

OCIA has been LEED-certified by the U.S. Green Building Council—the first airport in the nation to achieve this distinction. Among its “green” features, the new terminal at OCIA boasts use of wind, solar and geothermal energy systems, which drastically reduce the environmental impact and cost of operating this regional economic engine. Additionally, the terminal includes recharging stations for electric vehicles and not only showcases the use of recycled materials in its construction, but also demonstrates recycling of rainwater for landscape irrigation use on the building’s “living” wall.

Mr. Speaker, this latest first-in-nation accomplishment of the Oakland County International Airport is truly a remarkable milestone and as a lifelong Oakland County resident, it is a source of great pride. This “green” terminal is not only a realization of Oakland County residents’ continuing commitment to build a better future, but is also a model for the nation of the success that comes from the merging of economic development and environmentally sound building strategies.

IN RECOGNITION OF THE RETIREMENT OF COLONEL JAMES C. MILLER FROM THE UNITED STATES AIR FORCE AND OREGON AIR NATIONAL GUARD

HON. GREG WALDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 2011

Mr. WALDEN. Mr. Speaker, I rise today to pay special tribute to Colonel James C. Miller on the occasion of his retirement from a long and outstanding career in the United States Air Force and the Oregon Air National Guard.

Colonel Miller began his career in the Air Force through the ROTC program at Central Washington University in 1984. Early in his Air Force career he qualified as a pilot in the T-37 and the F-15 Eagle aircraft and served honorably throughout the United States. In 1999 he became a member of the Oregon Air National Guard as an instructor pilot in the Fighter wing at Kingsley Field, Oregon, and has since served in numerous jobs of increasing responsibility at Kingsley Field. Throughout his career in the Air Force, he became an accomplished pilot, exceeding 4,300 flying hours in the F-15 Eagle.

Colonel Miller most recently served as the Commander of the 173rd Fighter Wing at Kingsley Field. During that tour of duty his exceptional leadership and tenacious dedication to duty to both the State of Oregon and the United States of America resulted in an outstanding set of accomplishments.

He commanded over 800 airmen, oversaw over \$20 million annually in operating costs, and orchestrated over 44,000 Class A accident-free flying hours. Under his leadership the wing accepted 19 new aircraft and converted the aircraft to new engines in only five months, while maintaining the highest mission capable rate in the Air Force.

Colonel Miller’s visionary leadership was instrumental in the establishment of Kingsley Field as the Air National Guard’s premier F-15 training unit and the Wing’s selection as the sole F-15 fighter training unit in the U.S. Air Force.

Colonel Miller served his community as well as his military mission. He spearheaded the efforts of the most successful series of Combined Federal Campaigns in Kingsley Field history, raising more than \$500,000 for local non-profit agencies. He re-invigorated the Kingsley Field Military Affairs Committee, directly involving local civic and Chamber of Commerce leaders in supporting Kingsley Airmen. He created the “Pilot for a Day” program, allowing local underprivileged and challenged youth to experience what it’s like to be an Air Force pilot.

Throughout his long career, Colonel Miller served his country and his state honorably, and, on behalf of the people of Oregon’s Second District, I want to thank him for his service.

ON THE OCCASION OF DOKKA FASTENERS’ GRAND OPENING IN AUBURN HILLS, MICHIGAN

HON. GARY C. PETERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 2011

Mr. PETERS. Mr. Speaker, I rise today to congratulate Dokka Fasteners Inc. as the company commemorates the grand opening of its new facility in Auburn Hills, Michigan.

Dokka Fasteners is a company with over a century of experience in manufacturing precision quality bolts and studs for use in construction and energy development. Most recently, the company has expanded its focus to include production of bolts for alternative energy production systems, such as wind turbines. Over the company’s history it has developed the expertise to create a precision process, certified by the International Organization for Standardization, which results in a 100 percent traceability of its materials and a consumer confidence that has made Dokka a leader in its field.

Dokka Fasteners’ investment in Michigan is well poised to take advantage of a state whose leaders, from the local level to the federal level, are engaged in a concerted effort to develop Michigan as the center of knowledge, manufacturing and infrastructure of the next generation of energy production. As a commitment to developing alternative energy, state leaders passed a renewable portfolio standard which requires Michigan to produce at least 10 percent of its energy from alternative sources by 2015. As Oakland County’s Representative to Congress, I am pleased to have supported multiple national efforts to develop our nation’s alternative energy industry and nurture companies that are developing the vital information and infrastructure bases which are necessary to achieve those goals.

Dokka Fasteners’ investment in the City of Auburn Hills, Oakland County, and Michigan speaks to the progress Oakland County and Michigan are making in the fight to become the leaders in alternative energy production. The company’s facility will house a state-of-the-art quality inspection laboratory and will be the first hot-forming fastener manufacturing plant to open in the United States in over 40 years. Dokka’s choice to develop their products in Michigan represents a multi-million dollar investment in our local economy which will create nearly 100 new jobs and will aid the

Southeast Michigan region as it continues to develop its alternative energy portfolio.

Mr. Speaker, the grand opening of Dokka Fasteners’ new facility in Auburn Hills is a testament to our local, state and national commitment to strengthen our development of alternative energy. It is with the hard work of companies like Dokka that America will be able to approach a clean energy future with the knowledge and production capabilities necessary to achieve our goals.

HONORING PETER DOUGLAS

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 2011

Ms. WOOLSEY. Mr. Speaker, I rise today to honor the career of an exceptional man and public servant. Peter Douglas has dedicated his life to defending our natural heritage and promoting conservation along the California Coast. Rarely does a single man cast such a long and positive shadow over our state; but as an architect of the California Coastal Commission, and as its longest-serving Executive Director, Douglas’s contributions are truly incalculable. His retirement in November 2011 will mark the end of a proud era in the history of our environmental movement.

Peter Douglas has long been a passionate fighter for a just cause. As a Jewish child born in Berlin in 1942, Douglas’s early life was imbued with a special sense of purpose. Douglas eventually immigrated via Mexico to California, where he attended the University of California at Los Angeles, graduating with a law degree in 1969—months after the Santa Barbara oil spill, and just as the national environmental movement was beginning to make significant strides.

Douglas wasted little time in putting his passion for public service to work, throwing his energy and expertise into the California campaign for 1972’s Proposition 20. Douglas was key in drafting the language for the voter-approval initiative that created one of the country’s most powerful land-use agencies, overseeing development across California’s entire Coastal Zone. In 1985, he became the third Executive Director of the California Coastal Commission, a position he has held to this day.

Under Douglas’s tenure, the Coastal Commission has become a formidable instrument for ensuring that all Californians’ voices are heard in development decisions affecting our unique coastal environment. Douglas has helped to expand public access to our beaches, limit private encroachment on public lands, and prevent the spread of pollution throughout our fragile ecosystem. His work has ensured that our coast remains above all a public landmark, inclusive of any individual who wishes to enjoy the same unspoiled natural wonder that has inspired others for generations.

Countless organizations have acknowledged the impact Peter Douglas has made as an environmental pioneer. He is the recipient of awards from groups as varied as the National Resources Defense Council, the Hispanic Chamber of Commerce, the Sierra Club, the Environmental Defense Center, the California State Legislature, and the National Coast Trail Association. He was the first recipient of the
