

of the 15th district's most distinguished community and business leaders. Peter has dedicated the last six years of his life to creating a world without limits for people with diabetes both in California and all over the world.

Peter joined LifeScan Inc., a Johnson & Johnson company headquartered in Milpitas, CA, in 2000 to oversee U.S. sales and marketing. Peter's responsibilities soon expanded to global sales and marketing, eventually leading to his current position as president of LifeScan. Peter's commitment to people with diabetes and their families has positioned LifeScan as the leading global diabetes management company that partners with patients and healthcare professionals around the world to offer innovation that improves the quality of life. Over 21 million people in the U.S. alone have diabetes, and tens of millions more are at risk to develop this chronic condition in the near future. Peter has worked tirelessly to provide the most advanced, accurate, and clinically-based quality diabetes management products and services available today.

Peter's professional accomplishments have consistently reflected the Johnson & Johnson credo that guides all company employees to put patients first. Peter recently developed an industry-patient advocacy partnership called the Diabetes Care Coalition that created the "Know Your A1C" campaign. The media campaign carries the message of awareness about sound diabetes management and tight glycemic control to people with diabetes through public media outlets. The American Diabetes Association named Peter "Father of the Year 2004" and inducted him into their honorary Pinnacle Society.

However, of all the professional accolades Peter has received during his impressive career, I believe he is most proud of his devotion to his family as a committed husband and father. While Peter's wife Dina and their three children remain his nonnegotiable priority, he has been able to surpass business goals and at the same time strike a workfamily balance with humility, grace, and strength.

Mr. Speaker, I wish Peter well in his personal and professional endeavors as he departs LifeScan and California for a major corporate promotion that will relocate him and his family to New Jersey, and I thank him for his exceptional service to our community.

TRIBUTE TO THE ELIZABETH RIVER/ARTHUR KILL WATERSHED ASSOCIATION

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 2006

Mr. PAYNE. Mr. Speaker, I am proud today to recognize a valued institution within my Congressional district. For the past 8 years, the Elizabeth River/Arthur Kill (ER/AK) Watershed Association has been dedicated to the education and empowerment of its diverse, multilingual residents by proactively addressing clean water issues. Through services such as water-quality testing, research and advocacy, the ER/AK Watershed Association, which is certified through the New Jersey Department of Environmental Protection, stands apart from many environmental organizations because of its emphasis on educating under-

served communities about the environmental issues that affect their daily lives.

Responding to resident requests for community-generated graphics and maps of the watershed, the ER/AK Watershed Association worked closely with New Jersey's Rutgers University Center of Remote Sensing and Spatial Analysis and the prestigious international Green Map organization to create a dynamic Green Map that will document the natural and cultural resources of our Watershed community. It is important to share with you that two other watershed universities, New Jersey Institute of Technology and Kean University, have generously provided formative and foundational resources to the ongoing development of the ER/AK Watershed Association.

I salute the ER/AK Watershed Association and its partners as they utilize their Green Map to enhance the quality of life in and around the watershed for its natural and human residents. I am proud to have this organization in my district and I wish them continued success in their future endeavors.

ON THE INTRODUCTION OF THE GLOBAL TRADE REQUIRES UNMITIGATED TRUTH IN HEALTH (TRUTH) ACT

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 2006

Mr. MARKEY. Mr. Speaker, in November 2005, President Bush announced a "National Strategy for Pandemic Influenza", which contained plans "to prepare our nation, and our world to fight this potentially devastating outbreak of infectious disease." Clearly, our government must develop and implement thorough plans to detect, respond to and recover from an avian flu pandemic in the event that an outbreak occurs in the United States. However, our country cannot effectively combat avian flu unilaterally. That is why today I am introducing the Global Trade Requires Unmitigated Truth in Health, TRUTH, Act, a bill that seeks to address global health risks in an era of unprecedented international commerce that has created enormous opportunities while also speeding the spread of communicable diseases.

As global trade increases the number of products crossing international borders at faster rates, we also see an increase in harmful and dangerous diseases flying across our borders. With mounting concerns surrounding avian flu and recent experience with Severe Acute Respiratory Syndrome, SARS, governments have not only the right but the responsibility to protect their countries from the threat of disease.

Because avian flu cases have been confirmed in Asia, Europe and the Middle East and the ease of international travel increases the chances that avian flu could emerge in our country, our health officials need the latest epidemiological data as soon as cases are confirmed abroad. The Global TRUTH Act will ensure that all countries that participate in global trade are also good citizens when it comes to protecting the global public health.

The SARS outbreak in Asia in 2002 and 2003 highlighted the inherent dangers in de-

layed reporting of public health risks for the supposed benefit of international trade. When a country is reluctant to publicize early cases of disease for fear of such an announcement's economic effects, that disease is allowed to spread. In order to maintain a system of global public health preparedness, we should enshrine fundamental public health preparedness principles in the international trading system, including the World Trade Organization, WTO.

Unfortunately, press reports have indicated that Indonesian officials covered up and then neglected the spreading bird flu in Indonesia for 2 years until it began to infect humans. According to an Indonesian microbiologist, the Indonesian government could have eradicated its emerging avian flu outbreak if it had acted sooner. Moreover, Indonesia's national director of animal health admitted that Indonesian government officials did not set aside money to vaccinate poultry against the disease this year, despite assurances that such vaccination would be a principal component of the government's avian flu containment plan. Vietnam and China also reportedly failed to take steps that could have contained the virus in Asia.

As noted by the Indonesian microbiologist who first identified the flu virus in the country's bird population, failure of the Indonesian government to take prompt action to stamp out avian flu inside the country's borders has deadly consequences far beyond them. Two years ago when it was revealed that Chinese officials had covered up the existence of SARS inside their country, I urged President Bush to link international trade benefits to international cooperation on public health issues that transcend national boundaries. China eventually responded to international pressure by permitting World Health Organization, WHO, officials to investigate in the affected provinces, but, according to then-Health and Human Services Secretary Tommy Thompson, "If Chinese authorities had reported cases in the beginning of the epidemic, the impact of SARS on the international health and economy would likely have been substantially more limited."

The avian flu outbreak spreading through Asia and Europe presents serious public health challenges for our government and nations around the world. Prevention and containment of infectious diseases are only possible if governments report outbreaks immediately, permit medical researchers to investigate cases, and take protective measures such as vaccinations and quarantines, where appropriate.

In order to both achieve vital public health goals and continue the spread of international trade, the Global TRUTH Act directs the U.S. Trade Representative to submit a proposal to the World Trade Organization, WTO, that states that the WTO take into account whether countries are undermining the international trading system through a failure to comply with the WHO's International Health Regulations. The Global TRUTH Act directs the U.S. Trade Representative to propose that the WTO should enforce strong public health considerations by imposing sanctions or other punitive measures on members who are found to violate the International Health Regulations as well as requiring all member countries to abide by rules of other international organizations with regard to public health. By requiring countries to follow the regulations of the WHO in order to be a member of the WTO, we will link
