□ 1149

Mrs. MCCARTHY of New York, Messrs. LANTOS, BOOZMAN, KELLER of Florida, WALSH of New York, TIM MURPHY of Pennsylvania, SEXTON, SCHIFF, TIBERI, ANDREWS and CONYERS changed their vote from “yea” to “nay.”

Mr. GILCHREST changed his vote from “nay” to “yea.”

So the motion to adjourn was rejected.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

(Mr. TIM MURPHY of Pennsylvania asked and was given permission to address the House for 1 minute.)

Mr. TIM MURPHY of Pennsylvania. Madam Speaker, as I stated in the CONGRESSIONAL RECORD: “On Rollcall vote 340, I was recorded as a ‘yes’ vote when I intended to cast a ‘no’ vote.” I wish to clarify on the RECORD my miscast vote and my strong support for the National Drug Intelligence Center located in Johnstown, Pennsylvania, right outside of the 18th Congressional District. I was pleased to support funding for the NDIC in the Intelligence authorization bills in both the 108th and 109th Congress.

I look forward to continuing my work in support of the critical intelligence work of this agency.

PROVIDING FOR CONSIDERATION OF H.R. 1585, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2008

The SPEAKER pro tempore (Ms. BALDWIN). The time remaining in the debate on the rule, the gentlewoman from Florida (Ms. CASTOR) controls 4 minutes, the gentleman from Washington (Mr. HASTINGS) controls 9½ minutes.

Mr. HASTINGS of Washington. Madam Speaker, I'd ask my friend from Florida how many speakers she has on her side.

Ms. CASTOR. Madam Speaker, I have one remaining speaker before the close, so I'll reserve the balance of my time.

Mr. HASTINGS of Washington. Madam Speaker, I'm pleased to yield 2 minutes to the gentleman from Kansas (Mr. TIAHRT).

Mr. TIAHRT. Madam Speaker, I rise today to speak against this rule. There are two provisions in this bill regarding specialty metals that will make a bad situation worse. I offered two amendments to help correct this problem but, unfortunately, the majority did not allow either of the amendments. As a result, the Democrat majority will force high quality union jobs overseas.

My amendment would have also addressed the problems with the specialty metals and the country of origin specialty metals problem.

Can you believe that today we simply exempt foreign suppliers from the specialty metals provisions. If a product containing specialty metals comes from 18 other countries like France, Germany or Canada, they simply do not have to comply.

This provision is a competitive disadvantage for American industry and American workers. And here's how it works today. Caterpillar makes diesel engines for the Army. These are very common, commercially available engines that operate in civilian construction and trucking industry all over the world. This engine is manufactured by American workers in their Greenville, South Carolina plant.

But Caterpillar also manufactures the very same engine in Belgium. Because of the world demand, Belgium is also a qualifying country. That means that if Caterpillar makes an engine for the MRAP in South Carolina, they must go through the expensive process of documenting the nation of origin of the specialty metals content of every component in the engine. Or they could simply shift the production to Belgium and avoid the process and save money. This puts American jobs at risk because of this outdated legislation, and this rule denies us the ability to protect American workers in this bill.

It's simply unconscionable that we would legislate a competitive disadvantage upon American companies and American workers. And it's even more disheartening that Congress refuses to address the unintended consequences of this decade old problem.

DOD should be leveraging the industrial might of the United States to provide the best technology for our soldiers. But we're denied that ability in this rule.

Ms. CASTOR. Madam Speaker, I yield 1 minute to the gentleman from Rhode Island (Mr. LANGEVIN).

Mr. LANGEVIN. Madam Speaker, I rise in strong support of the rule and the underlying bill. I know Chairman SKELTON and Ranking Member HUNTER have worked exceptionally hard on this bipartisan measure, and I thank them for their leadership.

Our operations in Iraq and Afghanistan have put great strain on our military, and this bill will reverse the decline in readiness. It adds funds for force protection programs such as mine resistant combat vehicles, IED countermeasures and body armor and a much deserved pay raise for the troops.

I'm also pleased that the measure recognizes the importance of submarines to our national security by adding \$588 million to construct a second Virginia-class submarine as early as 2009, 3 years earlier than planned. This is welcome news to the men and woman at Electric Boat in Rhode Island, as well as Groton, Connecticut, as well as our entire submarine industrial base, which is threatened by an insufficient workload. The Navy's current shipbuilding plan would have our submarine fleet drop to dangerously low levels in future years, just as other nations are increasing their naval capabilities.

I've been working exceptionally hard for 6 years to address this important national security issue, and I thank Chairman SKELTON and Seapower Chairman TAYLOR for their commitment to a robust submarine force.

This is a good bill and a good rule and, Madam Speaker, I urge its passage. And I thank my colleague for the time.

The rule before us makes in order an amendment I am offering with the gentleman from Maine, Mr. MICHAUD, that would require military pharmacies to include emergency contraception in the basic core formulary. Access
