

TELEWORK IMPROVEMENTS ACT
OF 2010

SPEECH OF

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 14, 2010

Mr. WOLF. Mr. Speaker, I rise today in strong support of the Telework Improvements Act of 2010, and thank the gentleman for yielding.

I have been pleased to work with the gentleman from Maryland, Mr. SARBANES, in sponsoring this legislation and thank him for his tireless efforts. I also appreciate the persistent work of the gentleman from New York, Mr. TOWNS, on this matter.

There are several points I would like to make, especially to my side of the aisle.

H.R. 1722 does not authorize any new appropriations of taxpayer funds. The Congressional Budget Office in April scored this legislation as deficit-neutral.

CBO estimated that the implementation costs of \$30 million over 5 years, assuming the appropriations of necessary funds, will come from developing regulations to implement telework programs, reporting and training costs. As my colleagues know, however, such costs are routinely absorbed by current administrative budgets in each agency.

Let me repeat—this legislation is deficit-neutral and does not authorize any new appropriations.

I have been actively engaged in the telework issue for over 20 years and know for a fact that telework saves money.

The limited administrative costs will be more than offset when a robust telework program is fully integrated into the federal government's Continuity of Operations Plans (COOP).

During February's snow storm, when the government was shut down for four days, the Office of Personnel Management (OPM) estimated that roughly 30 percent of eligible federal workers in the metropolitan D.C. area teleworked.

Rather than absorbing the almost \$30 million in salaries for those employees for each day that it was closed, the federal government reaped the rewards of telework because those employees were productive and continued the work of the federal government when they couldn't reach their regular workplaces.

The government must be able to function during an emergency or natural disaster. Currently, only 56 percent of government agencies have formally included telework in their COOP plans. H.R. 1722 would change that policy.

What if there is another terrorist attack? Telework was vital to ensuring that our government continued to function after 9/11.

Or what if the "big one" earthquake hits California? Some 700,000 of the one million workers displaced by the 1989 Loma Prieta earthquake—the World Series earthquake—teleworked from their homes or nearby locations, including federal workers.

What happens when snowmageddon hits the nation's capital again? Those federal employees who were eligible to telework recognized that the government must continue to

function and that people in other parts of our nation were counting on them to do their jobs.

Snowstorms or hurricanes or tornados should not prevent the most powerful nation on earth from functioning. We must fully embrace new technologies to keep the government working and telework is the ideal way to keep employees on the job.

Telework also provides other obvious benefits, from reducing traffic congestion, air pollution, gasoline consumption and our dependency on foreign oil to allowing individuals and working parents the flexibility to meet everyday demands outside of work.

Employers with a strong telework option report fewer days used by employees for sick leave, better worker retention, higher productivity, and increased morale. They also report overhead savings in office space.

The private sector has long recognized the benefits of telework. Roughly 115,000 IBM employees telecommute each day with 40 percent operating without dedicated office space. In return, IBM saves \$450 million a year in infrastructure costs.

One government agency, the Patent and Trademark Office (PTO), has had a long track record on telework mirroring the success that IBM has had in the private sector. Some 83 percent of eligible PTO employees telework. These arrangements have enabled the agency to save \$11 million otherwise needed for new office space.

No other federal agency has the policies in place to enable more than 50 percent of eligible employees to telework at least one day a week.

Work is something you do, not someplace you go. There is no magic about strapping ourselves into a car, driving sometimes up to an hour and a half to our workplaces, and sitting in front of our computers all day. Information accessed at workplaces can just as easily be accessed from computers in our living rooms.

Telework is a win-win for employers and employees and the federal government should be the model for telework in the 21st Century workplace.

H.R. 1722 is good government legislation and I urge my colleagues to support its passage.

REMARKS IN HONOR OF BLUEFIELD WEST VIRGINIA'S 200TH LEMONADE DAYS

HON. NICK J. RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 15, 2010

Mr. RAHALL. Madam Speaker, last week, a great tradition in my native West Virginia, Lemonade Days, marked a sweet milestone—its 200th serving of free lemonade—and I am proud to offer this salute to it.

The historic Lemonade Days was born in Bluefield, West Virginia in 1939, when the late Edward H. Steel dreamed up the idea of serving free lemonade to the town residents whenever the temperature reached above the 90-degree mark. It wasn't until three years later, in 1941, when the first free cup of lemonade

was served, as the temperature didn't hit the required 90-degrees until then.

According to a recent editorial in the local newspaper, the Bluefield Daily Telegraph, it took a historic 71 years for the city to serve 200 servings of free lemonade, and there have been at least 35 summers on record, in which the temperature never reached 90-degrees. Bluefield, West Virginia, has since received the moniker "Nature's Air-Conditioned City," as the temperature in this beautiful town rarely reaches this old faithful temperature.

The free lemonade tradition in Bluefield is tried and true. It has endured challenges from cooler than normal summer months with no free lemonade servings, a lemon and sugar shortage during World War II, a strike by the lemonade lassies and several friendly controversies over the temperature reading and whether or not the town thermometer is or isn't accurate. Yet the tradition—200 cups later—is still flourishing—whenever the temperature hits of course.

And what better place than Bluefield, West Virginia, to carry on a celebrated tradition that's as sweet as the people who live there? Nestled deep in the Appalachian Mountains, the Bluefield area of southern West Virginia is home to a magnificent coal story. Most of the towns in Mercer County were built due to the thriving coal operations when Bluefield emerged as the corporate center of these coalfields. Many shops, businesses and activities flourished around the activity of the busy rail yard. The striking architecture of the city was built in the 1920's and reflects the optimism and confidence of that area.

Eight of the areas downtown buildings are listed on the National Register of Historic places and locals and tourists bask in the hunt for old treasures in the town's antique and specialty shops.

Mercer County is home to several cultural art centers, theatres and galleries and boasts of a Natural Gravity Switching Rail yard; the Eastern Regional Coal Archives; Chicory Square, which houses 25 uniquely painted trains; a Railroad Museum, home to over 100 railroad lanterns, exhibits, and railroad artifacts, photographs and artwork; the last remaining structure from the Civil War, the McNutt House; Mercer County War Museum; Historic Bramwell, home to coal barons' old mansions, a train depot and many unique shops; two minor league baseball teams, the Bluefield Orioles (farm team for the Baltimore Orioles) and the Princeton Rays (the farm team of Tampa Bay); and the Coal Heritage Trail Interpretive Center in Bramwell, which houses relics and exhibits of West Virginia's truly inspiring coal story.

Locals and visitors may also enjoy three of southern West Virginia's most beautiful state parks—Camp Creek, Pinnacle Rock and Pipestem—as well some of the country's best ATV trails, hiking and biking trails, fishing and boating. There truly is something for everyone in Bluefield and in Mercer County West Virginia.

On behalf of all the residents of Bluefield in my native Mountain State who enjoy this wonderful tradition, Lemonade Days, I salute this historic sweet milestone and encourage anyone who hasn't visited this community to plan their next summer vacation in our "Nature's Air-Conditioned City."
