

overall structure, but these changes are not intended to have any substantive effect.

The bill, along with a detailed section-by-section explanation of the bill, can be found on the Law Revision Counsel website at <http://uscod.house.gov/cod>. Interested parties are invited to submit comments to Tim Trushel, Assistant Counsel, Office of the Law Revision Counsel, U.S. House of Representatives, H2-304 Ford House Office Building, Washington, D.C., 20515-6711, (202) 226-2411, as well as to the Committee.

HOLOCAUST REMEMBRANCE DAY

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 21, 2009

Mrs. MALONEY. Madam Speaker, yesterday evening marked the beginning of Yom Hashoah, Holocaust Remembrance Day, the day set aside to remember the six-million Jewish victims of the Holocaust. In Israel, it is a national memorial day.

The atrocities of the Holocaust are horrific and unforgivable. Those who perished live on in the memories of those who survived. Today, I would like to recognize one such individual, Fanya Gottesfeld Heller, a survivor and a remarkable woman, who lives in my district and who I am privileged to represent.

Fanya's presence here represents the victory of life over death, of light over darkness, and of goodness over evil. She is a member of the last generation of Holocaust survivors. With the survivor population growing older, with most in their 70s, 80s and beyond, there is an urgent need to record the events of this most tragic period in human history.

Fanya grew up in a tiny village on the Polish-Ukrainian border called Skala. Prior to the war, the Jews, Poles and Ukrainians lived in different worlds with very little interaction. The Nazis were able to take advantage of this lack of communication and centuries' old hatred to turn average citizens—shopkeepers, doctors, lawyers and teachers—into willing participants in the war against the Jews. They brainwashed the public with a media campaign of lies, at a time when there were no jobs, no money and no food. People wanted someone to blame and Hitler took advantage of this anger and frustration and convinced an entire nation to wage a genocidal war against the Jews.

A Polish peasant farmer named Sidor, one of the poorest in the village of Skala, risked his life and that of his wife and young daughter to save Fanya's family. He dug a cave for them under his chicken coop, where Fanya, along with her parents and little brother, hid and remained in a crouching position for nearly two and a half years. They had little air and no light and subsisted on whatever meager rations Sidor was able to share with them. Lice and rats were their constant companions.

Jan, a Ukrainian shoemaker who became a militiaman during the war, was the only other person to help them. Jan had taken a particular romantic interest in Fanya and, because of his love for her, throughout this entire period, he risked his life—hiding them at times in the attic of his family's barn—to save their lives. He brought them food and bits of news from the warfront whenever possible.

Because of the help he gave Fanya's family in hiding, Jan was teased and called a "Jewish Uncle." His own mother turned him in to the Nazis, who in turn beat him mercilessly in order to try to find the Gottesfelds.

Fanya's contributions to the community are multifold. She has raised a wonderful family, three children, eight grandchildren and seven great-grandchildren. In 1998, the New York State Board of Regents awarded her the Louis E. Yavner Citizen Award in recognition of her outstanding contributions to teaching about the Holocaust and other assaults on humanity. Fanya holds a B.A. and an M.A. in psychology from the New School for Social Research and honorary degrees from Yeshiva University and Bar-Ilan University. She serves on the boards of numerous institutions and charitable organizations, many of which focus on Jewish education and the empowerment of women.

She is the author of *Love in a World of Sorrow*, a candid memoir of her experiences during the Holocaust and a public record of one woman's witness to the Holocaust. After publication, Fanya also began to teach. Speaking to young people, mostly not Jewish, Fanya puts a face to the suffering they had read about in their textbooks, providing a message of hope and an emotional connection that can only come from hearing a first person account. There is also a study guide published alongside Fanya's book to help educators present the issue of genocide.

Fanya is committed to helping others understand the power of goodness in a world of evil, the power of just one person, of each individual—that individuals can and must make the right choices instead of remaining bystanders in the face of evil. Fanya wants to insure that these and future generations better understand the tragedy of the past and work to make sure that, in each lifetime, fairness, justice and love will win out over indifference, evil and hatred.

HONORING JIM SAXTON FOR HIS MANY YEARS OF SERVICE TO THE STATE OF NEW JERSEY

HON. ROBERT E. ANDREWS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 21, 2009

Mr. ANDREWS. Madam Speaker, I rise today to honor Jim Saxton for his service to the United States House of Representatives. I was pleased to have the opportunity to previously honor Mr. Saxton at a dinner in Cherry Hill on March 15, 2009.

