

AMERICAN AID TO "HAMAS"
UNIVERSITY

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, incompetence seems to be running loose in a couple of Federal foreign aid programs. The United States dumps millions of American dollars for programs all over the world. Some of these may be worthwhile, but I want to mention some that defy common sense.

According to the Washington Times, the United States has been giving millions of dollars to two Palestinian universities with links to the terrorist organization Hamas. The money is sent through the United States Agency for International Development and through a sister group called the American Near East Refugee Aid.

The Islamic University, which is controlled by Hamas, has received money for student scholarships and money to build a state-of-the-art facility. Al Quds University also got millions of dollars for scholarships for 2,000 students. This is the same university that held a week-long celebration honoring the founder of the suicide belt that kills Americans and innocents. So it seems the good ole U.S. taxpayer is paying for both sides of the war on terror.

No American money should be given to any university that preaches and teaches hate and terror.

And that's just the way it is.

ANNOUNCEMENT BY THE SPEAKER
PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Record votes on postponed questions will be taken after 6:30 p.m. today.

INLAND EMPIRE AND CUCAMONGA
VALLEY RECYCLING PROJECTS

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 122) to amend the Reclamation Wastewater and Groundwater Study and Facilities Act to authorize the Secretary of the Interior to participate in the Inland Empire regional recycling project and in the Cucamonga Valley Water District recycling project, as amended.

The Clerk read as follows:

H.R. 122

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INLAND EMPIRE AND CUCAMONGA
VALLEY RECYCLING PROJECTS.

(a) SHORT TITLE.—This section may be cited as the "Inland Empire Regional Water Recycling Initiative".

(b) IN GENERAL.—The Reclamation Wastewater and Groundwater Study and Facilities

Act (Public Law 102-575, title XVI; 43 U.S.C. 390h et seq.) is amended by adding at the end the following:

"SEC. 16 . INLAND EMPIRE REGIONAL WATER
RECYCLING PROJECT.

"(a) IN GENERAL.—The Secretary, in cooperation with the Inland Empire Utilities Agency, may participate in the design, planning, and construction of the Inland Empire regional water recycling project described in the report submitted under section 1606(c).

"(b) COST SHARING.—The Federal share of the cost of the project described in subsection (a) shall not exceed 25 percent of the total cost of the project.

"(c) LIMITATION.—Funds provided by the Secretary shall not be used for operation and maintenance of the project described in subsection (a).

"(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$20,000,000.

"(e) SUNSET OF AUTHORITY.—The authority of the Secretary to carry out any provisions of this section shall terminate 10 years after the date of the enactment of this section.

"SEC. 16 . CUCAMONGA VALLEY WATER RECY-
CLING PROJECT.

"(a) IN GENERAL.—The Secretary, in cooperation with the Cucamonga Valley Water District, may participate in the design, planning, and construction of the Cucamonga Valley Water District satellite recycling plants in Rancho Cucamonga, California, to reclaim and recycle approximately 2 million gallons per day of domestic wastewater.

"(b) COST SHARING.—The Federal share of the cost of the project described in subsection (a) shall not exceed 25 percent of the capital cost of the project.

"(c) LIMITATION.—Funds provided by the Secretary shall not be used for operation and maintenance of the project described in subsection (a).

"(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section, \$10,000,000.

"(e) SUNSET OF AUTHORITY.—The authority of the Secretary to carry out any provisions of this section shall terminate 10 years after the date of the enactment of this section".

(c) CONFORMING AMENDMENTS.—The table of sections in section 2 of Public Law 102-575 is amended by inserting after the last item the following:

"16 . Inland Empire Regional Water Recycling Program.

"16 . Cucamonga Valley Water Recycling Project."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from Utah (Mr. BISHOP) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. GRIJALVA. Mr. Speaker, I ask unanimous consent that all Members may have 5 days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I yield myself such time as I may consume.

The purpose of H.R. 122, as amended, introduced by our colleague, Congressman DREIER of California, is to amend the Reclamation Wastewater and Groundwater Study and Facilities Act

to authorize the Secretary of the Interior to participate in the Inland Empire regional water recycling project and in the Cucamonga Valley Water District satellite recycling plant.

