

developed a prototype for renewable battery power that harvests energy from mechanical vibrations with a larger magnitude and efficiency of AC voltage. His prototype can be used as a primary power source in wireless structural monitoring sensors for bridges, implantable medical devices, tire pressure monitoring systems and portable devices.

Another 17-year-old, from Ponte Vedra Beach, FL, Nathan Georgette, developed a mathematical model intended to reduce the costs of stopping viral disease outbreaks in impoverished nations. He used mathematical modeling to generate a formula to calculate in real time the minimum number of vaccines needed to stop a measles outbreak. Nathan's research represents a new approach to understanding the dynamic effects of infectious disease spread and gradual immunization.

Seventeen-year-old Molly Hensley-Clancy from Minneapolis, MN, explored the primal human instinct of storytelling through the eyes and minds of young girls, demonstrating that geographic and linguistic differences do not change the universality of dreams, thoughts, and troubles. She believes the more we notice the commonalities that bind us together as human beings, rather than what sets us apart, the less we will be able to ignore those who are suffering among us.

Kyle Hutzler, a 16-year-old from Huntingtown, MD, authored a substantial policy paper on education reform, recommending that successful school reform must incorporate choice, autonomy, and accountability, along with the empowerment of parents, students, and teachers. His work articulates a vision for restructuring with specific proposals ranging from classroom organization and curriculum, to funding and teacher pay.

At 17 years old, Michael Leap from Okemos, MI, has examined the role of science in our society by synthesizing and applying several complex philosophical concepts to basic questions about science in everyday life. With the thesis that conventional views of science, truth, and nature only function from a self-referential viewpoint, he presents new, transversal perspectives in hopes that this critical examination will lead to a greater understanding of the world at large.

Divya Nag, a 17-year-old from El Dorado Hills, CA, developed both a thermal analysis technique to quantify the effects of forest fires and a novel ratio to determine organic matter loss in on-site situations. By using differential scanning calorimetry, thermogravimetry, and x-ray diffraction, Divya determined soil ignition temperatures and soil compositions before and after burning. These techniques can be used in evaluating the efficacy of prescribed burning and forest management.

Seventeen-year-old Avanthi Raghavan from Orlando, FL, studied mechanisms of protein transport critical to

the survival and pathogenicity of the malaria parasite, *Plasmodium falciparum*, which infects human red blood cells and causes malaria. By using confocal microscopy, Avanthi characterized the role of the SNARE proteins PfSec22 and PfBet1, thus identifying potentially exploitable targets for the future development of parasite-specific drugs.

Sarah Walianny, a 16-year-old from Arcadia, CA, discovered that expression of the gene t-Darpp can make Her-2 positive breast tumor cells become resistant to the drug Herceptin. Sarah demonstrated that t-Darpp alters a critical signaling pathway that regulates growth and survival in cells. Sarah's work shows that blocking the t-Darpp gene can eventually lead to more effective breast cancer treatment.

Mr. President, today each of these 20 young scholars deserve our praise for the commitment they have demonstrated to enriching our understanding in the fields of music, science, literature, and technology. These 20 young people also deserve our admiration for their desire to improve the lives of individuals worldwide by addressing issues of practical import. Finally, these young people deserve our gratitude for the shining example they have set for us by the excellence of their work and their desire to work on the behalf of others. I would also like to thank the Davidson Institute for the support and direction they provide to this group of our country's young leaders. The knowledge of such dedicated and gifted young Americans gives me great hope and comfort for the future. Clearly, the future of our country rests in capable hands.

REMEMBERING TERRANCE DAVIS

Mr. PRYOR. Mr. President, it is with great sorrow I rise today to remember a bright young man who was taken from us far too soon. Terrance Davis, 20 years old and from Osceola, AR, was a gifted student majoring in sociology, theater and performance studies, and African-American studies at Georgetown University.

My staff and I were blessed to benefit from this young man's talents this past summer when he served as an intern in my office. I had the privilege of getting to know Terrance during this time and to see his passion for public service.

Terrance was an enthusiastic leader who was not afraid to take on multiple responsibilities. After fulfilling his duties in the Senate he would attend rehearsals for the play he was directing at Georgetown University until late into the evenings. He also served as director of the Georgetown University Gospel Choir.

His friends at school and people in my office referred to him as someone with a positive attitude who was always ready to work. Other friends referred to him as having strong passion for his Christian faith.

Terrance had plans to serve our country by participating in the Teach for America program and wanted a future in helping students through higher education. He once said that becoming a college professor or dean was something he inspired to do.

