LEGISLATION TO INTERCHANGE THE ADMINISTRATIVE JURISDICTION OF CERTAIN FEDERAL LANDS BETWEEN THE FOREST SERVICE AND BUREAU OF LAND MANAGEMENT, AND FOR OTHER PURPOSES

HON. WALLY HERGER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 26, 2009

Mr. HERGER. Madam Speaker, today I introduce a bill to facilitate a land exchange between the Bureau of Land Management and the Forest Service to allow for consolidation and more streamlined administration of the Chappie-Shasta Off-Highway Vehicle Area in the northern California district I represent. The Chappie-Shasta Off-Highway Vehicle Area is managed by the Bureau of Land Management but also encompasses a parcel of land under the jurisdiction of the Forest Service.

This legislation is a simple and straightforward land exchange that would allow the Bureau of Land Management to consolidate the management of the OHV area to achieve more efficient management and a better experience for the area's users. In addition to consolidating the OHV area this bill will also place an equal amount of scattered wilderness parcels and other Bureau of Land Management lands under the jurisdiction of the Forest Service, allowing for improved management of those lands as well. Passage of this non-controversial legislation will result in a win-win for the taxpayers and the Federal Government.

I look forward to working with my colleagues in order to move this legislation through Congress.

IN HONOR OF MARY GREEN

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 26, 2009

Mr. FARR. Madam Speaker, I rise today to honor the memory of a great woman and model citizen. Mary Reese Green, of Monterey, California, lived her life to make the world a better place. She was many things: civil rights activist, mother, wife, political campaigner, and friend. On January 9, 2009, Mary passed away at the age of 81. Mary was a fearless fighter during the civil rights movement and an active advocate for art throughout her life. She held a passion for politics and played instrumental roles in numerous political campaigns over the years. She was a real spark plug whose personal motto was "Yes, we can!"

Mary was born and raised in Trenton, New Jersey, where she developed a lifelong love of art. She went on to study at the Pennsylvania Academy of Fine Arts in Philadelphia and to teach art at George School in Bucks County, Pennsylvania. There she met her husband, Ross Green, a fellow teacher. Her first brush with politics came when she and Ross moved

to Berkeley. Mary campaigned for the right of students to post political flyers on university bulletin boards. When she and her husband moved to Atlanta, she fought for civil rights alongside her friends, Dr. Martin Luther King, Jr., Coretta Scott King, and Vernon Jordan. A notable story from Mary's life centers on a public meeting held in Atlanta to discuss voters' rights after the enactment of the 1964 Civil Rights Act. Despite death threats and the hostile presence of the Ku Klux Klan at the meeting, Mary bravely spoke as scheduled, while many others backed out and retreated.

Mary continued to play an active role in politics throughout her life. She served as the central California chair for Robert Kennedy's presidential campaign, the northern California co-chair for George McGovern in 1972, and worked on the presidential campaigns of Gary Hart in 1984 and 1988. Back in Monterey County, she promoted the arts. She helped raise funds to revitalize the Monterey Peninsula Museum of Art's La Mirada wing and took the lead in founding the Pacific Street branch's sculpture garden. Mary also helped produce two award-winning documentary films: *Time Captured in Paintings: The Monterey Legacy* and *The Roots of California Photography: The Monterey Legacy*.

Madam Speaker, I know that I speak for the whole House in extending our deepest sympathies and condolences to Mary Green's daughter, Alice Green, son Mitchell Green, her three grandchildren, and many friends.

IN REMEMBRANCE OF SENIOR CORPORAL NORMAN SMITH, DALLAS POLICE DEPARTMENT, GANG UNIT

HON. PETE SESSIONS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 26, 2009

Mr. SESSIONS. Madam Speaker, I rise today in memory of Senior Corporal Norman Smith of the Dallas Police Department. He was shot and killed on January 6, 2009 while trying to serve a felony warrant in South Dallas.

Senior Corporal Smith had over seventeen years of service with the Dallas Police Department; fourteen of those years with the elite Gang Unit, facing some of the toughest criminals in Dallas. Although he had many years of service, Norm approached the job with the fire and drive of a rookie, never giving less than one hundred and ten percent. He was deeply committed to fighting crime and his passion and dedication were evident to all who knew him. His fair treatment made him one of the most respected officers in the City of Dallas as well as among former gang members. Underneath his tough demeanor, he also offered hope to those seeking a new life outside of gangs. Different parts of the city affectionately referred to him as the General, Soprano, Big Swede, Normando, and the White Russian. Norm is considered irreplaceable by his fellow officers in the Gang Unit. He was by definition a true warrior.

Prior to his tenure with the Dallas Police Department, Norm proudly served his country as a U.S. Marine and worked with Kaufman and Dallas Counties Sheriffs Departments. He is survived by his wife of eighteen and half

years, Lieutenant Regina Smith; a daughter, Clenique L. Williams; and a son, Karlis Smith. Norm loved Regina deeply and treated her like a queen. He was her best friend and did everything with her. It was evident to all that the love they shared was special.

The Dallas Police Department and the Dallas community have suffered the loss of a remarkable officer, dedicated crime fighter, and an outstanding American that committed his life to public service. May the peace of God be with those he loved and sustain them through this hour of sorrow.

TWO ST. PETERSBURG, FLORIDA GEOLOGISTS HONORED WITH PRESTIGIOUS NATIONAL AWARDS

HON. C.W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 26, 2009

Mr. YOUNG of Florida. Madam Speaker, it is with great pride that in St. Petersburg, Florida, I represent one of the world's foremost centers of marine and geological research. We have created a thriving hub of academic, government and private sector facilities whose professional staffs work together on a daily basis to study and help to solve some of our state's, our nation's and our world's most challenging environmental, marine and geological problems.

The University of South Florida College of Marine Science on the University's St. Petersburg campus has been the linchpin of our efforts to bring together the best and brightest scientific minds. With the addition of the U.S. Geological Survey 10 years ago and the National Marine Fisheries Service, the Florida Fish and Wildlife Research Institute and the Florida Institute of Oceanography, and in the private sector SRI International, we have at Bayboro Harbor a thriving research community.

Recently two of those researchers have been honored for their work in the field of geology. The first is Dr. Albert C. Hine, the Associate Dean of the USF College of Marine Science, who received the Francis P. Shepard Medal for Sedimentary Geology at the annual Society for Sedimentary Geology meeting in Denver, Colorado. The award is given to those who have a sustained record of outstanding research contributions in marine geology.

In addition to being recognized for his prolific research and his 140 peer-reviewed publications in the field of coastline studies, carbonate platforms and coral reefs using an array of geophysical tools, Dr. Hine was also recognized for his commitment to teaching. He is a major advisor to 11 Ph.D. and 22 M.S. candidates.

He is a perfect example of the type of collaborative research that goes on every day at USF's Bayboro campus, where he has worked and taught since 1979. That includes his work with the U.S. Geological Survey where the second award recipient Dr. Eugene A. Shinn worked for more than 31 years. Dr. Shinn was recently awarded the Society for Sedimentary Geology's William H. Twenhofel Medal for his outstanding contributions in the areas of paleontology, sedimentology and stratigraphy.

Now retired from USGS, Dr. Hine is a Courtesy Professor at the USF College of Marine
