

EXTENSIONS OF REMARKS

PERSONAL EXPLANATION

HON. STEVE KING

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 2011

Mr. KING of Iowa. Mr. Speaker, on rollcall No. 137 I was detained off the House floor during this 2 minute vote series and was unable to cast my vote before the vote was closed. Had I been present, I would have voted "yes."

THE RECENT TRAGEDY IN CYPRUS

HON. SHELLEY BERKLEY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 2011

Ms. BERKLEY. Mr. Speaker, I rise to express support and sympathy for the people of Cyprus about the tragedy that recently occurred in one of their naval bases, killing 13 people and injuring dozens more. Our thoughts and prayers are with the people of Cyprus at this extremely difficult time.

This tragic story begins with a courageous act of international leadership by the government of Cyprus. In January 2009, a Cypriot-flagged merchant ship was illegally transporting arms from Iran to Syria, when it was called to port by the Cypriot government. Acting on their suspicions, Cypriot forces arrested the sailors aboard the ship, seized the arms, and stored them at the Evangelos Florakis Naval Base in Zygi, Cyprus, where they had been kept until now.

On Monday, July 11, the gunpowder in these containers was ignited by a brush fire and exploded. Thirteen Cypriots were killed in this massive explosion and fire, including the commander of the Cypriot navy, Andreas Ioannides, and the commander of the base, Lambros Lambrou. The explosion also damaged the most important power plant in Cyprus, which normally supplies 60 percent of the electricity for the island, causing widespread blackouts, reducing water supply, and threatening the nation's economy.

This tragic event is made only more so by the fact that it began with such a great act of leadership on the part of the Cypriot government. I know my colleagues join me in extending our deepest appreciation to the Cypriot government for the actions they took to stop the illegal arms shipment and in expressing our deepest condolences for those who lost their lives and all those who were harmed by this tragic event.

We stand ready to assist the Cypriot people to recover from this accident and look forward to many more years of working together to advance the cause of world peace.

HAPPY BIRTHDAY JOHN GLENN

HON. TIM RYAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 2011

Mr. RYAN of Ohio. Mr. Speaker, I rise to extend my very best birthday wishes to the Honorable John Glenn of Ohio on the occasion of his 90th birthday.

John Glenn is an American hero and a true legend. It is difficult to believe that today he is celebrating his 90th birthday. He is a hero in war, a hero in peace and remains a hero in the hearts of his countrymen.

Growing up in New Concord, Ohio, and attending Muskingum College, he was on his way to his girlfriend Annie's organ recital at Brown Chapel when he heard the news that Pearl Harbor had been attacked. That changed their lives and changed America forever.

His incomparable life of service began as a Marine Corps fighter pilot flying the F4U Corsair in the South Pacific in World II and the F9F Panther and F-86 Sabrejet in Korea. In 1957, as part of Project Bullet, he made the first supersonic transcontinental flight from California to New York in a F8U Crusader.

In 1959, he was chosen by the recently established National Aeronautics and Space Administration (NASA) as one of the original seven astronauts for Project Mercury. Next February will be the 50th Anniversary of John Glenn's orbital flight aboard Friendship Seven. Just last month John Glenn and Scott Carpenter, the only two surviving Mercury Astronauts reunited at the Smithsonian National Air and Space Museum in Washington, D.C., to recollect and discuss their historic flights and America's Space program.

Of course we all know that John Glenn did not end his public service at that point. In 1974 he became a U.S. Senator from Ohio and served for 24 years. In 1997, John Glenn announced his retirement from the Senate stating that there was no cure for the common birthday. Nonetheless, in 1998, he returned to space aboard the Space Shuttle Discovery at age 77 to study the effects of space flight on seniors.

You can be sure that John Glenn doesn't stand still. He worked to establish the John Glenn School of Public Affairs at The Ohio State University and he served as Chairman of the National Commission on Math and Science Teaching for the 21st Century.

I have been honored to join him on many occasions at public events in Ohio. He is clearly on the side of maintaining our commitment to the manned space program and disappointed with the decision to end the Space Shuttle Program.

At 90 he is recovering from a knee replacement but still pilots his own plane and admits that his greatest success was not war, space, or politics but 68 years of marriage to his childhood sweetheart, Annie.

Happy Birthday John Glenn. We wish you and Annie all the best.

Mr. Speaker, I ask unanimous consent that a column by Connie Shultz of the Cleveland Plain Dealer be printed following my remarks.

[From the Cleveland Plain Dealer, July 18, 2011]

JOHN GLENN TURNS 90: AN APPRECIATION
(By Connie Schultz)

Happy birthday, John Glenn

Two summers ago, John and Annie Glenn loaded up their Cadillac, pulled out of their driveway in Columbus and headed west for 8,400 miles of unscheduled adventure.

"We'd seen the Northwest from the air, but we'd never experienced it on the ground," John said. "We wanted to explore from the road."

For a month, they stopped when they felt like it. They took detours whenever the spirit moved them. They made hotel reservations one day at a time, from the road.

"It was like one long date," Annie told me after their return. "We just enjoy each other's company so much."

John was 88 at the time. Annie was 89. They'd been married 66 years by then.

John Glenn—World War II veteran, the first American to orbit the Earth and Ohio's U.S. senator for 24 years—turns 90 today.

He seems unmoved by the milestone.

"Well, you know what they say," he said from his hospital room, where he is recovering from knee surgery. "If I'd known I was going to live this long, I would have taken better care of myself."

If there is any person whom Americans—particularly Ohioans—expect to be hale and hearty at 90, it's John Glenn.

He was 77, after all, when he launched into space for the second time, on the space shuttle Discovery. Not the normal retirement trajectory for a septuagenarian.

To commemorate John's 90th birthday, LIFE.com has posted an online gallery of 25 previously unpublished photos of Glenn. It is worth a visit, for the photographic glimpses into a fascinating life, and time, in America, and for the narrative that unfolds through the captions, such as this one from a 1964 interview with John:

A lot of people ask . . . why a man is willing to risk [everything] on something like this. Well, we've got to do it. We're going into an age of exploration that will be bigger than anything the world has ever seen. I guess I'm putting my family up against some risks. I could do other jobs, which might increase my life expectancy. But this could help my kids, too. I want them to be better off than I was as a young man. With risks, you gain.

John Glenn is still a champion for space exploration. I talked to him on Saturday, four days after his surgery. He was still in the hospital, in some discomfort but refusing to complain.

Until I asked how he felt about the recent end of the U.S. space shuttle program, that is.

"I could talk to you for three hours about that," he said. "The space station is the most unique laboratory we've ever built. The reason we have it is to do research on materials, people, medical matters, pharmaceuticals—the possibilities are nearly endless.
