

fight. This is going to affect power plants around the country that are operating under natural gas, coal, oil, any kind of hydrocarbon. This is just the tip of the iceberg of what is going to happen in this arbitrary decision by the EPA against the will of the Congress and the American people.

We have had 2 years of doing things against the desired will of the American people, and the American people spoke in the last election. It is time for us to make commonsense decisions and do what makes sense. It makes no sense to let people operate under a system that works for 15 years and then come in and say implement this immediately. We are not giving you 3 years to implement it. You will do it now. And when we said, no, wait a minute, let's play by the rules, they say, Fine. We never did get around to giving you the official letter approving your flex permit system, so here is your official letter. It is denied. Because you are not doing anything about it, we are going to come in and take over your permitting system.

I don't think the average American thinks that is the way anybody ought to operate. It is not the way that I think anybody ought to operate. I would be surprised if it is not the way that a majority of the people in this House think these agencies ought to operate.

You know, we always hear the idiot, crazy things and they come out in the newspaper and you will see some of them. But just to let you know it is not just in this industry where new regulations are going to be going strange; there is a proposed regulation that is going to be affecting Texas for sure and a whole lot of other States in this unions: they want to regulate dust.

□ 2140

So, if you've got a dusty road, driving up to your ranch house or to your personal house, they want to come in and regulate the dust that kicks up in the summertime, when it's hot, behind your car.

The solution they came up with for this in California—California, the place where they have the drought in the Central Valley, a shortage of water—is to water down your road every day. Take the water you need for the plants and for people, and squirt it on the road to keep dust from going up in the air.

Like Mr. GOHMERT said, we used to laugh and say, someday, the government is going to regulate the air we breathe and the food we eat. Lo and behold, they are. It's going on right now.

So this is just the beginning. As JOE said, this is just the beginning of bringing this to the attention of the American people—this regulation, what they're doing to Texas—and of standing up for our fellow Texans, who are standing up for our State's compliance record and standing up for our State's ability to create an environment where people can have a job and where they

can pay their own way—and good industry jobs. We're standing up for those people. We're making sure that we don't lose those great jobs in Texas because of this regulatory agency.

This is only the beginning of the fight. There is more to come. We're going to fight, not only this regulation, but many, many more. We'll be bringing them up to let the American people see that the regulators can be dictators.

I just want to correct one thing Mr. GOHMERT said. We're no longer having a moratorium on drilling. I was told today by one of my constituents that we're having a permanent moratorium.

They said, Oh, yes. Where the moratorium's lifted, you just have to get a permit.

So far, there haven't been any permits.

Mr. BARTON of Texas. I just want to make one nonscientific comment.

I flew this morning from DFW Airport up to Reagan Airport to attend this session of Congress. The DFW area is home to approximately 3 million people, to a number of power plants, lots of industry, electronics, general aviation, defense. I flew into Washington, which has almost no industry. The air was clear at DFW. When I came into Reagan, I looked out the window, and I thought, man. I mean, I don't want to be disrespectful to our international friends over in Poland, but it did remind me of the last time, which was several years ago, I flew into Warsaw, and the air was so thick you could see it. I don't know what the issue is here in the Washington region today, but when we flew into Reagan, it was noticeably hazier and browner flying in than it was when I left DFW, where the air was absolutely crystal clear.

Now, that's nonscientific, but I would invite anybody who thinks we've got an air quality problem in Texas to go to Dallas or to go to Houston. Drive out along the Houston ship channel. Go down to Corpus Christi, outside the major refineries on the gulf coast, and you'll see a success story. What you won't see is air pollution that's caused by industry in Texas. Their compliance record is excellent, and they've got the facts to back it up.

Mr. CARTER. I thank you.

At this time, I yield back what little time I have, and remind everybody that the stars are still big and bright deep in the heart of Texas.