Since his time as an elementary school teacher and a small business owner, Representative Saxton has worked tirelessly to help the people of New Jersey. He served in the New Jersey General Assembly and the New Jersey Senate. He served the State of New Jersey in the House of Representatives for more than twenty-three years. He became the Ranking Member of the Armed Services and Resources Committee. He has been instrumental in efforts to keep military bases in New Jersey, to stop beach erosion, and to support New Jersey hospitals.

Madam Speaker, Jim Saxton has a proud record of service to the State of New Jersey and I am proud to call him my friend. I congratulate Mr. Saxton for all his accomplish-

ments and wish him the best of luck in all of his future endeavors.

EARMARK DECLARATION

HON. TODD RUSSELL PLATTS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 21, 2009

Mr. PLATTS. Madam Speaker, I rise to announce the projects that I have requested for my Congressional District within the Fiscal Year 2010 Appropriations bills. My office is regularly contacted by non-profit and other organizations within the 19th Congressional District, as well as state and local government entities, to request federal funding as part of the eleven annual appropriations bills. This year sixty-five funding requests were submitted to my office and were reviewed by a ten member advisory board comprised of community leaders throughout the 19th District. The breakdown of members from the three counties was done on an approximate per capita basis.

Based on the recommendations of the board, the following are domestic projects which will be forwarded to the House Appropriations Committee for consideration. If more than five requests were received for a particular appropriations bill, rankings by the board were used to reduce the number of requests to five or—in the event of a tie—six.

All of the projects listed below will compete against all of the other projects submitted by Members of Congress for consideration by the Appropriations Committee. Their appearance on this list does not guarantee that they will receive funding, nor that any funding they receive will be in the amount requested.

Labor-Health-Education Appropriations Bill: *Goodling Advanced Skills Center*: The William F. Goodling Regional Advanced Skills Learning Center is a non-profit 501(c)(3) training center providing industry-led training to incumbent workers, dislocated workers, and new entrants into the workforce. Training is also provided to high school seniors. The Advanced Skills Learning Center would use this funding to create the Goodling Innovation and New Technology (GIANT) Center. The GIANT Center will help private industry leverage their idle intellectual properties by matching them with existing companies and start-up businesses in need of those technologies, thereby serving as the link between technology excess and technology success. Additionally, funding would be used for startup costs of this initiative, allowing the GIANT Center to develop a resource network in the region, and assist with administrative costs, staffing needs, and marketing initiatives. This is a good use of taxpayer funds because, due to the increasingly competitive nature of the global economy, firms must innovate in order to survive by developing new technologies, products, and processes. The GIANT Center would play a critical role in working with companies, allowing them to remain competitive. (\$300,000)

William F. Goodling Regional Advanced Skills Center, 2101 Pennsylvania Avenue, York, PA 17404.

Hanover Hospital: Hanover Hospital would use this funding to convert all paper records at the hospital to an electronic medical record system. This is a good use of taxpayer dollars because the use of such records is proven to

improve clinical outcomes and enables health systems to better define, measure, monitor, and reward quality care. Electronic medical records create efficiencies for patients, physicians, and the hospital. (\$1 million)

Hanover Hospital, 300 Highland Avenue, Hanover, PA 17331.

Holy Spirit Hospital: Holy Spirit Hospital would use this funding to provide improved outpatient mental health services for older adults within their Seniors' Behavioral Health Services Outreach Program. Funding would be used to partially support the salary costs of trained psychotherapists providing education and support services and registered nurses providing medical support in lieu of the psychiatrist. In addition, funding would be used to produce educational materials specific to mental health issues concerning older adults. This is a good use of taxpayer funds because current barriers to mental health treatment remain significant, and the mental health needs of older adults in the Cumberland, York and Adams County areas remain largely unmet. (\$100,000)

Holy Spirit Hospital, 503 North 21st Street, Camp Hill, PA 17011

Memorial Hospital: Memorial Hospital would use this funding to purchase a new Digital Mammography Unit for the Memorial Hospital Breast Center. The unit would allow for high quality digital breast images to provide earlier diagnosis and treatment of breast cancer. This is a good use of taxpayer funds because breast cancer continues to be on the rise in York County and across the nation. Early detection through mammography is key to early treatment and survival of women diagnosed. (\$100,000)

Memorial Hospital, 325 Belmont Street, York, PA 17403.

