

responsibilities, organizational structure, and/or resources and facilities for integrated missile defense training.

EARMARK DECLARATION

HON. GLENN THOMPSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Mr. THOMPSON of Pennsylvania. Madam Speaker, pursuant to the Republican standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Act, 2010. The entity to receive funding is Impact Technologies, LLC, 2029 Cato Avenue, State College, PA 16801, in the amount of \$3,000,000. Funding will be used for smart oil sensors.

EARMARK DECLARATION

HON. BRETT GUTHRIE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Mr. GUTHRIE. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Act, 2010.

Requesting Member: Congressman BRETT GUTHRIE

Bill Number: H.R. 3326

Account: RDT&E/DW

Recipient: EWA, Inc. 2413 Nashville Road, Suite 126, Bowling Green, KY 42101

Description of Request: Provide \$5,000,000 to develop prototypes for the U.S. Special Operation Command to covertly identify and track individuals who threaten the national security of the U.S. Government.

RECOGNIZING GENERAL AVIATION

SPEECH OF

HON. CANDICE S. MILLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 2009

Mrs. MILLER of Michigan. Mr. Speaker, I rise today in strong support of H. Res. 508. I'm a proud member of the General Aviation Caucus and have been a long time supporter of general aviation. My husband was a fighter pilot in Vietnam, and now we fly an RV-8 aircraft, which he built in our garage.

More than 75% of all flights in the United States are general aviation. America relies on general aviation for business, medical delivery services, sightseeing and for just plain fun and a love of flying.

General aviation contributes high-skill jobs in aircraft manufacturing, avionics and technology development, and flight training. This is a vital industry in America's economy. Currently there are 19,000 airports nationwide that provide jobs for 1.3 million Americans and bring in more than \$100 billion dollars annually.

According to a 2006 report from the General Aviation Manufacturers Association, general aviation contributes more than \$4.1 billion in value to the state of Michigan alone. And there are more than 200 general aviation airports in Michigan—these airports are a vital link to rural communities.

After the terrorist attacks of 9/11, the General Aviation community responded by partnering with the TSA to develop a nationwide Airport Watch Program that uses pilots as eyes and ears for observing and reporting suspicious activity.

The General Aviation Community has made impressive contributions to our nation's economy and security. So I am proud to support this resolution. I urge my colleagues to support this resolution.

THE ANNIVERSARY OF THE FALL OF ZEPA

HON. RUSS CARNAHAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Mr. CARNAHAN. Madam Speaker, I rise today to recognize the anniversary of the fall of Zepa during the war in Bosnia in 1995. Just a few weeks ago, I attended the Srebrenica genocide remembrance ceremony in Bosnia and Herzegovina to commemorate the thousands of innocent lives lost during the war. It is important to remember these innocent people who lost their lives as Bosnians move forward.

This siege on Srebrenica, however, was not an isolated event. On July 25, 1995, Zepa, another U.N.-declared safe haven, also fell to the same forces that took Srebrenica just weeks earlier. The thousands of inhabitants and refugees in Zepa were forced to suffer, and die through a constant downpour of shellfire.

In addition to the vast numbers who perished due to the barrage of fire and starvation, an unknown number were taken away never to be seen again, including the Colonel of the Bosnia and Herzegovina army, Avdo Palic, who negotiated the evacuation of approximately 5,000 civilians.

Today, a little more than 14 years after the fall of Zepa, I urge us all to remember not only the fall of Zepa, but also the destruction of the other towns of Srebrenica, Zepa, Sarajevo, Gorazde, Bihac, Tuzla, Prijedor, Bjeljina, Visegrad, Foca, and Kozarac, and many others, all of which experienced significant loss. We must remind ourselves of the innocent lives that were lost, and honor their memory.

Madam Speaker, while we cannot erase the pain of these losses, let us support the efforts of the families of the missing to learn the fate of their loved ones, and let us support the justice that is necessary for the building of a stable, prosperous, and unified Bosnia and Herzegovina.

EARMARK DECLARATION

HON. PHIL GINGREY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Mr. GINGREY of Georgia. Madam Speaker, pursuant to the Republican Leadership stand-

ards on earmarks as well as in accordance with Clause 9 of Rule XXI, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Act, 2010.

Requesting Member: Congressman PHIL GINGREY

Bill Number: H.R. 3326

Account: Research, Development, Test, Evaluation, Army

Legal Name of Requesting Entity: Georgia Institute of Technology

Address of Requesting Entity: Institute of Bioengineering and Bioscience, 315 Ferst Drive, NW, Atlanta, Georgia 30332-0363

Description of Request: The \$3,000,000 included in H.R. 3326 for the Center for Advanced Bioengineering and Solider Survivability (CABSS) will focus on research in advanced tissue and bone regeneration and wound care and treatment issues relevant to military trauma care. Fundamental research advances in these areas can lead to technologies and techniques for better immediate clinical combat care as well as address long term care issues involving limb loss, tissue and organ damage, facial and dental injuries, and reconstruction.

