

Unfortunately, it has not worked out that way because the Bush administration has more than 50,000 National Guardsmen and Reservists stationed in Iraq. That amounts to just over 40 percent of the total U.S. military forces there.

The Army's Guard and Reserve units are supposed to be our Nation's emergency force, America's defenders of last resort. Yet the Army's Web site actually defines the Army reserve as being "like a part-time job that enables soldiers to keep their civilian careers while they continue to train near home."

But the President has 50,000 of them fighting in a war very, very far from home, shouldering a disproportionate share of the burden in Iraq. He has them suffering for a war that was supposedly about weapons of mass destruction and then about Saddam's link to al Qaeda and then about bringing democracy to Iraq. But no matter how we slice it, the war in Iraq was never a war of last resort. The emergency units should have remained here at home in case of a real emergency. In fact, all 3,700 of Louisiana's National Guardsmen are currently stationed in Iraq and will not return home to help their devastated State or their own families, for that matter, for another week. Unfortunately, it was only a matter of time before the deployment of thousands of Guardsmen and Reservists to Iraq ended up hurting Americans right here at home.

The city of New Orleans and the rest of the gulf coast has learned that lesson in a painful way, losing family members, loved ones, friends, and pets that could have been saved if their government had provided more human support and a smarter approach to dealing with Katrina's aftermath.

It is my hope that our national over-reliance on military solutions during the past 4 years, made painfully clear by the Katrina hurricane, will lead us to a smarter national security strategy in the future. That is why I have introduced SMART Security: a Sensible, Multilateral, American Response to Terrorism. SMART is based on the belief that we should pursue the military solution only in the most extreme circumstances and after every diplomatic solution has been exhausted. SMART would divert resources for military spending and foreign wars to homeland security and energy independence, from outdated weapons systems to an ambitious development plan for the troubled regions both in the United States and around the world.

Democracy-building, international aid, human rights education, small business development, these are the cures to poverty, to oppression, to hopelessness that plague both the people of Iraq and the survivors in the gulf, particularly in New Orleans. SMART projects protect America by relying on the very best of America, not violence and conquest, but our capacity for global leadership, our belief

in freedom, and our compassion for the vulnerable people here at home and around the world.

Mr. Speaker, Katrina's aftermath has given us a firsthand look at what happens when a nation's forces are stretched thin. That is why it is time for us to start bringing our troops home. The Iraqi people need the United States, they need the U.S. National Guard out of Iraq, and no less important, the American people need them here at home where they belong.

STATEMENT REQUIRED BY SECTION 402(a)(3) OF H. CON. RES. 95, THE CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 2006

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LEWIS) is recognized for 5 minutes.

Mr. LEWIS of California. Mr. Speaker, the funds provided in H.R. 3673 to meet the urgent needs arising from the consequences of Hurricane Katrina are designated as emergency requirements for the purposes of section 402 of H. Con. Res. 95, 109th Congress. The requirements funded in the bill meet criteria outlined in section 402(c) since they are in response to a situation which poses a direct threat to life and property, is sudden, is urgent and compelling, is unpredictable, and is not permanent in nature. The funds are also essential to the continuing recovery effort.

The devastation that has occurred in New Orleans and around the Gulf Coast as the result of Hurricane Katrina is of monumental proportions. It already is the most costly natural disaster in the Nation's history, and most government natural disaster assistance experts anticipate recovery needs far beyond the \$62.3 billion to be provided by Congress in the first two Hurricane Katrina supplemental measures. The funds in H.R. 3673 will provide urgently needed food, shelter, security, and reconstruction. The funds will help to save lives. Clearly, the funds meet emergency needs and are consistent with the criteria outlined in the budget resolution.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HINCHEY) is recognized for 5 minutes.

(Mr. HINCHEY addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

EXCHANGE OF SPECIAL ORDER TIME

Ms. MILLENDER-McDONALD. Mr. Speaker, I ask unanimous consent to take the Special Order time of the gentleman from New York.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PAY INEQUITY AND THE WAGE GAP IN THE UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

woman from California (Ms. MILLENDER-McDONALD) is recognized for 5 minutes.

Ms. MILLENDER-McDONALD. Mr. Speaker, earlier this week we observed Labor Day. We take this important opportunity every year to honor this Nation's workers.

Tonight I want to shed light on one way that this country can really honor a group of workers that make up almost half of this Nation's workforce, and those are our women.

Mr. Speaker, the Department of Labor estimates that women will account for 55 percent of the increase in total labor-force growth between 2002 and 2012. However, in 2004 women made up 46 percent of the total United States workers. In that same year 68 million women were either working or looking for work.

Women work in every sector of our economy. They are professionals, managers, nurses, salespersons, factory workers, and business owners. More and more women are entering into non-traditional occupations. We are an essential component of the American workforce.

Then why is it that a full-time working woman receives only 73 cents to every dollar received by a man? That figure is worse for women of color. African American women earn 65 cents for every dollar paid to a white male. Hispanic women receive only 53 cents for each dollar earned by a white male. This means that Hispanic women are paid only slightly more than half of what white men earn. Even in jobs where women make up the majority of the workforce, and that is over 70 percent, men still earn close to 20 percent more than the women.

This trend must stop. Anyone would be hard pressed to find statistical evidence proving that women work is less arduous than their male counterparts or that they underperform comparatively. There is no logical explanation why a woman, who is often times still responsible for her children and family, in addition to working full time, should earn less than a male doing the same work.

This is not an issue that is going to go away, Mr. Speaker. Pay inequity is affecting the American family. If women earned the same amount of money as men who work the same hours doing the same job, their families' annual income would increase by \$4,000 per year. This would cut poverty rates in half. Equal pay for equal work will increase women's spending capability. Equal pay for equal work will empower women to plan for their children's education and their own retirement.

Over 40 years have passed since the enactment of the Equal Pay Act. In that time we have only closed the wage gap by one-third of 1 cent per year. Mr.
