

LATOURETTE from Ohio and particularly also my Florida colleague, Ranking Member JOHN MICA, for moving this resolution through their committee and allowing it to come on the floor today. I also want to thank my colleagues from Florida who have shown their bipartisan support for this resolution, which is indicative of how important the issue of marine security is for our State. I would like to thank all of our colleagues who have cosponsored this particular resolution.

Mr. Speaker, I believe it is necessary to emphasize the importance of increasing maritime domain awareness and encourage recreational boaters and others to report suspicious and unusual activities, which is what America's Waterway Watch program does. I urge all of my colleagues to embrace the goals of this program and our shared responsibility for homeland security by supporting House Resolution 549.

Mr. CUMMINGS. Mr. Speaker, I continue to reserve.

Mr. LATOURETTE. Mr. Speaker, I would advise my friend, the distinguished chairman of the subcommittee, that we have no additional speakers, and if he is prepared to yield back, I will yield back the balance of my time.

Mr. CUMMINGS. We are prepared to do so.

Mr. LATOURETTE. I yield back the balance of my time and urge adoption of the resolution.

Mr. CUMMINGS. Mr. Speaker, we urge Members to vote for this very meaningful resolution, and we wholeheartedly support it. I want to thank the sponsor for his thoughtful piece of legislation.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Maryland (Mr. CUMMINGS) that the House suspend the rules and agree to the resolution, H. Res. 549.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. BILIRAKIS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

□ 1830

SUPPORTING THE GOALS AND IDEALS OF NATIONAL CYBER SECURITY AWARENESS MONTH

Mr. LAMPSON. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 716) expressing the sense of Congress with respect to raising awareness and enhancing the state of computer security in the United States, and supporting the goals and ideals of National Cyber Security Awareness Month.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 716

Whereas more than 200,000,000 American adults use the Internet in the United States, 70 percent of whom connect through broadband connections, to communicate with family and friends, manage finances and pay bills, access educational opportunities, shop at home, participate in online entertainment and games, and stay informed of news and current events;

Whereas United States small businesses, which represent more than 99 percent of all United States employers and employ more than 50 percent of the private workforce, increasingly rely on the Internet to manage their businesses, expand their customer reach, and enhance their connection with their supply chain;

Whereas nearly 100 percent of public schools in the United States have Internet access, with a significant percentage of instructional rooms connected to the Internet to enhance children's education by providing access to educational online content and encouraging self-initiative to discover research resources;

Whereas almost 9 in 10 teenagers between the ages of 12 and 17, or approximately 87 percent of all youth, use the Internet;

Whereas the number of children who connect to the Internet at school continues to rise, and teaching children of all ages to become good cyber-citizens through safe, secure, and ethical online behaviors and practices is essential to protect their computer systems and potentially their physical safety;

Whereas the growth and popularity of social networking websites has attracted millions of teenagers, providing access to a range of valuable services, making it all the more important to teach teenaged users how to avoid potential threats like cyber bullies, predators, and identity thieves they may come across while using such services;

Whereas cyber security is a critical part of the Nation's overall homeland security;

Whereas the Nation's critical infrastructures rely on the secure and reliable operation of information networks to support the Nation's financial services, energy, telecommunications, transportation, health care, and emergency response systems;

Whereas cyber attacks have been attempted against the Nation and the United States economy, and the Department of Homeland Security's mission includes securing the homeland against cyber terrorism and other attacks;

Whereas Internet users and information infrastructure holders face an increasing threat of malicious attacks through viruses, worms, Trojans, and unwanted programs such as spyware, adware, hacking tools, and password stealers, that are frequent and fast in propagation, are costly to repair, and can cause extensive economic harm;

Whereas coordination between the numerous Federal agencies involved in cyber security efforts, including the Department of Homeland Security, the National Institute of Standards and Technology, the National Science Foundation, and others is essential to securing America's critical cyber infrastructure;

Whereas millions of records containing personally-identifiable information have been lost, stolen or breached, threatening the security and financial well-being of United States citizens;

Whereas consumers face significant financial and personal privacy losses due to identity theft and fraud;

