PASSPORT BACKLOG REDUCTION  
ACT OF 2007

SPEECH OF

**HON. MICHAEL E. CAPUANO**

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, July 16, 2007*

Mr. CAPUANO. Madam Speaker, I rise today in strong support of the passage of S. 966, a bill that will help ease the lengthy delays that citizens are experiencing obtaining a passport.

The House will have the opportunity to pass amendments to S. 966, the Passport Backlog Reduction Act. The Senate passed the bill, originally introduced by Senator SCHUMER, by unanimous consent on June 29.

After hearing from many constituents about problems they were having, I introduced my I own bill, H.R. 2960, the Department of State Crisis Response Act of 2007. Along with my colleagues Representatives LOUISE SLAUGHTER, RUBEN HINOJOSA, TED POE, AL GREEN,

MAC THORBERRY, CHARLES GONZALEZ, EDDIE BERNICE JOHNSON, SHELLEY BERKLEY, HENRY CUELLAR, CAROL SHEA-PORTER, JERRY MCNERNEY, PETER WELCH and JASON ALTMIRE, I introduced this legislation to enable the Department of State to respond to a critical shortage of passport processing personnel by re-employing vital former employees. I am pleased that the House Foreign Affairs Committee decided to send the Senate bill, similar in purpose to my bill, to the floor in an effort expedite the process. With passage of S. 966, the State Department can begin working to reduce the passport backlog.

I am hopeful that this legislative action will go far to ease the difficulty and delay many of our constituents have experienced in getting or renewing their passports.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

SPEECH OF

**HON. TOM UDALL**

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 17, 2007*

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes:

Mr. UDALL of New Mexico. Mr. Chairman, we as leaders must face and prepare for the reality that America's nuclear footprint is shrinking and that in the coming years our national priorities will shift to address the looming energy crisis. With that in mind, it is abundantly clear that the mission and purpose of Los Alamos National Laboratory, located in my district, must be diversified to ensure its future permanence and to utilize its full potential for scientific research. I stand resolutely behind LANL, and will continue to fully support the men and women who work there, but they must recognize that the bill before us marks

only the first step of the coming reallocation of resources in the nuclear complex. Only in recognizing, accepting, and ultimately embracing this shift, will the lab ensure that they continue to serve in their leading role in combating existing national security threats as well as others that are sure to emerge.

That is why today, Mr. Chairman, I will be voting in favor of the Energy and Water Appropriations bill. In so doing, I am voting for the future of the lab. I am voting for what I believe will be a future as bright as past in helping this country meet its national security challenges. But as I do, I vow to help the leadership at the lab make this diversification a reality. I vow to help the lab remain the pre-eminent lab in the country, home to the best scientists in the world.

Before we vote, however, I would like to briefly recap the steps in the Appropriations process that have brought us to this point today. In May, the Appropriations Subcommittee on Energy and Water marked up its Fiscal Year 2008 bill and reported it to the full Appropriations Committee. This bill included funding cuts that would affect the core mission of the Lab, which gave me great concern. The bill also postponed funding for the RRW and CMRR, projects I have been skeptical of since first being proposed. I am not the only one skeptical of these programs, which is why this bill also wisely included a provision requiring the Administration to thoroughly evaluate and prepare a plan outlining the specific need for not only these projects, but for our entire nuclear stockpile before authorizing millions more taxpayer dollars.

On the other hand, the bill we considered in committee included an unprecedented and long overdue investment in energy efficiency, renewable energy, and climate change research. I applauded the Chairman's vision for these investments, both because it is needed to enhance our nation's security for the future, but also because I firmly believe that the top-notch scientists at LANL have valuable contributions to make in these areas. During this discussion, I received assurances from the Chairman that LANL will have access to these new funds, but they must actively compete for them.

The bill was voice-voted in Committee a few weeks ago and was brought to the floor. During that debate, I led the fight to protect the core mission of the Lab, offering an amendment to restore \$192 million in funding for the Road Runner Supercomputer, the Science campaign, and the Lab's facilities. Not only are these areas needed for the lab to effectively conduct its core mission, but they will also be needed for diversification. However, my amendment was not an endorsement of the status quo regarding our nuclear weapons policy. Unfortunately, my amendment was defeated.

However, during all of this, what became clear was that part of these funding issues for LANL had to do with preparing for conference with the Senate. As the gentleman from Tennessee, Mr. WAMP, stated on the House Floor, ". . . this is the beginning of the process. I know Senator Domenici is going to weigh in. I love it, because these House leaders have given the House a better position to negotiate this bill from than we have ever had in my tenure here, because we need that leverage. Frankly, the Senate has rolled us on this bill for many years. Not any more. We get fair

treatment. We can go in there and negotiate our priorities and come away with a good product." No one who follows the Appropriations process should be shocked by this negotiating tactic.

In the meantime, the Senate Appropriations Committee reported a bill to the full Senate that provides hundreds of millions of dollars in funding increases for LANL. The Senate has yet to pass their legislation, but when they do, as we know, a conference committee will convene to negotiate the differences between the two versions of the legislation. I am confident that the final conference report will result in the restoration of funding for the core mission of the Lab, just as my amendment would have done.

And I will certainly be working for restoration of these funds through conference. Nevertheless, the process to this point must serve as a signal that change is needed if the funding—and the permanence—of the lab is to be certain. It would be folly to assume that the status quo and a static mission will be enough in the years to come. Instead, I hope the idea of diversification is strongly embraced and pursued by LANS, not only to strengthen the lab and its work force, although that is also important, but because the capacity of the lab to produce scientific greatness in pursuit of solving the gravest threats to our nation and to the world is too important.

I have received assurances from the NNSA that diversifying the mission of the lab is possible, but the leadership of the lab must take the initiative to start the process. In fact, there are ongoing discussions at this time about a possible diversified mission for LANL. As we continue the funding process, it is now up to LANL to decide whether it wants to diversify and thrive, or remain focused only on its current mission, which, as we have seen this year, means an uphill battle. I have strongly advised and urged the leadership at the lab to see that diversification is the only way to ensure the future of the lab. I hope that those at the lab believe the same and that in the very near future we will begin to see a true, substantive move toward this important goal.

INTRODUCTION OF THE DENTAL HEALTH PROMOTION ACT OF 2007

**HON. RON LEWIS**

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, July 19, 2007*

Mr. LEWIS of Kentucky. Madam Speaker, I rise to inform my colleagues of legislation I have introduced today to broaden applications for personal health accounts.

The legislation that I have proposed will amend existing Internal Revenue Service Code to permit the purchase of dental care items, including fluoride toothpaste, powered and manual toothbrushes, dental floss, dental cleaners, oral irrigators, and preventive and therapeutic mouth rinses and toothpastes.

Specifically, my proposal adds a definition to the IRS Code for medical care tax treatment to include "products used to diagnose, cure, mitigate, treat, or prevent the onset of tooth decay, periodontal diseases, and conditions ailing the teeth, gums, and mouth or affecting the proper function thereof."

Personal health care accounts are funding arrangements where health care expenses are