WellSpan Health: WellSpan Health would use this funding to purchase a remote monitoring system for the York Hospital Emergency Transitional Care Unit, allowing physicians to monitor patients in a distant location without physically leaving the main Emergency Department. This is a good use of taxpayer funds because the remote monitoring system would create remote access using video/audio conferencing technology so that a physician could monitor multiple patients at one time. In addition, while caring for a patient in the main emergency department, the physician could answer questions and communicate with patients and families who are waiting in the Emergency Transitional Care Unit, eliminating the constant disruption of walking back and forth. (\$99,500)

WellSpan Health, 912 South George Street, York, PA 17403.

York College of Pennsylvania: York College of Pennsylvania is a private, four-year institution of higher education serving over 5,600 students. This is a good use of taxpayer funds because York College would use this funding to expand their existing Nursing Department. Specifically, funds would be used to refurbish laboratories and purchase equipment related to the project. This is a good use of taxpayer funds because York College operates one of the largest bachelorette nursing programs in the region. York College's ability to continue providing a pool of highly educated and trained nursing graduates helps fill the critical demand for nurses, both locally and nationally. (\$500,000)

York College of Pennsylvania, 441 Country Club Road, York, PA 17403.

Homeland Security Appropriations Bill:

Carroll Valley Borough: Carroll Valley Borough of Pennsylvania is located in Adams County and is a self-governing incorporated borough. Carroll Valley would use this funding to create a Southwest Adams Regional Fleet Fueling Station for First Responders. This above-ground fuel tank system would be accessible to regional first responders on a 24 hour basis to refuel their vehicles. This is a good use of taxpayer funds because it would assist the Fairfield Regional Emergency Management Agency (FREMA) in providing resources to first responders during a declared disaster/emergency. (\$80,700)

Carroll Valley Borough, 5685 Fairfield Road, Fairfield, PA 17320.

Cumberland County Government: Cumberland County would use this funding to construct a new facility for the Department of Public Safety, the Office of Emergency Preparedness (including the Emergency Operations Center), and the 911 Public Safety Answering Point. This is a good use of taxpayer funds because the County is a critical regional player in emergency planning and response and this facility would assist Cumberland County in executing these responsibilities. (\$1 million)

Cumberland County Government, 1 Court-house Square, Room 200, Carlisle, PA 17013.

Agriculture Appropriations Bill:

NutriCore Northeast: NutriCore Northeast, a not-for-profit alliance of corporations, industry organizations, research universities, and municipal communities, was established in 2003 as the National Center of Excellence in Food and Nutrition Research. This alliance funds nutrition research programs and coordinates services to both industry and government agencies to maximize their investments in food or nutrition research and development. NutriCore would use these funds for research projects as well as staffing and overhead costs. This is a good use of taxpayer funds because food manufacturing and food safety are critical components in our national economy and society. NutriCore NorthEast is directly supporting the development of healthier foods, and providing technological and scientific resources to farmers and food processors that were previously unavailable to them. (\$500,000)

NutriCore NorthEast, 144 Roosevelt Avenue, York, PA 17401.

Penn State University—Improved Dairy Management Practices: Penn State is a public university. Some of the most important challenges facing the dairy industry today lie in the areas of nutrient and emission management. Penn State faculty will use this funding to research nutrient management through cow nutrition modification and the impacts of emission from dairy operations. In addition, funding will be used to develop new technologies to address problems associated with dairy production in Pennsylvania in an effort to improve water quality, lower impacts of air emissions, and use energy more efficiently. This is a good use of taxpayer funds because the sale of dairy products accounts for nearly half the farm gate value of Pennsylvania's agricultural income. The profitability of Pennsylvania dairy farms is inextricably tied to management decisions that are being made by farmers. (\$550,000)

Penn State University, 117 Old Main, University Park, PA 16802.

Penn State University—Integrated Bioenergy Farm: Penn State would use this fund-

ing to create an Integrated Bioenergy Farm. Bioenergy crops would be integrated into food production cropping systems relevant to the Northeast. Initially six systems would be implemented at field-scale to demonstrate the opportunities and challenges associated with reducing fossil energy dependence and greenhouse gas production of farming systems. This is a good use of taxpayer funds because Bioenergy crops harvested from these fields would be converted into biodiesel at Penn State's student run biodiesel pilot plant, ethanol (including cellulosic) at a nearby Bioenergy International pilot plant, or pelletized at the Penn State Energy Institute. (\$1 million)

Penn State University, 117 Old Main, University Park, PA 16802.