Tragically, on September 1, 2008, Terrance Davis was involved in a fatal accident in Harkerville, South Africa, where he was traveling on a holiday break from his academic study abroad program at the University of Cape Town. I join his family and friends in mourning the loss of this great young man.

Mr. President, I ask my colleagues to join with me in honoring the life of this exceptionally talented young man, Terrance Davis.

ADDITIONAL STATEMENTS

40TH ANNIVERSARY OF EDEN HOUSING

• Mrs. BOXER. Mr. President, I take this opportunity to recognize the 40th anniversary of Hayward-based Eden Housing, one of northern California's oldest and most esteemed nonprofit affordable housing developers and managers.

In 1968 six community activists, troubled by the lack of affordable, non-discriminatory housing throughout Alameda County founded Eden Housing. Over the last 40 years, Eden Housing has expanded its advocacy for affordable housing beyond Alameda County. Through the dedicated work of its staff, volunteers, and board of directors, Eden Housing has succeeded in creating nearly 5,000 affordable housing units that have provided homes to thousands of Californians. Throughout the last 40 years, Eden Housing has grown to partner with 20 cities in 6 counties throughout California.

Eden Housing has an outstanding commitment to providing low to moderate-income families and seniors, people with disabilities, the formerly homeless and first-time homeowners with affordable housing opportunities, social services and supportive programs. Eden Housing has received numerous awards for its work in quality affordable housing, including being named one of the Top 50 Affordable Housing Owners in the United States by Affordable Housing Finance Magazine in 2007 and 2008.

In 2006, Eden Housing was honored by the California Housing Consortium for its "contribution to fostering the creation of affordable housing throughout California." The services and programs provided by Eden Housing offer those with limited incomes or disabilities, and potential first-time homeowners, the opportunity to turn the dream of quality affordable housing into a reality.

I commend Eden Housing staff and volunteers for their many accomplishments over the last 40 years and I send

my best wishes for many future successes over the next 40 years.●

REMEMBERING MATT GARCIA

● Mrs. BOXER. Mr. President, it is with a heavy heart that my friend Senator DIANNE FEINSTEIN and I ask our colleagues to join us today in honoring the memory of an extraordinary young man, Fairfield City councilmember Matt Garcia. Matt, a dedicated public servant, was shot in a senseless act of violence on the evening of Monday, September 1, 2008. Matt passed away on Friday, September 5, 2008. He was 22 years old.

In November 2007, Matt was elected to a 4-year term on the city council of Fairfield, CA. Just 21 years old when he was elected, Matt was the youngest councilman in Fairfield City history and one of the youngest elected officials in the State of California. With a deep sense of civic pride, Matt worked tirelessly to address Fairfield's crime rate and to develop effective gang prevention programs. In his short time on the council, Matt served with distinction and passion, earning the respect of both his colleagues on the council and the youth of his beloved city.

Mrs. FEINSTEIN. Long before being elected to the Fairfield City Council, Matt Garcia's ambition and dedication inspired his community to be better and to do better. Since the 6th grade, friends remember Matt telling them that one day he would become the mayor of his hometown of Fairfield. Matt attended Armijo High School, where he served as vice president of his senior class and was selected as both prom king and homecoming king.

Matt Garcia was a driven young leader who cared for his community deeply, and will be remembered by friends and colleagues as honest, passionate, and full of life. Matt served Fairfield with enthusiasm and a commitment to creating a better world. His dedication to his goals and dreams of improving his community will live on in those whose lives he touched.

Mrs. BOXER. Matt Garcia is survived by his grandmother, parents, siblings, and extended family members. Senator FEINSTEIN and I will always be grateful for Matt's example of passionate public service. Our hearts go out to Matt's family, friends, and colleagues who struggle with this incomprehensible loss.●

A TRIBUTE TO CAPTAIN ED W. FREEMAN

● Mr. CRAPO. Mr. President, on August 20, America lost one of her bravest heroes, and I am honored to say he was an Idahoan. Ed "Too Tall" W. Freeman, U.S. Army, retired, was awarded the Congressional Medal of Honor for actions undertaken during the battle of Ia Drang in Vietnam in November, 1965. Recounted in the book by Joseph Galloway, "We Were Soldiers Once . . . And Young," Ed's bravery became leg-

end. American forces were heavily engaged with North Vietnamese soldiers and the medical evacuation helicopters refused to fly into the battle zone to retrieve soldiers—it was deemed too dangerous. The infantry commander asked for volunteers, and young Captain Freeman, followed by LTC Bruce Crandall, stepped forward and offered to fly, unarmed, to the battlefield to bring supplies and carry out the wounded. Ed flew 14 separate missions and his actions, literally under fire, saved life and limb of 30 soldiers—all in a landing zone that was within 100 to 200 meters of the defense perimeter set up to engage the North Vietnamese Army at close range. Many of us have been to the Vietnam Wall—that tragic list is dozens of names shorter for Ed's extraordinary valor. Imagine the children and grandchildren that are here today because he saved the life of their father or grandfather. Incidentally, Ed himself had two young boys—preschool and elementary school-aged at the time.

