These studies will address the environmental, technical and economic feasibility of a facility benefits, technical and economic feasibility of a synthetic liquid fuels facility and the environmental benefits and economic and technical feasibility of the transpor-

ation and sequestration of carbon dioxide to enhance crude oil recovery in northern Alaska.

This project will supply the U.S. Air Force and other military branches a secure supply of synthetic fuels to operate fighters, bombers and other aircraft and military equipment. Bill Number: H.R. 3326—Research, Development Test & Evaluation, Defense Wide.

Legal name and address of entity receiving earmark: Kachemak Research Development, Inc., 59584 East End Road, Homer, AK 99603.

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Kachemak Research Development, Inc. is a woman owned, HUBZone, 8(a) entity. AutoScan, an under vehicle inspection system developed by KRD, is a stationary system that captures the entire undercarriage image of vehicles, ranging in size from passenger vehicles to semi-trucks. Because of the unique capabilities of AutoScan, vehicles do not need to maintain a constant speed as they travel across the system. Funding will be used for product enhancement and beta testing of AutoScan generation 2 and 3 architecture. As part of the inspection protocol at every military base, CONUS and OCONUS, the undercarriage of every delivery vehicle must be inspected. Standard inspection protocols have been comprised of a mirror-mounted stick or search pits. AutoScan makes it possible for inspection personnel to maintain a safe stand-off distance. Additionally, it stores images for later comparison and analysis if needed. And it provides one, complete, clear image of any vehicle's under-side in real-time and capabilities that no similar system is able to provide.

Description of matching funds: KRD profit is reinvested back into the company to provide facilities that are needed to perform the work. KRD investment exceeds \$750,000 to-date.

Appropriated Amount: \$3,000,000.

Project Name: Under-Vehicle Inspection System.

Detailed Finance Plan: Of the \$3M, roughly 25% will go to administrative support within OSD and the contracting agency. The remaining 75% of the funding, \$2.25M, will cover labor: \$1,290,000; materials (including equipment and fabrication) \$238,000; benefits \$262,000; OH \$214,000; technical consulting \$112,000; \$31,000 travel; \$95,000 installation and beta testing of generation 2 and 3 AutoScan before fielding.
