IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 2609) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2014, and for other purposes, with Mr. HULTGREN in the chair.

The Clerk read the title of the bill.

The CHAIR. Pursuant to the rule, the bill is considered read the first time.

The gentleman from New Jersey (Mr. FRELINGHUYSEN) and the gentlewoman from Ohio (Ms. KAPTUR) each will control 30 minutes.

The Chair recognizes the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Chairman, I yield myself such time as I may consume.

It is my honor to bring the fiscal year 2014 Energy and Water Development bill before the membership of the House.

However, before I go through its highlights, I would like to thank my ranking member, Ms. KAPTUR, for her partnership on this bill and hard work and friendship. It's been a real honor to work with you, and I look forward to working with you to get through the entire process. I would also like to thank all the members of our committee on both sides of the aisle for putting this bill so quickly together and so responsibly.

I would also like to recognize the hard work of Chairman ROGERS and Ranking Member LOWEY to bring this bill, and several others before it, to the floor under an open rule.

The bill for fiscal year 2014 totals \$30.4 billion, \$2.9 billion below last year's levels and more than \$4 billion below the President's request.

The budget allocation we received this year made for some very difficult decisions, but in our bipartisan tradition, we worked hard to incorporate priorities and perspectives from both sides of the aisle.

Mr. Chairman, we placed the greatest priority on national defense, our nuclear deterrent, also the critical work of the Army Corps of Engineers and other activities on which the Federal Government must take the lead. The reductions we had to make to the applied energy research and development programs will shift more of their work to the private sector.

The bill provides \$7.6 billion, an increase of \$98 million above the fiscal year 2013 amount, to modernize the Nation's nuclear weapons stockpile and its supporting infrastructure, excluding rescissions.

I would also like to note that the recommendation contains no funding to