When he retired from the Army in 1966, Ed continued flying helicopters, this time for the U.S. Department of the Interior, conducting animal censuses, herding horses and fighting fires. In 2001, Ed was presented the Congressional Medal of Honor by President George W. Bush for his actions during the Battle of Ia Drang.

Ed was laid to rest in the Idaho State Veteran's Cemetery, a beautiful place that overlooks a vista bounded to the south by the Snake River Valley and distant mountains, to the east and west by a vast expanse of open sky, and behind to the north, by foothills rising to meet their less-weathered relatives. The wind blows with reassuring regularity, and it seems that in this western meeting place of land and sky, at once comfortingly familiar and awe-inspiring, it is indeed an appropriate place for Ed.

In a tribute written upon Ed's death, author, former war correspondent and friend Joseph Galloway said:

Too Tall Ed was 80 years old when he died in a hospital in Boise, Idaho, after long being ill with Parkinson's disease. He turned down a full dress hero's funeral in Arlington National Cemetery in favor of a hometown service and burial . . . close to the rivers he loved to fish and the mountains he flew through in his second career flying for the U.S. Forest Service . . . Now Too Tall Ed Freeman, a much larger than life-size hero . . . and a much better friend than we deserved, is gone, and we are left with too large a hole in our hearts and in our dwindling ranks.

When Ed spoke to a reporter in Idaho back in 2000, he recounted those 14 harrowing hours. He said, "That Huey helicopter was my tool, and I was trained to use it. It was capable of flying into that hell hole, and I was capable of making it do that." When asked if he was afraid he said he ate "franks and beans" and chain-smoked. "God knows how many I smoked. Till I had a blister on my tongue." When asked about why he volunteered for this dan-

gerous duty, he said: "You don't think, 'I'm going to go out and win the Medal of Honor.' You're going to win a body bag if you're not real lucky."

And, in a testament to Ed's humble nature, his comment on his heroism was simply: "I did think I possibly did a little more than was required of me. But again, I had a job to do."

It is a tremendous honor for me to pay tribute to Ed W. Freeman, and my condolences go to his wife Barbara, his sons, and their families at this difficult time.●

REMEMBERING BILL GWATNEY

● Mr. PRYOR. Mr. President, it is with great sadness I rise to honor a great American, a great Arkansan and my friend. Bill Gwatney, a valiant public servant, was taken from us on August 13, 2008.

Bill was my friend for many years. This included his days as an elected official in Arkansas where he served as a State senator for 10 years. He was committed to improving the State of Arkansas by taking the lead on legislative redistricting, reforming ethics rules, and encouraging economic development throughout the State. While serving in the State senate he fought against insurance companies to pass the Any Willing Provider legislation. This allowed patients more flexibility in choosing their doctors. He inspired other great leaders to lift the State and the country into a prosperous future. He worked tirelessly every day to make Arkansas a better place for his children and for children from the Delta to the Ozarks.

He became chair of our State party in 2007 and was a leader in getting the party to where it is today. His work ethic and ability to bring people together were unmatched. His personality was contagious, likable, and he was an all around wonderful person. In the days following his death, he was praised on both sides of the aisle. Bill was taken from us too soon.

I echo a comment by Arkansas Governor Mike Beebe who said: "Arkansas has lost a great son, and I have lost a great friend." These words ring true to any Arkansan who had the privilege of knowing him. He believed strongly in integrity and good leadership within the State of Arkansas. His death put in perspective what he believed, that public service is about people, and with his passing Arkansas has lost one of its finest.

Bill leaves behind a wife Rebecca and children, Christian and Chase, along with two step-children, Zachary and Emily.

I ask my colleagues to join with me in paying tribute to the life of a great family man, business leader, and public servant, Mr. Bill Gwatney.●

COMMENDING THE CANYON LAKE LITTLE LEAGUE BASEBALL TEAM

● Mr. JOHNSON. Mr. President, today I wish to recognize and congratulate
