

verging on dangerous interference with the global climate system. This means making tremendous reductions quickly and ensuring that our energy decisions today do not warp the future for our children and generations to come.

As we celebrate Earth Day this year, I ask that you join me in thinking about the road ahead and how we will overcome this great environmental challenge that we face as Nevadans, Americans, and citizens of the world.

NATIONAL WEEK OF THE YOUNG CHILD

• Mr. HARKIN. Mr. President, today I recognize the National Week of the Young Child. This week provides all of us here in Washington the opportunity to reflect on the ways in which we can better care for children in our communities and more effectively cooperate with teachers, parents, and other caregivers.

Critical to the success of many disadvantaged Iowa children is the Head Start program. If we really want to get kids ready for school, we must focus on early intervention. This means improving access to education and developmental services to help provide kids with a good start in life. Since 1965, Head Start has served more than 24 million low-income children and their families.

Head Start programs help Iowa families to meet young children's basic educational, health, nutritional and social needs with a goal of having these kids ready for the first day of kindergarten. I was pleased to recently help modernize and update Head Start by passing The Head Start for School Readiness Act, which allows more families access to programs, improves early childhood training for Head Start educators, and updates learning standards to reflect the latest research in child development. I also made sure that early learning programs do not ignore the importance of wellness and healthy behaviors by requiring training to integrate physical activity and good nutrition in the classroom.

I have heard tremendous stories from my State of children whose lives were improved through the social services Head Start provides. These children received eye glasses or necessary dental work thanks to the early intervention of our Head Start programs. Head Start educators and employees often connect parents in need to the outreach services which help give children safe and comfortable homes.

I was particularly touched by the story of Rebecca Navarro. She writes that her youngest son, Anthony, received help learning his letters and colors, and improved his social skills, through their local Head Start agency.

At the same time, a Head Start social worker helped Ms. Navarro go back to school and receive her degree, pay for food and utilities and provide a better quality of life for Anthony and his four siblings. Anthony has now successfully graduated the 6th grade with math skills above his grade level, and plans on going to college and getting his master's degree in engineering and math.

Providing our Nation's youngest learners with the tools they need to succeed benefits not only those children and their families, but our Nation as well. While celebrating the victories of Head Start this week, we should also continue to work hard to ensure every child has the opportunity to reach his or her full potential.●

HONORING THE UNIVERSITY OF MICHIGAN GOSPEL CHORALE

• Mr. LEVIN. Mr. President, I would like to take this opportunity to highlight a memorable trip recently taken by a group of students from University of Michigan. Each spring, many students head for warmer climates during spring break. However, the University of Michigan's Gospel Chorale, comprised of 40 students, spent this year's spring break accompanying university president Mary Sue Coleman and other faculty and staff to the nation of Ghana.

During this trip, the Michigan Gospel Chorale performed at churches, schools, colleges and public forums, including the National Theatre and the Kofi Annan International Peace-keeping Training Center, where they were warmly received. In fact, they performed before an audience of more than 2,500 at Ghana's National Theatre. One of their most moving performances occurred when the chorale sang in the dungeons of the Elmina Castle, where slaves were once held captive before they were transported across the ocean.

The purpose of the University's trip to Ghana was to strengthen existing relationships the University of Michigan has in Africa and to explore opportunities for new research programs and for faculty and student cultural exchanges. Currently, more than 120 University of Michigan faculty members are involved in various projects in Ghana and South Africa, and numerous students are taking courses or are involved in research activities.

As you know, the United States has a long history with Ghana, and that partnership continues to grow. The people of Ghana will remember the efforts of the University of Michigan and the Michigan Gospel Chorale's visit for a long time. For the Michigan Gospel Chorale, the journey provided a significant global learning experience. Many of the students had never traveled by air or had been out of the country. I am sure my colleagues agree that it is important for our young people to have opportunities to explore, and to con-

tribute to, our ever-expanding global community.

I know my colleagues join me in commending the University of Michigan and the Michigan Gospel Chorale for their outstanding efforts in fostering goodwill between the United States and the nation of Ghana.●

HOLD ON NOMINATION OF HARVEY E. JOHNSON

• Mr. WYDEN. Mr. President, more than 40 months ago, prior to his confirmation as Secretary of the Department of Homeland Security, Michael Chertoff told me in my office that if confirmed he would move expeditiously to implement the National Emergency Technology Guard—NET Guard—program. Unfortunately, Secretary Chertoff has so far failed to honor this pledge.

The idea of NET Guard was born in the aftermath of 9-11, when a number of communications and technology companies told me they wanted to help New York City when it was attacked—and there was no system for using their volunteers. Then-Senator George Allen and I moved on a bipartisan basis to support a program, called NET Guard, that would ensure that volunteers with technology expertise could be fully utilized in future crises. These teams of local volunteers with science and technology expertise would be vital in assisting our communities in responding to attacks on communications networks, or recovering from natural disasters. Congress authorized the establishment of NET Guard 5 years ago, in the Homeland Security Act of 2002.

However, DHS has delayed and delayed and so far failed to implement this critical program.

At times, Secretary Chertoff has appeared willing to move forward on NET Guard, but each time he stops short of action. On August 1, 2007, the Secretary pledged to me in a letter that he would be submitting a request to fund the NET Guard program in the President's fiscal year 2009 budget. I will ask that a copy of Secretary Chertoff's letter be printed in the RECORD. I thought this meant that the Secretary recognized NET Guard's potential and understood Congress's intention in authorizing the program. Unfortunately he failed to fulfill this promise and we again find ourselves at an impasse.

I feel that further delay is unacceptable. I reluctantly feel that I must put a hold on the nomination of Harvey E. Johnson who has been nominated by President Bush to serve as Deputy Administrator of the Federal Emergency Management Agency, until the NET Guard program is up and running.

I place this hold reluctantly, but see no other option in light of the Department's foot dragging. I am hopeful that the Department will soon be able to stand up a NET Guard program, and I will be able to withdraw my hold and Mr. JOHNSON's nomination can move through the Senate. In the meantime, I