H.R. 122, as amended, would add approximately 100,000 acre-feet of new water annually to one of the largest recycled water distribution systems in the Santa Ana River Watershed. Some of the recycled water will be used to reclaim the groundwater basin and help drought-proof the service area. These water recycling plants will develop recycled water near where it will be used, offsetting the energy costs associated with pumping.

The Subcommittee on Water and Power held hearings on similar legislation in the 108th Congress. In the 109th Congress, similar legislation was passed by the House.

H.R. 122, as amended, will provide a very modest amount of Federal financial assistance to help in the construction of these worthy water recycling projects.

I urge my colleagues to support this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, I rise to support H.R. 122, as amended, and yield myself such time as I may consume.

H.R. 122, sponsored by our colleague, DAVID DREIER, authorizes the Bureau of Reclamation to participate in two water recycling projects in Southern California that will allow the water districts there to be less reliant on imported water.

As the water demand grows and supplies become more scarce in Southern California, this bill would help to drought-proof this arid area. These projects would add over 75,000 acre-feet of water annually to one of the last recycled water distribution systems in the Santa Ana River Watershed. This legislation passed the House during the past two Congresses, and I urge my colleagues to support this noncontroversial bill.

Mr. Speaker, I would like to yield as much time as he may consume to the sponsor of this piece of legislation, the gentleman from California (Mr. DREIER).

(Mr. DREIER asked and was given permission to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, I rise in strong support of this bill. As I was just told by a distinguished member of the committee staff, we hope that the third time is a charm here. We have been pursuing this for quite a while, and I hope very much that we will be able to see final implementation of this.

I would like to recognize the leadership again on both sides of the aisle; the Committee on Natural Resources, of course, Mr. BISHOP, who served with great distinction on the Committee on Rules. And I will say that we miss him upstairs in the Rules Committee. I especially miss the fact that we are no

longer in the majority up in the Rules Committee, but he is serving very ably now as an important member of the Natural Resources Committee and the Water and Power Subcommittee. And I want to thank, of course, on the majority side the distinguished chairman of the full committee, Mr. RAHALL, my very good friend from California (Mrs. NAPOLITANO) with whom I worked closely on this, and of course the ranking member on the subcommittee, CATHY MCMORRIS RODGERS, and of course the ranking member of the full committee, Mr. YOUNG.

I want to really underscore the great commitment and support that was provided in this effort by my California colleague, Mrs. NAPOLITANO, who was an original cosponsor of this bill and has long been a great champion for many, many years of regional water solutions. I am also very pleased to have had the continued support and cosponsorship of other Southern California colleagues in a bipartisan way, KEN CALVERT, GARY MILLER, and of course I am pleased to see that we have just been joined on the floor here by my good friend, who represents the Inland Empire, Mr. BACA. And I should say, Mr. Speaker, that I just signed one of those cosponsor sheets and turned it in at the desk that will now include Mr. BACA's name as one of the cosponsors of this important legislation.

As many of you will recall, this bill was passed, as I said, by the last Congress; but it was held up in the other body over issues that were much larger regarding overall reform of the Bureau of Reclamation's title 16 program. And I do share the concern that the program, while hugely popular, successful and competitive, is oversubscribed and underfunded. That being said, Mr. Speaker, the need to reform the program shouldn't hold back good projects like this one.

The Inland Empire Water Recycling Initiative authorizes \$30 million for the Inland Empire Utilities Agency and the Cucamonga Valley Water District to assist in constructing two water recycling projects. The projects will produce nearly 100,000 acre-feet of new water annually to the area's water supply. This initiative has the support of all member agencies of the Inland Empire Utilities Agency, which encompasses 240 square miles in Southern California. It also serves a number of cities that I am very honored to be able to represent, the cities of Rancho Cucamonga, Upland and Montclair, some of the fastest growing cities in our Nation.

