

writes, "can lead to a mutually cooperative framework between the tribe and town to improve the quality of housing, education, law enforcement, fire protection, public safety, health care, transportation, and preservation of lands and water in a way that will improve the life of all residents of Mashpee."

In essence, with these words, the Mashpee Wampanoag are bridging years of tension in a wonderfully generous and inclusive manner. Federal recognition and its financial advantages is not simply for tribal members, they are saying, it's about Mashpee, and that can be good for all of us. It's hard to contemplate a firmer foundation for the private and public talks and conversations in the months and years ahead.

HONORING MARY AND JIM HORN
FOR THEIR LIFETIME OF SERVICE

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 19, 2006

Mr. BURGESS. Mr. Speaker, I rise today to honor Mary and Jim Horn for their lifetime of service to the city of Denton as well as the State of Texas.

Ms. Mary Horn, formerly Mary Roberts, has had an important leadership role in both the government and business realms. Before she served as the first and only female Denton County Tax Assessor-Collector, she rose from the position of a flight attendant to become the Manager of Special Operations at Braniff. She was the first woman in that company to serve as an executive. From there, she moved on to manage her own business from 1982 to 1992. After serving two terms as the Denton County Tax Assessor-Collector, she ran and was overwhelmingly elected Denton County Judge. Again, she became the first and only woman thus far to serve in that capacity.

In 1998, she was awarded the Outstanding Volunteer Award of the Denton County Republican Party. She was honored at the Texas Federation of Republican Women during their Tribute to Women at State Convention. In 1999, she was nominated for the "Tax Assessor-Collector of the Year" Award.

Representative Jim Horn served in many important leadership roles. In 1969, he led the Aerosmith Corporation as the Executive Vice President. He followed this with a move to the role of Precinct Chairman. He then served as Denton County Republican Party Chairman and as the elected Committeeman on the State Republican Executive Committee. In 1980, he became the first Republican to be elected county-wide to a State legislator in over 100 years. To top off his career, Representative Horn was recognized for his efforts with the honorable "Hat's Off" Award for his many years of loyal service to the city of Denton as well as the State of Texas.

Representative Jim Horn and his lovely wife Judge Mary Horn will be recognized in August for their many achievements with the dedication of the Mary and Jim Horn Government Center. Mr. Speaker, it is with great honor that I stand here today to recognize them for their tireless public service. It has been a pleasure working with them both and representing them in Washington. I know that the city of Denton and the State of Texas would have been at a loss without their leadership.

STATEMENT RECOGNIZING THE
ACCREDITATION OF THE FIELD
MUSEUM OF NATURAL HISTORY
IN CHICAGO BY THE AMERICAN
ASSOCIATION OF MUSEUMS

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 19, 2006

Mr. DAVIS of Illinois. Mr. Speaker, I rise today to recognize the recent accreditation of the Field Museum of Natural History in Chicago by the American Association of Museums. Accreditation is awarded to less than 5 percent of museums in the United States, and the Field Museum now stands among those few museums honored for its high professional standards and excellence in education and stewardship. Anyone who has ever been to the Field Museum knows that an award for excellence befits this well-known Chicago institution.

Mark Twain wrote, "It is hopeless for the occasional visitor to try to keep up with Chicago—she outgrows his prophecies faster than he can make them. She is always a novelty; for she is never the Chicago you saw when you passed through the last time." Twain's comment remains timeless. Chicago's wonderful museums are never the same since the last time you walked down their halls, especially the Field Museum.

As we speak, hundreds of thousands of advance tickets have been booked from visitors around the world who are waiting to experience the Field Museum's latest exhibition, Tutankhamun and the Golden Age of the Pharaohs. The Museum's commitment to educational programs for people from all backgrounds and educational levels, provides an important window to our world and an educational venue paralleled by few institutions of its type. The exhibits contained within the Field Museum elucidate remote and ancient cultural practices from around the world for others to learn. Their archaeological work has produced astonishing finds from the earth's past. Current groundbreaking work in avian genetics may expose important information that will help address an avian flu pandemic. Beyond traditional museum activities, the Field Museum, in collaboration with the Chicago Cultural Alliance, contributes to Chicago cultural life in many ways. Together the Alliance is developing an innovative program that targets at-risk youth by engaging them in arts workshops that allows them to address issues of identity, conflict resolution, and their heritage. These are but a few of the ways the Field Museum enriches all of our lives through discovery, education, and community outreach.

Museum staffs go to great lengths to consult State educational curricula and guidelines when designing exhibits, thereby further enhancing the quality and relevance of the museum experience. Each year, we spend over \$1 billion to create and stage educational exhibits and special programs. The men and women of the Field Museum are to be commended for their dedication to stewardship, rigorous research, and the creative educational ways they reach out to the community to feed people's curiosity and wonder for the world in which we live. Just as the American Association of Museums recognized the Field

Museum of Natural History with accreditation, today I also want to celebrate and congratulate those responsible for the amazing work that transpires within and outside its halls.

ALTERNATIVE PLURIPOTENT
STEM CELL THERAPIES EN-
HANCEMENT ACT

SPEECH OF

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 18, 2006

Mr. PAUL. Mr. Speaker, the issue of government funding of embryonic stem cell research is one of the most divisive issues facing the country. While I sympathize with those who see embryonic stem cell research as providing a path to a cure for the dreadful diseases that have stricken so many Americans, I strongly object to forcing those Americans who believe embryonic stem cell research is immoral to subsidize such research with their tax dollars.

The main question that should concern Congress today is does the United States Government have the constitutional authority to fund any form of stem cell research. The clear answer to that question is no. A proper constitutional position would reject federal funding for stem cell research, while allowing the individual states and private citizens to decide whether to permit, ban, or fund this research. Therefore, I will vote to uphold President Bush's expected veto of H.R. 810.

Unfortunately, many opponents of embryonic stem cell research are disregarding the Constitution by supporting S. 2754, an "acceptable" alternative that funds non-embryonic stem cell research. While this approach is much less objectionable than funding embryonic stem cell research, it is still unconstitutional. Therefore, I must also oppose S. 2754.

Federal funding of medical research guarantees the politicization of decisions about what types of research for what diseases will be funded. Thus, scarce resources will be allocated according to who has the most effective lobby rather than allocated on the basis of need or even likely success. Federal funding will also cause researchers to neglect potential treatments and cures that do not qualify for federal funds.

In order to promote private medical research, I have introduced the Cures Can Be Found Act (H.R. 3444). H.R. 3444 promotes medical research by providing a tax credit for investments and donations to promote adult and umbilical cord blood stem cell research and providing a \$2,000 tax credit to new parents for the donation of umbilical cord blood from which to extract stem cells. The Cures Can Be Found Act will ensure greater resources are devoted to this valuable research. The tax credit for donations of umbilical cord blood will ensure that medical science has a continuous supply of stem cells. Thus, this bill will help scientists discover new cures using stem cells and, hopefully, make routine the use of stem cells to treat formerly incurable diseases.

H.R. 3444 will benefit companies like Prime Cell, which is making great progress in transforming non-embryonic stem cells into any cell type in the body. Prime Cell is already talking
