

claims for their flood damage. No one wants to live in a nation that does not honor its debts.

In addition, I am concerned that Congress is reacting to the unprecedented flooding damage of 2005 by blaming the victims and innocent parties.

Federally backed flood insurance is necessary because the private sector will not supply this product since the damages are too concentrated geographically and chronologically for the risk to be sufficiently spread by private firms.

We recently passed a Federal flood insurance reform bill in 2003 and many of those provisions have not come into force, so I think it is premature to require Congress to approve more "reforms" before honest, premium paying policy holders are allowed to receive their payments.

The Katrina disaster was a tragedy, because the mass New Orleans flooding was probably preventable; if the levees had been built and maintained as they should have been.

Now my constituents in Houston, who do not live below sea level and do not live on the ocean coastline, will have to pay the price.

There are over 120,000 families in the 100-year floodplain who are required to have flood insurance. In Harris County we have updated our maps using airborne infrared radar, so they are accurate. There are another 155,000 families in the 500-year floodplain.

These people did not develop irresponsibly, in fact many of them didn't move into the floodplain, but the floodplain moved to them. Subsidence and later development has expanded floodplains and put innocent homeowners in the floodplain.

We should not blame these people for geographic factors beyond their control. Reforms of the NFIP should focus instead new development in floodplains, eliminating flood insurance for beach houses, and ensuring that the program keeps its commitments to its policy holders.

If we greatly increase premiums or expand the number of people required to have flood insurance, we should take into account the shock this can have on low-income families, and consider my legislation, H.R. 103, to offer 50 percent discounts for the first 5 years to low-income homeowners who suddenly have to pay premiums after a floodplain is redrawn to include them.

#### GREAT LAKES INVASIVE SPECIES CONTROL ACT

**HON. MARK STEVEN KIRK**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, February 16, 2006*

Mr. KIRK. Mr. Speaker, today I introduced a bill to require all vessels, including those with no ballast water on board (NOBOBs), to undergo ballast water exchange before entering the Great Lakes.

Invasive species pose a dangerous threat to the Great Lakes. These creatures can cause irreparable ecological and economic damage to a variety of locations and industries. Al-

though no federal agency accumulates such statistics comprehensively, an estimate by the American Association for the Advancement of Science put damage to the U.S. economy at \$123 billion annually. We must do better to prevent the introduction of invasives into the Great Lakes environment.

One method by which these species enter the Great Lakes is through ballast water tanks. Current law requires ships carrying ballast water to undergo ballast water exchange to flush out invasive species before entering the Great Lakes from another port. However, 90 percent of all ships entering the Great Lakes have no ballast water on board. These NOBOBs are not subject to the same ballast water exchange laws, even though they still have ballast tanks. Invasive species often survive in the sediment at the bottom of these tanks. When these ships operate in the Great Lakes, they may add and then pump out new ballast water before leaving. This mixes with residual ballast water and sediments, and provides an unregulated pathway for the introduction of new invasive species when the ballast water is released.

In other words, the contamination begins.

We must not leave 90 percent of ships entering the Great Lakes untreated. This bipartisan legislation requires all ships with ballast tanks, including NOBOBs, to undergo ballast water exchange. In addition, the bill commissions a study of the effectiveness and environmental soundness of other ballast treatment options. The language fixes a current problem and works towards an even stronger solution for the future.

Mr. Speaker, this legislation, while small, has enormous consequences for the health and safety of one of our national treasures. I am proud to introduce this ballast water legislation to significantly reduce the infiltration of invasive species into the Great Lakes.

#### NATIONAL PHYSICAL EDUCATION AND SPORTS WEEK

**HON. MARK UDALL**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, February 16, 2006*

Mr. UDALL of Colorado. Mr. Speaker, as obesity and the associated health risks continue to increase in America's youth, it is important to encourage children to participate in physical activity.

To help spread this message, today I am introducing with Congressman ZACH WAMP of Tennessee, a resolution urging the declaration of a National Physical Education and Sports Week and National Physical Fitness and Sports Month.

This resolution notes the increase in childhood obesity along with the negative consequences of extremely overweight and obese people including a decrease in the average life span and rising health care costs stemming from obesity related illness. It also includes findings from the United States Surgeon documenting that regular physical activity is associated with improved health-related quality of life. It resolves the sense of the House of Representatives regarding "National Physical Edu-

cation and Sports Week" and "National Physical Fitness and Sports Month."

Research shows that sound physical education programs can help students learn healthy habits for life. Through regular exercise and information on proper nutrition, children can develop habits for maintaining a healthy weight into adulthood. We must encourage our children to adopt healthier lifestyles because America's children are experiencing obesity in growing numbers, and data continues to highlight the link between obesity and diabetes, heart disease and other life-threatening medical conditions.

"National Physical Education and Sports Week" and "National Physical Fitness and Sports Month" would remind citizens of the importance of maintaining a consistent exercise program and healthy lifestyle.

I urge the support of this resolution and look forward to its consideration.

#### TRIBUTE TO GEORGE DUNKLIN, SR.

**HON. MARION BERRY**

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, February 16, 2006*

Mr. BERRY. Mr. Speaker, I rise here today to pay tribute to one of my father's great friends, Mr. George Dunklin, Sr., who is a true leader in Arkansas' agriculture community. With more than 60 years of work in the cottonseed oil and fertilizer industries, George Dunklin, Sr. is one of the state's most gifted businessmen.

As the former President of the most successful cottonseed oil mill in the country, George Dunklin, Sr. knows how to run a successful business. From the day his father bought the Planters Cotton Oil mill in 1935, to his days as President of the cooperative, George Dunklin Sr. has worked hard to transform the cottonseed industry. He spent 66 years building a profitable enterprise, and left a lasting mark on MidSouth agriculture.

Years of hard work earned George Dunklin Sr. distinguished positions as the President of the National Cottonseed Association in 1975, a member of the Cotton Advisory Committee to the Secretary of Agriculture, President of the Mississippi Valley Oilseed Processors Association, and recipient of the 1990 Harvey W. McGeorge Award for Distinguished Service to Agriculture. But George Dunklin, Sr.'s talents did not stop there. He was even elected to the Arkansas Sports Hall of Fame in 1991 for his accomplishments in tennis.

George Dunklin has been married to the former Mary Elisabeth Black of DeWitt, Arkansas for 57 years and is the father of two children, Deborah Tipton of Memphis and George Dunklin, Jr. of DeWitt. He and his wife have five grandchildren, Megan Dunklin, Robert Tipton, Mary Tipton, Hillary Dunklin and Lauren Dunklin.

On February 21, 2006, our community will meet in Pine Bluff, Arkansas to honor George Dunklin, Sr. for his remarkable contributions to Arkansas agriculture. I ask my colleagues in Congress to join me in congratulating him on this occasion and thanking him for over half a century of dedicated service, as a great friend, and a great American.