Whereas national organizations, policy-makers, government agencies, private sector companies, nonprofit institutions, schools, academic organizations, consumers, and the media recognize the need to increase awareness of computer security and the need for enhanced computer security in the United States;

Whereas the National Cyber Security Alliance's mission is to increase awareness of cyber security practices and technologies to home users, students, teachers, and small businesses through educational activities, online resources and checklists, and Public Service Announcements; and

Whereas the National Cyber Security Alliance has designated October as National Cyber Security Awareness Month to provide an opportunity to educate United States citizens about computer security: Now, therefore, be it

Resolved, That the House of Representatives—

(1) supports the goals and ideals of National Cyber Security Awareness Month; and

(2) intends to work with Federal agencies, national organizations, businesses, and educational institutions to encourage the voluntary development and use implementation of existing and future computer security voluntary consensus standards, practices, and technologies in order to enhance the state of computer security in the United States.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. LAMPSON) and the gentleman from Florida (Mr. FEENEY) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

GENERAL LEAVE

Mr. LAMPSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on H. Res. 716, the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LAMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H. Res. 716, a resolution to applaud the goals and activities of National Cyber Security Awareness Month. The Science and Technology Committee has been a leader in the Congress supporting efforts to promote better security in cyberspace, and I am pleased to be able to help raise awareness of this crucial issue.

Each year, Americans become more and more dependent on technology for their daily lives. More than 200 million people in this country use the Internet for shopping, for education, for socializing, for information gathering, for banking and entertainment. An increasing number of Internet users are children and seniors. The Internet is looking more and more like real life.

Mr. Speaker, unfortunately, with this growth in usage, we have also seen a startling increase in cybercrime. Bank accounts are being hacked, children are being bullied and harassed on social networking sites, and personal information is being stolen from retailers, universities, and even government agency databases.

The United States Computer Emergency Readiness Team, US-CERT, found that security threats to personally identifiable information grew 500 percent between the first quarter of 2006 and the first quarter of fiscal year 2007 to 103,000 reports. Identity theft has topped the list of complaints consumers filed with the FTC for the 7th year in a row, accounting for 36 percent, or nearly 250,000 complaints.

Mr. Speaker, financial crimes are not the only issue; 32 percent of teenagers who use the Internet say they have been victims of cyberbullying. Criminals and terrorists can also use cyberattacks to affect infrastructure, potentially causing physical or economic devastation.

These data breaches and other cybersecurity threats come at a huge cost to consumers and to businesses. GAO reports that 31 companies that responded to a 2006 survey said that data breaches cost an average of \$1.4 million per breach. Consumers lose valuable time and energy fixing their credit and recovering lost funds. Clearly, we as a Nation must make a stronger effort at securing cyberspace.

Mr. Speaker, that is why I join with my colleagues in applauding the efforts of the National Cyber Security Alliance, a public-private partnership focused on improving cybersecurity for home users, for small businesses and for educational institutions.

I especially want to thank Chairman LANGEVIN, Mr. MCCAUL, Chairman WU, Dr. GINGREY, Ms. LOFGREN, Mr. LUNGREN, Chairman THOMPSON, Mr. KING, Chairman GORDON, and Mr. HALL for introducing this resolution. Their leadership during National Cyber Security Awareness Month and year round will help protect us from cybersecurity breaches in all forms.

The National Cyber Security Alliance conducts public education campaigns to alert computer users to potential threats and provides guidance on best practices. They organize events for businesses, universities and the public to raise awareness of cybersecurity. This resolution draws attention to this important organization and the critical cause that they champion.

Mr. Speaker, I urge my colleagues to support this resolution commemorating National Cyber Security Awareness Month.

Mr. Speaker, I reserve the balance of my time.

Mr. FEENEY. Mr. Speaker, I rise in support of H. Res. 716 and yield myself such time as I may consume.

Mr. Speaker, I want to thank the gentleman from Texas for his advocacy on behalf of this resolution. Information technology has become an integral part of our lives. It shapes how we communicate, how we entertain, and how we work with one another. Computers route our phone calls, print our paychecks, constantly tune our Nation's power plants and transmission lines to meet our energy demands. The extent

to which our Nation's infrastructure, economy and way of life depend on computers is simply astounding.