Penn State University—Milk Safety Program: Penn State would use this funding to identify issues in milk and dairy products safety and seek interventions that can be transferred to producers, processors, distributors, and retailers to continue to improve consumer confidence in the quality of their food supply. This is a good use of taxpayer funds because dairy is the single largest economic component of the Pennsylvania agricultural portfolio. (\$800,000)

PENN STATE UNIVERSITY, 117 OLD MAIN, UNIVERSITY PARK, 16802.

Penn State University—Sustainable Agriculture and Natural Resources: Penn State University would use this funding to create a new collaborative research and education program that will help diverse farm operations better adopt more sustainable farming practices. Investment in this special grant would increase field research and demonstration to increase the exposure of farm advisors and farmers to sustainable cropping system practices. Practices to be further investigated include: crop species and cultivars for inclusion in crop rotations that improve the performance of sustainable and organic cropping systems, especially for the Northeast; fine-tuning of management guidelines for mechanical control of cover crops and weeds in conservation and no-tillage systems to reduce or eliminate herbicides; factors that better promote conservation of biological control organisms and beneficial soil microorganisms for weed seed predation and management of other pests; and practices that increase soil organic matter. This is a good use of taxpayer funds because the demand for increased farmer understanding and adoption of sustainable farming practices continues to be a high priority in the agricultural community. (\$400,000)

Penn State University, 117 Old Main, University Park, PA 16802.

Commerce, Justice, Science Appropriations Bill:

Adams County Department of Emergency Services: Adams County Department of Emergency Services is the Public Safety Answering Point for Adams County. The entity provides Public Safety Communications to all Emergency Response Agencies within Adams County. Adams County would use this funding to develop a new, standards based wireless communication system that will operate in the 700 MHz and 800 MHz bands. This is a good use of taxpayer funds because the system would be capable of supporting all public safety operations in the County and would allow for increased interoperability. (\$200,000)

Adams County Department of Emergency Services, 230 Greenamyre Lane, Gettysburg, PA 17321.

Carlisle Borough: Carlisle Borough is a municipal government located in Cumberland County. Carlisle Borough would use this funding to acquire between 25 and 50 surveillance cameras to be installed in public areas in downtown Carlisle. The cameras would be operated remotely at the Carlisle Police Department. Cameras would be of a mobile, wireless variety so that they can be relocated if necessary. This is a good use of taxpayer funds because Carlisle has experienced an increase in crime, specifically robberies, which pose a public safety threat. The project is expected to deter crime and assist in the apprehension of suspects. (\$200,000)

Carlisle Borough, 53 West South Street, Carlisle, PA 17013.

Cumberland County Government: Cumberland County would use this funding to relocate and replace communications infrastructure that is essential to the operation of the Department of Public Safety, the Office of Emergency Preparedness (including the Emergency Operations Center), and the 911 Public Safety Answering Point. This is a good use of taxpayer funds because the County is a critical regional player in emergency planning and response and this facility would assist Cumberland County in executing these responsibilities. (\$200,000)

Cumberland County Government, 1 Courthouse Square, Room 200, Carlisle, PA 17013.

Survivors, Inc: Survivors, Inc. is a 501(c)(3) not-for-profit organization which supports individuals who experience domestic violence or sexual assault. Survivors, Inc. provides a 24-hour crisis counseling hotline, shelter services, transitional housing, supportive counseling, support groups, and legal advocacy for individuals affected by domestic violence or sexual assault. Survivors, Inc. would use this funding to partially fund staff salaries, on-call stipends, and expenses for hotline provision. This is a good use of taxpayer funds because safety is one of the most essential needs to both individuals and society. When an individual is not safe in their own home they must have resources available to them to meet their needs. (\$25,000)

Survivors, Inc., 233 West High Street, Gettysburg, PA 17325.

York County Children's Advocacy Center: The York County Children's Advocacy Center is a 501(c)(3) not-for-profit organization that works to reduce the trauma of child abuse investigations, foster professional collaboration and cooperation, and promote education and advocacy regarding the prevention of child abuse within the community. The York County Children's Advocacy Center would use this funding to establish the Sexual Assault Forensic Examiners (SAFE) Team. SAFE Team members are registered nurses who have advanced education and clinical preparation in forensic examination of sexual assault victims. The SAFE Team would provide compassionate care to victims of child abuse by simultaneously gathering evidence of a crime. Funds would be used to purchase medical supplies and cover exam costs. This is a good use of taxpayer funds because York County ranks as the third highest county in our Commonwealth for substantiated cases of child abuse. Currently, less than 10% of the children involved in substantiated cases receive a forensic medical exam. (\$60,000)

York County Children's Advocacy Center, 28 South Queen Street, York, PA 17403.

