H.R. 1625, the Equity and Access for Pediatric Physicians Under Medicaid Act, would classify pediatricians as physicians for purposes of direct reimbursement through the Medicaid program. Podiatry is critical to the treatment and understanding of diabetes.

The Medicare Diabetes Self-Management Training Act, H.R. 2425, would make a technical clarification to recognize certified diabetes educators (CDE) as providers for Medicare diabetes outpatient self-management training services (DSMT). CDEs are the only health professionals who are specially trained and uniquely qualified to deliver care to patients with diabetes to help them improve their health and avoid serious diabetes-related complications. The 1997 authorizing DSMT statute did not include CDEs as Medicare providers. This exclusion has made it increasingly difficult to ensure that DSMT is available to patients who need these services, particularly those with unique cultural needs or who reside in rural areas.

Another bill that is a priority of the caucus is the Preventing Diabetes in Medicare Act, H.R. 2590. This bill would extend Medicare coverage to medical nutrition therapy (MNT) services for people with pre-diabetes and other risk factors for developing type 2 diabetes. Under current law, Medicare pays for MNT provided by a Registered Dietitian for beneficiaries with diabetes and renal diseases. Unfortunately, Medicare does not cover MNT for beneficiaries diagnosed with pre-diabetes. Nutrition therapy services have proven very effective in preventing diabetes by providing access to the best possible nutritional advice about how to handle their condition. By helping people with pre-diabetes manage their condition, Medicare will avoid having to pay for the much more expensive treatment of diabetes.

In addition, we are working hard to pass, H.R. 3668, and reauthorize the Special Diabetic Programs for Type I Diabetes and Indians. This program provides federal funding for the Special Statutory Funding Program for Type 1 Diabetes Research at the National Institutes of Health and the Special Diabetes Program for Indians at the Indian Heath Service. H.R. 3668 would extend these critical programs through 2016 and increase funding for both programs to $200 million a year.

I want to thank my colleague, Congressman Mike Castle, for his many years of leadership working together with me as Co Chair of the Diabetes Caucus. I also want to thank the many Members who are supporting this effort and both sides of the House leadership for their bipartisan support of diabetes issues. I look forward to working with the Congressional Diabetes Caucus to pass the important legislation we are promoting and continuing to further the goals of National Diabetes Month.

EXPRESSING SUPPORT FOR GREATER AWARENESS OF OVARIAN CANCER

SPEECH OF
HON. SHEILA JACKSON-LEE
OF TEXAS 
IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 1, 2009
Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise before you today in support of H. Res. 727, “supporting the goals and ideals of National Ovarian Cancer Awareness Month.”

I would like to thank my colleague Congressman Steve Israel for his leadership on this very important issue, as ovarian cancer is the 5th leading cause of cancer deaths among women in the United States.

Ovarian cancer is the deadliest of gynecological cancers. All women are at risk for ovarian cancer, but older women are more likely to get the disease than younger women. About 90 percent of women who get ovarian cancer are older than 40 years of age, with the greatest number being aged 55 years or older. Additionally, 90 percent of women diagnosed with ovarian cancer do not have a family history that puts them at higher risk. Early detection is vital, only 20 percent of ovarian cancers are found before tumor growth has spread beyond the ovaries. The chance of surviving ovarian cancer is better if the cancer is found early. Unfortunately, there is currently no reliable early detection test for ovarian cancer.

Among women in the United States, ovarian cancer is the eighth most common cancer and the fifth leading cause of cancer death, after lung and bronchus, breast, colorectal, and pancreatic cancers. Ovarian cancer causes more deaths than any other cancer of the female reproductive system. In 2005, 19,842 women in the U.S. learned they had ovarian cancer, and 14,787 women died from the disease.

Ovarian cancer is known as a "silent killer" because it usually isn’t found until it has spread to other areas of the body. Unfortunately, there is no simple and reliable way to test for ovarian cancer in women and the Pap test does not check for ovarian cancer. However, new evidence shows that most women may have symptoms even in the early stages, such as: bloating, pelvic or abdominal pain, difficulty eating or feeling full quickly, and urinary symptoms, among several other symptoms that are easily confused with other diseases. This new evidence has led to the first national consensus statement on ovarian cancer to provide consistency in describing symptoms to make it easier for women to learn and remember them. Awareness of symptoms may hopefully lead to earlier detection.

The mortality rate for ovarian cancer has not significantly decreased in the almost 40 years since the ‘War on Cancer’ was declared. If ovarian cancer is diagnosed and treated at an early stage before the cancer spreads outside of the ovary, the survival rate is as high as 90 percent. However, due to the lack of a reliable screening test, 75 percent of ovarian cancer cases are diagnosed in an advanced stage when the five-year survival rate is below 45 percent.

I urge my colleagues to support the goals and ideals of National Ovarian Cancer Awareness Month. Education and awareness of ovarian cancer will save the lives of countless women.

HONORING EARL HALL

HON. GEORGE RADONOVICH
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 2, 2009
Mr. RADONOVICH. Madam Speaker, I rise today to commend and congratulate Earl Hall upon being awarded with the “Community Health Champions Award” at the 2009 West Fresno Health Care Coalition’s 5th annual “This is Your Life of Service” lunch and awards ceremony. This year the ceremony will be held at the Radisson Hotel Conference Center in Fresno, California on Tuesday, November 3rd.

Mr. Earl Hall was born in Oklahoma. When he was just six months old, the 1940’s “Dust Bowl” hit his family’s farm and they were forced to leave the area. Upon migrating to California, his family settled in Wasco, California. Mr. Hall’s father was finally able to find employment as a farm manager for a family farm. Mr. Hall graduated from Wasco High School then attended Bakersfield Junior College and Fresno City College, where he earned his Associates degree. He transferred to California State University, Fresno and graduated with a Bachelor’s degree in Agricultural Business in 1964.

Mr. Hall has dedicated his career to establishing and developing his business, Hall Ag
