

In just five years, the Center demonstrated the merits of combining two different health care systems. Through hard work and dedication, the FHCC staff has shown that one health care facility can annually provide excellent care to over 90,000 military personnel, their families, military retirees and Veterans. I would like to personally congratulate Director Dr. Stephan Holt, and Deputy Director Navy Captain Bob Buckley. Their vision and enthusiasm facilitated the integration tremendously.

I look forward to celebrating many more anniversaries of the Lovell Federal Health Care Center. Congratulations and thank you for your hard work.

PERSONAL EXPLANATION

HON. TOM COLE

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 28, 2015

Mr. COLE. Mr. Speaker, I was unavoidably detained and not present for Roll Call vote number 518. Had I been present, I would have voted "YEA" on final passage of H.R. 348, the Responsibly and Professionally Invigorating Development Act of 2015. On Roll Call number 514, (Gosar of Arizona Amendment No. 8 to H.R. 348) I intended to vote "YEA."

CELEBRATING THE 375TH ANNIVERSARY OF FARMINGTON, CONNECTICUT

HON. ELIZABETH H. ESTY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, September 28, 2015

Ms. ESTY. Mr. Speaker, I rise today to celebrate the 375th anniversary of Farmington, Connecticut.

During the month of August and September, seven historical organizations planned History Day to display, honor, and celebrate influential Farmington community leaders. This historic milestone recognizes Farmington's deeply rooted history and significance as one of the first settlements in New England.

Over the past 375 years, Farmington residents have enjoyed the fruits of the land, scenic views along the Farmington River, and trails through the Farmington Valley greenway. Though closely neighboring the major metropolitan hub of Hartford, the town of Farmington has maintained its unique character through careful land use and historic preservation.

On September 13, 2015, the town celebrated History Day, educating community members about the first Tunxis Indians who welcomed new settlers into the area. In 1640, the early settlers purchased the land that would become Farmington. During the mid-1700s, Farmington's rich farmland and access to water made it an attractive destination for homesteaders. As trade opportunities evolved, a booming economy brought with it an era of technological innovation. Manufacturers located their factories in the Unionville section of Farmington to take advantage of its easy access to the Farmington Canal, which was later replaced by a railroad.

Through its many periods of growth, Farmington continues to embody the values instilled

by its early inhabitants to promote its natural resources. From its wooden lands, to the majestic river and valley, Farmington offers its residents a getaway from the Hartford metropolitan area, while remaining in a central location in the state. I am honored to represent Farmington in Congress.

Congratulations to Farmington on its 375th anniversary.

CELEBRATING 25 YEARS OF NATIONAL RICE MONTH

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 28, 2015

Mr. CONAWAY. Mr. Speaker, I rise today to join with America's rice farmers in celebrating the month of September as National Rice Month.

It has been 25 years since September was first declared National Rice Month.

On this silver anniversary, I want to pay a special tribute to the hard working men and women who produce rice on their family farms.

I would also like to recognize all of those who mill and market rice, all of the suppliers and buyers, and, of course, all of the consumers who make rice an essential part of their diet.

Rice farming in America actually predates our nation's independence, beginning some 300 years ago.

Today, America's rice industry creates 125,000 good-paying jobs and contributes an estimated \$34 billion to our nation's economy, including an estimated direct impact of \$169.8 million in my home state of Texas.

Nine million tons of rice are grown each year by family farmers on some 2.7 million acres of land, predominately in the states of Arkansas, California, Louisiana, Mississippi, Missouri, and Texas. While these six states produce the lion's share of rice in America, there is also rice production in other states, like Illinois and Tennessee, and the entire rice industry reaches every state in the nation, especially those states with cereal makers, breweries, and other food-makers that use rice as a key ingredient.

On top of this, about half of America's rice crop is bound for export markets, helping to feed people around the globe while positively contributing to our nation's balance of trade.

Although the figures I just listed are as impressive as they are important, the benefits of rice are not limited to jobs and the economy.

Health-wise, rice is a source of more than 15 vitamins and minerals and 100% gluten-free, with only 100 calories per serving. Brown rice is 100% whole grain and may reduce the risk of heart disease and certain cancers.

What is more, studies suggest that those who eat rice have healthier diets than those who do not.

On the conservation front, America's rice farmers have a longstanding commitment to protect and preserve natural resources. Today, U.S. rice farmers produce more rice using less land, energy, and water than they did just 20 years ago. Our rice farms provide critical habitat for hundreds of species, particularly migratory birds.

America's rice farmers continue to serve as leaders in the farming community by pro-

ducing a healthy, conservation-friendly food that, as a byproduct, generates jobs and economic opportunity.

It is fitting that we honor the hard working American farmers, millers, merchants, suppliers and buyers, and the consumers who make rice not only such a wholesome and popular food but an important part of our economy.

I ask that my colleagues join with me in celebrating September as National Rice Month.

IN MEMORY OF RICHARD RAINWATER

HON. JOE WILSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 28, 2015

Mr. WILSON of South Carolina. Mr. Speaker, Richard Rainwater sadly passed away on Sunday, September 27, 2015, at his home in Fort Worth, Texas. The following obituary by Miguel Bustillo, Gregory Zuckerman and Rob Copeland was published in The Wall Street Journal on September 27, 2015. The citizens of South Carolina especially appreciate the Rainwater and Moore families for their phenomenal generosity promoting business education at the University of South Carolina.

Long before Wall Street was littered with swaggering hedge-fund billionaires, Richard Rainwater earned a Texas-size reputation as an investor with an eye on the big score.

He helped install Michael Eisner as Walt Disney Co. chief executive, steered George W. Bush to buy a stake in Major League Baseball's Texas Rangers and helped multiply the Bass family fortune one-hundred-fold before building a billion-dollar one of his own.

"My brother said, 'Don't be mediocre at anything; be remarkable at something,'" Mr. Rainwater recalled in 2010 in a speech at Stanford University.

Mr. Rainwater died on Sunday morning at his home in Fort Worth, Texas, according to the Rainwater Charitable Foundation and his family. He had been suffering from complications of a rare brain disease. He was 71 years old.

Born to a middle-class family, Mr. Rainwater parlayed a gift for mathematics and a gregarious personality into a more than \$2 billion fortune as a financial adviser and wheeler-dealer whose underlings went on to become chief executives, governors and hedge-fund tycoons.

"He was a laid back guy who liked to invest but he was not a fan of fancy dinners or some of the other things that went with it," his son, Todd, said on Sunday. "What he was best at is being a talent scout. He would find a troubled business, find the best person to run it, the Michael Jordan of that industry, and inevitably that person would turn the business around".

A native of Fort Worth, Mr. Rainwater attended the Stanford Graduate School of Business on scholarship, where he met Sid Bass, who hired him to serve as chief investment adviser for the Bass brothers, who were also from Fort Worth.

He began working in 1970 for the Bass family, which had inherited an oil fortune from Texas wildcatter Sid Williams Richardson, and helped them to dramatically increase their wealth over the next decade and a half through a dizzying succession of deals.

Perhaps the most famous deal was the Bass family's rescue of then-struggling Disney in