Unfortunately, this reliance on information technology has also left us vulnerable to cyberattacks, viruses and worms, as well as identity theft. The National Cyber Security Alliance is a public-private partnership whose mission is to improve the safety of our computer networks at home and at work against those threats.

Mr. Speaker, the NCSA has declared October National Cyber Security Awareness Month and is sponsoring events throughout the country to raise awareness of the significant cybersecurity issues that we face as a Nation. There are straightforward steps we can take as individuals on our personal computers to help protect ourselves.

The NCSA has a Web site to help consumers and small businesses to prevent or respond to cyberattacks at StaySafeOnline.org. It includes tips such as how to create strong passwords, how to protect your children online, and what to do if you think something goes wrong. As part of Cyber Security Awareness Month, we should all visit StaySafeOnline.org and consider how we can better protect ourselves, such as by ensuring antivirus applications are installed and up to date.

Mr. Speaker, I applaud the organizations and agencies involved in the National Cyber Security Awareness Month for their efforts to help us all become more responsible and safer computer users. With that, I thank the gentleman from Texas (Mr. LAMPSON).

Mr. Speaker, I reserve the balance of my time.

Mr. LAMPSON. Mr. Speaker, I yield 5 minutes to the gentleman from Rhode Island (Mr. LANGEVIN).

(Mr. LANGEVIN asked and was given permission to revise and extend his remarks.)

Mr. LANGEVIN. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of H. Res. 716, a resolution supporting the goals and ideals of the National Cyber Security Awareness Month. I want to thank my ranking member, Mr. MCCAUL, for his support of this resolution. I commend the other gentleman from Texas for his leadership on this issue as well.

Each year the National Cyber Security Division of the Department of Homeland Security joins with the National Cyber Security Alliance, the Multi-State Information Sharing and Analysis Center, and other partners to support National Cyber Security Awareness Month. The goal of National Cyber Security Awareness Month is to show everyday Internet users that by taking simple steps, they can safeguard themselves from the latest online threats and respond to potential cybercrime incidents.

Mr. Speaker, these safeguards taken by everyday home and office users are a critical component in protecting not

only these individuals themselves, but the larger universe of computer and Internet users as well. We all have a role to play. Unfortunately, though, it would be dangerous to believe that simple steps by end users will sufficiently combat the larger threats associated with an increasingly networked society.

As chairman of the Homeland Security Subcommittee on Emerging Threats, Cybersecurity and Science and Technology, I have held a number of hearings this year on our Nation's cybersecurity posture and the various vulnerabilities in our critical information infrastructure. This is an area where I plan to hold increasing hearings and provide intense oversight because cybersecurity vulnerabilities can significantly impact our national and economic security.

Mr. Speaker, we all know that security networks can help prevent problems like identity theft, but secure networks can also protect our nuclear power plants, our electric grids and other critical infrastructure.

Sadly, the issue of cybersecurity has been largely ignored and misunderstood for far too long. This is an area that needs greater attention and far greater oversight, making sure that both government is doing what it is supposed to do, as well as the private sector, to make sure that our computer networks are as secure as they possibly can be. This is truly an issue of national security.

The oversight that the Homeland Security Committee is undertaking will help change that, but much work remains to be done. I want to commend Chairman BENNIE THOMPSON for the attention that he has given this issue as well.

We must continue to bring together greater attention to this issue by dedicating resources to securing cyberspace, such as increased funding for cybersecurity research and development, but we must also demand accountability and prompt action from those officials tasked with developing comprehensive strategies for securing cyberspace.

I am proud to recognize October as National Cyber Security Awareness Month, and I hope that the passage of this resolution will bring greater attention to the importance and urgency of securing cyberspace.

I want to thank Chairman GORDON for his leadership in bringing this measure to the floor. Again, I want to thank my ranking member, Mr. MCCAUL from Texas, for his partnership in highlighting the importance of cybersecurity, and I urge all of my colleagues to join me in supporting this important resolution.

Mr. FEENEY. Mr. Speaker, I am delighted to yield 2 minutes to my friend, the gentleman from California (Mr. HERGER).