Interior, Environment Appropriations Bill:

Adams County Historical Society: Adams County Historical Society is a private, non-profit organization that identifies, preserves, and tells the stories of people, organizations, businesses, and events that have shaped Adams County, Pennsylvania. Adams County Historical Society would use this funding to restore Schmucker Hall, a building that was constructed in 1832 for use as a campus building for the Lutheran Theological Seminary at Gettysburg. After its restoration, Schmucker Hall will be used as a museum. This is a good use of taxpayer funds because Schmucker Hall is nationally significant to United States history, and elements of the building are in poor condition. Its national significance has been recognized by its listing on the National Register of Historic Places. (\$400,000)

Adams County Historical Society, 111 Seminary Ridge, Gettysburg, PA 17325.

Carlisle Borough: Carlisle Borough is a municipal government located in Cumberland County. Carlisle Borough would use this funding to upgrade its wastewater treatment plant facility to achieve the point source effluent nutrient cap loads targeted by the Department of Environmental Protection's Chesapeake Bay Tributary Strategy. This is a good use of taxpayer funds because this project is mandated by the Pennsylvania Department of Environmental Protection and the United States Environmental Protection Agency to benefit the Chesapeake Bay. (\$160,000)

Carlisle Borough, 53 West South Street, Carlisle, PA 17013.

Gettysburg National Military Park: Gettysburg National Military Park is a unit of the National Park Service that preserves and protects the resources associated with the Battle of Gettysburg and the Soldiers' National Cemetery. Gettysburg National Military Park would use funding to develop plans and implement activities which enhance and preserve the resources of the historic district. This is a good use of taxpayer funds because technical assistance funding for the Gettysburg Battlefield Historic District helps accomplish vital historic preservation goals of the National Park Service and the Gettysburg community. (\$100,000)

Gettysburg National Military Park, 1195 Baltimore Pike, Suite 100, Gettysburg, PA 17325.

York City Sewer Authority: The York City Sewer Authority is a public, municipal authority providing wastewater services for residential, commercial, and industrial users in an eight-municipality service area. The York City Sewer Authority would use this funding to construct a new headworks facility, which includes the replacement of the building's heating and ventilation system and replacement of the activated carbon bed in the building's odor control system. This is a good use of taxpayer funds because the combined improvements provide the most cost-effective solution for updating infrastructure for the authority's residents and businesses. (\$160,000)

York City Sewer Authority, 1701 Blackbridge Road, York, PA 17402.

York County Government: York County Government would use this funding to create a digital Countrywide Geographic Information Systems (GIS) database that will contain all of the major water system features in York Coun-

ty, along with their location and attributes. This information would be standardized throughout the county and could be shared with all participating water companies and all levels of government. This is a good use of taxpayer funds because the water infrastructure within York County continues to rapidly expand to meet the requirements of high development pressure, while the need to maintain its aging components must be fulfilled. It is critical to know where the water infrastructure is located and attributes, such as age, size, and capacity of each component. (\$125,000)

York County Government, 28 East Market Street, York, PA 17401.

Energy, Water Appropriations Bill:

Renewable Energy (Photovoltaic) Project: If this project is funded, PPG Industries would be expected to compete for the contract. PPG Industries is a diversified manager that supplies paints, coatings, chemicals, optical products, specialty materials, glass, and fiber glass. PPG is a publically traded company located in Carlisle, Pennsylvania. PPG would use this funding to develop advanced, in-line process technologies to fabricate thin-film solar cells. This is a good use of taxpayer funds because thin-film technologies could be directly integrated into current manufacturing glass processes in order to reduce the cost per watt while optimizing the photovoltaic supply chain to accelerate the introduction of alternative energy sources in the market. (\$1 million)

PPG Industries, 400 Park Drive, Carlisle, PA 17301.

