Norway, he can buy it in Spain or Norway. That is called parallel trading, and that is allowed in most of the European Union.

Let me tell Members something about the Europeans. They are not intrinsically smarter than Americans, and they do not have all of these safety concerns that our FDA does. They do keep records, and they know that almost nobody dies in Europe or Canada. I can go through this list, and the numbers, as I say, they are slightly different, but the percentages are almost always the same. The bottom line is this: The world's best customers, the American consumers, pay the world's highest prices in virtually every single category, and not just a little bit more, we pay a lot more. In fact, in almost every category, it is almost 30 percent more, and in some categories it is almost 300 percent more.

For example, Tamoxifen is probably the most effective antibreast cancer drug ever developed. It was developed here in the United States, and it was developed by the American taxpayer. It was developed with funds from taxpayers. Taxpayer money through the CDC, through the NIH, we took that drug all of the way through phase two trials. Once we had it almost ready for market, we licensed it to a pharmaceutical company. Our reward, the taxpayers' reward, was they sell it to American consumers for \$360 a month on average. They sell it in Canada for \$60. They sell in Europe for \$50.

I think we ought to pay our fair share for the research costs, and I think we ought to subsidize the people

in sub-Saharan Africa, but we do not need to subsidize the starving Swiss. It is time to open the markets. We have open markets when it comes to oranges and raspberries and almost every other product except prescription drugs.

Mr. Speaker, I yield to the gentleman from Massachusetts (Mr. DELAHUNT).

Mr. DELAHUNT. Mr. Speaker, I want to acknowledge the gentleman's expertise. There is no one in this institution that has the depth of knowledge on the subject than the gentleman, and is certainly someone who is highly respected and regarded on this side of the aisle.

During the course of the debate, there has been much attention given to the so-called safety issue. I do not know whether you have this, but can you inform me and my other colleagues and those that might be watching in terms of those in Canada or those Americans who have purchased pharmaceuticals from Canada, what are the numbers, how many fatalities are there, how many reported problems attendant to safety have actually occurred?

Mr. GUTKNECHT. Mr. Speaker, I thank the gentleman for asking that important question because we hear the FDA and the pharmaceutical reps and other people saying it is safety, and this Henny Penny the sky is falling, but we keep records on this. The CDC keeps amazing records on how many people have died from taking drugs from other countries. The CDC is the official recordkeeper of all health statistics here in the United States. They keep very good records. We have had them testify in front of the subcommittee of the gentleman from Indiana (Mr. BURTON), and we have asked how many have died, and it is an easy, round number, and the number is zero.

We also know if we go to the CDC files, we will find 264 Americans have become seriously ill from eating raspberries from Guatemala. So in effect, we are 264 times more likely to become seriously ill eating vegetables or fruits from other countries than from prescription drugs.

Tomorrow night we are going to have another Special Order, and I invite people from the entire political spectrum, let us come down and talk about this because this is not a Republican issue, this is not a Democratic issue or right versus left, its right versus wrong. And what this House decided a few months ago on an overwhelming majority, it is wrong to hold American consumers captive. That is what is happening today. If this bill passes later this week, that is exactly what will continue to happen. I warn my colleagues that they will have to go home to their constituents and they are going to get asked a couple of very tough questions. And the first question is: Why is it Americans pay so much more for Tamoxifen or Glucophage or Coumadin or any of these other drugs, why is it we pay so much more?

That is a tough question, but here is an even tougher question that they are

going to have to answer: Congressman, what did you do about it? Ultimately, we are all going to have those kinds of questions. Republicans will have to answer them, and Democrats will have to answer them. That is why I think we ought to come together on a bipartisan basis and pass a bill that makes sense, that opens markets, allows competition. I am one who happens to believe in free markets and in competitive markets. I know this, when we have competitive markets, ultimately, the prices will level. The prices in Canada may go up a little bit, and the prices in Germany may go up a little bit, but the prices here in the United States will go down.

I do not want American consumers going to Canada to buy their drugs. I do not want them to buy their drugs from Germany. I want to force the pharmaceutical companies to adjust their pricing strategies so we get fair prices here in the United States.