Mr. HERGER. Mr. Speaker, I rise in support of House Resolution 716. While the Internet offers a multitude of benefits, it can also pose threats, such as

identity theft and online scams. It is important to raise awareness of these threats and how they can be avoided.

Cybersecurity is also critical to our national security. A cyberattack against our Nation could cripple our communications, destroy our energy grids and damage our economy. We must take proactive steps today to prevent and respond to future attacks.

I also commend the Air Force for establishing a Cyber Command. Our Nation must be able to defeat any adversary on tomorrow's cyberbattlefield.

I thank my friend from Florida (Mr. FEENEY) for yielding time, and I urge my colleagues to support this resolution.

Mr. LAMPSON. Mr. Speaker, I reserve my time.

Mr. FEENEY. I want to thank my friend from California.

Mr. Speaker, I yield 4 minutes to my friend, the gentleman from Texas (Mr. MCCAUL).

Mr. MCCAUL of Texas. I thank the gentleman from Florida.

Mr. Speaker, I want to thank the Members who introduced the bill. I want to thank Chairman LANGEVIN, who I have worked with very closely on this.

Mr. Speaker, I rise today to urge the passage of this resolution, which supports the goals and ideals of National Cyber Security Awareness Month. While I believe it is important to recognize the need for cybersecurity awareness, this is an issue that should not be limited to just one month. Cybersecurity should be on the minds of all of us throughout the entire year.

Computers and the Internet have become an integral part of American business, government and lifestyle. Over 200 million Americans use the Internet on a regular basis. Companies, both large and small, rely on the Internet to manage their business, expand their customer reach and enhance their connection with their supply chain.

Almost 90 percent of all youth use the Internet, and the vast majority of those use the Internet at school. It is important that these children are taught to use the Internet in a safe and secure manner. This will not only protect their own systems from attack, but will provide for their physical safety.

Cybersecurity is also a critical part of our Nation's overall homeland security. The systems that control and monitor our dams, power grids, oil and gas supplies, as well as our transportation systems and other critical manufacturing processes, are connected to the Internet.

Right now, a terrorist organization or a hostile nation-state could disrupt our critical infrastructure systems and do serious damage to our economy without even entering our country. Appropriate cybersecurity practices are essential to overall security.

The dangers associated with online behavior are becoming more and more common. These threats range from

spam, viruses and identity theft to complex computer attacks created by organized crime, terrorist organizations and possibly nation-states designed to steal sensitive information through espionage.

Organizations, such as National Cyber Security Alliance, are making it their mission to increase awareness of cybersecurity and technologies to home users, students, teachers and small businesses. These organizations deserve to be recognized for their good work and be supported.

While there is much to do, cybersecurity awareness is growing. The Congress has a role to play in encouraging the use of proper cybersecurity practices and technologies throughout our country. National Cyber Security Awareness Month provides a solid platform from which to improve cybersecurity awareness in our country, and I am pleased that this Congress is supporting its ideals and its goals. We have much more work to do, but being aware of the need for cybersecurity is a necessary first step.

Mr. LAMPSON. Mr. Speaker, I continue to reserve my time.

Mr. FEENEY. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. KINGSTON).

Mr. KINGSTON. I thank the gentleman for yielding.

Mr. Speaker, I wanted to talk a little bit about my dad. My dad is 89 years old. He has never owned a credit card. He has never even had a digital telephone. He doesn't have a computer. He doesn't have Internet. He is not interested in any of it. And yet, as removed as he might be from computer technology on a day-to-day basis, as it would appear in his personal life, the truth of the matter is, no one is isolated from high tech today.

□ 1845

His veterans payments, his Social Security payments, his bank transfers, his Medicare, all of this comes to him through computer networks. If anybody messes up those computer networks, my 89-year-old dad will not get the services that he needs. That's why this is so important today.

Today there are some 64,000 hacker programs that are available to consumers for free. In addition, there are 12,000 that if you pay \$1,000 for them, you get 1 year's support. Support for a hacker program, can you imagine that. And America's computers are absolutely under siege.

