

and the humor that comes with wisdom.

Through his leadership, spirit, and abiding faith in the American people, President Reagan gave our Nation a renewed optimism. With his courage and moral clarity, he enhanced America's security and advanced the spread of peace, liberty, and democracy to millions of people who had lived in darkness and oppression. As America's President, he helped change the world.

The sun has now set on Ronald Reagan's extraordinary American life. Just as he told us that our Nation's best days are yet to come, we know that the same is true for him.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2511. A bill to direct the Secretary of the Interior to conduct a feasibility study of a Chimayo water supply system, to provide for the planning, design, and construction of a water supply, reclamation, and filtration facility for Espanola, New Mexico, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. DOMENICI. Mr. President, my home State of New Mexico is currently facing the greatest threat to its prosperity that I have witnessed during my 31-year tenures as a United States Senator. The threat is one that we all too often take for granted: the availability of water.

I rise today to introduce a bill that would address New Mexico's most urgent water needs.

The water problems facing New Mexico are twofold. The State faces both water supply shortages and the contamination of the scarce water resources it does have. This has resulted in inadequate water supplies to meet our State's needs, causing great hardship to New Mexico communities.

New Mexico faces significant contamination of both surface and subsurface water stores. Nowhere is this more evident than in the centuries-old community of Chimayo. The 3,000 citi-

zens of this unincorporated community rely on individual wells for their potable water and rely on largely deteriorated septic systems to dispose of waste water. Hydrologists have determined that, because of absence or deterioration of sewer and water infrastructure in the basin, an alarming 75 percent of well samples taken had significant contamination of both total coli form and fecal coli form. Their individual wells are further tainted by high levels of total dissolved solids. Because of the unreliability of the well water, many residents use water from irrigation ditches for drinking. This water, too, was found to have high levels of fecal coli form contamination.

The water contamination in Chimayo is so desperate that in 2001, then-Governor Gary Johnson declared the region an emergency area and had the National Guard bring in tanker trucks to provide potable water to the area every other day. Chimayo is still in "emergency status" and the tanker trucks still provide the only potable water to many of the citizens. This state of affairs is clearly unacceptable in the most technologically advanced and wealthy country on earth.

The bill I introduce today would provide emergency water treatment assistance to Chimayo so that its communities' citizens no longer have to rely on water tankers for their water. In addition, it would direct the Interior Secretary to perform an assessment of water resources in the area and to help the city of Chimayo to make good decisions about a regional water system.

Ever decreasing water supplies in Espanola, New Mexico have also reached critical levels and require immediate action.

The city of Espanola's current water system produced approximately 1,000 gallons per minute less than is needed to provide for its current population. This production shortfall has resulted in insufficient water pressure throughout the city. The chronic lack of pressure is prevalent especially in the portion of the city where the Espanola Hospital is located. The city has twice declared a state of emergency due to lack of adequate water and water pressure. As a result, the city has called on the National Guard to supply water to the hospital.

Further exacerbating the problem, the city has been unable to make good use of its water resources. Although it has been allocated 1,000 acre feet per annum of San-Juan Chama Project water by the Bureau of Reclamation, the city is unable to divert this water due to inadequate water infrastructure. Instead of making use of its available San Juan Chama water, the city has been depleting its limited groundwater, a resource which the city needs to save for years of reduced surface flows.

I commend the efforts of Espanola to secure funding for infrastructure necessary to make use of its San-Juan Chama Project water. To date, the city has secured funding for a necessary di-

version project and has identified a site for the project. It has also raised from State, local and Federal sources nearly all the money required to build a water filtration facility to treat its San Juan Chama Project water.

The bill I introduce today would provide the sum of \$3 million at a 25 percent Federal cost share to complete this critically necessary project.

These are two problems are representative of many we have just begun to address. There are no easy answers or solutions to the western state's water woes. New Mexico and much of the Western United States will face these and other problems for years to come. However, preserving the livelihood of my home state requires that we address these issues instantly and vigorously. I hope the Senate will give this bill its every consideration.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2511

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Chimayo Water Supply System and Espanola Filtration Facility Act of 2004".

TITLE I—CHIMAYO WATER SUPPLY SYSTEM**SEC. 101. DEFINITIONS.**

In this title:

(1) SECRETARY.—The term "Secretary" means the Secretary of the Interior, acting through the Commissioner of Reclamation.

(2) STUDY AREA.—The term "study area" means the Santa Cruz River Valley in the eastern margin of the Espanola Basin.

(3) SYSTEM.—The term "system" means a water supply system described in section 102(a).

(4) TOWN.—The term "Town" means the town of Chimayo, New Mexico, located in Rio Arriba County and Santa Fe County, New Mexico.

SEC. 102. CHIMAYO WATER SUPPLY SYSTEM FEASIBILITY STUDY.

(a) IN GENERAL.—The Secretary, in cooperation with appropriate State and local authorities, shall conduct a study to determine the feasibility of constructing a water supply system for the Town in the study area that includes potable water transmission lines, pump stations, and storage reservoirs.

(b) SCOPE OF STUDY.—In conducting the study under subsection (a), the Secretary shall—

(1) consider operating the system in connection with the Espanola Water Filtration Facility; and

(2) consider various options for supplying water to the Town, including connection to a regional water source, local sources, sources distributed throughout the Town, and sources located on adjacent Bureau of Land Management land;

(3) consider reusing or recycling water from local or regional sources;

(4) consider using alternative water supplies such as surface water, brackish water, nonpotable water, or deep aquifer groundwater; and

(5) determine the total lifecycle costs of the system, including—