Transportation, Housing, and Urban Development Appropriations Bill:

Carlisle Borough: Carlisle Borough is a municipal government located in Cumberland County. The Borough of Carlisle would use this funding to carry out the recommendations of the Downtown Traffic Safety and Mobility Project, a comprehensive traffic study of downtown Carlisle. Funding would be used to: reduce High and Hanover Streets from two lanes to one lane in each direction; add bicycle lanes to both sides of High and Hanover Streets; install camera-activated traffic signals; install "bump-out" curbs at all intersections; and implement a truck mitigation program to reduce truck traffic. This is a good use of taxpayer funds because it would improve vehicular and pedestrian safety, calm traffic, reduce air and noise pollution, encourage multi-modal transportation, and revitalize downtown Carlisle. (\$1 million)

Carlisle Borough, 53 West South Street, Carlisle, PA 17013.

Cumberland County Government: Cumberland County would use funding to engineer, design, and replace Craighead Bridge. Craighead Bridge is a 110 year-old steel thru truss bridge that carries nearly 2000 vehicles per day across the Yellow Breeches Creek. This is a good use of taxpayer funds because Craighead Bridge has been named one of the worst bridges in Pennsylvania and is functionally obsolete, structurally deficient, and has an estimated remaining life span of four years. (\$1 million)

Cumberland County Government, 1 Courthouse Square, Room 200, Carlisle, PA 17013.

Cumberland County Government: Cumberland County would use funding to engineer, design, and replace Orr's Bridge. Orr's Bridge is a 52-year-old pre-stressed non-composite adjacent box beam structure that carries over 12,000 vehicles per day across the Conodoguinet Creek. This is a good use of taxpayer funds because the current design has been proven to accelerate deterioration of the bridge's structural system and in turn increases its susceptibility to sudden collapse. (\$1 million)

Cumberland County Government, 1 Courthouse Square, Room 200, Carlisle, PA 17013.

Rabbittransit: The York County Transportation Authority (Rabbittransit) is the public transportation provider for York County. Rabbittransit would use this funding to relocate its facility to a location that could house all 86 buses. The current location can only house 65 buses. Due to rapid growth over the past decade, Rabbittransit has been providing increasingly valuable service to the community. However, because of the growth, Rabbittransit is completely out of parking space and the bus facility has become overcrowded. This is a good use of taxpayer funds because the project would provide Rabbittransit with the ability to continue to meet the needs of the community. (\$1 million)

Rabbittransit, 1230 Roosevelt Avenue, York, PA 17404.

Springettsbury Township: Springettsbury Township is a local government located within York County, Pennsylvania. Springettsbury Township would use this funding to improve the intersection of Northern Way and East Market Street. Specifically, the funding would be used to add a westbound right turn lane to Northern Way. This is a good use of taxpayer funds because it would provide a safe access point to the Township's retail, entertainment, and industrial center, while strengthening and enhancing the commercial and industrial redevelopment in the area. (\$930,732)

Springettsbury Township, 1501 Mount Zion Road, York, PA 17402.

West Manheim Township Park and Recreation Board: West Manheim Township Park and Recreation Board is a non-profit organization dedicated to the planning for and funding of a 113 acre recreation park in West Manheim Township in Hanover, Pennsylvania. The Board would use this funding to outfit two regulation-sized baseball fields with backstops, bases, scoreboards, specialized infield dirt, field drainage systems, and fencing. The funding would also be used to purchase two sets of restroom facilities. This is a good use of taxpayer funds because the facilities in the park will provide a safe outlet for the activities of the local youth population. The West Manheim Recreation Park will be a premier destination for Southern Pennsylvania and Northern Maryland residents. (\$300,000)

West Manheim Township Park and Recreation Board, 15 Waterview Road, Hanover, PA 17331.

The board also approved forwarding the following defense projects to the House Appropriations Committee for consideration:

Defense Appropriations Bill:

5" Extended Range Insensitive Munition Projectile: This request would provide funding

to produce Extended Range Insensitive Munition (ERIM). ERIM projectile is a promising technology for providing extended range and accuracy improvement for the 5" Naval Gun system. This is a good use of taxpayer funds because extended range and accuracy will enable the Naval warfighter to confidently engage specific point targets in both rural and urban terrains. The munition is produced in part by the General Dynamics facility located in Red Lion, Pennsylvania. (\$4 million over the President's Budget)

General Dynamics, 200 East High Street, Red Lion, PA 17356.

