

in Nepal, Burmese in Thailand, and Somalians and Sudanese in Kenya.

Sadly, the number of warehoused refugees may soon increase as violent conflicts continue around the world. According to the recently published 2005 World Refugee Survey, the total number of refugees and asylum seekers worldwide exceeds 11 million, and 21 million more are internally displaced. As these shameful statistics demonstrate, there is far more the world community can do to ease their plight.

The resolution we are offering denounces the practice of warehousing refugees and urges all nations to grant them their basic rights under the Refugee Convention of 1951. Refugee camps are often created quickly to address a crisis. But the solution creates a greater problem, if temporary camps are allowed to become long-term places of confinement.

Under the 1951 Convention, refugees have the right to earn a livelihood, to have a job and earn wages, to practice a profession, to own property, and to have freedom of movement and residence. Warehoused refugees can do none of these things. Unable to work, travel, own property or obtain an education, they live un-lived lives, without the basic freedoms they are entitled to have under the 1951 Convention.

This resolution denounces the practice of warehousing refugees and calls for conditions that enable refugees to exercise their rights. It encourages donor countries, including the United States, to increase their assistance to host countries that allow refugees to live and work among the local population.

It urges the Secretary of State and the United Nations High Commissioner for Refugees to adopt models of refugee assistance that achieve the rights recognized in the Refugee Convention. It also encourages all nations to ratify the Convention, and without reservations, and to enact legislation and policies that protect human rights and end the denial of these rights to any refugees.

The U.S. must strengthen our own commitment and work with other countries to solve this problem.

As a number of authorities have pointed out, we may well have to face an urgent aspect of the issue ourselves if conditions in Iraq continue to deteriorate and significant numbers of Iraqis are free to become refugees because of their ties to us.

Over 130 international organizations support the end of warehousing, including more than 25 agencies based in the United States. Nobel Laureates have condemned this practice, including Archbishop Desmond Tutu of South Africa, and so has the Vatican.

We must find long-term solutions and alternatives to this abominable practice. It is a gross violation of both refugee rights and human rights. It is wrong to squander the immense human potential and condemn human refugees to live in despair and isolation for unacceptable lengths of time.

Refugees around the world depend on us to hear their pleas and respond to the assistance they so desperately need and deserve. We must do all we can to protect the rights and dignity of refugees everywhere.

I look forward to working with our colleagues on both sides of the aisle, as well as in the international community, to pass this important resolution and take steps toward implementing its provisions and achieving its objectives.

Mr. BENNETT (for himself and Mr. LUGAR) submitted the following resolution; which was considered and agreed to:

S. RES. 178

Whereas over the past 55 years the United States and the European Union have built a strong transatlantic partnership based upon the common values of freedom, democracy, rule of law, human rights, security, and economic development;

Whereas working together to promote these values globally will serve the mutual political, economic, and security interests of the United States and the European Union;

Whereas cooperation between the United States and the European Union on global security issues such as terrorism, the Middle East peace process, the proliferation of weapons of mass destruction, ballistic missile technology, and the nuclear activities of rogue nations is important for promoting international peace and security;

Whereas through coordination and cooperation during emergencies such as the 2004 Indian Ocean tsunami disaster, the AIDS pandemic in Africa, and the ongoing situation in Darfur, the United States and the European Union have mitigated the effects of humanitarian disasters across the globe;

Whereas economic cooperation such as removing impediments to transatlantic trade and investment, expanding regulatory dialogues and exchanges, integrating capital markets, and ensuring the safe and secure movement of people and goods across the Atlantic will increase prosperity and strengthen the partnership between the United States and the European Union; and

Whereas although disagreements between the United States and the European Union have existed on a variety of issues, the transatlantic relationship remains strong and continues to improve: Now, therefore, be it

“(b)(1)(A) There is established in the Treasury of the United States a separate account to be known as the ‘Secure Energy Reinvestment Fund’.

“(B) The Fund shall consist of—

“(ii) any other amounts that are appropriated to the Fund.

“(2) For each fiscal year 2006 through 2009, the Secretary of the Treasury shall deposit into the Fund \$300,000,000.

“(B) During December 2006, and each December thereafter, the Secretary shall make any payment under this paragraph from revenues received in the Fund by the United States during the preceding fiscal year.

“(A)(i) Of the amounts made available for each fiscal year for which amounts are available for allocation under this paragraph, the allocation for each coastal energy State shall be calculated based on qualified Outer Continental Shelf revenues from each leased tract or portion of a leased tract the geographic center of which is within a distance (to the nearest whole mile) of 200 miles from the coastline of the State and shall be inversely proportional to the distance between point nearest point on the coastline of such coastal energy State and the geographic center of each such leased tract or portion of a leased tract, as determined by the Secretary.

“(ii) For the purposes of this subparagraph, qualified outer Continental Shelf revenues shall be considered to be generate off the coastline of a coastal energy State if the geographic center of the lease tract from which the revenues are generated is located within the area formed by the extension of the seaward lateral boundaries of the State, calculated using the conventions established to delimit international lateral boundaries under the Law of the Sea.

“(B) 35 percent of the allocable share of each coastal energy State, as determined under subparagraph (A), shall be allocated among and paid directly to the coastal political subdivisions of the State by the Secretary based on the following formula:

“(ii)(I) 25 percent shall be allocated based on the ratio that—

“(aa) the length, in miles, of the coastal of each coastal political subdivision; bears to

“(bb) the length, in miles, of the coastline of all coastal political subdivisions of the State.—

“(II) For purposes of this clause, in the case of a coastal political subdivision in Louisiana without a coastline, the coastline of the political subdivision shall be considered as $\frac{1}{2}$ the average length of the coastline of the other coastal political subdivisions of the State.