Specifically, the \$3,000,000 in funding will be paid out at pre-negotiated rates in accordance with Department of Defense policy. Specifically, funds will be used to: establish a seed grant program to identify novel technologies for treatment of musculoskeletal defects following trauma, develop oriented nanofiber meshes for treatment of neurologic defects following injury to the extremities, develop biodegradable shape memory polymers for treatment of large bone defects, develop biodegradable shape memory polymers for craniofacial reconstruction, and test the effects of sustained delivery of osteoinductive proteins in tubular nanofiber mesh scaffolds on functional repair of large segmental bone defects.

Georgia Tech will continue to leverage this request to obtain funding from other sources. The Georgia Research Alliance has pledged additional money to the project for infrastructure and equipment, and past Congressional funding has been leveraged to successfully obtain funding from DoD's Orthopaedic Trauma Research Program and its Armed Forces Institute of Regenerative Medicine, as well as funding from the Musculoskeletal Transplant Foundation.

Requesting Member: Congressman PHIL GINGREY

Bill Number: H.R. 3326

Account: Research, Development, Test, Evaluation, Army

Legal Name of Requesting Entity: Printpack, Inc.

Address of Requesting Entity: 2800 Overlook Drive NE, Atlanta, GA 30345-2024

Description of Request: The \$1,000,000 added to H.R. 3326 will be used to develop new and innovative packaging and processing technologies for the Warfighter's combat rations. These funds will result in the ability to provide greater variety and more nutritional rations with longer shelf-life and reduced production costs.

The objective of this effort is to develop advanced thermal processing techniques based on the utilization of non-foil materials for military ration packaging. The importance of developing non-foil packaging materials will

serve as a precursor to the next stage of the R&D effort to investigate new and enhanced thermal processing techniques—specifically, Enhanced High Pressure Processing (EHPP) and Microwave Sterilization (MW) technologies. The EHPP and MW processing technologies have numerous advantages over conventional thermal processing; however, these processes cannot be used on current foil packaging because they cause blistering and flex cracking of the foil packaging material. Therefore, to achieve the advantages of advanced EHPP and MW processing, it is essential to use state-of-the-art, non-foil packaging materials.

The development of advanced, non-foil packaging materials and utilization of innovative EHPP and MW processing techniques will result in the provision of rations with the following beneficial and enhanced qualities: greater variety, better taste, more nutrition, longer shelf-life, lower overall production costs, environmentally friendly, less volume and waste. The FY10 effort will consist of three stages and is budgeted as follows: Stage 1: Blistering (\$0.14M), Stage 2: Flex Crack Resistance (\$0.26M), Stage 3: EHPP & MW Trials (\$0.6M).

Requesting Member: Congressman PHIL GINGREY

Bill Number: H.R. 3326

Account: Research, Development, Test, Evaluation, Defense Wide

Legal Name of Requesting Entity: Scientific Research Corporation

Address of Requesting Entity: 2300 Windy Ridge Parkway, Suite 400, Atlanta, GA 30339

Description of Request: This program will utilize recently developed Wavelet Packet Modulation (WPM). The \$1,000,000 included in H.R. 3326 will be used to implement design modifications for limited rate initial production, including form factor packaging changes for ruggedization and for integration with signal intelligence systems. Additionally, production readiness for integration with existing communications systems will occur. Finally, module testing will be subjected to continued assessment and utility testing on multiple platforms.

The enhanced modules will then undergo a final government Production Readiness Review, paving the way for subsequent deployment. Covert WPM Communications Modules as communications links for multiple platforms, including unmanned aerial systems, provide a critical solution to special operations warfighters that require the ability to communicate covertly without detection.

Funding is required for hardware and software engineering, integration, and testing (64%); specialized equipment (21%); specialized software (13%); and travel to U.S. Special Operations Command and to military test sites (2%). This request is consistent with the intended and authorized purpose of the U.S. Special Operations Command Special Operations Tactical Systems Development program.

Requesting Member: Congressman PHIL GINGREY

Bill Number: H.R. 3326

Account: Other Procurement, Army

Legal Name of Requesting Entity: Meggitt Training Systems

Address of Requesting Entity: 7340 McGinnis Ferry Road, Suwanee, GA 30024

Description of Request: The ARNG combined arms simulation training system began

in 1996, and presently there are 266 fielded Combat Skills Marksmanship Trainers (CSMT) systems. All have been or are in the process of being upgraded. The ARNG has an immediate requirement to supply its soldiers with newer and more advanced training technology, since simulators are an integral part of the training requirement. Since the Army no longer supports the ARNG with training simulator systems, Congress has consistently provided funding for these systems upgrades. ARNG itself has contributed funds of its own—\$4.5 million in FY07 and \$1.2 million in FY08.