EFSS Precision Extended Range Munition: The EFSS is a close fire support, all-weather, quick responsive indirect fire system supporting Marine Expeditionary Units. The system is produced in part by the General Dynamics facility located in Red Lion, Pennsylvania. This is a good use of taxpayer funds because it would provide Research, Development, Test & Evaluation dollars to greatly expand the munition range for the EFSS system. (\$10 million over the President's Budget)

General Dynamics, 200 East High Street, Red Lion, PA 17356.

Future Medical Shelter System: This project would fund the production of a successor to the current tent-based field hospital that has served the Army well but is currently marked for phase-out. This is a good use of taxpayer funds because the 21st Century Military Hospital System is a mobile medical unit that incorporates superior quality in medical care. Gichner Shelter Systems, located in Dallastown, Pennsylvania would design and manufacture the specialty ISO containers used in the mobile medical units (\$9.5 million over the President's Budget)

Gichner Shelter Systems, 490 East Locust Street, Dallastown, PA 17313.

Improved Recovery Vehicle (M88A2): This project would fund the remanufacturing and upgrade of the M88A1 to provide safe and effective recovery capability for the M1 Abrams Tanks. The Abrams Tanks are manufactured in part by the BAE Systems facility located in York, Pennsylvania. This is a good use of taxpayer funds because the tanks are used extensively in Operations Iraqi Freedom and these upgrades will satisfy major deficiencies identified during Operation Desert Storm. (\$72.8 million above the President's Budget)

BAE Systems, 1100 Bairs Road, York, PA 17405.

Paladin Integrated Management (PIM): This project would fund the completion of testing and evaluation of the PIM self-propelled howitzer and companion ammunition resupply vehicle. These vehicles are manufactured in part by the BAE Systems facility located in York, Pennsylvania. This is a good use of taxpayer funds because the changes to this vehicle will reduce the logistics footprint thereby reducing operational and support costs. (\$9 million above the President's Budget)

BAE Systems, 1100 Bairs Road, York, PA 17405.

Military Construction Appropriations Bill:

York Readiness Center: Funding would be provided to the Pennsylvania Army National Guard to provide soldiers with modern facilities in which to assemble and train in York,

Pennsylvania. It would also allow the Guard to close two undersized, inadequate armories now in use. This is a good use of taxpayer funds because the facility will incorporate sustainable design features to achieve LEED NC 2.2 USGBC Silver Certification and improved energy efficiencies. In addition, the new site would implement required Anti-Terrorism/Force Protection. (\$12.8 million)

York Eden Road RC, York, PA.

Members of the advisory board included:

Adams County: Steve Niebler, Director, Adams County Office for Aging, and John R. Peters, Adams County Farm Bureau. Cumberland County: Dean Clepper, Principal (retired), South Middleton School District; John Connolly, Former Chief Clerk, Cumberland County; and Jerry Nailor, Former State Representative, 88th Legislative District. York County: Carl Anderson, President, Community Progress Council Board of Directors, Metro York; Eric Menzer, Wagman Construction, Metro York; Steve Nickol, Former State Representative, 193rd Legislative District; Mario Pirritano, Supervisor, Fairview Township; and Peg Weaver, Former President, Gettysburg-Adams Chamber of Commerce.

RECOGNIZING THE CONTRIBUTIONS OF GLENDA BOOTH

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 21, 2009

Mr. CONNOLLY of Virginia. Madam Speaker, I rise today to recognize Glenda Booth, an outstanding environmental activist from Fairfax County. On Saturday, April 25th Ms. Booth will receive the Liz Hartwell Conservation Award for her decades of service to her community.

Ms. Booth has served as Chair of the Wetlands Board of Fairfax County, and spearheaded the first program in the state to implement Living Shorelines to protect the upper tidal reaches of the Potomac River, reducing erosion and nutrient pollution that would flow to the Chesapeake Bay.

She has promoted environmental stewardship through the Audubon Society of Northern Virginia, Virginia Conservation Network, Friends of Westgrove Park, Mount Vernon Council of Citizens Associations, Friends of Huntley Meadows Park, Friends of Dyke Marsh, and numerous watershed management advisory committees. She was instrumental in helping me develop and implement Fairfax County's environmental agenda, which the Board of Supervisors adopted shortly after I was elected Chairman. This comprehensive environmental plan addresses topics ranging from natural landscaping to the reduction of endocrine disruptor pollution. Without Ms. Booth's extraordinary scientific expertise and political acumen the County's environmental policies would not be as inclusive or effective as they are today.