(III) EXCEPTION FOR THE STATE OF ALASKA.— For the purposes of carrying out subparagraph (c)(2)(B) in the State of Alaska, the amounts allocated shall be divided equally among the 2 coastal political subdivisions that are closest to the geographic center of a leased tract.

“(iii) 50 percent shall be allocated based on a formula that allocates—

“(I) 75 percent of the funds based on the relative distance of the coastal political subdivision from any leased tract used to calculate the allocation to that State; and

“(II) 25 percent of the funds based on the relative level of outer Continental Shelf oil and gas activities in a coastal political subdivision to the level of outer Continental Shelf oil and gas activities in all coastal political subdivisions in the State, as determined by the Secretary.

“(3) Any amount allocated to a coastal energy State or coastal political subdivision that is not disbursed because of a failure of a Coastal energy State to have an approved plan shall be reallocated by the Secretary among all other coastal energy States in a manner consistent with this subsection, except that the Secretary—

“(A) shall hold the amount in escrow within the Fund until the earlier of—

“(i) the end of the next fiscal year during which the allocation is made; or

“(ii) the date on which a final resolution of an appeal regarding the disapproval of a plan submitted by the State under this section is filed; and

“(4) Notwithstanding any other provision of this subsection, the amount allocated under this subsection to each coastal energy State during a fiscal year shall be not less than 5 percent of the total amount available for that fiscal year for allocation under this subsection to coastal energy States.

“(5) If the allocation to 1 or more coastal energy States under paragraph (4) during any fiscal year is greater than the amount that would be allocated to those States under this subsection if paragraph (4) did not apply, the allocations under this subsection to all other coastal energy States shall be—

“(A) paid from the amount remaining after the amounts allocated under paragraph (4) are deducted; and

“(B) reduced on a pro rata basis by the sum of the allocations under paragraph (4) so that not more than 100 percent of the funds available in the Fund for allocation with respect to that fiscal year is allocated.

“(d)(1)(A) The Governor of a State seeking to receive funds under this section shall prepare, and submit to the Secretary, a secure energy reinvestment plan describing planned expenditures of funds received under this section.

(2) on June 13, 2005, crude oil prices closed at the exceedingly high level of \$55.62 per barrel, the price of crude oil has remained above \$50 per barrel since May 25, 2005, and the price of crude oil has exceeded \$50 per barrel for approximately 1/3 of calendar year 2005;

(3) on June 6, 2005, the Energy Information Administration announced that the national price of gasoline, at \$2.12 per gallon, could reach even higher levels in the near future;

(4) despite the severely high, sustained price of crude oil—

(A) the Organization of Petroleum Exporting Countries (referred to in this section as “OPEC”) has refused to adequately increase production to calm global oil markets and officially abandoned its \$22–\$28 price target; and

(B) officials of OPEC member nations have publicly indicated support for maintaining oil prices of \$40–\$50 per barrel;

(5) the Strategic Petroleum Reserve (referred to in this section as “SPR”) was created to enhance the physical and economic security of the United States;

(6) the law allows the SPR to be used to provide relief when oil and gasoline supply shortages cause economic hardship;

(7) the proper management of the resources of the SPR could provide gasoline price relief to families of the United States and provide the United States with a tool to counterbalance OPEC supply management policies;

(8) the Administration’s policy of filling the SPR despite the fact that the SPR is nearly full has exacerbated the rising price of crude oil and record high retail price of gasoline;

(9) in order to combat high gasoline prices during the summer and fall of 2000, President Clinton released 30,000,000 barrels of oil from the SPR, stabilizing the retail price of gasoline;

(10) increasing vertical integration has allowed—

(A) the 5 largest oil companies in the United States to control almost as much crude oil production as the Middle Eastern members of OPEC, over ½ of domestic refiner capacity, and over 60 percent of the retail gasoline market; and

(B) Exxon/Mobil, BP, Royal Dutch Shell Group, Conoco/Philips, and Chevron/Texaco to increase first quarter profits of 2005 over first quarter profits of 2004 by 36 percent, for total first quarter profits of over \$25,000,000,000;

(1) the Administration has failed to manage the SPR in a manner that would provide gasoline price relief to working families; and

(2) the Administration has failed to adequately demand that OPEC immediately increase oil production in order to lower crude oil prices and safeguard the world economy.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the President should—

(1) directly confront OPEC and challenge OPEC to immediately increase oil production; and

(2) direct the Federal Trade Commission and Attorney General to exercise vigorous oversight over the oil markets to protect the people of the United States from price gouging and unfair practices at the gasoline pump.

(c) RELEASE OF OIL FROM SPR.—

(1) IN GENERAL.—For the period beginning on the date of enactment of this Act and ending on the date that is 30 days after the date of enactment of this Act, 1,000,000 barrels of oil per day shall be released from the SPR.

(2) ADDITIONAL RELEASE.—If necessary to lower the burden of gasoline prices on the economy of the United States and to circumvent the efforts of OPEC to reap windfall crude oil profits, 1,000,000 barrels of oil per day shall be released from the Strategic Petroleum Reserve for an additional 30 days.