The ARNG's immediate need is to upgrade the remaining fleet of CSMT systems, and the plan includes acquiring approximately 1,200 new weapons. The \$4,000,000 included in H.R. 3326 will continue the multiyear upgrade and modernization of existing firearms simulation systems in the Army National Guard necessary to meet the validated system standard.

The ARNG has defined modernization as paramount to resolving an immediate mandatory small-arms training need in support of the Guard's role in a global war on terrorism and homeland security. The Army's Program Executive Office for Simulation, Training & Instrumentation (PEO STRI) has validated the upgraded system as a U.S. Army standard for use by the ARNG.

The CSMT system includes U.S. Army-specific courseware and training scenarios that address new and complex tactical situations and provide soldiers with the ability to conduct weapons, judgmental, and military training in a tactical environment built on geo-specific terrain databases. The CSMT simulates tactical small unit defensive and offensive situations such as security operations, fire & maneuver, and hostage & clearing operations in built-up urban areas. Small unit leaders use the system to conduct mission planning and rehearsal. The system's embedded scenario authoring capability allows the user to quickly author a scenario reflecting emerging doctrinal and/or mission requirement changes.

Requesting Member: Congressman PHIL GINGREY

Bill Number: H.R. 3326

Account: Research, Development, Test, Evaluation, Army

Legal Name of Requesting Entity: CryoLife
Address of Requesting Entity: 1655 Roberts Boulevard, NW, Kennesaw, GA 30144

Description of Request: Despite advances in medical technology, battlefield trauma injuries present a significant threat to the lives of U.S. soldiers. In fact uncontrollable bleeding from internal wounds where tourniquets cannot be applied is a major cause of combat casualty. Biofoam Protein Hydrogel will provide a new tool for physicians to address blood loss at Forward Surgical Team (FST) and Combat Support Hospital (CSH) locations for injuries sustained by service personnel.

CryoLife believes that further development of its existing protein hydrogel technology could result in FDA approval to address blood loss by forward surgical teams or combat support hospitals. CryoLife has developed a formulation for an expanding, adhesive, foam sealant. This two-part material is applied as a liquid that mixes in the portable delivery device and is expressed as a foam to the application site where it bends to the surrounding tissue. An easy to use, expandable hemostatic agent would provide better packing, faster hemostasis and improve the survival of the soldier by extending his "golden hour."

Congress has appropriated \$6.6 million for the development of this technology in FY05–09. The \$1,000,000 included in H.R. 3326 will build upon the previously funded work conducted with the Army Medical Research and Material Command and the Army Institute of Surgical Research (ISR), including feasibility studies and acute and chronic animal studies. The funding included in H.R. 3326 would support large scale pivotal clinical trials on humans in accordance with FDA standards and protocols.

EARMARK DECLARATION

HON. BRETT GUTHRIE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Mr. GUTHRIE. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Departments of Defense Appropriations Act, 2010.

Requesting Member: Congressman BRETT GUTHRIE

Bill Number: H.R. 3326

Account: RDT&E/Army/Medical Technology
Recipient: Owensboro Medical Health System Mitchell Memorial Cancer Center, 811 E. Parrish Avenue, Owensboro, KY 42303

Description of Request: Provide \$2,500,000 to continue the hospital's partnership in plant-based pharmaceutical research.

EARMARK DECLARATION

HON. ROBERT J. WITTMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Mr. WITTMAN. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding an earmark I received as part of H.R. 3326, the Department of Defense Appropriations Act, 2010.

Program Name: SSBN(X) Systems Development

Amount: \$2,500,000

Requested By: ROBERT J. WITTMAN (VA-01)
Account: Research and Development, Navy (RDTE,N)

Intended Recipient of Funds: Northrop Grumman Corporation, 1000 Wilson Blvd, Suite 2300, Arlington, VA 22209

Program description and explanation of the request: This funding is provided as an increase to the Advanced Submarine Systems Development Program, Line 41, Research and Development, Navy. SSBN-X is the designation for the submarine class that will serve as the replacement for the OHIO submarine class, which will begin going out of service in 2029. The OHIO Class is the nation's primary and most secure nuclear deterrent and this capability will be maintained. Detail design expected to start as early as FY12 (construction start is in FY19) and the concept design work must be performed in advance of detail design. \$53M was requested for FY09 in order to conduct the SBSD concept study plan originally planned for FY08 and FY09 which has