I am proud that in 2002 Armstrong Atlantic University in Savannah, Georgia, began its Regional Center for Cybersecurity Education and Training. This was part of the G-8 Summit which was held in Savannah, Georgia, in 2004, and they played a key role in the law enforcement efforts surrounding the G-8.

Since then, Armstrong Atlantic University has taken on partners of Washington Group International and

Bridgeborn, and they are offering all kinds of computer security training programs, from simulating and modeling to visualization, covert channels, cybersecurity and security of networks.

Why is this important? Now, Mr. MCCAUL said there are 200 million U.S. citizens connected to the Internet. It is even more than that. The numbers of people with access have increased over 182 percent from 2000 to 2005. In 2006, total nontravel-related spending on the Internet is estimated to be over \$100 billion. That is a 24 percent increase over 2005. In 2005 the FBI has estimated that American businesses lost \$67 billion because of computer crime, and that number of \$67 billion in 2005 has moved to over \$105 billion in 2007.

The United States is the location of 40 percent of the known command-and-control servers; and because of that, we are the target of attack after attack. Most of these are executed by botnets, which are a collection of broadband-enabled PCs hijacked during virus and worm attacks and seeded with software that connects back to a server to receive communications from a remote attacker. In other words, the botnets all work together to simultaneously and consistently and constantly attack computer networks, such as the Department of Defense, the Centers for Disease Control, and the Department of Energy.

In fact, in America our governmental computers alone get millions of attacks each and every day. It is something that we all should be very concerned about. The United States was the top country for malicious activity, making up over 31 percent of the worldwide total.

Personal information, for example, on veterans in May 2006 was taken home with a Veterans Administration employee, and 26 million veterans had their own personal information compromised simply because one employee took a laptop home. Now 25 years ago that may have required a truckload to carry that many files home. But just think about it, all he did was take a laptop home. And if the employee's house had not been broken into and the laptop stolen, we still might not have known about it. The Department ended up spending \$200,000 a day just to operate a call center to explain to veterans how this might affect their service. Of course, there are class action lawsuits that have followed, and there will be a lot more discussion about that.

In September 2000, a 16-year-old young man in Florida intercepted 3,300 e-mails from one Department of Defense operation. He also stole 13 NASA computers.

In February 2001, Gary McKinnon of London took a poorly secured Windows system of NASA and the Pentagon and 12 other military operations and caused almost \$1 million worth of damage by just basically playing around.

We know that in March 2007 Max Ray Butler, a 27-year-old computer expert

working as an FBI informant was indicted on 15 criminal counts for allegedly hacking into the U.S. Department of Defense Air Force and other computer-sensitive systems.

The list goes on and on, even to the extent that you have folks in China and North Korea purposely attacking American systems. I will submit some of these for the RECORD, but the list goes on and on. That is why it is very important for us to support this legislation and have Members talking about it and knowledgeable.

If you think about cybersecurity now, the cost of it is more than what it is for the illegal drug trade in America. This is a huge problem, but it is kind of a quiet problem and this resolution helps raise its visibility.

Mr. FEENEY. Mr. Speaker, I have no further requests for time, I thank the gentleman from Georgia and the gentleman from Texas, and I yield back the balance of my time.

Mr. LAMPSON. Mr. Speaker, I just want to encourage all of our colleagues to support this legislation. It is critically important, and I want to express my appreciation to all of the sponsors who made such a tremendous effort to bring it here to the floor.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. LAMPSON) that the House suspend the rules and agree to the resolution, H. Res. 716.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

HONORING THE 50TH ANNIVERSARY OF THE DAWN OF THE SPACE AGE

Mr. LAMPSON. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 225) honoring the 50th anniversary of the dawn of the Space Age, and the ensuing 50 years of productive and peaceful space activities.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 225

Whereas the dawn of the Space Age took place on October 4, 1957 with the launch of Sputnik 1, an event that was followed soon after by the American launch of Explorer 1;

Whereas the exploration of space evolved from cold war competition into an endeavor that has been marked by significant international cooperation, with results that have benefitted all humanity;