These water agencies are using high-quality recycled water in many water intensive applications like landscape and agricultural irrigation, construction and industrial cooling. This allows fresh water to be conserved or used for drinking, which reduces our dependence on expensive imported water. In addition, by recycling water which would otherwise be wasted and unavailable, these agencies ensure that we

wring the last drop of use out of water before it is ultimately returned to the environment.

It is imperative that we continue to approve measures preventing water supply shortages in the western United States. And, Mr. Speaker, this recycling initiative will help meet the water needs of the Inland Empire and begin a strategic Federal-local partnership to bring a significant amount of new water supply to this very important region in Southern California. This project has already been recognized nationally as one of the most cost-effective water reuse projects that we have.

The Inland Empire Utility Agency and the Cucamonga Valley Water District are innovative leaders in using high-quality recycled water in environmentally sensitive and creative ways. This allows fresh water to be conserved for drinking, reducing our dependence on expensive imported water.

The hard work of these two local water agencies should be recognized.

Mr. Speaker, I want to specifically recognize the tireless efforts of Rich Atwater, the CEO of the Inland Empire Utilities Agency, and Robert DeLoach, the CEO of the Cucamonga Valley Water District.

I would also like to commend the boards of these agencies for their leadership in providing our region with safe, clean, and affordable water. And I will say, Mr. Speaker, that at a time when we are focusing constantly on the need to look at ways to recycle and focusing on the issue of environmentally sound planning for our future, meeting our needs, this measure is, again, a model that can be used for the rest of the country.

At this juncture, I would be happy to yield to my very good friend, with whom I am privileged to share representing part of the Inland Empire, Mr. BACA.

(Mr. BACA asked and was given permission to revise and extend his remarks.)

Mr. BACA. I appreciate the comments by Mr. DREIER. I appreciate his leadership on this important issue of water. It is critical to the Inland Empire. This is one that needs to be addressed, and he has constantly addressed the issues of water in the Inland Empire, not only now, but in the past. And I rise in support of H.R. 122, the Inland Empire recycling project.

And I appreciate Grace Napolitano's leadership in this endeavor because this is a bipartisan effort for the Inland Empire and its region in the area. This is not a Republican or a Democratic issue, but an issue that pertains to water and water that is important to a lot of us in that region and throughout the State of California.

This project is important for my district. And he not only mentioned his district that covers Upland and Rancho Cucamonga, but it is important for my district and across Southern California because it would help solve California's state-wide water shortage.

We all have been warned about global warming and the impact it is going to have in terms of the future and the possibility of the lack of water. Well, this addresses some of that. By recycling the water in our region, we will be able to increase the local water supply and reduce our dependence on imported water from San Francisco Bay delta area.

□ 1415

The Bureau of Reclamation has ranked this project as one of the most cost-effective new water supply projects in California; I state, the most effective, cost-effective water supply projects in California. And it is also endorsed by all cities, including Fontana and Ontario, as well as community groups and business groups, and environmental leader groups, and I state, environmental groups and leaders throughout the Inland Empire.

I rise to give my full support, and I urge my colleagues to do the same on this important issue on water that impacts not only the Inland Empire but the State of California, and I ask full support.

Mr. DREIER. Mr. Speaker, reclaiming my time, I thank my friend for his very able contribution.

Let me just say, Mr. Speaker, in closing that I think that this legislation underscores once again how the California congressional delegation continues, as it has in the past, to work in a bipartisan way addressing priority concerns that we have, whether it be transportation, dealing with the whole issue of base closure, dealing with the challenge of illegal immigration, dealing with this very important water resources issue, health care issues. California's delegation is working together in a bipartisan way to address them, and this legislation today is evidence of our great success at implementing the shared vision that we have for the constituents whom we are honored to represent in California. And I again thank both Democrats and Republicans on the Natural Resources Committee for their strong support of this important legislation.

And, again, as Mr. BACA said, I hope very much that the committee and others will utilize this very successful program as a model for future water recycling.

Mr. BISHOP of Utah. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and pass the bill, H.R. 122, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.
