able to be considered because of the procedural situation on the floor in September. The managers of the bill, Senator Levin and Senator Warner, stated that they had prepared a set of over 90 cleared amendments in a managers' package for the Army to carry out a pilot program using the private sector for the acquisition or construction of military unaccompanied housing for all ranks in an arrangement similar to what we have carried successfully with the privatization of family housing and senior unaccompanied soldiers. While I was very disappointed that the amendment could not be adopted because of the procedural situation, I want to thank Senator Levin and the other members of the committee for their willingness to include the public-private sector partnership approach for ensuring improved housing for all ranks of our single soldiers.

The Army already has five similar privatization projects for our single or senior unaccompanied enlisted personnel or officers. The business case for these projects shows that they are not only less costly than traditional government-funded construction and sustainment, but more importantly, the living conditions are vastly improved as soldiers have access to larger, modern apartments on post. The living conditions for these soldiers and officers will be enhanced to the same level as that of military members with families.

Given our Nation's current financial crisis, defense spending is likely to come under great stress over the next few years. Historically the Army and the other services have had great challenges in maintaining even minimum levels of housing sustainment and revitalization funding to keep our barracks fit for our soldiers. I can speak from personal experience about the serious deficiencies in the barracks at Fort Polk in Leesville. Despite the recent increase in Army funding for barracks revitalization there, I worry that needed long-term funding will be difficult to secure under the traditional model to prevent deterioration in the longer run. Ensuring the quality of life, modern housing, is critical to the retention of our enlisted soldiers, and critical to keeping our All Volunteer force strong.

Partnerships between the Army and the private sector for this segment of our military housing will be needed as a fundamental long-term solution to providing the best housing for our soldiers.

Despite the procedural setback in September, I appreciate the support we received for our amendment and am committed to continue working with the Armed Services Committee to advance this issue in 2009. We are also hopeful that the Army will use its existing authorities to begin extending the successful privatization model to construction and revitalization of barracks for all of our soldiers.

### ADDITIONAL STATEMENTS

**TRIBUTE TO DR. XIAOMING TIAN**

- **Mr. DOMENICI.** Mr. President, today I pay tribute to the outstanding achievements of Dr. Xiaoming Tian. For many years, Dr. Tian has been recognized as a leading practitioner of Chinese medicine, acupuncture and alternative medicine in the United States. I am very pleased that Dr. Tian's recognition was extended worldwide when he received the prestigious World Federation of Chinese Medicine Societies, WFCCMS, world award for distinguished physician earlier this year.

This award is the highest honor the WFCCMS can present, and it is only presented to a handful of physicians each year. This year, only 10 clinical physicians worldwide were honored and Dr. Tian received the distinction of the only recipient in the United States.

The World Federation of Chinese Medicine Societies was founded in 2003 and is headquartered in Beijing. Currently, the federation is chaired by Dr. Shi Jing, Vice-Minister of Health and Director of the State Administration of Traditional Chinese Medicine of the People's Republic of China. The WFCCMS includes 174 Chinese medical associations from 55 countries and is the highest global organization of Chinese medicine.

In honoring Dr. Tian, the WFCCMS reports, “Dr. Xiaoming Tian’s great contributions include many different areas such as clinical medicine, research, new Chinese herbal medicine development, education and health care policy. Dr. Tian is highly respected by medical professionals and patients in the United States.”

As the WFCCMS noted, in May of 1991 Dr. Tian established the first Chinese acupuncture clinic at the National Institute of Health, NIH, Clinical Center. This clinic represented the first time that the NIH had formally recognized acupuncture as a routine treatment and had developed a procedure code for it. Dr. Tian became the first clinical consultant on acupuncture within NIH's medical database. It is only less costly than traditional government-funded construction and revitalization projects underway for the acquisition or construction of military unaccompanied housing. The Army already has five similar privatization projects for our single or senior unaccompanied enlisted personnel or officers. The business case for these projects shows that they are not only less costly than traditional government-funded construction and sustainment, but more importantly, the living conditions are vastly improved as soldiers have access to larger, modern apartments on post. The living conditions for these soldiers and officers will be enhanced to the same level as that of military members with families.

**TRIBUTE TO DR. JAMES TEGNELIA**

- **Mr. DOMENICI.** Mr. President, today I wish to pay tribute to Dr. James Tegnelia who will be retiring from his position as the Director of the Defense Threat Reduction Agency, DTRA, in February 2009 and returning to New Mexico.

The DTRA is charged with safeguarding the United States and its allies from the threat of weapons of mass destruction, WMD, and consists of a 2,000 member team. Dr. Tegnelia has been the Director of this prestigious Agency since February of 2005 and has been an integral part of its many accomplishments.

Prior to his appointment as the Director of the DTRA, Dr. Tegnelia was the vice president, Department of Defense Programs, at Sandia National Laboratory in Albuquerque, NM, starting in 1998. He has been involved in defense-related fields since 1971 and has a long and distinguished career in championing innovative causes. From increasing the DTRA’s efforts in science and technology investment in nuclear detection, nuclear forensics and advanced energetic capabilities, to working on the global stage in the international effort to counter WMD—in part through the establishment of regional and global nonproliferation partnerships—Dr. Tegnelia has been a true leader in protecting our great Nation.

In addition to his leadership in securing our country and its allies from the threat of WMD, Dr. Tegnelia has worked to strengthen the capabilities of the Congress and the Agency to bring the Agency into a combat support-focused, technically agile and operationally relevant organization.