Whereas a new chapter in space exploration was opened when cosmonauts and astronauts first orbited the Earth in the early 1960s, culminating in the historic first steps taken by astronauts Neil Armstrong and Edwin E. Aldrin Jr. on the Moon in 1969;

Whereas robotic explorers have ranged throughout the solar system, with Voyager

and Pioneer spacecraft now on the verge of entering interstellar space;

Whereas from space, we have been able to increase significantly our understanding of the universe and its origin;

Whereas observations from space have enabled large scale monitoring of the Earth's weather and climate;

Whereas satellites have become a part of our daily lives, transforming communications, navigation, and positioning;

Whereas the competition that accompanied the dawn of the Space Age reinvigorated the Nation's interest in science and technology, leading to an increased investment both in research and in science, technology, engineering, and mathematics education;

Whereas these investments contributed to the development of a technologically skilled generation of Americans that has led the world in innovation and accomplishment;

Whereas the new global competition for preeminence in science and technology and innovation has led to a call for a renewed commitment to research and to science, technology, engineering, and mathematics education akin to that which followed the dawn of the Space Age; and

Whereas Congress has responded by renewing our national commitment to science, technology, engineering, and mathematics education with the recently enacted America COMPETES Act: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) honors the 50th anniversary of the dawn of the Space Age;

(2) recognizes the value of investing in America's space program; and

(3) declares it to be in America's interest to continue to advance knowledge and improve life on Earth through a sustained national commitment to space exploration in all its forms, led by a new generation of well educated scientists, engineers, and explorers.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. LAMPSON) and the gentleman from Florida (Mr. FEENEY) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

GENERAL LEAVE

Mr. LAMPSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks, and to include extraneous material on H. Con. Res. 225, the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LAMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the space age arrived with a roar of the Soviet launch of Sputnik, which propelled our Nation, the leader of the free world, into a space race. We recognized we faced a challenge, and we responded. We made smart investments in our people and in knowledge acquisition to enable us to compete technologically.

Specifically, we invested in what we now call STEM education, and we invested in science and engineering research. Those investments brought us preeminence in a new area of endeavor, and they inspired a generation of engineers and scientists.

And just 12 years later, two Americans, Neil Armstrong and Buzz Aldrin, stood on the surface of the Moon. The competition with the Soviet Union on a world stage is what drove us initially, but it was strongly coupled with America's innate yearning to explore and discover.

America was settled by people who already had lives elsewhere, but who wanted something more. They wanted to find out what was over the horizon. They wanted to determine if there was a better way. We are here today, we are the beneficiaries of that restless energy and that hard work.

An array of spacecraft high above works for us. Satellites monitor weather and climate, forest fires, pollution, the growth of cities, and even the shrinking of ice mass. They augment our infrastructure by providing positioning information, and television, radio, telephone and e-mail communications. They help our Nation remain secure. And they serve our restless need to always know more as they go on missions for us throughout the solar system and, soon, even beyond that boundary.

Every day people benefit: farmers, surveyors, pilots and sailors, and even moms using GPS to get the kids to soccer practice. For all of our relatively small investment, we get a lot back. That investment is a start-up payment that calls forth the strength of American entrepreneurship and taps America's restless energy.

Today we must not sit back, content with these benefits that we owe the previous generation. It is not American in nature to do so.

Congress recognizes that our Nation again faces a challenge. This time our adversaries are economic. In the space race we demonstrated the winning strategy and we need to maintain that commitment to a strong national space program. That includes human exploration beyond low Earth orbit, including missions to the Moon and beyond because rising to that challenge will bring out the best of us as a people.

In addition, we must renew America's investment in STEM education, in science and engineering research.

Congress got this under way with the recently enacted America COMPETES Act, and Congress will need to provide sustained support if we are going to maintain American technical superiority and if we are going to again inspire the world with our accomplishments.

I want to thank Chairman GORDON for his leadership in introducing this legislation. I also want to thank Representatives MARK UDALL from Colorado and RALPH HALL from Texas and TOM FEENEY from Florida who have joined me as original cosponsors of this legislation. We want to honor this historic anniversary by offering this concurrent resolution.

I would like to close by quoting a few lines and key phrases, namely: "Now, therefore, be it resolved by the House
